

TWIN FALLS NEWS

VOLUME III

TWIN FALLS NEWS, TWIN FALLS, IDAHO, FRIDAY, NOVEMBER 16, 1906.

NUMBER 3

EFFECTIVE WORK DONE BY COMMERCIAL CLUBS

League Meeting in Twin Falls Productive of Splendid Results—Railroad Officials Will Cooperate in Effort to Relieve Coal Shortage—Many Questions of Interest to Shippers Are Taken Up—Convention Concluded with an Excellent Banquet to Delegates.

Delegates from commercial clubs representing cities in every section of southern Idaho attended the second convention of the League of Southern Idaho Commercial Clubs which met in Twin Falls yesterday. The convention was well attended and enthusiasm and earnestness characterized every stage of the proceedings. A number of important questions were taken up and a number of resolutions were referred to committees for further action. The sessions were held in the rooms of the Twin Falls Commercial club, which were comfortably fitted for the occasion.

M. J. Swallow of Twin Falls welcomed the delegates on behalf of the local club and Chairman Hamilton of the village trustees on behalf of the city. Suitable responses were made by E. M. Helgeson of Weiser for the league. In calling the convention to order President Steeves reviewed the work of the organization performed during the past year and summarized the more important matters now pending. He spoke of the coal displayed by the local clubs in the matter of co-operation and predicted that the movement undertaken by the league would result in vast benefit to the state.

Following the report of the secretary, which contained a detailed account of the work, the president appointed the following committees: Credentials—Max Mayfield, Boise; G. M. Hill, Twin Falls; F. H. B. Moulton, Weiser. Resolutions—W. N. Northrop, Boise; A. B. Moss, Payette; R. B. Goodwood, American Falls; A. R. Huddleston, Cambridge; R. J. Haynes, Pocatello.

This concluded the afternoon session. The evening session opened with the adoption of the report of the committee on credentials.

The report of the committee on resolutions, of which W. N. Northrop of Boise was chairman, provoked some animated discussion. The section of the report that caused the most discussion related to the coal situation in southern Idaho. The resolution gave the transportation committee of the league power to take the question up and secure, if possible, relief from the existing fuel famine. The resolution continuing said: "That an immediate arrangement be made whereby coal can not only be obtained to relieve present wants but that a regular supply for future needs shall be arranged for and that said committee are by his league empowered to thoroughly examine railroad freight rates on coal and if it shall be found that there are discriminating rates in effect that said committee take the whole matter before the Interstate Commerce commission." The delegates who discussed his question were unanimous in a desire to have the league act promptly and vigorously, the only question at issue being as to the means to be employed. Assistant General Freight Agent F. H. Plafied of the Short Line, who, with several other railroad representatives, was present, was called upon. He said that in his opinion the league was going about the matter in a very proper way and he assured the delegates of the hearty co-operation of the Short Line. So far as the present coal shortage was concerned, he said, the Short Line was making forth honorable efforts to relieve it. General Manager Bancroft

TOWN OF WALLACE FLOODED

Yesterday's Storm Did Much Damage in that City.

Twin Falls was not the only city in Idaho to feel the force of yesterday's storm. Boise was swept clean of dust and in every other city in the state there was more or less damage. A dispatch from Wallace says: "This city is entirely cut off from the outside world by the worst flood in the history of the town. All of the city bridges have been swept away and water is four feet deep on the streets. On the lower places people have been driven from their homes. Fully 200 persons have been forced to seek shelter elsewhere."

The rain which has been falling for the past few days was accompanied by a terrific windstorm Thursday morning. Trees were uprooted and considerable damage was done to small buildings. One huge cedar tree was broken and thrown through the roof of the Stonehamer dwelling house, demolishing the building.

No trains are moving between this city and Spokane or Missoula. Reports from the Great Northern branch of the Northern Pacific give news of several landslides which have completely blocked the main line. The Northern Pacific depot in this city, two feet in depth covers the floor."

LOCATION OF FILER DEPOT

Is Giving the Citizens of that Town Much Concern.

FILER, Nov. 13.—C. B. Channel of the Nibbler-Channel Lumber Co. and Mr. Weeter of the Weeter Lumber Co. visited Filer last Friday. M. E. Houck has bought the equity in a good piece of land southeast of town and is building on and otherwise improving the property.

S. B. Houck, our blacksmith, has taken a homestead northeast of town. Among those thrashing the last week were Lordin, Davis, Duquesne, Sommers, Angus and Cedarholm. Crops are threshing out very good. Mr. Craig and Mr. Dine were in Twin Falls Tuesday on business.

A load of coal came to town today but only two of our citizens were fortunate in getting any. Our people are all anxious about the location of the depot and our townsmen are trying to get together on location. Several new arrivals are reported whom your correspondent will report in the near future.

We have remarkably fine weather for this season of the year, but it is a little dumpy. Mr. Angus, our feed man, is buying all the grain offered and storing for future demand.

HIGH EFFICIENCY OF TWIN FALLS CANALS

Measurements by Elias Nelson of the Department of Irrigation Investigations Show that Losses Through Seepage Are Well Below the Average. In Measured Mile of Main Canal the Evaporation Amounted to but One-Ten-Thousand Part of the Inflow.

During the past season some seepage investigations were made by the writer on the Twin Falls tract under the direction of Dr. Elwood Mead of the United States department of agriculture. The following is a brief statement of the results:

The average loss on the main canal in June was 1.05 per cent per mile. In August, 1.36 per cent. At the last time the measurements were taken the flow of the water was being checked by manipulation of the gates at Dry creek and the end of the canal as a result of which the discharge of the canal was only 80 per cent of the calculated capacity for the particular depth of water flowing at that time. Hence if the velocity had not been checked one-fourth more water might have been carried by the canal for a considerable distance above the points at which the velocity had not been materially increasing the seepage.

In the low line canal the loss in June was as follows:

Per Cent.	Miles per Mile
1st section.....5.88	.96
2nd section.....6.49	.99
3rd section.....9.61	2.71
4th section.....10.24	4.91

In the high line the loss in July was:

Per Cent.	Miles per Mile
1st section.....12.68	1.13
2nd section.....16.94	.66
3rd section.....11.8	2.67

The loss in the laterals measured was from 1.31 to 3.5 per cent per mile. Some coulees showed a loss, others a gain. The greatest loss found was 5.22 per cent per mile. Ground waters having their source in irrigated fields and ditches on higher levels, moving as they do horizontally as well as downward, augment the coulees and laterals. In some cases such additions exceed the loss and the measurement therefore shows a gain. During the height of the irrigating season certain laterals showed a gain, none of which was visible inflow. While in August when the fields lying above them were not being irrigated there was no loss.

The chief loss in the canals and ditches is by the absorption of the soil, the loss by evaporation or by sinkholes, being relatively so small as to be well reckoned with. The seepage was found to be from 15 to 150 times as great as the evaporation. In one mile of the main canal the loss by seepage was but one ten-thousandth part of the inflow. The loss from one acre of water surface was .012 second feet, while the loss by seepage for one acre of wetted surface was 1.45 second feet.

By way of comparison it may be stated that the usual loss in ordinary soil in water irrigated sections will vary from .36 to .5 per cent per mile. In gravel the loss has been known to be even 17 per cent in one mile, while in some instances a canal having an other on a higher level above it has shown an actual gain.

ELIAS NELSON.

The results of Mr. Nelson's investigations and measurements are intensely interesting to the Twin Falls farmers. Mr. Nelson is an exceedingly careful student and his figures may be accepted without question. It is remarkable, considering the formation of the soil and the newness of the laterals, that there was not more loss of water. There is another reason why the ditch beds and banks do not silt. The Milner dam creates a very fine settling basin and the Dry creek reservoir another consequence of the water is turned into the canals without a trace of silt. This is a very important fact and for domestic purposes but it does not all the interest in the canal banks.

It should be borne in mind that water settling by the soil is not wasted. The figures presented by Mr. Nelson are very satisfactory and demonstrate thoroughly the efficiency of the Twin Falls canal system.

EDITORS ARE HEADING FOR THE SAGEBRUSH

Eastern Idaho Press Club Will Meet in Twin Falls on Monday—Will Be the Guests of the Commercial Club—Snake River Valley Journalists Will Be Given the Freedom of the City—Mystery Shrouds the Preparations for Their Entertainment—Shortage of Food is Hinted.

The members of the Eastern Idaho Press Club are on the trail for Twin Falls. Those of the editors who managed to make their peace with General Passenger Agent Burley of the Short Line will ride to the Magic City in first class coaches; those who did not will walk, but they will get here just the same. At the last accounts Brother Picotte of the Wood River Times lacked only 30 cents of the amount necessary to pay his fare and he had hopes of making a touch when Fred Reed arrived in Halley. Brother Wright the tall avocet of Bear Lake county, would have walked to Twin Falls as he has a wide of over six feet, but consideration for his wife prompted him to secure transportation. Joe De Witt of Soda Springs was dispirited at the prospect of the last but not the least from the first water city and had every prospect of being able to make the raise. "Pop" Wheeler, the dean of the bunch and the president of the association, has been chopping kindling wood for days and the latest dispatch from Idaho Falls stated that he had enough piled up to last the family until his return, which, he figured, would be on Tuesday night. Mr. Wheeler was a trifle skittish about coming to Twin Falls. He thought the town was too queer for him and when he heard that the trustees had reduced the license from \$2000 to \$1000 a year as a compliment to the city he was too queer for him and he wanted to see the lousy young city as he dug up the necessary and decided to desecrate the Sabbath by taking the train.

Charlie Sumner of the Idaho Falls Post is reported to be in a feeble condition, the result of a strenuous political campaign. According to Harry Gable's statistics—Charlie wrote 4,745 words of political editorial during the campaign and his fingers are worn from the type. However, his intellect is unimpaired and he will shine as Twin Falls as expected. Brother Strong of St. Anthony, who is billed to do the high dive from the crest of Shoshone falls, is preparing to hole up for the winter but will come out of his burrow long enough to attend the meeting. Wood Parker will also come. He can hold his own in a fight and to be distinctly understood that he is not to be fished for wearing ear muffs. Brother Christie of Boise is endeavoring to secure distance rates. He weighs 246 pounds and his address on the sugar beet industry exceeds the baggage limit of 550 pounds. Still he is willing to pay excess baggage if he can enlighten the farmers on the beet question and the Twin Falls Commercial club will reimburse him. Gus Wallin of the Pocatello Tribune is hard at work on an invention for rocking the baby cradle by means of the power generated from one of Jim Brady's eight candle power lamps. He has the contrivance all but completed but he wants to have it in shape to present to Charlie Diehl, who will be the first to try it. Bush Armstrong of the Tri-Valley has finished his epic on "Blow, Ye Winds, Blow," which he will recite at the banquet if climatic conditions permit. He will also present the scenic play in which the hero, a citizen of Burley, was blown across the river just as he was about to cast his vote on election day and claimed the right of franchise because of providential interference. Carl Hahn, it is understood, will back Bush in putting on the play, and Fred Adams will assume the title-role. Bird Trego has been borrowing coal oil from his neighbors for weeks and sitting up all night working on his monologue on the Snake River valley. He will demonstrate that this is the greatest country on earth and the Twin Falls real estate dealers will advance the price of all property on the strength of it. Eyed will have something to say to the farmers which will set them to thinking and his dissertation will be one of the plums on the journey.

Brother Hogg of Bear Lake was soon buying a new collar last week and the postmaster at Paris ascertained that Walter Inquired of him the distance to Twin Falls. This is taken as an indication that he will be here. Brother Talbot ordered a supply of dog biscuit for his pet, "Satan," and engaged room in French Fork. He is safe to assume that he will answer the roll call. Brothers Peck and Hanson of Malad are trying to assemble some currency to pay for two half acre tracts and if they succeed in running a "sandy" on the coulees and passing themselves off as under age they too will reach here on Sunday. And there are others.

It is understood that inasmuch as four of Fraser's pointer pups have recently died Jimmy Cameron will cut sausage from the banquet bill of fare. Frank Eastman has a corps of deer hunters scouring the forest reserve for venison and Charlie Diehl has Harry Barker's promise of a ham on trust. Huber Benson has agreed to furnish the crackers and cheese, provided Jim Burnett does not come to town in the meantime, and there is a fair chance of a foot of Fraser's banking on a "mulligan" and Walt Cruven has partially promised to kill a fat pig if the worst comes to the worst.

The boys will arrive on Sunday and from the moment the train stops until the last dog is hung they will be at the mercy of the town. The wives of the members will be entertained by the ladies of Twin Falls. They will be fed on lemon ices, angel's food and chrysanthemums.

The gentlemen (they are all gentlemen) will make the Commercial club their headquarters, closing the doors and transoms when they do their deep thinking stunts. "Big Bill," the famous court jester, has been provided with a badge and will represent Blue Lakes. It has been moved and seconded that the men be suspended and the city of Twin Falls turned over to the boosters and lib. They have all printed many kindly paragraphs about Twin Falls and they will be given by the Commercial club that their kindness has been appreciated. Make way for the editors. They are welcome.

ELDRIDGE'S

DEATH CLAIMS EDITH COSTELLO

POPULAR YOUNG LADY SUC-
CUMBS TO TYPHOID.

Stricken Simultaneously with Her
Three Younger Brothers, all of
Whom Will Recover—Sincere Sym-
pathy for Bereaved Parents.

The heartfelt sympathy of the peo-
ple of Twin Falls is extended to Mr.
and Mrs. John Costello, who mourn
the loss of their only daughter, Miss
Edith, who died of typhoid fever last
Friday night. Miss Costello recently
arrived with her parents from Marion,
Ill. She was in perfect health until
stricken with fever and was the life
of a constantly increasing circle of
friends. Her demise was rendered all
the more pathetic by reason of the fact
that her three younger brothers were
taken sick at the same time and are
all unaware of the death of their be-
loved sister, for whom they constantly
inquire. When the children were
taken ill Mr. Costello moved from his
ranch to the home of his brother, P. J.
Costello, in Twin Falls, the latter tak-
ing quarters for his family in the Ho-
tel Perrine. Tender and skilled nurs-
ing and the best of medical attention
were unavailing in Miss Costello's
case, in which the entire community
seemed to take a personal interest.
The younger son's life was despaired
of for a time but he has rallied and his
recovery is now confidently expected.
The funeral services were held in the
Christian church of Monday after-
noon, Rev. O. B. Evans officiating. The
building was thronged with mourners
who by kindly words and actions
sought to lessen the grief of the pa-
rents and relatives. Miss Costello,
who had barely reached her majority,
was a young woman of rare accom-
plishments and possessed a disposi-
tion so kindly and lovable that she
quickly endeared herself to all whom
she met. Her death is a distinct loss
to society and the public heart beats
strongly in sympathy with those to
whom she was near and dear.

TO INVESTIGATE COAL CASES Action Taken in Salt Lake by Federal Grand Jury.

Subpoenas were being served by
United States deputy marshals yester-
day which lead to the belief that the
federal grand jury is about to take
cognizance of coal cases.

Every grand jury and every official
connected with the court is preserving
the utmost secrecy. Not an intimation
on the subject would be let them drop
yesterday, but the identity of the
men being served with subpoenas
lent color to the belief that the coal
cases are to be investigated.

It is the expectation of some of the
cases which will be taken up will be
that of D. J. Sharp, who testified be-
fore Interstate Commerce Commis-
sioner Charles A. Prouty at the recent
Salt Lake hearing that he was driven
out of business. He testified that af-
ter he had announced a cut in Salt
Lake retail prices, he was notified by
the Union Pacific Coal company that
no more coal would be sold to him,
and he was cut off from a supply by all
the coal mining companies in this
territory. At the time of the hearing
it was intimated that prosecution
under the federal anti-trust law might
be started.

Testimony before Judge Prouty
also brought out many facts in con-
nection with the difficulties encoun-
tered by independent coal operators
and with the methods employed by the
Union Pacific Coal company to acquire
land. Charges of fraud by the use
of "dummies" were made.

Many allegations of conspiracy and
fraud are made in the civil suits filed
by the government against the Utah
Fuel company and the Pleasant Valley
Coal company. It is thought possible
that the grand jury may take cogni-
zance of these and investigate their
criminal aspects.

The grand jury was sworn in before
Judge John A. Marshall yesterday
morning. After the court had delivered
the charge the body of inquisitors re-
fused and began its deliberations. Spec-
ter Clawson was elected foreman—

RANGE CATTLE TO BE HEADED OFF

STOCKMEN WILL NOT ALLOW
THEM ON TRACT.

Camp Will Be Established on High
Line Canal at Cedar Draw—Farm-
ers Requested to Notify This Camp
When Bordered by Range Stock.

Andrew J. Harrell, the well known
stockman, and Charles Huggitt, su-
perintendent of the Harrell ranches in
Idaho and Nevada, were at Twin
Falls on Monday, having driven over
from the Shoshone ranch at Rock
Creek. Mr. Harrell said his cattle
were in good condition for the winter,
which, he believed, would be mild. He
further stated that it was his inten-
tion to keep his stock from straying
on the Twin Falls tract during the
winter.

"A large number of our cattle were
shot last winter by Twin Falls farm-
ers," said Mr. Harrell. "The severe
weather drove the cattle down to
their old range and they invaded the
unfenced fields of the farmers. We
did our best to round up the animals
but we could not get them all. This
is our old winter range and the
cattle naturally turn to it in stormy
weather. I do not wish to see any
farmer on the tract injured by our
stock and I would appreciate co-opera-
tion on the part of every farmer. We
will establish a camp where the high
line canal crosses Cedar draw and if
any stray cattle cross the canal they
will be taken up immediately if the
camp is notified. If the canal were
fenced from end to end it would be a
great benefit to all concerned. The
Twin Falls tract is bound to benefit
from the cattle business and we wish
to cultivate friendly relations with the
farmers. All they need do is to com-
municate with our camp and the
stock will be looked after. This ap-
plies to all range stock, regardless of
brand."

The farmers on the west end of the
tract will doubtless be glad to learn
that steps have been taken to prevent
the encroachment of range stock. They
did not understand the situation last
winter and some of them took drastic
measures to protect their fields. Most of
the farmers were unable to procure
fence posts and many of them used
rifles. Now that they are informed as
to conditions it is believed they will
co-operate with the stockmen and
prevent friction. The camp at Cedar
draw will be central and men will be
stationed there until spring to look
after the stock. It is a very difficult
matter to keep cattle away from an
old range. In stormy weather they
drift down toward the Snake river,
and especially when they break up
into small bands it is a most impos-
sible to head them off. Most of the
range cattle come down Cedar draw
from Goat springs and Warm creek
and the cattle can easily be checked. An-
other favorite route is down Mud
springs creek on the west end of the
tract and this runway will also be
closely watched.

Notice to Contractors.

Sealed proposals will be received by
the chairman and board of trustees
of the village of Twin Falls, Idaho,
until 3:00 o'clock p. m., November 17,
1906, for the construction of a trunk
and outlet sewer system in and for
said village, to be used in connection
with the plans and specifications on
file in the office of the village engi-
neer. All bids must be sealed and ad-
dressed to the village clerk. The approximate quantities of
work to be done are as follows:
6722 linear feet of trench excavation
from 0 to 6 feet deep.
5712 linear feet of trench excavation
from 6 to 8 feet deep.
3260 linear feet of trench excavation
from 8 to 10 feet deep.
1055 linear feet of trench excavation
from 10 to 12 feet deep.
1800 cubic yards solid rock excava-
tion.
2655 linear feet 6-inch vit. sewer
pipe in place.
2705 linear feet 8-inch vit. sewer
pipe in place.
1000 linear feet 10-inch vit. sewer
pipe in place.
1087 linear feet 12-inch vit. sewer
pipe in place.
4292 linear feet 15-inch vit. sewer
pipe in place.
4685 linear feet 18-inch vit. sewer
pipe in place.
150 feet cast iron pipe.
55 manholes.
14 lamppoles.

Each proposal must be accompanied
by a certified check for 10 per cent
of amount bid, made payable to the
village clerk of Twin Falls. Success-
ful bidder will be required to furnish
bond for the faithful performance of
the contract.
Copies of the specifications, forms
of proposal, contracts, etc., may be
obtained from the village clerk.
The board of trustees reserves the
right to reject any and all bids.
In order to give contractors more
time in which to figure on construction
of sewer work, proposals will be re-
ceived and bids will not be opened un-
til 8 p. m. on Saturday, November 24.
By order of the board of trustees of
the village of Twin Falls, Idaho,
IRVING R. DARRON,
Clerk.

Chips of the Old Blade.
He rejoined in the not very humor-
ous name of Wood, and he prided
himself on his jokes, and smart rep-
artee. Few of his friends had escaped
the lash of his tongue, and he had vic-
timized many by his practical jokes.
In fact, he never lost an opportunity
of being funny. One day he met a
friend whose name was Stone, and na-
turally a man like that was too good
a chance to miss.
"Good morning," Mr. Stone," he said,
"and how is Mrs. Stone and all the
family?"
"Oh, quite well, Mr. Wood," was the
reply. "How is Mrs. Wood and all the
little spithees?"

Sole Agents for Water Rights for all Carey Act
Lands under the

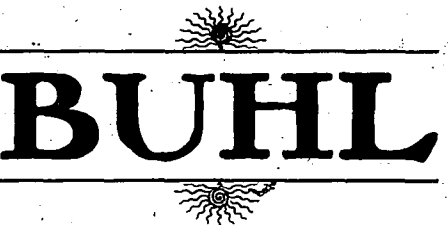

GREAT TWIN FALLS CANAL SYSTEM

45,000 Acres of
Carey Act Land

Still open for original entry under this Canal
System

Land, 50 cents per acre. Perpetual water rights, \$25 per acre, ten
annual payments.

Vehicles from Buhl furnished free to those who desire to inspect
land. Prospective entrymen accompanied by competent locators.

Buhl, located 17 miles west of the city of Twin Falls, will be the
leading city on the west end of the tract and the distributing point for
a large area, including the stock districts of Three Creek, Butte and
Roseworth, likewise the farming and fruit growing districts of Hager-
man, Kanoka Flat and Salmon. The contract for the railway exten-
sion from Twin Falls to Buhl has been let and the rails will reach
the new town in December. Buhl will have waterworks, electric light
and electric power before the close of the year. Business property
values in Twin Falls have increased 500 per cent in less than two
years. The same opportunities for investment are presented at Buhl.
Now is the time to buy. Write for literature and further information.

The Studebaker Wagon stands for the qualities that make wagons desirable.
Light-running and easy on the team, durable because the lumber is sea-
soned right before being finished. Made to stand up under heavy loads.

THE STUDEBAKER WAGON

Is built from first-class material down to the minutest detail. The slow
growing, fine-grained, tough-fibered black birch from the rocky hills of New
England is used in the hubs, select white oak is made into spokes and fel-
lows and choice second growth, but cut hickory is used for the axles.
Every other part as carefully selected. The skains, tough and hard, are
forced into place on the axles under 100 tons pressure. Studebaker spoke
shoulder spokes are driven into the hub under the same tremendous pres-
sure. Best and toughest iron-and-steel strongly-reinforced every part
where needed. The Studebaker is

The Unapproachable Wagon

and we sell it because the name is the best guarantee we can give of its ex-
cellence. We keep them in stock, and if we haven't the kind you want, it
is or style, we can get one for you in the shortest possible time.

We shall be glad to talk wagon to you and if you will come in, we will
give you some interesting reading matter about wagons.

G. O. Melgs, Twin Falls, Idaho.

CURRENT WORLD.

D. M. Belmes, the noted San Francisco attorney, has been retained to defend Harry K. Thaw.

Dr. Minot J. Savage, the eminent New York clergyman, has been placed in a private sanatorium on account of the unsettled condition of his health.

It is stated by the San Francisco press that Secretary Blount is of the opinion that Japanese children can not be excluded from American schools.

President E. H. Ripley of the Santa Fe is authority for the statement that there will be an increase in wages on all transcontinental roads this autumn.

Major General William R. Shafter, U. S. A., retired, died on Monday at the ranch of his son-in-law, Captain W. H. Murrick, 30 miles from Bakersfield.

J. T. Harkness, who succeeded Stuyvesant Fish as president of the Illinois Central railway, has assumed control of the system. His election was due to the influence of E. H. Harriman, who controls the system.

Armed vandals held up the West-bound Overland Limited at Carlin, Nevada, on Sunday night and escaped with a large sum of money. The money sack of Conductor Conn. They secured about \$1000. A posse was formed and a pitched battle took place at the edge of the town, about 100 shots being fired. Nobody was injured. Southern Pacific detectives and deputy sheriffs are hot on the trail of the robbers.

Forty-seven passengers were killed outright and as many more were injured in a collision between an immigrant train and a freight train on the Baltimore & Ohio railroad near Woodville, Indiana, on Monday last. The number of all the dead will never be known as the bodies were consumed in the fire which followed the wreck. Most of the immigrants came from Russia and were bound for the west.

According to the report of the executive council of the American Federation of Labor, which was submitted at the convention of that organization in Minneapolis on Tuesday, the federation expended \$7,834 for campaign purposes. It was announced that the federation does not contemplate the formation of a distinct political party nor to dictate the party membership of union men, but it will take measures to secure the election of men favorable to labor interests.

Mrs. Russell Sage will give away the bulk of the fortune of about \$80,000,000 bequeathed to her by her husband to individuals whom she considers worthy, who through no fault of their own are so unfortunate as to be blind and deaf and too proud to ask. It will not be given to needy churches nor to those who might write begging letters. Mrs. Sage said she would do all she can, however, for struggling churches and institutions devoted to the care of the needy and sick.

Secretary of the Interior Allen Hefschcock will retire from President Roosevelt's cabinet on the 4th of next March and James R. Garfield of Ohio, at present commissioner of corporations, will succeed him. Herbert Knox Smith, now assistant commissioner of corporations, will be appointed to Mr. Garfield's place. These changes, and that of the retirement of Mr. Richard of the general land office, on March 4, have been announced in a statement from the White house today.

On account of crime and disorders in that city a vigilance committee has been organized in Pittsburg. Several murders have been committed, women have been assaulted and hold-up men and burglars have terrorized the city. At a meeting of the East End board of trade a resolution was passed warning citizens to arm themselves, recommending the purchase of several bloodhounds which will be presented to the vigilance committee. Newspapers are offering rewards of \$1000 for the apprehension of murderers.

Thomas Daugherty of Danmore, Pa., was killed by being pierced in the heart by a long needle which was caught in the bosom of Katie Burke, his sweetheart, whom he embraced. Miss Burke had used the needle to repair her brother's clothing and stuck it in the bosom of her dress. When Daugherty embraced her the point of the needle caught in his vest while the blunt end rested against her corset. In the embrace the needle was forced into Daugherty's body, through the fifth rib and into the cavity between the pericardium and the heart. Hemorrhages resulted that caused death.

At the national congress on uniform divorce laws which met in Philadelphia this week, a bill was drafted for presentation to the legislatures of all states for the purpose of securing uniformity. The bill names six crimes for which divorces may be granted—intemperance, felony, bigamy, desertion, habitual drunkenness and intolerable cruelty. Insanity will also be included. The legislatures will be asked to agree on a period of residence before application may be made for divorce. The following constitute the grounds warranting annulment of a marriage contract: Consanguinity, impotency, fraud, force or coercion, an existing former marriage, insanity and illegal age.

"Silver is going to reach a price of 76 or better within two years, and it is going to hold the price," said George W. Roberts, director of the United States mints, in an interview in Denver. "I believe that hundreds of silver mines throughout the west which have been shut down for more than 10 years because of the fall in price will be opening again within a year, simply because the price of the metal makes it worth while." Mr. Roberts continued, "And, further, let me state, this is no speculative or boom market. The price of silver today will be better next month, and it will steadily and naturally advance a point at a time until a high mark, possibly 80 cents, will be touched."

In a duel over a poker game James Van Cramer was shot and killed by James McKelock at Burns, Oregon.

On her third trial the crusader California managed to work up sufficient speed to meet naval requirements and is now ready for acceptance.

Mount Vesuvius is grumbling again. The disturbance is said to be due to water from recent heavy rains having reached the fire zone inside the crater.

Herbert Bradley, a wealthy flour exporter, was gored to death by a pot buck deer on his game preserve at Montclair, N. J. Mr. Bradley was informed that poachers were shooting on his preserve and while making a tour of inspection he was attacked by the buck.

Public attention in France has again been drawn to the peril involved in the constantly diminishing birth rate as shown by the vital statistics for 1905 which have just been made public. They show a decrease in births of 10,376, the total for the year being 809,292. There was no reduction in the number of marriages.

Max Crawford, electrician, Albert Bloom, carpenter, A. P. Latta, pipe fitter, Paul Lancioni, Giovanni Lancioni and Julius Weeder, laborers, were instantly killed, and two other workmen were fatally injured by the explosion of a boiler in a power house of the Lake Shore & Michigan Southern Railroad in Cuyahoga, a suburb of Cleveland, on Monday.

In a football game between the Great Falls team and the Port-Haw Indians at Great Falls last Sunday, James C. Curtis of Syracuse, N. Y., one of the Great Falls players, was butted in the abdomen by one of the Indians and sustained injuries which resulted in his death a few minutes later. The game, which was won by the Indians, is said to have been fierce but the Indians are credited with having played fair.

At a banquet given by the Merchants' club of Chicago last Saturday night, James H. Hill urged more elastic commercial relations with Canada. He cited figures showing that the trade with the people whom the United States want to trade is reached by the construction of the Panama canal amounts to only about \$54,500,000, while the United States trade with Canada is over \$200,000,000 per annum.

The most gigantic theatrical combination in the world is in process of formation at Chicago. It will include 325 of the most important theaters in the United States and will dictate the booking of all the big companies. Among the interests to be consolidated are Klaw & Erlanger, Daniel Frohman, Charles Frohman, Al Hayman, Nixon & Zimmerman, Rich & Harris and the Shubert brothers. The total stock will be between \$50,000,000 and \$100,000,000.

STATE NEWS.

Nampa is to have a new theater with a seating capacity of 850.

Work has been commenced on the enlargement of the power plant at Swan Falls.

Rapid progress is being made on the Boise & Inturban railway. It is expected that the road will be completed to Caldwell by February 1.

The Pacific & Idaho Northern railway is now completed to Evergreen station, 17 miles north of Council, which has been made a shipping point.

Boston capitalists have applied for a franchise to operate an electric car system in the town of Everett and the project has been favorably considered by the council.

Joseph H. Peterson, formerly private secretary to Governor C. E. Dillingham, Washington, a previous attempt of this kind was blocked by the Oregon Short Line, which refused to haul Northern Pacific cars. It is claimed that under the new rate law the Short Line will be compelled to accept the cars.

Boise dealers are endeavoring to secure coal from Ellensburg, Col., Blum, Washington. A previous attempt of this kind was blocked by the Oregon Short Line, which refused to haul Northern Pacific cars. It is claimed that under the new rate law the Short Line will be compelled to accept the cars.

Senator La Follette of Wisconsin addressed a large audience in Boise on Tuesday evening. He said that less than 100 men controlled the industrial and commercial systems of the country and that eight men controlled eight billions of the 13 billions of railroad capital. The trusts were said the senator, a menace to the life of the nation. Senator La Follette's address made a profound impression on his audience. He was given a hearty reception by former citizens of Wisconsin.

Governor Gooding has announced that the state land board is in position to make some farm loans, there being about \$100,000 in the state treasury that may be used for that purpose. "Applicants have been coming in so regularly from school districts for money loans on school bonds," he said, "that it has kept the land board busily engaged in the purchase of those bonds. At present we have cleaned up all applications from school districts and can now accept applications for farm loans."

Notice for Bids.

Notice is hereby given that school bonds of School District No. 32, Cassia county, Idaho, in the sum of \$2,000, due in five years, are offered for sale to the lowest and best bidder. Bids to be opened at 2 p. m., November 24, 1906. The board reserves the right to reject any or all bids. Send bids to MARTIN STUBBINS, Clerk District No. 32, Kimberly, Idaho.

DEATH CLAIMS EDITH COSTELLO

POPULAR YOUNG LADY SUC-
CUMBS TO TYPHOID.

Stricken Simultaneously with Her Three Younger Brothers, all of Whom Will Recover—Sincere Sympathy for Bereaved Parents.

The heartfelt sympathy of the people of Twin Falls is extended to Mr. and Mrs. John Costello, who mourn the loss of their only daughter, Miss Edith, who died of typhoid fever last Friday night. Miss Costello recently arrived with her parents from Maroa, Ill. She was in perfect health until stricken with fever and was the life of a constantly increasing circle of friends. Her demise was rendered all the more pathetic by reason of the fact that her three younger brothers were taken sick at the same time and are still unaware of the death of their beloved sister. When the children were taken ill Mr. Costello moved from his ranch to the home of his brother, P. J. Costello, in Twin Falls, the latter taking quarters for his family in the Hotel Perrine. Tender and skilled nursing and the best of medical attention were unavailing in Miss Costello's case, in which the entire community seemed to take a personal interest. The younger son's life was despaired of for a time but he has rallied and his recovery is now confidently expected. The funeral services were held in the Christian church of Monday afternoon, Nov. 12. Rev. C. E. Evans officiating. The building was thronged with mourners who by kindly words and actions sought to lessen the grief of the parents and relatives. Miss Costello, who had barely reached her majority, was a young woman of rare accomplishments and possessed a disposition so kindly and lovable that she quickly endeared herself to all whom she met. Her death is a distinct loss to society and the public heart beats strongly in sympathy with those to whom she was near and dear.

TO INVESTIGATE COAL CASES Action Taken in Salt Lake by Federal Grand Jury.

Subpoenas were being served by United States deputy marshals yesterday which lead to the belief that the federal grand jury is about to take cognizance of coal cases.

Every grand jury and every official connected with the court is preserving the utmost secrecy. Not an intimation on the subject would one of them drop yesterday, but the identity of some of the men being served with subpoenas lent color to the belief that the coal cases are to be investigated in this territory.

It is the expectation that one of the cases which will be taken up will be that of D. J. Sharp, who testified before Interstate Commerce Commissioner Charles A. Prouty at the recent Salt Lake hearing that he was driven out of business. He testified that after he had announced a cut in Salt Lake retail prices, he was notified by the Union Pacific Coal company that no more coal would be sold to him, and he was cut off from a supply by all the coal mines in operation in this territory. At the time of the hearing it was intimated that prosecution under the federal anti-trust law might be started.

The testimony before Judge Prouty also brought out many facts in connection with the difficulties encountered by independent coal operators and with the methods employed by the Union Pacific Coal company to acquire land. Charges of fraud by the use of "dummy" were made.

Many allegations of conspiracy and fraud are made in the civil suits filed by the government against the Utah coal company and the Pleasant Valley Coal company. It is thought possible that the grand jury may take cognizance of these and investigate their criminal aspects.

The grand jury was sworn in before Judge John A. Marshall yesterday morning. After the court had delivered the charge the body of inquirers retired and began its deliberations. Spencer Clawson was elected foreman. Salt Lake Herald.

RANGE CATTLE TO BE HEADED OFF

STOCKMEN WILL NOT ALLOW
THEM ON TRACT.

Camp Will Be Established on High Line Canal at Cedar Draw—Farmers Requested to Notify This Camp When Battered by Range Stock.

Andrew J. Harrell, the well-known stockman, and Charles Hughtit, superintendent of the Harrell ranches in Idaho and Nevada, were in Twin Falls on Monday, having driven over from the Shoshone ranch at Rock Creek. Mr. Harrell said his cattle were in good condition for the winter, which, he believed, would be mild. He further stated that it was his intention to keep his stock from straying on the Twin Falls tract during the winter.

"A large number of our cattle were shot last winter by Twin Falls farmers," said Mr. Harrell. "The severe weather drove the cattle down to their old range and they invaded the unfenced fields of the farmers. We did our best to round up the animals but we could not get them all in time. This is our own winter range and the cattle naturally turn to it in stormy weather. I do not wish to see any farmer on the tract injured by our stock and I would appreciate co-operation on the part of the farmer. We will establish a camp where the high line canal crosses Cedar draw and if any stray cattle cross the canal they will be headed off immediately if the camp is notified. If the canal were fenced from end to end it would be a great benefit to all concerned. The Twin Falls tract is bound to benefit from the winter business and we wish to cultivate friendly relations with the farmers. All they need do is to communicate with our camp and the stock will be looked after. This applies to all range stock, regardless of brands."

The farmers on the west end of the tract will doubtless be glad to learn that steps have been taken to prevent the encroachment of range stock. They did not understand the situation last winter and some of the stockmen made it their business to protect their fields. Most of the farmers were unable to procure fence posts and many of them used fence rails and some of the stockmen to conditions it is believed they will co-operate with the stockmen and prevent friction. The camp at Cedar draw will be central and men will be stationed there until spring to look after the stock. It is a very difficult matter to want cattle away from an old range. In stormy weather they drift down toward the Snake river and especially when they break up into small bands it is almost impossible to head them off. Most of the range cattle come down Cedar draw from Goat springs and Warm creek and these can easily be checked. Another favorite route is down Mud springs creek on the west end of the tract and this highway will also be closely watched.

Notice to Contractors.
Sealed proposals will be received by the chairman and board of trustees of the village of Twin Falls, Idaho, until 8:00 o'clock p. m., November 17, 1906, for the construction of a trunk and outlet sewer system in and around village, to be paid for in cash in accordance with the plans and specifications on file in the office of the village engineer. Bids must be sealed and addressed to the village clerk. The approximate quantities of work to be done are as follows:

6772 linear feet of trench excavation from 2 to 6 feet deep.
6712 linear feet of trench excavation from 6 to 8 feet deep.
3260 linear feet of trench excavation from 8 to 10 feet deep.
656 linear feet of trench excavation from 10 to 12 feet deep.
1800 cubic yards solid rock excavation.
2565 linear feet 6-inch vit. sewer pipe in place.
2705 linear feet 8-inch vit. sewer pipe in place.
1000 linear feet 10-inch vit. sewer pipe in place.
1087 linear feet 12-inch vit. sewer pipe in place.
422 linear feet 15-inch vit. sewer pipe in place.
4685 linear feet 18-inch vit. sewer pipe in place.
150 feet cast iron pipe.
55 manholes.
14 lampholes.

Each proposal must be accompanied by a certified check for 10 per cent of amount bid, made payable to the village clerk of Twin Falls. Successful bidder will be required to furnish bond for the faithful performance of the contract.

Copies of the specifications, forms of proposal, contracts, etc., may be obtained from the village clerk. The board of trustees reserves the right to reject any and all bids.

In order to give contractors more time in which to figure out construction of sewer work, proposals will be received until 8:00 p. m., on Saturday, November 24. By order of the board of trustees of the village of Twin Falls, Idaho.

IRVING R. DARRRY, Clerk.

Chefs of the Old Blaine.
He rejoiced in the not very humorous name of Wood, and he brided himself on his jokes and smart repartee. Few of his friends had escaped the lash of his tongue, and he had victimized many by his practical jokes. In fact, he never lost an opportunity of being funny. One day he met a friend whose name was Stone, and naturally a man like that was too good in a chance to miss.

"Good morning," Mr. Stone," he said, "and how is Mrs. Stone and all the little pebbles?"

"Oh, Mr. Wood," he said, "the reply, 'How is Mrs. Wood and all the little splitters?'"

ABOVE EVERYTHING ELSE
The Studebaker Wagon stands for the qualities that make wagons desirable. Light-running and easy on the team, durable because the lumber is seasoned right before being finished. Made to stand up under heavy loads.

THE STUDEBAKER WAGON

Is built from first-class material down to the minutest detail. The slow growing, fine-grained, tough-fibered black birch from the rocky hills of New England is used in the hubs, select white oak is made into spokes and felloes and choice second growth, butt cut hickory is used for the axles. Every other part as carefully selected. The skains, tough and hard, are forced into place on the axles under 100 tons pressure. Studebaker slaps shoulder spokes are driven into the hub under the same tremendous pressure. Best and toughest iron and steel strongly reinforced every part where needed. The Studebaker is

The Unapproachable Wagon

and we sell it because the name is the best guarantee we can give of its excellence. We keep them in stock, and if we haven't the kind you want, in size or style, we can get one for you in the shortest possible time. We shall be glad to talk wagon to you and if you will come in we will give you some interesting reading matter about wagons.

CURRENT WORLD.

D. M. Delmas, the noted San Francisco attorney, has been retained to defend Harry K. Thaw.

Dr. Minor J. Savage, the eminent New York clergyman, has been placed in a private sanitarium on account of the unsatisfactory condition of his health.

It is stated by the San Francisco press that Secretary-Metcalf is of the opinion that Japanese children cannot be excluded from American schools.

President E. H. Ripley of the Santa Fe is authority for the statement that there will be an increase in wages on all transcontinental roads this autumn.

Major General William K. Shafter, U. S. army, died on Monday at the ranch of his son-in-law, Captain W. H. McKittick, 20 miles from Bakerfield.

J. T. Harahan, who succeeded Stuyvesant Fish as president of the Illinois Central railway, has assumed control of the system. His election was due to the influence of E. H. Harriman, who controls the system.

Armed vandals held up the west-bound Overland Limited at Carlin, Nev., on Sunday night and escaped with the suit cases of passengers and the money sack of Conductor Conn. They secured about \$1000. A posse was formed and a pitched battle took place at the edge of the town, about 100 shots being fired. Nobody was injured. Southern Pacific detectives and deputy sheriffs are hot on the trail of the robbers.

Forty-seven passengers were killed outright and as many more were injured in a collision between an immigrant train and a freight train on the Baltimore & Ohio railroad near Woodville, Indiana, on Monday last. The names of all the dead will never be known as the bodies were consumed in the fire which followed the wreck. Most of the immigrants came from Russia and were bound for the west.

According to the report of the executive council of the American Federation of Labor, which was submitted at the convention of the organization in Minneapolis on Tuesday, the federation expended \$7,834 for campaign purposes. It was announced that the federation does not contemplate the formation of a distinct political party nor to dictate the party membership of union men, but it will take measures to secure the election of men favorable to labor interests.

Mrs. Russell Sage will give away the bulk of the fortune of about \$50,000 bequeathed to her by her late husband to individuals whom she considers worthy, who, through no fault of their own, are so unfortunate as to need assistance, and too proud to ask. It will not be given to endow churches, nor to those who might write begging letters. Mrs. Sage said she would do all she can, however, for struggling churches and institutions devoted to the care of the needy and sick.

Secretary of the Interior Allen Hitchcock will retire from President Roosevelt's cabinet on the 4th of next March and James R. Garfield of Ohio, at present commissioner of corporations, will succeed him. Herbert Knox Smith, now assistant commissioner of corporations, will be appointed to Mr. Garfield's place. These changes, and that of the retirement of Mr. Richards of the general land office, on March 4, have been announced in a statement from the White house today.

On account of crime and disorders in that city a vigilance committee has been organized in Pittsburgh. Several murders have been committed, women have been assaulted and hold-up men and burglars have terrorized the city. At a meeting of the East End board of trade, a resolution was passed warning citizens to arm themselves, recommending the purchase of several bloodhounds which will be presented to the vigilance committee. Newspapers are offering rewards of \$1000 for the apprehension of murderers.

Thomas Daugherty of Dunsmore, Pa., was killed by being placed in the heart by a long needle which was caught in the bosom of Katie Burke, his sweetheart, whom he embraced. Burke had used the needle to repair her brother's clothing and stuck it in the bosom of her dress. When Daugherty embraced her, the point of the needle caught in his vest while the blunt end rested against her corset. In the embrace the needle was thrust into Daugherty's body, through the fifth rib and into the cavity between the pericardium and the heart. Hemorrhages resulted that caused death.

At the National congress on uniform divorce laws, which is in Philadelphia this week, a bill was drafted for presentation to the legislatures of all states for the purpose of securing uniformity. The bill names six causes for divorce: may be granted: infidelity, felony, bigamy, desertion, habitual drunkenness and intolerable cruelty. Insanity will also be included. The legislatures will be asked to agree on a period of residence before application may be made for divorce. The following causes are given as warranting annulment of marriage contract: Consanguinity, impotency, fraud, force or coercion, an existing former marriage, insanity and illegal age.

"Silver is going to reach a price of 76 or better within two years, and it is going to hold that price," said George W. Roberts, one of the United States mints. In an interview in Denver. "I believe that hundreds of silver mines throughout the west which have been shut down for more than 10 years because of the fall in price will be opening again within a year, simply because the price of the metal makes it worth while," Mr. Roberts continued. "Any further let me state, this is no speculative or boom-market. The price of 71 cents today will be better next month, and it will steadily and surely advance a point at a time until a high mark, possibly 80 cents, will be touched."

In a duel over a poker game James Van Crenshaw was shot and killed by James McClellan at Burns, Oregon.

On her third trial the cruiser California managed to work up sufficient speed to meet her opponents and is now ready for acceptance.

Mount Vesuvius is grumbling again. This disturbance is said to be due to water from recent heavy rains having reached the fire zone inside the crater.

Herbert Bradley, a wealthy deer exporter, was gored to death by a pot buck deer on his game preserve at Montclair, N. J. Mr. Bradley was informed that potbuck were shooting on his preserve and while making a tour of inspection he was attacked by the buck.

Public attention in France has again been drawn to the peril involved in the constantly diminishing birth rate as shown by the vital statistics for 1905 which have just been made public. They show a decrease in births of 10,376, the total for the year being 808,292. There was no reduction in the number of marriages.

Max Crawford, electrician; Albert Bloom, carpenter; A. P. Latta, pipe fitter; Paul Lancelotti, Giovanni Lancelotti and Julius Wacidor, laborers, were instantly killed, and two other workmen were fatally injured by the explosion of a boiler in a power house of the Lake Shore & Michigan Southern railroad in Collingwood, a suburb of Cleveland, on Monday.

In a football game between the Great Falls team and the Port Shaw Indians at Great Falls last Sunday, James C. Curtis of Syracuse, N. Y., one of the Great Falls players, was injured in the abdomen by one of the Indians and sustained injuries which resulted in his death a few minutes later. The game, which was won by the Indians, is said to have been fierce but the Indians are credited with having played fair.

At a banquet given by the Merchants club of the world's last Saturday night, James J. Hill urged more elastic commercial relations with Canada. He cited figures showing that the trade with the people whom the United States would be able to reach by the construction of the Panama canal amounts to only about \$54,500,000, while the United States trade with Canada is over \$200,000,000 per annum.

The most gigantic theatrical combination in the world is in process of formation at Chicago. It will include 325 of the most important theaters in the United States and will dictate the booking of all the big comedies. Among the interests to be consolidated are Klaw & Erlanger, Daniel Frohman, Charles Frohman, Al Hayman, Nison & Zimmerman, Rich & Harris and the Orpheum circuit. The stock will be between \$50,000,000 and \$100,000,000.

STATE NEWS.

Nampa is to have a new theater with a seating capacity of 860.

Work has been commenced on the enlargement of the power plant at Swan Falls.

Rapid progress is being made on the Boise & Interurban railway. It is expected that the road will be completed to Caldwell by February 1.

The Pacific & Idaho Northern railway is now completed to Evergreen station, 17 miles north of Council, which has been made a shipping point.

Boston capitalists have applied for a franchise to operate an electric car system in the city of Boise and the proposition has been favorably considered by the council.

Joseph H. Peterson, formerly private secretary to Congressman French, has accepted the position in the office of Attorney General Guheen made vacant by the resignation of F. S. Woltan, who will shortly open a law office in Boise.

Boise dealers are endeavoring to secure cars from Ellensburg, Clatskanie, Washington. A previous attempt of this kind was blocked by the Oregon Short Line, which refused to haul Northern Pacific cars. It is claimed that under the new rate law the Short Line will be compelled to accept the cars.

Senator La Follette of Wisconsin addressed a large audience in Boise on Tuesday evening. He said that less than 100 men controlled the industrial and commercial systems of the country and that eight men controlled eight billions of the 13 billions of railroad capital. The trusts were, said the senator, a menace to the life of the nation. Senator La Follette's address made a profound impression on his audience. He was given a hearty reception by former citizens of Wisconsin.

Governor Gooding has announced that the state and bona fide farm lands, there being about \$100,000 in the state treasury that may be used for that purpose. "Applications have been received in so regularly from school districts for money loans on school bonds," he said, "that it has kept the land board busily engaged in the purchase of those bonds. At present we have cleaned up all applications from school districts and can now accept applications for farm loans."

Notice for Bids.

Notice is hereby given that school bonds of School District No. 2, Cassia county, Idaho in the sum of \$2,000, due in five years, are offered for sale to the lowest and best bidder. Bids to be opened at 3 p. m. November 24, 1906. The board reserves the right to reject any or all bids. Send bids to MARTIN SULLIVAN, Clerk District No. 2, Kimberly, Idaho.

TWIN FALLS NEWS

George B. Fraser, Editor.

Published every Friday by
THE NEWS PUBLISHING COMPANY
TWIN FALLS, IDAHOSubscription Rates:
One Year, in Advance, \$2.00
Six Months, in Advance, \$1.00Reliable information regarding the city and
country generally, and especially pertaining to
the Twin Falls, Idaho, is given by the
Twin Falls News, published every Friday.Entered as second-class matter, December 12,
1904, at the postoffice at Twin Falls, Idaho, under
the Act of Congress of March 3, 1879.

The blow almost killed father.

The Twin Falls tract met the con-
vention delegates at Burley.Frank Plasted did not state that the
friendship between the railroads
and the shippers was purely platonic.The Twin Falls Commercial club
handled the convention in splendid
shape and without any fuss. As a
special mark of friendship the electric
lights were kept burning until 1:30
a. m.The delegates to the convention
showed their good sense by avoiding
falsely praise of the Twin Falls tract.
What little they had to say on the sub-
ject was timely and well put. They
were a fine body of men.The attention of land owners is di-
rected to the report of Elias Nelson
upon the seepage and evaporation in
Twin Falls canals which appears else-
where in this issue. Mr. Nelson's fig-
ures are very interesting and they
demonstrate beyond a doubt the high
efficiency of the Twin Falls canals.
The loss from evaporation, about
which much has been heard, proves to
be trifling, while the loss from seep-
age is far below the average.The fact that a body of representa-
tive business men should be obliged to
take steps to induce labor to come to
Idaho indicates the remarkable
propriety of the state. Several dele-
gates to the convention of commercial
clubs spoke of the difficulty experi-
enced in securing labor in their sec-
tions of the state and the trouble en-
countered in retaining workmen.
"Elect a Democratic president" was
the remedy suggested by a factious
delegate. The labor question was one
of the most serious to come before the
convention and upon its satisfactory
solution will depend in a large meas-
ure the immediate progress of Idaho.
Railroad construction has been hin-
dered, important projects have been
hampered and material damage has
been wrought by the inability of con-
tractors to secure workmen. Skilled
labor is in demand in all sections of
southern Idaho. If the work outlined
by the League of Southern Idaho Com-
mercial clubs is carried out there will
always be a demand for labor here.At last night's banquet to the visit-
ing delegates to the League of South-
ern Idaho Commercial clubs it was
shown conclusively that the shippers
loved the railroads and the railroad of-
ficials loved the shippers. The rates
were all right, it was demonstrated,
because the shippers themselves had
made them. The only trouble was
caused by the nasty problems which
refused to solve themselves. The coal
shortage puzzle was the cause of brain
fever. It positively refused to dawn
and tried to coax the salt rate to fol-
low in its tracks. Frank Plasted
hugged the stove while he told the
delegates how much sleep he lost
through the twitches of conscience
which constantly reminded him of the
shivering public of Idaho sitting up at
night because coal was not to be had.
Despite the delectable change of cour-
tesies upon subjects which were al-
most too hot to handle, the delegates
and the railroad officials showed a
manly consideration for each other
and the convention demonstrated the
ability of broad gauge men to work in
harmony on questions of vital and mu-
tual interest. "Let us get together!"
was the cry. The shippers were as-
sured that any requests made through
their transportation committee would
receive prompt attention and the rail-
road men were made to understand
that the shippers would ask nothing
unreasonable. The question resolved
itself into one of rivalry between com-
peting cities, each of which sought to
outreach upon the jobbing trade of its
neighbors.In re-electing Dr. Steeves president
of the League of Southern Idaho Com-
mercial clubs the delegates honored
themselves and paid a merited com-
pliment to one who has given freely
of his precious time and talents to the
organization. Guy Plaster, the sec-etary-treasurer of the league, stated the
case in a sentence when he said the
league needed "live men" who would
work and work effectively. Dr. Steeves
fills this requirement to a dot. He has
a thorough grasp of commercial condi-
tions and the facility of explaining
them to others. Without the valuable
services of Mr. Plaster the league
would have been unable to grow to its
present proportions. From the best
possible viewpoint Mr. Plaster has
been able to study the growth of south-
ern Idaho. There is scarcely a busi-
ness man in the state with whom he is
not personally acquainted. Through
his long connection with the Idaho
press he has been placed in close
touch with the development of the
state and no other man is better qual-
ified to pass upon its needs. By reason
of his wide acquaintance Mr. Plaster
is able to keep the machinery of the
league in good working order and his
activity and acumen are potent
factors in the make up of the organi-
zation. He is in harmony with his fel-
low officers who are none the less cap-
able and the league is fortunate in-
deed to have at its command the serv-
ices of so competent a body of men.During their visit in Twin Falls the
traffic officials of the Oregon Short
Line made plain their intention of
moving the products of the tract to
profitable markets. It was, they stat-
ed, a question of ascertaining what
the tract would produce and where the
products could be placed to advan-
tage. Rates would be made to fit con-
ditions, the object being to move the
products at a profit. This action sug-
gests the propriety of co-operation on
the part of the farmers. By engaging
a traffic manager and salesman they
could market their products by the
wholesale and be relieved of the ne-
cessity of hauling them in the local
markets or awaiting the pleasure of
buyers. Once let it become known
that a certain product may be obtained
in wholesale quantities on the Twin
Falls tract and the demand for it will
arise immediately from some quarter.
It would be a great relief to the farm-
ers, for instance, if all their potatoes
were sold before they were picked.
The shipment of a few trains of pota-
toes would clean up the local market
completely and relieve the farmers of
all anxiety regarding their storage.
The Twin Falls farmers are irrigat-
ing on a wholesale basis and might
just as well market on the same basis.
Carloads of melons rotted in the fields
on the Twin Falls tract this summer.
A traffic manager could easily have
marketed every melon at a profit. The
best market could have been found,
rates that would move the product se-
cured and the problem resolved into
one of hauling the product to the rail-
road. There is a vast difference be-
tween a single farmer trying to sell a
wagonload of melons by peddling them
from house to house and an organiza-
tion of farmers disposing of their melons
by the carload through the agency
of a traffic manager who attends to all
details for them and saves them the
time they waste in trying to find a
market. There is also a slight differ-
ence in commercial status between the
solitary farmer who tries to ship a
half dozen hogs by rail and an or-RESULT OF THE OFFICIAL CANVASS IN
CASSIA COUNTY.The county commissioners have concluded the work of canvassing the
election returns. The result of the canvass shows that all candidates on
the Republican state and county tickets were elected. H. H. Thornton,
candidate for county superintendent of public instruction, heads the list
with a majority of 693. He is closely followed by Congressman French
with 662. Mine Inspector Bell 654, and Miss Chamberlain for state superin-
tendent of public instruction, whose majority is 649. B. P. Howells,
candidate for county attorney, had a hard battle, defeating C. M. Price by 123
votes. Following is a list of the candidates and their majorities:

Candidate.	Office.	Majority.
Burton F. French	Congressman	662
Frank R. Gooding	Governor	314
E. A. Burrill	Lieutenant governor	528
George H. Stewart	Supreme Justice	578
Robert Langdon	Secretary of State	424
John J. Guheen	Attorney general	545
C. A. Hastings	State treasurer	539
Robert S. Bragaw	State auditor	564
Robert N. Bell	Mine inspector	654
S. Belle Chamberlain	State superintendent	649
E. A. Walters	District judge	458
George A. Day	State senator	364
H. T. West	Representative	567
E. D. Brackenbury	Sheriff	304
Moses Smith	Assessor	385
B. P. Howells	County attorney	123
J. Y. Haigh	County clerk	287
Andrew Lounsbury	County treasurer	579
C. M. Gilkey	Probate judge	294
C. H. H. Thornton	County superintendent	693
H. H. Mull	County surveyor	395
Frank Tremayne	Coroner	638
John L. Smith	Commissioner	503
Leonard Condit	Commissioner	470
George A. Crocker	Commissioner	611

ARE THERE CLAMS IN YOUR DITCH?

IF SO, SEE IF THEY CONTAIN PEARLS.

Fresh Water Clams Are Now Producing the Most Valuable Pearls on the Market—They Are Abundant in Twin Falls Canals.

If you should happen to unearth a clam in your irrigation ditch do not feed it to the hogs until you have examined its internal organs. Possibly it may contain a pearl of great price. Minnesota is becoming the center of the pearl fishing industry. That pearl fishing is no inconsiderable industry may be seen from the fact that the value of all the fresh water pearls produced in the United States during 1905 amounted to fully \$5,000,000. The harvest gathered from the fresh water streams in Minnesota alone exceeded \$1,000,000. Within a month William Bates of Red Wing, Minn., found a pearl which sold for \$70,000. It weighed 34 grains and was obtained from a clam which he took from the Mississippi River.

The bed of the Snake river is literally lined with fresh water clams and have found their way into the irrigation ditches on the Twin Falls tract. Schoolboys are in the habit of digging huge clams from the little ditch which passes beside the Bickel school. In all ditches where water has run for any length of time clams may be found embedded in the banks and bottoms. As the ditches in this section have contained water for less than 18 months it is evident that the clams attained their growth in a remarkably short space of time as it is almost inconceivable that they should have been full grown when they were carried into the laterals.

But it is possible that the Twin Falls clams may be too healthy to grow pearls. The pearl, so scientists declare, is the result of the presence of a microscopic insect known as the diatom. This diatomlike creature enters the clam's body and causes disease among the mollusk inhabitants that undoubtedly yields more valuable results than any other in the whole known realm of therapeutics. Pearls have exactly the same chemical composition, whether they are taken off the coast of Australia or from the bed of Rock creek.

Today, according to a recent estimate, there are 30,000 men and women engaged in the pearl industry in the United States. Clam shells were once worth \$3 a ton but they now bring from \$2 to \$3. American fresh water pearls are the more valuable because of their wide variety of coloring which makes them difficult to match.

FOUR NEW RESERVES CREATED

One Along Raft River and Tributaries in Cassia County.

President Roosevelt has signed a proclamation creating four new forest reserves in Idaho, and enlarging two others, adding to the reserves of the state 7,406,556 acres. He created every reserve recommended by the forest service, including the Shoshone reserve, in northern Idaho, which was so vigorously fought by Senator Heyburn.

The Shoshone reserve is created in conjunction with the Coeur d'Alene reserve adjoining it on the north and two others which are now known as the Coeur d'Alene reserve. Their aggregate area is 2,250,000 acres. They lie in Shoshone, Kootenai, and Blaine counties, extending northward to the middle of Lake Pend Oreille.

In creating these various reserves it is stated that their natural resources will be available for use and development but they will be administered by the forest reserve, placed under the protection system and timber cutting will be restricted to mature timber.

The Coeur d'Alene reserve is the largest of them. The largest reserve next in size, embraces 1,346,400 acres in Lemhi and Custer counties. This reserve consists of three narrow strips of land running southwest and southeast, adjoining Montana boundary. Innumerable streams that empty into the Lemhi river head in this territory.

In the extreme northeastern part of Idaho, on the British Columbia and Montana lines, 165,240 acres have been reserved, forming but a small segment of the Injuro Kootenai reserve in Montana. Like Lemhi, this reserve lies on the west slope of the Rocky mountains.

Salmon river reserve, in Lemhi and Custer counties, embraces 2,201,120 acres. It comprises a solid block of mountainous country, lying between the Salmon and the middle fork of the Salmon river.

In Cassia and Oneida counties 291,976 acres have been set apart as the Raft river reserve, embracing many of the tributaries of Raft river and Deep creek.

Numerous additions are made to the Sawtooth reserve. Their aggregate area is 1,371,760 acres. These additions are made at various points along the present boundary.

Having rented my farm, I wish to sell at private sale all my thoroughbred Berkshire hogs, consisting of brood sows and young pigs—also a full line of farm implements and household goods.

A. H. KELLOGG,
Half Mile South New Bridge.

PROPER WAY TO FEED ALFALFA

Young Cattle Require a Little Grain in Addition.

Alfalfa feeding to both cattle and sheep is becoming quite a feature throughout Colorado and the west. We have been experimenting in feeding steers for 12 years and have discovered that the locality in which the alfalfa is grown has a great deal to do with results. The climate and soil have much to do with the proposition as well as the time the alfalfa is cut and the manner in which it is put up. We are thoroughly convinced that when alfalfa hay is fed without grain the only kind of steers to feed are aged steers. By this I mean three-year-olds and up. The younger steers do not mature fast while growing and to get the results on the latter some grain is necessary. The kind of steers that have given the best results are well bred, fleshy steers of four years old, in fact, just as fleshy as possible, and the more flesh they carry the better will be the results. They should be one-third fat, from 200 to 240 days. These steers when shipped have weighed between 1,400 and 1,600 pounds on the river markets and have sold evenly with the corn fed natives. There are many different methods of feeding alfalfa throughout the west. In the majority of cases in my section of the western slope the hay is stacked in the feed lot where the cattle are to be fed. The hay is built up against the stack. The rack or fence is built with heavy poles about 27 inches from the ground; then a space left from there to the top pole with posts supporting the latter about a rod apart, leaving plenty of space for the head and neck. The hay is thrown from the top of the stack morning and evening. The steers are to be fed at each feed is soon ascertained so that about the right ration is given, neither too much nor too little at each feed. Every morning before feeding any poor hay or rubbish left over is cleaned out and given to stock cattle. The idea is to have good clean fresh hay in front of the cattle at all times. If any poor hay is left they are likely to waste a certain amount of the good hay. A good many feed also in upright racks, hauling the hay once or twice a day from the stack. I do not like this method as well as the other as in the first instance the cattle get all the leaves, whereas by the latter method a good many of the leaves are lost by reason of the fact that the hay is handled more. However, the feeding of stock in a wet country might not work so well, but in our dry climate we are not troubled with much moisture. T. A. Mostyn in Denver Field and Farm.

WHEN THE WEST WAS UNKNOWN

Learned Eastern Statesman Insisted It Was a Desert.

"Between the Missouri and the Pacific," said a member of congress, "save a strip of cultivable prairie not above two or three hundred miles wide, the region is waste and sterile, no better than the desert of Sahara and quite as dangerous to cross. The author of the bill, Senator Edward Bates of Missouri, whom Horace Greeley long afterward boomed for the presidency in the New York Tribune, and in the Chicago Republican convention of 1860, and who became attorney general in Lincoln's cabinet. This was in the session of congress of 1859. In 1848, John C. Calhoun of South Carolina, in a speech in the senate, which was applauded by many persons in and out of that chamber, declared that for agricultural purposes he would "not give a pinch of snuff for the whole territory west of the Rocky mountains."

Marysville Canal Complete.

A public announcement has been made that the Marysville canal system is now complete and the lands are now open for entry.

These lands are located in Fremont county, north of the city of St. Anthony, and in a territory famous for the production of enormous crops of wheat, oats, rye, barley, alfalfa, clover, timothy, sugar beets and many varieties of hardy fruits.

The total cost of land and water is \$20.50 per acre, a price that is, in fact, a small sum, and perhaps the last really cheap water right that will be offered in the state. Payment privileges are granted extending over a period of ten years, so that any American of the year of age can avail himself of the opportunity to secure a good piece of land.

Fertile owning lands under this canal system which were improved this year are refusing \$75 per acre. Where can you equal it?

Write us for particulars.

Boise, Idaho.

Simple English Vindicated.

Professor Thomas R. Lounsbury, the noted commentator on Yale, believed in simple English. He opposes those who would substitute for simple terms pompous ones—those who would say, for instance, "The day is Sunday." "Is incorrect, and would write instead, "Tomorrow will be Sunday."

Professor Lounsbury, discussing this question of simple English, said at Yale one afternoon:

"There was a little boy who began to keep a diary. His first entry was 'Got up this morning at 7 o'clock.' He showed the entry to his mother, and she, horror-stricken, said:

"Have you never been to school? 'Got up.' Indeed! Such an expression! Does the sun get up? No, it rises."

"And she scrawled out 'Got up at 7,' and wrote 'Rise at 7' in its place. 'That night the boy, before retiring, copied the entry for the day with the sentence,

"Set at 9 o'clock."

Oh, Boston! A well known Washington architect who has just returned from Boston is chortling over a good joke on that corner set in its. He says that in the reading room of one of the most exclusive clubs in the Hub there is a sign that reads:

Here? Law Conversation Permitted

Blue Lakes Fruit

The finest Winter Apples in the country at prices which cannot be equaled elsewhere.

Plums and Pears better and cheaper than can be obtained in any other market.

Recollect, the Blue Lakes fruit is picked fresh and not subjected to long shipments.

Link's Modern Business College

THE REPRESENTATIVE BUSINESS SCHOOL OF IDAHO.

Stands for the highest, broadest and best in business education. Ideal location and environment. Elegant and complete equipment—new throughout. Courses strictly practical. Faculty composed of specialists. Patronage consists of young men and women who are characterized by intelligent ambition and earnestness of purpose. Its graduates are sought by business men as bookkeepers, stenographers, cashiers, secretaries, managers and practical office assistants, and by high schools and commercial schools as teachers. A high standard of scholarship is maintained throughout the school. Every department is thoroughly organized. Students receive individual instruction. We teach the celebrated Gregg system of shorthand. It is the easiest to learn, the easiest to write, most rapid, most legible. We specialize on TOUCH-TYPE WRITING, the only method of operating the typewriter by which great skill is attainable. We perform our whole duty towards our students and the public in an honest, earnest and conscientious manner.

WE TRAIN YOUNG MEN AND WOMEN FOR SUCCESSFUL BUSINESS CAREERS.

If you desire a good position you can prepare you in the SHORTEST TIME possible and at the LEAST EXPENSE consistent with thoroughness. Your success is assured if you complete a course in LINK'S MODERN BUSINESS COLLEGE.

Fall Term Opens Sept. 4, 1906

If you cannot enter on the opening day, enter any time. The sooner you enroll the sooner you will enjoy the benefits. For further information, call, telephone or write. Address

A. T. Link, Principal

1014-1018 West Main Street, Boise, Idaho.

Agricultural College of Utah

"UTAH'S GREAT INDUSTRIAL SCHOOL"

Prepares Men and Women for Success in Life

COURSES OF STUDY.

Agriculture—Agronomy, Horticulture, Animal Industry, Veterinary Science, Dairying, Irrigation and Drainage. Domestic Science and Arts—Cooking and Dietetics, Sanitation, Hygiene, Sewing, Household Economics, Etc. Commerce—Business Administration, Accounting, Banking, Transportation, Commercial Law, Stenography, Etc. General Science—Comprising English, Mathematics, History, Economics, Modern Languages, Natural and Physical Sciences, Etc. Courses are also offered in Music, Art, Physical Training and Library Work.

IT IS IMPORTANT

Before you decide which school to attend that you consider carefully the opportunities afforded by the AGRICULTURAL COLLEGE OF UTAH—its strong faculty, modern courses of study, splendid equipment, moral atmosphere and healthful environment; also the low expense and the uniform and splendid success of its students.

Twenty buildings, provided with the best modern equipment; live stock, farms, orchards, gardens, parade grounds and athletic field—these afford exceptional facilities for thorough and efficient work. A strong faculty of experts, representing the best institutions of America and Europe, are in charge of the work of instruction and experimentation. No tuition. Entrance fee, \$5. College opens September 15. Write now for illustrated catalogue.

Address THE REGISTRAR, AGRICULTURAL COLLEGE, Logan, Utah.

BUHL MAINTAINS ITS RAPID GAIT

MORE BUILDING OPERATIONS HAVE COMMENCED.

Extension of Waterworks System Devised Upon Many Prospective Settlers Looking for Land—Ed Braun Introduces New Language.

BUHL, Nov. 14.—P. J. Lynch started for Elly, Nov. Friday. He will visit all the principal mining camps of that state and return to Buhl in the spring.

Mrs. Ellen E. Lyons, Miss Katie Hudson and R. B. Hudson were Buhl visitors Friday.

J. H. Scholer has painted the front of his lively stable and is now building an addition to his dwelling house.

B. Boyd is serving 30 days in the sagebrush, getting ready to prove up.

H. B. Wells of Twin Falls was in town Friday looking for a building in which to start into business, but there are no such buildings vacant in this burg.

Geo. R. Dunn and W. B. Harris are contemplating the erection of a two-story lava rock business block on Broadway south of the Hotel Buhl.

G. E. Paul bought the corn crop on the experimental farm. He will convert it into pork.

Fred Nihart of Twin Falls and Mrs. Nihart, who recently came from Portland, Ore., to join her husband, accompanied by their son, Melville, spent several days of last week visiting Postmaster Nihart and his wife.

Nihart was pleased with what he saw of the west end of the Twin Falls tract.

Chas. Coker, who has been superintending the construction of the waterworks system all summer, moved his camp out to the high line canal Saturday, leaving the Greeks under the charge of Chas. Logan, ditch boss.

Work in town. It was decided to extend the waterworks system beyond that proposed in the original plans. This extension would be in the form of a ditch.

H. S. Hobson brought in two loads of coal from Twin Falls Saturday, but we have no use for the stuff, except for cooking purposes. What we need is screen doors to keep the flies out.

Don H. Bark, foreman of the experimental farm, has accepted a position as school teacher in Shoshone on Monday, and he and Mrs. Bark left for that town Sunday morning.

C. B. Peck made a business trip to Twin Falls on Thursday.

Ninth avenue is being improved. The railroad depot will be located on this street.

Edie J. Lilly, C. Lilly and Chas. D. Ward, all of Pueblo, Colo., spent several days of last week looking over the country and went to Twin Falls Saturday to file on land.

They returned to the city on Sunday to commence operations on the sagebrush. They intended to file in 160 acres each.

E. G. Hobbs of Lamar, Colo., says this country looks good to him, and that he will have some of it. He is a guest of Hotel Buhl.

E. B. Ackers of Montrose, Colo., is town looking for a place on and to suit him, which no doubt he will find.

C. C. Howell of Cody, Wyo., is registered at Hotel Buhl. He is a home-seeker on this end of the tract.

C. F. Davenport of Rupert, Idaho, was a Buhl visitor on Thursday.

Henry G. Ellis, a Chicago photographer, is taking pictures of our grand natural scenery as well as some of the most prominent buildings in town. His artistic soul is delighted with the opportunities he finds around Buhl for the exercise of his skill. The pictures are intended to illustrate magazine articles descriptive of the country.

G. H. Erdman and J. H. Day of Twin Falls registered at Hotel Buhl Thursday. Day says the Twin Falls tract is the best on earth for any old purpose, for even in politics nothing but

the best would do and so it went Democratic.

Clifford Williams, Samuel E. Clegg, Chas. Butters, Norman Jordan, William Conger, L. Willey, F. O'Neill, W. S. Kellogg, all of Ottawa, Ill., arrived in town Friday and spent their days looking around the tract. They left for home Monday.

J. K. Parnell of Boise was a Buhl visitor Saturday.

D. W. Yoder of Bliss, Idaho, was a business visitor to Buhl Saturday.

Jacobi Frith brought a load of fruit in from Thousand Springs Monday and for Ed. Frith he was there with the goods. "What nationality are you?" was the next query. "Mormon," was the unblushing answer. "How many other languages can you speak?" was asked. "Oh, I can talk several kinds of German, the English and Mormon languages," said the sage.

brush pilot as soberly as a judge passing on a case. "What nationality are you?" was the next query. "Mormon," was the unblushing answer. "How many other languages can you speak?" was asked. "Oh, I can talk several kinds of German, the English and Mormon languages," said the sage.

PREFER HANSEN TO WENATCHEE

WASHINGTON 'FARMERS' THINK WELL OF TRACT.

J. N. McMaster Does Some Rooting in Iowa—School Will Open on November 30 With Entertainment—Threshing Machines Are Still Busy.

HANSEN, Nov. 14.—Nick Smith is painting his barn.

J. S. Babcock spent Saturday, in Twin Falls, with his family.

W. K. Smith is doing carpenter work for Professor W. R. Hinton.

Mrs. F. M. Towne and daughter spent Wednesday last in Twin Falls.

C. J. Jones, R. B. Roberts and J. D. Merrill are remodeling the houses of F. M. Towne is building a large gragnary.

Miss Gertrude Walton is visiting friends at Rock Creek.

J. S. Babcock was taking pictures in this vicinity this week.

Mrs. N. H. Nichols and son Stephen have arrived from Merce county.

Walter Kennedy, after spending several months at Rupert, has returned to his home here.

N. H. Nichols is building an addition to his store.

The officials of the Townsite company will be here in a few days to arrange for improvements.

J. S. Babcock is in Shoshone on a visit.

J. T. Barnes and J. S. Barnes returned from the forest reserve this week with two loads of poles.

Will Becker and family, after spending several weeks at their former home in Ontario, Canada, have returned to their ranch near Hansen.

Two threshing machines are in operation near here. There is enough grain in this vicinity to keep threshers busy until the first of year.

Mr. Jerome and family have arrived here and are occupying the P. H. Smith house on mile east. Mr. Jerome is a brother of Mrs. G. S. Redhead.

Two postoffice was installed this week in the W. N. Rose building in the center of the townsite.

All trains now stop at the sign HANSEN.

While racing horses with Leon Redhead, Will Lytle was thrown from a horse on Sunday afternoon and badly injured.

The Hansen public school building will be opened on Friday evening, November 30, with a program which will appeal to every grade of taste.

Babcock Bros. have contracted and are now at work clearing the sagebrush from an 80-acre field which is being cut by the Hinton grubbing outfit.

While Mr. and Mrs. Pelkes were out driving one day this week their horse became unmanageable, upsetting the buggy and throwing Mr. and Mrs. Pelkes to the ground. Mr. Pelkes was injured about the head and Mrs. Pelkes is confined to her bed as a result.

W. N. Rose went to Ogden on Thursday to order a stock of general merchandise. Frank Brower fitted up the Rose building this week for that purpose and the store is now ready to receive the goods.

C. W. Reid and A. B. Courtney arrived here on Saturday last from Wenatchee, Wash. Mr. Courtney said the Wenatchee country was a great fruit country, land ranging there from 2500 to 3000 feet. They intend to plant there just before coming here.

After seeing this country Mr. Courtney remarked that he would not trade one acre of land here for 10 acres in Wenatchee.

They both returned to their homes this week after becoming owners of land near Hansen. They will return in the near future.

J. N. McMaster, who is visiting in Iowa, is boosting for the Twin Falls tract. The following is taken from the "Times-Republican" of Bedford:

"J. N. McMaster arrived here Friday from Twin Falls, Idaho, but expects to remain only a short time. He is going to the south end of the tract in the vicinity of his new home and will return just as soon as he can complete arrangements for shipping a car of goods which he will ship with him."

"When he left Twin Falls, Mr. McMaster said he could see the snow that has fallen in the mountains, and after he started the train ran into a big snowstorm which delayed them for some time."

"Mr. McMaster says that he frequently saw Miss Ethel Mankier while at Twin Falls. Miss Mankier is in charge of the department of music in the city schools at that place and he says she is giving the most eminent satisfaction. In fact, she stands high in the estimation of the people that they would be pleased to have either Iowa girls come out there, and that are teachers and any way as nearly competent as Miss Mankier they will not have the slightest trouble in securing remunerative situations."

(Continued from Page 1.)

shled by the Twin Falls orchestra and dated materially from the occasion. George D. Aiken was toastmaster and although he protested to be very uncomfortable himself he certainly did not transmit his discomfort to others.

Guy Flenner opened the headnotes of the oratorical can with a sprightly response to the toast. "The roses," he started trouble by opening with the remark: "Mr. President, gentlemen and railroad men," which brought him a shower of drumnsticks and apples from the railway officials.

After humorous reference to the first meeting of the league in Weiser last March, when the delegates were taken on a tour up the Snake river road by Mr. Helgoh and returned in time to vote in November, reviewed the work of the press in connection with the league matter.

The success of the organization had been due to the assistance it had received from the newspapers. He showed why the league was entitled

Where Did You Catch That Cold?

Chances are you went without an Overcoat during the cold snap or forgot to exchange your light summer underwear for winter weights.

We have the Overcoats and we have the Underwear, and you need not run the risk of contracting pneumonia because we can fit you.

It is time you were ordering that Holiday Suit. We have it.

Seasonable Furnishings for Gentlemen

THE HUB Clothing & Tailoring Co.

to the support of the press and why the press merited the support of the league.

A. B. Moss of Payette, delivered a brief and thoughtful address on "Shipping," which contained much that was interesting.

Frank Plaidated presented the railway rate situation in a manner entirely new to most of his hearers. He declared, and with the concurrence of the prominent shippers present, that the shippers themselves were responsible for the rates and he explained why this was true.

Mr. Plaidated explained the existence of local branch rates and how these rates had been adjusted in the new tariff which will shortly go into effect. He also informed his hearers why the railroads carried freight from Atlantic to Pacific ports at a lower rate than that charged to intermediate points.

It was necessary, he said, that the roads should utilize their carrying capacity in order to make trade pay. It cost the same for maintenance whether trains were run or not and taxes had to be paid regardless of traffic.

Water competition had to be met and the railroads were in a virtually the same position as the merchant who, in order to turn over his goods, sometimes has to be content with a nominal profit on certain lines.

E. M. Helgoh, who followed Mr. Plaidated, expressed his doubt that Mr. Flenner had returned to Boise in time to vote, because of the work of the league.

Mr. Mayfield showed the delegates was compelled to move the delegates out of Weiser and they could not travel on the main line. Mr. Helgoh expressed his confidence in the league, enlightening his hearers on many points.

Max Mayfield explained the benefits which had resulted from the cooperation of the shippers with the railway companies and predicted that this cooperation would be made easier and more potent by the work of the league.

Mr. Mayfield around the circuit, as he said, was a hard boost. There was nothing like advertising, he said. The state or section that did not advertise was handicapped as the merchant who was afraid to spend a dollar to let the people know what he had to sell.

He said that the league was the league of the state's resources. W. F. Jack described the evolution of irrigation, showing how the intelligent American farmer had revolutionized the science. Mr. Jack paid a high tribute to the Mormon pioneers who first demonstrated the value of irrigation.

Mr. Jack then referred to the foundation for the splendid system in vogue today.

Dr. Steeves briefly reviewed the work that had been done and pointed out why it was necessary. He complimented the commercial clubs affiliated with the organization on their loyalty and their efforts to bring the matter before the public.

J. A. Reeves thanked the people of Twin Falls and the Commercial club for the hospitality extended to visitors and also referred in complimentary terms to the wonderful growth of the tract.

He then brought down the house with two comic songs and was joined by all the guests in "Auld Lang Syne" at the close of the banquet.

Your friends will appreciate a note of yourself at Xmas time.

BIG MONEY FOR SUGAR BEETS

Paid Out to the Farmers of Utah and Idaho.

Something like \$1,250,000 will be distributed by the Salt Lake & Ogden head office of the Utah Sugar company, the western sugar company, the Amalgamated Sugar company, to farmers throughout Utah and Idaho for the October delivery of beets.

The beet is the greatest of the season, the amount of money paid during any one month reaching the highest on record.

The beet season, in point of quantity raised, has been unprecedented in the annals of beet culture in the west, and the district tributary to the Lehi sugar beet factory, the greatest tonnage of beets ever produced, is engaged in the industry in the two states.

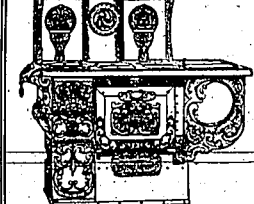

Next in line in point of tonnage is the Sugar City factory, after which comes Carleton, Idaho Falls, Nampa and Blackfoot.

The settlement for November beets will take place December 15, but this

TWIN FALLS, IDAHO

will not be large, as fully 75 per cent of the entire crop is delivered in the month of October.

The present season has presented only one drawback and that is the shortage of cars for the transportation of the product. This is less pronounced now than at the commencement of the season, and in many cases the factories have accepted delivery alongside the railroad tracks, the matter of getting the product to the factories thus being left in their hands.

Mark Austin, general manager of the Idaho sugar factories, and an expert in the beet business, has issued the following bulletin to the growers of western Idaho:

"It is certainly very gratifying to know that the greater number of our growers have harvested a very large crop of beets this season, and it has been thoroughly demonstrated that beet culture is a profitable and thorough success where the proper preparation of the land is made and proper care is given the crop; therefore we desire to urge upon the growers the absolute necessity of the plowing of their soil this fall as soon as the beets are harvested."

"If you have any manure to put on the land it would be well to do so before plowing. If the land is too dry to plow properly it should be irrigated before it is plowed, which should be done at the earliest possible moment for fall irrigated land contains the moisture for the care of the crop the following season much better than land which is not irrigated."

The fact that it is a good thing to do as little irrigating as possible during the irrigating season. "Farmers having alfalfa land to break up, it would be an excellent thing to break same as soon as possible this fall to get it ready for next spring's crop."

Just skimming two or three inches off the top where the land is not too clayey, with a sharp plow, and then springing, taking care that there is no clay left on the top that was not there before to deposit the seed in.

"A year ago this fall land that was seeded with alfalfa and clover was only plowed once and it was pretty hard to get a good stand of beets. "Contracts for all those that require an increased acreage or those desirous of making new contracts should get in touch with the company agents at once. It is better to make arrangements to be made at once to take care of them. The growers should also make arrangements to secure their Japanese beetles as soon as possible. We will not have a shortage next year like we had during the present season. It will be well to make your contracts direct with the firm who are in your district such of them as are good workmen, and where there is insufficient supply we will arrange to get more in to take care of the balance of the season. It will be much better for next year than it was for this, and the growers will get a 12-ton basis instead of a 10, for 1907 and the contract will be much better work being done, and we are certain that we will get better results. It will be the proper thing to make your contracts direct with the company agents. It will be much better for next year than it was for this, and the growers will get a 12-ton basis instead of a 10, for 1907 and the contract will be much better work being done, and we are certain that we will get better results.
