

TWIN FALLS NEWS

VOLUME III TWIN FALLS NEWS, TWIN FALLS, IDAHO, FRIDAY, DECEMBER 28, 1906. NUMBER 9

WORK ON NORTH SIDE TO BEGIN WITHIN 60 DAYS

Twin Falls Land & Water Co. Secures the Segregation of 180,000 Acres Which Will Be Reclaimed by Means of Three Large Reservoirs Supplied from the Milner Dam—Water Rights Will Cost \$35 an Acre—Company Preparing to Begin Work Before Winter is Over.

The Twin Falls Land & Water Co., within 60 days, begin work on the north side canal system which will reclaim 180,000 acres. An agreement has been reached whereby the Twin Falls company and the Idaho irrigation company will each secure the segregation of the acreage which they asked for, the former company being given the right to reclaim all land south of its canal line as surveyed, while the latter company waters the territory north of the line. Roughly speaking, the Twin Falls canal will extend from the Milner dam to the town of Gooding on the Oregon Short Line. It will encompass 180,000 acres of magnificent land, similar in character to that on the south side, with the added advantage of the possibility of artesian water. Thousands of springs gush from the walls of the Snake river canyon on the north side of the stream, while not a drop finds its way into the river from the south side. The construction of the north side system involves the utility of three large reservoirs with a combined storage capacity sufficient to irrigate the entire tract without taking an inch of water from the Milner dam during the dry season. Because of the increased cost of construction on the north side and the reduction of the acreage to be reclaimed by the Twin Falls company the charge for water rights will be \$35 per acre.

By the original filing, the south side project, which embraces 240,000 acres, is entitled to 3,000 second feet of water from the Milner dam and the first segregation of 30,000 acres on the north side has a right to 400 second feet. This right was subsequently increased to 3,000 second feet but the increase is secondary to the appropriation for the north side, although prior to Minidoka. The original north side segregation of 30,000 acres is still tied to that on the south side and some arrangement will have to be made by which the two systems can be divorced, so far as their joint operation is concerned, and yet retain their interest in the Milner dam.

Fortunately for the north side no enterprise three splendid reservoir sites are available, Wilson lake, Sugar loaf lake and Monument lake. These reservoirs will afford ample storage for the irrigation of the north side tract without drawing on the Milner dam for a drop during the dry season. Now that the segregation has been made, work on the north side project will commence so soon as the machinery can be set in motion. Milner will be the first base of operations for the

UNCLE SAM MAY SUPPLY WATER

Carry Act Settlers to Benefit by Government Storage.

The secretary of the interior has decided that lands segregated under the Carey act may receive such additional water as they need from government storage works, provided the settlers form water users' associations. This ruling is of great importance to the way in which the complete irrigation of every acre which can be watered. The method by which water may be obtained is outlined in the following letter:

WASHINGTON, D. C., Oct. 11.—The Secretary of the Interior: Sir: A letter from the director of the geological survey of September 28, 1906, referring to an opinion of this office of November 24, 1905, advising that there is no authority under the act of June 17, 1902 (32 Stat., 388) to grant the American Falls Canal and Power company a permanent interest in and right to the use of water stored in reservoirs constructed under said act for the irrigation of lands segregated under the Carey act and being reclaimed by said company under contract with the state of Idaho, has been referred to me for opinion as to whether additional water supply to the individual land owners can be furnished under the provisions of the reclamation act. The director in his letter states that the irrigation system established under the Carey act is more than half completed, two openings of lands under the state laws having already been segregated under the Carey act, and that the third opening will probably soon occur, which will cover practically all the remaining lands in the list approved by the department. He further states that "the requirements of the Carey act have been fully complied with by the furnishing of an adequate water supply to reclaim the lands sufficiently to raise profitable crops each year."

His proposition is not to furnish water for the reclamation of lands segregated under the Carey act, as that has been accomplished, but to reinforce the supply to make possible a more complete development of the situation is this: These lands are practically held in private ownership, and the proposition involved in segregated under the Carey act, private ownership that are partially irrigated may be supplied with additional water for the complete reclamation of these lands, if all the conditions imposed by the act are complied with and no restriction of the act as to area

is violated. I am of the opinion that individual owners of lands acquired under the provisions of the Carey act may be supplied with such additional water from reservoirs constructed under the reclamation act as may be necessary to fully develop and reclaim the irrigable portions of such lands. I call attention to that provision of the contract entered into by the secretary of the interior with the Water Users' associations that "only those who are or may become members of said association under the provisions of its articles of incorporation shall be accepted as entrants or applicants for rights to the use of water impounded, developed, or the supply of which is or may be regulated or controlled by said proposed irrigation works." which would seem to require that all persons receiving water from such source must be members of the association. Very respectfully,

FRANK L. CAMPBELL, Assistant Attorney General. Approved: Robert H. 1906. HITCHCOCK, Secretary.

ALL LANDS SHOULD PAY MAINTENANCE

KIMBERLY FARMERS FAVOR THE PROPOSITION.

Do Not Object to Repeal of Free Water to Unsegregated Lands—Contract for Amusement Hall is Awarded and Work Will Begin Immediately.

KIMBERLY, Dec. 27.—Last Thursday's train brought home a jolly crowd of Normal students. Those who left the train here were Messrs. Brose, Burke, Larsen and Ellen Larsen and Vada Holsley, all of whom went on to Rock Creek. Misses McMillan, Jessie McMillan, Dunken, and Mosses, Wilkins, Mabbutt, Dunken and Sude-wicks are all home to visit during the holidays.

Ray and Oakley came home with Alex. Wilkins to spend his vacation here. B. Wilkins had the misfortune to lose one of his valuable horse shoes that he had brought here from Utah with him. The horse got loose during the night and devoured a whole barrelful of oats and his death next morning was the result.

Miss Bertha Norton, who has been attending school in Salt Lake, returned on Thursday to spend the holidays at home. Lester F. North left last Friday for Salt Lake where he expects to spend the holiday season visiting his home. A meeting of the Kimberly Commercial club was held on Saturday afternoon. Constitution and by-laws were adopted. It was decided to hold a smoker at the restaurant on the night of January 7. The time of the regular meeting was set to be the first Monday in each month. The club has a charter membership of 20 representative business men whose purpose it is to place before the public the advantages of Kimberly in such a way as to attract capital to the town.

The regular meeting of the Literary society held at the schoolhouse last Saturday evening was very well attended. The principal numbers on the program were papers read by A. J. McMillan and P. W. Hess respectively. The meeting on Saturday of this week was postponed because of its conflicting with the basketball season to be given by the ladies Friday evening. The question chosen for debate at the next meeting was: "Resolved, that the United States should annex Cuba."

Osgood the fine Jersey cows, belonging to Wilbert McGreary died of blood this week.

A jolly little party who were left at home Christmas because of the bad weather of the night met at the new dance house on Mr. Thorne's place to have a dance. The time was very enjoyable.

The Christmas entertainment held at the schoolhouse Monday evening was a grand success. The program, which was made up entirely of numbers rendered by pupils of the school, was very interesting. The hall was very prettily decorated, a large Christmas tree standing in one corner. At the close of the program old Santa Claus appeared, much to the delight of the smaller ones. A generous supply of candy, nuts and apples was given to all present.

The regular meeting of the Ladies Pioneer club last Thursday was held at the home of Mrs. T. E. Henley. T. C. Steyer, the Nibley-Channel Lumber Co.'s agent, is now in charge of the warehouse, Henry Scott having gone to Salt Lake.

Miss Thorne will leave last week for Utah to spend the holidays, after which she intends to attend school at Provo. Sam Holt left with his family on Friday for Boise. They expect to make the trip in a motor car. Before G. M. Anderson, who with his family has been visiting El T. Newby here, returned on Monday to his old home in Oregon, he will much for having expressed his intention of returning later to locate permanently.

At the regular meeting of the Farmers' association, held last Wednesday evening James McMillan explained at length the position of the Canal association in the matter of turning over the canal to the settlers which is now pending. The following resolution was adopted: "Resolved, that the Kimberly Farmers' association favors the proposition that all land bear its proportion of the cost of maintenance whether irrigated or not, and does not object to repeal of free water to unsegregated lands." Action was also taken to ward appointing a committee residing under each lateral to be ready with a report to present to the engineering board when an examination of the project is made. The committee will facilitate the work of the engineers and will prevent their overlooking any needed alterations or repairs. It would be well if the system were followed all over the tract.

At the adjournment of the farmers' meeting the house was again called to order for further discussion regarding the building of an amusement hall here. A sufficient subscription have been secured to assure the funds necessary for its erection. The bids of the two lumber yards were opened and it was found that the Nibley-Channel Co. had made the lowest bid. A building committee consisting of Messrs. Campbell, Wilkins, Osburn and Young were appointed to have charge of the construction. The building site has already been secured and work will begin immediately after the first of the year.

Mrs. J. E. Henley entertained at Christmas dinner all the homeless bachelors about town. Those present besides Mr. and Mrs. Henley and Mr. and Mrs. A. L. Benson were J. O. Lee, A. J. McGulmon, H. G. Wisco, P. H. Wisco and C. M. Clippinger.

Some of our industrious citizens took advantage of the weather and built a sidewalk from the postoffice to the bank. This was a much needed improvement and will be greatly appreciated.

All should bear in mind the fact that a box social is to be given at the schoolhouse Friday evening for the purpose of raising money to improve the city park. Every lady is expected to bring a box filled with lunch enough for two.

The Women's club of Rock creek will give a masquerade at the hall on New Year's eve. Many of the members are delightful hostesses and the New Year's dance is anticipated as a repetition of the many successful entertainments of the club. The cuisine will be in charge of the members and an excellent supper is assured. A cordial invitation is extended to all. Masks may be obtained at Rock Creek.

CAREFUL INSPECTION OF ENTIRE CANAL SYSTEM

Formal Ruling of the State Land Board With Reference to Proposed Transfer of Canal System—Organization of Operating Company is Proposed. General Manager Faris Outlines the Position of the Land & Water Company.

The proposed transfer of the Twin Falls canal system from the company to the settlers is still occupying the attention of the state land board. The company has withdrawn its first proposal and now asks for the organization of an operating company to take charge of the distribution of water. It is claimed that this company may be organized without violating the contract between the company and the state and that it will afford the means of making all land pay maintenance charges, thus compelling speculators to bear their just burden of the cost of operation. The matter in which this company is to be formed, if it is formed at all, has not been made clear to the settlers. In fact, all negotiations for the transfer of the system have been conducted at such long range that the settlers are uninformed and therefore suspicious.

The following extracts from the minutes of the board meeting gives the status of affairs up to date:

"In the matter of the application heretofore made by the Twin Falls Land & Water company, limited, for the organization of a company to assume control of the operation and management of the Twin Falls canal, the board ordered that the application be denied."

"Whereupon, the board agreed to employ a consulting engineer to act in conjunction with the state engineer and requested that the settlers under the Twin Falls project and the Twin Falls Land & Water company each employ an engineer within 30 days, the said application to act as a board of engineers to make an examination of the Twin Falls dam, ditches and all construction work under said project at the earliest possible date, taking into consideration the physical and climatic conditions, and report to the board, the said examination being made, with a view of turning the project over to the settlers."

The following letter is self-explanatory:

Twin Falls, Idaho, Dec. 27, 1906: Mr. Fred A. Volz, Secretary and Treasurer, Twin Falls Land & Water Co., Twin Falls, Idaho: Dear Sir—I find that there is some misunderstanding among the farmers on the Twin Falls tract as to the application pending before the board for permission to organize the operating company.

To the end that there may be no misunderstanding or misapprehension as to what is proposed, I desire that you make it plain to as many of the settlers as possible, that there is at this time no application before the board to turn over the canal to the settlers. We have merely asked the board to appoint its engineer to act in conjunction with the state engineer in making a report to the board for the purpose of determining what we will finally be required to do before the canal can be turned over. The application pending for permission to organize the operating company in accordance with the terms of the contract with the state does not in any way modify the original contract nor release the company from

any of its obligations under its contract and bond to fully complete the system in accordance with the original plans and specifications, the only object being to facilitate operation, reduce operating expenses and enable this company to levy a maintenance charge against all lands that have been reclaimed, whether cultivated or not. The only actual change required in the contract is a modification abolishing free water on lands heretofore sold, which does not in any way affect those now on the tract. We have gone further, however, and agreed to guarantee that the maintenance charge would not in any event exceed 30 cents per acre and that we would make it as low as possible to meet the operating and maintenance charges economically administered, charging for maintenance and operation only the salary of a superintendent and secretary and necessary clerical and operating force and repairs, with the express understanding that any unusual break or disaster, caused by defective construction and not properly chargeable to maintenance, will be charged to construction."

With this understanding we do not see how any farmer on the tract could object to the board making the order at this time permitting us to organize the operating company as requested. Very respectfully,

TWIN FALLS LAND & WATER CO., By R. W. FARIS, Chief Engineer and General Manager.

The Land & Water company yesterday proposed that if the settlers would agree to the organization of the Canal company and the transfer of the operation of the water side canals to it, the Land & Water company would guarantee that the operating expenses should not exceed 65 cents per acre; they would also enter into a contract to make the canals satisfactory to the stockholders and to make any repairs the engineers might decide were necessary to place the canals in first class condition.

The representatives of the settlers of the tract were not authorized to accept the proposition but the state land board should meet with the different farmers' associations and explain in detail what the proposals mean. The settlers have not been heard from and they are the most concerned.

ADVERTISED LETTER LIST

List of letters remaining uncalled for in the postoffice at Twin Falls for the week ending December 22, 1906: English, Chas. C. Thompson, G. C. Sebring, Miss Yaman. When calling for above letters, please say, "Advertised December 22, 1906." W. W. DUNN, Postmaster.

CULTIVATION BETTER AND CHEAPER THAN WATER

Professor French of the University of Idaho Advances Some Sound Theories Based Upon Wide Experience—Advices Against Lavish Use of Water, and Shows How Cultivation is Less Costly, and More Beneficial Under All Conditions.

The following paper was read by Professor H. T. French of the University of Idaho at the National Irrigation Congress in Boise. It contains many valuable suggestions. Professor French is one of the best posted men on irrigation in the west. He said:

In a convention made up largely of people who are, to a greater or less degree, interested in the problems of cultivating water-land, water is the subject of discussion. My subject might seem out of place. But in modern times men are learning that it is not enough to control the source and supply of water, but that cultivation is as important to know where the water goes to and how it may be retained long enough in the soil to furnish the plant with its food. It is only in recent years, however, that much consideration has been given to the latter problem. We can all remember irrigation is impossible without contact with such, even now, who are giving all their attention to getting more water, and in the getting, often carelessly neglecting the question of who are getting the same direction. "Pour on more water," it is possible to buy or steal it, has too often been the motto of the farmer who raises crops under this system of farming.

Through the light of recent investigations men are learning that successful agriculture is not alone dependent upon water supply, although that is, in all cases, a fundamental factor in the problem. In other words, the best results are attained when efficient irrigation and good cultivation go hand in hand.

On account of the wonderful advancement in our understanding of the science of soil cultivation, and soil metabolism, it is possible today to grow crops where a few years ago it was deemed impossible. And who can predict the ultimate outcome, when the work now under way by agricultural scientists shall have been completed? The science of soil cultivation is put into available form for the guidance of the tillers of the soil? We believe the future has much more to reveal for the man who has faith in the possibilities of Dame Nature, assisted by the hand of man, than has been revealed in the past, and that instead of the black land, which now greets the eye, the mild and mellow light reflected from fields of growing crops will soften the vision.

Now all that has been claimed for the so-called dry land farming, by some men who make journalism their business, will be realized, for there are impossibilities, often described in titles on this subject, which are not to the men who are familiar with practical things, but which are hidden to the eye of the theorist.

In discussing the conservation of soil moisture it is first necessary to understand the forms in which water is found in the soil, and to understand which of these is most useful to the plant. There are three forms in which water is found in the soil under certain conditions. Hydrostatic water, when the soil is flooded or, as we would say, is full of water, that which can be drawn off by gravity, capillary moisture and hygroscopic moisture, or that moisture which can not be drawn off by the ordinary means, and which is, if any, of very little value to plants.

Hydrostatic water is of no direct value to agricultural plants excepting a few, such as rice and cranberries, which might come under this class, and which seem to thrive, at least in part, on the period of growth, with their feet in water. This is the form of water that is seen standing in pools in poorly prepared fields under irrigation, which, when it evaporates, often leaves a deposit of alkali to corrode the weak and sticky vegetation, the vitality of which was first impaired by being flooded too long with irrigation water.

It is probably necessary to sound a note of warning, that the first requisite to conservation of moisture is to have the land so leveled and tilled that water will not stand for any length of time on any portion of the field, after the gate is closed. If this feeling is permitted to continue then there will be hard, cloddy places in the field, where it will be difficult to retain moisture even with double the amount of cultivation given the balance of the field.

When gravity has drawn off the superfluous water, down through the lower layers, there is still plenty left in the soil for the use of plants in the form of capillary moisture—that moisture which makes light colored soils dark, and dark soils lighter. It is the moisture which forms a film around the soil particles and is held by them. The amount of capillary moisture held by cultivated soils will vary from less than 10 per cent in sandy soil to 14 per cent in soil rich in humus. It is of the highest importance that the tiller of the soil should understand how to maintain a proper amount of capillary moisture, for his success in growing crops will be measured by the ability displayed in controlling his supply. It is possible to have capillary moisture so abundant in finely pulverized soils, as to cause them to puddle and run together. This is due to the particles coming so close together that the films of water lie very closely, excluding the air, and thus the plants do not thrive. The largest amount of capillary moisture a soil can contain will vary from 22 to 32 per cent, or from 4 to 6 acre-inches per acre-foot of soil. This is about 20 to 32 pounds of water per cubic foot of soil. The same condition may be found in cultivated fields, however.

By incorporating decayed, or decaying vegetable matter, with soil its capacity for holding moisture is very much increased, and this is an important matter in all irrigated sections, for there is often a lack of humus in such soils. This is a question which needs little emphasis, for it is too apparent to pass unnoticed by anyone who has cultivated alfalfa and alfalfa with soil tillage. It is, however, one of the secrets of dry land farming, and should not be overlooked; and it is of great importance. Few farmers have gained the land, it is not a good plan to maintain the cultivated field, too long before seeding it down to grass and alfalfa. Too little attention is given to rotation of crops. Do not hesitate to plow up the old alfalfa fields and grow sugar beets, potatoes or grain on them for a few years, and put some of the money saved down to alfalfa or seed the fields which have been under cultivation for a term of years. This advice has been given us continually since the time of Columbus, and it is the only advice that has stood the test of actual practice during the ages. It is the keynote to success in all systems of farming.

The capacity of the soil may be changed and improved in a limited way by incorporating in it certain chemical salts applied as fertilizers, but this is hardly within the scope of my subject.

When we consider the vast amount of moisture that is needed for growing crops, and that practically all of this must come from the capillary moisture present in the soil, the subject of conserving this important supply becomes an interesting one. Mollirel of Germany found that it required 43 tons, or 3,008 acre-inches of water to produce a ton of dry water; or to produce 40 bushels of wheat, would require 12 acre-inches of water.

Coming to methods of tillage to conserve soil moisture, I will briefly discuss some of the most important ones which have been proven so by actual field tests. First of all, the fall plowing, which has been practiced by many of our best farmers, who are wholly dependent on nature's supply of moisture, in the form of rain and snow. This is a very effective method of preventing evaporation and breaking up the capillary attraction of water from the soil below the furrow when then by plowing in the fall. Fall plowing has the additional advantage of putting the surface of the soil in the best possible condition for catching all the winter precipitation in the form of rain and snow. This practice also prevents deep freezing of the soil, which is a drying process also. Surface tillage, with harrow or disc, before plowing, will retard evaporation by breaking up the capillary action of the upper layers of the soil. Fall plowing, should be as deep as possible. Next to fall plowing in importance is early spring plowing, or in case plowing can not be done early, the harrow should be used, making a dust mulch on the surface to prevent the escape of water from below. Some of the best orchardists plow and harrow their orchards late in the fall after the season's work is matured, thus conserving the moisture furnished by fall rains.

Farmers would get better results as a rule by taking a little more time in preparing the soil in the spring before planting than by being in too great haste to put the seed into a cold, wet soil, where germination is well nigh impossible, or at all events much impaired.

It should not be difficult to prepare land so that it will retain sufficient moisture to germinate field crops, thus, doing away with the necessity of irrigating crops up. This is certainly a very unsatisfactory practice.

Subsiding, or stirring of the soil below the furrow after it is of considerable importance in retaining soil moisture in humid climates, and may assist materially in increasing the percolation of water into the lower layers, where irrigation is practiced. Water cannot be saved judiciously until it has passed into the form of capillary moisture, and this only when the plow has brought into contact with the soil particles. To do this, the soil must be worked deeply, if too compact, as many of our soils are, for the water to penetrate to the lower layers. Anything which will open up the soil, so that water may be stored in the lower layers, is very beneficial, and tends to conserve the moisture for the use of plants. It also serves as a key to unlock valuable stores of plant food in the lower layers of the soil, which the plants are unable to reach, after providing the inducement for them to send their rootlets deeper into the soil than is possible in the absence of the capillary moisture.

Subsiding can be done any season of the year when there is moisture sufficient to make it possible. It is better, however, to do it in the fall, winter or early spring.

Surface Cultivation. No operation connected with soil tillage has undergone greater changes in the past four years than has the method of surface cultivation. The old practice of billing up the corn, pulverized soils, as to cause them to puddle and run together. This is due to the particles coming so close together that the films of water lie very closely, excluding the air, and thus the plants do not thrive. The largest amount of capillary moisture a soil can contain will vary from 22 to 32 per cent, or from 4 to 6 acre-inches per acre-foot of soil. This is about 20 to 32 pounds of water per cubic foot of soil. The same condition may be found in cultivated fields, however.

made and as soon as the soil has received sufficient moisture, and the ground was again leveled and pulverized on the surface, the soil would not have to be irrigated nearly so often. The old practice was to sow corn or alfalfa deep furrows along the bodies of the fruit trees, but the more modern practice is to irrigate the entire ground through small furrows and then cultivate the surface as soon as the ground will permit.

The thinner the mulch the better, providing it is a perfect mulch. The feeding furrows for the roots of plants below. On fine grained soil the mulch must be thicker, for the tendency of moisture to rise to the surface and escape into the air is greater in finer sandy soil.

Cultivation should be frequent to prevent the mulch from becoming compacted, when it loses its virtue as a mulch.

Some orchardists have been compelled to learn the lesson, though at a shortage of water, that frequent cultivation gives far better results than less cultivation and more water.

Frequent cultivation has other compensating features: when, will more than pay for the added expense, such as aerating the soil, and thus rendering a greater amount of plant food available than would be possible with such cultivation.

It is quite safe to lay down a rule that any process of cultivation which compacts or leaves the soil in coarse feeding furrows or lumps should be avoided in the summer season, by a surface pulverizer of some sort.

Rolling the land should be followed by the surface harrow. The Campbell system of farming, of which we hear so much, is based upon a thorough, deep cultivation at the proper season of the year, and surface packing of the soil and surface mulching, all of which is simply rational, cultivate to conserve moisture and save the plant the largest possible feeding ground from which to draw its supply of food.

Many kinds of decay or decaying

vegetable matter are used for mulching the ground to prevent the escape of moisture. Leaves, straw, coarse manure, sawdust, and even boards are laid down sometimes to keep the soil moist. All of these are more or less useful, but must be limited to small areas and more intensive methods than the average farmer follows.

Had I the space to discuss some topics for discussion in this brief paper, for in the exchange of ideas on these subjects we believe the greatest good is realized, I will close by stating that in cultivating the soil to conserve moisture we have a theme which must go hand in hand with that of irrigation which, in the language of another, is the supplying of water to plants in quantities best suited to their most perfect development.

BEES TRUE TO THEIR MASTER

Followed 'His Body to the Cemetery and Stayed There.

A strange incident illustrating the attachment creatures of the animal kingdom will exhibit toward humans from whom they have received kindness comes from Iowa. It is reported that Oliver J. Seer, a pioneer bee man, died suddenly at Wall Lake. It had been his custom to move among his bees without covering his hands or face. The bees followed him about the house and yard. In the winter, when their supplies were low he fed them sugar syrup and rye flour. He covered their hives with blankets to keep out the cold. He never lost an opportunity to minister to their wants, and he believed the insects had a real attachment for him. From the day of Seer's death there was unrest in the colony of bees. On the day of his funeral, they swarmed about the hearse, and thousands followed it to the cemetery. The following day it was discovered that the bees were deserted. Several swarms of bees were found in the trees near the grave of their former owner—American Field.

Twin Falls Investment Co.

LIMITED

Sole Agents for Water Rights for all Carey Act Lands under the

GREAT TWIN FALLS CANAL SYSTEM

45,000 Acres of Carey Act Land

Still open for original entry under this Canal System

Land, 50 cents per acre. Perpetual water rights, \$25 per acre, ten annual payments.

Vehicles from Buhl furnished free to those who desire to inspect land. Prospective entrymen accompanied by competent locators.

Buhl, located 17 miles west of the city of Twin Falls, will be the leading city on the west end of the tract and the distributing point for a large area, including the stock districts of Three Creek, Butte and Rosworth, likewise the farming and fruit growing districts of Hagerman, Kanoka Flat and Salmon. The contract for the railway extension from Twin Falls to Buhl has been let and the rails will reach the new town in December. Buhl will have waterworks, electric light and electric power before the close of the year. Business property values in Twin Falls have increased 500 per cent in less than two years. The same opportunities for investment are presented at Buhl. Now is the time to buy. Write for literature and further information. Address all communications to

COLORED TROOPS WHOLLY TO BLAME

NO JUSTIFICATION FOR THEIR
CONDUCT.President Roosevelt Effectually Si-
lences Those Who Protest Against
the Discharge of Three Companies
of Disorderly Negro Soldiers.Replying to the senate resolution
concerning the dishonorable discharge
of three companies of negro soldiers
as a result of the "shooting-out" at
Brownsville, Tex., President Roose-
velt transmitted to congress a number
of reports on the affair, and accompa-
nied them by the following special
message:"In response to the senate resolu-
tion of December 6 I herewith send
the report to the secretary of war of
General Nettleton, documents and
other reports and memoranda as to
precedents for the summary discharge
or mustering out of regiments or com-
panies, some or all of which were
guilty of misconduct, I ordered dis-
charge of these companies after a full
consideration, finding it my constitu-
tional duty as commander-in-chief of
the army. Appended are the reports
of Major Blockson, Lieutenant Colonel
Lovering and General Garlington."It appears that there was feeling
between the citizens of Brownsville
and the garrison. In differences both
sides were to blame, but this is wholly
unimportant, as the matter was
settled in any way or shape—an ex-
cuse or justification for the atrocious
conduct of the troops when, in a law-
less and murderous spirit, under the
cover of the night, they made an at-
tack upon citizens. Nine to 20 colored
soldiers took part in the attack, leap-
ed over the walls, hurried through the
town firing at whomsoever they saw
and shot into houses where they saw
lights. The would-be murderers must
have known that in the houses were
many women and children. There
were 10 shots fired into one house
where there were two women and five
children. Their escape was remark-
able.

Saw Colored Soldiers.

"A lieutenant of police rode toward
the firing and saw 15 colored soldiers.
They killed his horse, shot the right
arm of an officer which was later
amputated, and shot into a saloon and
killed the bartender. No individual
rulers were recognized, but many
witnesses of all classes agreed that
they were negro soldiers. Shattered
bullet, shells and clips from govern-
ment rifles found on the ground were
of corroborative value. A bullet hole ap-
peared in any structure of the fort,
thus disproving the contention that
the citizens started the firing."The citizens were wholly
unaware. No private soldier could
have secured a rifle unless a non-com-
missioned officer unlocked the gun
rack for him. All soldiers were pre-
pared to fire at the first order, and
that others than participants in the
raid, perhaps all of the command,
knew of the conspiracy."Commanding officers, by their
own actions, rendered it necessary
either to leave all the men, in-
cluding the murderers, in the army,
or to turn them all out. Under such
circumstances there was no alternative,
for the usefulness of the army
would be at an end if it permit such
outrages to be committed with im-
punity.

Purpose Was Murder.

"In short, the evidence proves con-
clusively that a number of soldiers
engaged in a deliberate, concerted at-
tack, cold blooded and cowardly, the
purpose being to terrorize the com-
munity, kill or injure men, women and
children in homes and bodies on the
streets, at an hour of the night when
concentrated and effective resistance or
defense was out of the question and
when detection by identification of the
criminals in United States uniforms
was well nigh impossible."A blacker deed never stained the
annals of the army. It was supple-
mented by another, only less black,
in the shape of a successful conspiracy
of silence for the purpose of
shielding those taking part in the
original conspiracy of murder. They
were soldiers, not schoolboys on a
frolic, but full grown men, in the uni-
form of the United States army, sworn
to uphold the laws of the United
States under every obligation. Their
path was not merely to refrain from
criminality, but with studious rigor
to hunt down criminality, and the
crime they committed or connived at
was murder. People call this dis-
charge punishment. I deny this, be-
cause, as punishment, it is utterly in-
adequate.

Precedents Are Given.

"There have been efforts to arouse
sympathy for men of long service.
These are the men who should be pun-
ished most severely. Upon long ser-
vice men should rest the honor of the
service. They should do all in their
power to reveal criminals. Officers
are called upon to check, under cir-
cumstances, would be treated
exactly the same."The precedents are many. During
the civil war the Sixth Ohio Regt.
was summarily discharged because it
was mutinous and worthless. General
Grant mustered out two officers and
fined all men of the Twentieth Illinois
for a raid on a store, an offense much
lighter than that I had to deal with."In the fiscal year ending last June
the war department discharged 352
colored men without trial, 20 of
them for misconduct. Many others
were dismissed by subordinate mili-
tary officers. So much for the mili-
tary side of the case.

The Race Question.

"I wish to speak from the stand-
point of the race question. It is of im-
portance to all our people that we
deal with each man on his merits,
as a man, not as a member of a cer-
tain race; that we judge him by his
conduct, not by color. If colored men
elect to stand by criminals of their
own race, because they are of their
own race, they lay up for themselves
a dreadful day of reckoning. Any con-
duct by colored people tending toshield an evil-doer because he is of
their own race, means the degradation
of the race. It means the damage of
the white man, but it means the ruin
of the black race. In this I do not
claim as a favor but challenge as a
right the support of every citizen of
this country of whatever color who
has the spirit of genuine, far-sighted
patriotism."

COAL FAMINE DUE TO CAR SHORTAGE

GOVERNOR TO RECOMMEND RAIL-
WAY COMMISSION.Investigation Shows that Inability of
Oregon Short Line to Supply Cars
Is the Cause of Coal Shortage—
Sharp Letter from the Governor.In a letter to the Interstate Com-
merce Commission Governor Gooding
has announced his intention to recom-
mend the creation of a railway com-
mission in Idaho. The governor has
been engaged in an investigation of
the coal famine and has reached the
conclusion that the Oregon Short
Line is to blame for existing condi-
tions. In a letter to General Manager
Bancroft of the Short Line, Governor
Gooding lays bare the facts in connec-
tion with the coal famine and recom-
mends the railway company for its failure.
The letter follows:Boise, Dec. 3, 1906.—Mr. W. H.
Bancroft, General Manager, Ore-
gon Short Line, Ogden, Utah: Dear Sir:—
I feel it my duty to again call your
attention to the serious condition now
existing in this state as to the supply
relative to the lack of a coal supply.
That I might present to the people of
Idaho this situation in its true light,
I sent Colonel Allen Miller, state im-
migration commissioner, to the coal
fields of Wyoming to investigate and
report on the conditions at the mines,
and to determine as to their ability
to furnish coal. I also held a confer-
ence with all local dealers in this city in
my office today.After a careful consideration of the
whole matter I feel warranted in say-
ing that your company is wholly to
blame for the serious condition now
existing in southern Idaho, from the
coal famine to which the people are
suffering. I shall not attempt to pic-
ture in this letter the suffering already
endured in Boise. It is enough to
say that strong men who were
already suffering from lack of fuel to
keep them warm, to say nothing of
the invalids and children.From matters submitted to me by
the local coal dealers, and from the
report of the state immigration com-
missioner, it is evident that your com-
pany has failed to furnish cars at the
coal fields since July. From the
correspondence submitted to me, it is
evident that not more than 35 per cent
of the orders filed by the local dealers
have been filled. I am satisfied these local
dealers made an honest effort to secure
coal early in the season for the stor-
age, but all their efforts by letters from
the coal companies themselves that they
were no more successful in securing
cars in July than during any other
month—thus defeating the object of
the local dealers to get an advance
supply. I have a copy of a telegram
from the "Kohmreiser company" to a lo-
cal dealer stating that the company
could not work its mines more than
half the time because of a scarcity of
cars. The Central Coal & Coke com-
pany complain in their letters of being
compelled to load cars for eastern
points, and that very few cars are fur-
nished that can be loaded for western
points.After a careful investigation of this
whole subject, I am forced to the con-
clusion that your company is respon-
sible for the suffering now being en-
dured in Idaho by reason of the scar-
city of coal. I feel that in this matter
the people of Idaho have a right to
know upon whom the blame should
rest. They have submitted patiently
in the past to suffering and losses en-
titled by lack of proper equipment on
the part of your company to handle
the business of this state. In my
judgment there is no excuse for this
shortage of coal. As a common carrier
with complete monopoly of the
transportation facilities in Idaho, the
people expect your company to pro-
vide proper equipment for doing the
business of the state. It is true that
Idaho has made marked progress
during the past few years, but no one
was in no good position to know
what this great development of the
state was doing for your company. Not
to prepare for this, so that you would be
able to promptly furnish the neces-
sities of life, cannot be too strongly
condemned. The condition that exists
this year is only a repetition of those
prevailing during the two previous
years, with no improvement, such as
was promised each year. In fact, the
condition is much worse than ever
before. Already the schools in out-
lying districts are being closed, and we
are now confronted with conditions
that if unrelieved will compel the
practical discontinuance of business.
If the present comparatively mild
winter weather should change to the
very stormy season it may be expected
that many deaths could be traced
directly to lack of fuel.Unless this situation is relieved at
once I in consideration of my duty, as
governor of this state, to advise dras-
tic measures, so that the present fuel
famine may be relieved.I have the honor to remain, very
respectfully,(Signed) FRANK R. GOODING,
Governor.

Reliable information regarding the city and county is promptly and cheerfully furnished. Address all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter, December 17, 1904, at the postoffice at Twin Falls, Idaho, under the Act of Congress of March 3, 1879.

In seeking to transfer the canal system to the settlers the Twin Falls Land & Water Co. began at the wrong end. It overlooked the most important factor in the transaction—the settler. Very few settlers on the tract were aware that the transfer of the system at this time was contemplated until they read in the newspapers that the question was before the state land board. Had the proposal been placed before the farmers' associations and explained in detail before action was taken in Boise conditions would be vastly different. The company is not in touch with the settlers and it never has been. The officials of the company have overlooked the importance of forming the acquaintance of the settlers and learning of their needs at first hand. With the exception of Superintendent McPherson, whose duties are not of an executive nature, it is doubtful if a single officer of the company ever met with the farmers outside of two or three meetings in Twin Falls. If there is a lack of harmony, it is due to lack of acquaintance and for that there is no excuse. The settlers are unaware of what is being done and not knowing the men with whom they have to deal they are naturally very cautious. This condition is reflected in the action taken by the Kimberly-Farmers' association at its last meeting. The Kimberly farmers wisely decided to prepare a bill of claims, as it were, to present to the engineers who are to inspect the canal system. They will ask the engineers to examine into the facts and thus nothing will be overlooked. The example of the Kimberly farmers should be followed by other associations. The work of the engineers would be greatly facilitated and the farmers would have the satisfaction of knowing that their demands were being considered. No matter how far the company may desire to be, it cannot gain the confidence of the settlers through the press or mails. Let the officers of the company meet the settlers face to face and outline their proposals and better progress will be made. The good faith of the company is not questioned but farmers are not accustomed to buying pigs in porks and they demand something more tangible than newspaper reports upon which to base their conclusions. If a member of the state land board were to come to the Twin Falls tract and meet with each of the farmers' associations, he would accomplish more in one week than the entire board at a dozen meetings in Boise. He would meet a class of men who are fair minded, conservative and reasonable, men of education and intelligence, ready and willing to do what is right.

The Ninth session of the Idaho legislature will convene in Boise next Monday morning. The crop of candidates for the speakership of the house of representatives is unusually large and available timber appears to be sound to the core. Hon. J. Frank Hunt of Bannock county, who occupied the speaker's chair during the Seventh and Eighth sessions, is again a candidate and has a large following. Shoshone county has a strong contender in the person of Mr. Connor. Several other counties have favorite sons whose claims are being urged and whose fitness is being extolled. For years Cassia county, by reason of its hitherto scant population, has occupied a back seat. Since the last session of the Idaho legislature, however, this county has made more substantial progress than any section of the state. It has accomplished in two years what other sections, perhaps equally favored, have performed in a decade. In the house of representatives during the Ninth session Cassia county will be represented by Hon. Harry T. West of Kimberly, who is particularly qualified for the speakership. Two years hence Cassia county will cast a vote equal to that of any county in the state, hence it would be a diplomatic as well as a wise act for the Republican party to recognize the young giant of the Snake River valley. Mr. West represents progress unparalleled in the history of Idaho. He represents a citizenship of the

cont purity, now people who deserve and would appreciate the honor which Mr. West's selection at the hands of the Republican party would confer. Cassia county is unleased. It has no political feuds to settle, no axes to grind. All it will ask for at the approaching session is county division and upon that question the people of the county are, or should be, united. All political parties placed county division planks in their platforms and the people expect a divided county with the county seat in Twin Falls. Being untrammelled, Mr. West would make an ideal speaker. Imbued with the Twin Falls spirit he would facilitate the work of the house. Accustomed to "do it now," as things are done on the Twin Falls tract, Mr. West would undoubtedly make the verbose members cut down their long speeches and get down to facts. While the Republicans from various sections of the state are opening for an opening for their favorites, why cannot they all unite upon an unbiased and capable man from the coming agricultural district of the west who will give them all "a square deal?"

In every corner of the globe water power is becoming more and more valuable. Until electricity was developed as a motive power, streams capable of developing immense energy continued to waste unnoticed. The power was there but it could not be transported. Electricity has changed conditions and now every available power site is eagerly sought for. From the inception of the Twin Falls project the immense value of power sites on the tract has been appreciated by far seeing men. While the plants are, perhaps, not being installed with that rapidity which pleases, their value is constantly increasing and ultimately they will be the most important asset on the tract. The continued and increasing shortage of coal is contributing to the growing value of water power. It is not possible to operate with profit a steam plant for the generation of electricity in a section which can be supplied with current generated by water power. Besides being hard to get, coal as a motive power is a dead loss from firebox to exhaust pipe. Electricity is gradually supplanting steam because of its economy, safety and utility. Yet coal is growing scarcer and dearer. While it is possible that the popular upheaval caused by the present coal famine may result in increased development of the coal industry, there is little room for hope that one year hence conditions will not be equally as bad, if not worse. The mining of coal is neither a healthy nor safe occupation. It is not one which a man will follow if he can obtain other employment. Every time he goes underground in a coal mine the miner takes his life in his hands. In prosperous times like the present he finds no trouble in securing work above ground, consequently the mines are crippled for want of labor and the output is decreased. It is estimated that the anthracite coal companies have no less than 3,000,000 tons of their product in storage as a safeguard in the event of a strike. This surplus would relieve the present coal famine in a very few days if it were thrown on the market but the mine owners will not take the risk. They must have a club to hold over the heads of their poorly paid employees. Soft coal cannot be stored for any length of time. It will stack so rapidly as to become worthless. The coal companies do not pretend to store soft coal for emergencies and they cannot expect the coal dealers to do what they will not do themselves. Thus the soft coal famine, such as those which supply the Idaho market, cannot provide a surplus for use in time of need. They must, so far as they are able, accom-

modate their output to the demand. As the demand increases the mines begin to run hopelessly behind. The only apparent remedy lies in the development of more mines and if the present agitation will bring about this result, it will not have been in vain. Meanwhile the attention of the commercial world is being more emphatically directed to water power as the energy of the future. The development of electric power from small streams in the Italian Alps has done wonders for Italy in recent years. There the conditions were not nearly as favorable as they are in many sections of America. But the power was there and once it was generated commercial development followed. The Twin Falls tract can produce the raw material and the power to manufacture it and also to transport it to market if necessary. No other section is so well favored in these respects.

Notice for Publication—Final Proof.
I, William S. Starr of Kimberly, who made entry No. 104, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1899, which embraces the SW¹/₄ of section 17, township 10 S., range 16 E., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before W. O. Taylor, representative of the State Land board, at Twin Falls, Idaho, on January 12, 1907, by two of the following witnesses: William Cheek of Twin Falls, John Eysen, Elam Cheney and A. E. Green of Kimberly. WILLIAM S. STARR, Entryman.

BREVITIES

Paul S. A. Bicket left on Wednesday for the east.

I. B. Perriole left for the east this evening on business connected with the north side project.

W. O. Taylor is visiting with his family at his home in Boise this week. He will return tomorrow and Mrs. Taylor and the children will follow shortly.

Mrs. Lela Gaylord will succeed Miss Grace Klorstedt as stenographer in the office of W. O. Taylor, representative of the state land board in Twin Falls, on January 1.

A party will be given in the school auditorium by the Young Men's Association Saturday evening in honor of Miss Klorstedt, who will leave next week for Boise to assume her duties in the office of Miss Chamberlain, state superintendent.

Mr. and Mrs. Ernest Nussong mourn the loss of their infant son, who was taken from them on December 20. The funeral services were held in Hunt's undertaking parlors on the 22nd, interment being in Twin Falls cemetery.

Miss Marie Ladd of Toledo, Ohio, has rented rooms in the Boyd block for dressmaking parties and comes from LaSalle, Illinois. Miss Ladd is one of the best dressmakers in her home town and is visiting the style centers of the east before finally starting for Twin Falls, where she will be fully equipped to give the best work and most stylish modes going.

R. M. Bardsen, contractor for the Twin Falls sewer system, has perfected his bond and commenced work. Don Bryan has requested the village trustees to locate the sewer line for a hundred feet further down the stream in order that his cattle may have access to the creek. Judge Taylor and H. Willis will present their claims to the board at its next meeting on January 7.

R. M. McCollum has received a letter from M. B. De Long who is in Paris, where he and Mrs. De Long have been enjoying themselves for several weeks. Mr. De Long declares that the attractions of the French capital are beginning to pall on him and he longs for a whiff of sagebrush. He sends cordial greetings to his many friends in Twin Falls which will be heartily reciprocated and Mrs. De Long will likely remain in Paris until spring.

George W. Higgins, who had been very ill for some time, died at the home of his son in Twin Falls on Sunday last, December 23. The funeral occurred on Wednesday in Hunt's undertaking parlors. The services were under the auspices of the Odd Fellows and Knights of Pythias and were largely attended. Rev. J. H. Schenck officiated. The interment was in Twin Falls cemetery. Mr. Higgins was well known and highly esteemed in Twin Falls where he had many friends, especially among the pioneers.

An amusing misunderstanding arose with reference to the huge Christmas stocking displayed in the show window of the Idaho Department store and labeled "City Council." Suspended from the stocking were streamers on which were written "Redskins," "Sawyer System," "Sleazebags," "Crossings." Those intended to represent the gifts of the council to the city but many misconstrued them as a slur at the council. The idea was all right but its presentation might have been more lucid.

Justice J. F. Allshole of the Idaho supreme court, who will become chief justice on January 1, arrived in Twin Falls yesterday and will return to Boise this evening. Mr. Allshole, of the distinction of being the youngest chief justice of any supreme court in the United States. He has made a magnificent record on the bench. Mr. Allshole was attended at the appearance of Twin Falls and delighted with the progress he witnessed. He was informally entertained by Mr. and Mrs. B. Perriole at the Hotel Perriole last evening.

The members of the Twin Falls Rod and Gun club, who were friends of the 15 fat birds were awarded to the successful marksmen. Mr. White of the Pioneer barber shop secured the most. Mr. White and the others were paroled out singly. Dennis Holohan broke 23 out of 30 live rocks but failed to win a bird, being handicapped 20 per cent. Will Burton and Don Bryan were also handicapped 20 per cent but they had better luck. Mr. Stuart of the Twin Falls National bank did some fine shooting and Bob Steele got away with a fat turkey. Jimmy Jones likewise managed to annex a bird. B. Johnson also shot in the hard luck class as did Roy Hansen. Among the rifle shooters Doc Horn and Mr. Graham were the most successful, each winning a turkey.

Mrs. Sallie O. Iron, wife of W. Z. Iron of Twin Falls, died at the family home on Saturday last after a lingering illness. Mrs. Iron was 49 years of age and is survived by one son, J. W. Iron, and three daughters—Nancy J., Mattie C. and Mary Leone. She was the daughter of William and Nancy J. Iron of East Tennessee. Mrs. Iron was a devout Christian from childhood, being a member of the Methodist-Episcopal church. She possessed a "lovable disposition" and was regarded with the highest esteem by many friends. The funeral services were held on Sunday afternoon at the family residence. Parker officiating. The deep sympathy of the community is extended to Mr. Iron, who recently lost a daughter. Mrs. Iron has a sister in the Twin Falls, Idaho, and those who know him as a good neighbor and sterling citizen share in his sorrow.

Superintendent McElroy, in attending the meeting of the state horticultural society at Payette.

Fred Volgt returned today from Boise, where he represented the Idaho & Western Cattle Raisers' association at the state land board.

W. S. Starr visited Boise to appear before the state land board during the consideration of the proposal to transfer the canal system.

C. A. McMaster returned last Friday from Boise where he has been for several weeks. Mr. McMaster was ill when he went away but is now in splendid health. He did some effective lobbying for Twin Falls during his absence.

On New Year's eve the Methodist young people will entertain their friends in the church parlors. A short literary program will be rendered, followed by games and stories. Light refreshments will be served. A cordial invitation is extended to all.

Catherine Norma Rendahl, infant daughter of Mr. and Mrs. Benjamin Rendahl and granddaughter of Mr. and Mrs. Fritz Olsen, died Christmas day, aged seven months and eight days. The funeral services were held at the family residence on Thursday afternoon, December 27, at 2 o'clock. L. J. Miller of Miller's undertaking parlors, Rev. John Goerly officiating.

John H. Hayes, who is now consulting engineer on the Fish Creek reservoir project in Blaine county, returned this week to spend the holidays with his wife and daughter. Johnny broke the record from the depot to his home so anxious was he to see his first child. The dimpled and plump granddaughter of "Uncle John" Hansen is as precious a treasure to Johnny as the proudest man in Twin Falls.

Mr. and Mrs. E. P. Ring of Lake Park, Iowa, are visiting their son and daughter in the city. Mr. Ring of Twin Falls, Mrs. D. A. McFadyen, mother of Mrs. Ring, is also a welcome visitor. There was a grand rally when the parents arrived and "Billy" looks happier than he has at any time since the day after the Burroughs hotel was burned and his building escaped with a few bits.

Colonel Frank Hubbs of the Sparks-Harrell Co. arrived from San Jacinto, Nevada, on Wednesday riding in a way of Rock Creek. Colonel Hubbs reports that the range cattle are in fine condition and are giving very little trouble. He expects to make a change for the worse they will winter in good shape. The colonel, after calling on his many Twin Falls friends and wishing them the best, started for home this afternoon.

W. C. Cooper, proprietor of the People's Drug store, returned on Wednesday from his home in Utah, where he had been called by the illness of his daughter. Mr. Cooper was notified of her condition and returned on December 16 and without hesitating a moment he closed his store and sacrificed his holiday trade in order to be with his beloved daughter. He received many sincere congratulations, not only upon his daughter's recovery, but because of the true domestic affection which he displayed.

The officials of the forest service announce that they will do everything reasonable and possible to keep the fire belt in obtaining firewood and lumber during the winter. It is suggested that those who wish to visit the reserve should go in by the route of the river. The fire belt will be located there where not on the reserve. During the present mild weather it is possible to secure wood and timber without much difficulty and those who need it should take advantage of the opportunity.

The Christmas cantata, "Santa Claus Delivers," given by the children in the Bicket school auditorium on Christmas night, was delightful throughout. Although the books were ordered only two weeks ago the children were perfect in their parts, thanks to the splendid coaching of Mrs. Evans and Mr. Thomas, to whom great credit is due. The little ones acquitted themselves admirably. Considering that 100 children took part in the cantata the performance was a striking success, as any one of the hundreds who crowded the auditorium will testify.

Rev. John Gourley of the Presbyterian church of Twin Falls has received a beautiful silver loving cup as a memento of the centennial of the First Presbyterian church of Lancaster, O., of which his was a member 13 years ago. The cup was presented to Mr. Gourley by the members of the family of the late Rev. John Wright, the first pastor of the church, who occupied the pulpit for 31 years. The centennial was celebrated on October 20-22, 1905, Rev. Gourley preaching the sermon. Mr. Gourley desires to place the cup because of the beautiful sentiment attached to it and on account of his warm friendship for the donors.

My heartfelt thanks is extended to my friends and neighbors whose sympathy lightened my sorrows occasioned by the death of my beloved wife. Twin Falls, Dec. 26, 1906.

DELIGHTFUL MASQUERADE BALL

Given by Mrs. Leland and Son at the K. P. Hall.

Stately noblemen, brave officers, cowboys, clowns, plumbers, Indians and "cut-throat gentlemen" were the guests of Mrs. Leland and her son, Craig Leland, at K. P. hall last Friday evening. The costumes were bewildering and beautiful and the only mistake Mr. Leland made was in not offering a prize to the person who recognized most of the dancers. The ball, which was in honor of Mr. Leland's birthday, was unique and delightful and the hostess was warmly congratulated upon her success. Mr. and Mrs. Stuart Taylor, Mr. and Mrs. Dunn and Mr. and Mrs. Mitchell assisted Mrs. Leland in receiving. Amid sentimental "quits" the mothers taught their partners, who were identified by means of the playing cards which they were suspended from ribbons on their breasts. Nobody dared to speak above a whisper for fear of betraying his or her identity and everybody felt certain that every disguise saved their own had been solved.

The ladies were dressed as follows: Miss Grace Klorstedt, colonial girl; Miss Lena Porine, night; Miss Bullen, midnight; Miss Barrett, Scotch lassie; Miss McCallum, bride; Miss O'Neill, folly; Miss Gertrude Kinney, cow girl; Miss Parsons, school girl; Miss Ethel Davies, colonial girl; Miss McManis, Scotch lassie; Miss Wilson, cow girl; Miss Morris, flower girl; Miss Dyer and Miss Cole, queen of spades; Morgan High, clown; Clifford Milliken, clown; Everett Switzer, English nobleman; David Fuller, cowboy; Ed Kuhl, Zulu; Harry Allen, Harry Hoggan, Charles Macaulay, kid; Frank Booth, ball player; Leon Perso, black knight; W. A. Nicks, admiral; Woods, kid; A. Barker, soldier; Leon Carlock, monk; Dennis Holohan, Sam in Chains; C. M. Price, Indian; A. Stiles, negro; C. C. Bedford, stroller; Arnold Frankel, colonial gentleman; Herbert Aubrey, Alabama coon; R. Strowbridge, duke.

Mrs. Leland's guests in full were: Mrs. W. S. Dunn as a Japanese nobleman, Mrs. Dunn as a maid; Stuart Taylor as a clown, Mrs. Taylor as Madame Butterfly, Mr. Mitchell as a schoolboy and Mrs. Mitchell as a cow girl. Ed Kuhl stumbled over Everett Switzer's English accent and injured Mrs. Nicks was so highly as an admiral that several of his lady partners suffered from chills. At first it was supposed that Walter Carven was disguised as a sock of flour, at least that is Carl Haber's statement. Light refreshments were served and the guests departed deploring it was the most enjoyable dance they had ever attended.

The holiday windows of the Idaho Department Store presented a most novel as well as beautiful display. The corner window represented Santa Claus emerging from the chimney after filling the stockings. The snow-covered landscape with frost in the air was effective. The second window shows a fully furnished living room with large grates in back wall, from the mantel of which were suspended the well-filled stockings. The third window is artistically draped with red silk and velvet draperies intertwined with sprays of leaves, and in the center is a beautiful hand-painted poster the work of Mr. J. Bainbridge, wishing to all a merry Christmas. There has been quite a misunderstanding regarding the well-filled stockings presented to our city council, some regarding it as an indirect attack upon that body. The designer and decorator, C. E. Cole, who himself understood that no such idea was intended but rather he desired to compliment them upon the vast amount of work he has done for the city in the past and supporting of the numerous beneficial measures which have been so helpful to us during the past year.

For Sale. Your choice of two Jersey cows, also one brood sow. G. T. CUMMINGS. 307-Mile North of De Long Place.

BIG CHRISTMAS TREE AT HANSEN

ROUNDED OUT WITH SPLENDID PROGRAM

Sunday School Children All Remembered—T. J. Raugh Bags a Monster Horned Owl—Change in the Post-office—Holiday Entertainments.

HANSEN, Dec. 27.—W. N. Rose was a Twin Falls visitor last Friday. Little Lester Redhead is suffering from an attack of pneumonia. John Radd and Will Layton spent last Sunday in Twin Falls. Mr. and Mrs. Hoene of Kansas are the guests of their son, John Hoene. O. C. Mills was hauling lumber last week to improve his ranch south of town. Voe Neilson has returned from Circle City, Utah, to spend the holidays with his parents.

Mr. and Mrs. S. E. Brower spent several days last week in Twin Falls, where Mrs. Brower underwent a very successful operation. Little Mildred Ricks is rapidly recovering from an attack of typhoid pneumonia. A number of men working for Contractor Banks on the high line canal have gone to their homes to spend the holidays.

Ray Conway, a barber from Hoburn, called on T. T. Rutledge Wednesday last while on his way to Twin Falls. The Hansen postoffice has changed hands. W. N. Rose being appointed to succeed T. J. Raugh, resigned. Miss Dixie Divina and her sister, Mrs. A. N. Hansen of Hoburn, Wash., were passengers to Twin Falls last Saturday. Mrs. Hampton will leave for her home next Saturday after spending a week with relatives.

A large horned owl was shot by T. J. Raugh one night last week which measured 48 inches from tip to tip of its wings and was one of the finest specimens of owls soon shot on the tract. It has been sent to a taxidermist at Heyburn to be mounted.

A delightful dance was given at Hansen last Tuesday evening in honor of T. T. Rutledge. The music was furnished by home talent. W. J. Thompson entertained a part of the evening with a number of good gramophone selections. There were about 20 couples present and time was forgotten and another day had dawned before it was thought of home.

A Christmas tree and entertainment was given by the Hansen Sunday school on Christmas evening which was well attended. The Christmas tree was a large juniper and was prettily decorated. W. Baker, W. J. Thompson, J. Babcock, W. J. Calkins and G. L. Bond were in charge. A number of small boys passed the presents around. A splendid program was given in the early part of the evening, and all who participated should be given great credit. A bag filled with nuts, candy, popcorn and an apple was given to every child present, and a large number of Sunday school pupils were made extremely happy and the evening to them is one long to be remembered.

Millinery at half price at Booth's.

Clothing bargain hour at the Idaho Department store on Monday evenings from 7 to 8 o'clock. All suits in our cabinets, Kahn-Bloch patterns, selected from choice fall and winter stock, worth \$42.50 to \$50, will be sold for one hour at from \$19 to \$16.

BIRDS THAT WINTER ON THE TWIN FALLS TRACT

Some Are Useful, Others Are a Nuisance—English Sparrows Are Beginning to Come In—Willow Grouse, or Prairie Chickens, Make Their Appearance—California or Blue Quail Are Multiplying but the Bob Whites Are Not Very Numerous.

Several varieties of birds winter on the Twin Falls tract. Perhaps the most conspicuous are the road birds, a species of the sparrow family. During the cold weather they gather in flocks and frequent the fields and roads. They are harmless and it is probable that they destroy a good many insects.

In the Snake river and Rock creek canyons are a few horned owls. So far as known they do not molest the poultry yards. Their food consists principally of field mice and young rabbits.

Chicken hawks are very troublesome and the damage they do to farmers' chickens does not offset their good work in destroying gophers, ground squirrels and field mice. As a matter of fact there are very few gophers on the tract but they will undoubtedly increase and they should be watched.

Woodpeckers of the "yellow hammer" variety are plentiful in Rock creek canyon. They have not given any attention to young fruit trees thus far but if they follow their habits elsewhere they will eventually become a nuisance.

The meadow larks, of which there are many, have a splendid song. They are beautiful insect or ground eaters and are of great value to agriculture. Caterpillars, emerald worms, fall webworms, tussock moths and collared moths all look alike to the meadow lark.

Bush-tits and other small birds are invaluable for ridding orchards of small and minute insects that destroy the value of crops.

The sage chickens spend the winter in the valley, returning to the hills to nest in spring. This winter there are very few chickens on the tract.

Several willow grouse, or prairie chickens, have recently been seen in the vicinity of Twin Falls. At first it was thought that they were songhens but their identity has been clearly established. Flourney Tago reported having flushed a covey near the head of Cottonwood creek about 12 miles south of town, a few weeks ago, and since then several eastern people who know prairie chickens as far as our eye can see them, report having seen quite a number near town.

The blue California quail are much more numerous than they were a year ago. They make Rock creek canyon their home and they do not stray very far unless they are hungry. The Bob Whites are hard to find. They appear to have selected Cedar draw as their abiding place. As the quail is a good friend of the farmer the birds should be fed during the winter if necessary. They destroy injurious insects and do little or no damage to anything except Kaffir corn, of which they are very fond.

The pestiferous English sparrow has discovered Twin Falls and it would be a good idea to encourage the small boy to declare war upon them. They are an unmitigated nuisance and should not be allowed to make a home here.

About the usual number of ducks are wintering on the river. Quite a few are reported on the Dry creek and the Snake and the pond above the Millard dam. They are mostly mallards, redheads, widgones and butterballs, with an occasional canvasback and a few teal.

Geese have been very scarce this year, having apparently forsaken their old haunts on the river. A few swans have been seen but only two or three were killed.

Contest Notice.

State Land Department, Boise, Idaho, Nov. 19, 1906.
A sufficient contest affidavit having been filed in this office by R. T. Newberry, contestant, against Carey net, entry No. 78, made March 17, 1899, for lot 2 (SW 1/4 of NW 1/4), section 19, township 10 S., range 18 E., by A. Van de Graaf, contestee, in which it is alleged that the said A. Van de Graaf has failed to improve, cultivate or reclaim any part of said land, and that he has not resided at any time upon said land and never been absent from said land to be done with or upon said land in the way of ditching, clearing, cultivating or distributing water thereon, said parties are hereby notified to appear, respond and offer evidence touching said allegation, at 10 o'clock a. m. on Thursday, January 3, 1907, before the register of the State Board of Land Commissioners, in Boise, Idaho.

The said contestant, having, in a proper affidavit, filed November 19, 1906, set forth facts which show that after due diligence personal service of this notice can not be made, it is hereby ordered and directed that such notice be given by due and proper publication.

M. I. CHURCH, Register.

BOUNTIFUL SUPPLY OF FISH

Congressman French Aids in Stocking Idaho Streams.

Congressman French introduced a bill in the house during the last session of congress providing for an appropriation of \$25,000 for a fish hatchery in Idaho. He received a favorable report on his bill from the committee on merchant marine and fisheries, to which it was referred, but the rush of work in congress during the last session on account of the many important matters prevented that bill from being considered. However, as this is a part of the same session of congress, the previous favorable report secured by Mr. French will be before the house, and it will not be necessary for another bill to be introduced or another report secured to entitle the bill to consideration at this session of congress. Mr. French will make an effort to have his bill passed soon after the holidays, and says he has good

hopes of succeeding. The people of Idaho are greatly interested in stocking the rivers, streams and lakes, of the state with fish, says Mr. French, and he has received a great many requests for fish with which to stock these streams. In cases where they have been secured for the people applying for them. Mr. French has been notified by the fish commission that he can have all the fish desired with which to stock, and as the commission has all kinds of fish, persons applying can secure the kind of stock that is best for the particular lake or stream to be stocked.

Notice for Publication—Final Proof.
I, Charles G. Raby of Twin Falls, who made entry No. 1616, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1899, which embraces lot 2 of section 2, township 10 S., range 17 E., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on and cultivated said land as required by law, before W. O. Taylor, representative of the State Land board, at Twin Falls, on January 29, 1907, by two of the following witnesses: James A. Waters, C. O. Morrell, C. H. Hiny, Edwin H. Adams, all of Twin Falls.

TO BUILD BUHL HAGERMAN ROAD

FARMERS RAISING FUNDS BY
SUBSCRIPTION.

Mail Service Cut Down to Alternate
Days on Account of the Bad Roads
—Christmas Entertainment Proves
to Be a Grand Success.

BUHL, Dec. 26.—W. H. Griffith of
Mid Springs was in town Friday
soliciting subscriptions for building a
road on a better grade and shorter
route from Hagerman to Buhl. He
says the people down his way have
been waiting for the company to
build the road, as it promised, and
that the people have determined to
build it themselves and wait no
longer.

Superintendent Conway is busy run-
ning water pipes from the main
water pipe system to the buildings
along the streets.

The ranchmen are well pleased
with the news that the state land
board has rejected the proposal of the
Land & Water Co. to transfer the
canal system at this time but not
knowing what move the company may
make next, they have decided to re-
main vigilant and see to it that they
are not caught napping.

Sam Holt of Kimberly, with his
wife and daughter, passed through
town Sunday on their way to Boise.
They are driving overland. Mr. Holt
makes Boise his future home. The
family met many old friends here,
among whom were Mr. and Mrs. Geo.
L. Eveleth and J. H. Schooner.

E. H. Hardy came up from Hager-
man last week on business and spent
a few days in town.

Geo. L. Eveleth went to Shoshone
Thursday on business and returned
home on Sunday.

J. E. Sawyers of Salmon Creek was
a Buhl visitor Saturday.

J. D. Fleming of St. Louis was a
guest at Hotel Buhl last week and
took a look around the country.

A. W. Bishop of Deep Creek was
shaking hands with friends in Buhl
Friday.

Elmer Corb, a traveling man from
Portland, made the town Friday—and
did a good business.

G. Konzo of Tillamook, Oregon, is
visiting with T. W. Bowley on the
Lakota ranch.

J. E. Van Aiken of Twin Falls was
in town last week and painted a big
sign for the Western Hotel.

One of the Buhl Mercantile Co.,
Linnie Eden of Murtaugh, came up
from that town Saturday and is em-
ployed as a printer on the Buhl Post.

Albert Herrin of North Yakima
spent two days of the past week look-
ing over the country and left Monday
for Twin Falls to file on some of it.

Mr. and Mrs. John Hopkins of Clear
Lake spent the Christmas with Mr. and
Mrs. Geo. L. Eveleth.

George B. Farnsworth, editor of the
Twin Falls News, is on the Snake
again, duck hunting. He intends to
spend several days in that pastime,
and will be the guest of Jess Ho-
lmes and the Riverdale ranch while
enjoying himself.

W. W. Humphrey, the genial livery
man of Twin Falls, came up Sunday
with C. B. Farnsworth and returned
the same day. He said that Buhl was
bound to be a hummer.

J. A. Parker of Twin Falls was a
Buhl visitor Sunday. He put up at
Hotel Buhl.

J. P. Stout of Hastings, Neb., has
been here for a few days sipping up
the country and he is so well pleased
with it that he is going to take 120
acres of it.

C. B. Millikin has returned from a
several weeks' trip around the coun-
try. He reports having had a good
time.

C. B. Harrah came up from Twin
Falls Sunday and returned Tuesday.
D. W. Leaman, ditch rider, came in
to town Saturday to see his friends
and attend the Odd Fellows' meeting.

W. R. Lindsay has been appointed
in place of Lindsay Hudson, who has
gone to California for the winter. If
you have any kick coming on this
end of the tract about any old thing
in connection with the Land & Water
Co.'s affairs see Mr. Lindsay about it
and he will fix you all right.

The new schoolhouse is finished.
The seats are in place and ready for
business after the holiday season is
over.

The Christmas tree was set up in
the new schoolhouse, and the young
people were happy. It was a big one
and loaded down with all kinds of
nice presents that Santa Claus
brought to the children, and he re-
membered many old people too, know-
ing that we never get too old to be
children on Christmas eve.

The condition of the roads is so
bad that it became necessary to cut
the mail service between Twin Falls
and Buhl down to every other day.
This makes it very inconvenient for
us, as business is increasing rapidly
and requires a daily mail service, but
it seems that it cannot be helped and
that we will have to put up with it
as it is.

Sunday school was held in the of-
fice of the hotel last Sunday on ac-
count of the state building being in
shape for Mr. Larsen's clothing store.

H. Schooler drove George Wil-
son and W. B. Hubbell to Twin Falls
Monday.

Linnie and Gretchen Milner, two
young daughters of E. A. Milner, came
up Friday from Pocatello where they
are attending the academy to spend
the holidays with their father and
sister Edith. They like the school
and are well pleased with their cir-
cumstances here.

Drs. T. M. Gilmore and W. H.
Clouche performed an operation on
John P. Melvin Tuesday to remove
a tumor. The operation was a suc-
cess and Mr. Melvin is doing well.

The Sunday school organ has been
placed in the hotel office and now the
guests may take their lunch "with mu-
sic" as a son of the fatherland would
put it.

Dr. James Monroe went to Hager-
man Monday to spend the holidays
with his family there.

The Farmers' association held an
adjourned meeting Monday after-
noon for the further consideration of
the question of the canal transfer, at
which time the following was read:

The News containing the statement that
the land board had rejected the Land
& Water Co.'s proposal to make the
transfer or any change in the con-
tracts, showed a deep interest in the subject.
Many speeches were made and show-
ed the sentiment to be against the
transfer and the canal transfer.

The question as to the ef-
fect of the construction of the north
side canal would have on the water
right of the people on the south side
was discussed, but it seemed to be
finally understood that the south side
had the prior right to the water and
could not be injuriously affected by
the building of the north side canal.

During the discussion the statement
was made that the question of most
vital interest to the ranchmen was
the condition of the Milner dam, which
it was asserted was not sound.

The speaker described the condition
of the dam and aroused intense at-
tention. It was suggested that a
committee be appointed to go up and
thoroughly inspect the dam before the
land board met again to consider the
question of the transfer. Many of
those present at the meeting joined
the Canal association through Messrs.
Buel, Berry and Harris, who re-
present the association here. It was
decided on motion to continue the as-
sociation meetings and to change the
time of meeting from Monday night
to 2 o'clock p. m. every alternate
Monday.

Calico bargains hour at the Idaho
Department store on Monday after-
noon from 2 to 3 o'clock. Calico will
be sold at 3 1/2 cents per yard for just
60 minutes only. Come early for bar-
gains.

FILER CITIZENS ARE CHEERING UP

PLEASED OVER THE RAILWAY
PROSPECTS.

Good Progress is Being Made on the
Grade—Farmers' Association to
Discuss Proposed Transfer of Canal
System.

FILER, Dec. 26.—The order of the
court appointing making a uniform
rate for box rent reduces the rent in
Filer materially. The rate originally
ordered for the office was 50 cents
per quarter for call boxes and 75
cents per quarter for lock boxes. The
new order reduces the call boxes to
10 cents per quarter and the lock
boxes to 25 cents. It will become ef-
fective on January 1.

Since the last barrier to the con-
struction of the railway has been
swept aside, Filer is taking on new
life. Everybody is more cheerful and
spring is ahead with keen anticipa-
tion. The prospects are very alluring
and the people in this section are ap-
preciating more and more the fact
that they are fortunately situated.
With transportation facilities Filer is
bound to forge ahead as its surround-
ings and citizenship are second to
none.

At the Filer schoolhouse on Thurs-
day evening, January 10, the Farm-
ers' association will discuss the con-
tract between the state and the Twin
Falls Land & Water company and its
bearing upon the proposal of the Wa-
ter company to organize an operating
company to control the distribution of
water. Messrs. Evans and Chamberlain
will take part in the discussion.

H. G. Munyon has completed his
new drug store and law office and en-
joys the distinction of being the first
attorney to practice in the town. He
has a splendid library and, being a
courteous, affable and conscientious
gentleman, he is certain to succeed.

Miss Anna Meyers, pastor of the
Mennonite Brothers in Christ church,
and Rev. W. H. Schnake of the Evan-
gelical Lutheran church conducted
Christmas services in Filer which
were well attended and highly ap-
preciated.

G. L. Cox, assistant engineer for
the O. S. L., located at Filer, left
for New York last Monday to
spread his vacation and visit his old
home, from which he has been absent
for three years.

the O. S. L., located at Filer, left
for New York last Monday to
spread his vacation and visit his old
home, from which he has been absent
for three years.

Miss Anna Meyers, pastor of the
Mennonite Brothers in Christ church,
and Rev. W. H. Schnake of the Evan-
gelical Lutheran church conducted
Christmas services in Filer which
were well attended and highly ap-
preciated.

G. L. Cox, assistant engineer for
the O. S. L., located at Filer, left
for New York last Monday to
spread his vacation and visit his old
home, from which he has been absent
for three years.
