NUMBER 36.

## CELEBRATION A GRAND SUCCESS

ATTENDANCE BROKE ALL PREVIOUS RECORDS.

Parade Witnessed by Immense Throng and Proved Even Better than Anticipated—Eloquent Address Delivered by Hon. Glenn McKinlay.

Without mishap or unpleasantness of any kind to mar the pleasure of the day, the Fourth of July was celebrated in Twin Falls yesterday on a magnificent scale. The program was carried out without a skip and from the moment when the first gun was fired at sunrise until the last rocket faded away at night the day was one of unbroken pleasure. Estimates as to the probable attendance vary, but all agree that the crowd was the largest that the city has ever entertained. Bunnell, Miller, Hansen, Rock Creek, Murrell, and Three Creek were all well represented.

The parade was exceptionally good and was well conducted. Judge McKinlay, in his speech, was very much and wearing the national colors across his breast, kept the line intact and everything in motion. He seemed to be right on the spot whenever his presence was needed and there were no waits or lags.

Spectators lined the streets all along the line of march and cheered the features. At the head of the procession walked the members of the Twin Falls band in uniform, natty and sprightly. The Elks looked cool and handsome in white duck. The Woodmen showed up in strength and the Odd Fellows and Knights made an excellent appearance. The little girls representing the states march a beautiful picture and the eight wagons loaded with school children furnished an inspiring spectacle. The wagons were lined up behind a big traction engine and they were cheered every inch of the way. The implement houses showed off their public spirit by furnishing strong features. The Idaho Department Store float was a beauty and the Knights of Pythias likewise had an excellent float in line. Carl Meigs contributed liberally to the appearance of the parade and the Poland Transfer Co. has its trademark on a pretty float. The parade was quite lengthy and the marching occupied considerable time. The prizes will be announced next week, it being impossible to award them today. Taken as a whole the parade was extremely creditable and was worthy of a much larger city.

The exercises at the park were carried out according to program without variation. Some commotion was caused when a fire broke out in Pete Holsman's team attached to a wagon containing Mrs. Glenn McKinlay and her children. Mr. McKinlay was delivering his address at the time and as the horses started to run he leaped from the platform, sprinted to the heads of the horses and checked them before any damage was done. It was a plucky act and one which required nerve and coolness. Frank Chamberlain and Mr. Harris were prompt to see the horses. Mr. Harris injured his arm in the operation. Mr. Holsman's horses are as quiet as tame mice but the team in front of them was scared by a cracker and the crowd was scattered. Mr. McKinlay was cheered for his courage. His address was the right length and was near from beginning to end. He laid particular stress upon the awakening in Idaho and the marvelous development in all sections of the state. The north was producing more timber, more metal and more grain, while the south was building up empires, increasing the population and wealth of the state. "Three years ago," said Mr. McKinlay, "I left this section of Idaho a desert waste, I returned to find it an em-

pire. You are doing a great work here and the history that you are making today will be among the greatest chapters in the history of the state. Travelers no longer shut their car windows at Green River not to open them until Huntington is passed. The Carey act has made possible the greatest irrigation project in America, if not in the world. It has brought to Idaho a class of people not excelled in citizenship on the face of the globe. It has added millions of dollars to the wealth of the state and will add millions more. The Twin Falls project has given irrigation a stimulus it never enjoyed before. It has made the construction of other projects possible and as an asset of the state it stands beside our magnificent forests and gigantic mines in the north, priceless jewels in the Gem of the Mountains. Idaho has become something more than a stepping stone on the way to the Pacific coast. The Carey act has swept from the map those tracts formerly designated as deserts. I believe we have made a big step toward the reclamation of the Snake river water and capital are making new Idaho. The citizens of north Idaho are no longer strangers to those of south Idaho. Three sections of families exist in this splendid audience. When it

boys had big heels in their line-up and Twin Falls was in much the same predicament. But the boys plugged away and put up a nice exhibition. Immediately after the ball game the field was cleared for the sporting events, which resulted as follows: 50 yards dash for men—George Smith first, Louis Peterson second. 50 yards dash for boys under 10 years—John Groh first, S. Walton second. 100 yards dash for men—Robert Barnes first, George Smith second. 100 yards dash for boys under 10 years—Charles Costello first, David Girdner second. Relay race won by Paul Smith, George Smith, Louis Peterson and Lora Eldred. 300 yards dash for men—Robert Barnes first, George Smith second. 50 yards dash for girls over 12 years—Janice Perkins, first, Louise, Berry second. Three-legged race, 50 yards—Smith and Eldred first, Wilkie and Trout second. Tug-of-war—Won by Twin Falls farmers. Free-for-all horse race—Don Bryan's horse won, J. M. Bunnell's horse second. Half-mile middle race—Roy Cheney first, Claude Whinery second. Horse cart race—Won by John Carl No. 1. Broncho bucking contest—Won by

FRANK H. BUHL.

became no longer necessary for us to traverse Washington and Oregon while we journeyed from north Idaho to south Idaho, then indeed can we shake hands and congratulate ourselves on being citizens of the most resourceful state in the Union."

Mr. McKinlay was frequently cheered during the delivery of his address and he made a splendid impression. Always gifted in oratory, he has, during the six years he studied at Ann Arbor, acquired a poise and polish which readily places him among the foremost speakers in the state.

At the Ball Grounds.

The ball game between Twin Falls and Buhl was a warm event, from a climatic standpoint at any event. The score was 3 to 2, or something like that, in favor of Twin Falls. The Buhl

F. Wireman. The man who captured the greased pig picked up his prize and kept on moving, consequently his name was ascertained. The display of fireworks was grand and was witnessed by a large crowd. A contest not down on the program was that between a dog and a badger which occurred in the vicinity of the depot. The dog could not injure the badger, nor could the badger injure the dog. The appearance of the contest put a stop to the contest before either animal had gained an advantage. The dance in the evening was a grand success, the receipts exceeding the expenses by more than \$50. The dancing floor was crowded all evening and the music was excellent.

## PRESIDENT BUHL DONATES PARK

URNS TWO BLOCKS OVER TO THE CITY.

Blocks Are on the Southeast Side of Shoshone Avenue and Are Set Aside for Park Purposes—Brief Mention of Some of Mr. Buhl's Good Deeds.

President Frank H. Buhl of the Twin Falls Land & Water Co. has presented to the city two of the four blocks reserved in the heart of the townsite for park purposes. These two blocks are located on the southeast side of Shoshone avenue. There are no strings to Mr. Buhl's gift which was made with the same lack of ostentation that accompanied his numerous other gratuities on the Twin Falls tract. At the council meeting on Tuesday evening the gift was acknowledged and accepted as follows: Whereas, the Hon. Frank H. Buhl has presented to the City of Twin Falls the plot of ground bounded by Shoshone avenue, Eighth Avenue,

never makes any fuss over his generous deeds. The amount of money he has spent on different features of the project beyond the requirements of his contract with the state would almost buy an ordinary irrigation system. To him the Twin Falls canal system is something more than a mere vehicle for the distribution of water. He sees and understands the human side. While Mr. Buhl was over at Buhl last autumn he was informed that the first boy born in the city had been christened Frank Buhl. The home of the boy's parents was pointed out to Mr. Buhl, who inquired if it was reached by the waterworks. He was told that the system did not go that far and that the cost of extending it would be considerable on account of heavy rockwork. "That's all right," said Mr. Buhl, "make the extension; that boy must have his bath." The extension cost over \$2500, incidentally the boy was given a business lot and residence lot in Buhl and he will likewise have the first account in the new bank there in which Mr. Buhl is interested.

Frank H. Buhl is a plain spoken and quick acting man. There is no hesitation in his make-up. His eye is aye and his may is nay and he is not put off by the waterworks. His simple verbal assurance is as good as a government bond. "The heart is in the right place at all times and in him the Twin Falls tract has a friend indeed."

MRS. FRANK H. BUHL.

Sixth avenue and Ninth street, in the said city, as a public park for the use of the said city and the inhabitants thereof for park purposes, therefore be it

Resolved, by the mayor and city council of the City of Twin Falls, Idaho, that the said gift be and the same is hereby accepted by the said city, and that a vote of thanks be and the same is hereby tendered to the citizens, that the said gift be and the same is hereby accepted by the said city, and that a copy of this resolution be mailed to the donor. Resolved, That this resolution be spread upon the records of the City of Twin Falls as lasting proof of the appreciation of the citizens thereof for the generous and munificent gift of Mr. Buhl, and that a copy of this resolution be mailed to the donor. Adopted by the city council of the City of Twin Falls the 2nd day of July, 1907.

Approved by the mayor on the 2nd day of July, 1907.

This is not the first time that Mr. Buhl has given his heart to the people of Twin Falls. In addition to giving the hospital site last for a city, Mr. Buhl contributed \$500 in cash to the institution. Through his generosity every child in the city has a building site. The city has two well located blocks for school sites. The county has a block on which to erect the county building. When the city was young and hard up Mr. Buhl dug into his pocketbook and furnished the cash to buy sprinkling carts and for the purchase of a fire engine. He contributed to the extent of several hundred dollars toward the fair last year. The Rock creek bridge represents a gift to the city from Mr. Buhl of more than \$1000 cash. Moreover, he has furnished lumber to the value of more than \$5000 for bridge building elsewhere on the tract. He was under no obligation whatever to furnish this lumber but he found out that the bridges were needed and he could see that the material was for some use. Never has he refused to contribute to any worthy cause and the various donations he has made at different times to defray the cost of entertainment or celebration would aggregate several thousand dollars. To his nameless, the city of Buhl, he has given \$25,000 for a public school building. The Twin Falls tract is indeed fortunate in having the backing and good will of such a man as Mr. Buhl. He does everything quietly and

## CANAL TRANSFER.

The state land board has set August 20 as the date when a hearing will be had for the purpose of perfecting arrangements for the transfer of the Twin Falls canal system from the company to the settlers. The transfer committee has directed to prepare the articles of incorporation for the Twin Falls Canal Co., Ltd. The land board has agreed to send an engineer here to estimate the amount of work remaining to be done on the system which cannot be done until a more opportune time. Some of the work will involve the turning of water out of the canal and this is important in the irrigation season. The board has notified the Canal association to engage an engineer at the expense of the state to cooperate with the engineer employed by the land board in making the estimate. When the estimate is turned upon the Land and Water company will turn over to the Canal association in cash the sum required to complete the work. It would be a useless waste of money to do much of the work at present. The sum turned over will be held by the Canal association for the express purpose of covering the cost of the work and for no other use, and it will be expended as conditions permit.

Ned Maher, who handles the freight for the Oregon Short Line at the Twin Falls freight house, was seriously injured about the time this afternoon by the explosion of a dynamite cap which had been placed in the ear of one of his boys. In the apartment in which the lead seal is pressed and when Maher tried to seal a car the cap was exploded by the pressure, burning him in the face and injuring one of his eyes. How the cap was placed in the ear nobody can conjecture. Dr. Cluechek, the Oregon Short Line physician, gave Maher prompt relief but he is suffering intensely and possibly the sight of one eye may be affected.

## ARRANGING FOR HANSEN OPENING

TOWNSITE WILL SOON BE PUT ON THE MARKET.

Date Will Be Set Before the North Side Opening on October 1—Large Number of Hansen Citizens Celebrate the Fourth at Twin Falls.

HANSEN, July 4.—Hurrah for the glorious Fourth!

A. P. Murray, of Rock Creek, was a Hansen caller Saturday taking out a load of lumber from the Wester yard on his return trip.

F. E. Griswold of the Charleward Farm Co. took the early morning freight Saturday to Minkola, at which place he met his wife and family. They came down on the noon train. Mrs. Griswold seems very much pleased with her new home though it is quite different to her place at Colorado Springs, Colo. Mr. Griswold is rushing his house to completion. It will be ready to move into it the first of next week.

W. E. Deers, the hustling implement dealer of Murrell, was in Hansen this week selling and delivering former orders of agricultural implements. Those who made purchases are as follows: Bunnell Bros., a binder; R. D. Heberts, top buggy; E. L. Ricks, hayrack, tools, and Nick Smith, hayrack.

W. F. Brewer has been busy the past week constructing window and door frames for R. J. Neely and Ezra Williams.

N. P. Anderson, foreman of the Jap gang, has been doing some repair work along the Oregon Short Line in the vicinity of Hansen for the past week. Mrs. Anderson came down from their home at Hoyburn to spend the glorious Fourth with her husband at Twin Falls.

Mrs. S. S. Morrill was a Twin Falls visitor Monday.

B. E. Rose is helping F. M. Towne lay this week.

The Japs gave a fine display of fireworks Tuesday evening while camped on the Hansen siding. The rockets were of their own manufacture and more brilliant than the ordinary American production.

Ben Walton made a call at his home in Hansen over night Monday. Mr. Walton is employed with the north side engineering corps.

Mrs. Morrill of Twin Falls was a Hansen visitor Tuesday, going out to their ranch near town.

J. W. Frabin had the misfortune to lose a valuable horse last week. The symptoms were difficult of diagnosis and the real cause of the loss was not discovered in time to save the animal. The post mortem examination revealed the presence of great masses of botry, which were probably the cause of the fatality.

Mrs. W. N. Rose and Miss Gertrude Walton were among the passengers to Twin Falls Wednesday.

T. Hamilton, central townsite manager, spent some time Wednesday looking over the tract and arranging the work on the townsite. Mr. Hamilton's employees for the past week have been busy with the north side opening of Carey land in October. The people whom Mr. Hamilton represents do not believe they will have a "hot" day in the fall. The townsite as the depot is constructed by the Oregon Short Line and an agent installed along the Rock Creek road and much other traffic points will be transferred to Hansen. Already there is talk of a best sugar factory in the near future, the power to be furnished by the flow of the low level of the canal at the point where it descends 30 feet in the distance of half a mile. This power is located within a few miles of the townsite. The site of the proposed sugar factory will be given later.

Short James sold his 40-acre tract for \$1000 and has two immediate possessions. The purchaser is J. M. Shively, who has been looking over the country for several days. His former home was at Eugene, Ore.

Parade will be well represented at the celebration at Twin Falls. All true Americans will feel the grandest banner ever unfurled today. The parade in which the state has been to recognize the anniversary of the day when we were declared "a free and independent nation."

RAN INTO BARBED WIRE FENCE

George Tadlock Meets with a Serious Accident.

While George Tadlock of Rock Creek was riding into Twin Falls yesterday morning to attend the celebration he ran into a barbed-wire fence across the road about three and a half miles south of town. His horse was frightened, cut and had to be destroyed and Tadlock's leg was so badly lacerated about the knee that the best he can hope for is a stiff knee for life. The knee cap was literally torn from the socket.

The course of the dead had been changed at the point where Tadlock ran into the fence, and the old road was being closed with wire. Tadlock was jumping along and never saw the barbed wire until his horse piled into it. The fence had been placed across the road to conform to a survey line and to a man on horseback the wire was difficult to see.

## After the Fourth!

Now is the time to secure special bargains in hot-weather-clothes.

Two-piece suits, straw hats and light underwear, must go at any old price.

Cool collars in quarter sizes.

# Edridge Clothing Co.

## Summer---The Time for CEREALS

Summer is the time for cereals—that is, the proper cereals. Man should not eat meat during the summer months any more than he can help, as meat causes the blood to heat and over-exerts the digestive system. That is why one feels sluggish after a noonday meal of heavy foods. We carry all the best grades of cereals. Let us have your next order for this grade of goods and we know you will be satisfied.

## Perrine & Burton

General Merchandise

## Eureka Hotel

J. C. GIRDNER, Prop.

Everybody works at the Eureka hotel but father and he's too fat. He don't do nothing but bring in fresh vegetables from the ranch every day. That's why we can give you the best rates in Twin Falls. Give us a trial and be convinced. First class women cooks.

Good Clean Beds, 25 Cents.

Meal Ticket, good for 21 meals, \$4.00.

Board and room by the week, \$5.00.

Hot Cakes and Coffee for Breakfast, 10 cents.

Meal Hours from 6:30 a. m. to 7:30 p. m.

DEALER IN ALL KINDS OF

Lumber, Coal, Lime, Portland-Cement, Fence  
Posts, Builders' Hardware

Yards at RUPERT, BURLEY, KIMBERLY, TWIN FALLS, FILER.

## BETTER LOCATION FOR HOSE CARTS

WILL BE MOVED CLOSER TO THE BUSINESS CENTER.

One Cart Will Be Placed at Each End of the City in Order to Minimize the Loss of Time Consumed in Running to Fires.

The city council has decided to change the location of the hose carts, placing one at each end of the business district. In order that time may be saved by the firemen in getting to fires. The building formerly occupied as an office by the Braun-Transfer Co. can be rented from month to month at a monthly rental of \$5. It would be possible to move the present fire hall to a more central location. Mayor Vogt stated that the Townsite company would allow the city to use an unoccupied lot for the time being, the understanding being that the fire hall, which is a wooden building, would not be obtrusively placed in contrast with better structures. Until all danger from fire through the discharge of fireworks in the past the hose carts will be kept on Main street.

The council, at its adjourned meeting on Tuesday evening, accepted the trunk sewer system and settled in full with the contractors, R. M. Benson & Co. On the recommendation of Engineer R. S. Cookingham the five per cent. of the contract price which according to the contract, might have been withheld for one year, was paid to his honor the engineer. He stated that the work had been performed in a very careful manner.

The council passed upon a number of bills and adjourned to meet on July 17, when the lateral sewer question will be taken up.

## BIG TRADE IN IMPLEMENTS.

Consolidated Wagon & Machine Co. Sells Over 50 Binders in the City of Twin Falls.

An immense crop of grain will be harvested on the Twin Falls tract this year. That the farmers are preparing to take care of the crop is evidenced by the fact that the Consolidated Wagon & Machine Co. has already sold over 50 binders in Twin Falls. The company is handling the McCormick Special 1907 binder, which is built especially for use on irrigated lands. The frame of the Special is extra stout to withstand the pounding caused by corrugations and subsoil. It is a machine that will do the work in the east, where the ground is level and the soil is rich, and it is also adapted to the irrigated ground. The big eastern factories are now making machinery especially suited to irrigated lands and the McCormick Special 1907 binder is the latest in the harvesting line.

The Consolidated Wagon & Machine Co. is still cramped for space, but its salesmen and saleswomen are making a record for business and competence. Everything is in place where it can be seen and reached. The floors are as clean as a plate and the appearance on all sides. The company is selling its stock on the correct theory that the Twin Falls farmers will require a lot of implements and will have all the best. With every shipment is a large quantity of extras. The extra question is one to which the leading dealers pay close attention. Farmers have found that it does not pay to buy implements for which extras cannot be readily obtained and they are confining their patronage to those houses which keep a full line of extras of all kinds constantly on hand.

The Consolidated is also putting out a very handsome colored calendar, dating from July 1, 1907, to June 30, 1908. It contains splendid portraits of Washington, Jefferson, Lincoln, Grant, Lee, McKinley and Roosevelt, an eulogy on Washington, Lincoln's speech at Gettysburg, the Declaration of Independence, statistics on the civil war and pictures of the Washington and Lincoln monuments, Lee statue and Grant's tomb. It is a beautiful piece of lithographic work and an ornament anywhere.

## OREGON SHORT LINE.

### Excursion Rates.

Seashore rates on sale July 4 for special train. Call at depot for particulars. Special rates east, one first class fare, plus \$7, on sale July 18 and 25. Inquire at depot for particulars.

Fourth of July rates, 2 cents per mile in each direction, any point on the Short Line.

National Educational Association convention, Los Angeles, special rates. Dates of sale June 27 to July 8. Call at depot for particulars. D. E. Burley, G. P. and T. A., Salt Lake City. D. S. Stoney, A. G. P. and T. A., Salt Lake City. D. E. Sullivan, agent, Twin Falls.

### Irrigated Lands.

If you contemplate investing in first class irrigated land, we can show you land at very reasonable prices and on terms satisfactory to you.

The lands are famous for fertility and the water supply is never failing. Write today for particulars. THE NORTHWESTERN INVESTMENT CO., Ltd., Boise, Idaho.

### For Rent.

50 acres, 2 1/2 miles south of Twin Falls, all plowed and fenced; fine soil. Inquire of S. T. HAMILTON & CO.

## UNCLE SAM'S WEIGHING MAIL

ALL OUTGOING MATTER MUST GO ON THE SCALES.

Hence the Mails Will Close Half an Hour Earlier than Usual, for the Next Six Months to Allow for Weighing—Pioneer Experiences.

Uncle Sam is "shortening" his mail. He is endeavoring to ascertain the weight of the annual deficit and for the next six months all outgoing mail from the Twin Falls postoffice will be weighed. This means added work for the clerical force and in order to allow time for the weighing operation it will be necessary to close the outgoing mail, hereafter at 4 o'clock in the afternoon, instead of 4:30.

Weighing the mails has often been a source of amusement in the past. When it became known that the mails on a certain route were to be weighed for a space of time, the mail sacks on that particular route were often stuffed to make a showing. It has been charged that congressmen, mailed books, seeds, pamphlets, etc., in liberal quantities on favored star routes during the weighing period.

In the pioneer days when the Idaho mails were carried by stages on the old Boise-Kelton route, which traverses the Twin Falls tract, the weighing periods were very disastrous. They generally came at a time

when the roads were bad and overloading meant grief. The settlers of today can well imagine the difficulty of transporting heavily laden stages across the desert when the mud was two and three feet deep in the ruts. The lumbering vehicles often stuck fast and in order to move them, sacks of congressional records were dumped into the ruts. It is not of record how the weights panned out at the destinations, but old timers declare that the desert highway was paved with government publications which they estimated were so dry that they absorbed all the surplus moisture. Special agents and inspectors were scarce in those days. The stage driver was the harbinger of the transportation lines and he was the sole judge as to what ballast should be cast adrift in times of distress.

Should a Twin Falls settler happen to play up an ancient copy of the congressional record he will know how it came to be on his land, especially if his farm should happen to be marked with two deep gashes, denoting the former presence of the old stage road.

If the old Boise-Kelton road was any worse in the olden days than Shoshone avenue has been at times not long ago the drivers would have almost been justified in using packages of government bonds to load them out of the mud. But times have changed and Uncle Sam's publications are treated with greater respect in the west. This may have something to do with the deficit but the people forget all about it when they want seeds, maps, bulletins and copies of a single issue of a rural paper.

## HOW CLOVER SHOULD BE CURED

Care Necessary in Order to Preserve Nourishment.

Probably no other forage crop is so universally grown and has such an economic value as clover hay, and with no other has the period of curing and manner of curing such an influence upon the feeding value, and no other crop in the northwest causes as much trouble in curing.

Clover is at its best and has great feeding value—digestible—just as it gets to the flowering stage; after that it rapidly grows woody and becomes very quickly less digestible. If cut at the right time and properly cured stock will eat practically the whole plant, stems as well as leaves. If I could cut my whole crop of clover in single day I would wait until the majority of heads were in full bloom, but as this is impossible, and it grows so fast, I prefer to begin cutting as soon as the first heads are formed. In fact, since the advent of the clover midge, which so effectively destroys the blossoms, I do not depend upon the appearance of the blossoms so much as the development of growth. If clover is of good growth a tedder is very necessary in the making of good hay. The blades of the stems after being cut are not so much as the development of growth. If clover is of good growth a tedder is very necessary in the making of good hay. The blades of the stems after being cut are not so much as the development of growth.

If weather is good the second morning, as soon as dew has set off the road, may be spread out and in an hour may be drawn to the mow. If the sun is bright, clover may be put into the mow while containing a good deal of dew, but it does not do to put it into the mow with rain or dew. For that reason it is well to be provided with hay racks to be used in showers and catching weather. If clover is properly put into racks as soon as well wilted it will stand a good deal of rain without much injury.—Rural New Yorker.

There's only one tonic, IRONBREW.

## TWIN FALLS NEWS

Official Paper of Twin Falls County.  
George B. Fraser, Editor.Published every Friday by  
THE NEWS PUBLISHING COMPANY  
TWIN FALLS, IDAHO.Subscription Rates.  
One Year, in Advance, \$2.00  
Six Months, in Advance, \$1.00Reliable information regarding the city and  
country promptly and cheerfully furnished. Ad-  
dress all communications to The News-Publish-  
ing Company, Twin Falls, Idaho.Entered as second-class matter, December 12,  
1904, at the postoffice at Twin Falls, Idaho, under  
the Act of Congress of March 3, 1879.

From the upper Snake river valley come reports of a coal famine of unusual severity. Although the mine owners and railway companies urged the storing of coal during the summer as a safeguard, the dealers were unable to obtain coal to store. Their orders are rejected for the alleged reason that it is impossible to get cars. All the threshing machines in the upper valley are equipped with coal burners and the coal famine threatens the immense grain crop of that section. The situation is reported to be so serious that an appeal will be directed to the interstate commerce commission, showing the conditions and asking for immediate relief. Similar conditions prevail lower down the valley. While a few of the threshing engines are fitted to burn straw, they cannot be moved from farm to farm without the use of coal. Of the several threshing outfits sold in Twin Falls this season, only one is equipped for straw burning. A rise in the price of coal is threatened. In Cassia county, within a day's drive from Twin Falls, are beds of serviceable coal which is extensively used in the vicinity of the fields. Lack of transportation facilities prevents the development of these veins. Fortunately for the Twin Falls farmers, there is plenty of wood in the forest reserve to be had without money and without price.

The lack of pressure in the water mains at the time of the fire last Saturday morning was a very serious matter and should be thoroughly investigated. It is claimed that the proper pressure is not being maintained as it should. The company's franchise calls for working fire pressure. It matters not whether the lack of pressure was due to an accident or otherwise. The city must have fire protection, especially at night. If the mains are not strong enough to withstand pressure at night they should be replaced. The safety of the city cannot be jeopardized because of weak pipe or, for that matter, any other defect in the system. If defects there are, it might be a good idea to place a pressure indicator where it could be inspected daily by the chief of the fire department.

A great many entries have made final proof on their land have gone away without leaving their addresses. The assessor has all the land on his books but he is unable to communicate with many of the owners because they cannot be found. If those who have not received notice from the assessor were to communicate with him by postal they would save that official and themselves a lot of trouble.

The fire ladders acquired themselves splendidly at the blaze on Saturday morning. They never lost their heads for an instant and they worked together with perfect harmony. The department deserves the highest praise for its good work and the public should not forget the fire boys and should see that they are properly encouraged.

## RICH - COPPER VEINS FOUND

In the Trout Creek District, Not Far From Contact, Nevada.

Frank Eastman and L. M. Lucy returned on Wednesday from the Trout creek, Nevada, copper district, which is located on the east side of the Salmon river not far from Contact. They report that a number of rich copper veins have been uncovered in that locality, where a large number of claims have been staked out. Mr. Eastman and Mr. Lucy located nine claims. On this contact well defined fissure veins have been found. John O'Connell has 30 or 40 claims on which the representation work has been done and development work has commenced. Mr. O'Connell also found a fine pocket of high grade gold ore which, it is reported, would average between \$2,000 and \$3,000 a ton. The district is attracting much attention. Twin Falls is the nearest railway point to the Trout creek district and there is a good road all the way. Trout creek empties into the Salmon river near San Jacinto. The claims are located about 15 miles south of the Idaho-Nevada line and on the south side of Colyer mountains.

DICE GAME ENDS  
IN KNIFE PLAY

J. L. BUCKLEY SLASHES HENRY BERGER-AT-MILNER.

Wields a Pocket Knife and Inflicts an Ugly Wound in the Throat—David Walker Breaks His Leg While Competing in Horse Race.

MILNER, July 5.—During an altercation over a game of dice in a saloon here yesterday, J. L. Buckley slashed Henry Berger on the left side of the throat with a pocket knife, inflicting a deep and painful wound though not dangerous wound four inches long. Head the knife penetrated a little deeper Buckley would now be facing a charge of murder. He is now in the county jail at Twin Falls awaiting a preliminary examination on a charge of assault with intent to commit murder. Buckley and Berger were shaking dice when Buckley applied an offensive epithet to Berger, who retorted by calling Buckley a liar. Buckley whipped out his pocket knife and made a pass at Berger's throat. By drawing away just far enough Berger saved his life. Buckley dashed out of the saloon and started for the bridge. Just as he got across the river Constable Smith overtook him and placed him under arrest. At first it was feared that Berger was fatally wounded and sentiment against Buckley ran high for a time. He was taken down to Twin Falls on the freight train. Deputy Sheriff Dyer coming part of the way on the passenger train, took the prisoner from Constable Smith. Buckley has been working as a laborer for Contractor Parls and has about three weeks pay coming in. Parls was employed by Contractor Berger as driver on one of the water wagons.

The celebration yesterday was a grand success in every way. The program was carried out in detail and was witnessed by a large crowd. During the progress of the horse race David Walker of Oakley was thrown from his horse and had a leg broken. The animal stepped into a patch of sand and stumbled. Walker pulled the reins taut and one of the reins broke, causing him to lose his balance and fall to the ground; the horse rolling on his leg and breaking it.

A splendid baseball and athletic ground is being laid out in Milner by the Land and Water company. It will

be handsomely decorated and nicely arranged, the intention being to make it the prettiest ball ground in Idaho.

## ADVERTISED LETTER LIST

List of letters remaining undelivered in the Twin Falls postoffice for the week ending July 1, 1907. Parties calling for these letters will please say, "Advertisement," July 1, 1907."

Notice for Publication—Final Proof.  
I, George H. Vaughan of Twin Falls, the signee of D. E. Wright, who made entry No. 1265, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1899, which embraces the N. 34 of S. 34 of section 4, township 34 S., range 17 E., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before R. B. Williams, representative of the State Land board, at Twin Falls, on the 15th day of June, 1907, by two of the following witnesses: C. O. Poland, B. J. Diller, B. J. Thomas, Dan Thomas, all of Twin Falls, and GEORGE H. VAUGHAN, Entryman.

Deferred until July 5, 1907.  
Deferred until July 13, 1907.

Notice.  
All persons indebted to us will please call and settle immediately as we have closed out our business. Failing in this accounts will be placed in the hands of an attorney for collection. ROBISON, TAGE HDW. CO., Twin Falls, Idaho.

## BREVITIES

Mr. and Mrs. Marvin Gallagher visited at Blue Lakes on Wednesday.

Mr. and Mrs. S. T. Hamilton and daughters enjoyed the "Glorious Fourth" at Blue Lakes.

Miss M. A. Boyle, Mrs. J. V. E. Taylor and S. T. Hamilton spent Sunday at Blue Lakes.

Miss Lena Perrine will leave shortly for an extended visit with her parents in Lebanon, Indiana.

Andrew Robinson of Three Creek was among those who came in from that section to witness the big celebration.

Several fathers walked down to Blue Lakes on Monday morning before breakfast, but they did not like the turbulent appearance of the river as they walked back to the city without attempting to cross.

Some of the varieties of apples in Mr. Perrine's orchard bore so heavily this year that he has had men engaged in thinning them out. The Blue Lakes fruit was not injured in the least by the spring frost.

M. M. Murtz has received an offer from a large mining company to inspect and report on a huge dam for hydraulic sluicing in Alaska where the company owns a considerable amount of valuable placer ground. Mr. Murtz has gone to Philadelphia to attend the annual convocation of the Elks. While east he will confer with the officers of the mining company in New York.

W. W. Humphrey returned on Saturday from Kimberly, Idaho, where he has been looking after the interests of the Montana & Yellowstone Stage Co., of which he is an officer. Mr. Humphrey reports that an unusually large number of tourists are visiting Yellowstone park this year. Parties numbering several hundred are booked over his company's line for weeks ahead. The Oregon Short Line will soon be completed to a point from which the stage road is in excellent condition. Mr. Humphrey states that there is still an enormous quantity of snow on the Tetons and that the Snake River is not likely to go down for some time.

Mrs. George F. Sprague found a neat agate charm on the Three Creek road a few miles north of the Salmon bridge. The charm is oval in shape, bound with a gold rim. On one side are a square and compass with the letter G in the center and beneath are three links in which are the letters F, L and T. On the reverse side is a small gold plate bearing the inscription, "Found on the Snake River, September 25, 1883." Mr. Sprague can recover his property by applying at The News office.

Miss Alice Crismon went to Salt Lake on Saturday for a visit.

L. J. LaFrance has been awarded the contract for the electric wiring of the new Hotel at Milnor.

Rev. E. R. Jones of Pocatello will hold Episcopal services in the Commercial club rooms Tuesday evening, July 30.

Mrs. S. T. Hamilton and her daughters, Beth and Ruth, arrived on Wednesday from Colorado Springs and will remain here for the summer.

E. B. Williams has purchased the house and lot of G. W. Tarr on Ninth avenue. As soon as some alterations are made Mr. and Mrs. Williams will occupy the house.

George Marvin, a member of the Greek construction crew at Filor, had two ribs broken yesterday while engaged in unloading ties. A number of ties slipped and fell on him, crushing his breast.

The three-year-old son of Mr. and Mrs. M. Shores fell from the wagon while his parents were driving home from the ball ground yesterday and broke his left leg just above the knee. The child was riding in the front seat when he lost his balance and tumbled out. He is resting comfortably.

During a ball game at Kimberly last Sunday between the Twin Falls firemen and the Kimberly team one of the frames collided with a fired McMillan at first base, hitting him a severe blow across the kidneys. The collision was purely accidental but it put Mac out of the game and he suffers considerably. This accounts for the lack of Kimberly news in this week's issue.

There will soon be some extensive building operations on Shoshone avenue. Frank Smith intends to put up five stores on the southern side of the avenue across the alley from the rear of Perrine & Burton's. Johnson Bros. are figuring building next to Frank Hutto's residence on the northwest side of the avenue and Dave Smith is also planning a block on the opposite side. If all the contemplated buildings go up, and there are no reasons why they should not, the appearance of the avenue will be wonderfully improved.

C. E. Evans encountered a wild animal of some kind on the road near his residence while he was going home last Friday evening. It looked like a bobcat but it had a tail about two feet long. The beast was light in color and belly bared. The claws were dark and the ears sharp but not pointed. Mr. Evans fired two shots at the animal at close range and wounded it seriously if not fatally. It crawled to the rim rock and disappeared in the canyon. There were a number of carcasses in the vicinity of where the animal was seen and dogs congregated there up to daylight. Since then no dogs have been seen and the supposition is that the cougar or bobcat drove them away.

Mr. and Mrs. Scott Delg of Duhl took in the celebration here yesterday.

Mrs. Robert W. Steele, who has been ill for the past week, is somewhat improved.

Dr. J. O. Boyd has gone to Rochester, Minn., on a business trip. Mrs. Boyd accompanied him as far as Salt Lake City.

Professor T. W. Potter left today for Los Angeles, California, where he will attend the meeting of the National Educational association.

The members of the choir of the Presbyterian church were entertained at a strawberry supper by John R. Newton at his home last Monday night.

An attempt was made to break into the county jail yesterday night. An axe was used with some effect but the party or parties were evidently frightened before they could finish their work.

While camped near the Salmon bridge last week, George F. Sprague lost a dark bay mare, mane closely reached, fetlocks trimmed, weight about 1200. The animal ran away and was later seen in the foothills to the south.

W. F. Bury and James Cameron have purchased the Bradley & Price restaurant. The interior of the dining room has been entirely overhauled. A lunch counter has been added; also several private booths.

Word has been received of the death of Clarence Ernst, the 12-year-old son of Mr. and Mrs. R. C. Ernst of Cornelia, California, formerly of this city. The boy died of diphtheria on the 9th of June. Mr. and Mrs. Ernst have many friends here who will sympathize with them in their affliction.

Mrs. H. O. Miller gave a delightful mother's tea in honor of her mother-in-law, Mrs. John Miller of Salt Lake, last Tuesday afternoon. Mrs. John Miller is one of those delightful old ladies so rarely seen nowadays and the ladies who had the pleasure of meeting her were Mesdames Fuller, Nixon, H. D. Pike, Rankely, Layle, Clouche, Smith and Fielding. Tea was served with the guest of honor at the tea urn.

Hon. Glenn P. McKinlay, who delivered the address of the day at the park yesterday, arrived from Ann Arbor, Michigan, on Wednesday, accompanied by Mrs. McKinlay and their two children. Mr. McKinlay has been studying law at Ann Arbor for the past six years, graduating last month. He will practice in Idaho. Mr. McKinlay stated that no less than 1600 students graduated at Ann Arbor this year. He considers it the greatest university in the country. Mr. McKinlay had not seen Idaho for three years and he was astounded at the improvement, especially in this section of the state.

D. R. Grossman, a brother of James Grossman, is visiting in the city for a few weeks.

A party of 50 Donskars enjoyed a picnic at the Blue Lakes on the Fourth.

Miss Margaret White, formerly clerk in the postoffice, is in the city again. Miss White had been in California for several weeks regarding her health.

Mr. and Mrs. W. A. Dellow, parents of Miss Edna Dellow, are in the city for a few days. Mr. and Mrs. Dellow are from Pomeroy, Wash.

R. B. Hoyt, assistant station agent in Twin Falls, will leave today for Elly, Nevada, for a vacation. He will be relieved by C. H. Taylor, formerly cashier at the depot, who will remain here until the Duhl station is opened.

A cement sidewalk is being laid on the south side of Main street between the Boyd block and the Idaho Department store. Another section of cement walk is also being put down on the south side of Main street between Sixth and Seventh streets.

R. C. Beach of Lewiston, who owns considerable city and farm property on the Twin Falls tract, was here for a few days this week. He was immensely pleased with the looks of the tract and declared he never saw finer crops in his life. While here Mr. Beach put in a bid for the first lot in Jerome, offering Bob McCollum \$1250 for the choice. He will be over at the opening in Jerome on October 1.

Agent D. E. Sullivan of the Oregon Short Line will leave in a few days for Seattle, where he will visit for two months or more. This will be "Sully's" first vacation in seven years and he proposes to make the most of it. He will take in every city of note from New Orleans to Minneapolis and will continue to see all the baseball games he can crowd in. Mrs. Sullivan and the children will accompany him.

Four cars of steel rails have arrived for the Duhl extension. Ten cars more will be required to complete the work, if the steel comes the track-laying should be finished by July 10. A box car will be fitted up as a temporary depot with C. H. Taylor as agent. Mr. Taylor has a farm near Duhl which he is improving. The intention is to run the freight train through to Duhl daily until the track is surfaced.

P. J. Holohan returned yesterday from the east. He had been away from home for several weeks, touring the northwest in the interest of the Dupont Powder Co. Mr. Holohan took part in the Grand American handicap at Chicago and made an excellent score. This was the first time that the blue ribbon event of the traps. The number of entries in the Grand American was larger this year than ever and competition was very keen.

**We Handle Quickly**

A great many lines in Stationery but never equals with prices. We furnish every facility for writing, for the busy or the office and the only thing there is about our trade is the low price that accompanies the highest quality. ## SHOWS - BIG INCREASE

Twin Falls Firm Increases Business 50 Per Cent Over Same Month Last Year.

The month of June past has been a prosperous one for Twin Falls, as shown by the business done by Twin Falls merchants. Mrs. Booth of the Booth Dry Goods Co. states that their business during June shows an increase of fully 50 per cent over June last year, which is a gigantic stride for this firm, and business well merited, as Mr. Booth always endeavors to obtain the best in the market for his customers. The Booth Dry Goods Co. are offering exceptional bargains in many lines that will pay one to inspect, and no doubt the business of this firm will continue to increase.

START BUHL CEMETERY.

Was Down and Out for a Time but is  
Now 'Convalescing'—Several New  
Business Buildings in Prospect—  
Modern Woodmen Form a Camp.

BUHL, Idaho, July 3.—Many of the readers of The News have asked me if I am not going to write any more for that paper. It is gratifying to learn that one's efforts to relate the happenings in and around this bustling infant city have proved sufficiently interesting to attract notice. The people of the town know that for several days of the past three weeks I was a prominent candidate for the honor of furnishing the material with which to start the undertakers and the cemetery people in motion and in business, and it seems I might have achieved that distinction if Mrs. Jacoby of the Hotel Buhl had not registered a vigorous protest against it by declaring that no one should stumble off the mortar-cott in their popular hostility while she had anything to do with its management—and when the time came for the medicine man to render his final decision, Dr. Monahan balked and backed away. He said that he had a kindly feeling for the undertakers and the bonyard people, as they are all on the same lay, but that he was not burning with a desire for the distinction to be the first to furnish them with an opportunity for active operations. Hence, though somewhat disgraced, your humble and obedient servant is still on deck, and will do his best in the future as he has done in the past to keep the readers of The News informed of the happenings in bustling, busy, blooming, booming Buhl.

The Buhl Trading Co. has completed the excavation for the addition to their store building on Broadway and will soon commence the erection of the addition.

R. C. Beach of Lewiston, Idaho, accompanied by J. H. Day of Twin Falls, was in town Monday. Mr. Beach is the owner of the corner lot on Main and Broadway which will be auctioned on the opening day for \$10,000, on which it is said he contemplates building at once.

Miss Edith Miller has been confined to her bed on account of sickness for several days. Dr. Boyd of Twin Falls is attending her and reports her condition as not being dangerous.

J. M. Griffith, an old Colorado ranchman, has taken charge of E. A. Miller's ranch on Huckleby Heights for the summer and will put it in first class shape for irrigating and cultivation. Mr. Griffith has had many years experience in leveling and irrigating lands in Colorado, and a water man could not have been selected by Mr. Miller for the purpose.

G. E. Paul and W. T. Showman have commenced the erection of two residence buildings in the neighborhood of Thirteenth avenue and Poplar street.

L. A. Havard has commenced excavating for a store building 22x20 feet opposite the postoffice on Main street.

The farming implement men are busy setting up farm machinery and selling it to the ranchmen.

Ed Little of Twin Falls, who has been yard foreman for the Twin Falls

Lumber Co. for the past three years, spent a few days visiting in Buhl recently. He is proving up on his ranch three miles northeast of town and as soon as he gets through with the proof he will commence the erection of a business building in town to be used as a billiard hall, news stand, confectionery and cigar store. He intends to become a permanent resident of Buhl.

The railroad crossing on Broadway is dangerous, as there is considerable of a grade at the point of crossing the track, and the numerous trains passing, together with the amount of switching done in that vicinity, makes it necessary for precautions of some kind to be taken to prevent injury to persons and property, and as it is well-known that the railroad company is too poor to incur the expense of protecting the public in this case, the citizens of the town are raising a fund by subscription to erect danger signals at that point. So we may soon expect to see the old familiar sign, "Railroad Crossing, Look Out for the Cars" in the heart of Buhl.

Osgood & Baldwin were too busy to tell your correspondent of the doings around their establishment during the past week.

It keeps Ed. Larsen hustling to keep enough merchandise hauled in to supply his customers, but he says, "I wait till the rats get here and then see if I don't keep up with them."

Many of the ranchmen have commenced cutting hay in this vicinity.

Christian Behman proved up yesterday and moved his family back to Twin Falls.

Mrs. A. Webster is visiting in Twin Falls.

Miss Xenia Farlow has been on the sick list for the past few days but is now able to be up and around again.

George J. Berry, representing the Boise Statesman, was in town Monday and Tuesday and secured many subscriptions for his paper. Mr. Berry crossed this tract with an ox team in 1853 on his way from Indiana to Puget sound. It took the party seven months to make the trip.

Mrs. J. M. Rogers, who has been with her husband on his ranch for the past month doing the proving up act, returned to Twin Falls yesterday.

The doctor is still in Buhl and busy sticking gold into people's teeth.

John Rogers, district deputy of the Modern Woodmen of America, has been in town for three days and organized a camp of the Modern Woodmen here last night.

Herman Gorr, is painting the Citizens State bank. Main street is putting on all kinds of airs these days, with its new bank building, new restaurants and barber shop.

Jim Patten left last Friday for Kirksville, Mo., where he will spend several weeks visiting his relatives and friends. He was accompanied by his friend, Michael Boon, who has been in Buhl around for ten months.

Ben Howard is helping Andy Wilson do the mizokologist act in Jim's place while the latter is desporting himself on the banks of the big muddy stream. Jim was doing well in Buhl. He had already reached a point where he could see many things without having them pointed out to him, but now it is feared that he will lapse in a "show me" condition of mind in which all good people from old Idaho are found, but worse than all that is the fact that it is said when he returns it will be seen that the barbers' club will have lost one of its most highly respected and valued members.

It is reported that the Parker-Mars shall people have a carload of fireworks to burn on the Glorious Fourth.

Mrs. Andy Wilson went to Twin

Falls Monday to visit her sister, Mrs. George Wilson, who is sick with typhoid fever.

W. A. Tull of Fallon, Nev., is a new arrival in town who does not propose to lose any time in getting down to business. He bought two lots—one on Broadway and one on Main street, and will commence the erection of business blocks on them at once. He paid \$1000 apiece for the lots. Real estate is going up.

Deputy Sheriff C. W. Dyer of Twin Falls was a Buhl business visitor Wednesday. He took the alleged forger, G. A. Miller to Twin Falls after the latter waived his preliminary hearing.

J. E. Close was a guest of Hotel Buhl Wednesday.

Fred Voigt, secretary of the Twin Falls Land and Water Co., accompanied by Miss Belle Chamberlain, superintendent of public instruction, was in town Thursday on business connected with school matters.

R. N. Ingraham of Hagerman was a Buhl business visitor Thursday.

Charles Innes of Castle Ford registered at Hotel Buhl Saturday.

Prof. Geo. H. Watt of Pullman, Wash., arrived in town Monday. Prof. Watt owns 100 acres close to town and is here looking after his interests.

Quite a number of Buhliites are preparing to help celebrate the Glorious Fourth in Twin Falls.

W. N. Clark proved up yesterday and started for Blue Lake this morning.

FIRE CONSUMES  
NEW BRICK BLOCK

OWNED BY R. W. JONES, JOHN  
PETERS AND ROSS BONHAM.

Flames Destroy the Interior Work, Allowing the Walls to Collapse—Firemen Did Splendid Work but Water Pressure Was Inadequate.

The most disastrous fire in the history of Twin Falls occurred on Saturday morning when the three-story brick building recently erected on Main street, between Tenth and Eleventh streets, by R. W. Jones, John Peters and R. E. Bonham, was totally destroyed. The loss to the owners, as nearly as can be ascertained, was \$25,000, of which \$10,000 is covered by insurance. The loss to the city of Twin Falls cannot be computed in dollars and cents, but it is a hard blow to the new town to lose one of its most pretentious business structures.

The two upper floors of the building had been plastered and tinted and the interior work was nearly completed. The structure was consumed, allowing the walls to collapse before sufficient water pressure could be obtained to successfully fight the fire. A strong wind blew from the west but fortunately no other buildings were endangered, except the adjoining structure, occupied by Garl's pool room, which was completely wrecked. The Twin Falls fire department did excellent work and had the water pressure been at all adequate the building might have been saved. The owners will rebuild and they will also endeavor to fasten the responsibility for the lack of water which, they believe, caused the loss.

The fire was discovered at 1:15 in the morning by Joe Van Meter, a barber in Reed's barber shop, and Arthur Hauser of the Brunk Realty Co. Half an hour previously to that time a number of people who had attended the entertainment in Kimberly passed the building and report having seen no traces of fire. Van Meter and Hauser immediately gave the alarm.

Fire Chief Frank Halverson was awakened at 10 minutes of 2 o'clock and five minutes later he had a hose cart on the scene. The cart was propelled by Frank Halverson, Frank Sorenson, Andy Mulholland and De Witt Young. The second hose cart trailed the first closely and the boys had two lines of hose out in a jiffy. For a few minutes the pressure seemed to be all right but it died down to nothing. So feeble did it become that it was impossible to stop the flow at the nozzle of the hose by closing the outlet with the thumb.

De Witt Young hastily telephoned to Manager Ramsey of the Waterworks company and the latter hurried down to the standpipe and opened the valves, letting the water down from

the big tank. The effect in the way of increased pressure was instantaneous, but the flames had made such headway in the meantime that the inner supports of the building had been consumed and the walls caved in with a crash which sent sparks and embers flying in all directions. The fire rads were there like a flash with three streams and in a short time not a trace of flame could have been seen. The ruins were soaked until the last vestige of fire disappeared.

J. C. Garl succeeded in moving a little of his stock and fixtures but his billiard and pool tables were ruined and his place of business wrecked. He carried \$1000 insurance. Messrs. Jones, Peters and Bonham are of the belief that the fire was of incendiary origin. They have secured depositions from persons who declare that the odor of petroleum could be detected in the smoke and that the flames spread upward from the stairway in the center of the building in a manner which indicated something more than dry wood and shavings. Nobody was supposed to be near the building when the fire started, nor was there any material of an inflammable nature stored about the premises. When the fire was first detected the flames appeared to be spreading under the main stairway, which was located in the middle of the building. The high wind swept through this hallway with great force, carrying the blaze with it. The firemen quickly mounted the stairs but the water pressure was so feeble that they could do almost nothing and they barely retreated in time to avoid being caught in the ruins when the walls collapsed.

Manager Fred Ramsey of the Waterworks company said he could not account for the light pressure. All he did, declared Mr. Ramsey, was to open the valves and let the water down from the standpipe. The pressure from the reservoir is controlled by a valve near there. This valve, Mr. Ramsey asserts, was wide open and, so far as he could learn, had not been tampered with.
