

## REPORTS OF ENGINEERS ON TWIN FALLS SYSTEM

NO DULL MOMENTS IN TOWN  
BY THE DAM.

Navigation Company Has Plenty Business—Milner Bank Will Be Open in a Few Days—Independent Telephone Line for the North Side.

MILNER, Idaho, July 10.—Milner spent the most delightful Fourth of July. His little town was crowded all day long and every one seemed in the best of spirits. The races were the worst race in the country, the excitement ran very high. To test the merits of two of the winning horses an extra race was pulled off in which the horses were run over the top of the horse-race ramp over which the excitement ran very high. To test the merits of two of the winning horses an extra race was pulled off in which the horses were run over the top of the horse-race ramp over which the excitement ran very high. To test the merits of two of the winning horses an extra race was pulled off in which the horses were run over the top of the horse-race ramp over which the excitement ran very high.

are especially worthy of mention. They were shot off over the dam in a most effective manner and the different colored lights reflected on the foam was a beautiful sight. Every piece was good and many people pronounced it one of the prettiest fireworks displays they had ever seen. The dance in the Riverside Inn was a decided success. The rooms were very tastefully decorated in flags and bunting. The floor was in good condition and the music, composed of a

are especially worthy of mention. They were shot off over the dam in a series of brilliant patterns. The brilliant colored lights reflected on the foam was a beautiful sight. Every place was good and many people, probably more than 100,000, were present. The works displays they have ever seen. The dance in the Riverside Inn was a decided success. The rooms were very tastefully decorated in flags and bunting. The music was good and the diffen and the music, composed of a full orchestra, was very good. There were 66 couples on the floor and \$25.00 was collected for the Pioneer charity fund. Every one had a good time to say for Milner and the attractions here. Many trips up the river which added much to the pleasure of the day.

The Milner ball team has ordered

The Miner ball team has ordered new suits which will be ready at the close of the season. The team is now open for engagements and can put up a good game at any time.

The new road which was circulated throughout the town and county of Twin Falls to the county commissioners to have a herd law established, the \$2000 road not put out by Miner town.

full orchestra, was very good. There were quite a few couples on the floor and the \$250 tickets were very popular. They were used for the Pioneer charity fund. Every one had a good word to say for Milner and the attractions here. The Milner ball team has ordered a new uniform, and they are very attractive. They are of white flannel, with red trimmings. The team is now open for engagements and can put up a good game at any time.

The "Fris-kol" power plant is being circulated throughout the town and county of Twin Falls to the county commissioners to have a herd law established. The 2,000 trees set out on Milner townsite are being irreparably damaged by the stock that has been allowed to range over the townsite.

George Haggood has sold the Kirtzville property to Scott Murray.

The Frisk-Kol power plant is now running full force and water is being pumped out of the river. The dam is and, to all the construction work on the north side canal. The settlement on the north side of the river is now being started.

The Milner State Bank, Ltd., will be opened in a short while. The brick work on the \$7,000 building is completed and will be finished in a few days. The bank will be completed and the bank will be opened just as soon as the building is

Plans and specifications are now being prepared for the 80-foot dancing pavilion in the park in the rear of the Riverside Inn. An effort will be made

Plans and specifications are now being prepared for the 80-foot dancing pavilion in the park in the rear of the Riverside Inn. An effort will be made to make this one of the most attractive of the new buildings.

The pipe has all arrived for the city water works, and work on the system will be pushed vigorously to completion.

It is now planned to have Milner connected with an independent telephone line through the north side of the river, this work to be done this summer.

Business conditions in Milner are certainly improving every day. Every morning, noon and evening, the men hear the blowing of whistles calling them to and from their work. The

## TWIN FALLS NEWS

Official Paper of Twin Falls County.  
George B. Fraser, Editor.Published every Friday by  
THE NEWS PUBLISHING COMPANY  
TWIN FALLS, IDAHOSubscription Rates.  
One Year, in Advance, \$2.00  
Six Months, in Advance, \$1.00

Reliable information regarding the city and country promptly and cheerfully furnished. All communications to The News Publishing Company, Twin Falls, Idaho.

At a second-class matter, December 12, 1904, at the postoffice at Twin Falls, Idaho, under the Act of Congress of March 3, 1879.

The Union Pacific railroad is reported to have contracted with the Illinois Central for the delivery of 16,000 cars of coal at Omaha before November 1. This will make 560 trains of coal which is required to supply the Union Pacific system during the winter. The coal is now moving westward. It is said, and will all be delivered on time. This means a great deal to it, as it will enable the Union Pacific to turn practically the entire output of the Wyoming mines westward. If this can be done, the coal famine will be less severe than it would be had the company been obliged to rely on the product of these mines which is sent enough in summer, to say nothing of its inadequacy in winter.

The accident which befell George Tadlock on the morning of July 4 emphasizes the need of abolishing the barbed wire fence. The market value of the livestock mutilated and killed every year by these fences would fence every field in Idaho. The barbed wire fence should be called the barbarous wire fence. It is dangerous, cruel, ineffective and expensive. There is scarcely a farm raised horse in the west that does not bear harsh scars. The barbs will not check brachy on the any more than will plain wire. They are a thorn in the flesh of the farmer, literally and metaphorically, and they should be relegated to the scrap heap with other antiquated relics of torture.

The Twin Falls farmers are puzzled to know to what extent the Sunday rest law affects their work. Several of them hesitate to work in their fields on Sunday for fear of violating the statute. The law does not restrict the farmer in the performance of his own work. He cannot come into town and buy a loaf of bread or a sack of flour but he can work up all the appetite he pleases at home.

A farmer on the Twin Falls tract bought a mower from a Chicago mail order house. He used it for 15 days, cutting 15 tons of hay. Then he concluded to get a real mower which he bought in Twin Falls. Moral, buy your mowers in Twin Falls and if they are not equal to the work, or fall to meet requirements, you have some recourse. The mail order house will take your money and hand you a lemon.

The reports of the engineers who inspected the canal system, which appear in this issue, will be read with great interest by all who have the welfare of the tract at heart. While there is much to be done, there are no obstacles in the way and the transfer will not impede the rights of either the settlers or the company. The situation is summed up in one sentence: "A canal system is never completed."

It has been legally determined that it takes two dogs to constitute a dog fight.

Sickum.

## IMPROVED FARM MACHINERY

The following improvements in farm machinery have just been patented:

Plow by J. R. Raman, Natchez, Miss. The object of the improvement is to provide a plow for turning a furrow, breaking up the sod, harrowing and pulverizing it and uprooting and destroying weeds and grass and turning them into the soil and bringing the land into order for planting, with much less labor than is usually employed.

Sweep rake, by E. Nelson, Disceol, N. D. Of the intentions of this inventor, one is to provide a construction of rake wherein when the teams are backed to discharge a load a sweep bar will be automatically drawn over the teeth to impart the initial movement to the load, and wherein further the moment the team is started forward, or commences to pull, the sweep bar will be automatically returned to its normal position close to a rake head.

Furrow plow and roller, by C. E. Johnson, Coeur d'Alene, Nev. This invention relates to improvements in furrowing or ditching plows and rollers for irrigation, the object being to provide a device by which the plow will be automatically drawn over the ground to form the furrow and to smooth the banks, sides and bottom of the ditches.

## KIMBERLY WANTS SOME HAYMAKERS

WAGES ARE HIGH BUT LABOR IS VERY SHY.

First Car of This Year's Hay Crop Is Shipped to Milner—Foundation for Power House Staked Out and Machinery is on the Way.

KIMBERLY, Idaho, July 10.—Practically all the hay crop on the mill is completed and the plating will be finished this week. The contractors have begun work on the warehouse which will be a very large building, located 100 feet east of the mill on the track.

E. C. Crocker, representing the Salt Lake firm having the contract for the installation of the power machinery for the mill, was in town last week. During his stay here he had the foundations for the power house staked out so that work can begin without any delay upon the arrival of his machinery and materials for construction. A carload of machinery, including the water wheel, has been shipped from the factory in the east direct to this place and should arrive any day.

W. H. Thomas returned on Sunday from Payette, where he had gone to spend the Fourth.

Kimberly won a baseball game from a team from Twin Falls, the score being 20 to 10.

Everyone is busy with their hay crop and all are short of men, who seem to be very scarce notwithstanding the high wages that are being offered.

The Kimberly baseball team went to Oakes to play last night on the Fourth. Although our boys put up a very good game, Oakes's salaried pitcher was too much for them and they had to take defeat to the tune of 15 to 2.

Jack Farrell, who had been working in Twin Falls for a short time, returned recently and has gone out with a baling outfit.

Ray Dunken has returned from Milner, where he has been working for Joe Nelson; one of the contractors on the north side.

Two of the Moon boys have gone to Rock Creek, where they will work for O. C. Tadlock during the haying season.

The stock left a baby girl at the home of A. R. Campbell last Sunday. Another car of grain was loaded at the warehouse Monday.

C. A. McMaster loaded a car of grain for shipment to Minkola on Tuesday.

John Martin loaded a car of baled hay for Milner on Tuesday. This was new crop hay and was baled from the field.

John Clime made a trip to Contact, Nev., this week for the livery stable to take to that place Mr. and Mrs. Ed. Flare, who will remain there for some time.

H. T. West brought his family down from Boise last week and they have been in possession of their new home on the ranch where they will remain all summer.

August Hendricks left for Portland this week on business. Mr. Hendricks has disposed of his property here and intends moving his family to the vicinity of Portland next winter.

The anniversary entertainment of the Ladies' Pioneer club was a grand success. All numbers on the program were nicely rendered and the presentation of the comedy, "The Kleptomaniac," surpassed all expectations. The ladies netted about \$25 through their efforts.

J. N. McMaster and family have moved from their old home on their ranch south of here for the summer.

The Nibley-Channel Lumber Co. received another carload of lumber last week which was unloaded by Elgior & Clime.

Mr. and Mrs. A. Dunkan are being visited by their daughter-in-law from Washington.

Mrs. A. D. Norton and daughters have moved to their ranch on Rock Creek, where they will spend the summer.

The Western Lumber Co. made a local shipment of lumber to Milner this week.

M. H. Wright has gone to Milner, where he has the contract for a building.

Messrs. Campbell & Osborne have the contract for the erection of a dwelling for A. G. Ellis on his place south of town. They will begin work on it as soon as they complete the mill warehouse on which they are working at the present time.

Notice for Publication—Final Proof.

I, John Hunter of Hanger, Idaho, who made entry No. 872, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2, 1899, which embraces the 8% of SW<sup>1</sup> and SW<sup>2</sup> of SW<sup>1</sup> of section 11 and the NE<sup>1</sup> of the NW<sup>1</sup> of section 14, township 10 N., range 13 E. B. M., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before E. B. Williams, representative of the State Land board, at Twin Falls, Idaho, on the 10th day of August, 1907, by two of the following witnesses: Pote Nelson, John Fralun, W. R. Smith, Jess Ball, all of Hansen.

JOHN HUNTER, Entryman.

Plan to Extend Telephone Area.

Farmers and ranchmen of Idaho are invited to work in co-operation with the Rocky Mountain Bell Telephone company to extend the area of telephone communication in the state by means of local ownership companies connecting with the lines of the Bell system. The plan has been found successful in several communities in Idaho and neighboring states and the company believes it can be extended with similar success with advantage to the rural resident and the telephone company.

By the plan that is being followed in the territory of the Rocky Mountain Bell Telephone company, ownership of local companies remains entirely in the hands of local people. The Bell company gives exchange service for 50 cents a month for each subscriber on the local line. This enables the local company to dispense with expert labor and the Bell company arranges to secure equipment for the local company at low cost. Another great advantage, probably the greatest of all, is that the local subscribers are enabled to communicate with all parts of the Rocky Mountain Bell Telephone company, covering four states.

The local company is only required to build its lines to the limits of the nearest exchange of the Rocky Mountain Bell Telephone company. The Bell company makes the exchange connection. Interested persons may receive detailed information from the manager of the nearest exchange of the Rocky Mountain Bell Telephone company.

OREGON SHORT LINE.

Excursion Rates.

Special rates east, one first class fare, plus \$7, on sale July 13 and 25. Inquire at depot for particulars.

NATIONAL FORESTS A BENEFIT.

Timber is Protected From Onslaughts of Lumber Hogs.

"The Use of the National Forests," a publication just printed by the department of agriculture, is a brief, clear manual for public information as to the forest policy of the national government.

It is too true, as the short preface to the public says, that "many people do not know what national forests are. Others may have heard much about them, but have no idea of their true purpose and use." It is the object of this pamphlet to explain just what the national forests mean, what they are for, and how to use them.

In the first place, it is explained how the forests are created and how their boundaries are drawn. Next, their direct use and value are shown from the point of view of the homeseeker, the prospector and miner, the user of timber, the user of the range, the user of water, and other users of forest resources. Third, it is shown how the forests are intended for use, for the production of usable products, and for the establishment and maintenance of homes; how on all of them the timber is protected from fire, the water flow is kept steady, the forage on the range is increased and guarded from abuse; and how, in addition, they serve as great public playgrounds and as breeding places and refuges for game. Finally, the management of the national forests is described.

Here it is that the great usefulness of the forests is brought out clearly and strikingly; for the forests are managed by the people in their own interests, and every means is used to meet the desires and wants of all forest users as far as by dealing with them in the main directly on the ground and in all cases with the utmost practicable dispatch and freedom from tax and delay.

In a word, the special interest of this manual lies in its showing that the forest policy of the government, both in principle and in practice, is for the benefit of the ordinary man for the benefit of every citizen equally. There is still a tendency to think of the national forests as "preserves" closed to use, and to look on the public lands exposed to unregulated individual exploitation. Where these misapprehensions still prevail, "The Use of the National Forests" will go far to correct them.

The book is written by Frederick E. Olmsted, whose intimate knowledge of conditions in the West and the public mind which the national forests are managed to supply, fit him to deal with the subject.

NATIONAL FORESTS A BENEFIT.

Timber is Protected From Onslaughts of Lumber Hogs.

"The Use of the National Forests," a publication just printed by the department of agriculture, is a brief, clear manual for public information as to the forest policy of the national government.

It is too true, as the short preface to the public says, that "many people do not know what national forests are. Others may have heard much about them, but have no idea of their true purpose and use." It is the object of this pamphlet to explain just what the national forests mean, what they are for, and how to use them.

In the first place, it is explained how the forests are created and how their boundaries are drawn. Next, their direct use and value are shown from the point of view of the homeseeker, the prospector and miner, the user of timber, the user of the range, the user of water, and other users of forest resources. Third, it is shown how the forests are intended for use, for the production of usable products, and for the establishment and maintenance of homes; how on all of them the timber is protected from fire, the water flow is kept steady, the forage on the range is increased and guarded from abuse; and how, in addition, they serve as great public playgrounds and as breeding places and refuges for game. Finally, the management of the national forests is described.

Here it is that the great usefulness of the forests is brought out clearly and strikingly; for the forests are managed by the people in their own interests, and every means is used to meet the desires and wants of all forest users as far as by dealing with them in the main directly on the ground and in all cases with the utmost practicable dispatch and freedom

## BREVITIES

W. H. Thomas, who is building the flour mill at Kimberly, was in the county seat yesterday.

Miss Lulu Ormsby of Roxburg came down on Tuesday to look at the falls and see the greatest irrigated tract on earth.

State Bank Examiner W. S. Chaney came in on Tuesday evening and left for Pocatello on Wednesday morning. He was chaperoned by Norman Belcher.

G. W. Tarr has left on an overland journey to California by way of the big Nevada mining camps. He will stop at Contract, Ely, Goldfield and elsewhere and will spend a year on the journey.

Bassett & Wilson have purchased the noted Percheron stallion, "Socialist," from the Twin Falls Horse Breeders' association and will finish the season with him on the Twin Falls tract. "Socialist" is a beautiful animal and his colts are as pretty as pictures.

Oscar Bonnekah, the well known civil engineer of Pocatello, left on Tuesday with a crew of men to survey the unurveyed portion of Twin Falls and Cassia counties bordering the Nevada line. There are several townships in the tract, which includes the forest reserve. Mr. Bonnekah will be in the field until cold weather sets in.

The Twin Falls North Side Land & Water Co. and the Twin Falls North Side Investment Co. have opened a joint office with the Great Shoshone & Twin Falls Water Power Co. in Twin Falls. D. M. Robinson will be stationed here to disseminate literature, answer inquiries and pilot land seekers to the north side. Every train brings prospective buyers who want to look over the north side after they have seen what has been accomplished on the south side.

Woods, Evans & Thomas report the following real estate sales the past week: Lot 11, block 22, belonging to Mr. Debe, sold to Idaho Department store, price \$250; plot 7, Murtough addition, to Abraham H. Boylan, \$350; plot 8, Murtough addition, to A. H. Boylan, \$1050; plot 4, Murtough addition, to Mr. Harris of Utah, price \$750; plot 5, Murtough addition, to Mr. Harris of Utah, price \$750; lot A, block 11, Murtough addition, to Miss Edna Debow, price \$200; lot 11, block 4, Murtough addition, to Miss Edna Debow, price \$700; lot B, block 1, Murtough addition, to Miss Myrtle McManis, price \$250; lot C, block 2, Murtough addition, to A. A. Alvord, price \$280; house and lot belonging to George D. Wisely sold to Cassia County Abstract Co., price \$1760.

Miss Margaret Roberts of Boise is visiting her sister, Mrs. W. O. Taylor. Miss Roberts has been here before and is one of the best of Twin Falls boaters.

C. A. Builes has arrived from Victor, Colorado, and may decide to remain here. Mr. Builes is a brother of Mrs. C. E. Builes and has been studying mining for the past two years. He is very proud of his little mine and nobody blames him.

The Cassia County Abstract Co. is about to open an office in Twin Falls. Manager Stout was here during the week and said the company would soon engage quarters here. The firm has represented here for several months.

Word received from Rev. John Gourley states that the condition of his son Frank is steadily improving. Both Mr. Gourley and his son are still at Catalina Island. Rev. Gourley is not expected home for two or three weeks.

Walter G. Filer came over from Salt Lake City on Wednesday and returned yesterday. Mr. Filer, who was the first general manager of the Land & Water Co. and who retains large interests here, was more than pleased with the looks of the tract.

Miss Jean McMillan and Miss Dolli Snodgrass have been engaged to teach in the Ricketts school. Miss McMillan will have charge of the fifth grade and Miss Snodgrass of the seventh. Both young ladies are very popular and their selection is commended.

"Capucine," the Percheron stallion awarded first prize at the Idaho state fair in Boise last autumn, has been purchased from the Palo Alto stock farm by the Twin Falls Horse Breeders' association. He is a trim and nicely proportioned animal, strong on all points that go to make up a good farm horse. "Capucine" is six years old and as gentle as a kitten. He was bred in the commune of Icel, canton of Billeme, department of Orne, France, by M. Chaumier. He was approved by the French and American governments and admitted into the United States free of duty.

P. H. Hilliard of Spokane was a Twin Falls visitor last week. Mr. Hilliard said the country looked beautiful to him, save for the "Jim Hill" mustard which, he declared, was the greatest curse of all weeds. This pest had caused great damage in the Big Bend and Patouise countries, said Mr. Hilliard, where the farmers were at their wit's ends to eradicate the weed. He advised the Twin Falls farmers to take prompt measures to stamp out the "Jim Hill" which should not be allowed to get a start next year. The best remedy Mr. Hilliard knew of was summer following but this is almost impractical in an irrigated section where farm units are small.

Mrs. J. M. Spackman entertained the Ladies Aid society of the Presbyterian church at dinner yesterday.

Ed Kuhl returned from Mountain View, where he left for Omaha, where he will remain for the summer.

A valuable paper belonging to J. M. Stepp, Twin Falls, was found on the street yesterday and left at the News office.

L. H. Willott, who is interested in Twin Falls realty, has returned after an absence of two years. Mr. Willott said Twin Falls looked better to him than any city he had seen during his absence.

Attorney General John J. Guheen spent a few hours in Twin Falls yesterday. Mr. Guheen said he had been over the work at Almer and was astonished at the progress which was being made on the north side.

Senator and Mrs. Hayburn will arrive in Twin Falls tomorrow. The senator has been a very busy man, being chairman of the commission which is engaged in codifying the federal laws. A number of his friends are planning a reception for him tomorrow evening.

The annual meeting of the Y. P. S. C. E. of the Presbyterian church was Tuesday night. The following officers were elected: President, John S. Gourley; vice president, Mrs. Will Young; secretary, Mrs. Lovison; treasurer, Mrs. Wilbur Hill; corresponding secretary, Boyd H. Fuller.

Mrs. Blanche Wilson, wife of George Wilson, died on Tuesday of typhoid fever. Mr. and Mrs. Wilson were married in Albion on March 19 and their honeymoon was scarcely over before the grim reaper intervened. The funeral occurred on Thursday afternoon from Miller's undertaking parlors, Rev. Parker officiating. The attendance was larger than at any previous ceremony of the kind on the tract, the sympathy of the public being strongly stirred. Mrs. Wilson was a very popular young woman and her husband likewise has a host of friends who condole with him in his hour of sorrow.

Walter Craven has more hogs than some people have hay and still he is not satisfied. Last week he sold 150 Duroc Jerseys and he has 300 left. To keep up the stock he shipped in a car of registered Duroc Jerseys, Berkshire and Chester Whites. Twin Falls alfalfa puts the fat on hogs in layers and Walter declares that as a hog country Twin Falls will soon rival "old Missouri." He also brought in a number of nice roadsters, fillies and geldings, some registered Jersey cows and a pure bred Jersey mammoth jack, 1½ miles east of town, and there are four other black mammoths to keep up the noise.

Mrs. F. S. Tomlinson of Albany, Oregon, is visiting with her sister, Mrs. Robert Steele.

The condition of Ned Maher, who was seriously burned about the face last week as a result of an explosion of a detonating cap, is greatly improved.

The Ladies Aid society of the Baptist church will give a social in the city park Tuesday evening, July 16, beginning at sunset. Ice cream, cake and lemonade will be served.

John B. Leahy, who resides south of Twin Falls, left on Tuesday evening for Assumption, Illinois, in response to a message informing him that his father was at the point of death.

J. H. Dingman and family left on Tuesday afternoon for Nevada, taking the overland route. After visiting several points in that state they will continue their journey to California.

Miss Edith Young is attending the International convention of Christian Endeavor societies which is being held in Seattle this week. Miss Young is the delegate from the society of the Presbyterian church of this city.

The services announced for Sunday at the Catholic church have been postponed until a later date. On account of other arrangements Father Bousmans will be unable to be here as expected.

The Twin Falls Coal Company, with Oakley as its principal place of business is one of the latest Cassia county corporations. It is organized for the purpose of exploiting the Trapper creek coal deposits. The company's holdings consist of 1333 acres lying on Trapper creek about thirteen miles from Oakley. Its capital stock is \$100,000 shares, \$50 par value, and is subscribed as follows: Joseph H. Boren, John C. Boren, Charles V. Craner, George W. Cox, William H. Dunn, Reed A. Doren, Edward Barrett and Christian Petersen, each \$750, and Alfred von Wiesensthal \$30,000—Albion Times.

There's only one tonle, IRONBREW.

For hall insurance see Guy B. Slicer.

Spring tree planting season is here; so is the Twin Falls Nursery with over 300,000 home grown fruit, shade and ornamental trees of all varieties. Mr. J. A. Waters, the genial proprietor, is pleased to have buyers make a personal selection.

Corrections are made easy when Fogg's liquid Perlino is used. Instantly removes all kinds of stains from fabrics and ink from paper. For sale at the News office.

All kinds of interior views taken by Blabon, the photographer.

Hay for Sale.  
150 tons good alfalfa in stack.  
ROBERT BROSE, Rock Creek.

We Handle Quickly

A great many lines in Stationery but never tangle with prices. We furnish every facility for writing, for the library or the office, and the only thing there is about our trading is the low price. Our company has the highest quality, which you are an office provider or a "home secretary" you will be interested in our offerings.

We carry a large line of Easton-Hurbutt's Stationery, the most up-to-date and highest grade on the market.

THE HOME OF BARGAINS

[illegible]

**Main Canal.** The bedrocks of the main canal are of a type which has been generally adopted throughout the system. A greater or lesser amount of the water is to be delivered to the volume of water to be delivered. As they are all well illustrated in this report, a detailed description is not deemed necessary. The canal, when well maintained, will be the flow of the canal could be improved by being made flatter, but this will naturally result as the canals are used. A sub-grade has been excavated throughout a large part of the canal, and the slope of the lower bank will gradually adjust itself and deposit in the bottom of the

The following figures indicate the carrying capacity of the main canal—

Station 0 to station 166: canal in average depth 12 feet; width 12 feet; depth water, 9 feet; grade .016, from which section is 108.8 square feet; the velocity of the water, 2.9 feet per second, and this would be sufficient water to irrigate 252.6 acres, not allowing for any losses.

Station 166 to station 138: has the bottom width of 12 feet; depth 12 feet; width of banks 16 feet; height with an incline one of 2 to 1. This lower bank has been designed to carry a 2-foot water in depth, the grade is .015. We estimate the discharge at 170 cubic feet per second portion of the canal is 96.4 square feet; the velocity when full will be 2.9 feet per second; the area of the canal is 112.8 square feet; the discharge 212 cubic feet per second sufficient to irrigate 252.6 acres.

Station 138 to station 1247: where the decision gates are located, the main canal is 12 feet wide, the bottom width dimensions are the same as in section of the canal just described. We estimate the discharge at 170 cubic feet per second

[illegible][illegible]

**High and Low Line Canals.**—Some twenty miles from the head waters of the canal appreciably higher than the low line, the high line has been designated as the "Point." A water race has been cut from the Point. Unfortunately but little solid material has been encountered here, this water race is not very deep, and is put in a large fill of rock and it woudn't be safe to depend on it. It is probable that this waste water will not be used to any great extent, and it is not necessary to cut it. The main race is cut from the Point, and divides into two branches at this point. One canal runs westerly to near the town of Dink, while the other runs easterly to near the town of Salmon River. The former is designated as the low line, and the latter as the high line. The low line canal is no well defined channel for nearly a mile, and then divides into two branches, one of which is from two to three feet in the first half or three-fourths of a mile, and the channels are in permanent condition. Attention is put in the high line canal, and it is in permanent condition. The high line

[illegible][illegible][illegible]

stature that the area of the cross-section in the lower part of the sub-graben is 1.5 m<sup>2</sup>. The width of the sub-graben at the bottom will be 0.2 feet per second, the discharge 910 cubic feet, sufficient to irrigate 45,000 acres.

Station 690 to station 700; the bottom of the sub-graben is 1 foot, the width of the lower part of the sub-graben is 1 foot, the width of the upper part of the sub-graben is 2 feet and the grade is 0.02. The estimated area of the cross-section is 542 square feet. The width of the sub-graben at the bottom will be 0.2 feet per second and the discharge 718 cubic feet, sufficient to irrigate 35,900 acres, 57,140 acres.

Station 700 to station 715; the bottom of the sub-graben is 1 foot, the width of the lower part of the sub-graben is 2 feet high, with an inside width of 1 foot, the width of the upper part of the sub-graben is 2 feet, the width of the bottom width of the lower part of the sub-graben is 1 foot, the width of the upper part of the sub-graben is 2 feet and the grade is 0.02. We would estimate the area of the cross-section is 577 square feet, that the discharge is 777 cubic feet, sufficient to irrigate 39,000 acres, 57,140 acres.

Station 715 to station 725; the bottom of the sub-graben is 1 foot, the width of the lower part of the sub-graben is 2 feet high, with an inside width of 1 foot, the width of the upper part of the sub-graben is 2 feet, the width of the bottom width of the lower part of the sub-graben is 1 foot, the width of the upper part of the sub-graben is 2 feet and the grade is 0.02. We would estimate the area of the cross-section is 577 square feet, that the discharge is 777 cubic feet, sufficient to irrigate 39,000 acres, 57,140 acres.

Station 1656 to station 1671: the canal has a bottom width of 25 feet, the subgrade is 1:1, the water depth is 1.5 feet, with an inside slope of 3 to 1. The lower bank has a top width of 6 feet of topsoil, with a subgrade of 2 to 1. The estimated area of the cross-section is 257 square feet, the velocity 2.4 feet per second and the discharge 622 cubic feet per second sufficient to irrigate 42,500 acres.

Station 1671 to station 1692: the canal has a bottom width of 25 feet, the subgrade is 1:1, the water depth is 1.5 feet, with an inside slope of 3 to 1. The lower bank has a top width of 6 feet of topsoil, with a subgrade of 2 to 1. The estimated area of the cross-section is 246 square feet, the velocity 2.4 feet per second and the discharge 596 cubic feet per second sufficient to irrigate 42,500 acres.

Station 1692 to station 1729: the canal has a bottom width of 25 feet, the subgrade is 1:1, the water depth is 1.5 feet, with an inside slope of 3 to 1. The lower bank has a top width of 6 feet of topsoil, with a subgrade of 2 to 1. The estimated area of the cross-section is 222 square feet, the velocity 2.25 feet per second and the discharge 502 cubic feet per second sufficient to irrigate 42,500 acres.

Station 1920 to station 2015; the canal has a bottom width of 12 feet, low water bank width is 16 feet, and a middle slope of 5 to 1. The lower bank has a top width of 4 feet of water at depth, and the grade is .035, while the width on top is 12 feet. We estimate that the area of the canal is 168 square feet per second. Velocity 2.1 feet per second and the discharge 352 feet per second, sufficient to irrigate 28,160 acres.

**The Low Line Canal.**

The low line canal terminates on an elevation about one mile south of the town of Buhl. We have been informed that the company has been offered \$100,000 for the canal, and that the company is to be paid \$100,000 for the canal. The canal is to be a large one, and probably improve conditions by the

[illegible][illegible][illegible]

canal, sufficient to irrigate 100 acres; the canal has a bottom width of 28 feet; the top width is 36 feet; the depth is 4 feet, with an inside slope of 3 to 1. The lower bank has a top width of 6 feet, an inside slope of 3 to 1, and a height of 4 feet, and the grade is .028. We estimated that the velocity when full will be 1.5 feet per second, and the discharge of this portion of the canal is 230 acre-feet, that the velocity when full will be 1.5 feet per second, and the discharge of this portion of the canal is 230 acre-feet per second, sufficient to irrigate 230 acres.

The area under the low line canal is approximately 3,500 acres. The area under the high line canal is approximately 10,000 acres. West of Cedar draw is 20,000 acres. West of Cedar draw is 45,000 acres.

## RAILROAD WITHIN A MILE OF BUHL

TOOT OF THE WHISTLE CAN BE  
HEARD IN TOWN.

But Steel Is Coming In Slowly and It  
Will Be a Few Days Yet Before  
Tracklaying Is Finished—Brother  
Peck Lands a Big Sturgeon.

BUHL, Idaho, July 9.—Mrs. John A. Jacoby has been confined to her room of account of sickness for several days.

C. E. Inglesby, who owns 80 acres three miles west of town, arrived last week from Ogden, and will commence making improvements at once. His family will be here some time in the fall.

Mr. and Mrs. Andy Wilson and Mrs. Wilson are in Twin Falls, where they were called by the illness and death of Mrs. Wilson's sister, Mrs. George Wilson.

Miss Naomi Howard, daughter of Joe Howard, arrived Friday from Palouse, Wash., and will make her home here for the future.

Jack Heath and A. A. Dimitt spent Saturday and Sunday at Clear Lake, fishing.

Lester Brown of Twin Falls came up from that town Saturday evening, and he and the Howard boys put in Sunday at Clear Lake fishing.

S. O. Kerley of the Buhl Meat Co. went to Twin Falls Monday on business.

Miss Lulu Norris, who has been very sick recently, is recovering. Her mother, Thompson of Hagerman, is here with his English huckey stiltion.

Dr. James Monroe came near losing his life Friday night. He was called to see Mrs. George Durfee, who lives four miles from Hagerman. He rode horseback and the night was dark.

The horse stumbled and fell and threw the doctor over his head. The doctor was carrying a large box of surgical instruments, which struck him on the head as he fell, and almost put him out of commission, but he escaped without serious injury.

The surgeon is being cleared on the new school house site west of the city park, and work on the excavation for the building will soon commence.

Chas. Coker reports having finished a new lateral in the Deep Creek country and that he will soon resume work on the big lateral in the same locality.

Dr. Monroe is treating the 10-year-old son of Mr. and Mrs. Dack, who live in the vicinity of Clear Lake, for appendicitis. He thinks he can bring the boy around all right without an operation.

A. D. Boylen, wife and family, arrived in Buhl last week from Coeur d'Alene and spent several days looking over the tract in this vicinity. They left for Twin Falls Friday.

J. W. Talley, brother of J. A. Talley, and J. J. Hoffman, of Lindford, N. D., spent several days of last week inspecting the west end of the tract and were favorably impressed with its future prospects. They left Monday, but will return soon.

W. W. Cory of Cory Bros. contractors of Ogden, was a guest of Hotel Buhl, Thursday.

Mrs. P. D. Neer and Miss R. Neer came in from their ranch Friday and spent the day shopping.

Robert Finlay and family will depart for Nampa soon to make that town their permanent home.

Mrs. D. W. Southworth and daughter Grace returned Monday from Twin

Falls, where they had accompanied Mr. Southworth, who went to Boise on important business.

P. Palmer came in from his ranch Friday and spent several hours in town transacting business.

C. F. Clark of Spokane, Wash., maker of blank books and hotel registers, was in town Friday doing business with our people.

W. B. Hoag, the genial and popular landlord of the Waverly hotel, in Twin Falls, was a Buhl business visitor Saturday.

C. D. Rogers of Twin Falls registered at Hotel Buhl Friday.

P. J. Lynch and George R. Dunn, who are acquiring brawn and muscle on their ranches a mile east of town, ceased their labors last week long enough to take a run into town for their mail and to prevent Buhl from growing their memories.

P. J. Falk came in from his ranch last week to see his friends and transact some business with our merchants.

A party consisting of J. R. Conway, Mrs. J. R. Conway, Margaret Conway, Mildred Conway, Mrs. H. Barger and Grace Barger, came up from Twin Falls Saturday and are now fishing on the Snake river.

E. W. Peck went fishing Saturday and brought home a sturgeon that weighed thirty pounds. It was served to the guests of Hotel Buhl. Mr. Peck said he caught it himself, but some jealous fishermen hint that he paid some one else to catch it for him.

However, it was all right and was greatly enjoyed by those who had the good luck to get any of it.

Mrs. Anna Kelly of Fremont, Utah, is proving up on a ranch close to town. She was a Buhl visitor last week.

Rees, Elison and Miss M. King of Twin Falls were Buhl pleasure visitors Sunday.

J. Paulsen of Rock Springs, Wyo., was a land seeker on this end of the tract last week.

A party consisting of E. A. Miller, R. H. Coor, Misses—Edith—Miller, Gretchen, Minnie and—Jimmie—Miller, the four children of Judge E. A. Miller, of Riverside ranch, the Misses Gretchen and Lillian are still visiting at the ranch.

W. J. Tull has a large store building well under way on the lot adjoining Osgood & Baldwin's store on Broadway. As soon as it is completed he will commence the erection of another on the lot adjoining the old postoffice building on Main street.

Scott Doug has several big tents at the Sandstone springs for the accommodation of the men who are to be employed in his sandstone quarry. He has set up a sign at the springs showing them to be only two miles from Buhl.

The rails are close enough now to enable us to hear the "toot" of the iron horse, being within a mile of town, but it is said that the construction forces are shy on rails, and that it will be a few days yet before they are laid into the depot grounds.

E. B. Williams, representative of the state land board, did not make his appearance in Buhl yesterday to take Ed Larson departed for California Wednesday. He will spend several weeks traveling through the orange state and will visit all the interesting places there.

John Jacoby is one of the efficient force employed in Ed. Larson's general merchandise store.

Osgood & Baldwin are excavating for an extension to their store. They are going to build a warehouse in the rear of their present establishment in which to store goods. They have ordered a large stock which will arrive in the fall.

R. W. Allred, cashier of the Citizens state bank, will bring his family

ly here from Boise about the first of August.

Archdeacon Jones of Pocatello held Episcopal services in the school house last night, which were well attended.

J. H. Gregory and wife of Duquoin, Ill., accompanied by J. M. Rogers and wife of Twin Falls, arrived in Buhl yesterday from the latter town. Mr. and Mrs. Gregory are looking over the country and like it well so far as they have seen it.

The Weaver Lumber Co. has had a carload of lumber and another of posts delivered to it at the end of the track, a mile and a half from town, which are being hauled into the company's yard.

Notwithstanding the fact that a large number of our people went to Twin Falls to help that town celebrate the Fourth, those of us who, by reason of old age, young age, or other defects and disabilities, were unable to attend the big doings in the Magic City, and had to stay at home, celebrated just the same, and had a glorious time. Lack of space prevents us giving the details of the program, but it was a hot number.

A little irrigation water turned on the city park grounds would not hurt the grass or the trees therein any. It is a shame to let them die for want of a little water.

The shade trees that have had water are doing splendidly.

Prof. Wyatt and Miss Evans have been reemployed by the school trustees to teach the schools for another year. Prof. Wyatt will have charge of the schools as heretofore, and it is expected that more teachers will be required by the time school opens.

To Sell Dairy Cows.

The Brunk Brokerage & Realty Co. will have a shipment on or about July 25 of two car-loads of first class milk cows with young calves by their side, also some fine 3-year-old heifers. These cows are all good gentle dairy raised cattle. They are shipped from one of the best dairy farms in Utah.

## We Play No "Favorites" at This Clothing Store

We charge everybody the same price for the same stuff because we believe that's the only way to build a permanent, lucrative business. We are catering to no particular class of trade. We are trying to sell good clothing to everybody who appreciates honest values, courteous treatment and prices as low as worthy goods can be sold for.
