TWIN FALLS NEWS, TWIN FALLS, IDAHO, FRIDAY, SEPTEMBER 20, 1907.

NUMBER 47

## PREPARING FOR THE COUNTY FAIR

### ALL DEPARTMENTS HAVE BEEN WELL-ORGANIZED.

Plenty of Room Will Be Provided for the Exhibits of Live Stock, Which Promise to Be Large—Other Divisions Are Filling Nicely.

A young city is springing up on Twelfth avenue, between Fifth and sixth streets. It will be known as the "Fair City," and the opening will take place Thursday, September 25, and will continue for three days. Carpenters are hard at work on the sheds and pens for the county fair, which promises to be an eye opener. It will be necessary to build a large number of sheds to accommodate the live stock exhibit, which will be a record breaker. In the Babcock building and the building adjoining both of the large store rooms will be utilized, one for the fine arts exhibits and the other for farm products. Other structures will be fitted upon the adjoining lot for the heavier products of the farm.

C. A. McMaster, who has charge of the horse and mule department, is making preparations to take care of an unlimited number of animals, and from all indications he will have his hands full. A large number of fine horses have been brought to the tract since the last fair and will be shown next week. Walter Craven promises to bring in some black mammoth jacks and Mr. McMaster himself will exhibit something choice in that line. Craven wears a hat like Charlie beaten and Charlie declares that Walter's jacks will look like his mountain hares alongside of the melodious canaries from Hansen. It will be a great competition.

The beef cattle division, which is in charge of John Peters and F. Lee Johnson, and the dairy cattle division, in charge of James Fitzgerald and Frank Russell, will have a large number of entries. Jack Voorhees has a strong notion to capture some of the best prizes in the dairy division and will have some animals that will be hard to beat. There are others who will contest Jack's claims. Frank Russell has a young Jersey bull, Alphonso II, which he relies upon to pull down a fat plum, but he will not have a walkover. There are some animals around Kimberly that will give Alphonso a run for the ribbon. Don C. Bryan and J. M. Spackman, who have charge of the sheep division, are making preparations to care for a large number. The farmers all seem to have the sheep fever and there should be a grand showing in this division. It will furnish a fine object lesson and one which the farmers cannot afford to miss.

The swine department, presided over by B. A. Baker and Walter Craven, threatens to eclipse all others. There are some sows enough hoes on the Twin Falls tract, just as good stock as can be found anywhere, and there will

be keen rivalry. Don Bryan, Walter Craven and P. H. Smith will show something choice, and H. P. Tandy will skin them if he can and it is safe to predict that the margin, either way will be small. There will be a grand exhibit.

Mrs. B. F. McPherson and Mrs. W. R. Summers will again make a success of the poultry division. This division was well filled last year and the showing next week will be better. Prizes are offered for everything that wears feathers.

To equal the showing in the farm products division of last year will require a great effort, but J. A. Watson and J. E. Steinhorn declare they will have no trouble in beating the record. They have more products to draw from, the variety will be greater and the quality better. There will be a number of exhibits of home-grown fruit. Fred Ramsey and George Bassett will show apples nice enough to make a person's mouth water, grown on their Twin Falls farms. There will be a nice display of pears and a few peaches.

The fine arts division, under the supervision of Mrs. Frank Eastman and Mrs. Haridengen, will be a thing of beauty. It was a gem last year, but this year's showing will be a revelation.

Great interest will attach to the needlework display, which is to be looked after by Mrs. Packard, Mrs. Davis and Mrs. Boyd. The showing in this division last year was a surprise to everyone, but it would look very tame beside the display of next week.

The kitchen and pantry division will, of course, be a magnet. It is in charge of Mrs. Seebek and Mrs. Gross. They have engaged a young giant and armed him with a locust club from Waters' nursery to keep the hungry bachelors from raiding the division. Extra guards will be provided on Buhl day in the event that Pat Monahan comes over.

Miss Debow, Mr. Potter and Miss Wolfe will take care of the educational division, from which much is expected. On the showing made last year, this division should be a wonder.

Mrs. Spackman, Mrs. C. M. Hill and Mrs. Slierer will have supervision of the floral department and will be kept very busy as some magnificent exhibits are promised. Many fine flower gardens were planted last year and the results were grand.

Carl O. Meigs and L. E. Salladay will have their hands full in the industrial department, in which the exhibits will be numerous and interesting.

The sports department, presided over by T. J. Woods, will be right up to the mark. Mr. Woods has arranged for a chariot race in which the owners of runaway teams will have an opportunity to do business. There will be some good horse races and other attractive features.

Cattle and sheep are most attractive stock on the Twin Falls tract at present, and it is desirable that those who can should make good exhibits

## MURTAUGH GRAIN YIELDING WELL

### FARMERS ARE THRESHING MORE THAN EXPECTED.

Duck-Hunters Open the Season at the Dry Creek Reservoir—Threshing Operations Interrupted by an Accident to the Engine.

MURTAUGH, Idaho, Sept. 19.—The threshing-machine has been stopped for a few days by the breaking of the power.

Mr. A. B. Bacon is expected home soon. She went east to attend the funeral of her father.

Quite a number of hunters came to the reservoir on Saturday evening to be on hand for the opening morning of the duck season.

The school is progressing very nicely under the tutelage of Mrs. Steinhorn. B. W. Steinhorn spent Sunday at his ranch northwest of town.

Mrs. W. P. Jones visited her brother, P. P. Jones, who has been in Centennial Valley, Montana, putting up hay, will be home in a few days. He is bringing four teams back with him. Ernest Medley was in town last Sunday.

F. M. Welmohr is erecting a machine shed.

Miss Cleo Jones, who is teaching the Miller school, spent Sunday with her parents.

Mr. and Mrs. F. Lee Johnson visited Mr. Jack Fuller last Sunday.

Mr. and Mrs. Jack Fuller were callers in Murtaugh on Monday.

Messrs. Oliver Pickett and Maybee were business callers last week.

In these divisions—those who have cattle or sheep to sell should bring them in and those who want to buy this kind of stock should attend the fair and obtain some information.

The creamery is now assured, and dairy cows will be profitable. No farmer can afford to miss this department.

Friday will be "Buhl day" at the fair. A special train will leave Buhl at 9 o'clock in the morning and return in the evening and everybody on the west end will come over. J. Warren White has been pulling the wires and has assurance of a special with a big load of passengers. The Filer folks will also take advantage of this train, which gives promise of being a hummer.

The stock sale at the conclusion of the fair should be very successful. A considerable amount of stock will be offered and the demand promises well.

Additional interest will be lent to the fair this year by reason of the fact that hundreds of people who will come to attend the big opening at Jerome will take it in the fair also. For this reason alone it is necessary that as good a showing as possible should be made. The strangers will be largely influenced by what they see at the fair and if there should be a fine exhibit it would prove to be the best possible advertisement. While it is a lot of trouble to bring in exhibits and the prizes at any fair are no money at all, the exhibitors, the farmers should remember that their exhibits serve as advertisements, insurance and investments.

Grain continues to pour into Kimberly. From one to three cars are being shipped nearly every day. Quite a lot of baled hay is also being shipped.

A. W. McDonald and E. W. Tiller were out on their local ranches Sunday.

W. E. Lewis has been burning sagebrush and getting more of his land ready for cultivation. He has an excellent 10-acre tract just west of town. Mr. Parks has his dwelling up and is nearly ready for the plasterers. It is a very nice cottage and adds materially to that part of town.

Ed Claborn is trying to secure a carload of sand for use in plastering his house to be erected at once.

## FOUR THRESHERS ARE KEPT BUSY

### LOTS OF GRAIN IN VICINITY OF KIMBERLY.

Farmers There Are Afraid to Put a Price on Their Land for Fear It Will Be Accepted—Ladies' Pioneer Club Elects Officers.

KIMBERLY, Idaho, Sept. 19.—G. W. Osborn purchased a good team from R. M. Newbury for \$350. Mr. Osborn will need the team on his home stead east of Rock Creek.

George Mott and his partner, who have charge of the Peterson threshing machine, were at work for A. B. Bacon Saturday. George is carrying his right hand in a sling and his partner has one eye out of business as a result of some stranger trying to run their business for them. George, in striking the man, broke three bones in his hand and had to go to Twin Falls to have the doctor set them Friday.

Mr. and Mrs. Frank Burlington were Rock Creek visitors Sunday. James Budd and family have been staying with his father-in-law, D. B. Morgan, on the Young property in the west part of town. Mr. Budd will soon move up on his 80-acre tract near Rock Creek.

The little boys, who purchased the 320-acre tract from Hardy Bros, just east of Harry West's place, have it nearly all plowed and will sow the entire tract to fall wheat.

E. U. McIntire has returned from Contact and says the camp is flourishing and that he has his claims in good condition. He is now hauling rock and digging a claim on his place at the south edge of town preparatory to building his residence.

Both the local lumber yards at this place are well stocked with pine and lumber and are ready for the fall building.

J. M. Staples, who recently bought the George Moore place, has erected a house and barn and is getting a large part of his grain fall crop.

O. S. S. Audin, who was here Saturday checking in the new agent, C. W. Rice, who will have charge of the station instead of G. H. Truitt, who has a busy day of absence.

The Ladies' Pioneer club met at the home of Mrs. W. H. Turner last Thursday. This was the regular business meeting and there were about 16 of the members present. The following officers were elected: Mrs. A. L. Besaire, president; Mrs. W. H. Turner, vice president; Mrs. C. Parks, secretary, and Mrs. J. E. Henley, treasurer. The next social meeting was held Thursday, September 19, at the home of Mrs. C. Parks. The ladies of the Kimberly Mercantile store since the departure of Mr. Driscoll.

Judge Osborne, our local justice, had the people with then accompany the children to Oregon, where the former will also locate. Both of these good places have been sold to Washington men who will move here this fall.

J. H. Eaton, who recently sold his farm here to J. H. Mudd, is now prospecting in California.

Marshall Barnhouse, who lives southwest of town, has sold half of his farm—80 acres—to Morgan Moore of Wyoming, prices about \$50 per acre. Mr. Moore will clear the sagebrush off this land at once and get it ready for crop. Eighty acres will be enough to keep Mr. Barnhouse busy.

A. W. Ford has had misfortune to lose one of his work horses recently, probably caused by getting too many green oats.

Most of the second crop of alfalfa around here has been cut and is in the stack. It is of a very fine quality and turns off well.

Professor Rice, our school teacher, was a business visitor at Rock Creek Saturday.

Grain continues to pour into Kimberly. From one to three cars are being shipped nearly every day. Quite a lot of baled hay is also being shipped.

A. W. McDonald and E. W. Tiller were out on their local ranches Sunday.

W. E. Lewis has been burning sagebrush and getting more of his land ready for cultivation. He has an excellent 10-acre tract just west of town. Mr. Parks has his dwelling up and is nearly ready for the plasterers. It is a very nice cottage and adds materially to that part of town.

Ed Claborn is trying to secure a carload of sand for use in plastering his house to be erected at once.

## BIG CONTRACTS ON NORTH SIDE

### WILL BE AWARDED NEXT WEEK AT MILNER.

President Wm. G. Kuhn and J. H. Purdy, Wm. C. From, Pittsburgh—Work on Second Segregation Canal System Will Begin at Once.

MILNER, Idaho, Sept. 19.—An additional contract was let this week for work on grading of the electric road. This work is being pushed right along.

Plans and specifications for the North Side company's canal system have been approved by the State Land board and state engineer.

Harry Strong has purchased a number of cows, erected stables and is now running the Milner dairy.

W. S. Kuhn and J. H. Purdy of Pittsburgh are expected in Milner the first of the coming week on business.

In connection with the North Side company, of which Mr. Kuhn is president. The contract for the canal system over the second segregation will be let while Mr. Kuhn is here, so that work on same can be started about the 1st of October.

J. B. MacWaters spent several days in Boise on business this week.

J. O. McPherson and family, who have been spending the summer in Milner, where Mr. McPherson has had charge of the experimental farm of the North Side company, have gone to Twin Falls for a visit.

Mr. and Mrs. Bert Johnson of Main street have gone to Fayetteville, Ark., where Mr. Johnson was called by the serious illness of his father.

Miss Blanch Boynton and Miss Lil- lo Bennett are visiting Miss Boynton's parents for a few days in Rupert.

Mrs. W. G. Smith spent several days in Twin Falls visiting friends this week.

Mr. C. R. Larimer and son Leo spent Saturday at Jerome. In Twin Falls visiting Mrs. Larimer's brother and his wife.

J. C. Porterfield of the Fair-Kool Co. is on a business trip to Boise for a few days.

Mrs. James Lynch has taken the restaurant on recent recently, contacted by W. L. Cooper in Twin Falls.

Charles C. Owens of Southern California is visiting his brother, H. A. Owens of the Fair-Kool Construction company.

Miss Mattie King is in Milner for a few weeks, visiting her brother, B. F. King.

John Grimm and son Homer have come to Milner from Jewell, Kansas to take up residence on their farm in section 1.

John A. Morgan has moved his family to his farm in section 4, township 10.

Rev. J. H. Barton of Boise spent Monday in Milner and held church services in the schoolhouse in the evening.

J. H. Heyer has returned from Boise, where he purchased a new automobile.

Moore of Twin Falls, formerly station agent at Milner, spent Sunday in town calling on old friends.

S. T. Hamilton and family of Twin Falls are in the launch "Stella" on a business trip to Jerome and Twin Falls.

H. A. Strout of Delaware, Colorado, was in Milner for a few days. Mr. Strout is in the launch "Stella" on a business trip to Jerome and Twin Falls.

Miss Alice Crismon of Salt Lake City has accepted a position with the North Side company. She arrived in Milner Sunday afternoon.

Paul S. A. Bickel has returned from a business trip to different points in Wyoming.

Trappers are being dug for the Milner waterworks system and pipe laying will be commenced next Monday. A 15 horsepower gasoline engine is being installed in the launch "Stella" and the motor for the power plant that is to supply light for the Riverside Inn.

B. F. Johnson of Twin Falls was registered at the Hotel Grinnell this week.

Messrs. L. J. Lester and H. G. Babine of Denver, Colorado, were in Milner on business this week.

## \$25 Suit Given Away

During Fair week we give a ticket on a \$25 tailor-made Suit with each dollar of trade.

At our store will be found the largest selection of fresh, up to date Fall goods in town.

Our \$15 Suits are especially good values, while we've no end of Hats, Furnishings and Shoes.

## ELDRIDGE'S

## SPLENDID EULOGY BY ROBERT BELL

STATE MINE INSPECTOR PRAISES  
TWIN FALLS.

Gives Interesting Data in Regard to  
What Has Been Accomplished and  
Describes the Character of the Soil  
and Cause of Its Fertility.

Local Idaho people who have lived in southern Idaho and were so used to its desert, sagebrush plains had grown careless of their remarkable possibilities with the magic touch of water, and while a few of them took advantage of the opportunities presented at the south side opening three years ago, many of them have since lived to regret their neglect to heed the loud knockings of the Goddess of Success and can now see where they "slept on their chances" of becoming wealthy at comparatively little cash risk. With many others, I was slow to appreciate the advantages offered by this great enterprise and did not get in until the third opening under the high line canal on the south side Twin Falls irrigation enterprise, and the little holdings I now possess are five miles out from the city.

I had not been in the tract for two years until the other day. At that time it was a trip across a lot—through straight sagebrush for the full five miles. Last Wednesday I hired a team to drive out to the thing I made, and thought I should have no trouble in finding it as its location was pretty well fixed in my mind and I neglected to take a plat with me. The result was that I drove through well fenced lanes and cultivated farms and passed the place and went a mile beyond it, only recognizing it, on account of the greatly improved surroundings and cultivated ranches adjoining.

**Great Results.**  
It is simply astonishing to see the agricultural development of that section in such a short time. Property values in both city lots and acreage are growing almost as perceptibly as the alfalfa crops and will continue to do so. The results accomplished in such a short period are astonishing. The most conspicuous feature and one of the most important that a person will observe in traveling over the Twin Falls branch is the remarkable production of alfalfa, which at once fixes the value and quality of the soil and practically eliminates the possibility of its permanent impoverishment and the necessity of expensive artificial fertilizers in the future, for the homely alfalfa plant is known to possess the remarkable quality of fixing nitrogen from the air and thus providing the most essential element of plant nutrition to the soil, and by a rotation of crops will always serve the purpose of keeping the soil in fertile condition.

This sagebrush waste of three years ago is now populated by a very thrifty class of settlers. As the old saying goes: "A farmer is known by his fences; a villain by his offences." The thing that most impresses a visitor to the south side tract at this time with the quality and character of the settlers and their soil, is the size, number and construction of their stacks of produce of grain and hay, which are invariably put up in symmetrical shape and indicate a degree of intelligence in husbandry that is unusual in a new settlement.

**This Year's Crop.**  
I was only there a limited time and was unable to gather any definite statistics, but from the best information I could get from conservative residents, I think I am safe in stating that the south side Twin Falls tract this year will produce between six and seven hundred thousand bushels of grain, and probably fully the hundred thousand tons of hay, principally alfalfa and clover, together with enormous quantities of garden products, especially potatoes; and when you consider that probably less than 30 per cent of the total area under the canal is yet under cultivation, the importance of this tract as a producer of agricultural wealth in the near future can be appreciated.

The second crop of alfalfa now being harvested lies so thick on the ground, that when bunched together with a rake from the windrows there is hardly room to drive between the rows with a hayrack. While the enormous yield of grain is surprising for new land that has produced nothing but sagebrush for centuries, and with a ready market for the grain at a cent a pound, or better, on board the cars, the success of the settler in a financial way can be appreciated. In fact, the cost of the land will be cleared by the crop production. In many instances, this year. The market value of such an enormous production of hay, of course, is lower than a year ago, but it is still good and will continue to be so until the more complete settlement of the North Side Twin Falls tract, the Wood river project and the Salmon river project, all adjacent to the north and south; and with alfalfa at \$5 per ton and a yield of seven tons per acre, which is a common result where properly cultivated, the land will show a net profit of about \$20 per acre, which means 10 per cent interest on a \$200 an acre valuation. And other crops will pay much higher results even than this, as the progress of the tract advances and the settlement of the spring up that their products will justify.

**Stock Feeding.**  
This will make one of the greatest stock feeding sections in the west, and will be able to produce a variety of products. Cattle feeding and dairying will be an important feature. The alfalfa affords a fine forage for hogs through a long season from early in the spring until late in the fall, and when properly harvested and cured, it can be ground by modern methods into alfalfa meal which contains a large proportion of the fat-

ting element of grain, and with a little grain added in the winter fattening season) there is no reason why a very profitable packing house industry cannot be developed at this point, and all the fancy lines of ham, bacon, etc., produced at home that are now shipped into the state from the east at high transportation costs.

**New Forage Plant.**  
Some Ohio settlers have been experimenting with a forage plant called English bluegrass, that roots from runners at the surface like a strawberry vine and produces a tall grass with heavy seed almost as nutritious as grain. It is one of the first plants to grow in the early spring and stays green until freezing up time late in the fall, affording an excellent pasture grass with a matted sod that will stand irrigation, and is said to afford the most excellent sheep pasture available. A party of these settlers near Filer are seeding with this important forage plant, and figure that they can carry 10 head of sheep per acre under present prices of sheep products this means a yield of about \$3 or \$4 per head a year. Given an additional 60 acres for diversified farming, this means that a quarter section of land on this tract is capable of producing a small fortune every year.

Other industries of best culture (not sugar-manufacture, probably also starch and alcohol products) together with, contingent lines of manufacture, will rapidly be developed where so much cheap power and raw material is available.

The Short Line railway is now completed and in operation through to Buhl and the several electric lines now being surveyed that have been financed and on which construction will commence immediately will tend to rapidly develop the remarkable resources of this fertile field.

**Thriving City.**  
Twin Falls is rapidly becoming a handsome little city, and many very substantial buildings are now in progress. Its enthusiastic citizens are figuring on a population of 15,000 people in 1910, and a person cannot view the progress of the tract for the past three years without feeling that their anticipations are not only justified but very conservative, and the opportunities for investment in realty at this point are exceptional.

**Geology and Topography.**  
Geology and farming are widely divergent subjects, to the ordinary mind but, as a matter of fact, they are intimately related and the former has an important economic bearing on the latter. From a topographical point of view, the Twin Falls North Side tract presents an undulating plain, a succession of long, low swells that produce a flat relief with shallow intervening draws and coulees, the whole split lengthwise through its center from east to west by the narrow box canyon of the Snake river. This canyon varies from 50 feet to 800 feet deep, and contains a suc-

cession of magnificent terraces capable of developing a million horse power, an important unit of which has already been harnessed at Shoshone falls.

The walls of this canyon are built of a succession of nearly horizontal flows of recent basalt lava, which forms the true bedrock of the Twin Falls tract and the adjacent tracts to the north and south.

These topographical conditions afford ideal drainage for the irrigation of the soil and absolutely insure against soggy, sourd land due to the irrigation of the soil. In flatter areas the soil covering varies in depth from one to 20 feet, and is underlain with strata of white, crumbly or trass-like lime tufts called "hardpan" which generally rests immediately on the lava bedrock surface. This hardpan, however, when saturated by the water of irrigation, readily softens and becomes permeable to delicate plant roots, and its simple composition of lime carbonate eliminates the probability of alkali efflorescence. The soil is light gray in color and "very fine grained," so much so that about 80 per cent of it will pass through a 20-mesh sieve, and is of such a nature that it never bakes under irrigation, and is a great absorbent and retainer of moisture.

**Soil Formation.**  
I am inclined to take issue with the opinion of some of the government experts who have passed on the lava surface geology of this tract and attribute the soil to ash-lake or wind-blown sources foreign to its present position, and also as to the nature and origin of the sub-soil or hardpan on the lava surface. The following analysis will give an idea of its remarkably interesting composition of elements entering into the composition of this soil and is copied from the admirable detailed government report of the "Geology and Water-Resources of the Snake River Plains of Idaho" by Professor Israel C. Russell.

Chemical analysis of soil from near Shoshone falls, Idaho:

	Per cent
Silica, SiO <sub>2</sub>	62.41
Alumina, Al <sub>2</sub> O <sub>3</sub>	7.10
Ferric oxide, Fe <sub>2</sub> O <sub>3</sub>	2.63
Titanium dioxide, TiO <sub>2</sub>	.35
Manganese oxide, MnO	Trace
Calcium oxide, CaO	14.60
Potassium oxide, K <sub>2</sub> O	1.7
Sodium oxide, Na <sub>2</sub> O	.33
Magnesium oxide, MgO	2.23
Carbon dioxide, CO <sub>2</sub>	12.40
Phosphoric oxide, P <sub>2</sub> O <sub>5</sub>	.20
Water, H <sub>2</sub> O	4.90
Total	100.31

Analyst, W. F. Hildebrand.  
In the same work, another analysis of a straight basalt rock gives a comparatively strong development of the same principal elements, the silica contents being practically identical, and I believe that the soil was produced volcanic dust omitted from the numerous crater cones that dot the Snake river plain of this region, and precipitated into a lake that covered the whole valley at that time. The value of such a composite soil

containing, as it does, such a variety of elements as the analysis gives, will be apparent as compared to the soil produced from a formation of simple composition. If this soil was derived from the sedimentary and granite crystal line rocks that form the mountain ranges bordering the valley, it is owed to its present position by aeolian forces, its composition or analysis would not likely be so nearly that of the basalt formation on which it rests, nor so uniform.

**Floot Indications.**

Another reason why this is unlikely to be its mode of origin and an evidence that it was precipitated in a body of water, is its semi-crystalline structure near its base, as exposed in recent excavations where the soil is deep in Twin Falls City. A further evidence against its foreign origin, in the patches of float lava that occur along the west slope of the low swells throughout the tract. While there is probably as large a proportion of clean rock as there is of soil, the clean lava is found under any other irrigation system in the world, there are limited areas where patches of slabby lava rock occur at the surface. If these rocks rested directly on the solid bedrock surface, they would represent so much of waste land that would be of little value. With very limited exceptions, however, this is not the case, and as a general rule a depth of rich soil underlies these patches of float rock which may be removed and leave a resulting area of valuable land for cultivation, a very important feature to the settler and to the investors in the irrigation bonds of this region.

On my fifth mile south of Twin Falls City, and at several other points I investigated this feature the other day, and found as much as three feet of clean soil underlying slabs of lava that would weigh as much as 30 or 40 pounds, and while it is possible that the wind has played an important part in the modification of the present soil surface, it is inconceivable how it could have conveyed such heavy pieces of solid rock and deposited them on soil and across such a broad plain as intervenes between their present position and the lava bluffs that border the valley at many points and from which they were probably derived.

**Ancient Lake.**  
There is no question but that the whole Snake river valley was covered by an ancient lake early tertiary age that antedated Lake Bonneville of the great basin to the south, as it is manifested by old shoreline deposits that can yet be observed in remnant areas at an elevation of over 5,000 feet on the mountain slopes of Blaine and Owyhee counties, and by the evidence of the erosion of the Columbia lava dam that held it in the grand canyon of the Snake river below Huntington, and it is not unlikely that the prevailing winds were from the west at that period as they are now, and that these patches of float rock were conveyed in ice floes from the borders of this great lake and pre-

ciptated on the lee shores of its gradually receding surface, which would account for their prevalence on the westerly slopes today.  
The underlying hardpan or trassine has also been attributed to a segregation from the soil itself and the immediate bedrock by surface waters and capillary attraction. I believe, however, that it is more likely to have had its source in a precipitate from a seething array of hot mineral springs that saturated the cooling surface of the upper lava flows, and that, this lime tufts was dissolved from the composition of the lava and probably from deep underlying bodies of straight limestone formations. This theory is largely substantiated by the occurrence of an example of dying vulcanism four miles west of American Falls, where a hot springs crater, almost circular in form and several acres in extent, and now used for a reservoir, that is still flowing 1000 inches of warm to hot mineral water, has built up horizontal beds of the same trassine material of red sign and is still precipitating the same clean lime carbonate at the present day.

The above interesting geological conditions prevail over practically the entire area of the adjacent irrigation tracts that are being developed by the Idaho Irrigation company (better known as the Wood River project) to the north, and the Salmon river project to the south, which are practically a unit with the Twin Falls tract in soil and physical features, and the importance of their complete and rapid development to the state at large and the enormous property values that will be created by them in the next few years can hardly be appreciated without a trip through the South Side tract which is well worth the cost, as it gives a convincing idea of the future from what has been accomplished in such a brief period at that point since the inception of the Twin Falls enterprise three years ago.—Robert N. Bell in The Boise Statesman.

### OREGON SHORT LINE.

Summer Tourist Excursion to Pacific Coast, 1907.  
From Pocatello to San Francisco and return, via Ogden and Southern Pacific, \$46.50; going via Ogden and returning via Portland, \$53.50.  
From Pocatello to Los Angeles and return, via Ogden and Southern Pacific, \$46.50; going via Los Angeles Ry. from Salt Lake & Los Angeles Ry. from Salt Lake, \$48.50; returning via Portland, any route, \$63.50.  
From Twin Falls, a 50 per cent of double local fare for the round trip to Pocatello.  
Dates of sale, June 1 to September 15, inclusive. Going limit, 60 days from date of sale; stopovers within transit limit. Final limit, October 31, 1907.

TWIN FALLS, IDAHOSubscription Rates:  
One Year, in Advance, \$2.00  
Six Months, in Advance, 1.00

Reliable information regarding the city and county news and generally published, draw all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter, December 12, 1894, at the postoffice at Twin Falls, Idaho, under the Act of Congress of March 3, 1879.

After two weeks of annoyance, determined to business and financial loss to those who use gasoline for power and lighting purposes, the gasoline famine was broken in Twin Falls on Tuesday, when orders placed one month previous were filled. There have been so many gasoline famines in this garden spot of the universe that those who rely upon Mr. Rockefeller's notsoe illuminant have risked their chances of redemption to an extent that they have become reckless. The recent famine, however, was sufficiently acute to empty every vial of wrath on the tract upon the heads of those responsible for it. Why people should suffer for the lack of a staple like gasoline is beyond comprehension. The oil wells are still spouting and so is John D. Rockefeller. In his latest report he announced his repentance and his desire that the Standard Oil company should henceforth obey the laws of the land and so relieve its aged head from the burden of public contempt. This sublime resolution formed on the brink of eternity by the rapacious president of personified greed could well be classed with the repentance of Harry Orchard. It will receive fully as much credence. It is said that to err is human and to forgive is divine, but Mr. Rockefeller does not merit forgiveness. He has neither confessed nor atoned for his sins. Possibly Mr. Rockefeller has a conscience, but the majority of American citizens and others who are familiar with his "system" will be more likely to believe that the \$25,000,000 fine imposed by Judge Landis restored its vitality than they will to credit his reformation to the promptings of the divine spirit. If Mr. Rockefeller has a conscience he must surely be moved by public sentiment. To quit this world with the maledictions of millions ringing in his ears is a fearful contemplation for a man who professes Christianity. A little gasoline famine is a trifling occurrence except to those who suffer by it, but it serves to draw attention to the operations of an agency which is responsible for more anarchistic proselytism than all the yellow press in the world. Good citizens are imposed upon and embittered to such an extent that they cease to wonder when fanatics commit deeds which should cause Christian people to shudder. The machinations of the system breed discontent. While Mr. Rockefeller is probably guiltless of many of the crimes charged against him, and can boast that he has never been imprisoned, his eleventh hour repentance has a hypocritical ring which offends the public ear. Richard Mansfield, who laid down Jiff's mantle only a few days ago, bequeathed less than a million dollars to his wife and children, yet he left a greater legacy than will John D. Rockefeller. For him the English speaking world mourns sincerely. The same world will breathe a sigh of relief when it is freed from the dangers to which it has been subjected by the organizations of which Mr. Rockefeller is the dominant spirit.

Provision has been made for the introduction of a preparatory course in agriculture in the high schools of Idaho. Twin Falls was the first city in the state to take up this work and the example set here is now to be widely followed. It has always been strongly advocated by Alex. McPherson, who conducted the study in Twin Falls. Why agriculture has been slighted for other less important branches of study in the past has always been a mystery and it is gratifying that Twin Falls led the way in teaching the children the theories of plant life and animal husbandry, knowledge which every child should possess and which will eventually place farming on a much more scientific plane.

Notice to Contractors.

SENIOR'S SPUDS  
DRAW RIVAL FIREEVERYBODY HAD THEM BEATEN  
A MILE.

But His Competitors Have Yet to Produce the Goods—Grand Chance for Them to Settle the Potato Question at the County Fair.

Alan P. Senior, one of the most enterprising farmers on the Twin Falls tract, recently brought in a number of samples of Notted Gem potatoes. The Notted Gems are so shaped and so well molded for domestic use that they excited wide admiration. From one hill Mr. Senior dug 11 marketable potatoes, any one of which would delight the eye of a housewife. They were just the proper size for cooking, smooth as an infant's cheek and with eyes flush to the skin. Mr. Senior left them on the counter in the business office of the News. In so doing he started something. He did not know that it was impossible for any farmer on the Twin Falls tract to raise a vegetable which could not be surpassed by every other farmer on the tract. He was likewise ignorant of the fact that every farmer on the tract has the finest piece of land under the canal system.

Nels Lind of Filer was one of the first to inspect Mr. Senior's Notted Gems. Nels always has a good word for everything produced by his neighbors. He is a booster, not a knocker, but when he saw the 11 beauties he grew serious.

"Nice potatoes, all right," declared Mr. Lind, "but let me tell you. My neighbor, Frank Griffith, planted a half dozen Burbanks last spring. He put them on good ground and gave them good care. A few days ago he dug up one of the hills and filled a coal scuttle and a five-pound lard pail. That's what I call a good yield. Still, as I said, those Notted Gems look mighty nice."

One of the Kimberly farmers strolled in and cast his eyes on Mr. Senior's offering. The Notted Gems were unshrunk as a result of Mr. Lind's visit.

"Very good, indeed," said the gentleman from Kimberly, "but you ought to see my Early Ohio. Planted them late, too; gave them mighty little water and they are so moony that we have to steam or bake them. Won't stand boiling. Some of them are so big

that I used them to tether my cows to. Don't suppose I'll be able to tell the real big ones at all," and he walked out without cracking a smile.

George Smith, deputy county recorder, squinted at the Notted Gems through the corner of his glasses. "I was going to give a cash prize for the biggest potato at the fair, the potato to become my property at the close of the fair," said Mr. Smith, "but I want something bigger than that. One man has already offered to bring me in a spud 14 inches long, and he says it ain't done growing yet."

Pat Monahan of Buhl, Tom Rutledge of Hansen and John Steinhour of Murtough are still to be heard from. By the time they get through, Mr. Senior's Notted Gems will look like early June peas.

Moral—If you have anything good, bring it to the county fair and give everybody a treat.

H. B. Johnson expressed his admiration of the Notted Gems. "They are certainly pretty," said Mr. Johnson, "but you can't handle them the way we handle ours. When we want some spuds we just go and gather an armful. Our potatoes are so long that they can be carried like bullets of wood across the armer. Half a dozen of them will make a lady man's load."

For Sale—One dozen full blooded Bur Lakshon roosters, \$1 and \$2 each. Write or inquire of C. M. LAY, Filer.

## BREVITIES

John Lischer of Griswold, Iowa, has accepted a position with the Booth Dry Goods company.

Mrs. R. W. Farris of Boise visited on Thursday with their childhood friend, Mrs. I. B. Farris, at Blue Lakes.

Rev. John Gourley will preach at the banner school in Maroon on Sunday afternoon at 3 o'clock.

Mr. and Mrs. Sweet have arrived from Wallace for a visit. Mr. Sweet, who has a farm on Cour d'Alene ridge, is associated with O. M. Gant in Wallace.

The new herd law is now in effect but it seems to make very little difference. How to enforce it appears to be a puzzle which nobody has thus far been able to solve.

Ed Kahl returned last Friday from Earling, Iowa, and will remain in Twin Falls during the winter. He was accompanied by M. A. Loeltz and James Quinn of Earling, who came to look over the tract. M. A. Strunk of Earling is also here and finds a great deal of improvement since his visit in June.

Mr. and Mrs. Larned gave a delightful dinner party at their home on Thursday evening. Those who enjoyed their hospitality were Mrs. Mitchell, the Misses McManis and Miss Hughes. Mr. Mitchell, Mr. Voorhees and Mr. Heap. After dinner the guests amused themselves playing bridge.

County Clerk West has notified the trustees of all school districts in the county that they should be careful to certify their special tax levies, otherwise the taxes cannot be collected. A number of districts have already certified but several have failed to do so and should attend to the matter immediately as the time is short.

The News has received a wireless dispatch to the effect that Pete Holohan came home on Thursday. It is reported that Peter found two tons of mail awaiting him and is endeavoring to engage a stenographer. While touring the northwest for the Dupont Powder company Mr. Holohan did some splendid execution at the traps. His scores being equal to those of the leading professionals.

James A. Waters has returned from Walla Walla, where he bought four cows, three two-year-olds, 20 yearlings and 20 calves. In his shipment were Jerseys, Holsteins and dairy strain Durham. Mr. Waters said he found that good dairy cows were scarce but it was possible to get good young stock. As the young stock is more easily acclimated he decided to buy it. He has the cattle on his farm one mile north of town.

Mr. and Mrs. C. C. Bodford are preparing to move to their home on Thirtieth avenue, next to the residence of Mr. and Mrs. Chancel.

Former Senator and Mrs. Fred T. Dubois arrived on Thursday and joined Mr. and Mrs. Bryan at the Blue Lakes.

Every box in the Twin Falls post office is rented and there is a demand for more. Postmaster Greenhow announces that those who are delinquent with their rent after October 1 will lose their boxes.

Attorney General Guheen, Robert J. Hayes of Pocatello and H. T. Ames, a friend of Mr. Hayes, came in on Wednesday and went over to Jerome on Thursday morning to look at north side land. They are all going to file at the opening.

The last of the county record books came down from Abilene on Monday and the work is now nearing completion. Documents filed since Twin Falls county was organized are now being returned to the owners and the work will be up to date in a very short time.

R. L. Bybee of Leona, Bingham county, Idaho, is here visiting his son, James A. Bybee. Mr. Bybee first came to this part of the country in 1861. He was astonished to witness the change in this section of the valley with which he was greatly pleased. Mr. Bybee said that first class yields of all crops were being obtained in his part of the state and that everything looked well.

During the month of October the postage mail from Twin Falls will be weighed by states. From October 12 to October 19 every piece of mail matter will be counted and the precise amount noted. It is desirable that the public should endeavor to place mail in the postoffice not later than 4 o'clock in the afternoon if they wish it to go out the same evening.

Two meetings of the Commercial club were held this week for the purpose of endeavoring to reorganize the club on a different basis. The most favored plan is to increase the initiation fee and dues to such proportions that the club will be able to furnish a suite of rooms and employ a steward to look after them. The idea is to install a billiard table and buffet and keep open house. A committee was appointed to canvas the situation and report at the next meeting.

There has been a runaway almost every day for the past week. Several amusements have occurred and it is fortunate that nobody was injured. The practice of leaving teams standing untied on the streets should not be tolerated. There is a city ordinance prohibiting it but the authorities hesitate to punish good citizens for mere carelessness. The chief of police has announced that he will be obliged to fine the next offender in this respect.

Mr. and Mrs. F. H. Eastman returned on Wednesday from the east, where they had been visiting.

Mr. and Mrs. B. J. Dittor are receiving congratulations on the birth of a son, which came to cheer their home on September 12.

The Brotherhood of American Yeomen will give a basket social in the Odd Fellows' hall on Friday evening, September 27, to which all members of the order and their friends are invited.

Mrs. C. W. Hawk has returned from Boise and will remain at her home in Twin Falls for the winter. Mr. Hawk is in Elly, where he is foreman of construction on a large business block.

I. B. Perrine has built a temporary stand on the corner of Main street and Shoshone avenue, where he will maintain an exhibit of fruit for the next 60 days in order to give visitors an idea of what can be done in the way of fruit-growing on the Twin Falls tract. The exhibit is now being prepared at the Blue Lakes and will be installed in time for the county fair and the Jerome opening.

Everett Sweeley left this week for Spokane, where he is to marry Miss Hazel J. Browne, a charming young lady who visited with the parents of her prospective husband not long ago. The boys are planning to give Everett and his bride a reception in keeping with their esteem. It will be something stylish, from all accounts, and no trimmings calculated to make it spectacular will be omitted.

John W. Voorhees has shipped in two carloads of thoroughbred Jersey cows which he purchased from the Ladd, Atkinson and Looney farms in Oregon, where some of the finest Jerseys in the country are bred. Mr. Voorhees has taken the cows to his farm in section 24, township 9, range 16, a half mile north of the township road to Buhl, where he is selling them. Counting the car which James Fitzgerald is now buying, 10 carloads of dairy stock have been shipped into Twin Falls within the past month. Now for the creamery.

For Sale. Registered and high grade Jersey cows. At Voorhees ranch, half mile north of township road to Buhl, section 34, township 9, range 16.

Notice. A special meeting of the governing board of the Twin Falls Canal association will be held in the association's office on Friday, September 27, at 2 p.m.

Wanted—To exchange for property near Buhl, Filer or Twin Falls, 80 acres under the Minidoka project canal; land all cleared and fenced; nearly all under cultivation this year; good frame house; irrigated direct from the main canal. Call or address IDAHO REALTY CO., Buhl, Idaho.

Hotel for Sale—Doing good business in growing town. Address A. G. Lammers, Filer, Idaho.

**Health Preservatives**

It is a certain thing that there would be much less disease in the community if every individual took proper precautions to preserve his or her health. We cannot be too cleanly in our habits. Cleanliness is not only next to godliness, but a sure keeper of good health. We should daily wash the skin with a good antiseptic soap, brush and clean the teeth well, and see to it that our person and personal effects are beyond reproach as regards cleanliness. Every facility for the Bath and Toilet are here.

## Bedford Drug Co.

They have a way of doing things down at Twin Falls that is bound to make the town a thriving commercial center—the hub of the vast south side tract. For instance, it was proposed a short time ago to establish a creamery there, and in order to boost the proposition along the town company donated a site on which to erect the creamery buildings. How different that is from the method employed by many towns. In some towns, the moment it is noted about that a proposed enterprise is to be established there-up-jumps the value on every foot of vacant land in the town. The result is the promoters of the enterprise refuse to be held up and they go to some other town where concessions are offered. The establishment of a creamery in Twin Falls will put money into the pockets of every business man in the town and add to the wealth of the farmers who supply cream to the institution—Montpelier Examiner.

Board and Rooms—Mrs. Frank Bowser, 619 Java, bet. 10th and 11th streets.

Last call for Spackman's Fair View Ranch (P. V. R.) roasting ears of corn.

## 150,000 Acres Carey Act Land

To Be Opened for Entry

### October 1st, 1907

\$35.50 Per Acre

\$3.25 per acre in cash is paid at time of filing, the balance is divided into annual payments covering a period of ten years with 6 per cent interest on deferred payments.

Under the Carey Act, people who have used all their government rights to take up land can still acquire 100 acres of Carey Act land. Filings may be made by power of attorney when parties intending to do cannot possibly come.

The entire Twin Falls tract embraces 150,000 acres. The opening OCTOBER 1ST is the last tract to be sold under the gravity system.

There are three new towns in this opening—MILNER, JEROME and WENDEL. Surveys for an electric railroad reaching all the towns have been made and active construction from Milner and Jerome will be commenced August 1st, 1907. The contract from Jerome to Wendel will be let later in the season.

Special rates will be given on the O. S. L. railroad to reach Jerome, where the opening takes place October 1st. Take the O. S. L. railroad to Shoshone or Twin Falls, where stages will make frequent trips to Jerome.

## RAILWAY SURVEY INTERESTS ELY

WOULD LIKE TO BE CONNECTED WITH TWIN FALLS.

Great Copper Camp Needs Power from the Snake River and Farm Products from the Twin Falls Tract and Offers a Good Market.

W. N. Bowen, who has a farm east of Buhl, and who went to Ely, Nevada, one year ago, is here looking after his interests.

"The tract looks better than ever to me," said Mr. Bowen, "and I hold my land to be much more valuable than when I went away. The development during my absence has been something wonderful and I only wish I could stay for the Jerome opening. It will be the greatest in the history of the country."

Concerning the great copper camp of Ely, which is now attracting universal attention, Mr. Bowen said:

"Ely and Twin Falls are going to be more neighborly in the near future, I hope. We are watching with great interest the railway surveys from Nevada to Twin Falls and we believe that it will not be long before the road is built. In Ely we need Twin Falls products and in Twin Falls you need the Ely market."

"There are 1100 men employed in constructing the Ely smelter, which will be the largest in the world. Fully 2,000 more are engaged in the mines and on the railroad. More labor would be employed if it were possible to get it. The Hotel Stetson, which will be the finest in Nevada and will contain 180 rooms, is now being constructed of Denver pressed brick with gray sandstone trimmings. It will be modern throughout and should be completed by next spring. There are two other three-story hotels already open to the public. The Nevada Northern has one of the finest depots in the state at Ely. A big electric power plant is nearing completion from which power will be used for running the electric roads which will connect the smelter, the mines and the city. The Gunn-Thompson block, three stories, 55x100 feet, built of Denver pressed brick, is about finished. Everybody is building for the future in the belief that Ely will surely be one of the best cities in the country. Ore valued at millions of dollars has been blocked out already and enough is in sight to run the big smelter for the next 50 years at a rate of 25,000 tons per day. Considering these facts it is not surprising that within the last six months a modern city has sprung up and \$1,500,000 has been spent in improvements. We have a modern waterworks system of sufficient capacity to supply a city of 75,000. Ely is lighted by electricity and will have a first class sewer system. It is bound to be the distributing point for southern and eastern Nevada. Remember, all this has been accomplished within the past six months. The first unit of the concentrator, with a daily capacity of 5,000 tons, is expected to be in operation by the first of the year and the first unit of the smelter, of similar capacity, should be running by the first of June. The Western Pacific will be operating passenger trains from Salt Lake City to its junction with the Nevada Northern, about 100 miles north of Ely, within 30 days and will run its trains into Ely on the line of the latter road. The San Pedro road, which is now building from Calliente to Pioche, has been surveyed through to Ely and will be constructed to the great copper camp in the near future. A railroad has also been surveyed from Ely to Tonopah, over which the Tonopah ores will be brought to the Ely smelter. Another road has been surveyed from Ely to Salt Lake City in a direct line by way of Deep creek. The construction of these roads will undoubtedly make a great city of Ely. I consider that a railway from Twin Falls to Ely would be of incalculable benefit to this tract and its construction would be equally welcomed in Ely. We need Twin Falls electric power to run our mines and machinery and we need Twin Falls farm products to feed us. Here you need just such a market as Ely affords. By all means let us get together."

Choice Lands.

We own and have for sale some choice irrigated lands, improved and unimproved, that we can sell you very reasonable terms. The price will be satisfactory, the quality of the land and water supply second to none in the United States.

## GOLDEN SANDS OF THE SNAKE RIVER

CONTAIN COUNTLESS MILLIONS IN GOLD.

Stream is a Natural Sluice Box for 600 Miles—Persistent Efforts Being Made to Save the "Flour-like" Gold in the Bed of the Stream.

The largest and richest natural sluice box in the world, and perhaps the greatest deposit of gold on earth, is to be found in the combined gold of the black sand concentrates of the Snake river, Idaho. The writer having obtained these black sand concentrates from the bars of the river at varying depths of from one to two feet below the gravel, to 10, to 12 feet below the surface at different points in the river for a distance of 240 miles; having treated hundreds of samples of these concentrates in the last three years and obtained their gold values, will endeavor to give the public, in this article, an authentic statement of the results of his labor in this particular deposit of gold-bearing concentrates in the black sands of the Snake river.

The free or metallic gold that is found on the gravel bars in the river is a light, flakey, nugare, that is washed up on the bars together with the finer portions of the black sands, and will perhaps have an average value of 10 cents per cubic yard of the gravel. The efforts of all the dredging companies operating on this river in the past was to obtain this surface gold, and their dredges were so constructed that it would enable them to skin the surface of the bars to the depth of a foot or two, and their failures were owing to the fact that the flakey gold was lighter than the black sand concentrates, and would wash off from their burlap sluices and leave the black sand, so that they were enabled to get but a small percentage of the values, after separating their free gold by amalgamation they would throw their black sand back into the river.

In treating these sands taken from a depth of one or two feet below the gravel in the river, I found the gold values to run from \$400 to \$700 a ton. This included both the free and combined gold. At Glen Ferry, where I was enabled to get the concentrates at a depth of three feet, I found the values to be \$1,300 a ton in gold; and the surface sands obtained from the Imperial Dredge & Exploration company at Mountainhome carried gold values of \$1,048.80 a ton. The superintendant of a suction dredge at Great Bend, as indicated by the sluice to a depth of from 10 to 12 feet below the gravel, and 40 pounds of concentrates obtained by me gave a gold value of \$8,270 a ton.

In these concentrates there was but very little, if any, free gold, the black cubes of sand at this depth being almost as large as pin heads; the first one-pound sample of this batch giving me 98 grains of gold. I also found that the magnetic sands being of a lighter specific gravity (and they are of a greater depth) wash up on the bars with the light, flakey gold; these sands carry a much larger percentage of magnetite than are found in the sands of a greater depth, and it will be seen the difficulty one would have to contend with to give an absolute analysis of the sands from a surface standpoint.

The percentage of the black sand concentrates that can be obtained from the sands and gravel on the surface of the bars at the depth of one or two feet below the gravel is estimated carefully. It runs from three-fourths of one per cent to one and one-half per cent; but with every foot in depth the increase in percentage is enormous. It was not possible for me to obtain the percentage of the concentrates at Great South Bend at the depth mentioned above—10 to 12 feet. The superintendant of this dredge declared that it would run fully 20 per cent. At this depth they seem to have reached a black sand stratum. I am fully convinced that 4 or 5 per cent of the concentrates can be obtained at the above mentioned depth. What the percentage of values will be at a depth of 20 or 30 feet can only be conjectured. No sand that I am aware of has been obtained at a greater depth. In the analysis of the black sand concentrates, on areas 1 and 2, 29 per cent of titanium. This was obtained by me as a certain, and perhaps from 10 to 12 per cent of other oxygen salts and metals exceed 20 per cent of iron. I mention this merely to show the absolute infusibility of this compound. In metallurgy we have the tellurides, selenides, sulphides and pyrites compounds of gold, but there is no metallurgical authority that mentions a silica gold titanate; and as I am the inventor and patentee of the freeing of gold in its metallic state from its binary compounds, I claim the honor of being the discoverer of this unclassified mineral or compound—a silica gold titanate—and for the present, at least, this is the only known method of extracting the full gold values from these concentrates.

The estimated cost per yard of obtaining these concentrates by the use of a suction dredge or sand pump is from \$2.50 to \$3. A 10-inch suction pump has a capacity of 3,000 yards in 24 hours. It is estimated that it will give 30 yards of concentrates per day that would have a gold value of at least \$300 per yard, or \$24,000 per day; but a 10-inch pump can be obtained at a depth of from 10 to 12 feet, and the gold values of these concentrates run \$8,270 per ton. Is there any industry on earth that will equal the money-making possibilities of obtaining the black sand concentrates from the greatest natural sluice box in the world? And these conditions prevail for a distance of 240 miles. The sand pump is all that is required; the whole proposition is one of depth and concentration. — George W. McGee in Ores and Metals.

Sole Agents for Water Rights for all Carey Act Lands under the

## GREAT TWIN FALLS CANAL SYSTEM

25,000 Acres of  
Carey Act Land

Still open for original entry under this Canal System

Land, 50 cents per acre. Perpetual water rights, \$25 per acre, ten annual payments.

Vehicles from Buhl furnished free to those who desire to inspect land. Prospective entrymen accompanied by competent locators.

Buhl, located 17 miles west of the City of Twin Falls is the leading city on the west end of the tract and the distributing point for a large area, including the stock districts of Three Creek, Butte and Roseworth, likewise the farming and fruit growing districts of Hagerman, Kanoka Flat and Salmon. The railway track is now completed between Twin Falls and Buhl, and train service has begun. Buhl has a splendid gravity system of water works, with a pressure of 100 pounds in the business section. It will soon be supplied with electric power and light. Business property values in Twin Falls have increased 50 per cent in less than two years. The same opportunities for investment are presented at Buhl. Now is the time to buy. Write for literature and further information.

**Notice of Attachment.**  
In the District Court of the Fourth Judicial district of the State of Idaho, and for Twin Falls County.  
Plaintiff, Elmer T. Shoomak and Eva B. Shoomak, his wife, defendants.  
Notice is hereby given that a writ of attachment was issued out of the above entitled cause filed the 17th day of August, 1907, in an action wherein Elmer T. Shoomak is plaintiff and Willy T. Shoomak and Eva B. Shoomak, his wife, defendants, to attach the property of the said defendants to recover the sum of \$152.13 besides interest, with all costs, expenses and disbursements.  
Witness my hand and the seal of said court this 20th day of August, A. D. 1907.  
H. T. WEST, Clerk of District Court, Twin Falls County, Idaho.  
By GEO. H. SMITH, Deputy.  
P. W. MONAHAN, Attorney for Plaintiff.

**Notice of Attachment.**  
In the District Court of the Fourth Judicial District of the State of Idaho, and for Twin Falls County.  
Plaintiff, vs. A. Dunkan, defendant.  
Judge is hereby given that a writ of attachment was issued out of the above mentioned court on the 11th day of September, 1907, in an action wherein Western Lumber Co., corporation, is plaintiff and A. Dunkan, defendant, attaching the property of the said defendant to recover the sum of \$110 besides interest, with all costs, expenses and disbursements.  
Witness my hand and seal of said court this 13th day of September, A. D. 1907.  
H. T. WEST, Clerk of District Court.  
By GEO. H. SMITH, Deputy.  
SHIELDS & ASHTON, Attorneys for Plaintiff.

**Notice.**  
Twin Falls, Idaho, Sept. 2, 1907.  
Notice is hereby given that the firm of S. T. Hamilton & Co., doing business at Twin Falls, Idaho, has this day been dissolved by mutual consent. The said Hamilton continuing the business and will pay all claims against the firm and will receive all debts due said firm.  
S. T. HAMILTON & CO.  
S. T. HAMILTON.

**Alias Summons.**  
In the District Court of the Fourth Judicial District, State of Idaho, and for Twin Falls County.  
Christian Jacobson, plaintiff, vs. Lizzie Jacobson, defendant.  
The State of Idaho sends greetings to Lizzie Jacobson, defendant.  
You are hereby summoned and required to appear in an action brought against you in said plaintiff in the said District Court, and to answer the complaint of the above named plaintiff, filed therein, within 20 days (exclusive of the day of service) after the service on you of this summons. If served elsewhere within 40 days. The said action is brought to dissolve the bonds of matrimony now existing between the plaintiff and defendant herein.  
And you are hereby notified that if you fail to appear and answer said complaint as above required, the said plaintiff will apply to the court for the relief prayed for in plaintiff's complaint.  
Attest my hand and the seal of the District Court of the Fourth Judicial District, State of Idaho, in and for Twin Falls County, this 15th day of September, 1907.  
H. T. WEST, Clerk.  
C. ROGERS, Attorney for Plaintiff, Residing at Buhl, Idaho.

**NOTICE OF BOND ELECTION.**  
Notice is hereby given that at a special meeting of the Board of County Commissioners of Twin Falls county, Idaho, called and held for the herein after mentioned purpose, on the 9th day of September, the following resolution was adopted, to wit: "Whereas the Board of County Commissioners find it necessary and for the best interests of Twin Falls county, Idaho, that a jail be erected and maintained in said county, and it being found by said board that the expense of erecting such a suitable jail of suitable size and capacity and furnishing the same will be \$15,000, and that the same will exceed the revenue of the current year applicable thereto and to that purpose, and  
"Whereas the board deems it for the public good to bond the county in the sum of \$15,000 for the purpose of providing funds therefor; therefore be it  
"Resolved, by the board, that the above and foregoing proposition be submitted to a special election of the voters of said Twin Falls county."  
In accordance with said resolution, a special election is called to be held on the 5th day of October, 1907, to determine whether the said commissioners are authorized to issue the several bonds of said county in the sum of \$15,000 for the specific purpose of building and equipping said jail for said county. The election above mentioned will be held in the several precincts in said county as hereinafter mentioned and the polls will be opened at the hour of 1 o'clock in the afternoon and will be closed at the hour of 7 o'clock in the evening of the same day.  
Said bonds to be issued will be issued in denominations of \$1,000, and if necessary, will be issued in denominations of \$500 and \$100, and all of said bonds will bear a rate of interest not to exceed 6 percent per annum, payable in cash on the 1st of January of each year. Said bonds, or any part thereof, may, at the option of the county, be redeemed at any time after 10 years from the date of their issue, provided the same time and portion be stated upon the face of each bond, and each bond must be redeemed in the order it is numbered.  
GEORGE L. CROCKER, Chairman.  
Attest:  
H. T. WEST, Clerk.

Full tree planting season is here: so is the Twin Falls Nursery with over 200,000 home grown fruit, shade and ornamental trees of all varieties. Mr. J. A. Waters, the general proprietor, is pleased to have buyers make a personal selection.

## SUN AND WATER SET HIM AFIRE

WARM EXPERIENCE OF VISITOR FROM WASHINGTON.

Undertook to Take Home a Bottle of Water from Thousand Springs, but Found it Too Hot a Proposition to Handle Comfortably.

Sunny Idaho and the pellucid waters of the Thousand Springs have furnished inspiration for many a sentimental line. They have filled the minds of nature lovers with lofty thoughts and filled the waste-baskets of many editors with laudatory poems. Sunshine and water are two of Idaho's chief assets. Colloquially speaking, they are a hot combination, commercially and physically, literally hot enough to set the world afire.

A few days ago a party from Washington visited the Thousand Springs. They crossed the river on Judge Uthlaub's ferry and remained for several hours at the springs. While there they concluded to take back a sample of the water, with which they filled a quart bottle. What the bottle previously contained is nobody's business. While recrossing the ferry on the homeward trip one of the gentlemen held the bottle in his lap. The sky was unclouded and the sun's warm rays slanted caressingly across the broad green bosom of the Snake river. The judge was explaining the beauties of the canyon to the visitors when the man who carried the bottle of water leaped from the wagon seat and began to perform an Indian dance on the boat. A small cloud of smoke arose from his—fired his clothing and he snatched himself vigorously on that portion of his anatomy on which the bottle had rested. It was found that the rays of the sun, passing through the glass and the clear water, had set fire to his garments, burning a hole the size of a half dollar.

Judge Uthlaub promptly took the depositions of the visitors regarding the occurrence. Last the happening might be questioned. As the scorched gentleman went to Buhl, it is miraculous how Pat Monahan managed to get "scorched" on the story. Possibly he was afraid that his reputation for veracity might suffer.

Moral—Don't carry any bottles when you visit the Thousand Springs.
