HOW MOISTURE IS BEST RETAINED

INTERESTING PAPER BY PROFESSOR FRENCH.

Cultivation and the Preparation of the Soil Are the Essentials in Holding the Moisture Until It Is Required by the Plants.

The following paper was read at the irrigation congress by Prof. H. T. French of the university of Idaho:

In modern times men are learning that it is not enough to control the source and supply of water, but it is found quite as important to know where the water goes and how to retain it long enough in the soil to furnish the plant with its needs. It is only in recent years, however, that much consideration has been given to the latter problem. We can all remember of irrigationists, and come in contact with such even now, who are giving all their attention to getting more water, and in the getting, often care little for the rights of other men who are striving in the same direction. "Pour on more water," if it is possible to buy or steal it, has too often been the motto of the farmer who raises crops under this system of farming.

Through the light of recent investigations men are learning that successful agriculture is not alone dependent upon water supply, although that is, in all cases, a fundamental factor in the problem. In other words, the best results are attained when rational irrigation and good cultivation go hand in hand.

On account of the wonderful advancement in our understanding of the science of soil cultivation and soil moisture, it is possible today to grow crops where a few years ago it was deemed an utter impossibility. And who can predict the ultimate outcome when the work now under way by agricultural scientists shall have been completed and the knowledge thus gained is put into available form for the guidance of the tillers of the soil? We believe the future has much more in store for the man who has faith in the possibilities of Dame Nature, assisted by the hand of man, than has been revealed in the past, and that instead of the bleak landscape which now greets the eye, the mild and mellow light reflected from the fields of growing crops will soften the vision.

Not all that has been claimed for the so-called dry land farming, by some men who make journalism their business, will be realized, for there are impossibilities often described in articles on this subject plain to the man who is familiar with practical things, but which are hidden to the eye of the theorist.

In discussing the conservation of

soil moisture it is first necessary to understand the forms in which water is found in the soil, and to understand which of these is most useful to the plant. There are three forms in which water is found in the soil under certain conditions. Hydrostatic water, when the soil is flooded, or, as we would say, is full of water—that which can be drawn off by gravity, capillary moisture and hygroscopic moisture, or that moisture which cannot be detected by the ordinary senses and which is, if any, of very little value to plants.

Hydrostatic water is of no direct value to agricultural plants excepting a few, such as rice and cannerberries, which might come under this class, and which seem to thrive, at least a portion of the period of growth, with their feet in the water. This is the form of water that is seen standing in pools in poorly prepared fields under irrigation, which, when it evaporates, often leaves a deposit of salt, to corrode the weak and sickly vegetation, the vitality of which was first impaired by being flooded too long with irrigation water.

It is probably unnecessary to sound a note of warning, that the first requisite to conservation of moisture is to have the land so leveled and laid out that water will not stand for any length of time on any portion of the field after the rate is closed. If this flooding is permitted to continue, then there will be hard, cloddy places in the field, where it will be difficult to retain moisture even with double the amount of cultivation given the balance of the field.

When gravity has drawn off the superfluous water, down through lower layers, there is still plenty left in the soil for the use of plants in the form of capillary moisture—that moisture which makes light colored soils dark and dark soils darker. It is the moisture which forms a film around the soil particles and is held by them. The amount of capillary moisture held by cultivated soils will vary from less than 10 per cent in sandy soil to 44 per cent in soil of the heaviest texture.

Of the highest importance that the tiller of the soil should understand how to maintain the proper amount of capillary moisture, for his success in growing crops will be measured by the ability displayed in controlling his supply. It is possible to have capillary moisture so abundant in finely pulverized soils as to cause them to puddle and run together. This is due to the particles coming so close together that the films of water lie very closely, excluding the air, and thus plants do not thrive. The largest amount of capillary water a soil will contain will vary from 32 to 62 per cent, or from 4 to 6 acre-inches to the acre-foot of soil. This is about 20 to 32 pounds of water to the cubic foot of soil. These conditions are never found in cultivated soils, however. By incorporating decayed or decaying vegetable matter with soil its capacity for holding moisture is very much increased, and this is an important matter in all irrigated sections for there is often a lack of humus in such soils. This is a question which needs

little emphasis, for it is too apparent to pass unnoticed by anyone who has ordinary intelligence and is familiar with soil tillage. It is, however, one of the secrets of dry land farming and should not be overlooked, and it is of equal importance to farmers who irrigate the land. It is not a good plan to maintain the cultivated field too long before seeding it down to grass and alfalfa. Too little attention is given to rotation of crops. Do not hesitate to plow up the old alfalfa fields and grow sugar beets, potatoes or grain on them for a few years. This advice has been given us continually since the time of Columbus, nearly 500 years ago, and it has stood the test of actual practice during the ages. It is the keynote to success in all systems of farming.

The capillary of the soil may be changed and improved in a limited way by incorporating in it certain chemical salts applied as fertilizers, but this is hardly within the scope of my subject.

When we consider the vast amount of moisture that is needed for growing crops, and that practically all of it must come from the capillary moisture present in the soil, the subject of conserving this important supply becomes an interesting one. Hillebrand, of Turpan, found that it required 453 tons per 3,998 acre-inches of water to produce a ton of dry matter; or to produce 40 bushels of wheat would require 12 acre-inches of water.

Methods of Tillage.

Coming to methods of tillage to conserve soil moisture, I will briefly discuss some of the most important ones which have been proven so by actual field tests. First in the list is fall plowing, which has been practiced by many of our best farmers, who are wholly dependent on nature's supply of moisture in the form of rain and snow. There is no more effective way of preventing evaporation and breaking up the capillary attraction of water from the soil below the furrow line than by plowing in the fall.

Fall plowing is the additional advantage of putting the surface of the soil in the best possible condition for catching the winter precipitation in the form of rain and snow. This practice also prevents deep freezing of the soil, which is a drying process also. Surface tillage, with shallow or disc, before plowing, will retard evaporation by breaking up the capillary action of the upper layers of the soil. Fall plowing should be as deep as possible. Next to fall plowing in importance is early spring plowing, or in case plowing cannot be done early in the spring the harrow should be used, making a dust mulch on the surface to prevent the escape of water from below. Some of the best orchardists plow and harrow their orchards late in the fall after the season's work is matured, thus conserving the moisture furnished by fall rains.

Farmer would get better results as a rule by taking a little more time in preparing the soil in the spring, before planting, than by being in too great a haste to put the seed into a cold wet soil, where germination is well nigh

impossible, or, at all events, much impaired.

It should not be difficult to prepare land so that it will retain sufficient moisture to germinate food crops, thus doing away with the necessity of irrigating crops up. This is certainly a very unsatisfactory practice.

Subsiding or stirring of the soil below the furrow line is of considerable importance in retaining soil moisture in humid climates, and may assist materially in increasing the permeability of water into the lower layers where irrigation is practiced. Water cannot be saved judiciously, until it has passed into the form of capillary moisture, and this only takes place when the water is brought into contact with soil particles. To do this the soil must be worked deeply. If too compact, as many of our soils are, for the water to penetrate to the lower layers. Anything which will open up the soil, so that the water may be stored in the lower layers, is very beneficial and tends to conserve the moisture for the use of plants. It also serves as a key to unlock valuable stores of plant food in the lower layers of the soil, which the plants are ready to go after providing the inducement is made for them to send their rootlets deeper into the soil than is possible in the absence of the capillary moisture.

Subsiding can be done any season of the year when there is moisture sufficient to make it possible. It is best, however, to do this in the fall, winter or early spring.

Surface Cultivation. No operation connected with the soil tillage has undergone greater changes in the past four years than has the method of surface cultivation. The old practice of hilling up the corn, when it is laid by, or given the last cultivation, has been replaced by the more rational method of level, shallow cultivation. Deep cultivation should be done early in the season if the land requires it, and then it is always best to follow deep tillage with surface tillage, to have a fine dust mulch on the top of the ground to prevent the escape of moisture from below. Irrigating furrows are often made too deep between the rows of cultivated crops. If only slight furrows were made and as soon as the soil has received sufficient moisture the ground was again leveled and pulverized on the surface the crop would not have to be irrigated nearly so often. The old practice was to run the water in deep furrows along the borders of the fruit trees; but the new practice is to irrigate the entire ground through small furrows and then to cultivate the surface as soon as the ground will permit.

The thinner the mulch the better, providing it is a perfect patch. The thinner the mulch the greater the feeding ground for the roots of the plants below. On the other hand, the mulch must be thicker, for the tendency of moisture to rise to the surface and escape into the air is greater in finer clay soils than in coarse grained sandy soil.

Cultivation should be frequent to prevent the mulch from becoming compact when it loses its virtue as a mulch. Some orchardists have been compelled to learn the lesson through a shortage of water that frequent cultivation gives far better results than less cultivation and more water. Frequent cultivation has other compensating features which will more than pay for the added expense, such as aerating the soil and thus rendering a greater amount of plant food available than would be possible without such cultivation. It is quite safe to lay down a rule that any process of cultivation which compacts or leaves the soil in coarse clods or lumps should be followed in the summer season by a surface pulverizer of some sort. Rolling of the land should be followed by the surface harrow. The Campbell system of farming, of which we hear so much, is based upon a thorough, deep cultivation at the proper season of the year, sub-surface packing of the soil and surface mulching, all of which is simply rational cultivation to conserve moisture, and

give the plant the largest possible feeding ground from which to draw its food supply.

Many kinds of decayed or decaying vegetable matter are used for mulching the ground to prevent the escaping of moisture. Leaves, straw, coarse manure, sawdust and even boards are laid down sometimes to keep the soil moist. All of these are more or less useful but must be limited to small areas and more intensive methods than the average farmer follows. In cultivating the soil to conserve moisture we have a theme which must go hand in hand with that of irrigation, which, in the language of another, is the supplying of water to plants in quantities best suited to their most perfect development.

Ranches to Exchange. Have three ranches in Flathead county, Mont., that I will exchange for land in this vicinity: 1,500,000 feet saw timber, 2 mile lake frontage, some bottom land, cleared and well watered, within 3 miles of G. N. Ry. W. O. WANN, Twin Falls, Idaho.

It is quite safe to lay down a rule that any process of cultivation which compacts or leaves the soil in coarse clods or lumps should be followed in the summer season by a surface pulverizer of some sort.

Summer---The Time for CEREALS

Summer is the time for Cereals—that is, the proper Cereals. Man should not eat meat during the summer months any more than he can help, as meat causes the blood to heat and over-exerts the digestive system. That is why one feels sluggish after a noonday meal of heavy foods. We carry all the best grades of cereals. Let us have your next order for this grade of goods and we know you will be satisfied.

(Continued from Page 1.)

rendered a service of real value to his country.

"I am informed that out of over 2,000 farmers in Twin Falls county, all but three made out their own assessment blanks intelligently. This shows that they are an educated people and that their citizenship is high class."

With superb eloquence Mr. Bryan described his experiences in foreign lands. He leavened his remarks with delicious bits of humor. His word picture of the Filipino was extremely interesting, particularly that of his visit to one of the dattos, who received him in barbaric splendor, holding over his head a red umbrella, the insignia of royalty, although the moon was shining at the time.

Mr. Bryan said that his audience with the czar of Russia was a complete refutation of the statement that he was an anarchist. "I have been accused of being an anarchist," said the speaker, "but if that charge is repeated I have but to point to the fact that I spent a half hour alone with the czar, who certainly ought to be able to tell an anarchist when he sees one, and his excellency was none the worse for the meeting."

The king of England was the most approachable of all the monarchs he had met, said Mr. Bryan. He did not require the noted Nebraska to wear evening dress or knee breeches and received him on a plane of equality. Mr. Bryan stated he was unfortunate in not being able to meet the emperor of Germany, whom he was very anxious to see. The emperor of Japan was difficult of approach. He gave Mr. Bryan an early morning audience which lasted fully 15 seconds. The guest was obliged to wear full evening dress and to bow at stated intervals while entering the room and backing out of the door. Mr. Bryan's meeting with the king of Norway was a very formal affair also. Mrs. Bryan declared that the king smiled when Mr. Bryan made his bow, and Mr. Bryan averred that the king would surely smile if he ever bowed again. Mr. Bryan stirred his audience to frequent outbursts of applause when he contrasted social and commercial conditions abroad with those at home. In no other country, said Mr. Bryan, were women treated with the consideration which they received in North America. This, he asserted, was the best proof of our advanced civilization.

Coming down to political issues, Mr. Bryan spoke with great fervor. He declared that President Roosevelt

was the only Republican who had the courage to adopt Democratic ideas. For that reason he was the only candidate which the Republicans could put forward with safety in the campaign for the presidency next year. The Republican party was the party of postponement, declared Mr. Bryan. When the president forced the rate bill upon congress he met determined opposition in his own party and when the measure went to the senate it was placed in the hands of Senator Tillman, a Democrat, because no Republican senator dared stand sponsor for the measure.

Mr. Bryan spoke for half an hour on politics, frequently drawing enthusiastic applause from his hearers.

Mr. and Mrs. Bryan and their daughter, Mrs. Lovitt, took the evening train for the east on Friday, announcing their intention to return to Twin Falls in order that they might see the development in which they are deeply interested.

"I want to come back when the Jerome and Twin Falls baseball teams are contesting for the championship of southern Idaho," said Mr. Bryan, "when the Jerome high school and the Twin Falls high school send their debaters to Blue Lakes or Kimberly to contest for the oratorical honors; when the sugar beet factories are in operation; when the flouring mills are in full blast; when the electric roads are running; when all the industries which this section of the country by merit inherits are in operation—then I want to come back and look at Twin Falls and the other thriving cities in this most favored section. Until this no far distant date I bid you goodnight and goodbye."

In this issue of The News W. O. Wann, a nurseryman from Montana, makes his bow to the people of the Twin Falls country, and what he says is worth considering. He has investigated conditions in several states and different parts of this state, and believes that this portion of Idaho is better suited for growing winter apples on a large scale than any other portion of the United States. He will locate here and will do considerable planting for himself, and will plant commercial orchards for others. He proposes to grow the trees upon your own ground, on yearly payments, and assures a better tree than can be obtained in any other way, and at about half the usual cost. His plan is recommended by the U. S. horticultural department. Those interested may learn particulars by dropping a postal to Mrs. Wann at Twin Falls. See his adv.

Notice to Contractors.

Grading of electric line at Jerome, Idaho, and grading of Interstate Highway, Idaho, can be had upon application to the Twin Falls North Side Land & Water company.

PAUL S. A. RICKEL,
Chief Engineer.

Miller, Idaho, Sept. 12, 1907.

Here Are a Few Prices

That Will Bear Careful Consideration

| | |
|--|---------|
| 320 acres, well located and improved | \$36.50 |
| 160 acres, well located and improved | 31.00 |
| 160 acres, well located and improved | 28.00 |
| 80 acres, well located, all in alfalfa | 80.00 |
| 40 acres, well located and improved | 40.00 |
| 70 acres, well located and improved | 50.00 |

the Act of Congress of March 3, 1879.

LEST WE FORGET.

The stirring incidents connected with the big North Side opening reveal memories of the days not long ago when similar scenes were enacted on the south side. The same pattern is heard, the same old stories are repeated, the same fears and the same hopes expressed. To those who are familiar with what has transpired on the south side the conditions are amusing. It took hard talk and lots of it to induce people to take up land on the south side. Aside from the Blue Lakes or-
chard and a few farms around Rock Creek there was nothing to show the land seekers. They wanted proof that the south side land would produce what was claimed for it. Now when homeseekers are looking at North Side land they have but to shift their gaze to the stretch of fields on the south side to see the possibilities of the tract. Jerome has much more to show today than Twin Falls had to show two years ago. It has a well of the purest water; it has electric light and power; it has the grandest object lesson in the west on the south side to back it up.

The selfish man and the knacker and many a well meaning man who knows no better, may claim that the North Side is rougher than the south side and contains less good land. They never stop to consider that all sage brush land in its raw state is unimproved and rough in appearance. Two years ago two of the drivers in the employ of the south side company actually insisted upon resigning because they claimed that they could not find any more good land to show to intending settlers. One of these two drivers is still showing land. He has been cured of his hallucination. His daily sees magnificent crops growing on land which he did not consider worth showing two years ago. One of the most prominent, respected and loyal farmers on the south side, who now has hundreds of acres under cultivation, once expressed the fear that the land west of Rock Creek was not high grade because it gave forth a hollow sound under the hoofs of his horses. At that time it was considered hazardous to locate west of Rock Creek. To locate west of Cedar draw was believed to be suicidal. Nevertheless there are as fine crops and as good yields in the vicinity of Buhl as there are anywhere. Two years ago the most sanguine booster did not have predicted that the land through which the Rock Creek canyon passes would ever be taken up. It was all fled upon months and months ago, and it is producing just like the rest of the tract. Nobody would have the nerve to suggest that there is any rougher land than this under the North Side system. Clearing and cultivation make a wonderful change. One settler, who is now happily located on one of the finest farms on earth not far distant from Hansen, spent days on the tract boring holes with a posthole auger before he made up his mind that the Twin Falls tract was anything more than a lava plain covered with a thin coating of dust. He made five trips over the tract with three different drivers before he was satisfied. It was claimed at one time that the low line canal would never be extended west of Rock Creek, and again that it would surely stop at Cedar draw; that the high line would be abandoned; that the railroad would never be built; that if it was built it would not follow the route outlined on the maps and if it did happen to follow that route it would stop at Twin Falls and not be extended to Buhl; that the power plant at Shoshone falls would never be completed; that the proposed building of the Hotel Perrine was only a bluff to sell town lots.

Every promise made with respect to the Twin Falls project has been fulfilled to the letter; every promise that is being made with respect to the North Side will be fulfilled to the letter. Lands have increased in value as it was claimed they would, and the same will be true of the North Side. The calamity howlers, of whom, thank the Lord, there are few, will have to hunt another location in which to give voice to their gloomy forebodings. The loyal citizens of Twin Falls have no time to listen to them.

The improvement in the stock exhibit at the fair this year is gratifying. Eastern visitors are surprised to see the high grade stock which is being shown. To them it is an indication that the farmers on the Twin Falls tract want nothing but the best and are not afraid to put their money in high class stock. In this connection it is appropriate to call attention to the number of high grade dairy cows that are being brought in. Eight carloads of excellent cows have been shipped in during the past fortnight and they are going like hot cakes. It is unfortunate that the display of sheep was not better. There are some splendid sheep in the county and as sheep feeding seems destined to be one of the chief industries on the tract there should have been a better exhibit in this display. However, the farmers are very busy at present. The season was late and everybody was rushed. Taken as a whole, the showing at the fair is highly creditable and considering the limited time in which it was gathered it is exceptionally good.

At Idaho Falls five carloads of clover seed harvested by one farmer brought a return of \$30 per acre. The yield was from 12 to 14 bushels to the acre and the price paid was 11 cents per pound. A locality in which seed growing is a success is certain to prosper. Martin Sullivan of Kimberly has demonstrated that the Twin Falls tract cannot be surpassed in the growth of clover seed and the time will soon come when farmers will pay more attention to this branch of agriculture.

Colonel William J. Bryan and his wife and daughter are now enjoying a fortnight's rest at the delightfully picturesque home of J. B. Perrine and family at Blue Lakes, four miles from Twin Falls City, and within the hearing of the roar of the great Shoshone falls. If Colonel Bryan does not pronounce that one of the most charming places he has ever seen, although he has recently returned from a tour around the world, we will be greatly

disappointed. The river, the bluffs towering above it, the immense orchard planted among the rocks and now loaded with the wonderful variety of the finest fruit in Idaho; the beautiful Blue Lakes, showing their color in their depth near by, the trout sport in their waters and in the rapids flowing from them, all go to make up a picture fair as an artist's dream. All will be interested in knowing what this gifted and world-famous gentleman will have to tell about this glorious section and the wonderful transformations going on thereabout. Twin Falls City, Buhl, Kimberly, Milner and other towns on the south side of the river, with their surrounding improved farms and homes, have all sprung into existence out of a wilderness of arid sagebrush since his former visit to that section, six years ago. And now if he will come back less than six years hence he will see a like or greater transformation which have taken place on the north side of the river, between Blue Lakes and Shoshone, and reaching from Milner by a line to Gooding with a trolley line running through it, and the recently born town of Jerome and other as yet unborn towns and fertile farms and beautiful homes, picturing the landscape, if he remains here a few days longer he will see at Jerome not less than 5,000 homeseekers, and how the arid lands are being peopled. He will see how the west is outgathering the east in enterprise and importance. Silver City, Nugget.

For Sale—Short Time Only.
172 acres, all in cultivation and fenced, with three good houses, barns, grumery, etc., only 4 miles from city. The proposed electric railroad runs along the north side of this farm. Only \$2,000 and water right. I can make good terms on this. Three crops will pay for it. The best chance on the tract to get a farm cheap to make money on.
One 40-acre tract half mile from city. Just right to divide into 6-acre tracts.
See me at H. D. Johnson's hardware store, opposite postoffice, for prices, etc.
M. O. CRAIGMILE.

Taken Up—Dark bay mare, weight about 1350; had new blanket. Apply J. F. Doany, 4 miles south, 1 mile east, Twin Falls.

Wanted—Suite of rooms for light housekeeping. A. G. Fisher, Box 361, Twin Falls.

For Sale—14-hole Buckeye drill and a Hapgood disc machine; also two brood sows. J. A. THOMPSON, 1 1/2 miles north of town.

BREVITIES

Rev. C. A. Varnum, pastor of the Methodist Episcopal church of Shoshone, was a visitor at the fair.

Hubert Conway of St. Joseph, Mo., a brother of Mr. Conway of Twin Falls, is here and intends to remain.

F. L. Cludas and C. E. Cludas have purchased a farm from J. E. Vanderveer and will locate in Twin Falls permanently.

German Lutheran services will be held by Rev. W. H. Schunke in the Christian church next Sunday afternoon at 2:30 p. m., followed by English services at 3:30 p. m. A cordial invitation is extended to all.

Mrs. Alken gave a bridge tea Wednesday at which Mrs. Booth made the highest score. The ladies present were Mesdames McCollum, Eastman, Davis, Booth, Barrett, Tush, Wilbur Hill and Pike.

Ex-Chief Justice C. O. Stockinger was a Twin Falls visitor to be seen this week. He was in Dahl the early part of the week on a business trip and stopped in Twin Falls on his road home.

Mr. and Mrs. H. O. Milner are back from the east, where they spent several weeks visiting. They took in all the large cities and enjoyed several scenic trips. Mr. and Mrs. Milner had a splendid time but they said they missed the cool Idaho nights and the delightful sunshine.

Mrs. M. J. Turner of De Beque, Colo., accompanied by her brother, Colonel R. G. Carlisle, one of the most prominent and well known cattle growers of western Colorado, have arrived and are looking over the country. Mr. Carlisle thinks very highly of the tract which, he believes, is destined to be a great fruit producer. He likes the lay of the land and the appearance of the canal system, and it would not be surprising were he to become interested here.

The past fortnight has been rather quiet socially, but a few of the parties were especially pretty. That of Mrs. Wilbur Hill being particularly noticeable. She introduced military "gigs" to about 30 of her friends. The innumerable tiny flags added a new touch to the other decorations. Payors were awarded Mrs. Boyd and Mrs. Costello. Miss McCollum rendered some brilliant piano selections, while Misses Beth Hamilton and Margaret Gourley served the refreshments. The guests present were Mesdames Boyd, Baker, Ball, Camp, Davis, Sweedley, McCollum, Booth, Nixon, Stalker, Hartogian, Grosse, Hill, Packard, Pike, Taylor, Marshall, Costello, Hamilton, Guthrie, Mitchell, Slicer, Sprague, Mrs. Kenyon of Burley and Misses McCollum, Gourley and Hamilton.

John W. Runyon and family have arrived from Telluride, Colorado, and will be permanent residents of Twin Falls hereafter.

The bridge players meet frequently for a social game. Six enjoyed an afternoon recently with Mrs. Wilbur Hill, namely, Mesdames Barrett, Tush, Davis, McCollum, Booth and Boyd.

S. Beck, traveling immigration agent for the Oregon Short Line, spent the night in Twin Falls and left Wednesday morning for the north side. Mr. Beck is a believer in sagebrush lands and intends filing for himself on the north side.

Irving R. Darrow and Miss Lucella Felt were married at the residence of Judge Walters in Shoshone Wednesday afternoon, September 25. Rev. C. A. Varnum officiating. They left the same evening for a wedding trip to Portland.

James Fitzgerald of Filer has returned from Oregon with a carload of 20 Jersey cows, of which eight are thoroughbreds and the rest grades ranging from half to seven-eighths pure blood. Fifteen of the cows are fresh and the others, which are principally heifers, have been bred and will soon be fresh. The cows are at the farmers' farm.

A literary afternoon was an innovation enjoyed with Mrs. Nixon. An original poem entitled "A Flower's Romance" was given in which the blanks were to be filled with the names of flowers. Mrs. Davis' botanical knowledge won for her a magnificent bouquet of carnations. Light refreshments were daintily served by the hostess. Her guests were Mesdames Slicer, Hill, C. M. Hill, Packard, Stalker, Ramsey, Fuller, Young, Taylor, Davis, Dodds and Levisse.

Mrs. F. E. Ramsey entertained a number of ladies at her home Friday afternoon. Thelma paper was given them of which to fashion flowers or animals and much amusement resulted therefrom. Mrs. J. R. Conway was first prize for flowers; Mrs. Dodds for animals. Later refreshments were served. Those present were Mesdames Dyer, Grosse, Hill, Levisse, Stalker, Costello, Morgan, Wilbur Hill, John Costello, Fuller, Nixon, Mullins, Green, Young, Hutto, Ellis, Morrill, Conway, C. M. Hill, Taylor, Oles, Dodds, Baker, Ring and Hamilton.

Mrs. Herman Martin was hostess to a charmingly appointed afternoon of pleasure at her mother's home. Each lady was given a subject for a picture; after drawing them they were all required to guess what each represented. The ones who were best "art critics" were Misses Scheffel and Parsons received a pretty souvenir spoon and hair receiver. Delicious refreshments were served at small tables. The ladies invited were Mesdames Mull, Bedford, Channell, Cookham, Craven, Misses Manker, McCollum, Parsons, Dyer, Dobow, Snodgrass, Kinney and the Misses Scheffel.

William McMillan, Bert Brackett, Chas. Bragot and Frank Hamilton of Butte were in Twin Falls during the week on their way back from Raft river, where they delivered a bunch of cattle to L. H. Sweetser.

John B. White has sold his interest in the O. K. and Perrine hotel barber shops to Gus Johnson and Mr. Johnson has disposed of the O. K. shop to W. Hollingsworth. Mr. Johnson will continue to operate the shop in the hotel.

J. E. Bower, the well known stockman of Dry creek, is nursing a fractured leg as the result of a kick from the animal last Sunday when the horse pulled away and kicked him. Doctors Albee and Patterson set the fracture and Mr. Bower is doing nicely.

Dr. J. N. Wiley of Fort Lapwai, who took a number of Indian children to the Crested school, stopped over in Twin Falls on route and purchased a 40-acre tract west of Filer. The tract was greatly pleased with the Twin Falls project and will probably acquire more land.

Martin Sullivan has 20 acres of clover which should average 1021 pounds of seed in the acre. Gus Vogelner of the Twin Falls Grain & Produce company contracted for the seed at 11 cents per pound, which should bring Mr. Sullivan \$112.21 per acre. On account of the superior quality of the seed, said Mr. Vogelner, he will ship it to Germany, the most efficient market in the world.

The Eldridge building at Filer, which was being moved from the north to the south side of the track, was destroyed by fire early on Thursday morning. How the fire started is a mystery which has not been solved. The structure was recently purchased by the Idaho Store Co. and was being moved to the property of the latter company in Filer. The fire was a very fortunate happening for Filer as the building was a credit to the town. However, there is still an abundance of building material to be had and a little thing like a fire will not stop Filer from holding its own.

There was a grand opening on Wednesday evening which was not conducted under the provisions of the Carey act but which was nevertheless a grand success. It occurred under the auspices of Sweet & Galt, with Jake Lockman as master of ceremonies. A very strong and pleasant tonic flavor marked the occasion. It was the introduction of Nampa first quencher at a nickel per quench, and those present forewore their allegiance to ditch water. Messrs. Sweet & Galt have fitted up a splendid establishment, one of the finest in the state. In the front is a handsomely furnished cigar store in which Dennis Holobin is greeting his many friends. The back was out at the opening and there were several vernal choruses on the slide. Jake Lockman drew No. 1 and refused to sell his chance.

The Twin Falls Hardware Co. has purchased a lot facing the warehouse track on which will be built a warehouse 60x125 feet.

J. F. Long and E. M. Flory of Elgin, Ill., were among those who came early in the week to go over the North Side project.

C. L. Scott and J. E. McClure of West Virginia stopped in Twin Falls Monday on their road to Jerome to look over the North Side lands.

Miller Bros. of St. Anthony have bought and shipped over 20 cars of wheat and oats in Twin Falls during the past week and are in the market for all the grain they can get.

H. A. Stroud and R. A. Carter have formed a partnership in the real estate business. Mr. Stroud came here recently from Albuquerque, Colorado, and was so well pleased with the tract that he intended to remain here. He is an experienced real estate man and a gentleman whom it is a pleasure to meet. Until they can secure other rooms the firm will have its office in Mr. Carter's building in the hotel block.

Splendid returns were obtained from the experimental farm at Milner, of which John McDermott has charge. Bluebon, wheat, yielded 77 bushels per acre, Dickson 66.25, Danahoe 60.23 and Little Club 60. Without irrigation. Sixty day oats returned 60 bushels per acre and Golden Giant side oats yielded 95 bushels per acre. Big Four oats topped the list with 113½ bushels to the acre. Field peas matured splendidly without irrigation. Barley averaged from 40 to 53 bushels per acre. The farm was grubbed in March and no irrigation was done until July 10.

COUNTY FAIR.

The county fair is open and like that of last year it is a record breaker. There is a greater variety of exhibits and more attention is paid to quality than before. Last year the farmers brought in liberally in their desire to show what they had accomplished on raw land. This year they felt grown up, as it were, and only touched the high places. The stock exhibit is particularly good. All divisions are right up to the mark and are all attracting great attention. The bull contingent, numbering over 100, came in this morning with bright badges on their coat lapels. Visitors are here from all parts of the country and the city is alive with land seekers headed for the north side. A detailed description of the fair and a complete list of the awards will be printed next week.

Health Preservatives

It is a certain thing that there would be much less disease in the community if every individual took proper precautions to preserve his or her health. We cannot be too cleanly in our habits. Cleanliness is not only a sign of godliness, but a sure keeper of good health. We should daily wash the skin with a good antiseptic Soap, brush and clean the teeth well, and see to it that our person and personal effects are beyond reproach as regards cleanliness. Every facility for the bath and toilet are here.

Bedford Drug Co.

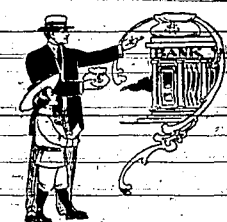

ADVERTISED LETTER LIST

List of letters remaining unclaimed in the Twin Falls postoffice for the week ending Sept. 23, 1907. Parties calling for these letters will please say "Advertised Sept. 23, 1907."

IDAHO

150,000 Acres Carey Act Land

To Be Opened for Entry

October 1st, 1907

\$35.50 Per Acre

\$3.25 per acre in cash is paid at time of filing, the balance is divided into annual payments covering a period of ten years with 6 per cent interest on deferred payments.

Under the Carey Act, people who have used all their government rights to take up land can still acquire 100 acres of Carey Act land. Filings may be made by power of attorney when parties intending to file cannot possibly come.

The entire Twin Falls tract embraces 420,000 acres. The opening OCTOBER 1ST is the last tract to be sold under the gravity system.

There are three new towns in this opening—MILNER, JEROME and WENDELL. Surveys for an electric railroad reaching all the towns have been made and active construction from Milner and Jerome will be commenced August 1st, 1907. The contract from Jerome to Wendell will be let later in the season.

Special rates will be given on the O. S. L. railroad to reach Jerome, where the opening takes place October 1st. Take the O. S. L. railroad to Shoshone or Twin Falls, where stages will make frequent trips to Jerome.

For full information, circulars and printed matter, address

eration, \$500.

NEW TOWN IN PAYETTE VALLEY.

Fruitland Will Be Central for Great

Fruit District.

The Payette Valley Railroad com-

pany has just completed a line of

the famous Payette valley. The

Payette valley is one of the most fa-

vorable sections under the sun and

Fruitland has a very promising fu-

ture. The Fruitland Manufacturing Co.

is erecting a factory for the manufac-

ture of denatured alcohol, vinegar,

apple butter and jelly. The plant will

be ready for business this fall. The

Melon & Fruitgrowers' association has

a large packing house at Fruitland

which is now ready to its fullest ca-

pacity and affords employment to

many. Forty-acre farms are being

divided into acreage tracts and farm-

ing in the vicinity of Fruitland will

be most intensive. Sugar levels produce

heavily in this section, farmers in the

vicinity of Fruitland having cleared

\$75 per acre above expenses. Fruit-

land has the advantage of natural

delivery and telephone service. Nat-

ural gas has been discovered in several

wells in the vicinity and there are in-

stances of the future of the fruitland

electric railway from Boise will in all

probability cross the Payette Valley

road at Fruitland and an abundance

of electric power from the O. S. L. rail-

road will soon be available. The people

of Idaho are just beginning to discover

the riches at their own doors and the

Payette valley is enjoying an awaken-

ing which will make it famous.

WHY FRUITLAND IS VALUABLE

Handsome Returns Obtained by North

Yakima Orchardist.

The celebrated, Norman pear crop in

Parker bottom, at North Yakima,

Washington, which has aroused much

dispute among fruit growers and experts

because of the extraordinary profit it

has been entirely picked, and the re-

sult given out. From a half acre of

land Mr. Norman secured 300 boxes of

first-class Anjou pears and 150 boxes

of second-class pears, which, at the

present New York price, will bring in

the neighborhood of \$1500. This fruit

is the product of 54 trees.

WHEN HER BACK ACHES

A Woman Finds All Her Energy and

Ambition Slipping Away.

Twin Falls women know how the

aches and pains that come when the

kidneys fail make life a burden. Back-

ache, hip pains, headaches, dizzy

spells, distressing urinary troubles, all

tell of sick kidneys and warn you of

the stealthy approach of diabetes,

dropsy and Bright's disease. Doan's

Kidney Pills permanently cure all

these disorders.

Mrs. E. Burnett, residing at 152

First avenue, Pocatello, Idaho, says:

I consider Doan's Kidney Pills a

most excellent remedy and one that

can be entirely depended upon by

those who have any symptoms of kid-

ney complaint. I speak from experi-

ence because I cured some of the

most aching pains across my back and

through the region of the kidneys.

Any hard work about the

Notice for Publication—Final Proof.
I, Charles B. Roberts of Rock Creek, Idaho, who made entry No. 1856, under the provisions of an act of the legislature of the State of Idaho, commonly known as the "Carey act," approved March 2, 1899, which embraces the NW 1/4 of NE 24 of section 3, township 11 S., range 18 E., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before E. Breckinridge, all of Filer, Idaho.

JOHN J. CRAIG, Entryman.

FARMERS SHOULD PLANT TREES.
Maintenance of Forests is Absolutely Essential.
While the government is doing much by its forest reserve policy, it is the duty of every farmer to cooperate by pursuing an individual course in keeping. Not only should he take better care of the woodlands he has, but he should also plant with of trees by planting more every year. Forests may be made productive, like any other crop, but he kept growing and adding to the supply of food, and thus being used. Several of the states have adapted a forest reserve policy. New Jersey having added 5,000 acres, making a total of 7,500. Indiana has purchased a tract of 5,000 acres to be used as a nursery and school for teaching scientific forestry, which in time will greatly benefit the state. The wasteful methods which stop or retard the growth of a nation. Man can not live in a treeless world. Destroy the forests and you destroy the streams, all the while the soil is being washed away in the end will leave nothing but howling wastes of deserts. The face would be of starvation and thirst. Count the year lost in which you have planted no trees. The American Farmer.

H. T. WEST, Clerk.

By GEO. H. SMITH, Deputy. P. W. MOXNAH, Attorney for Plaintiff.

NOTICE OF BOND ELECTION.

Notice is hereby given that at a special meeting of the Board of County Commissioners of Twin Falls county, Idaho, called and held for the hearing after mentioned purpose, on the 3rd day of September, 1907, the following resolution was adopted, to-wit: "Whereas, the Board of County Commissioners find it necessary and for the best interests of Twin Falls county, Idaho, that a full be erected and equipped for said county, and it being found by said board that the expense of erecting such a suitable full of suitable size and capacity and furnishing the same will be \$15,000, and that the same will exceed the revenue of the current year applicable thereto, and to that purpose, the board deems it for the public good to bond the county in the sum of \$15,000 for the purpose of providing funds therefor; therefore be it

Resolved, by the board, that the above and foregoing proposition be submitted to a special election of the voters of said Twin Falls county." In accordance with said resolution, a special election is called to be held on the 5th day of October, 1907, to determine whether the said commissioners are authorized to issue the bonds of said Twin Falls county in the sum of \$15,000 for the specific purpose of building and equipping said full for the county, and also for the purpose of holding the same in the several precincts in said county as hereinafter mentioned and the polls will be opened at the hour of 1 o'clock in the afternoon on the date of the election, and of 7 o'clock in the evening of the same day.

Said bonds to be issued will be issued in denominations of \$1,000, or if necessary will be issued in denominations of \$500 and \$100, and all of said bonds will bear a rate of interest not in excess of 6 per cent per annum, payable on the 1st of January 1 and July 1 of each year. Said bonds, or any part thereof, may, at the option of the county, be redeemed at any time after 10 years from the date of their issue, provided such time and option be stated upon the face of each bond, and each bond must be redeemed in the order it is numbered.

GEORGE L. CROCKER, Chairman.

H. T. WEST, Clerk.

BUHL BACHELORS ENJOY A FEAST

CELEBRATE THE BIRTHDAY OF
BELKNAP BROTHERS.

Several of them Reported to Have
Been in Danger of Foundering—
Meetings of Farmers' Association
Are to Be Continued.

BUHL, Idaho, Sept. 25.—A. V. Mounce is the soliciting agent in Buhl for Bryan's Communion. He is securing a large number of subscribers and is forming clubs.

J. J. Frith brought a load of water melons and other fruit up from Thousand Springs on Monday and made your correspondent a present of a fine melon.

H. E. Baldwin will soon commence an addition of another story to his rooming house on Main street.

The fixtures of the Howard & Taylor rooming house on Broadway have arrived and are being put in place. George Dunn, the owner of the building, is in Salt Lake hurrying up the plans for the front. As soon as it is ready, the place will be open for business.

The hard law may be in force, but it does not seem to have much effect in this locality. Andy Wilson complains that the law around his residence has been destroyed by cattle in the last few days.

E. E. H. has commenced the construction of a commodious residence on his ranch a mile west of town. He is going to make the ranch his home for the future.

Elbert Debusk, who has been bedridden for several months, is convalescent. But it is feared that he will lose the sight of one of his eyes completely.

Herman Geor is having the sagebrush cleared off his ranch close to town preparatory to getting it all in cultivation next spring.

The managers of the circus that showed in Twin Falls last spring have not forgotten our brave blacksmith, W. H. Bell, nor his heroic deed in killing the tiger that broke loose from the cage during the performance, a full account of which appeared in the News at the time. They sent him one of the tiger's claws in recognition of his daring act and their appreciation of his courage. It is no joke to say that Mr. Bell is entitled to a Carnegie medal and the officers of the circus are going to make an effort to secure it for him, for they believe, as well as do the circus managers, that he deserves it.

Buhl is likely to be depopulated on Friday as all the inhabitants thereof have expressed their intention of going to Twin Falls on that day to take in the fair and hear for Buhl.

Dr. Rogers has moved his dental parlors into his new office in the Tull building on Main street. He has them fitted up in elegant style.

A. Popovitch will open his confectionery store in the old postoffice building on Main street in a few days.

Chas. A. Dowell and wife and Leonard W. Huffman of Chicago, Ill., registered at Hotel Buhl Wednesday and spent several days looking over the tract.

C. M. Everson came in from his ranch on business Thursday.

Geo. Butt was a town visitor Thursday.

B. F. Tucker of Salt Lake registered at Hotel Buhl Thursday.

C. Robert came in from Dunkirk Thursday on business.

G. H. Inyard has resumed operations on the construction of his business block on Main street across from the postoffice.

F. D. Kimball of the McCormick & Co. bank of Twin Falls and C. B. Channel, wife and family, spent Sunday at Thousand Springs fishing and eating watermelons. They had a fine time and caught some of the finest ribbe. They returned to Twin Falls Monday morning.

Dr. H. R. Wells of North Yakima, Wash., who owns 160 acres two miles east of town, came in Saturday night. He has been traveling in the east and was on his way home. He is planning to take a run in and see how Buhl was progressing. He found that it had made such improvement since he was here last summer as to justify him in taking his ranch of the market and wait awhile before he sold it. Besides, things look so good to him here that he is thinking of coming to live in Buhl.

J. C. Weeden of Garland, Utah, was a Buhl business visitor last week.

A. Teal and Frank Bennett of Twin Falls came up from that town on business Thursday.

Mrs. W. O. Straley and son left for their old home in Missouri Thursday returning to spend the winter here and during the winter also W. O. will do the harvesting act.

J. C. Goff of Twin Falls was a business visitor Friday.

Max Overholser of Salt Lake registered at Hotel Buhl Friday.

A number of our prospective ranchmen are purchasing the new 1907 Ford. Fourteen of the vehicles has just arrived in town for delivery to the purchasers.

ried in town for delivery to the purchasers. The project may not be designed for a get-rich-quick proposition but the farmers on this end of the tract are feeling too big already to ride to the common lumber was gone, although they were glad to be able to ride in one when they first hit the grit among the sagebrush. It really looks as if in a few more years our lawyers and doctors would be able to purchase something to ride in.

Frank Russell, president of the Buhl Farmers' association, has announced that the association will hold regular meetings of the association again. He says that many of the farmers are awakening to the value of such meetings and that they are anxious to see them held as soon as the harvesting rush is over. Many of the farmers on this end of the tract are men ripe in experience in all kinds of farm industries, and the new beginners can learn a great deal from them.

Mr. Russell is well equipped in this way and can furnish us with information of value of which we can not be calculating in dollars and cents. It is hoped that every farmer on this end of the tract will take sufficient interest in the association to attend the meetings and give the benefit of his experience and his presence to the members, and thereby help the good work along.

W. E. Wallner of Burlington, Mo., was a land seeker on this end of the tract Friday.

John White of Twin Falls was a Buhl visitor Saturday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

W. D. McNeal of Salt Lake City was a west end investigator Saturday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

It is reported that the passenger train which left Buhl this morning for the west will have several more than usual and are used to it.

Judge C. O. Stockslager visited this end of the tract yesterday for the double purpose of a conference with the farmers on the legal effect of their various contracts with the company, also that of the State Land board with the company, and for the purpose of seeing if he could buy any hay here for his sheep, which he intends to winter in this vicinity this winter. He held that of the State Land board with the company, and for the purpose of seeing if he could buy any hay here for his sheep, which he intends to winter in this vicinity this winter.

H. F. Grosvenor of Twin Falls was a Buhl business visitor Saturday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

W. E. Moore of Chicago, Ill., registered at Hotel Buhl Monday.

Connet street.

The Water Lumber company has delivered the lumber of the ground for building the bridge across the low line canal a mile south of town.

A fall seed time was opened by those present at the elegant home of J. W. Belknap, two miles south of town, Thursday evening. It was the birthday of Mr. Belknap and his brother, George T. they being twins.

Mrs. J. W. Belknap decided to surprise her husband and his brother and she did it as only a woman can do such things. The victims were just about through with their chores and anticipating an early to bed when several wagons, buggies and horses came thundering up the driveway and started not only Mr. Belknap but the codyotes and jackrabbits for miles around.

As soon as Mr. Belknap recovered his breath his brother, George, who owns a ranch adjoining his, was seen and upon his arrival there were others who met with a surprise. P. W. Monahan was requested to make a few remarks upon the occasion and it was hard to tell whether he or the Messrs. Belknap were the most surprised, but it was clear enough that Monahan was the most embarrassed.

He rose and tried to say something, but his talk tank only leaked out a few incoherent and totally irrelevant words. He took his seat amidst his own confusion and the applause of the others. The applause was given to the feigning of the remarks, not to their merit.

J. Warren White was called upon and although he probably suspected that there might be designs on him, he was caught unaware, too, but he did manage to say something relevant and appropriate.

The Messrs. Belknap must forget many of their former birthdays but the last one they will always remember. It was the first social event of its kind on this end of the tract.

The crowd played cards, talked, laughed, ate cake and many other things until the middle of the night. A majority of the men present were old bachelors. A stranger would have known that. You can always tell an old bachelor at a place like that by the way he eats. I am not going to mention any names, but the next time that W. S. Harris, R. H. Cost and Pat Monahan are invited to such a place they should school themselves for some time before coming to a conference with the poor onesome creatures and that they must be on their guard and good behavior. Among those present were Mr. and Mrs. E. Thompson, Mr. and Mrs. M. D. L. Barstow, Mr. and Mrs. William Moore, Mr. and Mrs. S. Marshall, Mr. and Mrs. W. Snodgrass, Mr. and Mrs. George Marshall, Mr. and Mrs. H. O. Howard, Mr. and Mrs. J. H. Schooler, Mr. George L. Evelev, Mr. and Mrs. George Bickham, Misses Mary Hinkley, Mamie Francis, Edith Miller, Mrs. Edna Cora Schooler, Messrs. John B. Hinkley, E. A. Milner, Earl Knight, Moore Junior, W. S. Harris, J. W. White, C. E. Atkinson, E. Thompson, E. Braun, W. W. Tulp, B. H. Cost, P. W. Monahan and Mr. Wallace.

J. A. Howard has just brought into town a cubango weighing 30 pounds and a bunch of onions that average a pound apiece.

"F. V. R." green tomatoes.

BINKLEY BOOSTS TWIN FALLS TRACT

CONSIDERS PROJECT THE BEST
HE EVER SAW.

Engineer Who Surveyed Railroad from Nevada and Who Has Had Wide Experience Praises This Section of Idaho Most Generously.

George H. Binkley, who conducted the railway survey from Nevada to Twin Falls, has accepted the position of chief engineer of the Gulf, Plains and Northern railway. His headquarters will be in Chicago. Mr. Binkley's crew is now in charge of Herman Martin. Mr. Binkley regretted to leave Twin Falls. In all his experience, he said, he had never seen a project of this character that looked so well. "It will be a source of gratification to me if this beautiful tract should be connected with the wonderful mining camps of Nevada by means of a railroad following the survey we have made," said Mr. Binkley.

Binkley is a member of the American Society of Civil Engineers and also the Western Society of Engineers.

For several years he was with the Pennsylvania railroad and had charge of construction on the longest tunnel on the southwest system of that road. For four years Mr. Binkley was in charge of the survey and grading of the World's fair grounds in Chicago. He was chief engineer of the Calumet railway in Chicago, most of which he built and operated. He was likewise chief engineer and general manager for a firm of contracting electric engineers and put in three years on consulting work. He has examined several projects for bond houses and is vice president of the American Engineering Co. of Indianapolis. In view of Mr. Binkley's wide experience his commendation of the Twin Falls project carries weight. He will visit Twin Falls again at the first opportunity.

"The Doxie," ask R. W. Jones.

Wanted—Girl for general housework. Apply to J. M. Maxwell, First National bank.

Lost—Between Hazen ranch and Twin Falls, pair gold bowed glasses. Return to News office and get reward.
