

TWIN FALLS NEWS

FOURTH YEAR

TWIN FALLS NEWS, TWIN FALLS, IDAHO, FRIDAY, FEBRUARY 13, 1908.

NUMBER 16

KIMBERLY AGENT WON THE PRIZE

OFFERED BY WEETER LUMBER COMPANY.

Set the Best Record For Cash Sales and Collections—Doctor. Visits the Town But Falls to Find Any Prospective Patients.

KIMBERLY, Ida., Feb. 12.—Wilkins and Thilly finished putting up ice on Saturday. They obtained a full house of good ice as the weather was getting too warm for the business.

Nick Smith passed through town on Tuesday with several loads of fat pigs. He was taking them to market at Twin Falls.

M. H. Wright has been laid up for several days past, but is out again. Mr. and Mrs. Wright will move to Twin Falls this week. Their place here will be rented or sold. The people here are sorry to have this family leave Kimberly.

W. C. Newberry sold M. Barnhouse a good horse this week for \$125.

A doctor was here a few days ago but not finding any sick people and being that this was a distressingly healthy community he decided not to tarry. One doctor was starved out here about a year ago.

Mr. and Mrs. A. R. Moore are at home from their trip east. They took in the sights at Washington and attended the meetings of congress while there.

Mr. Hughes has completed an addition to the farmhouse on the ranch of P. H. Smith southeast of Kimberly. Messrs Butler and Perry have built a good barn on that place this spring.

M. L. Hornan has built on the Black ranch just south of Sullivan's place and will clear and farm there this summer.

Mr. Wilson purchased a good team on Will Newberry a few days ago. Two new families came in this week on Colorado. One moved on the big place, two miles southwest of Kimberly, and the other on the Williams place just this side of there.

The Ladies Pioneer club met with Mrs. Lewis on Thursday, Feb. 6. The following officers were elected for the coming year: president, Mrs. Wm. Van Houten; vice president, Mrs. J. Pringle; secretary, Mrs. C. C. Parks; treasurer, Mrs. J. E. Henley.

W. F. Brackton has had the paper hangers at work on his house and is getting ready for the return of Mrs. Brackton, who is expected home from Los Angeles in a few days.

It is reported that Jack Ferrill, who was here the past summer, has sold his ranch in Colorado and that he expects to return to Kimberly permanently.

Several months ago the Weeter Lumber Co. offered a prize of \$50 cash, or a free trip to Tacoma and all expenses, to the agent who would make the best record for cash sales and collections. The business was to be placed on a percentage so that the large and small yards would have the same chance. As the company has

numerous yards there was quite a rivalry for the prize. On the tract here the agents at Buhl, Piler, Twin Falls, Kimberly and Hansen were in the race. Whether the prize was secured up it was found that this agent, Kimberly, W. M. Black, had made the best record and was entitled to the prize. This not only speaks well for the business ability of our friend Kimberly, but it also speaks well for the residents of Kimberly and vicinity to know that they have the record for paying their bills. The people at Hansen were a close runner in this contest and there is no doubt that the cost of the Twin Falls tract will justify its own with people anywhere.

C. W. Rice bought some hogs from Albert East the past week.

O. L. Tyler expects to start east in a few days on business connected with his nursery.

Martin Sullivan has been rounding up the land owners for the Canal association and getting them to join in the Kimberly project. It is found that there are more non-resident land owners than those who live here. Much of this land is held by speculators and has never been cleared.

While this may be good money for the speculators it is not good on the business community of Kimberly. We are glad to state that quite a number are coming in this spring to live on this land or are having it put in crop and tended by renters.

B. F. Hoover, our station agent, has built a chicken house and is going to go in the chicken business this summer for recreation.

The Methodist minister from Twin Falls has been holding meetings in Kimberly schoolhouse the past few nights.

The fine weather of the last few days has been nipped in the bud and it seems that the ground here is right in his prediction for the present. The roads are rather rough after the thaw.

SCHOOL NOTES.

Every one is satisfied with the outcome of the debate with the Albion State Normal last Friday evening the account of which appears in another column. The next one will be with Idaho Falls Academy on Friday, Feb. 21 at the Bleck school. Idaho Falls defeated the Rexburg Academy last Friday night and they are reported to be first class debaters. The debate promises to be interesting and a large crowd is expected. Twin Falls will defend the affirmative side of the question. Resolved: that a system of Postal Savings banks be established in the United States. The average of last week's debate was: Affirmative, Turner, 89 1-3; Shields, 86 1-3; Fuller, 92 1-2; negative, Smith, 80 1-6; Burgraf, 84 1-3; Rogers, 83 1-6. Twin Falls: Argument, 91 7-9; delivery, 83 1-3; language, 89 7-9. Albion: Argument, 88 8-9; delivery, 87 1-9; language, 85 1-3. It will be noted that Twin Falls held the largest score on all points. The judges were Mr. Guthrie of Twin Falls, Mr. Wagner of Rupert and Mr. Edwards of Burley.

A Washington's birthday program will be given in the schoolhouse Friday, Feb. 21 at 2:30.

We are all rejoicing over the promise of the new schoolhouse. The board say they will make it the finest in the state and one of the finest in the United States.

GREAT ACTIVITY AROUND HANSEN

NUMEROUS LAND SEEKERS VISIT THE DISTRICT.

Nick Smith harvests a crop of ice. A. M. Babcock Meets With a Painful Accident—T. J. Rauch Returns From Spokane.

HANSEN, Ida., Feb. 13.—T. J. Rauch, who spent the winter with his family in Spokane, has returned to Hansen to be present at the townsite opening.

C. A. McMaster of the Farmers' Real Estate Co. of Twin Falls, was in Hansen this week with a party of land buyers from Iowa.

E. H. Butler met his family in Minidoka last Friday and brought them to Hansen. They came from Boulder, Colorado. They will occupy a portion of Robert Brose's house until their own home is completed.

John F. Hansen came over from Rock Creek last Saturday and inspected the new road from Hansen to Murtaugh.

W. N. Rose has embarked in the real estate business. In fact he was literally forced into the field, being continually importuned by those who seek investments in this locality. Mr. Rose knows the country as well as any man living and he certainly can present its many advantages.

A pleasant dinner was given at the home of G. L. Redhead on Tuesday.

H. L. Beatty of Heyburn passed through Hansen yesterday on his way to Rock Creek.

Foreman Anderson of the Short Line and his gang of Japanese are engaged in repair work in the vicinity of Hansen.

John F. Hansen made a business trip to Halley on Tuesday.

Dr. Albee came over from Rock Creek on Sunday and went to his home in Buhl.

J. R. Hinton is loading a car of hay for main line points and A. M. Babcock is loading a car for Rupert.

An enjoyable evening was spent at the Hidy residence on Wednesday. The principal amusement was a taffy pull.

T. J. Rauch and John Walton were Twin Falls visitors on Wednesday. The ball given in the Rauch hall last Friday evening was a decided success. All present enjoyed the evening very pleasantly. Luncheon was served at midnight and an appetizing spread it was. W. A. Hidy and A. M. Babcock furnished the music.

Nick Smith has harvested a fine crop of ice from T. J. Rauch's pond. Fourteen inches was the extreme thickness.

W. F. Brewer is doing the finishing work on the residence of T. N. Williams. Mr. Williams expects to be here with his family as soon as the house is completed.

A. M. Babcock had the misfortune to slip beneath a wagon loaded with hay last Wednesday, severely wounding his foot.

NOVEL WAGER BY MILNER YOUTHS

WHO ARE ENGAGED IN GROWING MOUNTAINES.

The One Making the Poorest Showing Will Have to Settle For a Dinner. New Meat Market Opened—Hard Times Dance Friday Night.

MILNER, Ida., Feb. 13.—H. K. Belmont, purchasing agent for the North Side company at Milner, would like to receive quotations on hay and grain.

Great activity is looked for in Milner this spring.

J. C. Ream has the contract for painting a number of the buildings in town. The next improvement to be taken up and agitated is sidewalks. Settlers are moving in and it is expected there will be lots doing.

H. K. Belmont and D. O. Longmeyer have put up over 100 tons of 14-inch ice which they expect to sell this summer.

C. E. Hoffmaster of the American Waterworks & Guarantee company of Pittsburg, representative of Messrs J. S. and W. S. Kuhn arrived in Milner Monday. Mr. Hoffmaster will spend a week in Idaho looking after business matters in connection with the North Side Land & Water company.

C. E. Hoffmaster and G. E. Hoffmaster went to Boise Tuesday evening on a business trip. Mr. MacWatters returned to Milner today. Mr. Hoffmaster going on through to Twin Falls.

Rev. J. H. Barton of Boise will hold church services in Milner in the bank building Monday evening. It is hoped there will be a large attendance.

Major Reed is in town this week (manufacturing business). The Major and J. M. Hale expect to drive from Milner to Jerome and Wendell tomorrow. Mr. Hale drove to Milner from Jerome today.

Messrs Palmer & O'Leary are erecting a large addition to their livery barn to provide more stable-room. Mrs. Robert Brose and daughter of Rock Creek have been spending several days in Milner this week with Mr. Brose of the Palace Meat Market.

The Ladies' club met Wednesday afternoon at the company house with Mrs. Alice Waters and spent a very delightful afternoon. They will meet next week with Mrs. H. R. Grant of Electric avenue.

Miss Klorstedt has been in Twin Falls for the past week doing some professional work in the Power company office there.

The little son of Mr. and Mrs. J. L. Mounat, born last Saturday, has the proud distinction of being the first child to be born on the Twin Falls North Side Land & Water company's segregation. It is the hope of all the settlers that the boy may grow up to become governor of his native state.

Walter Pezold of Halley, Idaho, is visiting his sister, Mrs. A. Clermont of Milner.

Mr. and Mrs. J. E. Bower of Dry Creek have been in Milner for several days, Mr. Bower looking after his hay and grain interests here.

Mrs. George Ferguson of Shoshone has been in Milner for several days attending to some business.

Lorin Gallogly of the Milner Dairy has had to go to his home in Burley where he is quite ill being threatened with fever. His brother, Floyd Gallogly, is attending to his dairy business.

(Continued on Page 4.)

POTATO CULTURE ON MODERN LINES

OUND ADVICE FROM EUGENE GRUBB.

Noted Colorado Grower Discourses Upon the Humble Tuber and Tells the Twin Falls Farmers How It May Be Profitably Grown.

Hon. Eugene Grubb of Carbonado, Colorado, the most successful potato grower and stock breeder in the west, talked to an audience of farmers in Twin Falls Monday on the subject of potato culture. He expressed the opinion that the Twin Falls tract was particularly adapted to the successful growth of potatoes and he gave his hearers much valuable advice on the subject. Mr. Grubb has stated that he could take any piece of ground he had seen on the Twin Falls tract and pay for the land and water right with one crop of potatoes. Nobody who knows him doubts his ability to perform this feat. He is willing at all times to tell or to show how he grows and markets his potatoes. He has no secrets and it was a pleasure to him to tell the Twin Falls farmers how he grew his potato crops. The meeting was presided over by Alex McPherson.

Mr. Grubb said:

I think the idea has been circulated that I would give some of my experience in potato culture and general farm management for the production of the best potato crop. In my talk I will take in possibly markets, market conditions, seed selection and cultivation, rotation of crops, fertility of soil, storage and marketing and the work of growing potatoes to make money; that is the idea of what we grow potatoes for. There is not much romance about it to some people, but for myself I got as much pleasure out of growing a good crop of potatoes as I do in growing fine shorthorn cattle, and I find it requires as many years' experience as to grow shorthorn cattle or run a bank, though I have never had much experience in running banks. I made a remark the other evening at the delightful little social gathering of your business men here that possibly, among the jokes and fun and amusement, might not have been taken as seriously as it was intended. But I want to say to you here today that I meant every word of it and I say it again. I have traveled all over this country and southern Europe and I want to emphasize it—I believe it more today than I did Saturday, that the Garden of Eden of America has been found and it is in Idaho, and at Twin Falls. (Applause.) If the agriculturalists cannot make money here, I do not know where they would go to be successful and make good comfortable homes and enjoy the blessings that come from clean agricultural life. I think there is no higher ambition for any man than to have a home in the country on a farm, where he is really monarch of his business. This is not so in other callings, where you are so

(Continued on Page 6.)

RICH PROMISE OF GEM STATE

GOVERNOR GOODING WRITES OF IDAHO'S RESOURCES.

Although Wonders Have Been Accomplished, the State is Only on the Threshold of Development—Future Gives Grand Promise.

Idaho has had extraordinary growth in both population and development within the past few years. If this onward progress is not seriously retarded by the present financial crisis, the state should double in wealth, production and population within the next five years. To those who are acquainted with her resources, all that has been done in the past seems but a trifle to what must be accomplished before the word "rich" can be written after the story of the development of her natural resources. Idaho is especially a land of opportunity to the young men and women. This is a young state. Capital has become interested in the development of her resources. Much has been accomplished during the past years, but a great deal more remains for accomplishment. The state is going forward with a bound. Each tomorrow finds her richer and greater than she is today. She is excellent, or she is destined to excel in all lines of natural progress and production. The fruit of her orchards cannot be surpassed for size, beauty, flavor and keeping qualities. This is true of the other products of her fields and farms. The state is blessed with a climate unsurpassed in the world for healthfulness. Her days are filled with sunshine, and her air teems with essential constituents of health and strength. Her soil possesses a fertility not exceeded in any portion of the globe; her mountains are forest-clothed with the most valuable timber; her hills are filled with precious metals; her streams will furnish power for transportation and manufacture and there is ample water in the Snake river and its tributaries to reclaim all the lands of the great Snake river valley of Idaho. This valley, I believe, is destined to be, in years to come, one of the most fertile in the world.

In southern Idaho, under the Carey act, the state has under segregation and supervision 925,000 acres of land, which have been developed by means of irrigation works. It will be given the advantage of irrigation by means of works now in progress of building. In addition to this, the general government is at work on two projects under the reclamation department that will reclaim 625,000 acres more of these lands. There is now in this state awaiting purchase and settlement here a million acres of these lands, and which at present there is every reason to believe will be supplied with irrigation within the next three years. The Snake river valley is unique in two things—there is more naturally fertile land susceptible to cultivation than in any other semi-arid state, and Snake river and its tributaries carry flow an ample supply of water to irrigate all of these lands. The Snake river flowing more water annually than any other stream in the semi-arid portion of America. On the South Fork of the Snake the United States, at Jackson Lake, has already constructed a reservoir. It will store 35,000 acre feet of water. The capacity of this reservoir, at very slight cost per acre, has increased to 1,000,000 acre feet. On the North Fork of the Snake river an equally large storage reservoir can be constructed at slight cost. The waters stored otherwise running entirely to waste. Other streams, such as the Wood River, Payette, Owyhee and Weiser, can be made to furnish by storage great amounts of water for irrigation in addition to the natural flow of these streams during the irrigation season.

The area of lands in the Snake river valley in Idaho now under irrigation, or where works are under construction and to be completed within the next three years, is approximately 4,000,000 acres.

These lands, which are as fertile as any in the world, are being used for the production of hay, grain, vegetables, fruits and sugar beets. Hay and grain is fed to our livestock, the fruit and vegetables find both home and foreign markets, and the sugar beets are used in the five sugar beet factories of the state, each of which institutions annually distributes directly among the farmers of the state hundreds of thousands of dollars. In the production of all these fruits of the soil is a waiting opportunity for the present or future citizen of Idaho. The land is there awaiting the tiller, the demand for the product has been created, and all that is now needed are men with a capital of industry and desire for independence.

The streams which furnish water for irrigation in southern Idaho can also be made to supply power for transportation and manufacturing. In some instances this is already being done. In addition to the agricultural, stock-raising, manufacturing and commercial opportunities of the Snake river valley, this portion of the state possesses enormous undeveloped mineral wealth, and an extensive area of valuable timber lands which have not yet come into the market. The mineral resources, although mining has been one of the principal businesses of the state, are yet but half developed. There is now every incentive for renewed mining activity in this and other portions of the state. Railroads building and under contemplation will place many of these unworked mining districts in position to be worked profitably, while railroad extension and active demand is even now calling attention to the coal beds in the southern part of the state, which are known to be of great value and wide extent.

A glimpse at opportunities for home-building and home-making in this state would be but half complete unless the riches of the northern half of the state are taken into consideration. In the six northern counties of Idaho are to be found one of the great grain, hay and fruit belts of the world, producing annually millions of dollars of product. Here are located the greatest silver-lead mines of the world, producing one-third of the world's supply of lead, and being an extensive producer of both gold and copper. Clothing the valleys, the hill-sides and the mountain tops of a portion of northern Idaho are the greatest white pine forests east of the present time. These timber resources are even now being developed and the product of the mills located at various points is being marketed all over the world. Northern Idaho possesses a distinction which it is believed is not enjoyed to such an extent by any other timber region in the world, and that is that as a general thing the lands upon which our best timber grows are of extraordinary fertility, and these lands denuded of their timber are certain to at once become devoted to the production of grain, hay, fruit and vegetables.

The role of the prophet is a difficult one to essay, and yet I feel that in the case of Idaho and its future I am willing to trust that my faith in her boundless resources and opportunities will be justified by her constant growth, and the constant increase in the prosperity and happiness of those citizens enough to choose this state as their abiding place. I look to see this state grow within the next decade to be the greatest producer of wheat in the United States, to continue to produce the most lead of any one place in the world, to add largely to her production of the precious and useful metals, to build up manufacturing enterprises of great importance, to develop her grain and fruit-growing areas until she is second to no state in the value her product in these lines, to cut and market more lumber than any other state in the Union, with the possible exception of Oregon and Washington, and, last and greatest, to continue to give to her people a guarantee of individual liberty under the law, such as was intended by the founders of our nation.—Pacific Monthly.

Cure Your Kidneys

Do Not Endanger Life When a Twin Falls Citizen Shows You the Cure.

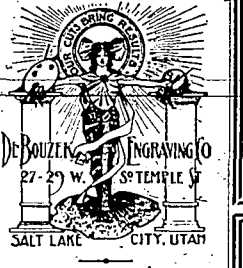

Why will people continue to suffer the agonies of kidney complaint, backache, urinary disorders, lameness, headaches, languor, why allow themselves to become chronic invalids, when a certain cure is offered them? Donan's Kidney Pills is the remedy to use, because it gives to the kidneys the help they need to perform their work.

If you have any, even one, of the symptoms of kidney disease, cure yourself now, before diabetes, dropsy or Bright's disease sets in. Read this Twin Falls testimony:

Ed. H. Chandler, farmer, living one mile and a half south of Twin Falls, Idaho, says: "I do not hesitate to recommend Donan's Kidney Pills for the cure of kidney trouble to me. For two or three years I suffered on and on with kidney complaint and weakness and on one occasion I was laid up for a week on account of it."

I procured a box of Donan's Kidney Pills at Sprague's drug store. I took this remedy faithfully and found it to be just as represented. Donan's Kidney Pills relieve the pains in my back in a very short time. I know this remedy to be safe and reliable for kidney trouble, and should I have a recurrence of the trouble I will again resort to Donan's Kidney Pills.

For sale by all dealers. Price 60 cents. Foster-Milburn Co., Buffalo, New York, sole agents for United States. Remember the name—Donan's—and take no other.

TWIN FALLS NEWS Official Paper of Twin Falls County, George B. Fraser, Editor.

Published every Friday by THE NEWS-PUBLISHING COMPANY TWIN FALLS, IDAHO.

Subscription Rates: One Year, in Advance \$2.00 Six Months, in Advance \$1.00

Reliable information regarding the city and county promptly and cheerfully furnished. Address all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter, December 2, 1904, at the postoffice at Twin Falls, Idaho, under the Act of Congress of March 3, 1879.

The February number of the Pacific Monthly contained several articles on Idaho in which the writers laid great stress upon the magnificent resources of the state. The Pacific Monthly has been very kind to Idaho and particularly gracious to the Twin Falls tract. It is the only publication that came in with a clean cut business proposition. It did not ask the business men for a donation for a write-up. The investment company put a half page advertisement in the Pacific Monthly from which it received approximately 1000 inquiries from the most desirable class of citizens. It was the most profitable advertisement the company ever secured and the officers of the company state that they get better returns today from the Pacific Monthly than from any other publication. The Monthly is a clean, progressive magazine, devoted to the west and to western enterprise. It is doing a splendid work and its friendship for Idaho is of great value to the state.

Twin Falls lost the Republican nominating convention by one vote. Where the gentlemen who tried to secure the convention for this city intended to hold it nobody knows. Twin Falls wants everything that is beneficial but a good bunch of farmers from Iowa are worth more to the town than a dozen political conventions. From all accounts Chairman Brady has his fences well patched and it only remains for the people to vote as they are told. In fact it is almost superfluous to hold primaries when the machine is working so smoothly. Mr. Brady's supporters are dancing upon the prostrate political form of Governor Gooding whom they now regard as a dead man. What a change, my countrymen. And the Republicans are supposed to swallow it all and say they like it. The nominating convention will be held in Boise on September 1 and by that time there may be some startling changes.

After considerable sparring over the length of the contract, the city council and the power company have reached an agreement with respect to street lighting which will cover a period of three years. It will take the company two years to recoup the cost of installation. The company has agreed to accept its pay from the city in warrants and has pledged itself to give Twin Falls the Spokane power rates during the life of its contract with the city. This should tempt industries to Twin Falls and make this the leading manufacturing city in the state. The company is now negotiating with several parties who are figuring on putting up plants here and there are fair prospects that some, if not all of them, will be landed.

TWIN FALLS WINS THE DEBATE In a Close Contest with the Albion Normal Team.

In a very exciting and fairly conducted debate, the Twin Falls high school team defeated the Albion State Normal speakers at the auditorium last Friday night. Twin Falls won on the affirmative side of the question: "Resolved, that a system of postal savings banks be established in the United States." This question is being debated in the schools of southern Idaho with varying results. The Idaho Falls academy will send its debate team to Twin Falls on February 15 to defend the negative side of the question.

Friday's debate was very interesting, not only because of the vast amount of information supplied by the speakers, but likewise on account of the personality of the debaters and the thoroughness with which they treated the subject. Professor Thompson was in charge of the Albion team, which was composed of Miss Hattie Rogers, Miss Burgett and Clarence Smith. The visitors came well posted and they put up a stiff argument. They were weak in marshaling their facts and their arguments lacked coherence. This was probably due to the fact that they were away from home and were somewhat nervous. Twin Falls' facts and the language by which they did not kill their arguments sufficiently strong. The visitors were given close attention and were liberally applauded. Their visit was a

TWO NEW ROADS FOR MURTAUGH

COMMISSIONERS PROMISE TO BRIDGE DRY CREEK.

Anniversary of Washington's Birthday Will Be Celebrated by the Children-District Canal Association Holds Meeting.

MURTAUGH, Ida., Feb. 12.-Miss Fannie Bacon came down from Pocatello Tuesday on a visit to her brother, Fred.

A. B. Beverlin was a county seat visitor Tuesday.

Mr. and Mrs. J. I. Tolman visited relatives and friends on Goose creek last week.

W. E. Boers attended the meeting of the Republican county-central committee in Twin Falls last Friday, returning home Saturday morning.

Mrs. Wm. Tolman of Alberta, Canada, is visiting with her son, E. L. Tolman, of this place.

Miss Gertrude Walton, who had been visiting her sister, Mrs. W. P. Jones, returned to her home in Hansen Monday.

Bishop A. G. Smith and Harvey Sessions of Marion, were Murtaugh visitors Sunday. They inspected the W. H. Emanuel is erecting a commodious barn on his farm.

J. W. Walton has brought his herd of sheep in from the desert and is feeding in the feed house.

Messrs. B. F. Hayes and L. James, who have dry farm homesteads south of Murtaugh, purchased a grubber, this week and are soon to dig out their well and get their land in shape for seeding.

J. J. Henderson is erecting a neat residence on his dry farm homestead near the state school.

W. E. Boers shipped a car of wheat to Salt Lake City last week.

Mrs. Frank Terrill was a Twin Falls visitor the first of the week.

County commissioner John F. Hanson of Rock-Creek was here Saturday on official business connected with our roads, or rather lack of roads.

In company with the board of supervisors, Hanson inspected the two new roads which were created at the last meeting of the county board and selected the site for the bridge across the creek at the intersection of the two roads.

There was a meeting of the local central committee of the Republican party at the schoolhouse Friday evening.

The school will give a public entertainment on the anniversary of Washington's birthday.

It is to be hoped that they will make more at home next time they come here.

Curtis Turner, James Shields and Miss Dell Fuller spoke for Twin Falls at the meeting of the central committee. They showed careful study of the subject, expressed themselves in pure English and displayed rhetorical ability of high order.

Miss Fuller, in particular, showed splendid poise and command of language and perfect self possession. She had her facts at her finger tips and she spoke rapidly and clearly. When she enjoyed the banking system of the present she was enthusiastically applauded. She went after the banks, hammer and tongs, and her hearers could almost hear the Maxwell and Carl Hahn scolding through the brush for the hills. She flatted the "system" unmercifully and in rebuttal she showed that she still had plenty of good argument left. Carl Turner has a ready delivery and is careful in his use of words. He talks fast and gives the impression that he has memorized his matter. He could unbind a little to advantage. His argument on Friday night was sound and convincing.

He spoke without hesitation and his lines were pleasing. James Shields showed excellent poise and careful delivery. He kept closely to the thread of his argument which was coherent and orderly throughout. His language was good. He made a few florid at times but always grammatical, and he has a good voice.

The Twin Falls debaters conducted themselves admirably and are deserving of the highest praise. They are a credit to the city and the school and a credit to their tutors. There were a number of strangers in the audience and they were astonished at the showing made by the Twin Falls children. To defeat Albion is not an easy task. They have some of the best material in the state at the Albion normal, both among the students and in the faculty, and they show it. It was a clean cut victory and one of which the Twin Falls scholars have every reason to feel proud.

WANTED-Second-hand typewriter. Address B, care News office.

R. F. HARDER A. C. HARDER M. B. HARDER Twin Falls Creamery Co., Ltd. Our Creamery Will Be Ready for Operation March 1st. Those wanting separators and cans at factory prices should apply to us. We received this week a carload of machinery including separators and cans. Call and see us and we will aid you in starting in the dairy business. We are offering every inducement that means economy to the farmer. Our cream will all be Pasteurized. Cream thus treated always brings the highest market price as it is free from harmful bacteria. It also insures a steady market for our product and a ready sale for cream.

Continued from Page 1.

ness for him during his absence. Mr. and Mrs. Bert Johnson and little son, Floyd, have returned from Albion where they have been visiting Mrs. Johnson's parents for a couple of weeks.

Mrs. W. L. Cooper and children of Albion is visiting friends in Milner for a few days.

Mrs. A. J. Henry of Riverside avenue 1848 left for...

Mr. H. S. Martin was called to Twin Falls several days ago by the serious illness of her sister.

Arthur L. Towne is in Milner transacting some business. Mr. Towne is to have charge of P. E. A. Bickel's ranch at Twin Falls this summer.

W. G. Smith, formerly deputy sheriff at this place, was in town calling on old friends this week and looking after some county business.

A new meat market has been opened up in Milner by Taylor & Son of Burley. Dave Bennett is in charge. J. H. Smith of Boise is visiting his brother, Mr. Charles B. Smith, for a few days.

Mrs. M. E. Weldon who has been visiting her son, Mr. George Weldon has returned to her home at Albion.

E. L. Skelton who has been visiting with his family in Boise, returned to Milner to take up his residence on his ranch on the North Side. Mr. Skelton will take contracts for grubbing scrub brush on other farms.

W. G. Smith has gone to Shoshone to attend the meeting of the county commissioners and to look after the passing of a herd law for this section.

Mr. H. B. Hart and Carl C. Dudley of Chicago have taken up their residence on their ranches in the west end of the first segregation. This part of the tract is already quite thickly settled.

Wm. Detweiler, formerly of engineer camp No. 1, has returned from Twin Falls where he purchased a team of horses and equipment for his farm. Mr. Detweiler expects to have his land all under cultivation this season.

R. S. Fessenden has ordered some thoroughbred registered chickens from Iowa and will raise chickens on his farm in the first segregation.

Charles B. Smith spent Monday afternoon in Twin Falls transacting some business.

F. F. Cockburn, of the Jerome State bank, spent Sunday in Milner at the company house.

J. C. Cannon, lumberkeeper, on the Donald Grant construction work on the H. B. Hart tract, was in Milner Wednesday and Thursday transacting business at the company office.

LoRoy Decker, G. H. Butler and Wm. Butler of Chicago are registered at the Hotel Grand. They are here on business.

Ed Schroeder of Heyburn transacted business in Milner Monday afternoon.

There will be a Hard Times dance in Milner hall Friday evening. Every one is looking forward to a very delightful evening.

There is a big bet on among the young men of Milner. The man who eats the best hard time dinner every 10th is to be given the best dinner that can be had in Boise. Charles B. Smith and C. R. Larimer became so discouraged that they took out their moustaches many months ago. Lang Howard and John Haughey are just about even and the chances are one or the other will win out.

The Milner Real Estate & Engineering company have their office furnished up in most attractive style. These energetic young men are doing a good business and hustling for more work. Any one wanting work done on their farms will do well to call upon them.

Notice for Publication-Final Proof. I, John P. LaSalle, of Rock Creek, Idaho, assignee of Christian M. Soronen, who made entry No. 1294, under the provisions of an act of the legislature of the state of Idaho, commonly known as the "CAREY ACT," approved March 2nd, 1909, which embraces the W 1/4 of SW 1/4 of section 28, of township 11, of range 18, E. B. M., do hereby give notice of my intention to file a final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before E. B. Williams at Twin Falls, Idaho, on the 14th of March, 1910, by two of the following witnesses: James Stark, Dave Morgan, Frank Bower and John Harms, all of Rock Creek, Idaho.

JOHN LA SALLE, Entryman.

BOYS' CLOTHES AT ELDRIDGE'S. Some merchants sell goods that only look well. They think they are building a reputation on such merchandise but they are only putting up a house of cards. It will suddenly tumble about them.

STOP! LISTEN! READ! The Farmers' Real Estate Co. Office in Postoffice Building. Where the best bargains on the Twin Falls tract in ranch land and city property will be at our disposal.

(Continued from Page 1.)

subject to back and call, or dismissal if you are working in a salaried position, and some day something comes up, no matter how loyal you have been, some business changes come and you are let out and you have to learn another business to support yourself and family education of children and enjoy the fruits of your labor. With the farmer, that never comes and there is no independence so great as that of the American farmer, or the farmer in any country. I found that in Europe it was not the tradesman, the railroad builder, the professional man, or the banker that was the aristocrat of that country. It was the land holder and farmer and livestock breeder, and this is coming in America faster than it ever came to any other people. The day has come by, never to come back, that the American farmer is made sport of as an old fashioned. He is the man that produces the food that supports the population of the world. The American farmer produces and sells more every year than all the money of the world could buy; more than seven and one-half billions of money has been the annual product of the American farmer. So it is to you people that the great reason for the success of the world of producing food for the American family.

Fertilization.

It has been customary in America to rob our soils and practically rob ourselves, and I know no way of explaining the way this is done that to compare it with a bank account. If you keep taking your money out of the bank without putting any in, you will soon find yourself bankrupt. Whenever you grow grains and grasses and ship them out of the country, you take so much from your farm, which is your bank account, which is gone forever.

So we come back to the point that I left, that of livestock, which is the real basis and foundation of success in every agricultural district in the world. There has never been an agricultural country that has been completely depleted and has not poverty without the use of livestock. The feeding of grains and grasses at home replaces in the soil that vegetable matter which furnishes the humus or element that keeps up the fertility of the soil. In this country, where water is a prime requisite, it should be remembered that there is no better storage for water in no soil than in the vegetable matter, and if you grow crops and ship them off, every year your land will become less porous and harder to work and diseases will enter it more readily than they do now.

It is utterly impossible to grow good potatoes without the porosity of the soil which opens it to the air and sunlight. Few realize what the potato crop means to the world as food. My neighbors are always fearful that the market will be overstocked when they hear of someone putting in 40 or 50 acres of potatoes. Three hundred million bushels of potatoes are produced in the whole United States, and they are all grown in a few states, while Germany grows 500 million bushels annually, and without the potato crop in Europe there would be nothing to keep people from starving to death. It is the food crop of Europe and the time will come when it will be the food crop of America. Our average yield in America is about 37 bushels to the acre, while in Germany it is over 250 bushels to the acre, and about the same in England, Ireland and Scotland. That gives you some idea of what science and knowledge have done. Those people study conditions, have a knowledge of the soil and everything pertaining to potato culture.

Robbing the Soil.

In 1865, when I went to Minnesota, the average wheat crop of northern Iowa and Minnesota was 23 bushels to the acre. This was when they grew wheat and wheat, without the use of livestock until the average yield today of spring wheat in the Dakotas, Minnesota and northern Iowa is about 42 bushels. Britain had about the same average then as we have now and by their methods, knowledge and education they have increased their production until it is now 28 bushels to the acre. The same thing in the United States is practically developed now. There is no more land in the United States that will ever be growing wheat corn. There is some in Africa and some in Australia. In 60 or 65 years from now we will have 300,000,000 people to feed in America. I want to say these things to you people who have not studied this question, in order to bring you to a realization of the value of agricultural lands and what the future wealth of the farm means. When I said that this valley is the garden of Eden of America I believed it with my whole judgment. You people here have a wonderful opportunity to make beautiful homes, with a secure bank to take care of you and your children for generations.

Potato Culture.

I have been in a measure successful in growing potatoes and I will give you my method of growing them. The natural home of the potato is the mountains of South America. Where natural conditions are favorable for the growth of plants or animals, is where you can develop them successfully. The nearer you get to the natural conditions, the better. So you have here the natural conditions of mountains, altitude, perfect soil conditions, absolutely free from germs or bacteria. It is so much better to keep your soil free from those diseases than it is to eradicate them after you get them. Nothing but the fungus and clover should be your foundation crop, clover or alfalfa. I also clover or alfalfa. I do not care much which, for four years. That is broken up in the fall, quite deep, or else broken twice, and the action of the frost disintegrates the soil and loosens it from the roots and puts it in a better mechanical condition for the seed bed. One thing that would be a good suggestion right here is to fall plow, because you get from

five to 12 per cent more heat or warmth in your soil than you would by spring plowing. It is very important to prepare your seed bed and start your potatoes in the spring in a healthy, vigorous condition. We take the fall plowing and disc it or spring plow, as deep as we can, and use it and re-harrow it as long as it can be worked; I try to put my seed bed in as good till as a garden. I think my ground last spring was cultivated in a day. We use two-horse cultivators, something like your double shovel plow, with a 16-inch shovel, and put four horses on those cultivators. You can use a John Deere or any other good, strong cultivator that will stand four horses and try and run it as deep and as close to the tuber as possible. This affords a storage for moisture and opens up the soil for plant food and for the development of the roots. We keep cultivating from time to time, once a week if we can. If weeds germinate, we put a fine tooth harrow on, set the teeth that are there is not much danger of disturbing the seed. We harrowed with this harrow until the potato plant is five or six inches high. With the deep cultivation spoken of, we seldom need any irrigation until July, by plowing the first of May. By that time, in July, the potatoes are set, or being set. To determine when irrigation is needed, we take a shovel and dig down in the hill where the feeder roots are and take a handful of dirt and if it holds its form there is moisture enough for present needs, but you must not wait until it won't hold together, because you cannot irrigate all your potatoes in one day. Then we want to grow potatoes as rapidly as we can, just like you would grow a calf. I find if I can grow my potatoes rapidly and strong and get them well established they will stand a lot of grief later on. A small trench should be made in which to run the water, so that the potatoes will always be in loose soil, through which the air can circulate. We like to plant our potatoes with the rows 38 inches apart, which gives them a nice width and keeps them under cover from the sun and protects them from frost. When it comes to the marketing of potatoes, you want to consider what kind of potatoes you should grow. I don't think I ever saw a bin of potatoes so uniform and so free from scab as that those in Mr. Smith's cellar, but they are too large for the market. You want to grow a medium sized potato. I would say if you would plant them eight inches apart in the rows you would have a bin of potatoes and a more desirable potato, that would bring more money than a large one. There are very few markets, except in the south, that will pay a good price for those large potatoes. We have experimented with rows all the way from 37 to 42 inches apart, and I want to say this to all of you men who will solve your own problem, you will have to work it out by practical experience. Mr. Smith's potatoes were planted 34 inches apart and he did not get a very good stand. I have not seen any soil in here except on the brakes which, from my experience, if properly prepared, and the seed bed made available, but what would stand planting potatoes at least within 10 inches of each other in the row.

Question—How often do you irrigate?

Whenever it is necessary, it is necessary whenever there is a deficient moisture in the soil, whenever the soil around the feeders or tap roots will not ball when you press it in your hand. You do not want to wait too long before irrigating. If you do not grow your potatoes uniformly, with a continuous growth, the starch element will not properly develop, the tubers will be small and the potato will not be a good seed potato. You cannot grow seed where the soil is hot or the potatoes will be checked in their growth and started over in a new year, starting growth. You should grow your potatoes continuously and uniformly, just like you would grow a show calf.

Question—What variety of early potatoes do you grow in this country?

I do not think in this country there has ever been an early potato equal to the Early Ohio. It is a potato that is early in the time it is the size of an egg up to maturity, but it is not a prolific yielder.

Seed Selection.

Question—What do you think of (1) changing of seed, and (2) having seed brought in from other sections of the country?

It is all right if you can bring better seed than you have here, but if you have the best that can be found, I would not do it. I did not say much about seed selection, but I will say that nearly every potato grower I know of in Colorado or anywhere else, advocates getting new seed every other year from Wisconsin and the divide. Some 12 years ago I undertook to breed a potato and develop it on the same lines that I bred my Shropshire sheep or Shorthorn cattle, by using the best seed and then giving it the best treatment in cultivation, irrigation and storage of the seed. For 12 years I selected seed of the size I liked to use, and the ounce potato is about an ideal potato. No man would ever criticize or find fault with that kind of a potato. So I used seed that size for 10 or 12 years, selecting the seed in the fall in the spring and often planted four or five acres in a special plot for seed the following year. I carried that on for 10 or 12 years, and the seed would run out in the period of Peaschlow, and that potato continued to improve during all that time. Two years ago I had one of our colleagues a special-ized seed grower, now the seed he spent a great deal of the summer investigating and experimenting and he complimented me quite freely on my work in selecting the seed. He wanted to take up and further improve my stock. Out of specially selected seed

Sole Agents for Water Rights for all Carey Act Lands under the

GREAT TWIN FALLS CANAL SYSTEM

25,000 Acres of Carey Act Land

Still open for original entry under this Canal System

Land, 50 cents per acre. Perpetual water rights, \$25 per acre, ten annual payments.

Vehicles from Buhl furnished free to those who desire to inspect land. Prospective entrymen accompanied by competent locators.

BUHL

Buhl, located 17 miles west of the City of Twin Falls is the leading city on the west end of the tract and the distributing point for a large area, including the stock districts of Three Creek, Butte and Roseworth, likewise the farming and fruit growing districts of Magerman, Kanoka Flat and Salmon. The railway track is now completed between Twin Falls and Buhl, and train service has begun. Buhl has a splendid gravity system of waterworks, with a pressure of 100 pounds in the business section. It will soon be supplied with electric power and light. Business property values in Twin Falls have increased 500 per cent in less than two years. The same opportunities for investment are presented at Buhl. Now is the time to buy. Write for literature and further information. Address all communications to

PRaises Twin Falls Schools

PROFESSOR HAMMOND OF RIGBY SPEAKS KINDLY

Gives Twin Falls Full Credit For Its Splendid School System Which He Says Makes For The Highest Kind of Citizenship.

The last week in January I spent in visiting the schools of Twin Falls. The school system operated upon the consolidated plan. I went there for the purpose of inquiring into and learning all I could about the system. From the standpoint of a teacher I studied carefully the advantages of the country boy or girl in the way of class-work, social training, athletics, manual training, moral development and the upbuilding of our citizenship.

The class of work done in the Twin Falls schools is highly commendable and its influence will be felt by the State of Idaho, through the training of its future citizens are receiving there. The efficiency of the school is due to the untiring and energetic management of Prof. Parke.

Every detail of the school work is under his immediate observation and in a real sense the highest standard of work is done in all the departments. The creating of a large school district from the city and country surrounding it has not only made possible the establishment of one of the first public schools in the state, but has made possible the establishing of a high school department, and a commercial department, and a manual training department, all of which are the advantage of a higher training, which if any of us take advantage of for our boys and girls we must do so by sending them to our care and protection, and pay out from \$250 to \$300 per year. Not many of us are able to do that and as a result hundreds of our best citizens consume their lives for themselves poorly equipped and unable to cope with the intelligence of the favored few.

It was certainly a pleasure to visit the various departments and note the pride and energy manifested by the students in their class work. It seemed that every room was filled with the same energy and vitality manifested by the superintendent, Prof. Parke, each doing with the other to make the most brilliant record.

The class of work done by the school bears witness for itself in this fact that during the year the number of its life has passed into the high school from the grammar grades over 90 students and these 90 are continuing on through the high school. Compare this to the year 1907. In the past four years you have graduated from our grammar grades 34 students and of that number 21 students have entered upon the high school. Where are the other 27? Why have they not continued their work? Slimly because the opportunity is not theirs. Their school life and development has taught them that they have nothing higher to aspire for. Our boys and girls are just as bright as any and if given the opportunity will climb as high as any other school.

It is the duty of the citizens of our fair state, and stand among the leading men and women. I plead unselfishly for boys and girls of our communities. Give them the opportunity which they are young; consolidate the schools whenever possible; establish high schools and give the country boy the education he so richly deserves. Give them the best of our institutions of our future state. Educate him and place him above the jeers and scoffs of our idle city boys, who unjustly have been more fortunate in their school advantages. The bravest men of all times have come from the humble country cottage, but how few they have been in comparison to those whose advantages have been better. How many more intellectual giants would we have known had the country boy's education been properly appreciated. We complain about the conditions of our citizenship in our politics, corruption in our national institutions and look about us for various remedies of the evils existing. I believe honestly and sincerely that the United States would for the period of four years place at the command of every boy who lives in the free air of the country, unstinted in character by the vicissitudes of such large communities, with a humble reverence for all that is good and noble, and upon whose countenance can be read good material for the highest order of citizenship, the very advantages that every boy who lives in the city enjoys every day of his life, that men would stand at the head of the list of states of nobility of character that the grievances of today would disappear and cease to exist, because when citizenship reaches its highest standard such things cannot exist.

As I stood upon the door-step of the "Blickel school" building of Twin Falls and watched the wagons loaded with happy country children arrive at the schoolhouse, I was reminded of the wagon steps and I longed for the beautiful and comfortable environments given to them by high minded citizens, my thoughts turned to the school with which I was familiar and my eyes filled with tears because I saw the boys and girls I loved plodding through the snow and cold to school houses poorly equipped, cold and cheerless and devoid of all that is inspiring to a school child. Neighbors let us embrace the opportunity that is ours and work unceasingly to give our boys and girls the best that is in our power to do for them. Consolidate our interests and

establish a school that our state can point with pride to the work done and glory in the improvement of her citizenship through our efforts.

M. J. HAMMOND, Supt. of Schools, Rigby, Idaho.

The Devil's Selloquia

Contributed by Frank Fullivore, Owen, Kentucky.

One night as the devil sat musing alone in the midst of his cozy hot fire, And trying to figure the difference in guilt.

'Tween a thief and an all around liar, His memory turned back to days of his youth, His eyes filled with boiling hot tears, So he took down his ledger and turned down the page.

Dated back about six thousand years, I suppose, he said, as he glanced through the book, I am doing the best that I can, For my business shows a gradual increase.

Ever since the creation of man, I've cribbed a rich harvest, for six thousand years, And would be content with the yield, And give my opponent permission to get.

The gleanings I've left in the field, I've gathered a very diversified crop, Of merchants and farmers galore, I've bound politicians in bundles until my fingers are every one sore.

I've doctors, gamblers and insurance men, I've murderers, forgers and liars, I've filled up the furnace with the gas-sipping clan.

'Till they've actually put out the fires, I've railroad conductors, and jewelers to spare, Horse traders and saddlers to spend, Republicans, democrats, Tories and Whigs.

And a good bunch of newspaper men, But there is one class, I am happy to say, That never can gain entrance here, Their souls are so dirty I'm sure that they would Demoralize hell in a year.

I refer to that class, neither human or beast— The carrion crows of the world, Whose never content, but always hell they would slander some woman or girl.

There's another class, too, which I would not dare, To allow to come into my den, 'Tis those who delight in letters they write, And fall to "scribble" at the end.

Ten millions of years in my hottest cells, Could never their sins atone, So give them a slash, and tell them to start.

A scribe from you hell of their own, I know that I'm king and ruler of hell, Through the darkest of places I roam, And I know that I'm truly a very bad man.

But I've got some respect for my home, Notice is hereby given that on the 14th day of March, 1908, at 4 o'clock P. M., bids will be received and opened for the sale of sixty thousand dollars coupon bonds on independent School District No. 1, Twin Falls county, Idaho. Bonds are to bear five per cent interest, payable semi-annually by the 1st day of January and the 1st day of July in each year, with an option of ten years, all bids to be addressed to C. D. Thomas, clerk of independent School District No. 1, Twin Falls county, Idaho, at Twin Falls, Idaho. The board reserves the right to reject any or all bids.

Done by order of the board February the 11th, 1908. C. D. THOMAS, Clerk.

Feb. 14 to Mar. 13 inc. If you have the blues, Packard the Cartoonist, will drive them away. School Auditorium, Wed. Eve. Feb. 19.

BIG PUBLIC SALE

Thursday, Feb. 20th, 1908, 2 miles west of Twin Falls, consisting of horses, cattle, hogs and farm machinery and household goods.

H. B. LUE, Auctioneer.

Nursery Business. One-third interest in established and thriving nursery business for sale at a very reasonable price. Reason—Rapid increase in business. Working partner desired. Inquire J. V. Marshall & Co.

Notice. All county warrants independent prior to January 1st are deemed by the county treasurer on presentation at his office in McCormick & Co's bank in Twin Falls.

C. J. HAHN, County Treasurer. Man and wife want place on a ranch. Five years experience in Irrigation. Address P. O. box 570, Twin Falls.

Will grow Commercial Orchards on your own land and guarantee to supply or will furnish anything in the nursery line in exchange for one good horse 1200 lb. 1200 lbs. one drive one horse 1000 lb. 1000 lbs. a light one horse wagon with top, a single buggy and double and single harness.

W. O. WANN, Twin Falls. Fruit tracts, 10 to 30 acres, free water, in Snake river canyon, north side, at Clear Lake portage, a few miles from Wendell. Address B. L. Rathbun, Clear Lake, Idaho.

FOR SALE—160 acres close to Filer, cheap, easy terms. Inquire of Idaho Irrigated Lands Co.

(Continued from Page Six)

which I had, he selected perfect tubers and planted them in a hole by the side of the three best potatoes were fit to dig we dug all of them and left them just as when dug in the hills. Any hill which did not have 20 perfect tubers of uniform size, I put a knife through it and it was not reserved for seed. No hill was selected unless it was absolutely within the rigid requirements and I want to tell you, we did not have any hills which were selected to select 200 pounds. Those we planted one year ago and we harvested them last fall and it was the most marvelous row of potatoes I ever saw. The specialist whom I referred to, illustrated the experiment by asking me if I would ever think of breeding a bull that was from an inferior dam, no matter how good the sire. If we keep up this sort of selection, we will soon have a potato that will average 25 perfect tubers to the hill if we had bred our short-leafed potato as we have selected our seed potatoes, or corn, or oats, we would not have any shorthorn cattle, if we only used the culs, or waste to breed from, our breed would soon be ruined. So you will see that in selecting the best to breed from, Professor Bennett illustrated that idea by saying that if you used a good potato out of a hill that contained 10 or 12 bad ones, if you were to select the good one, that is the reason we never selected a perfect potato out of a hill that contained a knotty or split potato.

Question—What was the character of the tops of the hills of potatoes that you got so many out of?

You see that for a quarter of a mile, they were large and luxuriant. These are now known as the Perfect Peachblows have been grown on my farm for 25 years and people visiting my bins say they have never seen a more uniform lot of potatoes and they are beginning the work of selecting and breeding a perfect potato.

(Taking a Peachblow and cutting it up) I have very much to say about it had only found good hollow potato in this variety in 25 years.)

There is one thing the Chamber of Commerce ought to do before the sun goes down, and that is to see that the hills here are furnished with fine class potatoes, so that visitors and investors coming into the country may see what is produced here.

You do not want to grow 15 or 20 or 100 varieties. The Carbondale district grows scarcely anything but the Peachblow potato. That is not an early potato. The Dalmeny Challenge is used on the Vanerick works in the dining cars and in nearly all the best hotels in Denver, because it is a fine cooker and has so little water in it, that you can fry it that you should grow a smooth potato, free from dirt and scab, or anything to detract from its appearance.

Question—Could we buy a carload of Peachblows from you for seed?

I did not come out here to sell potatoes. Barteldes & Co. handle largely my stock. I do not refuse to sell my potatoes, but the agent of the Grande railroad says I am a big fool for not keeping the stock and making a monopoly of it.

Marketing Potatoes.

Our methods of packing and selling potatoes have been the most cruel of these used in handling any food product. By the time they get to the consumer they are bruised and jammed. I have thought of creating potatoes and developing that idea in Denver and New York. At the present time I favor 40-pound crates. We might either decrease or increase the size of the crate, or make various sizes. The question of weight remains. If the one you want to enter into, I don't think there would be any trouble in selling these potatoes (indicating the Peachblows) at five cents per pound in the city. I am trying to educate the public to the delicacy of a first class potato. At Debeque I talked on marketing potatoes and they shipped some to New York. My purchasers were very well pleased with them. While I was making this talk in Debeque, a man from Pallasades interrupted me and said they were shipping in 15-inch boxes, he said to New York and could not get any more nine-inch boxes and so they used peach crates. The peach crates filled with scab, they got just a day later in New York. People would take a peach crate of peaches home and he said the peaches shipped in peach crates weighed 40 per cent more than those shipped in boxes. As a rule, the poorer the wealthy people buy only in small lots, about 50 cents per purchase. So I believe that when you produce a high quality of potatoes, you should put them in crates and sell them. Do not be afraid of freight bill if you can furnish something better than anybody else. You certainly can do it here. Food River grows practically only strawberries and apples and of apples practically only one kind, but what a rigid and honest system of grading such fruit. They do not sell in a single apple that is not first class. They do not put a lot of poor ones in the middle and good ones outside. I say, do not put anything in a sack that you would not get yourself.

SCHOOL NOTICE.

The attention of those interested in the formation or division of school districts is directed to the following provisions of the state school law:

"The board of county commissioners of the several counties of the state shall have power to create new districts from organized territory or from disorganized territory, to change the boundaries of any district heretofore established or to attach to one or more districts the territory included within the boundaries of any district which shall lapse by reason of failure to comply with the provisions of this title. Provided, That no district shall be formed in any territory or the boundaries of any territory be changed at any other time than at the regular April meeting of the board of county commissioners, unless a petition for such new district or the change of boundaries is filed in the office of the county superintendent not less than 15 days before the meeting preceding. Providing, further, That in no instance shall the changing of the boundaries of any organized district take effect until after the meeting of school in that district for that school year. If such petition is for a new district, it must set forth the boundaries of the new district asked for, and the names of the owners, trustees or guardians of at least 10 children of school age who are residents of the proposed new district, and, if for a change of boundaries, such petition must set forth the change of the boundaries desired, and the reason for the same, and must be signed by at least one-third of those who are heads of families and residents of the district or districts whose boundaries are in question. Provided, further, That no petition for the changing of the boundaries of a majority of the heads of families residing in each of the said districts, be united to constitute one district, nor shall any district shall be divided for the purpose of forming a new district unless it contains an area of more than nine square miles except in the case of a territory which is a student of schools and by the unanimous vote of the board of county commissioners, nor shall a new district be divided if by doing the same the area of the district shall be found to contain less than 15 persons of school age, nor shall incorporated cities or towns hereafter be divided into two or more districts."

Meigs can show you the best line of high grade bugles and spring wagons in the city.

Don't forget Packard, the Cartoonist, Wed. eve. Feb. 19th.

FOR SALE OR RENT—Two farms near Dubu, one 150 acres, the other 100. Will sell or make satisfactory arrangements for leasing. Address E. V. Aasey, Box 4329, Drexel Boulevard, Chicago, Ill.

other year. Before planting, the seed is left exposed to the air and sun for a week.

Dipping potatoes has never been proved of any value in Colorado. Our growers at our experimental stations have tried it before. If I had my seed and was going to plant it here I would treat it with corrosive sublimate. England has brought all of her seed for years from Scotland because their own ripened seed would not give any results. I want to say that in this year I have 2500 bushels of seed raised in August and put in storage cellars. Cut your seed the same way you plant.

Storage.

I will tell you how I constructed my cellars and why. I found some potatoes that had been dug two years that were just as fresh and ripe as those that were dug in the early days in Colorado at an altitude of 12,000 feet and met an old prospector friend down town. He told me he was going out of that part of the country in an effort to find a better soil, so my supplies, including 12 sacks of potatoes, which had been put in there two years before, which I might have used. So my friend and I went over there and in the end of the tunnel we found the potatoes. They had been in there two years. There had been an air shaft constructed at the end of the tunnel. As the air had been hung up, but through the tunnel was a current of air. The temperature would be about 40 degrees.

So you see that if you keep those potatoes would keep two years. I think they would keep 20 years. So my brother and I said we would build a cellar as near those conditions as possible and that is the way we got to those conditions of our potatoes. Our cellar has a concrete or cement roof so that it is absolutely tight. It has double doors and a spring at each end through which to drive, with blinds and ventilators every 10 feet.

When we want to lower the temperature of the cellar, we do it by opening the doors. When spring comes I try to keep our potatoes at a temperature of 34 degrees, though if the temperature should go down to 30 or 32 degrees the potatoes would not suffer much. Potatoes do not freeze above 28 degrees. We like the temperature at about 34 as the potato does keep better and do not shrivel. I will send a blue print of our cellar to some business man here. One point in the storage of potatoes which has been proven by fruit and potato culture is to reduce the temperature to as low a point as possible directly after the product is stored. I make my men handle potatoes as you would eggs. They are not supposed to throw them or tramp on them or bruise the skins. We put about one foot of potatoes on the cellar floor, by the time we get to the top of the cellar, the potatoes are pretty well carried off by this system of ventilating, the current of air passing through the cellar.

One point in the storage of potatoes which has been proven by fruit and potato culture is to reduce the temperature to as low a point as possible directly after the product is stored. I make my men handle potatoes as you would eggs. They are not supposed to throw them or tramp on them or bruise the skins. We put about one foot of potatoes on the cellar floor, by the time we get to the top of the cellar, the potatoes are pretty well carried off by this system of ventilating, the current of air passing through the cellar.

So you see that if you keep those potatoes would keep two years. I think they would keep 20 years. So my brother and I said we would build a cellar as near those conditions as possible and that is the way we got to those conditions of our potatoes. Our cellar has a concrete or cement roof so that it is absolutely tight. It has double doors and a spring at each end through which to drive, with blinds and ventilators every 10 feet.

When we want to lower the temperature of the cellar, we do it by opening the doors. When spring comes I try to keep our potatoes at a temperature of 34 degrees, though if the temperature should go down to 30 or 32 degrees the potatoes would not suffer much. Potatoes do not freeze above 28 degrees. We like the temperature at about 34 as the potato does keep better and do not shrivel. I will send a blue print of our cellar to some business man here. One point in the storage of potatoes which has been proven by fruit and potato culture is to reduce the temperature to as low a point as possible directly after the product is stored. AND THE STREETS ARE THERE BY MUCH IMPROVED.

Odd Fellows Have Purchased a Site For a Cemetery—Complaint Made That School Boys Are Being Supplied With Intoxicants.

BUHL, Ida, Feb. 13.—Mrs. Frank Russell, returned home Thursday from North Yakima, where she had spent several months visiting with relatives and friends.

R. B. Hudson was a Buhl visitor Monday. He says that the country northeast of Buhl where he lives is going to go some this summer. Everybody in that vicinity is preparing to put in hard licks the coming season, as there will be no dearth of water this year.

J. H. Schoeller and D. E. Meyers have rendered the town a valuable public service free of charge. They employed their men and teams several

days of last week making cinder sidewalks and crossings which enabled the people to get around now without going knee deep in mud. They did what the company thought to have done. But then Messrs. Schogler and Meyers are not huge, you know. They increased the value of property in the town while the owners of the property set selfishly back and watched them do the work. It may be that these gentlemen, or some other public spirited ones like them will have to turn in and grade the streets yet, for it does not seem that the expert grader of whom we heard some time ago, will ever get around to do it. The ground is frozen now and the grading cannot be done. When the frost is out, the expert will be on the north side and too busy to come here. This reminds one of the Arkansas traveler's house. When it rains it was too wet to repair the roof.

B. T. White came in from his ranch Friday on business. His daughter, Miss Maggie White, left for California last week.

J. W. Morris came in from Ferguson Plains Saturday on business and to subscribe for the News. He said he wanted to keep ahead of what was going on in Buhl and the county generally, and that he did not know any better medium for that purpose than

the News, so he subscribed for the News that he might get the news. And he was right, for he will tell them to do as you did. The News has a typesetting machine and can turn out thousands more copies than it is doing at the present time. Don't waste any sympathy of the editors or printers. Let them work overtime if necessary just so long as the machine stands it, let us hammer it to human ones.

The fire's plug wrench is hanging just inside the door in the post-office, and the door is never locked. Keep this in mind so that you will know just where to find the wrench in case it is needed.

Professor A. Wynatt had a high fever Saturday, but was able to attend to his school work Monday, and is now fully recovered.

It is reported that some one is buying liquor and giving it to school boys; two or three of the latter were so drunk recently, as a result that they were afraid to go home. This was done to the hunter up and given the full limit of the law. The school men of this town live strictly up to the law, but they cannot tell of course what becomes of the liquor bought and taken out of their places of business, and it is impossible to make them suffer indirectly for the misconduct of others. Get after the wretch and "clinch him". The prosecuting attorney will please take notice.

Paul S. Bickel, chief engineer of the North Side canal system passed through Buhl Saturday on his way to his wife's ranch on the Snake river, to make preparations for the spring work on it. He says that work is progressing rapidly on the north side canal. He was accompanied by Arthur W. Eldridge, the live clothing man of Twin Falls, who also owns a fine ranch on the sunny slopes of Dunderberg, was a Buhl visitor Thursday.

W. H. Eldridge, the live clothing man of Twin Falls, who also owns a fine ranch on the sunny slopes of Dunderberg, was a Buhl visitor Thursday. He was accompanied by Gordon MacQuiboy, of Middlebury, Vermont, who was seeking an investment. They took in the north side and came to Buhl by way of Hagerman. Mr. MacQuiboy is favorably impressed with the country and will no doubt purchase a piece of land before going back home. We worked Mr. Eldridge to take us to the show, but we were really sorry for it afterwards, for the show was a very bum affair.

J. F. Umphrey of Twin Falls was a short trip Buhl business visitor Thursday.

W. H. Aronstam and wife of Missouri registered at Hotel Buhl Friday. S. Dean Vincent of Chicago, Ill., was a Buhl business visitor Saturday. He was looking for land.

L. C. McNeil, a beef and shoe salesman of Portland, Ore., was doing business with our merchants Saturday, and inquiring for bargains in real estate.

W. H. Evans of Hagerman was visiting among his Buhl friends Saturday. K. D. Rose of Bustrow, Iowa, is registered at Hotel Buhl and looking for a piece of land on which to build himself a home.

Mr. A. Gould of Ogden spent a few days in Buhl last week on business.

D. W. Jenkins of Twin Falls came up from the Hub for a short business visit Monday.

J. H. Downing and J. E. O'Conner of Montpelier, Iowa, were among the landholders on this end of the tract last week.

The Odd Fellows purchased 40 acres of land from W. T. Berry, three quarters of a mile south of town, which they are going to clear off and use for a cemetery. It is desired to buy them to all persons desiring to buy them. The location is ideal for the purpose. It slopes to the southwest and is well drained. This was the last thing needed to furnish Buhl with all modern conveniences.

The county Sunday school convention will be held in Buhl some time in April. The date will be announced later.

The district capital association meeting held Saturday was largely attended. It was well crowded. Hon. Eugene H. Grubb of Carbonde, Colorado, who had been previously announced to make a talk on potatoes and how to raise them, was present and gave the talk. He imparted a vast amount of valuable information about the tuber, and showed its great importance as a bread stuff. He said that if the potato should fail for only one year in Europe, the people of that continent would starve to death in millions. He detailed the strenuous methods employed in the older coun-

tries for the preservation of this article of food. According to his statements, we do not know anything about the work necessary for the most fruitful, or indeed for any results, for with us they seem to grow no matter how they are treated, so that in America they may be said to grow and make fine crops without any labor at all. Any one who missed this talk missed more than he has any idea of. Mr. Grubb was accompanied by Joseph B. Hunt of Glenwood Springs, Colorado. Mr. Hunt is a wholesale dealer in farm products in Glenwood Springs and Aspen, Colorado.

The Buhl Schiltz club held its regular meeting Saturday night. The meeting was called to order by president, Jim Patton. The roll called showed that Ben Howard and Walter Lewis, two of the chief officers, were absent, which, according to the rules, made a special election of officers necessary. The following officers were elected: President, Jim Patton; secretary, A. A. Dimit; head cook, George Scott, second cook, A. A. Dimit; butler, Ed. Clark; head and water boy, Sam Beckel; general manager, Mr. McLaughlin. It was decided that the club's first outing of the season should be at the Scott-McLaughlin camp. No. 1, one mile north of town, Sunday, and to indulge in a chicken dinner instead of spending the day fishing and dining on trout. The members marched in a body to the camp and on their arrival found two big roosters done to a turn, and a gallon of oyster soup ready for the satisfaction of their concious appetites, and the manner in which they attacked the food should serve as a warning to those who had to do the cooking that they must be at

their best whenever they undertake to get up a meal for that crowd again. One of the members invited Jim Patton to supper with him in the evening, but Jim assumed that sunny smile of his and said: "I'll never want any more to eat, at least as long as I feel the same as I do now."

Pat Hall, the building contractor, of Twin Falls came in on the train yesterday to look over the schoolhouse site here for the purpose of making calculations for bidding for the contract for building it. He was accompanied by J. Oughton, a bricklayer and stonemason, who will also make calculations on the brick and stone work, and John T. Conroy of American Falls, a plumber and gas fitter, who will form an estimate on the plumbing. It looks as if the work on

the building is about to be commenced at last. From the work done by Mr. Hall on the tract in the last few years, it is evident that no better man could have the contract, and it is to be hoped that he and the school board can get together on the price.

Mr. and Mrs. M. D. L. Barstow went to Twin Falls Sunday and visited several days with Joe Day, brother of Mrs. Barstow.

Dr. T. O. Boyd of Twin Falls came up from that town yesterday on professional business.

Mesdames Baker and McAtee of Twin Falls are visiting with Mrs. Dr. D. P. Albee.

Mr. and Mrs. G. M. Davis were in town yesterday on business.

C. L. Evans was in from his ranch yesterday obtaining needed implements with which to begin spring work on the sage and stubble.

James Shields of Twin Falls spent

Sunday with his parents at the Burley ranch.

Mrs. Russ Alford, Mrs. J. H. Shields and Mrs. Nathan Shields were in Twin Falls Friday attending the debate between the Twin Falls high school and the Albion Normal.

Mr. and Miss Sherman entertained Wednesday evening at their home southwest of the city in honor of their sister, Miss Lizzie Sherman, who has recently come to Buhl.

Mr. Elison of Oakley was the guest of his son, Ross Elison, on Tuesday.

Dainty heart-shaped invitations have been issued by the Misses Hazel Alford and Irene Ford for a Valentine party Friday evening at the home of Miss Alford.

The Ladies' Aid society met with Miss Edith Milner last Saturday afternoon.

Dr. Shank and Miss Day Shank were Twin Falls visitors this week.

Dr. and Mrs. Albee and Master Joseph, returned Monday from Rock Creek where they were called by the illness of Mrs. Albee's father, Judge Hansen.
