

TWO "BAD MEN" DISTURB MILNER

ARE ROUNDED UP AND CHASED OUT OF TOWN.

Also Chastised for Their Unruly Conduct—Practical Joker Suffers Unexpected Immolation—Whereat His Victims Greatly Rejoice.

MILNER, Ida., Feb. 20.—The waste material being placed in the concrete wall in the North Side canal.

A large party of landseekers from Chicago and surrounding country is expected in Milner Friday morning en route to the Twin Falls North Side tract.

G. W. Hayes, the Milner nurseryman, is very busy grafting and preparing a great lot of fruit trees to set out on his farm in the first segregation. Mr. Hayes also has a number of trees for sale.

Milner is being improved by the addition of much needed sidewalks. George Wolden, D. O. Longenberger and the North Side company have all laid plank walks during the past week.

Messrs James Stephenson, Jr., state engineer, A. J. Wiley, consulting engineer, Paul E. A. Bickel, chief engineer and D. C. MacWhorter, general superintendent, yesterday completed inspection of the canal work just completed by the Farris-Keele Construction company. They report the work very satisfactory. Mr. Stephenson saying it was unusually good and substantial canal construction.

Two "bad men" from some where raised "cain" generally in Milner Tuesday night. They tried to break into the company house, but were stopped by Harry Strong. They are reported to have been seen and heard around a number of private residences; stole some clothes from a line in the rear of Frank Webb's residence; broke into the schoolhouse, where they built a fire and cooked their supper, and stole the teacher's clock. The next morning they were taken and taken before a temporary justice of the peace and given 30 minutes to leave the town, which they did after being beaten up "scandium" as punishment for their misdeeds.

Thayer Palmer was transacting business in Twin Falls, Wednesday afternoon.

The Ladies' Wednesday Afternoon club met yesterday with Mrs. H. R. Grant and after a very pleasant afternoon. They met next Wednesday with Mrs. George W. Hayes on Electric avenue.

Attorney General J. J. Guheen of Boise is in Milner attending to some business. He was a guest at the company house over night.

Mrs. L. M. Lucy of Twin Falls, who had been visiting Mrs. Ernest Thayer for several days, has returned to her home.

H. S. Martin spent Saturday and Sunday in Twin Falls, returning to Milner Monday morning.

Miss Lillian Bennett is visiting friends in Milner.

J. C. Beam has gone to Burley where he has a contract to do some painting for P. R. Kartze & Co.

Miss Genevieve Peterson visited friends in Heyburn Friday and Saturday and attended a dance there Friday evening.

Lorin Gallosy, who had been at home quite ill, has returned to Milner and resumed his duties in connection with the Milner dairy.

Landon Howard returned to Milner Wednesday afternoon after being absent for a week on the desert on some engineering work.

Scott Murray was transacting business in Twin Falls Monday afternoon. He was accompanied by his daughter, Miss Helen Murray, and Miss Marie Ryan.

Harry Applebaum made a business trip to Burley on Tuesday.

W. A. Morrisk of Salt Lake was transacting business in Milner Monday.

Miss Grace A. Klorsted returned from Twin Falls on Friday where she had been spending several days attending to some professional business.

F. Bickel, who has been in town several days this week transacting business.

F. F. Cockburn, one of Jerome's engineers, a young business man, was a guest at the company house over Sunday.

The Milner State Bank, Ltd., has issued a very neat and attractive stationery which makes a very good showing for such a young banking institution.

Sidney Strong of J. H. Henry's camp spent Sunday with his parents at the company house.

Mr. and Mrs. C. A. Brotherton of Steamboat Springs, Colo., who had been visiting their daughter, Mrs. C.

WOLVERINES TO BUILD BUNGALOW

ON THEIR FARM IN VICINITY OF JEROME.

Colonel Avery and Son of Jackson, Both Recent Arrivals from Michigan, Are Imbued With the True Twin Falls Spirit.

JEROME, Ida., Feb. 18.—Major Reed—Reed drove in from Milner Friday.

R. S. Cookinham spent several days in Boise last week.

J. M. Hale of the Twin Falls North Side Realty Co. was in Milner Thursday on business.

Chief Engineer Bicket came in Saturday evening, departing for Milner Sunday morning via camp No. 1.

F. R. Berry of the Cookinham corps of engineers left Sunday for his home in Idaho, going for a short visit.

J. B. Porfird passed through town Thursday en route to Twin Falls from Boise where he had been in attendance on the land hearing.

Mr. and Mrs. C. E. Edwards were in Twin Falls yesterday on Tuesday. Nick Smith has been in the Oakley district for several days, buying work stock and milk cows. Frank Lytle came up from Twin Falls to assist Mr. Smith in bringing over his string of horses.

Mrs. Keith has improved in health to such an extent that she was able to go to Twin Falls this week to visit her daughter. She contemplates a trip to Washington next week if her health will permit.

W. H. Barry has received his commission as a notary public and is now ready for business.

Mr. Knippson left last evening for his home in Colorado.

Joseph Nelson is some for a rest. He has a portion of his contract on the North Side to finish and when this is completed he expects to take a contract on the South Side Minidoka project.

The Wecker Lumber Co. shipped a consignment of lumber to Murtaugh this week.

Forest Ranger George Crockett was a stage passenger for Crook Creek on Wednesday.

Mrs. Moon of Twin Falls was a Hansen visitor this week.

Paul Keith has sold his wheat which was stored in the Kimberly warehouse. He received \$125 per hundredweight.

Dputy Sheriff Dyer passed through Hansen on Wednesday on official business.

Conductor George Marshall of the

W. H. Barry of Chicago, who has been in Wendell for the past two weeks overseeing the completion of clearing on a tract of 40 acres on his desert claim near town, made proof of labor in Shoshone Monday, for the first year's work.

C. O. Judge who purchased land recently five miles west of Wendell has left for the east from whence he will return in about two weeks with his effects for permanent residence.

Among the recent purchasers of land are Col. E. E. Avery, a prominent lumberman and his son, both of Jackson, Mich. These gentlemen were so favorably impressed with the Idaho climate and the immediate prospects for business activity on the North Side tract that they concluded to remain. They have sent out for their camp outfit and will set up camp on their land and improve their land. They have also arranged for the erection of a six room bungalow.

Geo. Dillich of Washington, North Carolina, is in town. Mr. Dillich is a man of experience in the timber and stone business and is looking over the situation with a view of opening a stone quarry near town.

NEW SETTLERS FROM PAYETTE

ARRIVE IN HANSEN WITH THEIR FAMILIES.

Serenaders Visit Mr. Babcock Who Insisted That Their Action Was Somewhat Previous—Now They Are Searching for Sympathy.

HANSEN, Ida., Feb. 20.—T. N. Williams arrived from Payette on Tuesday with his family and took possession of his new residence which he recently purchased from Harry Keith. His carload of effects, which was in charge of his sons, arrived the same day. The stock stood the journey in good shape, notwithstanding the long wait at Mindoca, waiting for the "crashopper" to get up steam for the next day's run. In Mr. Williams' car were some stock for Mr. Anderson, who also comes from the Payette district and who purchased the Nelson place at the same time Mr. Williams acquired the Kiltough farm. Mr. and Mrs. C. E. Edwards were in Twin Falls yesterday on Tuesday.

Nick Smith has been in the Oakley district for several days, buying work stock and milk cows. Frank Lytle came up from Twin Falls to assist Mr. Smith in bringing over his string of horses.

Mrs. Keith has improved in health to such an extent that she was able to go to Twin Falls this week to visit her daughter. She contemplates a trip to Washington next week if her health will permit.

KIMBERLY NEEDS LARGER SCHOOLS

IS IN ABOUT THE SAME FIX AS TWIN FALLS.

Both School Buildings Are Crowded—Pupils Number 420 and Are Constantly Increasing—Movement For Road to the Twin Falls.

KIMBERLY, Ida., Feb. 19.—W. N. Ross, the Hansen merchant, was here Tuesday.

"General land buyers" from Colorado and Iowa were in Kimberly this week.

August Behm from Pendleton, Oregon, has opened a barber shop in the west room of the drug store building and is expected to do a first class barber business. This will be quite a convenience to the citizens of this vicinity who have had to make a trip to Twin Falls or let their locks wave in the wind for the past winter.

Mrs. E. U. McIntire has been quite sick for some days past but is better now.

Professor C. F. Romig was a Rock Creek visitor Saturday.

C. W. Rice and Henry Larsen traded cows a few days ago.

E. W. Tilly's father is expected to start from Iowa for Kimberly on Tuesday of this week and will arrive about Friday. Mr. Tilly will have his family follow soon and bring a car of stock and household goods.

J. W. Hill was home from Milner the past few days. He still has work in construction camp on the north side and will rent his farm here this spring.

The Ladies' Pioneer club will meet with Mrs. Pringle this week.

J. H. Knapp sold a cow to H. A. Rowell for \$70.

W. C. Newby bought eight head of horses from the Twin Falls Land & Water Co. and has been selling them to the farmers around here. Professor Romig bought a team for \$175.

Mr. and Mrs. J. E. Henley decided to sell their 80 acre milk purchase of Kimberly to the party of David Lefferts of Illinois, price \$90 per acre. Mr. Plouzf is expected in about the first of March and will move on the place at once.

E. E. Blesemer, our village blacksmith, has sold his residence property in south Kimberly to J. H. McCay of Wenatchee, Oklahoma, for \$950. Mr. McCay's family will be very gladly to live in a few weeks. Mr. Blesemer has bought a lot from the Kimberly Township Co. near his shop in town. Such a move will be a relief to the place as the place is being hauled now and work will be pushed to completion in order to give possession to Mr. McCay.

W. H. Thayer ordered several telephones for local use in the Kimberly business houses, which will be installed at once. Poles for the power plant will be used for the present as far as they will permit. Farmers wishing to connect can obtain their poles from the mountains and by placing them by their own labor can secure a very cheap service.

Tilly's William is loading a car of wheat and shipping it from Hansen this week.

Professor C. F. Romig was a Rock Creek visitor Saturday.

C. W. Rice and Henry Larsen traded cows a few days ago.

E. W. Tilly's father is expected to start from Iowa for Kimberly on Tuesday of this week and will arrive about Friday. Mr. Tilly will have his family follow soon and bring a car of stock and household goods.

J. W. Hill was home from Milner the past few days. He still has work in construction camp on the north side and will rent his farm here this spring.

The Ladies' Pioneer club will meet with Mrs. Pringle this week.

J. H. Knapp sold a cow to H. A. Rowell for \$70.

W. C. Newby bought eight head of horses from the Twin Falls Land & Water Co. and has been selling them to the farmers around here. Professor Romig bought a team for \$175.

Mr. and Mrs. J. E. Henley decided to sell their 80 acre milk purchase of Kimberly to the party of David Lefferts of Illinois, price \$90 per acre. Mr. Plouzf is expected in about the first of March and will move on the place at once.

E. E. Blesemer, our village blacksmith, has sold his residence property in south Kimberly to J. H. McCay of Wenatchee, Oklahoma, for \$950. Mr. McCay's family will be very gladly to live in a few weeks. Mr. Blesemer has bought a lot from the Kimberly Township Co. near his shop in town. Such a move will be a relief to the place as the place is being hauled now and work will be pushed to completion in order to give possession to Mr. McCay.

W. H. Thayer ordered several telephones for local use in the Kimberly business houses, which will be installed at once. Poles for the power plant will be used for the present as far as they will permit. Farmers wishing to connect can obtain their poles from the mountains and by placing them by their own labor can secure a very cheap service.

Tilly's William is loading a car of wheat and shipping it from Hansen this week.

W. N. Ross, the Hansen merchant, was here Tuesday.

"General land buyers" from Colorado and Iowa were in Kimberly this week.

August Behm from Pendleton, Oregon, has opened a barber shop in the west room of the drug store building and is expected to do a first class barber business. This will be quite a convenience to the citizens of this vicinity who have had to make a trip to Twin Falls or let their locks wave in the wind for the past winter.

Mrs. E. U. McIntire has been quite sick for some days past but is better now.

COST OF COOKING BY ELECTRICITY

5 1/2c PER DAY PER PERSON

THE FOLLOWING IS A COPY OF A LETTER, WHICH SPEAKS FOR ITSELF:

Portland Ry. Light & Power Co. Portland, Oregon, August 26, 1907. Gentlemen: In reply to your request for a statement of how much it costs me to cook by electricity...

Call at our office and see electric cooking utensils in operation. Everybody invited.

Great Shoshone & Twin Falls Water Power Co.

CAREY ACT HOMES CHOICE IRRIGATED LANDS

50,000 acres open for original entry under the Canal System of the Twin Falls North Side Land & Water Co.

These lands are unsurpassed for the growth of fruits of all kinds, as shown by orchards which have been bearing for a number of years.

They are especially suited for winter apples. Likewise grains and grasses.

Perpetual water rights \$35 an acre, payable, \$3 down, balance in installments covering a period of ten years with interest at 6 per cent.

ELECTRIC RAILWAY PROJECTED THROUGH ENTIRE TRACT. ABUNDANT FLOW OF CLEAR WHOLESOME SPRING WATER OBTAINABLE WHEREVER WELLS HAVE BEEN DRILLED.

FOR PARTICULARS ADDRESS TWIN FALLS NORTH SIDE INVESTMENT COMPANY

IDAHO, THE LAND OF OPPORTUNITY

WHAT IT OFFERS THE INVESTOR AND HOMEBEEKER.

Splendid Description of the State's Resources and Development, With Special Reference to the Great Twin Falls Project.

(Fred Lockley in the Pacific Monthly)

Of Idaho's 84,600 square miles about one-third consists of timber and mineral land, while the remaining two-thirds consist of pasture and agricultural land.

Rich in Idaho in minerals, extensive as are her forests, numerous as her undeveloped resources, the time is coming for it to be developed, when the most potent factor in her development will be the use of her river resources.

Shoshone falls, American falls, Twin falls, not to mention a score of lesser falls, can develop sufficient power to make of Idaho one of the leading manufacturing states in the Union, and that is but one use of the water; the other, and what is destined to be of even more importance, is the use of irrigation in reclaiming her one-time vast deserts.

Already in the west an area equal to one-third of the entire cotton area of the United States is under irrigation. By the close of this year, of 1908, at least 16,000,000 acres of land will be under irrigation in the western states, with an estimated crop value of \$2,000,000,000.

The creation of the Carey act has proved wonderfully beneficial to Idaho and she was one of the first states to take advantage of the provisions of this act. In brief, the Carey act allows the construction of extensive irrigation works for the redemption of any given tract of land, the cost being prorated to the area covered. The land is sold by the state, the purchaser for 50 cents an acre with a further sum varying from \$20 to \$30 an acre for a perpetual water right. The construction of the work is under the supervision of the state engineer. Any citizen of the United States may purchase 160 acres of land under this act, 25 cents per acre being paid at the time of selecting and the remaining 25 cents per acre when the final proof is made, which proof may be made when not less than one-eighth of the land is under cultivation, while payments for the water are made in 10 annual installments.

Idaho has 7,656,593 acres now under irrigation, and almost double that amount of land that is susceptible of irrigation.

When one learns that over 9000 miles of canals and ditches have been constructed at a cost exceeding \$20,000,000, the extent of the irrigation movement in Idaho is realized.

In Bingham county alone, 758,940 acres are under canals and of the immense area 458,220 acres are already being irrigated, making this county exceed in its area of irrigated land any other single county in the state or in the west.

In the northern part of the state irrigation is but little practiced, as mining and lumbering are the principal industries. In Latah, Idaho and Nez Perce counties, where raising is carried on on a vast scale, the prosperous city of Moscow being supported very largely by the wheat-raising industry, there being in these three counties approximately 1,270,000 acres under cultivation.

Government Work

Idaho has 13 Carey act projects and two government-reclamation projects, one of which is at Mindokia and which will reclaim 80,000 acres, and the other, the Belle-Travette project, which will eventually reclaim 372,000 acres, the cost for the two projects being \$11,000,000. In addition to this gravity system at Mindokia, the government is also planning the reclamation of 70,000 acres on the south side of the Snake river by a pumping system, which is the first attempt to irrigate on such an extensive scale in this manner.

Carey Act Projects

Idaho holds first place among the western states in the amount of her irrigated land and land open to settlement. Her 13 Carey act projects embrace 836,500 acres, and the two government projects 522,000 acres. She has the greatest acreage of any state under the Carey act and, with the exception of Montana, she has reclaimed more land under government reclamation than any other state.

Aside from the Carey act projects, under which are 513,000 acres of land available for settlement, there are numerous private concerns of such merit that have for sale government or state land in quantities ranging from 500 to 3,000 acres. In addition to these there are not less than 3,000,000 acres in the arid portions of the state susceptible of irrigation, land which with water would prove wonderfully productive. At least 100,000 acres of this arid land is now being farmed and is producing good crops by the "dry-farming" system.

Utah and Nevada have not as yet any Carey act projects. Wyoming leads with the largest number, having 26, but though Wyoming has twice as many as Idaho, the latter state has 186,500 more acres under her 13 projects. Colorado has three, Montana three and Oregon three. About 100,000 acres of Idaho's arid land is subject to homestead entry and by the use of dry-farming will produce from 20 bushels to 35 bushels of wheat per acre. The subject of dry-farming is too extensive to be discussed in this brief article, but those who are interested in the subject may secure valu-

able information by addressing the Idaho Agricultural College.

Idaho's Rich Soil. Idaho, like eastern Oregon and eastern Washington, has a wonderfully rich soil. It is formed by the distinct segregation of the Columbia river silt, or basalt rock, which is mixed with the lava dust which fell in great showers over the whole country ages ago, has formed a soil of marvelous fertility. An analysis of the soil shows: Silica, 68.90 per cent; alumina, 14.43 per cent; ferric oxide, 1.17 per cent; ferrous oxide, 1.23 per cent; sodium oxide, 5.08 per cent; potassium oxide, 0.25 per cent, with small amounts or more traces of 11 other constituents.

The principal agricultural lands in Idaho are in the valleys of the rivers and streams, especially along the Snake river, and in the valleys of the Blue, the Payette, the Teton, Little and Big Woods, Teton, Blackfoot, Portneuf, Salmon, Rock Creek, Willoughby, Bruneau, as well as Long Valley, Bear Valley, Lost River, Blaine and the Snake river valley. These are in the southern part of the state. In the northern and central part of the state excellent farm lands are to be found on the Salmon and Clearwater, the Balmain, St. Maries, St. Joseph, the Cedar, d'Alene, the Spokane, the Priest and also in Kootenai valley, Nez Perce prairie, Camas prairie, St. Joe and Doumenet plains and throughout the famous Palouse country.

Great Yields

I think it was our old friend Herodotus who, when he had come back from a visit to the irrigated country along the Nile said he was made up of all of the immense crops raised there for fear his friends would think he had lost his ability to tell the truth. A person who attends to the productivity of irrigated Idaho meets with similar disbelief. I will not tell of wheat yields of 63 bushels to the acre because, while it is true, still the usual yield will run from 35 bushels to 45 bushels to the acre.

I have in mind a field of sugar beets which received five irrigations between May and August, amounting to 26 and a third inches of water (in addition it received four and seventy-hundredths inches of rainfall) and yielded 23 1/2 tons to the acre. The average yield per acre for the state during the year 1906 was 11 and 1/4 tons of sugar beets. There are 1450 farmers growing sugar beets in Idaho and they cultivate 2,000 acres of beets. The 1906 crop amounted to 234,000 tons, which was converted into 64,000,000 pounds of refined sugar worth \$2,880,000. There are four sugar-beet factories in the state, located at the following places: Latah, Idaho Falls, Sugar City, Blackfoot and Nampa. At \$4.50 a ton, with an average yield of over 13 tons, the value of the beet crop for last year was a trifle more than \$50 a acre.

Livestock

I do not happen to have the figures of the value of Idaho's livestock, but I am going to quote just one instance of the possibility of success in the raising of livestock. In talking with Professor H. T. French, of the Idaho Agricultural college, a few days ago I asked him what crop had proved the most profitable on his farm. (In this connection it is interesting to note the rising value of Idaho farming land.) Five years ago when Professor French bought his farm near Moscow he paid what was considered a good price. The farm consisted of 363 acres of land and he paid \$29 an acre. He sold it a few weeks ago and received \$45 an acre. In answer to my question Professor French said: "Sheep have been my most profitable crop. Three years ago in April I sowed a mixed lot of grade merinos for \$17.75. In July of the year I sold the flock for \$78.50. There were 221 head, 102 of which were spring lambs, for which I was paid \$4.10 each. During the winter I kept sheep 1-1/2 acres a thousand dollars worth of lambs, mutton and wool. For two or three months each winter I fed them alfalfa, the rest of the time they were on the range as they were little or no expense, and yet during three years I received almost \$2000 more than the original investment."

I have visited the districts about Weiser, Payette, Mountainhome, Shoshone, Twin Falls, American Falls, Idaho Falls, the upper Snake river valley near Rexburg and St. Anthony, as well as Pocatello, Boise, Caldwell, Nampa and a score of other places, and it is hard to say "this is the best district" or "that is the best district". In fact, a person will not go very far away in settling in any of these districts. The land is fertile and if a person is industrious and has a fair amount of intelligence and some of that very uncommon quality improperly termed common sense, he will make a success in any one of these districts.

Irrigation Methods

In most new districts alfalfa is the principal crop because it brings an immediate and satisfactory return. In most of the Idaho irrigated districts the furrow system of irrigation is used, though here and there one sees the check system being used to advantage.

Let us suppose you have just come upon the raw sagebrush land and want to put in some alfalfa. Here is about what it would cost you. If you hire your land cleared it will cost \$5 an acre, though if you clear it yourself it will cost somewhat less. Now you have the acreage cleared and stacked by your back door for fuel you must next plow the land, this will cost \$2.50 an acre; the leveling will cost you about 50 cents an acre—unless you find it rough, when it will cost more—but 50 cents is a fair average; the ditching not less than a dollar an acre, seeding \$2.50, furrowing \$2.50, and the cost of irrigating three times during the season and harvesting about \$2.30. You will probably get from one to two tons of alfalfa. The second year, all of the preliminary work done, you will have to spend about 25 cents an acre repairing your ditches, \$1.50 for three irrigations (Continued on Page 6.)

Reliable information regarding the city and county generally and especially furnished.
Address all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter December 2, 1902, at the postoffice at Twin Falls, Idaho, under the Act of Congress of March 3, 1879.

The effort which is now being made to organize a building and loan association in Twin Falls merits the hearty support of all who are interested in the welfare of the community.

The movement is worthy and it should meet with unanimous approval. In this connection, however, it should be recalled that the Twin Falls Building & Loan association was organized and incorporated about two years ago with a capital stock of one million dollars.

Shares were sold and those who invested would like to know what became of the money. Before this new organization is perfected, it might be well to investigate the old one and see how it stands.

A large number of citizens are interested and prudence suggests the use of the probe. Those who put their money in the association have a right to an accounting and they should have it before the new organization is formed.

The association should never have been allowed to languish. There is not a vacant house in Twin Falls today and there is demand for not less than 50 residences.

The lovers of the national game are endeavoring to secure permanent baseball grounds for Twin Falls and their efforts should be emphatically seconded.

The Twin Falls club has been a credit to the city during the three years of its existence, yet it has never had half decent grounds. The time to secure athletic grounds is right now.

Had the fair-association thought grounds when the purchase was first suggested more than a year ago, it would have secured desirable property for less than one-half of its present value.

The price of land in Twin Falls and vicinity will never be as low as it is at present. While it might be a difficult matter now to raise sufficient funds to buy a tract large enough for the future, it is quite possible to make such arrangements as would engage the ground for the purpose intended and hold it until the proposition can be financed.

In any event grounds must be secured and the most economical way is to buy and buy now.

Approximately \$3500 has been subscribed for the construction of a bridge across Rock creek on the range line between ranges also and 10'. The building of this bridge would be of great benefit to a large and closely settled tract which is now divided by a deep canyon.

A bridge can be erected on this range line cheaper than at any other point and the location could not be more convenient. Residents of Sucker flat and those living between the flat and Rock creek have to travel by way of Twin Falls if they wish to visit Shoshone falls or Blue lakes, which they frequently do during the summer months.

The building of the bridge would greatly improve the road between Twin Falls and Buhl and would be a distinct and permanent benefit in every way.

A teacher in the Twin Falls school was about to explain to her pupils why the anniversary of Washington's birthday is celebrated as a holiday and by way of preface she asked the class the question: "Who was the father of his country?"

The children hesitated. Finally a bright youngster held up his hand. "All right, Johnny," said the teacher. "You may tell the rest of the class who was the father of his country." "Joseph Smith," blurted the youngster.

Another Twin Falls teacher had in her class a boy who was evidently not addicted to the use of soap and water. She gave the boy a note for his mother in which she requested that the boy be tidied. Next day the boy brought back the curt reply: "Teach him, don't smell him!"

WATER PLAIN ON THE NORTH SIDE

BEING THOROUGHLY DEVELOPED BY WELLS.

Eight Wells Have Been Drilled in All of Which Excellent Water Has Been Struck at Depths Varying From 150 to 355 Feet.

It may be of a great deal of interest to the people of the Twin Falls tract, and especially the "Dick Lowe" tract, to know that a great deal has been accomplished in the way of making it certain that well water of the finest quality can be secured at a greater or less depth on the North Side tract.

There have been eight wells drilled on the North Side since March of last year in the following locations:

Well No. 1 is a Domestic Artesian well in section 16, township 8 S., range 18. This well is just east of the high ground known as Sugar Loaf butte.

Well No. 2 is at Jerome townsite, a well about 40 feet above the main part of the townsite and furnishes all the good pure water that can be drawn through the pipe by any power that may be applied to it.

In fact, the water is so abundant that there never can be any question about a water supply at Jerome, providing enough power is used to raise the water.

Well No. 3 is near Wilson lake, which is north of what is commonly called Skelton butte in the first section of the North Side tract.

Well No. 4 is two miles west of Well No. 3.

Well No. 5 is four miles west of Well No. 4.

Another well has been drilled just north of Sugar Loaf butte by Newman Bros., sheepmen, who have sunk the well for their own convenience and are now using water from same.

The eighth well has been drilled by Samuel Grant on his desert claim which he has taken up in section 17, township 9 S., range 18. This well was just a venture on Mr. Grant's part to test the possibility of getting water on his land.

He found it was a very easy matter, striking water at 160 feet. The most of this 160 feet was through lava, but the strange thing was that it was so abundant that any one can see that if a man would put down a shaft to this depth it would not be a very expensive matter after all.

Below are the approximate elevations and depths of the different wells.

Well No. 1. Grant's camp, elevation 3880 feet, water surface 3597 feet.

Newman well, elevation 3555 feet, water surface 3520 feet.

Well No. 2. Jerome, elevation 3770 feet, water surface 3483 feet.

Well No. 3. Wendell, elevation 3900 feet, water surface 3225 feet.

Well No. 4. Wilson lake, elevation 3950 feet, water surface 3695 feet.

Well No. 5. J. H. Heyer's camp, elevation 3894 feet, water surface 3600 feet.

Well No. 6. Four miles west of No. 5, elevation 3912 feet, water surface 3640 feet.

Well No. 7. 17-18, Grant's land, elevation 3765 feet, water surface 3615 feet.

Any one interested in desiring any further information can secure it by writing to the engineer of the Twin Falls North Side tract, who will be pleased to encourage anyone in this work.

It will be observed from the different elevations that the wells range from 160 to 347 feet. The well at Jerome is the deepest well the company has, which is 347 feet.

At No. 4, a well farther north is 355 feet, which is the deepest well on the tract. The Wendell well is only 200 feet, whereas the wells farther east are 250 feet or near that.

The fact that the water is so abundant in every instance. Every time a well has been drilled it has been a success. Apparently, these bodies of water lay in slowly moving large underground lakes. It is possible they are fed by water coming from the upper Snake river or from the Lost river.

Notice for Publication—Final Proof. Charles W. Pierce, of Twin Falls, Idaho, who made entry No. 37 under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey act," approved March 2nd, 1899, which embraces NW 1/4 of NE 1/4 of section 16, of township 10 S., of range 18, E. B. M., do hereby give notice of my intention to make final proof to establish title to said land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before E. B. Williams, J. A. Twin Falls, Idaho, on the 21st day of March, 1908, by two of the following witnesses: E. F. Cozzens, M. P. Swan of Hansen, and Charles E. Swan of Kimberly.

CHARLES W. PIERCE, Entryman. A snap 160 acres 6 1/2 miles from Twin Falls for sale. Address Box 62, Twin Falls.

Coming Again. Dr. Drake, the eye man of Boise, will be at the Shodor Apartments, Twin Falls, Feb. 25th to the 29th. Miller, March 2 and 3. Burley, March 4. Albion, March 5. See him for eye glasses. Regular trips every three months. A safe and conspicuous service at a reasonable price. Your old eyes are fed by any lens duplicated. All work guaranteed.

Better see C. O. Moyle about that Hooser Drill.

Another Twin Falls teacher had in her class a boy who was evidently not addicted to the use of soap and water. She gave the boy a note for his mother in which she requested that the boy be tidied. Next day the boy brought back the curt reply: "Teach him, don't smell him!"

How to Pay for Your Farm Out of the First Year's Crop.

PLANT "DICK LOWE" WHEAT

The "Dick Lowe" wheat came from Shiora. Mr. Lowe received a very small quantity, planted same in his garden, and from that source got the seed started. Our entire crop was all on our cash crop. Mr. Filer was all of the "Dick Lowe" variety, clean, and free from all obnoxious weeds of any kind.

Where planted on the new ground it averaged sixty bushels to the acre. Mr. Grant, our near neighbor there, got his seed from us the year previous. We both sold our entire crop raised for the season of 1907 to the Milner-Perkins company of Buhl, Idaho, expressly for seed, at an advanced price.

We heartily recommend this wheat to all farmers as being superior to any other wheat known for fall or spring planting on our soil.

Hyde, Kelsey & Ward, Springville, Utah.

Springville, Utah, Sept. 20, 1907. To Whom It May Concern:

We, the undersigned farmers of Springville, Utah, have for a number of years planted "Dick Lowe" wheat in the month of September, beginning about the 15th and continuing until the last of the month, as a fall wheat. We averaged from sixty to seventy-five bushels per acre when properly cared for. We would recommend in case of dry season that the land be watered before plowing to insure a better crop.

We highly recommend this wheat to all farmers as the best all around wheat known.

G. B. Allan, Stronger, Utah. C. H. Hutchings, Bliss, Hutchings.

Springville, Utah, Sept. 21, 1907. To Whom It May Concern:

I, Joseph Vane, a farmer of Springville, Utah, county, Utah, furnished to Hyde & Kelsey in February, 1908, eighty bushels of the "Dick Lowe" wheat, which they planted on their farm near Filer in April and May the same year and from which seed the Twin Falls Experimental Farm received its seed.

I have used this wheat on my farm for a number of years, sowing in the spring receiving the following results: A general average of seventy-eight bushels per acre; in 1904, eighty-one and one-half bushels per acre, machine measure, the same over-running six pounds per bushel in actual weight.

I heartily recommend this wheat to all farmers as the best all around wheat used, and will mature with less water than any other irrigated wheat.

Yours truly, Jos. Vane.

Spanish Fork, Utah, Sept. 19, 1907. As manager of the Gen'l. Miller Mills of Spanish Fork, I desire to certify that the "Dick Lowe" wheat which is raised in Utah county, and is in general favor with the farmers, is a better than any other wheat well to the acre, and for milling purposes it is par excellent. The quality of the flour from the "Dick Lowe" wheat is first class, producing a very strong flour and white as snow. I take great pleasure in recommending the "Dick Lowe" wheat both to farmers and millers.

James L. Hales, Manager, Gem Roller Mills. Springville, Utah, Sept. 17, 1907. "Dick Lowe" wheat. It is a good yielder to the acre and for milling purposes it cannot be duplicated, as it produces more flour per bushel than any other wheat. The quality of the flour from the "Dick Lowe" wheat is first class, as it is a strong flour and very white; therefore I take pleasure in recommending the same.

Springville Flouring Mills. For John S. Smith, Mgr.

The Milner-Perkins Lumber Co. Ltd., Buhl, Ida., still have a limited amount of the pure "Dick Lowe" seed wheat on hand to dispose of, which has been carefully cleaned by hand through the fanning mill, and is in first class condition.

Notice of Dissolution. The firm of Woods, Evans & Thomas has been dissolved, partnership between Evans will continue the business under his name, he having purchased the entire insurance business and the accounts against Woods, Evans & Thomas will be deposited with C. E. Evans and will be paid by the old firm of Woods, Evans & Thomas. All accounts due Woods, Evans & Thomas up to February 6th may be paid to any one of the three members who are hereby authorized to give receipt for same.

T. J. WOODS, C. E. EVANS, C. D. THOMAS.

FOR SERVICE—Thoroughbred Durham bull, 3 years old, service 32. S. B. Camp, 1 1/2 miles south, 1/2 mile east of the southeast corner of Twin Falls.

gations and not less than \$10 per acre for harvesting your crop, which will be not less than six tons and probably more. It should not cost you to exceed \$12.60 an acre; you will harvest six or seven tons, which you can sell at from \$15 a ton; to be on the safe side say you receive only \$12 an acre for your second year's crop, then you have cleared \$37.60 per acre. I am putting this very low and more farmers will go above these figures than below.

Crop Assurance.

The irrigation farmer not only has crop assurance, but he has in addition another equally important advantage over the farmer who depends upon the rainfall. He regulates his rainfall with natural precipitation not more than a certain number of plants can be successfully grown, as they exhaust the soil moisture, while with irrigation no such handicap exists. There need be no conservation of the soil moisture; every plant may have all it needs for its perfect growth and development. Not only may more plants to the acre be grown, but the irrigation farmer has a decided advantage in the quality of the water he uses. He is not only moistening his soil, he is fertilizing and enriching it, for the water from his irrigation ditch, flowing through the rich residual soil, has in solution lime and potash and other phosphates with a variety of salts which are utilized by the growing plants. For example, take alfalfa; the water rich in phosphates stimulates its growth, the nitrogenous matter lying on the roots of the alfalfa plants have the power of changing the nitrogen in the soil air into soluble nitrates which are among the most essential elements of plant food. The stems and falling leaves of the alfalfa and other humus to the soil, so frequently the alfalfa is constantly enriching the soil instead of depleting its strength.

Twin Falls Enterprise.
What irrigation can do for a site just one instance, may be seen in what is now Twin Falls county. Three years ago this was desert with a population not to exceed 300 people; today the same territory has a population of over 10,000 people. There are more than 1500 farms with at least 100,000 acres being cultivated. There are 10 towns in the county, one of which, Twin Falls, has a population of 3000 people.

While on the train recently I was looking with much interest at a fine field of standing grain immediately adjoining a field of sagebrush. My seat-mate, a middle-aged woman, noting my interest, began telling me something about the district through which we were passing. My seat-mate here two years ago. He bought 80 acres of Carey act land, and as both my husband and myself were in miserable health, we decided to come out to Idaho. Our home was near Topeka, where we had a little farm. I was terribly disappointed when I first came out. My son got a job, and as we needed the money, he took it and left on the train. My husband began to get better, and having been raised on a farm, I couldn't bear to look out and see that land lying bare. My husband was still sick and could not work. I hired four horses and a gang-plow and I broke 50 acres of the raw sagebrush land. I put 21 acres in wheat, planting it in April. I had it harvested and turned the wheat on it so as to prepare for plowing in the fall. The water stimulated the growth of the stubble, and in October I sold the wheat hay on 21 acres for \$10 an acre. My husband had never seen anything like that before and I began to think Idaho was a pretty good state. A little while after that a man came along and offered my husband \$100 more than we had paid for the place, but my husband thought that was making money so fast that we had better sell, so we sold. We went back to Topeka. When we had been back in Kansas for about six weeks my husband came to me and said, "I guess we made a mistake in coming back. I don't like it as well as I thought I was going to. Let's go back to Idaho." So here we are and we are going to buy an 80-acre farm and stay here this time.

A Wonderful Stream.
The recent report of the geologist to leave his own state in search of striking scenery. Rising in the Yellowstone Park, the Snake river twists and turns for 1300 miles in its sinuous course before it empties its waters with those of the Columbia river. More than a thousand of these sinuous miles are in Idaho and one may find a wonderful variety of scenery along its snake-like course. Along its upper reaches it flows through a broad and beautiful valley, where green and fertile acres line its banks. Further along it has torn its way through the lava formation and one looks down on the river far below, a gray green ribbon between its deeply-cut lava walls or as stretches of rapids like tiny whirls of ice against the somber background of fire-formed and water-worn rock.

Scenic Beauty.
Shoshone falls where the river drops over 200 feet, is worth a trip across the continent and in time will be recognized as one of the beauty spots of the world. The Thousand Springs in Lincoln, where the Lost River, after a subterranean course of 150 miles, reappears and in the form of a thousand springs gushing from the rock, joins the Snake river. Blue lakes and the famous Perrine ranch on the Snake river. The rugged and picturesque Seven Devils range of mountains and the no less interesting Sawtooth range with beautiful Red Fish lake at their base. Alturna lake, Payette lake, Little Salmon falls, The Coeur d'Alene lake in northern Idaho, with a length of 25 miles. The Snake river with its stream-like beauty and its 40 miles of shadows. Lake Pend d'Oreille, near the British Columbia border. Beautiful Hayden lake, the Snake river, Shoshone, The treacherous Swiftwater, with its continuous succession of rapids and its gam cut-throat trout flowing through a perfect wonderland

of beauty. The miles and miles of unbroken cedar and evergreen woods, Surely one who loves nature and his wilder moods can find perennial joy in Idaho.

Land of Opportunity.

The state is full of opportunity, not only to the homeseeker, but to the investor. The land of opportunity is crowding the sagebrush back further and further, villages are becoming towns, prosperous cities-in-springs are being located, where the water power is abundant. In a few years the hum of the factories will be heard, and instead of sending the raw material to the eastern states it will be converted into the finished product where it is produced. Cities like Caldwell, Nampa and Boise are beginning to realize the wonderful possibilities of electric and interurban systems of transportation, and wherever the electric line for electric trolley springs up along their route and orchards and gardens supplant the sagebrush. With the wonderful power possibilities of the Snake river at its various falls, it will be only a few years till Idaho's irrigated districts will be a network of interurban lines, radiating from the cities along the main lines of the state.

The spirit of optimism in the irrigated country gets in one's blood, and without intending it one becomes a "booster" for the country. As an exact and true reporting matter over the state, take the Snake river. A year ago the sagebrush stretched unbroken from the north side of the railroad track at a little station called American Falls, which takes its name from the picturesque 140-foot falls on the Snake river nearby. Today cement walks, shade trees, modern brick and stone buildings are scattered along the river, a distance which a year ago, remember, was an unbroken stretch of sagebrush.

Last fall I stopped off at American Falls between trains to look around. I ran across one of the promoters of the town. "Come down and see our new \$30,000 hotel," he said. We walked down the road, which was being graded, till we came to a long stretch of wide cement sidewalks, which surprised me in surprise to the walk and said: "Isn't this cement sidewalk, lost out here?" "Oh, no, it's along the main street and when the stores go up they will not have to wait for water, sidewalks and other such conveniences." We walked to the new hotel, a splendid structure by the way, and one that looks as if it were designed for a town of 10,000 people in place of one with less than one-tenth that number. My guide pointed down the river and said: "That island down there in the Snake river will be our park. We have reserved this square for the courthouse." "Hold on," I said, "the county seat of this county is at Malheur City. Are you going to move the county seat?" "No, sir. We are going to make a new county. We only lacked one vote of forming the new county at the last session of the legislature. You must use your imagination, we will in six months ago when I told the old-timers we were going to make a city here they just laughed. When I told them we were going to have modern department stores, hardware store, bank, big hotel and all the rest that you see here, they were scornful. They offered to be, we would never have plans drawn for a \$70,000 hotel. When they saw the plans they wanted to bet two to one, that it was just a bluff to sell real estate; when the hotel went up and paid from the start they were finally silenced. With our 60,000 horsepower here we are bound to make a town. Do you know we have one of the best water systems in the world. We've enough water in our artesian springs to supply a town of 20,000 people. Come down and see it." But I told myself away: "I was afraid if I stayed with him I would not be able to leave without buying some lots. Afterwards I was sorry I didn't, for they have doubled in value since. Well, this is just a sample of the new Idaho spirit."

Someone has said, "and of no place is it truer than Idaho." "I am the plains-barren since time began." "Yes do I dream of motherhood, when man One day at last—ah! look upon my charms And give his towns-like children for my arms."

The two river plains are dotted with towns nor is the reason far to seek. With 300 days of sunshine each year, with a mild and pleasant climate, with an immense area of desirable land, with a fertile and productive soil, with a sure reward for intelligently-applied labor, the land-hunger of the Anglo-Saxon will soon make of the Idaho desert a land of beauty and prosperity in place of a waste. Soon the desert will be but a memory.

FILER STATE BANK
Issues certificates of deposit payable on demand at any time, but if left for a stated length of time will draw interest at the rate of 4 per cent per annum.
A progressive, yet conservative banking business transacted.
Officers and Directors:

Twin Falls Investment Co.
LIMITED
Sole Agents for Water Rights for all Carey Act Lands under the
GREAT TWIN FALLS CANAL SYSTEM

25,000 Acres of Carey Act Land
Still open for original entry under this Canal System
Land, 50 cents per acre. Perpetual water rights, \$25 per acre, ten annual payments.
Vehicles from Buhl furnished free to those who desire to inspect land. Prospective entrymen accompanied by competent locators.

BUHL
Buhl, located 17 miles west of the City of Twin Falls is the leading city on the west end of the tract and the distributing point for a large area, including the stock districts of Three Creek, Butte and Roseworth, likewise the farming and fruit growing districts of Magraman, Kanoka Flat and Salmon. The railway track is now completed between Twin Falls and Buhl, and train service has begun. Buhl has a splendid gravity system of waterworks, with a pressure of 100 pounds in the business section. It will soon be supplied with electric power and light. Business property values in Twin Falls have increased 500 per cent in less than two years. The same opportunities for investment are presented at Buhl. Now is the time to buy. Write for literature and further information.

DESCRIPTION OF TWIN FALLS SOIL

BY ROBERT N. BELL, STATE MINE INSPECTOR.

Indications That Twin Falls Tract Was Once a Lake Bed, Basalt Being Much Younger Than the Columbia River Lava Further West.

(From the 1907 Report of the State Inspector of Mines.)

Twin Falls county, which was created by the last session of the legislature from the western portion of Cassia county, made a shipment of gold amounting to a little over \$2000 last year. Its source, if derived within the present boundaries of the county, was probably from the operation of the Snake river lava soil drainage. Aside from this source of precious values, the possible metallic resources of the new county are limited to the mountain slopes south of the

big irrigating enterprises, where some excellent gold-bearing ore has been discovered that may ultimately lead to the development of minable deposits. I have never examined the western extension of the Goose creek lignite fields, but have no doubt that considerable portions of them are in the present area of the new county, and with intelligent prospect work may find a source of good lignite that would be useful for domestic purposes. The agricultural resources of this new division of territory are probably unexcelled in area and ultimate real estate possibilities and values by those of any other county in the state as they embrace nearly half a million acres of low land, half of which is now under water and the subject of the balance well under way. These include the present enterprises of the Twin Falls Land & Water company and the Salmon river project. The Twin Falls tract has seen a wonderful transformation, from sagebrush to productive farms in the brief period of three years, and with the new adjoining Salmon river tract should, within a few years, make Twin Falls the most productive agricultural county in the state. The yield of last season of over 600,000 bushels of grain and 100,000 tons of hay, so shortly after its original desert con-

dition, is simply an earnest of what the future holds in store for the development of productive possibilities. This enterprise, together with the North Side Twin Falls enterprises, are extremely fortunate in falling into agricultural lands, and it seems likely that the territory will soon be extensively developed with electric railway transportation, with a southern extension to the Snake river, which will give the tract a cash market for its products that will probably equal Butte, Montana, in population and requirements within a very few years. The agricultural enterprises which would also develop some fine mineral territory between the two points, besides giving another transcontinental railway connection. The whole west is growing so rapidly in other lines, as well as in agricultural enterprises, that there is hardly any likelihood of lack of market which will doubtless develop and extend to the eastward. The resources of the tract, if diversified farming is followed. The topographical and geological features of the extensive tracts of rich agriculture land are of general interest and valuable nature and insure its successful development and rapidly increasing value. The Twin Falls North and South Side tracts, and the adjacent Salmon river tract, are situated between the east coast to west, by a natural drainage slope in the form of a profound box canyon, from 100 to 200 feet deep, the walls of which are built of a succession of volcanic rocks, including bordering plateaus, soil covered to a depth of from 1 to 20 feet, whose surface aspect presents a succession of low undulating swells, with a general tendency to the west. The soil is shallow, infertile, and grows which afford the most perfect natural drainage possible. This condition of the soil increases the difficulty of a general soil-irrigated or seceded land, and presents ideal conditions for obtaining the maximum results in distributing water. The soil of this region is of a nature peculiar to the tertiary lava fields of this and adjacent states. It is not a residual soil due to the gradual decay of the underlying basalt, which, in this instance, is of very recent origin and much younger than the brown Columbia river lava further west, but is probably of local plutonic origin. Under irrigation it has proven to be of remarkable fertility and probably designated as volcanic due to the numerous crater cones that dot the surrounding Snake river plains, and has subsequently been modified in its distribution by wind and water action. Between the soil and actual bed rock the land carries a layer of white travertine of lime tuffa, locally called hard pan, which generally rests immediately on the lava bed-rock surface. This hard pan, however, when saturated with the water of irrigation, is able to delicate plant roots. Its simple composition of nearly pure lime carbonate, combined with a small amount of alkaline pervasiveness. Its origin is doubtless due to precipitation from the numerous hot springs that followed the most recent lava flows under the soil. The entire process is in progress today, and the same kind of travertine being deposited from warm springs of lime water now flowing to the surface at a point on a smaller plateau four miles west of American Falls. The soil of this tract is of a gray brown color, and of very fine grain, so much so that about 80 per cent of it passes through a 20-mesh sieve. In spite of its fineness, however, it has a loose sandy nature all through and does not bake. Its analysis gives a remarkable array of elements, rich in the basic salts of vegetation, and so closely follows the complex composition of the underlying lava in the variety of its component elements as to practically exclude its identity. This soil gives astonishing results in the production of alfalfa, whose well known virtue of fixing nitrogen from the air affords a natural means of fertilizing and a gradual means of impoverishment by proper rotation of crops. These extensive tracts of land under canal lines are not, of course, all clear, and in some areas considerable patches of surface rock occur. These are not such a serious detriment, however, as to ruin the value of the land, for it has been proven that in most instances these rocks are simply surface flows of flat basalt and are generally underlain with a good depth of rich soil, and while these rock patches doubtless form an objectionable feature, the fact still remains, that when they are cleaned off, valuable and productive areas of deep soil are available, and not a bare waste of bedrock. The origin of these patches of surface rock is an interesting problem. Some authorities have argued that the soil of the whole tract is of wind blown origin from the adjacent mountain slopes. This seems to me to be unlikely, and while the wind could have displaced the soil from its original source to its present position, it is inconceivable how it could have conveyed slabs of lava, weighing up to 200 pounds, over such a broad area of comparatively flat surface and deposited them on four or five feet of soft soil along the crest and western slope of the north and south swells, of which the tract is noted. Nor does there seem to be any other source for them in the position they occupy, on the top of the soil, than that of ice and water transportation. It is not improbable that the bulk of the soil of this tract originated as calcareous dust, and during the time it was accumulating, or shortly after the withdrawal of water, was covered with one of the heavy ice sheets which probably were the same then as now, and were thawed out and dropped there on the already "soft-covered" lake bottom, as it is a notable fact that these deposits

occur principally at the crest and westerly slope of the swells. This action can be observed along the Snake river, east of Horseshoe Bend. Every year the shore ice freezes into the lava rocks break away in the spring in large cakes, with connected slabs of lava, to float on down the river, and anchor on the low borders of mud banks where they thaw out with the advance of the season, and mix with the silt and sand of these low lands, accumulating in the bed of the stream. The astonishing results of irrigation on this tract have to be seen to be appreciated. The further development of its natural power sites, and equipment with electric lines warrants the anticipation of a remarkable growth in population and real estate values.

SCHOOL NOTICE

The attention of those interested in the formation or division of school districts in this county is hereby given the following provisions of the state school law:

"The board of county commissioners of the several counties of the state shall have power to create new districts from organized territory or from old districts by changing the boundaries of any district heretofore established or to attach to one or more districts the territory included within the boundaries of any district heretofore established, by reason of failure to comply with the provisions of this title. Provided, That no district shall be formed from any territory or the boundaries of any district be changed, except at a meeting of the board; nor at any time unless a petition for such new district or change of boundaries is filed in the office of the county superintendent on or before the 15th day of the month preceding. Providing, further, That in no instance shall the changing of the boundaries of any organized district take effect until after the close of school in that district for that school year. If such petition is for a new district it must set forth the boundaries of the new district asked for and must be signed by the parents or guardians of at least 10 children of school age who are residents of the proposed new district, and if for a change of boundaries, such petition must set forth the change of the boundaries desired, and the reason for the same and must be signed by at least two-thirds of those who are heads of families and residents of the district or districts whose boundaries are to be changed. Provided, further, That two or more districts lying contiguous, may, upon petition of a majority of the heads of families residing in each of the districts, be united to constitute one district. Provided, also, That no district shall be divided for the purpose of forming a new district unless it contains more than nine square miles except on the approval of the county superintendent of schools and by the unanimous vote of the board of county commissioners, nor shall a new district be divided if by so doing the remainder of the district shall be found to contain less than 15 persons of school age. Where a petition for a district hereafter be divided into two or more districts."

Act Quickly

Delay Has Been Dangerous in Twin Falls.

Do the right thing at the right time. Act quickly in times of danger. Backache is kidney danger. Doan's Kidney Pills act quickly. Cure all distressing, dangerous kidney ills. Plenty of evidence to prove this. D. F. Chamberlain, living at 103 Engle St., Idaho Falls, Idaho, says: "I had kidney trouble for a long time and suffered from backache. My kidneys were in a disordered condition. I experimented with different remedies which were said to be good for kidney complaint, but did not succeed in finding relief until I procured a box of Doan's Kidney Pills. It was acted just as represented and it was cured before I was wonderfully relieved and a continuation of their use resulted in a cure. I have applied to their use on several occasions and have always given me satisfactory results."

For sale by all dealers. Price 50 cents.

BUHL CITIZENS TO CELEBRATE COMPLETION OF CASTLEFORD BRIDGE

Commercial Club Members Decide to Hold a Jollification-Landseekers Continue to Flock to the West End of the Tract.

BUHL, Ida., Feb. 20.—C. M. Parker arrived last week from Illinois, and took up his residence on his ranch five miles south of town, which will be his future home. That is a good idea. Let us boost for an alcohol factory. Buhl is an ideal location for such an establishment. More potatoes can be raised to the acre on the land tributary to Buhl than on any other spot on earth. W. S. Harris is building a six-room house for Peter F. Martin, six miles southwest of town. Patten & Wilson are building an extension onto the rear of the Jap

restaurant, to make more room for the growing business of the Japs. The Castleford road and bridge committee authorize the statement, that the road and bridge will be open for travel the latter part of this week. John H. Buford leased his ranch to T. R. Allen for three years. Mr. Allen bought the stock and farming implements of Mr. Buford and will go into possession of the ranch at once, and commenced operations for raising a big crop this summer. The Presbyterian church was organized here last Saturday. E. G. Hayford, Samuel Farlow and J. H. Chambers are the trustees and incorporators. The church has a lot on the corner of Eighth avenue and Locust street, and will soon commence the erection of a church building. W. J. Full went to Twin Falls Saturday on a short business trip. Mrs. Geo. L. Eveleth visited Mrs. J. W. Bolpink Tuesday. Mrs. Bolpink is reported on the sick list. Laura McKay spent Friday and Saturday in Twin Falls visiting her sister, Mrs. I. B. Perrine. Frederick Winter leased his ranch to J. H. Chambers for a year. Mr. and Mrs. Winter will spend the next year in California. Mr. and Mrs. F. A. Ricker of Chicago, were Buhl visitors Thursday. Mr. Ricker is a banker and was looking over the country with a view of

making investments. He formed a good opinion of the country and expressed himself as well pleased with it. He said that there would be many Chicago people out here this coming summer looking for land. F. E. Towne of Ogden registered at Hotel Buhl Thursday. E. F. Hunt of Boise was a Buhl business visitor Friday. L. S. Kostoda of Minneapolis, Minn., was among the landseekers on this end of the tract Saturday. A. A. Seiden of Portland, Oregon, was a prospective land-purchaser on the west end Friday. R. D. Johnson of San Francisco, Cal., was talking real estate to some of our agents in that line on Thursday. Rev. J. Barton of Boise preached in the high school building Sunday night. He assisted in organizing the Presbyterian church. R. W. Davis of Boise was a guest of Hotel Buhl last week. M. D. Good was among the landseekers in Buhl the latter part of last week. S. C. Turnipseed of Twin Falls made a swift business trip to Buhl Saturday. Miss Edon, Miss Bacon and K. D. Rose of Twin Falls were Buhl visitors Saturday. W. Robert and wife of Pocatello visited Hotel Buhl the latter part of last week. W. S. Stitt of Twin Falls came up from town Saturday and returned the same day. Alfred Peterson and John Peterson, merchants of Montrose, Colo., visited Buhl Monday. They predicted a great future for the tract and particularly for the west end of it. They were investigating the country and will probably return shortly to make final decisions. There would be a number of Montrose people out here this summer to make investments. Attorney S. T. Hamilton of Twin Falls made a quick legal business trip to Buhl yesterday morning. C. O. Meigs of Twin Falls, accompanied by C. J. Campbell of Ogden, Utah, representing the Racine-Sattley Flow company of Wisconsin, were in Buhl yesterday on business. Mr. Campbell is not a stranger in this part of the country. He traveled over the Snake river valley many years ago. He has a good word to say for the tract. The Commercial club met Tuesday night and received the report of the Castleford road and bridge committee, which was to the effect that the grade and bridge were finished. The club members decided to meet on Wednesday and view the work, and if it is as reported, to accept the road and bridge. The club will give a banquet as a jollification over the bridging of the Salmon river at that point. It means much to Buhl. Jesse W. Holtncke, a member of the Nibley-Channell Lumber company, and a schoolmate of Postmaster Nibley, visited his old school friend between trains Sunday. Holtncke is now a resident of Twin Falls. An enjoyable house warming was held at the home of R. C. Parker, cousin of Irving Ward, south of town last night. Many Buhletes were there and they report having had a royal good time. The house that was warmed is a substantial, commodious dwelling house and a credit to the owner and the country south of town. One of the most charming social events was the Valentine party given Friday evening by the Misses Hazel Allred and Irene Ford at the home of Miss Allred to about 30 of their young friends. The house was artistically decorated with red and white hearts. Games furnished the evening's amusement, one being an advertisement guessing game. The first prize a box of stationery, was awarded Harold Ford, while Lucian Shields received the "booby prize", a package of gum. Dainty refreshments were served to the one-following guests: Almer Lindstrom, Addie Howard, Corn Scholter, Edna Weaver, Lola Taylor, Lillie Lidstrom, Beatrice Miller, Retta Smith, Agnes Miller, Stella Beckenbaugh, Beth Howard, Iva Smith, Lottie Smith, Oma Kivley, Laura Griffith, Vere Sonner, Florence Neer, Archer Douglas, Denn Marshall, Luth Howard, Clarence Davis, Harold Ford, Dave Howard, Harry Miller, Lucian Shields, Elbert Sherman, Kenneth Shark, Fred Baldwin, Jasper Rogers, Lester Russell, Sam Stridley, John Doll, Irt Sonner, Ray Ward,

Mallory CRAVENETTE HATS
Weather
STYLE SERVICE
The Mallory Cravenette Hat is Doubly Guaranteed
The name of Mallory, since 1823, has stood for the best in men's hatteries—styles, materials, workmanship, and prices that are accepted as standards. Besides this guarantee of excellence, the

has that no other hat can have—the quality of being weather-proof from the greatest process, which makes a Mallory stay new in spite of all kinds of weather. We can heartily endorse any hat that bears the Mallory stamp.
We have them both soft and stiff, in all styles and all the popular shades. They await your inspection.

OUR NEW CRAVENETTE DERBY

This is one of the best shapes we have ever shown in young men's hats. We think you will agree with us when you see the hat. The quality for price is the best in town. We sell only the best kind of hats; best in style; best in quality, and best in finish. Let us show you.

Reserved Seats Now On Sale At Bedford's Drug Store

George Marshall, Glen Taylor and Melville Nihart. About 25 people enjoyed the dance at Anderson's hall last Friday evening. Music was furnished by Messrs Holmes and Provins. Dr. Shaak, who has opened her offices in Twin Falls and Buhl, went to Twin Falls Tuesday to remain until Saturday. The Rev. Stoy of Pocatello held Episcopal services in the school-house Monday evening. Dr. D. E. Albee entertained Rev. Stoy during his stay in the city. Mr. and Mrs. Parker entertained Wednesday evening with a dancing party at their home west of the city. The ladies of the St. Elizabeth Guild of the Episcopal church will hold a cook-out and lunch in the bank room of the Hotel Buhl Saturday from 10-9 P. M. Senator Geo. Day of Boise was in the city Monday on business. Miss Kate McManis and Miss Nan Greenbush of Twin Falls were Buhl visitors Sunday afternoon. Del Sprague, Jack Voorhees, Everett Sweeley and E. R. Barrett of Twin Falls were in the city Friday afternoon. W. H. Eldridge of Twin Falls bought a ranch five miles west of the townsite. J. E. Bradley, representing the wholesale drug house of Meyer Bros. of St. Louis, was in Buhl Friday. Teachers examinations will be held in the office of the county superintendent, Twin Falls, Idaho, on Feb. 27, 28 and 29. EDNA DE BOW, County Suppt.

two cars of coal which arrived Tuesday. Elmer North shipped two cars of hay to Milner this week. H. D. Scott is baling hay on the Pringle place. Frank Bigler's father is visiting him at his home in east Kimberly. A. E. Moore is to have a public sale next week in the city. W. M. Black has decided not to make the trip to Tacoma at the expense of the Wooten Lumber Co. for winning the prize as mentioned in last week's item, so the company has sent him the \$50 in cash instead. We are glad to learn that the second prize, \$25 in cash, was awarded to our good friend, Terr. Rutledge of Hansen. So Kimberly and Hansen carry off all the honors, the company having had 12 years which completed for these prizes. George C. Oakes returned Wednesday from his survey work on the North Side and will be here permanently from now on during the crop season. J. P. Gaskill, formerly manager of the Kimberly lumber yard for Nibley-Channell Lumber Co. returned from Missouai this week. Mr. Gaskill sold his land here some time ago and returned to his native state, but he finds that he liked Idaho better than Missouai so he returned and his many friends hope he will be satisfied to stay with us now. W. W. Towler passed through Kimberly a day or two ago with his fishing outfit and is now at work hauling coveit for Peter Link south-east of town.

LADIES' FURNISHINGS.
Booths Dry Goods Co. to Enlarge. In keeping with the progressive policy of the Booth Dry Goods store, Mr. Booth is arranging the rear of his store to accommodate a much larger stock of ladies' furnishings in the way of ready-made goods in silk suits, dresses, coats, skirts, etc., and in addition Mr. Booth has employed a first class milliner who will soon arrive and take charge of that department and be equipped to furnish the elite of Twin Falls with the best going in the milliner's art. This store is exhibiting some beautiful new spring goods that speak well for this kind of body needed and all persons interested ought to come. Notice. All persons interested in the organization of a Building & Loan association in Twin Falls are requested to meet at Hill & Taylor's office on Tuesday evening, February 25th, to talk over the plans for forming such an organization. An institution of this kind is badly needed and all persons interested ought to come. FOR SALE OR RENT—Two farms near Buhl, one 150 acres, the other 100. Both well watered and satisfactory arrangements for leasing. Address E. V. Asay, 4320 Drexel Boulevard, Chicago, Ill.
