

DIGGING AND SACKING POTATOES ON THE FARM OF J. B. KEELER, TWO MILES EAST OF TWIN FALLS. 300 BUSHELS PER ACRE. Photo by Blisbee, Twin Falls.

There is no section of the country that excels the Twin Falls tract as a producer of potatoes. Yet the growers on this tract are still in the primer class. They still have much to learn before they can make their potato ground profitable. Seed of all kinds has been sold here, regardless of its suitability for soil, climate or irrigation. The farmers are now beginning to realize that they are on the wrong track in the matter of potatoes and are willing to listen to a little wholesome advice. There is no school like experience. Theory sounds nice and is very essential, but the only way to teach a man anything is such a way that he will remember it to let him "go up against it." After

a man has drowned two or three crops he will be more careful in handling water. A few crops of unmarketable potatoes will make him pause and figure a little, and a few stacks of ungrainable hay is likely to promote thoughts of drying and feeding. The upper Snake river valley passed through this stage years ago and has since settled down to a practical basis upon which the farmers are receiving excellent returns. The proposed organization of a producers' association is intended to develop the commercial as well as the scientific instinct of the farmer. Some men are able to grow produce but unable to sell it. Others have difficulty in producing crops, but excel when it comes to marketing

what they have grown. The farmer with the small amount of produce to dispose of is handicapped when it comes to finding a market. The producers' association should afford relief for the big and little producer alike. Markets cannot be molded to suit particular localities, but production can be regulated to suit the available markets. A long potato, which may be green at one end and frozen at the other, is hard to sell. Anything that cannot be sold readily should not be grown. The Twin Falls tract can produce any kind of potatoes. It should produce what the market demands. Every farmer on the tract should make it his business to attend the in-

stitute shortly to be held in this section. There he will learn many profitable truths which will put money in his pocket if he follows them. It takes time to find markets, but they can be found. Our neighbors in the upper valley have found them and we can do the same. There is no danger of over-production. Good stuff can always be sold and the Twin Falls tract should produce nothing but the best. It costs just as much to grow a poor potato as a good one, and a scrub cow will eat just as much as one that is profitable. The application of practical business sense is all that is needed to make farming profitable in the Snake river valley.

W. M. Sharp and son are plastering the new house built by W. F. Brock on. It has been painted and will soon be occupied by its owner and family. Jas. N. Clyde has finished his residence and put up a stable and made a good clamor. A new man is in charge of the drug store this week. Frank Burtington expects to leave for California in a few days to spend the winter and also on a business trip. W. M. Tennant is proving up on his homestead east of Park Creek and will move to California to reside in about a month.

SUNDAY SERVICES.
Presbyterian church, Rev. John Gourley, pastor. Services held every Sunday in K. P. hall. Sunday school at 10 A. M. Preaching service at 11: Evening service at 8:00.
Methodist church, Rev. Henry W. Parker, pastor. Services held in the Biokel school. Sunday school at 10 a. m. Preaching service at 11. Evening service at 7:30. Junior Epworth league at 8: Senior at 8:30.
The Church of the Brethren (or Dutch) church, Rev. C. Fahrney, pastor. Sunday school at 10 a. m. Preaching at 11 a. m. Christian workers' meeting, 7 p. m. Evening service, 8 p. m.
Christian church. Sunday school at 10 A. M. Preaching at 11 A. M., and 8:00 P. M. Y. P. C. E. at 7:00.
First Baptist church, services every Sunday at 11 a. m. and 8 p. m. by Rev. Lester. Bible school at 10 a. m. all services in the Odd Fellows hall. Welcome to all in every service.
Christian Science church. K. P. hall every Sunday at 3:00.

No difference what time of day or night, Blisbee can take your photos.

Water has been drilled on the Hollister tract to a depth of 674 feet. The water is flowing, but the water is not so good as the water on the other side of the divide. After the lava had been drilled, a drill struck a dense sedimentation which seemed to be the bottom of an ancient stream bed. This formation gradually grew until a strata of gravel was found. In which the water was found. A pump was made to go down 200 feet in the gravel as the water rose to a height of 37 feet in the well, which is deemed sufficient for the present.
Mr. F. Cochran, who drilled the well, is of the opinion that he has tapped an underground lake which, in his belief, underlies at least a large portion of the Salmon tract. This proves to be the case the value of land on the tract would be greatly enhanced.
The Hollister well is the first real test of the kind on the Twin Falls tract. South Side tract. Wells have been drilled along the foothills, but not in the valley. At the same site Mr. Cochran struck water at a depth of 350 feet, but this was not considered a good test on account of the proximity of the river. Hollister is right in the heart of the desert, and the fact that water can be obtained there at 674 feet is very encouraging. It is now probable that other wells will be drilled on the tract and the water plain developed. Well water is a distinct benefit and the Salmon tract seems in a fair way to profit thereby.
The Twin Falls Salmon River Land & Water Co. has ordered a 25-horsepower electric motor and a pump for the Hollister well. The motor should be here in about two weeks and the pump about the same time. The installation will be made immediately and the well will be a boon to freighters and settlers.
The strike at Hollister has greatly encouraged those who have desert claims on the Salmon tract.
For Rent—30 acres near Castelford. Address Box 480, Twin Falls, Idaho.

CAPITAL STOCKS ARE INCREASED

KIMBERLY INSTITUTIONS ARE THRIVING.
Bank Doubles Its Working Capital
Flour Mill Tacks on an Additional \$10,000—New Elevator Proves Great Convenience.

KIMBERLY, Idaho, Nov. 11.—W. F. Brecken, our postmaster, has been on the sick list this week but is some better now.
The plasterers are at work on the school house and the roof has been completed. The contractors promise that the four lower rooms will be ready for use by the first of December, which will probably be the case as the weather will not delay matters now in any extent.
All of the school wagons are now on commission and the enrollment is increasing. The records show now that the best of cannot be done until after the new building.
The motor has sold his black-

smith shop and dwelling to W. F. Swearingen, who has taken possession. Mr. Swearingen is a practical blacksmith and brings a fine set of tools with him. He has machinery which he can run with electric power, including emery wheels, lathes and drills. He is prepared to do all first-class work as well as horseshoeing, etc. The sale was made by the Kimberly real estate agency.
Mr. Blisometer and family will probably move to Boise for the winter, if not permanently. He is away now looking up a location and will move in the next few days.
A. R. Campbell is out again, but still has a lame shoulder as a result of his fall from the warehouse last week.
The coal sheds belonging to the Kimberly Supply & Produce Co. near the warehouse have been moved in order to give way for the new commercial track. This track has been completed now and gives fine shipping facilities from the mill, warehouse, elevator, coal sheds and also for loading from and on wagons.
Mrs. Mary Y. Norton has been in town this week on business.
T. N. Williams has a public sale this week and will soon leave for Nampa.

The new elevator has been supplied with electric power from the local power plant here and is now running full blast. They have a 10-horse-mo-

tor for which runs all the machinery. Twelve large bins about 60 feet high hold the grain until ready for shipment. A complete fanning mill is also run by electric power so the farmers can get clean seed of all kinds. The grain can now be taken from the thrasher in wagons loose and does not have to be touched by hand until loaded into the car, all done by machinery and no sack expense. This is quite a nice enterprise for Kimberly and means an outlay for the company of about \$15,000.
W. H. Thomas is back from Payette, where he has been attending a meeting of the directors of the mill. He has been re-elected president and manager for another year, and the capital stock of the mill increased another \$10,000. This speaks well for Kimberly and for the mill here.
N. W. Swearingen has the warehouse completed for his hardware and furniture and is hauling material for the foundation for the store building. Owing to the cold weather he will build a frame building on the south lot so as to get the store opened now and will leave the two north lots to build a permanent brick or concrete building on in the spring.

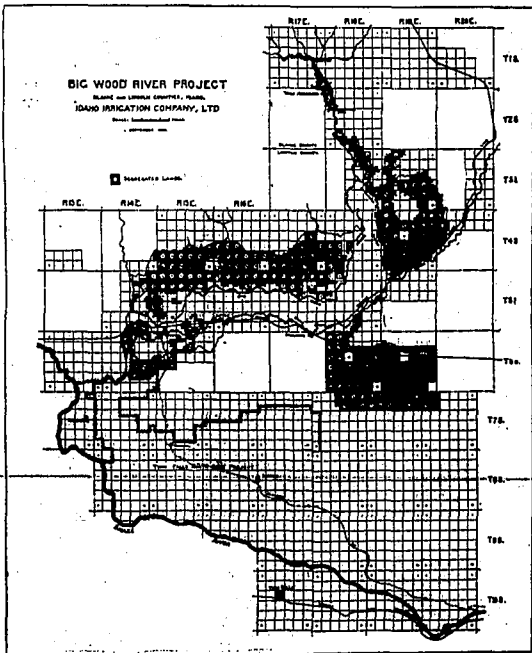

The stockholders of the Bank of Kimberly met Saturday afternoon, at which meeting 75 per cent of the stock was represented and all voted unanimously to increase the capital stock to \$20,000—just double what it

now is. Quite a number of new people want to get stock in the bank and the increase is made for that purpose.

USEFUL AND Distinctive Jewelry AT GUIBERT & PRIEBE

Big Wood River Project

Now under construction by J. G. White & Co., of New York.

This project adjoins the Twin Falls North Side tract on the north and embraces some of the best agricultural and horticultural land in Idaho. Within its confines are farms which have been developed for years and on which unexcelled fruit is being grown. A portion of the segregation is now open for entry and the remainder will be opened next spring. The water supply is obtained from the Big Wood river, one of the most dependable streams in the state, and the storage capacity provided for is far more than sufficient for the lands to be irrigated. Fifteen miles of the main canal has been completed, the diverting dam is ready for use and work is in progress on the reservoir. Water rights cost \$35 per acre and there is no better value for the investment.

CIRCULATING LIBRARY FOR TWIN FALLS

WE have started a Circulating Library in connection with our new store, and the people of Twin Falls can now read all the latest and best books for 10 cents per book. We only charge one dollar subscription (which makes one a life member), and if at the end of the year a member desires to withdraw he may take any \$1.50 book in the library. We shall receive all the new books as they are issued and shall be most pleased to order any book a member suggests.

We have now on display writing paper of all kinds and prices, Tablets from 1 penny up, and a vast assortment of office supplies, including Ledgers, Journals, Cash Books, Time Books, Files, etc., which we are selling at prices hitherto unheard of in Twin Falls.

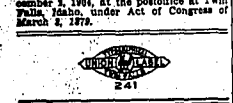

We carry all the leading magazines and it will pay you to visit us at once. We are located in the Smith & Smith building, north of the Commercial Bank.

We do printing—the very best.
Saturday is "School Day" at our store. We shall give away an extra Tablet to every girl or boy who spends 10 cents.

If the Idaho undertakers form a combination at their meeting in Pocatello next week, walking around to save funeral expenses may become a necessity.

By insisting that delinquent payments must be made by settlers on the Mindoka project not later than December 1, the government is working a great hardship upon many worthy citizens of Idaho.

Following are the complete election returns as canvassed by the board of county commissioners:

That the agitation started by the farmers in the vicinity of the Denny schoolhouse is having good effect is shown by the activity of the Oregon Short Line in putting into effect lower rates for the purpose of moving Twin Falls products.

main concessions. Each railroad is jealous of its own territory and it cannot afford to let in the products grown on another road to compete with those produced on its own line.

ELECTION RETURNS

Table listing election returns for various precincts including Justice of the Peace, Constable, and other offices. Lists names and vote counts.

Table listing names and addresses of individuals, possibly related to the election returns or a community directory.

PREMIES

Mrs. E. B. Williams, the victim of a severe cold which has confined her to her room for several days. She is recuperating nicely.

Mrs. O. J. Merrill suffered a slight stroke on Monday evening from the effects of which her many friends sincerely hope she will soon recover.

The dance which was to be given on the evening of November 25, under the auspices of the Methodist Episcopal church, has been postponed indefinitely.

Don C. Bryan shipped two carloads of fat hogs this week to the Fry & Bruhn Co., Seattle. The farmers won an exceptionally fine lot, fattened on alfalfa and barley on grain.

Thomas Mochler, one of the Twin Falls pioneers, and who had a farm two miles north of the city, died at Claremore, Oklahoma, on November 8. He was stricken with paralysis which proved fatal in a few days.

Contractor Neilson will soon complete the third mile of grade on the Idaho, Nevada and Southern railway. The grade has been finished through the townsite of Hollister, from which the work is being done southward.

The Eagles will institute an acrole in Twin Falls on Monday evening, November 16, in the Northern railway. The Hon. and A. G. Miller of the Boise team will conduct the ceremony, which will conclude with a banquet at the hall. The Twin Falls committee will give an initial membership of about 75.

Joe Lilly, one of the Twin Falls pioneers, recently secured a new home in Mfonk, Ill. Intending to spend the winter there. At the expiration of two weeks he was ready to come back to Twin Falls. His friends in Illinois all thought he had either lost his reason or his reputation for veracity when he told them of the crops on the Twin Falls tract.

Dr. L. B. Stocklager, a son of Judge Stocklager, is in Twin Falls, looking for a location. Dr. Stocklager graduated with high honors and has had invaluable practice since his graduation. He is a thorough western man with his father's general temperament and kind heart, and he will soon win a place in whatever community he may locate.

It is more than likely that the side track on the south side of the main line will be extended and the Twin Falls rockery moved from the main line to the extension. When the yards were built Twin Falls was the terminus. In order to load stock necessary to spare cars on the main line, where they interfere with traffic. This will be obviated by placing the yards on a siding.

John W. Trehwala, the popular representative of Hemmaway & Mosler, the Elk Lake cigar dealer, says he has his Twin Falls friends this week by bringing his wife with him. Johnny had been a bachelor from the day of the recent domestic troubles. He had the pleasure of Trehwala's unannounced visits for forsaking the ranks of bachelors. He is glad to declare that he is absolutely blameless as no man with a shred of sentiment could do otherwise.

"When I left Twin Falls on Sunday night, I left the best town and country in Idaho," says John W. Trehwala, representative of the Western Union Life Insurance Co., of Spokane, who had been here for several weeks on business. He is a man who is always ready to talk Twin Falls, its opportunities, its resources and its splendid people," continued Mr. Wolfe, "and I am looking forward to the day when I can return and renew my friendships with your hospitable citizens." Mr. Wolfe is a good booster and a loyal friend of the Twin Falls tract.

Mark Murtaugh's sawmill is in active operation in the short line yard. Huge piles of timbers are being reduced to stovewood and cordwood. Some of the timbers are suitable for bridge construction and will probably be so used. Other are being transformed into rough lumber. Mr. Murtaugh has 200 carloads of timber coming from the Yellowstone branch of the Short Line which will be cut and distributed in Twin Falls. The saws are operated by electric motors of ponderous proportions which are lighted from a trolley on the blink when they start.

R. W. Jones, Adams & Pilgrimage and William Warburg are going to erect a two-story business block on Main avenue, with a frontage of 100 feet. It will occupy the site of the block which was recently destroyed at the time of its completion. The basement and foundations of the former block will be used for 75 feet, and Mr. Warburg will be the contractor. His foundation on his lot, which adjoins on the west. Owing to the lateness of the season, it is doubtful if the building can be erected before the winter. The intention of the parties interested to put it up as soon as possible.

John W. Miller, who has a farm on the Snake river about six miles northwest of Duhl, had a thrilling experience last week while rescuing a sheep from an island which was being swept by a skiff. The skiff was caught in a strong current and drawn into a turbulent stretch of rapids between the south side of the island and the shore. Mr. Miller, who is a powerful man, lunged to the boat which upset and was buffeted about by the angry waters. How he managed to escape being pulled under is a mystery. He finally succeeded in getting above the rapids and went to Henry Chriewell's cabin where he sought refuge. He was completely exhausted and numb with the cold, but he soon recuperated and is now none the worse for his exploit. The skiff, though, has not been passed are exceedingly rough, the water curling back in places to a height of about 10 feet.

Mr. J. H. Stiles, who is visiting friends in Oregon.

Judge W. M. Uhlirah came over from Riverside farm this week to visit his wife and incidentally call on a dentist.

John D. Nims, editor of the North Side News, was in Twin Falls this week. Mr. Nims expects to begin publication in a few days.

Heber Borneman and Harry Allen went to Salt Lake on Monday evening to pay their tithing and see how Zion looked after the election.

Doc Sprague has returned from Pocatello, where he underwent a slight surgical operation last Saturday, for the removal of varicose veins.

Floyd Norman, an employee of the power company, was severely shocked at the substation on Saturday evening. He grasped a live wire and burned his hand.

Fred Nare, foreman on the Lincoln school building, tumbled into a hole on the second floor of the building this week. He suffered a slight concussion of the brain but is doing nicely.

D. A. Marshall, who represents the Seattle-Columbia Copper Co., reports a splendid strike in the Delano group at the end of his last Saturday. A few feet wide, was uncovered in the lower tunnel.

Tourtelotte & Co., architects, are making plans for an eight-room hotel to be built at Twin Falls for the Hotel and A. G. Miller of the Boise team will conduct the ceremony, which will conclude with a banquet at the hall. The Twin Falls committee will give an initial membership of about 75.

F. B. Alken of Omaha, who has been connected with the Union Pacific for a number of years, is in Twin Falls, visiting his brother, Geo. Alken. He likes the city and may conclude to locate here.

The undertakers of Idaho will meet in Twin Falls on Monday evening, November 16 and 17, for the purpose of forming an organization. Members of the craft from all parts of the state will be present.

Addison T. Smith, private secretary to Senator Heyburn, was in Twin Falls on Tuesday and Wednesday, looking after his property and noting the growth of the city. Mr. Smith is on his way to Washington, where he will join the senator in a few days.

F. O. Gillett of Towa was in Twin Falls for a few days, looking after the interests of his clients. He has several good investments, among them a quarter section one and one-half miles south of Filer, which he purchased through the efforts of his agent, the Twin Falls real estate dealers.

A magnificent new fountain is being installed in the Majestic pharmacy. Proprietor Peterson believes nothing is too good for Twin Falls and consequently he bought the best fountain in the city. It is a gorgeous piece of furniture and is attracting a great deal of favorable attention. Mr. Peterson will serve any kind of a hot drink during the winter months.

George McCallister, John Black, Al Beebe and Don Bryan, the latter a former Mackayite, all of Twin Falls, were here this week after having set traps on the Snake river. They are known to inhabit that waste of land. While on their way here they saw many signs of big game and will hunt a week or so on their return. They are all jolly good Twin Falls boosters. Mr. Bryan, who is well known to many of our people, has made many thousand dollars there—Mackay Miner.

By a vote of 14 to 13, the members of the Twin Falls Commercial club expressed their sentiment in favor of a railroad commission. Frank H. Priest, general freight agent of the Short Line, attended the meeting, which was held on Tuesday evening, and presented the company's side of the case. W. P. Guthrie, T. J. Woods, J. A. Davis, J. A. Waters and C. E. Booth were elected delegates to the National convention. The vote in favor of the creation of a railway commission, while not an instruction to the delegates, practically binds them to support the movement.

Elbert E. Hobbs has obtained warrants for the arrest of several John Ross and Richard Ross on the charge of taking cattle out of his possession by force and display of firearms. The cattle had been taken up by Hobbs and the Rosses and representatives of the owners came and took them away without formally. The accused men appeared in court this afternoon and their preliminary examinations were set for next Thursday. Range cattle have been drifting across the canals of late and the farmers have been grabbing them on sight.

George N. Iff, United States consul in Warsaw, Poland, was a Twin Falls visitor on Friday, accompanied by his wife and two children. Mr. Iff had not been in this section of the state for several years and he was amazed at the development which has been achieved in the consular service. Mr. Iff, who was formerly editor of the Pocatello Tribune, has made wonderful advances in his building a supplementary dam on the Deep creek about five miles south of its reservoir. The second dam will impound a considerable quantity of water. He started two years ago when he was promoted to Annaberg, Germany, where he did such good work that he was promoted to Warsaw, a very important post.

The Deep Creek Land & Water Co. is building a supplementary dam on Deep creek about five miles south of its reservoir. The second dam will impound a considerable quantity of water. He started two years ago when he was promoted to Annaberg, Germany, where he did such good work that he was promoted to Warsaw, a very important post.

There was no quorum at the meeting of the Canal association last Saturday. The meeting was adjourned until December 6.

K. M. McCollum returned today from Boise, where he had conferred upon him the 32nd degree of Masonry. His head seems to be about normal.

Perry Miller, who went to Salt Lake City for surgical treatment, is reported to be successful at the Idaho State hospital and will probably return home next week.

At an informal entertainment given by Mrs. Pickett on Tuesday afternoon the bridge favors were won by Mrs. E. M. Sweeney and Mrs. Frank Mitchell.

Mr. J. H. Stiles, who is visiting friends in Oregon.

Judge W. M. Uhlirah came over from Riverside farm this week to visit his wife and incidentally call on a dentist.

John D. Nims, editor of the North Side News, was in Twin Falls this week. Mr. Nims expects to begin publication in a few days.

Heber Borneman and Harry Allen went to Salt Lake on Monday evening to pay their tithing and see how Zion looked after the election.

Doc Sprague has returned from Pocatello, where he underwent a slight surgical operation last Saturday, for the removal of varicose veins.

Floyd Norman, an employee of the power company, was severely shocked at the substation on Saturday evening. He grasped a live wire and burned his hand.

Fred Nare, foreman on the Lincoln school building, tumbled into a hole on the second floor of the building this week. He suffered a slight concussion of the brain but is doing nicely.

D. A. Marshall, who represents the Seattle-Columbia Copper Co., reports a splendid strike in the Delano group at the end of his last Saturday. A few feet wide, was uncovered in the lower tunnel.

Tourtelotte & Co., architects, are making plans for an eight-room hotel to be built at Twin Falls for the Hotel and A. G. Miller of the Boise team will conduct the ceremony, which will conclude with a banquet at the hall. The Twin Falls committee will give an initial membership of about 75.

F. B. Alken of Omaha, who has been connected with the Union Pacific for a number of years, is in Twin Falls, visiting his brother, Geo. Alken. He likes the city and may conclude to locate here.

The undertakers of Idaho will meet in Twin Falls on Monday evening, November 16 and 17, for the purpose of forming an organization. Members of the craft from all parts of the state will be present.

Addison T. Smith, private secretary to Senator Heyburn, was in Twin Falls on Tuesday and Wednesday, looking after his property and noting the growth of the city. Mr. Smith is on his way to Washington, where he will join the senator in a few days.

F. O. Gillett of Towa was in Twin Falls for a few days, looking after the interests of his clients. He has several good investments, among them a quarter section one and one-half miles south of Filer, which he purchased through the efforts of his agent, the Twin Falls real estate dealers.

A magnificent new fountain is being installed in the Majestic pharmacy. Proprietor Peterson believes nothing is too good for Twin Falls and consequently he bought the best fountain in the city. It is a gorgeous piece of furniture and is attracting a great deal of favorable attention. Mr. Peterson will serve any kind of a hot drink during the winter months.

Every Saturday afternoon, 1:30 p. m. We sell anything and everything. You need not see us, but bring in your stuff. BRUNN AUKTION CO., Office 2 Doors South of Ferrine Hotel on Cheshone Street. Phone 130.

DR. DRAKE, the eye specialist of Boise, will be here soon. Watch this space for his dates. Remember he has no partners nor is he connected with any one. If you want reliable work, patronize a reliable man. Ask your neighbor about him.

WENT REPUBLICAN FOR FIRST TIME

CLEAR LAKE PRECINCT FALLS IN WITH MAJORITY.

Coyotes and Bobcats Suffer at the Hands of Charles Rose and J. W. Briggs—Buhl Butchers Will Feed Beef Cattle in Canyon.

CLEAR LAKE, Idaho, Nov. 9.—Charles Rose and J. W. Briggs are making the fur fly among the coyotes and bobcats in this locality. The friends of Mrs. W. S. Smalley are glad to learn that she is improving in health.

J. W. Banbury returned from Chicago on Monday. He had a very enjoyable trip but he missed the calm content of his Idaho ranch.

Charles D. March went to Buhl this morning and returned in the afternoon with several friends from Twin Falls who came to feast their eyes on the scenery and look over the resources of the valley.

J. W. Banbury and Otis Syater went over to the Twin Falls tract today for grain.

Mrs. E. A. Daek has gone to Shoshone, where she will perfect the transfer of her property, the title to which has been involved for several years.

Mr. and Mrs. Otis Syater visited Wendell this week. Clear Lake precinct went Republican on election day for the first time in its history. It is never too late to mend, and that is the conclusion reached by many in this vicinity.

Overbaugh and Fredenbogen of the Buhl meat market are building corrals and feed racks on the Clear Lake ranch, where they will feed their beef cattle this winter. They purchased the hay crop of Otis Syater.

Abstracts—Abstracts—Abstracts. J. H. Wise, room 6, Commercial Bank building, Twin Falls, Idaho.

We have the best line of front doors ever offered to the people of Twin Falls. Westler Lumber Co., Ltd.

Any one wishing to learn dressmaking or have sewing done, address P. O. Box 412, Twin Falls, Idaho.

500 sacks oats and a few stacks alfalfa for sale. Arthur L. Swin, Hotel Perrine.

Those who have tried chickens on the Twin Falls tract have found them to be a good profit producer.

Fair View Ranch onions.

To Rent—2 large furnished rooms with electric light and bath. Mrs. E. A. Hibbard, block 18.

Bisbee always gets your photos done on time.

WENDELL MAKES A GOOD SHOWING

FIFTY-FOUR VOTES ARE CAST IN PRECINCT.

Great Majority of Citizens Unable to Vote Because They Had Not Seen in the State Long Enough to Be Qualified Electors.

WENDELL, Idaho, Nov. 10.—W. J. Tias was in Jerome Tuesday. E. W. Walker of Jerome transacted business here Thursday.

Mr. Goodfellow spent Tuesday in Gooding. F. W. Hastings was constable on election day.

Thos. Smith went to Gooding Thursday on business. The Oregon Short Line has a survey camp here, consisting of about 15 men.

J. B. Walton of Colorado Springs was in town Thursday looking for a business location and expects to return in the spring.

C. C. Leeper and J. H. Gaston of Gooding were in town this week looking for a building to open a business. Among the traveling men that made a business call this week was Col. J. E. Roberts of Oakes & Co. of Boise; E. H. Wisecarver of Swift & Co., and Charles Merrick of the Salt Lake Hardware Co.

John Kearns and son Martin made a business call here Thursday. W. H. Buehler, our druggist, transacted business in Gooding on Saturday.

J. C. Brubacher of the Gooding State bank was in town Sunday. Messrs. Busse and McPherson of Twin Falls spent Friday and Saturday in town looking after the interest of the North Side company.

Mr. Shoopman of Ketchum, Idaho, is visiting friends in town and also looking for a business location. H. G. Hazlett of Twin Falls is hauling lumber to build on his ranch east of town.

Among the new settlers who arrived this week are J. T. Koeny and brother and R. P. Hall from Massachusetts. They are hauling lumber to their ranch near Thousand Springs to erect buildings at once. It looks good to see the spirit they show in going to work upon their land and they will win out.

The Wagonell Hardware Co. has completed a warehouse on the rear of its lot in order to handle its stock, to which it is adding each week. It is now carrying a line of furniture and harness, too, which is much appreciated by its many customers.

Frank Reid has just completed a large rock house on his ranch west of town. He is a native of Idaho and did the work. Mr. Reid has one of the best improved ranches to be found on this tract.

Mr. Robson has been helping H. D. Jackson for the past few days to rail and clear his land about four miles west of town.

Messrs. T. L. Barton, Dan Beaton and Chas. L. Dinger were appointed judges of the election. Max Taylor, Roy Hastings and Ira Anderson were the clerks. It being such a busy day, clear of all arguments, many did not come in to vote, but nevertheless 54 votes were cast, which made a good showing for our first election. R. F. Smith was elected constable of the precinct and Dan Beaton was elected constable.

Considering that the entire precinct, including the territory near raw sagebrush until early spring, and that the great majority of the settlers have not been here long enough to see them to vote, the showing is remarkable. Most of the settlers were too busy to pay much attention to politics, and the greater number of men left their politics behind when they came to town. It was a difficult matter to induce them to register or to interest them in state or county issues. Two years hence Wendell precinct will be a big factor in the county.

The Westler Lumber Co., which already has a number of yards in this section of the state, is preparing lumber for the erection of an office and sheds. It has a splendid location on Idaho street. It will not put in much of a stock until the winter begins running. By that time it will have its buildings completed and be ready for business.

The Wendell State bank received its charter November 5 and expects to have its safe here Monday ready to begin business. The bank will help to increase business to a great extent as the construction of the bank is by check and the majority of the men have to go to neighboring towns in order to get their money.

Next week the bank will have its second lecture at the Wendell school house Wednesday evening, November 4. It had been the intention to organize a permanent Farmers' association at this meeting, but as the lecture had not been thoroughly advertised it was decided best to postpone the organization until another meeting. Mr. McPherson talked on what he illustrated his lecture with views of the roots of different plants. These views were taken by him from experiments made on the South Side. They showed the length of various roots, and the manner in which they permeate the soil, thus acting as a fertilizer. Much interest was manifested in the lecture, a number of questions being brought up for discussion.

Mr. McPherson will lecture again on Tuesday evening, Nov. 4. It is hoped everyone will come for these lectures as a valuable aid to the farmer inexperienced in irrigation.

Wanted—Two young men to room and board; West Thirtieth street. Mrs. O. K. Thomas.

Rooming house for sale, or will trade for city property. Address P. O. Box 434, Twin Falls, Idaho.

United States cream separator, No. 7. For sale at price \$60. C. J. DOUGHERTY, Elm Lakes boulevard.

MODIFICATION OF THE LAND LAWS

SUGGESTED BY COMMISSIONER DENNETT.

Many Important Changes Recommended to Prevent Speculation and Insure Settlement of Public Lands by Bona Fide Settlers.

The annual report of Hon. Fred Dennett, commissioner of the general land office, Washington, D. C., contains two questions of vital importance to the west; one is the necessity of so administering the remaining public domain as to insure its falling into the hands of bona fide homesteaders; the other the necessity for preventing speculation in arid lands reclaimed or to be reclaimed under the national reclamation act and under the Carey act. The following extracts are made from his annual report:

"An intelligent and economic disposal of the remaining public lands demands that every acre shall be preserved for its greatest use. The policy of congress has been to offer every acre on the land to those who are anxious to obtain them. The reclamation act showed the evident intent of congress to continue the policy of providing the greatest number of homes possible on the public domain. The logical sequence is to take the necessary steps to hold irrigable lands which without water can not furnish homes, for future irrigation."

The commissioner sets forth the advantages of irrigation, and adds: "It is the manifest advantage of the people of the United States that everything possible be done to further the reclamation of public lands. The knowledge that an acre of arid land of no prior value specially reaches a price of from \$100 an acre up after water has been successfully brought upon it, has introduced a new character of speculation, to prevent which there is no law. Land of no present value for farming or other purposes is taken simply in the hope that the increasing demand and consequent higher values for irrigated land will bring the tract within an irrigation project. If it is not when an irrigation project is initiated, it is found that a large proportion of the area is either entered or in private ownership, and held by tracts of 160 acres or more, though the land without water is incapable of growing crops. Thus the purpose of the reclamation act is defeated. When the land is held in tracts of 160 acres, there is only one home, where two or more homes ought to be established. The result is that additional homes are secured by paying a fancy price to the speculator."

"A similar difficulty confronts the states under the Carey act. As soon as a project is introduced to it, under way, claimants under the desert land and other acts flock to the spot. The land is thus entered and the Carey act applicants necessarily abandon the project or pay the speculators to vacate."

"The proper step to take would be to classify the lands of the United States. In order to ascertain what public lands (which in their present condition are incapable of affording homes) are susceptible of irrigation up to a cost even much greater than that now entertained by the reclamation service, and to withdraw those lands from entry, waiting to be taken when they can be irrigated by made homes either under the United States government or under the Carey act. So long as the land is held by the government, state, or by the expenditure of vast sums by private enterprise. At the time of approval of the project the lands should be withdrawn from settlement and entry until the water is ready, and then restored to entry in the manner now adopted in the case of Indian reservations."

"A general withdrawal of this character would, in addition, not only operate to relieve the public domain from certain difficulties encountered in carrying out its work, but would also relieve this office from the greater difficulties arising from the adjustment of existing homestead entries to the farm units upon the opening of the lands after the completion of the project."

To Prevent Fraud. Commissioner Dennett urgently recommends the enactment of a new law to punish persons who fraudulently obtain or attempt to obtain title to public lands. Heretofore such offenses have been prosecuted under the statute punishing conspiracy to defraud the government, and under the laws prescribing penalties for perjury and subornation of perjury. It is often difficult, says he, "if impossible, to prove either a conspiracy or subornation, and many cases are now pending and others will arise, where the need for a more comprehensive statute than we now have is very urgent. Also there is not any statute which authorizes the punishment of an attempt to fraudulently acquire title."

It is also recommended that a comprehensive law be passed authorizing officers, clerks, inspectors, agents and employees of the land office to administer oaths. This authority is now conferred only on officials specially detailed to investigate particular cases. Commissioner Dennett would also have congress provide a method by which special agents of his office compel witnesses to appear before judges or clerks of courts, United States commissioners, or registrars and receivers and disclose facts of their own knowledge relative to any matter under investigation.

A third legislative recommendation made by the commissioner is to the effect that the law compelling the attendance of witnesses in reclamation and recovery of land offices be enlarged so that such witnesses can be compelled to go outside of the coun-

ties in which they may respectively be subpoenaed.

Changes Needed. During the past several material modifications were made in the regulations of the general land office. Among the more important were the following:

Where mistakes in description of lands are made by homestead entrymen, amendments are allowed to include the land intended, and if that is not subject to entry, other contiguous land can be taken.

After the completion of the reclamation project on good lands, entrymen need no longer reside upon the land, but may, upon water being furnished, reclaim at least one-half the area and pay all charges imposed by the reclamation act, before final certificate is issued.

Clay, Robinson & Co's Weekly Market Report.

SOUTH OMAHA, Nov. 7.—The run of cattle here this week has been extremely light for this season of the year, and the trade has been in very good healthy condition. Prices are generally about a quarter higher for the week on good lots of cattle, including a gain of 10¢500 during the past couple of weeks. No good cattle of any sort have been offered, quality being ordinary. Cows are quiet, and have also shown the full strength, and while stockers and feeders have been strong, prices do not show a gain of over 10¢250 for the week. Good to choice killing steers are quotable at \$1.75@2.50; fair to good, \$1.25@1.75; good to choice cows and heifers, \$1.25@1.50; fair to good, \$1.00@1.25; 3.50; canners and cutters, \$2.00@3.00; veal calves, \$1.00@1.50; good to choice heavy feeders, \$1.50@2.00; fair to good, \$1.00@1.50; good to choice medium weights, \$1.75@2.25; fair to good, \$1.25@1.75.

Light receipts of sheep, less than half for the week as compared with last week, was the outstanding feature of this branch of the trade this week, and prices show a gain of anywhere from 25¢400 over one week ago. Good killing lambs are quotable at \$5.00@6.00; yearlings, \$4.25@4.85; wethers, \$1.00@1.50; ewes, \$1.75@2.15; good feeding lambs, \$4.50@5.25; yearlings, \$3.75@4.25; wethers, \$3.00@3.50; ewes, \$2.50@3.15.

FIXED BLAME FOR BOISE WRECK

Conductor and Flagman Dismissed by Short Line.

Passenger Conductor Pyper and Flagman C. A. Hunt have been dismissed from the service of the Oregon Short Line for carelessness in connection with the wreck in Boise yard which resulted fatally to Joseph Hennessey, the engineer, was suspended for 60 days, and the engine crew of engine 405 was censured for allowing an authorized person to be on the engine. The inquiry was held in Boise and in accordance with the rule recently adopted by the Short Line, "three prominent citizens were selected to serve on the board. The citizens were John M. Holmes, mayor of the city; Calvin Cobb, proprietor of The Statesman, and Edgar Wilson, attorney at law."

After hearing all the evidence in the case the board submitted a unanimous report, Mayor Holmes only dissenting in that he thought dismissal was too severe punishment for Conductor Pyper.

The accident was found to be due entirely to violation of the plain rules of the company which are framed to prevent such accidents. It was shown that the action of the responsible engineer was completely justified, and that they had been allowed ample rest and had been on duty but five hours when the accident occurred. The accident occurred on a morning fair week and resulted in the death of Daniel Lawler, a machinist apprentice, who was riding on an engine in violation of the rules. Martin Black, who was beating his way in from the fair grounds, was also killed.

SPECIAL CONTESTS ARRANGED

For the Great National Apple Show in Spokane.

SPokane, Wash., Nov. 11.—That districts of the northwest which produce apples may secure valuable publicity at the national apple show, a contest is being arranged by the management which makes no restrictions on the exhibitor and permits any decorations and arrangement desired. This contest is arranged at the request of a number of commercial clubs in Washington, Idaho and Oregon which were desirous of making district displays aside from those already arranged which do not provide for any publicity schemes.

"While the national apple show is educational in purpose," said Manager H. J. Reilly, "we appreciate its importance as an advertising medium to the fruit districts of the country, and in deference to their requests we have arranged this special contest which permits the exhibitor to get as much publicity from it as possible. This contest is for the fruit districts of the northwest especially, although it is open to the world. A space sufficient for a large exhibit will be given to each district which enters the contest and makes such use of it as it desires. The prizes aggregate \$500, of which \$400 is cash, and in addition a beautiful silver cup which cost \$100 and which will be furnished by the board of trustees."

Another new contest also has been arranged, it being for the best specimen of a new apple. A number of growers throughout the country have written that they have in their orchards apples which belong to no known variety. Manager Reilly is of the opinion that many of these apples belong to some variety with which the grower is not acquainted, and this contest was arranged to determine the name of the variety of such apples and if they are really new apples to give them a name.

LAWS GOVERNING USAGE OF WATER

ARE TO BE COMPILED INTO ONE VOLUME.

National Conservation Commission is Preparing for Publication a Book Which Will Cover Every Act Pertaining to the Use of Water.

The National Conservation commission is compiling for publication in a single volume all the laws and court decisions, both state and federal, which relate to the use of water in the United States. This manual will be of immense practical value and it is somewhat remarkable, considering the wide number of interests which are touched by these laws, that no such compilation has been made before this. With the constantly growing demand for interstate waterways, the increasing utilization of water power for the development of electricity, and the widening areas of semiarid western plains that are being made arable through irrigation, these laws at the present time affect the interests of a wide variety of individuals and corporations, and in the immediate future the number whose business is directly touched will be beyond doubt be greatly increased.

The work which the National Conservation commission is doing along this line is extremely thorough and the compilation will be complete. It will include all state and national statutes and all court decisions which concern water rights and kindred questions on both navigable and non-navigable streams and lakes. The citations will include all acts which relate to riparian rights, and public usufruct of water, and all statutes which concern mills, pollution of water, interference with navigation, the use of streams for power, damming of streams, diverting stream flow, and so on—in short, all acts which affect the use of waters and their private appropriation to power or other purposes. In the book will be included also some authoritative discussion of the principles involved in these laws.

The National Conservation commission in its endeavor to make the compilation absolutely complete and accurate has called upon the governors of all the states for assistance and the replies in every instance have promised support. Considerably more than half the states have already appointed state conservation commissions for the specific purpose of cooperating with the national commission in its work of gathering the material which will be embodied in the report to the president the first of the year. In the other states the state

officials whose work most nearly touches this project are at work. A single volume containing all the laws which bear upon the use of water in the various parts of the country will be an exceedingly useful reference handbook. It holds possibilities of an even greater usefulness in that it will exhibit within limits that make ready comparison possible, not only the general tenor of the laws and decisions on this subject, but the discrepancies that exist between the regulations of different states.

The fear is frequently expressed that the tendency towards monopolistic use of water power, which has already made very great progress in some parts of the country, will result in practically all of this extremely valuable natural resource passing from the people as a whole into the hands of comparatively a few men, with resulting higher cost of water power, and water-developed electricity to consumers and a tremendous advantage to the few possessors. If this danger is justified by the present laws, it is a matter of great importance to make this fact apparent at once. For this purpose nothing could be more effective than such a presentation of all the laws on the subject as that which this commission is preparing.

LEAGUE OF COMMERCIAL CLUBS

Will Hold Annual Convention in Nampa November 16 and 17.

According to the returns received by Reilly Alderson, secretary-treasurer of the League of Southern Idaho Commercial clubs, the fourth annual convention of that organization, which will be held at Nampa, November 16 and 17, will be the largest and most enthusiastic one yet held. Clubs in all sections of the south have sent in lists of delegates and evince an unusual interest in the convention.

The league started a campaign to get an appropriation of \$25,000 a year from the next legislature for an immigration and advertising bureau in the state. It is this bureau's business to gather statistics of Idaho and publish them. This is work which will build up every little community of Idaho, help to populate our vacant lands and to bring in new investors. It is of equal importance to every one and the state can not be too liberal if the money is thus used. We got it back a hundred fold. Every city in southern Idaho should be represented at Nampa and thus give this movement all the backing possible.

Our legislature has not yet made any provision for having Idaho represented at the Alaska-Yukon-Pacific Exposition to be held in Seattle during 1909. The league will undoubtedly take some action on this and will probably ask for an appropriation. The convention will be called to order Monday afternoon, November 16, and every city in southern Idaho should be represented.

Private board and rooms. By Baptist church. Phone 218.

PROGRESS AT THE UNIVERSITY

Bacteriologist Engaged for the Farm Experiment Station.

UNIVERSITY OF IDAHO, MOSCOW, Nov. 6.—The faculty of the university will be represented at the annual conference of the Washington Good Roads association at Kennewick, November 19, by Dr. C. N. Little, professor of civil engineering. Dr. Little also will be present at the educational congress at Whitman college, November 17 and 18, representing the faculty of Idaho university. The latter work of education from the east as well as the western leaders.

Governor Gooding is one of the enthusiastic backers of the Idaho football team. He has seen the men play several times and has helped out with good hearty encouragement from the side lines. The governor expects to see the Salt Lake game Thanksgiving day. And now his good will takes the more tangible form of a gift of \$100 to the team to be used in the interests of the game. Of course there was a vigorous ovation for the governor when President MacLean announced this gift at the recent rally. Mr. Vaughn, instructor in sociology, gave a lantern lecture before the university Y. W. C. A. on the fifth, the topic being "Japan and Her Roster for National Pride." The speaker showed a series of lantern slides made from his own negatives taken during his residence in Japan. The pictures were of the work people and the customs and habits of the common folk scenes which it is hard to obtain and which are rarely seen.

L. F. Parsons has been appointed bacteriologist of the college of agriculture and the experiment station. He has for some time during his residence in Moscow done occasional work in the university laboratories, and has done considerable original research in his special line.

The report to the United States army made by the inspector, Captain Penn, last May concerning the cadet battalion of the university, has just been published. For the most part the report is very favorable, but it goes into detail thoroughly, and points where there should be improvement are noted. This year with full time for drill the battalion will be in more perfect form when inspection comes in May, 1909.

WESTERN PACIFIC EXTENSION

Opened Between Salt Lake City and Shafter, Nevada.

Traffic over the Utah division of the Western Pacific railroad, the Gould system extension to the Pacific coast, was formally opened on November 9, when a "mixed" train left Salt Lake for Shafter, Nevada, where the road crosses the Southern Pacific. The service will be irregularly presented, or until construction work is completed further west. Work is being pushed rapidly.

Have Blaboo do your picture framing.

ANOTHER EMPIRE ASSUMING FORM

SPLENDID PROGRESS ON THE WOOD RIVER TRACT.

Work on Dam and Canals Under Way and Will Be Continued All Winter—Waterworks and Hotel for Richfield Being Constructed.

Work on the construction of the foundations for the new hotel being erected by the Idaho Irrigation company, Ltd., at Richfield, Lincoln county, Idaho, has been in progress for the past three weeks. The contract for the construction of the building above the foundations was awarded to H. O. Koopman of Boise, Idaho. The brick, cement and lime for this building have been furnished by the company, and are on the ground, so that the construction of the hotel will start as soon as the foundations are completed. Work on this will be rushed by the employment of an extra force of men during the winter months, so that the company expects to have it open for occupancy by February 1st. The plans and specifications were drawn by Wayland & Fannell of Boise, and call for 24 rooms in the present plan, so laid out that an addition can be made at any time, which the company now expects it will be necessary to put on in the spring to meet the growing demand which already exceeds the present facilities in the town.

In this hotel there will be six rooms with baths, and every sleeping room will be provided with a set bowl for hot and cold running water. It is planned to connect every room by telephone with the main office, and through that with local and long distance lines. A large boiler steam heating plant will be installed, and every other accommodation found in a modern up to date hotel.

The company is already at work upon the plans for its water supply system, work on which will commence within a short time, and it is expected to have this system in readiness for use by the time that water is available on the lands of the Richfield tract, on April 1, 1909.

Bids have been received by the company for the plumbing and heating of the hotel, and the award will be made within a few days. The building complete, without furnishings, will cost \$25,000.

A large number of town lots have been sold during the past three weeks, and this sale continues regularly.

The new bank building being erected by the First State bank of Richfield, a two-story brick building, with offices on the upper floor and the

bank on the ground floor, is well advanced. The company is also planning the erection of a new office building, with rooms on the upper floor for the construction and engineering company, which is building the dam, canal and ditches, and the headquarters of the manager's department will be on the main floor.

A force of over 150 teams is at present working on the canal and ditches, and by December 1st a crew of 500 men, steam shovels, trawmays, sluicing pumps and tunnel equipment will be at work on the big dam and waste way tunnel at the impounding reservoir. This work will be kept up all through the winter months. Before the work is completed on the canal and ditches in connection with the Richfield tract a large force of men will be put at work on the canals and ditches on the South Gooding tract, where work has already started, and it is assured that water will be available for both the Richfield and South Gooding tracts by April 1, 1909.

COST OF MINIDOKA PROJECT

Made Public by Government Reclamation Service.

The official report of the entire cost of the Minidoka irrigation project under the supervision of the government up to the end of construction of the gravity system on both sides of the Snake river shows that the great project has cost complete \$1,780,818.41.

This includes all cost of every kind, including the great dam, the main canal and laterals, bridges and structures, right of way for Jackson lake reservoir, temporary Jackson lake storage works, telephone system, supervision, engineering expenses both in Idaho and Washington, as well as all expenses caused by the work in this state, and all expense preliminary to the beginning of work. The gravity system will afford water for the irrigation of between 70,000 and 80,000 acres, probably the latter figure, making cost \$22.25 per acre.

The expense of construction is divided into the following sub-heads:

- Dam, spillway, etc. \$10,032,462
- main north side canal, \$251,604.30
- main south side canal, \$149,712.67
- "A" branch and laterals, \$147,058.49
- "B" and "C" branches and laterals, \$233,632.60
- waste canal "D," \$21,238.20
- bridges and structures, \$50,043.86
- telephone system, \$15,729.08
- general force on account of the work, \$125,252.25
- right of way above Minidoka dam, \$29,706.41
- right of way for Jackson lake reservoir, \$3,167.78
- Jackson lake storage works, \$25,912.25
- expenses previous to construction period, \$66,682.84.

The total engineering expenses were \$179,729.97, while the expenses of administration were \$21,832.09. The last figure includes the cost of administration in Idaho and in Washington, all of which is added to the cost of the project.

Blaboo studio, Commercial and Savings Bank building, 1st floor, no stairs.

PREPARING FOR EXPOSITION

Severely Impeding Building Plans Completed.

SEATTLE, Wash., Nov. 10.—The \$350,000 worth of exposition bonds has "removed the last" obstacle to the success of the Alaska-Yukon-Pacific exposition and it is now certain that the 1909 fair will have the distinction of being the first big exposition to be entirely completed in time for the opening date. The process that is being made on the construction of the buildings and grounds is a guarantee that no detail will be left unfinished when the fair is formally opened June 1, 1909.

When it was announced that an additional \$350,000 worth of exposition bonds has "removed the last" obstacle to the success of the Alaska-Yukon-Pacific exposition and it is now certain that the 1909 fair will have the distinction of being the first big exposition to be entirely completed in time for the opening date. The process that is being made on the construction of the buildings and grounds is a guarantee that no detail will be left unfinished when the fair is formally opened June 1, 1909.

When it was announced that an additional \$350,000 worth of exposition bonds has "removed the last" obstacle to the success of the Alaska-Yukon-Pacific exposition and it is now certain that the 1909 fair will have the distinction of being the first big exposition to be entirely completed in time for the opening date. The process that is being made on the construction of the buildings and grounds is a guarantee that no detail will be left unfinished when the fair is formally opened June 1, 1909.

Already three of the permanent buildings are finished and are ready to be turned over to the University of Washington at the close of the fair. By the first of the next year the fourth permanent building will be completed and a number of the temporary structures finished. The mining palace and the fisheries building and the hospital and fire station are in use and the Oregon building, the first state building to be completed, is ready to be subscribed within a week after the shipment of its exhibit about January 1. The first consignment will be 3000 boxes of apples, which will be placed in the cold storage plant in the basement of the Oregon building until within a few weeks of the opening date.

Remarkable progress has been made on the construction of the California state building and this structure will be completed not later than January 1. Work has been commenced on the Washington state building, which is to be one of the permanent structures to be turned over to the University at the close of the fair.

The plans for the United States government building have been approved and the contract for the construction will be awarded in about 10 days.

Work on the grounds is in excellent shape. The site of 250 acres has been entirely cleared and graded and roads and paths laid out. Acres of green lawns give refreshing appearance and the mild climate of Puget sound will make it possible to transplant a great many of the more hardy flowers during the winter months. There are in all about a million plants in the green houses and when these are set out and in bloom the grounds will be a veritable mass of beautiful flowers, clinging vines and green shrubbery.

Ladies of the Maccaheas will meet Wednesday afternoon, November 18, at 2:30 in R. of P. hall.

SANGUINARY GAME ON THANKSGIVING

TWIN FALLS AND JEROME WILL PLAY FOOTBALL.
 Magnificent Array of Talent Secured for the Contest Which Will Be Conducted Right Out Loud in the Midst of the Sagebrush.

The Twin Falls and Jerome football team will clash in Twin Falls on Thanksgiving day. Elaborate preparations are being made for the impact which threatens to be a smashing affair. In order to give the players room, the Salmon tract will be used as a gridiron. All the physicians and surgeons in southern Idaho have been here to attend and the ambulance facilities will be ample. It is the intention of the management to use the coulees to drain away the gore. The contest will be conducted under Marqule of Gooseberry rules, which permit the use of anything from a baseball bat to a box of dynamite. Harry Allen seems to be the morning spirit in the game. Since the baseball season closed Harry has been suffering from ennui and his circulation is running down. He has been skrimbling around town and has succeeded in finding quite a bunch of retired football artists who have agreed to crawl out of their shells just once more for the glory of Twin Falls. Mark Murtaugh has signed to play center and Bob Rogerson will be found in the back field. The strength and strength of these giants, Jerome is going to put in a team of Sam Grant's mules. They are said to be great kickers and this is to be a kicking game. Assured, that he had the material to make good, Harry Allen sent the following deft to Bill Kinney, defender of the peace of Jerome.

Twin Falls, Oct. 28, 1906.
 Gilmore Kinney, Jerome, Idaho:
 My Dear Mr. Kinney—We have been getting busy over here on the football program and want to know if we can book a game with you people to be played here on Thanksgiving. We propose to play as near a professional team as we can get by using the local crowd, and we won't bar anything that you can dig up anywhere in your "neek of the woods." We would suggest that you get one of the steam shovels from the ditch line for center rush as we have an "infant" over here, weighing 265 pounds, that we expect to put in against you, and we would like to have something that would entertain him. Kindly give this matter your immediate attention, and oblige,
 Yours very truly,
HARRY F. ALLEN.
 Dict. HFA

Mr. Kinney refused to be scared. He came back with the following:
 Jerome, Idaho, Nov. 4, 1906.
 Mr. Harry F. Allen, Twin Falls, Ida.:
 My Dear Harry—Your letter of the 28th of October was received the other day and have given your proposition due thought. I will say that the North Side football team take great pleasure in accepting your challenge for Thanksgiving day. By the way, if you have any idea of your head that we are a bunch of sagebrushers. Yours truly,
"GIL" KINNEY.

Let those who have tears to shed prepare to shed them now. A slump in the hide market is already threatened.

EXTENSION OF TIME REFUSED
 Government insists on Payment from Delinquent Settlers.
 A special to the Statesman from Washington says that Secretary Garfield has announced that he would grant no extension of time to settlers on the Minidoka irrigation project in Idaho who fail to make their construction payments as required by law. There are many settlers whose first annual installment of \$2.00 per acre fell due December 1, 1907, but who have so far failed to pay up. They are allowed only one year to get under the law, but the secretary today served notice that all such settlers who fail to make their payments on or before December 1st next will be declared delinquent; their entries will be cancelled and they will forfeit whatever payments of any character they may have heretofore made. This does not affect settlers who have paid up as required by law. The secretary declined to grant an extension of time because to do so would establish a bad precedent, but more particularly because there is urgent need of more funds to complete the extension of the Minidoka project so that water can be supplied to settlers who are already located there.

Clay, Robinson & Co.'s Denver Market
DENVER, Colo., Nov. 9.—Receipts of cattle were rather light here this last week and the market worked higher every day. It was the highest it has been since early fall. Grass steers sold up to \$5.00 per cwt. and cows up to \$3.85. Receipts today were 5000 head of stock from 10c to 25c lower. Good cattle were not much off but canners and cutters and light weight, horned scores were dragged and fell to 25c lower. The top today was \$4.85 per cwt. at which price we sold some Wyoming averaging 180 pounds for R. E. Allen of Iron Mountain. Of the same gentleman we sold a load of mixed cows and heifers, weighing 800 pounds, at \$3.76 per cwt. This was also the top on cows for the day.

FARM TOPICS
 BY WILLIAM HEWES.

(This column is open to all farmers in Twin Falls county who desire to express their views on agriculture, horticulture or any other feature of farming. They are invited to relate their experiences in growing fruit, grain or vegetables, or in raising stock.)

We wish to again mention the great National Apple Show to be given at Spokane the first of next month. Apple exhibits will be sent there from all parts of the United States and a few foreign countries. The Twin Falls tract should be well represented there. Our exhibits will rank high in competition with the rest of the apple producing world. We do not necessarily need any more apple trees to make a good showing. This is a very young fruit producing country. The people who see our exhibits will realize this. Best samples will surprise those who attend this apple fair. Most of these people will be directly interested in apple culture. Many of them will be looking for investments in apple producing lands. Our exhibits will show them what our lands will do. Directly and indirectly it may be the means of sending many investors to our tract. There is another good reason—it will advertise our products and help create a demand in the market for Idaho apples. We have the soil, climate and land, but we must let the world know it.

Now is a good time to manure your garden for spring. It will save you time in the busy season.

Cinders make a very fine filling for a barn yard. They also make a very substantial walk. Fine cinders will soon pack until they are nearly as smooth as a pavement.

Have you stopped all the cracks in your barn? Your live stock will keep warmer and be more comfortable.

Vinegar will remove stains from eggs where water fails. Clean eggs command a better price and a more ready market.

Use poles for chicken roosts instead of your plows.

Don't raise weeds. They will not pay your interest.

A blinder in the shed is worth two in the rain.

Good soil is a bad place for a poor farmer but a good place for a good farmer. Our soil is too good to be injured by poor farming.

Notice for Bids.
 Sealed bids will be received by L. A. Pierce, clerk, Twin Falls Independent School District No. 1, until the hour of 1 o'clock Monday, November 26, 1906, for the furnishing and hanging of window shades for the Lincoln school building.

Shades will be required for all windows in the building except in the toilet and coal room.

Bid to specify kind of roller and ladder required to furnish sample.

Separate shades are required for the classrooms over the windows on the stairs.

Bidders are to take measurements from the building and be responsible for the same over the windows on the stairs.

Shades are to be fitted between the jambs.

The board reserves the right to reject any and all bids.

WANTED—Success Magazine requires the services of a man in Twin Falls to look after expiring subscriptions and to secure new business by means of special methods unusually effective; position permanent; prefer one with experience but would consider any applicant with good natural qualifications; salary \$1.50 per day, with commission option. FIRE PROTECTION FOR BUSY BUHL

Continued from Page 1.

Tuesday to keep in touch with the booming town of Buhl. Ho says it is growing so fast that unless he comes in occasionally to take his bearings he will be apt to get lost when he does come into town.

The second story of the new school house is finished and the trimmings will soon be put on. It will be ready for occupancy in about six weeks.

A. H. Anthony of Central City, Neb., was a Buhl business visitor Monday. Fred L. Southworth was in from his ranch Monday on business spent with Frodenberg & Overbaugh are erecting a building west of the City market on Main street to be used as a restaurant.

Ed Cause came in from Castleford Tuesday on a short business visit.

Mr. and Mrs. Thomas Dovy came up from Twin Falls Sunday and spent the time between trains visiting friends in Buhl.

W. S. Scruby of Des Moines, Iowa, was looking for an investment on the west end of the tract Monday.

J. H. Andrews of Twin Falls was a guest of Hotel Buhl Tuesday.

Mrs. D. W. Southworth spent several days of last week visiting friends in Buhl.

Several additional fire plugs have been put in the course of the extension of the water works system, so that we have ample fire protection for the time being, but we are growing so rapidly that further extensions of the system will be necessary as soon as the present one is completed.

J. Hartnett and L. L. Black purchased and gave intoxicating liquor to two minors Monday, the boys furnishing the money. The boys got gloriously drunk, and the men who gave them the liquor were arrested and fined \$10 and costs each by Judge Barstow.

The electric light fixtures are all in place in Hotel Buhl and ready for the tests, which will be here about the end of the week.

N. J. Chelino is building a large and commodious residence on his ranch a mile north of town.

NORDICA TO SING IN BOISE
Famous Artist Will Appear in Capital on November 23.

Madame Nordica, the famous prima donna, will be heard in concert at the Flanery theater in Boise on Monday evening, November 23. This will be her only appearance in this part of the country and orders for seats are already pouring in. It is sad to hear the people of Idaho have the opportunity to hear such a distinguished performer as Mme. Nordica at home and there will no doubt be many who will journey to the state capital for the concert. Mme. Nordica is peerless as a dramatic soprano and she is accompanied by other skilled artists of more than national renown.

INSTITUTE CARS TO BE SENT OUT

OVER ALL DIVISIONS OF THE SHORT LINE.

Exhibits Will Be Transported and Experts Will Accompany the Cars, Which Will Be Sidetracked at Every Station for Lectures.

The officials of the Oregon Short Line are arranging to send two farmers' institute cars over the entire route. One car will be used as a lecture room and the other will contain exhibits to be shown in connection with the lectures. The cars will be put out at every siding where the farmers are willing to congregate and experts from the Idaho and Utah agricultural colleges will give illustrated lectures on those subjects of most interest to the farmers in the various sections visited.

This movement was prompted by the desire of the railroads company to assist the communities along its lines in the production of high grade products which can be more easily marketed than those of lower grade. It will also be productive of uniformity in production and the growth of those products which the big markets most desire.

From the Utah Agricultural college at Logan, Utah, will come men who have made irrigation in the Intermountain region a study for many years and who are exceptionally well qualified to explain its workings to the Twin Falls farmers. The methods of irrigation practiced in Utah are similar to those in vogue here and their demonstration by the faculty of the Logan college should be very profitable.

Professor H. T. French of the Idaho experiment station at Moscow, one of the best authorities in the west on dairying and live stock breeding, has been invited to accompany the cars and participate in the institute work. The information which he is able to give on the breeding and feeding of sheep and swine should be eagerly sought by the Twin Falls farmers who have surplus hay on their hands.

The itinerary for the cars has not been arranged, but the preparations are well under way. Local organizations will be asked to co-operate in giving publicity to the institutes and to arrange dates at various points on the Twin Falls tract. There is no disposition to hurry the cars through the section of the country; the intention being to give all farmers the fullest opportunity to obtain all the information they desire.

The lecturer will be fully illustrated with stereopticon views and made as interesting as possible.

The best photos come from Blabow's.

THANKSGIVING PROCLAMATION

The president of the United States, in accordance with custom, by proclamation, has named Thursday, November 26, 1908, as a day of Thanksgiving to God.

The state of Idaho and its people during the last year have enjoyed a season of continuing growth and prosperity, and today the state is probably more largely in the eye of the business and investing world, and is developing more rapidly than any other of the surrounding states. Our material well-being is assuredly cause for thanksgiving.

Fortunately, our blessings are not measured alone by notable material prosperity. As people, we have been protected during the past year from pestilence and disease. Good health has been our portion, and peace reigns throughout our borders. We have been favored so abundantly by the Almighty that our hearts should go out to him in thanksgiving and praise.

Therefore, I now declare Thursday, November 26, 1908, as a day of general thanksgiving, and request that on that day, so far as possible, business shall cease, and the people shall assemble at their various places of worship and there give thanks to God for his manifold blessings during the past year.

Given under my hand and the great seal of the state of Idaho, at the capital, in the city of Boise, Idaho, on November 10, 1908.

(Seal) F. R. GOODING, Governor.
By the governor: ROBERT LANSBON, Secretary of State.

AND NOW COME THE PLUMBERS

Who Have Organized a Strong Local Association.

The plumbers of Twin Falls have formed a local organization for their mutual benefit and for the purpose of improving the grade of work by making it conform to the high association standard. Heretofore there has been no regulation system in the work and no attempt to standardize. Hereafter every job must conform to the standard and no loose work will be permitted.

J. T. Spanh was elected president of the new organization, Roy Craig vice president, L. D. Ham secretary and John Gregory treasurer. It will be known as Local Union No. 215, United Association of Steam Fitters and Plumbers of United States and Canada.

The worthy president and vice president, accompanied by Carl Van Dyke, went down Rock creek on a hunting expedition and bagged enough game to furnish a dinner for the members of the union which was served on Monday evening. There were lots of good things on the table and many appropriate toasts were given. The boys say the ducks laid down and turned up their toes when they saw the members of the union approaching. This accounts for the big bag. All the boys took with them was a bunch of blank bookheads and a little wire.

SUES SATURDAY EVENING POST

"Diamondfield Jack" Davis Claims to Have Been Libeled.

"Diamondfield Jack Davis" of Goldfield has entered suit in the United States court at Carson against the Curtis Publishing company of Philadelphia for \$250,000 damages for what he terms malicious libel. He complains that in a recent issue of the Saturday Evening Post, he is represented as the villain in a murder story, the scene of which is laid in Goldfield. The name of the villain is "Diamond Jack," and Davis says he is sure he is the person meant. The circumstances of the story are pointed out so minutely, he says, that the malice is evident. James Hopper, author of the story, resided in Goldfield for a time.

"Diamondfield Jack" had a varied career in Idaho, the most striking scenes of which were laid in what is now Twin Falls county. He was tried and found guilty of the murder of two sheepherders on Deep creek, about 25 miles southwest of Twin Falls. Bitter feeling existed between the sheepmen and cattlemen at the time and "Diamondfield Jack" was supposed to have been employed by the cattlemen to terrify the sheepmen into leaving the country. His trial occurred in Albion and he was convicted of murder in the first degree. The gulch in which he was to have been executed was transported to Albion with great difficulty. At the eleventh hour he was reprieved and later he was pardoned by Governor Hunt. The pardon was transported to Idaho with great difficulty. "Diamondfield" went to Nevada, where he acquired wealth in mining deals.

At the Tabernacle.

No one can afford to miss the strong gospel sermons which Evangelist Charles is preaching night after night. Under the subject of "Christ the Way" he refuted the old idea that unaccountable children could be lost. They are already as safe and pure as Christ himself. When man learns to sin then it becomes necessary for him to be won back to God. Christ is the only door by which men may enter God's kingdom of love. Just as we enter this life by birth so must we be "born again" to enter into the life of the next world. This birth is made possible only by a regenerated heart and a surrendered will. Sunday evening Mr. Clarke, who is a member of nine judges, dealt with "Fraternal Salvation." His thought was that the work of any fraternal order is incomplete until the lodge member has been led to enter the highest degree, that of a Christian life. Evangelist Clarke promises that his next Sunday night sermon will be his best yet delivered here, which means that it is worthy of a great hearing.
