PARISH, Entryman.

Notice to Show Cause Why Order of Probate Real Estate Should Not Be Granted. Probate court, county of Twin Falls, state of Idaho. In re: the matter of the estate of J. F. West, deceased.

I, J. F. Chamberlain, administrator of the estate of J. F. West, deceased, having filed his petition hereto praying for an order of sale of all the real estate of said deceased, for the purposes therein set forth, it is therefore ordered by the said court that all persons interested in the estate of said deceased appear before the said Probate court on Monday, the first day of February, 1909, at 10 o'clock in the forenoon of that day, at the court room of said Probate court, in the city of Twin Falls, county of Twin Falls, to show cause why an order should not be granted to the said administrator to sell so much of the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least once a week for not less than three weeks in the Twin Falls News, a newspaper printed and published in said Twin Falls county, Idaho, and that said publication be made on the first days prior to said first day of February, 1909. F. E. CHAMBERLAIN, (Seal) Administrator of Probate. Dated December 28, 1908.

An Invaluable Strawberry Book. We are just in receipt of a copy of the 1909 edition of R. M. Kellogg's "Great Crops of Strawberries and How to Grow Them." This book has already been translated into several languages and is cultivated, but this edition excels in practical value, as it is written in typographical beauty, all previous editions being in the form of a book, containing more than 100 beautiful half-tones, and in no other work has there been so much instruction as to the how and why of strawberry culture as we find in this book.

It is written in such a style as to make it readable by the amateur as well as all lovers of the strawberry, and it should be in the hands of all who wish to achieve the highest success with this most interesting of the summer fruits.

Not the least interesting feature of this book are the facts and figures it contains relating to the famous Kellogg farm in the United States, which the farm consists of 220 acres of as fertile land as may be found anywhere. Each year 100 acres of strawberries are raised on this farm, which were 292 miles of plants on the farm, which would make a continuous row extending from Chicago to Denver, and 28 miles beyond into Canada.

To cultivate these plants during the growing season of 1908 required that the new plants introduced from the west traveled 17,520 miles. What this means may be comprehended when it is understood that this equals five trips from New York to San Francisco, with 1,165 miles to credit on the sixth trip. The number of plants grown annually is somewhat in excess of 20,000,000.

To spray these great fields requires 22,500 gallons of material. To fence them requires more than 2,000 tons of material. It requires one ton of manure in 1907 alone amounting to more than \$1,700. Each fall these great fields are mulched with straw, and 350 tons of fresh straw are annually purchased for this purpose. In shipping these plants sphagnum moss is employed to protect and keep them alive, and this requires one ton of this material for this purpose. The annual postage bill of the company averages between \$7,500 and \$8,000.

As reflecting the comparative value of the Kellogg plants, it is interesting to know that, while the average production of the country over, according to the census reports, is one quart per acre, those who grow fruit from the Kellogg thoroughbred plants produce from 8,000 to 15,000 quarts to the acre. We find this in a copy of the statement from O. J. Wigen of 1903, B. C., that in the season of 1903 he picked 53,000 quarts of Kellogg berries from one acre.

Frank E. Steiner, the president and general manager of the R. M. Kellogg Co., is now preparing 30 acres on Buhl, Idaho, for the purpose of testing winter apples and intends to set out strawberries between the apple trees. He has invested \$40,000 in Twin Falls and he has the same confidence in this section of the country as a producer of winter apples, strawberries, plums, prunes and other fruits which grows here.

The R. M. Kellogg Co.'s wonderful strawberry plant farm is located at Three Creeks, Mich., and we advise our readers to secure a copy of this book if they would learn very much of value relating to strawberry production in all its phases. The book is free of cost to our readers who will ask for it.

Notice. A meeting of the shareholders of the First National bank of Twin Falls, Idaho, for the election of directors for the ensuing year and the transaction of such other business as may be brought before it will be held at its banking house on the 19th of January, 1909, at 7 o'clock P. M.

**MILL IS RUNNING  
 DAY AND NIGHT**

**KIMBERLY POWER PLANT AGAIN  
 IN COMMISSION.**

Interruption caused by ice in the  
 Turbine Wheel Has Been Eliminat-  
 ed—New School Building Opened  
 on Monday with Four Teachers.

KIMBERLY, Idaho, Jan. 6.—V. F.  
 Brecken has moved into his new  
 residence. He found that he thought  
 he did not have room enough so has  
 added a kitchen to the north side,  
 which has also large rooms and it is  
 the largest residence in Kimberly  
 and one of the best.

W. H. Thomas has been in Twin  
 Falls and Boise on business the past  
 few days.

The ice has melted enough in the  
 ditches so as to enable the power  
 plant to be put into operation again,  
 after being shut down for several  
 days on account of needle ice getting  
 into the turbine. The mill is now  
 running day and night and will fill  
 the orders as usual.

A. J. Dobbins, the bookkeeper for  
 the Wooster Lumber Co. at Kimberly,  
 was called to Poentelle to aid the  
 home office with the winter, 1908-  
 Year's business. He will return this  
 week.

Mrs. Mary V. Norton and daughter,  
 Miss Alice, who were Kimberly, de-  
 part Monday, went from here to Twin  
 Falls on business.

Wells Webster, Morgan Heay and  
 others were delivering fat hogs at  
 the Ogden parties Saturday. These were  
 shipped to Ogden.

Merritt Elgner and family are liv-  
 ing in the new cottage on South  
 Main street, which was built by Mr.  
 Cline. Mr. Elgner is over at Contact  
 doing assessment work on his mining  
 claims, which are very promising,  
 especially since the new railroad is  
 almost an assured fact, and will give  
 a ready means of transportation for  
 the copper ore.

John V. Tennant expects to start  
 for California this week, where he  
 has his property. He is getting old and  
 thinks the climate will agree better  
 with him than the winter. Here's  
 hoping that he will return to Idaho  
 in the spring with improved health.

The Woodmen dance on New  
 Year's eve was well attended and a  
 nice sum made for the lodge. Sou-  
 venirs were given and all had a nice  
 time. The lodge is still growing. W.  
 F. Hirschen is the new consul for the  
 ensuing year, and W. E. Carter the  
 new clerk. E. L. McIntire holds over  
 in the office of banker. Several new  
 members are being taken in and the  
 camp is in a growing condition.

School opened Monday in the new  
 building with four teachers. New  
 desks of the latest pattern have been  
 provided, and with the well lighted  
 and ventilated rooms will greatly add  
 to the comfort of the teachers and  
 pupils. The residents of Kimberly  
 district are proud of their school  
 building and they have a right to be.  
 The taxpayers have provided the  
 best of everything for the young  
 hopefuls, and it is up to them to  
 make the best possible use of them  
 now while they have the opportunity.

W. E. Lewis has sold 20 acres from  
 the east side of his ranch to Robert  
 J. Schubkegel for \$125 per acre. Mr.  
 Schubkegel will put the land to fruit  
 this spring. In fact, there will be a  
 very large tract planted to fruit all  
 around Kimberly the coming season.  
 Some are putting their whole farms in  
 trees, and almost every one is put-  
 ting out a nice family orchard and  
 expect to add to it later. The local  
 nurserymen report large sales, and  
 several agents are here representing  
 outside nurseries.

The recent funeral of Mr. Witt was  
 delayed at the grave by a coil falling  
 into the excavation. It took some  
 little time to extricate it and repair  
 the casket lining at the bottom. There  
 is talk of organizing a cemetery as-  
 sociation for this place, but that has  
 been up several times before and al-  
 ways ended by failure to agree on a  
 location.

The bride and groom—Mr. and Mrs.  
 H. D. Scott—are still receiving con-  
 gratulations of their friends. Mr.  
 Thomas, our miller, remembered  
 them in a substantial way by pre-  
 senting them with a barrel of Kim-  
 bery's best flour.

W. F. Brecken has been patterning  
 after Job these days. He started the  
 new year with a large fat check  
 which deceived his friends by sud-  
 denly disappearing after he had a  
 dentist. Since then his eyes have  
 been badly inflamed, badly bothering  
 him in his duties as postmaster.

The continued rain has been of  
 great benefit to the farmers for the  
 next irrigation season. The frost  
 was practically out of the ground  
 and most of the water soaked in and  
 less irrigation will be required next  
 summer.

Mr. Chalmers's son has been run-  
 ning one of the school wagons since  
 the holidays.

Workmen have begun moving the  
 largest of the old school buildings to  
 its new location on the west side of  
 Main street, where it will be remodel-  
 ed and occupied by J. F. Hogan &  
 Co. with men's furnishings, dry goods,  
 etc., as soon as completed. Mr. Ho-  
 gan was here from Hayward this week  
 and is getting anxious to get into his  
 new location.

The Odd Fellow lodge has received  
 a special dispensation from the Grand  
 lodge of the state and will be allowed  
 to take in new members for \$15 for  
 initiation fee for a time. Several  
 have already made application and  
 the local lodge will make quite a  
 growth in the next few weeks.

Don't forget the poultry show  
 dates, Jan. 28, 29 and 30, and the  
 place, too, the Orpheum, and then  
 whatever else you forget, don't forget  
 to come.

For building loans see Arthur J.  
 Peavey over First National bank.

**Big Wood River  
 Project**

**UNDER THE CAREY ACT**  
**Now Under Construction by J. G.  
 White & Co., of New York.**

This project adjoins the Twin Falls North Side tract on  
 the north and embraces some of the best agricultural and hor-  
 ticultural land in Idaho. Within its confines are farms which  
 have been developed for years and on which unexcelled fruit  
 is being grown. A portion of the segregation is now open for  
 entry and the remainder will be opened next spring. The wa-  
 ter supply is obtained from the Big Wood river, one of the  
 most dependable streams in the state, and the storage capacity  
 provided for is far more than sufficient for the lands to be  
 irrigated. Fifteen miles of the main canal has been complet-  
 ed, the diverting dam is ready for use and work is in progress  
 on the reservoir. Water rights cost \$35 per acre and there is  
 no better value for the investment.

TWIN FALLS NEWS

George B. Frazer, Editor.

Published every Friday by THE NEWS PUBLISHING COMPANY TWIN FALLS, IDAHO.

Subscription Rates.

One Year, in Advance..... \$2.00 Six Months, in Advance..... 1.00

Reliable information regarding the city and county promptly and cheerfully furnished. Address all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter, December 2, 1904, at the postoffice at Twin Falls, Idaho, under Act of Congress of March 3, 1879.

The Idaho Leader, published at Gooding by Lisle & Darbor, proprietors of the Shoshone Journal, is the latest addition to the southern Idaho newspaper family. The Leader was born with a full set of teeth and whiskers, being equipped in the very latest style mechanically. The fact that the owners of the paper are willing to install such a splendid plant as that possessed by the Leader is sufficient evidence of their faith in Gooding, and they will not be disappointed. The Leader has an excellent field and the men behind the paper may be relied upon to put forth every effort to keep that section of the state in the foreground of publicity.

Twin Falls should secure a special city charter from the Idaho legislature which is now in session. The restrictions imposed by the laws governing cities of the second class are hampering the growth of Twin Falls and have become well nigh intolerable to progressive citizens. Under these laws the city can only levy a tax of 10 per cent and it is denied control of its own revenues. Every public improvement is set back for 12 months, unless the people come forward and put up their money in advance, as they did in the case of the lateral sewer work this year. Every taxpayer in the city contributes to the street sprinkling fund in 1908 and 1907, whether they were benefited or not. This expense was a heavy drain upon the general fund, out of which it was paid. Under a special charter, the expense of sprinkling would be assessed against the property benefited and the city would be saved this unnecessary cost. Many other privileges which could be obtained through a special charter are now denied and the city suffers in consequence. Boise has been operating under a new charter for two years and its growth has been wonderfully accelerated by the change. Twin Falls can scarcely afford to wait two years for a charter. The population of the city will surely be doubled in that time and the charter should be obtained now.

The patrons, or former patrons, of the Bell Telephone Co. are in much the same predicament as the man who had the bull by the tail. They dare not let go and they do not know where they are going to land. Many of them would like to know how the fight started and who is responsible for the middle. All are willing to stand together and cut out the service, but they are puzzled to know what to do in the meantime. Should an independent system be instituted, it would be at least eight months before it could be put in operation, and to deprive a busy community like Twin Falls of telephone service for eight months would not be conducive to the public good. When an independent company was organized in Twin Falls in June, 1907, many of those who are now the loudest in their condemnation of the Bell service were the most outspoken in their opposition to the independent organization. At that time it was a difficult matter to get a franchise from the city council. No so now. No member of the council would have the temerity to oppose the wishes of the people. It may be expected that the Bell company will do all in its power to win back its patrons, and what will happen before another system can be built is difficult to conjecture. Meanwhile the people are standing firm, as they always do on all public questions, and there are no indications of a break on either side.

BERRIES THRIVE ON IDAHO SOIL

F. E. BEATTY TELLS HOW CROPS ARE OBTAINED.

The Twin Falls Soil, Being Rich in Plant Food, Develops an Unusual Fruit Bud System and Insures Great Crops of Berries.

The large correspondence which has come to me from readers of the Twin Falls News, influenced by my article on intensive cultural methods, shows that the people who are farmers in that section of the country are open to suggestions. The tone of these letters indicate that these people have enthusiasm, and it is to this class of people I enjoy writing. The fact is, a man must become enthusiastic in his business if he would attain to a high degree of success, and in no other way does enthusiasm show more forcibly than in farming. When a farmer becomes enthusiastic he will give much earnest thought in planning his work. Everything will be done at the right time and in the right way. Enthusiasm puts push and energy into a man, and wherever push and energy exist, intensive methods are assured. Scientists will agree with me that intensive farming is not so wearing upon the soil as is careless, halfhearted methods. The farmer is more profit from intensive farming. If this be true, why not settle down to business and get from each acre that amount of profit which soil of such richness is capable of producing. Bear in mind that the real, tangible value of any farming land is based upon the net returns per acre.

The winter evenings should be spent in planning as to what crops you will grow. Then order such seeds and plants as are desired upon; and in ordering these essentials, don't sacrifice quality for quantity. Study the experiment station bulletins, read the papers, and do a little experimenting each year yourself.

How to Plant Berries.

If the growing of strawberries should appeal to you, I would suggest your following either the hill or single hedge system. I make this suggestion because the soil of Idaho forces a heavy vegetative growth, and with the large amount of potash and phosphoric acid in connection with the nitrogen, it is only natural to suppose that the crown and fruiting system would be in proportion to the vegetative parts. When the hill system is followed in an irrigated country, I recommend that the rows be 36 inches apart and the plants set 18 inches apart in the rows. This allows sufficient space for the watering furrows, which should be made with a small shovel to prevent the throwing of dirt over the plants. With the hill system all runners are cut off before the young plants up. This treatment builds up a mammoth mother plant of great fruiting power. With the single hedge system the rows can be either 20 or 36 inches apart, and the plants set 24 inches apart in the row. When the mother plants become strong and well established, allow each to mature two runners and each of these to make one plant. Layer these runner plants in a direct line with the mother plant. Place them so that the plants in the row will be about 8 inches apart. This method requires the purchase of just one-half the number of plants that are required for the hill system.

Irrigation.

Two or three waterings each season should be sufficient, provided cultivation and hoeing is thorough. It is less necessary to cultivate than to irrigate, and many times more profitable. I might give my reasons for recommending the hill and single hedge system. First, it gives a winter plant with powerful fruiting capacity. Second, it allows the sun to strike all parts of the plant, which in turn gives a uniformly high berry of high color and rich flavor; also makes a firmer berry which will stand long shipment. Third, it increases the number of quarts per acre, developing the largest sized fruit, and making picking less difficult. I could give many other reasons, but these are the most important.

Winter Protection.

The plants should be lightly covered with straw, there the same as in the east. This covering will hold the plants dormant in the spring, preventing to a certain degree such early blooming as might endanger their being injured by frosts, which generally come at that time of the year. The mulch should remain over the plants until the plants start growing, at which time it should be completely parted over the row to make an opening for the plants to come through. This leaves the mulch close around the plants as the berries mature, where their weight will pull them down upon the clean straw, keeping the fruit free from dirt. This one feature alone will add largely to the net returns per acre, because anyone will pay more for bright, glossy, clean fruit than he will for fruit that is full from dirt and grit. The straw will in no way interfere with irrigation during fruiting time, as the water can run through furrows which should be made in the fall before the plants are mulched, and the furrows should be free from any straw. The mulch will hold the moisture, thus making less irrigation necessary. Too much watering at fruiting time will make berries soft and insipid. It is impossible to give complete instructions on strawberry growing in a single article. The book I have written on strawberry culture treats upon every department of the work. I will be glad to mail one free to any interested party who will write me at Three Rivers, Mich.—F. E. Beatty.

**PREVITIES**

Mrs. M. W. Kunkley visited during the holidays with her daughter, Mrs. W. F. Pike.

J. M. Bower came over from Dry creek on Monday. Mr. Bower said that he had been heavy fall of snow in the hills which would insure a good supply of water in the spring.

The Ladies' Aid society of the Presbyterian church will hold its regular monthly business meeting with Mrs. W. J. Young on Tuesday afternoon, January 14. A full attendance is desired.

C. T. Soreson, who was accused of passing worthless checks, was preliminary examination before Packard and discharged Monday. Evidence to prove that the checks were not good where issued.

M. R. Tennant, who was one of the engineers on the Salmon project, who went east to settle the estate of his father, returned from Denver on Sunday to look after his interests here.

Mr. and Mrs. Stanley Wilson have moved from Twin Falls to their new north-southwardly situated Trout spring, in the canyon on the north side of the river below Auger falls, where they have a beautiful home.

L. A. Nelson, assessor of Cassia county, was in Twin Falls this week, comparing notes with Messrs. McMillan and George Harlan. While on the way from Oakley Mr. Nelson packed a number of fat cattle from Rock Creek ranchman.

The Lincoln school was opened to the public on New Year's day. Hundreds of citizens visited the building of which they are justly proud. The members of the board of trustees showed the visitors about the building and gave them a hearty welcome.

George J. Cunningham has been appointed trainman for this division of the Oregon Short Line, succeeding C. E. Eldred, who has been transferred to Nampa. Mr. Cunningham came over the Twin Falls branch on Saturday, familiarizing himself with conditions.

George A. Wilson, the two-year-old son of Mr. and Mrs. G. A. Wilson, died at the home of the parents, two miles southeast of town, on January 7. A funeral took place from the residence this morning, under the direction of H. E. Hunt & Co. The heartfelt sympathy of the neighborhood was extended to the sorrowing parents.

Gus Vogelger of the Twin Falls Milling & Elevator Co. arrived on Thursday from Salt Lake City. From the amount of mail which he brought with him it might be suspected that he walked the entire distance, although he insists that he got it all on one Main avenue crossing. Mr. Vogelger is moving considerable hay and grain in southern Idaho.

One of the freight crews on the Twin Falls branch was taken off on Monday, January 13. The freight now leaves here at 7:30 a. m., arriving in Minidoka at 12:30 p. m.; leaving Minidoka at 1:30 p. m., and returning here at 6:15. The company does not expect heavy traffic until spring. The passenger train now leaves Twin Falls at 6:35 p. m., 10 minutes earlier than before.

H. A. Strand came over on Sunday from Jerome. He made the trip in one hour and took him half a day to thaw out and scrape the mud from his clothing. By special permission of the city council, he was permitted to remain in Twin Falls until Tuesday afternoon, with the distinct understanding that he was not to absent himself for more than two weeks at a time hereafter.

Mrs. May Jacobs will open a hair dressing and manicure parlor in the new Stover building on East Main avenue about January 20. She will lease the rooms on the second floor for office. Mrs. Jacobs proposes to equip her parlors in the most approved manner and will be prepared to do all the latest and most interesting styles. Privacy and prompt service will be her aim and she will cater to the best class only.

The people of Twin Falls will be addressed by P. Hiram Frank Draper of Allegheny, Pa., on Tuesday, Wednesday and Thursday, January 12, 13 and 14, at the Methodist church. The meetings will open at 7:30 p. m. "Some of God's Times and Seasons Outlined in His Word" will be one of the subjects discussed by Mr. Draper. Follow Christians, regardless of denomination, are most cordially invited to hear these lectures.

The opening reception given by the Twin Falls Grocery & Mercantile Co. in its saleroom, three doors west of the postoffice, on Wednesday, attracted hundreds to the new store. The big saleroom is as neat as a pin and the stock is displayed in a very effective manner. Patrons are interested in the new store, and the show window, which are hard to pass. The store was crowded on New Year's day, and the members of the staff received many congratulations upon their enterprise and the artistic manner in which they had fitted up their establishment.

Frank Smith dug his way into the trench beneath the Palace clothing store and invaded the office of the Broad Realty Co. by going under the building into the clothing store. A man was within the store but Smith got out in time to escape. He was accompanied when he went inside. Later the man was found, but evidence was not sufficient to charge him. The police are looking for the man, which the companions were living in the creek canyon and they think there is nothing in the world equal to Idaho land. The new firm has an office at 217 Main street.

**A. C. Coburn went to Shoshone and Halley Tuesday on business.**

Ralph H. Schneelech was over from Jerome on Wednesday for a few minutes.

John F. Hansen has been in the city most of the week attending the closing session of the outgoing board of county commissioners.

J. A. Fennell, the Boise architect, was over on Monday to see how the new school, designed by his firm, looked when completed.

Rev. A. Chamberlain will hold services in the Episcopal church on Sunday morning at 11 o'clock and on Sunday evening at 7:30.

Chief Engineer C. A. Tush of the Twin Falls Land & Water Co. returned on Wednesday from the east, where he had been visiting.

Mrs. W. O. Taylor and daughters have returned from Boise, where they visited Mrs. Taylor's parents, General Mrs. Holbert during the holidays.

Alex. McPherson left on Wednesday by way of Caldwell to attend the meeting of the State Horticultural association and the Pure Food commission.

President C. B. Hurst of the Twin Falls Investment Co. and W. M. Wayman of the Northwestern Investment Co. were in Twin Falls today looking after their interests.

J. W. C. Deake is moving into his handsome new residence on Blue Lakes avenue, which he has named "The Place." It is one of the most beautiful homes in the county, both without and within.

William O'Donnell died in Jerome on Monday, January 4. The body was brought to Twin Falls and prepared for shipment on Thursday to Dayton, Ohio, where a sister of the deceased resides.

Mr. and Mrs. Thomas Robertson are expected today from High Point, North Carolina. Mr. Robertson is a brother of Mrs. George F. Sprague and has accepted a position in the office of the Irrigated Lands Co. and will remain here with his family.

The Consolidated Wagon & Machine Co. has commenced work on the expansion of the splendid two-story building which it will erect on the north corner of Main avenue and Second street north. The basement will be the full size of the building, 70x125 feet.

Fred Volz returned last Friday from the east, where he conferred with President Bull of the Twin Falls Land & Water Co. on business matters. Mr. Volz said the estimates for the west of Salmon extension were now under consideration and it would require some time to pass upon them.

Rev. L. F. Stephens, who built the Christian church in Twin Falls and has since been around the world, returned this week after an absence of several months. Mr. Stephens has property in Twin Falls and thinks very highly of the project. He was greatly pleased during his absence.

The stockholders of the Twin Falls County Irrigation Co. met on Tuesday evening and elected officers as follows: C. M. Hill, president; S. H. Taylor, secretary; Carl Bahn, treasurer. It was decided to seed the cemetery plots with clover, to plant additional trees and to put in driveways.

George Green and Will Burgie have purchased the Majestic cafe, which is now being remodeled and beautified by Mr. Fred Will Burgie. The poolroom in front of the cafe and have now leased the entire premises. Walter Lenz is looking after the cafe and the establishment and he promises something extra good in the eating line when the changes are made.

The county commissioners have appointed W. O. Taylor to serve as a member of the building commission in Idaho and to take charge in place of Fred A. Volz, who asked to be excused for the reason that he would be unable to devote sufficient time to his work. The commissioners have fixed the compensation of the building commission at \$1500, to be apportioned as the members of the commission decide.

C. I. Minkler of Portland, Oregon, who with Mr. Miller came to visit Mr. and Mrs. C. B. Thomas, has purchased 40 acres on the Salmon tract. The purchase was made through Mr. Thomas, Mr. Miller's brother-in-law. Mr. Minkler, who thinks very highly of the Twin Falls country, which he had never seen before, was first prize at the Good Roads carnival in Portland with his driving team of 2:08 pacers. The team is the finest in the Pacific northwest.

Mr. and Mrs. R. C. Beach and son have returned from a delightful visit in Honolulu. They were accompanied by Mr. and Mrs. Thomas Costello, who went to Los Angeles for the rest of the winter. Mr. Beach said he and his family greatly enjoyed the voyage and were very favorably impressed with the hospitality shown them in the island city. Honolulu, said Mr. Beach, had a very progressive city and the promotion committee in that city is putting forth great efforts to attract attention to the wonderful resources of the islands.

Thomas Beach and C. F. Leonardson, two sturdy native sons of Idaho, have formed a co-partnership under the firm name of Beach & Leonardson, and have embarked in the real estate business. They are both farmers and they have unlimited faith in their native state and its future. Mr. Beach came to this section three years ago and taught school at Rock Creek. He is the only mistake he made was in not going into business in Twin Falls at that time. Mr. Leonardson is an enterprising young man who is thinking of nothing but the world equal to Idaho land. The new firm has an office at 217 Main street.

**MUCH DEPENDS ON WEST EXTENSION**

**EVERYBODY WAITING FOR ITS DETERMINATION.**

The Greatest Enterprise Ever Undertaken in the State—Would Change the Entire Map of Southern Idaho and Treble the Population.

Everybody in Twin Falls county is eagerly awaiting the decision of Frank H. Bull with reference to the extension of the Twin Falls canal system beyond the Salmon river to cover from 600,000 to 1,000,000 acres of the richest land in the state. Not only are the people of the Twin Falls tract vitally interested, but railroad officials have their eyes glued to the map of southern Idaho, watching developments. Business men hesitate to erect new buildings or enlarge their premises or stock farmers are undecided about disposing of their grain and hay. Everybody is waiting for the big undertaking, and when it is once assured beyond a doubt, there will be such a stir in Twin Falls as the town has never known.

It is difficult to comprehend what the value of the west extension means to the state of Idaho. In connection with the development work, it has been demonstrated that water for 1,000,000 acres is available. The river records, taken since 1895, show this to be an absolute fact. But to distribute this water over the area which it is proposed to reach is the most stupendous undertaking of the kind ever attempted.

To water the west of Salmon extension from the Milner dam will require a main canal 230 miles in length, the width of the canal at the Milner dam would be increased to 265 feet on the bottom and it would be 201 feet wide on the bottom at the Salmon river.

The opening of the Salmon river would be one of the most spectacular pieces of engineering in the history of irrigation. Three or four methods have been considered, but none favored at present being a cement slip channel more than 600 feet deep which would carry the flow of the canal across beneath the foot of the stream, leaving an outlet about 30 feet lower than the intake. Another method which has been worked out and is before consideration is the construction of approximately 26 feet square, with sufficient fall to make the crossing secure. To build this crossing would cost considerably more than \$1,000,000.

In making up his estimates, the company has figured on transforming the high line canal into a model of its kind. It cannot afford to risk any risk with that volume of water. A break would be disastrous. The building of such a canal would make Twin Falls south side water rights the best in the land. They are the best as it is, but with a young river flowing past the tract from end to end there would be simply perfection.

The moment the west extension is assured, the Oregon Short Line will begin to build from Malad to Burley, from Bull to the main line west and from Twin Falls to Idaho Springs. The Northern Pacific is also figuring on the development in southern Idaho is evidenced by its purchase of the Pacific & Idaho Northern from Meadows to Weiser, and the Dewey road from Emmett to Murphy. James J. Hill never lets an agricultural district within his reach get away. The Short Line surveys show that the distance by rail from Oxnard to Portland would be considerably shorter than by Twin Falls. It is estimated that the fast traffic would come this way. The cut-off to Wells would include the Nevada and California markets to the southern Idaho and would place us within reach of the seaport of San Francisco and the Panama canal.

All this development has been predicted since the inception of the Twin Falls project. The success which has attended the opening of the various Carey act tracts in southern Idaho has been the rapid with which they have been settled has caused a more rapid movement in railroad construction than would otherwise have taken place. The railroads have gone steadily forward as they originally planned. They are now putting in a big power plant at the Lower Salmon falls and will follow it up with others as necessities arise. Their electric road from Milner to Gooding has been completed to Jerome. That as they promised it should be by the first of this year, and it will be extended to Milner as fast as possible and transformed into a trolley line during the coming summer. Construction work on the Salmon river dam and canal system is moving as fast as anyone could reasonably expect, and there is no question that water will be ready for delivery on the tract next year.

The coming 12 months should work a wonderful change in southern Idaho as a Twin Falls citizen within the year be able to see the crest of its wave of prosperity.

**CHANCE TO GET FINE STOCK**

Sale of Registered Holstein Cows at Rocky Ford, Colo., Jan. 19.

The registered stock of the South Side dairy at Rocky Ford, Colo., will be sold at public auction on the ground, January 19. There are 60 head of thoroughbred, registered Holstein cows, bulls and calves in the lot, all of the best strains. The cows are all tested milkers of the finest type and also spongers, producers of many Twin Falls citizens are familiar with this stock and pronounce them equal to the best. Nothing is more urgently needed on the Twin Falls farm than good dairy cows, and an effort is being made to form a pool and buy a carload of the South Side stock for this season. Harder breed cows can easily handle double the amount of cream they are getting and there is no surer source of profit for the farmer.

**REPORT FOR MONTH OF DECEMBER**

John B. White & Bro. List your ranch with Twin Falls Realty Co. List your city lots with Twin Falls Realty Co. We have buyers for farms and city lots. Williams, Jones & Bolton. Furnished Rooms and Board—Mortell House, East Main ave., Twin Falls. Mrs. E. H. Smith.

# 12,000 ACRES

of Desirable Land still open for original entry under the Twin Falls North Side Land & Water Co's

Canal System under the

## CAREY ACT

on which water will be available for the irrigation season of 1908.

This fruit and farm land is all tributary to the towns of Gooding, Wendell, Jerome and Hilldale, which will shortly be connected by electric railway, on which the steel is now being laid. It is certain to double in value as have other lands under the same system. Several wells have been drilled, showing the water plain to be at a depth of from 100 to 300 feet, at which an abundance of the pure water is obtainable.

Excellent real investments and business opportunities are offered in the above towns, which are now rapidly building up. They have the advantages of electric light and power, railway facilities and the secure backing of a large and productive area of irrigated horticultural and agricultural land.

Terms, one-fourth down, balance in one, two and three years at 6 per cent. Land, 50 cents per acre; 25 cents at time of filing. Water rights, \$25 per acre; \$3 per acre down, balance payable in nine annual installments.

## 40,000 Acres of Magnificent Land in the Clover Creek

### Extension

Will be opened for entry next spring, possibly sooner. Watch for this great opportunity.

## ENJOYED WATCH NIGHT SERVICE

WENDELL CITIZENS GREET THE NEW YEAR.

Enjoyable Musical Program Rendered and Dr. Perry Delivers an Entertaining Address—More Business Enterprises Are in Sight.

WENDELL, Idaho, Jan. 3.—Good. T. Klingling, manager for the Western Lumber Co. at Jerome, visited in Wendell Sunday.

H. P. Blodgett of the Idaho Leader was a business caller here Tuesday. He is best in erecting a new residence on his lot in the north park of town.

J. W. Pittinger, proprietor of the Nampa nursery, was here on business Tuesday.

F. N. Uhrhau of Riverside was in town Monday. Mr. Uhrhau was well pleased with the progress Wendell is making.

E. W. Walker of Jerome was in Wendell Tuesday.

Wendell Bradley, receiver of the U. S. land office at Halley, was in town Saturday. Mr. Bradley was much impressed with the country around Wendell.

While helping to install the new engine at the well last week, John Williams had the misfortune to smash his thumb. He was taken at once to the local hospital.

The Wendell Hardware Co. is erecting a large warehouse on Main street. It expects soon to begin the erection of a fireproof store building.

The people of Wendell will soon be enjoying all the conveniences of a modern city. L. W. Glass, superintendent of the Idaho & Twin Falls Power Co., has established a camp of 12 men near here for the purpose of building telephone and electric light lines.

F. A. Brockett, principal of the Wendell High school, spent the holidays with Mr. and Mrs. H. E. Barrett.

J. A. Boss expects soon to build a residence on the lot which he recently purchased.

Rev. G. W. Barnes, presiding elder of the Methodist church for this district, was here last week making arrangements to hold the church meetings in the new home.

The Settlers Reclaiming & Operating Co. is having a large house and barn erected just west of town. Bert Schultman has the contract for the work.

Dr. McCombs of Iowa was in town Saturday looking for a place to locate.

E. J. Parr of Chicago recently bought 40 acres of land just east of Wendell.

Wesley Evans, Charles Deane and Mr. Helms came out from Chicago last week with three carloads of household goods and farm supplies. They have lived here two weeks.

D. R. Quinn of Chicago is having buildings erected on his ranch about two miles from Thousand Springs.

J. F. McKesson of Wisconsin is the contractor.

Bert Schultman is building a three-room bungalow on Third street for Dick Cookhillman.

Mr. Hopton of Spokane, Wash., was here last week looking for investments.

J. J. Buehler was here Saturday on business.

R. H. Trull and daughter, of Jerome, were Wendell visitors Saturday.

While in Jerome last week F. W. Hastings closed a deal whereby he received \$2500 for lot 3, block 85, in that city.

General J. J. Gilman passed through here New Year's day on the special train to Jerome.

F. W. Rieker is having a well bored at Ruckey Knoll this week. Mr. Rieker was severely kicked by a horse some time ago, but was able to be in town Saturday for the first time.

The following societies were sent to W. S. Kuhn, president of the Twin Falls North Side Land & Water Co.:

"W. S. Kuhn, Pittsburg, Pa. The citizens and Commercial club of Wendell wish you a happy New Year. We thank you for the railroad, canal and other acts beneficial to us." (Signed) Citizens and Commercial club of Wendell."

A Young People's society was organized at the Wendell church last Sunday evening for the purpose of holding services on those Sundays when we have no minister with us. A large number were present and great interest was shown in the organization. The following officers were elected: E. A. Kenney, president; J. N. Watson, vice president; Mrs. J. E. Barrett, secretary; Mr. E. A. Kenney, treasurer; Mrs. H. D. Jackson, organist; L. R. Hastings, chorister.

Engineer George Walter and his crew have moved their camp within

three miles of Gooding to finish the engineering work on that part of the canal.

Hoffman of Pocatello arrived Saturday to assist B. L. Barton in his blacksmith shop. Mr. Barton has been so busy that he was unable to stop here alone.

C. M. Cunningham and son of Minnville, Oregon, are visiting R. V. Wilcox and family.

On Thursday evening, December 31, a watch party was held at the Wendell school house. The night was ideal and a large number of people gathered to witness the old-fashioned and welcome new. Entertainment had been provided for the evening, so that the hours passed away almost before we were aware of it.

Refreshments, consisting of sandwiches, coffee and cake, were served. The following musical program was given: Piano solo, Mrs. H. D. Jackson; vocal solo, Miss Ethel Hastings; mandolin solo, Frank S. Reed; violin solo, K. M. Critchfield; vocal solo, Miss Blanche Watson; reading, Miss Eva Hastings; vocal solo, E. A. Kenney. Dr. Perry gave a short address, which was thoughtfully enjoyed by all. Receipts of the evening were \$25.60. This was turned over to the board of trustees to be used for school purposes.

On New Year's day the initial run over the new railroad from Gooding to Jerome will be made. The passengers were D. C. MacWaters, Major Fred Reed, Harvey W. Hurlbut, Dr. Higgs, Messrs. Bagher, Blodgett, Burkhead, Davis and others; also the general manager, general passenger and freight agent, traffic manager, and E. S. Jackson, engineer of construction. There were also several ladies in the party.

The train arrived at Wendell at 11 a. m., where it was greeted by lively demonstrations from the crowd assembled at the depot and in the streets.

The Commercial club of Wendell enthusiastically met the occasion. Major Reed gave a short address in which he welcomed the party to the new year. F. W. Hastings responded with a short talk and welcomed them to our city.

The party then stopped for a time to give the party a chance to look over the town. At the hotel a short address was made by Edward T. Barber. At Jerome the party was met at the depot and taken to the hotel, where they were treated to a turkey dinner.

Wendell was represented by H. E. Barrett, president; R. W. Wilcox, secretary, and L. R. Hastings, treasurer of the Commercial club; F. W. Hastings, F. A. Busse, A. J. Ferguson, Mrs. H. E. Barrett and Miss Blanche Watson.

"LET HER GO AS SHE LAYS" Parma News Reported to Be Terminus of Western Railway Extension.

It was learned from an authoritative source last Saturday that actual construction work on the extension of the Minidoka branch of the Oregon Short Line will commence within the next 60 days. The western terminus will be Parma, instead of Nyssa, as indicated by the previous surveys.

This route, by way of Roswell, will shorten the distance to the main line 15 miles, and it is said, afford a grade of less than 1 per cent for the entire distance from Minidoka to Parma.

The crew of engineers running the preliminary surveys removed camp on Saturday down the river from Gully to a point two miles below Glass hot springs, on the proposed line of the survey which will cross the Snake river east of the great bend and cut across the country to the Canyon country town.

A second crew of engineers is engaged in locating the line from Buhl to the mouth of the Bruncan canyon. The crew running the preliminary survey as soon as Parma is reached will then turn back and do location work, indicating the determination of the Short Line to rush the construction of the road.

The proposed route to Nyssa, which followed the south side of the Snake river, crossing near the Oregon town, has been entirely abandoned.—Boise Statesman.

Don't miss the poultry show, but try to be on hand every day and have the time of your life.

Firings of every feather will there be booked together.

Good bargains in land and city investments with the Don-Sprague-Reality Company. We also do a general livestock shipping business. Animals bought and sold. Office Bryan building, Main street, Twin Falls, Idaho.

"I don't believe the approach of Christmas brings you a single joyous anticipation," said the sweet young thing.

"Don't, oh!" replied the savage scholar. "Listen to my secret. That youngster on the third floor is sure to get a tin trumpet for a present."

"Yes?"

"Then he will get careless and leave it on the hall floor. And then I shall stop at it with both feet. Don't you call that a joyous anticipation?"

For terms, throughout Jersey bull, Terms, \$2.00. Samuel Woodhead, 3 miles north, 1/2 mile west, Twin Falls.

**Blue Lakes Nursery**  
150,000 of the finest evergreen trees of the leading varieties ready for orchard.

Our trees are propagated from young trees in the Blue Lakes stand, guaranteed absolutely true to name.

General line of fruit and shade trees; 75,000 good strong strawberry plants, 13 varieties. Nursery located north of the Orchards tract and 1/2 mile west of Blue Lakes boulevard.

## HABITS OF THE CUNNING COYOTE

ARE DESCRIBED BY CLAUDE T. BARNES.

Interesting Article in the Desert News of January 2, 1909, in Which the Characteristics of the Desert Pariah Are Outlined.

The Desert News of January 2, 1909, contains a very interesting article on the coyote, from the pen of Claude T. Barnes, in which are the following passages:

In Utah and the surrounding states, wherever there is waste land, there also is the coyote, awaiting after living things and running from them, winning his livelihood, not by courage and the muscular force that craves a rabbit, but by the fierce endurance that follows and then snatches down, but by (fearful) cunning aided by a stomach which is not at all particular. In fact, he respects nature's transition from wolf to a fox with less boldness of the one and less craftiness of the other. He is artful enough, however, to know that nature does not see him on an ordinary waste-land background as long as he does not move; and thus he will sit minutes at a time, watching you from some knoll, having every appearance of a bush or weathered rock. When he does move, it is with much deliberation, though he will take his favorite dog-trail, which even a gun shot will, at times, be unable to make him vary. Ordinarily, he trots easily—a habit inherited from the wretch with all the insouciance of a hoodlum and the cunningness of a thief. If you follow him, he jogs away, saying, "You are not worth the pursuit and return, he stops and follows you back with the curiosity of a Paul Pry.

Coyotes breed only once a year, the mating season being late in January; and the period of gestation, like that of the wild genus canis, is about 60 days. The young are born in dens, which are usually enlarged badger-holes along stream embankments or among the rocks of the hillsides. I once, however, found a coyote den in the middle of a plowed field just north of Layton. The hole was about eight feet long with two openings, the one at each end, and the entrance to the surface. Seven little coyotes were in it, and after the first scare they became quite playful until growth brought out their unamiable instincts. The young number from four to nine, and, in rare instances, more. They play about their den during June; desert it in July, and finally, by the first of August, shift for themselves. In this region, if the den is placed away from the frequented track of man, the young have every chance to reach maturity undisturbed, as there are few large animals about which would relish a coyote meal.

The food of the coyote is more varied than one would suppose. Of course, animal matter constitutes the greater part of its fare, but this is supplemented with some vegetable and fruit. In the desert lands of Utah, where there exists a sharp-toothed, savage fight from the start, the coyote is apt to devour anything that he can get in his jaws. He likes rabbit meat, but the desert rabbits are themselves hungry. He occasionally sniffs the presence of a bird's nest in the parching desert sands; but, when nothing better can be had, he pounces upon a lizard, which he gulps down whole. He will even eat the fruit of prickly pears (Opuntia) and mesquite beans, or stand on the hind legs and gather choke cherries and nutmegs. He becomes gaunt, leathery, almost savage; his sun-scathed hair stands up in stiff bristles and he looks dirty, sandy, worn away. He shuffles along as if weary, snapping his white teeth in the wild desert air as much at home as the three-toed sloth (Phrynosoma), which he devours.

Nothing reduces his craftiness better than the method he employs in capturing a rabbit. Two or three of them frequently trot along until a rabbit is sighted, when one of them starts at full speed in pursuit. The other two seek some knoll or elevated point from which they watch the chase and learn the general lay of the big circle in which the fleeing rabbit is bound to run. One of them waits off to meet it on its return, takes up the chase, while the first coyote roars. The race goes on, each coyote taking part until finally the exhausted rabbit is taken. The coyotes gather, and, contrary to their habit, have no discord in sharing equally the meal. Sometimes they also accomplish the task of capturing a bunny, yet I have never heard of the larger animal's forbidding the smaller from enjoying a portion of the prize.

A single coyote catches a rabbit by lying in bunches of grass or behind bushes near a regular run, and pouncing upon it as it wanders by; and as coyotes are usually alone, this is by far the most frequent method of capture.

The good the coyote does, by warning on these rodents, is inestimable; in fact, men who are most familiar with conditions in the west attribute the abundance of jack rabbits to the systematic destruction of coyotes.

The coyote is useful, also, as a scavenger, because cattle that succumb by the way-side in the outlying districts, and dead cattle and horses that are dragged out of town, are stripped to the bone in a single night, thus making the usual, lingering, deleterious stench impossible. I have seen a pack of them visit a slaughter house regularly, and each endeavour every scrap of refuse that the mangers were unable to carry off in the day. When thus prowling and quarrelling in the moonlight, they are few shots for a rifle, and it is an interesting fact that when one is killed, the others, if hungry, will return to

the spot of the lower animals scavenger. Not always is the coyote so praiseworthy in its habits, for, at times, it destroys not only domestic but also wild animals, and often assists man in his warfare against insects and rodent pests. Among them are weasels and skunks, though few people will regard the medicinal use of the latter as any thing so commendable as they may sometimes be. Skunks kill chickens as well as destructive rodents.

The coyotes do, however, destroy considerable game. Our California quail (Lophortyx Californicus) which runs about in the brush on the hillsides, are hunted by the whole pack of them, while grouse and wild ducks are captured on the nest, both birds and eggs being slobbered with a rollish, Coyote milk, and a regular patrol along the shore of Great Salt Lake, where duck shooting is good, there to capture and eat wounded birds.

In some parts of the west they capture antelope and deer in exactly the same manner that they chase a rabbit. They first seek out these animals; give little opportunity for such chases, and then it is much easier to worry a cow from her calf, Mr. Ernest Ingersoll, in the Populair Science Monthly, tells how a coyote attacked a doe antelope and her fawn.

Hens, ducks, geese and turkeys are slain with a craftiness that well shows the leading characteristic of the coyote. At times it lurks about in the woods or bushes until a few come near, when it seizes it at a bound. Turkeys, which are wont to ramble far afield in search of grain, grass, Coopers' make, and are the frequent victims of the coyote's cunningness. At other times, especially at night, it will approach farm buildings and hide about in the brush on the leeward side, and when satisfied that no danger lurks in the shadows, actually snatch chickens from their roosts in the barnyard. I have once having seen a coyote dash full speed into a yard, grab a chicken by the neck and rush away before anyone could get away from the spot. It is exceptional, for the animal is naturally more stealthy than daring, more wary than rash; therefore it must be conducted in a most judiciously manifested only in most thinly populated districts where the coyote is extremely hungry.

After repeated experiments on a farm near the lake shore at Kayaville, I am thoroughly convinced that nothing is quite so efficacious in keeping the coyotes away from the sheep as root at night as a lantern hung on a pole in a conspicuous place. A pack of a dozen or more, accustomed to feed and hide about in the brush, will not even approach when there is a light.

It seems that there are few farm animals that are finally, by the instigations of coyotes. Some people, for instance, lose every cat they take to the home, though just what the killing takes place is never known. A coyote will follow a sick animal for days. It will readily attack calves, cats, pigs, lambs and young goats; but as a rule in a very vicious beast when on the defensive, assaults upon a cow are seldom of much avail. The manner of taking calves seems to require more patience than courage, for, in every case that I have observed so far, the coyote was lying in thick weeds, watching at a distance of 50 or 60 yards, every movement of the cow and calf, waiting until the cow went to water or graze a safe distance away. Sometimes one or two coyotes, as many as 10, come from the neighborhood of a cow and calf, though each one of them usually appears to have been playing the same game. If a spring is killed by a coyote work together, waiting for it from the herd; and even then the attack is not always successful. I know a whole pack of coyotes, a full grown cow, for being unable to get at the throat without great danger, they keep pipping at the animal's legs until it falls from sheer exhaustion or loss of blood.

The resentment of most farmers towards the coyote rodents, however, mostly from its continual warfare upon sheep, is so intense and so thoroughly successful. In some districts, as, for instance, in Harbaceable canyon over the mountains east of Salt Lake, the mountain lion, bears and wild cats are fully as destructive to the sheep interests as are coyotes; but, considering the west as a whole, the coyote is undoubtedly the sheep man's greatest enemy. Worthless dogs, which kill thousands of sheep in thickly populated districts of the east, are of little economic importance here in the west, where enormous herds range in districts where the bark of the camp dog only sounds through the still night air.

The coyote's method of capturing sheep is similar to that used in taking chickens. He sneaks oftener than he dashes; but if a herder wanders away from his flock the wily fox takes immediate advantage by running straight away into the herd, but open the throat of half a dozen antlers and disappearing as suddenly with a lamb in its fangs. Sometimes, a single coyote will visit a sheep pen, "stake" it, and—adding light and left, as if tearing open their throats were a mere diversion, not a livelihood. At other times a pack of coyotes will stampede a sheep or two in the night time, and not only mutilate many, but, if possible, drive the whole herd over a precipice, where the dead bodies will be left in a pile to be eaten at leisure.

Poultry Association Meeting.  
The Twin Falls County Poultry Association will meet in the Commercial club rooms in Twin Falls on Saturday, Jan. 16, at 2 p. m. This is the last meeting before the show and a full attendance of the membership is greatly desired.

an entertained at dinner on Tuesday evening.

# BRADY SAYS GOVERNOR BRADY

### Chief Executive Sends Strong Message to Legislature in Which He Urges Enactment of Direct Primary and Local Option Laws, Advises Creation of a Carey Act Commission, a Public Utilities Commission, and Makes Many Valuable Suggestions in the Way of Needed Legislation.

Governor James H. Brady has submitted a strong message to the legislature, in which he counsels the fulfillment of the Republican party pledges. The message is filled with practical and progressive suggestions, none can mistake the governor's meaning. Concerning those questions in which the Twin Falls tract is principally interested, Governor Brady says: "The attention of the Senate and House of Representatives. The people of this splendid commonwealth have conferred a great honor upon me by choosing me as their chief executive for the coming two years. There is a full appreciation on my part of the confidence they have placed in me, and I hope by the guidance of an all-wise Providence to give to them such an administration as will redound to the credit of the state. I am glad to announce from every platform upon which I appeared during the campaign that I would do my utmost to serve the people of this state. I know a large number of you personally, and a goodly number of you intimately, and I feel no hesitation in saying to you frankly that I will never forget your confidence and advice in order to give to the people that which is their due—a just, conservative, economical and wise administration. Knowing you to be men of rugged honesty and lofty purpose, I have every confidence that you will extend to me that support to the end that together we will work for the moral and material uplifting of our state and the welfare of its Gem of the Mountains of which we are all justly proud.

#### Party Pledges.

There is one thing that every rugged mountaineer and honest plainsman of the west stands for, and that is personal honor and integrity in every man. This sense of honor and integrity is the basis of our party pledges. A political party has no more right to break faith with the people than a gentleman to betray his word. Personal honor and party honor are just as sacred as personal honor, and if you turn the leaves of history and read to you carefully you will know that it is in politics that men who have pursued any other course has ever left a favorable imprint upon any people, and it behooves the people in this state to see to it that every pledge made to the people is backed into law. By so doing we will insure a milestone in the history of this state that our children and future generations may look back upon with pride. I hope and believe that the republican majority in this legislature will fully meet the expectations of the people by redeeming every party pledge.

There is a republican government who want every pledge fulfilled will work with you to that end, and I believe that the republican majority on November 2, gave a vote of confidence to the republican party in effecting a good working majority at party to both branches of the legislature, and that is absolutely necessary for the people to pass. Knowing the bright and able men of men that the people have honored by electing to the present branches of the legislature, every confidence that you will enact equitable laws fully in plank in the Republican

will be this year Direct Primary.

For identical conditions in our country. The present standard of our citizen educational was never considered that it is a step in the wrong direction; to take in the affairs of state, and this time the former, then, the educating the masses have come to understand our form of government, which shall serve them in Men who 20 years ago were in political affairs and the man of the anti-union the worth of a cent that he stands for as in the result in a general all classes who believe should rule for a direct primary law giving the right to every office with his party is just and should be passed. The would give an opportunity to the voters to select their representatives untrammelled by caucus votes or caucuses, and that you that you give the subject consideration, that it be calmly and judiciously, as the in a vital part of our country. The people should be to express their preference. States senators, as well as county officers, and the law so framed that the other on the full protection of

the Australian ballot, the same as in the general election law. I desire to earnestly recommend the early passage by you of a direct primary law.

#### Local Option.

Owing to the fact that the local option plank was more fully discussed during our campaign than any other question, I feel it would be appropriate to allude to it. I desire to simply call your attention to that part of our platform referring to local option, in which it says: "We favor the enactment of an effective county local option law, so that the people in every county in this state can have the power to decide whether or not the liquor traffic shall be carried on within their respective county boundaries, and we pledge the support of the Republican party of this state to the enactment of such legislation which will bring about that result."

The duty of the legislature in this matter is to enact a law which will give our people a fair and equitable law carrying into effect the wish of the Republican party with reference to the control of the liquor traffic. Never do I believe that any one public or quasi-public corporation should be staged out in the provisions of such a bill when it comes to the regulation of our public service corporations.

There are 39 states in the Union that now have railroad commissions, but in studying the conditions and that no one of the 39 has made the substantial progress in the way of the development of their resources that has been accomplished in Oregon during the past four years. In order to maintain our leadership in state government and the development of our resources, it is declared that we should make proper supervision for all public service corporations in order that no great business may be permitted to operate to the injury of the public and the patrons.

In the state of New York last recently public service corporations were established by a commission and a commission of gas and electric utility, and after some years of experience Governor Hughes recommended and secured the abolition of the railroad commission and the creation of a public utility commission that has been of great benefit to the people of that state. In his message to the legislature of New York in January, 1907, in which he recommends the abolition of the railroad commission, he states this which I quote verbatim in accordance with my views that I quote portions of my recommendation of a public utility commission. He says:

"We also have a commission of gas and electric utility with board powers with reference to corporations engaged in supplying gas and electric current. In my judgment there is no need of two separate commissions to deal with these subjects.

"It is plainly in the interest of economy to designate in order to avoid the unnecessary multiplication of officers and clerical force that there should be but one commission, with powers relating to the regulation of the railroad commission, and the commission of gas and electric utility, and that a new commission be constituted, with powers relating to the regulation of the corporations now subject to the existing commissions. The commission should have all the powers possessed by the present commissions and such additional powers as may be needed to insure proper management and operation. The powers should be clearly defined and should embrace the power to act upon its own initiative as well as upon complaint; to examine properties, books and accounts; to require detailed reports in prescribed form; to prescribe reasonable rates; to regulate wholly and impartially; to provide for the safety of employees and for the protection of the public; and generally to direct whatever may be necessary or proper to safeguard the public interests and to secure the fulfillment of the public obligations of the corporations under its supervision. Provisions should be made for suitable inspection so that the commission may be advised as to all matters within its purview and be in position to take action on behalf of the people without the formal institution of proceedings by complainant. A prescribed questionnaire should be entitled to decide all questions and any one commissioner should be empowered to make investigations, and the commission should have the power, when approved by the board, should stand as its proceedings and decisions.

The corporation policy of disallowing to its officers and all other persons responsible for such disallowance, should be visited with appropriate penalties. The commission should be entitled to institute legal proceedings for the enforcement of its orders and all such proceedings should be expedited by the courts. The legislature should provide, within its constitutional power, adequate means for the enforcement of such and impartial regulations of these important public enterprises.

#### Horticulture and Pure Food.

The offices of state horticulturist and pure food commissioner have been combined ever since the passage of the pure food law in 1902. While much good has been accomplished, it is believed that the establishment of each office is now of such importance that it should receive the entire attention of the official in charge. It is believed, therefore, that these offices be separated and the pure food work be in charge of the board of health as recommended by the dairy food and oil commission. It is believed that the horticultural inspection is increasing so rapidly by reason of large plantations of new orchards that additional funds are required for the department. As I believe that the department of the state should be as nearly self-supporting as possible, some plan should be devised to raise additional funds within the industry itself, possibly through an acreage tax on orchards as recommended by the horticultural board. The pure food work should be in charge of a commission of agriculture acting through a commissioner whose duties shall be to assist in the agricultural work and to regulate the sale of farm lands now taking place, this office would be of great value. At the same time, the horticultural commission should be fully maintained upon your appropriations and call your attention to the proposal of creating this new office without recommendation.

#### Carey Act Lands.

One of the most serious problems confronting the state at the present time is the successful management of the Carey act lands. This department in the past four years has assumed greater proportions and has developed in a manner far beyond the expectations of its most earnest supporters. Congress has granted \$5,000,000 acres of land to our state to be reclaimed. There are 24 Carey act projects at the present time and approximately 1,300,000 acres have been applied for under the Carey act. From investigation and personal experience in the reclamation of arid lands I am convinced that we have reached a point where the state should be represented by men whose full time should be devoted to this subject. It is true that many contacts have been made by the state, and a few projects have practically been completed. However, the successful operation of these canals for many years in the future involves innumerable questions and details to be solved and worked out after the settlement of the land and after water is available for irrigation. These questions and details must all come before the land board for consideration and settlement. It can hardly be expected that the state land board, as now constituted, can give the time and attention that their importance justify. The state land board is composed of four state officers, whose primary executive duties in the management of state affairs demand all the attention they are able to give. These officials are with many other boards which deal with varied and multifarious subjects, and their duties are increasing from year to year. I believe that a Carey act board should be created whose duty it shall be to see that the estimated and allowed cost of construction of canals is equitable and fair, and that the terms of the contract are just as between the investor and the water user, and that contracts are executed in conformity with the laws and regulations. The law enacted should be such as to define the powers of the board, and should fix the amount of money to be paid before the canals can be turned over to the water users and make provision for the delivery of the canals to the water users.

There is no question that means so much to the welfare and uplifting of our state as the intelligent handling of these Carey act lands. The management should be in the hands of qualified men, whose full time should be devoted to the work. We must remember that the state is not incidental, but is fundamental. It is the foundation of our future development, and we cannot spread our hands beyond this land. Therefore, we should devote our best thought and energy to the development of every available acre of our arid lands.

I recommend that the governor be empowered to appoint a commission

the material property of the state depends in a very large measure upon a proper and adequate system of water laws. I believe the engineering department one of the most important of the state. We have today a system of water laws so efficient that it is being adopted as a model by other states. Through the operation of laws requiring water rights to be initiated under permits granted by the state engineer, over 5,000 permits have been issued and during the last two years the receipts of the state engineer's office have exceeded the expenditures by more than 100 per cent.

To the end that we may have accurate data touching the water resources of the state, it is necessary that a general light and durable flume for use in irrigated countries. Mr. Maginnis devised a method of coupling sections of galvanized steel without the use of solder or rivets which has proved eminently successful. The flumes are shipped in sections, knocked down, and can be set up by anyone. The beaded ends of the flumes are lapped together, the beads fitting into each other. The rod that is used in making the joint, and that also carries the weight of the flume, is placed in the band on the outside of the flume. The ends of the rods protrude through a cleat across the trough of the flume, which acts as a carrier being heavy enough to sustain the weight of the flume when filled. When the nuts on the

flume is placed in the band on the outside of the flume. The ends of the rods protrude through a cleat across the trough of the flume, which acts as a carrier being heavy enough to sustain the weight of the flume when filled. When the nuts on the

#### Irrigation Districts.

Several irrigation districts have been organized under the present law, and are included in the territory covered by the boundaries of the respective districts. The law is a good one, and has been of much benefit to the state. In some instances the law needs to be changed so as to simplify the mode of procedure in organization, and to make the bonds more desirable to the investor, thus making them more readily marketable. I will suggest to you that you change as I think will be beneficial both to the district and to the investor, and ask your careful consideration of the same.

One of the most serious problems confronting the state at the present time is the successful management of the Carey act lands. This department in the past four years has assumed greater proportions and has developed in a manner far beyond the expectations of its most earnest supporters. Congress has granted \$5,000,000 acres of land to our state to be reclaimed. There are 24 Carey act projects at the present time and approximately 1,300,000 acres have been applied for under the Carey act. From investigation and personal experience in the reclamation of arid lands I am convinced that we have reached a point where the state should be represented by men whose full time should be devoted to this subject. It is true that many contacts have been made by the state, and a few projects have practically been completed. However, the successful operation of these canals for many years in the future involves innumerable questions and details to be solved and worked out after the settlement of the land and after water is available for irrigation. These questions and details must all come before the land board for consideration and settlement. It can hardly be expected that the state land board, as now constituted, can give the time and attention that their importance justify. The state land board is composed of four state officers, whose primary executive duties in the management of state affairs demand all the attention they are able to give. These officials are with many other boards which deal with varied and multifarious subjects, and their duties are increasing from year to year. I believe that a Carey act board should be created whose duty it shall be to see that the estimated and allowed cost of construction of canals is equitable and fair, and that the terms of the contract are just as between the investor and the water user, and that contracts are executed in conformity with the laws and regulations. The law enacted should be such as to define the powers of the board, and should fix the amount of money to be paid before the canals can be turned over to the water users and make provision for the delivery of the canals to the water users.

There is no question that means so much to the welfare and uplifting of our state as the intelligent handling of these Carey act lands. The management should be in the hands of qualified men, whose full time should be devoted to the work. We must remember that the state is not incidental, but is fundamental. It is the foundation of our future development, and we cannot spread our hands beyond this land. Therefore, we should devote our best thought and energy to the development of every available acre of our arid lands.

I recommend that the governor be empowered to appoint a commission

the material property of the state depends in a very large measure upon a proper and adequate system of water laws. I believe the engineering department one of the most important of the state. We have today a system of water laws so efficient that it is being adopted as a model by other states. Through the operation of laws requiring water rights to be initiated under permits granted by the state engineer, over 5,000 permits have been issued and during the last two years the receipts of the state engineer's office have exceeded the expenditures by more than 100 per cent.

To the end that we may have accurate data touching the water resources of the state, it is necessary that a general light and durable flume for use in irrigated countries. Mr. Maginnis devised a method of coupling sections of galvanized steel without the use of solder or rivets which has proved eminently successful. The flumes are shipped in sections, knocked down, and can be set up by anyone. The beaded ends of the flumes are lapped together, the beads fitting into each other. The rod that is used in making the joint, and that also carries the weight of the flume, is placed in the band on the outside of the flume. The ends of the rods protrude through a cleat across the trough of the flume, which acts as a carrier being heavy enough to sustain the weight of the flume when filled. When the nuts on the

#### Irrigation Districts.

Several irrigation districts have been organized under the present law, and are included in the territory covered by the boundaries of the respective districts. The law is a good one, and has been of much benefit to the state. In some instances the law needs to be changed so as to simplify the mode of procedure in organization, and to make the bonds more desirable to the investor, thus making them more readily marketable. I will suggest to you that you change as I think will be beneficial both to the district and to the investor, and ask your careful consideration of the same.

One of the most serious problems confronting the state at the present time is the successful management of the Carey act lands. This department in the past four years has assumed greater proportions and has developed in a manner far beyond the expectations of its most earnest supporters. Congress has granted \$5,000,000 acres of land to our state to be reclaimed. ## Twin Falls County Directory

A book which should be on the desk of every business and professional man in the county and in the office of every business house doing business in this county.

It contains a complete list of all the business houses and residents in Twin Falls, Buhl, Filer, Kimberly, Hansen and Milner, together with the names of the farmers on the tract and the location of their lands.

It also contains a complete classified directory of the county.

### The Twin Falls County Directory is invaluable to:

- Lawyers, because they can turn to it in an instant and find the name and address of any business man or farmer in the county.
- Doctors, because they can easily find the address of patients in the country or in the cities.
- Real estate dealers, because it instantly shows them where every man in the county lives and where his land is located.
- Business men, because it will enable them to reach customers quickly and with certainty.
- Only a limited number of these directories are available. They are sold at \$3 the copy, but by

### Special Offer

The News has secured the entire issue and offers the directories on the following terms:  
Copy of directory and Twin Falls News for one year, cash \$3.75.

This applies on renewals as well as to new subscribers. The supply will soon be exhausted, as the directories are selling rapidly.

### BUNL BACHELORS ARE UNDISMAYED

CLUB REORGANIZED ON BETTER FOOTING THAN EVER.

Wall Company Decides to Drill on the South Side of the Railway Track. Where a Lot Has Been Secured—Firemen to Give a Grand Ball.

DULLE, Idaho, Jan. 6.—Jake Shank was a Twin Falls business visitor last week.

The Woodmen's dance was a great success, so was the supper given on the occasion of the Woodmen's ball. Ed Larson is going to sell his ranch at auction on the 12th. He intends to move into town and extend his merchandise business.

Mr. and Mrs. P. S. Marshall returned Monday from Salt Lake, where they had been visiting for several days.

George Sprague was up from Twin Falls yesterday on business connected with the investment com-

pany's affairs. In Buhl, W. M. Moley, the Twin Falls socialist, delivered a lecture on socialism in Woodmen's hall Saturday night and preached a sermon in the school house Sunday morning and evening. Mr. Moley is a pleasing speaker, whether discussing political economy or religion, and he was listened to with the closest attention by those present. He announced that he would speak in Buhl once a month from now to an indefinite time in the future.

The fire ladders are making elaborate preparations for a grand ball to be given for the benefit of the fire department on February 12. No pains will be spared to make it the most elaborate social affair that has taken place in the history of Buhl. The south side company, Captain Eliason, Captain Geer, to a race and water feat contest, which has been accepted. The stake is a banquet, the losing team to pay for it.

Jack Heath returned Monday from British Columbia, where he has been for three weeks looking over the country. He speaks well of that territory and predicts that it will eventually be the grain raising country of the world. He bought several tracts of land there and intends to go there to permanently reside.

E. W. Dilatah was up from Hager-

man last week. Going business in Buhl, Judge Urbahn is up from the River side ranch. He is visiting his numerous friends in this village. He invites us all down to a flower festival in Art and music next August. It will be in August. You bet, will be there, Judge.

Mrs. Grace Southworth was in from Fremont, but took on a shopping expedition.

Mrs. R. E. Bonham and Mrs. J. R. Stevens of Twin Falls were Buhl visitors Thursday.

Ray Branbury of Grace, Idaho, registered at Hotel Buhl Friday.

John Gaines of Mountainhome, Idaho, was a Buhl business visitor Thursday.

Mrs. Fred Gustin, Flossie Gustin and Caroline Purree of Hagerman were guests of Hotel Buhl Saturday.

Mrs. Lena Smyth, and Bessie Bently of Twin Falls were Buhl visitors last week.

Dr. P. F. Albee returned Monday from Utah, where he had been visiting during the holidays. Mrs. Albee and Master Joe are still in the territory of the saints.

The city grand met in regular meeting Monday night, passed a new sidewalk ordinance, received the reports of the officers and allowed some of the members to address the board to meet next Monday night to consider several applications for franchises which have been submitted to the board.

The management of Hotel Buhl has changed hands, M. N. Simons taking charge today.

The Ladies Aid will give a lunch at the Episcopal church Friday evening, the proceeds to be applied to the furnishing of the church.

Mrs. Beattie of Twin Falls and Stubbie of Seattle were in Buhl yesterday looking over Hotel Buhl with a view of purchasing that popular hostelry.

J. M. Hart and wife of Twin Falls were in Buhl Monday and visited John Hopkins. They also think of buying the hotel.

W. C. Snodgrass is in Twin Falls on business.

The site of the deep well has been changed from the south side of the railroad track to the north side, where the company purchased a lot. The work of boring will commence as soon as the machinery can be moved from the old to the new site and will be pushed with vigor for 1000 feet unless water is sooner encountered.

The news took occasion last week in reporting the marriage of two of the members of the Buhl Bachelors' club to shy a brick at the club by declaring that it was going to pieces.

This declaration the members of the club authorize me to indignantly deny and to give to the world the facts concerning the situation and condition of the club, so that the people may know. Therefore, the said declaration is hereby indignantly denied and the following are the facts relative to the condition of the club. It is admitted that the club has sustained several heavy body blows lately, and that it lost many prominent and valuable members last year, but it has also gained several new ones.

are on probation, and enrolled a number of full fledged members. But the losses of last year do not discourage us in the least, especially as we gained about as many as we lost. In fact, we are highly elated at coming out as well as we did. It must be remembered that last year was our year and therefore necessarily a hard one on the club, but now that the opportunity to lay is passed for four years more, it is reasonable to expect that the deserters will be few for a long time to come, and the members are jubilant and happy.

Therefore, however, that celebration is the price of independence, and that the enemy never sleeps, so the club took steps to strengthen its breastworks. A meeting was called for the night of the 1st and was well attended. The history of the campaign of last year was reviewed and notes taken of our losses and gains. This review showed that the enemy did not hurt us very much, there being but a comparatively few who did not respond to the roll call. The roll call showed all members of the old club, stand and true and without a scratch, and all in good standing. W. S. Harris called the meeting to order. A resolution was immediately offered to reorganize the club and start the new year with new rules and new officers. The resolution was unanimously adopted.

W. J. Tull was elected president, Ross Eliason secretary, Herman Goer secretary at arms, and Jake Shank secretary. It was a happy event. Every face shined with joy of the dangers passed and escaped and freedom still perching on our banners. It was an occasion long to be remembered by those who took part in it. It was a case of "on with the dance, let joy be unconfined." President Tull was chosen to the role of the noble Roman, made a similar one at the bridge. It was painfully intense in its loyalty and patriotism. The speaker's face shined with the spirit of freedom and single blessedness, and his Van Dyke whiskers shook defiance at the whole feeble population of the earth. His impromptu eloquence reminded his hearers of Patrick Henry's famous liberty or death speech, and some of the members whispered that he looked like Patrick himself. At the close of the speech the membership roster for the year 1920 was opened. At the top of the first page of the roster was written: "This roll is not for soft heads, soft hearts, or females. If you are weak kneed and cowardly, don't sign, but go away! Look and sign down," but not a man flinched or flinched. A mad rush was made for the president's desk, each member determined to get his name on the roll of honor. They all seemed to be as eager to sign the roster as were the members of the continental congress to sign the Declaration of Independence. After all had signed, it was found that the club was 35 strong and in a better condition than at any time in its eventful history. The president invited the members to a real old

man last week. Going business in Buhl, Judge Urbahn is up from the River side ranch. He is visiting his numerous friends in this village. He invites us all down to a flower festival in Art and music next August. It will be in August. You bet, will be there, Judge.

### STRAW VOTE ON INCORPORATION

WILL BE TAKEN NEXT TUESDAY IN FILER.

Rabbit Drive on New-Year's Day Results in Destruction of 1000 "Jacks"—Filer Team Challenges Any Team in County for Rabbit Hunt.

FILER, Idaho, Jan. 6.—While the rabbit drive on New Year's day did not attract such a crowd as that which attended the first drive, that sport was equally exciting and the results very satisfactory. About 30 men took part in the hunt, and it is estimated that fully 1,000 rabbits were destroyed. Filer is ready to meet any town on the tract in a team match, 35 men on a side. We would like to hear from Twin Falls or Buhl. Such a match should prove very exciting and there are plenty rabbits to work on.

A. A. Timm and M. G. Ripley have purchased the Filer Mercantile Co.'s store and expect to move to Main street in the near future.

Dr. Chas. W. Warburton was a Twin Falls visitor on Wednesday.

A straw vote will be taken on Tuesday, January 12, between the hours of 1 and 6 p. m. to ascertain public sentiment in regard to the incorporation of Filer.

Fred Meyer of Hendley, Neb., is visiting his brother, Frank Meyer, and expects to purchase land here before he returns to Hendley.

The mask ball, given by the Filer Dancing Club on New Year's eve, was a splendid success. Miss Rose Summers was given first prize for the neatest costume, second prize going to Mrs. H. Fisher. Claude Wagner won first honors for the best comic costume, Dick Davis taking second place. The club will give a calico and overall party on the night of January 14.

The Gloria Dare company and moving picture show, announced for Tuesday evening, did not materialize.

F. W. Shelton of Hagerman was a Filer visitor last week.

The big horse sale at the Turnpike ranch was postponed until Friday, January 8, on account of bad weather.

Sam Taylor, who had been working in Jerome, returned to Filer this week.

Mrs. and Mrs. H. Fisher moved into their new residence this week.

H. G. Munyon is preparing to erect a frame building, 24x60 feet, on the best lot east of the present location of the Johnson grocery. The building has been leased by Davis Bros. and will be occupied by the Pasture pool hall. Work will begin as soon as the weather permits.

G. H. Traill has purchased the Monmouth church property, including two lots. Mr. Traill says there is nothing like owning a church of your own.

Lester Aird was in Twin Falls, Monday on business.

E. J. Fink was a Twin Falls visitor on Monday.

Miss Hulda Schonek has returned home after a visit of four days in Twin Falls.

S. Claude Stewart has purchased a residence lot on Sixth street from H. E. Ravecroft. Look out for another new house in the spring.

### MILNER FORCE IS KEPT BUSY

IN THE OFFICES OF THE NORTH SIDE COMPANY.

George Rinker of Boise Appointed Watermaster on the Two North Side Segregations--Postoffice is Raised from Fourth to Third Class.

MILNER, Idaho, Jan. 7.--The year has started in with a bang in the North Side offices. The boys spend their days in the office now.

George Rinker of Boise accepted a position as watermaster on the two North Side segregations. Mr. Rinker accepted upon the condition that he should be paid \$100 a month. Mr. Rinker is a native of Boise and has been in the city for several years.

Postoffice is raised from fourth to third class. The postoffice at Twin Falls is now a third class office. This is due to the fact that the population of the city has increased to such an extent that it is necessary to raise the class of the office.

Parls stepped off in Milner on his return to Boise from the Salmon river dam. Parls is a native of Boise and has been in the city for several years.

Robert Climbore of the same town will visit his brother at the Riverdale Inn on her road. Climbore is a native of Boise and has been in the city for several years.

Mr. and Mrs. Frank Webb have gone to Logan, Utah, to visit friends. They were accompanied by their brother, Erwin Webb, who will recenter the Agricultural school at that place.

George Weldon of the Milner Drug store visited with his mother in Albion over New Year's. Mrs. Marie Ryan was the guest of her son, Mrs. Anna Bosley, in Twin Falls New Year's.

R. E. Nelson, postoffice inspector, was in Milner Tuesday checking up the accounts of the Milner postoffice, which was changed from a fourth to a third class office.

Mr. and Mrs. Frank Webb have gone to Logan, Utah, to visit friends. They were accompanied by their brother, Erwin Webb, who will recenter the Agricultural school at that place.

George Weldon of the Milner Drug store visited with his mother in Albion over New Year's. Mrs. Marie Ryan was the guest of her son, Mrs. Anna Bosley, in Twin Falls New Year's.

R. E. Nelson, postoffice inspector, was in Milner Tuesday checking up the accounts of the Milner postoffice, which was changed from a fourth to a third class office.

Mrs. J. W. Davis is very ill at her home in Milner. The Milner school has opened up again for the balance of the winter term.

Miss M. A. Boyle received the highest school she advertised last in the last issue of the News. It pays to advertise.

P. S. A. Beckel, chief engineer, is in Milner today on professional business. E. C. Klorsted and Vincent R. Cookburn were Twin Falls visitors Sunday afternoon.

Notice of Writ of Attachment. In the District Court of the Fourth Judicial District of the State of Idaho, in and for Twin Falls county.

T. D. Aker, plaintiff, vs. R. W. Steele, defendant. Notice is hereby given that on January 6, 1909, a writ of attachment was issued out of the above entitled court in the above entitled cause, attaching the property of the above named defendant for the sum of \$700.00, interest, \$100 attorney's fees and costs.

In witness whereof, I have hereunto set my hand and the seal of my office this 8th day of January, 1909.

H. T. WEST, Clerk of the District Court, by R. H. ROYS, Deputy.

A commercial traveler had taken a large order in the north for a consignment of hardware and ordered to press upon the cunning Scottish manager who had given the order a box of Havana cigars.

### PANIC AMONG THE BACHELORS

Caused by the Marriage of George Scott in Twin Falls.

That once proud organization, the Cassia County Bachelors' club, is ground hard and fast on matrimonial rocks and the few remaining members of the club are having either taken to the woods or are waving signals of distress. Buck Rice and Al Jones are reported to be in hiding. Johnny Maclean, Jim Steele, Andrew Rogerson and Jack Bratton have not been seen for some time. They were all stampeded on Monday, January 4, when George Scott, a staunch and true member of the famous organization, deserted and married Miss Rhoda Wallace. The escapement was performed in the office of Judge Chamberlain, and the bride and groom were the guests of Mr. and Mrs. Chamberlain at dinner.

There was a time when the dancing given by the Cassia County Bachelors' club were the social events of the season in this section of the state. But late schoolers soon found that the dances were proving costly to the organization. Almost every dance cost the club a number, and a short distance ahead of the club was with suspicion. When Nephtharson took unto himself a wife the bachelors shook their heads and reeled their arms, making them more binding. Another hard blow was sustained by the club when a bouncing boy was born to Mr. and Mrs. Louis Harrell.

The sight of the baby aroused strange emotions in the hearts of the bachelors, who began to realize that there was something lacking in their lives. Louis seemed to grow younger while his bachelor friends were more forlorn than ever. "Scotty" was one of the bulwarks of the club, and his defection is fatal to the organization. Moreover, Jim Steele and Al Jones are reported to be tottering, though the reports have not been confirmed. At all events the club is out of commission. What George Scott is one of the pioneers of this section of the state. He had a farm in the Salmon river canyon a short distance ahead of the dam site, which will be submerged when the reservoir is filled. "Scotty" is a man without an enemy. Courteous, big hearted and square as a two in all his dealings, he has the confidence and good will of all who know him. In a business deal his word is as good as a government bond. He was never known to desert a friend or to hang back when his help was needed. No traveler ever left his cabin during the illness and at the time of the death of our son and husband, Frank Halverson.

He could do to further the project but died cheerfully.

Mrs. Scott is a cousin of Mrs. Louis Harrell and has visited at the Harrell ranch for some time. To her and her husband the News extends its best wishes. If their married life is as happy as "Scotty's" position they will be fortunate indeed.

Money to lend on improved farms near Twin Falls. Henry J. Warren.

### DEATH OF FRANK HALVERSON

Proves a Cruel Shock to His Many Friends.

Frank Halverson, one of the most popular young men in Twin Falls, died on New Year's night of typhoid pneumonia. He had been ill for several days, and although his condition was critical at times, hope for his recovery was entertained until the last. The body was shipped on Saturday evening to Graden, the home of his parents, where the funeral occurred on Monday, January 4. The members of the Eagles, the Ironmen and the members of the city assembled in Milner's undertaking chapel on Saturday afternoon to pay their last respects to their beloved comrade and to escort his remains to the depot. They formed a very imposing line of march, each organization presenting its full strength.

Frank Halverson first became known in Twin Falls through his connection with the Stothard-West Harward Co., of which he was a member. He was a young man of cheerful disposition, kind hearted and loyal to his friends. He took great interest in the fire department, being one of the organizers of the volunteers. To his young wife he bore the sympathy of a host of friends is extended.

### BUILDING LABORERS ORGANIZE

As Branch of International Protective Union.

A branch of the Building Laborers' International Protective Union has been organized in Twin Falls with an initial membership of 25. The officers of the organization are: T. E. Bato, president; William House vice president; John Kahrs treasurer. Meetings will be held every Tuesday evening.

Familiarized with the organization are the hod carriers, mortar mixers and building laborers, of whom there are a large number in Twin Falls. With business building the aggregate cost of which will exceed \$1,000,000, now under construction, or about to be constructed in Twin Falls, the new organization will be a powerful factor in the growth of the city.

"We hope to be able to prevent friction between employer and employee," said a prominent member of the order. "Most of us have been through the war and we know what strikes and lockouts mean, not only to the workmen but to those dependent on them. With a harmonious understanding between ourselves and our employers, we can do better work and avoid needless misunderstandings which so often cause trouble."

Card of Thanks. We desire to express our sincere gratitude to the friends who showed their kindness toward us and aided us during the illness and at the time of the death of our son and husband, Frank Halverson. S. F. HALVERSON. MRS. FRANK HALVERSON.

## Carey Act Land

Under the Clover Creek extension of the Twin Falls North Side Land & Water company's canal system

WILL BE OPENED FOR ENTRY Monday, Feb. 8, 1909 At GOODING, IDAHO

The drawing will be under the supervision of the State Land Board and will begin at 1 p. m. and will be similar in character to previous Carey act drawings, preference being given to entrymen in the order in which their numbers are drawn. The cost of land and water rights under the Clover Creek extension is \$45.50 per acre, \$46 for the water right and 50 cents for the land. The first payment required is \$32.50 per acre, of which \$3.00 is applied on the water right and 25 cents on the land. The Clover Creek extension covers some of the very best land in Idaho. It is traversed by the main line of the Oregon Short Line, placing it favorably as regards market facilities; it is within reach of the great mining section of the state and it has the added benefit of free range adjacent.

IS LOOKING FOR ONION SEED. A. F. Shadel of Milford, Utah, has a Proposal for Farmers. A. F. Shadel of Milford, Utah, would like to have the Twin Falls farmers grow some onion seed next year, grows 24,000 pounds of seed. He wants 24,000 pounds of seed and he offers to furnish the stock from which the onions may be grown. From the stock thus furnished it will be possible for the farmer to grow three successive crops. A. F. Shadel would also like to have 30 to 40 acres of onions grown in the vicinity of Twin Falls. Milly (in horridly) Mamma--An Indian Milly--Yes; he don't be love there's any...
