Twin Falls County Directory. A book which should be on the desk of every business and professional man in the county and in the office of every business house doing business in this county. It contains a complete list of all the business houses and residents in Twin Falls, Buhl, Piler, Kimberly, Hansen and Alther, together with the names of the farmers on the tract and the location of their lands. It also contains a complete classified directory of the county. The Twin Falls County Directory is invaluable to: Lawyers, because they can turn to it in an instant and find the name and address of any business man or farmer in the county. Doctors, because they can easily find the address of patients in the country or in the cities. Real estate dealers, because it instantly shows them where every man in the county lives and where his land is located. Business men, because it will enable them to reach customers quickly and with certainty. Only a limited number of these directories are available. They are sold at \$3 the copy, but by Special Offer. The News has secured the entire issue and offers the directories on the following terms: Copy of directory and Twin Falls News for one year, cash \$3.75. This applies on renewals as well as to new subscribers. The supply will soon be exhausted, as the directories are selling rapidly. Get a copy before they are all gone. News Publishing Co. Twin Falls, Idaho.

FOR BUILDING LOANS AND SECURED PEAVY OVER FIRST NATIONAL BANK. WANTED—\$1,000 at 12 per cent interest for one year; \$3000 security. Apply W. S. Harris, Buhl, Idaho.

ALFALFA AND CLOVER

(By F. Lee Johnson, Murtaugh, Ida.)

The farmer of today is far in advance of the generation before him. He has realized that the farmer of the future will be the man who looks to science for his help...

The farmer today is studying to raise the maximum in crops and to make his farm better, instead of taking all he can force from the land regardless of the future. He is studying plant life and crop rotation as never before...

Throughout most of this section of the country more alfalfa is raised than clover, but in few places indeed does red clover seem to be more thoroughly at home...

Of alfalfa it can be said that it is the most important and most profitable crop grown in the irrigated west. Our best alfalfa seems to be the natural home for the enormous root growth of this drought-resisting plant...

It is to supplant the great ranges of our land, which are falling away, that a great future is awaiting alfalfa. Our best alfalfa seems to be the natural home for the enormous root growth of this drought-resisting plant...

less homes are being made prosperous and by far better stock is being bred and raised on the farm than on the range...

Our soil is of such a nature that alfalfa of proportion will not grow as well as either alfalfa or clover, but we should not let this fact keep us from putting our land in good shape and doing it...

This far most of our fields have been seeded alone, and for now land is the best, but on land that has been cropped several seasons successful seedling has been done by grain. While some prefer sowing alone on unplowed stubble, this is often the best method on sandy soil...

The wheelbarrow sowing is the best, followed with a light harrowing, fringing corrugations should be from 20 to 24 inches apart, not more than 10 to 12 inches apart at the head of water, and run on such a grade that the water can stay in them to the end. Don't run up and down hills...

Many farmers have found out that by watering the fields before cutting alfalfa, the alfalfa will be better. It is also a fact that early cutting seems to check the growth loss in the plant, thus hurrying along the following crop...

It is to supplant the great ranges of our land, which are falling away, that a great future is awaiting alfalfa. Our best alfalfa seems to be the natural home for the enormous root growth of this drought-resisting plant...

of hay in a good feed rack is worth one or three times in the mud. Feed racks don't cost money; they save it. Time to Cut.

The most important point to be considered in making alfalfa or clover hay is its feeding value. It is well known that protein is an essential element in the food of both man and beast...

Experimenters in the Kansas experiment station in regard to the value in protein of alfalfa cut at different stages show the following results: One-tenth in bloom, 18.5 per cent protein. One-half in bloom, 17.2 per cent protein.

Full bloom, 14.4 per cent protein. This is very interesting when taken with another experiment conducted at the Utah experiment station, which determined its feeding value for beef cut at different stages, with the following results: In first bloom, produced 3.55 tons of hay...

In full bloom, produced 4.50 tons hay, 622 pounds beef. Half bloom fall off, 4.55 tons hay, 410 pounds of beef. This shows a gain of nearly 50 per cent for early cutting over late, with much less hay to handle.

It has been contended by many good feeders that a prime beef or mutton could be produced by feeding alfalfa with a ration of small grain that would rival the corn-fed product. One of the interesting features of the western stock show being held in Denver this week will be the exhibits of alfalfa and corn...

A steer fed in this way will produce a larger per cent of meat and a smaller per cent of tallow, with quality and flavor unequalled, so both feeders and killers are anxious to know the outcome of these trials. For many years a great number of beef and mutton have been raised on alfalfa hay and beet pulp and have given satisfaction to the feeder, killer and consumer...

While it is a well established fact that animal life depends so largely upon its supply of protein, and that alfalfa and clover can supply such quantities of it, it is well known that they can be grown under such varied conditions and over such an extended territory, it is indeed the leading factor in the present development of the stock raising industry.

But whatever can be said of its usefulness as a forage plant for the animal kingdom, they are after all only by-products as compared to the alfalfa plant or feeder for the plant kingdom, for all plants must have nitrogen to thrive and can only use it through their roots.

The fact is well known that for ages past the farmer has been applying, in varying quantities, fertilizers containing more or less nitrogen, and it is well known that wherever they would and save what they could, the fact is becoming more painfully evident every day that the world, as far as manufacture and commerce are concerned, is in sight, and many writers have graphically portrayed such a famine as a catastrophe through their roots.

Outside of the limited supply of fertilizers manufactured containing nitrogen, the commercial supply of this element is derived from the east of South America. In 1890 all export investigators claimed that the supply would last for 1500 years. So great has the demand become for this element that the deposits will be exhausted in less than 40 years.

If all the crops and animal life that would be lost from the farm, the loss of nitrogen could be prevented. This is plainly shown by the practical stockman who feeds all his calves and most of his cows on alfalfa and fertilizer year after year and gets maximum yields of crops in return. But the average farmer does not do this and his farm gets poorer and poorer...

This is what the good alfalfa saw who would have the country see his warning cry went out to England and he said: "Nothing will more certainly consummate the ruin of England than the loss of nitrogen." It means the scarcity of food. It is impossible that such a shift of the alfalfa fields of nature should occur without the loss of nitrogen. It will probably come for England sooner than for any other country...

Few at that time gave a thought to the fact that the nitrogen of the world was becoming more exhausted each year. The Best Fertilizer. Necessity has been called the mother of invention and can be called the mother of progress. For years some of our greatest students have been looking for the remedy and the remedy "The Best Fertilizer" has been found. It is a simple, uncomplex, starting process. Few men indeed have been able to see the value of this world were becoming more exhausted each year.

Protein, which is the foundation of life, is just as essential in the production of meat as it is in the production of milk. It is a certain portion of protein to keep up the flesh and tissue of the body. She must have the food that can supply enough for the use of the cow and to produce a profitable amount of milk, and no hay yet made equals alfalfa and clover alfalfa taken lead. When practicable it should be accompanied with a certain ration of other roots, such as beets or carrots.

In many places, where alfalfa is cheap and grain is high, the greatest profit can be made from feeding hay, but where alfalfa is high and grain is low, the greatest profit is made from feeding alfalfa. This produced is of the best quality and flavor, equaled only by green pasture.

It is a noteworthy fact that the great showing of alfalfa in the world at our national fairs and exhibitions has been greatly aided by alfalfa. It is a large portion of the prize-winning stock has been raised on alfalfa. It is a fact that alfalfa is so common to so many, yet so little understood and so little appreciated.

For pasture, alfalfa or clover alone makes good horses or beef, and does it best to let it get into full bloom, and many good horsemen say feed it with from one-third to one-half of clover. It is a fact that alfalfa is so common to so many, yet so little understood and so little appreciated.

DAIRYING (By Prof. J. H. Franzen, University of Idaho)

That dairy farming is a profitable business is fully shown by its marvelous growth during the past decade. No other branch of agriculture has made so rapid an advance in the same length of time. Its growth has been universally noticeable in all parts of the country.

By carefully testing and weeding out the poorest cows the people of Denmark in five years have succeeded in raising the producing capacity of their cows from 1000 to 1500 pounds of butterfat, or an increased profit from each cow of over 12%.

There are many advantages in having the cows come fresh in the winter when all dairy products sell at high prices. In Idaho butter is fully 50 per cent cheaper in winter than in summer.

However, in addition to this direct profit we must not fail to lay our stress on the importance of dairying in retaining the fertility of the soil. In feeding the raw material of the farm to the dairy cows, we are not only manufacturing high priced products, but we are retaining upon the farm almost the entire amount of fertilizing material found in the feed.

After separating the cream should be quickly cooled to a low temperature. The best method for doing this is to place the cream in a deep can; set this in cold water. Stir with a stick until the cream is about the same temperature as the water. Warm cream should never be mixed with cold cream. Warm cream causes the temperature enough to lessen the efficiency of the souring bacteria.

Some one has well said: "Clean cream, rich cream and rich cream are the three essentials of a good producer of good cream." There is always a demand at the highest price for cream of this quality.

Many of Idaho's rich cows do not come up to a fair standard. It is perhaps safe to say that one-third of all our cows are milked at a loss. It is a fact that alfalfa is so common to so many, yet so little understood and so little appreciated.

Money to lend on improved farms in Twin Falls, Henry J. Wall.

GOVERNMENT LAND Now Open for Entry Under the Carey Act. Irrigated at low cost. To reach land: Go to Shoshone, via Biggs, on the O. R. & N. Ry. thence by stage, via Madras, to Bond, Oregon. Write to Deschutes Irrigation & Power Co. BOX 2, BEND, OREGON for application blanks and booklet.

PROVED A BOON TO NORTH SIDE

CANAL SYSTEM WITHSTANDS THE FLOOD TEST.

Completed Ditches Carry Flood Waters Beyond Their Estimated Capacity Without a Break—Only Slight Damage at Unfinished Crossings.

Jerome, Idaho, Jan. 27.—The gates of the main canal for the second segregation of the North Side tract have been opened and the water has now reached Sugar Leaf butte, a distance of 23 miles. In the section of canal where the water is now flowing are 4 1/2 miles of rubble wall which is from 18 to 25 feet in height. This wall has stood the test perfectly, being as tight as a drum and as solid as a rock.

to Jerome. Seven cash registers have been ordered and will arrive in a few days.

James Grant has a new jail which will be 16x23 feet. The board of directors passed on the resolution on Tuesday evening.

The Jerome Commercial club has been organized. The first meeting on lot 1, block 75. If the club goes ahead and erects a stone, brick or concrete building the company will present it with the above mentioned lot.

Donald Grant is building a residence for his daughters on their land near Wendell. Several other men are also building fine houses of 8 or 10 rooms just north and east of the Shoshone falls, where he has a desert claim, which is to be irrigated by the North Side canal, and where he has drilled a well and started a nice orchard last summer. He has invested 250 acres to be cultivated this spring.

The Jerome Commercial club has started operations regarding building a new school. The investment company has agreed to co-operate and build walks in front of the lots that have not yet been sold. Walks will be placed on the principal streets from the depot to Main and along Main street.

SCHOOL NOTES.

No new cases of scarlet fever having developed in the town, most of the children who were being kept out on account of the scare are returning to school.

Most of the school wagons are running now.

The public is cordially invited to the following program which will be given by the High school at 2:30 p. m. on Lincoln's birthday: Recitation—Hymn of the "Lion and the Unicorn"—School Paper—"Lincoln's Boyhood"—Fred Jayno Paper—"Lincoln's Boyhood"—Photo solo—"Lincoln's Boyhood"—Readings—"Gettysburg Address"—Paper—"Lincoln, the President"—Recitation—"Lincoln's Boyhood"—Vera O'Connell Paper—"Lincoln's Boyhood"—Newspaper—"Lincoln's Boyhood"—Hazel Lilly.

Resolution "To Captain, My Captain"—Lena Eckert Song—"America"—Mrs. Gibson. Appropriate exercises will be carried out by each of the grades at the same time.

Choice Acreage Property

Advantage the townsite of Jerome. On Thursday afternoon, February 11, commencing at 1 o'clock, 200 acres of choice land adjoining the Jerome townsite will be sold in Jerome, Idaho, in parcels of 2 1/2, 5 and 10 acres, each at auction from \$150 to \$250 per acre, according to quality or location. Terms, one-sixth cash and the balance in five annual payments with 6 per cent interest. The purchase price includes the water right and the annual maintenance charge per acre for water distribution which will be provided over the entire tract to be subdivided. The same will be draining under the same conditions which attach to Carey land holdings. The person desiring to purchase will have first refusal. All prospective purchasers will be required to register and a deposit of \$100 will be necessary with each registration. No one will be allowed more than one registration number, but registrations can be made and voided at pleasure by power of attorney. The registration books will be open several days in advance of the drawing. No residence will be permitted on these tracts. For a full list of those who desire homes and orchards with city conveniences, this is an excellent opportunity. Electric light, power and the purest of water for domestic purposes are available. The company has ordered 12,000 trees, the major portion of which will be planted on the tracts to be sold. For further particulars address TWIN FALLS NORTH SIDE INVESTMENT CO., Jerome, Idaho.

Dan McCook Post No. 33, Department of Idaho, G. A. R.—Order No. 1.

All members of Dan McCook Post No. 33, G. A. R., with their families, will report at the Dan McCook hall in Twin Falls, Idaho, at 10 o'clock, February 12th, 1909, to celebrate the one hundredth anniversary of our martyred president, Abraham Lincoln. All ex-Confederate soldiers and their families are requested to be present and participate in the exercises of the day as soldiers of the State of the American war and all members of the army who are not members of the G. A. R. and families.

JAMES W. SHIELE, Commander.

H. SCHMALLHAUSEN, Adjutant.

Woman will come to your home and sew for \$1.25 per day. Address Mrs. Catherine, Twin Falls.

The purchase price includes the water right and the annual maintenance charge per acre for water distribution which will be provided over the entire tract to be subdivided. The same will be draining under the same conditions which attach to Carey land holdings. The person desiring to purchase will have first refusal. All prospective purchasers will be required to register and a deposit of \$100 will be necessary with each registration. No one will be allowed more than one registration number, but registrations can be made and voided at pleasure by power of attorney. The registration books will be open several days in advance of the drawing. No residence will be permitted on these tracts. For a full list of those who desire homes and orchards with city conveniences, this is an excellent opportunity. Electric light, power and the purest of water for domestic purposes are available. The company has ordered 12,000 trees, the major portion of which will be planted on the tracts to be sold. For further particulars address TWIN FALLS NORTH SIDE INVESTMENT CO., Jerome, Idaho.

Dan McCook Post No. 33, Department of Idaho, G. A. R.—Order No. 1. All members of Dan McCook Post No. 33, G. A. R., with their families, will report at the Dan McCook hall in Twin Falls, Idaho, at 10 o'clock, February 12th, 1909, to celebrate the one hundredth anniversary of our martyred president, Abraham Lincoln. All ex-Confederate soldiers and their families are requested to be present and participate in the exercises of the day as soldiers of the State of the American war and all members of the army who are not members of the G. A. R. and families. JAMES W. SHIELE, Commander. H. SCHMALLHAUSEN, Adjutant. Woman will come to your home and sew for \$1.25 per day. Address Mrs. Catherine, Twin Falls. LOST: At Skatting ring, a pair of gold earrings. Address Mrs. Augusta Zelstra, Twin Falls.

he planted last year with oats and his fields will require very little re-planting in the spring. It is his intention to grow the clover for seed. Judge Corcoran has a splendid record on his ranch and his place is an ornament to the tract. John O'Neil has arrived from Hamilton, Montana, to make final proof on his quarter section which adjoins Judge Corcoran's ranch on the north.

The attendance at the farmers' institute meeting last week was very satisfactory, considering the wretched condition of the roads. The papers were excellent and the discussions entertaining and instructive. Several land owners on the North Side attended the meetings and were interested listeners. They spoke in the highest terms of the papers and complimented the farmers who prepared them. Nothing, they said, had demonstrated to them more clearly that the Twin Falls tract was populated by the best class of farmers. They now understand why this tract had been such a grand success.

KIMBERLY, Idaho, Jan. 27.—W. H. Thomas was in Twin Falls on business Tuesday. E. T. Newbury returned Tuesday evening from the meeting of the county commissioners held Monday and Tuesday. Fred W. Mollman has received his car his household goods, etc., from Illinois, and has stored most of them in the warehouse until the roads get better and until he gets his new house completed. W. W. Smith has quit the livery business and turned the business over to Messrs. Highby and Voss. Mr. Sharp will leave Kimberly, but will probably not leave the Twin Falls tract. Newbury Bros. & Clyde have their new dry wagon completed. It was built under the supervision of W. F. Swearingen, and is well fitted for the business.

HILLSDALE, Idaho, Jan. 27.—Range cattle are still making trouble for farmers in this section, despite the fact that the first segregation is included within the boundaries of a herd district. During the recent cold spell the cattle trampled the fields of fall wheat, damaging the crop and leaving the banks of the laterals. It is reported here that the cattlemen have declared their intention to ignore the herd law and the Hillsdale farmers propose to find out if this is true. They will band together and make it warm for the men who use the public range and defy the rights of those who raise feed for their cattle on their own land and do not impose on the public. Judge M. B. Corcoran, the pioneer settler on the first segregation, and the first man to build a house on the tract, has 250 acres of clover which

Paulson & Nichol are in Twin Falls, buying hay. During the past year they have cleared over 600 acres of land on the first segregation, 400 acres of which they put in crop. They now have several contracts ahead. Having had a great deal of experience on other irrigated tracts, they can appreciate the advantages of this segregation. They state that the land is excellent, and having cleared 600 acres of it, they should know. They also declare that the ditch construction is of the highest grade and the system of water distribution first class. An additional benefit to which they call attention is the ease with which the purest of well water can be obtained. All that the settlers now need is railway facilities, and as the Southern Idaho railroad is headed for Hillsdale from east and west, the steel will soon be here.

The Twin Falls poultry show is a revelation to those who were not aware of the work performed by the Twin Falls Poultry association. Few appreciated the fact that on the Twin Falls tract birds equal to those to be found in communities where poultry breeding has been in progress for many years. Moreover, the manner in which the birds were displayed showed good taste and progressive spirit. The association spent hundreds of dollars for equipment, but the showing fully justified the expense. These eggs will be taken down after the show and stored for use in the show next year, which, it is hoped, will be held in the exhibition halls on the fair grounds.

The increased capital stock in the bank of Kimberly has all been paid up, making it a \$20,000 bank. A number of new stockholders have been taken in. The old and new ones now are as follows: Henry Jones, North H. Corcoran, 212; Mary Y. Norton, F. W. Gooding, Mrs. Wm. Walker, A. J. Fuller, Mrs. Fuller, Louie, Harriet, Wm. Webster, E. D. Scott, A. McFarland, W. E. Brandon, E. T. Newbury, H. F. Hoover, Ed. Clifton, W. H. Thomas, C. B. Roberts, Mrs. Roberts, and others. The Ladies' club will meet with Mrs. E. T. Newbury and Mrs. W. H. Turner, at the home of Mrs. Turner, on the first Tuesday in February. The resolutions will be served. Every member is requested to be present as it will be the annual election of officers, who will hold office during the coming year. E. L. Arthur was in town, Creek and Twin Falls the first of the week. Henry Jones was here from his ranch south of town the last day of last week. Mr. Hanson of Twin Falls has the contract for building the two old school houses. The first one has already been moved and work is being pushed on the second. They will be completed and turned into store rooms on Main street. Mr. Daniken has the contract for putting in the stone front and has a good lot of work now. Mr. Duncan will be in with his book about the middle of February. C. W. Osborne has come to town with Mrs. Corcoran, whose he will build a large frame house and pool hall for the father. Mr. Corcoran will not let his book touch ranch until the next week.

All but two or three property owners in the four blocks radiating from the corner of Shoshone street and Main avenue have signed an agreement to give the streets in front of their property. The road work is still in progress and it is hoped that a sufficient number of signatures can be obtained to justify the council in paving Shoshone street from the depot to the park or court house, and Main avenue for two blocks on each side of Shoshone. Without exception the resident property owners cheerfully signed the proposal to pave, most of them expressing their pleasure at the opportunity to do so. The streets will have to be paved sooner or later, and the time to do it is now.

OBSERVED LINCOLN AFTERNOON
Synoga Club Enjoys Spendid Program on Tuesday.
Tuesday being inauguration day for the Synoga club the Ladies' M. A. A. Club, was not happy in her selection of a subject for her talks on that afternoon. Against the custom of Lincoln anniversary she had originally proposed a splendid program on the life of Lincoln, but she was overruled by the meeting and she was to give a talk on the life of Lincoln from a religious standpoint, referring to him generally in closing as the greatest man the age has produced, especially fitted for the work he undertook. Mrs. Packard also read an account of all well prepared paper filled with ecology, photos and an index outline of her subject.

Word comes from Washington, D. C. that the first ready-made U. S. established list of Kimberly to 200,000 families. The order is to be put into effect April 1. This will be good news to the many who live on the north side. It will save the farmers a great deal of time in the summer when they are busy with their crops, and will also be a great advantage to them in the winter when the roads are muddy as they have been the last few weeks.

Mrs. Steinman is a wonder. Thousands have pronounced her the greatest body builder in the States today. Miss Steinman is assisted by MISS CONSTANCE VEITCH, vocalist and pianist, late of the teaching staff of the Toronto (Ont.) College of Music, comes from England and holds certificates from the Royal College of Music and Trinity College, London. Miss Veitch has toured the Canadian Provinces, and comes now to the States for the first time. MISS IRENE SHEAHAN comes to this company from Toronto, Ont., where she has been a most successful teacher in oratory. Her work is clean cut, her dialect delightful and the lady herself altogether charming.

BREVITIES

The Christian Science service, held every Sunday in P. hall, has been changed from 9 p. m. to 11 a. m.
P. C. Horne, chief engineer on the Salmon, is being given a vacation in southern California.
The Episcopal Guild will meet with Mrs. E. B. Williams at the Home on Thursday afternoon, February 4.

Mrs. Earley, who has been visiting with her daughter, Mrs. E. B. Williams, will leave this evening for her home in Mackay.
To accommodate the big rush of freight, the Idaho Southern has placed another crew on the run between Gooding and Wendell.
Divine services at the Episcopal church next Sunday at the usual hours of 11 a. m. and 7:30 p. m. will be by the pastor, Rev. A. Charnier.

The auxiliary of the C. W. B. M. will have their meeting at the Friday afternoon of each month, instead of on the first Tuesday as heretofore. Place of meeting, in the Christian church.
The Ladies' Aid society of the Christian church will hereafter hold their meetings in the church building on a Sunday afternoon of each week. There is plenty work. Ladies interested are invited to meet with us.

The Ladies' Aid of the Christian church will meet at the home of Mrs. L. C. Bower, on Main street, next Wednesday afternoon, Jan. 27, at 2:30. All ladies interested in the good work are cordially invited to meet with them.
At the annual meeting of the Episcopal Ladies' Guild, held at the home of Mrs. H. S. Martin on Thursday afternoon, Mrs. McCallum was elected president, Mrs. Sherburne vice president, Mrs. Martin secretary and Mrs. Troutman treasurer.

Mr. and Mrs. Wade Christian and Mrs. Christian's mother have arrived from Pine Hall, N. C., and are the guests of Mrs. James M. Wall. An old friend of theirs, whose on-the-water boat was at Twin Falls caused them to come here.
A. J. Wiley, consulting engineer on the North Side and Salmon projects, and also for the Great Shoshone & Twin Falls Water Power Co., is in Twin Falls on business connected with the installing of another mill at Shoshone falls and the erection of the big power plant at the Lower Salmon falls.

Elnora J. Moran, the son of Mr. and Mrs. M. D. Moran, died at the family home, one mile southwest of Kimberly, on Thursday, January 28, and 11 years. The funeral services were held in the Latter Day Saints' church at Kimberly on Thursday afternoon at 2 o'clock. Interment was in Twin Falls cemetery under the direction of H. E. Hunt & Co.
W. P. Chubb, C. E. Griffin, and Ben L. Ward have organized the Club room in the basement of the Regan building on the corner. The room is furnished with tables and comfortable heated. There are three pool tables and a billiard table, a neat stage stand and card tables. There is plenty of room for the best of the table and a very best of the best. The Club is already being liberally patronized.

C. W. Stockdale, of the telegraph department of the Illinois Central railway, arrived from Chicago yesterday and is looking over the country. He will visit the North Side, and later visit in Mountbusham and Gooding. Mr. Stockdale was invited to the Twin Falls country by a number of the citizens and he has surveyed the railway line from Twin Falls to Wells, Nev., for the Idaho Southern and who has been boasting for southern Idaho ever since.
John Janney returned to Twin Falls on Saturday after an absence of several months, during which he visited in several cities, east and west. John Janney has been in the territory looked better in him than ever and was one of the very best investments he had ever made. He will bring the first hall building, the first hall erected in Twin Falls. It is probable that Mr. Janney will improve some of his other holdings.

"Santos," the property of Miss Gertrude Kierstead, is missing and his consanguine owner would like some information regarding his whereabouts. "Santos" is a blue-eyed dog with a human shaped coat, white neck and feet. He is somewhat large, affectionate and has excellent disposition. Miss Kierstead brought him from Chicago when he was a pup and he has been a fixture in this city for three years. On previous occasions he has absented himself for a few days but he usually returns within a reasonable time. Miss Kierstead would greatly appreciate his return, or information relative thereto.
The power was turned on Sunday to the installation of the new runners or feed pipes leading to the turbine wheel at Shoshone falls. The old pipe did not admit sufficient water to generate the full capacity of the dynamo. The new pipes did not fit and required considerable tinkering. For 48 hours Superintendent Chubb and his energetic crew were on duty, finishing their work on Monday evening. This was the first interruption since the plant was in operation three months ago, and while it occasioned some annoyance, the patrons did not object. The schools were closed on Monday because of the weather and heating apparatus would be operated without electric power.

Thomas Freed of Salt Lake City has assumed the management of the Majestic Pharmacy.

Judge C. O. Stockalger was in Twin Falls Monday on business connected with the Canal association, for which he is attorney.
A considerable number of dressed logs are being marketed in Twin Falls by the farmers. Local dealers are paying six cents per pound for pork.

Hon. J. C. Fencio, the Boise attorney, and Andrew Lounsbury of Albion were here on Monday settling the estate of Jake Diehl, deceased.

A. K. Prescott of Helena, Montana, prominent woodworker of that state, was in Twin Falls on Thursday in search of a good farm adjacent to public range on which he would like to place a large number of sheep.

J. W. C. Donke received a postal card this week addressed: "Shilo Donke, Two Falls just alike, Idaho, Box 411, U. S. P. O." The card was delivered without delay, which shows that even the employes of Uncle Sam in the postal service recognize Twin Falls in any disguise.

Mr. and Mrs. D. C. Cunningham left Chicago on their excursion, the altitude here being too high for Mrs. Cunningham's health. John Peetz, proprietor of the Independent Meat Market, and his family will arrive from Chicago in a few days.

C. F. McKay, bookkeeper for the Twin Falls Lumber & Water Co., returned on Wednesday from Los Angeles, California, where he went some two months ago on a business tour. His health, which is much improved, Mrs. McKay is visiting friends in Salt Lake City and will soon rejoin her husband here.

Mrs. M. A. Holman, the well known pianist, was married on Wednesday afternoon to Charles H. Stinson at the home of her parents in Twin Falls. The ceremony was performed by Rev. H. W. Parker. Mr. and Mrs. Stinson received many beautiful presents from their numerous friends of whom heartily desire to wish them all the pleasure in life.

As a sequel to the arrival from Missouri on Monday, Mr. and Mrs. J. H. Wiley, Miss Beulah Weston, who accompanied them, was married on Monday evening to W. D. Howe, of Twin Falls, at the home of Mr. and Mrs. Wiley in Twin Falls. The bride and groom are friends of Mr. and Mrs. Wiley and will be cordially welcomed in social circles.

A widow's dispatch from Reel, Ore., states that Brock Wiley, who disappeared upon hearing of George Scott's marriage, has been found minus his mustache. An official was his alleged name. He has never failed to recognize him at first, but being assured that the danger of both year had passed, he consented to let his mustache grow and will reappear in the haunts of civilization.

Arnold Frankell has returned from the west of Salmon extension, where he has been engaged in the classification of land. Mr. Frankell said that the west extension contained a large amount of good land, the soil being deep and free from rocks, and the elevation more than 1000 feet lower than the Twin Falls tract. It is, therefore, a very desirable and easy of irrigation.

General Superintendent D. C. MacWaters of the North Side company was in Twin Falls for a short time on Wednesday evening. Mr. MacWaters is a well known and well respected with the way in which the North Side ditches stand up under the severe test to which they were subjected during the recent storm. The ditches will never be expected to carry so much water again and their stability has been amply demonstrated. The damage wrought by the heavy waters was slight, more than compensated for by the outcome of the test, which was well worth the expense of repairs. In several cases ditches had been late in coal crossings to carry the water under the roads, and where it had been impossible to public the earth under the road. The extent of heavy storms. The same was true in the case of unfinished ditch openings. The farmers who are on the North Side tract are now perfectly satisfied that they need have no fears in regard to their ditches as it has been shown that they will carry water in the event of heavy storms. The immediate delivery of water in the North Side laterals will also be a great convenience to those farmers who have not access to wells and who have been obliged to haul their water from Blue Lake or Jerome.

MANY ACCIDENTS AT CLEAR LAKE

SEVERAL YOUNG MEN MEET WITH MISFAPS.
J. W. Banbury Battles Successfully With a Big Raccoon on His Castle Rock Ranch—North Side Farmers Are Buying Up All the Hay.

CLEAR LAKE, Idaho, Jan. 21.—We have had about 10 inches of snow, but owing to the rain which followed the ground is bare again.
J. W. Banbury was over from his Castle Rock ranch on Sunday. Mr. Banbury is so busy that he only comes for his mail once a week. He went to Twin Falls this week and purchased two and one-half tons of barley which he will plant along the edge of his water. The willows have grown undisturbed since the day beyond which the memory of man runneth not. This land, which was cleared by Mr. Banbury some five or six months, is almost a solid mass of decayed vegetation and he will have to use an axe to cut down his barley stubs. Mr. Banbury is also preparing to plant Muscat and Tokay grapes among the springs on the side of the canyon near his house. He has decided upon these varieties because evergreen has informed him that they cannot be grown and he wants to prove that they can. The springs maintain a constant temperature of 60 degrees in summer and winter, and if Muscat and Tokay cannot be grown in their vicinity it is useless to try elsewhere. Mr. Banbury says that many-hoos that he cannot count them. He is considerably elated over the result of an encounter which he had with a monster raccoon. The thing was flushed by Mr. Banbury's collie, "Ringo," not far from the house. Taking refuge in the rocks, the raccoon was hard to reach, but Mr. Banbury did some effective rock-rolling and "Ringo" and the hunter were soon doing consultations on the hillside. The dog began to show signs of weariness and Mr. Banbury made up his mind that something of a strenuous nature had to be done and done quickly. He had some trouble in getting the dog and the raccoon but finally managed to get the latter by the tail. By vigorously swinging the animal, he prevented the raccoon from dodging and biting him and finally he managed to kill it with a rock. Only a few days before, Mr. Banbury and his daughter, with the assistance of Herbert Hargrave, killed a raccoon on E. N. Chubb's ranch at Riverside.

There has been an epidemic of accidents among the young men in this vicinity late in the winter. D. Marsal seems to be the only one who has escaped injury. While Robert Marsh was cooking supper at his ranch near Woodville on the 14th, both the stove and water which spilled on his feet. Marsh now believes that leap water was unpropitious. Will Syster, while sweeping snow from the clean walk, slipped and fell, hurting his back. The injury left him quiet for some time. J. W. Briggs is pursuing a course which is injurious to his health. Charles Smith has been suffering from a number of days and as a result he has been prostrated at night which he found very obnoxious.

Mrs. M. E. Syster was a flourman last week. Her husband, who is being secured by the valley. The North Side ranchers are buying all they can get for their winter stock.
The sheep which are being fed in the locality are wanting well.

UP-TOWN OFFICES ARE NEEDED

Telegraph and Express Companies Are Behind the Times.
The recent trouble in communication with the telephone service demonstrated the need of an up-town telegraph office and also an express office. It seems to be a duty to do it now. In order to send a telegram a person has to walk five blocks through the mud at the best and perhaps more. The result is that probably not less than half the telegraph patronage of the city is developed and the business men are thrown upon the mercy of the long distance telephone.

Twin Fall demands modern business methods. The people are willing to pay for what they get if they receive what they pay for. Antiquated business methods are intolerable and will be abandoned until they are completely eliminated. The telegraph and telephone companies are making enough out of their Twin Falls patronage that they cannot hold up their end and the public utilities commission which the legislature proposes to create will have something to do.

MILNER OFFICES ARE RE-ARRANGED

MORE SPACE AND CONVENIENCE FOR EMPLOYEES.
Harry Strong Goes to the Coast for a Visit—Miss Ella Harris of Boise Accepts Position With North Side Company as Stenographer.

MILNER, Idaho, Jan. 28.—Miss Ella Harris of Boise has accepted a position as stenographer with the North Side Company at Milner.
Lee W. Glass of Twin Falls was a Milner business visitor last Friday evening and Saturday morning.

Another Mr. Brooks formerly a popular light in Milner social circles, but now on the Salmon river work, was the guest of friends for several days this week at Riverside Inn. Mrs. Alice Matons and children of Twin Falls were guests at Riverside Inn over Sunday.

A. W. Jaynes of the Idaho-Southern railroad at Wendell, spent Sunday with friends in Milner.
Loat—An old felt hat of great value some time Tuesday evening. Please find it and return it to the office.
W. C. Stark, Hopewell Saturday and Ivan Bennett spent Thursday afternoon and Sunday on the Copeland ranch at the mouth of Cottonwood canyon.

E. C. Kierstead was a Twin Falls visitor over Sunday.
The offices of the North Side company have been rearranged, affording more space and convenient location for the different employes. The entire office building has been rearranged and is now used for offices.

There will be a dance in Milner, held on Saturday night of this week, with music by Stout brothers orchestra.
H. S. Martin of Twin Falls made a business trip to Milner Tuesday evening.

Sidney Strong returned to Milner Friday from American Falls and will remain here during the absence of his father in California.
Francis and Doris Porterfield and Charlotte Wiley of the first North Side section are attending public school and will remain here for the balance of the winter.

Mr. and Mrs. E. H. Spencer went to Twin Falls Monday to visit their youngest daughter, Mrs. Spencer Palmer, who has been confined to the hospital there for the last four months.

Mr. and Mrs. D. H. Bennett of Albion were the guests of their daughter, Mrs. D. Marsal, at Riverside.
Frances and Doris Porterfield and Charlotte Wiley of the first North Side section are attending public school and will remain here for the balance of the winter.

Mr. and Mrs. D. H. Bennett of Albion were the guests of their daughter, Mrs. D. Marsal, at Riverside.
Frances and Doris Porterfield and Charlotte Wiley of the first North Side section are attending public school and will remain here for the balance of the winter.

GEORGE B. FRASER, U. S. Commissioner. Homestead, desert, timber and stone entries and proofs. News Office, Twin Falls, Idaho.

**10,000  
ACRES**

**Carey Act Land**

Under the Clover Creek Extension of the Twin Falls North Side Land & Water company's canal system

**Will Be Opened for entry**

**Monday,  
Feb. 8, 1909**

**GOODING, IDAHO**

The drawing will be under the supervision of the State Land board and will begin at 1 p. m. and will be similar in character to previous Carey act drawings, preference being given to entrymen in the order in which their numbers are drawn.

The cost of land and water rights under the Clover Creek extension is \$15.50 per acre, \$15 for the water right and 50 cents for the land. The first payment required is \$3.25 per acre, of which \$3.00 is applied on the water right and 25 cents on the land.

The Clover Creek extension covers some of the very best land in Idaho. It is traversed by the main line of the Oregon Short Line, placing it favorably as regards market facilities; it is within reach of the great mining section of the state and it has the added benefit of free range adjacent.

**TRAINING BOYS FOR FARM WORK**

LARGE CLASS AT UNIVERSITY OF IDAHO.

Agricultural Department Shows Largest Gain During Year—Of 48 States, 14 Show Smaller Attendance Than Idaho in This Study.

UNIVERSITY OF IDAHO, MOSCOW, Jan. 22.—In the reports of that department at the university that has made the largest proportionate gain in attendance in agriculture. The necessity for training agricultural workers in developing the resources of the state is becoming generally recognized, also the call for agricultural teaching in high schools is opening a new profession for and vocally trained men. Another feature in the rapid growth of the agricultural college has been the enthusiastic work done by Dean E. E. Elliott, who was placed in charge of the work last summer by the regents.

But it is not only in comparison with her past work that Idaho makes a good showing, in comparison with other institutions older than herself, and in further developed communities, Idaho stands well in the proportion of students doing regular work in agricultural courses. Statistics taken from the last report of the U. S. department of agriculture, reporting the number of students in four-year courses in agriculture, horticulture, forestry and veterinary science in 48 college states, show 14 of them with less attendance than Idaho has. Some of these states have schools with many times as many students doing this work. Iowa, with her famous college at Ames, leads with 288 students. Illinois is second with 268. And the wealth of these states is due in no small measure to the work of students trained in these schools who have doubled the amount of corn grown in the west, and the value of the cattle herds by careful breeding. Idaho has the same opportunity of multiplying her wealth by training her sons.

There are in the University of Idaho 20 students enrolled in college work in agriculture. Maryland has the same number, but Oklahoma has only 27, Montana 10, Utah 22, Wyoming 2, Nevada 1, South Dakota 12, North Dakota 26, so it will be seen that in the group of newer states Idaho stands in the front.

This year the regents are asking the legislature for the carrying on of this agricultural work \$1,000 for agricultural extension and \$5,000 for auxiliary studies.

In addition to the 20 students doing agricultural work in the college, there are 25 in the preparatory department. They come from the following countries: Idaho and Idaho, 14; other states, 10; from Idaho, 2; from Canada, 2; from Nevada, 1; from Utah, 2; from Oregon, 1; from Idaho, 1; from Idaho, 2; from Idaho, 2.

The university authorities have just completed the annual inventory of the institution and reported it to the state comptroller of insurance at Boise. The total amount of state effects and property in the custody of the regents of the university appears as \$23,118.52 of this \$2,000 is real estate, \$177,829.96 is in buildings, and the remainder the general equipment of the university. The total value of the latter is \$105,888.26, an increase of \$2,629.94 over the value shown in the inventory of 1907. This equipment is classified in the inventory as follows: Furniture, \$10,288.08; automobiles, \$18,341.25; library, \$21,062.52; machinery, \$29,553.52; other equipment, \$26,737.87; supplies, \$4,119.95. The stock, \$1,487. Of these items buildings and apparatus show a slight decrease

as compared with the 1907 value, but under all the other headings there has been increase. In some cases marked as in the column headed "other equipment," the value has risen from \$15,941 to \$25,538, or nearly double. Altogether the financial showing of the university made in this document is excellent.

**Planting That Orchard.**

The leading commercial varieties of apple trees are generally scarce in your all over the country, and nurserymen particularly have looked upon raising their own stock. THE BLUE LAKES NURSERY made a heavy planting of commercial apple trees last year and still have a few available. If you are thinking of buying an orchard this spring, write and call at the nursery and place your order at once.

We are handling orders right along from Jan. 20 to 30 and have a large stock. Our trees are regarded the best grown in this country. They are strong, thrifty and healthy. General line of fruit trees and plants. Nursery two miles north of Twin Falls, near river canyon. I. B. Perrine and B. W. Steinhilber, Props. Box 71, Twin Falls.

Lincoln's 100th Anniversary.  
All lovers of Lincoln are requested to assemble at the rink at 2 p. m., February 12, to celebrate the centennial anniversary of our martyred president. An interesting program will be rendered. After the program the Illinois association will be organized.

Money to lend on improved farms near Twin Falls. Henry J. Wall.

**THIS HOG DRESSED 600 POUNDS**  
Was Raised on Alfalfa Straight and Topped With Grain.  
The accompanying picture is that of a Hampshire pig named Chittu now raised by G. B. Lehr on his farm, seven miles southwest of Twin Falls. The sow was 30 months old when slaughtered and the carcass dressed 600 pounds. Mr. Lehr stated that the pig had been raised on straight alfalfa, running in the pasture in summer and burrowing into the stack in winter. The sow was fed some grain for a short time prior to killing for the purpose of fattening the fat. He is now selling for \$50 cents per pound on the hoof and at this price they can be profitably raised on the Twin Falls tract, where alfalfa at this time is the most important growth and his losses are unknown.

**Free for Farmers**  
The business men of Twin Falls will pay the cost of selling your horses, cattle, sheep, hogs, household goods or whatever you have to dispose of, on

**Market Days**  
THE FIRST SATURDAY IN EACH MONTH.

For the present the sales will be held on the corner opposite the Hotel Perrine, next to Eldridge's sign. Remember, the business men of Twin Falls pay the auctioneer. Bring in your stuff and get the money.

These two orchard views were taken on the Big Wood River project, which adjoins the Twin Falls North Side tract on the north. The upper picture shows an orchard properly cultivated. The trees are set as they should be and pruned right. In addition to the healthy condition shown by the orchard, its beauty cannot fail to excite the admiration of those who appreciate good work. The lower picture shows an orchard which has not received the atten-

tion it should. The trunks of the trees are neglected and the sprouts show neglect. Notwithstanding its condition, the orchard shown below has borne prolific crops of the finest winter apples year after year. Its yield has been heavy and the quality of the fruit unexcelled. Winter apples reach perfection in southern Idaho.

# Big Wood River Project

## UNDER THE CAREY ACT

### Now Under Construction by J. G. White & Co., of New York.

This project adjoins the Twin Falls North Side tract on the north and embraces some of the best agricultural and horticultural land in Idaho. Within its confines are farms which have been developed for years and on which miscellod fruit is being grown. A portion of the segregation is now open for entry and the remainder will be opened next spring. The water supply is obtained from the Big Wood river, one of the most dependable streams in the state, and the storage capacity provided for is far more than sufficient for the lands to be irrigated. Fifteen miles of the main canal has been completed, the diverting dam is ready for use and work is in progress on the reservoir. Water rights cost \$35 per acre and there is no better value for the investment.

### THE HORSE

(By Dr. F. T. Kenaley, V. S., Twin Falls.)

Gentlemen: My subject in "The Horse," and in it: will endeavor to point out some of the common defects of the horse and how to guard against them and anything that I may say that you do not understand, or any questions that you may wish to ask on this paper I shall be pleased to answer to the very best of my ability at the close of the paper.

It is frequently said that the unsound stallion is the source of a myth, and that the public will take care of itself and not use these unsound animals, if they do exist. But it is the general opinion of the veterinary surgeons all over the country, and generally acknowledged that all these diseases of an hereditary character are largely on the increase. Foremost among these diseases are bony enlargements in connection with important joints, such as ring bone, bone spavin and enlarged joints; also diseases of the throat, such as roaring, and are in general very badly balanced, awkward and longish animals as the result. Imperfections which so seriously lessen the value of the animal and are handed down from sire to offspring, constitute heavy losses to the community as well as the breeder, and at the same time it is possible to prevent these by a careful selection of a stallion, and it is just as important as the selection of a brood mare.

#### Selection of Sire.

Sound sires are essential in the production of any type or class of horses; and bear in mind, a sire is just as prevent in transmitting his undesirable features as his desirable ones. As the saying is "Like begets like."

The same may be said of the mare, so she should be sound and fully matured. In any community may be found stallions in the draft line cross bred, very unbalanced, not classed, very much size, but have a comparatively low service fee, which tempts large numbers of farmers to select them for breeding purposes, thus regarding a low service fee as one of the commendable features of a stallion.

When disappointed from the use of one class or type of stallion many farmers resort to the use of another, generally the very opposite in type. The result in these cases is very far from satisfactory, the progeny generally being badly behaved, that they resemble one parent in one respect and the other in another, and their endurance is sadly lacking.

A mare, when forming a broodmare, a mare of about six to a stallion of a ton and expecting to get a good proportion of draft colts.

In the future we will no doubt have a law compelling all stallion owners to have their stallions registered and examined as to soundness, by a qualified veterinary surgeon, and to have their grades crossed-bred stallions. But at the present time, by a careful observation, you may notice many of these things and profit by them just as you would before purchasing a horse.

#### The Brood Mare.

In the selection of a brood mare many of the same conditions in the selection of a stallion must be taken into consideration. For if a sound sire is necessary a sound brood mare is just as necessary in the production of good stock.

Breeding from immature mares is very unsatisfactory. In most cases both the mare and the progeny are injured so far as proper size and development are concerned. The mare seldom develops sufficient size, while the progeny are always small and often times badly proportioned animals.

The advent of maturity is always marked by changes in form which generally occur at the age of four or five years. These are their awkwardness, the outline of the frame becomes more consolidated, the different parts of the body are in greater unison and the appearance denotes age and vigor.

#### Care of the Sire.

Good care of the stallion is necessary for a sure foot getter, and of course the farmer wants to breed to the one that is a sure foot getter, in order to get his mares with foal during the season. It is necessary that the stallion be not serving too many mares, and is always kept in good quarters and well fed.

The average stallion can serve 60 mares during a season fairly successfully, and not to exceed this number. The mare has been known to produce a foal at the age of 2 1/2 years.

#### Feeding.

Diseases and disorders caused by gross errors in feeding are readily known as "rotten" or "rotten" horses. The horse is living in the wild state it lives upon the grasses of the plains. He takes plenty of time for feeding and his food is such that he requires ample leisure for this purpose. When, however, domestication is introduced, the conditions of life are entirely and radically changed. The chief part of the food he now takes dry, and therefore is very often damped, and thus it is clear that the functions of digestion are adverse to take care of the new process of feeding. He must be fed upon more concentrated foods, because much of the former eating portion is used for work. It is very essential that the food supply should be well and thoroughly attended to. They should be fed at regular hours and no irregular work. It should be allowed sufficient time to digest their food before being put to work.

The diseases of the digestive organs of the horse are the most commonly encountered and, as a rule, are due to errors in feeding. They may be easily guarded against, and when recognized in the early stage are generally very amenable to treatment.

The mechanism of digestion in a horse consists of a long tube or alimentary canal having certain dilata-

time, and about 115 feet in length. The horse feeding on vegetable material must have a large area for exercising, and a class of food being very bulky and consuming such a large amount, explains why errors in feeding and feeding on bad hay, which the horse so frequently suffers from, and often proves fatal. The diseases of the digestive tract are many, and I will not try to name them or describe them.

#### Colic and Bots.

When a horse is suffering from colic it is generally put to diseases of the kidneys by the horse owner. But, sometimes, if you know how to care for them, the colic will trouble you would not think this. It tends to reason that the diet of the horse is more uniform, and they are not fed rich, concentrated food stuffs as man is and thus they are exempt from these diseases. It is noted in the practices of a veterinarian that he comes in contact with diseases of the kidneys.

It is often the opinion of the horse owner that when the horse is run down, that on end, he is troubled with bots. Bots are a very serious parasitic pest, but may cause injury when great numbers are congregated together. The history of the bot is that the early attacks of the horse in late summer and lays its eggs, generally on the neck, shoulders, and especially about the knees of the horse. The mares lick the spots and thus the eggs reach the mouth and pass down into the stomach where they hatch and attach themselves to the mucous membrane by means of hooks, and in the spring they attain their full size and become loose and escape with the feces and hairs themselves in the soil and about the feet of the horse later they emerge as perfect insects, and about June or September they develop into adults, and then they lay their eggs and hatch in October.

#### The Hoof.

We will now consider the horse's hoof and the changes that it undergoes from childhood until maturity and the causes of diseases to which the hoof is upon which they are subjected to. In a great majority of instances the horse's ability to perform labor is one thing that affects his career, and to that end the presence of a good, sound foot is an almost indispensable qualification. As the old saying is "No foot, no horse." Even in rubber-soled shoes, if neglected, may become the source of trouble, unless periodically examined and properly trimmed. Its shape is of the most serious character, it may become so changed by the horse as to seriously lessen the animal's value by causing awkward and unbalanced limbs and giving rise to many diseases.

In the nature of feeding the hoof, too, trouble is likely to follow, as the horse's hooves are to the stall after the working horses have been fed and taken out, leaving feed in the grain boxes unattended. As the horse carries the shoe on his feet, a tender result is then the otherwise valuable hoof is generally permanently ruined.

Express as the foot is to injury, the most serious is the danger of wounds from picked up nails, sticks, and wire-still, the barbed wire and other agents which excite infection and capillary reaction, thereby terminate in unsalvageable lameness.

Before having their inception in error, in standing are not always laid at the doors of the horse, but will hold out. Horn at the force frequently results from roughness, carelessness and lack of skill. Much injury may result from careless and conscientious workmanship when it is unfortunate enough to be based on wrong principles. It so happens that shoeing in itself is not necessary evil and may be responsible for injuries in which the force plays no part. For example, the owner following the horse to carry the shoe too long a time, which is too often the case, in this case the natural growth of horn carries the heel of the shoe further beneath the foot than is safe for a correct balance. This shoe at the same time is greatly thinned from excessive wear, the result is a sharp and easily bleeding piece of iron all around the edge of the hoof and the breaking of the horn and the cutting

of the sole result and the animal is lamed. The maling on to the foot of a plate of iron is not giving the animal easier means of progression. Instead of the sucker-like surface of the foot we have substituted a smooth and by wear a highly polished surface, and as the result of this, and attempts to gain a foothold strains the tendons and ligaments around the joint and lameness results.

We may look to the nature of the animal's work and the conditions under which he is kept as other causes in the disorders of the foot. Some classes of horses are used on hard roads and freshes result to the sole and frog from scattered stones. Upon these unyielding surfaces the horse is called to pull heavy loads and these effects are bound primarily to find the feet, and then such diseases as ring bone, curbs and cracks in the wall make their appearance.

Diseases also occur in the foot as the result of changes the horse is frequently subjected to when lamed. Only too often the bedding that the animal stands on several hours out of the 24 can only be described as filthy in the extreme. The animal's hooves from the collected body discharges do have a bad effect upon the nature of the horn. Though slow in progress, such a condition may or later, to occur in the shape of weakened hoof and a discharging, and worse still, contracting foot.

This in conclusion it may be said that the artificial selection by the hand of man, together with the artificial selection always made, on has done in the past is the result of various kinds of losses. It is indeed astonishing to note how the forms of horses have been modified by the various conditions to which they have been subjected. And those who have the horse should therefore try to perfect that animal, as it is so supremely useful.

all us how best to improve these and cultivate us to get the best results. The same with fruits, live stock and poultry and everything connected with the farm. At this time I wish to call your attention to a few of the small things—some not so small after all—which materially help the whole community.

Keep Down the Weeds.

First I will mention keeping down the weeds. In an irrigated country it is necessary to have concerted action in fighting the weed pest. It may be necessary to have a noxious weed law compelling all land owners to destroy all weeds classed as noxious, on ditches and roads. And in laying out the farm care should be taken to leave no nooks or corners to grow weeds. Ditches must be kept free of weeds and grass to carry the water for which they were intended. Few people not used to maintaining ditches realize how weeds or grass growing in a ditch or on the sides so they drop into the water and clog the current and cut down the capacity of the ditch.

Many fields of grain on the tract last year were short on account of the weeds and grass that were in them and the main reason for this, in most cases, was in the private laterals supplying such fields being either too small in size or placed so near the main line that the weeds and grass were not kept under control. Do not let your supply and head ditches. Do not let them get large enough and in good condition.

The law forbids the running of water into the public roads, still there is entirely too much of it, caused by carelessness and poorly constructed ditches. It is the duty of the farmer to take a personal interest in doing what they can to keep the public highway in their immediate vicinity in good condition.

The Home Market.

We are continually eating about us, east, west, north and south, for a market for our products. I have heard farmers complain that our local market was not satisfactory, and they were buying their hams and bacon from the States or some other foreign city. Others buy the vegetables they use on their own table. Many buy butter from Utah, and so on.

Many seem to think that a tree in its infancy should be able to hold its own against weeds in their maturity. The poor little tree in a wilderness of weeds is a very depressing and discouraging sight. We say plant trees, and plenty of them, and then take care of them in their infancy at least. Take good care of them; nothing will pay you better, either for rest or fruit trees.

A County of District Fair.

There seems to be no diversity of opinion as to the benefits to be derived from a good county fair, or it could be enlarged as the country develops into a district fair. The time has now arrived for the work to be taken up and made a permanent institution. The movement has already been started to organize a stock company and buy a piece of land suitable for a good race track and grounds near the city and as convenient as possible. Every business man, farmer and property owner in the county should take stock in this company and not only lighten the burden of expense but thus insure its success.

The great interest manifested and benefits derived from the two fairs held under the management of the federation inspires confidence in the unqualified success of a fair having ample financial backing and under able management, such as it is possible for us to secure. Every farmer should give this move his hearty support and assistance.

I don't care to take much of your time in discussing subjects which will be taken up during our meetings and thoroughly thrashed out, but I want to congratulate my fellow farmers on what has already been done in an educational way. It is gratifying to see the substantial improvements made on farms during the past year. It looks like the settlers were here to stay and make this tract famous for beautiful homes for a happy, contented people. Let the good work go on. Beautify your grounds. Make it a home to be proud of. It will make the wife content and the children happy. I say you have made a splendid beginning, let the good work go on, our watchword to be, "Twin Falls tract to the fore!" But we cannot pause in this movement. Other progressive communities are springing up around us with people just as enthusiastic as we are here. Let Twin Falls set the pace and let us keep it. Great is Twin Falls.

MARKET GARDENING

(By A. P. Senior, Twin Falls.)

My chief business is fruit growing, principally strawberries, but I find I can make it quite profitable growing some vegetables for market. The only way to make a garden profitable in a country town is by getting your stuff ahead of the other fellow. The secret of the art is to be profitable. The first thing that should be considered by the prospective gardener is location, which should have an southern slope if possible. It is wise to some five foot or have first class shipping facilities.

The second thought to me is not to have more ground than you can properly take care of. Shallow methods of cultivation will not produce results. Again, another thought the gardener should estimate as closely as possible the probable demand and plant accordingly. After all these preliminaries have been thought out the next thought is the soil, which should be enriched by well rotted stable manure. I have never seen soil so rich for gardening. See that there is plenty of moisture in the ground before planting. In too dry, irrigate before planting, never after. Next, plow deep. Do not be afraid that you will plow too deep. Many of the root crops need plenty of loose soil to get their roots down. After a thorough plowing, work down to as fine a seed bed as possible, for this is the secret of success, thorough preparation.

Never make all your rows straight as a line and just as long as possible. It is more economical to cultivate long rows than short ones. In cultivating long rows the best, even if it costs a little more. Buying cheap seeds is a costly saving. After the seeds are planted, at their proper time the garden should get hot spots ready for irrigating and in place as we will have time later on. And let me say, right now, I consider the proper distribution of the water, both as to time and quantity, one of the first essentials of successful gardening. Never flood your ground. If you do you will make heaps of trouble for yourself later on. When you have to irrigate, make four furrows deep and allow the water to seep in. Let this idea of watering be remembered by everyone, as it is applicable to everyone farming on this tract. And again, be as careful as possible in the use of the water. If the above advice is followed one and not over two irrigations will mature most of the crops and you will have found it so.

When you market your vegetables see that they are washed clean and put in the most attractive form possible and get them to market as quickly as you can. Every garden should have a small hotbed. The hotbed is an essential to every gardener. Peppers, egg plant, cauliflower, young cabbage and tomatoes could not be grown here profitably without the aid of a hotbed. To treat on every kind of vegetable separately would take up too much time, but I will say if the above advice is taken seriously the market gardener can make a financial success of his business. Practice intensive and scientific gardening. Try everything now in a small way as you may not want something that will benefit the community as well as yourself. As the kind of vegetables to grow, the gardener must be governed by the demand. Gardening is hard work, but you must see your way to do it, and the whole and you will obtain results.

Here Three Times a Year. Dr. W. H. Mack, the optical specialist, will be at the St. Regis for a few days. Those having eye troubles should not miss this opportunity to call on him.

VICTIMS SELECTED FOR JURIES

Commissioners Name Those Who Will Serve This Year. The county commissioners have selected from the poll list the names of 110 qualified electors who will compose the jury list for 1930. Following are the victims:

- C. H. Spencer. J. L. Kite. F. E. Drake. W. E. Bush. B. F. Ratcliff. J. A. Woods. M. C. Van Ausden. H. Carshon. J. E. Mussor. A. E. Pond. A. H. Bonner. Wesley Young. C. M. Waller. Frank Russell. A. J. Milner. Geo. A. Farlow. Fred W. Young. Ben Williamson. J. C. Gates. Wm. Ringler. Clayton Liver. M. Koppelman. C. W. Gorman. Wm. Snodgrass. O. O. Chamberlain. E. E. Moore. F. Brooks. G. H. Erdman. C. D. Baldwin. C. H. Trull. W. E. Selwegood. H. O. Munyon. R. L. Halley. H. E. Houck. T. E. Pitz. W. P. Shinn. Chas. Crea. C. A. Vining. L. A. Harford. W. H. Pitt. R. R. Duran. W. J. Tull. C. E. Whitby. D. W. Thomas. John Couck. John M. Campbell. Thos. Howard. Geo. L. Eschscholt. Paul Tonsteth. W. H. Morrison. J. H. Wice. Jas. A. Waters. Fred W. Young. H. P. Allen. Geo. F. Dillendard. H. O. Buy now before the advance, which will surely come.

came last week and will assist in the Stroud-Sprague Realty office. Mr. Davis has lived for a number of years in the irrigated sections of Colorado. He says the people here do not realize the value of this land.

The North Side Land & Water Co. is erecting a new cook house just back of its cottage.

J. R. Hastings and Ira Anderson made a business trip to Gooding Thursday.

H. S. MacDougall, Mr. Hanson and Roper and McCoy have all completed new residences the past week.

Fullerton & Watson are building a large warehouse at the rear of their store building so as to be ready for the rush when the settlers come in on their land. Simeon, Roper & McCoy are the contractors.

R. E. Bryant of the Wendell Nursery Co. addressed the Farmers' association at Jerome last week on the subject of trees to be planted on the north side.

Wm. Pusch of LaPorte, Indiana, arrived Tuesday with a carload of household goods, horses, etc., and will begin work on his ranch south of town. He also purchased some business lots on Idaho street upon which he will erect a large building.

Messrs. Salisbury and Ingersoll spent Wednesday here looking for a location to open a law and real estate office. Mr. Ingersoll is an experienced real estate man from Denver, Colorado, while Mr. Salisbury has practiced law several years at Nomo, Alaska.

A. D. Milligan was in town last week making arrangements to erect a building and got his paper started as soon as possible. He hopes to have the first issue out March 1st. It is to be called The Hub City Irrigator. Mr. Milligan has a thorough knowledge of agriculture, having been an instructor in the Colorado State Agricultural college. He expects to devote a part of his paper to the interests of agriculture and horticulture.

B. C. Williams, general agent for the Western Loan and Savings Co. of Salt Lake City was in town last week and organized a local branch here with the following stockholders: J. S. MacDougall, C. Y. Stanley, H. H. Pike, J. H. Andrews, F. W. Anderson, Besie J. Barrett, Ota M. Wilcox, W. T. Smith, H. D. Jackson, J. C. Blair, L. R. Hastings, W. H. Shepard, P. W. Ruzicka, Bert Shuffman, P. B. Carter, Fred R. Reed, H. E. Barrett, R. V. Wilcox, Robert P. Smith, Chas. L. Dingler, Wendell Furniture Co., F. H. Eppelink. A meeting of the stockholders was held Monday night and the following officers elected: H. D. Jackson, president; Chas. L. Dingler, vice president; P. B. Carter, secretary; H. E. Barrett, treasurer; R. V. Wilcox, agent. The directors are F. H. Eppelink, Bert Shuffman, P. W. Ruzicka, P. B. Carter and H. D. Jackson.

WANTED—Regular boarders at the Oasis, the new boarding house on Main ave. and 3th st. Try our Sunday dinner.

**MEETING OF ROD AND GUN CLUB**  
Will Be Held in Commercial Club on Sunday Afternoon.

The members of the Twin Falls Rod and Gun club will meet in the Commercial club rooms on Sunday afternoon at 4 o'clock for the purpose of electing officers, expressing their wishes in regard to the selection of a state game warden and deciding upon the changes in the game laws which they will recommend. The meeting will not be confined to club members only. All those who love sports and are invited to attend and affiliate themselves with the organization.

The club has recently purchased a new trap and the grounds have had an overhauling. Several applications for membership have been received and the outlook for the coming year is brighter than ever.

There is a reason why the sportsmen on the Twin Falls tract should belong to the club. The game in southern Idaho needs protection and effective work can only be done through organization. The proposition of Bob White quail should be encouraged; the sage hens will soon be exterminated unless they are given more protection; the dove law is a farce and should be amended, and the duck season should be extended into the month of January, when the migratory birds make their appearance. Streams should be stocked with trout and steps taken to see that all who hunt procure

**DEDICATION SERVICE SUNDAY**  
in the New Presbyterian Church, Just Completed.

Preliminary to the dedication of the new Presbyterian church, which will take place on Sunday, a public reception was given in the chapel last evening at which a large number of the members of all the city congregations were present. The ladies of the church were the hostesses and they dispensed hospitality in a most pleasing manner. The chapel was crowded and the occasion must have been exceedingly gratifying to all the pastors of Twin Falls, who work in harmony and whose efforts have ever been fruitful.

This evening at 7:30 Rev. J. R. Barton of Boise will deliver a sermon. Mr. Barton has been a frequent visitor to Twin Falls, being the first Presbyterian pastor to hold service in this city. He has watched the growth of the town and the congregation with the greatest interest, taking a personal pride in both.

Sabbath school will open at 10 o'clock on Sunday morning, followed by services at 11 a. m. Rev. B. M. Hamilton, D. D. of Denver, Colo., will preach the sermon.

The dedication services will open at 2:30 p. m. and will consist of brief addresses by local pastors and visiting ministers.

The evening service at 7:30 will be in the form of an illustrated lecture, "The trail of the cross and its forces in America" by Dr. Donaldson.
