IRRIGATION IN SOUTHERN IDAHO

HOW VARIOUS CAREY ACT PROPOSALS WERE FORMED.

Brief History of Their Development From the Start of the Twin Falls Enterprise to the Development of the Big Wood River System.

By C. A. ELNER. BOISE, Idaho, May 20.—The new Idaho, that of irrigation, with the capitol letter, is a development of the last closing decade. Ten years ago there was no irrigation, practically no water, but it was only followed as a makeshift, and lands under irrigation would not sell in the market for what is now worth the gold in effect of a vast tract of raw sagebrush.

CONSTRUCTION IN FULL SWING

ON THE TWIN FALLS BRANCH TO FENELON, NEVADA.

Tracklaying Crew Arrived on Thursday Evening—Three Outfits Are Now at Work on the Grade and Others Will Soon Be Added.

Construction work is now in full swing on the Twin Falls branch to Fenelon, Nevada. It is customary to begin the work in the "winter extension." The fact that the first survey was made to Wells give rise to this expression. The route to be followed by the Short Line water, joins the Southern Pacific at Fenelon, Nevada, almost due south of Twin Falls.

Change in Train Services Delays Mails—Bachelor Members of Farmers' Union Will Entertain the Ladies at a Spread Shortly.

HANSEN, Idaho, May 20.—Mrs. J. Pearson went to Preston Friday evening on a business trip.

Mrs. A. M. Babecek left Tuesday for Clarkston, Wash., to visit her parents, Mr. and Mrs. John Simmons.

Water rates are fixed by a commission as provided by state law. No drafts shall be installed on a pipe line of less than four inches in diameter.

HAGERMAN

The Capital of the most favored valley in Idaho

The Palisades of the Gem State

Townsite Opening, Saturday, June 5

Choice of lots to be determined by drawing similar to the procedure under the Carey Act

HAGERMAN

In addition to the lot sales, there will be placed on the market tracts of from one to ten acres of the richest fruit land adjoining the townsite. An inch of water will be furnished for every acre sold.

HAGERMAN

will have a gravity system of the purest spring water. No other town in the state is so blessed in this respect. It will also have a telephone system, electric light and power and an electric railway connection. Daily stages to and from Bliss and Wendell make close connections with all trains. Ample accommodations for the public. A hotel to cost \$40,000 will be built.

HAGERMAN

is located in the heart of the most beautiful valley in Idaho, beginning with the famous Thousand Springs and terminating with the turbulent Malad, the greatest trout stream in the state.

HAGERMAN

is a tested fruit section, producing peaches, apricots, pears, apples, plums and all kinds of small fruits. It is the earliest producer in southern Idaho, being well sheltered. It has a superabundance of water, coming from mammoth springs of which there are thousands in the valley.

Write to us for literature. You should have a map from which to make your selections before the drawing.

ADDRESS ALL COMMUNICATIONS TO

ORCHARD INVESTMENT CO.

HAGERMAN, LINCOLN COUNTY, IDAHO.

Cambronne Registered Percheron Stallion

Bred by Chevalier, imported by Dunham & Fletcher, Wayne, Ill. Foaled April 29, 1904. Jet black with star on forehead. Weight 1800. This horse is stronger in brilliant blood than any animal ever imported to this country, tracing back to the famous Brilliant on both sire and dam's side. Will make the season at the Farmers Real Estate & Livestock Co's barn, Twin Falls, Idaho.

TRIMMING DOWN THE BIG FLOCKS

AND GIVING NEW USERS CHANCE IN FORESTS.

As the Number of Users Increase, the Size of the Flocks Diminish—Policy of Department in Dealing With the Sheepmen.

There is probably no policy connected with the administration of matters upon the national forests that comes closer home to the stockman than the system under which the number of stock each man may graze is determined by the supervisors. With the rapid increase in population of most of the western states the demands for grazing privileges upon the national forests, especially from the men interested in sheep raising, increase every year. The new settlers locating the country adjacent to the national forests are nearly all desirous of entering the stock business, either as cattle raisers or sheep growers.

In order that they may more successfully handle their stock, they apply to the forest service for a permit to enter the nearest forest, which, very likely, is already stocked to its fullest capacity. The question then before the supervisor, with whom the applications are filed, is how to accommodate these new settlers without injury to those who are already occupying the ranges.

It has been the consistent policy of the service to take care of the new user just as far as possible without greatly restricting those already using the ranges, and in order to do this it has been necessary to reduce the number of stock the larger men on a pro rata basis in order to give the new men an opportunity. These reductions are only made after a full consideration of the conditions surrounding each permit, and every effort is made to carry out the system with as little injury to the individual stockman as possible. The result of this system of reducing the larger owners in order to admit the new settler is that many of the owners of large numbers of stock are continually appealing to the forester against the cutting down process, claiming they are being injured in their business and deprived of their rights as citizens, to increase and build up a legitimate industry. On the other hand, some of the smaller men are equally persistent in their appeals for further recognition than that already allowed them. In handling this matter the forest officers must act as fair and impartial judges for both classes.

There is one fixed and immutable point in this entire proposition which cannot be changed except through legislative action, and that is

the number of stock which a given area will ordinarily support. When the forest ranges are carrying the full number of stock which they safely can, the only thing that can be done to meet the demand from new settlers is to reduce the number which any one man can range and give the new settler the benefit of this reduction.

On one of the national forests in the state of Wyoming at the time it was created six years ago, the area was supposed to be a large number of sheep which were owned by a few large companies and individuals. The little man was almost an unknown factor in that region. The largest owner was grazing some 60,000 head of sheep which was 47 per cent of the total number on the forest. The next year there were a number of settlers who desired to enter the forest whose claims were legitimate and in order to admit them a sliding scale reduction was made upon all owners over and above a certain number, the surplus being used to allow the new men to enter the forest.

Each succeeding year more new settlers desired to graze their sheep and cattle on that forest and the same system was followed to obtain the necessary room for these new men. At the beginning of the present grazing season, the man who six years ago owned 47 per cent of the stock had been reduced in numbers until he was grazing but 1.6 per cent of sheep, which was about four per cent of the total number of the forest. In the meantime the number of individuals and firms grazing stock in that forest had greatly increased until there are almost three times as many men using the range as were at the time of its creation as a national forest. This certainly proves that the government is not maintaining the national forest ranges solely for the big companies, to the exclusion of the small owners and new settlers.

In other parts of the larger holders may not be too seriously reduced from year to year, they are guaranteed that they will not be reduced below a certain point and the new owners are restricted to a certain established number to begin with and allowed to gradually increase their number from year to year until they have reached the limit which is set for any one man or company. In this manner the reduction is spread over several years and the larger owners are given time to meet it. But the small men are quite as interested that they are being discriminated against, as are the larger men, because many of them claim that instead of starting at the low figure they should be allowed to enter the forest if they wish with a number equal to the full limit, which would result in making the annual reductions on the large holders several times heavier than they are under the present system.

For the year 1903 there were 32 new settlers who desired to enter a particular forest with their stock, but with the reductions made upon the older users it was impossible to take care of but five of them; and with the older users complain of the

It Took Two Weeks to Make Each of These Suits

Kling Men's Apparel is not turned out by the hundred thousand suits as many lines are.

Every garment is London Shrank.

The more generally used quick steam process takes much less time but doesn't insure maximum shrinkage. Each garment is cut separately by shears—not by machines which cut many at a time, but cannot cut the size accurately. Every Kling suit has that stylish, tailored effect obtainable in no other line.

Yet as great a choice of patterns given in these suits as you can find anywhere—with the addition of some exclusive Kling novelties that are proving highly popular with the discerning season.

Of course, only the highest grade materials are made up in Kling Men's Apparel. The world is searched for fabrics that will meet the requirements of this line. You will be more than pleased with these garments—come in and see them.

Kling
Men's

KING BROS. & CO. CHICAGO

BOOTH DRY GOODS CO.

reductions necessary to meet this demand from the new men, the new men also complain because they are not allowed a larger number at the beginning. One of the basic principles in handling grazing matters on the national forests is that it is better to help a small man make a living than a big man a profit.

The policy of the forest service in making these reductions and restrictions is not to injure any person nor to allow the new men to enter the forest with such a large number, as will necessitate unnecessarily large reductions to meet them. The number allowed each individual is believed to be that which will furnish a modest income to a man sufficient to enable him to establish his home, support and educate his family and advance his own interests as well as the interest of the community and state.

BREVITIES

H. R. Burley and wife went to Carey, Idaho, for the summer.

J. M. Davis, who spent the winter in Twin Falls, returned to Colorado to look after his interests there.

Charles A. Lindberg of Bellingham, Wash., and Miss Ada L. Wilson of Twin Falls were married by Rev. W. H. Parker on Thursday, May 20.

German Lutheran services will be conducted in the Christian church on Sunday afternoon at 2 o'clock by Rev. Martin O. Mueller. All Germans are cordially invited to attend.

W. H. Eldridge went to Contact on a business trip on Tuesday, returning on Thursday. He reports the copper camp as being a lively place, the prospects for a railway having greatly encouraged the mine owners.

The machinery for the Twin Falls cannery has arrived and is now being installed. The management has contracted for 35 acres of peas, a large acreage of beans and quite a lot of cabbage. The acreage of tomatoes is very small and the management would like to secure 20 acres additional, which is urgently solicited. A considerable amount of asparagus has been planted.

Elaborate preparations have been made by the local Shriners for the entertainment of the visiting members of the order on Sunday. The Shriners will arrive in two Pullmans on Sunday. A delegation will meet them at the depot with the band and escort them to their hotels. In the afternoon the visitors will be taken to Blue Lakes and Shoshone falls. The Shriners will gather at the rink on Monday afternoon when the degree of Daughter of Isis will be conferred upon several ladies of Twin Falls. The banquet will take place at the rink on Monday evening at 6 o'clock. In the evening a class of novices will be initiated.

William L. Thomas and Miss Stana Amason-Kimberly were married by Justice George Herriott on Tuesday, May 18.

The contract for wiring the Twin Falls county courthouse has been awarded to the Capital Electrical Supply Co. of Salt Lake City.

Carl Hahn has purchased C. Harvey Smith's handsome residence on Third avenue east, into which he will move his family on June 1. This is one of the prettiest homes in the city.

Mr. and Mrs. E. T. Barber of Gooding were Twin Falls visitors on Wednesday. Mr. Barber stated that the sale of acreage tracts and lots in Gooding on Monday was a grand success. The major portion of the famous Gooding farm was disposed of, the total sales aggregating \$150,000.

John P. Kosharek, who went to Contact two months ago to examine the irrigation proposition, has returned to Boise, filled with strange dialect and garbed like a tumbler. So he as he strikes a lucid interval his friends will find out all about the scheme.

Twin Falls and Filor met on the local ball grounds on Sunday afternoon, the game resulting in a victory for Twin Falls by a score of 10 to 8. McCroney and Dackman formed the battery for Filor and Murphy and Inglest for Twin Falls. Pocatello will play in Twin Falls on Saturday and Sunday.

The city council will take up the paving ordinance at a special meeting on Wednesday evening, May 20. It is necessary to compile a large amount of data before the ordinance can be drafted to comply with the law on the subject. The present intention is to pave Shoshone street from the depot to the park, Main avenue for a distance of four blocks on each side of Shoshone, and Second avenue south from Main to the railway yard. A bond issue will be required to provide funds for the paving of street and alley intersections. This election will be held the first week in July.

Mrs. A. L. Seal has disposed of the Iris rooming house to Miss Olive Platt, who recently arrived from Colorado.

Former Governor John T. Morrison delivered a stirring and patriotic address to the graduates of the Twin Falls high school on Friday evening last, which was received with frequent applause and enthusiastic applause. Mr. Morrison is first a scholar and he has never lost his scholarly sentiment, which he has the faculty of imparting to others.

Reports have been received from Chicago that 2500 tickets for Seattle, with free side trips to Twin Falls, will be sold during the first week in June when the Alaska-Yukon-Pacific will open. It is expected that the larger number of the tourists will avail themselves of the opportunity to see the greatest irrigation enterprise in America.

A daring attempt to break jail was made last Thursday by W. H. Copper, who is being held for trial, on the charge of attacking the sheriff. Means of an iron bar, heated in the stove, the prisoner was engaged in burning a hole through the wall of the jail when detected by the officers. Copper was shackled and is being closely watched.

Twin Falls council, Knights of Columbus, will be organized in K. P. hall on Sunday afternoon. The degree work will be done by the Pocatello delegation. A delegation of 75 knights from Pocatello, Boise and other Idaho cities will be present. The installation will be followed by a banquet at Union hall. The new council will have a charter membership of about 50.

Word has been received of the safe arrival in Vancouver, B. C., of Mrs. H. F. Allen, whose brother, William McGregor, was accidentally shot and instantly killed in that city a few days ago. It appears that Mr. McGregor was engaged in cleaning a gun which was not supposed to be loaded, when it was discharged with fatal results. He was very prominent young man and was on the eve of a business promotion which meant much to him. Mrs. Allen has the sincere sympathy of her many friends in Twin Falls.

A Chautauqua under the auspices of the Ladies' Aid society will be given in the Presbyterian church on Tuesday, Wednesday and Thursday, May 25, 26 and 27, by Charles Ovid Blackstone, lecturer, and Albert K. Houghton, vocalist. The work of these gentlemen has been highly praised by the best critics in the west, notably by Max J. McCland, the famous organist of the Salt Lake tabernacle. The programs are sprightly and instructive, besides being highly entertaining.

C. E. Evans has sold his real estate business to Farley Bros. of Bellingham, Wash. The Farleys are enterprising young men who are blessed with the progressive western spirit, and are welcome additions to Twin Falls. The retirement of Mr. Evans means that there is a consistent booster, who has brought many a good citizen to the tract. Mr. Evans has been active in all public movements and it is gratifying to know that his remains here and lend his good influence toward the continued upbuilding of the city.

The eighth grade commencement exercises for all the eighth grade pupils in Twin Falls will be held in the auditorium in Twin Falls on Friday, June 4. The commencement address will be delivered by President G. A. Moore of the Albion State Normal school.

While practicing a little acrobatic stunt on a heavy log, John Peck lost his balance and fell to earth with some what of a thud. His left collar bone was broken and he is obliged to wear a neck brace, which is unable to button on collars. He looks like Napoleon, only that he wears his left hand across his breast, while Napoleon has his right hand there. It is what he saw some recent pictures of Napoleon declare.

Montville Flowers, whose two entertainments in Twin Falls are most pleasantly remembered, will give a recital from "The Little Minister" at the Bickel school auditorium on Friday evening, June 4. Mr. Flowers needs no introduction to the people of Twin Falls with whom he is highly a strong favorite. He is a man of wonderful versatility and wide resource and "The Little Minister" is one of his favorites.

IS APPOINTED CHIEF ENGINEER

J. W. Howe Engaged by the Burley & Albion Railway Company.

J. W. Howe of Abbey, Idaho, has been engaged as chief engineer by the Albion & Burley Railway company. Mr. Howe is well known in Twin Falls, where he has lived most of the time since the inception of the project. He was in the employ of the Twin Falls Land & Water Co. for one year and is conceded to be one of the most accurate draftmen and most reliable engineers in the west. After his marriage, Mr. Howe retired to his farm at Abbey, but like Cincinnatus of old he was dragged from the plow by the North Idaho company when that project started. Recently he has returned to the employ of the Twin Falls Land & Water company. He is a very quiet and modest man and inclined to belittle his own ability and his firm preference that he now has an opportunity.

Mr. Howe will make his headquarters at Albion, where he went on Tuesday evening. The company by which he is engaged proposes to build a road from Burley to Albion, a distance of about 20 miles, which will connect with the main line of the Twin Falls and Water company. It is a very quiet and modest man and inclined to belittle his own ability and his firm preference that he now has an opportunity.

ago, the fish will jump out on the bank to get only bit at it, but to drink it.

Miss Grace Southworth won the prize for the basket best representing the Modern Woodmen at the dance given by that order Friday night. The prize is a cut glass nappe.

FOR TRADE—160 acres good black land located in Concho county, Texas; will trade for Twin Falls land. Address Woody T. Seal, R. F. D. No. 2.

Point out if you can any good quality possessed by any \$4000 five-passenger car that the Cadillac 30-horsepower, \$1400 car, does not possess.

Money to lend on improved farms near Twin Falls. Henry J. Wall.

AN AUTOMOBILE to trade for farm or city property. Hill & Taylor, Twin Falls, Idaho.

The Cadillac 30-horsepower \$1400 five-passenger car has every quality possessed by any car of the same capacity, regardless of price.

Popular Prize Voting Contest

Beginning Monday, May 24th and Ending Monday, July 5th

The management of the Iris Theatre will give

THREE VALUABLE PRIZES

To the three most popular ladies receiving the largest number of votes.

First Prize—Ladies' Gold Watch
very heavy 14k, solid gold, with American Waltham movement, to the lady receiving the highest number of votes.

Second Prize—Ladies' Fancy Diamond Ring
perfect stone to the lady receiving the second highest number of votes.

Third Prize—Solid Gold Nugget Brooch
or Chateau Pin, to the lady receiving the third highest number of votes.

THESE PRIZES ARE GUARANTEED

Voting coupons may be secured at any of the three drug stores or at the ticket office.

The prizes may be seen at W. R. Friebe's jewelry store.

Write the name plainly of the lady you wish to vote for on the coupon and deposit it at the time you secure your ticket.

EACH ADMISSION TICKET TO THE IRIS THEATRE ENTITLES THE HOLDER TO TWO VOTES.

Word has been received of the safe arrival in Vancouver, B. C., of Mrs. H. F. Allen, whose brother, William McGregor, was accidentally shot and instantly killed in that city a few days ago. It appears that Mr. McGregor was engaged in cleaning a gun which was not supposed to be loaded, when it was discharged with fatal results. He was very prominent young man and was on the eve of a business promotion which meant much to him. Mrs. Allen has the sincere sympathy of her many friends in Twin Falls.

CROWDING WORK UPON WEST END

PREPARATORY TO THE OPENING NEXT FALL.

Tunnel Under Way, Core Being Placed in Dam and Work on Canal Started—Several New Buildings Started in Buhl During Week.

Buhl, Idaho, May 19.—Buhl has two passenger trains a day now, one arriving at 11:06 a. m. and departing at 11:30 a. m., the other arriving at 1:05 p. m. and leaving at 6:20 p. m. All mail for towns on the middle branch arrives at 11:05 a. m. and departs at 11:10 a. m. All mail for the outside, east and west, arrives at 11:30 p. m. and departs at 12:00 p. m.

Thomas Holmes, the popular Buhl barber, bought a barber shop in Twin Falls on Shoshone avenue and is there getting acquainted. He will close his shop in Buhl and will continue to live here, but he wants to clip them at both ends of the line, hence his Twin Falls purchase.

The baseball game Sunday between Rupert and the Boosters was a good one. The teams were well matched and some fine work was done on both sides. The east end boys walked away with the game, the score being 8 to 6 in favor of Rupert. A large crowd witnessed the game and took a deep interest in it.

Fred Volt and Mark Coffin are in town today, having come up from Twin Falls on an errand. They seem to be chuck full of business. It was learned that Mr. Volt said he would give a deed to the park to the town as soon as the city plans are put out that far, on condition that the trustees would agree to plant trees in it and take care of it in a proper manner; all of which the trustees will be glad to undertake and perform. The park is a beauty spot with the lake in the center. It covers what will be two whole blocks when the town is platted out to and beyond it. The trustees will commence work on it at once.

President C. E. Perkins of the West End Twin Falls Land and Water company, attended a meeting of the stockholders of the company recently held in Salt Lake City, at which matters of great importance to the project were considered and settled. E. T. Meredith, one of the principal stockholders, his mother and daughter, accompanied him. Perkins, on his return to Buhl and went out to the dam site, where they spent several days. They returned to Buhl and departed for their homes a few days ago. Work on this project is progressing rapidly. The tunnel is well under way, the core of the dam is being put in and work on the canal has been commenced. Those who have been on the ground say that the townsite is a veritable beauty spot, and an ideal location for a city. The opening of this project will take place in Buhl either this summer or fall. Buhl is the supply point for the works and all that neighborhood. When the company's trams are in for supplies the town looks like a busy mining camp where miners and prospectors are outfitting for the mountains and the merchants are all on a jump.

W. S. Harris and several of his friends are out on a fishing trip. Well of all about the city that got away next week. But if the bait is as good as the wine W. S. served to

WHERE QUALITY COUNTS

SACK suits are the commonest garments worn by men in ordinary daily activities; the regular thing for business. That's all the more reason for having

HART SCHAFFNER & MARX

clothes; because the sack suits they make for us are not common looking at all; they're distinguished; a man dressed in one of our suits looks different; looks dressy, stylish, without being extreme in dress.

The fine tailoring does it; the correct designing in style; and the quality of all-wool fabrics helps the general effect.

There are no other clothes that compare with them in these points.

This store is the home of Hart Schaffner & Marx clothes.

MORE WELLS IN FILER VICINITY

J. D. WISEMAN THE NEXT TO TRY HIS LUCK

Has Contracted With J. A. Potts to Drill on His Farm West of Town—D. H. Davis Prostrated by an Attack of Appendicitis.

FILER, Idaho, May 18.—Wm. U. Hews, former editor of the Filer News, has engaged in the real estate business and last Monday opened his new office in the Films building on Yakima avenue. The style of the new firm will be the Hews Realty company. Mr. Hews is well and favorably known in Filer and the surrounding country, and has many friends who wish him success in his new venture. He has had considerable experience in the real estate business, having been connected with one of the largest real estate firms in South Dakota during the boom period there prior to his coming to Idaho.

Mr. and Mrs. Floyd McIntyre of Moscow, Idaho, arrived in Filer Tuesday and will make their home here in the future.

J. A. Potts, who recently finished drilling the deep well for the Filer Development and Waterworks company, is this week moving his machine to the J. D. Wiseman ranch west of the city and will at once commence to sink a well. Mr. Wiseman was so well pleased with the success the company met with here in securing water at a depth of 130 feet that he at once decided to sink a well on his place. This is an example that should be followed by many of the farmers on the south side tract.

Born, to Mr. and Mrs. R. H. Miller, an eight-pound girl. The young lady arrived last Thursday.

The dupey which was given by the O. K. orchestra in the Johnson hall Saturday evening was well attended and all present report a most enjoyable time.

In the case of George Weidenman vs. Frank Richmond, which was held in Justice Fisher's court last Wednesday, the jury brought in a verdict for \$95 damages in favor of the plaintiff. Weidenman sued Richmond to recover loss on hay burned, the plaintiff claiming that the hay was set on fire by the defendant's pipe while they were haling alfalfa last January.

This is the first time the local team has defeated this season. D. H. Davis was taken suddenly ill on Thursday while up town. He was immediately taken to his home and a doctor summoned. He was found to be in a very serious condition and gradually grew worse until Friday evening when he was taken to the hospital in Twin Falls and an operation was performed. The operation proved he had a very severe case of appendicitis. At this writing his condition is somewhat improved.

The Townsley company is having the trees on the streets irrigated and is also setting out a number more, having recently set out a beautiful park just north of the depot.

H. E. Ravencroft, who left here about March 15th, writing back from Michigan that he expects soon to return to Idaho.

Dr. Charles Withers recently purchased a new driving team, buggy and harness, and is now the finest turnout in town.

Franklin Squires of Abbot was in town Tuesday. Mr. Squires says it has been rather breezy in the canyon this last week.

Mr. and Mrs. J. Seales are spending a few days in Twin Falls.

Mrs. H. H. Schildman, who has for the past six weeks been taking treatment at Hot Lake, Oregon, is expected home the latter part of the week.

Lewis Morehead of Abilene, Wash., has been spending a few days here looking over the country with a view of investing in some southern Idaho land.

The Filer Baseball association was permanently organized last Tuesday evening. J. C. McCreezy was elected manager, E. B. Ripley assistant manager and S. C. Turpin captain.

John Musser left Tuesday evening for Abilene, Kans., where he will spend a couple of weeks visiting relatives and old friends. Mr. Musser will also attend the River Brothers conference which is being held at that place.

A. Haupt, who left Filer last fall and has been spending the winter in Colorado, returned to this city the first of this week. Mr. Haupt says there are worse places than Filer.

FRUIT TREES.

General line of fruit trees and plants for the family orchard. We have the finest stock of 150,000 apple trees one year old for commercial orchards grown in this country. If you are going to plant an orchard, write us or come to the nursery and see the trees.

We still have some of the leading varieties unsold. They are propagated from the best of fruiting trees and are absolutely true to name—thrifty, healthy and well-rooted.

The nursery is two miles north of Twin Falls, near the river canyon. BLUE LAKES NURSERY, I. B. Perkins and B. W. Slesinger, Props. Telephone, 184-red 5 rings.

Notice. Opening of the Coeur d'Alene reservation to take place soon. For information write the Coeur d'Alene Reservation Co., Lewiston, Idaho.

BALSAIRE
Percheron Society of America
Sire Calypso 25017 (44577) by Thedis 25015 (40871) by Bealque (1802) by Brilliant III 11116 (2819).
Dam Etolise 20885 by Tripoll 11110 (20084) by Gilbert 5154 (401) by Brilliant 1271 (765).
Calypso is the greatest sire in America, having won more prizes on stallion showing four of his got, than any other stallion of the draft breed.

Balsaire is richly bred in Brilliant blood; is one of the best sons of Calypso, being good enough to take the blue ribbon in the yearling class at the Great International Stock Show at Chicago in 1907. He is of that fashionable dark grey color; has the finest of high, clean action; plenty of quality and while only a three-year-old, weighs 1900 pounds.

Will make the season at our farm, one mile east of Hansen.

NORTH SIDE LANDS
We have listed with us eight 40-acre tracts which range from one-half mile to 1 1/2 miles from Jerome.
This is desired land and does not require residence thereon. The land is very good and its close proximity to Jerome makes these tracts very desirable investments.
Write us for information and prices.
We have a large number of relinquishments for sale of North Side lands and the prices are very attractive.
Remember that the Clover Creek lands sold at \$45.00 per acre, which is equivalent to \$10.00 bonus on North Side tract.
Our prices for relinquishments range from \$2.00 per acre bonus upwards.
There is considerable activity in lands on the North Side now and this is the time to buy if you want to invest, or to sell if you have land and wish to dispose of it.
Inquiries cheerfully answered. Correspondence solicited.

U. S. GOVERNMENT CAREY ACT LAND IN THE FAMOUS SNAKE RIVER VALLEY, IDAHO

There still remains about 20,000 acres of the finest fruit and farm lands in the world, to be entered in tracts of forty, eighty, one hundred and twenty and one hundred and sixty acres, in the Shoshone and North flooding segregations, a part of the

BIG WOOD RIVER IRRIGATION PROJECT

Water for the irrigation of these lands will be furnished by April, 1910.

MANY TWIN FALLS PEOPLE have recently made filings under the Carey Act on lands of these segregations, and a number of others have expressed an intention of doing so. This is the last chance the people of Idaho will have to secure valuable government land and first-class water rights under the Carey Act for \$35.50 an acre, payment of this amount being continued over a term of ten years. Would it not be wise to take advantage of this?

For further information relative to both land and town lots, call on or address

Idaho Irrigation Company Ltd.
C. B. HURTT, Manager Land Sales Department, Buhl, Ida.

Final Opportunity
Parties who desire to see these lands will be shown over the segregation free of charge by applying to our representatives either at Gooding, Richfield or Shoshone, or on application to me.

RICHFIELD TOWN LOTS are the best investment in town property anywhere in the State of Idaho at the present time. Water for the irrigation of over 40,000 acres of rich land was turned into the canals on April 1. This will result in the settlement of over 300 families on the lands immediately surrounding Richfield, insuring large increase in all lines of business pursued, and the continued and permanent advance of property values there.

REWARD—Satisfactory reward will be paid for the whereabouts of one O. A. Berg, (White Horse) Morrison Secret Service Association, Lock Box 25, Chicago, Ill.

1900 car for \$1400. The Cadillac Motorpower, 1904, Holohan.

AN AUTOMOBILE to trade for farm or city property. **WILL & TAYLOR**, Twin Falls, Idaho.

Meeting-Notice.
Notice is hereby given that a meeting of the congregation of the First Presbyterian church of Buhl, Idaho, will be held in the church Saturday, May 22, 1905, at 2:30 p. m. to take action in the matter of obtaining a loan.

IRRIGATION IN SOUTHERN IDAHO

Continued from Page 1.

of investment was made before the state land board consented to an opening of the lands. This was in February, 1905. Prior to this few months, the town of Twin Falls had been established. The Oregon Short Line had extended a branch line from Minidoka to Twin Falls, passing through the reclamation service project on route. The drawing was held at Twin Falls, and within a week of the day of drawing about 70,000 acres of dry and the black rocks lay bare in the drawing the water was turned into the canal at Milner and permitted to flow down to the land about to be reclaimed. Thus for the only time since the formation of the country, the waters of Snake river were completely shut off. The Twin Falls were dry and the black rocks lay bare in the winter sun. As an illustration of the oddities of water supply in the Snake river valley, it is narrated that although all the water was shut off from the river, still 100 miles down the stream the flow at no time showed a perceptibly diminished volume.

Slow Progress During First Year.
During the first year of irrigation of the Twin Falls tract it became apparent that the initiatory idea with many of those who had taken land was entirely speculative. Having secured the land the entrymen did not know what to do with it. Under the rules of the state land board they were given opportunity to make settlement at any time within six months. There were many requests for delay and a number of the entries of the very choicest lands were relinquished for a small bonus—parties who first entered on claims that are now worth \$50,000 to a quarter section, having in the early months of 1905 given up their claims on a cash payment of a dollar or so an acre.

There were some of the entrymen, however, of sterner stuff—men with faith in the future of irrigated Idaho. They were in sufficient number to make a respectable showing of improvement during the year 1905. Some grain was raised, that year a little hay was cut, and potatoes to the amount of several carloads were shipped out. Several thousands of acres

It is difficult to understand, much less explain, just what has built Twin Falls. The limit of February, 1905, has during the ensuing four years grown to be a town of 6000 people, and is apparently certain to double this population within the next two years. In all things but size it is a city, with electric lights, sewers, waterworks, paved streets, metropolitan schools and all the conveniences that go with towns many times its size.

The people have apparently become so accustomed to growth that it has become a matter of course. There has come about such a thorough understanding of the value of these lands under irrigation that when there was an opening under the Carey act of 50,000 acres of land lying to the south and known as the Salmon river segregation, practically every resident of the Twin Falls region who had not exhausted his Carey act right was registered for the drawing and a large portion of the land was taken by the residents of that region. When it is remembered that the lands in the Salmon river opening are generally on an elevation of from 4200 to 5000 feet that water will not rise in any event be delivered to these lands prior to 1910, something of the hold the idea of farming under irrigation has on the people can be better understood.

The history of the Twin Falls country in a large way is duplicated in the other irrigation projects under the Carey act, with the difference since brought to a condition of completion. The opening to entry has been attended by the same degree of excitement, there has been something of the same speculative strain, but it has not taken as long to dissipate, the work of subduing the wilderness has been more quickly begun and more rapidly finished and the resulting profitableness of farming operations has been sooner proven. The North Side Twin Falls company, which takes title by irrigation from the same dam on the Snake river and which covers relatively the same area as the parent Twin Falls company's canals, is showing a history of more rapid development.

Twin Falls Hardware Co.

irrigation Through Conservation of Water Supply.

It was not until the summer of 1906 that the idea of constructing irrigation systems whose supply should be water conserved by artificial means, began to take serious root in Idaho. That year the Idaho Irrigation company, limited, which had been organized, the needed capital being secured in New York. Application was made to the state land board for the segregation of about 150,000 acres of very rich land in the Big and Little Wood river valleys. The proposal of the company to the state was to provide water for irrigation by the building of an enormous dam across Wood river, thus creating a lake about 11 miles in length, two and a half miles wide and a mean depth sufficient to store 200,000 acre feet of water—approximately nine billion cubic feet. The water was to be stored during the winter and flood water season in early summer, and was to be used for the later season irrigation. The company had acquired sufficient of the ordinary flow of the Little and Big Wood rivers to provide for the irrigation of all the lands asked for during the earlier part of the irrigation season.

The proposal was such an innovation upon what was regarded as the established order of things that objection was instantly made. It was not feasible, the proposed lake would not hold water, the river would not furnish any more water for irrigation than had already been appropriated and was in use. It was necessary, however, that some one should see its way to acting favorably upon the application, to secure some evidence that would fully answer the objections that were urged. This was done and it was speedily shown that more water was running to waste yearly from the water shed of Big Wood river, than was necessary to irrigate many times the acreage proposed to be improved; that the proposed dam and lake site was almost absolutely ideal for the purpose; that the lands, the segregation of which were asked, were the best in the state. Once these proofs were submitted the state land board acted favorably, and in the latter part of the summer of 1907 there was a Carey act land drawing of about 30,000 acres of extremely rich land covering what had long been known as the Marley Burn on the Little and Big Wood rivers. This opening was attended by a large number and the greater portion of the land offered was at once taken. The lands of the Marley Burn resemble in their chief characteristics the great grain lands of the Palouse country of eastern Washington and Northern Idaho, the rainfall, however, being somewhat less, and preventing the successful prosecution of dry farming.

The work of development was at once begun. At great expense the company began preparations for the building of their dam. A diversion dam was constructed to Big Wood river about four miles below the big dam, and work on the main canal was

Just Tell Them That You Saw Me And That I Saw the Wood, But Tell Them That the Wood I Did Not Saw.

Sounds somewhat involved. We not only saw the wood, but we also saw the wood. If you ever saw our wood you saw the finest timber that ever went into a stove. What's the use of stewing when you can get a nice, quick fire by using our wood? Save your fuel bill and your temper by buying your wood from us. You will feel better and live longer.

JOHN A. PEETZ, Prop.
Just above the Postoffice.

You needn't be afraid.

One day a lady who had been reared in the capital luxury of the old-fashioned Virginia home was invited to visit the kitchen of a great Chicago hotel. She wanted to go, but was afraid. When asked why she replied, "You afraid I'll see something that will forever destroy my appetite for hotel food?" She went, and found everything delightfully clean. Good housewives consider cleanliness and purity first of all; that's why Quaker Oats is their choice among all oatmeals. In making Quaker Oats the grain is sifted and refined, passing through more than fifty processes of cleaning before it is cooked and rolled.

If you took a handful of oats and scrubbed and polished and wiped each separate grain, it wouldn't then be nearly as clean as Quaker Oats. No human hand ever touches a single grain of Quaker Oats from the field to your kitchen. The best advice on foods you could have is "Eat Quaker Oats every morning for breakfast."

Well and Quaker Oats put up in two size packages, the regular size and the large, family size for those who are not so prudent to the store.

COMMISSIONERS' PROCEEDINGS

Twin Falls, Idaho, May 1, 1909. The board met this day pursuant to adjournment of April 23rd. Present, all members and clerk. Immediately upon convening, the board adjourned until Monday, May 10th.

Twin Falls, Idaho, May 10, 1909. The board convened this day pursuant to adjournment of May 1st. Present, all members and the clerk. The board examined and approved the report of George Carley, contractor for the construction of the bridge of \$49,200.00, by the American Survey Company of New York as surety thereon.

The board considered the petition of F. W. Monahan and others, for the appointment of Frank L. Cludas to be constable of Buhl precinct, and granted the same to the petitioner, Frank L. Cludas constable of Buhl precinct. And such constable having filed his bond in the penal sum of \$600.00 with R. H. Barnes as surety in the amount as sureties thereon, the board approved such bond, and declared such constable to be duly qualified.

The board considered the resignation of R. H. Barnes as overseer of road district No. 11, and accepted the same, declared the office of road overseer for road district No. 11 to be vacant.

The board considered the petition of J. H. Brashers and others, for the appointment of Byron O. Barnes as overseer of road district No. 11, and granted such petition and appointed Byron O. Barnes to be overseer of road district No. 11, and the same was exhibited and approved the official bond of B. O. Barnes as such road overseer in the penal sum of \$600.00 with R. H. Barnes as surety in the amount as sureties thereon, and declared such overseer to be duly qualified.

The board took up the petition of James H. Chambers and others for the division of school district No. 20, and the creation of a new district from a portion thereof, which petition was heretofore considered by the board, to which on April 20th, and denied as appears from the Commissioners Journal 1, page 311, and was at that time denied. A motion to reconsider such action prevailed, and such petition was again taken under consideration and granted, and a new school district was ordered established to be bounded as follows: school district No. 24, and bounded and described as follows:

Commencing in the center of the south line of section 16, township 10 south, range 14 east, and running thence south to the center of section 33, same township and range; thence east to the quarter corner of section 25, section 36, same township and range; thence north to the northeast corner of section 24, same township and range; thence west to the place of beginning.

The board took up the petition of Mrs. A. J. Lucker and others for the division of school district No. 20, and change in the boundary thereof, of which petition was by the board considered on April 15th, 1909, as shown by Commissioners Journal 1, page 21, at that time the petition was denied. A motion to reconsider such action prevailed, and the board again considered, and allowed such petition, and ordered that school district No. 20 be divided, and that the portion covered by this petition be re-organized and re-established to be bounded under the number of school district No. 20, with boundaries as follows:

Commencing in the center of section 23, township 10 south, range 14 east; running thence south to the quarter corner of the south line of section 16, same township and range; thence east to the southeast corner of section 13, same township and range; thence north to the quarter corner on the east line of section 36, same township and range; thence west to place of beginning.

The board ordered the auditor to credit George E. Harlan, assessor, \$115.00 as balance allowed upon the delinquent roll of 1908, as follows:

Paul J. Johnston—Twin Falls, lot 4, block 2, assess. 1908 \$85.00, paid J. McMillan No. 1123 \$4.34, pen. 6cts, credit 4 77

J. M. Dlee—NE 1/4 SE 1/4 10-10-17 assess. 1908 Newton add. lot 5, total \$100.00, Sol. Ex. \$14.00, paid J. McMillan No. 1438 \$18.82, pen. \$1.88, 20 70

TWIN FALLS, IDAHO.

Importer and breeder of Percherons, Belgians, Shires and Coach horses.

My second importation of Stallions will land tomorrow. They consist of three Royal Belgians and one German Coach Stallion. They are as good as money could buy, coming three and four-year-old and weighing up to 2200 pounds. Any community in need of a Stallion will find it profitable to inspect these grand horses or write me. I guarantee my Stallions and being in business and property owner here, my guarantee can be made good easily. Prices and terms most liberal to responsible parties and square deal to all. These Stallions being good to the back of good men at once, and will leave thousands of dollars in the pockets of the country.

You will find the homes at McMillan & Smith's big sale here until I can build barns on my own property on Blue Lakes boulevard. I am here to stay—support an honest home business.

IRRIGATION IN SOUTHERN IDAHO

(Continued from Page 7.)

at once commenced. Work was prosecuted with a very large force of men throughout the summer and fall, and when a second drawing of Carey act lands was announced to occur in November, the first 14 miles of the main canal had been completed. The season opening under this project was held in November, 1907, at Gooding, occurring in the midst of a financial panic which had at least partially paralyzed growth. Despite those untoward conditions, almost all the lands surrounding Gooding to the east, south and west were taken on.

Soon after this came the final slump, the New York backers of the project withdrew their support and the Idaho Irrigation Company was compelled to find a market for its bonds in a depleted money market. Work was stopped and for a time it looked as though the plan of the company could not be carried out. There was so much merit in the idea, however, that J. O. White & Co. of New York, the greatest contracting firm in the world, became interested, and late in the fall of 1908 the work of continued development commenced. During the succeeding seven months the company has completed the digging of the main line and lateral canals for the Marley Burn lands which are now being served with water. It has also placed a diverting dam in the Little Wood river about nine miles east of Gooding, and constructed 18 miles of main canal to serve the lands in what is called the South Gooding tract. The water has been turned into this main line canal during the past two weeks.

It was found necessary in order to bring the water on the land to the south and west of Gooding, to convey the water across the valley of the Little Wood river for a distance of nearly 4000 feet through a siphon. This siphon, which has just been completed, is said to be the largest and longest siphon used in connection with an irrigation system in the United States. The siphon is built of Oregon fir, the lumber being absolutely clear. The outside diameter is six feet and the inside diameter five feet and four inches. The siphon has a drop of seven feet in 4000. Still further down the canal there are a number of steel flumes which are used to convey the water across narrow canyons.

Another Segregation Aaked by the

During the latter part of the summer of 1908 the Idaho Irrigation company determined that their plans provided more water than was sufficient for the irrigation of all the Carey act, state and private owned land under their projected canals, and a petition was filed with the state land board requesting the segregation of about 51,000 acres of choice land lying along the main line of the Oregon Short Line railroad, immediately east of the town of Shoshone. After investigation the segregation was made and the company began the work of preparing to furnish water to these lands by the first of April, 1910. The contract with the state was made and signed and the state land board has decided to open these lands to entry on June 8, 1909. The sale is to be held at Shoshone and precedence in filing is to be determined by lot, the experience of the state with all previous Carey act openings having made clear that this is the best method.

The Great Storage Reservoir Under Construction.

The great storage reservoir now under construction by the company and which it is expected will take two years to complete is the first of its kind of any magnitude in Idaho. The dam that will form the reservoir is of what is called a rock-filled type. The dimensions are: On the bottom, 75 feet wide; at the top, 40 feet wide; height, 135 feet; extreme length, 2700 feet. The dam will have a rock toe with a vertical height of 40 feet and a rock heel of the same dimensions. In the center of the structure a trench is being dug across the bed of the river to bedrock about 32 feet below the bottom of the river, and in this trench is being placed an anchor for the dam made of sheet steel piling. These sheet piles are 18 beams four feet long which will be joined together with a steel web, fit snugly over the flanges of the beams. Around this anchor cement concrete will be poured and permitted to harden. The main dam will be of dirt with a puddle-and-dam method posted, so that when the dirt fill has been completed there will be no further danger of seepage disturbing the structure. On the upper face of the dam a paving layer will be laid of cement concrete a foot thick, thus preventing washing and leakage. The dam has an upstream slope of three feet to one. The down stream slope is two and a half feet to one. It is claimed that when the reservoir is entirely empty the dam will be filled with the surplus water coming down Wood river during the flood season within a very few weeks.

Water from this reservoir is not taken directly into the canal of the company. Through a tunnel already completed and which is 500 feet in length, 12 feet wide and 14 feet high the water is let into the river immediately below the dam and is taken into the canal at a diverting dam about two miles below. While the waters of the river will be carried through a spillway near the west end of the dam and over a rocky bluff. It is expected that ultimately an effort will be made to utilize this water by the development of electric power. This, however, will probably not be attempted until some future time. One of the most interesting problems that have confronted the company's resident engineer at the dam

BOISE, IDAHO

Mr. C. E. Abbott, was the construction of a proper gate through which the waters could be drawn from the reservoir through the drainage tunnel into the river below. This has been solved by the construction of a tower 135 feet in height at the upper portal of the tunnel. This tower is of cement concrete construction 18 feet in diameter on the inside. The north half of the tunnel is pierced with 33 elliptical openings through which the water is allowed to enter the tower. Running longitudinally through the tower from east to west is a wall reaching entirely to the top and dividing the tower equally. Still another wall divides this south half into two lobes. In each of these lobes are three gates, called wing gates, valve gates and sluice gates. The wing gates are always open and are not to be used except in case of emergency, if the other two gates should both be put out of commission. The sluice gate is also generally kept open, but can be used independently, providing anything should happen to the valve gate, which latter is designed to draw the stored water from the reservoir through the river below. These gates are all controlled by levers leading to the top of the tower.

The construction of the dam is just beginning. The rock toe is partially in place and a large force of men is at work clearing off the loose earth and sealed rock on the slopes of the canyon, preparatory to making the dirt fill. The trench through the bedrock is being made of the sheet steel piling anchor, and rock for the core of the dam is being taken from an immense quarry of limestone on the east side of the mountain just below the dam. The tunnel has been completed and lined with cement concrete and the gate tower is under course of construction, having now reached a height of about 30 feet. The sluice sills have been placed and pit openings have been made from which more than 700,000 cubic yards of dirt filling must be taken to construct the dam.

Work on the tunnel and dam was commenced about the first of last December, and has been continued steadily since with the largest number of men possible to secure. There has been an average of about 400 men employed and it is expected that during the coming summer fully 800 will be steadily used.

The dam is located on Big Wood river about 25 miles northwest of Richfield and fully 20 miles from the railroad. The reservoir extends north from the dam for a distance of over 11 miles with an extreme width of two and a half miles and an average width of more than a mile. The dam site is an ideal one.

The river which has been running through a valley suddenly runs into a gap in the hills where the walls of the canyon are precipitous. The dam is located just above where the river makes a turn to the west, the drainage tunnel being driven through the neck of the turn a depth of 120 feet. It is estimated that the cost of the irrigation system as planned will be between \$4,500,000 and \$5,000,000.
