

BIG LOST RIVER IRRIGATED TRACT

30,000-ACRE LAND OPENING ON SEPTEMBER 14.

Predicted to Be a Second Twin Falls—Facts Back Up the Claim—Land All Alike and All First Choice—Arco the New Town.

George F. Sprague returned to Arco, in the Big Lost River country. First of his time when he will spend most of his time until after the opening of lands to entry and settlement by drawing September 14.

"It will be another Twin Falls in point of settlement, improvement and crop production," answered Mr. Sprague. "It may not get as many settlers among its business men as this place, but that is depending on much," he continued. "What I mean is that the country is there, the climate and the water, and with this combination we know from experience that can be done."

"That country has some advantages we did not possess at the beginning and should make greater strides than we have had in other sections of the settlement first began. It already has a railroad, transportation facilities which we had to wait for; quite a number of other evidences of civilization which takes time, so that the people who go into Big Lost River will find much done for them, to which they will add to as settlement progresses."

"It is difficult for one to realize how ideally the lands in the Big Lost River tract are located. It is as nearly level as could be with the water, the water. I mean that it is unbroken and even; the lava has all decomposed and there are no rocky spots. The soil is uniformly the same, varying depth from 15 to 60 feet, under which is a layer of gravel, in which splendid water is found, so that every acre could be said to have its own well for domestic purposes."

"It is a very easy country for people to locate themselves. Land crusing will be a simple matter, for there was practically no poor sections, some may suit one person that wouldn't another, but the variation, if there is any, is sufficient to give men of different ideas a chance to suit themselves."

"The drawing takes place at Arco Tuesday, September 14, and special trains will be run to the place during that time and the week previous, while registration is going on. Arco will be to that tract what this city is to Twin Falls, a big metropolitan. Centrally located, in a magnificent country, it will enjoy an extensive business, for it is naturally the trading point for a big territory devoted to mining and stockraising, and will be the principal shipping point of that country."

"I have seen this place for as long as the old ranches adjoining the new land to be opened. Though the new land is higher than here, they have the same soil, the same climate, the same turns warm, and a full crop has been raised every season the past eight years without a failure, which is a wonderful thing."

"We have the Twin Falls country as an example of what can be done, and we are going to beat the record by making the new land as good as the old farms of 40 acres each to be drawn for the second Tuesday in September, and there is a chance for every good settler to begin with the first one did at Twin Falls and move along with the procession."

LABOR DAY.
Program of Exercises Arranged for its Observance.
The committee in charge of arrangements for the observance of Labor day at Twin Falls report a program of events practically completed, the exception being the speaker of the day, not yet decided upon.
The exercises are to begin with a grand industrial parade in the morning, covering the principal streets of the city, ending at the ball park, where the opening takes place. At 1:30 in the afternoon an interesting game of ball will be played at the park, following which some exciting and amusing contests will be given in pulling of the following events: Men's race, 1st and 2nd prize, free to all.
Boys' race, 1st and 2nd prize, free to all.
Ladies' race, 1st and 2nd prize, free to all ladies.
Polo race, 1st and 2nd prize, free to all.
Football race, 1st and 2nd prize, boys under 10 years.
Girls' race, 1st and 2nd prize, girls under 10 years.
Whomsoever race, 1st and 2nd prize, one man to wheel other, 25 yards and change and return, best time.
Grand ball in the evening.

HOLLISTER DAY ON SEPTEMBER 11

NEW TOWN STARTS OUT WITH A DRAWING FOR LOTS.

Town Will Have Immense Territory Draw Trade from the Men Behind to Make a City—Register for the Drawing.

Saturday, September 11, is to be known this year as "Hollister Day," for this has been selected as the date on which the new town of Twin Falls county, 17 miles south of this city, is to be opened to the public and the real work of building this big town will begin.

Hollister is a station on the new railroad building from Twin Falls to a connection with the Southern Pacific in point of settlement, improvement and crop production," answered Mr. Sprague. "It may not get as many settlers among its business men as this place, but that is depending on much," he continued. "What I mean is that the country is there, the climate and the water, and with this combination we know from experience that can be done."

"That country has some advantages we did not possess at the beginning and should make greater strides than we have had in other sections of the settlement first began. It already has a railroad, transportation facilities which we had to wait for; quite a number of other evidences of civilization which takes time, so that the people who go into Big Lost River will find much done for them, to which they will add to as settlement progresses."

"It is difficult for one to realize how ideally the lands in the Big Lost River tract are located. It is as nearly level as could be with the water, the water. I mean that it is unbroken and even; the lava has all decomposed and there are no rocky spots. OAKLEY OPENING SEPTEMBER 20

50,000 ACRES TO BE ADDED TO TWIN FALLS COUNTY.

Drawing to Be Held at Milner—Splendid Body of Land to Be Irrigated at Once—Further Development of Southern Idaho.

Our attention is called to an error appearing in last week's News in which the date of the Goose Creek or Oakley land opening was announced to be the 9th of September. The date of this great land opening, as fixed by the board of irrigation commissioners, is Monday, September 20.

The drawing for the selection of the lands, which is to be held under the supervision of the board of irrigation commissioners, is to be held at Milner, on the railroad, in place of Oakley, which will make it much more convenient for the large number who will attend.

This project, which is commonly termed the Goose Creek or Oakley land opening, has been cut off from the lands which are to be opened to the public. The lands which are to be opened to the public are to be opened to the public.

A PERMANENT EXHIBIT NEEDED

IDAHO SHOULD BE READY IN THE FUTURE

Views of Commissioner Fallon at Seattle—Commissioner McKinley Makes Good—Lawless Day—Idaho Hostesses Guests at a Ball.

(Special Correspondence.)
SEATTLE, August 18.—Idaho in the future must work for a permanent exhibit of her resources," said Immigration Commissioner Fallon, who, with Mrs. Fallon, has been an interested visitor at the exposition for the past week.

Mr. Fallon expressed himself as being highly pleased with Idaho's showing at the fair but he regretted that the permanent exhibit had not been preserved to add to this one. "California's exhibit is composed to a large extent of material which is of the nature of a permanent exhibit," he said.

Mr. Fallon's suggestion was voiced by many other Idaho visitors at the exposition all of whom, however, were amazed at the state exhibit, which, in the very brief time which the commissioners had had to collect it, was one of the best of the fair.

ARTESIAN WELLS FOR IRRIGATION

SETTLERS PROCURING THEIR OWN WATER.

Well on Bower Ranch Will Irrigate a Section of Land—Geek and Son to Irrigate 800 Acres in the Same Manner—Forty Feet of Soil.

J. H. Geek of this city informs the News that he and his son, the Mountain Meadow country are solving the water question by securing artesian wells, and will be independent of irrigation ditches in the future.

"The big well secured on the Bower ranch is a wonder," said Mr. Geek. "It is an eight-inch hole and the casing runs down 100 feet into the earth and considerable work must be done to provide waste ways to carry the water until ditches are built with sufficient to carry it to the land for irrigation."

"Together with my son, we hold 800 acres under desert entries and a homestead, and are preparing to reclaim the land with artesian water. Under a contract with W. A. Moore, an experienced driller, we have a well which will have a flow of water to the capacity of the six-inch casing, sufficient to irrigate the ranch."

"The first 40 feet was through soil, which shows the depth of the well is eight inches in diameter, which was cased. At this point solid rock was struck and no further casing is required. We had expected to buy water rights from the Goose Creek project, but with our own water we can do this a great saving."

"A great advantage of the well water is that it is warm, with a temperature of 60 degrees, and is suitable for use in the orchards and among tender fruit in the early spring. The water is so warm that it will melt the frost in the orchards and among tender fruit in the early spring. The water is so warm that it will melt the frost in the orchards and among tender fruit in the early spring.

IRRIGATORS MEET AT SPOKANE

WEEK'S SESSION OF NATIONAL IRRIGATION CONGRESS.

Large Attendance of Much Interest—Many Addresses by Prominent Citizens, Covering Numerous Important Subjects—Illuminated Parade.

The Seventeenth National Irrigation Congress, held at Spokane, Idaho, is reported to be the largest gathering in the history of the organization, and in some respects the most interesting.

The local organization at Spokane, which had the arrangements in charge, spared no pains or expense to provide ample accommodation for the visitors, and a program sufficient to keep the delegates interested throughout the week.

At the two last sessions of the congress there has been a contact on between government employees of the reclamation service and the forestry bureau on the one hand and private individuals on the other. The element is to control the congress. The victory will not be known until the resolutions committee makes its report, and a program sufficient to keep the delegates interested throughout the week.

At Tuesday's session John D. Rockefeller, a philanthropist and a member of the National Irrigation Congress, was the guest of honor. He made a speech in which he urged the irrigation of the arid lands of the United States, and called for a five-minute ovation given him when he took the rostrum, and ending with a similar ovation and "three cheers" for the irrigation of the arid lands of the United States.

CRUMBS FROM CURRY.

Gathered for Consumption of News Readers This Week.

CURRY, Idaho, August 11.—Hay cutting and stacking is the only go in this vicinity now.

Howard Van Anden left Saturday for the National Irrigation Congress at Spokane.

Miss Mary Fuller returned on Monday from a month's visit at the Seattle and Portland coast.

Miss Nettie Kindall visited with Miss Louise Nye Sunday and Monday.

The Thurbars and Pleshew families drove over to Shoshone Sunday in their delivery.

The Currys moving picture theatre gave its first show Friday.

Richard Elder set up his new hay-stacker Tuesday.

NEW MILL AT KETCHUM.

Concentrating Plant of 100 Tons Capacity—Ready for Operation.

W. H. Barry of Wendell is in the city Thursday morning, on his way home from an extended stay at Ketchum, where he has been engaged in installing a concentrating mill for the Independence mine at that place.

From his description the Independence is a great milling proposition and should be earning substantial dividends for its owners. Speaking of the property, he said:

"The Independence has a good body of hard-rock shipping ore running about \$200 to the ton, and has enough ore of the milling grade in sight and on the dump to keep a 100-ton mill in operation for 20 years or more."

"The mill just completed is of the concentrator variety, of 100 tons daily capacity. The ore first passes through rollers and into rolls, then through a series of screens, which classifies the pulp, separation takes place in bins of the coarse concentrates, and the fine pulp is then sent to the tables for separation. The mill has been in operation for two weeks and is giving excellent satisfaction, the saving being better than expected."

ARE YOU SATISFIED?

Question Asked and Answered by Idaho Falls Paper.

Idaho Falls Register: The greatest cause with which any community can be afflicted is thoman or men who are satisfied with the present progress of the community in which they live, and while there is probably no open resentment shown, a feeling of complacency is shown by the members pertaining to the rapid advancement of the community is evidenced.

It has been truthfully stated that the motto of the man who is satisfied with his present progress or goes backward. He may think he is holding his own, but in reality he is losing in the race, in that he is not keeping up with the progress of the community.

The business element of Idaho Falls, as a general proposition, is composed of active, energetic men, who are far from being satisfied with their present progress or goes backward. He may think he is holding his own, but in reality he is losing in the race, in that he is not keeping up with the progress of the community.

There are few satisfied western communities, and few satisfied men in those communities, but there are enough in some communities to be not least retard progress. They do not give their entire energies to the advancement of their communities.

Without too much complacency they can do business without too great effort. Just such self-satisfaction on the part of those who have in a way made themselves secure in life and who oppose any too great activity are draining the middle west of its best young men.

It is a dissatisfaction,—with present conditions and the desire to better conditions and then make them still better is making the great west what it is.

There are a great many communities within a radius of 100 miles of Idaho Falls which are dissatisfied with their present conditions and are trying to better themselves by public subscription thousands of dollars to be devoted to advertising. In the earnest effort to better their conditions, they invite more people and more competition. Idaho Falls cannot afford to be satisfied with conditions, and let the great west prosper at their expense.

OUT PROSPECTING.

Don Bryan Goes to British Columbia to Look at Land.

Don C. Bryan left for British Columbia Wednesday for the purpose of looking over an irrigation and land tract. Mr. Bryan started on the trip in response to a telegram received from Walter C. Piler, formerly of Twin Falls, but now of New York, which is an indication that the proposition he is going to look at is out of the ordinary. Mr. Bryan and Mr. Piler are old partners in the livestock and land business and close friends in a personal way on the Twin Falls tract. The great work done on the South side, including the dam, canal system and townships of the original tract is well known to Mr. Piler's genius and management. Mr. Piler's

FOR GOOD ROADS.

W. H. Cullington road overseer in district No. 7, south of town, stated to a News reporter that the effort to secure a law in the matter of permitting broken ditches to flood the roads was to be continued.

"We all want good roads, and we need them," said Mr. Cullington. "If we should let the broken ditches flood the roads, it would be a great loss to the community. We should have a law that would require the owners of the ditches to be responsible for the cost of the roads. We should have a law that would require the owners of the ditches to be responsible for the cost of the roads. We should have a law that would require the owners of the ditches to be responsible for the cost of the roads."

FILER FINDINGS. Threshing Commission—Rev. Wheeler Retires—News of the Neighborhood.

FILER, Idaho, August 6.—Mr. and Mrs. Samuela of Corning, Iowa, are here visiting with Mr. and Mrs. W. S. Fisher, who are on their way to the Seattle Exposition.

Charles Walker of the Cedar Grove farm in Twin Falls on business on Thursday of last week.

Miss Sadie Newberry, who has been visiting her parents and brother, Dr. Newberry, during the summer, returned to her former home in Denver, on Tuesday evening.

Rev. Charles Wheeler, who has had charge of the Methodist church here for three years, preached his farewell sermon on Sunday morning to a large audience. Mr. and Mrs. Wheeler will attend the Methodist conference at the residence of Mr. Wheeler, when Mr. Wheeler will retire from the ministry for a year at least, on account of ill health. They will make their home a small farm one mile north of town.

A large Reeves threshing machine and engine has arrived for A. H. Sonnesson, who is now engaged in threshing the living four miles southwest of town. Besides threshing his own large crop, Mr. Sonnesson has already engaged a second machine and engine to be used in the Pleasant View neighborhood and the crops there are the best since the opening of the tract, which shows that it will here respond readily to cultivation.

Willard Damer of Butte, Montana, arrived in Piler on Sunday and will attend the next meeting of the present canal, Mr. Voigt stated that a measurement, lately made showed that there was then flowing through the canal, between the dam and the second levee, and further stated that it was his belief that the whole system would carry 20 per cent more than the contract called for; that the amount of water carried sufficient water for 210,000 acres and was not then up to its full capacity.

In discussing the operation of the canal during the summer, Mr. Voigt stated that winter maintenance was very expensive. That from October to April 31, it cost \$42,000 to keep the canal open, and on August 1st it cost \$52,000. That the breaks during the winter from the banks freezing and thawing cost them \$85,000, and that the total cost was \$137,000 this summer.

Asked as to the probable maintenance cost per acre if the canal was turned over to all the land owners, Mr. Voigt replied that it should not be over 25 or 30 cents per acre, as then many of the expenditures now required could be avoided. That the cost of the canal during the summer would be \$7,000 and \$8,000 this year, and if all land was taxated, this expenditure would not be excessive. That if the canal were turned over to all the land owners, it could be eliminated, and only run the water in the canal during the time the weather was mild in the winter, and people fill their tanks and use the water to carry them over the cold snaps.

Mr. Voigt stated that there was probably under cultivation 12,000 acres, while 191,000 acres have been sold, which would probably be increased to 200,000.

Asked as to the amount of water furnished to settlers this year, Mr. Voigt said that in most cases it had been far in excess of what the contract called for, and that many of the farmers waiting so long in the spring before they began using the water, or had their crops in so they could use it, fall plowing and getting the crops in so they can be irrigated earlier in the season.

In all his remarks, Mr. Voigt expressed a feeling and a desire to settle in a friendly manner any differences that might arise between the company and settlers.

Adjourned sine die.

TO FIGHT BACK. Pinchot and Newell Complain to Scrap Ballinger.

A Washington special says that Gifford Pinchot, chief of the forest service, and F. H. Newell, director of the reclamation service, are equally aware that Secretary Ballinger is endeavoring to force them out of the federal service, or at least reduce them from their present positions of power to places less important than that of mere assistants. Pinchot is assuming different attitudes toward the secretary of the interior. Pinchot has denounced his paint and feathers and intended to resign his position, but his pessimistic attitude will await a decision by the president who is the final arbiter.

In the case of Pinchot it is a fight between the head of a department and the head of a bureau in that department. Secretary Ballinger is perhaps in a better position to wage war upon Secretary Ballinger than is his friend of the reclamation service. Yet it is the secretary of the interior who is being attacked by Pinchot in his own defense will also, to some extent, fight for Newell as well, for there is a bond of long-standing friendship between the two officials under fire and Pinchot would protest loudly against any authority of Newell.

Secretary Ballinger remains inactive some of his friends, especially friends in congress, have gone into the fight for him and are perhaps doing better than he is. It is possible that if he were inclined to follow the Pinchot tactics, Newell has friends as well as enemies in the senate and house, and it is possible that his friends have a much more vigorous support than Pinchot has.

Excursion to Canada. Via Oregon Short Line. Very long route to Cardston, Lethbridge, and Calgary. Return dates: August 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31. Ask agents for rates and information regarding train schedules, etc.

G. A. R. CONVENTION. Salt Lake City, August 9-14. Excursion via Oregon Short Line August 23rd, inclusive. Return limit, August 23rd. Ask agents for rates and further particulars.

Money to lend on improved farms near Twin Falls. Henry J. Wall, State Engineer.

Expert repairing on any sewing machine, satisfaction guaranteed, charges reasonable, at White office.

LEGAL NOTICES. Notice for Publication—Final Proof. J. James A. Crow, of Twin Falls, Idaho, who made entry No. 3474, un-

derstanding that the same was in the legislature of the state of Idaho, commonly known as the "Caray act," approved March 2nd, 1899, which established a good road district No. 12, between a good road district No. 11 and township 10 S., of range 15 E. B. M., do hereby give notice of my intention to make final proof to establish my claim to said land, and to that effect to expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before H. B. Lewis at Buhl, Idaho, on the 11th day of September, 1909, by two of the following witnesses: Herbert Painter and L. K. Cole, of Elbert, Idaho; Joseph Day of Twin Falls, and John Chisholm of Vista, Idaho.

JAMES A. CROW, Entryman.

Notice is hereby given that in the United States District Court, State of Idaho, Central Division. Notice to Creditors.

In re J. J. Boyd, voluntary bankrupt. No. 351. In Bankruptcy. The first meeting of creditors of said bankrupt is hereby called for the 30th day of August, 1909, at 10 o'clock a. m. in room 4, Commercial Bank building, Twin Falls, Idaho, state of Idaho.

This meeting will be held for the allowance of claims against the estate of the trustee and examination of bankrupt. Dated August 3, 1909.

J. H. WISE, Referee in Bankruptcy.

Notice of Writ of Attachment. In the District Court of the Fourth Judicial District of the State of Idaho, in and for Twin Falls county.

T. O. Boyd, plaintiff, vs. L. B. Noble, defendant. Defendant is hereby given that on July 26th, 1909, a writ of attachment was issued out of the above entitled court in the above entitled action, attaching the property of the defendant named defendant for the sum of \$125 and interest, costs and \$25.00 attorney's fees.

The witness whereof, I have hereunto set my hand and the seal of my office this 30th day of July, 1909.

H. T. WEST, Clerk of the District Court.

W. P. GUTHRIE, Plaintiff's Attorney.

Notice of Proof of Completion of Works and Application of Water to Beneficial Use.

Notice is hereby given that at 4 p. m. on the 6th of September, 1909, at Rock Creek, County of Twin Falls, state of Idaho, before Lawrence Hansen, proof will be submitted of the completion of works for the diversion of water from the waters of artesian well and spring and of the application to beneficial use of said waters in accordance with the provisions of section 4563 of the Statutes of Idaho, heretofore issued by the state engineer of the state of Idaho.

1. The name and postoffice address of the person or persons who are to conduct the works, or of Emma C. Young, Rock Creek, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is 0.6 cubic feet per second.

3. The use to which said water has been applied is irrigation and domestic purposes, and the amount applied to beneficial use is one cubic foot per second.

4. The place where said water is used is NE 1/4 NW 1/4, section 31 S., range 17 E., B. M.

5. The date of priority which said application is prepared to establish is April 25, 1909.

JAS. STEPHENSON, Jr., State Engineer.

Notice of Publication. Notice is hereby given that at 2 p. m. on the 7th day of September, 1909, at Kimberly, county of Twin Falls, state of Idaho, before W. F. Beyer, proof will be submitted of the completion of works for the diversion of 0.6 cubic feet per second of the waters of Rock Creek in accordance with the plans and conditions of a certain permit heretofore issued by the state engineer of the state of Idaho.

The name of the persons holding said permit is Geo. W. Goff, Edw. W. Tilley, Harry E. Elliott, and Chas. F. Romig.

The postoffice address of such persons is Kimberly, county of Twin Falls, state of Idaho.

3. The number of such permit is 0.6 cubic feet per second, and the date set for the completion of such work is September 7, 1909.

Said water to be used for irrigation and domestic purposes, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is 0.6 cubic feet per second.

Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is 0.6 cubic feet per second.

3. The use to which said water has been applied is irrigation and domestic purposes, and the amount applied to beneficial use is one cubic foot per second.

4. The place where said water is used is NE 1/4 NW 1/4, section 31 S., range 17 E., B. M.

5. The date of priority which said application is prepared to establish is April 25, 1909.

JAS. STEPHENSON, Jr., State Engineer.

Notice for a Special Election to be Held at Kimberly, Oregon, for the Purpose of Forming a Good Road District. Notice is hereby given that there will be a special election held at the office of the county clerk of the county of Harney, Oregon, on the 11th day of September, 1909, for the purpose of determining whether there shall be established a good road district No. 12, between a good road district No. 11 and township 10 S., of range 15 E. B. M., do hereby give notice of my intention to make final proof to establish my claim to said land, and to that effect to expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before H. B. Lewis at Buhl, Idaho, on the 11th day of September, 1909, by two of the following witnesses: Herbert Painter and L. K. Cole, of Elbert, Idaho; Joseph Day of Twin Falls, and John Chisholm of Vista, Idaho.

JAMES A. CROW, Entryman.

Notice of Writ of Attachment. In the District Court of the Fourth Judicial District of the State of Idaho, in and for Twin Falls county.

T. O. Boyd, plaintiff, vs. L. B. Noble, defendant. Defendant is hereby given that on July 26th, 1909, a writ of attachment was issued out of the above entitled court in the above entitled action, attaching the property of the defendant named defendant for the sum of \$125 and interest, costs and \$25.00 attorney's fees.

The witness whereof, I have hereunto set my hand and the seal of my office this 30th day of July, 1909.

H. T. WEST, Clerk of the District Court.

W. P. GUTHRIE, Plaintiff's Attorney.

Notice of Proof of Completion of Works and Application of Water to Beneficial Use.

Notice is hereby given that at 4 p. m. on the 6th of September, 1909, at Rock Creek, County of Twin Falls, state of Idaho, before Lawrence Hansen, proof will be submitted of the completion of works for the diversion of water from the waters of artesian well and spring and of the application to beneficial use of said waters in accordance with the provisions of section 4563 of the Statutes of Idaho, heretofore issued by the state engineer of the state of Idaho.

1. The name and postoffice address of the person or persons who are to conduct the works, or of Emma C. Young, Rock Creek, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of use, in accordance with the plans accompanying the application for such permit, is 0.6 cubic feet per second.

3. The use to which said water has been applied is irrigation and domestic purposes, and the amount applied to beneficial use is one cubic foot per second.

TELLS MONTANANS WHAT THEY'VE GOT

EDITOR FRABER TALKS OF CONRAD IRRIGATION PLAN.

Interviewed by Great Falls Paper He Tells of What He Saw While Inspecting the Project—Future of That Section Assured by Irrigation.

The Great Falls, Montana, Daily Leader says: "The heavy storms of last week subjected the canal system of the Conrad Land & Water company to such a test as it is not likely to undergo for some time, yet no damage resulted," said George Fraser of Twin Falls, Idaho, who has just returned from an inspection tour of the Conrad project and spent the day in Great Falls. "The old headgates on Dupuyer creek which are to be replaced by new concrete works this summer, were washed out by the flood and a flow of water equal to the carrying capacity of the feeder canal was turned into the new ditch, which had never held a drop of water. The banks stood the test and there was no washing, not even when the debris lodged and diverted the water against the dirt walls. It was an unexpected test, and the manner in which the canal stood it is very gratifying to the officials of the company. "The Conrad Land & Water company has every available man at work and is looking for more men. Five large steam shovels, each manned with a full complement of men are at work on the dykes and ditches, which are worming their way in all directions over the plains. More men and teams are being added as fast as they can be secured and it is likely that the company will let several contracts this season in order to hasten the construction work. "The Conrad Land & Water company is particularly anxious to see that the construction on any of the projects I have visited. The land slopes readily for irrigation and drains perfectly. This precludes the possibility of sour soil. On most projects it costs as much to get rid of the water

as it does to put it on the land. All the farmer on the Conrad project needs to do is to plow a furrow to the nearest coulee. "The town of Vallier is growing at a wonderful pace. There are more than 20 buildings under construction, including the First National bank building, the Vallier hotel, the Carnegie theater, the Methodist church, two business blocks and several residences. "The Montana Western railway from Conrad to Vallier is now being surfaced and the train makes two trips daily over the road. Eight carloads of lumber were unloaded at Vallier Monday, and the lumber was taken away as fast as it could be taken from the cars. The Conrad Land & Water company is shipping stock from Vallier, eight carloads having been loaded this week. The stock is billed to Anaconda and Seattle. Several trainloads will be shipped during the next month. Coal is being hauled into Vallier from Birch creek, a distance of about five miles, and it is only a question of a short time when mines will be opened up in that locality. The coal is free from cinders and burns nicely. There is also an abundance of good sandstone for building purposes within easy distance of the new town, and an unlimited amount of sand and gravel. It will be very simple matter to grade the streets of Vallier. "The development of the Conrad project will undoubtedly increase the assessed valuation of Teton county \$5,000,000 within five years. This has been true of other irrigated sections less favored, and experienced men class the Conrad project as being on a par with the best in the country. Magnificent crops are assured on the irrigated farms in the vicinity of Conrad. I saw a field of wheat yesterday which reached the shoulders of a man six feet tall, and if it does not yield 50 bushels an acre I miss my guess. The alfalfa crop is unusually heavy, the recent rains having brought it up with a rush. "The territory covered by the Conrad project is all tributary to Great Falls, and it seems reasonable to suppose that ultimately this city will supply power for that section and will be the manufacturing center. You will find that the Carey act will attract the best class of citizens and will result in a development as surprising as it is permanent."

REMOVES THE BAN.

Judge Permits Utah Smelter to Treat Copper Ore.

By a decision of Judge John A. Marshall of the federal court, the United States Smelting company will be allowed to open its copper smelting plant at Midvale, which has been closed for more than two years, says the Salt Lake Herald. The decision handed down by Judge Marshall Monday morning gives the smelting company permission to treat copper ore under the same restrictions as are placed on lead smelting. Judge Marshall decided that the experiments of the United States company with the baghouse system for the elimination of poisonous fumes and gases, which have been harmful to crops and stock, is successful, and that the smelter company may resume its operations without damage to the farmers living in the valley. One year ago Judge Marshall made a decree permitting the United States Smelting company to treat lead ores in its plant, using the baghouse system for the catching of the fumes. The system has proved successful, and has been extended to include copper ores.

Shrinkage in Whiskey Tax.

WASHINGTON, August 12.—The federal treasury suffered a shrinkage because of the prohibition wave during the fiscal year ending June 30. During this time there was a decrease of \$2,500,773 in whiskey tax receipts as shown by the preliminary report of the internal revenue bureau, made public today.

Whiskey tax collections last year were \$134,868,034, as against \$140,168,807 for the preceding year. The receipts of beer and other fermented liquors amounted to \$87,456,411, a decrease of \$2,954,205, as compared with 1908.

The nation's tobacco bill, however, showed an increase. The government tax on all sorts of tobacco aggregated \$51,887,178, an increase of \$2,024,123 over the previous year. The oleomargarine tax collections were \$92,197, a falling off of \$2,107.

BALLINGER MAKES NO ANNOUNCEMENT

REGARDING APPORTIONMENT OF RECLAMATION FUNDS.

Will Adopt Policy of Completing Projects Started Before New Ones Are Taken Up—What Director Newell Has to Say.

PORTLAND, Ore., August 3.—Secretary of the Interior Ballinger left for Seattle at midnight to hold a meeting with employees of the Indian service. Before starting he was again urged to make an announcement of the appropriations the different reclamation projects would receive during the year 1910. To this Secretary Ballinger replied: "Announcement of appropriations by my department are made quarterly. The next announcement will be made October 1."

In an informal statement today Secretary Ballinger said that in all probability the government would adopt the policy of completing reclamation projects now under way rather than undertake new works. Secretary Ballinger stated that the department had but \$11,000,000 available and that the new projects would involve an expenditure of \$15,000,000 additional.

Director Newell declared after today's meeting that the immensity of the different irrigation schemes as presented by the various engineers was simply overpowering.

"Every step taken must be deliberate," he said, "and we shall probably go along pretty much as we have done heretofore in conducting operations. "The demands of the territories, as well as the states are important as indicating the extent of development being accomplished on the arid lands. There was some talk of suspending work in the territories, but this idea was abandoned.

"The question of cutting out Idaho was considered, but state having received more attention than Oregon, but everything is uncertain as to just what steps will be taken, as it seems unwise to stop the work in one particular section with the idea of advancing the interests of another."

Mr. Newell stated that an attempt would be made in the ensuing year to complete all the larger reclamation projects. These, as enumerated by him, include the following: Roosevelt dam in Arizona, 70 miles above Phoenix; Gunnison tunnel, largest in the world, in central Colorado; also at Pathfinder, dam in central Wyoming; Teton system in Yellowstone Park; Boise system in Idaho; Minidoka system in Idaho; Bellefourche in South Dakota, largest earth dam in the world; dam on Yellowstone in Montana, dam on Rio Grande in New Mexico, to be continued.

THE ONLY INTERVIEW.

Mark Bates Tells What Secretary Said to Him in Parma.

Parma Herald: Secretary Ballinger of the interior department passed through Parma Saturday en route to Caldwell, where he delivered an address before the local club of that place. The Herald accented him at Parma and accompanied his return to Caldwell, and secured an interview that will be of great interest to the people of the North Side project. We do not pretend to give the questions and answers verbatim, but the following is the substance:

- Q. Mr. Ballinger, you are secretary of the interior, are you not?
- A. I am.
- Q. Do you draw your salary regularly?
- A. I do.
- Q. Do you really think a man with a large family can make a living on a dry ranch?
- A. I never tried it.
- Q. Do you know anything about irrigation?
- A. My private secretary may have an opinion.
- Q. How soon, in your opinion, will the government begin the construction of the North Side works, for which the people here have waited patiently for five years?
- A. Bendqourhikm (& 531gdb, 123 you're out.
- Q. Mr. Secretary, we wish to thank you for your candid and fearless answers to the foregoing questions, and as a last favor we would ask you what Parma people can do to advance your own interests and further the cause of irrigation?
- A. Rootferparmathe home of the Whitesox.

Scholarship Examination. The next qualifying examination for the Rhodes scholarships for Idaho will be held at the University of Idaho, Moscow, Tuesday and Wednesday, October 19 and 20, 1909. Dean J. G. Eldridge will act as supervising examiner and will conduct the examination in accordance with the regulations and rules of the Rhodes trustees. For further information apply to James A. MacLenn, chairman of the committee of selection for Idaho, Moscow, Idaho. New and second-hand typewriters bought, sold and exchanged. HILLS & TAYLOR.

C. B. HURTT, Mgr. Colonization Dept., Boise, Idaho

BREVITIES

Rev. John Gouley has gone to Butte, Mont., on a visit.

Dave Smith is back from an extended trip to the Seattle exposition.

O. B. Masterson returned Saturday from a 10 days' trip to Seattle and the exposition.

Mrs. A. K. Beaver is a recent arrival from Berkeley, Cal. Her future home will be in Twin Falls.

Mr. and Mrs. George Lacey have returned from their recent trip and are at home to their friends.

C. W. employed, formerly of Indiana, is now employed with the Twin Falls Title and Abstract company.

Mrs. J. W. Crocker of Merax, Ill. is visiting in the city, the guest of Mr. and Mrs. George L. Crocker.

Sam Grant of the contracting firm of Donald Grant & Co., was over from Gooding Wednesday.

The price of admission to Mrs. Lotie Cozier's recital on Friday evening, August 13, will be 50c and 75c.

L. M. Steiger of Pocatello was mixing among the hardware men of the Twin Falls country this week.

Mr. and Mrs. Henry Hand of Boise are visiting in the city, the guests of Mrs. Hand's sister, Mrs. F. A. Hutto.

STYLISH—Nothing more so. Hand-painted china neck, bolt, cuff and hat pins. Williams & Williams, Milliners.

D. S. Spencer, assistant general passenger agent of the Short Line, was a business visitor to Twin Falls Monday.

Attorney Wise is the possessor of a valuable real estate property located recently from G. C. McCallister.

G. W. Dean is the purchaser of a main street lot from Don Bryan. The consideration is stated to have been \$5,000.

B. C. Williams, a civil engineer of Pittsburg, Pa., is spending some time in the Twin Falls country with a view of locating.

Rev. Thomas Hine of Jerome will occupy the pulpit in the First Presbyterian church of this city next Sunday, morning and evening.

At the advice and persuasion of C. Harvey Smith, A. M. Moss of Spokane is making a tour of the Twin Falls tract this week.

J. P. Johnson has returned from a business trip to other places in the north, where he took a chance in the government drawing for Indian lands.

F. A. Griswold has purchased the interests of his partners in the real estate business at Burley, and will continue the business himself in the future.

A. B. Bear of Jerome was in the city Wednesday, on his way home from a business trip to Milner. He is in the accounting department of the North Side company.

I. B. Perrine is a business visitor to Salt Lake City this week. He will probably see a good deal of the G. A. R. encampment, though that isn't what he took him to the city.

Miss Irene Barber has gone to Old Mexico as an employe of the government. Miss Barber is a Red Cross nurse, who has many friends and acquaintances in this city.

Mrs. K. Sexton and daughter, who have been guests at the home of Dr. and Mrs. Will, will return to their home in the east in a few days. Mrs. Sexton is a sister of Dr. Boyd.

Alex McPherson is spending the week at the irrigation congress in Spokane. Mrs. McPherson accompanied him. They will go to the exposition at Seattle before returning.

A. A. Stalker returned Tuesday from Burley, Idaho, where he went with Mrs. Stalker for a few weeks ago on a summer vacation. Mrs. Stalker will remain for a few weeks longer.

The price of admission to Mrs. Lotie Cozier's recital on Friday evening, August 13, will be 50c and 75c.

J. H. Wise has received the sad intelligence of the death of his father, which occurred at the home of his wife on August 3. He had been in poor health for some time and death was not unexpected.

B. F. Catron of Buhl, who was operated on for the removal of glands in the neck at the Twin Falls hospital last week, has returned and recovered as to be able to leave that institution.

Robert Landson, secretary of state, was elected colonel of the Idaho National Guards recently, succeeding L. V. Patch, elevated to the position of lieutenant general by the death of Colonel Landson had no opposition.

At the drawing for Indian lands in the Coeur d'Alene reservation Monday, five citizens of Idaho were among the first 100 prize winners. Isador Solig of Myrtle Creek, Oregon, secured the first selection.

Dr. Adella R. Nichol is spending some days at the Twin Falls hospital, where an operation for appendicitis was performed. The doctor's large circle of friends will be pleased to know that she is doing nicely.

Geo. D. Alken & Co. has commenced the erection of a mammoth warehouse in block 152, extending from Sixth avenue through to Wall street. The building is to be covered with iron, making it practically proof against fire, and is to be used to accommodate the business of the company, storage and commission business.

LANDSCAPE in style, wear hand-painted china neck, bolt, cuff and hat pins. Williams & Williams, Milliners.

Dr. W. F. Pike has returned from an extended trip to Rochester, Minn. where he attended the medical lectures and clinical operations of a post-graduate course at Mayo hospital. The doctor spent a few days at Salt Lake City on his return.

Mike E. Mirich, aged 20 years, an employe on the construction work of the railroad building out of Twin Falls, died Tuesday afternoon, after a short illness. The funeral was held from Hunt's chapel Wednesday noon. Interment in Twin Falls cemetery.

Willard Wyatt has accepted a position with the Twin Falls Salmon Cannery and Water company, and will have charge of the office in this city. He takes the place made vacant by the resignation of Mr. Croft, who is now with the Twin Falls Milling and Elevator company.

E. M. Johnson of Burley, while in the city the other day, stated that he has his new prospect hole in working order, with a capacity of 20,000 brick per day. He is running the plant at full capacity and expects to begin making deliveries by September 15.

Situation wanted in southern Idaho by registered real estate agent, recommendation as to character, ability and general education. Age 22, single. Or would buy an interest in a well-paying drug store. Address G. D. Alward, 307 South Division St., Ann Arbor, Mich.

J. H. Mudd has returned from a trip through British Columbia, Washington, and other foreign countries, including Missouri, fully convinced that the Twin Falls tract is a well-contended and permanent city in the Twin Falls country.

Tuesday night, August 10, 1909, Norma Elizabeth Burton, the 18-month-old daughter of Mr. and Mrs. David C. Burton, living three miles from Burley, died. The funeral occurred from the family home the following afternoon at 3 o'clock. Interment in Twin Falls cemetery.

The Rose Lake Lumber company has sold its stock to the other yards of the city and will retire from the lumber business in Twin Falls. What new enterprises the members of the firm will take up has not been decided upon for the present.

The musical entertainment to be given by Mrs. Cozier at the school auditorium this (Friday) evening promises to be a rare treat for music lovers. Mrs. Cozier is said to be a very capable pianist and the program prepared is calculated to please a critical audience.

D. A. Ferry and wife of Waukegan, Illinois, are spending a couple of weeks visiting with their son, Ray Ferry, of Twin Falls. Mr. and Mrs. Ferry have been at the coast, visiting their daughter, and other places of interest, and are now on their way home.

Misses Leola Williams and Mary Miller of Twin Falls, were guests of honor at an afternoon party given by Mrs. Joseph Maddock, at the home of her parents, on Tuesday evening. The afternoon was pleasantly spent in games, and refreshments were served.—Mackay Miller.

J. H. Geek went to the Seattle exposition Thursday afternoon, where he will join Mrs. Geek, who has been spending some time visiting in the Twin Falls city. Mrs. Geek will spend a considerable party in Seattle, which he expects to seal on this trip, enabling him to add largely to his holdings in the Twin Falls country.

Don Bryan has returned from quite an extended trip in which he made some investigations as to the fruit growing in the region. The fruit of this section is in much better condition than in other communities visited, and that this season has established the Twin Falls country as a fruit producer up to the standard.

The price of admission to Mrs. Lotie Cozier's recital on Friday evening, August 13, will be 50c and 75c.

A letter from Thomas Woods of Linton, N. Dak., directing that the News be sent to him at that place for the next few months, states that he has purchased the William Cheek Farm, which he has just returned to the first of December, when he will become a citizen of Twin Falls country.

C. M. Hill has returned from Ash-ton, where he attended the revival of the town boom and sale of lots, covering the streets and failure to secure promised railroad rates served to reduce the expected attendance, but there was a "good crowd" and much interest manifested. Ash-ton received prominent advertising, and the good effect of which will be felt for some time.

F. A. Veit, vice-president and director of the Twin Falls Bank & Trust Co., has disposed of his stock in that well known institution and assumed his position. The vacancy in the directors has been filled by the appointment of Harley Minor, and at the next regular meeting of the board a new vice-president will be elected.

W. A. Kent, a prosperous merchant of Coeur d'Alene, came to the city Wednesday to meet his brother, D. E. Kent of Rutland, Vt. The Kent brothers will probably visit the big copper camp, after looking over the Twin Falls country, before the Yankee brother returns to the east.

The City Lumber company of Twin Falls has leased a tract of land adjoining the Hollister townsite and is establishing a yard at that place. While the location is temporary and will be changed as soon as a permanent site is secured, a stock of lumber and building material will be a great convenience to the town built-up on opening day.

An alarm of fire struck Wednesday evening, with a report that the hospital was threatened. The fire was of excitement and brought out the department. It proved to be a small blaze in the German Lutheran church, which was extinguished by the neighbors before the fire wagon arrived.

The Irrigated Lands company has received a large map showing the lands segregated to the Big Lost River irrigation company, which are to be disposed of at a public sale in this place on August September 13. The company will also have a supply of illustrated booklets to be given to those wanting more information regarding the lands and the opportunities to be had at that place.

Prizes offered by the Commercial club for the best samples of wheat, oats, barley and grasses, grown in Twin Falls county, have been awarded and the winning specimens are to swell the exhibit at the Seattle exposition. The first prize for wheat went to F. D. Brown, and the second to J. L. Boehm; oats, Turnpseed Bros. and G. W. Daubert; barley, E. E. Heaton and J. E. Stelnour; grasses, H. Havoclock and E. E. Heston.

Carl Camp, a prosperous young farmer living a mile west of the city, died quite suddenly Thursday noon, of heart failure. He had been ill for about three months, but on Wednesday he was able to walk to a neighbor's and was feeling quite well. Thursday morning he was much worse and passed away at about the noon hour. Deceased leaves a wife and infant child, besides his parents, living in this city.

The new drug store of Goldsmith & Ackerman, in the corner room of the Perrine Hotel building, has completed its stock of goods and is ready to care for the wants of patrons. The stock is entirely new and fresh, the proprietors are graduate druggists and pharmacists, and patrons are assured of satisfactory treatment. The fixtures of the store and the general arrangements give it a handsome and inviting appearance.

M. H. Wilson, a rancher living a few miles north of Nampa, while moving a derrick into the transmission line of the Swan Falls Power company, Tuesday morning, was electrocuted, being almost instantly killed. An iron pole attached to the wire, came in contact with the transmission line, forming a circuit, and the current passing through the body of Wilson, causing his death. Wilson was supporting three small children, deserted by their mother, making the case an unusually sad one.

Announcement.

On August 1, Don C. Bryan purchased the famous acreage at C. M. Foster, and has made arrangements with H. E. Barber & Co., of the Millst Parlor to convert this stock into shoes to wear in the next few days. This stock of high grade shoes, such as Stetson, Walkover, Soler Royal Balm and others, in men's and women's sizes, which will amount to about eleven thousand dollars, has been purchased at a very low price and will be sold regardless of cost. The Millst Parlor has leased the building, now known as the F. M. Fennimore shoe store and as soon as they can possibly make space, will move in their stock of men's and gent's shoes to wear in the next few days. The fall trade, contracted for with Edw. V. Price & Co., M. Born, and Royal Tailors, has commenced to arrive, and are compelled to move this stock of shoes to the store for their fall goods. Look for the ad in next week's paper announcing the slaughter of this big stock of shoes.

CAUSE FOR GOOD FEELING.

What the Reclamation of the Dubois Project Will Do.

Idaho Falls Register: The reclamation of the 270,000 acres of the Dubois project, which lies at the very doors of the great valley and city, means wonderful things. The bringing of that much fertile land under cultivation, the millions required to develop it, the advertising which will be done to place it on the market all spins success and prosperity for this section. It is estimated that a great question will furnish abundant home-steads and a living for 30,000 people. A market must be had for the production of this great section, some one must be the distributing point, some city will grow and prosper as a result. The logical conclusion is that that city will be Idaho Falls.

WANTED TO GO HOME.

Congressman Arrested by Sergeant at Arms at Railroad Depot.

A Washington dispatch of August 2 says: Five representatives were "held up" at the union station by the sergeant-at-arms of the house and compelled to remain in the city until a vote is taken to re-appoint the sergeant-at-arms of the senate on the first of July. They are Donny McEligan, Ashbrook of Ohio, Kellner of Massachusetts, Howell of New Jersey and Cassidy of Ohio.

It was reported to board a train for their homes when the officers of the house spoiled their plans. Countless excuses were offered, but the officer was firm.

Smile on Lincoln's Face.

Victor D. Brenner, the designer of the new Lincoln penny, 20,000,000 of which are now being circulated by the government, says that he obtained the smile on the "War President's" face by closing his eyes and imagining that Mr. Lincoln was talking to a child.

"If you look carefully at the coin, you will see I have made him smile," said Mr. Brenner. "I wanted to show the smiling sun, and the brightness of his life. I caught this expression only after I had shut my eyes and imagined him speaking to a child."

Mr. Brenner, as a boy, came to this country as a Russian immigrant. After struggling several years in various unremunerative positions, he took up sculpture and has won success.

While on your vacation, think of the places and things you'll see and the little episodes you'll want to remember in future years. Then take pictures of them with a

GALKINS & BOOTH'S Pharmacy

KIMBERLY'S WELL WATER.

Pumping With a Five-Horse Motor—Tank Used for Pressure.

KIMBERLY, Idaho, August 11.—The Ladies Pioneer club met with Mrs. J. G. Hightley last week. A good crowd was in attendance and the afternoon enjoyed by those present.

Ed Claiborn has installed his large pump and is working it with a five-horse motor and power from the local plant. The water is clear and cold and is a great improvement over the ditch water. Mr. Claiborn has erected a two-story house over his well and has power shaft for the purpose of running other farm machinery. The upper story will be used for a large tank, so that he will have pressure for his water through the house, as well as for fire protection and lawn purposes.

Several of our young people attended the dance at Rock Creek a few nights ago and report a fine time.

Jas. Mathews has secured a position on a farm near Twin Falls, and will remain there for the present.

Mrs. Lottie Cozier gave a recital at the hall last Wednesday evening to an appreciative audience. She is a soloist of rare ability and all present expressed themselves as being well pleased with such an entertainment. But few such singers come to Kimberly.

J. F. Benham left last Thursday for Portland and California, on his way to his old home in Missouri.

B. F. Hoover and wife are enjoying their vacation at the fair and other points on the coast.

Several of the Kimberlyites are arriving around in new bugles and carrying along the carload of vehicles arrived a few days ago for the Kimberly Supply and Produce company.

Four carloads of brick have been received from Pocatello for the bank and work is being pushed by Contractor Black on the new building.

E. U. McIntire's mother is visiting him from Ely, Nevada. This is her first visit to Kimberly.

A baseball game was played here Sunday between the local team and

Ladies' Dressmaking & Ladies' Tailoring

A. S. PAULIN

Begs to announce that he has opened a store in the Boyd Building with the intention of carrying on the above business. Ladies may feel assured that they will get perfect fitting and stylish garments well made and well finished. A full range of the newest and most UP-TO-DATE materials.

CHARGES MODERATE. ESTIMATES GIVEN

Link's Modern Business College

Many Students Have Already Taken Advantage of the Discount.

Start Right for Business Success. Enroll Today.

Now is the Time to Save From \$6.00 to \$15.00.

College Journal and full information sent upon request.

A. T. LINK, General Manager.

Both Phones. 1223 Main Street. Boise, Idaho.

one from Twin Falls. The score was in favor of our home team—10 to 2.

F. M. Kondall has begun work on his new residence in Burrittong's addition to South Kimberly.

Several hay baling crews in the neighborhood. Many of the farmers are having their hay baled and will take care that not so much spuds as did last winter. Hay crops in the northwest is reported light, so with the new projects in sight hay ought to be a good price this fall and winter.

A brother of E. V. Davis is here visiting at his suburban home east of town.

the past few days and the local real estate men were busy showing them around Kimberly.

Kimberly is a dry town now. The saloon license expired August 8 and Ed Demrose has closed up. He will install a pool hall and soft drinks in the old stand.

Justice Brecken and Constable Tilly will had a patient Tuesday evening. A man from Twin Falls came up the track aloft and thought a man and a woman was after him. They phoned the deputy sheriff who came after him with two assistants and took him to Twin Falls, where he will be kept under guard until he recovers.

John V. Tonnant and Herman Strickler are in Salt Lake this week attending the G. A. R. convention.

TO ALL INTERESTED IN CONTRACTS covering the following lots in the Twin Falls townsite:

- Lot 4 in block 130.
- Lot 5 in block 130.
- Lot 3 in block 131.
- Lot 4 in block 131.
- Lot 1 in block 153.

Payments on these contracts are delinquent and if not made by August 20th, we shall cancel the contracts and re-sell the lots.

TWIN FALLS TOWNSITE COMPANY, Ltd.

Money to loan. Apply C. W. Walton, Perrine Hotel.

Go to all Other Places First

Then come here and compare our values and prices with others. We feel safe in advising this because we know we are offering greater values in our lines than have ever been shown for the prices asked. We MUST be closed of this stock in a very short time. Hence such prices as:

- \$3.50 and \$4.00 Shoes, now \$2.75
- \$3.00 Hats, now \$2.00
- \$2.50 Straw Hats, now \$1.50

Twin Falls Hardware Co.

IDAHO'S FUTURE

Senator Borah Gives Facts to a Chicago Newspaper.

The Chicago Sunday Record-Herald has the following, written by Senator Borah, in its special southern Idaho number of August 15:
"You ask for information relative to the development of southern Idaho by means of irrigation and of the opportunities for homeseekers."
"Well, let us illustrate: Twin Falls is a city of 5,000 population—with every convenience, comfort, advantage and pleasure offered by the older cities of the east. It has good schools, modern hotels, electric lights and highly cultured, law-abiding, home-owning people. It is surrounded by a thickly settled community with farms, rich, marvelously rich, in productive power, where you find country homes such as you find in the old and established communities."
"Five years ago, where this thrifty, prosperous and stable community now exists, a community as well ordered and as settled in its routine of its successful industrial life as you will find anywhere, there was a desert as sad and somber as a tariff bill. It was a scrubby desert. Few men believed that it could be successfully irrigated and none dreamed of such a sudden and startling achievement in industrial life as is now a realized fact."
"I doubt if there is an instance anywhere to be found of such a sudden and permanent and substantial growth of a community as is found here."
"What has been done here will be done and is being done elsewhere. Such towns as Gooding, Jerome, Wendell, Ingorman, Buhl, Durtley, Hoyburn, Rupert and others are forging ahead, and many towns are particularly because they are associated with irrigation enterprises."
"There are thousands of acres in this region still awaiting the restless energy and integrity of purpose which made the city and community of Twin Falls. Other irrigation enterprises may not be as successful as such a town. But the natural resources are there if the same class of men take hold of them and have the same opportunity."
"Our arid lands are taken up under both the Carey and the reclamation law. Under the Carey act it is the nature of a private enterprise. The lands are built and water put upon the land and the land and water is sold to the settlers under terms and conditions controlled by the state. Under the reclamation law the settlement takes place under the administration of the national government. I am not going to discuss here the advantages or disadvantages of either system, but under the two there are thousands of acres yet to be reclaimed that are as rich and productive as any to be found anywhere."
"The Mindokoa project, which is a government project, covers about 132,000 acres. The Boise-Payette project may cover about 372,000. These projects having a unit of from forty to eighty acres, you will readily see will give permanent homes to thousands of people. There are also a number of private enterprises under the Carey act being inflated and carried forward. This land when properly irrigated will produce all kinds of fruits, vegetables and cereals."
"But these areas of reclaimed lands should not be regarded as oases in a mountainous and otherwise unproductive country. When a man secures a home in Idaho he has a home in one of the largest and richest states of the union. Our area is greater than that of New England. Our surveyed lands alone exceed in area twenty times the area of Delaware. We have the greatest lead producing mines in the world, also some of the richest gold mines. Every mineral imprisoned in the earth is found in Idaho. Almost one-third of our land surface is covered by yellow and white pine forests."
"Our fruit crop last year was estimated at more than \$3,000,000."
"We have therefore combined industrial resources composed of our mining interests, our timber lands, our agricultural lands and our grazing lands which must inevitably insure a great and prosperous commonwealth."

"I doubt if there is an instance anywhere to be found of such a sudden and permanent and substantial growth of a community as is found here."

The lands are built and water put upon the land and the land and water is sold to the settlers under terms and conditions controlled by the state. Under the reclamation law the settlement takes place under the administration of the national government. I am not going to discuss here the advantages or disadvantages of either system, but under the two there are thousands of acres yet to be reclaimed that are as rich and productive as any to be found anywhere."
"The Mindokoa project, which is a government project, covers about 132,000 acres. The Boise-Payette project may cover about 372,000. These projects having a unit of from forty to eighty acres, you will readily see will give permanent homes to thousands of people. There are also a number of private enterprises under the Carey act being inflated and carried forward. This land when properly irrigated will produce all kinds of fruits, vegetables and cereals."
"But these areas of reclaimed lands should not be regarded as oases in a mountainous and otherwise unproductive country. When a man secures a home in Idaho he has a home in one of the largest and richest states of the union. Our area is greater than that of New England. Our surveyed lands alone exceed in area twenty times the area of Delaware. We have the greatest lead producing mines in the world, also some of the richest gold mines. Every mineral imprisoned in the earth is found in Idaho. Almost one-third of our land surface is covered by yellow and white pine forests."
"Our fruit crop last year was estimated at more than \$3,000,000."
"We have therefore combined industrial resources composed of our mining interests, our timber lands, our agricultural lands and our grazing lands which must inevitably insure a great and prosperous commonwealth."

"I doubt if there is an instance anywhere to be found of such a sudden and permanent and substantial growth of a community as is found here."
"What has been done here will be done and is being done elsewhere. Such towns as Gooding, Jerome, Wendell, Ingorman, Buhl, Durtley, Hoyburn, Rupert and others are forging ahead, and many towns are particularly because they are associated with irrigation enterprises."
"There are thousands of acres in this region still awaiting the restless energy and integrity of purpose which made the city and community of Twin Falls. Other irrigation enterprises may not be as successful as such a town. But the natural resources are there if the same class of men take hold of them and have the same opportunity."
"Our arid lands are taken up under both the Carey and the reclamation law. Under the Carey act it is the nature of a private enterprise. The lands are built and water put upon the land and the land and water is sold to the settlers under terms and conditions controlled by the state. Under the reclamation law the settlement takes place under the administration of the national government. FIRST OIL WELL

Golden Anniversary to Be Celebrated in Pennsylvania.

The eyes of oldtimers will be turned to Tuscarora, Pa. during the latter end of this month, when the golden anniversary of the drilling of the first oil well in the world will be celebrated. The qualities of petroleum had been known for centuries, but it remained for Col. Edwin W. Drake to drill the first artesian well in search of the oleaginous fluid on August 28, 1859, near the town of Titusville, Pa. Mr. Drake located the spot for his first experiment on what is now the Emory farm. He drove a pipe down to bed rock to a depth of 66 feet and from that point the drilling began. At one time Col. Drake's money gave out, and had it not been for R. D. Fletcher of this city the discovery of the artesian method of obtaining oil would have been delayed several years. Mr. Fletcher came to the assistance of Col. Drake, and on August 28 the drill tapped a vein of oil which lay 69 1/2 feet below the surface of the earth and produced 40 barrels a day.

Car of Furniture Burns.
A car load of furniture valued at \$3,000 was burned at Blackfoot last Saturday and was a total loss. The car was consigned to a local furniture company, which, it is stated, opened the car to remove some of the goods and re-secured the car. The blaze originated within the car. A fireman pushed the car hurriedly to the water tank, hoping to flood it, but in the excitement and hurry the spot of the tank was caught between two cars and broken off. The fire department was then summoned, but the damage had been done. The question is—who is responsible? The national company or the local furniture company—Idaho Falls Register.

I make a specialty of collecting bad debts. I have a correspondent in every city and town in the United States. If you have claims you desire collected, call and see me.

BULL SHIPING HORSES TO OMAHA

TWELVE CARLOADS GO MONDAY AND MORE TO FOLLOW.

Grade Stakes for Railroad Extension to Nyssa—New Two-Story Business Block to Go Up—Getting Ready for a Sewer System.

DUBLI, Idaho, August 18.—Bills H. J. Nelson returned to his home in Boise Wednesday, accompanied by Miss Hazel Allred, who will visit in that city for several weeks.

Messias C. L. L. L. returned home Saturday from Missouri, where he had spent several weeks visiting his mother and other relatives and friends. They report having had fine times, but were glad to get back to Dubli and their homes. They say that the weather was very hot in the "show no" state.

Diego Duran, an employe of the Dubli Telephone company, met with a serious and what nearly proved to be a fatal accident last Friday. While working with the rest of the men in stretching the telephone wire cable, two pieces of flat iron, bolted together, fell from the top of a telephone pole on his head, inflicting two deep gashes in the scalp, which had to be stitched together by Dr. Murphy. Mr. Duran was unconscious for several minutes, but is fully recovered now, although still in bed.

Twelve carloads of fine range horses from the Three Creek country were shipped out of the Dubli stock yard to Omaha. They were exceptionally fine animals. Many more carloads are to be shipped in the near future. Dubli is bound to become the shipping point for the stock of the large territory in this vicinity and across the Salmon river.

Word has been received from C. J. Perkins, the president of the Dubli and Twin Falls Land and Water company, that the West End opening will take place in Dubli on September 28, 1909. This will make busy Dubli streets all for a few days, as the people to attend this opening. Dubli, however, will be able to take care of them all.

The work of stretching the telephone cable is almost completed. The exchange will be in the Harris building on Broadway. The office is being fitted up and put in shape for business.

Two gentlemen from Salt Lake City, whose names your correspondent was unable to learn, purchased the two lots on the corner of Main and Elm streets for \$2,500, on which they will commence the erection of a two-story building at once.

Surveyors started Monday to stake out the grade for the construction work on the extension of the railroad on westward from Dubli. The ramp is pitched between Dubli and the Salmon river. It is in the nature of a descent, but will be changed somewhat, but not enough to make any material difference in the route as at present contemplated. It is expected that the dirt will be hauled to the site.

O. G. Chamberlain was in from the ranch on business yesterday. W. R. Morrison was a Dubli business visitor yesterday. He reports the crops out in Dunkirk.

F. R. Ring was in town yesterday on business. He has just returned from the Couer d'Alene and Flathead countries, where he has just registered. He says that they are fine countries, but cannot compare with the Dubli country, and even if he should draw a good number, he would still consider the Dubli country the best in the world.

Dr. James Monroe is in Missoula, Mont., waiting for his name to come out of the lottery box, so that he can commence looking over the country for a choice location as soon as his number is announced.

The foundation work on the Peck building, on the corner of Main and Broadway, which is to be occupied by the Dubli Bank & Trust company, the second story being intended for office rooms, is completed and work on the construction of the building is on until the building is finished. This structure will be faced with elegant white cut stone, brought from Utah, and will have all the modern conveniences for banking purposes as well as offices.

The ball game Sunday, between the Boosters and the Hanson team, was a game of the Boosters. The score was 20 to 2 in favor of the West-enders. The Boosters will play the Hagerman Fish Eaters next Monday. Joseph Philizer returned home Saturday from Couer d'Alene and Missoula, where he had gone to register for the land opening at that point.

J. L. Harvey of Three Creek was in Dubli for a short time Friday.

B. E. Morse of Twin Falls was up from the trip Friday, on a short business trip from Friday.

A. C. Duffin of Twin Falls spent a few hours in Dubli Saturday. Charles C. Duffin, who has been up from the scenic Snake Saturday on business.

Mr. and Mrs. W. C. Morgan of Okla. Neb. were guests of Hotel Dubli for a few days last week.

C. A. Summers of Wendell was over from the northwest end town Saturday. Henry Smalley arrived in Dubli from Jacksonville, Florida, last Friday. Mr. and Mrs. Smalley, with the younger children, went to Florida last year to live, but the country was so unhealthful that some members of the family was sick all the time, so Mrs. Smalley came back to God's country, bringing the children, with her and leaving Mr. Smalley to fight out with the chills and fever. Mrs. Smalley says that she has had enough of the beautiful overland of Florida, and she and her children are in the Snake river canyon look far more beautiful to her than the overglades with the swamps, snakes and mosquitoes.

Mr. and Mrs. W. H. Weaver, mine hosts of the popular Pacific Hotel in Twin Falls, visited Dubli Saturday. It was Mrs. Weaver's first visit to the future great West End city and she was well pleased with it and the surrounding country. Mr. Weaver owns an 80-acre ranch, all improved, three miles northeast of Dubli.

W. Vance and W. McCullen of Three Creek were Dubli business visitors yesterday.

O. Karl Karchner and D. Brackett of Roseworth were over from that country Monday on business.

A. M. Brown of Minidoka, was transacting business in Dubli Monday.

H. B. Lewis of Twin Falls spent between train time in Dubli yesterday. At a special meeting of the city council, held Tuesday night, the city attorney was directed to draw an ordinance creating and establishing a sewer district, and a committee was appointed to negotiate with property owners along the canal running north from the north side of the canal park, for the terms on which they will grant the city an easement for the discharge from the sewer, it having been decided that this canal was the best place for such a discharge.

There should be no trouble in procuring the easement, as the canal can never be used for other purposes than a water way, and the water running in it need not be used for domestic purposes by any of the people living in its vicinity. It is only a matter of a short time until the city must have a sewer system. It is growing too rapidly to remain long without one, and it is to the interest of all the people living on this part of the tract that no obstacles should be thrown in the way of the progress of the city, but that all should assist in the accomplishment of it, the hope being that there will be no trouble in obtaining the easement required, and that condemnation proceedings may be avoided if possible.

A son was born Thursday to Mr. and Mrs. Harry Whitby. Mother and child are doing well.

A young booster arrived at the Dubli stock yard last night. He spent the evening, and mother and child are getting along all right, and the father will soon be able to attend to the crops again.

Money to loan. Apply C. W. Welton, Perrine Hotel.

NEW BRIDGE IN PLACE. Across Dry Creek Near Murtaugh—Ready for Approaches.

MURTAUGH, Idaho, August 12.—The new steel bridge across Dry creek is now in place and ready for the approaches to be built. With solid rock abutments and a steel structure, this is one of the best bridges in the state. It has a 60-foot span.

J. S. Wallace, who has been working for B. F. Jain, left for Pocatello Friday. Mr. and Mrs. Work of Pocatello are visiting at the home of W. Walker. President W. F. Jack of Burley was here last week. William Jacks and John Elchert returned Sunday from a visit to Stannard. F. L. Koller shipped a car of hay to the Twin Falls market Friday. Mr. Davis of the Utah-Idaho Elevator company was a business visitor in Murtaugh Tuesday. J. W. Walker and Jess Draper were Twin Falls visitors Tuesday. J. F. Walker of Oakley is visiting his brother, J. W. Walker, of this place. B. F. Jain is cutting his second crop of alfalfa, and reports a larger yield than at the first cutting. The county commissioners should look after the approaches to the two new bridges over the canal on the Murtaugh-Stannard road. It is almost impossible to cross the crossings in their present condition.

WHAT HAPPENS IN HANSEN TOWN

BRIEF MENTION OF EVENTS IN NEIGHBORING TOWN.

Organizing an Orchestra—Interest in Christian Church Meetings—House Party at the Redhead Home—Notes and Items of Interest.

HANSEN, Idaho, August 11.—Nick Smith and family drove out from Twin Falls Friday evening and were guests of the Methodist ladies at their ice cream social.

Sturges McCoy and his friend, Dr. W. C. McNeil, were in town, enjoying the scenery of the Snake River canyon, last Sunday.

Mr. and Mrs. J. R. Hinton, Mr. and Mrs. Ezra Williams and L. V. Kellogg, departed Sunday evening for Salt Lake City to attend the G. A. R. encampment.

Mr. S. E. Brewer and little daughter of Twin Falls, were the party for W. F. Brewer and Mrs. W. N. Rose a couple of days last week.

C. E. Edwards has purchased a new separator to be used with his engine, and will commence threshing the first of next week.

Those interested in organizing an orchestra are invited to meet at the school house Thursday evening, August 12. This is a move in the right direction, as there is no small amount of musical talent in the community, which with the proper program could be made the means of a good many social evenings.

The trees on the Hansen townsite are badly in need of some touch from the magic wand of the fairy goddes, "Irrigation."

When G. J. Rodhead returned from Twin Falls Saturday he surprised his family by presenting them with a new piano, which is justly appreciated by all.

A merry house party is being entertained at the home of Mrs. Rodhead's sister, Mrs. Ed Waters and Mrs. C. W. Wood of Springdale, and Mrs. Harriet Harland of Salt Lake City. It is needless to say that a pleasant time as assured.

Mr. E. J. Smith and daughter, Miss Ethel, went to Twin Falls Monday to visit Mrs. William Baker.

A number of young people gathered at the home of Professor A. Scranton Monday evening at a social party for his sister, Miss Lena Scranton, who has made her home here to attend the Y. P. conference. She returned to her home at Nemo, Illinois, to finish her course in the Normal college at that place.

John F. Hansen was a Dubli visitor last Sunday.

L. A. Conway of Three Creek had business with our U. S. commissioner, John F. Hansen, last Monday.

Mrs. J. E. Tolby went to Burley Monday for a few days' visit with relatives.

After a short visit at the home of his uncle, J. J. Barnes, G. W. Griswold, and wife of Jerome, were looking after their land interests in this community a few days this week. They were the guests of Arthur Scranton.

Mrs. S. F. Jerome took their friends from Salt Lake City for a pleasure trip to Shoshone falls and Blue Lakes last Wednesday.

WANTED—Position for boy to earn his way while attending high school. References exchanged. Write Roy C. A. Varnum, Twin Falls or Jerome.

A Day at the Circus. The very thought of it thrills you. What memories, what anticipations, what promises of pleasure it brings! Ask a man the character of the first show that his youthful eyes ever absorbed with innocent delight, and he will say with unhesitating candor, "the circus." Ask a boy what the future holds for him in the way of promised pleasure, and immediately

the circus jumps up big and dazzling in his imagination. "And it's strange that it should be so. The world famed Gentry Bros. Dog and Pony Shows, (now united) who exhibit here Tuesday, August 17, is a traveling university of entertainment and instruction. With a gold guarantee of twenty years' unprecedented success, doubled, is tripled in merit and quadrupled in rib-ticking fun, the public press in one accord proclaims that Santa Claus alone rivals Gentry Bros.; in the hearts and minds of millions of American children (grown-ups also) Elephants that entertain, dogs that delight, sheep of rare sagacity, birds both beautiful and amusing, monkeys, matchless in mimicry, pet pigs, fun promoting games and more than a hundred points that please the little ones, because they are pretty, affectionate and funny. Can there be any doubt to the fact that nine-tenths of the children of the United States would never see the marvelous exhibitions of the vast possibilities in animal

FOR SALE—Small stock of stationery and office supplies, 12 1/2 cent counter show case and wall case. News Publishing Co. Twin Falls, Idaho.
