

FIFTH YEAR

TWIN FALLS NEWS, TWIN FALLS, IDAHO, FRIDAY, OCTOBER 15, 1909.

NUMBER 51

CITY DELIVERY NEAR REALIZATION

WHEELS ARE MOVING FOR MAIL CARRIERS IN TWIN FALLS.

A Telegram Urging It, Receive Response That It Will Be Expedited by Department Officials and Prospect of Results is Good.

The machinery is set in motion apparently for early realization of the free delivery service in Twin Falls. Since the telegram was sent last week by F. Addison Smith, to the first assistant postmaster general, calling attention to the fact that the Department had been overlooking this matter. Senator Borah also promised Mr. Smith last Saturday, upon learning of the fact of the Department's neglect to subject up by wire with the postoffice department at Washington as soon as he returned to Boise. Mr. Smith, as the News last week announced, wired the first assistant postmaster general that all specifications required by the department for free delivery had been completed, and would be ready for official order. To this telegram the following telegraphic response was received by Mr. Smith, as the local representative of the News, last Monday from Mr. Bushnell, acting first assistant postmaster general:

"The establishment of city delivery service in Twin Falls is awaiting inspector's report. The matter will be expedited."

Mr. Smith says upon receipt of this information, that the subject would probably be referred at once by the first assistant postmaster general to the San Francisco inspector's department, which is the headquarters of the western division, and that from there an inspector would be sent here to report on the conditions relative to the work he had required that had not been done incidentally to having the free delivery ordered from Washington.

"I think you can safely say," said Mr. Smith, "that there will be an inspector here to look into this matter in a very short time."

"I think you can safely say," he continued, "that in the establishment of the carrier system here there will be an opportunity for two or three Twin Falls young men, because possibly the service will be inaugurated with temporary carriers to serve until carriers can be appointed from the eligible list of the civil service."

CHANGES IN TRAIN SCHEDULES.

A change effective last Sunday, in the train schedule, was made by the Short Line trains, which up Twin Falls mill and train timetables this week and discontinued many people. Until another change is made, the eastbound trains on the Minidoka & Twin Falls at 11:25 a. m. and 7:40 p. m. Westbound trains at 12:30 p. m. and 8:15 p. m. Mails close half an hour earlier than those train departure schedules.

ORDAINED A MINISTER.

Presbytery Acts on Application of Rev. R. J. Koffend.

At a meeting of the Twin Falls presbytery last Tuesday Rev. R. J. Koffend was duly ordained a minister of the Presbyterian church, and as to become a member of the church, he made an exceedingly favorable impression on the members of the presbytery, and starts out in his chosen career with the best of wishes from fellow ministers and in a splendid field. Mr. Koffend came to Idaho from Oregon, Ont., where he had been engaged in missionary work for some time, particularly in the territory of Y. M. C. A., which gave him a valuable training for a successful career in religious lines.

In addition to this experience he has a training in the Moody Bible institute.

Both Mr. Koffend and his wife were ordained in the Twin Falls Presbyterian church, at a recent session of the presbytery, and by this session were recommended to the presbytery. The church at Jerome, Mr. Woodall had invited him to take charge of their work, hence his formal assignment to these stations.

LOCAL BANK CHANGES.

Town Bank into Twin Falls Bank & Trust Company.

At a meeting of the Twin Falls Bank & Trust Company stockholders last Tuesday evening the old board of directors was re-elected with the exception of G. B. Wilfong, who has sold his stock to H. J. Falling of Randolph, Iowa. The latter was therefore elected director at the meeting.

W. S. McMillan, of Salt Lake, Frank D. Kimball, the former cashier, Dr. T. O. Boyd, H. O. Milnor, both of the city, H. J. Falling.

The conditions and business of the bank were reported in splendid shape and facing an excellent future. The resignation of officers was deferred until the arrival of Mr. Falling from the East. He is president of the First National Bank of Randolph and the American Savings Bank of Anderson, Iowa, and is arranging to move here to permanently reside and participate in the Twin Falls Bank & Trust Company's conduct.

ECONOMY EVIDENT IN COUNTY AFFAIRS

COMMISSIONER'S EXPENSES ARE LESS THAN LAST YEAR.

Only Extraneous, Unusual Charges of Courthouse Building, Tax Refunds and Demands of State for More Money Cause Increased Tax Levy.

In reviewing county affairs, during the session of last week, the Twin Falls commissioners find that they did not state called for an increased amount of cash from this county this year, to the extent of \$13,000 above the levy of only 10 mills, and had not been necessary to provide interest and sinking fund on the new courthouse bonds, the tax levy would have been considerably less than for the year. The members believe they are handling county affairs quite economically, all things considered, and members have a personal pride in this good record.

The increases of 5 mills for the courthouse and 2.5 mills for the state demands, were supplemented by a request for 10 mills, for the purpose of providing revenue required in the refund of taxes necessitated by erroneous assessments of property during past construction years.

The increase therefore is all due to circumstances and actions over which the present board had no direct control. The increase in the tax levy, however, the increased demands due to the causes named, aggregate 12.5 mills, there is an increase ordered in the levy of 10 mills in 1910, showing that the board had cut general expense accounts of the county to the lowest limit possible, as compared with previous administrations. The board in addition the board found \$1,000 for defraying the county's advertising campaign at the Seattle fair, and for doing more road and bridge construction than was ever done in Twin Falls county, including improvement of the roadway between Twin Falls and that point and the improvement of Shoshone road.

The board spent four days this week auditing bills and pay rolls.

HIGH SCHOOL BOND ELECTION.

District Directors Ask the Voting of \$49,000 Securities.

The Twin Falls board of education has presented to prepare for the erection of the proposed high school building, on the block north of the courthouse site, by calling an election Oct. 26, at which bonds are to be voted.

This action is believed by the members of the board to be in line with the sentiment, inasmuch as there is pressing demand for enlarged high school facilities.

An issue of \$49,000 bonds is contemplated, if the voters sanction the plan. The bonds will be sold in \$100 increments, and will start construction of a high school building under plans permitting of enlargement from time to time when needs of the district suggest.

LIVELY AT RUPERT.

Over a Hundred Greeks Put in Their Here.

Rupert Pioneer: The arrival yesterday of Mr. Ashton, chief engineer of the Short Line system, a construction train of over 100 Greeks and a number of other nationalities, at the commencement of activity at Rupert in connection with the construction of the new road from Rupert to Bliss, Idaho, and filled up here to such an extent that the local yards were completely blocked and it was impossible to land the regular train. The first train of material for the road is being laid and the material will all be unloaded and neatly stacked up within a day or two. It is piling in here at the rate of more than a car a day and includes rails, the fence posts, culverts, etc. Three carloads of 36-inch steel culverts arrived yesterday.

Number has been received for additional buildings to be erected here for the accommodation of laborers. A bank house large enough for fifty times the amount and a warehouse will be built at once.

Chief Engineer Ashton and construction Engineer McDonough left Tuesday yesterday by train and will drive over the entire line. Construction outfits are now at work all the way to Bliss. An outfit of fifty teams arrived at Wendell from Nevada this week.

The Irrigated Lands Company has settled comfortably by offering the first National Bank building (fronting on Shoshone street) after a voluntary move from its long established home in the Perrine hotel. The members of the old-established firm, consisting of C. B. Hurt, Geo. F. Sprague and Alex. McPherson, have ample funds to meet the needs of the transaction of an already large and yet growing real estate and insurance business.

SCHOOL DOINGS IN TWIN FALLS

FOOTBALL AND BASKETBALL GAMES AT PARK SATURDAY.

Requests to Parents Regarding Merit Cards Are Issued, Also Pertinent Suggestions On the Best Times for Personal School Visits.

Report cards will be issued to all pupils about the second grade next Monday afternoon. The cards will contain statements of the work done by all pupils. The grades are made up from the daily work as well as from the tests. The cards are urged to sign these cards and return them to the teacher as soon as possible. Pupils who lose their cards will be considered as having failed, and which will be given them. The cost will be five cents. Parents failing to receive cards may call up either the principal or the teacher. It is intended that each parent shall know just what their children are doing in school.

The first athletic event of the season will consist of a joint basketball game between the girls of the high school and the Pocatello academy, and a football game between the teams representing these schools. Twin Falls has by far the best team they have ever had. It is a bunch of lanky kids who have had the best of practice for several weeks, and it is believed that they will be the strongest team in the state. The game Saturday will be a battle for the supremacy of Southern Idaho, with chances in favor of Twin Falls. The boys will play better if they are given the support which they have earned by faithful practice for several weeks, and say they went 60 at the ball park next Saturday at 2 o'clock. The basketball game will be called at 2 o'clock and the football game will begin at 3 o'clock. Two splendid games for only one admission, the youths declare, should entice a large audience. The prices will be only 50 cents.

The football team will leave Twin Falls next Wednesday evening for Albion, where they will play a game with the team from that city on Thursday. The local team will have the privilege of playing before the state school superintendent and the trustees of the board of education.

Parents are cordially invited to visit the schools at any time. We are more anxious to have them see the regular work of the schools, than to attend the special programs which will be given during the year. The regular work counts for far more than the programs, and it is so that the regular work of the schools and the idea of the plans and aims may be gained from even a brief visit. Those desiring to see the special work should visit the Lincoln school on Monday or Wednesday to see the drawing, and Tuesday and Thursday to see the music. At the Bickel school the music may be seen on Monday, Tuesday and Thursday mornings.

The superintendent will be in his office on the Bickel building from 9 o'clock in the morning and from 3:30 to 4:30 in the afternoon and on Saturday from 10 to 12 o'clock. He will also be in his office on Tuesday and 2 o'clock in the afternoon of each school day.

KILLED IN RUNAWAY.

Buhl Farmer Meets Sudden Death Near His Farm.

George J. Hill was almost instantly killed in a runaway accident two miles west of Buhl Wednesday afternoon.

The catastrophe occurred near the home of the victim. Immediately he was taken to the office of Dr. McCluskey, where it was found he had been fatally injured. Dr. McCluskey fitted out shortly after sympathetic friends and neighbors had reached the physician's office with their charges.

Coroner Walker was notified by phone, and went from Twin Falls at once. He inquired into the circumstances, and decided, from all the facts, that the driver was negligent, that an inquest was unnecessary.

Arrangements were at once made for the funeral services to occur at Buhl under the conduct of the First Baptist church. The remains will be brought to Twin Falls Saturday afternoon and interment will be made in the cemetery here.

Mr. Miller had resided on the ranch near Buhl but about six months, that is a newcomer, it is understood, to that section, and leaves a wife and three children. He was 51 years of age.

'Dreamland' Changes Hands.

Management of the Dreamland dancing pavilion has passed to W. V. Tropper, the last few weeks having witnessed extraction of its financial affairs, it is said, from the financial management of the late owner, who has been in existence since its construction. All the interests which had participated in one way or another in these troubles are reported to have been sold to Mr. Tropper. He announces that he will conduct the place on more modern, up-to-date lines, as leasee.

Lots of people talk to themselves because there is nobody of any consequence to answer back.

CANAL COMPANY TO ERECT HOME

GROUND IS PURCHASED FOR A LARGE BUILDING.

Will Lose no Time, It is Said, in Starting This Improvement at the Corner of Second Avenue West and Second Street West.

The Twin Falls Canal Company last Monday purchased from John M. Clark, the Irigoin Land Company, lot 1, block 117, in this city, and will erect, at an early date as practicable, on this site a large home for its employees.

Details of the structure have not been announced, but it is understood the intention is to make it a most attractive home, and that a large enlargement when occasion may arise for more room than is at present needed for the transaction of the company's business, and that the building will be a credit to the city.

The corporation securing this land and contemplating its covering with this improvement includes the farming, the floor space of the building, the building will be a credit to the city.

The purchaser corporation but recently took over the management of the company's business, and it is believed that it will be a credit to the city.

The ground is located on the south corner of Second Avenue West and Second Street West, almost in the rear of the lot upon which the News office stands, and fronts the north.

On the corner lot opposite, known as block 116, the Old Fellows have a site for a building, which is expected to be erected in the near future, and which plans are understood to have been drawn and approved, and that include not only ample and commodious lodge rooms on the second, but also store rooms on the first floor. The building is expected to be erected in the near future, and which plans are understood to have been drawn and approved, and that include not only ample and commodious lodge rooms on the second, but also store rooms on the first floor.

BURGLED ARE AT WORK.

Make Two Hauls in Twin Falls the Past Week.

Twin Falls was struck this week, apparently by the gang of petty thieves and burglars which has been, in whole or in part, committing innumerable depredations in other cities and districts throughout the southern part of the state.

Last Sunday night the bachelor quarters of W. O. Temple and Homer Mills, near the public school, were burgled, and the gang of thieves and burglars which has been, in whole or in part, committing innumerable depredations in other cities and districts throughout the southern part of the state.

The room was fully awakened by the intruder, but both remembered the next morning of having experienced the same thing, and they were thought a third party was in the apartment. Each had accused the other at the time of dreaming.

The police believe that it was this thought a third party was in the apartment. Each had accused the other at the time of dreaming.

AUTO BUSINESS IN TWIN FALLS

FIRST BIG GARAGE IS IN COURSE OF CONSTRUCTION.

Ford Company's Agents Are Ostensible Owners of This Structure, and Say There Will Be Large-Sized Repair Shop in Conjunction.

Twin Falls first large automobile garage is being constructed on Shoshone street, a block and one-half south of the Perrine hotel, and is a harbinger of a greater era of automobiles throughout this section.

The building will be a credit to the city. The corporation securing this land and contemplating its covering with this improvement includes the farming, the floor space of the building, the building will be a credit to the city.

The purchaser corporation but recently took over the management of the company's business, and it is believed that it will be a credit to the city.

The ground is located on the south corner of Second Avenue West and Second Street West, almost in the rear of the lot upon which the News office stands, and fronts the north.

IDAHO'S SYNOD IS ORGANIZED

PRESBYTERIANS OF GEM STATE HAVE OWN GOVERNMENT.

Formerly Were Included in Utah Synod, but Church Growth Had Reached a Point Which Commanded an Independent Governing Body.

The Presbyterian synod of Idaho was organized in Twin Falls this week, forming an exceedingly interesting link in the religious history of the state.

Some twenty-five representative Presbyterians ministers voluntarily participated in the creation of this first institution of the kind in the state, Idaho having been formerly attached to the Utah synod.

The sessions began Tuesday evening, when Rev. J. H. Barton of Boise called the convention to order, in accordance with the constitution of the Presbyterian General Assembly, issued last May, and preached the opening sermon to an audience that quite exceeded the capacity of the Presbyterian church, of which Rev. John Gourley and all the local congregation are very proud, as well as the citizens generally.

Presbyterians were celebrating in this event a most phenomenal growth of the church in the Gem state as well as preparing for a yet larger development. Rev. Barton naturally reflected in his remarks a mood of personal pride in the special occasion.

He came on the scene of action twenty-five years ago, when the Presbyterian General Assembly, issued last May, and preached the opening sermon to an audience that quite exceeded the capacity of the Presbyterian church, of which Rev. John Gourley and all the local congregation are very proud, as well as the citizens generally.

WANT SENATORS ELECTED DIRECTLY

THIRTY-ONE STATES MAKE DEMAND ON CONGRESS.

Question Now is Whether the Federal Assembly Will Give the Matter Serious Consideration, or Ignore the Requests As in Previous Instances.

A Washington telegram to the Chicago Record-Herald last Friday says: Thirty-one states of the Union—two-thirds of the asterisk—have spoken through their legislative assemblies for an amendment to the federal constitution providing for the election of senators by direct vote.

In other words, two-thirds of the states have passed resolutions for electing senators by direct vote of the people and the question is: Can congress be made to feel the moral obligations of approving the proposal?

Congress will not have to call any constitutional convention in order to satisfy the demand that has been made by two-thirds of the states. It will suffice to pass a resolution through congress submitting an amendment the same as was done with the income tax.

Always it is to be kept in mind that four times the House of Representatives has passed resolutions proposing an amendment to the constitution to elect senators by direct vote, but no resolution of that kind has passed any state at the other end of the capital.

But if the time ever is to be ripe for forcing action, by reason of what has been done by the states, it would seem to be near at hand.

The constitutional provision governing this matter, reads as follows: "The congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to this constitution, or, on application of the legislatures of two-thirds of the several states, shall propose a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this constitution, when ratified by three-fourths of the several states, or by conventions in three-fourths thereof, in any one or the other mode of ratification may be proposed by the congress."

NORTH SIDERS ORGANIZED.

Satisfactory Machinery is Available for Settling Difficulties.

After considerable effort the North Side farmers are thoroughly organized, under the name of the Twin Falls North Side Canal Users' Association. It was accomplished when the meeting was held at Wendell. The board of directors is composed of one member for each of the several districts there, and of the membership of the three local farmers' associations of Shoshone, Wendell and Jerome. H. E. Barrett, of Wendell, is elected president; F. Brunner, of Wendell, is president; Colonel S. H. Avery, of Wendell, treasurer, and J. M. Hale, of Jerome, secretary.

Regular meetings of the association will be held every Saturday, alternately at Wendell and Jerome.

Committees were appointed to take up and press on the matter made by members against the Twin Falls North Side Land & Water Company for compensation for damage and loss sustained during the past season on account of the failure of the company to furnish water for irrigation purposes.

Messrs. Brunner, Hoeschle and Ziesler comprise the committee for the Jerome district, and Messrs. Barrett, Avery and Smith, the committee for the Wendell district. Settlers are requested to file their claims with Mr. Barrett at Wendell and with Mr. Hale at Jerome at once.

DUBOIS FINISHES "PROVING UP."

Having Secured North Side Land, Will Return to Blackfoot.

Former United States Senator F. T. Dubois, during his visit here last Saturday from Jerome, said:

"I am in Twin Falls on purely private business. I have just finished 'proving up' on 160 acres nine miles north of this city, on the north side of the river and exactly in line with Blue Lakes boulevard. From the land there is a fine view of Twin Falls which is especially conspicuous at night, when the lights here are plainly visible in their shimmering beauty.

"One day, I feel sure, a bridge will be constructed across the river so that one may drive, or ride on electric cars, between the North and South sides over a direct route past my land. I think that this bridge will be built by the two counties eventually for the accommodation of the traffic that is rapidly increasing both ways.

"Having proven up on the land I shall soon go back to Blackfoot to reside."

Senator Hayburn Coming Home. Senator Hayburn, who is touring in Europe, in a letter received by Addison F. Smith, his private secretary, says he will be home enjoying the journey delightfully. He explained that his plans were to reach Washington about Oct. 22, and after a brief stay there, to return to Idaho, to be his intention to prolong his stay in this state then until about three weeks before congress meets in December.

ALFALFA PRICE GOING "WAY UP"

ASCENT TO \$9 PER TON, BALDWIN, IS REACHED EARLY.

Forty Thousand Sheep Go Into Furguson Flats Country and Fulfill Past Predictions That This Country Would See Large Feeding Industry.

The prognosticators who have been saying that alfalfa would run into money in Twin Falls county this winter were never confident that the price would elevate itself much beyond the \$7 price of last year, but recent developments in the sheep feeding industry, coupled with the presence in this region of the many teams engaged on reservoir, and the price until \$9 to \$10 for the baled article was being offered by dealers here this week.

This was declared, by several men who have handled hay in Twin Falls almost since the beginning of business here, to be an unusually high price for this season of the year.

Consumption of the country's hay crop is surprisingly greater than ever before. There were 40,000 head unloaded last week at Buhl, and from that point driven into the Ferguson flat region, where contracts for the hay, including all grades and varieties, were made between flock masters and ranchmen, six weeks ago, on the basis of \$5 per ton.

Other herds are said to be en route into the Ferguson flats section, and every shred of overlying that can be classed in the hay category, is going to be devoured this winter. The company handling the cars of the sheep that passed through the Buhl gateway to pasture and the stacks, and this corporation is regarding the winter with much anticipation that success will follow.

In the meantime baled alfalfa is hard to secure from producers around Twin Falls, because many of the farmers have uses for their own crops, while an additional element is holding until there is yet more cash in sight for what they possess of this crop.

TWIN FALLS IN NEVADA EYES.

Contemplate With Satisfaction Proposed Extension to Main Line.

Judge Stockinger returned early this week from his trip to Northern Nevada towns, especially those on the main line of the Southern Pacific railway.

"I was at Elko considerably. It is going to be a big business point since the Western Pacific is being put, and is putting in shops, round-houses, etc.

"The Elkoites think the line from Twin Falls will bring the main line at Cobro where there are already terminals for the Ely line and a good townsite. I did not, however, learn anything about the matter from authoritative sources."

"Citizens in all those towns are looking forward to more direct connection with this part of Idaho with the Western Pacific, and to a better and cheaper source of supplies."

GOVERNORS TO GO WITH TAFT.

Will Travel With Him from St. Louis to New Orleans.

Governor James H. Brady of Idaho will be one of thirty of the total of forty-seven governors of the United States who will accompany President Taft as the guest of the Lakes-to-the-Gulf Waterways association on his trip down the Mississippi river to New Orleans where the deep water ways convention is to be held October 30 to November 2. It will be the greatest gathering of governors ever assembled in the history of the United States and the first time that such a number ever left their respective states at one time.

The fleet, which will accompany the president on his trip, will be notable not only in size, but will bear the most distinguished guests of the nation. It is expected it will be the largest and most imposing fleet ever seen—over on inland waters.

GOOD NEWS FOR SETTLERS.

Newell Believes Bond Issue Will Complete Irrigation Projects.

A telegram from Washington says: In the opinion of Director Newell of the reclamation service, there will be no difficulty in floating \$10,000,000 worth of reclamation bonds if congress carries out President Taft's recommendation and authorizes the same. Director Newell that such bonds at a low rate of interest could readily be floated at par, for they would be secured by reclamation bonds.

This bond issue, Director Newell says, will enable his bureau in one year to complete works which otherwise could not be completed inside two years or perhaps three. He believes the president's endorsement practically assures the passage of the necessary legislation.

IDAHO STATE NEWS

The Oregon Short Line has established train shuttles on Idaho divisions.

Train service was inaugurated last Saturday over the electric line between Boise and Nampa, which has just been completed.

A fifty-five acre field of alfalfa near Welsler yielded nine tons per acre from three cuttings this year. Fifty-four bushels of barley per acre and sixty bushels of wheat per acre was an uncommon result in that section this year.

Louis Selvers who about a year ago came from Boonville, Mo., and bought a farm three miles east of Idaho Falls, paying \$215 per acre for it, is delivering apples off a three-acre orchard, the fruit from which is being shipped to Salt Lake. Mr. Selvers says he will realize \$4,000 therefrom.

Legal Notices

Contest Notice. Department of the Interior, U. S. Land Office, Halley, Idaho, October 6, 1909.

A sufficient contest affidavit having been filed in this office by Albert B. Brown, contestant, against homesteaded entry No. 04658, made June 26, 1907, for N 1/4 SW 1/4, North half of southwest quarter, section 16, township 15 S., range 17 S. E. M., by Walter W. Elder, contestee, in which it is alleged that said Walter W. Elder has never established a residence thereon and that said Walter W. Elder has wholly abandoned said parcel, and has failed to cultivate or cause to be cultivated any part of said land or to make any improvements thereon of any nature, whatsoever, said parties are hereby notified to appear, respond, and offer evidence touching said allegation at 10 o'clock a. m. on November 22, 1909, before George B. Fraser, Twin Falls, and that final hearing will be held at 10 o'clock a. m. on November 22, 1909, before the register and receiver at the United States land office in Halley, Idaho.

The said contestant having, in a proper affidavit, filed July 13, 1909, set forth facts which show that due diligence personal service of this notice can not be made, it is hereby ordered and directed that such notice be given by due and proper publication for publication—Final Publication.

A. I. McMAHON, Register.

I, John T. Durfee, of Fltir, Idaho, who made entry No. 1705, under the provisions of an act of the legislature of the State of Idaho, commonly known as the "Carey Act," approved March 2nd, 1899, which embraces lot 6, of section 6, of township 10 S., of range 16 E. E. M., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before H. B. Lewis, representative of the State Land Board at Buhl, Idaho, on the 12th day of October, 1909, by two of the following witnesses: F. J. Myers, Peter Blanksma, Ira Thompson and C. F. Wallace, all of Buhl.

TWIN FALLS NEWS PUB. CO. . Twin Falls, Idaho

STARTS AT BUHL

TRAIN CREWS LAY OVER THREE UNDER NEW SCHEDULE.

Several Buildings Are Progressing and Traffic Reports Show All the Branches of Business Endeavor Are Being Vigorously Prosecuted.

BUHL, Idaho, Oct. 12.—Mrs. Pearl Roth returned home last week from Aberdeen, Wash., where she spent two months visiting her sister.

Miss Lucie Marshall, who has been sick for several months, is recovering and will soon be able to be around again.

Ben Grossman has his third cutting of alfalfa in the stack. It was almost as good as the first cutting.

Lon Freeman, of the Idaho Live Stock Company, went to Hagerman Friday with a big freight train loaded with hardware for the branch house of Parker & Marshall, in the Broadway.

J. H. Schaefer drove to Hagerman Friday on business and returned home Saturday.

Get now all the same as a division point. The schedule time of the passenger trains has been changed so as to have one train crew lay over here during the night and leave in the morning at 10 a. m. Both trains will, in a few days, render full train service. This makes two train crews, one freight and one passenger, to run the Buhl at night.

Dr. Murphy returned home Friday from Seattle where he had spent several weeks attending the fair. A. Courtenay, R. E. Shortman and family returned home last week from Seattle where they had been for some time attending the fair.

A carload of white pine lumber is being unloaded. For the Peck bank building on Main and Broadway. The stone is cut and shaped and ready to be put in place, so that the work of construction will go on rapidly until the building is fully completed. When finished, it will be a handsome structure.

Work was commenced on the Citizens State bank building this morning. This building will have a buff colored cut stone front.

Mr. and Mrs. C. W. Wheeler came from Filer today on business and spent the day in town.

Geo. L. Evelyn and family will move into town this week and occupy their handsome residence on Broadway, recently purchased by Mr. Evelyn.

Dr. Wetherbee of Filer will locate in Buhl the latter part of this week and will continue to reside here permanently.

The Christian Endeavor society will give a apook social on Halloween. That will be a healthy and enjoyable congregation of apooks. They will not be expected to scare even babies.

Dr. McCluskey went to Twin Falls yesterday and is expected to return here today.

Adelton T. Smith of Twin Falls was a Buhl business visitor Thursday.

J. Lynch of North Yakima is visiting in Buhl. Mr. Lynch owns a ranch two miles east of town and is here looking after his interests, some of which are in the city.

John Adams of Oakley was transacting business in Buhl Monday.

Mrs. Maggie Fankbender of Hagerman was a Buhl visitor Friday of last week.

ARTESIAN CITY

MANY VISITORS INSPECT THE PLACE LAST WEEK.

Preparations Under Way for New Construction of Various Kinds, While Sales of Lots and Garden Tracts Are Being Made.

ARTESIAN CITY, Ida., Oct. 12.—The sale of Artesian City lots and suburban tracts still continues at a good pace. Up to Tuesday the total number of sales made and checked off the plat at this place are as follows: Suburban tracts, thirty-four, city lots, twenty-one.

Every day since last Friday Mr. Joseph Day has brought an outload of investors out from Twin Falls. Among those who came out Tuesday was Peter Costello, who has a desert claim adjoining Artesian City.

The store and office building is almost completed. Mr. W. E. Boers of Murtaugh will put in his stock of goods the coming week.

R. E. Modley has purchased a lot in the city and will locate the post-office there instead of at his residence, as was formerly planned. Also steps are taken to change the name from Farmington to Artesian City.

Mr. Medley has purchased his office fixtures and ordered lumber for the building. By the end of the week the office will be well on the way to completion.

Mr. Isaac Medley has been on the sick list for several days.

Mr. James of the Salmon River engineering crew, recently built a house in Artesian City.

Mr. Harry Rorak of Coltonwood, has purchased a lot and will put in hot water baths for the benefit of the city.

The Mountain Meadows well is down 440 feet without any new development.

Robert Day, Jr., has charge of the office this week, during the absence of his father, who is transacting business in North Idaho.

The suburban tracts were meeting with ready sale and the supply so nearly exhausted that it was apparent that something must be done. The promoters and owners decided to locate the lots on tracts on an average of 225 per tract.

Mrs. Florence Morriasy is about ready to begin operations on her hotel building on the two lots she purchased.

Mr. J. M. Bower, son of the pioneer who discovered the hot wells, has purchased a residence lot and ordered the building to be put up a neat cottage in the new city.

J. E. Bower will put an addition to his residence and equip it with modern conveniences.

Mr. J. D. Norris of Maroa, Ill., was here last week and purchased three five-acre tracts and two city lots.

Messrs. C. C. Parks, J. K. Keiser, J. E. Powers and Mr. Thrift of Maroa, Ill., are out in the hills for a deer hunt this week. The party expects to be out for ten days, if they are not to be able to find a deer (trunk) sooner.

Wm. Hays and Buck Eden have taken the contract to clear the streets of the hot wells and to lay the necessary ditches to distribute the hot water over Artesian City and suburban tracts. They are at present clearing the tract for J. E. Bower, adjoining the city.

Mr. A. J. Fuller is down 300 feet with his deep well. This is the depth that Mr. Bower struck his big flow. It will be remembered that Mr. Fuller is on much higher ground and about two miles distant from the Artesian City wells.

KIMBERLY

SELL MORE LAND

Pioneer Owner Receives \$125 per Acre, and the Purchaser Has Now Secured a Total of 280 Acres in That Vicinity—Other Land Sales.

KIMBERLY, Ida., Oct. 13.—Ed Claiborn left Sunday for Portland with his list of horses which he is shipping to market. He will be gone about two weeks on business matters.

A meeting of the dry farmers was held at James' farm Friday night. Some of the Kimberly people attended and are looking after getting water for their homesteads. There are three or four propositions offered as to how to secure this valuable tract of land will soon be under irrigation.

Mr. F. Albert, cashier of the First National Bank of Paretia, was here this week, looking after business interests.

The dance given by the band last Friday night was a very successful and a good time reported. A nice sun was cleared for the benefit of the band boys, who are getting very proficient now.

Mr. W. E. Rogers expects to return to Oklahoma in a few weeks.

Work on the school well is still progressing and the drillers soon expect to have an unlimited supply of water.

The Western Lumber Company will erect a coal house on their lots at the lumber yard and will handle coal in the future.

F. Walter Fix expects to move to the Mollman place this week.

Mrs. L. S. Tucker is expected to arrive from her home in Missouri this week and will join her husband here, who has recently purchased the De Witt place.

Plow diggers are busy these days. The yield is good but the market is not up to the right price, so many of the farmers are plowing their crop and will hold until spring.

W. F. Brecken, was a Twin Falls visitor Tuesday.

E. T. Newbery is attending the meeting of the county commissioners this week, and reports a large amount of business to come up at this meeting.

Newbery Bros. are building a large addition to the south side of their delivery barn and will accommodate their growing business.

Frank E. Bigger has bought a lot in Twin Falls and will erect a nice residence at once. Halferty & Kendall have the contract and expect to begin on it this week.

P. J. LeFavroy and J. D. Merrill will have a public sale on Monday, Oct. 18, at the old Hegg place. A large amount of stock and machinery is listed for sale and a large crowd will probably attend.

J. H. Mudd has returned from a trip through the eastern states and back through several of the western and reports conditions here ahead of what he visited.

Mr. C. A. Culver will leave soon for Colorado, his former home. He has sold his 520 acre ranch a mile north of town to Mr. Mendenhall of North Yakima, for \$71 per acre. Mr. Culver expects to come back to the tract and invest in the future.

Geo. S. Truablood has sold his twenty acre ranch, two miles east of Kimberly, to William C. McHardy for \$125 per acre. This is a fine piece of land.

TRAVELERS SEEKING LAND FIND A HAVEN THERE.

Population Increase Shows Preponderance of Girls and Correspondent Says Bachelors Are Beginning to Take Notice—Personal Mention.

FILER, Ida., Oct. 12.—Dr. Wetherbee, accompanied by the stout, solid Mrs. H. H. Hays and Mrs. Parsons and left a ten-pound daughter Tuesday night. Mother and daughter doing well and the old man wears the hat.

Mr. and Mrs. A. J. Ripley, father and mother of Ripley brothers, arrived Tuesday night from MINN. N. D. They expect to spend some time in Filer and probably will locate here permanently. They are very glad to get away from the extreme cold weather of North Dakota.

Ripley Brothers sold the A. E. Larson well 160 improved eighty southwest of Filer to Lewis Manly, Tuesday. This is a fine piece of land, well improved and well located. It is only three and a half miles from town. Consideration \$30 per acre. Mr. Manly is to be congratulated on getting this piece of land at so reasonable a figure.

Mr. Grinnell from Nebraska is in Filer Tuesday figuring on putting in an up-to-date stock of general merchandise. Mr. Grinnell could not get out a better location than the biggest little city on the tract.

Mr. Williamson of Oregon, brother of Mr. Murphy, arrived in Filer Tuesday and is looking over the tract and will probably locate here.

Rev. Hoffman, the new Methodist minister, arrived in Filer with his car Monday. Mr. Hoffman is a well known preaching services Sunday morning and evening from now on.

The Rackett store received a large shipment of goods Tuesday. W. U. Hays of Buhl was in Filer Sunday.

Claud Whinery has gone to Seattle to see the big fair. Before coming here he will visit Vancouver and Spokane.

Mr. Potts is here fixing the pump so that his Fileries can get some of the water. Good sparkling drinking water from the Filer deep well.

S. Claud Stewart writes that he wishes to get back to Southern Idaho.

Harlan Fisher has accepted a position with one of the new owners of the Hillbine Grain Company.

Grandpa and Grandma Snelson celebrated their golden wedding Sunday.

Mr. W. Shafliner arrived home from Boise Wednesday. W. had gone over Friday on business.

Clove Barnes of Filer and Miss Sophie Miller of Hagerman were married Monday last. Congratulations to Miss Barnes and congratulate Clove's excellent judgment, we also congratulate him.

John B. G. Short has sold his forty acre ranch southeast of Kimberly for \$125 per acre. This is a fine piece of land.

Geo. S. Truablood has sold his twenty acre ranch, two miles east of Kimberly, to William C. McHardy for \$125 per acre.

W. B. Williams is at work on the new fixtures for the store part of the new bank building.

It is reported that the county commissioners will appoint the new school board at this session. A meeting was held at the school house last week and several citizens were recommended to be appointed by the board of county commissioners. Among the names were W. B. Brecken, E. W. Davis, W. M. Van Houten, A. C. Durkhalter, J. H. Sulwecke, W. H. Turner, and also the members of the old board.

HAYFORD IS NEW ASSESSOR.

Come from Buhl, and has lived for Four Years on Tract.

L. G. Hayford was appointed assessor of Twin Falls county by the board of county commissioners Tuesday, vice George Harlan, whose resignation has been accepted Monday.

Mr. Hayford resides at Buhl where he was formerly in business. He is declared by members of the board to be a reliable young, enterprising citizen, having been in the tract four years ago, and owns a half section on the West End. It is expected Mr. Hayford will assume the duties of the office next week.

The belief entertained around the court house is that Deputy Assessor James Beauchamp will be retained in this position.

Mrs. Hazel Kirkpatrick will take a limited number of scholars in piano lessons. Call or write, 302 Sixth Ave., East.

Automobile to trade for city lot, or trade on five-acre tract, close in. Inquire, 211 Ninth Avenue East, Twin Falls.

GERTRUDE'S FIANCE CAUSES QUARREL

SHAKES UP THE JARR FAMILY VERY SERIOUSLY.

Pointed Remarks by Mrs. Jarr Wound the Feelings of Mr. Jarr and Peace Does Not Reign for Considerable Time.

"Gertrude is thinking about getting married," said Mrs. Jarr, "and that's always the way! Your girl gets married and leaves you after you get her broken in."

"And she gets everything broken up," retorted Mr. Jarr. "You've got Gertrude so very careful now," said Mrs. Jarr. "When I bought that new set of dishes and the new glasses I said to her, 'Now, Gertrude, I'm going to charge you with half the cost of everything you break.'"

"Why didn't you charge her with the entire cost?" asked Mr. Jarr. "Oh, she's so careful," said Mrs. Jarr. "You can't expect them to pay full cost for what they break. They'd make that an excuse to leave right away."

"It appears to me that there are a lot of glasses missing," said Mr. Jarr, squinting over at the china closet. "Oh, they are all around somewhere," said Mrs. Jarr. "There's one in the bathroom, and there's one in the children's room and the rest are in the kitchen, I suppose."

"I suppose! Don't you know," asked Mr. Jarr. "Now you mind your business!" said Mrs. Jarr, sharply. "I'll attend to the affairs of my house. Even if you've broken one or two, that can't be helped, and I'm not going to be too inquisitive. It gets a girl nervous, and the first thing you know she leaves."

"I saw some broken glasses going down the dumbwaiter the other morning," said Mr. Jarr. "They were hid in some newspapers. Even if you're doing something looking through things on the dumbwaiter," asked Mrs. Jarr. "Oh, for that you have that article in it that says you've broken one or two, that can't be helped, and I'm not going to be too inquisitive. It gets a girl nervous, and the first thing you know she leaves."

"You've made a rule she's to pay half for what she breaks, why don't you see if she has broken anything?" asked Mr. Jarr. "Oh, I do, she'll get mad and leave. Of course, if she breaks anything while I'm around I'll say to her, 'Gertrude, the next time you do anything like that, don't forget, you'll have to pay half!'"

"It must be a great protection against breakage," said Mr. Jarr. "But didn't I hear a crash of broken glass last night?" "Gertrude said the cat knocked them down," replied Mrs. Jarr. "I can't blame the girl for what the cat does, and then the children break things, too."

"When is she to be married?" asked Mr. Jarr—not that he was interested, but what was the use of discussing dish-breaking. "That's just it," replied Mrs. Jarr, "she doesn't just know, and that's what has the poor girl upset. You see, she works on a water wagon, but she drinks terribly."

"He should be on a water wagon," ventured Mr. Jarr. "No matter what he should be on," replied Mrs. Jarr, "he drinks terribly. And Gertrude cries her eyes out about it. She won't marry a man who has under the influence of liquor. The girl has some pride."

"Well, I should say!" remarked Mr. Jarr. "She had better give him up and stay with us, turning our food and breaking our dishes, rather than become a sous's bride. One thing is sure, if a man won't sober up before marriage, he's not likely to do so afterward. In fact, he's liable to drink the harder."

"Oh, Gertrude's young man isn't a drunkard," said Mrs. Jarr. "Farr from it. He's only intoxicated occasionally."

"Then, why don't she risk it if she's so much in love?" asked Mr. Jarr. "Let her marry him when he's sober, and take the rest of the night with him every Saturday night. That'll keep him straight."

"But, you see, it's this way," said Mrs. Jarr. "He only wants to marry her when he's intoxicated. When he's sober he says it was the drink talking."

"What do you care, then?" asked Mr. Jarr. "But you are like all the rest of the women; you wish to promote more marriages, no matter at what personal disadvantage."

"To be the hat person in the world to stand in the way of the poor girl's happiness is ill!" said Mrs. Jarr. "But there, you see how it is. She won't marry him when he isn't sober, and when he is sober he doesn't want to marry at all. Don't you think you should give him some advice? He might follow it if you gave it to him."

SIX MEN BUILD STORAGE SYSTEM

WILL PUT 5,000 ACRES UNDER WATER NEAR TWIN FALLS.

Supply Will Be Available for Use, According to Present Plans, by Next Spring, and Indications Are That Proposition Will Be Successful.

The Deep Creek irrigation project, whose main operations have been carried on about eighteen miles southwest of Twin Falls and about three miles west of Hollister, is said to be almost completed.

Only the construction of the laterals and the riprapping of the dam are to be yet finished.

Therefore there are six Twin Falls citizens who are expected to be gratified over having brought this enterprise up to a point of success. These men are A. E. Larson, Carl Heber, Frank Reeder, J. W. Craven, R. C. Veach and P. H. Smith. These gentlemen undertook their project two years ago last June.

It is designed to irrigate 5,000 acres of good land, and will have cost in the neighborhood of \$40,000 by the time the system is ready for use.

The dam is 110 feet long, 35 feet high, and 150 feet wide at the base, and will impound 2,700 acre feet of water.

There are two big reservoirs for storage, and it is expected that the supply will be ample for every acre of land in the tract.

The water will be ready for delivery to the land by next spring, and this fact assures the growing of considerable crops throughout that section next season. Local capital companies have been organized, and the plan is said to have been used almost exclusively in the financing of this enterprise.

ADVERTISED LETTER LIST

- List of letters remaining in the Twin Falls postoffice for the week ending October 11, 1909. Parties calling for these letters will please say "delivered October 11, 1909."

Postage due on the above letters one cent each. Letters remaining at the end of fourteen days will be sent to the dead letter office.

W. H. GREENHOW, Postmaster.

Boasting Durum Wheat. A telegram to the Chicago Record-Herald last Thursday from Grand Forks, N. D., said: In compliance with a proclamation of Governor Hurka, residents of this state today ate only durum wheat bread. The proclamation was issued in compliance with a request of the grain growers of North and South Dakota and Minnesota with the object of establishing durum as a bread grain.

The amount of money that will be spent for new steel construction during the next twelve months will be larger, it is claimed, than in any similar period in years. The steel and blast furnace companies will spend \$100,000,000.

\$1000.00 to loan on real estate security; five years (time); privilege to pay off after two years. Guarantee Room 5, Commercial & Savings Bank Bldg.

Automobile for Sale, box 431, M. H. Wright, Twin Falls.

Money to loan on land on Twin Falls tract, or will buy good mortgages. Address, C. A. Bower, Buhl, Idaho.

THIRD DEGREE OF LOVE IS REAL

MISS HELEN ROWLAND DISCUSSES THE RULING PASSION.

Points Out Distinctly in Her Characteristic Way the Differences Between the Bachelors and the Widows.

"When you see what some women marry," remarked the Bachelor, "chancing generally at the tall, lanky, full-blond and the swarthy, little man in ready-made clothes at the table opposite, you realize how they must hate to be alone—single!"

The Widow frowned the beautiful blonde with carotid scarlatry. "Nonsense!" she retorted, calmly stabbing an oyster. "That girl is just as much in love as—as—"

"As we are?" suggested the Bachelor. "As she ought to be," corrected the Widow. "There are all sorts of degrees of love, you know."

"Fumph!" exclaimed the Bachelor laconically. "That looks like the third degree."

"It is!" retorted the Widow with a cheerful nod. "It's the only kind of love worth having. Haven't you ever observed that when a beautiful, fascinating woman marries an impossible little man, or a handsome, intellectual man weds a homely little woman, with nothing from a dimple on an eye, to recompose her, they are always perfectly happy?"

"Why is it?" inquired the Bachelor to an awe-stricken voice. "It is hypnotism!"

"I don't know," she sighed. "I understand the first degree of love—the kind that attracts you to a man or a woman at first, and is kindled by a curl or a dimple or a good pair of shoulders."

"And makes you want to kiss a woman before you have heard her utter a word," said the Bachelor. "Or want to be kissed by a man before you know his first name," added the Widow. "That's elemental love. And I understand the second degree of love—"

"What is that?" inquired the Bachelor. "Sentimental—or just plain mental!"

"Both," said the Widow, gazing out over the rose-colored lights with shadowy eyes. "It's the spiritual kind—the kind that comes from the perfect communion of two minds—the kind that makes you dream dreams together, and think the same thoughts, and forge what you're eating when you're dining together, and not even notice the color of each other's eyes when you're looking at the moon together, and—"

"Ah!" broke in the Bachelor slyly. "That's real love!"

"It's no more real than the others," declared the Widow. "It's more unreal. It's just a fairy spell; at the moment you're married the spell is quite as likely to vanish as not."

"And you're not to 'wake up' out of your dream?" finished the Bachelor, sorrowfully.

"Yes," agreed the Widow, "and to be as cross and unreasonably to one another as though you had gotten out of the wrong side of the bed. Did you ever see two 'mentally' married people who didn't quarrel over everything, from the weather to the salt cellar? But the third degree—"

"Yes! What is that?" cried the Bachelor eagerly. "It's what makes you fall in love with somebody for no particular reason on earth," explained the Widow. "He may not have a single personal attraction, nor a single thought, nor a single idea in common with yours; he may have a squint and a bad temper and no intelligence nor morals to speak of—and yet you can no more help loving him than you can help wanting your breakfast in the morning!"

"In short," rejoined the Bachelor mockingly, "it's a case of 'not because you're fair, not because you're true as the song goes; but because you're you!'"

"Exactly!" sighed the Widow. "It's the electric attraction—the tangible, measurable something that makes two chemicals, or two batteries, or two people respond to one another. And when that comes into play all the rest—beauty, wit, character, suitability—everything else on earth simply doesn't count!"

TWIN FALLS NEWS

Official paper of Twin Falls County, Idaho.

George B. Fraser, Editor.

Published every Friday by THE NEWS PUBLISHING COMPANY, TWIN FALLS, IDAHO.

Subscription Rates: One Year, in Advance, \$1.00; Six Months, in Advance, \$0.50.

Reliable information regarding the city and county promptly and cheerfully furnished. Address all communications to The News Publishing Company, Twin Falls, Idaho.

Entered as second-class matter, December 7, 1904, at the postoffice at Twin Falls, Idaho, under Act of Congress of March 3, 1879.

APPLE CULTURE IN TWIN FALLS

The paradoxical situation is afforded just now, in Twin Falls county, of advertising itself as an apple and other fruit growing bawliwick, and yet importing apples for immediate de-strike of the people. This may strike visitors peculiarly; but they will fully understand this feature of our conditions if they will realize that the population has increased more rapidly than the orchard development.

Having the start that it has, the local demand for fruits, such as apples, are likely to keep ahead of the orchard maturity, at least for a dozen years.

Fruit growing was introduced coincident with the first arrival of the settlers, who came into the Twin Falls tract four years ago, and there are many promising orchards now that show this region is splendidly adapted to apple culture. There are hundreds of acres, in the aggregate, of as fine looking apple trees as ever have been shown by any country.

These young orchards have not, however, as yet had the time to assume large yield.

But within a half dozen more years, it is altogether probable, Twin Falls county will be raising apples for export as well as home consumption, which for flavor, shipping qualities, and beauty of coloring, cannot be eclipsed by even the famous Hood River region.

The testimony of every expert who has examined the physical conditions here speaks in this strain. As a matter of fact, there is in this year's crop of apple ample augury of what may be expected in the apple line as soon as our many young orchards begin to bear as they will when a few years older.

In the apple line, we are merely lining up for a great future. Every qualified individual who has investigated the county's resources thoroughly for apple culture, says he foresees, within five years, the establishment, in the apple markets of the world, of a great name for those products grown and bearing the Twin Falls brand.

Sustaining those beliefs are many beautiful samples of Jonathans and other winter varieties, raised this year on orchards but four years of age, in various parts of this county. These are being displayed with considerable pride by the owners on the streets of Twin Falls and other towns and cities throughout this part of the valley, as an evidence merely of what the future has in store for us in the apple line.

Inasmuch as gigantic revenue follows the commercial growing of apples, there are suggestions of enormous land values attaching to soil having the location and the other environments required for the propagation of this fruit.

The testimony of everybody returning from the east, after having viewed the moving pictures of Twin and Shoshone falls in the theaters there, is to the effect that the public applauds these scenes vociferously. Twin Falls may therefore be depended upon, for many years, to maintain the reputation of Idaho in the public mind, as one of the greatest scenic spots of the Nation.

The brilliant idea of having the falls grafted into the moving picture business came to W. H. Eldridge of this city a few months ago, when he was thinking of what to do to boost. And now, after he has put the idea into tangible form, by securing the moving picture manufacturers' interest, and also their action (and the greatest advertisement that Twin Falls could have possibly found), and the advertising is being spread, without cost to this city, or state, there should be some public recognition of this man's work for

the citizens of Twin Falls. Mr. Eldridge himself has been too modest for personal glory; he is too modest a man to entertain any hope of reward for his patriotic efforts for the advancement of the interests of Twin Falls; but it is fitting, at this time, in view of the extraordinary publicity his thoughts and efforts have given the city, that some sort of testimonial be accorded him at the hands of this community.

The true explanation of the failure of several Idaho counties to have more representative exhibits at the Seattle exposition seems to have come from Mrs. Herriott, whose story of Twin Falls county's experience is printed in another column of the News. She says none of our county citizens is to blame for the very unfortunately meager displays, for the reason, as a matter of fact, that the last of March, 1909, had arrived before anybody was positive that Idaho would have a building on the grounds. It was really not until then that the legislature made appropriation for an Idaho building, and meantime scarcely anybody gave the matter of exhibits from this state any material consideration. It is to be hoped, in view of this explanation, that adverse criticisms of the management of this county's affairs at the exposition will cease. Another reason why there should not be any more unmerited condemnation of the management of our exhibit is that the county's representatives at the fair labored with all their strength to the best advantage possible under discouraging circumstances; and they assert it is their belief that the exhibits we had, together with the grand showing the entire state made, will eventually prove to have served a great money-making purpose in diverting thousands of home seekers to the state during the next few years.

These are weeks of big things in Twin Falls county real estate. Both city property and farm lands are moving with a constantly increasing momentum. The active fall season is beginning, just as has been predicted, and it promises to become more and more lively throughout the winter, while by spring the indications are that there will be realized the livestock market ever experienced here. The big investors are getting in. In the meantime there can be no denial of the fact that prices are gradually stiffening. Every additional good crop reported this fall, and each farm land sale effected at more money than had been paid for the property by the seller, is an element of stimulation in the gradual advance in values, which current transfers indicate.

Recent dispatches from Washington, presumably from authoritative sources, declare that congress will not attempt this winter to discuss currency reform, even though the currency commission makes its report, recommending a federal bank wherein there shall be lodged the money-issuing power. The fear of the members of congress is that the country will not endorse this system, and they desire to hear more from constituents regarding the proposition before possibly being brought up to the point of voting upon it.

Even in his most optimistic prophecies for Twin Falls' future, Senator Borah may not be mistaken. Scarcely any of the present generation may live to see 1,500,000 population in this county, but this inability on our part need not invalidate the senator's opinion. Were the soil not rich, and were the water for irrigating the tract not abundant, his optimism regarding our possibilities might be regarded in the boasting class. And without self adulation, we may say, that it is the belief of everybody familiar with Twin Falls county's great resources that Senator Borah's predictions will more fully materialize than casual thought suggests in the next ten years.

A perusal of the article, in another column of this issue of the News, on the science of preparing potatoes for market, will be of inestimable value to the large class of sap raisers in Twin Falls county which is looking forward to engaging in the export of this crop.

Twin Falls pavements, which are expected to appear within a few weeks, will more than ever convince visitors that the city is enterprising, vigorous and wise into its day and generation.

BIG FRUITLAND DEAL IS CLOSED

GALT LAKE CROWD SECURES 5500 GOOD ACRES.

Consideration Aggregate \$177,000 and Thereby Makes the Sale One of the Largest Effected This Season by Any Twin Falls Firm.

The sale was consummated during the last week of a tract of 3,500 acres of what is said to be very fine fruit land, for a consideration of \$177,000. A part of the tract was to be colonized, and the other part cut up into small fruit farms and sold to people desiring to engage in the horticultural business.

The land is located six miles south of Bellevue and belonged to various owners, requiring considerable time and negotiations for transfers by the Idaho Development Company, composed of Messrs. Smith, Clair, Hocking and Williams, a firm of consulting Twin Falls real estate men.

The purchasing contract is composed of 5500 acres, who are taking the tract with a view to its capitalization into a strong corporation, as soon as practicable, and a development somewhat on the same lines as fruit lands have been handled successfully for years in Oregon, Washington and California.

Therefore 600 acres are to be planted in orchard at once, by this proposed big company, which has engaged a practical horticulturist for the purpose of supervising the orchard, and the balance of the tract will be divided off, and sold to people on the installment plan, or for cash, under a guarantee that the company will purchase the tract back for the same for a stipulated number of years until they reach the age of bearing, permitting owners then to go back to the trade and stop remunerative occupations in harvesting, after the fruit ripens.

It is expected this tract will also be sold to colonists desiring to engage in general agriculture, and whom liberal terms on the land will be offered.

The Idaho Development Company hereby announces the sale of the tracts. Its members say that all kinds of fruits prosper on this area, particularly apples and pears, sweet cherries and the small fruits.

TWIN FALLS MARKETS.

Wheat Higher and Local Deliveries Heavy—Oats Light.

The advance of wheat about 5c this week brought out a heavier movement of wheat to the coast, but the Oats does not move at the same quotation as last week and only the poorer grades are offered.

The Twin Falls Milling & Elevator Company Thursday morning quoted as follows:

Wheat, choice milling, bulk, per hundred pounds\$1.30
Wheat, sacked, per hundred pounds1.35
Oats, good feed, sacked, per hundred pounds1.15
Barley, sacked, per hundred pounds1.00
Following are garden produce and orchard quotations to producers reported by the Twin Falls Grocery & Mercantile Company:	
Pointines, per 100 pounds\$.50
Turnips, beets and carrots, per 100 lbs.75
Dry onions, per 100 lbs. 1.65
Cabbage, per 100 lbs. 1.55
Green peppers, per doz. 20
Prunes, French and Italian, per 100 lbs. 1.00
Apples, choice, per box 1.75
Apples, cooking stock, per box	1.50

STROM OMAHA STOCK MARKET.

Strong Demand for Killing Steers, and Sheep Steady.

SOUTH OMAHA, Oct. 9.—There has been a big run at cattle here this week, but owing to the small number of beef steers offered the trade has been strong. This has also caused a heavy demand for butcher stock and all good cows and heifers have sold strong to a little higher than a week ago. Feeders sold fully steady for the first half of the week, but the accumulation caused a weak sale at the week-end.

Good to choice killing steers are quotable at \$5.00 to \$5.25; fair to good, \$4.50 to \$5.00; poor, \$4.00 to \$4.50. Cows, \$5.00 to \$5.25; fair to good, \$4.75 to \$5.00; choice light and medium weights, \$4.00 to \$4.25; fair to good to good to choice cows and heifers, \$3.75 to \$4.25; fair to good, \$3.25 to \$3.75.

We have had a liberal run of sheep the week end notwithstanding the fact that there has been a very good sheep trade has been very good since.

Good killing lambs are quotable at \$3.25 to \$3.50; yearlings, \$4.00 to \$4.25; ewes, \$3.75 to \$4.10; feeding lambs, \$2.50 to \$3.25; yearlings, \$4.50 to \$5.00; wethers, \$3.75 to \$4.15; ewes, \$3.00 to \$3.25.

WAS VALUABLE TO TWIN FALLS EXHIBIT AT SEATTLE DID THIS COUNTY MUCH GOOD. Statements of Mrs. Herriott, Who Was Hostess in the Big Show, for This County, Declare That Much Was Gained for This Tract. "Notwithstanding all the obstacles that surrounded Twin Falls county's advertising campaign at the Seattle fair, whatever was spent to that work has done us a lot of good," said Mrs. Lulu Herriott, who has returned home from the city after having served as one of the hostesses at the Twin Falls county exhibit. "There were about 20,000 to 27,000 visitors at the fair buildings every day," she continued, "and we were kept answering questions about the Twin Falls county. Inquirers seemed to have heard more about this part of the state than any other—that is they were better informed of its resources. That is one of the reasons perhaps why so much more interest seemed to be evinced in this part than other sections of Idaho. "We talked to thousands and thousands of people about our resources, and many manifested astonishment that we had no greater exhibit. But when it was explained to them that there were no preparations made last year for our exhibit—that our legislature did not provide for an Idaho building until the end of last March—our manager showing was the better regarded. They obtained just as much interest in Idaho as though the exhibit had been larger. "I really believe Idaho received more benefit, from the standpoint of advertising, than any other prospective section, than either Washington or Oregon. Around Seattle there is not any great extent of agricultural land, and such parts of Washington as are improved have lands boosted in prices so high that prospectors for farm homes from the East were appalled and could not invest. Interest was shown when I told them about the availability of Twin Falls lands at prices within almost every man's ability to pay, led these prospectors to immediately get interested. If they had not previously thought of visiting our part of Idaho. "It was unfortunate for us that nearly everybody from the eastern and middle states was routed over the railroads to our disadvantage. If they came into Seattle via the northern lines the tickets took them out nearly over the southern route, and if they came in from the southern lines the great majority went home over either the Northern or Canadian Pacific. "The traffic therefore skipped Idaho. A great many who had been impressed with Idaho, at the exposition said they could not afford to leave their tickets home; otherwise, if they could have changed their homeward routes they would have stopped in Twin Falls. I am sure thousands would have been interested in the city by the one mentioned cause. Most of those with whom we talked were actual farmers. "I secured a lot of their names and brought them home with me. Nearly all these people asked that literature descriptive of Twin Falls county be sent them. I shall turn these names over to the county commissioners for subsequent use. Thousands of the visitors at the fair who had never heard of Idaho's agricultural resources became much interested in the state while viewing our exhibit. "Altogether I consider that our work will react in our favor in the future more than it has so far, because the interested classes who could not come here as they went home from the fair are going to come either this winter or next year."

EGYPTIAN WHEAT IN TWIN FALLS

FARMER EXPECTS TO GROW 150 TO 200 BUSHELS PER ACRE.

Will Attempt to Eclipse All Other Idaho Counties on the Making of Big Records Next Year and Base Hopes on This Year's Experiments.

Twin Falls county will spring a sensation next year on the other districts of Southern Idaho which are in the competition for wonderful soil records of production, if the plans of a farmer residing a few miles south-west of this city mature as he anticipates.

It is hoped that all other county holdings of gigantic things grown will fade into insignificance. The results of this Twin Falls man's efforts shall have been announced. Almost a year must elapse, however, until the world can know what he shall have accomplished.

Until then the News concedes that in many respects various localities outside our immediate vicinity will have taken precedence for "raising" things.

For instance, The Nampa Record says there are watermelons on display in that city which weigh from 15 to 20 pounds; that another farmer there has raised fourteen and one-half pounds of potatoes in one hill and another has raised 47,000 pounds of squash this season on one acre.

Around Twin Falls the most important his records have been wheat and oat and out of which potatoes have been quite well up the line. Last week, furthermore, the fact was disclosed that two raised on four acres, with an average yield of 125 bushels per acre of Egyptian wheat—a species of grain which modern farmers found in the tombs of the Nile valley, where it had lain for many thousands of years along with the mummies and other relics of ancient civilization. Upon being brought forth by enterprising Europeans and Americans, this grain proved to yet contain life germs. Great results were anticipated for it, but experience proved that, while it is a prolific grower and gives up wonderful weight, and although this weight is pregnant with nutritious food for animals and flour for human consumption cannot be extracted from this grain.

Egyptian wheat, however, superior as a substitute for corn, and the topping of wheat, and the fact of its adaptability to this climate, and the resources of Twin Falls soil to grow marvelous yields of it, has led to the raising of the swine industry heretofore in large degree than has been anticipated. The experiments made this year by the farmer in question followed next season by sowing all the Egyptian wheat seed he has secured. While he did not attempt to grow a "chick" and this season, he will, in 1916, plant the grains just as thickly as possible.

"I believe that if I drill this Egyptian wheat in next year," he explained, "I can secure at least 150 to 200 bushels per acre. I do not want to be identified this year with the fellows who have raised big crops, you watch me lead the department on Egyptian wheat, and I think I will beat the best records for everything in all the counties of Idaho."

"At the rate of yield I secured this year the crop will prove for feeding than corn would have been, if produced by the same ground. I believe it will afford us plenty of Egyptian wheat shall all begin to cultivate this crop."

SPECTACULAR LAND DRAWING.

People Stood in Line Almost Four Days to "File."

The White Bluffs land opening in Washington, which occurred a few weeks ago, probably surpasses all others for spectacular features since the first days of land openings in Idaho when "rums" were made by the multitude.

In the White Bluffs affair, people taking the land in sections on the ground desired on a certain day, and subsequently, at an hour appointed by the authorities, make their filings.

There were only about fifty pieces of land to be awarded. For this 100 people were on hand at midnight exactly on the day preceding that of the "settling," denominated "the establishment of residence." Subsequently certain work was performed on these lands by 100 per cent more people than could be awarded any of the plots.

Later, a day had been appointed on which they should appear at the land office and make their filings. On this occasion the line began to gather at midnight Monday, and remained standing in line until the succeeding Thursday morning at 9 o'clock, awaiting the opportunity of getting "papers" in their hands. This, consequently, was necessary to get priorities in the filings.

Following these exciting procedures the officials had been to the department all kinds of trouble; hearings of claimants have consumed much time, and affidavits sworn have been made by principals in attendance, and for swearing affidavits in remarkable extent, while ill-feelings had been created among the settlers that is reported to have increased to a dangerous high degree in many instances. Several women are among the contestants who stood in the line, awaiting filing opportunities, almost four days in succession.

The Kansas state board of health has declared itself against the wearing of beads or neckties to have its rulings enforced by law.

A Paris girl after a quarrel with her sweetheart thrust her head between the bars of a lion's cage and was so badly injured that she died.

BIG MONEY MADE BY YOUNG FARMER

GETS A START AT MONEY-MAKING IN TWIN FALLS.

Transformed Successfully in Two and One-half Years from a City Broker to An Agriculturist With a Good Reputation for Raising Large Crops

L. B. Jennings of Duhl, one of the most successful of Twin Falls county's young farmers, declared last week, while in this city, that there is not only much money to be made cultivating the fields and raising big crops, but in raising mutton. He showed this season that as an agriculturist he is a pronounced success, having grown 120 bushels of wheat, 100 bushels of corn, and accounted for to some extent by the fact that its owner secured the bunch from some ungrazed pasture place on the farm patch and plant it in grain of this kind.

And the general opinion of Mr. Jennings is that the money made from reading accounts of his gigantic crops, was that he might be called an experienced farmer. He declared, however, that the other day the impression of his friends and admirers is an error.

"As a matter of fact," he said, "I was formerly in the investment business in the city of Chicago, and what I didn't know about farming out here, by irrigation, would make a long story. I had merely worked at farming some down here in the Missouri valley, as most every boy there gets a chance to work; but I came out of the city three years ago after working for many years between the brick walls, and upon asphalt pavements, so much that my feet were calloused. I never got an opportunity for enlarging operations of any kind that I wanted until I struck this part of the world, and here my eyes were opened to the possibilities."

"I went over to Duhl and purchased a tract at \$22 per acre and went to work. I studied every feature of the business that I could, and naturally I had a proud of having raised three bushels crop of oats. It was practically much surprised at these results, however, because I had figured before throwing that the field would run about seven bushels per acre."

Jennings "let opportunity in when it knocked" at his door again, and the oats were harvested, and showed that he was not a beginner. He began up for the season's work when he raised that big crop. He said: "I have just sold the place which grew the bumper crop. It cost me two and one-half years ago \$32 per acre, and I received \$100 per acre for the entire 200 acres. It is five miles from Duhl. And not alone is the soil that land, but I turned right around and bought an adjoining eighty acres of unimproved land at 50 per acre where I intend to get down to business next year. I intend to operate to better advantage, in the light of past experiences."

"You will see, therefore, that I am not intending to leave the country merely because I sold the other farm. I think this is the greatest country I have ever seen for the wise man who makes money in it. But of course, every man has his own views."

"I have learned that there is a good profit in feeding spring lambs. I am selling at the fields and the orchards heretofore. It is a good thing of last April that weigh around 100 pounds, which are bringing me \$7 per hundred pounds. This is one of the best crops of raising grain that I have found very profitable."

Mr. Jennings altogether therefore has enjoyed a most prosperous season, as well as having established a reputation for raising the western end of the county for being in the lead in everything that pertains to farming as a business. He said he had intended to visit the city of Kansas City in a few weeks, and is going to bring a bunch of people out here when he returns. He will have that order of Twin Falls prolific yields may not be doubted when he relates them to his Missouri friends. Mr. Jennings is collecting a number of the "big things" that have been grown this year and will thus carry the extreme limit of baggage in his trunk in the form of raising of the fields and the orchards heretofore. He also declares that he "believes" he can afford to take the trip.

His friends say there is little doubt that he has cleared up in the last two and one-half years somewhere around \$15,000 to \$20,000 quite a good-sized nest-egg as a starter for greater operations he is ambitious to engage in.

IDAHO FALLS APPLES HERE.

Expert Says Not Enough Raised for Demand.

O. F. Smith of the Blackfoot Nurseries, arrived in Twin Falls last Saturday morning with a carload of apples, including the variety of Idaho Falls, and declared they were of the very best quality obtainable at this season. "I started," he explained, "last Monday, and it seems to require more time than it should to have a consignment of perishable goods brought through to this point from a place so near."

"However, after getting these apples here, I found very few others were in the market, and sold a part of the consignment out the first day. The price is less than apples will be purchased for by consumers any other time this season."

"There are not enough raised in the southern part of the state to supply the home demand, and before spring apples will be money in this section."

SENATOR BORAH VISITS SETTLERS

GOES THROUGH THE MINIDOKA PROJECT TOWNS.

Made Addresses to the Farmers, Heard Complaints and Promised to Immediately Take Their Demands Before Authorities at Washington.

In an interview last Saturday, just after his visit to the Minidoka project, Senator Borah said: "My visit here at this time is purely prompted by a desire to see the town after a year's abeyance, and while of a severe nature, I could not arrive yesterday, so come along with Senator Sutherland on the special train to Duhl. A meeting had been arranged at Burley, where I should have met the farmers and settlers, and resolutions were presented to me, requesting the government to proceed, with all due haste, in the completion of the Minidoka project, and also include therein some 20,000 acres, known as the 'bench' adjoining the original segregation."

Resolutions also included a request that congress extend the time within which payments may be made for the water, on account of the delay in getting it on the land, and also asking that the provision of the homestead law be modified, in this case, relieving the settlers under this project of much embarrassment, through shortening the terms and periods, in order that their titles to the lands may be secured sooner. These same concessions from the government are also demanded by settlers in other uncompleted federal projects. The resolutions likewise demand that the government issue bonds, as has been proposed by myself, and in order to clear up indebtedness on these projects and finish them.

"Hardships have been enforced on the settlers under government projects in this respect, viz, that they could not get titles until their lands shall have been paid for, and certain specifications of the statute pertaining to the project, which would clear up indebtedness on these projects and finish them. "Hardships have been enforced on the settlers under government projects in this respect, viz, that they could not get titles until their lands shall have been paid for, and certain specifications of the statute pertaining to the project, which would clear up indebtedness on these projects and finish them."

Senator Borah had spent three days with the settlers of the Minidoka project. At Rupert, the meeting at the opera house was attended by all the representative farmers from all sections of the tract, including T. E. Brown, G. E. Ferrell, James Richards and Postmaster Shilling, who called the meeting to order and introduced the speaker, who said the reclamation act had been found to be very defective and would be thoroughly overhauled at the coming session. Federal staff of the secretary of the interior and the senate committee were making these investigations with a view to determining what changes were needed.

The senator spoke hopefully of the proposed bond issue of \$10,000,000 for the purpose of finishing all incomplete projects, and said he believed it could be secured. He said it would not affect this project except to relieve the pressure in the matter of enforcing payments, as the reclamation service under act is in such desperate need of funds and could be more lenient in the matter of delinquent payments. He expressed the opinion that the five-year residence requirement should be reduced, as he believed it was almost a crime for the government to enforce such a requirement under the conditions that exist on reclamation projects.

Senator Borah was asked by a farmer in the meeting what would be done this year in the matter of delinquent payments. He said that the settlers would be unable to raise the money. He replied that he had promised to take up the matter of change in the date of payments at once, and would communicate with the secretary by wire.

It was stated that the water of some of the settlers had been cut off during the irrigation season because they had not paid their maintenance charge, and Senator Borah expressed his disapproval of such a procedure and promised to take up the matter at Washington. In the evening Senator Borah was tendered a banquet by the Rupert Commercial club, which was one of the most successful affairs that the club has ever given.

Premier Cow Milker.

Miss Sylvia E. Bender of Colorado Springs, Colo., probably holds the record for milking the highest number of cows. She milks thirty-eight cows in her herd and averages two and one-half gallons per cow per day. Miss Bender is 19 years old and a well known concert reader and eloquent, besides being accomplished in many other lines. She spends her vacations on her father's stock and dairy farm.

Said to Protect Herds Against Beasts

A Washington dispatch says: A successful barrier against the forays of coyotes on sheep flocks of the west has been found. It is known in the coyote-proof fence, experiments with which have been carried on during the last year by a special agent of the forest service on Billy Meadows on the Wallows, national forest reserve in Oregon, according to a bulletin just made public here by the forest service.

"Coyotes" came to the fence nearly every night for ninety days, according to the report, and occasionally followed it for miles, but not one succeeded in passing over or under the coyote-proof fence. The fence was deep enough to give them an easy jump. Summarizing the experiments for the season of 1905, the report says: "The coyote-proof fence was entirely successful as a protection against coyotes; not successful against bears; it still problematical against bobcats; it was successful against foxes; of course not successful against badgers."

"The danger, however, from the bears, bobcats and foxes is less when compared with the large losses from the coyotes."

NORTHWEST LAND OPENINGS.

Demand Exceeds Supplies of Available Good Acres.

The most successful land opening in the history of Montana was held at Waller on the 7th inst., when 70,000 acres of Carey Act land were opened for entry. Number 1 was drawn by A. Carpenter of Oak Park, Ill. When the offices were closed for the day 20,000 acres had been taken and many who wished to get their original selections were out looking over more land.

In a half dozen towns of the north central part of North Dakota and the adjacent part of South Dakota, registration was begun Oct. 4, for the lands of the Cheyenne River and Standing Rock Indian reservations, which the government has thrown open to settlers. The registration points are Aberdeen, Pierre, LaBead, Moberg and Lemmon, in South Dakota, and Bismarck, North Dakota. The registration is to continue on October 23, and two days later the drawing will commence. The tract to be opened comprises more than 1,200,000 acres, of which desirable farm land. The tract is approximately one hundred miles long, in the two states, and forty miles wide. It is bordered on the south by the Cheyenne river and on the north by the Cannon Ball river, and is divided into three sections by the Grand and Missouri rivers.

SOILS ARE NOT DETERIORATING.

Expert Holds That the Nation's Land Resources Are Growing.

The common impression that the soils of the United States are wearing out, and that the crop yields are on the decrease, is declared to be erroneous by Prof. Milton Whitney, chief of the government bureau of soils.

The results of his investigation will be published in the next bulletin of the Department of Agriculture. In summing up, Prof. Whitney says: "A careful study of the data appears to justify two conclusions: first, that the productivity of the newer agricultural soils of the United States is not decreasing. Individual farms deteriorate and soils wear out, but, as a whole, it seems probable that we are now producing more crops per acre than formerly."

"The cultivation of the land has been more intelligent, the principle of rotation of crops has been better followed, the soil has been better cared for, and the use of fertilizers has been made."

"In addition, we must recognize the progress in farm animals and stock, for the improvements in selection and breeding and the increased population which is forcing attention to more intensive methods of cultivation."

ALFALFA LAMB FEEDING.

Advantages It Has Over the Grass Feeding Method.

The men who are thinking about raising sheep on alfalfa pasture have several advantages, one of which is that one of their lambs fattened for the holidays will weigh up 100 pounds in condition, while a range lamb shipped off grass is considered good at sixty-five to seventy pounds, says the Denver Field & Farm.

The feeding alone is not responsible for all this difference, as it is mostly in the growth which is never checked as in trailing to and from the summer range or by constant moving. For long periods of time the fact that lambs raised in this way can be marketed at any desired time and fed for marketing accordingly is advantageous because it enables the farmer grower to pick that market which he thinks will prove the most profitable and bring his lambs in condition accordingly, while lambs from the range must be shipped before the grass falls or carried over to the following season.

ALFALFA MEAL FOR CHICKENS.

Mixed With Other Things, It Forms Best Food.

Field and Farm: A combination of alfalfa meal, beef scraps, cut bone and a few other ingredients of minor importance makes the best food for chicks and laying hens that can be secured and would be more generally used were not so much labor involved in the preparation.

As most egg foods contain these ingredients it follows that they must be valuable for the purpose for which they are used. The importance makes the best food for chicks and laying hens that can be secured and would be more generally used were not so much labor involved in the preparation. As most egg foods contain these ingredients it follows that they must be valuable for the purpose for which they are used. The importance makes the best food for chicks and laying hens that can be secured and would be more generally used were not so much labor involved in the preparation.

LAND OPENING

Repeat Some of Their Idaho Successes in One of Latest Carey Act Projects Up North Where Land is Good and Water Plenty.

R. M. McCollum, general agent for Clinton, Hurr & Co., Ltd. of Boise, Idaho, returned Monday evening from a tour of inspection in the northern part of the state in connection with the Carey Act project.

The opening of the Carey Act project in the Twin Falls tract, which was the first of the Carey Act projects, was a greater success than any preceding affairs of that kind under our auspices," said Mr. McCollum.

"There was a big crowd at the opening of the Valley project and 30,000 acres of Carey Act irrigated land, and \$50,000 worth of improvements were declared to have been, by the most experienced old timers in that state, the most successful land opening ever held in Montana.

"The people who are seeking land are not only from the north but from the south, and the people from Montana to take the waste places blazoned in thirty farm homes. I was much pleased with the showing of the people in the section of the work, and found all ditches, intakes, and everything needed to permanency and worth, in first class condition."

FOOD-PREVENTING TYPHOID-FEVER

IDAHO HEALTH BOARD ISSUES BULLETIN OF VALUE.

Explains How Disease Emanates, How It May Be Guarded Against and How Patients Should Be Handled—Other Rules for Precautions.

The state board of health of Idaho has issued the following circular concerning typhoid fever:

"The law of Idaho requires every person attending a case of typhoid fever to report the same to the local health officer. Typhoid fever is mentioned among the 'dangerous and contagious diseases' to be reported and the board of health requires that the local health officer be notified in order to make an inspection, in case of epidemic typhoid, as to the sanitary surroundings of the patient, and to order all of it to be cleaned up.

It is probably the most widely spread of the infectious diseases. It is caused by a bacillus which is introduced into the body in various ways.

"The disposal of the excreta of man and animals is one of the most important factors in the spread of typhoid fever. Typhoid fever spreads in a most insidious manner than other acute infectious diseases.

Water is the most important means of conveying the germ to the healthy.

In sudden epidemics the source of infection is usually from the water supply. It has been proven to convey the germ.

Direct infection takes place more frequently than is generally supposed. Nurses frequently contract the disease which may result from careless-ness in disinfecting hands after attending to patients in overcrowded conditions. Houses or trailers where there seems to be a greater tendency to the spread of typhoid even when the water supply is pure.

Food is another means of carrying the germ into the body. Many epidemics have been traced to milk as the source.

Food and beverages may also be a source when eaten in uncooked state.

Filth carry the infection on their legs and feet and also furnish the media for the bacilli to the fly.

The fly settles on fecal matter and later lights on the food causing the infection.

Filth are especially attracted to typhoid fever patients, and are a great factor in spreading the disease.

Disposal of the excreta of man and animals is one of the most important factors in the spread of typhoid fever.

Rules to be Observed.

Place the patient, if possible, in a well lighted and well ventilated room.

Remove from the room all superfluous articles of furniture and drapery.

Kill the typhoid germs contained in the discharges of the patient before they leave the sick room to lay off. The following things low with this disease:

Secure any of the following disinfectants: Kreolin, lysol, trichrosol, chlorinated lime (chloride of lime or bleaching powder) or formaldehyde (U. S. P.) solution of formaldehyde, which is preferred.

Make up disinfectant solutions from the above by adding three level spoonfuls of kreolin, lysol or trichrosol or eight teaspoonfuls of the official (U. S. P.) solution of formaldehyde to one gallon of water.

Keep constantly in the bed-pan, urinal, chamber, commode or other vessel intended to receive the discharges from the bowels or bladder, a moderate quantity of the disinfectant. Cleanse and sterilize after receiving the discharges and use sufficient to equal the amount of the discharges.

Cover and remove the vessel and allow the contents to stand one hour before emptying the same.

Never empty the discharges upon the surface of the ground or into a stream, even though disinfected.

If a privy well is used, empty three gallons of any of the disinfectant solutions into it daily.

Keep constantly on hand a basin or other vessel containing one of the solutions mentioned for the purpose of washing your hands.

Wash your hands in the solution immediately after handling the patient, the discharges, or any of the body clothing.

If chlorinated lime is used for this purpose, it should be diluted with eight gallons of water.

Place all such clothing in this ves-

SPECIAL DRAWING

Government Lands Irrigated Under CAREY ACT

Twin Falls Country Southern Idaho

On the Main Line of Oregon Short Line Railroad

A FAIR, SQUARE PROPOSITION

With Approval of State Land Board of Idaho

LAND AND PERPETUAL WATER RIGHT, \$35.50 and \$50.50 per Acre, Payable in Ten and Twelve Annual Installments.

You can register by mail at the office. Small deposit at the time of registration. You pay for no land until you have seen it and are entirely satisfied. Deposit will be returned if you see the land and do not file.

You know whether you draw land without the expense of a trip. You will be notified if successful in drawing and be given 15 days to personally inspect the land. You do not have to cruise the land before the drawing. You do not buy a "cat in a bag." Profit entirely under supervision of the State of Idaho.

CROPS THIS YEAR

OATS.....102 Bushels Per Acre
 BARLEY.....90 Bushels Per Acre
 WHEAT.....74 Bushels Per Acre
 ALFALFA.....7 Tons Per Acre

You may register any time from Oct. 1st to Oct. 19th. Drawing to be made Oct. 20th, 1909, at 10 o'clock a. m., by the Idaho Irrigation Company, Ltd.

For full information and instructions regarding the drawing, and for booklet, write or call on

has had a most phenomenal and prosperous growth. Its stock has already advanced over 9000 per cent in price and I hope all the people own a few shares at a sacrifice.

The Fitcher Investment Co., P. O. Box 707, Portland, Ore.

Notice for Publication—Final Proof.

I, Clayton Dwyer, of Copiah, Idaho, wish to make entry No. 1123 under the provisions of an act of the legislature of the state of Idaho, commonly known as the "Carey Act," approved March 2nd, 1899, which embraces SW 1/4 of section 5, of township 11 S., of range 14 E. B. M., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before H. B. Lilly, Secretary of the State of Idaho, on the 10th day of November, 1909, by two of the following witnesses: John Morris, William Ringert, Arthur Dummer, and Copiah Lilly.

CLAYTON DWYER

PUSHING WORK AT CRANE FALLS

WESTERN ELECTRIC COMPANY'S PROJECT IS UNDER WAY.

Report Says Not Nearly All the Snake-River's Forces Are Corralled That Will Be Ultimately Turning Wheels of Twin Falls Industries.

From W. E. Smith, representing the Western Electric Company, who spent several days in Twin Falls last week, the information was gained that the big corporation, having just had a big success in perfecting its millions of power along the Snake river, is in this country.

Mr. Smith had just arrived from the Snake river, and the management of the company, with instructions to secure as much as possible of all the other power the river affords.

"The company's investments in this vicinity," said Mr. Smith, "look very promising. At Crane falls, thirty-five miles west of Twin Falls, our assessment work is all done. It is at this point that the Snake river is dammed, and the water for irrigation on tracts where water is unavailable by other than pumping methods.

"When the plant is completed, as the company expects, it will serve to bring under yield a great many thousands of acres between Mountain-home and Bruceau.

SCHOLARSHIP EXAMINATIONS.

Students' Opportunities to Be Available Soon at State University.

Examinations for Rhodes' scholarships will be given at the State University of Idaho, Moscow, October 19 and 20, under the direction of a faculty committee. Each scholarship has a yearly value of \$1,500 and is available at any college in the University of Oxford for three successive academic years. Candidates will be examined in the following subjects: "Translation from Latin to English, Latin prose composition, arithmetic, translation from Greek into English, Latin grammar, Greek grammar and Latin or geometry.

Examinations are not competitive, but are simply qualifying. The papers are forwarded to Oxford, and a list of candidates for the examinations is sent here, the faculty of the University of Idaho, acting as a committee of selection under the authority of the trustees of the Rhodes will, selects the scholar.

IOWA AS A MUTTON MAKER.

Industry in Colorado Said to Be Declining.

Breeders Gazette: Colorado is rapidly declining from a recently high position as the greatest mutton finishing state. Iowa threatens to surpass it and Missouri to take the second place. The Wolverine state has held second place in the column but the Iowa practice of running sheep and lambs in cornfields has created competition for the stock and Iowa the greatest feeder market in the country.

This is a distinct advantage to the Iowa feeder who has been enthusiastic over the value and pleasure of residence and work at Oxford, and their success both at the great University and at work in this country after graduation.

There was a heavy reduction in corn in Colorado last season and further curtailment is impending, owing to a short hay crop and partial failure of corn in Nebraska.

HIGH MUTTON ASSURED.

Several Causes Assigned for the Scarcity of Supplies.

Authentic reports say Colorado will not finish as many sheep or lambs as last season. Iowa's stock will be in a cornfield proposition here and there always forces the stuff to market.

East of Chicago, especially in Michigan and Ohio, feeding will be light, because neither the sheep nor lambs are to be had in sufficient numbers. A high mutton market all winter, therefore, seems certain. In many sections of Michigan where, five years ago, fifty cent a pound of lamb was a preparation for market, only one or two can be found now. Even at current high prices orders have not been filled.

There are people who are making plans to go where it is warm this winter if they live, and there are some who will go where it is warm if they don't live.

Now cometh the season when buck-wheat cakes, with sausage and syrup to match, will be the order of the day, and there is still another lot of pork gray and bring us all up to scratch.

The horseman's business is full of hitches.

The close friend is the one who will not lend you a nickel.

FREIGHT IS GOING INTO HOLLISTER

NEW ROAD DOES A GOOD BUSINESS THE FIRST WEEK.

Trains Carry Lumber and Cement and Inclinations Are Also That Active Building Will Have Showed Much Progress Before Cold Weather.

The new railroad to Hollister from Twin Falls, during the first week following the opening, carried thirty-six carloads of freight, and many company consignments. In addition, the road has carried a number of passengers, bound for not only the Salmon tract but for the new townsite.

As a beginning, the traffic was exceedingly good, and the management of the railroad and those who planned the town, and are earnestly engaged vigorously in pushing it to the front.

Among the freight consignments were several cars of lumber, which is said to be in great demand by local owners who are intending to have buildings before cold weather commences. Considerable cement also is going in, as well as general store supplies for Doholt Bros., the pioneer store at Hollister.

The train leaves the Twin Falls station every morning at about 6:30, is operating on what the profession calls "construction" schedule, and notwithstanding the fact that the road is in its infancy, all things considered.

On the return to Twin Falls, the train leaves Hollister at about 8 o'clock. Prospects bound for that section therefore have an opportunity of viewing the region within a day and getting back here in the evening.

With several weeks of good weather ahead, if former years' records are maintained this season, a dozen buildings will have been erected and quite a number of families established there.

MUNSEY CLEANS UP MILLIONS.

Fortune Cleared by Buying Securities During Panic Times.

By staking a huge fortune on the future prosperity of the United States at a time when business conditions were gloomy, Frank A. Munsey, the publisher, is said to have just cleaned up more than \$5,000,000 profits through stock investments made during the panic of 1907.

MAN'S FIRST SIGHT OF WOMAN.

Had Never Beheld One Until Eighteen Years of Age.

George Randolph, who has a little mining claim in the interior of Northern British Columbia, came to Seattle last week. George is eighteen years of age, and he declares that he had never seen a woman.

Since arrival and witnessing the scene in all its captivating glory, he is now a confirmed bachelor, he declares women are the most beautiful things on earth.

His father and he lived alone, far from civilization. When he was a mere babe his mother sickened and died in the great woods, and was buried by her husband and his partner, and he was reared in a robust youth.

Telling year after year in the canyons prospecting for gold, neither man nor woman had been known to him.

One end of each plug is constantly exposed to the sun while the other is shaded and cool, and the rays permitted to pass by the violet glass up a reaction in the special alloy used, causing a constant flow of current to the storage batteries.

Device for Saving Young Fish. In the distribution of young fish in her streams this fall, Idaho's fish and game warden has been materially aided by the Oregon Short Line Company.

The car wherein the fish are carried is hitched into trains immediately behind the tender of the engine. From the engine atom is furnished with water which is pumped into a fish car, and this pump supplies air to the fish so successfully that the loss in transit ranges less than one-half of one per cent.

Will Teach the Art of Milking. A device for teaching milking has been invented which will soon be on the market. It stimulates the udder and teats of a cow, together with other details that accord means for practicing the removal of water from the artificial udder by a proper compression of the teats, and thus enables a student to acquire the art of milking quickly and safely.

WILL GRIND MEAL IN THIRTY DAYS

FILER'S ALFALFA MILL BEING PUSHED ALONG.

Capacity at the Commencement Will Be Two Tons Every Hour, and Though Not a Large Plant, It Will Require Large Acreage for Supply.

The word comes from Twin Falls stockholders in the company that the Filer alfalfa mill will begin to grind in about thirty days. Its capacity will be approximately two tons per hour, twenty tons every ten hours, and if the management desires to keep the machinery busy continuously its possible output will reach thirty tons of alfalfa meal daily.

On the basis of thirty tons of the hay every twenty-four hours this mill will consume some 10,500 tons per year, requiring the product of some 30,000 acres holding a minimum probable five to six tons per acre annually. In reality, the coming of the alfalfa meal industry into Twin Falls county means an extraordinary demand for alfalfa which has not heretofore been contemplated.

The growers in the vicinity of Filer are said to have already boosted up the price of their alfalfa to between \$7 and \$8 per ton, and there is only one menace to the immediate success of the enterprise, and that is the danger that price of the hay will reach a point at which its grinding will not be profitable to the company, especially in its infancy, before sources of marketing and methods thereof may have been established.

But if the price of alfalfa remains within reasonable bounds the management of the company expects to grind about all the hay that producers in the western end of the Twin Falls tract have to sell, above the immediate farm demand.

The plant is not regarded as a large one compared with some that are operating in other sections of the country, but modest as it is it will pay out to the farmer throughout some \$75,000 to \$100,000 annually for supplies with which to operate, and furnish employment to several dozen people at good wages.

BIG DIAMOND ROBBERY.

Pocastello Store Raided Successfully in Broad Daylight.

Robbers opened the safe of M. L. Roberts' jewelry store at Pocastello, Idaho, Thursday, and the owner was at noon-day luncheon, and abstracted diamonds and other jewelry valued at \$10,000.

Entrance to the room was gained by prying open a rear door. No clues were left upon which the police department could follow. The perpetrators have not yet been identified.

Incandescent lamps are used in the new battery to maintain the required temperature during this time were practically nothing.

The incubator is formed with a triple wall, providing a water jacket and an air space for the battery, and asbestos finished in white enamel.

NEW ELECTRIC INCUBATOR

Overcomes Objectionable Features of Old-Time Methods.

A new incubator has recently been built, says the Scientific American, which is heated by electricity, and which overcomes the difficulties with gas-heated incubators.

Incandescent lamps are used in the new battery to maintain the required temperature during this time were practically nothing.

The incubator is formed with a triple wall, providing a water jacket and an air space for the battery, and asbestos finished in white enamel.

ELECTRICITY FROM SUNLIGHT.

Device Said to Have Been Secured Having Much Power.

George T. Cove of Somerville, Mass., has invented a solar battery which is claimed to produce enough electric current in ten hours' sunlight to supply thirty tungsten lamps for three days.

The apparatus consists of a frame of violet glass, like a large window, below which a number of metallic plugs are set in an insulating material.

One end of each plug is constantly exposed to the sun while the other is shaded and cool, and the rays permitted to pass by the violet glass up a reaction in the special alloy used, causing a constant flow of current to the storage batteries.

Device for Saving Young Fish. In the distribution of young fish in her streams this fall, Idaho's fish and game warden has been materially aided by the Oregon Short Line Company.

The car wherein the fish are carried is hitched into trains immediately behind the tender of the engine. From the engine atom is furnished with water which is pumped into a fish car, and this pump supplies air to the fish so successfully that the loss in transit ranges less than one-half of one per cent.

Will Teach the Art of Milking. A device for teaching milking has been invented which will soon be on the market. It stimulates the udder and teats of a cow, together with other details that accord means for practicing the removal of water from the artificial udder by a proper compression of the teats, and thus enables a student to acquire the art of milking quickly and safely.

TESTS FOR PURE ALFALFA SEED

RULE PROMULGATED BY U. S. AGRICULTURAL EXPERTS.

To This Important Advice Is Added Instructions for Having the Seed Fully Tested Gratis, by the Department at Washington.

The United States department of agriculture comes to the rescue of farmers in the matter of alfalfa seed, at a time when it may be said the Twin Falls region needs all the alfalfa seed it can secure. In a bulletin the department says:

It is difficult for one who is not accustomed to handling alfalfa seed to accurately determine its percentage of purity, especially the amount of dodder and other weed seeds present, but a general estimate of the quality of alfalfa seed can be formed on the basis of color. The percentage of seed that will grow can easily be determined by means of a simple test, as follows:

Mix the seed thoroughly and count out 100 seeds just as they come, making no selection. Put them between a fold of cotton flannel or some similar cloth, taking care not to let seeds touch one another. Lay the cloth on a plate, moisten it well, but do not saturate it, cover with another plate and keep at a temperature of about 70 degrees F. Every day count and take out the sprouted seeds. In from four to six days all of the good seeds will have sprouted, and the percentage of seeds that will grow is known.

The seed laboratory is prepared without charge to make tests of alfalfa seed and other seeds, both for germination and for mechanical purity. The test for mechanical purity consists in determining the percentage of pure seed and of weed seeds, including dodder. All samples sent for testing should be addressed to the Seed Laboratory, U. S. Department of Agriculture, Washington, D. C., and should be accompanied as far as possible by the following information: Name and address of seller, year and place of growth, price paid, and name and address of sender.

BOISE OPINION OF WALLIS.

Declared to Be a "Goer" Since His Work in Twin Falls.

Boise Capital News: If anybody in Idaho can beat Pure Food Inspector Wallis the well he will have to know more than the Missourians of this state.

Wallis went to Twin Falls a few days ago, found slaughter houses, meat markets and other like places so dirty that he almost had the entire outfit burned; he forced the grocers to dump their food stuff over a fire, and he made the city authorities clean up the streets and alleys; ordered the police force about; made the school authorities humble themselves before the city council and answered by the mayor.

But Wallis is a newspaper man and the father of seventeen children at last report. That is enough to guarantee that he is a "goer."

BIG SALE OF STATE LAND.

Tracts to Be Placed Under Government Ditch Next Year.

Register M. T. Church of the state land department, sold over 3,000 acres of land in Ada county last week at an average of \$35 per acre, the total receipts from the sale aggregating over \$100,000.

Sales were made only after much spirited bidding on the part of a large number of real estate men and farmers in the vicinity. The tract selling for \$116.60 per acre, while the lowest price received for one tract of ten acres at \$10.25 per acre.

These lands are in the southern part of the county in the vicinity of Kuna, and are not under water. A portion of the acreage will be placed under the government ditch next year, water rights to be sold for about \$25 per acre. The appraised value of the land ranged \$10 to \$50, the average being \$25 per acre.

MAUD ADAMS' RANCH HOME.

Mrs. Annie Adams Kiskaddon, mother of Maud Adams, the famous actress, has just finished "proving up" her homestead in the Jackson hole region of Wyoming, and now has 480 acres of what she and her versatile daughter call "the finest land" in that state. Mrs. Adams herself is said to have induced her parent to make the investment and to have advanced the capital, and to have spent her declining years in the remote home, among the mountains, the ranchers and the other enticing features of rural life as it is available throughout that part of the world. Her summers have been spent on the place for several years.

New Mechanical Pea Huller. A device of comparatively simple construction, has been invented, in which the hulling of picked peas or beans on the vision may be accomplished by merely shifting a lever and feeding the peas through the device in the direction most suitable for their proper treatment.
