

## ANOTHER MINE SUPPLY STOCK

Gallagher Machinery Company Shipping Stock.

TWIN FALLS HARDWARE CO. WILL BE LOCAL AGENTS.

Full and Complete Mine Supplies Will Be Added to Their Local Business.

This week C. D. Bladen, representing the Gallagher Machine company of Salt Lake, made a contract with the Twin Falls Hardware company to handle the mining supplies for their house in this city for the Jarbidge trade. The hardware company will keep a full stock of drum hoists, shive wheels, buckets, steel cables, windlasses, tram wheels, track rollers, and all the supplies needed for the active development of the claims. It will be the aim of the Salt Lake house and its agents to keep the supply right up to the minute.

## BUY HARRIS BUILDING.

Young & Keel Buy Ten Thousand for Property.

The frame building on East Main, occupied by Young & Keel and the Fargo Woolen Mills, was sold this week by George Harris of North Yakima, to Algersa Young & Keel for ten thousand dollars. The new owners of the building are among the best boosters the city knows and they fully expect that property will go to a much higher figure than the purchase price, while paying splendid returns. The building was one of the first erected in the block and has always demanded a good rental in a class with more substantial structures.

## DID SOME GOOD PACKING.

Farley & Sierer Send In Heavy Haulage to Camp.

The first real heavy and cumbersome bit of packing into the Jarbidge district was successfully carried out by Farley & Sierer when a big unwieldy restaurant range was taken from the rim rock into the camp without taking the range apart. The weight of the whole thing being handled by pack mules without the aid of sleds or skids. The same company will place in the gold camp the new machinery of the Jarbidge-Balmont company, which is putting in complete equipment for working its claim. One piece, weighing two tons, will be taken shortly by the same method used in packing the range.

## Booth's Addition.

The Booth Mercantile Co. is doubling the balcony space in their Big Daylight store to accommodate the large stock of ladies' suits and dresses Mr. Booth purchased when in New York. This balcony makes a store in itself, and Mr. Booth promises the greatest showing of ready-to-wear goods for children and ladies ever in town and expects to double its business this year. The big busy store is a winner.

## WILL THROW OPEN MUCH IDAHO LAND

President Taft Approves Changes in Forest Reserves.

PLAN OF ELIMINATION WILL RELEASE TWO PER CENT.

About 470,000 Acres in Idaho Will Be Taken from Reserves—Thirty-four Per cent Tillable.

The examination of national forest boundaries carried out by the forest officers last summer and fall upon the initiative of Secretary Wilson and under his direction, has resulted in new information, which will make it possible to restore to the unreserved public domain much land along the edges of and within forests that it does not best suited for forest purposes. This is to be under a plan just approved by President Taft. The plan was formulated by Secretary Wilson and Secretary Ballinger jointly and submitted to the president in the following letter:

February 7, 1910.  
The President, The White House, Sir: After having very carefully considered the matter of elimination from and additions to the national forests, we respectfully recommend that the following general policy be adopted:

1. Lands wholly or in part covered with brush or other undergrowth which protects streamflow or checks erosion on the watershed of any stream important to irrigation or to the water supply of any city, town or community, or open lands on which trees may be grown, should be retained within the national forests, unless their permanent value under such conditions is greater than their value as a protective forest.

2. Lands wholly or in part covered with timber or undergrowth, or cut-over lands which are more valuable for the production of trees than for agriculture, crops, and lands densely stocked with young trees having a

(Continued On Page 10.)

## RUSHED WITH MINING TRADE

Joe Meyer Sending Out Many Supply Outfits.

The supply departments of Meyer & company have been working overtime during the past week supplying the needs made upon it by the Jarbidge prospectors. Two big outfits were sent out perfectly cared for in the way of supplies and this week two more groups of men have taken departure from Meyers, bound for the famous gold camp.

## SERVING SODAS AND ICE CREAM

Huffman Candy Store Has Big Fountain in Operation.

The beautiful new fountain of the Huffman candy store has been in operation all the week and the crowds that have gathered show the appetizing quality of the hot sodas and ice cream which Manager Weltman is serving to his patrons.

## SALMARC MURDER TRIAL

Prosecution Brings Out Important and Damaging Testimony.

Thomas Haines, of Rock Creek, Unwillingly Gives Evidence as to the Tragedy of January 13.

The trial of Oscar Salmarc charged with the killing of Fred Elledge at Rock Creek last January came up Wednesday and the day was consumed in getting twelve jurors with no prejudices in the case. The jurors selected were:

### JURORS IN SALMARC MURDER TRIAL.

- A. C. Berkholtz.
- J. P. French.
- W. E. Chambers.
- W. K. Horendon.
- H. K. Belmont.
- David Reisman.
- D. B. Moorman.
- Chas. F. Burrows.
- B. Withins.
- J. C. Maxwell.
- J. P. Smith.

Thursday morning the prosecuting attorney opened the case for the state and created some sensation by the claim of having much evidence not brought out in the preliminary hearing.

At the morning session of the trial of Oscar Salmarc for the murder of Fred Elledge, the following proceedings were had:

Jury called.  
Minutes read and approved.  
Mr. Guthrie, prosecuting attorney, made the following opening address to the jury:  
Gentlemen of the Jury: This is an action brought by the state of Idaho against Salmarc, his defendant, alleging that he killed Fred Elledge on the 13th day of January, 1910, in this county and state.  
Now, we expect to show, gentlemen, that this tragedy occurred in this county and near the town of Rock Creek, within a mile or a mile and a half south and east of Rock Creek; that this Salmarc was staying out on the premises of Mrs. Van Nostram, where she and her daughter, Mrs. Elledge, the ex-wife of the deceased, were living; that he had been stopping there for something like three or four weeks.

We expect to show that on the morning of the 13th, Elledge came to this house to visit his child; that he had heard that his child was sick and he came there to visit it; he came to the house and was refused admission, was told by Mrs. Elledge, his ex-wife, that the child was over to a place about thirty or forty rods from there, by the name of Austin, and that he could go there and see the child.  
The evidence will show that he went to Austin's house, saw his child, and

that he also saw Mrs. Van Nostram, the mother of his ex-wife; that they left Austin's place about one o'clock, possibly a little after, and went back over to the Van Nostram place; that Mrs. Elledge came out, that they were standing in the yard between the house and the gate. Mrs. Van Nostram, Mrs. Elledge and Mr. Elledge were standing there talking; that, I think, the proof will show that they had been there but a short time when the bullets started for the house, and that Elledge came around from, I think, the north side of the house. I would not say positive as to which end of the house, and shortly after that started for the house. He was shot, he was shot right in here (indicating where). The proof will show further, gentlemen, that after the first shot, the defendant went out to the gate and started on the road on the east side of the house, on the road towards Rock Creek; that he went probably thirty-five or forty rods in the direction of the town of Rock Creek; that he turned around, came back, walked down towards the house, turned around, went nearly to Mr. Austin's barn, then turned, came back, went into the house or behind the house, got the rifle and went out and shot this Elledge a second time.

The evidence will show, gentlemen of the jury, that between the first shot and the second shot, the deceased was lying there groaning and crying, and probably fifteen minutes or more elapsed between the first and second shots. The evidence will also show, gentlemen of the jury, that after the first shot, the two women came out of the house and that Salmarc and the two women were seen standing a short distance from the door and a short distance from where the deceased was lying groaning and suffering from the effects of the shot which the defendant had fired, and which the doctor will tell you would prove fatal; that they stood there for a few minutes; then Mrs. Van Nostram starts over to Mr. Austin's house and Mr. Austin met her and said the house wasn't there wouldn't go to the house because my wife is not well, and I do not want any excitement over there. And she says: "I am going over after the baby, as Elledge has been shot and wants to see his child."

Now we think, gentlemen of the jury, that if we show this state of facts as I have stated to you, the state of Idaho will be entitled to a conviction as alleged in this information.

On motion of prosecuting attorney, all witnesses, except as called one by one, were excused.  
C. W. Dyer was called, and testified he had received telephone call from defendant, and sending deputy sheriff out to bring him in.  
Deputy Sheriff Schludner was called (Continued On Page 12.)

## KNIGHTS HOLD ROYAL BANQUET

Anniversary Ceremonies Held in K. P. Hall.

REV. MR. CHAMBERLAINE GIVES STIRRING SPEECH AT BANQUET.

People's Cafe Filled With Host of Merry Knights and Their Wives.

The Knights of Pythias gathered Thursday evening in goodly numbers to celebrate the founding of the order and to renew fraternal spirit. The first part of the evening was spent in playing cards and the social intercourse after which the members took possession of the People's Cafe where Mine Host Duffer had made regal preparations for the occasion. The banquet course banquet presided over by Chancellor Commander Gallinger, proved to be all too short for the members to clear the table, although they struggled manfully. At the close Mr. Gallinger in a few brief sentences introduced Rev. Mr. Chamberlaine, Rector of the Episcopal church, who delivered a most stirring address to the members on living up to the high principles of the order and pointing out that good lodge members are also expected to uphold all religious tenets.  
The balance of the evening was spent in the lodge room with music and cards.

## CONCERT AT THE M. E. CHURCH

Program Calls for Appearance of Local Talent March 11.

- Chorus.....Apollo Club

- Recitation.....Miss Nellie Hauch
- Vocal Solo.....Isadora Friedman
- Vocal Solo.....Miss Hargis
- Chorus.....Apollo Club
- Piano Solo.....Miss Wilson

## JUDGE SMITH HOLDS TWO JOBS

Municipal Officer Becomes Sergeant of the County.

Judge Smith has been appointed Justice of the peace in and for the precinct of Twin Falls in addition to his former position as police judge for this city, a fact that will please Judge Smith's friends greatly. The only doubt that will enter the judge's mind will be discrimination between his two offices and for he might inadvertently sentence a county prisoner to get out of his jurisdiction in ten minutes, just as he does now with the municipal magistrates and have to employ a constable with an affidavit to enforce his sentence.

HAY  
100 tons good alfalfa. H. P. Farmer, Twin Falls. Mar 4 pd

## A NEW LUMBER COMPANY HERE

Idaho Lumber Co. Disposes of Stock to New Concern.

T. M. FRENCH, BERT WILBERG AND ASSOCIATES FORM COMPANY.

French-Wilberg Lumber Company, Ltd., Will Open for Business March Seventh.

A strong stock company has been formed this week for the purpose of entering the lumber business in this city with T. M. French and Bert Wilberg as the prime organizers of the company. The Idaho Lumber company, which has extensive yards in other cities of this state, has sold its stock in this city only to the new corporation, and will by its local business March seventh.  
The new company will be known as the French-Wilberg Lumber company, limited, and will be capitalized at \$25,000. Mr. French is one of the best known business men in the city, and has always commanded the respect of the business men by his fair dealing and should prove a strong member of the new company. Mr. Bert Wilberg hails from Minnesota, together with the other stockholders in the company, the former being actively engaged in the new business with Mr. French.

## INTERESTED IN TWIN FALLS.

Noted Journalist Will Visit the Tract in the Near Future.

Leonard Fowler, journalist, novelist and special writer for the New York World, is planning to visit Twin Falls as a guest of LeRoy Benson, well-known in this city as a journalist, investor, and Twin Falls booster in general. By a chance meeting in Pocatello a few days ago the two men renewed an old friendship and it was decided that Mr. Fowler was persuaded to visit Twin Falls on his next tour of the west.

Mr. Fowler is a journalist and novelist with a national reputation, and as a special writer for the New York World and other eastern dailies, his stories of western life and the development of the northwest, have a national circulation.

As a journalist and writer, Mr. Fowler has done much for the exploitation of Washington and Oregon, where the phrase coined by him, "Where dollars grow on trees," has been used to such good advantage in the advertisement of the Wenatchee valley, and to secure his interest in Twin Falls and the adjacent irrigated tracts, would be a service of inestimable value to southern Idaho, and this city in particular.

Spring Styles Pretty.  
Many new and pretty styles are shown for spring, both in men's and ladies' wear and children's and misses' wear is given more attention than usual. The Booth Mercantile Co. is already displaying a beautiful selection of advance spring fashions, fresh from the great markets, at wonderfully low prices. The Booth store is proving as attractive to the men as it always has been in ladies' apparel.

# Ostrander Lumber Co., Ltd.

Shoshone Street and O. S. L. Tracks

We are now receiving our new stock, which is almost complete.

TEMPORARY OFFICE IN BOYD BUILDING

UNDER THE DIRECTION OF THE LIBRARY CLUB

LESSON SEVEN.

LA ORIGINO DI LA VIRINO.

(Legendo di Indio).

Ande la potentia Mahadeva irevela la belega Indio, di defugli sur la tere por admirar ol. De la flanga sifreksa varana Mahadeva vana. La flera palni rovereksa sub la flanga. Mahadeva vana, ed a pura, blanka, delikata, aromata palni floresta sub la flanga.

Mahadeva prelus un de la llyli ed Jetis ol en la azura maro. La vento faels od-ed en la kristalin aquo ed kovris la belega llylo per blanka spumo. Mfante ed ek ta buketo de spumo foreksis la virino-delikata, honodora, quale la llylo, faelta quale la vento, chanebla quale la maro, ed brillanta quale la spumo di la maro.

La virino riganrels en la kristala aquo di krili.

"Quelle belega me esat!"

Pose ed riganrels la tere ed krilis:

"Quelle beia esat la mondo!"

La virino edits sur la bordo di la maro tute eska, ed sub elca cigarko floresta helen flori sur la tere. Multa kurloza okuli videtes en la chielo, ed ol nomis ta okuli la stell.

(To be continued.)

Vocabulary.

- kante, when.
pauze, when.
powerful.
kreat, to create.
blea, beautiful.
india, India.
li, he.
ol, it.
ed, and.
defugar, to fly down.
sur, upon.
tere, ground, earth.
mondo, world.
admira, to admire.
de, from.
lisa, his.
sufesar, to be wuffed.
honodora, grand.
vento, wind.
flora, proud.
palni, palm.
reverekar, to bow.
supro, top.
pura, pure.
aromata, aromatic.
llylo, lily.
floro, to bloom.
sub, beneath.
prekus, to take.
jetar, to throw.
azura, azure.
maro, sea.

Nouns.

Helgan, "Most beautiful." Note the force of the suffix IG, intensifying the adjective.

Par admirar, "In order to admire." This is an example of POR used with the infinitive to denote purpose.

lisa, "His." Elsa would mean "hers," and also would signify "its."

Suflesis, The suffix ES gives a passive force to the verb. Suflar means "to blow," and suflesar, "to be blown." Also note the form "videsar," to be seen, in this lesson.

Floresta, "Burst into bloom." The suffix ESK denotes an action performed quickly or suddenly.

Indio de llyli, "One of the lilies."

Migardels, "Glimced." The suffix ET gives a diminutive force to the verb.

LINCOLN COUNTY'S SUCCESSFUL SHOW

Poultry Raisers of Twin Falls and Lincoln in Competition.

AWARDS SECURED BY MANY TWIN FALLS FELLOWS EXHIBITORS.

Show Held at Jerome With Result in Lively Competition and Better Exhibits.

Report of the show of the Lincoln County Poultry association at Jerome, Idaho, February 15, 16, 17 and 18, 1910.

The exhibits were largely local although a number of birds were exhibited from Twin Falls and neighboring South Side towns. The quality of the exhibits were unusually good for so new an association and the enthusiasm of the exhibitors and the loyalty of the North Side people in attending the show would have done credit to a much larger and more populous community. While the fanciers of the North Side had contemplated holding a show for some months, definite steps had not been taken until some thirty days before and the management deserves much credit for their work as do the business men of Jerome for their liberal financial support of the enterprise.

There were on exhibit 338 birds, consisting of 32 standard varieties of poultry and owned by 64 exhibitors. While all of the exhibits were quite good some deserve special mention.

Mr. R. L. Pence of Jerome, had a pen of Barred Plymouth Rocks of more than ordinary value as is shown by his winnings.

In White Wyandottes the pen exhibited by Mr. J. T. Balbridge of Twin Falls was the principal attraction. Her birds showed the quality of the breeding and were in almost perfect condition.

A Gaylord Graham of Jerome, also had a very good exhibit of White Wyandottes and won a number of premiums. Rhode Island Reds were much the largest class in the show and the quality was surprisingly good. In the single comb variety Wm. Snyder of Twin Falls was the leading exhibitor in point of numbers and winnings, but had a close second in the person of Mr. W. N. Hardwick of Jerome, who had nearly as many birds and won some good premiums. Mr. J. W. Peyer of Jerome and Mrs. N. A. Dyer of Jerome had some good specimens on exhibit in the Red class and were on hand when the premiums were distributed.

Mr. E. Shaw of Jerome, the president of the association, was the largest exhibitor in the show, having 35 Rhode Comb Rhode Island Reds on display and won by far the majority of the premiums in his class.

Geo. W. Reels of Twin Falls, had a pen of S. C. White Leghorns at the show which made a good record for their owner, and was the winner of the bulk of the premiums in their class.

Mr. J. H. Blass of Filer, exhibited a very good pen of S. C. Brown Leghorns.

Mr. R. S. Frazier of Jerome, had some fine S. C. Blue Minors that made good.

The superintendent, Mr. J. W. McIntyre, was one of the hardest workers at the show and an all-around good exhibitor. He had some splendid Single Comb Buff and Black Orpingtons that didn't take a back seat.

Wm. Snyder of Twin Falls, was talking the birds of the Indian Runner Ducks and he has some good ones, as well as Mrs. Mary A. Craver of Jerome.

Mr. Fred Voelger of Jerome was the only exhibitor in White Holland Turkeys and Toulouse Geese.

The list of awards in the several classes are as follows:

Class 1—Cuckers. Barred Plymouth Rocks—E. A. Reynolds, Jerome, Idaho, 3rd hen, Mary A. Rice, Jerome, 3rd pen, 1 special, R. L. Pence, Jerome, 1st, 2nd and 3rd pullets, 1st and 2nd cock, 2nd hen and 2 special.

Buff Plymouth Rocks—Mary A. Rice, Jerome, 1st and 3rd pullet, 2nd hen, 1 special, Fred Voelger, Jerome, 2nd hen, 1 special.

White Plymouth Rocks—J. H. Bruner, Jerome, 1st, 2nd and 3rd hen, 3rd cock and 2 special. A. Cutts, Jerome, 1st, 2nd and 3rd pullet, 2nd hen and 3rd cockerel.

White Wyandottes—J. T. Balbridge, Twin Falls, 1st pullet, 1st and 2nd cockerel, 1st and 2nd hen, 1st pen, 7 special. Gaylord Graham, Jerome, 2nd and 3rd pullet, 2nd hen, 3rd cockerel, 3rd hen and 2 special. Fred Voelger, Jerome, 2nd and 3rd pullet, 2nd hen and 2 special.

Single Comb Rhode Island Reds—Mrs. N. A. Dyer, Wendell, 3rd cockerel, 3rd hen and 1 special. Wm. Snyder, Twin Falls, 2nd and 3rd pen, 2nd and 3rd pullet, 2nd cock, 3rd cockerel, 2 special. J. W. Person, Jerome, 1st pullet, 3rd cock and 1 special.

Rose Comb Rhode Island Reds—S. B. Shaw, Jerome, 1st, 2nd and 3rd pullet, 1st and 3rd cockerel, 1st and 2nd hen, and 6 special. E. A. Reynolds, Jerome, 2nd and 3rd pullet, 1 special. F. H. Valkman, Jerome, 3rd pen and 4 pullet.

Class 2—Asiatie. Light Brahas—W. A. Britton, Jerome, 2 special. Black Langshans—A. Boyse, Jerome, 3rd cock and 1 special.

Single Comb Brown Cuckers—C. A. Varum, Jerome, 3rd cockerel. D. S. Boyd, Jerome, 3rd hen. J. H. Blass, Filer, 2nd cockerel, 2nd and 3rd pullet, 2nd pen. Mrs. F. A. Oaker, Jerome, 1st pullet, 1st cockerel, 3rd pen and 4 pullet.

Single Comb White Leghorns—O. W. Reels, Twin Falls, 1st, 2nd and 3rd pullet, 1st and 2nd hen, 1st cock, 1st pen and 8 special. Fred Voelger, Jerome, 2nd and 3rd pullet, 1st and 1 special. J. E. Speckman, Jerome, 1st cockerel, and 1 special. W. H. Sturges, Jerome, 2nd cockerel and 3rd hen. Howard Finch, Jerome, 3rd pullet, and 1 special. Rose Comb White Leghorns—Mrs. P. Rosa Sidwell, Jerome, 1st, 2nd and

3rd pullet, 3rd cockerel, 1st cock, 2nd and 3rd hen, and 2nd pen. Single Comb Buff Leghorns—C. W. Arthur, Albany, 1st, 2nd and 3rd hen, 3rd cock and 1 special. Single Comb Black Minoras—R. S. Frazier, Jerome, 2nd and 3rd hen, 2nd pen and 2 special.

Blue Andalusians—J. S. Hartshorn, Jerome, 2nd hen and 3rd cock. Mixed Anconas—Clara Mullin, Jerome, 2nd and 3rd pullet, 2nd and 3rd hen.

Class 3—English. Single Comb Buff Orpingtons—A. Cutts, Jerome, 3rd pen. J. W. McIntyre, Jerome, 2nd and 3rd pullet, 3rd hen, 2nd pen and 2 special.

Single Comb Black Orpingtons—J. W. McIntyre, Jerome, 1st, 2nd and 3rd pullet, 1st and 2nd cockerel, and 5 special.

Single Comb White Orpingtons—James Dross, Jerome, 3rd cockerel, 2nd and 3rd pullet, 1st hen and 4 special.

Class 12—Turkeys. White Holland—Fred Voelger, Jerome, 1st and 2nd hen, 1st cock, and 2 special.

Class 13—Ducks. Indian Runner—Wm. Snyder, Twin Falls, 1st drake, 2nd duck and 1 special. Mary A. Craver, Jerome, 1st and 3rd drake, 2nd drake, and 1 special.

Class 14—Geese. Toulouse—1st and 2nd pullet, 1st cock and 2nd hen.

Mr. Henry H. Collier of Teton, Wash, judged the show and has been employed for next year when it is proposed to hold another show from Jan. 24th to 28th, 1911. A permanent organization of the fanciers of the North Side will be effected Saturday, Feb. 26th, 1910.

THE HARDY KIEFFER PEAR.

Probably Most Dependable Variety Found In Oregon.

The Kieffer pear, the origin and dissemination of which has been appropriately denominated "one of the great pomological events of the Nineteenth Century," is the product of a chance hybrid between the European pear and peculiar Oriental species known as the "sand pear," and was developed early in the decade in the garden of Peter Kieffer of Philadelphia.

Its most especial value is found in the fact that it may be grown in more Southern latitudes than any other available to our varieties of this fruit, and, while it is not so well adapted to cultivation and does not produce as high a flavored and perfect fruit in the northern states, it is, in the climate of Central Missouri, more resistant to the effects of late frosts than almost any of the standard varieties, many trees bearing quite freely the present year in which the crops of almost all tree fruits were cut off by the May frosts and other unfavorable conditions.

It is almost, if not quite, blight-proof and does not ripen its fruit until late in the autumn, after almost all other kinds have been harvested, and may be kept, with care in handling, far into the winter.

The large, golden yellow pears, some with a rich, red cheek, are most attractive in appearance, and, while it cannot be claimed for the flesh that it equals that of certain of the sweetness of flavor some of the favorite varieties, it is by no means to be undervalued as a dessert fruit uncooked, and when baked, stewed or prepared as a rich preserve, is equal to any.

In addition to its culinary merits the tree itself is exceptionally ornamental, being naturally an upright, slender, with very little pruning graceful and symmetrical. The foliage is dense, fern, glossy, dark green, almost immune to insect attack, as well as crum, mildews and blights.

In its profuse blossoming season it is truly a vision of beauty, as it is also in the autumn, when its richly tinted fruits are displayed among the red and orange of the ripening leaves.

From the latitude of Central Missouri southward almost to the Gulf, especially on high and well-drained soils, it is one variety of this important group of fruits that can be depended upon to give satisfaction.—H. N. A. Kentucky, in Farm Progress.

REMARKABLE ASSAY SHOWING

Jarbridge Second Assays Are Better Than First.

Mr. Hermann, one of the directors of the Jarbridge-Bader company, a new corporation composed of McGill, Nev., people for the purpose of exploiting claims in the new Jarbridge district, has received the results of recent assays made by Millard & Son of Ely of the ore taken from the company's property give returns of \$12.46 in gold per ton. Mr. Hermann claims that the claims taken over by the McGill people were located by David Bourne, the original locator of Jarbridge district, and that first assays gave returns of \$95.80 per ton. Some little development was done on the ground, however, and the later returns came from assays made at the same time. It is stated that the deposits of this product have already been demonstrated to a considerable extent.

W. S. Enslow, president of the Jarbridge-Bader company, was the original discoverer and he will personally direct the development of the claims. The other officers of the company are: L. A. Fryberger, vice president; F. T. West, treasurer; Max Herman, secretary. These, with F. L. Bassett, Charles Holmes and Frank Holmes form the board. The company is capitalized for \$500,000, there being 500,000 shares of the par value of \$1 each.

Several Ely people are already interested in the proposition and, as is usually the case in such instances, the future of the property is "considered very encouraging."—Salt Lake Tribune.

For Sale Cheap. Restaurant with all kitchen and dining room fixtures, for company, using 50 or 60 boarders. Must sell quick. Good reasons for so doing. Write or call on Mrs. Morris Green, Hayward, Idaho. Feb. 18 Mar 1.

Get your butter wrappers printed at The Times from pure vegetable parchment and conform to the pure food laws.

Buy a Choice 5 Acre Tract Set to Jonathan Apples in GRACELAND SUB-DIVISION. Map showing County Road, Walter's Ave., and Lincoln Ave. Lots 1-8, with lots 2 and 3 marked 'SOLD'.

Furniture That Furnishes

Twin Falls, Idaho

Two Doors West of the P. O.

### FILER LOCAL HAPPENINGS

Filer, Idaho, Feb. 22, 1931.

Mrs. A. A. Mendenhall has been indisposed with an attack of la grippe for several weeks past, has entirely recovered.

The concert given under the auspices of the Men's Glee club on Tuesday evening in the Johnson hall, was a well attended affair and the net sum realized from door receipts will materially swell the church building fund of the Methodist church of which the affair was given.

After the delightful program in which the club was assisted most ably by Mosdames E. B. Ripley, L. Brown and R. Reynolds and the net sum realized from door receipts will materially swell the church building fund of the Methodist church of which the affair was given.

Mr. and Mrs. Chas. Lusher returned this week from Boise and will make their home here. Mrs. Lusher will be gladly welcomed by her many friends, who greatly regretted her sudden departure last fall on account of the illness of her mother. Mr. Lusher is returning from a month's vacation in the capital city and on his fine farm near Heyburn.

James Lyons, manager of Miss Francis Brown were the Sunday guests at the country home of Miss Charlotte Pond, in F. Ripley, manager of the Western Lumber yard of this place, returned on Monday from a week's vacation in Portland, Ore.

Miss Lyons is visiting with friends in Twin Falls this week.

Mr. and Mrs. R. A. Reynolds were the dinner guests of Mr. and Mrs. George Trell on last Sunday evening.

On last Saturday evening, Mrs. H. Carnahan and daughter, Miss Alice Maude McKinley, enjoyed the Herr Orchestra in the Ball theatre, all returning home the first of the week.

Mrs. Elizabeth Begle is expecting her daughter to arrive soon from Chicago to spend the summer with her on her farm near Jerome.

Mrs. G. Mendenhall returned from Twin Falls on Saturday with her eight-year-old son, Lloyd, who was severely injured while at play on the school grounds some weeks ago, and who since that time has been in the Twin Falls hospital.

Messrs. Blakely and Fox left for Washington, D. C., for Jarbidge, where they intend to open a lodging house. They took their supplies from this place.

Mrs. Scott has returned from Jarbidge, whither he went to take in A. Duquesno and W. Hush, who have joined the prospectors for the precious metal at that place.

Miss Alice Carnahan accepted the first of the week's position as stenographer, with the Ripley real estate firm.

The office of the new real estate firm, of Graves and Finch is announced with a new and large sign announcing this location of the firm.

Mrs. Henry Graf, who left for a visit with her parents in Kansas at Christmas time, returned on last Saturday, accompanied by Miss Peterson, of Abilene, Kansas, who will remain for some time in the city of Twin Falls.

Dr. J. B. Sweeney, of the Hotel, Mrs. M. E. Hodman, assisted by a surgeon party on Juneau Shinn and Ora Munden.

### TREE FRUITS IN GARDEN.

On Monday C. M. Walter received by telegram the sad news of the death of his sister, Mrs. Mina Andrews, of Appleton, Wis. That a few days previously he had received a letter from her saying she was in the best of health and was planning on returning again to Idaho to spend the summer with her brother. Mrs. Andrews will be remembered by many admiring friends for her charming personality who had the pleasure of meeting her on her visit to Filer last summer.

On last Friday evening a goodly number of the people of Filer enjoyed the hospitality of the Elks' lodge of Twin Falls. Among those attending the fine performance of the Herr Orchestra, were Mr. and Mrs. P. D. Conners, F. A. E. Allen, A. Newberry, G. Trullit, R. A. Reynolds, E. B. Ripley, M. G. Ripley and R. Brown, Al. Messers Pond and Brown, and Messrs. Max Pond and Henry Brown.

Wednesday was vacation day for the pupils of the high school as the entrance meeting for the students of the state agriculturists in Twin Falls on that day.

Mr. Grace Salway and Mr. and Mrs. W. H. Dale left the latter part of the week for their fine new farm near Hagerston.

Mr. Sibley of North Yakima, has rented the R. H. Barnes place four miles south of town and will locate his family there at once.

Old Garson and Byron Williams left the first of the week with a load each of grain for the Jarbidge mining district.

The marriage of Guy Humphrey and Miss Ella Davis, who is a sister of Messrs. E. L. and E. R. Davis, who live near town. The newly married couple have the best wishes of a large circle of friends and will make their home on the Humphrey place south of Twin Falls.

During the past week the Filer Townsite company gave the Methodist church four town lots at the corner of Union and Fifth street. Two of the lots will be reserved for the erection of a fine church edifice in the future, while the remaining two lots will begin the immediate erection of a \$1,600 paragon, money for which has already been subscribed.

Gardening Made Interesting.

If the beans you are watching happen to be of the "pole variety," watch the way they climb their poles and then watch the other vines and note the difference in the way they twine—some going always toward the sun and others in the opposite direction.

All vines have wonderful fascinations when one begins to study their habits for their ways of working seem as intelligent and their movements as voluntary as those of a person; but they must be watched to learn these things.

You can buy an Oliver typewriter at \$15 down and \$5 a month. The best machine made, Hill & Taylor, 100 N. Main, Twin Falls, Idaho.

Wanted—Map of Twin Falls, Idaho, for sale at the Times office.

### Dwarf Varieties Take But Little Room From Vegetables.

It is seldom, perhaps, that any man who has gone into fruit raising on a common scale will fail to properly cultivate the land in his orchard and fertilize the soil; but this unfortunately is not the case with the owners of small orchards kept for home use only.

In my observation, both of my neighbors and others not near-by, it has seemed to me that the orchard is neglected more than anything else about the farm. In fact, I have known of a number of small orchards, planted when the owners got possession of the farm, that never at any time got attention. The trees are not to be pruned, or the soil either cultivated or manured; and, in fact, the whole orchard was in two or three years covered with bushes and weeds, that took a large part of the plant food that should have gone to the young trees. It is needless to say that such orchards are failures and eyesores, and in a few years will be so injured that it will be almost impossible to make anything of them. If any new beginner feels that he will not have the time and means to cultivate and care for an orchard, he would better reduce the tree plantings to a very small number of trees and locate these where it will be almost impossible not to give them attention.

Of course, every man who lives on a farm and makes his living by farming has a few trees about his place. These trees help the garden, but it will be much better to plant a few trees than to do without them. And, really, if they are planted in fence corners and along the walks in the garden, they will not be much in the way. At any rate, this gain will be much greater than the loss.

In my old home garden we had a large apricot tree, several peach trees, two seckel pear trees, several other sorts of pears, and half a dozen plum trees, besides grape vines growing along the fence.

As the garden was well manured always, and thoroughly cultivated, the trees and vines flourished and did far better than those in the orchards, which were kept in sod and seldom got any manure, and their poles and all the fruit in the garden was so abundant that they fully sufficed for the use of the family, when ready for use.

I consider it of so much importance for all to have plenty of fruit, and especially the women and children of the family, that I think any new beginner would better neglect almost anything else than a fruit supply; and by planting trees and vines in the garden, so little trouble is given by the attention required by them, that really the fruits obtained in this way cost nothing at all.

At my old home, in several cases, grape vines near some fruit trees took possession of them, and ran all over them. They reached entirely to the top and, under circumstances, of the branches, and the trees were thus loaded with grapes as well as other

### Valuable Insecticide.

Many gardeners and fruitmen advise the use of paris green in connection with Bordeaux for trees, potatoes, etc. After using paris green and also arsenate of lead in connection with the Bordeaux some have found that the Bordeaux some have found that the Bordeaux is very difficult to get just the right amount of paris green, as a little too much will kill the foliage, and a little too little will not kill the insects. With arsenate of lead, however, much is used, and it sticks better to the foliage.

Both these poisons are excellent insecticides, each possessing certain advantages. Paris green is cheaper, as far as poisoning qualities are concerned, and is also more rapid in action than the arsenate of lead, and hence it is preferable where horsetail and the insects are inflicting great daily losses. Experts generally advise the use of paris green wherever immediate results are desired, and Bordeaux mixture is used with the paris green as a good chance of its remaining on the foliage for a little while at least.

On the other hand arsenate of lead though slower in action and more costly, is very adhesive and is especially useful where it is desired to protect the foliage from leaf feeders during a considerable time, and particularly where there is no prospect of immediate results. Further, arsenate of lead can be used in almost unlimited quantities without injury to the foliage, something which is not true of paris green. Some advocates of arsenate of lead advise its use in very large quantities where immediate results are desired, and the wisdom of following this course must be determined largely on local conditions, since the cost is considerably greater.

Some growers of potatoes have experienced difficulty in killing potato beetles with arsenate of lead applied with certain horse sprayers. This trouble was due to the fact that certain machines make a small amount of water go a great way, and as a consequence, unless the poison is in a very concentrated form, there will not be sufficient quantity on the foliage. It is a simple question as to whether, whether, on or the other be employed. Both are exceedingly useful when properly applied.

Wanted—A girl for general housework in small family. Apply to Mrs. F. M. Buckley, West Main Ave. Feb 24th

### BENEFITS OF SMALL FARM.

Farm of Few Acres May Be More Productive Than Larger.

During the last two or three years the tendency towards high prices of farm products to consumers has been more and more pronounced, though I cannot see that farmers seem to be making any more money, except what may be called exceptional cases.

The two factors that seem to be the most important in keeping down the net proceeds to the owner of the farm, one the increasing price of labor and the increasing cost of converting the crops into money. It is true that we now have more efficient implements than ever before; but as the implements become more and more improved, the greater the skill that is required in doing good work with them.

The freshly imported foreigner is not therefore competent to do first-class work that requires experience, and therefore cannot operate as competitor against a first-class experienced man. It seems inevitable that a great many large farms will have to be cut down greatly in size, and that on those that remain large such crops will have to be grown as will enable the farmer to secure experience, and work with his own force and the most up-to-date implements. I really do not think it is a matter to be regretted.

We have here so many farms of a large scale that we feel that it is a "come down" to do farming on a very few acres, but it has been fully proved that such is the most profitable and most satisfactory. Would it not be far better if we would simply acknowledge the wisdom and conform our methods to necessity?

There have been books written on the subjects "Twenty Acres Enough," "Ten Acres Enough" and "One Acre Enough." Of course, these opinions are only individual, and depend upon the man and the point of view. But there are vast numbers of instances where mere "garden spots" of two to ten acres are making a living and a good profit for the owner.

One instance is where one man with six acres is running a large dairy and has been extremely successful. What was the secret? It is in the average, but the exceptional crop of what we plant. The largest crop yield of corn in the United States, and also the best round corn world, was one of 153 bushels on an acre in South Carolina.

That merely shows the possibility of an acre in the best of circumstances if it is profitable.

When planted in checks 3 feet 6 inches by 3 feet 6 inches, corn with three stalks to the hill may produce with a good season on the most fertile land, well cultivated, over 100 bushels to the acre. Supposing the stalks to be 4 to 5 feet high, the average yield would be almost as good, except when the season is wet and the weeds bother. From two to three bushels of seed, which grow on seed bed compact, but loose, and fine on top, so that the young plants may easily come up. The planting may be done in rows with a one or two-horse corn drill, or a wheat drill may be used by stopping up every alternate feeder.

When planted in rows with a corn planter the crop may be cultivated and the result will be more certain. With rows 4 feet together the crop cannot be cultivated, yet it will be almost as good, except when the season is wet and the weeds bother. From two to three bushels of seed, which grow on seed bed compact, but loose, and fine on top, so that the young plants may easily come up. The planting may be done in rows with a one or two-horse corn drill, or a wheat drill may be used by stopping up every alternate feeder.

suits in the great majority of cases. In my own acquaintance, I believe that practically all of them cultivate all the land that they can cultivate. The result is inevitable. The owner is worked to death and his crops are small. No man can afford to cultivate more acres than he can at least keep up in productivity, as it is not better after all the time. If one makes this an inflexible rule, success is sure. The chances for the farmer are going to be better all the time in the future. The demand for products are increasing the production.

The land owner who is enterprising and who can make big profits on a small area if he does his work with the highest intelligence, and I believe I would say that the most certain factor in producing great results is having the land thoroughly drained. Land never gets too wet and suffers little from drought. It is the fault of the owner if he does not make his little farm pay big profits.—A. L. U. Indiana, in Farm Progress.

Life Means a Good Crop.

The common bean or soy bean, as it is often called, is extensively used in almost all households of the country, yet not all farmers grow their own supply.

Beans are a quick crop, maturing in about ten weeks, hence they may be planted after harvest and after the regular busy season is over. They are not always a sure crop, yet they are very easy when growing in a season favorable. The soil for a good crop does not need to be extra fertile, although the plants respond to good soil and treatment the same as other cultivated plants.

At least three benefits may be derived from a crop of beans. The beans themselves are a wholesome and valuable food, and the average yield is enough to pay for the labor and expense of seed and planting. If the ground on which the beans grow is to be down to fall wheat or rye, these crops may be sown without rebreaking the land, hence a great saving of labor. Beans are legumes, and, as all legumes, they have the power of extracting nitrogen from the air by means of nodules, which grow on the roots. For this reason the crop usually pays in fertilizing the land.

In case it includes any weeds, they may be plucked any time during July and mature before frost, unless frost comes unusually early. Prepare the soil for corn, which grows on the seed bed compact, but loose, and fine on top, so that the young plants may easily come up. The planting may be done in rows with a one or two-horse corn drill, or a wheat drill may be used by stopping up every alternate feeder.

**USES FOR ORCHARD GRASS**

Makes Excellent Hay if Sown Scientifically Thick.

Not long ago, while driving along a road I had never been over before, I saw a field that met my approval more than almost any other I ever saw. And yet it was what any man might have on his farm if he would, and if he properly appreciated it. It was nothing more than a field of grass, an orchard grass, that had been sown so thick that it seemed a perfect cover over the field like a sod of blue grass.

It was then about six to eight inches high, and the herd of cattle grazing on it were getting all they wanted. I suppose the majority of farmers might not be impressed with a mere pasture of orchard grass. Neither would I with one of the kind one always sees; that is, a field of bunches of orchard grass along with more or less clover, or perhaps some other grass mixed with it.

That is what one generally sees in a field of orchard grass, and naturally there is nothing attractive about it. And owing to its being in bunches, and the ground not being covered, it looks like, and is, a very poor pasture compared with one of the blue grass or some other that makes a perfect sod.

This shows how well this grass will stand to good treatment; but some experience of my own convinces me that it is the best all-around pasture grass for land that is too poor to make much show with any other grass. I am sure that on southern farms, whose owners who do not want their land to become infested with hares, mice, orchard grass will be found to be the best thing they can use. It requires considerable seed to make a heavy stand; I cannot say just how much it would require, but anyone can experiment a little in this line and find out definitely. I am certain that there is no one thing that will be found of greater value, and at the same time under no circumstances over prove to be a nuisance, as Bermuda and Johnson grass do.

But on the farms of a vast portion of this country, in fact, I may say all parts of it, where the soil is not like that in the limited sections of Missouri, Kentucky, and some other states, it is not only a nuisance, but next to the best thing that can be sown on a farm. It is a better pasture than any other, and naturally is the point I wish to bring to above; it does not require any special care in the way of mowing or anything of the kind, and it makes waste of land in its pasture. I am convinced that the only thing needed to obtain a complete stand on good land is to have the land in good condition and sow plenty of seed.

I am sure of one thing, that the grass will do well on some soils that timothy and clover, or even reitrop, will not thrive on very greatly. —

**SELECTING FARM BREED.**

Barred Plymouth Rock Seems to be Acknowledged Favorite.

The question often comes up with people who are not experts on a farm, What is the best breed of chickens to keep? I say with people who are not farm-bred, because the majority of those who are raised on farms have had their preferences already developed, as a rule.

So far as I have been able to observe in many localities in different states and in the city markets, more people like the Barred Plymouth Rock breed than others. They are certainly a good farm breed, and they seem to "take good" almost everywhere. But there are people that insist that the Plymouth Rock is a better breed as good flesh development on the breast as some others. It is true that they lack in weight compared with the largest breed, but the verdict of the American public is nevertheless favorable to the American-Bred fowl, the Plymouth Rock.

I know this breed well, having kept them for many years, much of the time exclusively, and part of the time along with some other breeds. No one who ever ate birds that came from my farm complained that they did not show as much meat for their weight as any other breed, or that the chicks did not reach a salable size as quickly as any other. Nevertheless if anyone is going to keep poultry with reference to selling eggs, my preference is for another breed. I have kept for a long time, the Brown Leghorn.

There does not seem to be any established standard of weight for the Leghorns, as there is of most of the well-known breeds, but we all know that they are a small breed. But since they are so highly valued for their 200 eggs a year, they stand with the best in that particular. And I do not doubt that in this particular they are the leading breed.

All the people of my acquaintance who are in the poultry business to sell eggs keep the Leghorns, and for the same reason. I have seen where the chickens have a wide range and are liable to be caught by hawks. I have not found any white breed so desirable as other colors, and the Brown Leghorns seem to be especially suitable for use on the farm in that respect. They are sure to prove extremely satisfactory to me, the eggs being large and pure white, and for that reason preferred by the market.

Of the Leghorn breed there are eight standard varieties, both single comb and rose comb of brown, white and buff, and single-comb black and silver duckwing. These birds are trim and well rounded, and though they make the impression of being light they are not so. They seem to lose less in size than some of the large birds.

As this breed is more active than almost any other, the hens "rattle around" and do more towards raising their broods without much feeding than any others, and if one has a garden that he does not want chickens to get into, he will find it best to clip the wings of the hens.

As they belong to the list usually considered as "monstrous," these I raise the Leghorns find it more satisfactory to hatch their eggs in incubators; but if they have any of the larger and slower hatching breeds, it would be well to put Leghorn eggs under them and not let the smaller hens sit. If hatched early and properly fed, so as to begin laying early, they may begin to lay the same season.—J. L. K., Missouri, in Farm Progress.

**Practices of Irrigation.**

As to the frequency of irrigation and the amount required for this irrigation or for the season the soil conditions and the climate must determine the proper treatment. The deeper the soil and the more retentive of moisture it is, the more economically irrigation water be used and the less frequent the irrigations. The shallower the soil and the more impervious it is the more frequent must the irrigation be and the less economically is the water used.

Irrigation in spring should not begin until warm weather has arrived says an exchange, and then not until the moisture condition of the soil is such as to require it. If irrigated when the cold weather is yet prevalent, injury may be done to the crop, which is indicated by a yellow foliage. Especially at the higher altitudes is this likely to occur.

As to the amount of water to apply that should be gauged by our knowledge of the requirements of the crop. To apply any more than is beneficial can be put to use as a waste. The alfalfa plant, as we know, roots deeply and can draw moisture from a considerable depth and this will not suffer so quickly as other crops, as it can draw upon the reserves in the deeper soil. We know that alfalfa roots penetrate no deeper than the water table, with wintering, the soil is a saturated soil is ungenial and something which alfalfa cannot withstand. We should therefore avoid such a condition of the soil as to be replenished. In a general way we may say that the desirable condition is that of half air and half water in the soil.

The climate we irrigate in is not better. Irrigation therefore means the replenishing the moisture contents of the soil to such a depth of soil as to permit the alfalfa roots to irrigate so as not to saturate the soil through and through.

Where the water table is liable to be affected by irrigation, care should be taken not to apply so much that it is raised and the feeding area of the roots in that way restricted. Overirrigation will gradually cause the water logging of soil and the attendant accumulations of alkali. Where ground water is within two feet of the surface, as on some farms, alfalfa does not thrive and generally dies in from three to four years.

**Low Cost. Economy of Time. Efficiency of Service.**  
POINTS THAT PLACE THE  
**Hendricks Sagebrush Grubbers**  
IN THE LEAD.  
The Hendricks Grubber is the best on the market today. Our many years' experience in the field with other machines has put us in the lead. We guarantee the Hendricks Grubber in any and all kinds of sage brush. It makes no difference how thick or how large or how difficult it is for the horses to get through, the Hendricks Grubbers do the work. Every owner of a Hendricks machine is more than satisfied. We have never had a single word of complaint from any purchaser of our machine.  
The Hendricks Grubbers with six horses, will clear six or seven acres per day in any kind of sage brush, and cut it out cleanly. The all steel machine at the price is equal to two ordinary machines.  
We have manufactured the Grubbers from original designs in this section until the acme of perfection has been reached in the machines now placed on the market. The cut of the first machine shows the solidity of the parts and it is a matter of pride with the maker that not a single purchaser has been dissatisfied with the work of the Grubbers.  
The working principles of the machine are simple and strong, so that there is little chance of even an inexperienced man having trouble. The knives are placed so as to cut below the soil surface, thus taking out the toughest sage brush roots and leaving the land ready for plowing. Descriptive circulars and detailed information will be gladly given by  
**T. B. HENDRICKS**  
Successor to the Twin Falls Manufacturing Co.

#### WILL PUSH HOTEL BUILDING

Hansen Taking On Ais of a Gay Metropolis.

Hansen, Idaho, Feb. 22, 1910. At the annual meeting of shareholders of the Hansen Realty & Improvement company the following named were chosen as directors: John F. Hansen, Thos. J. Rauch, W. Frank Brewer, Nephil Larsen, A. H. Shoemaker. These officers were elected: President, John F. Hansen; vice president, Nephil Larsen; secretary-treasurer, A. H. Shoemaker. It was decided to order the immediate construction of an hotel building and plans for same were received and accepted and a call for bids authorized. Work on the excavation and foundations will be begun within about ten days, and Hansen may expect to have a nice little hotel ready for use in about 90 days.

William Focht of Twin Falls, president of the Hansen Township company, was a visitor to the village on business last Tuesday.

Charles Pierce, who has been ill for some time and recently underwent a successful operation for appendicitis is rapidly recovering but is still confined to the hospital in Twin Falls.

Joseph Froehlich was a visitor to the county seat on business last Monday. J. R. Hinton's disposal sale of sur-

plus live stock was largely attended and the stock sold at good prices.

The open meeting of the local Farmers' Union held at the Hansen school house on last Wednesday evening was largely attended and the greatest interest manifested in the addresses given by various speakers. Professor J. R. Hinton, who is a successful grower of swine on his ranch near Hansen addressed the meeting on the subject, "Hogs," their breeding, feeding and marketing. W. A. Stofacher addressed the meeting on the varieties, culture and marketing of potatoes. His address was listened to with the greatest interest, not only because the speaker knew every phase of the business of growing and putting the tuber on the market, but because he, in a measure represented a company that is expected to be a large buyer of Idaho potatoes. Lunch was served during an intermission between addresses and a most enjoyable and profitable session held.

Mrs. Christine Newman came out from Twin Falls Tuesday and took the stage for Rock Creek, to visit her brother, Peter Newman, and family.

Mrs. John F. Hansen went to Twin Falls Tuesday to visit her daughter, Mrs. J. E. Hayes, before they leave for an extended visit to Colorado.

J. L. Rush is down from Rupert this week looking after his band of horses that are being wintered in this vicinity.

Prices Newman returned to Shoshone Monday after several days spent in

this vicinity looking to the welfare of their several bands of sheep.

A very enjoyable evening was spent by a number of the friends of Mr. and Mrs. M. G. Anderson at their spacious home south of town.

A benefit M. G. Church recital, "Mrs. Wiggs of the Cabbage Patch," by Gertrude Amy Rauch, will be given in the hall Friday evening March 4th. Miss Rauch, a pioneer of the Hansen settlement, has recently returned from Spokane, Wash., where she took the degree of master of expression at the Walton college, and was a member of the faculty later. Miss Rauch being an ecstasist of ability, Hansen people will be assured of an evening's entertainment worth while, and should appreciate this opportunity by giving Miss Rauch a crowded house.

A number of visitors responded to the invitation of Prof. C. C. Pomeroy to the literary program and debate given last Friday afternoon in honor of Lincoln's and Washington's birthdays.

Mrs. P. J. Jerome took their son Lewis to Twin Falls Tuesday for medical treatment.

We have recently received a shipment of extra pure alfalfa seed from the Hagerman valley which is the finest possible to obtain, and which are selling at a reasonable price. The Utah-Idaho Elevator Co., Kimberly, Idaho. Feb 3 March 10

Mining machinery and essay supplies at the Western Auto Co.

#### SATISFIED WITH OUTLOOK.

Roberts Sees Some Very Rich Ores In New Jarbidge Camp.

Edward J. Roberts, one of the first mining operators from Utah to get into the new Jarbidge district, has just returned from that gold bearing section. He says that he was able to get a lease on a very desirable property and located thirty-one claims on his own account, adjoining the famous Bourne mine, which was the first discovery in that camp. The rush was started only a short time ago and Mr. Roberts says there are at least 600 people permanently located in the camp, with more coming in every day.

The trip over is not dangerous, according to Mr. Roberts, although one should go prepared to encounter heavy snow and cold weather on the overland travel from the railroad. More comfortable and convenient conditions will be provided within a short time, as men and material are being taken into that country. The weather will doubtless moderate considerably within the next few weeks, as the ranchers in that locality claim that the worst part of the season has passed. Then the big snow will be on its way. It may be as late as May before enough of the snow has melted to insure an opportunity to inspect the surface formations.

Mr. Roberts says that they have the values in Jarbidge, all statements to the contrary notwithstanding. He has been there and taken out the ore himself and has some of the rock with him here. A great deal of this ore will average \$150 in gold to the ton, while samples can be selected that will naturally show fabulous wealth. All the workings in the camp are shallow, yet there are some large ledges of the fine grade of material bearing rock that have been opened up. Eventually the camp will doubtless prove to be a milling proposition, but Mr. Roberts says he feels perfectly satisfied that there will be fortunes taken out in high grade ores near the surface.

All who care to get employment have found work in the new camp. A number of men are coming in and within a short period the district should be amply supplied with workmen. On the group located by Mr. Roberts he has six men at work. He will remain here a few weeks to attend to some business here and will go back to the camp to inaugurate an extensive campaign of development. While here he will purchase some supplies and equipment for his properties and arrange with some of the people who are interested with him for the acquiring of more ground.—Salt Lake Telegram.

#### GEESSE WITHOUT WATER.

Stream or Pond Not Necessary In Raising Them.

Remembering, as I do, the success we had in raising geese on the farm where I grew up, I am always surprised to find so many farms that have the best facilities for doing this branch of the country business, yet never go into it at all.

As geese are associated in the minds of most people with water, the natural inference is that they do not do well without a stream or body of water, but this is a mistake.

On my old home farm we had a mile stretch of a small sandy bottomed stream, and in addition several large ice ponds, and our geese flourished and got great satisfaction out of life. They never are interested, except in winter, when they were fed along with the other poultry.

Our geese were of the kind common in the vicinity, some of them white and the geese dark gray. They grew to a good size, and if killed when not more than a year old, made fine eating. After that age they got tough. They would have afforded a good revenue from the feather, but my mother thought the pulling of the feathers such a needless operation to the geese that she never permitted it. But as a great many of them were killed for home use, I remember that we secured enough feathers to have all the feather beds and pillows to furnish a large house.

Anyone with conditions such as we had that farm can make geese raising pay well. If it is in a latitude where the winters are not long and severe, the geese will cost at a very low cost. And if some of the larger varieties are kept, they will not only add to the comfort of living, but pay a good price.

The breeds that are now the most popular are the Gray Toulouse and the White Embden. These are about the same size, the males weighing about twenty and the geese eighteen pounds when full grown. The gray Toulouse geese are among the best of the goose tribe, as being of good size and deep body, they carry more flesh in the desirable parts than most of the others.

Another point to their advantage is that they are better layers than most other varieties. They lay usually about forty eggs in a season. One goose can care for a large flock of goslings, but the eggs are so large that it is hard for one to cover thoroughly more than five or ten of them. The goslings should not be hatched before the young grass has started. In the spring, as it is the chief article of food, it is best to grow it in a field, as in Virginia, in April progress.

The Value of Sand in Winter. Enough sand should be stored in a dry place to enable the poultry keeper to change it once a month during the winter, and its value depends upon the care of the man who puts it. It should be changed at least once a month and stored when perfectly dry.

Cover the floor of the pen with this to the depth of two or three inches, and supplement this with one six inches of dry leaves, and you have an ideal floor covering. Scatter all grain feed over this, and you have busy, profitable flocks.

When the leaves become broken and soiled, remove and store in a dry place to top dress the ground in the spring. If you doubt its value for this purpose, just try two plots of grass land side by side, one with top dressing, the other without, and note the result.

### Independent Meat Market

THE MARKET OF QUALITY. JOHN A. PEETZ, Prop.  
Male St, 5th Door Above PostOffice. Fresh and Cured Meats, Sausages, Fish and Poultry. Our Specialty Pure Lard. Highest Prices paid for Product.

Remedy for Plant Lice. One of the best methods of destroying plant lice on roses and shrubs is by the use of tobacco stem solution. Pour a gallon of boiling water on a pound of tobacco stems and about twelve or fifteen hours later add four more gallons of water. This will reduce the swelling and allay the fever. To Cure Closed Eyes. When a hen is discovered with closed eyes and a very hot head, no more effective treatment can be given than taking a cupful of hot water; in which is dissolved a tablespoonful of salt, and applying it to the head as hot as it can be borne. This will reduce the swelling and allay the fever. This treatment should be followed by giving a one-grain quinine pill each night for three nights, during which time the hen should be kept in a comfortable, comfortable place and fed on soft, nourishing food.

The candidacy of B. F. O'Neill for governor, which was announced last week, has long ceased to cause a ripple in the state politics and this week Mr. O'Neill announces that he is for local option. The figure cut by three of the Republican candidates attempting to cling to the one lone plank looks as though the handwriting on the wall had not diminished in its sinister effect upon Idaho's politicians. Cragstone has gone farther and comes out boldly for state-wide prohibition and from Mr. Cragstone's record in the house there is not the slightest reason to doubt that his declaration is sincere, and if Gov. Brady and Barney O'Neill follow in his footsteps, the promised reforms for the state will start the average politician out of a year's growth. It is the declarations of principles made by the candidates so early in the campaign that makes the direct primary so valuable to the people in getting reforms.

The new federal corporation and co-partnership tax is designed as a happy medium between the income tax and the gift tax. It is the last in a series of measures designed to bring about a more equitable distribution of the tax burden.

doing business in the United States one per cent on all net earnings above \$500 and was intended to fall the hardest upon the trusts and watered stock companies. Whether the law will operate in favor of the honest corporation is something to be guessed at, but owing to the tax being based on net earnings it is doubtful. If the tax had been upon gross earnings it would then bring pressure to bear on the trusts who under the present law will only have to raise salaries of the directors and the stockholders' efforts to bring down the earnings to the lowest notch, while really making as large or larger profits. To the small corporation with little or nothing to conceal in its business affairs the burden of the tax will fall unless the federal government employs an immense force to inspect the books of the trusts. The law will be in operation next month and Idaho corporations will have to dig whether notified by the government collectors or not, the law holding that failure to notify does not release the corporation from liability.

#### DISTRICT COURT FINDINGS.

Several Civil Suits Decided—See Pleadings GUILTY.

During the past week a number of important civil cases have been tried before the district court. The case of H. G. Lesaur and Co. vs. A. C. Coburn was decided with a judgment of \$118 entered in favor of the plaintiff. The case of H. D. Lee vs. A. P. Smith was disposed of; the defendant being allowed \$94.60 as a counter claim. The case of Leedom vs. the Oregon Short Line was settled and dismissed. Mrs. Guy Miner was granted a divorce from the defendant in the amount of \$1. The only criminal case of importance so far, was that of H. D. Lee, charged with receiving goods stolen from the Filer Hardware Co.'s store. Mr. Lee pleaded guilty and will be sentenced the first of next week.

#### GET YOUR PROPER NUMBER

Cannell Prepare for City Delivery in Spring. In compliance with the demands of the postal department, the city delivery can be operated in the city the city council are urging every citizen to see that the proper house number is placed in a conspicuous place on each house. Numbers for the houses can be obtained at a number of stores at a purely nominal figure, while City Clerk Taylor can tell every resident his proper house number, provide the resident knows the number of the block and lot on which he resides.

### INCREASED ORE AREA DISCOVERED

Jack Hole Country the Center of Attraction.

A. A. HAMMER IS CERTAINLY NO KNOCKER FOR JARBIDGE.

Interesting Items Sent by The Times' Special Correspondent in the Mining Camp.

Arrivals from Jarbidge gold camp during the last week say that while strikes in two new parts of that district confirmed by arrivals of the ores at the office of District Recorder Smith, there is no doubt that the identical conditions prevailing in Jarbidge geologically exist also at points four miles north and five miles east. Discovery of gold-bearing ledges for five miles north of the original Bourne "and" having received immediate recognition in Jarbidge as valuable were followed by a stampede to a point locally known as Jack Hole. Over one hundred men collected there within four days, staked large areas in that vicinity, and this new town has acknowledged rights to competition with Jarbidge itself for the banner point of the two locations. Five miles directly east of the Bourne ledge, where there is another gulch whose sides are of the first-intrusive-elements and carrying lime and porphyry, the dykes of which are in the ricker mines of the second volcanic action. These stand frequently as high as 100 feet, and are described by A. A. Hammer of 1102 Jackson street, Spokane, Wash., as "blood red in appearance, much silified, containing much base metal, and frequently showing free gold." Hammer arrived here yesterday with samples of his discoveries, which he says are of more value than any preceding in the region of the Jarbidge. In the collection of surface rock that he carried were several possessing phenolitic characteristics, even to the flouring grains, which told the tales of wealth in the ricker mines of the Cripple Creek district. Hammer says that he is experienced in the mining business, having especially spent much time in the Coeur d'Alene and British Columbia. He had been in Jarbidge district three weeks, taking the trail over the hills easterly from the district recorder's cabin, and all the time having in view the locality described as the region of what is known as the Lost Shepherder's mine, and expecting to find the ledge from which the unfortunate camp tender secured the red ore that twenty years ago caused a stampede into the Jarbidge vicinity. Until now the locality from whence it came has been completely shrouded

in mystery. The feeling among the miners is that, in view of Hammer's "and," the time is near when, in the vicinity of Robinson Hole, that particular red ledge from which he knoeked the big piece of ore that assayed \$1000 per ton will be identified. Hammer did not remain long in Twin Falls, but started for Spokane, saying he intended having his assays made there. He also explained that he had left guarding his many locations in Robinson Hole none other than Hans J. Rice, formerly county treasurer of Shoshone county, Idaho, and well known throughout the northern part of this state. Hammer is the most enthusiastic prospector who has ever struck Twin Falls after visiting Jarbidge. He said: "They have certainly struck a big permanent camp up there. It is one of the greatest and assuring prospecting propositions I ever saw, the formations being easily recognized and in place and firmly defined. I shall be back in as soon as I can make the arrangements, and I think that an estimate of the probable population of 10,000 by the first of July is very conservative."

G. Winter is in town this week looking after some shipments of mining machinery which he is sending out to Jarbidge as fast as it arrives. The hoist left Saturday morning in charge of H. E. DeMunn, passing sent out three six-horse outfits, two four-horse and one two-horse outfit loaded with freight, powder and supplies.

#### DIES AT WILKINS RANCH.

George Fletcher Brought In By County Coroner.

One of the men employed by the Mining-Exchange-in-building-the-new road to Jarbidge, died on Tuesday of this week from pneumonia, passing away shortly after the camp physician reached the Wilkins ranch, where he had been carried. The man's name was George Fletcher, and upon his person were papers indicating that he had money in a bank at Reno, Nevada. He was brought to this city by Coroner Walker, who immediately wired the bank officials there to get trace of the deceased man's relatives. Meanwhile the body will be held at the Walker undertaking parlors.

#### CHANGE IN PALACE MARKET

H. F. Barger Sells Interest in Meat Company.

Early in February H. F. Barger, who for the past three years conducted the Palace Meat Market on South Main sold his interest in the market and immediately gave possession. The market which has been recently renovated and improved is now in charge of Arthur Hauser, formerly connected with the Twin Falls Meat company. Mr. Hauser has put on a new delivery wagon in charge of a competent man, and is adding new features to the business, intending to cater to the residential trade.

#### LOST IN SNOW STORM.

Three Men Reported Lost On Jarbidge Mountains.

Dubl. Feb. 23.—Three men, said to be settlers on the Twin Falls tract, suffered death from exposure at Jack Hole, about 10 miles from Jarbidge, on the northeast slope of the Jarbidge mountains, according to a statement made last night by George Tyler, a fruitgrower from Kimberly, who said his information was merely hearsay. He was not able to learn the names of the unfortunate men and did not know any of the details of the deaths. He stated that the storm, which would arrive tonight, would have the particulars. The arrival of the stage was eagerly looked for and when the travelers were questioned as to the authenticity of the report, stated that they had heard two men, who left Jarbidge on Monday in company with four others to go to Jack Hole, became separated from the party and were later found in a semi-frozen condition, but were quickly revived.

#### REV. MR. LANSDSELL RESIGNS

Popular Pastor Has Received a Call to Salt Lake City.

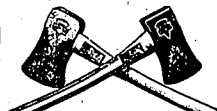

At the regular Sunday service, Rev. Lansdell tendered his resignation as pastor of the First Baptist church of this city, the same to take effect April 1st. Rev. Lansdell has made many personal friends during his year's residence in the city and under his leadership, the church has grown rapidly both in the size of its congregation and in its finances. Rev. Lansdell stated that he liked Twin Falls and his work here had been very pleasant, but that in view of very flattering calls from Georgia and from Salt Lake City, he felt it to his best interests to accept.

## Local and Personal

Frank Hoshimoto visited friends in Buhl the first of the week.

W. Zenus Smith was a business visitor in Filer the first of the week.

F. D. Kimball returned Saturday from a short business trip to Boise.

Mrs. R. W. Steele was visiting friends in Buhl the first of the week.

Grant Miller was a business visitor in Filer a few days the first of the week.

A. K. Seaver was a passenger to Buhl Tuesday to look after business affairs.

Fred R. Reed, the North Side booster, was in the city a short time Monday.

Mr. and Mrs. H. J. Falling visited friends in Buhl a few days the first of the week.

R. W. Steele was transacting business in Buhl a few days the first of the week.

F. A. Hutto returned Tuesday from a short business and pleasure trip to Salt Lake City.

E. W. Davis, manager for the Utah-Idaho Elevator Co. at Kimberly, was looking after business affairs in the city the first of the week.

T. A. Reed, Ernest White, Tandy Wigglesworth and A. Q. Fisher left Monday evening for Hagerman to spend a few days hunting along the river.

There will be German and English services conducted at the Lutheran church next Sunday. German services begin at 10:30 a. m. English services at 7:30 p. m. All are cordially invited to attend.

F. M. Bowman returned the latter part of the week from Seattle, Portland and various parts of the northwest. Mr. Bowman reported a most enjoyable trip.

N. T. Turnbull left today for Jarbidge, going by way of Twin Falls. Mr. Turnbull is one of a number of local men who recently sent Tom L. McDonald to the new district.—Ely Mining Expositor.

Joseph T. Laurill left Tuesday evening for Birmingham, Ill., where he will enter the Illinois College of Photography. Joe is already an expert amateur photographer and will be able to complete his professional course within a year.

Joseph Guyot, an experienced Alaskan miner, arrived this week from Seattle and will leave sometime soon for Jarbidge. Mr. Guyot was one of the earliest to realize the merits of the great camp, and has interested western mining men in the new camp.

J. A. McCoy, a prosperous rancher living near Three Creek, was a business visitor in the city the first of the week. Mr. McCoy was one of the first to see the possibilities of Jarbidge, where he secured several good claims and to which he expects to return sometime in the near future.

P. J. Conway arrived Thursday of last week from Neola, Iowa, to look over the tract and to visit with two of his old friends in the city, Fred and D. H. Beck. After a short visit, during which he purchased a ten-acre tract near Twin Falls, Mr. Conway left Monday for his Iowa home.

J. C. Graham has returned from Richmond, Va., where he was called about the middle of last month on account of the sudden death of his father. Mr. Graham will continue his connection with the Ostrander Lumber company and will likely be stationed at Twin Falls for the coming month. He reports a very severe winter through Virginia.—North Side News.

H. B. Blades, representing the Gallagher Mining Machine Co., of Salt Lake City, was in town a few days this week investigating the reports from the great Jarbidge district. Mr. Blades has made arrangements with the Twin Falls Hardware Co. to handle a supply of mining machinery, which his company is shipping to Twin Falls. Mr. Blades returned to his home in Salt Lake City, Tuesday.

C. B. Wilfley left Wednesday on a business trip to Boise.

Guy Holohan was a business visitor in Rupert a few days the first of the week.

Chas. Coker of Buhl, was numbered among the guests at the Perrino this week.

Working roads in this way is so simple and easy that it would be no task for the average farm owner to keep in good shape the public roads that touch his land. Of course, in a paper with a circulation spread through every state in the Union, road laws differ very much among those states in use; but that does not matter. The same principle will apply to all.

W. P. GIBBIE, Attorney for Plaintiff, residing at Twin Falls, Idaho. (SEAL) Feb 3-24

RILL & TAYLOR FIRE INSURANCE AGENCY. OUR LIST. Liverpool, London & Globe. Ins. Co. assets \$57,000,000. Scottish Union & National. Ins. Co. assets \$30,000,000. San Insurance Office of London. Assets \$15,000,000. St. Paul Fire & Marine. Ins. Co. assets \$6,000,000. Providence, Washington Ins. Co. assets \$3,000,000.

THE BEST TIME TO PICK APPLES. Picking when too hot or when the fruit is not ripe is unsatisfactory. As soon as the picking is done the fruit should be sorted. At least three grades should be made. Too much care cannot be taken in preparing the fruit for market. Apples that are not marketed at once should be stored in a well-ventilated cellar in crates. Stored fruit will become overripe and won't keep satisfactorily.

Excelsior News. Excelsior, Idaho, Feb. 21, 1910. Charlie Clanning of Twin Falls, was visiting with John Harryman, Thursday night. Wanda McGinty has returned from Washington. The sale of Hinton and Crater of Hansen, was well attended. W. J. Catkins and W. Dashiell each purchased a tea horse for \$100.

The Eureka Hotel. Now opened for business opposite old stand 2nd Ave. and 3rd Street. Your Patronage Solicited. SPECIAL RATES BY THE WEEK.

Notice of Publication—Final Proof. G. W. Humphrey, of Filer, Idaho, who made entry No. 1891, under the provisions of an act of the legislature of the State of Idaho, commonly known as the "Carey Act," approved March 2nd, 1889, which embraces SW 1/4 NE 1/4 of section 29, of township 108 N., range 18 E. R. M., do hereby give notice of my intention to make final proof to establish my claim to the land above described, and that I expect to prove that I have resided on, reclaimed and cultivated said land as required by law, before H. B. Lewis, representative of the state land board, at Twin Falls, Idaho, on the 5th day of March, 1910, by two of the following witnesses: A. O. Humphrey, H. Armstrong, E. L. Davis and E. R. Davis, all of Filer, Idaho. GUY M. HUMPHREY, Entryman.

STIRS OLD WALLACE MEN.

J. L. Dunn Writes of Former Couer of Alabers Being Reunited.

J. L. Dunn of Wallace, who is now at Jarbidge, sends the following interesting letter from Twin Falls, just prior to his going to the new camp...

If anyone thinks the people of a strictly agricultural section can not get interested in mining, he should spend a day in the new camps...

The people of Twin Falls seem alive to the possibilities. They are building a new road...

That there is bound to be a rush into Jarbidge is apparent to anyone now on the outskirts, and that it is the making of a good camp is the belief of many conservative and competent men...

Twin Falls seems to be the favored starting point. A railroad runs southwesterly for more or over 25 miles...

Just now the roads are very good, have frozen, but a very few days of mild weather would bring a change...

EXPERT OPINION ON CAMP

Cripple Creek Prospector Tells of Jarbidge Ores.

Nampa, Feb. 21.—Martin Conway, an old-time Cripple Creek prospector and a man of wide mining experience, returned to this city Friday from the new gold camp, Jarbidge, having made a trip of investigation...

Hens Which Weigh Ten Pounds or More are too large; if a young Rock weighing eight pounds she is too fat, or if a Leghorn weighs five pounds she is too fat.

Other signs that weighters are their sluggish habits, their desire to wait for food instead of being on the lookout and hunting for it, a brood or out and busting for it, a brood or out and busting for it, a brood or out and busting for it...

Are you in the market for a typewriter to buy or trade? See Hill & Taylor.

Wanted—Large, clean cotton rags at 10¢ per lb.

TRAMPS NOT GIVEN QUARTERS

Kimberly Station Agent Uts Strong Arm Penitentiary on Leasers.

Kimberly, Idaho, Feb. 23, 1910. Lawrence J. and A. G. Geck left Saturday with a complete mining outfit for Jarbidge. They expect to be out there about two months if they find the camp O. K.

Mrs. J. E. Thompson arrived Sunday evening from Ontario, Oregon, to join her husband, who has rented a farm near Kimberly, for this year.

B. F. Hoover, agent, had quite an experience with two or three tramps one night last week, when they dozing about in the alley between the depot as a bed room for the night.

The passenger train, No. 153, west, was delayed about 30 minutes last Saturday while the freight crew were busy getting their engine tender back on the track.

Kimberly is again free from small pox, the last patients having been cured on Monday of this week.

W. H. Thomas is here this week looking after business affairs connected with the flouring mill and the Townsite Co.'s new building that is being completed.

E. W. Davis returned Saturday from Denver and other Colorado towns where he and Mrs. Davis have been visiting for a couple of weeks.

F. E. Bigger, B. Wilkins, Wells Webster and A. E. Burkhalter are attending court this week, having been drawn on the regular jury panel for this term.

W. D. Griffith went to Barley last week to visit his family, who have been spending the winter in Michigan. Mr. Griffith moved his family onto his ranch near Barley, where they will live this summer.

The base ball fans and those interested in sports, will meet Wednesday evening to organize an athletic club. Kimberly expects to be in the same this summer when it comes to playing ball, so don't forget Wednesday evening and everybody come.

Mr. Good, an uncle of B. F. Hays, arrived here Monday from Illinois, to look over the country with the view of buying some property in this part of the country.

Mr. Gray Weckert from Stanton, Neb., was in town Monday looking for a location.

The Ladies' Aid meets at the home of Mrs. D. R. Carter Wednesday afternoon of this week.

Mrs. A. J. Wilson entertained the ladies of the Pioneer club Thursday, Feb. 17, from 2 o'clock to 5. At the request of the hostess the ladies came dressed as school girls, each bringing the usual number of tablets, pencils and books, besides a tin bucket full of lunch.

The Ladies' Pioneer Club will meet at the home of Mrs. F. J. Bigler, Thursday, March 3rd, at 2:30 p. m. The Star Amusement Co. are billed to give an entertainment in the Kimberly hall, Wednesday evening, March 2nd.

John P. LaSalle, rural carrier, had the misfortune to cripple one of his horses Monday, while trying to serve his route.

The dance given Tuesday evening by the Kimberly dance committee, proved a success, everyone present reporting a fine time.

E. Tilley, from Rock Creek, was transacting business in Kimberly Tuesday of this week.

Newbury Bros. and Ellis & Wilson, placed orders for a new saw each, Tuesday of this week.

Mr. Wallace, who lives near Rock Creek, fell from a ladder Monday, breaking his hip bone. Dr. Whyto was called to set the fractured bone.

Mr. Geo. Hanson, agent, Sunday with her relatives in Twin Falls. The young people of Kimberly are making good use of the fine sleighing these days.

W. H. Turner, E. W. Davis, E. Claiborn, E. T. Newbury and W. F. Breckon attended the school directors' meeting held in the Elks hall in Twin Falls, Wednesday of this week.

Preventing Horse Stumbling. If you happen to be there at the first time you will hear the blacksmith get a blowing up because the horse he lately shod was taken to stumbling. He can prove an alibi if he knows enough about horses.

Get your butter wrappers printed at The Times from pure vegetable parchment, and conform to the pure food laws.

FARMING HAS DECLINED.

Production of Country in Danger of Falling Behind.

If any one were to ask me what I consider the weakest point in our American method of farming, I should say it is our failure to take proper steps to maintain the productiveness of the soil.

Professor Cyril G. Hopkins, of Illinois, one of the best informed men in the country as to the needs for the maintenance of American prosperity, says that there is far less reason for our soil failure to take proper steps to maintain the productiveness of the soil.

I have been watching closely the rapid decrease in the productiveness of our soil in all parts of the country, and also the tremendous annual increase in our population and cannot but apprehend the time when our annual crop will fall to a point where we shall not be obliged to cut down liberal rations.

Every thoughtful person who keeps his eyes open is obliged to see that year by year the yield of all the grains per acre is decreasing.

Of course, on many of the millions of farms the loss of productiveness has been very rapid, because the steep hillsides have had the soil washed away on account of reckless cultivation. But, as a rule, it is not nearly so bad as the loss of productiveness by simple exhaustion of fertility by the continuous cropping of the soil without return of anything to the soil.

No other people on earth, intelligent or ignorant, have been so reckless with their resources. Because our new soil was productive, almost every one of us who owned a farm has cultivated it to the point where the soil is so exhausted that it is almost worthless.

The larger portion of the land in almost every one of the older states is now too poor to make profitable crops without manure. And where the soil is washed it is still worse. What are we going to do about it?

I cannot answer that question, but I will say this: In less than twenty-five years, if we go on at this gait, we shall be a decadent nation. Instead of exporting we shall have to draw on South America, Africa and Australia for much of our bread and meat, and the prestige of the United States as the granary of the world will be gone.

Brother farmers, let me appeal to you individually. I have lately seen large acres of level land, once the richest in this country and the people the wealthiest, forming the social center of the country, where now it takes hard labor to grow a bushel of wheat, and where the soil is so exhausted that it is almost worthless.

There is one thing to do; that is to farm with some intelligence. We have acted like simpletons in simply digging out of our land all the value in it and putting nothing back. Now we have got to put more back than we take out of it. I am glad to say there are some who are seeing the impending catastrophe, and are doing this.

We have got to study our business harder and find out what we have got to do to put plant food into the soil. We have got to work much harder with our heads, and by all means quit our reckless extravagance. Are we to let our soil go to the devil because we are a decadent nation, as the other nations have all done?—O. T. O., Arkansas, in Farm Progress.

## DEALS APPEAR ON MERIT.

Mining Men Can't Resist Camp's Formation, Says One Operator.

One of the properties which have been mentioned in the early stages of its development is the Long Hill group of three claims, which is only 600 feet north of the original Bourne strike. It is traversed by a northerly and southerly porphyry ledge which is crossed by two dyvitic dikes, and it is at several points that the rich ore shoals of the camp are found.

The Long Hill group was banded last fall by Theodore Parks, former mine operator of Cripple Creek and later of Seven Trouths. He has been in this city several days and will leave tonight for camp to be ready for operations as soon as weather conditions will permit active work to be done. There has probably never been one other gold camp in which deals involving so large an aggregate of wealth have been made at so early a stage of the camp's development. There have been recorded for Jarbidge up to this time," said Mr. Parks yesterday. "The aggregate sum of cash considerations involved in the purchase cannot be accurately stated at this time, but it is likely that the estimate of \$1,000,000 will be exceeded here. There is abundant reason for the confidence thus displayed by practical mining men in a camp of so slight development. The finding of tellurium ore in a formation so perfectly adapted for the making of ore ledges to great depth, is a confirmation of the fact that one familiar with gold can resist."

"There would appear to be not one chance in a hundred that a property, which covers up most of the intersections of the dyvitic dikes with the big porphyry ledge will fall to make good."

These are some of the deals that have been made: The Escalon group, banded in Twin Falls capitalists for \$200,000; the Pavick properties, one of which was sold for \$100,000, the other for \$200,000 each calling for cash payments; the Belmont and Bunker Hill groups, owned by Mr. J. H. Smith and Dan Greenway, which have been acquired by corporations, and the three groups recently purchased by Mr. Roberts and associates of Salt Lake.

"These are only the beginning—deals which could not be held back by the camp's being covered by deep snow. With the opening of spring million-dollar transactions will be of common occurrence; it will unquestionably be the greatest mining boom this country has seen."—Salt Lake Herald-Republican.

## NEWS OF ARTESIAN CITY.

Artesian City, Ida., Feb. 21, 1910. Mrs. Sarah Lambert has returned to Twin Falls from visiting her home-land.

A. L. Hiltbarnner is expecting his two daughters from Atlantic, some time next week for an extended visit. Miss Ethel Cramer of Odell, expects to spend the summer with her sister, Mrs. Hiltbarnner.

J. J. Jones, A. L. Hiltbarnner and A. H. Deatherer attended the dry land meeting at Kimberly.

Friends of Mrs. C. O. Workman will be sorry to hear that she will be unable to attend another operation at Odell, on Monday.

There will be a masquerade ball given at the school house March 4th. Everybody invited.

W. E. Davis was the guest of Anna Lee's Sunday.

Mrs. Nelson Barr received the news from Quincy, Ill., that her mother, Mrs. Dean, is not expected to live.

Mrs. F. A. Trill has been on the sick list for the past week.

Walter Hiltbarnner has come to Rock Creek to work on the Norton ranch. Will Hayes had the misfortune to lose his cold watch last Monday, while hunting hay.

Wade McMillan has returned from an extended visit through Washington and the northern part of Idaho.

Buy Perry has the contract for building a fine residence near the home of George C. Oaks made final.

A. H. Deatherer was at R. G. Monday, on business.

## INFORMATION BUREAU

Commercial Clubs Bulletin for the Week.

Twin Falls, Ida., Feb. 21, 1910. As per our announcement of recent date regarding "Information and Employment Bureau," will say that we have on file a list of applications, many of which show evidence of sincerity and good qualifications. Among the list are:  
7 Laborers.  
2 Barbers.  
2 Milliners.  
3 Farm hands.  
4 Carpenters.  
5 Engineers.  
17 Clerks.  
15 Stenographers.  
12 Bookkeepers.  
1 Automobile repairer.  
Level and rodman.  
1 Registered drug clerk.  
1 Bank clerk.  
If you can use any of the above, kindly get in communication with the secretary of the Twin Falls Commercial club.

Cultivation and Weeds. Recent inspection of a great many fields of tilted crops—corn, potatoes, etc.—and without exception the poorest crops are to be found on the fields which have been given the least cultivation and bear the largest and rankest crop of weeds. There is a vital connection here that a good many farmers of the soil ought to be making up.

\$15.00 to Kittle Wilkin's ranch, 25 pounds of baggage. Farley & Slater. Feb 3 if

Good farm team wanted. Frank Hicks, Route 2, Box 4, Twin Falls.

## COST OF KEEPING A COW

Animal of Greatest Production Not Always Most Profitable.

No one can tell the value of a cow unless he knows how much it costs to keep her. This is just as important as it is to know how much milk she gives or the quality of that milk.

A farmer who keeps a cow because a cow gives a large amount of milk she is the most valuable one in the herd, and yet he is not warranted in his judgment until he knows the comparative cost of keeping her. One cow will produce more milk than another, but when we figure carefully the cost of feeding it sometimes happens that the large producer has not made as great a net profit as some other, whose milk she does not produce. They say one cannot make them believe that a small cow giving a moderate flow of milk is worth as much as a large one, but it is quite possible that she makes us a larger profit in her investment. Consequently when we judge her from a purely business standpoint, if she does do this, the little cow is the more valuable of the two.

The great trouble with the dairymen, as with many other things connected with farming, is that they are too apt to guess at results. We do not figure carefully enough. The average man is likely to think there is no such thing as a free lunch, and consequently he will figure for each cow for him to consider the question seriously.

I do not pretend to say that the farmer can estimate the cost of feed within a cent or two, but he can get it close enough that he knows whether his cows are making him a profit or not, and whether one animal is better than another. It is not so very much either.

Suppose a man is feeding clover hay to his cows. If he feeds them carefully for several days he knows just about how much each cow will eat in a day. He is familiar with the amount of hay he learns how much the cow needs and he knows that one cow needs considerably more than another. Now, when this has been determined, he knows what each cow eats in one day and multiply this by the number of days that you feed clover hay. If other hay is fed, he can estimate the cost of feed within the same way. That will give him a close approximation of the amount of hay the cow eats.

If the ration is not what the grain ration is, it is not necessary to weigh the every feed, when you feed as nearly the same amount as possible.

Weight it once and then multiply by the number of times you feed.

If the ration is changed, the estimate must be made again. In this way, with very little trouble, one can get an idea of the cost of keeping each cow.

Then, if he has weighed the milk and tested it for quality, he has data whereby he can distinguish between the poor cows and the good, between those which have brought him a profit and those which have made a loss.—N. W. T. Iowa, in Farm Progress.

Cross Killing Chicks. The Rhode Island Experiment Station has received a number of reports where crows have caused serious losses in poultry raising. In one case 25 per cent of the chickens hatched were destroyed by crows, all sizes being taken from the pens they had hatched in.

Various efforts were made to keep the crows away, most of which were of little value. The best was to scatter the next crop sown in straw and straw solution was scattered on a field of planted corn at a little distance from the chicken yard; that, a stout trap was set on a pole near the chicken yard, but without success.

Finally a white twine was run on stakes around and across the chicken yard; this kept the crows from the yard, but the small chicks would not get out and fall prey to the crows. This being ineffectual, a crow was shot and hung on a pole near the chicken yard, after which there was no further trouble.

\$15.00 to Kittle Wilkin's ranch, 25 pounds of baggage. Farley & Slater. Feb 3 if

## MONEY TO MAKE MONEY.

Poor Man Not in Position to Take Advantage of By-Products.

I apprehend that about the greatest mistake a poor man can make is to take class labor is the lack of sufficient capital.

The farmer's capital may be divided into three classes: (1) the land, (2) the land and the permanent improvements, and working capital, such as the stock, farm machinery and the implements necessary to have the farm between crops, such as the support of the family and the payment of hired hands.

One of the phenomenal developments of the past twenty years in the necessity for a larger working capital. There was a time when a hired man would accumulate \$100 or \$200 could fit himself out for farming on a share of acre rent. For example, if one had a hundred acres of land, he could fit out a team with which he raised forty acres of corn and a proportionate acreage of other crops, for \$100.

This was the condition following the drought of 1891, when a man could buy working horses very cheap. Not only have horses advanced in price, but cattle as well, and with the price of farm machinery has not varied so much, yet more and better machinery is required now than twenty years ago. The reason for this is the advance in the price of labor and the necessity of increasing the output of farm products to be profitable. This, however, is only a small part of the working capital required.

Where one engages in stock farming he must greatly increase his working capital in the same line of stock. If he is to buy live stock to advantage, it is necessary for him to have a cash reserve, and he must not waste the capital already invested in live stock and machinery.

Where one has advanced notice that the farmer will greatly increase his working capital in the same line of stock. If he is to buy live stock to advantage, it is necessary for him to have a cash reserve, and he must not waste the capital already invested in live stock and machinery.

Wishes to announce to the people of Twin Falls that hereafter his price for Plano Tuning will be \$3.00. All work guaranteed. Mr. Dodd is permanently located here, and intends making this his home. He is a tuner with 10 years' experience, six years in the Bush & Lane Piano Factory of Chicago.

Leave orders at J. C. Bonchamps Real Estate Office in Rogerson Building. Telephone 338.

Ways of Preserving Eggs. When eggs are only required to be preserved for two or three months they keep very well packed in dry salt or bran. The meat of the egg may shrink and rattle within the shell when shaken, but it is still in good condition. Coating the egg with vasoline or butter will also keep it for a short time, or any application which effectively seals the pores of the shell will prolong the life of the egg.

If the egg is even momentarily exposed in holding wax, the albumen thereby becomes sufficiently coagulated to prevent the entrance of air. In some of the rural districts in England the Scotch eggs are made in this manner: are stuffed first with a mixture of sulphur and lampblack, a cheap and effective preservative.

## Something New and Delightful.

The ladies of Twin Falls will be delighted to learn of a place where they can buy home-cooked food. Also where they can order whole chickens for parties, avoiding the usual fuss and worry.

Lodges, clubs, etc. will be glad to know of a place where they can have a cup of tea or chocolate and a dainty lunch.

All this we are prepared to do as well to rest as to eat. We have coffee and treat-Vermont-maple-syrup every morning. We want you to visit us and see for yourself.

We serve meals only by special order. We are prepared, however, to serve you a most excellent lunch at any time. Give us your Sunday order for corn bread (white or raisin) pie, salad, baked beans or any thing you want. "THE IDEAL PLACE" 2nd Ave East.

A meeting to observe International Woman's Day will be held next Sunday evening at 8 o'clock in the Union hall. A lecture will be given discussing the economic rights of woman and her relation to the social problems of the day. Everybody invited to attend. Feb 24 pd

### SCHOOL TRUSTEES' FIRST MEETING

#### Sixty Delegates Meet in Elks Hall Wednesday.

#### PROF. SLAUGHTER OF POCATELLO ACADEMY DELIVERS ADDRESS.

Supt. T. W. Potter and O. M. Elliott actively interested in organization of County Trustees.

The first meeting of the school directors of Twin Falls county convened in the Elks hall, this city, on February 22.

Attendance was large, notwithstanding the inclement weather and bad roads, there being about 60 trustees present.

County Superintendent Potter called the meeting to order and presided over morning session. He explained the object of the meeting and appointed W. J. Turner of Piler, temporary president, and James Fitzgerald of Piler, temporary secretary.

The committee on resolutions and by-laws, recommended the temporary organization be made permanent. The program rendered was one of live interest to all educators and school authorities. The Girls' Glee club of the city schools also rendered two selections, which were greatly appreciated. Mayor Carl J. Hahn and Sec. J. P. Givens, of the Commercial club, unlocked the gates of the city and delivered the keys to the delegates in their warm words of welcome.

T. T. Davis of Buhl, and W. F. Brecken of Kimberly, made suitable responses. Prof. J. W. Slaughter of the Academy of Idaho, delivered an address on "Some phases of the conservation movement in its relation to rural welfare," dwelling on the importance of preserving the resources of our country and not needlessly wasting them. Pupils should be taught the principles of preserving the fertility of the soil, the planting and protection of trees, along with their other studies.

Supt. Elliott of our city schools, made an earnest, eloquent plea, made near school grounds, well ornamented with trees and shrubbery, and also urged the artistic decoration of the interior of schools, with proper pictures and stationery, which would be daily lessons to the pupils. Prof. Wootter of the Lewiston State Normal school, gave a splendid address on "Vocational Education in Rural Schools," covering the ground very thoroughly.

President Axline of the Albion State Normal, handled the subject of "The Great Problem of School Authorities," with his usual great thought and ability. The addresses of these professors

from the neighboring schools were of the brightest order, and were good, practical, and up-to-date. The general discussions following their remarks were profitable and interesting.

Miss S. Belle Chamberlain, state superintendent of schools, spoke on the subject of the "Responsible Trustees." Her address was right to the point in showing trustees that they had duties to perform, as well as the teachers to make their schools successful.

Dr. Purdy gave a most interesting lecture on "School Sanitation," and he delivered his shot into the school authorities, regarding the apparent carelessness existing in many schools as to good ventilation, lighting, cleanliness, etc. County Superintendent Potter intends having this address printed in circular form for distribution among the schools of the county.

Supt. J. M. Markel of Piler, delivered in his unique and eloquent manner an address on "High School Work in the Rural Schools." Mr. Markel is a speaker of great power, and possesses a fund of dry original humor, which he delivers with his goods, to the great entertainment of all.

The next school trustees meeting will be held in Buhl, on the second Saturday in March.

### TWIN FALLS VS. ALBION.

#### First Debate in Series Set For Friday Evening.

On next Friday evening at the Black auditorium representatives of the Albion State Normal will debate with the local high school debating team, the subject being, Resolved, "That the Constitution of the United States, as so amended as to provide for the election of United States Senators, by popular vote of the people." The local team, composed of Thaddeus Easton, Lyle Doversy and Rollo Crater, will take the affirmative side of the question. Much hard work has gone into the preparation of the debate, and with the aid of a number of selections by the Girls' Glee club it is thought to make the entertainment well worth the admission fee of twenty-five cents which will be charged to pay the expenses of the visiting team.

### HOTEL AT RIM ROCK.

#### Twin Falls Young Men To Establish Much Needed Road House.

A. S. Brown, C. A. Overfield and V. E. Pierson received this week a big hotel tent from Salt Lake City, and the two latter members of the firm left immediately for the rim rock. Besides their big tent the young men are taking in cots and bedding, a big range and a load of supplies, with which to establish a first-class restaurant and road house.

This is an enterprise which is badly needed as the congestion of traffic at the rim rock adds greatly to the discomfort of the trip.

Wanted—By a young man, a furnished room with a private family. Address B, care the Times, Feb 21 pd

### SALMARC MURDER TRIAL.

(Continued From Page 1.)

and testified to going out after defendant, taking him into custody, finding the body of the deceased, locating it as to exact position, etc., and searching for weapons which the deceased might have had. Practically recapitulation of testimony offered at the preliminary hearing, except that the deputy sheriff testified to having seen a circular space a short distance from the middle of the path, tramped down, and the hat of the deceased lying a short distance from this circular space, in a pile of wood.

Coroner Charles J. Walker called, and testified to the finding of the body, exact position, etc., and that in his opinion deceased had been dead but a short time when he, the coroner, got there. Also gave testimony regarding the post-mortem and autopsy held upon the body by Drs. Wilson and Clouche.

Henry Hansen, who assisted Deputy Sheriff Schindler, also called as a witness.

at that time besides Ellidge?

A. Yes sir, there was Mrs. Van Nostram, Luther Austin, and his wife and me.

Q. Anyone else?

A. Ellidge.

Q. Did you see his little girl there at that time?

A. Yes sir.

Q. What was her name?

A. I don't know.

Q. What was he doing there, if you know?

A. He was holding his little girl up when I went in the house.

Q. How long did Ellidge remain in the house at that time?

A. About 15 minutes after I was up there.

Q. Then what did he do?

A. He and Mrs. Van Nostram went up to their place.

Q. Did you see them go up to that place?

A. No sir, I saw them leave, that was all.

Q. What did you do then?

A. I was eating dinner.

Q. Did you hear any noise shortly after dinner?

A. Yes sir.

Q. Did you hear any shots fired?

A. I don't know what time it was, but I heard the shots.

Q. How far is the barn from the house, the Austin's house, and which direction?

A. I saw Mrs. Van Nostram's house.

A. Yes sir.

Q. What did you hear after you went to the barn?

A. I heard Ellidge holler.

Q. What did he say?

A. He was hollering "OH!"

Q. Did you see anybody at the Van Nostram's place at that time?

A. Yes sir.

Q. Who did you see and where?

A. I saw Mrs. Van Nostram and Mrs. Ellidge.

Q. Where did you see them?

A. In front of the house.

Q. Inside or outside of the yard?

A. On the outside.

Q. Did you see anyone else there at that time?

A. Yes sir.

Q. Who?

A. Salmarc.

Q. He was there?

A. Yes sir.

Q. What were they doing out there?

A. They were standing and walking around there.

Q. In the meantime you heard this Ellidge crying, you say, hollering "OH!"

A. Yes sir.

Q. How long did you see Salmarc, the defendant, and those two women standing in front of the house?

A. About two minutes, I should judge.

Q. Then what did they do if anything?

A. The two women went somewhere, I could not say where, and Salmarc went back like he was going to town, then he came back and came down pretty near to the barn, again, then went back and shot another shot.

Q. Now how much time intervened from the time you saw Salmarc start up the road and return and come down by the barn until you heard the last shot?

A. About ten minutes. (He said either ten or two, the answer was indistinct.)

Q. In the meantime did you hear these cries from this person?

A. Not all the time.

Q. About how often?

A. He came down and I guess.

Q. Did you hear a sound any more after the last shot was fired?

A. No sir.

Q. Did you see the defendant after the last shot was fired?

A. Yes sir.

Q. Where?

A. He came down and passed the barn. Luther Austin told me to tell him not to go to the house, because he did not want to excite his wife any.

Q. Just say what you saw and heard.

A. He came down there and said he had shot that man.

Q. Did he say what he had shot him with?

A. Yes, with a rifle.

Q. Did he have the rifle at that time?

A. No sir.

Q. Did you see him after that again?

A. Yes sir.

Q. When was that?

A. When Austin told him to bring the rifle down to the house, and he did it.

Q. Did he say where the rifle was?

A. No sir.

Q. Did you know where he went and got the rifle?

A. No sir, I don't know just where the rifle was.

Q. He brought the rifle back and gave it to Austin?

A. Yes sir.

Q. What did he say?

A. He said he was going to give himself up.

Q. Prior to that time when he came the first time without the rifle, what was he doing?

A. He said he had killed that man and he wished he had dropped him.

Q. He said he had killed that man?

A. Yes sir.

Q. And he wished that he had dropped him?

A. Yes sir.

Q. Did he had killed him with a rifle?

A. Yes sir, I don't know just where the rifle was.

Q. Austin asked him what he had killed him with and he said a rifle.

Q. With whose rifle?

A. With his rifle.

Q. Austin's rifle?

A. Yes sir.

Q. Then he returned the rifle to Austin?

A. Yes sir.

Q. About what time in the day was that?

A. About two o'clock, I guess.

Q. About what time in the day was that?

A. About two o'clock, I guess.

Q. About what time in the day was that?

A. About two o'clock, I guess.
