All Stars Fall in Land of Magicians... Boise Boys Out Hit and Out-Fielded... Locally Played Games A Few... Double Plays Helped Situation... Visitors Fumbled Badly.

The Boise All-Star team, composed of the pick of the Boise Twilight League and some players from the Tri-State League, appeared up the wicket of three games last Friday afternoon...

The game was not up to the standard of that the patrons had recently been accustomed to, the visitors not playing their best game and the home team started off in a better sort of way...

Huyck started to pitch for Twin Falls and Hal Brown for the visitors, but before the game was finished, both had been relieved, Hering taking the job for Huyck and Wigham replacing Brown...

Chapman was hit by a pitched ball, and he and N. Brown changed positions. The box score was as follows:

Table with 2 columns: Player Name and Score. Includes Boise All-Stars, Wigham, Brown, Pierce, Chapman, Wadell, Critch, Brown, Johnson, Snow, Huyck, Butler, Ansel, Wadell, Critch, Brown, Johnson, Snow, Huyck, Butler, Ansel.

PROBLEMS FOR FRUIT GROWERS

Circular Letter from Noted Association Problems for Fruit Growers

Your management has just returned from our central office at Spokane and wishes to announce to you the results of our recent visit to the grower.

It is very evident to the conditions that you growers have the largest and most complete marketing machine in existence and that this has come about solely through one man's initiative...

The competitive selling on the part of the grower is not in possession of the broad view of the market and the true situation.

The distributors are nicely installed in just such surroundings as the grower needs for the handling of his produce. A semi-public institution as this is, is most properly located in the Chamber of Commerce where a splendid display of fruit is maintained in the lobby off from which you enter our offices.

With the grower could be realized a splendid display of fruit is maintained in the lobby off from which you enter our offices.

Order after order is being cancelled because they can get Yakima peaches for 40 cents. Our market men in that area are writing orders for the cut to 40 cents in order to hold their trade.

With the soft fruit of the way the Distributors will have a better market for their produce.

SPORTSNAPSHOTS

Athletics

This is Joe Bromberg's thirteenth sweep on the circuit path and the Stetson, N. Y., distance, is still doing big stunts.

Katherine Brown, the three-year-old daughter of Capt. Al Brown of New York, the champion long distance swimmer, is creating a sensation as a fancy diver.

Both England and Germany will be represented by athletic teams at the Panama-Pacific Exposition.

Baseball

The only place umpires can find sympathy this season is in the dictionary.

Outfield Edwell, of the Cleveland Naps, is hitting with the .309 bat this season.

This year will find 24 others in the matter of security baseball fields for big league material.

Boxing

Sam McVey, the negro-heavyweight who calls himself a Frenchman, has returned from Australia to Paris and may meet Jack Johnson.

Bobby Burns, of Dallas, Tex., has signed articles for a ten-round boxing contest with Johnny Coulon, bantam-weight champion, at Omaha, September 17.

Buck Crouse, the Pittsburgh middleweight, will likely continue his pugilistic prowess in the ring hereafter. He will have three months with the chain gang in a Panama Jail to study the system. He was sentenced recently for striking an officer, who attempted to stop what proved to be a fake fight.

AEROPLANES IN HIGH FAVOR IN FRANCE

DESTROYERS ARE BEING BUILT

Novel Craft of More Use Than Mere Scouting—Valuable for Offensive and Defensive Work—Armored Flying Machines Anticipated

(United Press Dispatch.) PARIS, Sept. 5.—Aviation is to be developed by the French government on a vast scale. The general staff of the army has come to believe a capital mistake was made in regarding aeroplanes and dirigibles merely as useful for scouting when in reality they should be one of the most effective of the offensive and defensive forces of the republic.

The ministry of war has worked out a plan to organize the aeronautical troops to commands determined by the objects to be attained. Reconnaissance will continue to be important, but a large fleet of destroyers will be built to engage the enemy's air fleet. When the air is swept clear of rival craft, weapons of different types and armament can be employed against fortified positions and land forces. Dirigibles, relatively slow and heavily cradled with explosives, would find their functions.

Striking power before protection is the present formula of the aviation designers concerning armored aeroplanes. With the engines now in use it is considered impossible to burden the aeroplanes with protective plates without being compelled to reduce correspondingly the weight and efficiency of the weapons carried.

UNCLE SAM MAY LOSE BIG DUTY

ST. LOUIS, Mo., Sept. 5.—Bonded warehouses here are today crowded with foreign made goods, which are being held pending the enactment of the new tariff law now before congress. Cotton and woolen goods, fur and furs, china and glassware, and other commodities valued at about \$50,000 have accumulated here. Duty on them at the present rate would amount to more than \$300,000. Under the proposed tariff reductions the duty would be less than \$200,000. All the importers are not required to pay the duty until the goods are put on sale in the market. St. Louis merchants are planning to remain in the warehouses until the new tariff schedule is introduced.

TRIANGLE SHIRTSWAIST CO. OFFICIAL NOW ON TRIAL

NEW YORK, N. Y., Sept. 5.—Max Blank, one of the proprietors of the Triangle Shirts and Suits Company, in whose factory 147 women and girls were burned to death March 25, 1911, today went to trial in the Court of Special Sessions charged with locking the doors of his new factory in Fifth avenue. Inspector Duran of the Fire Prevention Bureau was expected to testify that he found the Triangle factory doors padlocked with 150 persons working there on August 4th.

(United Press Dispatch.) BOISE, Idaho, Sept. 5.—John U. McPherson has resigned as state horticultural inspector to become associated with the Pacific Northwest Planters' Association, which is handling the bulk of the fruit and potato crop of Idaho, Washington and Oregon.

WANTS FARMERS UNIONIZED

Pikara, Idaho, Sept. 5.—Editor Twin Falls News:— I believe it is that all roads, even the barbaric, have a union. Every trader man works for the interest of each other—and the farmer! I believe if we farmers are to exist and make a fair deal and forge ahead, we should help one another. I see by your paper that wheat and all crops are great on the Twin Falls tract. All over South Idaho it is about the same. My friend tells me that the crops at the Twin Falls Falls farm, for I am one going to see if we cannot, are finding you a sample to show to the visitors who may come into your office.

—What should be planted early and be well cultivated. It should be watered twice and the irrigator should be very careful in getting a uniform irrigation. Any crop raised must be attended to early in the spring—early plow and early plow as well as crops. It is the early crop that gets the dollars.

The building of the Western Pacific railroad to the south means more than anything else that I know of to the farmer. It means two fine markets—Portland and California. I remember when Perrine filed on 24,000 acres of land. I said to him: "What in the world are you going to do with so many acres of land without water." Mr. Hodgman, he said: "We are going to build a million dollar dam." And they did. Your fellow townsmen, Mr. Perrine, Geeser and his friends, are now crying out for help for the work he has done and is doing for the upbuilding of our state. Major Reed is the right man in the right place and I hope they just keep him right on that job and give him an appropriation with which to bring people to Idaho.

W. A. HODGMAN, GERMAN TEACHER RUNS AMUCK AND KILLS 13

STUTTGART, Germany, Sept. 5.—Thirteen people were killed and eleven injured, probably five of them fatally, by a demented school teacher named Wagner, who ran amuck in the villages of Degetoch and Mulhausen, near here. Wagner first murdered his wife and four children while they slept, then rushed to Mulhausen and fired a bullet through the window of the living of sleeping parents. When the parents rushed from the buildings Wagner opened fire on them with his revolver. Two revolvers and 32 cartridges were found on Wagner by the crowd who left him for dead to the police to pick up. Wagner is said to have spent entire days reading reports of the massacres committed in the war between the Balkan states.

CANADIAN AUTHORITIES DEPORT THAW AT ONCE

COATICOOK, Sept. 5.—The immigration authorities have decided adversely to Harry K. Thaw and his deportation has been ordered at once. His attorneys are arguing for an appeal. The writ obtained for Thaw's expulsion gives two reasons therefor: First, that he entered Canada by stealth; second, that he has been confined in an insane asylum within two years.

SATURDAY NIGHT SERMONS

By Rev. Samuel W. Pappas, D.D.

A STUDY IN MALICE.

Text—1st John 3:12-15. "Whoever hates his brother is a murderer." "Whoever loves his brother who has remained in the world, that man's love is true, and he continues to live in the Father and the Son." "Whoever hates his brother is a murderer, and his soul is not saved, neither shall he have any part in the Father and the Son." "Whoever loves his brother who has remained in the world, that man's love is true, and he continues to live in the Father and the Son." "Whoever hates his brother is a murderer, and his soul is not saved, neither shall he have any part in the Father and the Son."

Two Squares—Two Crops.

The problem of the taras is the problem of evil in the world. Nightshade, thistle, poison ivy, are among the weeds that grow in the garden. Some grow to scatter his seed. "Sons of the kingdom" were the plants. Then came the evil one, the sinner of God. By sowing his seed, he sows the devil's seed. His, violence and malevolence spring up in his path. If there be no personal devil this parable is meaningless and the kingdom of God is not in the world. If there be no devil does God do evil? Evil and devil, god and good, are strangely similar. How account for centuries of poverty and cruelty, for the millions who die and starve? It is a mighty puzzle, the enigma of the ages. In the world's field there's forever a mixture of wheat and taras. They grow in the same soil, the same light, the same water, the same heat. The heart is a Noah's ark with creatures clean and unclean—Dr. Jekyll and Mr. Hyde, the demon and the angel forever at war on our souls' battlements. The good lies not in masses, but in kind and quiet.

While Men Slept.

Yet the kingdom is positive as well as negative, favorable as well as viable. Who is asleep turns to frog and toad. There is a miracle of nature. When grass turns Samuel Hasky from sinner to saint he calls it "psychical by-larney." The "color" of the diamond changes with the angle of vision. But the other end the least of the Philistines. The kingdom of God ought to be as much concerned with "Tenderloin" as with the angels of heaven. The angels cry children and their choir surpluses. Wake up, slumbering church! There's something characteristically devilish in the expression, "while men slept." The good sower goes out in the night of the morning; the evil one waits till the sun sets. The church rests; this malignant spirit tries not. While the church slumbers over, more of baptism, style of confession, books of exorcism and occupational standing, this modern sower of taras is starting "furnished rooms" in the red light district, populating Reno, protecting "white slaves," legitimizing for the political and capital robber and selling cocaine to school children.

While parents sleep the enemy sows taras in the lives of their school children with vile literature and obscene pictures. While young people sleep the enemy sows evil habits of profanity, drink and licentiousness. While the nation sleeps the enemy sows the taras of evil citizenship. They come and they are visible warned against Sabbath breaking. Now the Generation-of-the-old rest and worship day is on the increase. Taras of every variety thrives to crowd out the wheat and the corn and the wheat and the corn. The nation's field is being sown rapidly. Souls are ruined, homes are broken up, nations are demoralized.

The Two Harvests.

"Let both grow together." Pay no attention! Ignorant was puny till Augustine noticed him. Pull up evil thistles! No; leave them alone. Try thinking good ones. They come and they are visible warned against Sabbath breaking. Now the Generation-of-the-old rest and worship day is on the increase. Taras of every variety thrives to crowd out the wheat and the corn and the wheat and the corn. The nation's field is being sown rapidly. Souls are ruined, homes are broken up, nations are demoralized.

GOOD REASON FOR HIS ENTHUSIASM.

When a man has suffered for several days with colic, diarrhoea or other form of bowel complaint and is then cured sound and well by one or two doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy, as is often the case, it is but natural that he should be enthusiastic in his praise of the remedy, and especially in the case of a severe attack when life is threatened. Try it when in need of such a remedy. It never fails. Sold by all Druggists.—Adv.

GOOD telephone service depends largely upon mutual courtesy. The telephone is more useful to those who talk as if face to face, for civility removes difficulties and facilitates the promptest possible connections. As in other intercourse, it often happens that two or more people wish to talk with the same person at the same time. Without courtesy confusion is inevitable, and the confusion is greater when the people cannot see each other. The operators must be patient and polite under all circumstances, but they will do better work if they meet patience and politeness on the part of telephone users. The Bell Telephone Service enters intimately into the social and business life of each individual. The best results come through the practice of mutual courtesy.

THE MIDDLE GROUND

In the history of the United States there have been three kinds of government—Jeffersonian and Jacksonian. One has meant just as little government as absolutely necessary, and the other just as much as was possible for the day.

The Jeffersonians insisted that if people desired to own slaves and bankers wanted to run all things money-wise, it was up to them. The Jacksonian doctrine was that it was the government's business to regulate from an extreme to the other.

THE MIDDLE MAN PROBLEM

A controversy has arisen in the market world over the use of the Society of Equity's "middle man" in the commission man. The Ducker, a Chicago trade publication, prints the following circular sent out by the society and comments thereon:

"Dear Sir: We are revising the 'Directory' of the Farmers' Society of Equity representatives. Attached in the corner below is your present list of EQUITY CHANGES. SHOULD YOU MAKE, PLEASE RETURN THE COUPON WITH NOTATIONS."

The coupon referred to reads on this whole: "New York City, John Jones Wholesale Fruit and Produce Commission Co. 25M." The 25M indicates the capital, \$25,000 and the Xa indicating the moral standing of the firm.

the existence and exploitation of the middle man. The expression "middle man" will become prominent because it is a short-cut. Two words do the work of a dozen. In baseball writing, the expression "batted" is good, because it is a picture word, not merely telling a fact, but showing a picture of the expert hitting of the batter. When the reporter calls the ball the "home" run, he has indicated a short-cut, but has found a more expressive phrase. It is merely trying to be funny. In the race for originality, he frequently becomes unintelligible. The baseball public likes a race and glowing story, but it is tired of words it doesn't understand and of posing.

THE USE AND ABUSE OF BILANO

The baseball reporter has a lingua franca of his own, which to him appears the limit of wit, humor and originality. CRYING FOR HELP
Lots of it in Twin Falls, But Daily Growing Less.

The kidneys often cry for help. Not another organ in the whole body more delicately constructed.

Not one more drop of blood to the kidneys. The kidneys are the filters of the blood.

When they fail the blood becomes foul and poisonous. There can be no health where there is polluted blood.

Backache is one of the frequent indications of kidney trouble. It is often the kidneys' cry for help.

Headache, what? Don't's Kidney Pills have done for overworked kidneys. Head what? Don't's have done for Twin Falls people.

Mrs. G. H. Hansen, New School graduate, Twin Falls, Idaho, says: Don't's Kidney Pills have been used in our family for the best of results. They have no equal in curing lumbago and all the weaknesses and disorders that go with kidney complaint.

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

LIKE A GREAT CROP
Fred A. Moore bought 150 acres of land here and found that he had a large amount of timber and that some of the property for \$150 per acre. Mr. Moore decided that forty acres, if properly handled, would pay better than a quarter section. He has 30 acres of this land in Idaho. This year he threshed out \$2,000 worth of seed from the 30 acres. He has the other 100 acres in potatoes.

Mr. Moore practiced what is called "suburban" farming. He made a practice of taking the morning train to his ranch, to see that the water was running all right and was not fouled up the evening train. Aside from water, irrigation, care or attention. A thousand dollars a year is a mighty high salary to pay. Allowing Mr. Moore this amount, it leaves him \$1,500 for interest on his investment, \$500 for taxes—and the ten acres of potatoes ought to be good for another \$1,000.

C. L. Rea went to Burley Tuesday.

PERSONAL

STYLEPLUS CLOTHES AND GOOD WAY OF SELLING THEM

Strous & Glauber have an interesting announcement in the advertising columns about Styleplus clothes. There is nothing superior in the way of men's wearing apparel. The Styleplus is manufactured in the east, where nearly all the clothing of the world in this part is manufactured, and where there is close competition. The Styleplus sells here as everywhere else at \$17 the suit. There is no rise in the price of Styleplus after you cross the Rocky mountains. The quality, too, is just the same high standard of excellence as in the east. Strous & Glauber are

the exclusive agents in Twin Falls. Their store is beautifully stocked at this season with a wealth of fashions and dependable merchandise for men, including shoes and furnishings, as well as clothing.

They are advertisers with something to say that makes an impression, for instance, their place of business being known by the slogan, "The Store of Clothing Economy—the Styleplus Store in Your Town." It is always a pleasure to commend the merchant who advertises and is not afraid of the light.

Mrs. Jack White, of Dubl, is visiting her sister, Mrs. Fred Bacon, up at Idaho Falls.

Raising Sheep on High Price Land

University Man Gives Instances Where \$42 an Acre Rental is Paid by Sheep Men for Pasture—Gooding Experiment Station, Rangas, Seven Head per Acre

The following question is by a King Hill, Idaho, man, and the answer is by Prof. E. J. Tidings, of the state university: "Can sheep be profitably raised on alfalfa pasture, land being worth \$100 per acre and capable of producing 4 tons of alfalfa hay per acre? How many sheep will 20 acres of such pasture carry during the summer? I am to have the lambs come in February or March. What breed of sheep is best suited for wool and mutton? What grain about the feed with the alfalfa hay to the ewes during the winter time? How much hay per month should each ewe require? I presume the lambs could be sold in July or August."

There is little question but that sheep can be profitably raised on land worth \$100 per acre. A new mixed grass pasture of one-half acre on the Gooding station farm carried six Lincoln rams during the summer of 1912 with some grass to spare. On a 30-acre mixed pasture of principally timothy and orchard grass in the Boise Valley in 1911, Geo. V. Leighton turned in 475 ewes and weathers and 176 lambs. With frequent irrigations this pasture was able to carry this number of sheep. Mr. Leighton received 1 cent per day per head—equivalent for a minimum pasturing season of 100 days to \$42 per acre for the use of this pasture. No labor other than irrigation was required. The above pasture was, of course, retained on the land.

We are advising mixed rather than alfalfa pasture for the southern Idaho section for the reason that unless sheep are carefully handled on alfalfa pasture losses will occur from blight. Thirty acres of irrigated pasture, judging from results at Boise and Gooding, will carry 500 to 600 head of ewes and lambs. Irrigations should be given as frequently as the conditions of the soil permit.

There is handling a small band and has adequate facilities for taking care of the ewes at lambing time. February lambing will be successful. Unless shelter can be had ewes should not be bred to lamb earlier than April in most sections of southern Idaho. The time at which the lambs are sold depends on the location and feed conditions. When pasture is good on the farm a legal butcher will often take the lambs in July and August. On the range the fatter and bigger lambs are cut out for shipment in September.

Very few sheepmen in the state feed grain to ewes along with alfalfa hay. Oats, barley, or both, combine well with alfalfa and are excellent for pregnant ewes. A one will eat 40 to 100 pounds of hay per month, depending on her size, the quality of the hay and whether she has other feed or thaugha from pasture or field in addition.

On the range grade Merino ewes are popular and on them are used neither middle-wool or long-wool bucks.

National Guard on Regular Pay Roll

Men to be Paid for Time Put in Drilling and at Encampments—Will Result in Full Company Enlistment and High Degree of Efficiency—The Amount of Compensation Depends on Rank

WASHINGTON, D. C., Sept. 8.—There is every prospect that the bill authorizing 5 per cent regular army pay for all members of national guard companies who do not miss any drill nights will be passed. Lieutenants and some of the higher officers draw 30 per cent. The head officials do not draw any compensation.

TELEPHONE FIRST AID IN FIGHTING FOREST FIRES

DENVER, Colo., Sept. 6.—Nearly \$2,000,000 is being spent this year by the forestry department to provide additional facilities for the prevention of forest fires by extended the present of the government and building new ones. The telephone is playing an important part in the modern fighting of such fires. Such arrangements parties and other volunteers in the mountains set fire to valuable timber and facilities are needed for massing the fire-fighting forces of the government on short notice.

The appropriation this year for the government work is to provide the present forces with additional wires and lines of telephone in all directions through the government preserves. The expense of providing these necessary safeguards will be saved many times each season. It is said by the prevention of the spread of fires which can easily be stamped out after their inception, but which are almost impossible to check when once they get under way and are fed by the winds which spring up and fan them into fury.

The telephone comes into use when smoke is seen by day or flames by night, both by notifying the forest rangers and assembling and directing the forces which fight fire. Sometimes several fires are burning in the forest at the same time and it is imperative that some means of communication be at hand to distribute the available fire-fighting force where they are most needed. The forestry department of the government has arranged to connect these lines with the system of the Mountain States Telephone and Telegraph Company, which operates 600 exchanges throughout the mountain region, thus adding to the value and enabling that company to serve thousands of people who have never before been in touch with the outer world except by slow means of communication.

SPEAKER CLARK'S FAMILY BUSY

WASHINGTON, Sept. 5.—While most Americans are enjoying summer and vacations or contemplating the good times they had on vacations already over, Speaker Champ Clark and his family today are busy with the duties and have been all summer. Besides his work in congress Speaker Clark spends several hours daily working on Chautauque addresses. He has a number of "stock" addresses, but he always believes in "producing" several new ones every year. In the meantime Mrs. Clark is busy writing her autobiographically and memoirs of Washington. Bennett Clark is studying law at a summer school and Miss Genevieve Clark is studying music abroad. Young Bennett has to find time for his law studies when he isn't acting as house parliamentarian, which position he holds.

RYE CROP THAT TIES DOWN SANDY SOIL

WENDELL, Idaho, Sept. 8.—The rye-and problem is settled for keeps. The sandy soil is warmer than the heavier soil and alfalfa grown on it matures a week or ten days earlier. The old adage "Great big letters in sandy lanes of hold true today as liquid in times gone by. The most different potatoes are grown in the sandy soil and when amid calamities, such as the afflicted Greeley, Colorado, strike a Greeley, the sandy soil, owing to perfect drainage, is less likely to suffer.

Once set in sandy soil, rye thrives, and when the grain is cut, leaving a high stubble, there is fine protection from the wind. Alfalfa sown in the stubble furnishes additional protection and, once alfalfa is well set, the

REMINGTON UMC

Steel Lined SHOT SHELLS

Cut down your load—Get your bird with the center-of-the-load

[In the making of shotshells, the greatest forward step since the invention of smokeless powder is the steel lining which the powder and wad occupy all the drive of the ammunition back at the shell.

It's a Remington special invention—that steel lining. You find it in Remington-UMC, Arrow and Jive Club. These steel lined shells get their shot to the target quicker than any other shells known to the shooting fraternity. They cut down the green-work almost dead and explain. They put the center of the load right on your bird.

The steel lining in Remington-UMC shotshells can get down. In-proof—no empty is lost. Shoot Remington-UMC Arrow and Jive Club Steel Lined Game-Factory Loaded Shot for Small Fowl in any make of shotgun. Your dealer carries them—or, if he doesn't, there's a news agent store in this section who works your business.

Be Happy!

Happy the girl, or woman, who has never suffered from any of the diseases of womanhood! Or, if she has been a sufferer, happy is she if she has learned of the wonderful benefits of Cardui, the woman's tonic!

Cardui is a gentle, tonic remedy for women's ailments. It is a natural medicine—safe, harmless, purely vegetable. It has been in successful use for more than 50 years. It has cured thousands. It should do the same for you.

TAKE The CARDUI Woman's Tonic

Mrs. Mary Neely, of Denver, Tenn., says, "I think there is no tonic on earth, as good as Cardui. I used it with the very best results. I had backache and nearly everything a woman could suffer with, until I took Cardui. Now, I feel better than I have for two years. I shall always recommend Cardui to other suffering women. I can't praise it too highly. As a medicine for weak, tired, worn-out women, Cardui is safe and reliable. Try it, today."

JARDINEE

July 20, 1905, Sept. 2... C. W. Mitchell, owner of the Blamond ranch, came into Jardinee with his large touring car. Mr. Mitchell informed the writer that he was preparing to make very extensive improvements in this locality, one of which was to build a wagon road so that he would have access to the Twin Falls and Boise roads at a point of supply for flour, oats, and food stuff that tract was unimproved... Joseph O. Horn returned from Connecticut, Nev. and will at once open his assay office... Geo. Hiddle and Frank Hiddle arrived in town today. Frank was one of our pioneers here and is welcome here... Mrs. Rankin and wife has returned from a prospecting trip. William reports his health much improved... I. L. Foman, the veteran mining man of Andrews, Oregon, arrived in camp today. He intends making a careful study of conditions here. Mr. Foman is an experienced mill man and assessor... A. Fox, of the Cocur d'Alene-Jardinee M. & L. Co., is in camp making preparations to do development upon the property... Clifford McCormick departs in a few days to take a preparatory course in mining and engineering in one of the eastern universities... R. P. Chaffin, the well known capitalist and mining man of Mountain Home, Idaho, arrived in camp this week... Mr. Chaffin is a good judge of "stocks" and has had rather a successful quite a pile. Yet, from the way one of his pockets aigs, we should judge he did not dip into those found in Jardinee... Dr. Moore, E. H. Russell and C. Parker, all of Elko, Nev., came in camp by auto. They expect to make a one week stay... Roy and Richard Hodges, in control of the Flaxie mine, arrive to inspect the property and meet the minor owners in consultation as to future development. The Flaxie mine is one of the big things of Jardinee... C. W. Benick of Cripple Creek, Colo., has arrived in camp. Mr. Benick is connected with the Ajax mine at Cripple Creek, and this is his second trip here. He is non-committal but he looks well. His address is don't get discouraged boys—Cripple Creek passed through your same experience... We were glad to welcome to our camp the party from Cripple Creek, consisting of Geo. B. Williams and Wm. C. Arthur, superintendent of the Humboldt reserve; Geo. Baker, Wm. Bailey, E. Cross, and the Misses Williams and Arthur. They made a jolly crowd... Jerome Helay, the well known sheep man of Three Creeks, arrived today to visit his friend, John Molley. Mr. Helay is one of the principal owners in the local telephone line... The owners of the Little Devil group of claims are shipping out about fifty sacks of high grade ore this week... John A. Jess is at Rogerson, superintending the loading of his mill and equipment, which will soon be installed upon the Alpha property... The Legitimate has opened up a line body of ore and the owners expect to do some very extensive development this fall... D. Marquand departed for Elko and Salt Lake to make purchase of equipment... Owners having annual work to perform would do well to write to The Jardinee Improvement Co. and get work done that goes to increase the value of their property... Twin Falls a Good Town...
