

# WAR WILL SHOW GREAT VALUE OF OUR MINERALS

### Secretary Lane Says United States is Independent of the World.

## RESOURCES ARE NEGLECTED

#### Raw Materials for Fertilizers and Steel and Other Industries, Hitherto Imported, Are to Be Found Within Our Own Borders.

Washington.—A direct benefit to the United States from the European war will be its effect in raising the price of the country's minerals to a greater extent than the value of its mineral resources," said Franklin K. Lane, secretary of the interior, in an interview. "It is entirely possible to so utilize these resources as to make the United States become familiar in its own and foreign markets."

"Of an importance second only to that of the food supply is the supply of mineral products necessary to the requirements of twentieth century civilization. One of the first effects of the war has been to make us realize the interdependence of nations in the matter of food supply. Most of the countries here at present are dependent upon importation of foodstuffs, and we have cause for self-congratulation in the United States that we are able to feed ourselves. What we possibly have not so fully realized is that we are nearly as independent in the possession of essential mineral resources, and that the interference with manufacturing, caused by interruption of the flow of importations of many necessary raw materials, may be overcome almost wholly by development of neglected resources in our own country."

"Do you mean," Mr. Lane was asked, "that the United States can make itself independent of the rest of the world in its manufacturing?"

"Very largely," asserted the secretary. "The main difficulty to be overcome are in the rearrangement of the distribution system necessary to establishing this independence. Industries established along certain well-marked channels, and usually follow the line of least resistance. It has been easier, and perhaps cheaper, to import mineral products and materials from other countries than to go to the trouble and expense of developing our own resources of the same nature. Forced to the latter course by suspension of commerce with other countries, I believe that American enterprise and energy will almost at once turn to the development of the native resources, rather than permit production to lag and supply to be diminished in any industry."

### As to Mineral Fertilizers.

"For the maintenance of agriculture, for instance, we rely more and more largely upon mineral fertilizers. The three essential plant foods are potash, nitrogen and phosphorus, the latter used generally in the form of phosphate. We have in the United States the best of the world's supply largely upon the mines of Germany for our supply of potash salts, and war has cut off this supply, but we have large deposits in California and Nevada which can be immediately opened and developed if a bill now before congress to make them supplier available is enacted. Chile holds a practical world monopoly of the most readily available nitrate for the great nitrate industry, but the manufacture and use of agricultural fertilizers but also of many kinds of high explosives has been made dependent upon the Chilean supply of nitrates. If this supply should be cut off, a new supply would have to be developed by the manufacturer and agriculturist would suffer. Fortunately this new supply is at hand. We can draw nitrogen from the air and fix it with lime by the use of large quantities of electrical equipment, as is done at Niagara Falls and in Norway, and all that is necessary to pave the way to this electrical development is the passage by congress of the Ferris bill now pending, which will make available the utilization of the great amount water power of the western states."

"The southern states have for years largely supplied the world with phosphates, but because of the distribution system a large part of this supply has gone to Europe, and much of the phosphates used in the western states have been imported across the Pacific. We have some 2,000,000 acres of phosphate lands in the West lying near the surface, from which is produced the sulphuric acid now necessary to convert these phosphates into form available for plant food, and still there is no law by which these phosphate deposits can be made completely available. Although a bill which would allow of their immediate development has been favorably reported."

### Manganese and Other Metals.

"What other industries are there now dependent upon the products of other countries, which can be made independent?" Mr. Lane was asked. "The steel industry, for one," he replied. "Manganese is of large importance to this industry, and the largest supply of ore comes from Russia and other countries with which commerce is now paralyzed. There are large de-

posits in South America, which have not been developed, but it is not necessary even to go so far afield as that. We have great stores of manganese in this country which have not been developed because it is somewhat inferior in quality. To bring this home supply into use means merely adoption of methods for its purification, which are known and can be successfully used, and then we can continue making manganese steel without regard to foreign wars or sources of material. There are other international contributions, though, in the steel industry. We have depended largely upon the island of Ceylon for the graphite used in the manufacture of the crucibles in which crucible steel for edge tools and small firearms is made. Or to take another metal, tungsten simulators, using in part Chinese and Mexican ores, have in the world's supply of antimony, which is used in the manufacture of type metal, and also molybdenum. War has paralyzed the production of antimony in England (at Newcastle), and prices have gone up. Antimony, however, is easily extracted from many low grade ores which we have in great quantities in at least seven states, and there is no reason why we should not make this extraction and be independent of other countries both as to supply and price. Similar conditions hold in the case of arsenic.

"A large hoarding of ferromanganese alloys comes from Germany and England. It is only in the last ten years that we have freed ourselves from Sicily's monopolistic control of the sulphur supply. Flint pebbles are common and the supply large in quantity in the United States, but for such an apparently unimportant product as this, used in the fine grinding of cement and ores, we have been depending upon the chalk cliffs of England, Denmark and France. Great mines of this depend almost wholly upon the tramp steamer, a carrier of foreign passage. Now the tramp steamer has been taken to cover, and all kinds of ocean freight, especially low grade freight, will be high up and its carrying almost entirely suspended during the war."

### Interruption for Industries.

"Will this suspension mean disaster to our industries?" "Not disaster, but inevitable interruption to some extent," replied Mr. Lane. "It means that suddenly materials upon which great industries depend must be obtained from other sources. Importers, consumers and manufacturers are making anxious inquiries as to where they may find in the United States supplies of certain materials to replace the foreign supplies now shut off. This is the opportunity of the United States to free itself from dependence of its industries upon other countries, and business men are awakening to this fact. They look to the government for aid in finding new sources of material with which to keep the factories open and in operation. When they have found the domestic supply and begun its use, they will not return to dependence upon the foreign supply, and thereafter good or bad times in the United States, so far as the material needs of industries is concerned, will be more independent of foreign complications."

"What is the government doing to aid industry in these matters?" "All it can do under present laws," replied the secretary. "The nation's greatest natural resources are a part of the public domain, and under the charge of the interior department. The annual reports on the mineral resources of the United States, published by the United States geological survey for the last 30 years, contain not only statistics of yearly production of all commercial minerals, but also useful facts regarding the occurrence, explanation and application in the arts and sciences of the various minerals of the country. The geological survey has been instructed to furnish upon request the addresses of producers from whom buyers can supply their wants if the mineral is produced at all in the country of interest. In this regard the industry where reported deposits are undeveloped. In some instances large areas remain undeveloped simply because of the fact that adequate maps have been given to the geological survey, and with the lower ocean freights an advance over domestic producers shipping by rail."

## HUMOROUS SIDE OF THE WAR

### Officer of German Tank Steamer Leda Caused its Capture by His Amateur Wireless.

New York.—Details of the capture of the German tank steamship Leda, bound from Rotterdam to London, by the British cruiser Suffolk and private by passenger on board the Leda, show the war has its humorous side. According to the passenger, the capture of the Leda was effected through one of his own officers, who innocently gave the whereabouts of the vessel to the British.

The Leda is not equipped regularly with wireless, but this officer had rigged up an amateur set of 100 miles range from Bermuda on August 3. That morning the wireless amateur began calling "CQ," the signal meaning "All ships, attention." The operator on board the Suffolk, realizing in the vicinity, heard the call and getting in communication with the Leda's nationality and position. At once the German answered, giving his name and his morning position. Within two hours the Suffolk ran alongside and ordered from British and to stop. She then captured the German vessel to Bermuda.

## SIR JOHN FRENCH

Field Marshal Sir John French who commands the English forces sent across the channel to help the French and Belgians against the Germans.

## HANGED IN EFFIGY

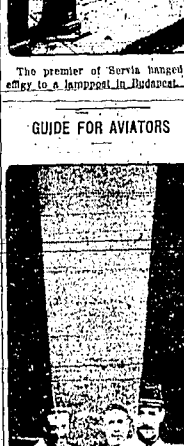

The premier of Serbia hanged in effigy to a lamp-post in Belgrade.

## SERBIAN RED CROSS NURSE

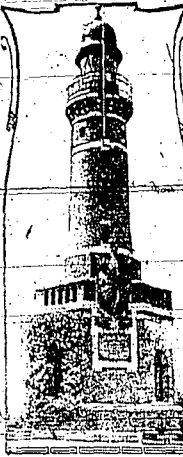

Serbian women tend all walks of life have joined the Red Cross.

## GUIDE FOR AVIATORS

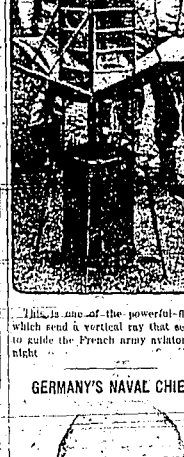

Germany uses a Mauser rifle with a bullet of 3 mm. caliber, steel and copper coated, a great Britain's missile is the Lee-Enfield, caliber 7.7 mm., and was the same, copper-jacketed.

## KIEL HARBOR LIGHTHOUSE

The extinguishing of this light might enable the German fleet to slip by the British fleet, which is supposed to have been waiting to engage the enemy outside of Kiel harbor.

## GERMANY'S NAVAL CHIEF

Even Russia, which made a sad mistake in the war with Japan, now has learned her lesson and has efficient surgical arrangements.

## GOOD-BY TO WIFE AND BABY

## MONKS DON FRENCH UNIFORMS

Paris.—The French state that all the Carthusian monks in military uniform who were expelled from France at the time that the law restricting religious associations was adopted have returned to the barracks at Grenoble and exchanged the white habit of the Order of the Hermit for the uniform of the French soldier. They were given an enthusiastic reception by the population of Grenoble.

## AMERICAN BUSINESS AND THE WAR

By DEAN JOSEPH FRENCH JOHNSON

Loss. 1. Opportunity to increase the profits and banking connections of America in international finance.

2. Opportunity to secure a larger share of this trade.

3. Sale of foodstuffs and other supplies at high prices in European markets, resulting in prosperity to producers of these goods and to those producers which enter to those products.

Profit.

1. Opportunity to increase the profits and banking connections of America in international finance.

2. Opportunity to secure a larger share of this trade.

3. Sale of foodstuffs and other supplies at high prices in European markets, resulting in prosperity to producers of these goods and to those producers which enter to those products.

# WAR MORE HUMAN REWARDS OF VALOR

## Army Sanitation and Surgery Are Now Far Advanced.

Americans and Japanese Have Been the Leaders—Modern Weapons Have Much to Do With the Change.

### By U. S. ARMY SURGEON.

(International News Service.) In the American Civil War eight soldiers died of disease to one from wounds. Experts expect that in the present general European struggle not a single man will fall victim to sickness to one killed on the field of battle.

Such is the advance of army sanitation and army surgery in 80 years. The Americans and the Japanese have been the leaders. The United States army hospitals have installed many remarkable innovations since the Spanish-American war with its dread lesson in the danger of typhoid. These new ideas have been adopted by the army surgeons of the old world countries.

So it is expected that the present war, the greatest yet in history, also will be the most humane. There will be no "disproportionate" mortality that from disease and no army of cripples as a direct result.

The modern, high-power, quick-drawing military rifle and the development in artillery will have much to do with the change. Those who die will die more quickly. Gangrene and infection will be practical unknown quantities, it is thought.

Before the Russo-Japanese conflict the armies of the world over used a high caliber bullet, made of unjacketed lead and great velocity caused friction in the barrel. The muzzle velocity was less than half that of the missiles now employed.

Then, too, bayonet and saber charges were more common. These resulted in hideous wounds very difficult for surgeons to handle.

The bullets which are flying in Europe today are of less diameter than the ordinary lead pencil. They are jacketed with nickel, lead or steel, and have tremendous velocity. The soft, muscled bullet of the old day resulted in the shattering of bones and the crushing, rather than cutting, of tissues. Infection was almost inevitable, the greatest help being palliative, mainly. A wound in the abdomen was considered necessarily fatal. The death rate among the wounded was enormous.

In recent campaigns there are instances where soldiers slept in what were once considered fatal spots, have walked unscathed to the field hospitals.

Germany uses a Mauser rifle with a bullet of 3 mm. caliber, steel and copper coated, a great Britain's missile is the Lee-Enfield, caliber 7.7 mm., and was the same, copper-jacketed.

The French weapon is the Lebel rifle, of 8 mm. caliber, with bullets coated with nickel. Russia uses Mosin-Nagant rifles, caliber 7.62 mm., with bullets copper-jacketed. Austria's bullet small arm is the Mannlicher, caliber 8 mm. with a steel sheet over the tip of the bullet.

Hitting a man beyond 500 yards the wounds inflicted by all these bullets are clean cut. They frequently pass through bone without splintering. When passing an artery the bullet usually pushes it to one side and goes around without cutting the blood channel.

Amputations, etc., very rare—compared with wars of more than fifty years ago. A bullet would shatter a joint, such as the knee or the elbow, then necessitated the amputation of the limb. Now such a wound is easily opened and dressed.

Even Russia, which made a sad mistake in the war with Japan, now has learned her lesson and has efficient surgical arrangements. All the nations use vaccine to combat typhoid, the scourge which once decimated camps and killed 1,000 in our Spanish war.

Next to typhoid, dysentery is the great army scourge. This is attacked by sterilizing the drinking water.

## Monks Don French Uniforms.

Paris.—The French state that all the Carthusian monks in military uniform who were expelled from France at the time that the law restricting religious associations was adopted have returned to the barracks at Grenoble and exchanged the white habit of the Order of the Hermit for the uniform of the French soldier. They were given an enthusiastic reception by the population of Grenoble.

## Crosses of Honor Will Be Won in the European War.

England, France and Germany will show These Testimonials of Daring Performed by Officers or Privates.

### By EDWARD B. CLARK.

Washington.—Some of the soldiers of England, France and Germany in the present war undoubtedly will win the crosses of honor which are the most coveted decorations that governments give for acts of extraordinary personal gallantry in the face of the enemy.

To Americans perhaps the French Cross of the Legion of Honor will be the most familiar. It was first instituted by Napoleon in 1804. The United States has the Congressional Medal of Honor which is given by congress for individual deeds of gallantry in the field. The title of one of our highest medals is about equal, and yet for the privilege of seeing long lines of soldiers seem always ready to tread "gray" paths of glory.

The French—decorated only by Napoleon in 1804, the highest of the present century, the Victoria Cross was instituted during the Crimean war and the American award of honor was first struck off to a war act of heroism performed during the Civil war. The French Medal of Honor which the English and American crosses planned only upon the brains of officers and sailors. In the words of a peasant and prince, "The chances of wearing that which can be lost but attested bravery can be given." The first Victoria Cross was given to Colonel James R. S. Gordon Highlanders, for exceptional gallantry at the battle of Tala-siange.

A portrait of the Victoria Cross tells which of the deeds for which the Victoria Cross has been awarded shows that it is probably the most striking exhibition of heroism have been shown by any man since the days of the Crusades. The first Victoria Cross was given to a man seventy-two years old, who was 57 years of age at the time he was awarded the Victoria Cross, and he had the right to write V. C. on his name. The first Victoria Cross was awarded to a man of 57 years of age at the time he was awarded the Victoria Cross, and he had the right to write V. C. on his name.

That drummer boy, if it were a man seventy-two years old, who was 57 years of age at the time he was awarded the Victoria Cross, and he had the right to write V. C. on his name. The first Victoria Cross was awarded to a man of 57 years of age at the time he was awarded the Victoria Cross, and he had the right to write V. C. on his name.

It was another British drummer boy who, while acting as a field guide for Lord Napier of Magdala in the Abyssinian war, lost the general's eye and dashed first into the stream of "Theodoros the Tyrant."

It would seem that by common consent the British authorities give the palm for surpassing bravery to a private named Baranagh, who succeeded in reaching Colin Campbell's army and by killing of the first British soldier, spurred the advance of the British army. Baranagh was wounded at the battle of the Tigris. The band of devoted men, with the women and children who were cooped up at the mercy of 60,000 Soudanese, were rescued by a British soldier who was wounded at the battle of the Tigris.

## Local and Personal

A. N. Sprague spent Tuesday in Twin Falls—Burley Advocate.

Olsen L. Cox returned Saturday from a short trip to Salt Lake City.

Ward Johnson returned Friday noon from a short business trip to Murtagh.

J. W. Vernehr, the reporter-merchant transacted business in Twin Falls Saturday.

C. F. Howell, of Twin Falls, visited his mother, Mrs. J. B. Breese, Sunday—Burley Advocate.

Mrs. J. H. Breese went to Twin Falls on business—Burley Advocate.

Mr. and Mrs. Sam Johnson and Mrs. M. L. Allen made a trip to Hault and Twin Falls Monday—Hagerman Sun.

Clifford Bentley, a rancher living south of the city, returned Friday from a business trip to Boise.

W. R. Priebe, O. S. L. watch inspector, returned Friday noon from a trip to inspection on the Wood river branch.

Marlin J. Sweeley, candidate for the Republican nomination for lieutenant governor in Nampa Friday—Nampa Leader-Herald.

G. C. Leighton returned Friday from a vacation trip, which he spent in the middle west, visiting his parents in Nortonville, Kansas.

Case Rice, owner and manager of the Isis theatre, returned Saturday noon from Salt Lake City, where he spent carnival week.

Miss Olla VanMeter, of Twin Falls, was in Burley the first of the week for the first of the family, the Rev. Shoemaker—Burley, Hilditch.

Mr. and Mrs. A. K. Keop, of Britton, were in Albion, the latter part of last week enroute from a visit with relatives in Twin Falls—Albion Nugget.

Joseph Kries was doing business in Hagerman part of last week. Mr. Kries is connected with the New Idaho road to be built from Twin Falls to Hagerman—Hagerman Sun.

Mr. Chas. Muir, the new principal of the Heyburn school, arrived here from Twin Falls Tuesday, taking his residence at the Jordan home east of the city—Heyburn Review.

The next regular meeting of the Twin Falls chapter O. E. S. will be held in Maacale theatre, Tuesday, September 8th at 8 p. m. A full attendance is desired. Visitors welcome.

Miss Liberty, who is at the head of the domestic science department of the Twin Falls schools, arrived in the city Friday, to make preparations for the year's work in her department.

C. H. Dowman, the new principal of the high school arrived in Twin Falls Saturday from Chicago. Mr. Dowman has spent the past year doing graduate work at the University of Chicago.

John MacIntosh left this morning for several days' business trip, which will include visits to Twin Falls and Boise. On his return he will go to Chicago for a few days—Idaho Falls Register.

Mrs. Gertrude Kinney, formerly a teacher in the Twin Falls schools, arrived in Twin Falls Friday for a visit at the home of her brother, Ed. Kinney, of the Kinney Wholesale Grocery company.

Carl Stradley, chief engineer of the Oregon Short Line, came up from Salt Lake City, Wednesday, in his special car. He was accompanied by the chief consulting engineer for the whole Harriman system, who is out from New York City, looking over the Union Pacific branch there.

Pete Holahan, formerly a resident of Twin Falls, but now living in Portland, is shaking hands with his many friends in this city. Mr. Holahan is one of the crack shots of the country; and his visits to Twin Falls are always welcome to all his admirers, because they are all his personal friends.

Walter Dufresne, Albert Putnam, Mrs. A. Dufresne, Miss Pearl Dufresne, and Miss McKnight of Twin Falls, who have been camping out on Warm Springs creek, about the Guyer hot springs, near Tripoli, the city, yesterday afternoon, on their way home. They are traveling in a Hudson car—Haley News-Miner.

H. H. Humphrey, of St. Louis, Mo., is a guest this week at the home of his brother, S. S. Humphrey, of this city. Mr. Humphrey is a consulting electrical and mechanical engineer of St. Louis, and his special trip was made for the purpose of seeing the new water tower at the Waterbury building, in Salt Lake City.

Mr. and Mrs. F. F. MacGregor are in the city from their home in Kimberley.

Mrs. H. H. Schilman and Mrs. Dan Connor, of Filer, were shoppers in the city Tuesday.

Manager Korn, of the Jenkins store in Burley, spent Sunday in the city visiting friends.

Mrs. Florence Neer in enjoying a visit this week at Miss Pearl Kealey, of Idaho.

Oils M. Van Tassel was in the city Saturday from his home in St. Anthony on a business trip.

Aubrey Cox returned Monday noon from a business trip to Salt Lake City, where he spent carnival week.

Mr. and Mrs. J. Stimpel returned to their home in Burley this morning after spending several days in the city.

Curtis Turner, receiving clerk at the Twin Falls Bank and Trust company, returned Sunday from a vacation to Kansas City and Denver.

The Misses Fern and Florence Castello returned home Saturday from Albion, where they have been attending summer school at the State Normal.

Miss Katherine Ford, who has been in the city a guest of Mrs. M. M. Murtagh, during the summer, left Friday evening for her home in Salt Lake City.

Roy H. W. Parker, district superintendent of the Methodist church, returned today from a trip which took him to Dillon, Montana, Salmon City and other points in northeastern Idaho.

A. E. Roberts and family accompanied by Miss Marielette Putnam, returned Sunday from Salt Lake City, where they spent carnival week. The trip was made overland in the tobacco car.

The Albion and clover seed crops, it is estimated, will add a million dollars to the wealth of the Twin Falls country this season. The average value of each acre crop is placed at \$46—Fairfield Sun.

Mr. and Mrs. Ivan Price and son, Vaughn, and Mr. and Mrs. Franklin Brown, all of Kimberley, arrived here Tuesday morning in Salt Lake City. They went by car and expect to be gone a week or ten days.

Marlin J. Sweeley, of Twin Falls, republican candidate for the office of lieutenant governor subject in Tuesday's election, was in the Perry Wednesday. He was accompanied by Mrs. Sweeley—Glenns Ferry Gazette.

Will Brubaker was taken very sick Friday. He was taken to Twin Falls that evening where it was deemed best to operate before morning. According to last reports, Mr. Brubaker was improving quite rapidly—Burley Advocate.

Quite a number of people from the Twin Falls area have been attending through here the past week enroute to the Wizard's Round-up at Salt Lake City. The Allison-Strevell-Brigham city group for the week left for the Utah capital—Albion Nugget.

George D. Saviers, of the Times, accompanied by Miss Stetler Putnam, returned Sunday from a vacation trip up into the Sawtooth. Part of the time was spent at the home of Mrs. Saviers' parents in the city. Mr. Saviers and Mrs. Saviers report a splendid outing.

Robert J. Leth, of Twin Falls, who spent the summer at the Experimental farm, left for his home Sunday morning. After a few days at his home, he was accompanied by his family for a short outing before he returns to the University—Gooding Leader.

Carl Stradley, chief engineer of the Oregon Short Line, came up from Salt Lake City, Wednesday, in his special car. He was accompanied by the chief consulting engineer for the whole Harriman system, who is out from New York City, looking over the Union Pacific branch there.

Pete Holahan, formerly a resident of Twin Falls, but now living in Portland, is shaking hands with his many friends in this city. Mr. Holahan is one of the crack shots of the country; and his visits to Twin Falls are always welcome to all his admirers, because they are all his personal friends.

Walter Dufresne, Albert Putnam, Mrs. A. Dufresne, Miss Pearl Dufresne, and Miss McKnight of Twin Falls, who have been camping out on Warm Springs creek, about the Guyer hot springs, near Tripoli, the city, yesterday afternoon, on their way home. They are traveling in a Hudson car—Haley News-Miner.

H. H. Humphrey, of St. Louis, Mo., is a guest this week at the home of his brother, S. S. Humphrey, of this city. Mr. Humphrey is a consulting electrical and mechanical engineer of St. Louis, and his special trip was made for the purpose of seeing the new water tower at the Waterbury building, in Salt Lake City.

J. H. Ivey, of Jerome, was a business visitor in the city Saturday.

Charles Dunn, of Kimberley, transacted business in Twin Falls Monday.

A. L. Sent of Gooding, was a business visitor in the city Monday.

H. M. Sims, editor of the Hollister Herald, and Twin Falls a business visit Monday.

Banker H. W. Craven was a business visitor in the city for a short time Monday.

Dr. Charles Wetherbee and wife were in the city Monday evening from their home in Butte.

Attorney and Mrs. J. C. Rogers were in the city for a day of the week from Burley.

J. H. Pinkston, of the Three Creek country, is in the city today looking after business affairs.

R. H. Kendall, of the Murtagh neighborhood, was a business visitor in Twin Falls Saturday.

A. J. Dermid, the postmaster, of Kimberley, was a business visitor in the county seat Saturday.

David Barrett, of American Falls, transacted business in Twin Falls for several days of last week.

J. N. Helsby, of the Three Creek country, is in Twin Falls today looking after business affairs.

C. A. Terhune, of the Book Store pharmacy, of Burley, transacted business in Twin Falls Friday.

Former State Game Warden O. H. Barber, was in the city for several days of last week on political business.

H. A. Brown, one of the well-known trappers, was in the city for several days of last week on the trail.

N. Mackay, of the Rogerson neighborhood, transacted business in the city for several days of last week.

Mr. and Mrs. C. E. Holdeman were shopping in the county seat for a day the middle of the week from Hollister.

Mrs. E. R. Holt left Sunday evening for Carlisle, Illinois, where she will visit with relatives for the next thirty days.

Mr. and Mrs. R. C. Cleaden were visitors in Twin Falls for a day or two of last week from their home in Rogerson.

Victor O. Johnson, one of the prominent attorneys of Lincoln county, was in Twin Falls Friday from his home in Shoshone.

Mr. and Mrs. Fred McCoy, of Seattle, Washington, left Friday for Greeley, Colorado, after staying for several days with her sister—Mrs. W. M. Crook. She was accompanied as far as Burley, Idaho, by Miss Vera Cook, who will visit at that place for several weeks with Mrs. S. A. Lyle.

Miss Irene Woods and Della Brock and Emery Bennett and Kenneth Brown went to Liverdale on Sunday and spent the day there.

Mrs. W. O. Taylor was hostess to a delicious dinner on Sunday evening in honor of her niece, Miss Margaret Hayles, who is a guest at the Taylor home. Mrs. Taylor was assisted by her daughter Suzanne. The guests of the evening were Messrs. Plimott and Wilcox.

Mrs. J. T. Evans delightfully entertained twenty of her friends on Saturday afternoon in honor of Mrs. Smith, of Idaho, who has been a guest at the Evans home for several weeks. 500 to the name of the afternoon.

Mr. and Mrs. Reese Williams gave a large dinner party on Thursday evening in honor of Mr. Chauncey of Woodward, Oklahoma. Sweet peas were used in abundance about the table and on the dinner table. The guests were old friends of Mr. Chauncey.

The Hart home was the scene on Monday evening of a very pleasant party of their friends. Mrs. Hart entertained a number of young friends. The house was beautiful with its decorations of yellow and this color was also used in the refreshments. At the interval, the first course of a very dainty lunch was served, then later in the evening a second course was served. Refreshments were Misses Margaret Putnam, Hilditch, Wash, Rosaline Putnam, Lesley Williams, Carmen Cox, Alma Angus, Gladys Grace Greenwood, for some time and returned to her home in Lovell, Washington, Monday.

Mr. Oliver Trumbull, who has been visiting at the home of her sister—Mrs. Grace Greenwood, for some time and returned to her home in Lovell, Washington, Monday.

W. H. Eldridge, of the Eldridge building company, returned Sunday from an extended eastern trip. Mr. Eldridge spent most of his time at his old home in Vermont.

Meadams M. A. Frost, M. A. Brubaker, and Mrs. J. C. Rogers were in the city for a few days of last week looking for some time at the home of Mr. and Mrs. E. C. Laverling.

Postmaster and Mrs. Grayson, Mrs. Marjory Spaulder, Miss Alma Bennett, and the Misses Dryden, Noland, and Combs, returned today from an excursion to the Yellowstone National Park.

The social services which began last Sunday morning at the Church of the Brethren, are being largely attended. Rev. A. J. Goehman, of Payette, is conducting the services. The program is a fearful epidemic and is very interesting. The meetings will continue each evening for some time, at 8 o'clock. Come and enjoy the evening.

Olson Electric Poles ranges \$50.00 to \$100.00.

## SOCIETY NOTES

Society items for this column will be gladly received by The Times.

Mrs. W. O. Taylor entertained about twenty-five of her friends on Saturday evening to a five o'clock tea in honor of Mrs. Brent and her daughter, Mrs. Stetler of St. Louis. The table was decorated with water and the dining-room had a color scheme of pink and white. Mrs. Cox, Sprague, plunk and Mrs. Stetler were present during the afternoon. Mrs. Taylor rendered several vocal numbers in a charming manner. Dainty refreshments were served by Miss Julia and Suzanne Taylor.

Miss Vera Angus was hostess on Saturday evening at a very delightful ragging party at Jewel hall—Lunch was served during the evening and the chaperones of the evening were Mr. and Mrs. Flower. Those who enjoyed the party were: Misses Fannie Hart, Rosaline Putnam, Frances and Grace Bolger, Grace Branger, Lesley Williams, Rosaline Putnam, Carmen Cox, Gladys Dwight and Kenneth Brown, Dovey, Costello, Conell, Peck, Heald, Green, Charles Girdner, Kendall, Hamaugh and Hart.

Miss Irene Woods and Della Brock and Emery Bennett and Kenneth Brown went to Liverdale on Sunday and spent the day there.

Mrs. W. O. Taylor was hostess to a delicious dinner on Sunday evening in honor of her niece, Miss Margaret Hayles, who is a guest at the Taylor home. Mrs. Taylor was assisted by her daughter Suzanne. The guests of the evening were Messrs. Plimott and Wilcox.

Mrs. J. T. Evans delightfully entertained twenty of her friends on Saturday afternoon in honor of Mrs. Smith, of Idaho, who has been a guest at the Evans home for several weeks. 500 to the name of the afternoon.

Mr. and Mrs. Reese Williams gave a large dinner party on Thursday evening in honor of Mr. Chauncey of Woodward, Oklahoma. Sweet peas were used in abundance about the table and on the dinner table. The guests were old friends of Mr. Chauncey.

# CHURCHES

The C. U. B. M. auxiliary of the Christian church will enjoy a luncheon at 1 o'clock Friday of this week at the church. Plans are being made for the women to attend down to Idaho to see the new dam to be built there to be held. Every member is expected to be there and any interested friends is invited. The program and business meeting will follow the luncheon. This is the last meeting of the year and it should be the best.

# Jenkins Takes His Employes To His Bosom

Figuratively, of course. The Ad-man says "I believe the public at large should have the benefit of one of Jenkins' talks at the weekly gathering, letting them know that we are not working for a mere business machine."

In part, this is what Jenkins said soon after the war in Europe began. "Prices on all merchandise in all our stores, will remain as heretofore—No prices will be raised until we are compelled to pay more for our merchandise."

We have endeavored to lay in considerable stock at the old prices and it will be to the interest of our customers to supply their needs from our present stock as soon as possible. We have a truly wonderful collection of the best and newest goods, so remember the advantage we have over competitors. Never be afraid to SHOW our goods.

## The War—Its Effects

As nearly as I can remember, Jenkins' words were as follows: "Nations representing half of the total population of the earth have withdrawn many of their people from the activities of commerce and production, and those men are now engaged in war."

Such nation or nations as are not engaged in war, will be called upon to produce not only their usual share of the world's needs, but take upon themselves the burden of producing what the other nations have thru necessity neglected.

Not only have some of these nations now at war interfered with their present commerce, but some of them have permanently lost their trade. The vast millions of people engaged in this conflict have now and will have still more, an intense feeling of hatred toward each other, and will therefore, not purchase any goods from opponents, who are actually and literally seeking to take their lives. It will be for generations that the feeling of ill-will will no doubt exist between them.

The only large neutral nation, large in geographical, commercial, and manufacturing sense, is the United States. It, therefore, will devolve upon the United States to take care to a considerable degree, the world's needs, which will give this country more to do than it has ever had before in all its history. The people of foreign nations will be compelled to buy of us or starve.

While they are now engaged in wrecking lives, it is our opportunity, privilege and duty to preserve life. We must not look upon this opportunity merely for money making, but recognize the large service we are called upon to render humanity at large.

## This Means Intense Activity In Business

Just at the present time, the mind of the average man is obsessed with the idea of an enormous war. As soon as the American public begin to think, they will discover that they have much to do. Uncertainty will be changed to certainty, money will be released, manufacturing go ahead as never before. Every dollar, every square foot of ground, every grain, every hand, every wheel, every ship, and every railroad will find that it has not only all it can do, but more than it can do, to take care of what is in reality right now knocking at our door.

These times are making a new epoch in our history, for there will be the quickest reaction after a slow period to times of intense activity that the world has ever seen.

It seems as if mother nature recognizing in advance the great need there will be for foodstuffs, has blessed us with bumper crops, such as we have never had before, knowing that it would be up to us Americans to feed, clothe, to shelter, to build, and to transport, while others are worse than wasting their time in active destruction.

Prices will no doubt rise, every manufacturer's product will show an increased value, stocks in stores will be worth more than a hundred cents on the dollar. Let us shake off the fears that have recently taken hold of so many of us merchants, and realize the facts as they are. The result of war is poverty, and the result of peace is prosperity. Prepare for PROSPERITY, it is coming rapidly.

Sincerely Yours,

THE AD-MAN

## BUTTE IN A TURMOIL

Union Faction Still Fighting for Control and Citizens Intimidated.

BUTTE—Miners openly threatened Monday night to lay the town in ruins if either state or federal troops attempted to enter Butte. One of the leaders of the miners declared that they do not propose to fight the soldiers, but they would wreak vengeance upon the business men for having been instrumental in bringing the soldiers to Butte.

"We have quantities of dynamite and all" said one leader, "and the troops will find them."

Up to Monday the majority of the miners did not credit the reports that the militia was being mobilized, as the local newspapers withheld the news on request of business men, who feared that the news would excite the miners. A Helena newspaper editor, however, Monday morning, brought an automobile load of newspapers to Butte for sale and newspapers soon began circulating the news of the mobilization of the militia.

Calls immediately went forward from President Mackay's ranch and the editor started for a meeting of a meeting of miners, which was held in secret to discuss the coming of the soldiers. Later a committee of miners was hurriedly sent to the valley from Butte to determine whether the troops had arrived.

The electric light plant and all the larger stores are guarded by many armed men as are the mines. On the attic floor of the courthouse there are 50 swords armed with rifles. County Attorney J. J. McCaffery issued a warrant for the arrest of the Helena editor on a charge of inciting a riot, but the editor was said to have fled the city early and the officers could not find him.

All communication to the hardware stores has been resumed and firing pins taken from the rifles.

Representatives of the Butte Mine Workers' union called at the Transvaal mine Monday morning and warned the men on duty not to observe the miners on their mine, threats laid down by the new union. These rules are drastic and differ in many particulars with the practice followed by the companies. The representatives said that if any "boss" objected to the new order, particularly in respect to the rule on blasting, the miners were to take care to observe the union, which would dispose of it.

Miners are refused, both by the sheriff and the county attorney, access to the mines. "I intend to protect private property with the assistance of departing men. You talk about awarding me," says the names of more than 100 mine workers who have been in their possession. You might tell the mine that I intend to prosecute every one of them."

## BABY SWEEP DOWN CANAL

Body of Child of L. E. Weeks Found Mile From Place of Accident.

The year-old child of L. E. Weeks was drowned Monday afternoon, August 21, in an irrigation canal near Ottertail. The family home is within a mile of that town. The body was found a mile from the home. The child had been playing an hour when the mother went in search for it.

Naturally she hurried to the canal and was horrified to discover the baby's tracks leading to the water. At that place the water was high and swift. Horrifying down stream they came upon the lifeless body.

The entire neighborhood was astir at the report of the drowning and called to express sympathy for the family.

George Redmond and Thomas Fay, who were at Ottertail Tuesday brought the unfortunate news to the *Shoshone* *Journal*.

## VISITS OLD HOME

Thomas Starb, Spends Some Time on Wood River.

Thomas Starb, a former resident of this city but now manager of the City Pharmacy company of Twin Falls, is visiting his former friends in Hallett, arriving Sunday.

With Mr. and Mrs. Wilcox Hance and their young son.

Mr. Hance is manager of the Lincoln Provision and Refrigerator company of Twin Falls.

Mr. Starb says it is a great pleasure for him to visit Wood River valley and meet his old friends and look over the familiar scenes of his boyhood days.

Mr. Starb has been here for some time, the guest of his brother-in-law, J. M. Barber, Hallett News Miner.

## KNIVES A BEAR

Camas Prairie Man Fights With Only Available Weapon.

Mr. Staffle, of the El Oro, was in last week, and while he said nothing about it, Martin King, who was on the ground, reports rather strikingly an adventure with two bears on Camas creek, in which Mr. Staffle was the leading participant.

It seems that he rather unexpectedly came upon two bears feeding on a dead sheep, but he wanted into them with the only available weapon he had, a knife, and succeeded in killing one and wounding the other on the second. Camas Prairie Courier.

## MADE BIG DEAL IN SHEEP

Over Hundred and Twenty-Five Thousand Head Chances Hands.

Payette Lake, Ida., Aug. 27.—Over a quarter of a million dollars worth of sheep changed hands at Metcalf.

Well known town on the north branch of Payette lake, during the last fifteen days. Most of the buying and selling of sheep was between growers and between growers and dealers.

The recent sharp advance in the sheep market is the prime cause of this heavy trading here in sheep. One of the states' best known sheep-men stated the year 1914 stands out as one of the best in the history of the Idaho sheep and wool industry.

Many of the state's prominent sheepmen happened to be at the lake at this time, and in business and for pleasure. As things have turned out they did an immense business while here. Much of it was done in the lobby of the Lakeview hotel. At Metcalf where many deals were closed and many big sheep were made in payment of sheep.

Metcalf has suddenly gained fame as one of the really important points for those engaged in the sheep business. It is now the natural shipping point for many of the thousands of Idaho sheep and many are coming to the vast stretch of mountain extend-
