ARRESTED FOR FRAUD

Lige Fletcher Wanted at Payette, Caught Near Nevada Line

On Monday night Deputy Sheriff P. O. Horvath made an important arrest near the Nevada line in the Three Creek country.

It is stated that three men were wanted at Payette for defrauding a Mrs. Gason out of 32 acres of land, valued at \$1000. Two of the men had been arrested and the third man was supposed to have made his escape.

The officers at Payette had notified all the officers in northern Idaho to be on the lookout for a man by the name of Lige Fletcher. The sheriff's office here learned that a man answering the description of Fletcher was on his way from Nevada and Deputy Sheriff Horvath was sent out Monday to look for the fellow. He found that he had not come in by stage to Towner, so went to Nevada and arrested him there, thinking he would come that way. Arriving at Three Creek the deputy found his man had not arrived and returned to the sheriff's office. There Lige Fletcher showed up and was placed under arrest. He was brought to Twin Falls and placed in jail. The officers at Payette were notified and an officer arrived Tuesday evening and on Wednesday morning the officer arrested at Three Creek was notified and left for the scene of the alleged crime. One of the men who is alleged to be connected with the crime was arrested from Oshkosh by a former partner, who says he did not get a full share of the spoils.

It is reported that German troops attacked along the entire British front in northern France. The British troops advance from five miles and the German advance on Warsaw are reported in official statements from Paris and Petrograd as having been hurt.

**ARRESTED WOMAN
FOR A FRAUD**

Local Merchant Loses Dresses to Transient

SWAINS OUT WARRANT FOR WIFE OF ALLEGED CROOK.

Woman Taken at Payette and Held for Twin Falls Officers, Three Children Stranded.

While visiting in this city last week, a Mrs. Leaver presented several dresses for approval from the Booth Mercantile company, promising to bring the dresses back in the morning. In the afternoon the clerk in the store left the city that night, with the property and did not return. A warrant was issued for the apprehension of a widow Leaver's land. Mrs. Leaver will be brought back here for the preliminary hearing. The children of the party are now without protection and will become state charges.

MARKING THE QUANTITY LAW

Rule on Marking of Potato Sacks Explained.

So much of a confusing and conflicting picture has been created and published about the necessity for marking contents on apple boxes that the North Pacific Fruit Distributors, after taking up the matter with the United States Government, has presented those parts of the law and the amendment passed by congress, the decision issued by the department of agriculture, the opinion rendered by the chief secretary of agriculture, and the instructions issued by the distributors, stipulating in apples and pears in boxes, as follows:

National Food and Drugs Act. Title: "An act for preventing the transportation, sale or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, cosmetics, and poisons, and for regulating the manufacture, sale or transportation of food and drugs."

Amendment in National Food and Drugs Act. Section 8. "The term 'misbranded' shall mean—

"Third—If in package form the quantity of the contents be not plainly and conspicuously marked on the package, measure or artificial container."

Food Inspection Act, Sec. 151. "The quantity of solids shall be stated in terms of weight and of fluids in terms of measure, except in the case of an article in respect to which there exists a definite custom otherwise, the statement may be in such terms of weight or measure as in accordance with such custom."

"The quantity of the contents shall be stated in terms of weight or measure unless the package be marked by numerical count and such numerical count gives accurate information as to the quantity of the food in the package."

Department of North Pacific Fruit Distributors. "The quantity of solids shall be stated in terms of weight and of fluids in terms of measure, except in the case of an article in respect to which there exists a definite custom otherwise, the statement may be in such terms of weight or measure as in accordance with such custom."

"The quantity of the contents shall be stated in terms of weight or measure unless the package be marked by numerical count and such numerical count gives accurate information as to the quantity of the food in the package."

"The quantity of the contents shall be stated in terms of weight or measure unless the package be marked by numerical count and such numerical count gives accurate information as to the quantity of the food in the package."

"The quantity of the contents shall be stated in terms of weight or measure unless the package be marked by numerical count and such numerical count gives accurate information as to the quantity of the food in the package."

"The quantity of the contents shall be stated in terms of weight or measure unless the package be marked by numerical count and such numerical count gives accurate information as to the quantity of the food in the package."

O. V. ALLEN CHARGED WITH EMBEZZLEMENT

Shortage in State Funds Over \$70,000

MIL ALLEN IS NOW UNDER ARREST IN IDAHO.

Warrant has been issued for Fred M. Coleman, Former Idaho Treasurer, He is Supposed to be in Seattle.

State Treasurer Allen is formally charged with embezzlement by Governor H. H. Wood. Allen arrived in the city last night shortly after a check from the southeast. He was met by Alex Ransdell, who has been in charge of the state funds office, and who informed him that the audit of the treasurer's accounts had developed far enough in warrant a charge that the treasurer was short in his accounts.

Prosecuting Attorney Glynn was at once called in and asked to prepare a complaint against the treasurer, which was immediately filed in his name.

The specific charge is the embezzlement of \$70,000, but it is possible the complete audit, which will require some little time yet, may develop a larger amount.

It is understood that proceedings will be commenced against Fred M. Coleman, a former deputy in the treasurer's office, who is now supposed to be in Seattle.

The warrant was served on Mr. Allen last night. He has been constant in his efforts to clear up his financial record.

Allen, Wood, Glynn.

According to a telephone call, Glynn received Thursday afternoon, O. V. Allen, state treasurer, whose arrest on the charge of embezzlement of state funds, was made in the city and pleaded guilty to the charge and will be sentenced today.

Fred Coleman, for a long time in charge of the state funds office, was brought back to Boise Thursday and also pleaded guilty.

Developments in the Allen matter to date are as follows: On Saturday, October 17th, Glynn received information of possible embezzlement by the state treasurer. He immediately notified Allen from the city, where he was in the city and also pleaded guilty.

"For a help of cotton in help the South" might profitably be changed by the Northwest states to "Use a bushel of Spuds to Help the West." Just as reasonable as the cry to aid the South, which helped to bring about the conditions which confront the whole nation. Idaho at least, can not pat itself on the back while the South is splitting cotton.

Wednesday was Edison day and throughout the nation those in closest touch with electrical work by some means paid tribute to the great inventor the world has produced. Americans are said to have little reverence for the noted dead of the land and name for the living, but this probably does not hold true in the case of Edison, who has by his wonderful mind made so many home comforts by his tireless delving into electrical mechanics. His one success, the incandescent light, will make his name a household word years after the memories connecting his name to more wonderful triumphs have passed away. A great man, literary and political, now occupies niches in the

Hall of Fame, who has not by any stretch of imagination, accomplished one-half for humanity as the Wizard of Electrical Science.

DOING WITHOUT GERMANY

The assertion of the German Government that the export trade of that country will shortly be resumed ought to be cheering news, for according to *The Engineering News* (New York, September 17), there is probably no other nation in the world whose sudden isolation, commercially, would cause such widespread loss. And, more than that any other nation, this paper goes on to say, Germany has won its place, not by natural resources of location, but by the skill and intelligence with which its people have attacked modern technical problems. We are now learning that it is to go without the things that are made in Germany; and *The News* says that some people are having their eyes opened to the extent and impingement of the field covered by these articles. While engineers and chemists, we are told, are generally aware of Germany's leadership in science and technology, the events of the past few weeks have been a great object lesson to the general public. We read:

"Few men have realized the extent to which the whole world has relied upon German scientists, chemists, engineers, and manufacturers for the supply of many materials necessary in the arts. Manufacturers in America and in England who were congratulating themselves on their enlarged markets for foreign trade commerce where the supply of German goods was cut off have in fact a few cases found their own productive operations seriously hampered because they could no longer obtain certain materials from Germany.

"As is well known, steel manufacturers were greatly startled to know what they were to do for their supply of ferro-manganese. Manufacturers of fertilizer have had to face the possible shut down of their works through the cutting off of the supply of German potash. In the textile industries, manufacturers suddenly realized that with access to German ports blocked by warships, there was every prospect that the supply of raw materials necessary for the dyeing and finishing of textiles would be cut off. The drug and chemical trade, prices doubled and troubles when it was realized that with the supply from Germany cut off for a time without certain drugs and chemicals which have become very-nigh essential both in the pharmacy and in certain industries.

"The above list might be extended greatly. But can we furnish at home something just as good? as most of these German products? Possibly. *The News* thinks, 'It was a great time enough; but this would mean a very long time indeed, in most cases. It would take many years, for instance to bring our facilities for supplying potash up to the demands of our own farmers and manufacturers—what are they to do in the meantime?' Says the writer: "The same thing holds true of numerous materials in the dye and chemical

trades. Physicians and druggists accustomed to use some of the varied products of coal-tar, most of which have originated in and are solely produced by Germany, are in a quandary to know what they can do in the absence of supply in entirely shut off.

"It is of particular interest to note moreover, that the manufacturer, of England, Germany's great commercial rival and present enemy, are almost as badly hit as those of the United States by the cutting off of the supply of German products. Our English chemists reveal that while English manufacturers are making large plans for capturing the export trade in many lands which Germany can not now reach, they find themselves handicapped at every turn by the cutting off of supplies which they themselves have been accustomed to obtain from Germany.

"Fortunately the war has not yet closed all the avenues by which Germany can send out its product to the world. Through Holland, a neutral nation, shipments from Germany can reach the ocean and be distributed by neutral vessels."

Thomas A. Edison, in *The Iron Age*, (New York), tells how he gets along without one German product, and incidentally offers a bit of good advice. He writes: "Carbolic acid is not obtainable in this country, as our firms contain scarcely any; hence we are dependent on England and Germany. I am the largest single user of carbolic acid here, and the embargo placed on shipments by England, together with the impossibility of obtaining any from Germany, has put me in a pretty tight place. However, by making a big can of men in three shifts, I have erected all the machinery and apparatus for making phenol synthetically from benzol, and my plant is now working but I shall manufacture only for my own use in the production of phonograph records. It occurs to me that there are many things we are short of in the chemical line that could be made here quickly, if some people in the trade would act—not talk."—*Literary Digest*.

NO APPOINTMENT YET

State Engineer Will Not be Named Until After Election.
The appointment of a state engineer to succeed the late Frank P. King, who died suddenly will not take place immediately—probably not until after the election, according to authoritative information received at the state house. Herbert A. Wing, deputy state engineer, has been temporarily appointed by Governor Haines to take over the duties of state engineer and will remain in charge of the department until Mr. King's successor is appointed. The death of State Engineer King came so suddenly and at a time when the state campaign was in full swing that Governor Haines found it difficult to either name his successor or definitely settle the matter before he was required to take the stump in the interest of his candidacy for reelection. Many Applicants.
That there are many applicants for the appointment has become known. From all parts of the state applications are pouring in to the governor's office in letter form. They are carefully filed for consideration of the governor on his return to the city. Many of these applications are from engineers of prominence and have the

backing and support of various men of influence. That the position is one to which engineers aspire is evident from the unusually large number of applications.

The position is one that requires exceptional training, broad engineering lines, especially in the handling of irrigation problems that demand intricate engineering. It is said to be felt by the governor and members of the land board that the position is of unusual importance, particularly at this time and in the immediate future because of difficult engineering problems that have and will present themselves in the reclamation of irrigation projects which so far have been failures. Engineers of the highest rank are free in their statements that in their opinion State Engineer King was the best state engineer Idaho ever had.

Unusual confidence was placed in his reports on various irrigation matters and upon his views in the solving of engineering problems that presented themselves from time to time. It is said of the late engineer that he never made a statement from an engineering problem without first becoming familiar with the facts which he had given study on which to base his answer. It was for this reason that his advice always carried a great deal of weight with the land board.
Mr. King was also very popular with all who knew him. While conversative in making acquaintances he was a warm friend and held friendship as one of his closest assets. The governor and land board believe that his place will be difficult to fill in an attempt to secure the services of an engineer who will have the same ability and in

whom the same reliability can be placed.—Capital News.

From "Poor Richard"
When you incline to have new "new" clothes, look first well over the old ones, and see if you cannot shift with them another year, either by scouring, mending or even patching. If necessary, remember a patch on your coat and money in your pocket is better and more creditable thing a wit on your back and no money to take it off.

Supreme Excellence.
In character, in manner, in style, in all things, the supreme excellence is simplicity.—Longfellow.

C. C. SIGGINS

Republican Candidate for Auditor and Recorder

make the following announcement to the people of the district. If I am elected Judge on the third of September, I will exert my utmost ability and conscientiously devote my time and energy to the performance of the duties of the office. I believe that there is too much delay in the courts. From my experience at the bar I believe a large part of this can be remedied by the Judge. I promise to use my best endeavor to get systematic and arrange the court work that litigants may be granted speedy relief. I also believe that the business of the courts can be more economically administered without impugning the functions. To this end I would be willing to try all cases, in which the parties or their attorneys might agree without a jury, and not allowing business and saving litigants and the public the expense attending jury trials. I believe in the broad interpretation of the law, and not in allowing technicalities to defeat or impair a fair and substantial administration of justice. W. A. HANCOCK, Adv.

(Advertising.)

the burden of maintaining government. Our present revenue law is ineffective in that it discriminates and allows a class to evade the law. I believe that the state should have a public utility law, but the present law is not fulfilling its functions for which it was intended. The primary law is sorely in need of revision that it may serve the purpose for which it was drafted. Our public school laws are in a deplorable condition and should be rewritten as follows. I am a firm believer in internal improvement in the way of good roads, bridges, etc., but do not advocate a reckless haste in trying to accomplish these improvements in too short a time, and thereby incur an expense the people cannot stand. I believe that a systematic method should be worked out and followed from year to year until completed. I am in favor of a state wide prohibition and would like to see it include every state in the Union. As to my fitness to serve as a member of the legislature before which the above questions will come, I am perfectly willing to submit my record. I have lived in southern Idaho for twenty-five years, have been in business in Twin Falls County for seven years, an extensive knowledge to make. I was actively engaged in almost every phase of school work in this state for fifteen years, and am familiar with the wants and needs of the public schools. The law prescribes the exact procedure in the creation of county divisions and should I be elected, I will follow the course outlined to the left, without malice or personal animosity. If I am defeated, exactly the same course will be pursued in regard to this question. In case you see fit to trust me as one of the three to represent you in dealing with the above and all other questions that will come before the next legislature, I shall appreciate your opinion and counsel, and in return I will endeavor to produce my very best efforts. Respectfully yours, JOHN W. FARIS, Adv.

I wish to announce myself as a candidate on the Republican ticket for the office of Representative to the state legislature. I have been a resident of the county for four years, four during the term. Vice-president of Salmon River Settlers' Association. Ten years' experience as a banker. W. P. HENSEL, Adv.

I wish to announce myself as a candidate on the Republican ticket for the office of Representative to the state legislature. I have been a resident of the county for four years, four during the term. Vice-president of Salmon River Settlers' Association. Ten years' experience as a banker. W. P. HENSEL, Adv.

Mr. Connor is asking the support of the voters of the county upon the record he has made as a resident of the county for six years. As a business man of Twin Falls, he has made good and established a reputation for squareness and integrity. He has been a member of the board of directors of the city. Serving a year in the military service by the death of his father, he has since then served three years as a member and has not a single blemish against his record in public office. As a graduate of the University of Chicago, he has had the honor of the Phi Kappa Phi Honor Society. He has at all times kept abreast of the new ideas in his profession, having his summer vacation spent each year at the Wharfedale school of Engineering at Chicago. He has for five years been connected as active manager of the Crosby & Company. Mr. Crosby is a man of good clean morals, well fitted in every way to ask the support of the voters of this county. Adv.

In reply to the article of Mr. Herriman, published in the Times, and myself for quoting figures showing the past and present expenditures in the conduct of the business of the sheriff's office, I desire to comment briefly on three or four points. It will be observed that Mr. Herriman says that if he is elected to the office of sheriff, he will act as jailor himself, and thereby do away with the expense of hiring a jailor. This is a vast expense in the conduct of the office, which should be the estimate of expense for 1914-15 placed at \$15,750.00, or a saving of \$2,250.00 over the year 1913.

Mr. Herriman also makes the statement that during the four years 1910-1913, the number of criminal cases in the Probate court was 114, whereas in the last twenty-one months the number has been 128, or an increase of 14. This is cited to show a purported increase in the county's criminal business. An examination of the files of this court has shown that there has been no increase; that this purported increase has been due solely to the policy of the present prosecuting attorney in having all possible prosecutions in the probate court during the last twenty-one months. As the parallel evidence of the probate courts, where they were formerly brought, and which matters would consequently not appear of record in the probate court for the years 1910-1913, but only in the justice's courts of the various precincts. Mr. Herriman further says "The expense of the business of the county has been charged to the sheriff's office, whereas in fact it is properly chargeable to other accounts." The records in the county auditor's office show that V. H. Ormsby, probate officer has drawn a salary of \$12.00 per month as probate officer for 1914-15, or \$144.00 per month as deputy sheriff. Is this properly chargeable to the sheriff's office? It will not be questioned that Ormsby has taken an active part in the work of the sheriff's office, and an investigation of his duties as probate officer will show that he is not occupied more than three or four days per month.

It is a further fact that the salary of Ormsby is a salient feature of the county, but disclosed by the board of county commissioners. It will be observed, the office, which is chargeable to the county, is an annual cost of \$823.00 per month, or \$9,876.00 for the year 1914.

It is a further fact that considerable work of the sheriff's office has been performed by persons not constables during the years 1911, 1912, 1913, 1914. It is a further fact that the cost of the work of the sheriff's office shows that in the last 12 criminal cases brought during the past 13 months an extra appears on the docket of the county auditor's office to the effect that the defendant has not been found by the sheriff's office. In a vast

majority of these cases the charge has been of a serious nature. No public officer should object to a careful scrutiny of the affairs of his office from a public standpoint. I am willing to admit that I have not been a deputy to the sheriff's office but I do believe that I have the right to express an honest criticism. Otherwise no voter would have a right to sit in judgment on the conduct of any public office which he never has. There must be of necessity, a starting for a new ally to enter my office. I promise that Mr. Day should be an excellent member qualified for the office of sheriff than Mr. Vinnau, Idaho. Veritas, Mr. Herriman will make a better sheriff than myself, but I am more than willing to leave it to the voters November 3rd. They vote with care. As to my qualifications for the office, I'll refer you to former Governor Hawley, Governor Haines, my successor in office, Mr. O. H. Barker, Mr. S. O. Taylor, former state auditor who are familiar with the state game warden's office, in which I had the honor to serve for a short time. Very respectfully yours, Adv.

BOISE BOY KILLED BY AUTO

Alton Pearson Killed by Machine Driven by F. M. Mierke.

Alton Pearson, aged 8 years, is dead and Frank M. Mierke, a chauffeur under arrest charged with manslaughter, as the result of another automobile accident on the valley road last evening at 6:10 o'clock, when a Buick driven by Mr. Mierke, came around a wagon and struck the little boy, who was following in the rear, breaking his neck and killing him instantly.

The unfortunate fat was the son of Mr. and Mrs. John Pearson, residents of the Hobbell home addition, this one of the soldier's home. Mrs. Pearson had gone to church and Mr. Pearson was coming forward the city to visit his mother. His son was following him about 100 yards in the rear. Mr. Pearson did not see the accident, but heard the crash, and ran to the spot where the automobile had gone into a ditch. He turned around seeing it had struck someone and ran back, realizing that the child was in the ditch. He ran into his arms by James Penning, an old soldier, who witnessed the accident and had picked up the child's body.

Mr. Pearson did not believe, at first his boy was dead and he was rushed to the hospital, but it was found he was extinct. When it was learned that the neck was broken it was certain that death was instantaneous. Mrs. Pearson was accompanied from church to the hospital and upon being informed of the death of her child, she fainted, but later revived and was able to leave.

According to Mr. Pearson, the automobile which struck his son passed him going at an inordinate speed. Mr. Penning, who was probably the closest eye witness of the tragedy, was almost directly across the road when the accident occurred. He testified, as stated, as in the case of a Buick and had stepped to one side as the automobile came out to pass the team. The crash came almost instantly, the machine knocking the boy down and mauling him when the automobile struck him.

Mr. Mierke, who was driving the car, refused to make any statement concerning the case as he has been the employ of the M. & H. garage and has also driven for Dr. Towle and was using the physician's car last night when the accident happened. The car with him at the time was his sister's and brother-in-law's and some young woman who he was taking out for a ride.

Mrs. Pearson states that owing to the speeding down the valley road, she had often warned her boy to be careful of automobiles and declares he was very watchful.

The valley road on which the accident occurred, is an extremely dangerous one. It is much traveled by old soldiers and women and there are no sidewalks on either side of the paved roadway. The accident last night makes the fifth which has occurred on the paved road down the valley, three of which has been disastrous.

An inquiry is to be held this afternoon at which all details of the accident will be brought out.

After making some investigations of the tragedy, Mr. Pearson sought Judge W. C. Boyer and there, secured out a warrant for the arrest of Mr. Mierke upon the charge of manslaughter. He was placed under a \$200 bond, which was unable to secure last night, but furnished this morning at 5 o'clock. His preliminary has been set for Wednesday morning at 10 o'clock. Capital case.

RESERVOIR WILL BE BUILT

Contract for Construction Work in Oneida County.

Contract for at least 2500 acre-feet of water at \$50 per foot will be advertised for by Oct. 27. The Mafad Reservoir company will proceed forthwith in the construction of what is to be known as the Mafad reservoir in Oneida county, the state land board having approved the contract.

The contract expressed by the board provides for a large crew of men and many buckets. The dam for the reservoir is to be constructed immediately. It will be 40 feet high with a concrete core wall running its full length and height. The outlet tunnel will be in solid rock and will be concrete lined. The spillway will be 20 feet wide and 10 feet deep and have a carrying capacity of 200 second feet of water. The water contract expressed by the board provides that where water payments are made in cash the water will cost 10¢ an acre. Where the water payments are made in installments the first payments will not become due until May 1, when certification is made by the state engineer that the 2500 acre contract is for installment behind the land board approved in September.

The contract was approved by the land board last month at which time the land board passed the following declaration: "We know that the Mafad Reservoir company, limited, a corporation organized under the laws of the state of Idaho, being duly compiled with the requirements of house bill No. 275 of the acts of the Third session of the legislature of Idaho, approved March 15, 1907, and the state engineer of Idaho having filed his report in writing with the register and having approved the plans and specifications for the said company's irrigation works, consisting of a dam and storage reser-

voir on the Little Malad river in Oneida county, Idaho, and the state board of land commissioners having at a meeting held on the 17th day of September, 1914, by resolution approved the form of water contract hereto attached and authorized and directed this certificate to issue.

"Now, therefore, said Mafad Reservoir company, limited, is hereby authorized to sell water rights in said irrigation system under the form of water right contract hereto attached as aforesaid, to the extent of 2500 acre feet for the irrigation of 2500 acres of land.

"In witness whereof, the said state board of land commissioners has caused this certificate to be executed in its name signed by its chairman, and attested by its register, and the seal of said board attached this 20th day of September, 1914.

"By John M. Holmes, Chairman. Attest: N. Jennings, Register. Capital Case."

EXPOSITION PLANS EXPANDING

Secretaries of Miss Mulkey Secured for Idaho Next Year.

Commissioner Reed has secured the services of Miss E. N. Mullins of San Francisco to assist J. W. Jones in installing the Idaho exhibit at San Francisco.

Miss Mulkey has adopted a profession most unusual for a woman, but one in which she has made the greatest success, that of designing and executing large spectacular parades. She has put on the best feet of the Portland "float" carnival parades, the "Butter" parade of Seattle in 1912, the last two parades of the "Wizard of the Wagon" and many large parades on the coast.

Asked how she happened to take up an unusual profession, Miss Mulkey said, "well, to begin with, I come from a family of artists and then I was born and lived until recently in New Orleans, and you know that kind of business being fairly steeped in Mardi Gras atmosphere. It really came natural, with my artistic training and my acquaintance with the late Mr. Harner, who put on the Mardi Gras parades for the next 10 years, I fell naturally into it."

Miss Mulkey is highly imaginative and she first makes her sketches of the parade, as she wishes it to be as a process, and she commences her working-drawings and finally she actually builds the floats. She has a special process in making models from papier-mache which have all the appearance of genuine sculpture. She has been commissioned to make a reproduction of the Utah copper mine for the Utah

building at San Francisco. This work is to occupy a room two floors deep and a five foot basement. She will also model one of the big coal mines.

Besides arranging the background for the Idaho exhibit, Major Reed wishes Miss Mulkey to make a large model of Arrow Rock dam and of Shoshone falls, believing that both will prove a splendid advertisement in promoting tourism during the usual winter season. The model will go to Arrow Rock tomorrow and examining the dam and if it is decided to make the model she will obtain working drawings from the engineers and make it exactly to the scale. She will then go to Shoshone falls and from there to Salt Lake en route to San Francisco.

Miss Mulkey will carry on the Idaho and Utah work together, since the two buildings are closely situated. She is highly enthusiastic over both states and hopes to achieve something worthy for both of them.—Statesman.

Chas. Townsend, who has been visiting for the past week with his uncle C. S. Peck, and family, left Tuesday morning for his home in Lewa, Oregon.

Mr. and Mrs. Cecil Melroe and Miss Viola Melroe, of Concordia, Kansas, arrived Sunday for a few days visit with Mr. Melroe's sister, Mrs. L. S. Melroe.

Messrs. Roland Gould, Ernest Howard and W. H. Faythor returned Satur-

day from a successful sporting trip in the Lost River country. This succeeded in getting considerable game, including a deer.

The Washburn Piano-- Leader in Popularity

The Washburn piano is essentially high-grade in every respect. Ordinary instruments sell at about the same figure do not compare with it in any particular. This is the reason for the popularity of the Washburn.

The Washburn is sold by over three hundred piano dealers throughout the United States and is endorsed by them as unequalled in value.

The Washburn method of construction was evolved in the Lyon and Healy factories and presents features that most appreciate to every unbiased purchaser. Very easy terms, in fact, payments as low as \$5.00 per month may be arranged on the Washburn piano.

Million Dollar Mystery

SYNOPSIS OF PREVIOUS CHAPTERS

Stanley Hargrave, millionaire, after a miraculous escape from the den of the gang of brilliant thieves known as the Black Hundred, finds the life of a recluse in the Golden Gate Hotel. He is gravely wounded and is taken to the hospital where he is cared for by the doctor who is a member of the Black Hundred. He is taken to the hospital where he is cared for by the doctor who is a member of the Black Hundred.

Fluorence arrives from the school. Countess Olga, Hargrave's companion, visits her and claims to be a relative. Two bogus detectives call on her and she is followed by Norton. Norton and the countess call on Hargrave the next day. She is more safe at home. The stolen jewelry is found. Jones removes a section of the flooring and from a cavity takes a box. It is found to be a duplicate box of the jewelry. The stolen jewelry is found. Jones removes a section of the flooring and from a cavity takes a box. It is found to be a duplicate box of the jewelry.

Complices of Hargrave surround kidnaping Fluorence while she is alone. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital.

Fluorence checks out of the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital.

Fluorence checks out of the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital.

Fluorence checks out of the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital.

Fluorence checks out of the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital. She is taken to the hospital.

serious. If it is not taken care of at once...

"What is the trouble?" queried Jones who was growing fond of Susan.

"Weak heart. Suffering and good sea air will strengthen her all right. No, no," said Jones. "I'll send you to the hospital. I'll send you to the hospital. I'll send you to the hospital."

All very unbusinesslike; not the least case in the world for any one to suspect that a new fraud was being set by the snafus. The maid returned to the kitchen room, while Fluorence toddled down the stairs to her room. She was Susan was suspicious, but she was not. Jones as he would, he could find no earthly reason for this suspicious attitude.

"All about them? Good night. Olga keep your hair on. I mean your own hair. We're going to win out, don't you worry. In all games the minute you begin to doubt you begin to lose."

That same night Norton sat at his desk in his shirt sleeves, pointing at the ceiling. "Fluorence! Fluorence! She has been here! She has been here! She has been here!"

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"Stay here for a little while and I'll take you to the manager's office."

"That's all right," said Susan. "I'll stay here for a little while and I'll take you to the manager's office."

CHAPTER XVI

Teachery in the Household

The maid stole into the house wondering if she had been seen. She wanted to be left in this quiet room. She was tired of the life, she wanted to be her own mistress, and the small fortune she had inherited was not enough to realize her ambition. What had she not seen and been of life since she joined the great detective force? Last night, cook, ship stewardess, food wagon, street clerk, and a dozen other employments. Her pay, until she secured some fat reward, was but two dollars a year, and here was five thousand in advance, with the promise of five thousand more the minute she had a year, and here was the money without any further delay. She was tired of the life, she wanted to be her own mistress, and the small fortune she had inherited was not enough to realize her ambition.

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

"I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind. I'll tell you my own mind."

Get on good terms with your lumberman.

When you have a building problem to work out—come in and let us help you. If we can't do it ourselves, we will have it done for you.

This institution is a public servant. If it can do you an extra service it stands ready. We believe by helping others we help ourselves.

Gen. State Lumber Co.

Allen Charged With Embezzlement

(Continued from Page 1.)

have been notified not to pay any of the state treasurer's checks pending the audit of the books.

The state treasury is for the time being out of business. These paragraphs epitomize a story that developed yesterday and that caused speculation in Idaho and all over the state as rumors leaked out early in the forenoon following receipt of instructions office.

It is apparent it was officially declared that these developments should be a serious public matter after a report was made to the governor by the state treasurer's office.

Treasurer Allen, when seen by The Statesman representative said he had no statement to make at this time and would probably wait until a report was made to the governor.

Mr. Allen told me he invited the fullest investigation of his accounts by the auditor general.
