

THE TWIN FALLS TIMES

HOME INDUSTRIAL NUMBER

VOL. X. NO. 52

TENTH YEAR

TWIN FALLS, TWIN FALLS COUNTY, IDAHO, FRIDAY, APRIL 9, 1915.

SUBSCRIPTION \$2.00 PER YEAR

HOME INDUSTRY BAKING CONTEST

End of Week Will Usher in
Bread Bakers

LIBERAL PRIZES OFFERED BY
MILL & ELEVATOR CO

Girls of Domestic Science Department
of High School Will Enter Cake
Baking Contest.

Every woman in Twin Falls county who knows how to bake good bread will be given a chance to demonstrate that fact, and incidentally, four of them will receive prizes for making bread better than mother used to make.

The bread baking contest will be held Saturday, April 17, and is open to everybody. The bread must be baked from Idaho flour and delivered to the City Pharmacy on Shoshone street by 1:30 p. m. Saturday, April 17. Each loaf will be given a number so that the judges will not be able to identify the bread. The judging will be done the same as last year. The prizes are: First, 200 pounds of Idaho flour; second, 150 pounds of Idaho flour; third, 100 pounds of Idaho flour; fourth, 50 pounds of Idaho flour.

At four o'clock the bread will be offered for sale, the proceeds to go to the Twentieth Century club.

At the same time the Household Science girls of the Twin Falls high school, under the direction of Miss Madeline Libert, will bake cakes, using Idaho flour, best sugar, Twin Falls water and other home products (Editor's note—The author of this is not a bread maker, but belongs to the consuming class). These cakes will be on sale at the City Pharmacy.

Cooking demonstrations will be held the same afternoon from 2 to 5 at the offices of the Idaho Power and Light company, on Shoshone street, and the offices of the Great Shoshone and Twin Falls Power company on Main avenue. At these special groceries will be displays of Idaho, Utah and Northwestern canned goods, coffee, butter, etc., and some pleasant surprises await visitors.

Soda fountains will serve Utah, Coca and Twin Falls cider.

The hotels and restaurants will have special Home Product menus every day during Home industry week, and on Sunday, April 18, every family is requested to make a special effort to have a home products dinner.

FLOUR MILLS ARE IMPORANT

Two On Twin Falls Tract a
Blessing to Producers.

DISTRIBUTE LARGE SUM ANNUALLY FOR WHEAT

Investments are Heavy and Payrolls Help to Keep Local Money in Constant Circulation.

The Twin Falls country is exceedingly fortunate in having two very thriving flour mills operating in its territory. These mills located at Kimberly and Twin Falls, are doing a great deal toward the growth of the community outside of the investment of large capital and the payment of taxes, in that they put into circulation a large sum for wheat purchased. By reason of the saving on freight the mills are able to pay a higher price than the market and for this reason one or two cents additional price have made money for many ranchers. A careful estimate of the money paid out in 1914 for wheat by the two mills is \$50,000 for wheat alone. On top of this each is distributing a handsome payroll to its employees, which goes into the pockets of the business

IDAHO HOME INDUSTRY WEEK HAD ORIGIN IN TWIN FALLS

Four years ago Idaho Home Industry Week was born in Twin Falls where so many good things have originated. At first it was only "Home Industry Day," and the Twentieth Century Woman's Club celebrated that day. About the same time the Boise Columbian club held a kitchen at which some effort was made to call attention to the benefits of patronizing home industry.

On March 2, 1912, the first real Home Industry Day was celebrated. The Twentieth Century club secured a vacant store room on Main avenue opposite the Hotel Perrine. A home products dinner was served, and ten young girls were dressed to represent the various Twin Falls industries. This "advance guard" consisted of Misses Margaret Wilson, Lesley Williams, Charlotte Wilner, Nevada Thomas, Allen Graham, Ethel Davies (now Mrs. Kirk Bout), Gladys Deloit, Thelma Senior, Edna Deuschamp and Margaret Gourley.

The following year the Idaho Home Industry League was launched at Boise by the Idaho Club Woman, and the second week in April set as the time for the observance of the first Home Industry Week. A monster meeting was held at the Idaho Commercial club at which producers, manufacturers, wholesalers, retailers and consumers gathered together for the common purpose of discussing the patronage of home industries. In the Boise Statesman's report of the meeting appears this excerpt:

"The meeting was called to order by Judge Fremont Wood, who was later made the permanent chairman of the organization. Judge Wood called attention to the fact that the movement for Home Industry Week was started by the Idaho Club Woman, of which Mrs. Martha Spangler is the editor, and through her efforts the idea has been taken up by the press and the commercial clubs and the women's clubs all over the state, until Home Industry Week bids fair to be observed in every city and hamlet in the state."

In 1914 the interest spread over the entire state, and Governor Haines issued the first Home Industry Week proclamation. The movement had by this time gained such impetus that it attracted the attention of Editor's Weekly, and a half page article in that journal was the result.

This year the Idaho Club Woman started the campaign early and in December last sent out a New Year resolution to the club women of Idaho, Washington, Oregon and Utah, which read as follows:

"New Year Resolution for the Women of the Western States:

"During the coming year I will do all in my power to jump in the upbuilding of the manufacturing institutions of the West:

"First—By purchasing products made in my home state.

"Second—By purchasing goods, when not manufactured in my home state, from the nearest manufacturer in the West.

"Third—By urging the consumption of home-grown fruits and vegetables.

"Fourth—By talking of the advantages accruing from Home Industry."

The generous response given this resolution is effectively demonstrated by the display of cards which will be made in the show window of Closs Book store during Home Industry Week. Each of these cards is signed by the president of a woman's club, and each card represents from a dozen to 500 women, so that the total who have pledged themselves runs into the thousands.

A proclamation similar to that of last year was issued March 30, by Governor Alexander, the date not being April 12 to 18. This proclamation reads:

"That the upbuilding of home industries will always redound to the benefit of a community, state or nation, is shown by the general interest and enthusiasm now being manifested in the 'Made in the U. S. A.' movement, which is sweeping the country.

"This is a national application of patronizing home institutions and when we urge the patronage of our local industries, we are only bringing the movement closer home and giving it a definite and practical application."

"Believing that much but good can come of the observance of these underlying principles, and that we, as a state, can become prosperous as a result of,

"Buying the products of our home manufacturers first.

"Patronizing the industries of the Pacific Northwest and finally,

"Purchasing goods made in the United States, endeavoring at all times to give the industries closest home the preference, and because this movement has already gained impetus in Idaho.

"Now, therefore, I, Moses Alexander, governor of this state of Idaho, do hereby proclaim and set aside the week beginning on Monday, the twelfth day of April, and ending on Sunday, the eighteenth day of April, as Home Industry Week and advise the careful observance of this period by all the citizens of the state in order that the principles may be thoroughly inculcated and the result will be a greater development of our home resources."

"In testimony whereof, I have hereunto set my hand and caused the great seal of the State to be affixed this 26th day of March, 1915.

"GEORGE R. HARKELL,
"Secretary of State."

The original proclamations issued by Governors Haines and Alexander will be shown in the display at the Closs book store next week.

The movement has now spread to the entire Northwest and the women of these states will make a general observance of the week. In Utah the Home Product Week, which is about the same general thing, was observed April 1 to 7th. This early start was chosen because the Mormon conference at Salt Lake City was held that week and the excursion rates on the railroads were taken advantage of to bring the people of the state into Salt Lake City.

In the past year or so there have been innumerable orange weeks, raisin weeks, ready-made clothing weeks, etc., all of which originated with the producers or manufacturers. Home Industry Week is exception in that it is set aside AT THE REQUEST OF THE CONSUMERS, and for that reason is likely to prove of more benefit to the manufacturer and be more far-reaching in its effect.

During Home Industry Week, the merchants of Twin Falls will have special displays of western-manufactured articles and a tour of the business district will be both interesting and instructive. On Saturday, April 17, there will be a number of special demonstrations, and on Sunday, April 18, every family is urged to serve a home products dinner.

men of the community in many ways. The flour shipped out is one of the mediums by which the money sent out for supplies and other eastern purchases is returned to again become circulated in the city.

MANY NEW HOMES IN CITY

Total Improvement Poor Consolation for Knockers.

Twin Falls city has no reason to feel

blue over the record of building improvements in the year 1914, on the other hand the number of new, pretty homes erected will no doubt surprise and delight every booster. The Times has been quickly working upon the matter for some time, getting information of the actual building operations and while information is not reached for as absolutely correct to a house or two, or as to the amount in dollars represented, the figures are sound enough to insure acceptance

by the most conservative. Through the lumber yards with whom the home builders of the city must transact business and through personal investigation of the editor the figures have been obtained. Sixty-one homes have been erected in the city of Twin Falls and suburbs in that time. A careful estimate of the total cost will run slightly over a hundred thousand dollars.

This does not include the potato growers' buildings, the new theatre, and the additions to the flour mill, which will add at least \$50,000 to this list.

Out in the farming sections the improvements are more numerous and more noticeable and are changing the crude look of a new irrigated section into that of an old settled community. To give the estimate of these is far possible, owing to the fact that materials for such buildings are supplied from a number of outlying lumber yards.

HIGHLY DEVELOPED LOCAL INDUSTRY

Many Automobiles Boosting
Selling of Accessories

INVEST THOUSANDS IN HANDSOMELY EQUIPPED GARAGES

Business Increasing in Twin Falls Beyond Expectation of Local Garage Owners.

Like all industries connected with the sale and manufacture of automobiles the growth of the firms in this city handling auto accessories and doing repairs has been phenomenal. Beginning with little equipment in a frame building, unable to accommodate more than one or two cars, six years' time found the "padding firms" of this well established in commodious, fireproof structures, which will care for the growth of the city for many years to come. The repair equipment capable of erecting any of the modern cars has been phenomenal. Beginning with little equipment in a frame building, unable to accommodate more than one or two cars, six years' time found the "padding firms" of this well established in commodious, fireproof structures, which will care for the growth of the city for many years to come. The repair equipment capable of erecting any of the modern cars has been phenomenal. MAKES HIS OWN LENS

Dr. R. A. Parrott Has Complete Establishment.

One of the most interesting sights to any person is the preparation of the black glass into lenses to fit any eye. Such work is done for the most part in the larger cities and the opticians fitting glasses merely send in the prescription to the nearest large city where the lens is ground and prepared ready for mounting in the bows. Such ordering necessarily causes much delay. However, Twin Falls is fortunate in having an establishment in which not only the fitting is scientifically done, but the lens is ground and prepared, ready for mounting in a few hours.

Every known means of perfecting such grinding has been added to the equipment of the Parrott Optical company, and with the experience of Dr. Parrott in lens grinding, gained in the largest optical factory in the east, he is in a position to give prompt service to the people of Twin Falls. Dr. Parrott has demonstrated his ability to make good and is enjoying an ever-increasing practice each year.

ANTICIPATING THE FUTURE

Ostrander Lumber Company Equipped To Handle Big Business.

One of the progressive businesses of the Twin Falls country with headquarters in this city, a purely home concern, is that of the Ostrander Lumber company, which in the early days of the city had faith in its future and erected substantial brick buildings and placed its sales department on a basis that will be sufficient for handling a growing business for years to come. Its president, E. J. Ostrander, has personal supervision over the selling force and has been developing new business in every town or city in which the company has placed yards. His energy has been instrumental in aiding his firm to maintain a service department in connection with the various yards that places the skill in planning and figuring homes at the command of its patrons without extra cost.

During the last two years, the Ostrander Lumber company has been attempting to interest farmers of the tract in the use of silos and as the direct result of its efforts, has induced several of the ranchers to erect silos and thus conserve the use of the food given the dairy cattle. In every single

case the farmer thus interested has become enthusiastic and is now preaching the silo way to his neighbors.

With fully stocked yards at Jerome, Wendell, Gooding, Hagerman, Bliss and Hollister, the work of caring for the business details and general bookkeeping falls upon the Twin Falls auditing and accounting department, in charge of D. C. Watson, secretary and treasurer of the company. Mr. Watson has been with the company since its beginning and is considered one of the best accountants in the city.

With an investment running into the hundred thousands, this company has despite the hard times been optimistic as to the future and with no greater overhead expense can it the occasion demands handle double its present handsome business. The slogan of the Ostrander Lumber company from the office floor clear through to the yard man in every one of its yards is "Quality Always."

DIRECT TO THE CONSUMER

Kinney Wholesale Company Pushing Out for Business.

One of the earliest firms in the commodities business in Twin Falls, was that now managed by Ed. Kinney. In the early days, The Falk Wholesale company, of Boise, began to note the vast amount of staple goods shipped to the Twin Falls country, and to be right on the ground, established a branch house, built a substantial warehouse and office and went after the business. The management went to a Twin Falls man and it was here that Ed. Kinney, part owner and manager of Kinney & Company, learned the fundamentals of the grocery business. Later, five years ago, Ed. Kinney and an uncle, J. J. Kinney, of Sterling, Colorado, took over the business and changed the name to Kinney Wholesale Company. Since that time Ed. Kinney has had entire charge, J. J. Kinney being engaged in extensive cattle business in Colorado. For three years the firm devoted its time to a commission business solely, still handling lines for Falk Wholesale Company.

Two years ago Mr. Kinney, ever on the alert for increasing the scope of the business decided to enter the retail field, to the extent of furnishing household supplies to the consumers and has in the two years demonstrated the success of his theory. Every quarter a price list of his commodities goes into the hands of the ranchers and housewives of the city with the

result that a tremendous business has developed. The first office and warehouse, a commodious structure built in 1908, has since been augmented by two other big warehouses to supply the increasing business. The Kinney Wholesale Company is becoming very well known to the consumers on the Twin Falls tract due to the energy and business ability of Ed. Kinney, who is one of the younger business men of the city. Last fall J. P. Kinney, a brother, entered into active participation of the business as secretary.

HAS HELPED BUILD HOMES

Nibley-Channel Lumber Company a Pioneer Builder.

One of the oldest lumber yards on the Twin Falls tract and one that has developed with the progress and growth of the tract and city, is the Nibley-Channel Lumber company, which has its main offices in Twin Falls. C. B. Channel, the junior member of the firm, but the active director of the big business, was the first manager of the business, arrived in Twin Falls early enough to become identified with every housing move for a bigger and better Twin Falls. In the rush of building in the first three or four years, much of the progress and development was due primarily to the encouragement given the home builder. Much of the task of financing and planning the building of the homes fell upon the lumbermen and the Nibley-Channel Lumber company aided greatly in the task of keeping the lumber moving under the poor freighting facilities and also kept a large force of expert carpenters when the building boom was at its height. For this reason they can well be classed as real home builders. Every movement for public good has had hearty support from this pioneer firm.

Four years ago Mr. Channel, together with several local men, platted what is known today as Eastlawn, a section where many of the citizens of the city have chosen to erect their homes. The residences erected have been of a type worthy of a big city.

As a part of the development of this firm a number of yards have been established in the towns along the Twin Falls branch. In all towns, handsome buildings and yards have been erected in harmony with the aim of the company to keep pace with the progress of the irrigated section.

IT'S OUR TREAT

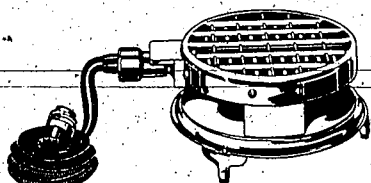

Every man, woman and child in Twin Falls is urged to visit our Creamery (just across the tracks from the O. S. L. Passenger Depot) during Home Industry Week—April 12th to 17th. We will be at home from 2 to 5 o'clock each afternoon.

You will enjoy the dish of delicious STERLING Ice Cream we will have ready for you, and it will be instructive to see where STERLING butter is made.

POTATO SEED CUTTER

Invention of Idaho Man is Useful and Inexpensive.

Mr. W. T. Matthews, of Pocatello, has invented and is making a potato seed cutter, which for a light, inexpensive machine seems to be the best we have ever seen or heard of. The cutting principle is like the foot power machine, but this make is hand power. It stands a sufficient height to enable the hanging of a sack beneath the cutter. The potatoes are laid on a series of knives and passed through with a hand lever which makes tolerably rapid work. The expense is \$5.00 and anyone desiring one either write directly to Mr. W. T. Matthews, Pocatello, or to this office.

Seed Treatment.

Now that the planting season is upon us we desire to issue some instructions on the matter of the control of various diseases. Any locally desiring full instruction on different diseases and their treatment, by application to this office and arrangements for a meeting can secure an address on the matter in full. In case this is done notify your members to bring samples of the potatoes they expect to use for seed. In this way practical illustrations can be given, and the treatment of the most common diseases explained.

List of Common Diseases.

COMMON SCAB: This is perhaps the most common disease in this state, and is well known to every potato grower. Seed treatment will kill the spores that cause Common Scab. It is not enough that the seed be treated, for this disease will live over in the ground for several years.

FUSARIUM WILT: To detect this in seed stock, cut off the stem end of the potato. If there are dark spots running through the flesh in a narrow cylinder, this is a sure symptom of this disease. Never, under any circumstances, plant such seed stock. This is a fungus disease which grows on the inside of the tuber and is detected by the dark rings underneath the surface. This disease does not manifest itself on the surface of the potato, therefore, only by cutting can its presence be shown. This disease is most easily detected on the growing crop. At different stages of the growth the top apparently turns yellow and dies. The affection is inside the water-vein of the stalk from whence it has spread from the stem end of the tuber. In the grow-

ing season of the year, they are dark or sometimes almost black. Seed treatment will not kill this disease. The disease being inside the tuber. Potatoes showing this disease should never be planted. Infected potatoes not only carry the disease to next year's crop but also infect the soil for future seasons. This is perhaps our most serious potato disease on account of the difficulty in controlling it.

RHIZOCTONIA: This is a common fungus disease which forms tiny, hard dark spots or germs in colony groups on the outside of the skin of the tuber. Most people think that these are black dirt spots, but such is not the case. They stick very firmly to the skin of the potato and attack the roots underground. This kills the stalk in the same manner as Fusarium, but can easily be detected on pulling up the stalk, as the disease affects the outside of the underground stem and not the inside as does Fusarium. Usually if this disease is developed in the early growing stage it will entirely cut off the life of the stem underground, causing a large group of small, inferior tubers to form above the infection. Sometimes even to the extent of an aerial growth on the vines above the ground. If these dark specks are large upon the surface there is no known remedy which can be entirely depended upon to kill them; however, if only small specks appear in very small numbers they can be killed by the Corrosive Sublimite treatment. The ground where once inoculated with these germs is unsafe as potato ground for at least three to five years.

Methods of Control.

Professor Olin, formerly of this state, and now Agricultural Commissioner of the U. S. R. G. Railroad, gives the following eight rules of control.

1. On clean ground, plant clean seed this year to grow in a seed plot, seed stock for the general field next year.
2. Select seed potatoes in the field, before harvesting from hills with healthy vines which give good normal number of potatoes of uniform size true to type and free from disease.
3. When forced to use bin selected seed, make careful selection, discarding all potatoes which you find diseased. You must cut slices not over one-eighth inch thick from stem end of potato, in search for wilt disease, which works inside the potato.
4. Get disease free seed. If you find you have none of your own and you cannot find it yourself, write to

your state experiment station to help locate seed stock free from disease.

5. Treat selected seed as your state experiment shall recommend.

6. Rotation of crops must be followed and volunteer potatoes not allowed to grow and carry over the disease.

7. Use Clover, alfalfa or pea land for potatoes when possible.

8. United persistent endeavor along these lines will enable us to stamp out those potato troubles as effectively as hog growers of a given district control hog cholera.

Treatment.

All seed potatoes should be soaked in a solution of mercury bichloride (corrosive sublimate) four ounces in thirty gallons of water for one and one-half hours. Formalin treatment will not kill Rhizoctonia as completely as mercury bichloride. The solution should be placed in a wooden barrel or tank. It corrodes metal. It should be poured out and made up fresh after it has been used to disinfect four lots of potatoes. It is poison to eat but not to the touch. Treated potatoes should not be eaten or fed. After the potatoes have been treated they should be stored in new sacks which have been similarly disinfected in the solution. Described and recommended by Dr. Geo. R. Hill, plant pathologist, Utah experiment station.

The corrosive sublimate or mercury treatment is also recommended and used by the Sweet Brothers of Denver, and is recommended by J. C. Jacobson, of Idaho Falls.

Recommendations.

Organization. While this central has been too much preoccupied in trying to get returns, prices, etc. It has neglected one very important feature of potato organization. If a potato organization in a community is to do its most effective work it should extend to other activities than merely the handling out of potatoes for market. Every local organization should make seed selection and administer treatment under the strict supervision of its manager or a committee appointed for that purpose. One set of machinery and one crew of workers could treat all the seed for any of our potato localities at much less expense than the same is being conducted now, and much more effective. It may be too late to take this matter up this season but I hope steps will be taken to carry it into effect for next year. Every man in every community should treat every potato he plants every year.

Darrow Bros. Seed & Supply Co.

When in need of SEEDS patronize a seed house where you can get anything you want in seeds. Put up by men who know what seeds are and are familiar with all varieties.

We carry the HIGHEST GRADES AND QUALITIES that we can obtain in SEEDS.

Poultry Supplies

We are the largest dealers in POULTRY SUPPLIES in Southern Idaho; and are in a position to make prices on this line that you can not equal elsewhere. We are making special prices right now on the following:

Fancy Eastern Oyster Shell, per 100	\$1.75
Grt. per 100	\$1.75
Chick Feed, per 100	\$3.75

Now is the time to buy your requirements.

Spraying Material

ARE YOU GOING TO HARVEST YOUR OWN APPLES OR LET THE WORMS DO IT FOR YOU?

Now is the time to arrange for your ARSENATE OF LEAD. We have the best prices this year that we have ever been able to make on this article.

Spraying Pumps

We can fit you out with any kind of pump you want, HAND OR POWER SIZES at almost any kind of price you want to pay.

We handle the FAMOUS BEAN SPRAY PUMPS. See us before buying a pump, it is to your interest.

HELPING THE EXPRESS COMPANY

Sterling Dairy Products Company Makes Shipments.

Ten thousand pounds in one express shipment and that into the heart of its competitors' territory, was the record of the Sterling Dairy Products company into Portland, where two of the largest creameries of the West are located. The shipment of "Sterling Butter" is but one of many which have found their way into other states by parcels post and express. During 1914 over a half million pounds of butter

was produced at this creamery, while the ranchers and dairymen received in cash approximately \$140,000 for the milk and cream to produce that half million pounds.

Opening only four years ago in a country where the dairy cattle were few and expensive, the Sterling promoter, Mr. H. J. Youngs, had a colossal task to create any kind of a business. The factory was built and the machinery installed and the next step of getting milk cows occupied the time of the energetic manager. Cows by the carload were procured in the east and shipped to Twin Falls to be resold to the farmers on easy terms.

The production of the creamery grew apace as the ranchers could see the value of a good fat pay check every month, rain or shine, summer and winter, irrespective of the price of farm products on the prevailing markets.

The Sterling has an investment of approximately \$60,000 and is distributing a big payroll every month with fifteen employees who patronize the home markets. It is industries like the creameries and other producing business concerns that are putting money into local circulation which comes from the outside to a large extent. They are bringing back part of

the money which has gone out in interest to Eastern capitalists.

HERBST & RAMBO

Well Known Caterers Pass Fifth Milestone in Business.

Five years ago Herbst & Rambo entered the business circles of Twin Falls in their present handsome quarters and in a very short time by the excellence of the service given, have built up a splendid business which has greatly increased up to the present time. The modest little business due

to the industry of the proprietors, has become one of the substantial fixtures of the business life of the city and is the resort of many of the business men of the city for the tasty midday luncheon served there.

In addition to the quick meals, Herbst & Rambo have a thriving candy business, most of the products sold over the cases being the output of the cleanly factory at the rear of the store. This portion is directly under the supervision of Mr. Herbst, expert candy maker.

In the early days, when banquets were almost out of the question anywhere in the city due to a lack of room, the above firm gained a reputation for catering which made them extremely popular with the public. For a long time the noonday luncheons of the Twin Falls Commercial club were made possible by the skill of Herbst & Rambo. At the present time the ladies of the city find the firm a ready help in the preparation of desserts and fees, which are delivered all over the city.

MANUFACTURES JEWELRY

W. H. Priebe Has Modern Jewelry Store.

A young man hailing from Waterville, Washington, entered the jewelry business in Twin Falls six years ago in the firm of Gulbert & Priebe and in a short time became a part of the social and business life of the city. He was an optimist by nature and in the small city saw the possibilities of the greater Twin Falls. When the present handsome quarters of Priebe's Jewelry Store were selected for expansion every move of Mr. Priebe, new sole owner, was made with the view to anticipate the demands of a city of fifty thousand.

Beautiful fixtures rarely seen outside of big eastern jewelry establishments were placed in the handsome room and a stock for a big retail trade was secured to wait the growth of the city for realization of his enterprise. Without a doubt there is not a single jewelry store in Idaho today that will surpass the tastefully planned store room which today makes the Priebe Jewelry store the pride of the city.

Coupled with the jewelry repairing business the proprietor has installed an optometrical parlor with an expert in charge, which has enjoyed an ever increasing business.

In the past two years Mr. Priebe has added a jewelry manufacturing department to utilize native ores of the Intermountain section, and although on a small scale, is a mighty

complete department with modern machinery.

THE LIVE CANDY MAN

F. F. Varney Makes Candy for the Kiddies.

At any time of the day one can see the little children with their faces light against the window admiring the bewildering array of candies set out for their delight by Varney, the live candy man. Candy houses, candy dogs and cats, candy of every hue, and description, is made in the clean factory at the back of the store. Mr. Varney is another optimist of the Twin Falls variety, who believes in going the limit when he knows a proposition is sound. From a small room with limited facilities, his last move was to a large and commodious store room, where lunch tables, a handsome soda fountain and other equipment was added to give the public the best of service. Over the candy factory and the culinary operation, the proprietor himself presides, and is keeping up his reputation as a first class caterer.

For luncheons and private parties Varney maintains a room for the preparation of ices and sherbets and brick tea cream. A number of new and delicious desserts have been created for his patrons from his own recipes.

Mr. Varney has a fine fruit ranch near the city and has for a number of years made all of his own fruit preserves and syrups at the ranch—home made products that appeal to the appetite.

ELECTRIC HOUSEKEEPING

Idaho Power and Light Company's Hotpoint Week.

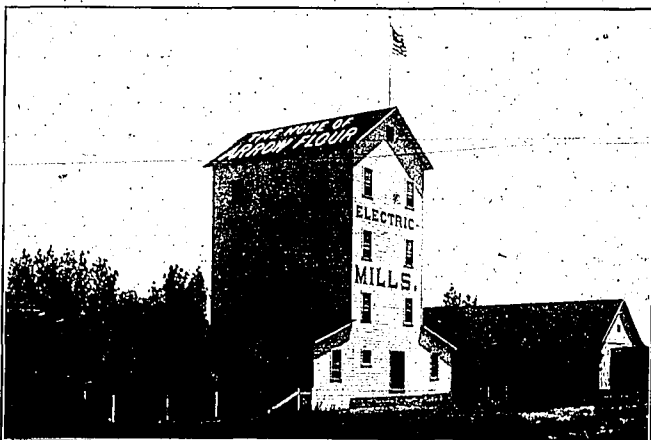

Hotpoint electrical appliances an first aids to the busy housekeeper, will be the exhibition idea of the Idaho Power & Light company, in a demonstration sale of the El Grillo, during the week of May 1-7. The company is making a special price for the most little utility cooker and will demonstrate its advantages together with the many other appliances which can be seen in its display room.

The company which is beginning its campaign for the development of electrical resources, is going to feature from time to time the value of electrical methods in cooking over thousands of the coal range and will each time place some one of the many Hotpoint appliances on sale.

ARROW FLOUR

A HOME PRODUCT

Made by the Pioneer Flour Mill of the Twin Falls Tract

The Kimberly Milling Company

KIMBERLY, IDAHO

TO APPRECIATE THIS AD YOU HAVE TO VISIT THIS STORE

The store that is just as complete as good looking. Where only unassorted merchandise is kept.

We appreciate it when faulty goods are returned and most cheerfully make good.

WATCHES

Twin Falls

A BOON TO FARMERS

First Flour Mill Aided Wheat Growers to a Market.

The first flour mill in the Twin Falls country was in possession of the bustling little town of Kimberley and is entitled to a place in the long list of Twin Falls home industries both by reason of its pioneering in the field and because of the excellence of its product, "Arrow Flour." Built by an expert mill man, who had learned the game thoroughly, the first mill was complete and modern in every way and a credit not only to its home town but the entire tract.

Making use of electrical power, developed from a drop in the irrigation

canal, the mill took its name from its source of power and was christened "The Electric Mill." For several years the mill with a capacity of a hundred barrels per day was the means of providing better prices for wheat to the farmers, who were handicapped by the heavy freight charges of the early days. It has enjoyed a steady and splendid patronage up to its full capacity due to the excellence of its product and the Arrow Flour is known to the cooks of the entire Twin Falls country.

R. H. Denton, who shortly after the building of the mill took charge to complete and modern in every way and a credit not only to its home town but the entire tract.

TWIN FALLS ON MENUS

Lincoln Produce Company Furnishes Golden Vesta to Diners.

Another Twin Falls product in bringing fame to Idaho along with the famous spuds as the part of every meal served to the traveling public upon the Union Pacific dining car. Lincoln Produce & Refrigerating company is being supplied regularly to the Union Pacific dining car

The First Plant of the Twin Falls Milling & Elevator Co.

service and is a signal testimony to the excellence of the Twin Falls product. More of the same golden brand is being shipped in all parts of the country, making an enormous total. Like all creameries the Lincoln, with subventions all over the tract, is distributing a good big sum yearly to the ranchers for butter fat and has also added in the bringing to of dairy cattle to increase the supply. Fifteen employees add to a pay roll of the city by about \$1000.

In another portion of the big scheme of the Lincoln Produce & Refrigerating company, is the artificial ice plant which supplies with a beautiful clear ice the business houses of Twin Falls. With a capacity of thirty tons daily, three big wagons are kept busy all day long delivering to all parts of the city, the third wagon having been added recently to care for the increasing trade. Vesta Distilled water and Vesta Ice Cream products

are well known products of the plant.

For the past three years Manager William Hendricks, of the company, has been maintaining a storage plant in connection with the ice business and is wholesaling storage products to the trade of the city.

CLEAR THE DESERT

Hendricks Sagebrush Grubber a Great Aid to Pioneers.

Hacking away at the tough sagebrush roots with a hand adz was a very slow process and at the same time a very expensive one, yet for years the only method known for clearing the irrigated lands.

Mr. Hendricks, who still operates one of the largest machines and black-ticking the difficulties and the expense of the machine, has placed his to the settlers, T. B. Hendricks, in grubbers in nearly every state in the 1900s, who was one of the first black-west and is still shipping to sections south in the city, decided to turn his mind to the task of inventing a grub-

bing machine. Many crude looking and ineffective models were made and tried and then cast aside, and the task again taken up. The first Hendricks grubber made strongly of a wooden frame and heavy metal knives proved the key to the problem of cutting the tough roots just below the surface and opened up a very profitable manufacturing field to its inventor. Later finding the access to the proper woods for a durable wooden grubber out of the question, the Hendricks machine was turned out on an all-steel product, which has been found to do the work of ten men in clearing the sagebrush.

Mr. Hendricks, who still operates one of the largest machines and black-ticking the difficulties and the expense of the machine, has placed his to the settlers, T. B. Hendricks, in grubbers in nearly every state in the 1900s, who was one of the first black-west and is still shipping to sections south in the city, decided to turn his mind to the task of inventing a grub-

A FRIEND OF THE THIRSTY

Blue Lakes Bottling Works Doing a Thriving Business.

One institution which has not complained of hard times or the Democratic tariff is the Blue Lakes Bot-

tling Works, owned and operated by L. I. Benoit and sons. Here business is always good and the soft drinks turned out by the establishment are always up to standard. As the pioneer firm in this line of business, the Blue Lakes Bottling Works has enjoyed an increasing patronage and its bottled goods are sold generally all

through Southern Idaho.

Last year the firm added a new line in the manufacture of cider and vinegar and has equipped substantially its plant to care for the production of both. By a special process the cider is kept pure and sweet and cannot be distinguished from the freshly milled article.

During the nine years of activity in Twin Falls, the proprietors of the bottling works have been identified with all the boating-moves and have loyally shouldered their share of the community burdens.

THE PURPOSE OF THIS ISSUE

While from the standpoint of remuneration for the publisher, the Home Industry edition is not a howling success, the purpose of the issue will be served, if it will make the people of this country realize how much is owed to the small home enterprises which year after year add to the wealth and stability of this new country. It is not the purpose of the editor to preach a trade at home sermon to the consumers but in a general way bring home to farmers and dwellers in the city alike, the thought that out of the bulk of a number of struggling industries representing a total payroll of forty thousand dollars monthly, is the general prosperity of the whole community. That to wipe out these industries through non-support and indifference and the city and tract inevitably loses not only that well circulated money, but loses in a thousand ways by the curtailment of other business and by the falling off in products consumed for which the farmer and the grocer, the merchant and the retailers generally receive a handsome portion of their business.

In this issue is contained only those firms who are considered in the producing line and while the line cannot be closely drawn, none of the retail merchants have been approached for support of the edition although just as much concerned in the creation of home industry spirit among the people. Without a single exception the editor was given hearty encouragement by those approached who are beginning to realize that better relations between consumer and producer, merchant and purchaser must come through better knowledge of the problems of each. The writers of the individual firms in the issue is the result of the personal investigations of the editor, who in his nine years residence in Twin Falls has grown to know the problems which make business conditions hard for all.

ROAD DRAG IS INEXPENSIVE

Constant Attention Is Price of Good Roads—Objection That Too Much Money Is Spent on Graders.

(By C. H. HULL, JR.)
I have watched the use of the road drag and the grader past my house this summer. The drag leaves the road in better shape—the grader plowing roughage in the middle while the drag smooths it off nicely. But the greatest objection is that the drag is not used often enough. Constant attention in the price of good roads, and the use of the drag is so inexpensive that good roads by its use are obtainable, or would be if the money were not spent in using the grader with four teams and five men. That's the way the money goes.

Permanency of Bridges.

Concrete bridges for roads are the kind that spell permanency. Between threshing outfits and heavy motor cars the county with shabby bridges is in for trouble.

Keep Water Away.

Run furrows along hills that may conduct water to a road and keep the water away from road and ditch.

Operating a Drag.

Slide the drag. You can control the cut by shifting your weight.

enormous profits have accrued to the average industry should note the fact that most of the men who have courage to develop are still hoping for a return for the efforts and the money invested and that in few cases have those hopes been realized. These men are the optimists of the nation, take them anywhere you will and Twin Falls has had many of them.

'Home Industry Week will mean nothing. It can mean nothing unless the germ of the idea incubated during this week grows during the other fifty-one and takes root of the purchasing public. The man who believes that he can succeed through the failure of his neighbor has not studied economic conditions with any degree of care and is doomed to failure himself. Home Industry does not mean the promulgation of a selfish doctrine by business men or labor or any one of the many units which make up a community. If Home Industry means in its essence, our concern in the welfare of your neighbor and is the perpetuation of the golden rule.

Thirteen tons of cigarettes are to be sent to the French soldiers. This will add a new volume to the smoke of battle.

The story comes of a Russian soldier, who, true to his army tradition, remained at his post after the officer who placed him there had been killed, refusing to be relieved by any orders but those of his officer or the czar himself. For this heroic devotion to duty he has been rewarded. It may have been fine obedience, not from an American standpoint, it was very poor common sense.

A prominent eastern pathologist cautions his readers to bear in mind that "the effects of juncation are, subordinate to those of the quantity ingested." If only he will tell us now whether this is a threat or a promise our relief of mind will be great.

Epidemics of one kind or another should encourage scientists who have promised the public meat and milk fresh from the laboratory to hurry along their experiments.

Sometimes we wonder what those girls who tell the preachers about the superlative qualities they demand in a husband have to offer in return.

Anybody tugger an extra billion around in his pockets can find a market for it in England.

AN APPRECIATED HOSPITAL

Institution of Early Days Has Expanded With City.

In the days when the sun beat down with pitiless persistence upon the dust and sage brush and ditch water, unfettered and bearing the fith of the now remote was the leverage of the settlers, a serious problem confronted the community. Sick men were not wanted in the crowded rambling huts and hovels. There was no place to put them nor a hospital to receive them short of Boise or Salt Lake City. To supply the needed hospital the energies of Dr. T. O. Boyd were directed with the result that in 1905, the Twin Falls hospital became one of the regular institutions of the tract, first being located in a small frame structure. Later a slightly larger frame building took care of the invalids. In 1907 the premier quarters in the present hospital gave relief for a short time from the crowded conditions. But through it all was the purpose of Dr. Boyd to have a modern up-to-date hospital which should be a credit to the city. So a year later plans were gotten out for the main building of the present handsome structure and it was pushed to completion.

From all up and down the Twin Falls branch railroad patients came pouring in and it was but a short time until the increased patronage demanded first one wing and then, the other until the present substantial structure resulted through the energy of one man.

Today the Twin Falls hospital has a capacity of thirty patients and it is skilled most of the time to hold back patients until a room is emptied. Its reputation has been built up through the efforts of a splendid staff of nine consulting specialists and physicians, who are capable of giving service equal to that of many larger cities. Its operating room has witnessed an average of one major operation per day for the past two years and the number of recoveries on an average are higher than for many large hospitals.

In connection with the hospital is maintained a perfectly equipped X-ray machine and fluoroscope with which Dr. Boyd has been able to do some wonderful work in repairing difficult fractures and dislocations, as well as in the line of many operations. Misses Crawford and Sewell, the managers of the hospital are entitled to much credit for the success which has attended the operations and the con-

tinued period. Despite the difficulty of obtaining experienced nurses at times they have by their own personal efforts established a perfect system in caring for the many patients. The Twin Falls hospital is one of the home institutions which is certainly appreciated and patronized.

GROWN UP WITH THE COUNTRY

Twin Falls Sash & Door Company the First in Field.

Probably the very first of the infant industries to invade the new irrigated territory opened ten years ago in the Twin Falls country, was the planing mill and sash and door factory, established by Adams & Pilgerlein, experienced mill men from Oregon, who were attracted to the new Idaho metropolis very early in the history of the city. A very substantial mill and lumber yard was their contribution to the bustling little city and in the early days the firm played a very important part in the upgrowth of the city by the speedy delivery of mill work to keep pace with the demands made upon it by the rushing in of hundreds in a day. And through it all the firm kept up the same high standard of workmanship which is today making its millwork set the pace for outside concerns.

In 1912 the senior member of the firm, George Adams, retired and Mr. Pilgerlein incorporated the business as the Twin Falls Sash and Door company and broadened its scope of endeavor by putting a man on the road to push new lines produced in the plant for the first time. Boxes for the fruit growers of the tract was the aim of Mr. Pilgerlein who placed expensive machinery for that purpose. Each year is seeing larger number of loyal Twin Falls fruit growers place their orders with a home concern, but still the big plant can care for a great many more. The manufacture of bee hives was also attempted about this time and today forms a very important part of the output of the mill.

Something of the growth of the business can be realized when from a four man plant in 1905, the present force includes fifteen men and distributes a payroll each month of approximately \$1100. Over six hundred thousand feet of lumber is converted into the finished products in this mill every year. Mr. Pilgerlein has had faith in the Twin Falls tract and invested many dollars in putting out Twin Falls products that are as good as those produced elsewhere and much better in many cases. His apple boxes

HAS HAD RAPID GROWTH

Western Auto Company Featuring the Ford Cars.

Among the pioneer automobile firms of the city and one that has kept pace in every way with its growth is the Western Auto company, which is located today in a handsome brick fire proof building and is handling a large amount of the automobile business of the city. Starting in a little room on Shoshone street north, now occupied by another business, the Western Auto company began the erection of a sheet steel and concrete building on the same street but nearer the railroad station. In this building, under the direction of Hall & Belleville and later J. A. Hansen, the company began building up a business which has continually increased.

In October, 1912, the business was purchased by a group of business men and shortly after incorporated with George H. Elsieley as manager. In the spring of the next year the company moved to its present commodious quarters and blossomed out as the Ford agency.

While catering to a large extent in its completely equipped repair shop to the fite of the Fords, the competent and skillful mechanics have established a reputation for mending almost any member of the auto family and the business of the firm has grown by leaps and bounds.

Many Fords have come and gone through the Western Auto company's selling force, only to have their place taken by more Fords until on any road in the Twin Falls country, you will see someone without seeing the busy little cars running along neck and neck with the bigger and bigger sized machines. Coupled with the repair service and the selling force this firm has assembled in their stock rooms, parts enough to rebuild any one of Henry Ford's pots, while the stock of tires and accessories runs into the thousands of dollars. Service is the motto of this firm and Manager Elsieley is fast spreading his slogan of service to the branch agencies which he has established in the surrounding towns. Ford service is everywhere for the Ford owners of Twin Falls county.

The Good Qualities of

IDAHOME

"THE PERFECT FLOUR"

Are as Strong as the Chain Around this Ad

IT'S ALWAYS GOOD

AT ALL GOOD GROCERIES

Let us show you through our Mill

Twin Falls Milling and Elevator Co.

BELIEVES IN TWIN FALLS

Twin Falls Milling & Elevator Company Occupies Big Plant.

J. K. Mullens, of Denver, Colorado, and one of the biggest millers of the West, evidently believes in the Twin Falls tract and is not afraid to spend his money in reaching out for more business. As a result of his faith the Twin Falls Milling and Elevator company's business has grown every year and with it the size of the plant and warehouses. Reaching out for more wheat, with which to keep the big mill running, the company has established elevators all over the tract, great big concrete structures representing a big outlay of money, but at the same time insuring permanency and low cost of upkeep. To put the best of everything into any project is typical of Mr. Mullens.

L. L. Breckinridge, the manager of the Twin Falls country, learned the Mullens method under the head of the firm in Colorado and has been an able exponent of the art of pushing things to the front. From an elevator with a small feed mill adjacent, the addition of a splendid six-hundred barrel flour mill added to the bulk of the

property looming up near the Short Line tracks. The mill was complete. It was modern and was constructed of brick with the same idea of permanency which has marked the moves of the company at all times. The outlay of money for buildings has been a vast help to the money circulated in this city. The mill bigger than spent each year, among the farmers for wheat means a local circulation that has made money much easier at all times.

Last year the company began the erecting of large brick warehouses on its property and today the Twin Falls Milling & Elevator company occupies with substantial buildings all its larger plot and represents a payroll monthly of a good many hundred dollars.

Idaho flour made in the big mill has a well known local fame among the housewives due to the educational campaign conducted during home industry week from year to year. While only a small part of the big output of the mill finds a local sale, the company, through selling agencies and created and now holds a wide stretch of territory in the Southern states and sends many train loads out yearly to that section. One order in almost thirteen crossed the Pacific to find an already created market

among the short-eyed celestials and provided an opening for a much bigger trade.

EXCELSIOR

Gloystein Brothers Putting the Well Known Cycle on the Map.

The good old X motorcycles have made a marked success in the Twin Falls country, both for economy of up-keep and cheapness of operation. Excelsiors go anywhere that any other cycle will go and they will go where some of the others will not. Londs and bad roads are alike to the sturdy little machine which pulled the steep pitch on the Shoshone falls grade with five people on it—a total load of 650 pounds and did it easily. It is a record not equalled by any other cycle and by a number of four wheeled cars.

Gloystein brothers, while young men in the business life of the city, pre among the early pioneers and with their father, C. F. Gloystein, helped to make the Twin Falls tract a net work of improved farms. They are still optimists and have invested a large sum in the motorcycle accessory and repair business. The Gloystein service department is right up to the minute.

A HOME SEED COMPANY

Darrow Brothers Filling a Place in Country's Development.

Six years ago two brothers already deeply interested financially in the farm lands of the Greater Twin Falls tract, established a new business in the city—a seed business which started to provide pure seeds to the ranchers and keep the profits at home instead of allowing everything to go to Salt

Lake City and out of the community. The business, owing to accessibility and the care displayed by the members of the firm, grew apace. The frame building next to the Felt Contracting Shop on Shoshone became too cramped for the stock carried and the present building of brick was the natural outgrowth. In this handsome building Darrow Brothers have gathered a big seed stock of every variety from garden seeds clear through the list to the last want of the rancher.

Supplies for the orchardist and the poultry owner and the bee man occupy a place in the big stock. In fact, the pioneer seedmen have endeavored with marked success to supply every want in the way of seeds and are reaching out each year for new business. A large illustrated catalogue of their stock finds its way into the hands of the people of the tract and a very flourishing mail order business has sprung up with the outlying towns as a result.

BORAH MAY NOT ENTER THE RACE

Will Fight Reactionaries in G. O. P.

WILL NOT BE CANDIDATE FOR PRESIDENT

To Issue Statement to Republicans Warning Them Against Nominating the Old Crowd.

Washington — Political gossip in connection with the next Republican nomination is developing here in a way that supplies old hands at politics. They attribute this precautionary step to the influence of the newspapers, which no longer will let them alone to choose a candidate in quiet and peace.

The quiet and peace men have been active. They have their agents here and all through the middle west. It would surprise some people to learn that Charles W. Fairbanks of Indiana, in making a dead set for the leadership next year and that he has so much financial backing that the radical members of the party are taking serious note of his motions.

It has gone so far not only with regard to Fairbanks, but also some other candidates who are formed reactionary that one of the so-called progressive candidates, Senator William E. Borah, has concluded to issue a statement and a note of warning to his party.

It is believed Senator Borah will include with his warning a declaration that he is not and will not be a candidate for president. Mr. Borah is one of the acknowledged heavyweights of the senate. No man on the floor can lead a candidate to his own defeat and not even Elmer Borah, command more attention when they speak than Borah. He is heart and soul a progressive and wishes to see his party win, but he is convinced that with a reactionary candidate and platform it will lose. So it is, he has concluded to take himself out of the race because he finds that he is geographically unavailable. In so doing he will have an opportunity to make a strong protest against the growing tendency to take a Republican victory for granted and to arrange for a conservative candidate and platform.

The Borah statement, when it comes, will not make matters, it will be taken to a great extent as a warning to the sentiment of the Republicans of the middle west, and mountain regions on the platform and the nomination. It will, in addition, be taken from a Republican who knows the feeling of Theodore Roosevelt and may throw a slight on the probability of the local of the Progressives, who party next year.

Close friends of Colonel Roosevelt are said to have become convinced that Colonel Roosevelt considers himself down and out as a politician. His present frame of mind is that he will quietly support the Republican candidate provided he is a representative Republican. Colonel Roosevelt does not expect to pick out a candidate. He has no thought of being a defender. He does not even know that his judgment of candidates is the best, since he selected Taft.

ELECTION POSTPONED

Twentieth Century Club Annual Meeting Delayed One Week.

The Twentieth Century club met at Jewel hall Tuesday, April 7, at 2:30 p. m. and held a short business session. Because of the interest of the hour and many club members being absent, it was deemed advisable to postpone the election of the club officers until Tuesday, April 20, when it is hoped all of the members will make it a point to be present. It is also expected that the members who expect to attend the club breakfast, after their debate as to the committee may know how many to plan for at that time. This is important.

Take that busted bike to Glyndon Smith's, they'll fix it. Mar. 24.

ARBOR DAY FOR SCHOOLS

County Superintendent Urges Proper Celebration by County Schools.

In accordance with section 188 of the School Law of Idaho, I hereby set apart Friday, April 10th, 1915, to be observed as Arbor Day throughout the school districts of Twin Falls county, and recommend that it be observed as a community affair, teacher and pupils and patrons taking part.

Teachers, school boards and patrons have done much in the way of planting trees and improving the school grounds. Much still remains to be done.

The school is one of the centers of the life of a community, the one in which is gathered its most impressionable element. The school is supported at public expense in order to make good American citizens. It aims at securing the highest possible development of mind and character. Every element of order, neatness, and beauty and every broadening influence, every appeal to the finer nature of the child means better men and better women and a more thrifty and prosperous community.

Let us make the school environment the best possible, the most beautiful in the community.

BERTHA NORT, County Supt. of Public Instruction, Twin Falls, Idaho, Mar. 31, 1915.

TEA AND COFFEE HOUSE

Grand Union Tea Company to Establish Big Branch in Twin Falls.

The Grand Union Tea company, with headquarters in Brooklyn, New York, is preparing to establish a big branch in this city. The company was recently incorporated in Idaho. The company besides carrying tea and coffee will put in a twenty thousand dollar line of fancy groceries. Such is the statement of M. A. Kholev, local manager of the company. John Evans, western manager of the company is here from his headquarters in Oakland, California, assisting Mr. Kholev in making arrangements in establishing the business. The company has leased the room occupied by the Twin Falls Fruit Store, in the St. Regis block, and is having up-to-date fixtures made for the store. Mr. Kholev will have charge of the business as manager.

McDOUGALL-PATTERSON

Twin Falls Young People United in Marriage Wednesday Evening.

On Wednesday evening of this week occurred the marriage of Miss Alice McDougall and Thomas C. Patterson. The ceremony was performed by Rev. Walter E. Thurman, pastor of the First Christian church, at the pastor's study. Both young people are well known in the city, where they have lived for several years. They will make their home on a farm on the Salmon tract, one party next year.

MAKES CLEAN SWEEP

Republicans Elected Mayor of Chicago by Great Majority.

Chicago, Ill., April 7.—Complete returns from yesterday's election show that William Hale Thompson, Republican, was elected by a plurality of 111,475. Robert M. Switzer, Democrat, received 52,722. Election officials estimate that Thompson received 61 per cent of the woman vote.

WILL ARRIVE NEXT WEEK

Rev. L. B. Frank, New Rector of Episcopal Church, Will Preach April 18.

The Rev. L. B. Frank, of Courdaine, who has been called as rector of the Episcopal church in this city, will arrive in Twin Falls next week with his family. He will deliver his first sermon on Sunday, April 18.

MODERN WOMEN

You are requested to be present at Moose hall Sunday, April 11th, at 2:30 p. m., to attend the funeral of Mrs. E. Marwood.

BAND SCORES

BIG SUCCESS

Home Talent Production Draws Big Crowd

Forty-Five Minutes From Broadway Makes a Hit

Clever Acting and Splendid Music Keeps Twin Falls Audience Well Entertained.

"Forty-Five Minutes From Broadway," as interpreted by some forty clever Twin Falls people under the able direction of Wilfred Mackay Olson, drew nearly a capacity house at the Lavering Monday night and netted the best box office sum for their expenses for the year. To specify all of the stars in the attraction is out of the question, for from the leading roles down to the musical ability of the pretty girls in the chorus and the brave policemen and reporters, there was not a single thing out of harmony in the whole performance. To Mr. Olson, who gave his time to the production and without doubt is responsible for its success should be accorded high praise, while the clever acting of Charles Hutto and Mary Jane received hearty and repeated accolades. The production was different from the minstrel show usually given and without a doubt was just as pleasing to the Twin Falls people.

ABE AND MAWRUSS

This Famous Pair Need No Introduction to Twin Falls.

For nearly two years the theatricals of Twin Falls have been hearing of the wonderful success in New York City of "Potash and Perlmutter" and now at last we are to see these delightful characters who come to the Lavering house on Friday, April 16. "Abe" Potash and "Mawruss" Perlmutter scarcely need any introduction. Millions of persons have read Montague's famous stories in the Saturday Evening Post and something like a million have laughed until they cried over the joys and sorrows of these lovely clown and suit partners as presented on the stage of the Cohan theatre, New York.

The story of "Potash and Perlmutter" deals with the fortunes of Abe and Mawruss, who risk their all in order to save from a Russian prison a young man who has fled to country to avoid persecution. The play teems with laughs, but there are also many sweet love-passages and touches of pathos that appeal to the heart and give to the comedy its lasting hold upon the audience.

TWIN FALLS BEATS FILER

One Sided Ball Game Played in That City Friday Afternoon.

Last Friday afternoon the Twin Falls high school baseball team went to Filer, where they played a game with the high school of that thriving little city. The game was a very one sided affair, Twin Falls winning by a score of 18 to 2. Friday afternoon the team went to Idaho where they will cross bats with the high school team of the West End city. A good stiff game is looked for as the ball boys have been practicing hard to try and win the game.

CHANGE OF VENUE

Editor of Idaho Republican's New Trip Will Be Held in Twin Falls.

Lynd Trago, editor of the Idaho Republican, at Blackfoot, who is charged with criminal libel has been granted a change of venue from Blackfoot to Twin Falls county.

Riverdale Route to Boise. Follow the red arrows from Blackfoot to Riverdale, the only good road. First class accommodation. Garage, store and coal sheds. J. W. HARRIS, March 23.

COMMERCIAL CLUB ELECTS OFFICERS

L. E. Salladay Elected President For Term

ATTORNEY T. L. DELONG TAKEN OFFICE OF VICE PRESIDENT

New Directors to Meet Soon to Elect Secretary and Treasurer of Association.

On Tuesday evening the members of the Twin Falls Commercial club elected officers to serve for the ensuing term. The election was a very quiet affair, not many of the members voting. The following officers and directors were elected:

President—L. E. Salladay.
Vice President—Carl L. DeLong.
Directors—H. J. Felling, J. M. Maxwell, W. H. Eldridge, Samuel Hart, and L. T. Wright.

The new board of directors will meet in a short time to elect a secretary and treasurer for the ensuing term.

PROCLAMATION BY THE MAYOR OF TWIN FALLS

It appearing to the undersigned, mayor of Twin Falls, that the diseases commonly known as typhoid, typhus, and cholera, are prevalent among coyotes and dogs, in the vicinity of Twin Falls, and that there is great danger of loss of life from dogs biting the citizens of said city;

It is therefore ordered, that ordinance No. 167 be in full force and effect, and it is hereby declared that it is unlawful for any owner or keeper of any dog, to permit said animal to run at large within the corporate limits of Twin Falls, unless securely muzzled and restrained from biting.

Dated this 6th day of April, 1915.

C. O. NEISS, Mayor.
Attest: STUART H. TAYLOR, City Clerk.

DAVIS FOUND GUILTY

Tried by Jury in Probate Court Wednesday Morning.

J. A. Davis, who has been conducting a children's band on the streets of Twin Falls for the past winter and who was arrested Monday on complaint of juvenile officer Ormsby for making money from children under sixteen years of age, had his hearing in the Probate Court Wednesday morning. The hearing was before a jury of the following citizens: J. Clyde Lindsey, L. A. Salladay, Don McKay, Peter Dean, J. W. C. Drake and H. D. Stover. The jury was out on business for a few minutes returning with a verdict of guilty as charged. Judge Shank will pass sentence on Mr. Davis Friday afternoon.

MILLINERY SPECIAL AT BOOTHS

Pretty trimmed hats for \$1.98 are displayed at Booth's by the millinery department. These hats are extremely good looking. Booth's are also showing the new silk auto hats in white and black and white at \$1.00 each. These are light-weight, pretty and practical.—Adv.

MASS MEETING CALLED

Candidates for City Officers to be Nominated Friday Evening.

Twin Falls, Ida., April 7th, 1915.—We, the undersigned taxpayers and voters in the City of Twin Falls, hereby call a mass meeting of the voters to be held in the rooms of The Commercial club on Friday evening, April 9th, 1915, for the purpose of nominating candidates for the coming City Election:

THOS. M. ROBERTSON,
C. E. HOOTH,
A. M. BOWEN,
J. M. MAXWELL,
E. J. FINCH,
GEO. F. SHAGGUE,
A. B. COLWELL,
F. P. BRACKEN,
SAMUEL HART,
H. J. FELLING,
L. T. WRIGHT,
W. P. GUTHRIE,
A. L. SWIM,
A. J. PEAVEY,
H. A. READ,
THOS. DOVERY,
WILBUR S. HILL.

DOUBLE BILL AT ORPHEUM

Good Vaudeville for the Last Three Nights of the Week.

For the last three nights of the week the management of the Orpheum has been able to secure a good double team for the vaudeville acts. Moore and Moore are said to be fine in their singing and dancing act, as is Eldy and Kvarno in their great comedy act. In the motion picture, Fifty and More will be seen at the San Diego exposition with a Keystone comedy. "The Mutual Weekly" is always one of the best, showing as it does the greatest events of the world. "The Legend Beautiful" is a dramatic masterpiece well worth seeing. "Peanuts and Bananas" is another Keystone comedy which is hard to beat.

DEATH OF CHARLES MARWOOD

Passed Away After Illness of Typhoid Pneumonia.

Charles E. Marwood, who has been seriously ill for several weeks of typhoid pneumonia, passed away Thursday morning about four o'clock. Mr. Marwood has resided in Twin Falls for several years and was well known. He was a member of the Modern Woodmen of America and the Fraternal Order of Eagles. The funeral will be held Sunday afternoon from the Greenman chapel, under the auspices of the two orders. He is survived by his parents, who live in Kansas, a brother living in the state of Washington, and a sister in California.

SOCIALISTS FILE TICKET

Complete Ticket Filed With the City Clerk.

The Socialists of Twin Falls have filed their ticket for the city election, which takes place Tuesday, April 27. The following is the ticket: Mayor—J. C. Crawford.
For Councilmen, First Ward—H. H. Froehlich, Earl Noble.
For Councilmen, Second Ward—J. S. Woodward, G. W. Tarr.
City Clerk—Herman Schuriger.
Treasurer—S. G. Giffeland.
Police Judge—T. P. Crumley.

SPRINKLING CONTRACT LET

A. L. Bessler and J. A. Johnson Awarded Contract by City Council.

A. L. Bessler and J. A. Johnson were given the contract Monday evening by the city council for street sprinkling for the ensuing year. The city will allow each man \$4.00 per day for himself and team. Sprinkling will begin in good shape Saturday.

NOTICE EAGLES

You are requested to meet at our A. C. Sunday, April 11, at two o'clock p. m., to attend the funeral of Theodore E. Marwood.

Advs.
Good equity in Wood, Bass and Fresno Valley. Kinney Wholesale Co. Mar. 24.

RUSSIANS TO PUSH IN CARPATHIANS

Austrian and German Commanders Getting More Soldiers

FRENCH CONTINUING OFFENSIVE IN THE WEST

Operations in the Dardanelles Have Been Resumed. Restrict Use of Liquor in England.

London, April 7.—The military situation in the Carpathians is "disappointing" with the prohibition question in the interest of the British public.

The cabinet meets today. It is expected that announcement will be made of measures to provide drastic restrictions on the consumption of liquor, but total prohibition is not expected.

Attention is concentrated on the Carpathian passes, where the Russians are bringing up heavy reinforcements to push their attack, the success of which is expected only through weight of numbers. On the other hand the Austrian and German commanders are also making strenuous efforts to strengthen their forces.

Foreign reports that the section near the Vinkov pass, of which Vienna admits retirement, extends for a distance of 17 miles. To offset, Vienna claims a counter offensive movement near Lypkov pass, where the Austrians report the taking of several Russian positions with the capture of 7000 prisoners.

A conservative interpretation of both the Russian and the Austrian reports leads to the conclusion that the Russian offensive at Lypkov has been checked while they have forced their way through the Rostok pass, capturing two villages on the southern side of the range.

In the western arena of the war the French continue their offensive movement between the Meuse and the Lorraine frontier. Their reported gains in the "Alfy" forest indicate the possibility of a new danger for the Germans holding St. Mihiel, while the advance to the east of Verdun is regarded in London as threatening St. Mihiel from the north. Berlin reports heavy fighting in this region without results for the French.

The belief that operations in the Dardanelles have been resumed is the general opinion today. Nevertheless complete silence prevails concerning details of the result of any activities.

Capital News.

BERGER TO STAGE PLAY

Local Talent to Present "The Miller's Daughter" April 30th.

As Berger and vicinity have excellent talent, who have been rehearsing the play that is to be given for some time, the public can be assured of an enjoyable evening.

Under the auspices of the teachers of the Berger school, a four act drama entitled, "The Miller's Daughter," or "Bound in Honor," will be staged Friday evening, April 30th, in the auditorium of the Emerson school at Berger.

The cast of characters is as follows: David Lawrence, Lord Harrington, an aristocrat.
P. Teaser John Derwent, a millionaire.
A. John Squire Thornton, C. L. Smith.
Lord Hyde, Cecil Harris.
Teddy Brown, Lendy Logue.
Humped Tom, C. L. Curry.
Mountain Mack, J. L. Logue.
Monsieur Mac, Mrs. J. M. Pierce.
Cousins Harrington, Mrs. Vera Foster.
Mrs. Derwent, Mrs. C. L. Curry.
Lady Isabel Hyde, Mrs. A. A. John.
Beauty Lynn, Helen Hudson.
Miss Miller, Gerant, the miller's daughter.

An admission fee of 10 and 25 cents will be charged, the proceeds are to be used for school equipment. A cordial invitation is extended to everybody to come and enjoy the representation of home talent.

Take that busted bike to Glyndon Smith's, they'll fix it. Mar. 24.

These who have followed the claims of Governor Alexander concerning the million dollar saving to the state will no doubt wonder how much of it is real saving and how much is political thunder. To give credit where due, Governor Alexander has made some saving to the state and has shown his intention of keeping a political promise, but to swallow the million dollar saving one must be blindfolded before taking the dose. While expenditure of appropriations has made the saving look great, yet viewed from a normal angle, looks like taking money out of one pocket and putting it in another. If by reason of curtailed appropriations the state incurs an indebtedness that is sure to follow, then the money saved must be taken from the taxpayers' pockets next year from the taxpayers' pockets next year administration will have to shoulder the curse of doubling the appropriations for years to come. There is no question but that every state administration has been extravagant and wasteful of the state money and the practice must be stopped. But it must be done by business methods and without the accompaniment of brass band politics.

OUR BLOCKADE PROTESTS USE LESS

"Hands off!" is the message the English papers send to America in reply to our protests against the recently proclaimed blockade against Germany. Almost without exception the British press make it very clear that while any American protest will be received with all courtesy, the practical effect upon the blockade will be nil. They suggest that American objections may safely be disregarded, as America is in no position to place any backing of force behind her protests. Perhaps the frankest statement of these views is found in the London Daily Express, which makes no bones about telling us that England has the whip hand, and that we can like it or not, as we please:

"We believe that to fighting Germany we are fighting the battle of civilization and human progress. We shall not stay our arms nor lay aside one of our weapons. Our command of the seas makes it possible for us to prevent American cargoes reaching German ports. We are convinced that every shipment of copper, or cotton, or foodstuffs that reaches the enemy lengthens war and adds to the fearful toll of death. We are, therefore, determined to cut off Germany's supplies from America and all other neutral countries."

"America will, of course, protest. We shall consider her protests with all courtesy. It is surely better to tell the truth."

The most interesting view, however, is found in the London Times, which puts forward the thesis that the Allies are but following a precedent set by the United States in the Civil War, and that, therefore, America has no moral right to make a protest. The Times explains the impossibility, from the English viewpoint, of accepting President Wilson's proposals:

"Germany who Washington in substance, that she may suspend her partial operations and refrain from endangering American ships and lives if England will allow her to import all the food she needs through agencies whose names are communicated to the United States, and who will hand it over to licensed dealers for consumption by the civil population only. We have already explained that a surrender by us, in any proposal of the kind would be, in the circumstances, a surrender to blackmail. It would be an admission that German strategy had intimidated us, and a direct invitation to our enemies to resume the process of their encroachment, even when they had imported enough food to carry them to the next harvest."

It then proceeds to say that even if Great Britain were to accept the proposition made by Germany because of Washington, there is no guarantee that Germany would live up to her agreement and that America is in a position to force her to do so. The Times then remarks:

"We are satisfied that on reflection the utterly impracticable nature of this project will be perceived as early as the Atlantic, and that the plan will be seen to be a more diplomatic trick. American opinion for the moment seems to have forgotten that in all great international disputes the action against which neutrals who choose to stand on the bare letter of the law might plausibly protest. Our Washington correspondent reminds us that this was very markedly the case during the own Civil War. The victory of the Union was in great part due to the ruthless blockade of the Southern States, which it was one of Lincoln's first acts to proclaim. The blockade was certainly irregular, under the Declaration of Paris, for many months after it began. The Washington Government knew and confessed that it was irregular. All America knew the terrible loss and hardship which it inflicted on the whole population engaged in one of the chief of English industries."

"But Lincoln's Government appealed for intervention and for indulgence, and the appeal was but in vain. Under the exultance of men like Bright and W. E. Forster, who understood the greatness and the value to mankind of the blood for which the North was fighting, the British democracy did not scrutinize too closely the acts of a kindred people struggling for its life. Therefore they showed the large, whole and generosity of their race."—Literary Digest.

CONVENIENT IN THE APIARY

Brush Made of Manila Rope is Handy for Cleaning Combs of Bees—Tool Box is Useful.

I have several little conveniences that I use in my apiary, one of which is a brush for clearing the combs of bees, writes H. A. Manly of Milwauke, in the Wisconsin and Culture. Take a round stick, 14 inches long, and with a rip-saw divide it for about three inches, leaving the other end for a handle. Take a piece of one-half inch Manila rope six inches long, and with the strands fill the opening in the stick, allowing them to project on both sides of the stick. At the end secure it with bee wire and securely.

Bee Brush Made of Rope.

Fill the stick with one-inch strands. This makes the best brush I have seen, and is almost indestructible.

Another convenience is my covered bee seat and tool box. My hive seat is a box 14 inches long, 6 inches wide and 4 inches high. The frame work of the cover is made of 1/2 by 1/4 inch white pine. The roof is rubbered. Everything under it keeps dry, though I leave it standing in the apiary all summer, and at the same time I take no chance of setting anything on fire in the honey house.

FEEDING MASH IN DRY FORM

More Equal Distribution of Food is Obtained by Use of Hoppers—Feed Some Cut Done.

Some of the most experienced poultry breeders claim that the best results can be obtained by feeding mash in dry form in hoppers where fowls have access to it at all times. This allows a more equal distribution of the food.

A slight feed of moist mash about three times a week in addition to this dry mash is good. It is essential in preparing this mash that the mixing process not be slighted, as a little longer, taking well, results in a much better mash and prevent the using of a excess of water, which tends to make the mixture nasty.

By mixing green cut bone with the mash in the quantity hereinafter given a food will be obtained that is unequal for laying hens.

Probably the best way to feed this ration is to give the flock a quantity which they will consume entirely in from eight to ten minutes.

This should be given them three times a week and the amount gradually increased so that each fowl will receive on an average of one ounce at each feeding on every two days. In other words, about one half ounce of green cut bone per day is recommended for the whole amount.

Alfalfa Versus Timothy.

In one ton of alfalfa hay there are 1400 pounds of digestible nutriment, while 2200 pounds are digestible protein. In one ton of timothy hay there are 220 pounds of digestible nutriment, of which 50 pounds are digestible protein. The nutrients in the timothy hay are furnished a little cheaper than in the alfalfa, but the protein in the alfalfa is far cheaper than in the timothy. As a dairy feed we would consider alfalfa hay cheaper at \$24 per ton than timothy at \$20.

Cracks Bad Venturers.

Having cracks in the barn is not a good system of ventilation. A draft of cold air causes the cow much discomfort. Windows hung at the bottom, which partly or even will allow the fresh air to enter and not stirle the cow directly.

Feed Young Stock Liberally.

The native, plan and all the young stock on the farm will pay splendid dividends on a good liberal growing ration during the cold weather. Feed for young stock is always too properly invested if the young stock is in the right kind.

Should Possess Character as Indicated by Bold Carriage, Strong Front and Masculine Face.

There are many essentials for an ideal ram. First, of course, is that he must be a sire. A breeder, if you will.

Granted this condition, there are many other important features. He must possess character as indicated by bold carriage, strong front and a "sirey" look. His face should be bold, strong and masculine.

These characteristics are to be taken as indicative of ability to produce these characteristics in his offspring.

However, these characteristics must be good ones; for a sire that possesses masculinity and character, strong ability to produce his characteristics, must have good ones to produce, or his influence is bad.

A masculine ram of bad conformation is worse than one lacking in masculinity of the same quality; otherwise, because he is more likely to produce his faulty faculties.

Granted that we desire the good qualities, what are they? We must

ESSENTIALS FOR IDEAL RAM

Should Possess Character as Indicated by Bold Carriage, Strong Front and Masculine Face.

BOOTH MERCANTILE COMPANY

WILL BE REPRESENTED

Western States to Protest Against the Passage of the Ferri Bill.

Idaho with the other water power states of the west including Oregon, Washington, Utah and Colorado and possibly Montana, Wyoming, Nevada, North and South Dakota, will be represented at the important water power conference to be held at Portland in June for the purpose of discussing the Ferri bill and protest against its passage by congress. This bill seeks to give additional federal jurisdiction over water power sites in the west. The last legislature in this state deeded Governor Alexander, Ex-Governor Hawley, Representative Randall and others to attend the Portland conference. Information has just been received that Washington and Utah and the Colorado legislatures passed resolutions to send delegates to the conference while the other states named received the Oregon memorial too late to pass upon it. Their governors will appoint delegates.

The Oregon memorial recites the same claim taken by the several western states with regard to water power sites in the following language:

"That the title to the beds of all non-navigable streams and the water power within their banks now unappropriated and as yet not alienated by the state of Oregon, and the title to the beds of all navigable streams within

the state of Oregon and the water power within their banks (subject only to the rights of commerce) is vested exclusively in the state of Oregon and the whole people thereof.

"That the unappropriated or reserved or withdrawn government lands on the banks of said streams, wherein water power is available, while necessary to development of said power, are in no case of value equal to the value of the water-power within said banks and owned by the state of Oregon.

"That the state of Oregon does not concede that the proportion value of said water-power to the value of said lands necessary to its development is less than the ratio of 50 to 1.

"That under such conditions, it is to the benefit of public policy that the government of the United States, relinquish to the state its title to lands needed for water-power development, under such terms as will safeguard the public from monopolistic or speculative control.

"That of importance equal to the water-power development is the creation of hydro-electric markets now interfered with by burdensome restrictions on the settlement of public lands and on the utilization of mineral and other products, extending in Oregon alone over tracts equal to nearly 60 per cent of the area of the state."

Capital News.

Chas. Miller was taken to Twin Falls last week very ill and was under the care of a physician. He returned Sunday evening much improved but very weak.

Blanche Horvack shopped in Twin Falls Saturday.

Carl Fredericksen made a business trip to Kimberly Monday.

Mrs. Dillon is progressing nicely and will be home soon.

Mr. Applebaum has moved his family into their new home and is arranging his drug store and refreshment parlor.

Mrs. Hoffman, of Golden Valley, spent a few days in Murtough calling on friends.

Little Helen Pomeroy is among the sick this week.

Mrs. Francis L. Johnson and Miss Jane entertained Mrs. S. Hoffman from Monday until Wednesday. On Tuesday afternoon they gave her a surprise party, inviting several of the ladies and preparing a birthday box, which contained a token of remembrance from each lady, thus celebrating her 24th birthday. She was busily engaged opening packages every 10 minutes. Refreshments consisting of cake and sandwiches, pickles and coffee were served. Those present were Mrs.

RESTRICT ISSUING OF PASSES

Short Line to Give Few Passes to Officials.

The Oregon Short Line will restrict issuance of free transportation to officials both state and county to the pure food commissioner and his deputies, the state veterinarian and his deputies, the public utilities commissioner and the sheriffs and their deputies. This, it is understood, is the information that will be transmitted in due course of time by E. E. Calvin, vice president and general manager of the Oregon Short Line, to state and county officials applying, or to the public utilities commissioners.

The public utilities commissioner may buy Saturday certificates in the various common carriers applications for transportation as made by state and county officials. There are many of these applications. They come from every department of state and from many of the sheriffs of counties. The Northern Pacific, the Great Northern, the Spokane & Inland, the Southern Idaho and other common carriers have notified the commissioner they will issue transportation. Capital News.

A repetition of your want ad—over a dozen publications it is—would be a really inexpensive way of selling that property.

Want ads pull. Did you ever try the Times?

charge, at \$30 p. m. A helpful service carefully conducted for boys and girls from 12 to 16. Senior C. E. at 7:00 p. m. R. E. Antile leader. Every effort is being put forth to make it a booster meeting. Special features. Evening services at 8:00. Sermon theme, "When Did the Church Begin?" A Bible investigation of a Bible theme of interest to all. The Bible will be given credit for what it says. The Christian church extends a glad hand to all worshippers.

WALTER E. HARMAN, Minister.

NEUTRALS TAKE CHANCES

Germany Disclaims Responsibility for Loss of Lives by Submarines.

Washington — Government officials took under consideration Tuesday a statement from the German embassy, quoting an official message from the Berlin foreign office in which responsibility was disclaimed for the loss of any neutral lives on board the British steamer Falaba, recently sunk by a German submarine.

The claim is set up by Germany that the Falaba was not among British merchantmen, were armed, and that military necessity made it impossible for the submarine to give any longer time than was allowed for the passengers to escape.

State department officials say that the death of Leon C. Thresher, an American, lost with the Falaba, constitutes a complicated case. If the German view that all merchantmen being armed are in the category of warships is accepted, the rights of neutrals to travel aboard belligerent craft of any kind would be circumscribed. Furthermore, Germany contends that sufficient time was permitted for the escape of the passengers, and the intimation is given that if it was not included among those saved there was an act of negligence for which the Germans were not responsible.

Early Tuesday President Wilson told callers that no steps had been taken diplomatically by the United States in the Thresher case, beyond efforts to obtain facts and circumstances under which Thresher was drowned.—Statesman.

GERMAN RAIDER INTERRED

Will be Tied up and Officers and Crew Keep Out of Struggle.

Newport News, Va. — Commander Max Taterlehn, of the German auxiliary cruiser Prinz Eitel Friedrich asked the United States government, through port authorities here, Wednesday night to intern his ship and crew. Up to the last moment the German skipper kept up the appearance of being ready for a dash to the sea, and when the time for decision finally came he explained that failure of "expected relief" to arrive had made it necessary to intern rather than "deliver crew and ship to fruitless and certain destruction by British and French warships waiting off the Virginia capes."

Thursday the commerce raider will make her last cruise of the war and will be taken to the Norfolk navy yard where she will be kept in the ship yard here, where she has been held since being taken to port on March 10, after the remarkable commerce-grepping voyage from the orient, during which she sent the American ship William P. Frye to the bottom.

Collector of Customs Hamilton boarded the Prinz Eitel after 7 o'clock Wednesday night with an imperative notice from the Washington government that the time for his stay in this port would expire at midnight Wednesday and that he must leave American waters by 4 o'clock on the morning of April 8. Before the customs collector could deliver the message, Commander Taterlehn handed to him the written announcement of his decision.

This operated to lift the American embargo against merchant ships of all European nations leaving this port, which had been in force since Tuesday.

merchant vessels were immediately permitted to leave port, and the German boats at Newport News and Norfolk were kept open until 10:30 o'clock, loading, clearing—Statesman.

SOCIETY NOTES

Society items for this column will be gladly received by The Times.

The Wednesday Auction Bridge club has been postponed for an indefinite length of time.

The Curry Teachers' association will meet at the Curry school house Friday, to elect officers.

The Woman's Home Missionary society will meet Thursday, April 8, at the home of Mrs. Kayser.

Mrs. Hagar was hostess to a large number of ladies and their children on last Saturday. The youngsters found great pleasure in an Easter egg hunt, and were later served with delightful refreshments.

The Alceira club met last Friday at the home of Mrs. J. C. Thompson. Mrs. Starg gave an interesting book review on "Janice Meredith," followed by an informal discussion on "The Early Puritans." Only a small portion of the members were present.

The Country Women's club met last Thursday with Mrs. Otto Johnson. The hostess served very dainty refreshments and the meeting was an exceedingly interesting one. Mrs. Edward Bots gave most delightfully a book review on "The Harvester," by Gene Stratton Porter. The annual election will take place next Thursday at the home of Mrs. McEae.

Little Miss Lucille Ahorn was a gracious hostess to a large number of her friends at a pretty luncheon on last Monday afternoon. The color scheme effectively used in table decorations was of yellow and white. In a guessing game Miss Mildred Wilson won first prize, while Miss Pearl Kayle and Ruth Taylor won prizes in another. The little affair was in honor of Miss Lucille's birthday and her guests were: Misses Helen Fisher, Anna Makirik, Mattie McEasters, Angela Beckwith, Ruth and Gladys Taylor, Pearl Kayle, Constance Hill, Gertrude and Alven Reed, Mae Alford, Lucy Munson.

TWO RANCH BARGAINS

100 acres, 1 1/2 miles from town, 80 acres alfalfa, no better soil on
this tract, land easily watered, fair improvements, rented this year for
\$1250 cash rent, which goes to buyer if sold soon. Price \$110 per acre.
This ranch is positively worth \$200 per acre, good terms on future pay-
ments.

A NATURAL SHEEP RANCH

150 acres 5 miles from town, 50 acres alfalfa, deep rich soil, good
small house, price \$60 per acre, easily worth \$80. This is a natural
sheep ranch, being well protected from west winds. Additional ad-
joining land, which is absolutely as good soil as there is in this county,
can be had to make a ranch of 250 acres. If you are interested in
sheep raising, investigate this proposition. It can be bought on very
favorable terms.

MEASLES PREVALENT IN IDAHO

Official News From the State Board of Health.

The person who knows, looks upon
measles with fear in his heart, and
well he may.

Persons who don't know, and their
sums in legend, go blundering on in
their careless, unthinking, indifferent
way and dally our children are paying
the price in precious lives.

To the health officer alive to the
facts and awake to his responsibilities
there is nothing more perplexing and
little that appears to be more in need
of correction than the present day al-
most universal indifference to meas-
les.

As a destroyer of child life measles
holds a position very close to the top
of the list. In Idaho in 1913, upwards
of ten times as many little graves
were dug on account of this disease
as were dug on account of that ter-
ribly dreaded disease, smallpox, and
smallpox was quite prevalent through-
out the state, too, some 384 cases be-
ing reported. It is very doubtful
whether these reported deaths repre-
sent even a small percentage of those
actually due to measles as many of
these deaths are reported to be due to
pneumonia.

In Idaho at the present time there
are thousands of cases of measles and
numbers of deaths are occurring.

The wide-spread prevalence of the
disease is in largest measure due to
improper handling of the cases, to the
looseness of quarantine, and to in-
direct proportion to the ignorance, care-
lessness, indifference, or lawlessness
of parents and attendants.

Measles is a wholly unnecessary dis-
ease, and no one should have it. To
willfully expose a child to it is nothing
short of criminal and to permit a
child to go about spreading the in-
fection among other children is, in-
deed, quite as serious an offense.

The suppression of measles is a mat-
ter of strict isolation of the infection
bearer.

The state board of health, believ-
ing that the time has arrived to clamp
down the lid on measles, has recently
formulated and promulgated rules of
quarantine for measles which must be
observed throughout the state of Id-
aho.

The new state rules governing meas-
les, briefly stated, are as follows:

1. All cases of measles must be
immediately reported to the local
health authorities.
2. The front and rear entrances of
the premises must be placarded with a
red warning card.

3. The patient must be isolated for
at least 14 days after the beginning of
the disease, or until all infectious dis-
charges have ceased. Visitors are pro-
hibited. Susceptible children of the
family must be confined to the prom-
ises, but may be permitted the free-
dom of an enclosed yard in which
they do not come in contact with other
children.

4. The patient must be excluded from
the schools and places of public
gathering for at least three weeks
from the onset of the disease. Sus-
ceptible children of the family must
be excluded for at least 18 days from
date of last exposure.

5. The sale of milk and food stuffs
from infected premises is prohibited.
6. Violation of this rule is a crime. The
patient must be given a disinfecting bath
and a complete change of clothing
must be made.

7. Public funerals prohibited. How-
ever, adults, and non-susceptible chil-
dren may follow the remains to the
grave provided they do not enter the
carriages occupied by persons who
have been in the infected building.

ZIDORA—THE TWENTY MILLION
DOLLAR MYSTERY
(Continued from Page 3.)

notorious huddling in the shadow of
the liver. They both recognized the
occupants of this launch, and it be-
haved them to act quickly.

"Look!" exclaimed Hunt. "There's
that man Huddlestone leaning over the
rail. By George. A fat water bottle
filled with gems and all right! I'm
sorry to be on a case like this, Hildr.
When he drops it I'll make for it. It
only catch a good hold of my leg when
I lean over. There it comes."

The bag struck the water with a
plap, and after a moment bobbed up
again almost under Hildr's hand. He
reached down and grabbed it. Hildr
shouted something which he
could not hear. As he strove to right
himself a boat hook from the other
knocked the bag from his grasp. A
dozen seconds later the bag was in
the boat Hildr had seized at.

Then he bent over sternly at the
board, slapping Hildr. And more de-
pendent upon this chase than any of
the six dreamed.

NEW BANK LAWS

Several Important Changes Made by
Legislature.

Recent changes of importance to
depositors were made in the state
banking laws by the Thirtieth legis-
lature. They relate to the checking
out of trust funds and joint deposits,
the removal of disability and the non-
payment of checks through error.
The amendments are similar to those
of other states and were formulated
by the American Bankers' Association.
Litigation has frequently grown
from attempts of trustees to se-
cure possession of trust funds on
deposit in banks. The law now clearly
specifies how such funds shall be
treated. The clause bearing on this
subject reads:

"Whenever any deposit shall be
made in any bank, savings
or trust company, by any person
in trust for another, and no other
or further notice of the exist-
ence and terms of a legal, and
valid trust shall have been given
in writing to the bank, in the
event of the death of the trustee,
the same or any part thereof,
together with the dividends or in-
terest thereon, may be paid to
the person for whom said deposit
was made, or to his legal repre-
sentative."

Affects Husband and Wife.

Joint deposits have always been a
source of trouble. In some cases,
where money has been deposited in
the credit of both husband and wife,
either would draw out the money
without the other's consent and com-
plications would ensue. The new law
treats a deposit of this kind in the
following amendment:

"When a deposit has been
made, or shall hereafter be made,
in any bank, savings bank or
trust company in the names of
two persons, payable to either or
payable to the survivor, such de-
posit, or any part thereof, or in-
terest or dividend thereon, if not
then attached at law or in equity
in a suit against either of said
persons, may be paid to either
of said persons, whether the
other be living or not, and such
payment shall discharge the
bank, savings bank or trust com-
pany making such payment from
its obligation, if any, to such
other person or his legal repre-
sentatives for or on account of
such deposit. This action shall
apply to husband and wife to all
intent and purposes as though it
applied to other persons."

Persons under disability are placed
on the same basis as those not under
disability under the new law, the
provision reading as follows:

"Whenever any minor, mar-
ried woman or other person un-
der disability shall make or have
credit in any bank or trust com-
pany in his or her name, such
bank or trust company may pay
such money on the check or or-
der of such depositor, the same
as in * * * cases of depositors not
under disability, and such pay-
ment * * * shall be in all respects
valid in law."

It occasionally happens that pay-
ment on a perfectly good check is re-
fused in error and in such cases the
writer of the check generally feels
like going after the new law, or, at
least, must prove that they have been
damaged by the bank's mistake. The
new provision reads:

"No bank or trust company
shall be liable to a depositor be-
cause of the nonpayment through
mistake or error and without notice
of a check which should have
been paid unless the depositor
shall allege and prove actual dam-
ages by reason of such non-pay-
ment and in such event the liability
shall not exceed the amount of
damages so proved."—Statesman.

NOTICE OF ELECTION.

Notice is hereby given that on the
fourth Tuesday of April, 1915, which
will be April 27, 1915, in the City of
Twin Falls, Idaho, the regular biennial
city election will be held for the pur-
pose of electing the following city of-
ficers, to-wit:

A Mayor;
A City Clerk;
A City Treasurer;
A City Engineer;
A Police Judge;
Two Commissioners for the First Ward;
Two Commissioners for the Second
Ward;
which election shall be open at nine
o'clock in the morning and will con-
tinue until seven o'clock in the eve-
ning of the same day.

The said two wards are described
as follows:
First Ward: All the territory with-
in the corporate limits of the City of
Twin Falls, lying north and west of a
line beginning at the Southwest cor-
ner of the Southwest quarter of the
Southeast quarter of section seventeen,
township ten, south, range seventeen
east, T10S, R17E, and running
thence easterly one-fourth mile;
thence northerly on a line with
the center of Snake River Street, to the
Southwest corner of section ten, afore-
said town and range; thence North by
one-fourth mile.

Second Ward: All the territory
within the corporate limits of the City
of Twin Falls, lying south and east of
Ward One as described.
The polling place of the First Ward
shall be 110 Shoshone Street West.

Clyde Lindsey's office, the Second
Ward will be 145 Main Avenue East.
Dated March 27, 1915.
By order of the City Council,
STUART H. TAYLOR,
City Clerk.

(SEAL) STUART H. TAYLOR, City Clerk

the last 12 or 15 years, than in Idaho. Millions of acres of raw, soggy bog land have by the beneficial application of irrigation, been converted into productive fields and veritable gardens, and there are yet millions of acres of virgin soil to which water will eventually be applied and made to support many times our present population. The placing under irrigation of these large areas of land, have necessarily caused constant tapping of our lakes and streams, thus gradually reducing the available water supply, which in time may prove much more necessary to the application and use of water than is now the case. One of the latest developments on the commission I take it will be to draft and propose such legislation as will reduce to a minimum expense and simplify litigation affecting the decrees of water rights on the various streams of the state.

Shipment of Hogs and Cattle Will Be Held 'Til 1st June 30th.

No matter how badly the Idaho farmer may wish to import eastern thoroughbred dairy or beef stock, he cannot do so until after June 30, 1915. Such is one of the effects of a proclamation issued Friday by the governor.

It prohibits the importation of stock or hogs from any states except Washington, Oregon, Nevada, California, California, Utah, Montana, Wyoming, Arizona, New Mexico and Texas.

The governor declared the proclamation to be necessary for the protection of the live stock industry in Idaho and to secure shipping privileges to other states.

He declared that the state veterinarian had notified him that the issuance of such a proclamation would be necessary to conform to the rules adopted at a meeting of the sanitary conference of western states held at San Francisco recently in connection with the meeting of the National Live Stock association.

When shipments are made to Idaho from the states not coming under the prohibition, the animals, if not detected for immediate slaughter, must be accompanied by a certificate of inspection, and if they are shipped in railroad stock cars, the cars must be cleaned and disinfected prior to loading.

When shipments are made of animals for immediate slaughter they must be accompanied by a signed statement of the shipper, showing the purpose of shipment.

Horses and mules will be permitted to enter the state only when accompanied by certificates of inspection and after their mouths and tails have been disinfected. No poultry will be permitted to be shipped in from states where federal quarantine against foot and mouth disease has been established.

It is figured at the local office that it will cost in the neighborhood of \$2000 to immediately carry out the rule of the embargo, as that amount of money will have to be expended for disinfectants.

Not only does the order require that no market stock can be loaded or unloaded for shipment into Wyoming, without first being disinfected, but such process will have to be repeated with each shipment, which makes rather a rigid bar to shipping.

The stockyards and cars will have to be disinfected after the last shipment before another consignment can go through, and this being the case it might have the result of the company unwittingly violating the federal regulation were a car, because of laying down, to be set out in this state.

The embargo is the result of the regulation imposed by the federal authorities against the foot and mouth disease in cattle, and through very little of that disease has been contracted in this state, a good many cases of it have been found in Montana, as many shipments go through Porterville, and it will have to be done here.

Specials for Saturday

These specials are just what the term implies—special prices, good for Saturday only, and no other time. Avoid disappointment and come Saturday. Bear in mind that all merchandise is perfect, that original and sale prices quoted are genuine, also that there will be numerous other attractive bargains to be had whilst they last. Our object in selling these goods so low is to get you into the good habit of trading with us.

Jenkins & Company, Twin Falls

Linen Laces, Special

Very rarely is it possible to get real linen, Trenchon Laces at such an extraordinary price, two to four inches in width and good design. These are worth fifteen cents. Never again at such a low price.

5c

Huck Towels, Special
