The complications, which have beset the city and its private waterworks company are in a fair way to be settled as the result of an interview between the city council and Attorney E. B. Critchlow.

SHOULD LOOK TO THE FUTURE: It has been suggested to the Times by one of our public spirited citizens that it is the right time to make provisions for a larger city park.

It was urged by this citizen that during the present low ebb of land prices, that forty acres be obtained upon which the city should plan a beautiful park. In connection with this park, it was urged that sites for permanent fair buildings for the county could be located without detriment to either.

WHAT AMERICA NEEDS MOST IS PATRIOTISM AMONG HER POLITICIANS: The patriotism this nation needs most in its hour of danger is the patriotism of political highway.

Our superabundance for war is due as much to crooked politics as to the idle dreams of pacifists.

manly spent her money, she would have an all powerful navy and a strong army. There has been too much pork barrel work at Washington—too much graft that was looked upon as only a part of the game.

"If we go down to defeat in our next war, we will have been defeated—no more by the enemy, than by our own politicians," says Julian Street in his excellent Collier's article on "Our Next War."

Many secretaries of the navy have made earnest efforts to concentrate and get the most possible out of the expenditures of the government.

Every lawmaker wants to take care of his own locality and thereby get votes. This is one of the most damaging weaknesses of our system of government.

New there are nine navy yards on the Atlantic coast.

"It is an apocryphal legend that in 1912, inclusive, our expenditures for naval purposes exceeded those of Germany by 500 millions of dollars, yet the tonnage in battleships (noted in the same period by Germany vastly exceeded ours.

"It is as a logical sequence to this sort of thing that the United States gets fewer ships in proportion to its naval appropriations than any other nation.

Army men have repeatedly tried to break down the patronage at Washington and concentrate large bodies of troops and abandon useless posts.

The artillery, cavalry, supply department and infantry should practice together. But they can't because they are scattered into such small groups.

If there is not an awakening in general there is the need of real patriotism and a policy of doing what the United States is likely to find herself in a pretty bad mess before many years.

of our unpreparedness, the first traitors to be shot should be the men whose political dishonesty caused the unpreparedness.—Salt Lake Telegram.

EFFORTS TO RAISE ARMS-EX-PORTS

There is no prospect that our government, as the New York Journal of Commerce remarks, "will attempt to stop the making of war materials in this country or to prohibit the sale of them abroad."

"The Union Metallic Cartridge company has a contract to supply 3,500,000 rounds of ammunition weekly, and the understanding is that this is to be increased to 7,000,000.

The General Electric company has an order for \$100,000,000 worth of war materials.

Germany naturally wishes, it is added, to disrupt in any way and at any cost the system by which England, France and Russia are thus being propped by the means to victory.

"With many of the big plants under contract to provide supplies on certain dates, it is apparent that a sudden demand of employees for shorter hours, more pay, or other concessions would seriously embarrass them.

The next German move "now under way," says the New York Sun, "is to foment strikes in these factories."

"A notable example of the latter fact occurred some years since when three munitions were constructed at Bath, Me. Battleships were needed at the time, and munitions were recognized by Congress as the need of absolute importance, however, than these considerations appeared to be the need for the expenditure of government money in the state of Maine.

And the Sun elicits a series of minor labor-difficulties in centers of the arms-making industry which it believes significant under the circumstances, if not a direct result of the German plan.

"Every labor-organizer who sells himself knows perfectly well that he is running counter to the best interests of American labor—playing traitor to the men who have trusted him; seeking to increase unemployment and industrial depression in the United States.

The alleged German efforts to buy up arms-plants and incite labor-difficulties "have no direct connection,"

we read in the New York Sun, "with the movement now on foot to start a protest among labor-organizations against war with Germany." "Yet an indirect relation between the latter movement and the Allies' ammunition supply may be traced in the 'diabolic rumor,' reported by the Chicago Herald's Washington correspondent, to the effect that—'opponents of the so-called 'Armor Trust and Powder Trust in the United States are working up a labor-movement war, with an appeal to the President in an act again for mediation and peace.'"

TALKS ON THRIFT No. 22. VACANT LOT GARDENING

"Economy is no disgrace: it is better living on a little than outliving a great deal."—Ralph Waldo Emerson.

Owing to the falling nature of the surface in the upper part of the Borough of Manhattan, New York City there are places where the Broadway 'Subway' is really an 'elevated' and one must ride in an escalator to reach the station platform.

For both economical and esthetic reasons there ought to be many more such garden spots in New York and every other city.

It is estimated that 375,000 was re-evaluated from crops raised on vacant lots in the city of Philadelphia last year.

There are few cities in the United States that cover the immense area that Philadelphia does, but there are none without some vacant land that could and should be used for a small garden.

And 'kitchen' gardens have become a reality in Chicago. Mrs. Lounara Z. Moler, commissioner of public welfare, opened a five-acre tract at East One Hundred and Twenty-third Street and Indiana avenue a few weeks ago.

Fifty more were awarded plots in the five-acre area and in the larger tract sixty men and their families—112 the toll.

"The unemployed are given first choice," Mrs. Moler said. "Each man is given enough land to cultivate, and the rest is divided among the women."

The department of public welfare has also been promised other land in different parts of the city and this will be turned over to the public."

A similar movement has been started in St. Louis, Cleveland, St. Paul and other cities.

"War-stricken Europe would love, staying were it not for the woeful knowledge of gardening possessed by its people, who can make a few acres yield enough to keep a family in food for a year."

HOW TO PREPARE BORDEAUX

A Few Suggestions in Regard to its Proper Mixing—Formula Most in Use at Present Time.

As Bordeaux is probably the most used fungicide at present, a few suggestions in regard to its proper mixing will not be out of place.

The lime and copper sulphate should be prepared in different receptacles, preferably half barrels. The copper sulphate should be held in a sack at the top of the half barrel and allowed to dissolve. Never put the copper sulphate in the bottom of the barrel.

TIMELY WORK IN ORCHARDS

Farmers Should Guard Against Ravages of Mice and Rabbits—Prune During Winter Weather.

The protection of orchards against damage by mice and rabbits is work which may well be pursued in the fall, particularly in the case of young orchards, and when that is completed the season's pruning may be begun.

Enemies of Young Trees.

doing this work before spring comes from localities where the winters are cold and dry, and there it is frequently found that worms which are made to the fall dry out during the winter, so such an extent that the bark is killed for a considerable area around the wound, making the wound many times larger than it would have been otherwise.

FORTLAND MARKET REPORT.
 Portland, June 24, 1916.
 The receipts for the week were: Cattle, 1027; calves, 67; hogs, 3686; sheep, 3682.

Cattle.
 Cattle market is steady to weak with fair receipts. Ten loads of steers and calves brought \$7.00. One load of choice Hereford-Shorthorn steers sold at \$7.40. In general, quality stuff was consigned by its absence. Cows are quoted at \$5.75 to \$6.25.

Hogs.
 With a good run of hogs the market opened at \$7.35 for top stuff, going down 10c to \$7.25 at the end of the week. Bulk of sales at \$7.25.

Sheep.
 Buyers are still forcing auction prices down. Receipts of sheep are light with good quality stuff. Choice lambs are quoted at \$7.15, ewes at \$4.75, and wethers at \$3.50.

IDAH0 SHERIFFS ORGANIZE

Meeting Held in Boise, Two Resolutions Proposed.

The Idaho State Sheriff's association was formed in Boise yesterday afternoon with a charter membership of 17. Emmitt Hunt, sheriff of Ada county, was elected president and George Chapman, deputy sheriff of Ada county for nearly 30 years, secretary.

The sheriffs took decisive and advanced steps on two important matters, the first being the passing of a resolution which provides that all sheriffs will collect fees strictly in advance. They believe such a movement will be better for the officers and better for the attorneys, as it will give the latter an opportunity to demand the necessary fees from their clients and not control them to stand good for papers to the sheriffs. It was pointed out that the sheriffs had to make good to the county commissioners, often paying out of their own pockets, and nearly all the officers reported they had lost money through failure to collect their fees in advance.

The second point was to ask the commissioners of each county to offer a reward of not less than \$250 for the arrest and conviction of any person stealing stock and that the reward could not be collected by any sheriff of any county, or deputy or any stockman. A resolution was also passed and ordered forwarded to the state parole board asking them to stringently refuse to grant any application for pardons to prisoners serving terms for stealing stock.

During the latter amount of stock-stealers in this state in the past eight months, the officers of the law feel that there is an organized band of cattle and horse thieves at work here and the only way in which they can secure results is through organized efforts and co-operation.

The meeting adjourned subject to the call of the chair, and at the next session the sheriffs of all counties in the state will be invited to attend. Following is a list of those who signed the charter organization yesterday afternoon:

Frank T. Merrill, Preston; W. W. Williams, Sweet; J. William Koerber, Idaho Falls; C. J. Lewis, Oxford; W. H. Hart, Idaho City; Sam Sanders, Gooding; George W. Froman, Caldwell; Arthur A. Stevens, Mountain

HOME: Clarence Wheeler, Shoshone; D. H. Gregory, Rupert; T. J. Fisher, St. Anthony; Emmitt Hunt, Boise; Frank M. Kendall, Twin Falls; C. T. Ward, Camanche; W. G. Pratt, Casada county—Capital, Nevada.

RABID COYOTE ATTACKS

Carlin, Nevada, Man Badly Bitten by Animal.

At eleven o'clock this morning, when a gang of Greck section men were proceeding westward about five miles west of Carlin, the foreman of the gang was attacked and badly bitten by a mad coyote, which was lying beside the track. It succeeded in inflicting a severe bite upon the leg of the Greck foreman. There were two dogs with the section party and were muzzled, but despite the fact that they were almost without protection when they saw that their master's life was in danger they forgot all thoughts of themselves and attacked the coyote, although unable to do much damage to him. In addition to the man being bitten both dogs were lacerated by the fangs of the mad animal; one of them was killed upon the spot and brought the foreman to Riko.

This little incident is noteworthy for three things. First, it shows that an animal suffering with rabies is possessed of a mania to kill humans; this coyote evidently lying in wait for the approaching party. Second, it should serve as a warning to people to look out for unmuzzled dogs of every description and third, it should not be passed by anyone without a comment on the faithfulness of the two muzzled dogs, who gladly offered up their lives as a willing sacrifice to save their master from a fate worse than death, and as a result of their faithfulness, one of them is today being treated and threatened with the dreaded death by rabies—Eiko Press Press.

RAILROAD TO BE ELECTRIFIED

Power Near Salmon to be Developed as Part of General Plan.

The Northern Pacific, says the Ancon Standard, will be the next big railroad of the West to electrify its lines through the Rocky Mountain district. Within a year, work will be started on a system of electrification that will equal the work now under construction by the St. Paul lines near Ward of the proposed work was received in Butte yesterday from authentic sources.

The first step toward the electrification of the Northern Pacific was made several months ago, when one of the engineers now connected with the electrification of the St. Paul lines ran a line from Butte over the Homestead Hill with a view of estimating the cost of the work. The estimate was considered too high by the Northern Pacific officials and a second preliminary line was run.

The Hill interests have followed up the scheme for the electrification by quietly purchasing power sites through the Rocky mountains. One site has already been acquired in the vicinity of Salmon City, Idaho. It is reported that power will be used in the Gilmore & Pittsburg which is slated for a place on the main line of the road that will go through Twin Bridges.

Verification of the rumor that Twin Bridges will be on the new main line which will have a water-level route almost to the coast, was received in Butte yesterday from the same source from which the word of the electrification of the road came.

Extra men in several departments of the Northern Pacific in Montana have been shifted to that section of Montana where the new main line will go, and indications point to the starting of construction work soon—Idaho Falls Register.

CATCHING CHILD LABOR YOUNG

Hope of Heading Off Child Labor in West Expressed at Conference.

"The children won't suffer any more after this will they" said a mother after the child labor parent night at the eleventh annual conference on child labor in San Francisco on May 23. While this parent written by Mrs. George Hough Perry, and staged on the exposition grounds, may not have justified in the minds of adults the optimism of the child, it did strike the national significance that prevailed throughout the meeting and it demonstrated the community's interest in the conference. An appeal to the West to prohibit child labor before it has a foothold there was the main theme of the address. Dr. Felix Adler, of New York, Chairman of the National Child Labor Committee, touched the heart of the matter when he pointed out that child labor has always been a by-product of the change from an agricultural to an industrial community. By the law of recurrence it has appeared in every part of the world going through that change. It appeared in England and our eastern states during such a time of change. It is now in its height in the South during a similar change, and it will appear in the West unless it is forestalled. Dr. Adler said. The West, realizing the national significance of widespread child labor and the community's responsibility toward each individual child, can prevent the recurrence of child labor here if it will.
