NEW HOME FOR FIRST NATIONAL BANK BUILDING

RAPIDLY NEARS COMPLETION WHILE WORKMEN FLY VARIOUS ARTS

CONSPICUOUS QUARTERS TO ACCOMMODATE INCREASING BUSINESS WILL BE READY FOR OCCUPANCY SOON, BUILDERS SAY

The work of modernizing and enlarging the banking room of the First National bank on the corner of Shoshone and Main streets is rapidly approaching completion. To the casual observer the work seems to be practically finished, but a closer inspection reveals the fact that the interior is still an active center of industry. There are carpenters, plasterers, plumbers, painters, marble setters, tile layers, machinists—men of many trades necessary for the completion of the interior—all plying their various arts and callings so that the First National bank soon will have splendid, new, modern banking quarters.

The activities on the inside of the building go on with the interruption or delay, unaffected by inclement weather.

Twin Falls is due to wake up one of these days in the future to find the bank ready to do business in a commodious banking room which will accommodate the increasing business which these changes necessitate.

R. M. Barnett, superintendent of construction for Haggren Brothers, the builders, says that the most intricate part of the construction work is going forward. He pointed out that the final steps in the carrying out of the plans—the finishing up of the interior, with its many and varied parts, each a separate job in itself—demand more time and thought on the part of the superintendent and workmen than the layman has any idea of.

The work is progressing in accordance with the schedule arranged by Haggren Brothers before operation was begun. It is expected that the bank will take possession of its quarters some time in March.

VOTE DETERMINES GIRLS' POPULARITY

Pleasant Community Gathering Takes Place at Elmore School to Secure Red Cross Charter

Miss Gladys Barnes is the most popular young woman of the Elmore school district, south of Filer, and Byron Williams, clerk of the school board, is the youngest man within its boundaries as determined by vote in connection with a program and pie social at a community gathering in the school on Friday evening. Votes were sold for five cents each, and 14 pies offered for sale brought from 25 cents to \$1.75 each. Proceeds totaling \$37.70 were received for the purpose of securing a membership in the Junior Red Cross organization. Miss Barnes received a cake. The program was given by the girls of the sewing club. Miss Bertha Courtney and Miss Mary Turner are the teachers of the Elmore school.

BOY'S MOTHER ACCUSES TEACHER

CHARGE OF ASSAULT UPON PUPIL IN PASTORAL AGAINST SUPERINTENDENT A. J. GOANS

Pedagogue Enters Plea of Not Guilty and Is Held for Examination—Justice Punishment Administered on the Grounds of Discipline

Accused of administering undue corporal punishment to boy pupils of the Murtagh school, Superintendent A. J. Goans was arraigned Friday before Probate Judge O. P. Durrall on a charge of assault preferred by the prosecuting attorney at the instance of Mrs. W. J. Goans, whose 18-year-old son, Elmer, is alleged to have been one of four boys ranging in age from 10 to 13 years, who were chastised by Goans. Plea of not guilty was entered and the preliminary examination has been set for today.

Goans stated that discipline had been lax in the Murtagh schools and that it had become a question of whether the boys who were punished or the teachers who administered the punishment. He said that the school board would provide for his defense in the prosecution of the action.

Statement of the prosecuting attorney is that the school laws of Idaho do not provide for administering corporal punishment in any instance. It is asserted that the boys exhibited numerous bruises in support of the claim that he had been beaten with a club. The other boys said to have been chastised are Ralph Gilt, 13; Leo Walton, 10; and Otto Walton, 12. The punishment was meted out on Wednesday of last week.

SCHOOL CELEBRATES NATIONAL SONG WEEK

Patriotic Airs Featured in Community Musical Program Announced for This Evening

In accordance with plans and instructions sent out by educational officials at Washington, D. C., schools, churches and all singing organizations are giving special attention to the singing of national airs and the underlying folk songs of our nation, during this "National Week of Song," from February 17 to 24. The Twin Falls high school faculty and students extend their cordial invitation to the general public to attend this community musical program to be given at the high school auditorium on Thursday, February 21, at 2:30 p. m. Following is the program:

Program
Boys and the Old Brigade (Parks)
High School Boys' Glee Club.
Group of American National Airs—Glee Clubs, Assembly and Audience.
"In Liberty's Name"—Glee Clubs.
Group of American Folk Songs—Glee Clubs, Assembly and Audience.
Song Group—High School Boys' and Glee Clubs.
"The Star Spangled Banner"—Glee Clubs, Assembly and Audience.

Rev. Butler Leaving—Rev. Charles U. Butler last week tendered his resignation to the official board of the Methodist church and at his own request the same was accepted. Mr. and Mrs. Butler will continue to make this city their home. Mr. Butler will engage in evangelistic and war camp work.

FOR EXCHANGE—Job printing for lowest price. Write for your money—the best. Twin Falls News.

Stop the "Snuffles"

If you want to make your children babies easy and comfortable, give Foley's Honey and Tar. It is just what they ought to have for feverish colds, coughs, "snuffles," and wheezy breathing. It stops croup, too. Foley's Honey and Tar tastes good and the little ones like it. It contains no morphine, chloroform or other drug that you wouldn't like to give to young children. Do not accept a substitute. Mrs. R. H. Corvett, Schoolfield, Va., writes: "My baby was stricken with a severe cold and we were much distressed. I gave him Foley's Honey and Tar and the cold broke up and he was well in a few days." **FINER DRUG CO.**

VACATION EARNINGS AVERAGE \$36 EACH

COUNTY SUPERINTENDENT PREPARES ESTIMATE OF VALUE OF WORK DONE BY PUPILS

Five Hundred Fourteen Pupils of the County Schools Report Labor With Total Wages of \$18,375 in All Fields of Endeavor

Pupils of the county schools, exclusive of those enrolled in the Twin Falls and Buhl schools, earned by their work during the summer vacation a total of \$18,375, according to estimate prepared by Miss Brittingham Wolfe, county superintendent. The average earning per pupil was \$36. The services performed included everything from housework to farm labor.

Following is the estimate showing the number of pupils reporting work and the amount earned in each district:

School	No. of pupils reporting work	Amount
Castelford	21	\$ 580
Fairview	17	590
Deep Creek	13	200
Murtagh	56	1,300
Hansen	37	1,631
Lucerne	12	425
Haggard	15	365

The Anatomically Correct Shoe

THE UNITED STATES ARMY SHOE

"Munson" Last for Women

The only shoe that has Uncle Sam's O. K. Adopted by United States army board after four years' exhaustive study by army surgeons of the feet of all the armies of the world, and at a cost of more than \$100,000.

Every known test was applied—the famous "Munson" last was the result. The only anatomically correct last known.

Women, slaves to the dictates of fashion for years, are fast becoming educated to conserve their health. Just as tight lacing has been abandoned, so will correct fitting shoes be worn when women realize their extraordinary comfort.

The war has aroused them. They are abandoning high heels. They are welcoming the Anatomically Correct Shoe. THE GREATER IDAHO DEPARTMENT STORE is the place to find such shoes.

For walking, for tramping, for high school girl, the U. S. Munson Army Shoe is unequalled for fit and quality.

We handle a complete line in all sizes from 2 1/2 to 8. Widths, AA to D. Exclusive sale in Twin Falls for the REAL ARMY SHOE FOR WOMEN made by John Ebert's Shoe Company, Buffalo, New York.

REPORT SHOWS STUDENTS WORK IN EMERGENCY

FOUR HUNDRED TWENTY-TWO PUPILS EARN \$11,270.00 WHILE CLOSED

PICKING AND PACKING FRUIT AND HARVESTING GRAIN AND VEGETABLES ARE INDUSTRIES HELPED—INVEST EARNINGS

Four hundred and twenty-two pupils of the Twin Falls schools, working a total of 4532.55 days during the period the schools were closed last October to permit of their employment in a crop harvesting emergency, earned a total of \$11,270.35, according to reports of students' advisors compiled by Superintendent Hal G. Blue. Only 66 pupils out of the classes dismissed were not employed. The second semester eighth grade and high school classes were dismissed from October 9 to 20. The period included 15 school days.

Following is a statement of the work at which the pupils were engaged and the earnings made in each: picking fruit, \$540.21; packing fruit, \$576.77; harvesting grain, \$532.31; harvesting vegetables, \$1175.28; general farm work, \$665.11; housework, \$201.35; clerking, \$257.12; recreation, \$403.13; laundry, \$81; given to parents, \$59.65; board and room, \$92; unpaid cash on hand, \$3,225.74. Total, \$11,270.35.

Investment of the money earned was as follows: bank deposits, \$1511.21; savings accounts, \$727.67; Liberty Bonds, \$501.07; Red Cross, \$26.70; clothing, \$287.12; recreation, \$403.13; laundry, \$81; given to parents, \$59.65; board and room, \$92; unpaid cash on hand, \$3,225.74. Total, \$11,270.35.

Fifty-four eighth grade pupils, working 687 1/2 days, earned \$1155.03. One hundred fifty-three freshmen, working 1796.53 days, earned \$4504.05. Eighty-six sophomores, working 1203 days, earned \$2487.32. Eighty-seven juniors, working 407 1/2 days, earned \$2884.11. Forty-two seniors, working 436 days, earned \$1239.22.

No earnings during the period were reported by only six eighth grade pupils, 16 freshmen, 11 sophomores, seven juniors and 14 seniors.

BICKEL DISTRICT MEN SERVE OYSTER SUPPER

Don Caps and Aprons on Occasion of Monthly Community Gathering

Men of the Bickel school district last Saturday evening served an oyster supper to the community, the net proceeds going to secure a membership for the school in the Junior Red Cross organization. More than 100 persons enjoyed the occasion. Musical numbers were given by Virgil Robinson, talented blind musician and graduate of the Bickel school, who has been in attendance recently at the state school at Gooding. The supper Saturday was served on the occasion of the regular monthly community gathering of the community, and was by way of variety in that refreshments heretofore have been served by the members of the women's club of the district.

William S. Hart

IN ONE OF THE BIGGEST WESTERN DRAMAS OF THE DAY, ENTITLED

The Cold Deck

The action of "The Cold Deck" is laid in the western mining camp in the early days, where the cards were stacked to meet a man's gameness, and a fortune made or lost on the turn of a card. The story concerns "On the Level Leigh," a man straight-shooting, hard hitting and always winning. Fair-haired MILDRED HARRIS is cast as Hart's sister, and dark-eyed SYLVIA BREMER is the girl he loved.

COOPER TO PROVE FAMOUS THEORIES

HIS REMARKABLE MEDICINE ACCOMPLISHING WONDERFUL RESULTS IN TREATING DYSPEPSIA

Referring to the visit to Boise and other western cities of Mr. L. T. Cooper, the millionaire philanthropist and lecturer who has commanded such widespread interest in the East with his health theories and celebrated medicine, Tanaka, E. C. Harris, his representative, recently said in Boise:

"Thousands of the most prominent people in Cincinnati, Cleveland, Denver, Salt Lake City, Detroit, Louisville, Dallas, Atlanta, Memphis and other cities, where his celebrated medicine has been accomplishing such remarkable results, are even more enthusiastic over Tanaka than Mr. Cooper himself."

"As previously stated, Mr. Cooper contends that nine-tenths of the diseases and ill-health of the average person is due to a catarrhal condition, which produces faulty digestion and improper assimilation of the food."

"In a recent interview, Mr. Cooper was asked if Tanaka would relieve kidney trouble, liver complaint, rheumatism and a dozen other ailments, and in this connection, said:

"As I have repeatedly said, my medicine acts directly on the mucous membrane, stomach and blood, expelling from them the impurities and toxic poisons, and rendering to them a strong healthy condition. I am convinced that the stomach regulates the condition of the blood, and is the fountain head of health or disease; as the case may be. My medicine is intended primarily for the regulation of the stomach and catarrhal inflammation, but it is no common thing for persons who have used it to come to me and explain that it has relieved them of rheumatism and many other ailments, not generally recognized as having their origin in stomach trouble."

"The ingredients or medicinal elements, which make Tanaka come from many remote sections of the earth—the Alps, Pyrenees, Russian Asia, West India, mountain states near the Rocky Mountains, Mexico, and Peru—are among the points from which the principal parts of the preparation are obtained. In the principal laboratory of the Cooper Medicine Co., Inc., under the efficient direction of a chemist of note, those medicinal herbs, roots and barks are assembled in the rough and partially refined, and developed so as to attain that high standard of efficiency shown by the uniform preparation—Tanaka."

"This is now sold in Twin Falls by City Pharmacy; in Rogersburg by Thompson Drug Co.; in Filmore by A. B. Wood; in Buhl by C. D. Boring Drug Co. Adv."

U. S. STILL LAVISH IN USE OF SUGAR

Comparison of Consumption Here With That of Other Allies Is Given by Food Administration

Some idea of how lavishly the United States is using sugar, compared with other nations, may be seen from the following figures:

England is now giving her people per capita 2.4 pounds of sugar per month. It is being developed so as to attain that high standard of efficiency shown by the uniform preparation—Tanaka."

"This is now sold in Twin Falls by City Pharmacy; in Rogersburg by Thompson Drug Co.; in Filmore by A. B. Wood; in Buhl by C. D. Boring Drug Co. Adv."

"The French and Italians are allowed only 1.10 pounds per month whereas the comparable per capita household use of sugar in the United States for 1917 was about 4.4 pounds."

Germany, with by far the larger part of sugar being growing sections of Europe in her control, is giving her people a ration of 25 to 35 ounces per month or about one ounce per day."

Large Luxury Use in U. S.

The problem of growing sugar (either cane or beet) touches only a limited number of American farmers, yet the sugar question is one to be seriously considered by all American households. Our annual consumption per capita, including both household and commercial use, has advanced from about 66 pounds in 1900 to 79 pounds in 1916; and in 1917 it was 84 pounds per person. The extravagant use of candies and soft drinks in this country consumes no inconsiderable amount."

Allies' Normal Supply Out of Us

Great Britain produces no sugar. Prior to the war she obtained two-thirds of her supply from the West Indian powers. The French in France has been reduced from 800,000 tons to one-fourth or one-fifth of this normal amount. Italy now is reduced to two-fifths of her pre-war sugar crop."

As an inevitable result, our associates in this war have to look to the western continent for their main supply. Where they draw 300,000 tons from America and the West Indies before the war, last year they received between four and five million as much. They also secured in 1917 about 400,000 tons from the East Indies."

If we in our homes can make a dollar's worth of sugar—cane or beet—longer than usual it will help relieve the critical French and Italian shortage, give us plenty for ourselves and avoid a further drain on our short shipping."

Why Kidneys Kill

Because they are diseased. Two sound kidneys are necessary for sound health. They must act as filters, cleaning the blood of the poisonous waste matters taken up in the course of the body."

When the kidneys are sound and active they do their filtering work perfectly. When they are weak and diseased they fail to do their task, and the whole human body suffers from this poisonous blood."

POLY-KIDNEY PILLS are just what is needed to make over weak, ailing, aching kidneys into strong, healthy active ones. Start taking Poly-Kidney Pills today, and backache, lame back, stiff-joints, dull weary headache and tired-out feeling will quickly pass away. Swelling of the bladder, action, clean blood, good health, sound sleep, and no more dull weary pains or headaches, will be your sure reward."

Your druggist sells them. Remember the name Poly-Kidney Pills. They are the best."

FILIER DRUG CO.

HUSBANDS GUESTS OF CLUB WOMEN

Filer Organization Plans Social Evening to Take Place of Annual Dinner Given

(From the Filer Journal)

Mrs. T. E. Moore gave an excellent dinner at the Filer Hotel for the "Filer Work," and Miss Margaret Showers entertained with several readings at a recent meeting of the Filer Women's club. The next social evening will be held on March 6. On Friday evening, February 22, the club will entertain the husbands of the members at a social evening at the Masonic hall. Each member has the privilege of bringing with her her husband or one other guest. This gathering is to take the place of the annual club dinner. A program will be given and refreshments served during the evening."

The residents of Filer are building a fine new church. The large bill of lumber was purchased from the Hughes Lumber company."

Norman Barker will complete a new bungalow adjoining his own residence, this week, and next week the building will be occupied by the W. A. Shear family."

Mr. and Mrs. Ray Shearer of Culm, Illinois, will be in Filer next week to make their home on the Taylor ranch southwest of town, which he purchased a year ago."

Arthur Scholten, well known carpenter of Filer, left on Wednesday of this week for Seattle, where he will go to work for the United States government, building ships. Mr. Scholten accompanied him as far as Blaine, where he went to catch the main line train, being summoned to be in Seattle by a certain date and having but little time to get there. Mrs. Scholten and her family will remain here for the present."

Frank Koch left Monday evening for Vancouver, Washington, to join the on-line building corps, where he will be with Sam. Mr. Koch is the son of Mrs. Martin and was a graduate of the Filer high school and also of the University of Idaho, standing at the head of his class."

ADVISES REDUCTION OF OAKLEY PROJECT

Land Board Agent Reports Recommendations for Paying of 10,873 Acres

A report recommending the patenting of 10,873 acres of the Twin Falls-Caldwell irrigation project was filed with the state land board by E. H. Hasbrouck, who had been authorized by the board to select the lands that probably will be retained in private segregation."

The board set March 11 as the time for hearing of protests against the acceptance of the report."

Should the recommendations be carried out, the total segregation will comprise approximately 20,000 acres, as patents have been issued already to 9,619 acres."

The elimination of certain canals as recommended will save 6223 acre feet at the head of the canals and 4978 feet of delivered water, the report states."

GARD OF THANKS

We desire to tender our sincere and heartfelt thanks to all of our many friends and neighbors who gave us assistance and sympathy in the last illness and earthly end of our dear little darling daughter and sister, Lela L. Haggle. May the Lord guide, protect and bless you all."

CLUB ARRANGES DEMONSTRATION ON WAR FOODS

HIGH SCHOOL DOMESTIC SCIENCE TEACHER TO DISCUSS FOOD VALUES

RECIPES FOR EMERGENCY
RATIONS TO BE OFFERED FOR SALE
AT OPEN MEETING—INVITES RU-
RAL WOMEN'S ORGANIZATIONS

The Twentieth Century club will meet Tuesday afternoon in the Moose hall. The program for the afternoon will be in charge of Mrs. Alken, a former president of the club, who has recently returned to the city. Miss Young, domestic science teacher in the high school will give a talk on food values, and will demonstrate the making of war bread. Mrs. E. J. Ostrander and Mrs. Alken will give a demonstration on war cakes and meat substitutes. Recipes for the demonstrated foods will be for sale. This will be an open session of the club and any lady interested in the club is requested to bring her friends. The rural women's clubs will be especially welcome.

To Elect New President

At this meeting the election for president of the club will be held in accordance with by-law 11, section 1. The office was made vacant by the resignation of Mrs. J. L. Cookley, who is now in Sacramento, California.

Complete Eight Layettes

The department of current events, under the chairmanship of Mrs. E. A. Packard, has donated and completed in three weeks eight complete layettes for the French babies, comprising 212 articles. These are now packed and ready for shipping.

The current events department after weekly meetings since September, during which much work has been accomplished, took a day for their annual celebration on Friday, February 15. The function took the form of a valentine luncheon and was as unique as it was original.

Mrs. Sweet opened her new, commodious home for the affair, and she and Mrs. Brumagh were prominent managers in charge. Their ability to fill the bill was demonstrated by the success of the day. The menu was choice, well-gilded by the rules of the time regarding lavish display. Valentines took the place of toasts, and twenty-four gayer, wittier guests could not have been found.

There were all kinds of valentines—copied, original, romantic and pathetic. Each was written to the winner's choice, read as a response to a toast, and presented to the lady. The chairman of the department presided as toastmaster and some of the original poems were classics in their way. Mrs. Gilbert gave several musical selections after the luncheon, happily closing a long to be remembered day.

PIONEER TO SELL APPLES IN DETROIT

C. M. Hill, First Secretary of Twin Falls Commercial Club, Arranging for Removal

C. M. Hill, resident of Twin Falls since January, 1935, first secretary of the local Commercial club and formerly associated with Stuart H. Taylor as the senior member of the firm of Taylor and Hill, an insurance firm of Hill & Taylor, will leave within the next two weeks to further the distribution of Idaho apples which he has been selling on the domestic market at Detroit. Mr. Hill returned Friday after a two months' stay in Detroit to arrange for moving with his family to that city.

Detroit is the scene of intense industrial activity. Mr. Hill reports, upwards of \$500,000,000 worth of government contracts having been let to manufacturers of that city. Airplanes, submarines, destroyers, ambulances, motor trucks and ships are among the demands of the government being supplied by Detroit industries.

"Detroit talks in big figures," Mr. Hill said.

To save wheat for Uncle Sam eat Royal War Bread. "It is wheatless." At all grocers—Adv.

JURY ACQUITS ON CHARGE OF THEFT

WILLIAM MILLER, ACCUSED OF
STEALING MONEY AT FUNERAL,
REGAINS HIS LIBERTY

Official Evidence to Explain His Possession of Considerable Sum and Give Reasons for Presence in Church at Time of Alleged Offense

Verdict of acquittal was returned by a jury in district court here Monday in the case of William Miller, accused in an information charging grand larceny, of the theft of \$150 from a purse left in a muff in the cloakroom of the Presbyterian church January 27 while a funeral was being held there.

Evidence offered by the prosecution was circumstantial. Miss Azzala Krangel testified that she had left the money in the muff. W. J. Young told of encountering Miller in the vestibule of the church. Sheriff F. M. Kendall's statements made to him by Miller tending to show that he had recently come into possession of a sum of money, and D. F. Redman of the city police force testified to having become acquainted with the accused several years ago while he was under sentence in the state prison and to having seen him here at about the time of the alleged offense and warning him as a suspicious character to leave town.

Testimony of several witnesses was introduced by the defense to show that Miller had considerable money in his possession prior to the date of the alleged theft, and he explained his presence in the church at that time saying that he was a stranger here and had been attracted to the building, which he did not recognize as a church building, by the evidence of an assemblage present, and by the crying of a child left in the vestibule.

Miller said that he had come from Salt Lake City only a short time prior to the date of the alleged offense, with the expectation of going to work for D. F. Redman, a filer sheep grower, but that he had been disappointed on account of not having had any experience in the sheep industry.

He was arrested and taken from an outgoing train at Rupert on the day following the alleged theft.

BAND ANNOUNCES MORE BENEFIT DANCES

Members Donate Time and Talent to Raise Patriotic Fund

Encouraged by success attending the first benefit dance, given to provide a fund for purchase of tobacco and other comforts for the boys in the military service abroad, and in response to "insistent" requests for more events of the kind, the members of the Twin Falls band, at a meeting Sunday, decided to give regular dances on the second Monday nights of each month for the benefit of various war funds, and expressed their desire to donate their talent and time for this purpose.

Proceeds from the next dance to be given on March 11 will be turned over, probably as a contribution of the band to the Red Cross drive which is to take place about that time.

As a committee to handle the proceeds of the first benefit dance, amounting to \$167.75, Director J. T. Bainbridge, Orrin Fuller and W. R. Priebe were named. The committee will be secured here and sent to Captain P. W. McRoberts, commander of the unit composed of the organizations that were D company of the 101st regiment, and mostly of Twin Falls men, now in France. He will be requested to secure distribution of the fund as far as possible among Twin Falls men.

RUPT AGAIN BREAKS THROUGH LOCAL'S GUARD

Rupt high school's basketball game here Friday evening last, with the result that the visitors gained a big win and the home team a 30-22. Rupt's five is the only team that has proved too much for the local players this season, and Coach Nafziger is determined to bring them to a style of play that will turn the tables in the forthcoming tournament.

In the game at Rupt, Twin Falls' defeat by score of 30-22, the result largely of Scott's shooting six baskets in the first half. Scott was effectively held down in the game by the Kings' center, got through for seven field goals, scoring a total of 14 points. In the previous game King scored only one field goal. The score at the end of the first half of last Friday's game was even, 12-12.

Births

Twin daughters were born on Thursday, February 14, to Mr. and Mrs. Ira Fuller, residing three miles southeast of the city.

To Mr. and Mrs. Harry Beer, on Friday, February 15, a son.

To Mr. and Mrs. M. P. Betty, on Thursday, February 15, a son.

To Mr. and Mrs. W. J. Hough, 320 Togo street, on Monday, February 19, a daughter, Mrs. Hough was Miss Gretchen Ryboe, daughter of Mr. and Mrs. James A. Ryboe.

To Mr. and Mrs. G. W. Saunders on Tuesday, February 19, a son. Mr. Saunders is superintendent at the city reservoir.

To Mr. and Mrs. J. L. Schwinn on Tuesday, February 19, a daughter.

Local Briefs

To Confer Degree.—The second degree will be conferred upon a class of candidates by Twin Falls lodge of Odd Fellows at its meeting tonight.

Undergo Operation.—Miss Kathryn Larson, the young daughter of Mr. and Mrs. G. Larson, underwent an operation for throat trouble on Monday.

Lodge Official Opening.—Twin Falls lodge, Knights of Pythias, is arranging to celebrate Thomas E. Jones, grand master, grand chancellor of the order in Idaho, on the occasion of his official visit here on Tuesday next.

To Attend Installation.—Representing Twin Falls chapter, Royal Arch Masons, Dr. E. A. Parrott, C. F. Green, A. P. Seaton and W. A. Minick will go to Rupert Friday to be present at the installation of Imper chapter No. 22.

Return from Coast.—C. E. Booth of the Booth Mercantile company returned Wednesday from a visit of a month or so at Los Angeles. Mrs. Booth and daughter will remain for the balance of the winter.

Lodge Men Visit.—Harry Lindeberg of Boise, grand lecturer of Idaho, Royal Arch Mason, and Victor Olson, past high priest of the Boise chapter, conferred degrees upon several candidates at the meeting of the Twin Falls chapter Tuesday evening.

More Time to Taxpayers.—Time for filing income tax returns has been extended until April 1, according to information received here through the office of W. C. Whaley, internal revenue collector for this district, at Helena, Montana. Required blanks are to be secured from his office.

Pastor Hadley Returning.—Under the auspices of the local International Bible Students association, Pastor Roy C. Hadley of Portland, who has lectured here previously, will return to speak on Sunday evening next at the last of a series of lectures on the subject of scriptural prophecy in respect to the war. The public is invited.

Would Help Catch Krimmer—"Mac" Herrera, son of Mexican parents though born in the United States, and now residing at Burley, applied Tuesday at the local United States recruiting station for enlistment in the United States army for service overseas. Because of question as to his eligibility for enlistment, Herrera was referred to the district headquarters for decision.

Returned to Salt Lake.—President E. A. Walters, Secretary Stuart H. Taylor and other members of the Rotary club organized here last week, left Monday evening to attend the annual conference of the district organization in Salt Lake on Tuesday. Wednesday at Pocatello the Twin Falls delegation was joined by newly made Rotarians from that city and Idaho Falls.

Appreciate Local Red Cross.—Mrs. W. F. Edwards, chairman of the women's work committee of the Twin Falls Red Cross, returned from Seattle, where she visited headquarters of the district organization and observed the manner in which the work is conducted. Her statement was made to her there that the Twin Falls chapter is regarded as one of the most active and efficient chapters in the district.

Elect New Directors.—Directors of the Twin Falls Building & Loan association have re-elected officers as follows: president, E. J. Koch; vice-president, O. J. Johansen; secretary, Urban Tracy; Dr. George H. Caldwell has been elected treasurer to succeed Lieutenant Lee P. Bracker, resigning. Now on active duty at American Legion. Directors of the association comprise the officers with the exception of the secretary, together with the following: F. P. Bracker, Floyd Norman, G. H. Self, Wolfenden, Robert McBride, G. H. Self.

Four Minutes Men to Talk.—Discussing the subject, "Danger to Democracy," local Four-Minute men will speak at the following: C. A. North at the Idaho; H. W. Sawyer at the Orpheum, and E. M. Sweeney at the Lavington. Following is the schedule arranged by C. D. Thompson, secretary of the following: February 23—E. L. Ashton at the Idaho and C. A. Robinson at the Orpheum. February 24—C. H. Haxel at the Idaho and C. L. Leugler at the Orpheum. February 25—J. H. VanTassel at the Idaho and J. H. Hise at the Orpheum. March 2—C. D. Thompson at the Idaho and C. D. Thomas at the Orpheum. March 4—Q. L. Kinney at the Idaho and E. V. Larsen at the Orpheum.

Deaths

Eugene H. Haines

At the age of 10 years, Eugene H. Haines, son of Mr. and Mrs. Frank Haines died on Thursday last at his home on Third avenue west as a result of heart disease, from which he had suffered for several months. Funeral services Friday afternoon were held from the Grossman & Emme chapel and were conducted by Rev. C. L. Bent. Mrs. J. H. VanTassel sang. Interment was in the Twin Falls cemetery.

Mrs. Katherine Straub

Shock from a fall in which her leg was broken last Sunday was a contributing factor to the death of Mrs. Katherine Straub, which occurred Wednesday evening at the home of C. E. Edwards on Blue Lakes boulevard, where her daughter, Mrs. Kate Miller, has been housekeeper for a year past. Mrs. Straub was almost 94 years of age. She had made her home here with her daughter for about ten years. Funeral services will be held at 10 o'clock Friday morning from the Crosby chapel and will be conducted by Rev. C. L. Bent, with interment in the Twin Falls cemetery.

James O. Rievin

At the home of his daughter, Mrs. J. L. Cunningham, eight and one-half miles southeast of Twin Falls, James O. Rievin, former resident of Bohi, died Tuesday last at the age of 82 years. A son from Pocatello was here. Funeral services will be held today at Pocatello, where interment will be made.

Classified Ads will bring you help.

TWIN FALLS BOY WINS COMMISSION IN FRANCE

Charles J. Younger of Twin Falls, on duty in France with an American aviation squadron, has been commissioned as a first lieutenant in that branch of the service, according to word received by relatives here. Lieutenant Younger has been in France for about one year past, serving first for six months as a member of an ambulance unit and later entering the aviation arm.

APPEAL FOR SPT GLASSES

"This week the government is making a special appeal for binoculars, my glasses and telescopes for the use of the navy. Those having such instruments are asked to present them to the navy, arrangements to receive them having been made by the county council of defense. They may help to spy a German submarine."

HIGH SCHOOL BAND TO GIVE CONCERT

PROGRAM INCLUDES QUARTETS,
TRIOS AND VOCAL SELECTIONS
BESIDES BAND NUMBERS

Student Organization, Under Direction
of E. J. Linder, Offers Entertainment
After School Hours Last Fall—
Displays Talent

On Friday evening at 8 o'clock in
the high school auditorium, the high
school band will give a musical pro-
gram, under the direction of E. J. Lin-
der. This program will consist of band
numbers, quartets, trios, and vocal se-
lections.

In the fall of the school year the
band began rehearsals somewhat crippled
by the loss of several competent
members through graduation and
enlistment. About ten beginners ap-
peared, who, together with those remaining,
in school, constituted the material for
the year's work.

The ability to play a string or wind
instrument is not acquired in a few
months. It requires ceaseless ef-
fort and diligent study. Not only is
this true, but some encouragement is
necessary. The band has shown prog-
ress since the first rehearsal.

There is some very promising talent
among its members.

It is the plan to make this event one
of the annual affairs of the school year.

Following is the program and mem-
bers of the band:

Program

March, "Our Director" (Bigelow)—

Band.

Creutzer, "The Iron Count" (King)—

Band.

Piano Duet, "Beetles" Dance" (Hil-
l)—Helen Spangler and Marjorie

Smith.

Descriptive, "A Day in the Cotton-
field" (Smith)—Band.

Trios, Cornet, Baritone and Piano, se-
lected—Vernon Walters, Chas. McCau-
ley, Marjorie Smith.

Serenade, "Cupid's Charming" (Mil-
ler)—Band.

Trios, Flute, Violin and Piano, "Moun-
tain Echoes" (Andro), Menuet in F
(Bach)—Ernest Reed, Marjorie

Smith, Mr. Linder.

Song, "Long Live Our U. S. of A." (Mil-
ler)—Band.

Brass Quartet, selected—Vernon Wal-
ters, Francis Sheneberger, Theodore

Schwartz, Chas. McCauley.

Overture, "Radiant" (Koefer)—

Band.

March, "Over the Top" (Crosby)—

Band.

"War Songs" (Rollinson)—Band.

"Star Spangled Banner."—Band.

Personnel of Band

Cornets—Vernon Walters, Dale Starr,

Noel Bailey, Paul Carlson, Kenneth Ay-
ers, Albert Dittell, Harold Porterfield,

Field Street.

Clarinet—Ernest Reed, Leslie Mout,

Lytle Bolton, Ralph Coburn, Easter Rog-
er, Leonard Hill.

Soprano Saxophone—Dean Davis.

Tenor Saxophone—Silas Davis.

Alto Horn—Theodore Schwarz, Chas.

Hesselsburg, Lawrence Strong (enlisted).

Tenor Horn—Quint Lendia.

Trombones—Vaughn Price, and John

Gamble.

Baritone—Charles McCauley, Francis

Sheneberger.

Tuba—Marvin Strong, John Hughes.

Drums—Elmer Wyland, Gwen Wat-
son.

LAST DUAL GAME
IS AGAINST BUIHL

The last dual interscholastic basket-
ball game of the season will be played
on Friday afternoon next, at 3:30
o'clock, on the floor of the local gym-
nasium, between the Buhl and Twin
Falls high school teams. The Buhl team
started late this season, but is rapidly
gaining but into shape, and a good
game is in prospect.

Winter Time Is
Planning Time—

NOW is the time to plan
your new buildings.

Planning in advance saves
waste. It insures satisfac-
tory building. It outlines
your work and enables you
to prepare for it.

"CUSTOMER'S AID" is
this year in better shape to
serve you than ever before.

Every month we add doz-
ens of ideas to it until now
it presents the highest form
of building help.

Let it do for you as it has
done for hundreds of prac-
tical farmers throughout
Southern Idaho.

Solve your building prob-
lems in the permanently
satisfactory way.

ALFALFA MILL AT KIMBERLY WORKS

Product Made With Ready Sale on the
Kansas City Markets—\$15
Is Price APM

KIMBERLY—W. B. Summers has
started his alfalfa mill and is grinding
and shipping the meal to Kansas City
markets, where he has a ready sale for
the product. About fifteen dollars per
ton is paid for the hay delivered at the
mill.

The play entitled "The Frozen Trail"
was given by the talented company of
Marquand and mot with a full house
at the local theatre Monday evening.
A good performance was reported and
the play is expected to be continued for
the Red Cross.

E. B. Bledsoe and family and J. T.
Bledsoe and family leave this week for
their new home on the North Side,
where they will reside near Eden.

A. C. Dalley and family are moving
to the Albert Ball ranch south of Han-
sen, where he will farm the coming sea-
son.

W. S. Baty and J. C. Baty are load-
ing their emigrant cars for Canada,
where they have bought land. W. E.
Cawood has rented the place they had
from H. L. Brandt.

E. M. Willmarth held his sale Tues-
day preparing to move to his new
home near Nampa.

C. T. Brown and wife are expected
this week from their visit to Cali-
fornia.

E. S. Wood is expected to arrive here
this week from Nebraska with his car
of emigrant goods. He will move to
the Burkhalter place north of town.

W. B. Hong and Ralph McBride ex-
pect to hold a public sale at the for-
mer's place about the first of March.

D. Kirby and family will leave in a
few days for a ranch on the Salmon
river, where he will farm for L. G.
Gatlin.

A good roads meeting was held here
Saturday afternoon. W. F. Brower was
chairman and H. W. Atwood secretary.

J. C. Fortman, lecturer on the local
lyceum course, spoke here Wednesday
evening.

E. E. Lewis is loading his property
this week and shipping to Gooding,
where he will reside. A reception was
held for Mr. and Mrs. Lewis Tuesday
evening at the M. E. church, and every-
one is sorry to see this good family
leave Kimberly.

GUY MILLER WRITES OF ARRIVAL IN FRANCE

Two Days' Trip From Port to Barracks
Says Camp in Fine Shape—Tells
About French Cafe

Guy Miller, son of Mr. and Mrs. Wil-
liam Miller of this city, has written his
parents of his arrival and experiences
in France.

The letter follows:
"Somewhere in France,
January 13, 1918.

My Dear Folks:
Well how is everything going with
you now? I am doing just
fine in every way. There is very little
we can tell so you see it makes it hard
to write.

We landed all right one morning ear-
ly, and that night we were on our way
to camp, riding in cars they had laid
out for us and in like those in the States, only
about one-third the price.

For a couple of days we reached our barracks,
which were in fine shape. We have a
great time making the people under-
stand what we want, but we are get-
ting by pretty good by this time.

I ate a meal in a cafe here one night
and it sure was a joke. First they
brought in a loaf of bread, then after
while soup, fried rabbit, pork, apples,
cake, and sugar followed at about five-
cent intervals until we had eaten about
how long it took us to eat. The whole
thing cost us about \$1.00.

Say, I got a bargain last night; saw
some "cutie" apples and bought a
dozen (20c) worth, and got ten, and
in five minutes they were gone, so you
see I am still able to eat.

Tell Walter and Bert to write, and
any chocolate candy they send I will
guarantee not to return.

Well it's time to quit. Best wishes
from your son

GUY.
101st Field Hospital Co., 110th Sanitary
Train, A. E. F.

UNPATRIOTIC SPEECH COSTS DAMAGE CLAIM

Jury Holds Wm. England Not Entitled
to Relief for Injuries Inflicted
by Dr. Erskine

A jury in district court here denied
William England's claim for damages
in the sum of \$1000 or any other amount
for personal injuries alleged to have re-
sulted from his encounter on June 5,
1917, with Dr. H. B. Erskine, local vet-
eriniarian, the defendant in the action.

Dr. Erskine did not deny assaulting
England, but said that the assault was
provoked by England's remarks in ef-
fect that President Wilson had forced
the war upon the American people; that
it was for the benefit only of the cap-
italist class and Hindus, and that eva-
luation under the draft was justifiable.

England is said to have altered his
views since the occurrence.

TO PROVIDE FUND FOR SCHOOL RED CROSS

Patriotic Program and Dinner to be
Given in Connection with
Fair at Curry

Pupils of the Curry school, taught by
Mrs. George Patton, Miss Ethel Hubert
and Miss Faye H. W. will give a Wash-
ington's birthday program in con-
nection with a community dinner in the
school building on Friday night.

Ribbon prizes will be awarded to the
successful entrants in a school fair to
be held during the day, and the prize
money together with the proceeds of the
program and dinner will be used to
secure a membership for the school in
the Junior Red Cross organization.

Recover After Operation—George and
Jean Sprague, children of Mr. and Mrs.
George F. Sprague, are recovering from
removal of their tonsils by surgical op-
eration last Thursday.

SOLDIER GIVES TIMELY HINTS TO GIFT SENDERS

AMERICAN TOBACCO AND CANDY VALUED NEXT TO LETTER FROM HOME

WORD FROM MEN AT FRONT IS
UNANIMOUS IN RESPECT TO DESIRES
AND NEEDS FOR THINGS
HARD TO SECURE ELSEWHERE

Next to letters from home, American tobacco, cigarettes and candy are the articles American troops in foreign wars desire most and find hardest to secure. With perfect unanimity, word received from these men bears out this statement, and relatives and friends wishing to contribute to the happiness and comfort of the fighting men abroad are generally guided accordingly.

A letter from an American officer in England to his sister conveys interesting and valuable information to those who are seeking for means of expressing in a tangible manner their appreciation of the service and sacrifice of the men bearing the brunt of warfare.

He writes: "To begin with, I will answer questions. You ask me what to send. Cigarettes are a welcome, especially in France. Reading matter is always welcome. Papers like Life, comic supplements, sporting stories, anything that will take our minds away from war for a few minutes is always snapped up. Sentimental stories are not liked very much, while good old blood-and-thunder yarns and detective stories are sought after by all."

"When you send gifts to France I would suggest a few things: Cigarettes, pipe tobacco, few packages of chewing gum, some milk chocolate with a few nuts in it, a few figs, a tube of tooth paste, a box of Keating's or some other corn powder, a cake of soap, such as Pears, which will last in cold water, and a stick of shaving soap. Find out whether he uses a safety razor or not and send a few spare blades. Then send a small mirror. Get one with a chain attached to it so that it can be hung to the neck of a bottle or around a bayonet. Handmade candy is always enjoyed."

A package of plain sweet biscuits comes in handy and makes a change from bread with the users of jam. An automatic lighter, one in which a piece of felt or punk or something like that is ignited by the touch of a button, does not send anything which requires gasoline or other spirits to work with. A small pocket searchlight with a spark battery. Remember the make and send batteries regularly. Socks, khaki handkerchiefs, bachelor buttons, a small penknife, ink tablets, tea tablets. Do not waste your money on cocoa tablets. If you want to send coffee, send chocolate or salt and coffee or salt, some lump sugar or a bottle of saccharine tablets. Do not send (fill up the space in your packages with waste paper. Put in a copy of Life, the comic supplements, a small towel or half of a bath towel or a piece of a newspaper containing news which you think may interest the receiver. When possible, do not wrap your parcels in paper. Sew them up in some cotton cloth. This cloth comes in handy for cleaning mess tins and so forth. A cheap watch such as a dollar Tugwell is an invaluable present. In sending things be careful to send things which are in flat cases. For instance, if you are sending a razor, do not send one which will be bulky. Get one in a flat metal case. Flat tin articles are carried easily in the pocket or in the haversack.

"Some coat plaster or adhesive tape is useful, while a bottle of aspirin tablets will be appreciated by anyone who knows their uses and value. Pipe smokers send a pipe now and then, finding out first whether they prefer a straight or curved stem. Also send them some pipe cleaners."

"As water is very bad in the battle areas and all over Belgium, I would suggest that in the summertime you send some lemonade powder so that he can mix it up with the water in his bottles, taking away the taste and at the same time making a more refreshing drink. Before sending any such powder sample it yourself and send the one with the least 'leaky' taste."

FARMERS' LIBERTY LOAN QUOTA TO BE REDUCED

Relative to the forthcoming third Liberty Loan campaign in March, which, it is announced, will be larger than the two preceding campaigns, combined, J. W. Davis, state chairman, who had just returned from a conference in the matter at San Francisco, said at the meeting of the state farm bureau with the state council of defense at Gooding last Thursday, it is indicated that the allotments will be so distributed as to provide for larger subscriptions in industrial and manufacturing regions, and that agricultural districts may employ their finances for the production of crops. In a later campaign, if the fact, the farmers will be called upon to make the heavier subscriptions, it is stated.

Idaho Club Women Rise to Meet Responsibilities of War

MRS. M. J. SWEETLY, PRESIDENT OF STATE FEDERATION, BEINGS MESSAGE OF ENCOURAGEMENT REGARDING CAPABILITY AND DEVOTION OF THE MEMBERS THROUGHOUT DISTRICTS

The war brings to club women of Idaho and of the nation new responsibilities and opportunities for service which they are meeting with a capability and devotion deserving of the highest praise and without diminution of their efficiency in other channels of action, according to statement of Mrs. M. J. Sweetly, state president of the Federation of Women's clubs, made on her return to her home in Twin Falls after an extended visit among the clubs of the Second district in the interests of the scholarship loan fund, by which club women are undertaking to advance money for deserving young men and women to prosecute their studies in Idaho institutions of higher learning.

In Thicket of Gray
"I was gratified, indeed, to find everywhere our federated women in the thick of the fray and, almost without exception, in charge of important war work," Mrs. Sweetly said. "These women are or have been active club workers."

"The state chairman of the women's council of defense is Mrs. S. H. Hayes of Boise, one of the charter members of the state federation, a woman who has time, with all her other duties, to assist the state president not only with her advice but with her active service."

"Mrs. Haasmark, president of the Red Cross chapter at Nampa, still has time to be the acting chairman of the loan scholarship fund in the absence of Mrs. Gooding from the state. She is one of the most brilliant women we have, and though frail of body, she acts always by change of work."

Result of Organization
"I mention these women only to show what years of organized work as members of the Idaho federation have done for Idaho women. In Nampa I asked the mayor, Mr. Davis, why the club women were so prominent in war work, and he replied that it is because they know how to systematize and accomplish things quietly and that they can be depended upon absolutely."

"I found new lessons in service at Boise, Nampa, Caldwell, Payette, Emmett, Weiser and Mountain Home. And I cannot wonder that President Wilson is urging through our national federation, the necessity for keeping our organization intact as the one united body of women in the world, non-sectarian, non-partisan, numbering

AND NOW THEY ARE COOKING TOBACCO TO MAKE IT BETTER

For a good many years the American Tobacco Company have been conducting a series of experiments having as their object the improvement of smoking tobacco.

And it is interesting to know that one of the greatest of their discoveries was one of the simplest, and that was, that cooking or toasting tobacco improved it in every way, just as cooking most foods improves them.

They took a real Burley tobacco, grown in this country, toasted it as you would toast bread, and found it to replace the natural moisture driven off by smoking, and in those cigarettes called, then, "LUCKY STRIKE," the toasted cigarette, and offered them to the public.

The result has been the greatest demand ever created for any tobacco product in a similar length of time.

The change produced by toasting is not only most wholesome, but the flavor is greatly improved, just as cooking improves meat, for example.

2,500,000 members always ready for important service

Extant Field of Service

"Our district presidents, besides carrying the enormous amount of work which the war has added to their official duties, are occupying positions of responsibility and trust in Red Cross and other war work."

"Mrs. Lamson, second district president, whose son is in the trenches in France, is president of the women's auxiliary at Nampa, an organization whose mission is to help the men at the front and their loved ones at home."

"Another prominent club woman who cannot herself leave home is doing her bit by taking care of little children of other women three afternoons each week so that they can go to work and look at case about their little ones."

"I found in some of the towns a wonderful work our women are doing for those whose loved ones are at the front. Some clubs have lists of every family thus touched. They have committees to go and visit them, give them what may be needed. Not many thus far have had need for more than expression thus extended of the sympathy and love of those around them. To make them feel that they are near the hearts of all, drawing them into various works and interests and giving to them of the world's goods if need be—these appeals to me as an example which should be followed by all of us."

Small Clubs Make Records
"Even the smaller clubs have raised large sums for the different war funds, many of them by unique means. At Weiser, for instance, a club of about 40 women raised \$875 for the Bryan and Armenian relief fund, by interesting sections, individuals and organizations."

"They have not failed to maintain their work in raising Red Cross money, etc., and were among the most enthusiastic to assist in raising money for the aid of our own boys and girls who need help to be able to shoulder the nation's burdens in the future."

"At Payette much has been done to assist directly French orphans."

"All of these clubs have raised by their efforts in almost every instance, at least \$1000 for the different needs occasioned by the war, Red Cross work of course, coming first."

"In one town the club has taken it upon itself to district the town in order that it may know what each woman is actually giving of service. A result is that every woman is doing her best under a system that knows no slacker. The more they are doing, the more they are willing to do."

"I found the superintendents and principals of schools enthusiastic indeed over the loan scholarship fund. We have today 35 memorials in sight and several others being provided for \$2500 and every dollar of it has been a free will offering of love."

JURY HOLDS O. S. L. LIABLE FOR LOSS

Awards \$1000 Judgment to Producers' Association in Spud Consignment Case

A jury in district court in the case of the Southern Idaho Producers' association against the Oregon Short Line Railway company, recently after 12 hours' deliberation, returned its verdict awarding judgment in the sum of \$1000 to the plaintiff. The association's claim for judgment was based on the allegation that the railway company had delivered a consignment of three car loads of potatoes shipped from Twin Falls in February, 1916 to a party in Chicago not the consignee, and that payment for the potatoes had been withheld. It introduced evidence to show that the potatoes had been consigned to the agent of the association at Chicago with orders that a certain broker, to whom delivery was actually made, should be notified on receipt of the shipment there. The defendant sought to prove that inasmuch as previous similar consignments had been delivered to the broker in question he was to be regarded as the legal agent of the association.

The Chevrolet

When you buy an automobile, you get either success or failure. Your car reflects the company it represents. There is no other way of figuring it. The Chevrolet has been a great success from the beginning. Among the reasons to be considered—

The Motor

FIRST—in the front rank of modern motor construction—is the Chevrolet valve-in-head motor.

The superior efficiency, economy and flexibility of this celebrated type of motor is already well known to the purchasing public.

This type of motor uses up all of its fuel. Waste is minimum. Maximum power is guaranteed. This is fuel economy.

The success of this type of motor construction is seen in the fact that the valve-in-head motor is rapidly coming into use with many higher priced cars.

This Chevrolet motor is generally considered to be even superior to the ordinary overhead motor in the following important respects:

The Chevrolet motor is more compact—absence of valve cages does away with 64 unnecessary parts.

THE CHEVROLET motor is more accessible, having detachable head, containing valve mechanism—easily disconnected.

The Chevrolet motor is more efficient in design, balance, proportion and accuracy of timing—possessing unusual power for its size and weight.

The Chevrolet motor is more economical—small cylinder bore, with proper port area, perfect vaporization of fuel, giving unusual mileage.

The Chevrolet motor is convenient, allowing utmost accessibility to all parts.

But motor excellence does not tell the whole story. The car itself is built right—on honor. Its performance are in excess of the products given.

It performs like the most expensive of cars and costs, until March 1, 1918—

DELIVERED, AND WITH ALL WAR TAXES PAID—\$736.20

NOTE TO DEAL WITH OWNER OF POWER SITE

CITIZENS TAKE STEP TO WARD SECURING A PUBLICLY OWNED PLANT

COMMITTEE TO NEGOTIATE FOR
PURCHASE OF CLEAR LAKE SITE
—CHARGES MADE AGAINST CORPORATION IN CONTROL—

A meeting of about 100 citizens of Twin Falls, Buhl, and other, convened in the Commercial club rooms here Monday evening to discuss ways and means of securing a mutually owned electric power and light plant and distribution system to serve this district, adopted by unanimous vote resolutions endorsing the principle of public ownership of power plants and the plans of the Mutual Light, Heat & Power company, recently formed to develop and furnish current to its stockholders at least of production.

Entireties Owner's Proposal
The resolution adopted further declared in favor of taking over the fully developed power site at Clear Lake on Snake river north of Buhl owned by W. C. Hazard, and provided for the appointment of a committee to enter into an agreement with the owner in pursuance of a proposition submitted by him at this meeting, with a view to taking over the property and determining the legal title to it.

In conclusion the resolution invited the co-operation and assistance of all people and organizations in the public ownership of a power plant to give their moral and financial support to this end.

Appointment of the committee of five members to negotiate with the owner for the taking over of the Clear Lake site is delegated by the resolution to County Auditor E. J. Finch, a director of the Mutual company, who presided as chairman of this meeting.

Respectful Notice

The resolution was adopted by a motion of J. A. Cron of Twin Falls, following discussion of the subject in which prominent part was taken by J. H. Seaver of Buhl, and Dr. A. F. McKinley of Twin Falls, an organizer of the Mutual company, and W. C. Hazard. Expressions in favor of the plan were heard also by Dr. A. F. McKinley and Mr. Koppelman of Buhl, D. F. Detweiler

War Has the Right of Way

TWIN FALLS BANK & TRUST COMPANY

TWIN FALLS, IDAHO

of Filer, and O. E. Carlson of Twin Falls, chairman of the board of county commissioners.

Seaver Quotes Profit Figures
Mr. Seaver resigned three years ago as manager at Twin Falls for the Great Shoshone & Twin Falls Water Power company, which was later absorbed by the Idaho Power company, now serving this section, as well as practically all of the southern Idaho district. He is now engaged in the sheep growing industry and says that he cannot be stamped back into the power business. His statement at the meeting Monday was an endorsement of the proposed publicly owned plant on account of its low installation and operation costs. He quoted figures from the reports of the company now serving this district showing that during the year ending December 31, 1910, in Twin Falls a net operating revenue amounting to \$28,717.50 was obtained after operating expenses amounting to \$31,884.99 had been paid. During the same period net revenue of \$11,055.01 above expenses of \$18,561.38 in Filer and a revenue of \$6,539.85 above expenses of \$17,927.24 in Buhl had been taken in.

Explains Apparent Recross

Requirements of a large capitalization and necessity for distributing profits obtained in the districts yielding a profit to cover deficits in non-profitable districts served were the reasons advanced by Mr. Seaver for these figures. He argued that the proposed public owned concern in that it need

not provide for these extra items of expense would be in position to deliver current to particular consumers greatly reduced cost.

Hazard Makes Charges

Charges that the Idaho Power company, now in control of the electric power industry in this district, was at the meeting to transfer his title to the Clear Lake site in litigation and prevent subscription to capital stock of the Mutual corporation, even though valid and legal objection to the title did not exist, were made by W. C. Hazard, in a written statement from which he read in submitting his proposition relative to the transfer of his title in the power site to the publicly owned facilities.

He suggested the appointment of the county proper and fought his legal case, stating that it was impossible at this meeting to make a definite offer, for the reason that there were many details to be considered.

Says Title Is Clear

"It may be that all legal steps necessary to acquire and maintain the power rights at Clear Lake have been taken under the direction and supervision of Wyman & Wyman, of Boise, and the title has been inspected and pronounced good by prominent local attorneys," he said. "At the request of the Mutual corporation abstract of title both to the power site and water permits were examined by its attorney, Judge James K. Bethwell, who found them satisfactory."

"Notwithstanding these facts," he added, "the Idaho Power company has seen fit to bring into question my title through certain persons who are residents of Clear Lake, so that a fight has been commenced by the Power company to prevent the people from owning a mutual power plant."

Asks Public Support

"I do not have the money with which to fight this great power corporation through the courts, and for that reason I am here tonight to solicit the moral and financial aid of this community, and to make an offer to a committee or body of men clothed with power to negotiate with me. I believe that the Mutual corporation or any other organization incorporated for the purpose mentioned, should have the property needed to it, in order that it may care for the property and fight such legal battles as may be necessary to clear the title to it. If my title to the property be lost in such litigation, then the corporation taking it in trust to be under no obligation to purchase it. If the title is cleared then a stated sum should be deducted from the price of the property to reimburse it for the money it has spent in litigation. The price of the property should be determined by a committee, half of which should be a committee of itself and half by the corporation, and in the event this body of men cannot agree, they shall select a third number to be composed of one or more persons, and the three elements so chosen shall determine what price shall be paid for the property. That I shall be bound to accept such sum."

Might Give It Away

"The fact is that I am willing to

HUNS COMPEL BOLSHEVIKI TO YIELD TO TERMS

KAISER'S FORCES CROSS DVINA AND BEGIN INVASION ON 400 MILE FRONT

INFANTRY LEADERS ON THE WEST FRONT, WITH ARMIES READY, EXPECT GERMANS TO LAUNCH MUCH ADVERTISED OFFENSIVE

With Teutonic troops advancing eastward into Russia over a front of 400 miles, from Riga in the north to Leningrad in the south, the Bolshevik government has capitulated and announced its readiness to accept the terms of a peace compact under the hard terms imposed by Germany. This means the giving up of Poland, Lithuania, Riga, and Moscow and the payment of an indemnity of four billion dollars. Thus far the operations have met with no appreciable success. Apparently it is still chaos in Russia, with civil war in progress and the food situation growing daily worse. Trotsky has been appointed food controller and given unlimited powers. He has ordered the arrest of food speculators.

Ready for Offensive on West
In France and Belgium the entire military leaders, with their armies ready, are expecting the Germans to launch their much talked of offensive, but there still is no outward sign of its approach. The German high command continues to feature the fighting. Three successful raids have been carried on against the Germans by the British, in Flanders and near Lens and Arras in northern France.

Air Fighting and Raids
Sixteen German airplanes were accounted for in the series of fighting by British airmen, and in addition German towns and military positions behind the battle front were heavily bombed. British naval airmen also paid a visit to the German naval and air bases at Zebrugg, which were effectively bombed, and drove down three German airplanes that attempted to give battle.

Eleven persons were killed and four injured in an aerial attack on London Saturday. Sixteen were killed and 27 injured in Sunday night's air raid.

On the American sector near St. Mihiel the Germans increased their aerial reconnaissance and bomb dropping expeditions. The American anti-aircraft guns are forcing the enemy planes to keep at high altitudes. One of them has been driven down and damaged by an American aviator.

American troops in France now are in battle on three sectors on their own lines near St. Mihiel and with the French in Champagne and on one of the most famous battle fronts in the world, where the Germans pushed forward their line and were ultimately driven back by the French.

All along the Italian front from Lake Garda to the middle of the Piave river artillery engagements are in progress. The tense political situation in Great Britain, arising from the secrecy surrounding the recent supreme war council at Versailles and the retirement of General Robertson as chief of the British imperial staff, has been bridged. Premier Lloyd George announced to the house of commons that it had been decided to set up a central authority and coordinate the strategy of the allies, and that the plan submitted by the Americans, "which put the case for the present proposal," was one of the ablest documents ever submitted to a military conference.

FAMOUS OPERA STAR IN THIS PICTURE

LINA CAVALIERI IN "THE ETERNAL TEMPTRESS"
AT THE IDAHO THURSDAY, FRIDAY, SATURDAY

A story of love and intrigue and of a gripping international situation saved by a woman's wiles, is Lina Cavalieri's first Paramount photoplay, "The Eternal Temptress." Opening at the commencement of the present international war, the scenes lead to a climax of thrilling intensity.

As beautiful Cordelia Sannio, Cavalieri wins the instant sympathy and interest of her audiences for her almost supernatural beauty, which is of the sort that films well, seeming almost to make its possessor stand out from the screen and become a living, breathing character. In her love affair with Harry Althrop, last of a long line of lovers, she comes into her best self and makes the supremest sacrifice a human being can make for another—and her country.

"RULES OF THE STRONG HEART" WITH GEORGE BEBAN COMING NEXT MONDAY

The ring of the woodman's axe, the hissing of the great logs as they slip down the gigantic chutes, the grinding of machinery by which the logs are created into lumber—these sounds rang in the ears of the players under Donald Crisp who was at Hooquiam, Washington, making the next Paramount picture starring George Beban—"Rules of the Strong Heart."

A recently announced a studio has been constructed in the Lucky lumber camp at this authentic spot and there a crew of workmen, as well as a big company of actors has gone to film exterior in the very heart of primary forests which are being decimated to supply the country with lumber for houses and ships.

"Rules of the Strong Heart" is from a story in Collier's by Wm. Merriam Brown, and George Beban will of course have the title role. That it will enable him to again demonstrate that as a delineator of Latin types he has no peer is the opinion of those who have seen the picture.

George Beban himself is sponsor for the statement that his one aim and desire since he entered motion pictures is to give the public plays that are exactly different and to portray characters that are colorful, big, vital, wholesome and clean. Such a play and such a role will, it is promised, be found in "Rules of the Strong Heart."

CUTS AND FLASHES

"The Ince stamp of approval to anything in a picture is as good as 'selling' it as a piece of the silver. It stands for merit in the eyes of the gro, for who has ever seen an Ince photoplay that ever smacked of the mediocre?"

"Has anyone ever seen an Ince picture that left even the semblance of a bad taste? Was there ever an Ince photo-dramatic role that was not well acted, or an ill-selected cast of performers who were not first class? Has anyone ever seen poor photography in an Ince picture-play, or a poorly conceived plot?"

The foregoing is an excerpt from an article by the author of this column in the Herald-Republic of Salt Lake City, Utah, of which he is dramatic editor. He continues:

"We believe that the great majority of the patrons of motion picture playhouses will agree that they have seen none of the things that go to make an Ince picture in the face of the productions of the past, and all accept a continuance of the Ince standard and even its betterment in his new venture in the Paramount. He has a finer hand now and this means more of Ince in every picture he produces, which in turn means more interest in the picture, more variety, in more of the amazingly good Ince pictures, and finally the erection of a lasting Ince edifice."

George Beban in "Rules of the Strong Heart" Paramount Pictures
COMING MONDAY

"All the Ince stars are now working on the first pictures the producer is to release through Paramount. Sam Dalton, Charles Ray and Reid Barnes are all being kept on the jump, and their newest productions, too, are well under way."

"The new pictures are all being supervised by Mr. Ince, who is also hard at work on the construction of plans for the erection of a big new studio in Hollywood, Cal."

SECOND SECTION

Entered as Second Class Matter December 2, 1904, at the Twin Falls Post Office, under the Act of March 3, 1879.

THE FARM WAGE SCALE

PRACTICAL value of the farm wage scale adopted for the guidance of Idaho farmers during the coming season by the State Farm Bureau, State Council of Defense and representatives of organized labor at a conference in Gooding last Thursday, depends largely upon the fidelity with which it is adhered to by the employers as upon its acceptance by the employees.

The greatest single bar to the solution of the farm labor problem in the past has been, perhaps, the competitive policy pursued by the employers themselves. A man familiar with farm problems in this district is authority for the statement that there was an available labor supply in men here last fall to harvest every pound of crop grown. This statement is made in full knowledge of the facts that the schools in several instances were dismissed to send the students into the orchards and harvest fields, and that even then thousands of dollars' worth of crops perished through lack of labor to harvest them.

Men were here to do all this work and more, but they would not work for lesser wages so long as they believed there was a chance of receiving more. Inveighing against this situation will avail nothing in the solution of the problem. It must be recognized as a situation that exists and dealt with accordingly.

A single defalcation in the ranks of the employers with respect to wages paid is sufficient to upset the whole scheme, and for this reason the payment or acceptance of higher than the prevailing wage scale is unjustifiable.

So long as assurance is given that more is to be gained by work on the farms than in the towns, the drift of labor will be toward the country, and when it is fully understood that employment on one farm is as well compensated as on another, there will be no excuse for men to stand about on the street corners in the hope of employment at higher wages to compensate for a temporary period of idleness—nor will they do so.

Unanimity of the diverse interests represented at the Gooding conference in adoption of the wage scale recommends the measure as one that is fair to all parties concerned, and it may be looked to in the light of a measure that will go far toward the solution of the farm labor problem, provided it is strictly adhered to.

AUDITING THE BOOKS

IT WOULD be well for everyone to understand that from time to time during the next few months there will be discoveries of mistakes, shortages, and similar high crimes as a result of the various audits of different state offices now going forward.

Just at this time the affairs of the Land Board are under fire and already there have been lurid headlines in a number of newspapers as to alleged false patents to lands, juggling of records and general incompetence. An interesting coincidence is presented in the fact that all these things date back to Republican days and that Republican office-holders are the only culprits so far discovered.

Further irregularities will be uncovered and fresh newspaper stories will add fuel to the flames. No man will be given a chance to defend himself and the fact that the bulk of the items referred to are matters of common knowledge and in many cases have already been corrected will be dwelt upon not at all.

A very excellent example of just how the system works may be found in the charges publicly made against John W. Snook, former warden of the State Penitentiary, some months ago. Mr. Snook spent several days in Boise in an effort to have the charges made a legal issue in order that he might have an opportunity to reply to them in court but the matter died with the trial of the case in the newspapers. Every useful purpose was thus served and the State was saved the expense of a public trial.

There will be more of these cases.

A REMEDY

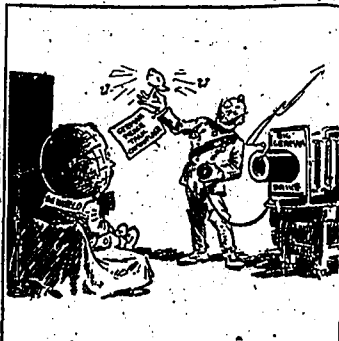

THERE is a sharp distinction between the man who is disloyal and the one who is merely unloyal. The disloyal type is easily recognized, but there is another element, almost equally inimical to the best interests of America, insidious, sinister and dangerous.

Examples of the type are to be found among those who, while well able to do so, have not bought Liberty Bonds, have declined to join the Red Cross, to assist the Y. M. C. A. or to observe the various food pledges. They rarely express an opinion as to the war, never defend this Government or any other, seldom criticize, rarely endorse. They are merely passive.

WITH THE CARTOONISTS

PEACE MAY BE AT THE BOTTOM OF THE BARREL
—Drawn in the Chicago Daily News.

"NOW, WATCH THE LITTLE BIRDIE."
—Orr in the Chicago Tribune.

Their attitude is not outwardly for or against anything, they simply occupy a supine position between the two extremes and by their attitude help to encourage the vicious idea that there is such a thing as neutral ground between America on the one hand and the German menace on the other.

It is difficult to deal with such an one. No single act can be cited as evidence of actual disloyalty and the mere fact that a man has declined to invest in war bonds or contribute to war charities is not enough of itself to constitute a cause of action. So far no legal method has been devised whereby these men may be driven into active support of our Government, but there are cases where ignorance alone is responsible and in these cases much may be accomplished through a campaign of education.

For the more flagrant cases there is still another remedy, drastic but found to be efficacious where used, namely, publicity. The posting of the names in public places of those who wilfully persist in withholding their co-operation in the cause in which this Government is now engaged.

The plan is not a new one. It has been tried out thoroughly in Michigan, Wisconsin and other middle western States. Conditions may not reach a point where such a step is necessary in this State, but should such treatment be warranted, it should be ruthlessly applied.

THE PROBLEM

WITHOUT adequate and proper facilities for conservation, increased production of foodstuffs is worse than useless. It results in the misapplication of labor for which there is urgent need in the present war crisis, and defeats the ends of the increased production movement designed for the purpose of feeding the nations striving for the supremacy of democracy, discouraging even the maintenance of former production records.

Tons of potatoes spoiling in the cellars and orchards turned upside down with the roots of trees where the tops should be, are present and costly evidence in the Twin Falls district of the fallacy of attempting to produce crops without proper means for their disposition. The problem is the more acute here in respect to the production of perishable crops because of the distance from markets and the insufficiency of transportation equipment that must always be taken into consideration.

These factors, however, ought not to be insurmountable, and are not. Other districts similarly situated have worked out solutions of the problem. Idaho Falls has its potato flour factory and Meridian is about to extend the scope of its conservation facilities, consisting now of an extensive evaporating plant, by the addition of a similar institution. Gooding County, under the direction of its Farm Bureau, has found a solution in its canning plant, which completed its initial and entirely successful season last year.

Many similar instances are to be found by those of this district who are interested in the solution of the conservation problem, and the number of investigators in this direction ought to include everyone who has his living to make here.

One need not be so directly concerned as a stockholder or as a purveyor of apparatus for the conservation of perishable foods to appreciate the advantages of such institutions and not only to extend a cordial welcome when they make their appearance here, but to reach out and help to bring them in.

"HE WHO TOOTETH NOT"

ONCE in a while at odd intervals, The News feels impelled to pick up its horn and give thereon a gentle toot. Not often, but occasionally.

On page one of this particular issue will be found a facsimile of a letter which reached this office, unsolicited and uninvited. It deals with an important subject rather better than The News itself could deal with it. It comes from a representative of the great foreign advertising class (advertising business originating outside the State) and was accompanied by a substantial advertising contract. The man who wrote it, as a representative of this class, is an authority on the general subject of the value of newspaper advertising space.

The recognition of the efforts of The News to give to its patrons the very best of which it is capable in the way of a carefully edited and well printed weekly newspaper is, we venture to hope, as gratifying to patrons and readers as it is to ourselves.

THE BRITISH VIEW

THE American garrison, which will be occupying England and France, whether or not it will prove efficient against the Germans, undoubtedly will be capable of intimidating strikers—an occupation to which the American army has been accustomed at home.

These words, a part of an article which he had written, sent the author, Bertrand Russell, to prison for six months in England last week.

It does not require a great deal in the way of anti-government talk to land a man in jail in England these days, and as the war wears on it will require less than at present to bring about the same result here.

Apparently a few years of war teaches that an actual hostile act is not always necessary to establish the fact that a man is a menace to Government and Citizenship.

THE WOMAN'S GAME

(London Pictorial.)

Was there ever a game we did not share,
Brother of mine?
Or a day when I did not play fair,
Brother of mine?
"As good as a boy," you used to say,
And I was as eager for the fray,
And as loath to cheat or to run away,
Brother of mine!

You are playing the game that is straight and true,
Brother of mine,
And I'd give my soul to stand next to you,
Brother of mine.

The spirit, indeed, is still the same;
I should not shrink from the battle's flame,
Yet here I stay—at the woman's game,
Brother of mine!

If the last price must needs be paid,
Brother of mine,
You will go forward, unafraid,
Brother of mine.

Death can so small a part destroy,
You will have known the fuller joy—
Ah! would that I had been born a boy,
Brother of mine!

ENOUGH ALREADY

It is a good thing that it is no longer the custom to throw eggs at poor actors. Think what an incentive to poor acting that would be nowadays!—Kansas City Times.

TO SAVE COAL BY USING DAYLIGHT

(Literary Digest)

We should have a million tons more coal now, it is estimated, if the Daylight-Saving bill now before Congress had been enacted last summer. In other words, remarks the Newark News, the clock has been "a slacker," and "no exception should be granted to it this year." This bill, agrees the New York World, "remains the most practicable coal-conservation measure yet proposed, and it would work automatically." The principle which it embodies, to use daylight and conserve artificial light by setting the clocks ahead one hour during the summer months, has been tried for several years in Cleveland and Detroit, and testaments from those cities endorse it unreservedly. "Clevelanders today would no more give up the hour of daylight than they would give up their citizenship," declares the editor of the Cleveland Press, and the editor of The Plain Dealer writes us that "after more than four and a half years' actual experience with daylight-saving, Cleveland, one of the largest and most important industrial centers in the country, would not turn the clock back for the month of May 1, 1914, under any consideration." "Daylight-saving is here to stay," says the editor of the Detroit Journal, and The News of the same city testifies that "the plan has had an accelerating effect generally."

Even more impressive is the testimony from the twelve European countries where daylight-saving has been adopted as a wartime measure. According to The Chicago Herald it is claimed that this simple device of setting the hands of the clock saved 200,000 tons of coal last summer in England and reduced lighting bills 23 per cent, and that in France an economy of \$10,000,000 was announced.

A RAIL-SPLITTING SIDE-SPLITTER

There's a story told of Mark Twain to the effect that the great humorist used to make good money splitting rails in an easy and delightful manner. He simply chopped down his trees, sawed them into lengths and then set down anti-toil jokes so funny that the cuts would split open with laughter. One day, however, he "struck a stump," the cuts refusing to appreciate his jokes. All day he sat at the butt of the tree, cracking all the old jokes he knew and manufacturing some grand new ones, but with no success. He went home and slept over the problem and when he returned to work next day the cuts were all split into a thousand splinters. Twain told a passing farmer of the incident and the latter replied, "You're a fool, that was an English walnut tree."—Los Angeles Times.

THE PEOPLE CAN DECIDE

America stands where Britain stood soon after the beginning of the war. There is no immediate danger of compulsory rationing in this country. Whether or not compulsory rationing ever becomes necessary depends almost wholly on the people. The national food administration is doing its best to make clear the need of economy. It is enforcing regulations wherever possible. It cannot, under the present law, enforce economy in the kitchen or the household. But if its precepts are ignored it will in time be given greater power, and the men and women who they told the satisfaction of their appetites more important than the national welfare may find themselves waiting in long lines for their daily doles.—Cleveland Plain Dealer.

THE CIRCUS IN DANGER

In the good old days the circus did not have to secure the permission of the railroad managers to move about the country. It was its own business and it was its own locomotion. It traveled on its own legs and on its own wheels. The camel and the zebra and the ponies paraded in triumph through country after country, and the small boy went down the road with them and got a job carrying water to the elephant, that admitted him to the afternoon performance. But the modern circus has become capricious. It wants more comfort and luxury. There is an easy answer to all this. Let us get back to the old-fashioned circus with one ring and start the parade promptly at 10 o'clock.—New York World.

THIS SHOULD CONVINCE HIM

The Pennsylvania "Dutch" have voted to ban the German language from their church services. If anybody could only make the Kaiser really see what it means for a Pennsylvania "Dutchman" to change anything, we should have them "out of the trenches" by supper time.—Springfield Republican.

FURNISHES

As Lincoln might have put it (but for his kindness of heart), you can't see some things for all of the time and all of the people some of the time, but you can't feel all of the people all of the time.—New York Evening Post.

SANQUINE PRESS-AGENTING

There have been several well-advertised giant German drives on the west front heretofore, but none of them lived up to the advance announcement from Berlin.—Chicago Herald.

THE VULNERABLE POINT

When it becomes necessary to expose those Hohenzollern boys to danger, then will the masters of Germany propose peace terms that may be worthy of consideration.—Baltimore Star.

There is evidently such a thing as being too well prepared; the Germans built the Vatterland in such a way that she could be at once converted into a troopship.—Philadelphia North American.

William, the well-known Christian Kaiser, has written another letter thanking the Almighty for help. We're afraid William is sending his thanks in the wrong direction.—Cleveland Press.

The fact that the demand for peace in the Central Powers is largely the demand for a piece of bread only makes it the more menacing for Wilhelm.—San Francisco Chronicle.

Now it appears certain that daylight saving will become a fact. It has been discovered that it would be good for baseball.—Buffalo Express.

We will say this for the Czar, and the Grand Duke, they had better looking whiskers than the Hohenzollerns.—Columbia Record.

No, we haven't hanged or shot any spies yet. But we have reprimanded one or two of them severely.—Sydney Herald.

Embargoes seem to apply to about everything except critics.—Newark News.

GOVERNMENT'S LIVE STOCK POLICY

(By Jos. P. Cotton, Head of Meat Division, United States Food Administration.)

In an address delivered before the recent convention of the National Live Stock association at Salt Lake City, Joseph P. Cotton, head of the meat division of the United States food administration, made the following interesting statement concerning the government's live stock policy:

"Six months ago we cheered the war cry that 'the United States was in the war to the last man and the last dollar.' And practically one of us had any conception of what that phrase meant. 'Since then the war map has changed. To the cattle grower and particularly the feeder, the first real hardship came in the prices of feed and the difficulties of labor, and now sharply in the market prices for high grade cattle and the shortage of feed at any price.

"Some of us think of these hardships as a result of mismanagement somewhere—some failure of government, some greed of a middleman, some profiteering by a retailer; and we want some government action taken which will clear it all up and leave the cattle grower and feeder at least as well off as before the war. There never was a more fundamental misconception.

"The existing hardships and the future sacrifices of the live stock industry are caused first and chiefly by the war, as definitely and certainly as if there were a Zepplin or a German submarine or a Prussian army ravaging the corn belt. The sacrifices you are making are sacrifices to the food administration, and the first taste of what it means to fight a war to the last man and the last dollar.

"I am sent here by the food administration to talk over with you the mobilization of your industry for war service. I bring no promise of miracles, nor word of a sovereign power to keep the industry from all hardships and sacrifice. We are here only to consider simply and wisely and without illusion how we can best meet the war needs of the country. We are here to let you make sure that the sacrifices you are called on to make help the country and the war. It is not a question of doing your share, for each man's share is all he can give, but you must not be asked for more than you have strength to do.

"Let us briefly review the situation of the live stock industry in the war. Speaking generally, the year ending last November was a profitable year for the industry. In the fall we saw unsampled high prices to the producer and the consumer—a bad thing for the industry—and heavy purchases of feed or stock brought the market high in competition with the packers. Since then soft corn and high price of feeds and a scarcity of feeds have made many of your ventures in buying feeder stock unprofitable.

"Some of these purchases of feeder stock were speculation and will show losses when the stock is marketed. However, no loss can be made unless any policy which has for its purpose saving from loss every purchase of feeder stock. That is impossible, but we must work out some policy that will avoid any loss that will cripple the feeding industry. The feeding industry and the live stock industry as a whole must go on and keep up production and to do that, they must generally be able to work with confidence that they will get a fair profit.

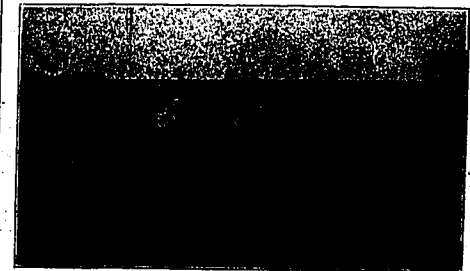

"Let us see what the government policies in the situation have been and whether they are fair. First, there has been a great drive, headed by the department of agriculture, for increased production, particularly on hogs. There is no question about the wisdom of that—we were short of hogs in the fall. The food administration sided by its corn ration and by its policy in stabilizing the hog price and its policy in placing the minimum of \$15.50 for hogs on the Chicago market.

"That is a fair minimum. I do not expect to change it in the immediate future, and we expect that we can hold it. Our advice to the industry now is, keep your feeds, keep your corn, and till they are ready to market. You will get no substantial advantage by rushing them to market and trying to get the top. I think, however, that there are two points where you may be called on to help. The railroads may be short of cars and the transportation of the meat may be difficult. If that happens, you will have to hold back the hogs on the farms for a day or a week until the glut clears.

"If that happens, I want you to look on that hog held back as if you were a soldier killed in action. You pay his head, you pay his feed, you pay his transportation, you pay his care, and you pay his burial. You are not to let your neighbors can hear, and send in your bill against Prussia when the nation's gaiter about the peace table after we win the war.

"Food administration has largely kept its hands off the cattle situation and cattle prices, but unfavorable market have been called attention to. You all of you know that the United States exports of beef to Europe have in the past been low, and even during the

A RESULT OF EARLY LAMBING

THESE TWO EWES ARE OF THE SAME BREEDING AND HAVE HAD THE SAME CARE. THE DIFFERENCE IN SIZE IS CAUSED BY BREEDING THE SMALLER ONE WHILE A LAMB.

war much less proportionately and actually than the exports of hog products. So there, too, we have the aid of the government in the form of increased export orders for frozen meat as to clear part of the freezer. I have advised the packers that it is our policy that the prices of cattle (except calves) will not fall substantially below the present levels at this time. And that, it seems, is the only sane remedy for a temporary condition where we have for a few months an over-supply which is only too likely to be followed by a shortage. We all know that any attempt to fix standard minimum cattle prices is almost an impossibility, and that at most periods the domestic demand takes care of the supply.

"Do not mistake what I say about these export orders which the food administration has issued to care for these temporary gluts when we have heavy runs of cattle and hogs. These orders will not be issued to boost the market and they will not be filled if the markets boost themselves. If any man interprets my remarks as a bull tip on the cattle market or as a tip to hold no policy in regard to it, let me say that I am not doing so. And if enough cattle and hogs are rushed to market at once, they will break any markets and swamp any buying by the American people, save the market; we can not do it all.

"The cattle feeding business in the past has been a good deal of a game—both a few years ago and now. A lot of bad ones. So far as the food administration is permitted, our efforts will go to keep down the big windfalls. In the fall we saw unsampled high prices to the producer and the consumer—a bad thing for the industry—and heavy purchases of feed or stock brought the market high in competition with the packers. Since then soft corn and high price of feeds and a scarcity of feeds have made many of your ventures in buying feeder stock unprofitable.

"Some of these purchases of feeder stock were speculation and will show losses when the stock is marketed. However, no loss can be made unless any policy which has for its purpose saving from loss every purchase of feeder stock. That is impossible, but we must work out some policy that will avoid any loss that will cripple the feeding industry. The feeding industry and the live stock industry as a whole must go on and keep up production and to do that, they must generally be able to work with confidence that they will get a fair profit.

"Let us see what the government policies in the situation have been and whether they are fair. First, there has been a great drive, headed by the department of agriculture, for increased production, particularly on hogs. There is no question about the wisdom of that—we were short of hogs in the fall. The food administration sided by its corn ration and by its policy in stabilizing the hog price and its policy in placing the minimum of \$15.50 for hogs on the Chicago market.

"That is a fair minimum. I do not expect to change it in the immediate future, and we expect that we can hold it. Our advice to the industry now is, keep your feeds, keep your corn, and till they are ready to market. You will get no substantial advantage by rushing them to market and trying to get the top. I think, however, that there are two points where you may be called on to help. The railroads may be short of cars and the transportation of the meat may be difficult. If that happens, you will have to hold back the hogs on the farms for a day or a week until the glut clears.

"If that happens, I want you to look on that hog held back as if you were a soldier killed in action. You pay his head, you pay his feed, you pay his transportation, you pay his care, and you pay his burial. You are not to let your neighbors can hear, and send in your bill against Prussia when the nation's gaiter about the peace table after we win the war.

"Food administration has largely kept its hands off the cattle situation and cattle prices, but unfavorable market have been called attention to. You all of you know that the United States exports of beef to Europe have in the past been low, and even during the

day is not objectionable, but it is argued that at periods when the market is glutted with cattle the demand is insufficient to absorb the surplus, particularly as to beef which is so highly perishable. It was because of this difficulty that the food administration obtained special export orders, which we expect them to be sufficient to meet the difficulty.

"In the Pacific coast states, from which there are normally no exports of frozen beef, and our export orders give little relief, for entirely local reasons, a short holiday will be granted from the beefers' day.

"I cannot expect that this decision is wholly pleasing to you, but I am sure you will accept Mr. Hoover's suggestion as patiently as you can. It is made by a man who better than any other, understands the world food conditions; by a man who has, in a way none of us have, access to view not of this industry alone, but of the country as a whole. More than that, it is made by a man who has nothing for himself, who is looking not only at the market of today, but at the year which is to follow, when the meatless day will be an absolute necessity, whose heart is set on one single object—to win the war.

"In studying the statistics of the live stock industry at this time of the highest prices in its history, the fact that while the prices of the average cattle stays fairly satisfactory, the spread between the top and the average constantly narrows and to the top tends to go down, and the spread between the bottom and the average constantly narrows and the bottom moves up. That price is not peculiar to cattle. It appears in nearly all commodities during any severe war and it is, and I believe it is, especially marked in this one. It is an inevitable condition to which the industry must adjust itself. With the demand for feed grains the country long, afford the luxury of highly paid cattle and that branch of the industry must turn to the marketing of short and half-cut cattle. If you have a change in the live stock industry will be on it. The live stock industry is asked for more hogs and as to the hog producer can safely go ahead so far as he has feeds with which he can make the business profitable around the stabilized price. But in this cattle business the producer must use his brains and watch his stuff most carefully."

"There are one or two other subjects I want to touch on. The first is feeds. Some of the feeds are not under the food administration, some are much hampered by transportation troubles. On the whole, I am inclined to say we have made headway slowly on the feed question, but I think we are on the right track. Further, the food administration of the feeds are at outrageous levels and must go down. The price of hard corn in particular seems to me very high.

"Next comes the question of the 'meatless day.' That has been discussed and some of you have felt that it is too harshly on the live stock industry. I think that view is wrong and am going to try to convince you. No one who has looked at the statistics will doubt that the American people eat more meat than any other, or doubt that, as a whole, they eat more than good for them. They can easily cut down.

"It is equally clear that this excess of meat eating is a luxury of a waste, and some of you have felt that there must be nationally—thrift and saving. And in the popular mind Hoover's meatless day and wheatless day have come to be the visible symbol by which the people pledge themselves to help win the war. It is hard to over-emphasize the value of those symbols. They have brought about a saving to each home, and they have the great advantage of being simple and concrete examples of conservation. They have a direct relation to the war because wheat and meat, together with sugar, are the essential exports which have come to be the visible symbol to the other side. All this, I think, you clearly understand and readily admit that at most times of the year the meatless

"The schedule of farm wages for the coming year printed in this issue is the result of careful deliberation on the part of the state farm bureau and members of the state council of defense. The meeting at Orono, last week, brought out very clearly the need of the most thorough and hearty co-operation on the part of every farmer in the state if we are to make the most of the labor available.

"Every employer should hold fast to that idea the men looking for work will come to the farm bureau office regard them so.

FARM LABOR TO STAY

President Wilson Replains Situation—Said May Be Fulfilled in the Planting and Harvesting Seasons. Future drafts under the new selective service regulations will not interfere with the supply of skilled farm labor, according to a letter received by Governor Arthur Capper of Kansas from President Wilson. Governor Capper has been interested in endeavoring to keep the supply of skilled farm labor from being seriously reduced, and the president's letter is in response to an urgent call for help from the governor. The president indicates also that farm labor may be granted, when necessary, for planting, cultivating, and harvesting food crops. This was likewise asked by the governor.

Mr. Wilson says in his letter: "Replies to Governor's Request. 'I have your letter of January 18, in which you call attention to the labor situation in Kansas and in which you especially request that the skilled

farmers in enthusiastic and training camps be given knowledge at planting and harvest time. I have also your statement that under the present-drafting methods, there is no intelligent selection possible between essential skilled and experienced farmers and the unskilled, non-essential men of the farms and small towns.

"As to your latter suggestion, I am inclined to believe from the whole tenor of your letter that you do not refer to the very selective service regulations, under which the present classification of registrants is now progressing, class in very specific terms in those regulations. It is provided that skilled farm laborers essential to the continued and undiminished operation of our farms shall be deferred in class 2. It is our present hope and belief that we shall be able to raise all the men in immediate prospect without invading any deferred class, and therefore, we can assume, I think, that future drafts will not interfere with your supply of skilled farm labor.

"I have also had very prominently in mind the advisability of furloughing selected men during planting and harvest time and to this end the war department has asked of congress, authority to grant such furloughs without pay whenever, in the opinion of the secretary of war, the military situation justifies such a step. Of course, it is impossible to say in advance what the changing military conditions may impose upon us, but I can assure you that, if this authority is granted by congress, we shall permit these furloughs whenever it is possible to do so.

"I take it that what I have said is precisely responsive to what you have in mind and I hope and believe that the various selective service commissions of men of your choice will exercise the authority to defer skilled farm laborers in such a way as to meet the situation you present in the most satisfactory way it could be met under our present circumstances."

URGENT USE OF HONEY IN MAKING OF CAKES

Home Economics Director for Idaho Will Be Glad to Furnish Information on Many Points.

Miss Jessie M. Hoover, home economics director for Idaho, United States food administration, is emphasizing the importance of substituting honey for sugar in the making of cakes. She is prepared to furnish a number of practical recipes and to give many hints for the saving of food and will be glad to communicate with all who are interested.

Honey Drop Cakes.
1/2 cup honey, 1/2 cup fat, 1/2 teaspoon cinnamon, 1/2 teaspoon cloves, 1 egg, 2 to 2 1/2 cups flour, 2 tablespoons water, 1 cup raisins. Nuts may be added if desired.

Heat the honey and butter until the butter melts. While the mixture is warm add the spices. When it is cold add part of the flour, the egg well beaten, the soda dissolved in the water, and the raisins. Add enough more flour to make a dough that will hold its shape. Drop by spoonfuls on a buttered tin and bake in a moderate oven.

POISONING ENGLISH SPARROWS.
The following method of preparing poison bait for English sparrows has been found very satisfactory and convenient:

Put one-eighth ounce of powdered strychnine in three-fourths gill of hot water. Add 1 1/2 teaspoons of starch or flour moistened with a few drops of cold water, and beat stirring constantly until the mixture thickens. Pour the hot poisoned starch into the wheat and stir until every kernel is coated. Spread the mixture in a shallow pan. A two-quart glass jar is a good vessel to mix in as it is easily shaken and allows the condition of the contents to be seen.

Roofs, back yards and unused poultry runs are favorable locations to put out the poison and every precaution should be taken to keep it away from domestic animals. The best time to poison sparrows is probably as the snow on the ground, when food is scarce and the birds are starving. It is of great importance to the farmers to protect their other birds for they are very beneficial in destroying all injurious insects. Sparrows are very wise and soon learn where danger lies, so the birds should be removed from the place when the poisoning is done as soon as possible.

C. J. Callier reports that the above formula has proven highly satisfactory in his case. He used a small trough suspended a little below the roof of a straw shed.

RED CLOVER SEED CULTURE.
George B. Oberdorf of Roswell, Idaho, hasn't had a failure in eleven years. He always gets a yield of over 8 bushels. This is how he does it, in his own words:

"The second bloom is what a person must bank on in first crop clover for seed, and if that fails I would advise you to cut your clover for hay not later than July 10. Even if the third bloom should fill you you wouldn't get more than 4 or 5 bushels per acre. If I think it is best for all of us to cut our first crop and take a chance on second crop for seed. Get your first crop in the stack as fast as you can, then give the ground a good irrigation, will say let water run 5 to 10 hours on the land you are trying to irrigate. Then wait 10 days or two weeks and irrigate again, but not too long. Then wait two or three weeks, if weather is hot irrigate in two weeks and if weather is cool wait three weeks before irrigating. Then forget you have a clover field and let it grow. Then nine-tenths of your clover heads are good and brown the crop is ready for the mower, and under ordinary conditions you ought to have a good seed crop."

COWS FOR SALE

Five Grade Jersey heifers, just fresh, for sale, 10 more coming in soon. Call the Farm Bureau if interested.

(Continued on Page 11.)

The cheapest fuel known to practical science is manufactured by the famous domestic Gas Maker (out of common coal and water) which is used in any smoking stove or range. Buy one of the Domestic Gas Maker demonstrated at the South Main. For information and instructions enclose stamp of one dollar and address—Adv.

Keep in mind the fact that Bevo, being a soft drink, will freeze at 32° Fahrenheit—just like any other non-alcoholic beverage. Be careful about this, as freezing affects the rich fullness of that delightful Bevo flavor which goes so particularly well with a meal or a bite by eat. If Bevo were merely a summer beverage this warning might not be so timely, but, as all who drink it know—

Bevo is an all-year-'round drink

Everybody enjoys it for more than just its thirst-quenching qualities—the pleasure it gives comes from its flavor, purity and wholesome nutritiousness—the enjoyment of these qualities is independent of time or season.

To get full pleasure out of Dutch lunches, Welsh rarebits, oysters, clams, lobsters, sausage, cheese and many other such delicious edibles, Bevo should be included.

You will find Bevo at inns, cafeterias, restaurants, groceries, department and drug stores, soda fountains, dining cars, steamships, canteens, soldiers' homes, navy and other places where refreshing soft drink beverages are sold.

Your grocer will supply you by the case. Demand the genuine—have the bottle opened in front of you—see that the seal is unbroken covering the crown top and see that the crown top bears the Fox.

Bevo is sold in bottles only, and is bottled exclusively by ANHEUSER-BUSCH—ST. LOUIS

Fred Murphy Cigar Co., Inc.

"WE NEVER DISAPPOINT"

IT'S A PLEASURE TO DO BUSINESS

is a modern business manner. Everybody prefers to receive a check for his account instead of the actual currency. No one in business should be without a bank account. It means security for the money deposited, security for money paid out by check. We have small accounts as well as those of larger size.

Idaho State Bank

(Continued from Page 10.)

FOYAL GROVE

The Foyal Grove Literary society, which meets every two weeks, met at the school house last Friday, February 15. It was a very excellent program of music, debates, readings, and talks. The local orchestra rendered several good selections.

The women debated on "Resolved: That farm women are too economical." This was both serious and humorous, brought out a great deal of interest and time. Everyone was very much interested.

Some of the younger folks put on a play and several very pretty. The county agent gave a talk on "Bacteria and the War."

The next meeting will be held March 1. There were over 100 present at this meeting.

MEETING AT SYRINGA

The farm bureau meeting at the Syringa school house, Friday, February 15, was very well attended. Mr. Alworth explained the objects of the farm bureau and told of the various activities it was furthering at the present time. Miss Britton-Wolf presented the plan of the women's department and the possibility of securing a woman county agent for the district.

Mr. Sommer, chairman of the district, had arranged for several musical numbers, which were well received. Coffee and doughnuts were served at the close of the program.

COURTY SCHOOL FAIR

Curry school district will hold a community and school fair all day February 22. They plan to have some excellent speakers and a Hoover basket dinner at noon. Prizes are offered for the best school work in the district of canning, embroidery, potatoes, etc. Everyone is cordially invited.

BUHL COMMERCIAL CLUB

The Buhl Commercial club will hold its regular bi-weekly meeting and supper at the high school, Thursday, February 28. Mr. Alworth, Mr. Edwards and Mr. McLean will be the featured speakers and farmers' plans for the coming year.

Farmers of that district are especially urged to come out.

TRY THIS FOR BLOAT IN CATTLE AND SHEEP

One pint raw linseed oil and two tablespoons turpentine, for bloat in cattle.

One-half pint raw linseed oil to one tablespoon turpentine, for bloat in sheep.

COST OF PRODUCING CORN STAGE

The New York state farm bureau office has been spending some time lately in getting the cost of milk production in a certain county. One of the factors in this matter was the cost of producing a bushel of corn.

In order to get an average of all the various conditions in the county a questionnaire was circulated to all the commercial and pleasure farmers. The results of these returned questionnaires gives the following data:

Rent for one acre	\$7.07
Plowing one acre	1.00
Harrowing one acre for planting	2.50
Fertilizer for one acre	6.00
Applying fertilizer to one acre	2.45
Cost of corn seed for one acre	1.01
Planting corn seed for one acre	1.34
(In labor)	4.57
Cultivating one acre for season	3.14
Hand labor (hoeing, replanting, thinning, etc.)	2.44
Harvesting (binding)	7.91
Harvesting and placing one acre of fodder in silo	4.65
Interest or deterioration of equipment, etc., etc., for one acre per year	13.39
Total cost of growing and placing one acre of fodder in silo	61.39
Average number of tons per acre	9.10
Grows	5.04
Cost of producing one ton of ensilage this year	5.04

BEES

Our honey crop can be increased immensely. Numerous districts in Idaho and other states are producing clover and alfalfa fields bloom, barrels-yes tons-of nectar become available. The key to the success of the beekeeper is to transform it into a palatable and highly nutritious food. Bees can be kept successfully in most, if not all, parts of Idaho and if they are properly treated and fed they will yield a good profit. Winter killing or spring dwindling, rather common in the colder sections, can be easily avoided by proper care of the bees in winter.

United States Farmers' Bulletin Nos. 391, 445, 446 and 447 are of value in the asking and they give valuable practical directions to the beginner in bee-keeping and also different ways that honey may be used. Write your farm bureau for them.

COMMUNITY HORSE BREEDING

A grade or scrub sire is the most effective proposition on the Idaho farm. Not all farmers can afford to buy high priced, pure bred mares, but certainly none can afford to use worthless sires. A carefully selected pure bred stallion in their horse breeding operations. Only by the continuous use of such sires can our horses be improved and it is surprising to see how quickly even one good stallion changes the character of horses in a community.

Resident in Buffalo county, Wisconsin, is regarded as one of the leading horse breeding districts in the United States. Buyers and breeders send many of the best horses from there. In that section almost every farmer drives to town behind a team of high grade or pure bred draft mares. This is the source of pure bred stallions for many years.

The farmers near New Richmond, St. Croix county, Wisconsin, are also well known for their good work horses. In the vicinity of this city, only the best pure bred stallions are used. Grant county leads the state in horse breeding. There are more pure bred stallions in service in Grant county than in any other county in Wisconsin. The enthusiastic horse men of that district even claim that they have more

and better horses than any other community in Wisconsin. The prevailing opinion of pure bred horses and stallions it has made scrub sires unpopular. Dane county comes next to Grant in the ownership of pure bred sires.

Why Bait Drafters

The auto truck has largely displaced light horse in the dairy country. However, instead of driving out the draft horse it has emphasized his value. Inquiries made among the large bulk breeders of some "bait" sires called for the drafters is preferred for short, heavy heads. The horse markets are continually demanding increased size and pure power, quality, of course, considered.

With the change from grain to stock farming the farmer no longer finds it necessary to buy his horses over the roads in getting his produce to market. He is now marketing finished articles instead of raw material, and does them up in small packages so that they are easily marketed.

He has found, too, that modern farm machinery of high capacity and efficiency to cheapen the cost of producing a crop. Such machinery is heavy and requires horses of great size and power for its operation. Four good big horses are required to properly handle the ordinary gang plow. Likewise the double disk and the eight-foot binder. If power is not a draft horse, it is a tractor.

One man with four drafters and a modern farm implement can do the work formerly done by two men with six to eight smaller horses. The four big ones will be worth more on the market, cost less to maintain, occupy less stable room and give better results generally.

Thus it comes about that the draft horse cuts down production costs from one-fourth to one-third of what it was. Then there is the question of economical power. Draft breeders should be the bulk of the farm power and be the better of the country. They should raise foals that will make a profit when mature. These foals will do the most of the work when they are mature and they will be easier to sell better when well broken to work. Under this system there are no horses "rotting their heads off" in the winter when there is little work to be done. The mares pay for their keep with their labor and also produce profitable foals. A prominent horseman states that a profit of \$50 to \$100 can be figured for raising good drafters up to three years of age.

Present conditions offer a splendid opportunity for the development of the draft horse industry and more now than ever before will the demand be for "horses, old and young, of good selection of sound, suitable, individually excellent stallions for stud purposes is the first and most important step. Experience has taught horse raisers that common and inferior sires seldom prove profitable and in a majority of cases are an actual loss.

For Success With Horses

If you intend to raise horses pick out your breed and stick to it. Avoid crossing with other breeds. Mating causes many horse-breeding failures. Patronize only a superior breed, breed your own stock, and sell your stock at a high service fee.

Sell the undersized, "unsound mares" and "lings" as soon as possible and replace to stamp his stock uniformly, if at all, with his own likeness. He may find weak points himself but experience proves that his offspring commonly does.

"Money Saved" or "Money Made" is the motto of the breeder. He should breed for "cheap feed" grade or scrub stallions? Certainly we do not! It can't be done. Because the female resists inferior and do not grow into the type of horse the market demands. The saving of a few dollars in service fees is a policy which is a "poor" one. A reliable figure shows that the market value of the horse got by a grade or scrub-stallion often is \$100 less than the price paid to get the pure bred sire, and in many cases two or three times that amount.

A few years ago a fine, pure-bred draft stallion of Holk county, Wisconsin, was competing with a grade. The pure-bred was handicapped because his price was \$150 higher than the grade was only \$10. Two neighboring farmers each had a few mares to breed. One of them with foresight patronized the pure-bred while the other patronized the grade. The result was that the pure-bred sire was only \$10 higher than the grade stallion. In the same time two mares had been raised from the grade stallion.

These two pairs of mares were very much alike in breeding and size, and mated with the same sire should have produced a pair of good offspring. Which man saved the money?

For several years a farmer in another district has been breeding his mares to a grade stallion. Last year he produced a pure bred. Some time ago he held a public auction. Yearlings, two-year-olds, and three-year-olds, grade sires, brought \$37, \$35, and \$70 a head, respectively. Yearlings from the same mares, sired by a pure-bred stallion, averaged \$100 each.

In 1907 a company of farmers bought a two-year-old stallion. He was so good that his service fee was placed at \$500 higher than any competitor. One three-year-old gelding, sired by him, went to a dealer at \$625 and none went for less than \$225. One man bred a three-year-old gelding at the auction and sold the colt, when a three-year-old, for \$250. He says the \$10 extra fee made him a profit of \$100 on the horse.

For a pair of grade mares sired by this stallion. One man sold at public auction a colt not 20 months old for \$700. The company has to turn away business.

Did you ever hear of a grade sire doing \$700 or even \$225? Good blood.

What the Market Wants: At the present time only ten per cent of the farm horses are real drafters. The other ninety per cent are made up of all possible combinations—horses that are not good for anything and insufficient to meet the market de-

mands. The poor ones do much to destroy the market for good horses. It can be said that our farmers are now maintaining thousands of horses whose room would be more desirable than their company.

The market demands a draft horse with weight, soundness, wearing quality, and a good action and a willing disposition. These essentials, in desired combinations, are not found in the majority of the inferior or grade scrub sires. The draft stallion should be pure bred, weigh 1800 pounds or over, stand well on his feet and legs, have a strong, well-coupled neck and be heavily muscled. He should have large, clean bones of fine quality. The Scotch saying, "no foot, no horse" should ever be kept in mind for "tops may come but bottoms never."

One of Wisconsin's great horsemen says that a large stallion is always to be preferred if he meets all the requirements named, but if he does not come up to the standard, a lighter, more perfect horse should be used. His experience has been that the inferior, extra big, or "no place on the market," or in the show ring, nor is he worth half his cost of production on the farm. It is far better to raise the 1650 pound "Jandy" than the ton "market dragger."

The successful breeder, keeping in view the use to which the draft horse is raised is to be put, selects sires of quality, soundness and weight, but pays only secondary notice to color. He knows that certain colors are preferred on the market; that "a good horse is a good color," but that color never buys a price for an unsound horse.

If he would always keep these points in mind when selecting breeding stock, more money would come into our pockets, markets would be swamped with nondescript horses and we would be possessors of what the whole world loves—good horses.

MINUTES OF BOARD OF DIRECTORS OF TWIN FALLS CANAL CO.

December 11, 1917.

Board met in regular session, all members present.

Moved by Wurtz, seconded by Taylor, that a new stock certificate be issued to R. H. Nipper, for four shares of stock, covering Lot 20, Block 2, Highland View Tract, provided he furnishes the necessary bond in the sum of \$100.00 to this company, as an indemnity in the event of the original certificate turning up in the hands of a third party. Carried.

Moved by Taylor, seconded by Lincoln, that Frank Fowler be allowed until January 1, 1918, without prejudice as to the statute of limitations for filing suit for permanent damages from seepage, the purpose being to allow time to complete the efficiency of the drainage operation before being done before he takes any action. Carried.

Moved by Taylor, seconded by Barker, that the officers and directors meeting held December 4, 1917, be allowed \$10 each for their services. Carried.

Whereupon recess was taken until tomorrow morning at 10 o'clock.

December 12, 1917.

Board met pursuant to recess, all members present.

Business was taken up with a discussion of matters of importance to the company, whereupon recess was had until tomorrow morning at 10 o'clock.

December 13, 1917.

Board met pursuant to recess, all members present.

MAXWELL

\$1195

F.O.B. DETROIT

There is inflexible logic in the fixing of that price for the Maxwell closed cars.

The purpose of the Maxwell builders was to strike the MIDDLE LINE of absolute value.

They have done so with scientific accuracy.

The Maxwell closed cars have grace, beauty, comfort, efficiency, durability, economy and standard equipment.

But, if built to sell for less than \$1195 one or the other of these would be lacking.

On the other hand, for a higher price you could get only larger size or fancier furnishings—not any greater VALUE or finer "class."

That is what we mean by "the Middle Line."

Five-Passenger Sedan, \$1195, Six-Passenger Town Car, \$1195; Touring Car with All-Weather Top, \$855; Touring Car, \$745; Roadster, \$745

THE MARKETS

KANSAS CITY

STOCKS—Receipts this week, 50,000 cattle, 20,000 calves, 10,000 hogs, 10,000 sheep, an increase of about 2000 cattle, 500 calves, and 1000 sheep, and a decrease of about 6000 hogs compared with last week. Compared with year ago receipts were about the same, except sheep, which show a decrease of nearly 50 per cent. The general trend in the prices was lower early in the week, followed by a substantial rebound in cattle and hog prices, though sheep closed dull and with a decline for the week. Improvements in conditions which came with moderate temperature increased the demand for cattle and hogs and farmers now are able to handle normal eastern consignments of hogs for the first time this year. It is the general opinion that this will result in a further improvement in the market.

Though prices for beef steers were irregular the market closed 10 to 15 higher for the week. The sagging tendency on Monday and Tuesday was offset Wednesday by returning receipts and Thursday prices were up 10 to 25 cents. More activity was evident in the market in the past two days than for some time past, as killers by large shipments have reduced their holdings of beef. The top price for steers this week was \$12.50. Purebred cattle went up to \$12.75, and there were several bunches of Kansas, Nebraska and Missouri steers at \$12.50 to \$12.55. Colorado steers sold at \$12.50 to \$12.55, and Idaho, Wyoming and Oregon steers at \$12.25 to \$12.55. Butcher cattle were scarce and are quoted strong to 15 cents higher compared with a week ago. Western cows sold up to \$10.10 and native cows \$10.50. Veal calves declined \$1.00 to \$1.25, late to \$1.25. This is in line with a sharp decline in Chicago. Bulls brought firm prices.

Stocks and Feeders
Because of the approaching grazing season, demand for thin cattle increased and prices were 15 to 25 cents higher. Feeding steers sold as high as \$12.50. Cattle \$12.25 to \$12.55, 600 pound western Kansas white face, up to \$10.50. The bulk of the cattle brought \$9.50 to \$10.75. Stock calves remained steady.

Hogs
Heavy receipts of hogs in Chicago in the first two days of the week resulted in a big drop in prices at all markets. Tuesday's decline was 60 cents and at the low point the market was \$11.25 under the high point of the preceding week. The decline was due to the run in the past three days and the market turned up 45 to 55 cents from the low level, and today was 35 to 40 cents under a week ago. Receipts at Chicago were 10,000 and bulk of sales \$16 to \$12.50. Choice hogs in all weights are selling at the narrowest range of the season.

Sheep
Trade in the sheep division was dull, with prices quoted off 25 to 50 cents. The most decline was on lambs, and sheep were scarce. Demand for lambs elsewhere were lower. Demand for mutton is held down by meatless days and the Lenten season. Fat lambs are scarce at \$15.00 to \$16.00. At Chicago the week the top was \$17.25. Yearlings sold up to \$13.00, wethers \$13.10, ewes \$12.35, ewe lambs \$17.50, feeding lambs \$16.10.

NORTH SALT LAKE

ARTHUR & MAGANN

for three years, holding meetings in many states. Where the church people have stood with them and given the needed assistance they have never failed to have good success, it is said.

All persons interested in the spiritual uplift of Twin Falls are most cordially invited to attend and take part in these meetings.

Two American soldiers were discussing the Lord's Prayer. One of them bet the other that he could not say it through properly without stopping. The challenged one began:

"Now I lay me down to sleep," and finished the stanza successfully.

"By George," said the other. "Here is your 'V.' I didn't believe you could do it."
