Shooting in Room at St. Regis House Results in Death of H. B. McCollum

H. B. McCollum is dead, J. L. Wenger is suffering from injuries on the head, and Ed. L. Slagle is held by the criminal authorities to answer a charge of murdering the former and assaulting the latter.

McCollum was shot down in a small room at the St. Regis house on Shoshone street, south.

McCollum had been invited to play a game of poker in a St. Regis house engaged by Wenger. The latter, McCollum and Jensen reached the room ahead of Slagle.

Wenger, bleeding profusely from his head, handed to Dr. Clousch's office where the injuries were treated.

Following the arrest Slagle is said to have advised the sheriff that the three men attacked him.

JUSTICE URGENTLY RECOMMENDED IN FIXING OF PROPERTY VALUES

Fairness is, Keynote of Assessors' Convention Held During Past Week - No Lowering of Real Holdings Will Obtain, but New Figures are Fixed for Livestock - Bank Assessments Bring Out Discussion - Making Hard Fight to Continue Road Building Program

Although advocating equalization of assessed values as between counties and the placing of fair and equitable values on all livestock, the state board of equalization does not favor lowering of values as applied to real estate.

Fairness is keynote. It was very earnestly advocated by the board that the assessors make every effort to equalize as between counties, and that lower values in real estate should not be made; also, that due to unsettled market conditions at present, it was suggested that as assessors place fair and equitable values on livestock, as compared with other property, it is suggested that the board that a law should be passed by the present legislature requiring all merchants to furnish sworn statements as to the value of their inventory on terms as prescribed by the state, and in the same manner as required by banks.

TUBERCULOSIS HOSPITAL FUND IS THREATENED

Chairman Snook of the House State Affairs Committee Says Necessity for Appropriations No Longer Exists

BOISE (Special to The News)—Further efforts at retrenchment will be urged by the committee on state affairs in the house this week when it asks for the repeal of the law enacted two years ago which established the tuberculosis hospitals.

Appropriations totaling approximately \$400,000 were made by the legislature in 1919 for two sanitariums. Later these hospitals were located at Standpoint and Payette. Sites have been purchased but actual construction work has been delayed.

The committee on state affairs in the house will recommend that these appropriations be turned back into the general fund and that the sites which have been purchased be sold. John W. Snook, head of the committee, says there is no need at this time for the sanitariums.

According to Snook the legislation two years ago was a mistake. Money for the sanitariums because it wanted hospitals for the treatment of soldiers who had been gassed. The action of the federal government in looking after the former service men makes state action unnecessary, he said.

The bill repealing the law carrying the appropriation will be introduced the latter part of the week. A companion bill will appropriate the state sanitarium at Orifino and for the state insane asylum at Blackfoot. By using the money originally appropriated for the tuberculosis hospitals to defray the cost of new buildings at the asylums, the state will have more money than it expected for new buildings at the state educational institutions, Snook explained Tuesday.

Pretty French Bride Seeks Divorce in America

On the steamship Imperator, which arrived in New York recently, was an exceptionally pretty French girl who said she was here to seek a divorce. She was listed on the passenger record as Mrs. Harriet Scott. Before her marriage in Paris she was Mlle. Jeanne de Guindé. She was wooed by a handsome American stationed at Paris with the army of occupation, and married him in the belief that he was a captain. Three days after the nuptials she discovered that he was an enlisted man, a mere sergeant. She promptly left him and now has journeyed all the way to America to have the marital knot untied. As she realizes she is an American citizen by virtue of her marriage to the soldier, she decided to come here to seek a divorce.

AERIAL FIRE PATROLS TO CENTER AT MATHER FIELD

Paths to All National Forests in Northwest to Radiate from Coast Station

SACRAMENTO, Cal., (AP)—Aerial paths to all national forests in California, Oregon, Washington, Montana, Idaho, Nevada and Utah will radiate from Mather Field here during the coming forest fire season, under plans being made at present.

Fifty aerial patrols will be on duty constantly during the fire season, with reserve aviators on call at Mather Field. It is a theory of the army that forest patrol work is excellent training for aviators and close co-operation between the war department and the department of agriculture, which controls the forests, has been decided upon.

In all, five air squadrons and 1,000 men will form the complement of Mather Field under plans announced unofficially. The field, it is believed, soon will be the largest air service training station in the western department of the army.

A forest rangers' school, intended to bring better co-operation with the army aviators, is being conducted at the field. To the same end, a meeting of forest supervisors of California, with representatives from several western states and from Washington, D. C., will be held January 30.

Improvement in care for the added personnel at the air field are expected to consist of twenty-four sets of permanent quarters for married officers.

CASSIA COUNTY READY TO FIGHT FOR NORMAL

Friends of School Organize to Oppose Leaders Abolishment Plan

BOISE, (AP)—The delegation from Cassia county in the legislature is preparing to make a determined fight in behalf of the Albion state normal.

Leaders in both houses are endeavoring to abolish the school in the interest of economy, and to prevent the friends of the school are already beginning to organize.

This organization work is expected to lead to an alliance between the Cassia county delegation and their friends and the members of the legislature from the northern counties who will seek to save the Lewiston state normal from being abolished two years hence. There are also a number of members of the legislature who want the two-mill road tax continued in force and they may be grouped with the Cassia county delegation in an attempt to save the normal and to prevent the abolishment of the law which makes a continuing appropriation out of the road tax.

It is now generally agreed by leaders in both houses that the state highway department has spent more money than the people of the state realized and as a result large deficiencies have been created which must be paid either by a direct appropriation or by the use of the \$2,000,000 voted by the state last fall. Many of the members want to continue the road tax for at least another two years for the purpose of making additional highway bonds, but this they must trade with delegations which are endeavoring to save the institution. Leaders in both houses are against the road tax and want it abolished.

COUNTY GUARANTEE BILL IS NEARING COMPLETION

Twin Falls Representative at Work on Irrigation District Measure

BOISE (Special to The News)—The committee on Irrigation, Reclamation and Waterways has not completed its bill giving the counties authority to guarantee bonds sold by irrigation districts but it will be ready for the question within the course of a few days, Carl J. Miller, head of the committee, announced Tuesday.

This bill is an administration measure and has the endorsement of the attorney general, the commissioner of reclamation and others at the capital. It is expected to allow a county to organize an irrigation district and sell bonds which will become a lien on the taxable property within the limits of the county.

The companion bill, introduced Monday provides for the creation of a county water district and the issue of stabilizing bonds issued by the irrigation district. This committee is empowered to investigate the financial condition of a district, determine the value of its water and to determine on the feasibility of the project.

PREDICTS NEW RECORDS IN IMMIGRATION FLOW

Commissioner General Caminetti Gives Views to Senate Committee

WASHINGTON, (AP)—The flow of immigrants from Europe will break all previous records before July 1 unless steps are taken to check it, Anthony Caminetti, commissioner general of immigration, declared Wednesday before senate immigration committee.

"I hesitate to estimate what will be the rate of immigration when Germany, Austria and nearby states open up," he added.

Mr. Caminetti said it was certain that new steamship lines would be established to bring immigrants from foreign ports.

He said he had been unable to get complete reports as to daily arrivals at Ellis Island since August, although the force of employers there exceeded by 200 the number employed at the peak of immigration in 1914.

Chairman Cobb requested Mr. Caminetti to expedite preparation of data on arrivals at various American ports.

FORESTRY SCHOOL WILL OFFER A MAIL COURSE

Woodcraft Branch of University to Conduct Lessons by Correspondence

The school of forestry of the University of Idaho at Moscow offers a correspondence course in lumber and its uses. That the course is meeting a real need is attested by the large number of students that have registered for it since it was first announced about three years ago. Some 30 different states are represented in the enrollment.

The course is designed to be of special value to lumber dealers, lumber salesmen, contractors or builders, carpenters, manual training teachers, and others connected with the wood working industries. The fee is a nominal one and includes the text book and all reference material.

The course consists of 42 assignments covering such topics as the structure and physical properties of wood, lumber grading, structural timbers, seasoning and preservation of wood, lumber production and the selection and use of materials.

A prospectus will be sent on application to the School of Forestry, University of Idaho, Moscow, Idaho.

CAP COMES BACK TO LEGION MAN AFTER DISCARD

Tappen Threw Headgear Away in France but Buys It Again in U. S. A.

PERTH AMBOY, N. J. (Special).—Howard Tappen, an American Legion member of Perth Amboy, did not cast his bread upon the waters with the traditional return. He did, however, discard his overcoat cap many months ago in France.

The other day, Tappen bought a renovated army cap in an army goods store here. When he tried it on, he found the also to be just right. But when Tappen looked inside the hat, he was considerably perturbed. On the inner lining was his name, written in his own hand writing.

The cap was the one he had discarded in France after the armistice.

REFUSES TO QUASH IN MATEWAN MURDER CASE

Judge Bailey Declares Trial of 24 Men Accused of Participation in Battle Will Go On

WILLIAMSON, W. Va. (AP)—Trial of the 24 men accused of participation in the famous statewan battle of May 19, 1911, will go on, Judge E. D. Bailey announced at the opening of circuit court here this morning. He overruled the motion for the defense to quash the seven indictments for murder, on the ground that one of the grand jurors was not a resident of West Virginia.

Deputy sheriffs guarded every entrance to the Mingo county courthouse this morning in search for all arms carried by persons who sought to enter. Colonel Herman Hall, commanding the federal troops in Williamson, took additional precaution to aid the civil authorities in preserving peace.

DOMINOES TOO MUCH FOR FOCH

Marshal's Strategy with Miller and Aid is Unavailing in Parlor Game

PARIS, (AP)—Marshal Foch, whose strategy confounded the Germans, suffered a crushing defeat the other day. President Millerand of France shared the blame, for they were partners. It was not at war but at dominoes. The American ambassador, Hugh C. Wallace, and former President Poincare triumphed over the great marshal and France's chief executive. The incident is related by a writer of the Grand Paris in the best of French journalistic style, substantially as follows: The presidential train carrying high personages of France and other nations to Verdun to attend the dedication of the monument marking the Bayonet Trench had been under way for an hour and conversation had begun to lag. "If we had a game of dominoes," exclaimed Marshal Foch. "Alas! the box of dominoes of the Elysee had been forgotten; and there were no dominoes in the restaurant. "We must get some for the return journey," declared M. Millerand, who entrusted this important mission to his son, Jean. When, after the ceremony, they rejoined the train for the return journey, a magnificent box of dominoes was spread out on the table of the saloon car. It had been borrowed from a colonel of the gendarmes. Two camps were immediately formed. The president had the marshal for partner. Their adversaries were M. Poincare and Hugh C. Wallace. "Are you strong enough?" M. Poincare asked the ambassador. "The president and the marshal are crack players." "We, to, I hope," replied Mr. Wallace, smiling. "Hm!" questioned M. Poincare. "You, certainly." The first game began. It went in favor of M. Millerand and Marshal Foch. "Let us see how it goes in the second game," responded Mr. Wallace. "Never despair." The second game commenced. It was a surprise. The Poincare-Wallace side gained a sweeping victory over the Millerand-Foch side. "Let us have a revenge," the marshal declared impetuously. "We cannot, Mr. President, allow ourselves such a defeat." The revenge was palpating, but in the end the game which for a long time swung in the balance, pronounced its verdict in favor of M. Poincare and Wallace. "Well, Mr. Marshal, you are beaten," M. Millerand said. "It seems to me, Mr. President, that you are to rejoice, the marshal, but what adversaries! Mr. Poincare plays very well and the ambassador is a champion player."

EUGENIE LEAVES JEWEL TO CARNAVALET MUSEUM Executors of Will of Former Empress Find Token of Appreciation for the Paris Institution PARIS, (AP)—The executors of the will of the late Empress Eugenie upon opening the document found in a small sealed package marked "For the Carnavalet Museum," and containing a magnificent jewel representing the arms of the city of Paris. When the Empress Eugenie visited Paris in 1913 she spent an afternoon in the museum and was so touched by the affectionate and cordial welcome she received that she promised that she would remember the museum in her will. This museum is largely municipal rather than a national collection and the empress desired in this way to express her affection for the city of Paris.

MUFFLER URGED ON PROPAGANDA AS TO HORNSBY

Big Money Offers Branded as Simon-Pure Buncombe by Expert in Ball Matters

By FRANK G. MENKE. It is almost time that a halt be put on the propaganda of the American league who are attempting to bunk the public into believing that Rogers Hornsby is the most valuable man in diamond harness. There has come for Branch Rickey, manager of the Cardinals, to shut up concerning those fabulous offers for the Cardinal infielder or produce the proof that they are real. If those \$200,000 and \$300,000 "offers" for Hornsby aren't fanciful to managers, why doesn't Rickey tell who made them? Why the mystery? And why is it that although Rickey constantly insists that the offers really were made, that no club assumes creation of those offers? For the past few months baseball king magnates are too keen about publicity for themselves to want anyone to keep a secret a record offer which they have made for a ball player. Never in the history of professional baseball has offer for a ball player without having his hired press agents inform every available news outlet in the wide world.

Table with columns: Game, Runs, Hits, Bases, Avor. Rows include Rogers Hornsby, Stolen, George Sizer.

Put on Muffler, Rickey. Yet no one within the American league has emitted any shrill cries about million dollar offers for Sizer. The reason for it probably is that the American league, unlike the National league, does not feel it necessary to attempt some weird propaganda to gather publicity for a good ball player.

DEMPSEY EASILY DEFEATS KELLER IN COAST MATCH

Champion Goes On in Exhibition to Show Pacific Fans What He Can Do

PORTLAND, Ore., (AP)—Champion Jack Dempsey and Terry Keller of Ogden, Utah, faced each other at Milwaukee, a suburb of Portland, in a six-round exhibition bout last night. Owing to the number of spectators it was after 11 o'clock before the ring was cleared. Announcement, among them one that Dempsey had agreed to return here in April to defend his title in a ten round bout with some opponent still to be selected, delayed the main event all more. The arena was jammed, it being the first appearance of Dempsey as champion in the ring in this section. The crowd grew restless as the hour grew later and there were demonstrations of having to be pushed along to the main event.

FRANK FARMER AND BOB DEWEY, heavyweights, fought ten rounds as a final preliminary for the approval of the first appearance of Dempsey as champion in the ring in this section. The crowd grew restless as the hour grew later and there were demonstrations of having to be pushed along to the main event.

Weights of Dempsey and Keller were not announced. While Keller appeared to be in good condition, he was clearly out-matched by the champion, who had there been a decision, would have won it by a large margin, in the opinion of sport writers and other present.

Brief Bits of Sport

The Salt Lake franchise in the Pacific Coast ball league is for sale. But the price is so high that nobody seems to care to consider it an investment. Announcement has been made that Tacoma wants the Bee franchise, but cannot see it at the charge set by the Bee management which is \$75,000.

Regardless of the downward revision of prices along most lines the Pacific league has decided to raise the price of admission to parks five cents per seat, to make a boost of 10 cents to bleacher seats. Canadians are said to be ready to guarantee Dempsey and Carpenter \$750,000 to get the bout in Montreal. And the war undoubtedly hanging as heavily as it does over all the British colonies.

Headline—Hornsby Poddles Life Insurance in the Winter. And Branch Pickey, manager of the Cardinals, poddles the rankest sort of bull about being offered \$200,000 and \$300,000 for the purchase of Hornsby, in the same winter, too. Rickey seems to have prated too much on this subject, and he is getting nothing but a horace machination for his pains now.

Charlie Mullin, former White Sox player, is to manage the Tacoma club in the Pacific International league this year. Reference to the P. I. circuit reminds that Spokane is not a baseball home now. The Inland Empire city pulled out of the Pacific International expecting that a new circuit would be formed with Montana and Washington and northern Idaho cities in the league. That proposition having fallen flat there seems nothing for Spokane this year but its little old city league.

The powder that held the reins in baseball has proposed to shift "Bab" Marquette from Boston to Pittsburgh, but the Braves shortstopper says nothing doing. Fitcher Eppa Jephth-Riley has been traded by the Phillies to the Reds for Jimmy Ring and Infielder Neale.

An eastern ball fan wants all the players to wear numbers on the back of their clothes, all same football folks. And while the recommendation has been received with a lot of favor in many quarters it does not seem to be popular with the masses. Sim Quilley sagobriush says says:

The foolishest person in the world is not the fellow who sinks his money in gold bricks, but the guy who is in love and wants over 'body to know it." New York sports writers have been kidding themselves that Willie-Hoppe is afraid to meet the Belgian billiard champ, Eduard Horsemann. Willie has accepted the foreigner's challenge and the match is to be played this spring or next fall.

Former Rector to be Tried Before Peers for Performing Marriage Ceremony

LOS ANGELES, Cal., (AP)—Trial of the Rev. Baker F. Lee, formerly rector of Christ church here, before twelve of his peers in the Episcopal church, on a charge of violation of an ecclesiastical canon in having performed a marriage ceremony for Alfred L. Du Pont, millionaire powder manufacturer of Wilmington, Del., and Miss Jessie D. Bill of Los Angeles, was a possibility today, according to church officials.

"Most Perfect" Model at Law Over Dance

Miss Marian Hurley, known among artists as the "most perfect woman," is far from content over the result of her first clash at law with Albert Korten, a stage director. She halted him before a magistrate in New York City on Jan. 26. Her next move will be a civil suit for damages. She charged that Korten assaulted her when she demanded pay for a dance she had given in one of his productions.

WHEAT MARKET RALLIES AFTER INITIAL DECLINE

Influence of 'One Large Firm Turns Bearish Tide; Close 1-4 to 1-2 Centa Net Higher

CHICAGO, (AP)—Unsettled political and economic conditions in Europe led to sharp declines in the wheat market today. Bearish crop gossip tended further to depress values. Support was lacking. Initial quotations, which varied from unchanged figures to 1-4 lower, with March 1.62 3-4 to 1.63 and May 1.52 1-2 to 1.53 1-2, were followed by decided upticks all around. There was considerable selling on an estimate that the four principal exporting countries would have a carry-over of 170,000,000 bushels into the next year. One of the largest firms here regarded this estimate as bullish, and the market rallied sharply. Prices closed firm, 1-4 to 1-8 net higher, with March 1.64 1-2 to 1.64 3-4 and May 1.54 to 1.54 1-2.

Low prices for the season were reached by corn and oats. Liberal receipts of corn continued. After opening 1-4 to 3-4 down, including May 1.12 1-2 to 1.12 1-2, a corn market underwent a further sag. Later the market recovered with wheat, and closed nervous, 1-4 net lower to 3-8 advance, with May 67 to 67 1-8.

Oats fell with other cereals, starting unchanged to 1-8c off, May 43 3-4, and then suffering a general decline. Provisions weakened on a result of downward trend of hogs and grain.

High School News

At the "Hi Y" meeting last night officers for the new semester were elected. Those chosen are: President, Dale Star; vice president, Leonard Hill; secretary, John Buchanan; treasurer, Charles King. A new constitution was adopted to fill the needs of the enlarged organization, the officers installed and the meeting adjourned.

The second debate tryout will be held about two weeks from here, those who will represent the school in the inter-scholastic debates which will be held in April. At the last meeting, held last Tuesday, the 12 aspirants were divided into four teams, two for each side of the question. They will work on the phases assigned them for their speeches until after the final tryout.

The entire time of assembly yesterday was taken up by assigning the students to their various advisers for the present semester.

The "Bobbin Boy"

This was a nickname given to Nathaniel Prentiss Banks of Massachusetts, at one time its governor and for many years a member of congress. He was speaker of the house of representatives for a session, being chosen on the one hundred and thirty-third ballot. In his youth he learned the trade of a machinist and worked in a factory; hence the nickname.

New York Stock Market
NEW YORK, (AP)—Trading in the stock market today was dull and narrow, interest centering mainly in foreign exchange and new railroad financing. Sales approximated 475,000 shares.

Extreme dullness attended the early dealings in the stock market today, the nominal trading disclosing the usual irregular mixture of gains and losses. Royal Dutch soon rose 1-2 points and General Asphalt advanced a large fraction. American Can, Vanadium Steel, International Paper, People's Gas, Chesapeake and Ohio, were higher by fractions of a point. The heavy issues included Atlantic Gulf, May Department Stores, Crucible Steel and American Agricultural Chemical. Mexican Oil also yielded to further pressure. Preliminary quotations for foreign exchange indicated another active day, the British demand rate making a further advance to \$3.85 1-4. There were no material changes in the later dealings, other than the further strength of steel and improvement in Pacific rails. The closing was firm.

Sugar
NEW YORK, (AP)—Raw sugar declined to the lowest level touched in over two years today. Business, however, was not particularly active, the only sales recorded in the early trading being 10,000 bags of Cuba's #10, at 45c net and freight, equal to 45.01 for contract.

The weakness in raws unsettled refined, although prices were unchanged at \$7.50 for fine granulated with business light.

Sugar futures were easier and at midday prices were fifteen to nineteen points net lower under selling by trade and Cuban interests.

INVITING MOB ACTION

Although Lynch law is never condonable, there are circumstances under which a man is expected to fight on the instant, anywhere, any time.

From Aurora, Ill., comes another reminder that the unpatriotic can have no hope of "getting away" with their offensive attitude in this country.

A wealthy farmer who during the war refused to buy Liberty bonds and later made disparaging remarks about the United States government and its soldiers, finally going to the extreme of refusing to permit the use of a church of which he is a deacon for services in connection with the funeral of a young man who had died in the service of our navy, was taken in hand by members of the American Legion.

It has been so from the beginning of the republic. God pity the republic if there ever comes a day when American manhood will submit for an instant to insults to the flag! Expressions of contempt for the banner consecrated by the blood of the country's best are no more to be treated with patience than insults to women and children.

This does not come under the term of "mob law", but rather under that of dealing with some one who is hunting a fight. The treacherous individual who would stab the country in which he makes his living is ever the aggressor.

The only way for the distoyal to escape rough handling is to keep their mouths shut. It is out of the question for them to expect the law to make it safe for them to insult the emblem of the government. There is nothing that can protect the individual who trifles with atrocity.

KICKING A CABINET

Theoretically the formation of a cabinet might seem an easy matter. Most any one of intelligence and knowledge of public men should be able to write down in 10 minutes enough names of men of first class ability to fill all the cabinet offices.

It also happens that most men of cabinet caliber have made enemies. Any one who amounts to anything does. A strong man is destined to tramp on the toes of somebody on his way up the ladder.

Then there is the geographical situation to be considered also. This may be a weak argument but sections feel that they must be represented and they insist so strenuously that in the interest of harmony their demands must be heeded.

It is slight wonder that President-elect Harding is reported to have grown whiter about the temples and that he looks worn. The very magnitude of his victory has made his problem more difficult.

to know who will be in the official family of the new president, Mr. Harding is taking the wise course in going slowly. Those who think it an easy job to pick a cabinet reckon not on its ramifications.

CLEAN FOOD

In every city in the country worthy of the name, food products inspection under municipal direction is an established fact. This inspection is rendered necessary in the interests of the public health.

An average of better than one hog out of every four is infected with tuberculosis and an average of better than one beef animal out of every twenty. This does not mean that those carcasses are a total loss but it does mean that certain portions of the carcass must be condemned as food products.

In Twin Falls, the decree has gone forth that all meat butchered within a radius of five miles of the city and offered for sale in the stores of the city, shall be subject to inspection.

Let it be thoroughly understood that, incidentally, meat inspection costs about one-fifth of a cent per pound for beef, plus the cost of the condemned portions of such animals as are found to be infected.

Meat inspection is clean, sound doctrine and its inclusion in the civic program of Twin Falls is a step forward in the direction of healthier, cleaner bodies among men, women and children.

WATCH YOUR AUTO!

The recent action of the supreme court of the United States in upholding that section of the Volstead law which says that a vehicle may be held when it is used for the transportation of intoxicating liquor illegally, should be of interest to a large number of persons.

the decision of the court quoted from the Missouri law to show that an instrument used in an illegal or injurious way came under the condemnation of the law, as in the case of an ox which had gored a person to death.

The plea that the Georgia man did not know the use to which the automobile was to be put did not have any influence with the court, which held that the owner took all the risks when his property was given into the control of another.

The decision of the court will affect the claims of quite a number of persons, for many automobiles and trucks have been seized by law-enforcement officers of the federal government.

CAUTION IS URGED TO PROCURING SEED

Department Warns Against the Use of Poor Quality Foreign Grown Clover

Red clover has been styled the corner stone of agriculture in the North Central and Eastern states. Many farmers will begin laying the corner stone as early as February, when it is customary in many sections to sow red clover on the surface of the hay, so that it will sink into the soil with the first thaw in the spring.

The first important point to be observed in the selection of good seed, say specialists of the United States department of agriculture. Considerable care should be used in this respect well in advance of the time of seeding. This is particularly true at present, when a large proportion of the red clover seed used in the United States comes from abroad.

Good red clover seed is plump or well filled, bright with a slight luster, the color of individual seeds ranging from violet to light yellow. The individual seeds should be at least medium sized and fairly uniform, free of adulterants of any kind and from seeds of noxious weeds.

Home-grown seed is desirable, especially in the north, because it is almost certain to be adapted to local conditions. If it is not available, samples should be obtained from reliable dealers. These should be examined for adulterants, weed seeds, and shriveled seeds. They should also be tested for germination before purchasing in quantity.

For a Permanent Cough.

Some years ago H. P. Burbage, a student, in law in Greenville, E. C., had been troubled for a long while with a persistent cough which he says "greatly alarmed me, causing me to fear that I was in the first stage of consumption." Having seen Chamberlain's Cough Remedy advertised in a newspaper, he bought a bottle and after using two bottles of the small size was permanently cured.

DEFINITE MOVE IS MADE FOR CONTROLLING COLORADO RIVER

At Salt Lake Meeting of Western State Engineers, with Federal Reclamation Forces, Organization is Formed Looking to the Saving of Property from Flood Through Restraint of Water to be Used for Reclamation of Land

Concerted action by the seven interested states and the federal government in the development of power and irrigation possibilities of the Colorado river and its tributaries is expressed in the aim of the Colorado river control project permanently organized at a meeting of state engineers of Utah, Colorado, Arizona and Wyoming, with reclamation service held in Salt Lake this week.

This organization results from activities initiated by Simon Bamberg, former governor of Illinois, about three years ago called together the governors of all western states interested for the purpose of outlining plans for the impounding of flood waters of the Colorado river as a two-fold benefit to the states through which the river flows. The impounded waters, it is estimated, could water millions of acres, and the restraining of the floods would result in preventing an enormous loss to lands and other property through the annual overflow.

The seven states which would profit by the restraining of the flood of the Colorado river are Utah, Wyoming, Nevada, Colorado, New Mexico, California, Arizona.

Not the Only Move.
Organization of engineering forces of the state mentioned in Salt Lake this week is not the only move recently made seeking the right to impound Colorado river waters for industrial purposes. A fortnight ago, with a view of developing electric energy to the extent of two and a half million horsepower for use in California, Utah, Arizona, Nevada, Colorado and the Southern California Edison company, made preliminary application to the federal power commission at Washington for hydroelectric rights on the Colorado river.

The electric energy which could be generated from the power sites on the river covered by the application, is equivalent to the total hydroelectric development in the states of California, Oregon, Washington, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico and Wyoming at the beginning of 1920.

Flood Warning.
Incident of great importance to the project, is the establishment of a uniform flow of the Colorado river, which would, practically eliminate the annual floods which have so often created possibilities for irrigation with subsequent colonization and the maintenance of large populations in the Colorado territory, which is one of the most important advantages of the project.

The present irrigable capacity without storage, is 750,000 acres. Full control under storage regulation, would allow an increase to 3,000,000 acres, which indicates that under present conditions only 25 per cent of the potential irrigating capacity of the stream is being used.

The storage basin will be over 200 miles in length, impounding more than 4,000,000 acre feet of water.

This application contemplates the development of power on the Colorado river at Marble Canyon and Diamond creek above the Boulder canyon project and the permit would allow the Edison company time for surveys, investigation and perfecting of financial plans for the construction of the dam, conduit and power houses at Marble canyon and Diamond creek, not including the possible power development in the Grand canyon and other sites along the national park.

The most possible hydroelectric development of the Colorado river is over 4,000,000 horsepower, which is equal to one-half the total hydroelectric power capacity generated in the entire United States.

Power for West Area.
A study of the area over which the power proposed to be developed from the Colorado river control project is estimated to be three-fourths of the state of California, the entire states of Utah, Arizona and Nevada, one-half of Colorado and New Mexico, and possibly the north and south of Idaho and Wyoming. Should international boundaries be crossed by the line of development, the large agricultural and mining districts

of northern Mexico would be within reach.

By the complete development of the hydroelectric resources of the Colorado river which drains a water shed of 250,000 square miles and has an annual run-off of 16,000,000 acre feet, electric energy could be furnished for the operation of trains on 16,000 miles of railroad consisting of air-casting and two proposed trans-continental lines, and also leaving 60 per cent of the generated power for general commercial, agricultural and industrial purposes.

Would Take State's Oil.
To develop an equivalent amount of power by generating plants using oil for fuel would require the burning annually of over 90,000,000 barrels of oil, which is practically the present total of petroleum in the state of California.

The substitution of this enormous increase in hydroelectric energy for the use of oil to operate machinery, definitely extends the fuel life of the United States navy and the merchant marine, since the expenditure of oil supply which is dependent upon it would be reduced, and the change to oil burning for navigation purposes.

The Colorado river is considered to be the second largest source of power in the United States, and is unique among the important waterways of the world in its adaptability to control for the four fold purpose of flood prevention, irrigation, navigation and power development. Although its outlet is in the desert lands at the head of the Gulf of California its head waters lie in the most fertile and densely populated part of the state of Wyoming, Colorado and Utah.

Impounding its waters above the proposed dam would store 93 per cent of the annual runoff.

Senator Can Be Secretary of War if He Wishes, Says Harding

United States Senator James W. Wadsworth, Jr. of New York who was elected President Harding's Secretary of War if he will accept the post, according to a report from Marion, which quotes Senator Harding to that effect, said he would accept the post, "if worth it I could get him to accept," he is the President-elect's declaration. Senator Wadsworth for years has been a member of the Military Affairs Committee of the Senate.

ALIAS SUMMONS

In the District Court of the Fourth Judicial District of the State of Idaho, in and for the County of Twin Falls.

Edward D. Beardsley, Plaintiff, vs. B. J. Potter, Defendant.

The State of Idaho sends greetings to B. J. Potter, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Fourth Judicial District of the State of Idaho, in and for the County of Twin Falls, by the undersigned party, and you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons if service is made on you by the undersigned, and you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will ask the judgment against you as prayed in said complaint.

The said action is brought for the purpose of obtaining a decree dissolving the bonds of matrimony between plaintiff and defendant, and that plaintiff is awarded the custody of two minor children and the sum of \$100.00 per month for the support of said minors upon the ground that defendant has willfully neglected to provide for plaintiff the common necessities of life, defendant having the ability so to do, as more fully appears from the verified complaint on file herein.

FARM WAGES TOUCH PEAK

Agricultural Labor Reaches Highest Pay in History During Past Year

WASHINGTON, (AP)—Wage rates for farm labor reached their highest point in the history of this country in 1920, as national averages according to figures gathered by the department of agriculture and made public today. The average wage rate for labor hired by the month, it was shown, was \$48.80, with board, and \$64.95 without board; for day labor at harvest \$3.50 with board, and \$4.30 without board. For the year, the average wage rate, with board, averaged \$2.56 with board, and \$3.50 without board.

Wood Fibers

The common ideas concerning wood fibers are not justified by the extended tests of the United States forest products laboratory. Each species of wood does not have its characteristic fiber length, but a greater difference may be found between the fibers of an individual tree than between the average lengths in different species. The length of fiber does not seem to affect the strength of the wood, as the longest fibers often belong to the weakest material.

Facts the First Requisite.

Facts are to the mind what food is to the body. One digestion of facts depends the strength of the mind, just as one assimilation of food depends the vigor of the other. That man is wisest in council who has digested the largest number of facts.

Not if as Rich as Oresus

If you were as rich as Oresus you could not afford to remedy your constipation than Chamberlain's Tablets. They are easy and pleasant to take and when the proper dose is taken produce a healthy and genuine effect. They also strengthen the digestion.—adv.

ISOLATION MAY BE PORTION OF KIMBERLY TOWN

Failure to Acquire Right of Way May Mean Leaving Village Off State Road

The town of Kimberly will not be on the state highway if a route viewed this morning by state highway officials is finally accepted by the board in charge. The route in question passes one-half mile north of Kimberly where the line decided upon originally passes diagonally through that town. It is probable that this route will be definitely abandoned after reports of those surveying the section today is received.

The officials viewing the districts this morning are D. M. Fairless of the state highway department at Boise, and A. N. Ashline, division engineer of the state highway, with headquarters at Shoshone. They were accompanied by the town engineer, J. H. Johnson, Twin Falls highway district officer.

REDUCTION OF EXPENSE PLAN IS IN OPERATION

Directors of Canal Company Slash Salaries Right and Left at Meeting

A sweeping scheme of operation cost reduction was inaugurated by the new board of directors of the Twin Falls Canal company at a meeting of the board yesterday. The reductions strike all salaried departments from the general manager to ditch laborers. In addition a resolution was adopted for immediate assessment for the year '22 was adopted. This assessment resolution was presented by W. P. Alworth, junior member of the board, and requires that \$1 be paid March 1 and the other \$1 on September 1.

Salary reductions which affect the directors themselves with other employees are:

- Directors from \$10 per working day to \$8.
- General manager from \$900 per annum to \$850.
- W. O. Taylor from position of secretary-treasurer at \$250 per month to position as assistant secretary-treasurer at \$225.
- Local counsel from \$250 per month to \$225.
- Engineer from \$100 per month to \$75.

WALK QUESTION GETS THOROUGH OVERHAULING AT COUNCIL TABLE

Consensus of Opinion is All Distributors and Dairymen are Willing to Put Their Plants and Establishments into Top Sanitary Condition to Preserve Health of Community — City to Aid in Maintaining Tourist Park

Members of the city administration party gathered about the deliberative board at the town hall last night in deferred session. The divisive bee should have been held Monday night, but was postponed on account of another affair demanding attention of a balance of legislative power.

Outside of considering a bunch of ordinances that just will be placed on official record and read or a bunch of claims against the municipality for labor in various departments of the city, and bills for merchandise and materials not delivered to the administration for municipal service, there was not a great deal to do. These matters, together with a question of the parks and the fixing of street grades, being discussed by the abbreviated council board settled back for a forensic occasion in which many affairs of greater or lesser moment were considered, maintaining reference to the general health welfare of the community.

Improvement Everywhere.

Naturally the milk situation, as it refers to sanitation, was given a lot of lay and expert thought, the consensus being that the conditions were 1000 per cent improved at all the dairies and distributing stations and agencies over what they had been a few weeks back. City Chemist E. B. Dooley stated tests of milk from all sources showed a vast improvement in cleanliness. Mayor Eldridge explained that every evening he had been called upon by the dairymen and distributing milk handlers to correct every evil which might exist at their plants. The mayor explained the numerous milkmen have called upon him in the past few days and have expressed a desire to cooperate to the limit in bringing the sanitation of their establishments to the highest notch of perfection. Mr. Eldridge said he believed every one of the milk vendors are earnest in their desire to give the city the purest and finest of milk products.

MACAULEY'S DOWN WARRENS BY BIG BOWLING MARGIN

Cigar Distributors Wallop Constructionists in Stout Skittle Battle

The Macauley bowling team last night downed the Warrens by a total score of 2227 to 2011. Charles Larson, a local winner, scored the high individual total with 406. H. E. CLUB DIRECTORS FAVOR EDUCATION COMMISSION

Chamber of Commerce Takes Stand Against Plan to Abolish State Office

At a special meeting of directors of the Twin Falls Chamber of Commerce held yesterday afternoon, sentiment was expressed in opposition to any change being made in the state law creating the office of school commissioner. A bill is now before the legislature opposing the department and proposing to refuse to make an appropriation covering the salary of the commissioner. The bill is said to grow out of dissatisfaction on the part of a faction opposed to the present incumbent, Dr. E. A. Bryan.
