

ACCIDENT ON FALLS GRADE

T. P. Sholtz, of Glenns Ferry, Loses Control of Car

RUN CAR AGAINST BANK TO SAVE CRASH INTO CANYON

Driver Flamed Under Overturned Car Has Arm and Several Ribs Broken. Officers Unhurt.

Last Saturday, while T. P. Sholtz with his family and two guests, all of Glenns Ferry, were coming down the Shoshone Falls grade on the north side, the brakes refused to work. Mr. Sholtz, who was driving, in a vain effort to avoid an accident turned the car into the upper side of the grade. When the car struck it, it turned completely over pinning Mr. Sholtz under it. The other occupants were able to get out without receiving anything worse than severe bruises and scratches. Mr. Sholtz was not so fortunate, receiving a broken arm, several ribs broken and bad bruises. He was taken to the Rogerson hotel by a doctor called in. It is said that he is getting along well as could be expected.

CELEBRATED TOO WELL

Number of Men Before Police Judge Smith Tuesday Morning

For a short time Tuesday morning Police Judge Smith was one of the very busy men in Twin Falls as he presided over the celebration of the Fourth and one-half days on the city streets. Charles Lacy faced the same charge and realising "an officer. He pleaded guilty and was given twenty-two and one-half days on the city streets. Another individual, who was creating a disturbance near the city park, was arrested by officers and showed light, at the same time using very vulgar language in the presence of women and children. This man was beaten up by his pains.

W. C. T. U. MEETING

Splendid Program Arranged for Session Next Friday

The W. C. T. U. will meet Friday afternoon July 9, 3 o'clock at the home of Mrs. N. M. Peairs, 126 Seventh avenue east. Subject for the evening, "The Young People's Department in Temperance Work." Leader Mrs. Grace Heartfield. The following program will be carried out: Devotional. Piano solo—Gladys Peairs. Play—We Should Teach Our Children to be Temperate—Mrs. J. W. Deuchars. "L. T. D. Work"—Mrs. Peairs. Duets—Mrs. Deuchars and Mrs. Reading—Beth Blake.

THE VALENTINO DUO

The Champion Acrobatic Play From Italy to be Seen at the Orpheum

For the first three nights of the week the management of the Orpheum will introduce the Valentino Duo, in comedy and singing, also introducing Mr. Valentino, the champion acrobatic player from the sunny land of Italy. Fatty Arbuckle will be seen with his trained bulldog in two act Keystone comedy, "In the Heart of Woodstock" in a hilarious gem enacted amidst the gorgeous setting of nature, featuring Vivian High, supported with superb cast of artists. "The Stain of Dishonor" is a splendid military drama, well worth seeing. The program and the theatre in a splendid one in every way.

FINISHED WITH PERFECT SCORE

Orville Gloystein Made Good Showing in Salt Lake Race

Orville Gloystein, of the Gloystein Brothers of this city, was in Salt Lake City during the celebration of the fourth of July. Mr. Gloystein entered one of the endurance race with his motor cycle. The race was over a stretch of three hundred miles and Mr. Gloystein made the entire distance with a perfect score. He started at 8:15 in the morning, ending at 6:40 in the evening. Nineteen machines ended the contest, nine finishing with a perfect score.

Take that bursted bike to Gloystein Brothers, they'll fix it. Mar. 9 15.

SHELLEY MAN DISAPPEARS

Much Anxiously Felt by His Creditors and Others.

In speaking of the sudden disappearance of a prominent buyer of Shelley, the Idaho Falls Register, of Tuesday says: It is reported that Jacob Jacobson, of Shelley, engaged in the wholesale produce business and an extensive buyer of goods in that vicinity, has left that community and has not been heard from for two weeks, and that fully ten thousand dollars in cash was taken with him, and a number of debts and creditors left behind. The last seen of Mr. Jacobson was at Shelley two weeks ago when he was loading six cartons of logs for the coast market. It is stated that he anticipated the returns and has not made settlement for the stock. Jacobson has been operating in Shelley for the past two years has been a heavy buyer and shipper of potatoes, grain and live stock, and owns the stock of the stock farmers mercantile houses and banks and that he is able to suffer a loss. It came here just before his disappearance, traded a car at a local garage for a heavier car, saying that he was going into Oregon to see his wife, who was visiting there to make the trip by the way of Glenns Ferry. Nothing was thought of his absence for a week or more until unannounced drafts began to show. The man who sold him the six car loads of logs tried to recover on the coast buyers for the full proceeds. One stockman of Shelley it is stated, is a loser by \$4,800 in the deal, some Burley farmers \$3,000 on logs, those amounts, with something like \$10,000 which he is supposed to have had, is gone. Several mercantile firms and banks of the vicinity are losers also it is stated. It was thought that he might have met with an accident with his car between here and Glenns Ferry and a search was made, with no result, and his business associates and friends have been forced to conclude that he disappeared purposely, taking the money with him.

FISHER LOST HIS JOB

Mutt & Jeff Cartoons Displeased English Government

It is reported in some newspapers that "Bud" Fisher, the celebrated cartoonist, has been "canned" by the British government, who have stated that he has been for some time. Fisher was noted especially for his "Mutt and Jeff" pictures, and it seems that it was his "Mutt and Jeff" pictures that were the cause of his dismissal. The last series of these popular cartoons had a dialogue between the two frankish characters, of which the following is a translation: Mutt—Germany is prepared to fight to the last German. Jeff—Yes, and England is prepared to fight to the last Frenchman. It is intimated that this was the subject of some "notes" between the United States and Great Britain, and the "canning" of Fisher was due to the fact that he had been appearing in newspapers. Thus "Bud" becomes a victim of the misfortune of war, and what was his crime? One day he may be vindicated and draw a pension.—Bloomington Star.

CASES DISMISSED

Utilities Commission Dismissed Power Complaints.

The public utilities commission has been busy clearing up a number of old cases that have been pending on its docket especially with relation to the former traction of the big hydro electric power companies or southern Idaho, all of which have been or are to be merged. Complaints in the following cases were ordered dismissed following verbal agreement by the interested parties: Great Shoshone & Twin Falls Water Power & Light company versus the Shoshone & Twin Falls Water Power company versus the Beaver River Power company and the Idaho Power & Light company; Great Shoshone & Twin Falls Water Power company versus the Idaho Power & Light company and the Beaver River Power company. All of the cases in the former traction of the Great Shoshone's field in the southern part of the state. This company is included in the merger together with the other companies named.

COMPANY D TO CAMP

Local Militia Company Will Go to Boise Thursday Morning.

On Thursday morning of this week, company D of the Idaho National Guard will leave for Boise for the annual encampment of the Idaho guard. The company will travel in a special car and will be in Boise on Friday and will remain in camp for ten days, where it will be drilled from morning to night. Adjutant General F. H. Crow was here for a day or two last week and inspected the company. Mr. Crow was highly pleased with the condition of the militia here. He left for home Saturday morning.

4TH ENJOYED BY MANY

Twin Falls Entertains Undiscouraged by Threatening Weather

Races, Base Ball Game, Band Concerts and Big Parade Please While Fireworks Are Best Ever Set Off in This City

The Georgia Fourth was indeed enjoyed in Twin Falls despite efforts of J. Phylvis to discourage the visitors with slight showers in the afternoon and evening. Fully five thousand visitors attended from all parts of the Twin Falls country. Excursion trains poured the people into the city from all directions. The property "light" began with a concert at nine in the morning by Twin Falls' famous band, gave the crowd a foretaste of one of the best celebrations ever given in Twin Falls. The automobile parade with fully sixty cars in line showed a number of beautifully decorated floats, which were given to the crowd by the spectators. Some difficulty was experienced in assembling the cars as that the parade did not create the impression it should have had under the circumstances. The people who entered their cars are entitled to the thanks of the citizens of Twin Falls for their loyalty. The judges awarded the prizes for best decorated autos to C. E. Booth, first; Mrs. J. B. McLean and John W. D. Smith second; Mrs. Hester W. Williams, third. Many other cars were deserving of mention while not receiving any of the prizes. Free Ice Cream to the Kiddies One of the most interesting sights and one that brought smiles to the faces of the children was the distribution of ice cream cones under the able direction of E. A. Maciver, when fully twenty children were lined up at one time awaiting their turn. The Twin Falls band divided the honors with Hon. Adolphus Smith and the other bands of the city park, when the assembly listened to some spirited music and an inspiring address by Frank Smith, congressman. Mr. Smith had charm of manner and ease of delivery that made it a pleasure to listen to him and the applause which greeted his treatment of national affairs showed that he was in close touch with public sentiment. Bud Bally Beats. The baseball game between Bud and Twin Falls drew one of the biggest crowds ever due to the rivalry between the two towns. Bud boosters were there in abundance to help win the game but were unable to put it over. Twin Falls won with Hart in the box by a score of 9 to 2. Up to the eighth inning Bud was unable to get a man across the plate, while Twin Falls won the game in the early innings by consistent hitting. Kelly, the doughy twirler from the west end, was not any terror to the local boys, but was hit for the eighth by bunting his and by an error were able to score three men. A Novel Feature. A new stunt for the celebration this year was the daylight fireworks in which all kinds of gaily colored and novel shaped shells were used, and the little folks. This was in charge of G. C. Stiller. The sports in the afternoon, raged all over the city, proved very diverting and every event found a large number of contestants entered. These events under the efficient management of Mayor Street, and the night went off without a hitch. The following were the prize winners. Winners of Events at 4th of July Celebration. 100 Yard Dash—Open. 1st prize, John Muncy; 2nd prize, C. Elliot; 3rd prize, Dew. 100 Yard Dash—Boys 18 and Under. 1st prize, Burton Dunn; 2nd prize, Howard Galloway; 3rd prize, V. Jarman; 4th prize, Geo. Rochester. 100 Yards—Boys Under 14. 1st prize, Roy Coppenhaver; 2nd prize, Ray Ashton; 3rd prize, Stanley Hodges; 4th prize, Vernon Smith. 100 Yards—5-Legged Race. 1st prize, C. Jones and Andy Jensen; 2nd prize, Geo. Gray and Peter Jensen; 3rd prize, E. Richards and K. Zuck. 50 Yards, Sack Race—Boys 14 and Under. 1st prize, L. Jarman; 2nd prize, Paul Showers; 3rd prize, Roy Owen; 4th prize, C. Helge. 50 Yards, Potato Race—Boys 16 and Under. 1st prize, Frank Stangle; 2nd prize, Loui Hodges; 3rd and 4th prizes, local names not given. 50 Yards—Girls 14 and Over. 1st prize, Rita Gwin; 2nd prize, Edith Harris; 3rd prize, Anna Calkins; 4th prize, Ruth Brabb.

USING STORED WATER

Natural Flow of Snake River Now Less Than 3000 Second Feet.

The natural flow of Snake River at the Minkdoka dam is now below 3,000 second feet. This is 400 second feet less than the amount called for on the Twin Falls project. The Minkdoka project is using stored water from Jackson lake reservoir. Lake Walcott is being refilled from Jackson's dam. Approximately 75,000 acre feet of the stored water has been drawn out of the latter, leaving over 300,000 acre feet for the remainder of the season for this project, which is ample for four more irrigations. The low period in the natural flow of Snake river is never below 3,000 second feet. When the river is dry at Blackfoot, the natural flow at the Minkdoka dam is ordinarily 2,000 second feet. The conditions, this condition will prevail by the fifteenth of the month. This 2,000 second feet of water which flows in the river below Blackfoot is just sufficient to run the machinery at the dam for pumping water for the South Side Minkdoka project. If the stored water at the dam is approximately 75,000 acre feet, it is necessary to use stored water to run the machinery. With conditions on the Minkdoka project are most favorable at this time, and practically all who took advantage of their turn in the rotation system, have their crops watered. The pumps supplying water for the South Side are working at full capacity. Potatoes are just coming on for the first irrigation and the boots will soon require water. However, the hay and grain will soon be out of the way, and for that reason there is little danger of a serious shortage. Yes, it is the plain duty of every farmer on Snake river to make the best possible use of his irrigation system.—Burley Bulletin.

IDAHO MAY BEAT TAX GAME

Treasurer Says Land and Timber Can Yield Enough for Public Needs.

That Idaho will become a taxless state for the balance of state government is concerned is the belief of John W. Engstrom, state treasurer. This, says the state treasurer, is dependent upon adoption of a constitutional amendment permitting the sale of more state land each year, and the pursuing of the necessary policy of selling timber and minerals. The endowment funds of the state are now approaching the \$5,000,000 mark, said Mr. Engstrom. "Of this sum there is now available in interest-bearing securities \$4,727,500.12. These securities are earning the state an average return of 5 1/2 per cent, or approximately \$260,000 annually. The endowment funds of the state could easily be increased to \$25,000,000 by the sale of pipe and marketable timber, and by the sale of land. The present value of the state's timber has reached a market value that will not increase as fast as their present value would accrue interest. An endowment fund of \$20,000,000 earning 6 per cent would produce a fund of \$1,500,000 and in two years the earnings would amount to \$3,000,000 which is instead of 6,000 dollars more than the legislature appropriates for the entire cost of state government.—Idaho Falls Recorder.

ROBERT BROSE HURT

Head Injured by Collision With Top of Auto.

Robert Brose, of Rock Creek, well known rancher, and former business man of this city, was severely injured when he was struck by the top of an auto Friday of last week. While riding in his new Cadillac, with his son driving a sudden bump threw Mr. Brose against the steel bows of the top inflicting a gash in his head and rendering him unconscious for several hours. It is thought that no permanent injury will result.

ELEVATOR FOR AMSTERDAM

Twin Falls Milling and Elevator Company to Build on the Salmon.

The Twin Falls Milling and Elevator company of this city will build an elevator in the growing town of Amsterdam, according to reports from there. The company has already built an elevator at Hollister but the growing business of the company on the Salmon necessitates a new building. It is understood that the contract has been let and the work will be pushed.

NOTICE

Twin Falls, Ida., July 6, 1915. TO THE PATRONS OF THE TWIN FALLS POST OFFICE: This office will be closed on Monday, July 12, and after July 12, the Money Order, Postal Savings, Registry and Stamp Windows of the Twin Falls Post Office will close at 5:30 instead of at 6:00 as by order of the First Assistant Postmaster General. Respectfully, W. R. STROME, Postmaster.

Take that bursted bike to Gloystein Brothers, they'll fix it. Mar. 9 15.

J. P. MORGAN SHOT BY ASSASSIN

Two Bullets Take Effect in Region of the Hip

FRANK HOLT, A MAN FROM TEXAS, ARRESTED AFTER STRUGGLE

Holt Confesses an Attempt to Blow Up the Capitol at Washington D. C. at Same Time.

Glenn Cove, N. Y.—Frank Holt, a former Cornell University instructor, attempted to assassinate J. P. Morgan at East Isle, Mr. Morgan's country home here, Saturday, and Saturday night confessed, he was the man who set the bomb which exploded at the United States Capitol at Washington Friday night. Mr. Morgan, the victim of the bullet which Holt fired Saturday, was said by specialists at his bedside to be resting well. No vital organ, the physician announced, had been involved in his injury. The physician, however, declined to state the exact location of Mr. Morgan's wounds. Julius Spencer Morgan, eldest son of the financier, was asked to state the exact nature of the wound. After conferring with the physicians young Mr. Morgan announced that his father had decided to add nothing to their previous bulletins. Holt, by his confession and the detailed description of the bomb he used in the capitol outrage, stamped himself as an expert on the use of explosives, the police assert. Immediately after his confession was obtained, the squad of secret service operators and New York City Detectives and Bertillon and finger print experts, were summoned to Glenn Cove.

The belief prevailed that Holt had been connected with other bomb outrages which have baffled the police, Holt's confession was obtained on the grounds of Andrew Carnegie's Fifth avenue residence in New York City. Thomas Tunney, captain of the bomb and anarchist squad of detectives of the New York police department, and William E. Luytner, the best known police officer who was assigned late Saturday, obtained the confession. To do so, they intimated, they had to employ so-called "third degree" methods of police headquarters. Holt was overpowered by Morgan and Henry Fiske, the butler in the Morgan household. He was jailed here where he issued a statement saying he had intended no harm to Mr. Morgan, but had come to Glenn Cove to procure the banker's safe for shipment abroad of millions of war. He went into the Morgan home, he said, with a pistol in his hand and a stick of dynamite in his pocket intending to remain there till Mr. Morgan "did something."

AVERAGE \$90 A HEAD

Best Ranch of Beef Cattle Ever Fed on Alfalfa.

J. W. McNutt, one of the prosperous Castleford ranchers, sold to Salt Lake and other buyers what is considered the best bunch of alfalfa fattened cattle ever shipped from this tract to the Salt Lake market was sold the other day. The bunch, he stated, Johnson of Denver, the pick of the cattle was sold. Eighty-eight head was the number that went to the latter place and the cattle averaged 380 pounds apiece and brought an average of \$90 a head. On hundred and thirty-nine head of the total number, fifty-nine going to Salt Lake. Mr. McNutt purchased these cattle last fall at Idaho Falls and fattened them on his Castleford ranch. The bunch made a pretty picture as they were brought to this city and placed in boxes for shipment ready for shipping.—Buhl Herald.

MOVED TO SALT LAKE

New West Magazine to Open Headquarters in Zion.

Mr. and Mrs. Robert W. Spangler, editors of the New West magazine, who have made their headquarters in Twin Falls for several years have moved to Salt Lake City, Utah, where they will edit their magazine. Mr. Spangler first started the Idaho Club Woman in Twin Falls, later changing the name of the magazine to "New West" with an edition for the club women. After changing the magazine to the "New West," Mr. and Mrs. Spangler concluded that the Idaho Field was too limited, they had secured the support of the leading men of the northwest for their publication and will now be in better shape to do the whole international copy.

SHOULD URGЕ CAUTION. The increasing number of accidents on the north grade at Shoshone falls makes it imperative that some means be taken to warn and caution drivers of autos and teams going over that grade for the first time.

The Times would suggest that the power company which controls the ferry, put up a good readable sign on the ferry urging travelers up either grade to sound horns on the cars when going around the sharp turns on the grades.

IT MUST BE GET TOGETHER. It must be apparent to the Republicans (Stand pat and Progressives) that there is nothing to be gained by the continual petty warfare that has wrecked the party in this county for the past four years.

Now it is high time that both Republican and Democratic parties should defeat the Democrats unaided, but united can easily win. It will take some concessions from both factions to get harmony.

It is a fact well known to wise parents and teachers that the best way to learn is by doing. During the coming school vacation, let your children do a little work and earn a little money.

They will then appreciate better the value of money and the importance of saving part of every dollar earned. A young boy who sells Saturday Evening Post was asked by his sister for a loan of fifteen cents. He had some doubts about the prompt return of such a loan, so he said: "No, Mary, I don't want to let you have that money. It took me an hour yesterday to earn fifteen cents, and I'm going to hang on to it for a while."

There are many ways in which ambitious boys can make money. A city boy can run errands, deliver things with his hand and leg-power express wagon, caddy on a golf course, etc.

A country boy or girl can earn money by planting and tending a garden, or caring for animals. A young girl in North Dakota made over \$50.00 in ten days by selling eggs which her sensible parents turned over to her to look after.

Girls in city or country can help with the housework, do sewing, make candy and in many other ways make themselves useful as well as ornamental.

In every case, when a child's earnings are to be put into a savings bank account, this will firmly establish the habit of saving.

The Boy Scouts of America have a chart plank in their platform. Following their annual convention, F. B. Silverwood stores of Los Angeles opened 700 savings accounts at the Los Angeles Trust and Savings bank recently. These accounts were opened in the names of worthy boys and other youngsters of the city.

The children of Los Angeles under the age of sixteen years 40,000 in number, have on deposit in the school savings bank close to \$1,000,000 almost \$25 each. This good record is ascribed to the instruction given in the business department of the schools.

Among the many other good things that the Young Men's Christian Association is doing, is its co-operation with the American Bankers Association in the effort to increase the sum total of thirty living in this country.

A recent number of its 40-page monthly magazine, Association Men, was devoted almost entirely to the subject of thrift, containing articles by James J. Hill, Henry Ford, George W. Perkins and others.

The front cover was ornamented with a picture of enlisted men of the navy depositing their savings for safe keeping with the Brooklyn Navy Y. M. C. A., where over \$4,000,000 has been deposited by men of the service in the past fifteen years.

Ask your own Y. M. C. A. secretary for the free personal expense record and the "Thrift Tips." They will help you.

T. D. MacGREGOR.

to be shown by the Germans either shortening their line, or they will hang on too long and it will break. Alternately it may not succeed, and the test will be that after the expenditure of this mass of accumulated ammunition and after appalling casualty lists the German line remains unbroken. In this latter alternative our decision to continue must remain. It will be a very critical turning-point in the war. If the German line has to retire then you have the war not ended, but decided.

Major Morath, writing in the Berliner Tagblatt, thinks that this offensive has begun, and he concludes: "Between Arras and Arras-les-Bains are very lively. It is an offensive of the enemy with strong forces, and therefore the beginning of the war in May" announced by Lord Kitchener. That announcement was not unaccompanied by our army command.

That Lord Kitchener approximately keeps his word, and that there is a "condition war" than to the completion of the much-advertised army of many million white and colored Englishmen. For two weeks transports have undoubtedly brought notable new forces into France, but in any case not millions.

What France has brought into the field for this offensive is difficult to say. It may be the great army of defense from Paris, which does not feel itself threatened just now, or it may be newly trained young reserves, or perhaps troops freed after fighting in Champagne and between the Meuse and the Moselle.

"Although we have every confidence that this offensive will not lead to driving us out of Flanders and northern France, as the enemy hopes, still an attack with numerical superiority may bring about a backward and forward" battle which may go on for a long time (Kitchener) reaching a positive decision. In these circumstances it must be remembered that the giving up of individual points on an extended front is not a catastrophe, and the trenches which the French have taken from us between Carrency and Neuville they have had to defend with bloody losses, and without any certainty of keeping us out permanently.

"The general situation on the western front is that a development toward a decision will lie in the question of whether we are stronger in defense or the enemy stronger in attack."

The military critic of the Manchester Guardian takes a similar view, and speaking of this continual exchanging of trenches he has marked "the fighting line" that ought to be taken.

"In themselves the military effect of these combats is after little more than a mutual slaughtering in which the side wins which puts the greater number of men out of action. 'Eyes-witness' has himself drawn attention to this aspect of the war. Ultimately numbers will win—numbers of men and numbers of guns. The Allies, especially since entry into the war of Italy, have the greater resources in men."

If, therefore, they succeed in putting out of action more or even only as many as they themselves lose—and do not fall behind in armament—they are fighting a winning battle."

The fighting in this region, in which the famous "Labyrinth" is situated, has been very severe, and the London Morning Post tells us that the now-captured Labyrinth, which lies to the south of Neuville-St. Vaast, contains in an area of some two square miles a perfect maze of trenches over fifteen miles long in the aggregate.—Literary Digest.

THE TURNING POINT OF THE WAR. A confident prophecy that the turning point of the war is at hand was recently made by Mr. Hilaire Belloc, the most inspired of all the military critics now engaged in writing on tactical theories. His prophecy seems to be based upon the somewhat mysterious operations now taking place north of Arras in French Flanders and Major Morath, the expert of the Berliner Tagblatt, agrees with Mr. Belloc in thinking that events are shaping so that both armies stand in a position. It is curious that these critics should agree on such a point at a moment when the fighting on the western front seems to be uninitiated to be quite uneventful and when the attention of the world is turned to the eastern front watching the triumphant advance of the Germans in Galicia. It is remarkable that Major Morath should see a few exchanges of trenches in northern France as a more significant and decisive "factored" than the dramatic recapture of Gallian strongholds by the German army. Mr. Belloc, lecturing in London, is reported by the Daily News as saying:

"I want you to remember that within the next few weeks you are certain to have the turning point of the war. It does not mean victory, but that the enemy will be getting further away from an inconclusive peace.

You will get the offensive, and not on one point but on many; and for some days you will not know where the weakness is showing itself on the German lines. If it succeeds it will

themselves useful as well as ornamental.

In every case, when a child's earnings are to be put into a savings bank account, this will firmly establish the habit of saving.

The Boy Scouts of America have a chart plank in their platform. Following their annual convention, F. B. Silverwood stores of Los Angeles opened 700 savings accounts at the Los Angeles Trust and Savings bank recently. These accounts were opened in the names of worthy boys and other youngsters of the city.

Peterson Hardware Company.

arrived Monday for a week's visit at her home. They are on route to the fair at San Francisco.

Mr. and Mrs. Glenn Fritcher, Mr. and Mrs. Bill Parham and Miss Serous Bussum, of Darlington, spent Sunday at Clear Lake.

Misses Dorothy Davis and Ruth Lindwood, went to Twin Falls Sunday to spend the day with their friends, Miss Helen Cairncross.

Mrs. Guthrie shipped five gallons of gooseberries to Clinton, Mo., the last of the week which she purchased from Dr. Rogers.

Miss Ethel Woodmann returned to Buil yesterday from Pocatello, and has accepted a position with the M. S. T. & T. Co.

Mr. and Mrs. Riley Maxwell and daughter, and Mrs. D. W. Jones and daughter visited Castleford and Balmoral Rock yesterday.

Miss Katharine Cairncross was a week and a half in Buil from Twin Falls, the guest of Eleanor Faris and Hazel McBee.

Miss Katharine Cairncross was a week and a half in Buil from Twin Falls, the guest of Eleanor Faris and Hazel McBee.

Mr. and Mrs. Taylor left Wednesday morning with two cars of lambs to the Omaha markets where he will sell them.

Mrs. Geo. Thompson returned Sunday from a visit in Boise and Nampa. While in Boise she attended the Sunday Oldfield exhibition.

Mr. and Mrs. Chas. Snyder and Mr. and Mrs. J. P. Fort have the contract for the work.

Mr. and Mrs. Walter Hutson and family, and Mr. and Mrs. A. Hutson returned Sunday from a visit with their son, of Boise, accompanied the party to Buil, and will remain here for several days, the guest of her sister, Mrs. A. R. Hutson.

Mr. and Mrs. Ed. Anderson, Miss Wilma and Ted Addison autored from Boise Sunday for a visit with the Addison's sister, Mrs. A. J. Trout and husband. The party spent the first of the week taking in the sights of the Buil country and left this morning, accompanied by Mrs. Trout, for a visit in Richfield, Ketchum and Hilday. They expect to return to Jerome for the celebration of the 100th anniversary.

A number of Buil people spent Sunday and Monday in the Rafter river country looking for homesteads, but no things were made by any of the party. The trip was made by automobile, in one of which were Misses Blanche Case and Lillian Ellis, Messrs. Fred Case, Roy Ellis, Chas. Kallan and Bob Sloc. In the other car, driven by L. C. Harvey, were Messrs. Smith, Troyer, Reams, and Cox.

Doctor J. B. Trumble, of Chicago, general secretary of the board of foreign missions of the Methodist Episcopal church, who was one of the speakers at the Epworth League convention held in Twin Falls last week, visited Monday and Tuesday at "The Pears," the being an old friend of the Barrett family. Mr. and Mrs. Bartlett and Mrs. C. O. Smithson accompanied him to Buil Tuesday, Mr. Whitby taking them in his car.

Mrs. C. Gates and daughter, Miss Estler, returned Monday from a six months' stay in Portland, Oregon, where the latter attended school. It will be remembered that Mr. Gates rented his fine ranch near Castleford last fall, and now upon the return of his family he has rented the residence property adjoining, the A. V. Mounce home, and so soon as the place can be properly repaired Buil will have another estimable family added to its list of progressive citizens.

proving and it is believed that an operation will be unnecessary.

Mr. and Mrs. P. M. Aldrich, Mr. and Mrs. H. W. Aldrich, Mrs. E. W. Byers, Mr. and Mrs. D. W. Jones and Miss Case were entertained at Sunday dinner by Mr. and Mrs. Gustav Kunze.

Mrs. D. W. Jones and daughter arrived last Thursday from New Mexico, and will spend the summer with her brother, Riley Maxwell and family, and her sister, Mrs. Alfred Carlson and family.

Miss Baker Burns, of Monmouth, Ill., is spending the summer months at the home of Dr. and Mrs. F. A. Marsh. During last winter Miss Burns was employed as principal of the high school at Laurel, Nebraska.

Postmaster C. V. Biggs, wife and daughter, Claudia, left Sunday for San Francisco, to attend the fair and visit with some of his. Biggest relatives, who live nearby. They expect to be gone about twenty-five days.

The Merrick Hardware Co. is having the new front of their store painted. The lower half painted a white, the upper half painted a cream tint. It is their plan to redecorate the interior of the building. J. P. Fort has the contract for the work.

Mr. and Mrs. Walter Hutson and family, and Mr. and Mrs. A. Hutson returned Sunday from a visit with their son, of Boise, accompanied the party to Buil, and will remain here for several days, the guest of her sister, Mrs. A. R. Hutson.

Mr. and Mrs. Ed. Anderson, Miss Wilma and Ted Addison autored from Boise Sunday for a visit with the Addison's sister, Mrs. A. J. Trout and husband. The party spent the first of the week taking in the sights of the Buil country and left this morning, accompanied by Mrs. Trout, for a visit in Richfield, Ketchum and Hilday. They expect to return to Jerome for the celebration of the 100th anniversary.

Its a Long Time Between Crops

Most business men receive money every day. Workmen and laborers are paid every week. But the farmer receives the most of his money only twice or three times a year.

A great many things might happen between one crop and the next. A chain of misadventures might put you in bad straits. For this reason, Mr. Farmer, you should have a well-established acquaintance with a strong bank. Why not deposit your money with the Twin Falls Bank and Trust Company and transact your business through us? This will go far toward establishing your credit. You may never need a loan. But if you SHOULD need it, you will realize the value of a friendly bank.

PUBLIC ROADS

ACTUAL COST OF GOOD ROAD

Various Methods of Financing Road Building and Retiring Debts Discussed by Experts on Subject.

While it is frequently easy for a county to issue bonds and borrow money for improving the local highways, the raising of the money to retire those bonds at maturity is often not so simple. Many counties, in borrowing money for bonds, figure that the amount of money raised represents the total cost of the road, forgetting that the road must be maintained and repaired if, at the end of the term of the bonds, the county is to have anything to show for its investment.

The question of financing county road building is discussed fully in Department of Agriculture Bulletin No. 136, entitled "Highway Bonds," which is written by the office of public roads in collaboration with James V. Glover, professor of mathematics and insurance, University of Michigan. In this bulletin the authors discuss fully the various methods of financing road building and retiring debts, for road construction, and also deal frankly with the actual total cost of a road during the life of the bonds. On the total cost of a road, the authors give the following two examples as affording at least a basis for estimating the total minimum cost of a mile of road: Bituminous macadam: Cost of construction (\$10,000) under 5 per cent serial bond with interest for 20 years, \$16,012.50. Cost of annual repair and maintenance (\$500) for 20 years, \$12,000. Total cost for 20 years, \$28,012.50. Brick: Cost of construction (\$18,000) under 5 per cent serial bond with interest for 20 years, \$26,426.73. Cost of annual repair and maintenance (\$300) for 20 years, \$6,000. Total cost for 20 years, \$32,426.73.

The authors point out why the actual cost of building and maintaining a specific highway can be determined only after the character and volume of traffic and actual wear and tear have been studied for a series of

Good Road in North Carolina.

years. The figures quoted above, of course, will not apply to ordinary main, gravel or clay roads, but in all these cases the interest on the bonds must be met, and there must be expenditures to maintain the condition. The poorer the drainage and the less permanent the character of the road foundation, the greater must be the percentage that repair costs will bear to the first cost. Similarly, the question of whether the actual surfacing is designed to withstand the character of traffic and weather to which it is subjected also has an important bearing on what will cost the county to keep the road in such shape that when the bonds are paid the locality still will have a valuable property to show as a result of its borrowing and repayment.

Most Helpful Signs

One of the most helpful signs of the present time is the attitude of the farmer and the business man towards greater permanency in building and improvements. This is seen in road building, in the very widespread use of concrete on the farm and in the tendency towards fireproof buildings in all of the smaller cities. Truly there are some places where concrete can be used to good advantage on your farm.

Good Road Benefits

Good roads broaden our sympathy, lessen distance and increase our usefulness.

Brings Market Nearer.

The good road brings the market nearer to you.

Prevents In Stock Feeding.

Much of the profits of stock feeding will depend upon the kind of feed you have at hand and the quality of the animals kept through the winter.

Straw for Bedding.

Straw for bedding animals should be safely housed in the barn and not allowed to go to waste in the stack.

Benefit of an Incubator.

In handling an incubator the persistency of a hen's nature does not have to be reckoned with.

POULTRY FACTS

ORIGIN OF WHITE WYANDOTTE

White Cochin Blood Was Introduced in Making of Breed as Feathers on Legs Would Denote.

A question has been asked relative to the Wyandotte breed, and why the White Wyandotte sometimes show a dark feather and even show a tannish red of feathers on its legs? There are several varieties now of the Wyandotte, but the first to be admitted to the standard was the Silver Wyandotte. From the first the Silver Wyandotte had the rose comb. The next

Flock of White Wyandottes.

variety of Wyandottes to be admitted was the White Wyandotte. The Towle and the large Wyandottes were the first to be shown, each of these fanciers stating that the White Wyandotte kept by them came as sports from the Silver Wyandotte, and yet claim to be the first Wyandotte originated, as several breeders must have been breeding for this type of fowl at about the same time, and that all the early White Wyandottes were sports from the Silver variety is not likely to be true. It is thought that White Cochin blood was introduced in the making of the White Wyandotte at the beginning, as the size, shape and color of the eggs not only denotes this, but the feathers appear at times on the legs makes this seem probable. Why dark feathers often appear in certain of these birds good enough to show is often a mystery to the breeder. These seldom appear in such numbers that they cannot hardly be pulled out. The present stock may show these. However, White Wyandottes are improving away from most of their early tendency to reverberation.

HOME-GROWN POULTRY FEED

Not a Difficult Task to Get Eggs During Winter if Ordinary Horse Senses is Exercised.

To get eggs in winter under the conditions obtainable on a general farm is, I find, no difficult task if ordinary horse sense is used in the matter of feeding and housing. Writes W. K. Moore in an exchange. As far as possible I use the food grown on the farm, feeding as soon after daylight as practicable a mash composed of fine corn chop and alfalfa meal, half and half by measure. Feed all that the birds will clean up by noon, then give about one gallon of water. Scatter the mash, scattering it in straw litter in the scratching shed or hen house. At noon, or shortly after, I give all the ear corn they will clean up by night, and let them shell it.

For a meat food I get good results from the cracklings obtained from the local butcher for one cent per pound, of which I give about two pounds to every hundred hens three times a week. I find that a good way to do this is to mix the cracklings in the one gallon of water. If it softens them so that the fowls will get every part that is not bone. I keep every shell and feed cracked bones before them at all times.

The mash referred to is mixed dry, and boiling water is poured over it and it is left to steam for at least two hours—or better, over night. For variety, I mix with the mash potatoes, beets or anything of the kind that is obtainable; however, a diet of oats, corn and alfalfa, with a little meal, will give good profit in eggs.

The poultry house must be airtight and water-tight on four sides, the top, north, east and west. The floor may be of earth if proper drainage is arranged so that it will always be dry, and floor of the cover side must be made of common unbleached muslin.

Feed White Clover Hay.

White clover hay is the richest in lime. Feeding clover is a preventive of soft-shelled eggs. Cut clover hay has helped revolutionize the poultry business. Red clover hay contains about twenty-eight pounds of lime to the thousand pounds. Scald the hay at night, and keep it covered, so it can steam. See that the clover is cut to one-third to one-half inch lengths. When tender it is apt to pack in the crop, causing crop-bound.

Talking Through His Hat.

When you hear a farmer saying one hen is as good as another, don't waste time trying to find his name among those who attend farmers' institutes. If you don't find him at home he is talking politics at the corner grocery.

Little money will now buy big bundles of good goods in our store. The summer season is drawing to a close with us and we want to sell out every piece of summer goods we have left. Our prices will soon do it.

But the wearing season for summer goods is now only at its height. Come now while the choosing is good and buy all you need.

Remember! Big value for your money now. Everything for the working man.

PORTLAND MARKET REPORT.

Portland, June 29, 1915.
The receipts for Monday are: Cattle, 1105; calves, 17; hogs, 3660; sheep 1387.

Cattle.
Monday's receipts were fairly heavy though not making a dent in the way of quality was in evidence. Some fairly good steers sold at \$7.25 although the bulk went at \$6.75 to \$7.00; cows, \$6.00 to \$6.25 and heifers \$6.00 to \$6.50. Market considered steady.

Hogs.
More hogs came forward beginning of week than for some time. Everything considered market strong. Bulk brought \$7.70 to \$7.75; tops at \$7.80. Market steady.

No changes in the sheep market only a handful being in evidence so begin the weeks trade. Market steady.

The following rates are representative:

BOARD OF HEALTH BULLETIN

Choosing a Resort for the Summer Months for the Family.

If you or your family go away from home for a vacation this summer it will be partly for pleasure, but mainly for HEALTH. You hope to come back strengthened and refreshed for the work of the coming year. It is an unfortunate fact that many people who have saved up for their vacations in this spirit come back, not strong and well, but infected with germs of disease that will keep them for weeks in a sick bed and if they recover will leave them for months afterward in poor physical condition. "Vacation typhoid" is a far too familiar fact to every health officer.

The state department of health devotes a great deal of attention to the supervising of the sanitary condition of summer resorts. The people of the state could do much themselves to aid in this important work if they would take steps to inform themselves beforehand about the precautions taken by hotels and boarding-houses to protect their guests. The state inspector cannot be on the ground all the time, but the hotel keeper has a profound respect for the educated public opinion of his patrons.

Before deciding where to go for vacation find out all you can about the water supply and sewage disposal, the milk supply and the presence of insect pests.

Make it clear that the WATER SUPPLY must be properly protected from sewage contamination, and if you find when you arrive that it is taken from a stream or pond into which sewage enters without proper purification you should cancel your reservation. If the water comes from a well be sure that it is not polluted by washings from the surface of the ground. The well curb should be raised at least a foot above the ground and the top covered over by a tight board cover or concrete slab. The well should be as far away as possible from any special sources of pollution such as cesspools or outhouses.

If the house has a regular water closet and sewage system, find out where it empties and whether the sewage pours into a lake from which you are expected to drink or in which you are expected to bathe. If there is an outside dry closet make sure that the closet is TIGHT and the closet screened to KEEP OUT FLIES. Flies carry disease germs from such places to the dinner table.

There is always danger that FLIES or MOSQUITOES may carry disease. Flies breed in decaying filth and mosquitoes in stagnant water, and both of these pests can be largely controlled by sanitary conditions of the premises. If the dining room is black with flies when you arrive, REMEMBER WHERE THEY MAY HAVE BEEN and try another hotel at once. You can get healthy conditions that will insure a happy vacation and send you back to your home in the best of health and vigor—if you will demand them.

How Fresh Air Cures Tuberculosis.

A patient in a tuberculosis sanatorium writes to the state board of health to ask: "What is the effect of fresh air upon the germ of tuberculosis in the lungs?"

Reply—There is probably no direct effect of fresh air upon the tubercle bacillus in the lungs. The fresh air affects the patient and makes it easier to fight off the disease.

The healthy human body has its "fighting edge" which can hold its own against the tubercle bacillus if it is given a chance. Great numbers of people become infected with tubercle germs who do not develop actual disease because the germs cannot gain any foothold. It is the people who live in overheated rooms and breathe the air of dusty corridors and get too little food and sleep who fall victims to tuberculosis. Disipation and attacks of other diseases also prepare the way for it.

Life in the open under medical advice, breathing fresh cool air and surrounding the body with fresh cool air—these things somehow stimulate the system to resist the invading germ, build up its vital resistance so that the patient who has just begun to develop tuberculosis succeeds in overcoming the germs and at last gets well.

In every case of tuberculosis and in most other diseases as well there are two sides, as there are said to be to a quarrel. It is just as important to strengthen the body as to weaken the germ, and this is what fresh air does. Indeed, we cannot by medicine or in any other way attack the germs of tuberculosis.

IN THE PROBATE COURT OF THE COUNTY OF TWIN FALLS, STATE OF IDAHO.

Notice of Time and Place set for Hearing Petition for Probate of Foreign Will.

In the Matter of the Estate of Charles Felix Wahrer, Deceased.

NOTICE is hereby given, That a petition for the probate of the will of Charles Felix Wahrer, deceased, and for issuance of letters of administration with will annexed thereon to Edward J. Monti, has been filed in this court, and that Saturday, the 17th day of July, 1915, at ten o'clock in the forenoon of said day at the courtroom of said court, in the City of Twin Falls, in the county of Twin Falls, State of Idaho, have been set as the time and place for the hearing of said petition, when and where any person interested may appear and contest the same and show cause, if any they have, why said petition should not be granted. Said Will is a foreign will, heretofore admitted to probate in the state of Missouri.

A repetition of your want ad may bring a better offer for that second night article.

A Meteor Fell and then—

Right there this remarkable photoplay-story starts—with a burning meteor falling from the sky. It was back in 1615. Sir Arthur Stanley was about to be burned at the stake. (Note: Strong firelight scene in full color.) Suddenly a meteor fell. When it cooled off it was found to contain a marvelous gem—"the diamond from the sky." You've never heard a more interesting story, or seen a more beautiful photoplay.

THE DIAMOND FROM THE SKY

A Picturized Romantic Novel.

\$10,000 For a Suggestion!

This photoplay took the \$10,000 prize in the \$10,000 photoplay contest announced last December. Another \$10,000 is now offered for a sequel to this prize play. This offer is open to you. Only a simple suggestion of 1,000 words or less is wanted.

"The Diamond From the Sky" has been produced in motion picture form at the Santa Barbara studios of the American Film Manufacturing company. In the cast you will find such favorites as Lottie Pickford, Irving Cummings, William Russell, Charlotte Burton, George Periolat, Eugene Forde, W. J. Fedmarsh and Orral Humphrey. You will find beautiful photography, elaborate settings—all in all an exceptional film drama.

You Can See It at Orpheum Theatre Next Monday, July 12-13-14

"The Diamond From the Sky" will be shown next Monday. Then you can see it for the first time. Whatever you do, don't make any other appointment for next Monday. Be sure to see—"The Diamond From the Sky."—READ THE STORY IN THIS NEWSPAPER.

Our Ice Cream and Soda are Delicious

Once you taste our ice cream and soda you will regret that you have not before visited our cooling fountain. Our cooling drinks and ices are "pure food" too. We use pure syrup, pure cream, pure flavorings.

W. C. Hall, who is engaged in the mercantile business in Murtaugh, transacted business in the county seat Tuesday.

J. J. Powers, train master for the Idaho division of the Oregon Short Line, was a business visitor in the city Tuesday.

H. C. Mallison, a pioneer of southern Idaho, who is making his home in Boise, spent several days of last week in the city looking after business affairs.

On Monday Justice W. J. Smith united in marriage J. W. Vanderford and Adeline Larson, both of Buhl. They will make their home in the west end town.

S. G. Hull returned last of the week from the eastern part of the state and western Idaho, where he had been for a month or more on business.

J. N. Holsley, of Three Creek, spent several days of last week in Twin Falls.

Rev. C. L. Bent, pastor of the First Methodist church, spent Sunday in Pocatello.

Attorney A. B. Harclay transacted business in Twin Falls Friday from his home in Jerome.

J. W. Tanner, editor of the Filer Journal, transacted business in the county seat Saturday.

J. B. Smith, of Eden spent Friday and Saturday in Twin Falls looking after business affairs.

Mr. and Mrs. Stamer were in the city Monday from Burley visiting with friends and celebrating.

Andrew Rogerson is in the city from the western part of the county looking after business affairs.

L. G. Price, of the Contact copper camp, transacted business in the city for a day or two of last week.

Mr. and Mrs. F. B. Carson were in the city from Buhl Monday visiting relatives, and attending the celebration.

County Attorney H. C. Mills, of Minidoka county and family spent Monday in the city visiting with relatives.

Robert Rogerson returned Friday from the Wood river country, where he had been looking after his sheep interests.

Mr. and Mrs. E. L. Brassfield and Miss Edith Bowser spent Saturday and Sunday in Albion. They made the trip by auto.

William Turner, of the Bruneau country, spent several days of last week in Twin Falls looking after business affairs.

John and F. H. Skilters, well known sheep men of the Boise county, were business visitors in Twin Falls Monday.

H. T. West, transacted business in the county seat for a day the middle of the week from his farm in the Kimberly neighborhood.

Mr. and Mrs. C. M. Hill and children are in the city from their home in Boise. They came over to spend the fourth with relatives.

Gus Johnson, who is foreman for the county road work on the Murtaugh grade, spent several days in the city visiting with his family.

R. M. McCollum left Thursday evening for San Francisco, California, where he will spend the next thirty days visiting the exposition.

L. M. Dow, of the Darrow Brothers Seed company, left Thursday evening for Pendleton, Oregon, where he will visit with friends for some time.

Lyle Doversy has been in the city for several days from Glens Ferry, where he is employed by the great Shoshone and Twin Falls Power and Light company.

C. L. DeLong, E. Hollingsworth, Dr. Oliver Harstad and Mr. Swanson, spent a few days on the north fork of the Wood river fishing. They report very good luck.

Dr. J. H. Morphy was in the city Tuesday from Buhl looking after professional business.

C. R. Patrick, who lives near Buhl spent Saturday in the county seat transacting business.

Ray Critchfield, a farmer of the Eden county, spent Friday in Twin Falls looking after business matters.

A. N. Sprague of the Book Store Pharmacy, at Burley, spent the Fourth and Fifth in the city with Mrs. Sprague.

E. H. Snyder, who is engaged in the hardware business in Filer spent Monday in the county seat attending the celebration.

John James arrived in the city Monday from Salt Lake City, and will be here for some time looking after his business interests.

S. S. Champlain, secretary of the Twin Falls-Salmon River Land and Cattle company, with headquarters at Hollister, transacted business in town Saturday.

Plan to Send Advertising Car Through Middle West.

Governor Alexander last night issued the official call for the conference of representatives of the various cities and towns in this state to be held in Boise July 9, to consider a plan of organization for publicity of the resources of Idaho to the end that immigration may be directed to the state. Briefly stated, the proposed plan is to send an advertising car through the middle western and eastern states advertising Idaho through an exhibit of products and resources as well as handsome literature, telling the story of the Gem state, its opportunities and its future.

"To the mayors, chairmen of boards of trustees of cities, towns and vil-

lages, and to secretaries of Commercial clubs in the state of Idaho:

"A call is hereby made for a meeting of representatives of the cities, towns and villages of the state of Idaho to meet at the office of the governor of the state at the capitol, Boise, at 10 o'clock a. m. on Friday, July 9, 1915, to consider a plan of organization for publicity of the resources of this state to the end that immigration may be directed to the state.

"It is desired that all sections and communities of the state, insofar as may be possible, should be represented at this meeting so that any plan which may be adopted may receive the hearty co-operation and support of the entire state.

"To the end that it is suggested that each mayor of every town and city, and each chairman of the board of trustees of every village, and each secretary of every commercial club in the state name one delegate to attend such meeting for the purpose of effecting a temporary organization and the adoption of a plan of procedure, rules and means for carrying such plans into effect if it be decided to approve any plan offered.

CALL FOR CONFERENCE

Plan to Send Advertising Car Through Middle West.

Governor Alexander last night issued the official call for the conference of representatives of the various cities and towns in this state to be held in Boise July 9, to consider a plan of organization for publicity of the resources of Idaho to the end that immigration may be directed to the state. Briefly stated, the proposed plan is to send an advertising car through the middle western and eastern states advertising Idaho through an exhibit of products and resources as well as handsome literature, telling the story of the Gem state, its opportunities and its future.

"To the mayors, chairmen of boards of trustees of cities, towns and vil-

lages, and to secretaries of Commercial clubs in the state of Idaho:

"A call is hereby made for a meeting of representatives of the cities, towns and villages of the state of Idaho to meet at the office of the governor of the state at the capitol, Boise, at 10 o'clock a. m. on Friday, July 9, 1915, to consider a plan of organization for publicity of the resources of this state to the end that immigration may be directed to the state.

"It is desired that all sections and communities of the state, insofar as may be possible, should be represented at this meeting so that any plan which may be adopted may receive the hearty co-operation and support of the entire state.

"To the end that it is suggested that each mayor of every town and city, and each chairman of the board of trustees of every village, and each secretary of every commercial club in the state name one delegate to attend such meeting for the purpose of effecting a temporary organization and the adoption of a plan of procedure, rules and means for carrying such plans into effect if it be decided to approve any plan offered.

"The plan for handling this campaign as given out by the representatives in the city is as follows:

"A secretary for the state organization, who knows no north, south, west or east section of the state, but one grand state. He will call a meeting of the secretaries of all public bodies throughout the state, and he will endeavor to secure their hearty co-operation.

"Each community is expected to arrange for an exhibit of the production of their own community, and provide a creditable one at that and they will be asked to provide samples of a creditable nature for the exhibit on the car.

"The arrangements to be made for this campaign do not cost the citizens of Idaho one dollar other than the local and state organization and cost of securing an exhibit for their own community and the car.

"Riverside Route to Boise.

Follow the red arrows from Buhl to Riverside, the only good road. First class accommodation. Garage, store and good meals. RIVERSIDE FERRY, Boise, Idaho, March 23.

TWIN FALLS, IDAHO

KILLED FRIEND IN BRAWL

Tragic Ending of J. H. Cross, Lander Householder.

E. D. Rogers lies in the Banook county jail in Pocatello charged with the murder of Clyde Cross, the twenty-four year old son of J. H. Cross of Lander, whom he fatally stabbed at 12:30 last Friday morning. Cross died at the Bethany Deaconess hospital at 3:30 Friday afternoon and was buried in Falls View cemetery Monday morning after short funeral services at the Hager undertaking parlors.

The two were presumably the best of friends and came to town together Thursday from their ranches near Lander as witnesses for James Warlich whose contest against Richard McIlroy for the latter's homestead was to have been heard Friday afternoon. They obtained some whiskey and late in the evening came to blows after a slight argument in Arnold's pool hall. They fought for a few minutes without injuring each other and Rogers was ejected from the room. Friends and witnesses of the scene struggled with Cross several minutes in an attempt to prevent him from following Rogers outside but failed to hold him. The fighting was resumed as soon as Cross reached the sidewalk and terminated by both falling into the gutter with Rogers on top. Rogers' head was seen to have a knife which had not been noticed before owing to the darkness. Cross lay where he fell, bleeding from four severe cuts the worst of which was in the pit of the stomach. He was taken to the West rooming house and attended by Dr. Starr. Mr. and Mrs. J. H. Cross, parents of Clyde, were notified and hurried to town with all possible haste. Mr. Cross came immediately but Mrs. Cross arrived later to see her son alive. An operation had been prepared for some time thought to be the only possible means of saving his life but it was postponed awaiting the arrival of Mrs. Cross from continued hemorrhages. The funeral was held Monday morning. Interment took place in Falls View cemetery.

Rogers was taken to Pocatello Saturday morning by Sheriff Jeffrey and lodged in the county jail to await a preliminary hearing here this afternoon. Prosecuting Attorney S. L. Baine filed a charge of first degree murder against Rogers who will be defended by Attorney O. R. Baum.

Best Sellers in Poultry.

At the time when the prices of market poultry are best the cost of production is the greatest. As soon learn what quality the best fowls, and then they demand in buyers of dressed poultry do not select the big, rough, coarse fowls which are sought for their table. The class of fowls is pushed aside and the plump, solid ones are selected instead.

Additional Eggs Mean Profit.

If a hen only lays one egg a week for a year, it will pay for her food and every additional egg means profit. A hen lays three eggs a week she will give double the profit derived from a hen that lays two eggs. The greater the number of eggs the cheaper the cost of production in proportion.

the

TOWN DOCTOR, NELS DARLING

OF OKLAHOMA CITY

During the next twelve months The Times has arranged for the exclusive use of a series of articles upon Civic Betterment from the trenchant pen of Nels Darling, the best known exponent of home-town loyalty in the United States. These articles will be pertinent talks on "The Home Town" "Talks with the Business Men" and "Talks on Advertising."

They are interesting, terse and to the point. Darling never wastes any ammunition. The Times believes that these articles will do much to awaken Twin Falls citizens to their responsibility for the success of the home town. Some of the talks to the merchants will probably stir up some argument and opposition, but will nevertheless set them to thinking.

WILL BEGIN NEXT ISSUE

If the Articles Appeal to You as Fair and Just
ACT ON THEM for the Good of Twin Falls

Working out on Idaho fields under an Idaho sun does not make a spend-thrift of a man.

Rather more likely that the hard dollar will be made to go as far as possible.

And hence "lumber money" must get value—and is entitled to money's worth.

We are schooling ourselves so we can help make our customer's money do the most for him.

It's part of our business to aid you in economizing wisely on your lumber purchases.

PLAN FOR CLEAN EGGS

Sunshine is Necessary for the Health of Laying Hens.

Poultryman Should Follow Nature's Plan and Make Winter Months Comfortable to Fowls—Furnish Plenty of Nests.

(By A. C. SMITH)
Sunshine is absolutely necessary for the health and vigor of the laying hen. Low windows should be set so that the sun will shine into every part of the house during some part of the day. Roosts should be placed on a level, and not too high, as the hens are apt to injure themselves either by crowding, falling or flying against a projection about the house. Keep the windows in the poultry house clean.

A Trap Nest With Door Closed.

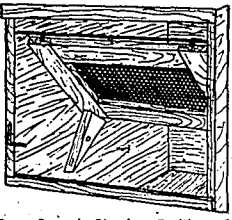

Rub them repeatedly with old newspapers. Sunshine in winter is the greatest of tonics.

When poultrymen and farmers realize that the sooner they follow nature's plan, and make the winter months as near like spring and summer months, the sooner they will realize the height of their ambition—winter eggs. Getting winter eggs is really quite easy if given a little thought and study. Using the gray matter in your skull will make you a successful poultryman.

Poultry keepers very easily reduce the percentage of dirty or soiled eggs, and losses entailed to insignificant figures.

First, an ample number of nests is, of course, necessary, but an ample number means no more, than, and probably not as many as are usually directed by poultry writers. Laying houses are, as a rule, provided with a sufficient number, but where the keeper falls down, is in failing to supply enough nesting material and floor litter.

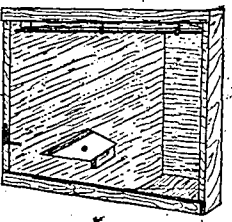

Obviously the nesting material must be clean, or the eggs become soiled by

Door Opened, Showing Position of Trigger When Trap Nest is Set.

contact, and it must be sufficient in quantity, or the eggs are often broken by dropping upon the hard floor of the nest. In houses where the dropping boards are above the nests, and the custom is to, sand the boards, small stones often drop into the nests, and breakage results when newly laid eggs fall upon them. The condition of nests should be noticed daily, and the nesting material replenished when necessary. Plenty of nesting material prevents breakage and insures clean eggs.

An ample and clean litter on the floor is also very essential when an A-1 clean product is sought. Particulary is this true when the hens

Door Removed to Show Position of Trigger When Door is Closed.

are allowed outdoors during weather. The litter acts as a foot mat for the hens on their way to the nests.

Clean eggs bring better prices than dirty ones.

Raise More Sheep. The domestic wool clip does not begin to satisfy the home demand, and more and more we draw upon the foreign markets for our needs. The remedy is to raise more sheep.

Green Feed for Hens. Sprouted oats are a splendid green feed for hens in winter and may be quite easily supplied on any farm. They are fed when they have reached a height of about three inches.

The DAIRY

EDUCATE THE DAIRY CALVES

Begin Early to Train and, With Sole Reference to Future Services—Never Play With Them.

The cow and her owner must be friends. Kindness and sympathy must dominate every step.

Begin the education of the future cow by educating the dam.

Take the calf in hand at once upon birth and show him how to get a foothold and direct the hairy tongue dencles. Grow with sole reference to future services.

Begin early to handle and train and never play with the calves. Allow no caretaker to have charge unless he is in full sympathy with your purposes and has a large appreciation of the problem.

The channel of nerve force must be untrammelled and the seat of nerve force, the brain, undisturbed and under control. If the largest yield is to be forthcoming.

Dealing with the functions so abnormally developed and yet to be identified, all conditions possible to affect the production should be taken into account.

The dairyman of today will fall to sorrow unless he feels growing within

Improved Dairy Animals.

In him a spirit of reverence for his dairy cows.

Leading for his support on these material functions and seeking all the while to increase them, he should never forget that it is out of intelligence and unselfishness of his animals that he is being enriched.

So, every instinct of humanity should prompt recognition of the untiring services of these faithful servants whose only thought is to yield to the utmost in response to friendly invitation.

Increase of product and decrease of cost per pound is inevitable and no man has determined the limit.

He who succeeds along the line of milk-making machinery will be he whose machinery the machine most thoroughly believes in it most firmly and respects it most truly.

CAUSE OF RHEUMATIC COWS

Large Majority of Cases Found in Dark, Ill-Smelling Stables—Cause for Afflicted Animals.

In nine cases out of ten the rheumatic cow will be found located in a dark, ill-smelling stable. A good floor kept dry, plenty of comfortable bedding, freedom from drafts, yet good ventilation and all the sunlight possible, will keep out rheumatism.

For an afflicted animal get the bowls in good condition and furnish laxative food for some time. Then apply to the stiff joints a liniment made by mixing equal parts of aqua ammonia, liniment of iodine and turpentine in four parts of linseed oil. Mix thoroughly and apply, rubbing the parts briskly. Give plenty of clean, fresh water and exercise in the yard on sunny days.

MAKE SUCCESS WITH DAIRY

Cleanliness and Neatness in Every Department is First Essential—Work Butter With Wood.

Those who have achieved the greatest success as dairymen are the ones who have been especially noted for cleanliness and neatness in every department and detail.

Never put milk or cream into a dark, poorly ventilated cellar. Good butter cannot be made from milk and cream handled in this manner.

Wood, instead of the human hands, should always be used in working over butter.

Water, milk comes from feeding frozen or watery feed.

SUMMONS

In the District Court of the Fourth Judicial District of the State of Idaho, in and for the County of Twin Falls:

Mary J. Brower, plaintiff, vs. George W. Brower, defendant.

GREENINGS to George W. Brower, defendant.

YOU ARE HEREBY SUMMONED AND Required to appear in an action brought against you by the above named plaintiff in the said District Court and to answer the complaint of the said plaintiff, filed therein, within twenty days (exclusive of the day of service) after the service on you of this summons, if served within this Judicial District, or if served elsewhere within forty days. That the said action is brought for the purpose of dissolving the bonds of matrimony heretofore and now existing as between yourself and the said plaintiff, upon the ground that you have failed, for a period of more than one year last past, to provide the plaintiff with the usual necessities of life.

And you are hereby notified that if you fail to appear, and answer as aforesaid, the said plaintiff will apply to the court for the relief demanded in her complaint as filed in the said cause.

Attest my hand and the seal of the district court of the Fourth Judicial District of the state of Idaho, in and for the county of Twin Falls, this 26th day of June, 1915.

E. J. FINCH, Clerk.

By H. H. COGGINS, Deputy.

E. V. Larson, attorney for the plaintiff, Twin Falls, Idaho.

victory over the Land and Water
company and the bondholders in their
suit to determine the rights in the
controversy over water on that pro-
ject. While allowing time for intro-
duction of further evidence regarding the
amount of water on all other points,
Judge Dietrich's decision is a clear
and unambiguous victory for the settlers and will
do much to increase the confidence of
the water supply, contracted for, of
the safeguarding of their interests.
The report taken from the Statesman
is given in brief but the full text will
be published next Tuesday.

Court's Decision.

An order of an interlocutory decreed
can be entered, restraining the com-
pany from making any contracts or
disposing of any right of forfeiture or
extinguishing any right of water,
collecting or attempting to col-
lect payments upon contracts until
the settlers have been provided with
a written assurance that the com-
pany will be provided. Leave will be
granted to either party to make ap-
plication at any time for the intro-
duction of further proof touching upon
the available water supply and more
particularly relating to the amount
of water in the reservoir basin.

The amount and dignity of the
rights awarded to adverse claimants
of the Vineyard company suit herein-
before referred to and now pending
in this court.

At the time the suit was commenced,
the company had entered into con-
tracts for the irrigation of 72,000
acres. The complaint of the settlers
was that the acreage is greatly in ex-
cess of the area for which water is
available, even during years of normal
run-off. For this reason they con-
tended that the company had failed
to comply with the terms of its agree-
ment and they are refusing to pay
the installments due on the purchase
price. Immediate termination of the
controversy is attended with great
importance and the court, Judge
Dietrich finds.

respect. The suggestion that a re-
ceiver collect the installments due
for the purpose of creating a fund out
of which to pay damages, meets with
the same objection.

Origin of Action.

The suit was brought by A. E. Cald-
well and others for the benefit of all
settlers on the Salmon River Carey act
project, against the construction com-
pany and the state land board which
awarded the contract to the company.
A. C. Robinson, who holds the settlers
contracts as collateral for a loan, and
the commonwealth Trust company, of
Pittsburg, trustee, were also parties
defendant.

Water Supply.

The sole source of supply for the
project is the Salmon river, which,
except for the flood water period in
the spring is a creek rather than a
river. For this reason a reservoir
was constructed with a capacity of
180,000 acre feet. In determining the
available supply during an average
year, the plaintiffs contend that the
water should be light and sufficient to
maintain the probable run-off of a
medium stream, but also the loss from
seepage in the reservoir and canal sys-
tem.

Meaning of Contracts.

In the belief that the fundamental
question is one of the meaning of the
contracts, the court takes up both the
settlers contract with the company
and that of the company with the
state. The plaintiffs contend that the
contracted for a water right of a definite
amount, together with the ownership
of an undivided interest in the water
supply. The defendants admit that the
contract carried no specific amount of
water but only a fractional share, the
extent of which is dependent on the
ratio between the water actually avail-
able for the system and the aggregate
number of contracts the company is
able to sell.

could be induced to sign a contract on
the mere chance of sharing with an
indefinite number of others, the water
from a system of which they could
have but little information. In con-
nection with this belief he quotes from
the prospectus of the company which
gives evidence that the company con-
sidered it had an abundance of water
and asks why, with that belief, the
company should not, for the purpose
of making its contracts attractive, in-
corporate in the contract an under-
standing to furnish a relatively small
specific amount of water.

Settler's Contract.

At this point, the court takes up
first the settlers contract and later
the contract of the company with the
state, showing where, despite the
sections of the company to the con-
trary, they are consistent with the
attitude of the settlers. The contract
with the settlers, the judge says, is an
agreement to sell a specific water
right of one-hundredth of a second
foot per acre for each acre of land
described and as an incident thereto,
to incorporate in the contract an under-
standing to furnish a relatively small
specific amount of water.

State Contract.

Taking up the state contract, Judge
Dietrich finds that there is an ap-
parent conflict with the settlers' con-
tract in paragraph four, where the
state contract says that the capacity
of the reservoir must be sufficient to
provide 2.34 acre feet for each acre
to be cultivated. This apparent con-
flict he explains away further in the
opinion by expressing the belief that
the state contract assumed that the
irrigation season being from April 1
to November 1, the first and last
months would be light and the total
amount of one-hundredth second feet
would not be required during that pe-
riod, so that 2.34 acre feet would be
the average amount of water used by
each acre during the entire season.

Why Protection.

If the settlers' contracts convey no
specific water rights, the court can see
no reason for the incorporation of
such a protective clause in the state
contract holding that, in that case
there was no possibility of selling
water in excess of the carrying
capacity of the reservoir and canal
system and such provisions need not
have been incorporated in the state
contract.

Supposing that the company has
not agreed to supply one-hundredth
of a second foot per acre to set-
tlers, the court asks why the state
should have been so careful to de-
mand a reservoir and canal capacity
of that amount. The rotation sys-
tem, he contends, would affect the
amount of water carried in the reser-
voir or main canals. The clause in
paragraph 10 of the state contract
which says that the capacity of the
operating company shall consist of
35,000 shares, the court believes must
be taken in connection with other lim-
iting clauses and permits the sale of
the full amount of shares only in case

water rights representing that amount
may be sold.

High Water Duty.

Disposing of the contention of the
company, under the clause in the state
contract which says that water is to
be delivered only in such quantities
and at such times as the conditions
of the crops and the weather dictates,
the judge rules that this clause refers
merely to the method of giving each
water its share of the water, and is
not to the amount of the right. He
cites the fact that hardly ever in this
state is water given such a high duty
as that of 1-50 of a second foot per
second foot and says that it was prob-
able that the officers of the company
and the members of the land board
realized, in making the contract, that
it would be necessary to adopt eco-
nomical methods for distributing and
applying the water and that, as the
reason for the most restrictive clause
in the contract the water referred to.

Specific Right.

Concluding this summary of the two
contracts, Judge Dietrich says: "Per-
haps, in greater detail, than the reason-
able length of judicial opinion, I would
ordinarily warrant, I have now
brought under review all the clauses
of the state contract which can be
construed to give even the most sup-
port to the defendants' contention
and it is submitted that they present
no real conflict with the settlers' con-
tract. Upon the whole, the opinion
upon further examination, that in its
most vital features, the precise lan-
guage of the latter is authorized by
the terms of the state contract. In the
state contract it is directed that the
certificate of shares of stock of the
Salmon River Canal company, Ltd.,
shall be issued to indicate an undivided
interest thereby represented in the
said system, to-wit: "A water
right of 1-100 of a cubic foot per
second for each acre of land irrigated
and a proportionate interest in the
said canal and irrigation works; based
upon the number of shares ultimately
sold." Upon the basis of this defini-
tion, paragraphs 4 and 5, this pro-
vision illuminates their meaning and
brings them clearly into harmony
with the settlers' contracts. It is ac-
cordingly concluded that the sale only
of undivided interests is untenable.

Defendants' Position.

"Now, shifting their position, the
defendants say that, if anything more
is to be done, it is to indicate an undivided
interest in the water. It was not a
specific amount of water, but only a
right to use such quantity
from time to time as might be reason-
ably necessary to indicate an undivided
interest in the water." Their argument, the court
says "is not convincing."

Answering this contention, the
judge says: "It is not to be con-
sidered that the water of a state belong-
ing to the public and that the private right
which the individual acquires by ap-
propriation is to be regarded as an undivided
interest in the water. It is only
only and, further, that at any
given time, the extent of his reason-
able need is the measure of the
maximum amount of water which he
is entitled to divert from the stream
or to receive and use. But this is
not to say that, in the exercise
of his right of appropriation, the
land may not, by appropriation or
contract, provide himself with an
available supply which shall be sub-
ject to his private use when
he has need therefor."

Conserve the Farmer.

"If the settlers' right is barely suf-
ficient for his needs in the ordinary
years and in the absence of mishaps,
manifestly he must suffer loss when
the run-off falls below the average or
when, through accidents to the sys-
tem, there is partial or temporary loss
of the use of water or when, because
of light precipitation or in unfavorable
conditions, the need of water is un-
usually large." So far as I am
aware, it has never been contended
that in making an appropriation of
water from a natural stream, the ap-
propriator is limited in the right that
he can acquire to his minimum needs
and no reason is apparent why one
who contracts to receive water from
another should be limited to such
needs. Conservation of water is a
wise public policy, but it is not the
conservation of the energy and well-
being of him who uses it. Economy
of use is not synonymous with mini-
mum use.

Three Determiners.

In the matter of the amount of
water allowed under the contract,
Judge Dietrich admits there are three
possible alternatives of interpretation.
The amount transferred is 1-100 of a
second foot per acre, according to the
contract. Since this is supplied from
a reservoir instead of a natural stream
the question of quantity in cubic
measure, becomes a factor. Eliminat-
ing two of the possible contentions,
the court finds it possible to reconcile
the state contract with the settlers' con-
tract where the former speaks of

a number of acre feet. Of this, the
court says:

"In a third view, and one in which,
in many respects, is identical with the
one just discussed but which covers
the whole ground, it is contended that
the parties contemplated sufficient to enable
the settler to receive water at the
rate of 1-100 of a second foot per
acre, but that the amount of water
of actual irrigation needs, the amount
of which the parties estimated and
understood to be 3-4 acre feet; and
this view is the one which I am
convinced is correct."

Duty Not Passed Upon.

"It is not at variance with any of
the terms of the contract it gives a
measure of effect to all and is in con-
formity with concurrent and general
irrigation practices in the state with
reference to which it may be assumed
the parties contracted, and further-
more entails no unreasonable results.
The parties doubtless understood that
while it is provided that water would
be demanded at any time between
April and October would be ex-
cepted in the month of September gen-
erally very light, and that it was
therefore reasonable to assume that,
on the average, resources of 2.34
acre feet would be sufficient to sup-
ply the settlers' right of a continu-
ous flow during the irrigation period,
of 1-100 of a second foot per acre."
With this finding, Judge Dietrich
concludes that the settlers' right of a
continuous flow during the irrigation
period, of 1-100 of a second foot per
acre, is not to be considered as an undivided
interest in the water. It is apparent that the company has
outstanding contracts greatly in ex-
cess of its system's capacity.

Relief Measures.

In ordinary cases, the company
would be required to supplement its
water supply. In the case of water
in this case, additional water is not to
be had. The matter then, to cut down
the present project to the only alterna-
tive. This cannot be done without
cutting off all contracts made after the full
capacity of the system had been sold
because it would require the presence
of all the contract holders; further, it
is possible that some of those who
contracted last have been more dil-
igent in improving their lands than
some of the first settlers. Similar ob-
jections pertain to the proposal to
scale down all contracts in the amount
of water and price to be paid. The
settlers' contracts are in the nature of
the company exercise its right of re-
lief whenever possible, and that it
sell no more water rights. It is al-
so believed that the negotiators will
permit of further reduction. As to the
matter of eliminating the deadwood,
there is little doubt that the company
will accept the proposal. It has been
intimated at times when the
subject has come before the state land
board: With this done, the court be-
lieves that the water rights released
from 15,000 acres to 55,000 acres.

TYPHOID TAKES IT TOLL

Many Deaths Already Reported This
Season in Idaho.

Already this summer a large num-
ber of deaths from typhoid fever have
been reported to the state board of
health. The disease is not so com-
monly reported in Idaho as in other
early indicate to what extent the dis-
ease may be expected to rage when
hot weather and fly time are on in
full force. As yet there has been
practically no hot weather and con-
sequently not a large number of
deaths from the disease should be
expected as typhoid fever most when
the weather is hottest and the flies
are thickest. Dr. Ralph Falk, secre-
tary of the board, said:

"This large number of deaths, how-
ever, already reported should be a
special warning to the unvaccinated
and those who are still tolerating flies
and fly-infected food. They should
get vaccinated as soon as possible and
see that their families and their
neighbors are vaccinated. Under such
conditions, it is not necessary to quit
summer, no person nor family can
afford to run the risk with typhoid.
Whenever the anti-typhoid vaccine
has been used, it has been given to every
person in any community, institution
or body of people, typhoid fever has
there been stamped out. For instance,
there has not been a death from ty-
phoid fever in the army since 1912;
the year after anti-typhoid vaccina-
tion was made compulsory and every
soldier was vaccinated.

"What vaccination did for the army
it will do for the family, the neigh-
borhood or the country. Vaccination
and cleaning up, including no flies
and breeding places for flies, no open
back porches or other places of filth—
will drive typhoid out of any com-
munity."

Aggressive use of the classified col-
umns will rent good properties, in or
out of season, and practically out of
losses from vacancies.

Market is Open

Our new sanitary and modern meat market is
open to the public and we solicit the patronage of
the people of Twin Falls county. It will be our
purpose to handle only the best at prices that will
cut down the high cost of living.
