

THE TWIN FALLS TIMES

VOL. XI. NO. 1 ELEVENTH YEAR: TWIN FALLS, TWIN FALLS COUNTY, IDAHO, TUESDAY, OCTOBER 12, 1915. SUBSCRIPTION \$2.00 PER YEAR

GREATEST CROPS IN HISTORY

United States in Shawee to Feed The World.

APPLE CROP OF COUNTRY WILL BE FALL SHORT OF 1914.

This Wheat Crop is a Record Breaker This Year; Corn is Still King of all Crops.

Washington, Oct. 7.—American harvests this year will be the most valuable ever produced. With the wheat crop exceeding a billion bushels, the largest ever turned out in one season by any nation, a corn crop which also may prove to be the largest ever grown, the government's October crop report issued today announced preliminary estimates, which indicate record harvests of oats, barley, sweet potatoes, rice, tobacco and hay.

Other Big Crops.

The potato forecast has declined 33,500,000 bushels, a reduction of 20,000,000 bushels, or 17.10 percent, from the September 1 forecast.

Overrun Forecasts.

The apple crop forecast is 71,532,000 bushels (three bushels), which is 420,000 bushels larger than the September 1 forecast.

CHINESE COMING

Hundreds of Chinese will appear in Twin Falls Wednesday and Thursday on the screen at the Lavering theatre in an unusually exciting two part drama entitled "The Great Escape."

WARNER-JENNISON YARD IS SOLD

Boise-Payette Lumber Company Takes Possession.

WILL BE OPERATED AS PART OF CHAIN IN SOUTHERN IDAHO

Former Owners of Yard Will Probably Purchase Interest in Some Other Line of Industry.

RUN DOWN BY AUTO

H. B. Holmes Run Over by Mrs. W. S. Campbell Monday Evening.

G. B. Holmes was run over and severely injured Monday evening about five o'clock on a highway near the town of Boise.

HAWAIIAN TROUPE COMING

Lavering Theatre Engage Famous Bell Company, Oct. 10-16.

The first appearance in Twin Falls of a genuine Hawaiian company of singers and players of national reputation, will be on Friday, October 15, at the Lavering theatre.

The Hawaiian troupe, which has been playing their native music and songs in the most popular of public places, will appear at the Lavering theatre on Friday and Saturday night, Oct. 15th and 16th, they will appear at the Lavering, presenting a full evening's entertainment, the program to include a reel or two of high class pictures to be exhibited while the audience is being seated.

NEW SITE FOR HOSPITAL

Commissioners Purchase Tea Acres in Holohan Addition.

At a regular meeting of the county commissioners, Monday, the board purchased ten acres of land on the state highway, near the Rock Creek bridge, which will be used for the county hospital.

OAK KEGS AND BARRELS

PARAFFINED & YARNISHED FOR CIDER AND KRAUT

SENATOR BORAH GIVES WARNING

Looks to Future of Workers and Farmers After the War

PROTECTION AGAINST LOW WAGE SCALE IMPERATIVELY NEEDED

Idaho's Man Says Industrial Reconstruction in Europe Will Menace U. S. Without Protective Tariff.

Boston, Mass.—While advocating military preparedness, the upbuilding of the navy and the navy Senator Borah of Idaho, in an opinion address delivered here Sunday afternoon before a large audience declared that "it is even more essential that we prepare for peace than that we prepare for war."

"Europe, when she emerges from this war, will be industrially at least a new Europe. If nothing else happens that will happen, just as the organization of great armies, the discipline, feeding and clothing of them during the civil war taught us the value of unity on a vast scale, taught us the value of organization and co-operation, and just as this spirit of unity and organization, the conception of vastness, was transferred by the military to the business world, so the rational and legitimate result."

Germany even before the war was the most thoroughly organized nation in the world—her history since 1870 has been a marvel—efficient, self-contained, self-helping, and she will be even more thoroughly organized after the war.

THE ORPHEANS PLEASE

First Lecture Attraction Draws Crowded House.

The Orphean Quartet, which opened the Twin Falls lecture course on October 7th, proved a very happy choice for the part of the committee which planned and delighted in packed house at the Lavering.

Mr. V. F. Henry, bass of the company, said the Lavering is one of the best places in the world to be ever experienced. The good qualities of the new sound board system recently installed at this theatre were in evidence, auditors in the rear of the house being able to hear perfectly.

OPENING NEW CAFE

George Richardson to be Ready for Business in a Few Days.

CARRANZA IS RECOGNIZED

Pan-American Assembly Agrees on Mexican Program

UNITED STATES WILL RECEIVE CARRANZA'S REPRESENTATIVE

Washington.—Recognition of the party led by General Carranza as the result of the action of the Twin Falls county commissioners in accepting the site offered for grounds by the Piler business men. The Piler citizens have entered hastily into the enterprise and in buying valuable land on the edge of Piler show their intentions to make the fair a success.

The action of the conference was regarded generally as the most important diplomatic step in the Mexican situation since the United States decided to withhold recognition from the Huerta government more than two years ago.

GEORGIA JUBILEE SERENADERS

A Colored Troupe Giving Excellent Satisfaction at the Orpheum.

For the first three nights of this week the management of the Orpheum has been fortunate enough to secure the Georgia Jubilee Serenaders.

The management of the Orpheum has been fortunate enough to secure the Georgia Jubilee Serenaders. This is an excellent troupe of colored vaudeville artists and dancers of merit.

For the last three nights of the week a double bill in vaudeville will be given. The headliner is the famous Hawaiian Dancer, Jack and Kitty Lee, presenting excellent music, songs and dances.

LOOKING FOR MORE WATER

Engineers for Bendishers Seeking Water West of Salmon River.

Engineers in the employ of the bondholders of the Salmon river project started out yesterday to make a survey of the territory west of the Salmon river and to run a survey from the Bruneau river across to the Salmon.

COMMISSIONERS SUPPORT FAIR

Promise Financial Aid to Filer

FORTY ACRES NEAR FILER OFFERED TO COUNTY

County Will Erect Buildings and Construct Truck, If State Lays Will Permit.

The Twin Falls county fair can be said to be officially launched as the result of the action of the Twin Falls county commissioners in accepting the site offered for grounds by the Piler business men.

AUTO TRUCK LINE TO BUHL

Will be Served Friday Evening in Basement of Christian Church.

The Home Idler Bible class of the First Christian church will give a Harvest Home dinner in the basement of the church, Friday evening of this week.

COUNTY AGENT CHOSEN

Newton W. Birch, of California, Comes Highly Recommended as an Expert.

Newton W. Birch, of California, has been tendered and accepted the position of county agent for Twin Falls county. The position was tendered him by the county commissioners on the advice of H. W. Hochbaum, of the University of Idaho, state leader of county agents.

COMEDY NIGHT AT ISSS

Thursday Evening the Night to Laugh all Through the Show.

If you want to enjoy a good, hearty laugh, do not fail to beat the late after Thursday evening of this week. The management of that popular play house has made arrangements for a night of comedy, and nothing but comedy for that night. The pictures will be of the best comedies obtainable and will be new to these parts. Come next week there will be a change of pictures every night.

FARMER KILLED IN RUNAWAY

E. B. Kyle Meets Instant Death By Being Thrown From Wagon

HAS RESIDED ON TWIN FALLS TRACT FOR SEVERAL YEARS

Accident Happens on Farm Southwest of City. Funeral Held Saturday Afternoon.

E. B. Kyle, a farmer living four miles west and one mile south of this city, was instantly killed last Thursday evening by being thrown from a wagon. The deceased was an unloading some hay from his wagon when the team became frightened and ran away, throwing Mr. Kyle out against a stump fence, fracturing his skull and bruising him in a frightful manner.

MEETING OF CHIROPRACTORS

Dr. Atherton Elected Vice Pres. at Convention Held in Boise Last Week.

The Idaho State Chiropractic Convention held at Boise, Oct. 4th and 5th, was a great success. The largest ever held by the profession.

The clinic was a very important part of the meeting, as a number of unusual cases were presented. A hard fight was put up for Twin Falls to be the place for the next regular meeting in 1916, but Pocatello won out by a small majority.

The election of officers was as follows: Dr. Guy of Pocatello, re-elected president; Dr. Atherton, of Twin Falls, re-elected vice president; Dr. Burkhart, of Caldwell, treasurer. Dr. Wyatt of Buhl, chairman of the board, naming Dr. Perry of Starbuck, of Nampa, to serve with him. All officers were elected for one year.

Dr. Atherton states that all had a regular meeting in 1916, but Pocatello was enthusiastic over the results of this convention of Druggists, Physicians, and especially regarding the requiring of Dr. Perry of Starbuck, of Nampa, for all practitioners of drugless methods.

ROADS NEED CARE

Unless the county road overseers make a special effort to immediately drag the highways after the next rain much of the costly grading and filling will be practically wasted.

THE RIGHT SPIRIT

The business men of this city took a step last week which will do much toward cultivating a friendly spirit on the part of the neighboring towns of this county if kept up consistently.

PREDICT HIGHER INTEREST RATES

American financiers who have made a study of the money markets of the world are predicting that this nation is not going to escape financial distress along with the wretched nations of Europe.

IS AMERICAN STAMINA FAILING?

As a nation we are falling below the highest standard of physical fitness. The wear and tear of modern life is telling on us.

OUR PUBLIC FORUM

Ralph Peters On Railway Mail Pay

A controversy has been raging in the columns of the press between the railroads and the Federal Post Office Department over the question of proper compensation for handling the United States mails.

"The first is that the Post Office Department weighs the mails, and re-adjusts the pay of the railroads, only once in four years.

"A second point is this: In addition to carrying the mails, the railroads are required to operate many traveling post offices for sorting and distributing the mails while in transit.

"One last point: In thousands of instances (though not in all) the Post Office Department requires the railroads to carry the mail back and forth between railroad stations and post offices, but pays them nothing for this extra service beyond the rates covering the rail transportation.

"Now for the remedies the railroads ask: They do not ask to have the mails weighed daily, or to have each shipment weighed and paid for separately.

birth to the grave, has steadily declined.

"These organs are breaking down and giving way too soon. The increase in mortality in three decades from these causes has been about 100 per cent, and it is confined to no particular class or element of the population.

"Therefore, while we are teaching our men the manual of arms and how to drill, is it not important that they also be taught how to live the hygienic life and to avoid the defensible and preventable diseases which are now weakening and destroying so many precious lives?

"The American people are especially in need of being taught how to eat correctly and to get the habit of taking natural exercise.

"Athletics are popular. The people, and especially the young, love to applaud those who engage in athletic sports. But the majority of school children and of adults in sedentary occupations who actually take natural exercise or who practice settling up or physique-building exercises is very small in our vast population.

"In a sense we are a strenuous people, and yet the most of us are constantly in search of physical ease. We have almost forgotten how to walk. The extraordinary increase in labor-saving and time-saving devices and the increase in wealth have placed at the disposal of the American people in the physically inactive or sedentary class. This number is constantly increasing not only among the well-to-do, but in our factories and industrial plants, where muscular effort is less and less required.

"We must adjust our habits of life to the new conditions. In time we shall doubtless awaken to this national need and take steps to check these degenerative tendencies, but just at present the habit is to ignore them. This is an excellent time to 'wake up.'

"If the American people are to prepare properly for national defense, they must give consideration to the great national problem of individual hygiene, which means the rational care of the body and its organs.

"Our people should know how to guard and protect their vitality as well as their liberty.

"The march of progress has become a stampede. A physically weak nation has a good chance to be trampled under foot. The fact that the productive working period of life is apparently shortening is really the most important phase of the decline in the defensive power of the nation.

TALKS ON THRIFT

No. 32—THE FARMER'S OPPORTUNITY

"I believe that the greatest constructive service the bankers of any city, or any state, or of the nation, can perform at this time, is to endeavor by every means at their command, to impress upon the minds of the people the necessity for each individual man, woman and child to strictly practice the virtue of thrift."

This should be a golden year for American agriculture.

mous crops—perhaps the greatest ever produced in this country, government forecasts indicating \$16,000,000,000 crop yield for 1915.

Big crops and good prices will quickly make better business for the railroads, for manufacturers, and for the wholesale and retail business generally.

Nature has been kind to us. Should we not be equally kind to ourselves in the matter of waste—prevention? American farmers will burn thousands of tons of straw that, in Europe war-made, thrift would cause to be saved for various uses.

According to one student of the value of by-products, allowing corn stalks to evaporate and decay causes an annual waste of \$200,000,000. But progressive farmers are reducing this waste by using silos to preserve crop-corn stalks and other fodder crops.

The humble hen is a first aid to the thrift of the farmer's wife, but the department of agriculture estimates an annual loss of \$40,000,000 from unnecessarily spoiled eggs.

The annual shipment of potatoes from Maine is 35,000 cars, and it is said that the average waste is 20 bushels per car, or a total of 700,000 bushels.

The yearly waste of vegetables of all kinds is duplicated by that of fruit. The government specialists estimate that home canning on the farm of what otherwise would be wasted, ought to save at least \$100,000,000 annually.

But these are large and general statements. To get right down to "brass tacks," as they say, how can the farmer actually save money?

He must not be tight-fisted or his farm will not be kept up; he must not be a spendthrift or he will get into difficulties that way. In approaching a bank for a loan the man without a bank account is handicapped.

The farmer who says "I wish to buy twenty steers to fatten for market; will you loan me some money?" will stand a good chance of getting the loan. If he says, "Our best horse died and we are hard up; the rent is coming due and the insurance expires tomorrow; won't you please loan me \$200?" the banker feels very sorry for him but dislikes to risk two hundred perfectly good dollars on a farmer with such an unpromising outlook.

Close co-operation between farmer and banker ought to enable most tenants to become owners if they really want to own their farms, as they should.

Many farmers as well as their wives try to do so much by doing all the work themselves, and after a few years spend more money than they saved on both hired help and doctors' bills. Sometimes they get beyond the doctor's help in carrying out this plan for saving money. Some people save by not insuring their property and lose everything when their house or barn burns.

Common sense saving is the thing and it is good for everybody, city-dweller and farmer alike.

Waists for Fall and Winter

We are showing a very pretty line of fancy silk waists in all the new materials, shades and colorings. All sizes are shown. Ask to see the pretty new styles.

Prices range from \$2.75 to \$7.00

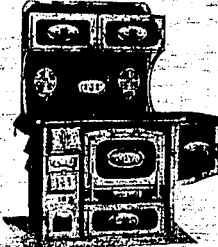

How a Bank Grows

A bank's success does not depend wholly upon the NUMBER of depositors upon its books. Its real advancement lies in the growth and material success of the depositors themselves. It is "the dollars on the books" that count—not the number of depositors.

And so we keenly realize that the success of those depositors we have NOW governs our progress. There is no reasonable length to which we will not go in co-operating with our clients for their betterment.

FIRST NATIONAL BANK OF TWIN FALLS

ELECTRIC LOCOMOTIVES

Chicago, Milwaukee R. R. to Use Electricity in Mountains.

The biggest electric locomotives in the world have been delivered this week in batches to the Chicago, Milwaukee and St. Paul railway system. They form the advance guard of fifty huge electric engines to be used by the road in operating 440 miles of its transcontinental line between Harlowton, Mont., 4162 feet above sea level, and Avery, Idaho, elevation 2484 feet. They will also climb the Rocky mountain summit, 6300 feet and the next mountain summit, 5700 feet.

When these locomotives are in operation, as they will do some time in November, hauling heavy freight and passenger train through the precipitous ranges of Montana and Idaho, the most ambitious electrification project ever conceived will have safely passed its most difficult stages.

These locomotives are designed to do the work being done at present and rather too expensively by huge Mallet steam engines, two of which are used to pull heavy freight trains up the grades of the Belt and Bitter Root ranges. They are expected to effect an enormous economy in operation.

In fact the purpose of the company in electrification has not been to increase the speed of its trains but to increase efficiency and promote economy in operation.

The new locomotives are of great interest because they are the first to be constructed for railroad service with direct current motors, designed to carry as high a potential as 3000 volts. They weigh 200 tons each and have a continuous capacity greater than that of any steam or electric locomotive hitherto ever built.

One of these big machines can "snake" a train weighing 2500 tons up a one per cent grade with its 3400 horsepower and make light work of the job. Two of them can do the same on a two per cent grade.

The motors are 112 feet 8 inches long. There is nothing about them to suggest the steam locomotive which they will ultimately displace in both freight and passenger service if the faith of the designers is sustained. Looking at first glance more like a big mail car than anything else, the St. Paul's new type of engine operates as mysteriously to the average observer as did the first automobiles in the eyes of those used to horse drawn vehicles.

The design is such as to save track wear and tear by minimizing the vertical and horizontal blows drive wheels through use of a separate motor twin-gear to each of eight pair of drivers. The drivers are spaced at ten-foot intervals. The drive wheels are 52 inches in diameter.

They are equalized in pair on each side so that each of the four driving wheel trucks on each side is independent. The axle extends for nearly the full length of the locomotive. Two men constitute a crew, though only one is required to operate the mechanism. The other is here for emergency and to learn his trade.

Here are some of the most striking advantages of the electric locomotives:

It operates with the highest efficiency in the coldest weather, when steam locomotives often freeze up.

It returns by "regeneration" a large part of the power used in running up hill during the corresponding run down hill.

It requires inspection only in every 2000 miles of travel, where the steam locomotive must be overhauled at the end of each division.

It uses no coal, requires no water and has no ashes to dump.

It carries no tender and has no boiler and will run indefinitely at a uniform rate of speed.

It requires roundhouse tinkering to the minimum and handles uniform tonnage irrespective of weather.

It lays away with its trains, and clears the tracks for traffic that pays dividends.

The best steam locomotives run to be overhauled after running 100 or 125 miles, whereas the immunity of the electric engine from this necessity—a heavy advantage in operating efficiency.

A steam locomotive waiting at a division point consumes 30 per cent of the fuel it uses in actual service, whereas the electric locomotive while consumes no power. The freeing of the track from fuel trains is an element of the highest importance, especially in mountainous country where double tracking is often impossible.

The direct current electric locomotive, in fact, bids fair to revolutionize railway transportation methods because while the "juice" to be used in the opening stretch of electrification on the St. Paul road is to be furnished by Montana water power companies, the road owns enormous coal resources on its own lands and it appears even now a demonstrable fact that coal can be converted into electrical power and fed to locomotives of the new type more economically than it can be used direct in the production of steam power.

The plan of operation includes the general use of a locomotive at each end of a train on up grades approximately 35 miles long over the electrified section of the road. On down grades only the head engine will do the regenerative braking—that is transferring power on its reverse and returning it to the wires to be used in pulling the following train.

These locomotives are geared for forward motion to haul trains of 800 tons at 60 miles an hour. The stretch of road to be used by the new engines, carrying three mountain ranges where there are long distances of from one and one-half to two per cent, will be doubled in capacity by their use, according to the engineers.

The railway company expects to achieve the same result as though it had double-tracked its line over the mountain divisions. It is believed that

PAN-AMERICAN INQUISSION

Will United States Defend the Monroe Doctrine if Attacked.

Washington—Eusebio A. Morales, the minister from Panama, speaking here at a conference on national defense being conducted under the auspices of the Navy League, the National Rifle association and the Council of National Defense, declared all the American republics were watching the preparedness of the United States, because he said, upon it depends the defense of the Monroe doctrine. The declaration of the United States that the American continent cannot be the object of conquest or foreign aggression, he said, now faces threatening realities.

"Suppose," said Dr. Morales, "that England and France are vanquished during this war. What will be the fate of their colonies in America? Will the American continent look with indifference upon the occupation by Germany of British and French colonies of British Honduras and of the islands which enclose the Caribbean sea?"

"The answer appears to be obvious," he declared.

Dr. Morales said that the Monroe Doctrine faced "threatening realities" and that because of it the national defense of the United States was intimately bound up with the whole of the American continents.

"In the face of the present situation," he declared, "it would be wise not to persist in the illusion of security in which we have lived but to create for the defense of the continent and the harmonious development of the American nations, an organization which in itself would command respect."

"In this organization there falls upon the United States the preponderant role not only because it is the most powerful country of the continent, but because it had voluntarily consulted itself the champion of other American nations."

A country at war with the United States, Dr. Morales also pointed out, would desire above all to take possession of the Panama canal and operations which might conduce to that end would have to take place on Panamanian territory. He referred to Panama as "the most strategic piece of land in the world," and concluded by saying that the topic of national defense for the United States was not at all foreign to the interests of Panama.

SENATOR BORAH

GIVES WARNING

(Continued from Page 1.)

learned how to mobilize and discipline the capacity and energy of this people. The period following the Austrian war—the Franco-Prussian War—our own civil war—advised us how quickly a people transfer the energy and capacity for organization from the battlefield.

Fight for Markets.

At the present time the war projects us from competition with the old countries. The farmer has not only our home market but in part the foreign market after the war he will have to fight for his home market. The American manufacturer is in no less advantageous position now. Europe no longer competes with us as she did before and as she will under present laws after the war. We are feeding, clothing, arming and financing vast armies without much competition. It is not altogether an enviable job, not one of which to boast, but I am but a simple citizen. When Europe, combined Europe, shall send her men and her women back to the farm and factory, to the workshop and the mine, to the field and the factory for industrial war, then the question will be up for us to answer, are we prepared to meet them on the peaceful fields of industry?

There will be no neutrality there. You had just as well talk of defending our great sea coast cities against the trained armies and navies of combined Europe with our present army and navy as to try to protect against such an assault—and into that fight will enter along with Europe, the South American countries and Canada and Japan—the American laborer, the American farmer and the American manufacturer with our present laws and fiscal policy, which is a formidable submarine which is supported to be concealed under the undefined, unlimited and unknown powers of the federal tariff commission.

Readjust the Tariff. We ought to set about to readjust our tariff laws and without delay. We ought to prepare to mobilize our resources and our people industrially. We ought to have a tariff law which would at least collect revenue from those gigantic industrial combinations such as the sugar trust, which enjoys

our market free; a law and a policy which would evoke confidence, diversity our industries and develop the varied talents of our people. If we expect war shall we not be prepared to feed and clothe and equip our population from within, Germany could not have kept her soldiers in the field six months shut off as she was from the outside world, had she not long ago adopted a policy which gave her home market to her producers and developed and diversified the genius of her people in every line of labor, production and manufacture, until she stood industrially equipped for all emergencies. Do not overlook, in studying the preparedness of Germany, the words of Bismarck and the fiscal policy which followed in 1878. Germany's industrial preparedness was more remarkable than her military preparedness. And even if we do not expect war but only peace, shall we fail to protect our workmen and our people as a whole against the conditions which shall surely confront them when, the long, hard pull, which is to follow after the war is over, has begun.

The Plain American. And finally, my friends, let us call up for service some of the old time pride in our country, some of the old time American spirit to which our ex-lamented president made fine reference in his speech to the old soldier, a few days ago. We hear much these days about the Anglo-American, the German-American, and so on, and so forth, sometimes we hear that we have become in these eventful days of just the plain simple untitled American. Does any one feel any interest in him? Is there not some concern, some discussion, some modest and well guarded commendation, some direct rebuke for the many who know no other country, no fatherland, but only and alone a simple, unadorned devotion to our own flag and for which they feel under no constraint to apologize.

It seems to me we ought to arouse some of the old time American spirit, not with bluster or offense, but with courage to that we may not only be a great and powerful people industrially, but also that we may come to have in truth and in fact a national purpose, a national ideal, a national ideal. We do not want a nation composed of groups communally awarded by radical and foreign friends. We want one people behind and loyal to one flag. Let us not care so much whence our immigrants come as the spirit and pur-

pose with which they come. This war must sometime end. Then the era of regeneration and rehabilitation will come. The long, patient climb will be before us and we as a people cannot become the victims of this war. We will feel the strain. In this work of rehabilitation in which we are to have so large a part, how important it is, how indispensable it is, we stand united, a determined and hopeful people. If this republic shall be able to hold out to our people, of all classes, bound together in mutual confidence, our institutions riveted together and braced by a common faith, who shall be able to continue its course in affluence for good, its inescapable moral force, not alone here upon the western continent, but among all nations and peoples. If Europe shall look up such a scene through her blood shot eyes, if the countless millions bonding beneath the burdens of war and shuddering at the skeleton clutch of famine shall behold here millions content and at peace, in their homes at night and pursuing their peaceful occupations by day, who shall estimate the beneficent, the all but divine influence the world order of such an object lesson.

CARRANZA IS RECOGNIZED

(Continued from Page 1.)

from the Carranza government. These guarantees are as follows:

1. Foreigners will be protected in their lives and property. 2. The Carranza government assumes full responsibility for claims growing out of the revolution and will indemnify them probably by means of international commissions. 3. No one will suffer in his life and property on account of religious beliefs; all priests and nuns who have not taken part in Mexican politics will be permitted to return and with the exception, provided they do not participate in politics and obey the Mexican laws governing the church and state. 4. A decree of amnesty is in preparation which will enable all elements, irrespective of political affiliations heretofore, to return to Mexico, with the exception of those guilty of complicity in the plot to kill Madero and Suarez, or who are charged with civil crimes.

Check on Politicians. A few political leaders who hitherto have opposed the Carranza government will not be permitted to return until the government is firmly established. If they will pledge allegiance to it. The form in which recognition is to be extended has not been decided. Secretaries of embassies and consuls might be sent to the Carranza capital or an ambassador named by Carranza received here, or that there might be an exchange of notes.

Meaning of Recognition. The recognition of a "de facto" government does not mean that in any sense, officials explained. The term applies to an authority that acts out of revolution. When a constitutional government is again erected, other credentials will be given to the American diplomatic representatives. In the meantime the full moral support of the United States is to be given the de facto government to hasten restoration of constitutional authority.

Carranza the Stronger. Secretary Lansing reported to the assembled ambassadors of Argentina, Brazil, and Chile, and the ministers of Bolivia, Uruguay and Guatemala, Santiago, that he has conferred with the representatives of the Villa and Carranza factions, and had come to the conclusion that the Carranza party possesses the military supremacy or material capacity requisite for a government. On this point all were agreed.

Memoranda filed by Elizco Arredondo, Carranza's representative at Washington, set forth the political program of his government, which includes the coupling of municipal elections it once, and then of a constituent assembly, to which General Carranza, as first chief, shall give an accounting of his handling of affairs and of the exercise of his executive power. This assembly will create an executive department by holding a general election.

Some of the diplomats at first were inclined to suggest a policy of further waiting; until General Carranza carried some of his promises into effect, but the consensus of opinion finally was that with the moral support that recognition would give Carranza, would be better able to carry out his pledges since he already dominates the country from a military point of view.

Secretary Lansing later explained that each government would act separately, the attitude of the United States not being condition on that of other governments, or vice versa.

Solution of Problem. The recognition of Carranza is confidently looked upon by Secretary Lansing as a long step toward the solution of the Mexican problem. With the recognition the process of reconstructing Mexico is expected to begin. Many officials expressed their pleasure that it was possible for the United States to recognize General Carranza, because as the first to do so, against Huerta, stood for liberal principles of the revolution with which the United States has been in sympathy.

General Villa's followers had hoped that the conference would continue its efforts to persuade Carranza to form a coalition government. What the Villa faction will do is not clearly indicated but that they will continue the struggle in the field is considered certain, since their leaders are at present in Washington, and official reports show that many of their troops have gone over to the Carranza side. Secretary Lansing will report to President Wilson Sunday what occurred at Saturday's conference.

A good position for you. Learn shorthand and typewriting. Business College—Adv. Oct. 12.

COMMISSIONERS SUPPORT FAIR

(Continued from Page 1.)

Board proceeded to the consideration of the proposition of the Piler citizens as submitted by their committee which is as follows: The people of Piler and vicinity promise to purchase as much land as known as the Schlidman and Coffin forty, described as the NW 1/4 of the SE 1/4 of section 8, township 16 north, range 16 east of the Boise meridian. Said forty to be deeded to the county with the provision that it remains the property of Twin Falls county so long as it is used for county fair purposes. If at any time the county refuses to use it for the purpose of a county fair, same shall revert to the donors of land. It is further understood that the Piler committee in consideration of this tender of land, that the county board shall improve the land by building a stable building for an armory, to sustain it for the purposes intended, and also build a half mile track and also to build fences, furnish water and other facilities that will fully equip the ground for the purposes intended.

J. W. TANNER, GEO. F. LEE, ALBERT E. ANDERSON, G. C. DAVIS.

After careful consideration the board being understood as endorsing such action for the public good, motion was made by T. E. Moore, seconded by D. P. Albee that the proposition be granted when the county attorney and attorney general, shall have filed written opinions with the board to the ability of the board to carry out the provisions of the request.

Motion carried unanimously. After further consideration of claims against the current expense fund, recess was taken until tomorrow morning at 9:30 a. m.

D. E. CARLSON, Chairman. Attest: E. J. FINCH, Clerk.

MILITIA COMPANY ORGANIZED

Buhl Company Starts Out With Forty New Members.

Company K of the Idaho state militia, was organized in Buhl Friday evening with forty members mustered in. The new company will use the Buhl opera house for an armory for the present. Adjutant general P. H. Crow and several officers from Boise, were present and mustered the company into the service of the state. G. V. Biggs, postmaster of the west end town was elected captain of the company. Forty-one members of company D of this city, headed by Capt. P. W. Roberts went down to Buhl by auto Friday evening and gave an exhibition of their marksmanship. The boys of the local company are more than pleased with the treatment accorded them in Buhl.

The new Buhl company has the backing of the business men of that city and there is no doubt soon will be one of the crack companies of the state.

FOREIGN DEMAND FOR COAL

War Insures Increased Mine and Shipping Activities.

Washington, D. C. Sept. 30th.—The probable foreign demand for coal in the United States, as viewed by competent observers here and as indicated by foreign dispatches, means that the mine owners and coal carrying railroads in this country can look forward to further increased activity in the next few months.

In fact, several railroads are already showing increased coal freight. In the last few days reports have been published that the Baltimore and Ohio railroad, and the Chesapeake and Ohio railway, for example, are rushing large stocks of coal from the mines. Idle coal cars are reported as greatly diminished on several important coal carrying roads.

According to Walter S. Hatt, special European correspondent of the Railway Age Gazette, France will be forced to get the coal formerly mined in Belgium from the United States. This is estimated at 20,000,000 tons annually. All of the Belgium mines are now

operated under German control and the coal is going to Germany. The British shortage in coal means not only that shipments to British ports will be increased but that Denmark will come into the American coal market. The Danish navy and other coal consumers formerly depended on the British supply.

Spain is also looking to American mines for the coal supply normally secured from Great Britain, according to a consular report received by the United States department of commerce.

The embargo on coal by Great Britain will not, it is believed, lessen American production. The Allies need so much more of the product than Europe and neutral countries in Europe are deprived of their usual supply to such an extent that coal exports from the United States will greatly increase rather than decrease.

This is interpreted as another favorable factor for the principal railroad in this country and renders more certain the outlook for greatly increased net earnings for the current year. Practically all of the exported coal means that much additional freight for the coal carrying roads which are already beginning to show greater earnings.

C. J. Demrose, of Rock Creek, transacted business in Twin Falls Saturday. C. C. Wilburn transacted business in the city Saturday from his home at Oakley. Dr. and Mrs. J. M. Rogers, of Buhl, spent Sunday in the city visiting with friends. Mrs. A. E. Mann was a shopping visitor in the city from the farm near Hanson. C. C. Bedford returned Monday from an extended trip in the northern part of the state. Frank Kennedy, of Hanson, was looking after business matters in Twin Falls Saturday. H. O. Brown returned Friday from Salt Lake City, Utah, where he had been for a week looking after business. Niels Christenson, who is engaged in the cattle business in Lincoln county, transacted business in Twin Falls Saturday. Mrs. Thomas O'Rourke returned Monday from Boise, where she had been visiting with relatives for the past ten days. Drs. Atherton returned Friday from Boise, where they had been attending the meeting of chiropractors of the state of Idaho. A. G. Fisher, of the Bedford-Fisher Drug company, and Dr. Frederick E. Shook, are on a hunting trip in the Getchell mountains, north of Ketchikan. Adjutant General F. H. Crow was in the city for a short time Friday, calling on friends. He went to Buhl Friday evening, where he organized a militia company. The following marriage licenses have been issued the past few days by the county clerk, Edward Carlson and Assistant Lindstrom of Buhl: Emil Schelling and Olga Lehman, both of Dietrich, Lincoln county; Claude Smithen, Twin Falls, Edna Breese, Reno, Nevada.

CHILDREN'S EYES

Require careful watching, especially in the case of studious scholars, at the first sign of weakness they should have their eyes examined and if necessary, glasses should be worn. But any kind of glasses will not do. Bring the child to us, we will guarantee to fit the right kind of glasses so as to relieve any headache that may result from eye strain.

Parrott Optical Co. Where glasses are fitted the right way.

J. L. Dunn transacted business in Twin Falls, Tuesday from his home in Hollister. Mr. and Mrs. F. C. Ramsey were in the county seat Saturday from their Cottonwood ranch. Lawrence Hanson, transacted business in the county seat Saturday from his home in Hanson. J. S. Boebe transacted business in Twin Falls for a day the middle of the week from Filer. Grant Miller spent Monday in Burley, where he has been called to look after business affairs. S. B. Wagener, of Buhl, was a business visitor in Twin Falls for a day the last of the week. C. A. Ross, of Three Creek spent a couple of days the last of the week in Twin Falls. Attorney and Mrs. J. H. Wise are in Boise, where Mr. Wise has been called on legal business. George Drake, who is engaged in farming north of Filer, was a business visitor in town Saturday. W. F. Forbes, one of the directors of the Twin Falls Canal company, is in the city from the west end of the tract. A. S. Brown left Monday morning for Hutchinson, Kansas, where he will look after the selling of Idaho spuds this winter. Attorney A. M. Brown returned the middle of the week from Boise, where he had been for several days looking after legal business. Attorney and Mrs. Asher B. Wilson returned Friday from Salt Lake City, Utah, where Mr. Wilson had been called on legal business. C. V. Biggs, postmaster of Buhl, spent Tuesday in the county seat. Mr. Biggs is the captain of the new militia company in the west end city. Editor J. W. Tanner, of the Filer Journal, was in the city Monday as one of the committee appearing before the county commissioners in regard to the Filer fair. Mrs. I. B. Perrine and daughter, Miss Stella, returned Monday from California, where they had been visiting the Panama-Pacific exposition and the fair at San Diego. Fred H. Gibson, who has been farming a ten acre tract near the city will move to the Casford country in the near future where he will engage in farming on an extensive scale. Rev. S. S. Nehor, of the Church of Brethren, left the last of the week for Portland, Oregon, where he was called to confer with missionaries of the church from the states of Oregon, Washington and Idaho. Rev. S. W. Creesey is in the city from Fort Hall, Idaho. Rev. Mr. Creesey is holding a mission in the Episcopal church, which will continue every evening. The public is cordially invited to the services. Mr. and Mrs. L. Schmitz have been in the city for some time visiting at the home of Mr. and Mrs. R. J. Fray. On Thursday evening Mr. Schmitz left for his home in Illinois, while Mrs. Schmitz will remain for several weeks longer. Del Hardy, foreman of the livestock department of the Utah Construction Co., returned in the city Saturday. Mr. Hardy says that the cattle output has been moved from the hills south of Rogerson to Rock Creek for the winter. Mr. and Mrs. C. M. Hill and two daughters arrived in the city Saturday from Boise and will be here for several days. They made the trip by automobile. Misses Vissler and Baird accompanied them on the trip and will visit friends in this city. DR. F. C. BEEBE, Dentist, Phone 42, Central Building.

Deputy Game Warden Joe Fitzsimmons was a visitor in the city Tuesday. E. J. Hornbrook was a business visitor in Twin Falls Tuesday from his farm near Berger. F. C. Graves, the real estate man of Filer, transacted business in the city Monday afternoon. Mr. and Mrs. Dan Turpinseed were visitors in the city Saturday from their farm on Sucker Flat. Joe H. Day, of the Eden neighborhood, transacted business in Twin Falls Friday and Saturday. A. R. Ostrander and family spent the latter part of last week on Wood river, hunting and fishing. C. M. Booth returned Friday from Salt Lake City, where he had been for a few days on business. J. B. Steele, who is engaged in the cattle business in the Three Creek country is in the county seat. George F. Allen was in the city Monday appearing before the commissioners on the Filer fair question. A. R. Hicks spent Monday in Rupert, where he had been called to look after the case in the district court. J. Warren White, editor of the Buhl Pioneer, spent a few hours in the city Tuesday looking after business affairs. H. L. Luce, who is engaged in mining in the Contact copper camp, is in the city looking after business affairs. C. H. Payson, of the Rogerson neighborhood spent Tuesday in the county seat looking after business matters. Charles Muil returned Tuesday from points in Cassia county, where he had been looking after contracts on the state highway. Dr. W. A. Sullivan returned from Boise, where he had been several days attending the meeting of the state sanitary board. Judge W. A. Babcock returned to Rupert Monday morning where he is holding court, after spending Sunday at home with his family.

C. R. Walters has been in the city for the past few days looking after business matters. Mr. Walters is a brother of Judge E. A. Walters. C. B. Channel, of the Nibley-Channel Lumber company, spent Tuesday in American Falls, where the company is installing a new lumber yard. County Attorney J. E. Davies returned to Twin Falls Saturday after spending several days in Boise, where he had been called on legal business. J. S. Reed was brought to Twin Falls Sunday from Contact, suffering with a broken leg. He was taken to the local hospital and the fracture reduced. He is reported to be getting along nicely. Mr. and Mrs. Wesley Burkholder, after visiting here for some time, left Monday by automobile for their home at Twin Falls. They were accompanied by Mr. Burkholder's sister and her children, who were also visiting here. Nampa Leader. Claude Smithen and Miss Edna Breese were married at the court house early Sunday morning. The ceremony was performed by Rev. Walter E. Harman, pastor of the First Christian church, who was called from his home in Utah after midnight. E. P. Finney, deputy county clerk was called from his home and issued the license. The newly weds will make their home in this city.

IDAHO FALLS CLERK SHORT Nine Thousand Filled as Sam. Said the City May Secure Recovery. It appears that the defection of Idaho Falls' city clerk William F. Dawe, will reach a considerably larger amount than at first figured and report from that city last night was to the effect that Dawe had confessed to Mayor Edgerton that the shortage was practically \$9,000. A chartered accountant had reported to the mayor that the shortage covering a period of four years, was \$2,138.87. Dawe was city clerk under the regime of Mayor H. W. Clark, and it appears that a sum of the books had not been made since the defection of Dawe's predecessor, Harry Hines. Following the audit of the city's books, the mayor confronted Dawe with the apparent shortage, and Dawe claimed that the amount had gone into his personal account but would

be straightened out by Monday of this week, but it has not been up to this time. His bond is \$4,000 and it is claimed that the bonding company and Dawe will succeed in straightening out the matter. In the meantime Dawe has resigned and the authorities selected George B. Riches as his successor and action is pending in the courts. The business of Idaho Falls, through its lighting, water and other resources, approximately between \$5,000 and \$6,000 a month, and with all municipally owned concerns there has always been a laxity of business, and a good many years has elapsed since a shortage was not claimed at the end of every administration. Mayor George Edgerton, however, is going into the city's affairs and states that the present probe will be continued, as it is thought other shortages exist, either in the city clerk's department or other departments of the city.—Pocatello Tribune.

BUHL (From The Pioneer.) J. H. Itley was in Buhl from Curry on Tuesday. E. D.ritchard was up from Castelford Sunday. A. W. Husted was down from Twin Falls Monday. J. B. Whitson, of Mountain Home, was in Buhl Saturday. James D. Pence passed through Buhl from Rosworth Tuesday. M. Johnson left Thursday for Kansas City, Mo., to visit friends. C. S. McMartin was in Buhl from Twin Falls on business Monday. J. B. Norris, of Idaho, visited at the home of H. W. Alfred this week. J. H. Rogers left Tuesday evening for Salt Lake City on a business trip. Mrs. M. E. Bennett, of Buhl, visited her parents near Buhl this week. W. L. Nowbry, of Hazelton, and C. T. Newby, of Kimberly, were in Buhl Saturday. C. D. Kingsmith, a former resident of the tract, was in Buhl Tuesday. F. W. Fisher, W. H. Harvey, E. R. Hobson and Hays and Alfred are shipping a carload of apples to New York City. Members of the Fruit Growers' association. The river banks and lake shores are lined with duck hunters this week, the

open season having begun last Friday. Joe Nakamura, of the Royal Cafe, hurt his shoulder badly Thursday night. He had secured an open trap door at an early hour before it was light. Mrs. L. D. Chamberlain has gone to San Francisco to visit the fair there. She arrived the winter in the Golden state. F. W. Fisher is another Buhl farmer who has had luck with alkali this year, as all of them had who planted it. He had fourteen acres which yielded twelve bushels an acre, which is doing mighty well considering current prices. An auto party composed of J. J. Tugstad and family, Thomas Fritcher and family, R. W. Alfred and family, R. M. Hays and family, Ross Elton and Willoughby Hubbell spent Sunday at the Salmon dam and Cedar-creek. They rode in the Elison, Hubbell and Buxer cars. Mr. and Mrs. C. J. Brower, Mr. and Mrs. E. B. Taylor, Mr. and Mrs. C. S. Peck, Dr. and Mrs. F. E. Freeman, Mr. and Mrs. W. Paris, Mr. and Mrs. Thomas Clinton, Mr. and Mrs. Oscar Baker and Mrs. B. R. Tiffany were among those who went to the Heloise fair this week. Mrs. Heloise was taken suddenly sick Friday night at his residence in this city and was unable to get out again until Wednesday. His physicians announced the DeLone and Faltig's poisoning. Mr. Cornell says that he has no idea of the channel through which he contracted the poisoning. O. L. Dunscomb, of Buhl, came fair last week and says that there was an excellent program. Probably some-thing when he reads this, will make reference to a visit to the north side city, but we refrain from doing so as we handle nothing on which the copyright is held. Miss Beulah Hann, daughter of Mr. and Mrs. T. Hann, of this city, was married Thursday to Pat Rati-nier, of Davengrove, Iowa, and H. F. Roerick, of Goldenburg, Ill., both of whom expressed themselves enthusiastically in favor of the Buhl county.

MORTAUGH NEWS Mr. and Mrs. Godman, of Berlin, Wisconsin, arrived in Mortaugh Wednesday to visit with the latter's cousin, Mrs. S. A. Hoffman, of Golden Valley. The Ladies' Aid will meet at the home of Mrs. Hero Thursday. Floyd Morrison left for Nehraska Thursday morning to attend high school. Miss Ina Johnson attended the young course in Twin Falls Thursday evening. Mrs. Bob Webb returned Tuesday from Eden, where she was called by the illness of her sister, Mrs. Bruce Gordon. She reports Mrs. Gordon much better. Mrs. B. F. Jain has been quite ill the past week, with appendicitis but is much better at this writing. Rev. Mr. Pemberton was assigned this point by conference as his work again for the coming year. He is busily engaged in building the church. Mrs. Francis L. Johnson spent Tuesday in Hanson with Mrs. Colner. Mrs. David Johnson and family were called to Kimberly because of the illness of his mother. At present she is much improved. W. A. R. class met at the home of their teacher, Mrs. Pemberton, Wednesday evening and transacted some business. Mrs. Mary Hall and Claude Hall spent Tuesday afternoon in Twin Falls. Andy Hall and Harry Chance, of Boley, were visitors here Sunday. Miss McMillen is visiting at the home. Grandpa Hall is remodeling his home and making it into a bungalow. Prof. Williams, of the Twin Falls Wednesday to consult a doctor about a badly burned arm. Dr. Wiglesworth dressed the arm and it is getting better. Mrs. Gardner, of Kansas, is visiting her brother A. B. Beverlin and son, Guy Gardner. Mrs. Davis transacted business in Twin Falls Saturday. Andy Hanson and Lew Rawlaga motored to Twin Falls Sunday afternoon. Mrs. Weatherly was in Twin Falls Saturday. E. D. Hunt had a fine yield of oats. After measuring the crop the yield was 16 1/2 bushels per acre. Several attended the Hard Time ball at Artesian city.

CHANCE VERDICT THROWN OUT

Supreme Tribunal Holds That Theory of Chance Has No Place in Juryroom. The theory of chance has no place in the jury room. The supreme court so held Saturday when it handed down its decision in the case of A. Beckley against the Optimist Printing company of Blackfoot. In the trial court it was alleged that the jury, being evenly divided on the case, decided the issue by tossing a coin, and by that method reached a verdict in favor of the defendant. On appeal the case was argued by two of the jurors who were submitted when the appeal was made, and that was the principal ground for the appeal.

In reversing the judgment of the trial court the supreme court held that "as jurors are bound to return verdicts according to the evidence and instructions of the court, the differences of opinions, when submitted to a jury, should be carefully and conscientiously considered, and should not be determined by the gambling method. The tossing of a coin to effect an agreement during the deliberations of the jury, coupled with the compact to abstain from further improper purpose — is nevertheless contrary to law, and a verdict so reached is void."

County Attorneys written by Justice Budge and concurred in by Justice Morgan, but Chief Justice Sullivan dissented. While the majority opinion made by two jurors to the effect that they had arrived at their decision by the coin tossing process, 10 of them made affidavit that the theory of chance had nothing to do with their deliberations, and Chief Justice Sullivan was of the opinion that the conflict of affidavits was such that the verdict should not be disturbed. He held that on account of that conflict it had not been proven that there was a resort to chance in arriving at the verdict. The case was one in which the plaintiff sued for damages on account of libel alleged to have been contained by the defendant in publishing a certain article regarding the plaintiff's character.—Statesman.

FATAL SHOOTING NEAR RUPERT

Rupert, Idaho. — A quarrel between three Mexicans on the Floyd Brown ranch, about three miles west of Rupert Sunday afternoon resulted in the death of one and the wounding of another. It appears that there had been bad blood for some time between the three Mexicans involved and the

W. R. PRIEBE Jeweler-Optician The need of glasses can best be told by an optician. Let us test your eyes, we will tell you if you do not need glasses. If you need glasses you should wear them. Bank & Trust Building Twin Falls

fatal quarrel resulted from an effort upon the part of the man who was killed to enter the house. Juan Carozos had been instructed by Clyde Brown to keep the Mexicans away from the house and when one of them named Manuel Emmeros attempted to enter a quarrel took place where upon Emmeros came at him with a knife and was backed up by another Mexican, Rodriguez Salazar. Carozos, who is 54 years of age, thereupon drew a gun and knocked Emmeros down with the butt. He got up and Juan shot him, the bullet entered the left arm and thence penetrating the heart, causing instant death. Salazar then ran for the tent to get a gun and Juan shot him as he ran, wounding him in the upper thigh. Juan then made off across the country. When the word of the tragedy reached Rupert, possees were quickly organized and some fifty men combed the neighborhood. The fugitive was traced to Adelaide, where he was found on the Rickert ranch and was brought back to Rupert for arraignment. A big 46 gun was taken from him but he made no effort to resist arrest. A representative of the Statesman for Mr. Brown. He displayed wonderful endurance for an old man as he was arrested some fifteen miles from the scene of the killing.—Statesman.

FOR NATIONAL CHILD LABOR LAW

Connecticut Manufacturer Favors a 16-Year Limit. "We need a national law which will keep all children in school until they are 16," Mr. D. H. Warner, one of the largest manufacturers in Connecticut, told a representative of the Statesman Child Labor Committee the other day. Mr. Warner is the head of the Warner Bros. Corset Co., of Bridgeport, which recently put 400 employees on a 48 hour week, although the state law permits him to operate 56 hours a week. "The manufacturer who employs children of 14 or 15 does not benefit himself, because children are not good workers; he does not benefit the community, because he harms the child, and it is the good of the community, not the individual manufacturer, that must be considered in this question could be made a law." "I never employ children under 16 if I can get older workers because I consider the years between 14 and 16 the most impressionable ones of a child's life and I know that the factory influence is a bad one, no matter how careful the employer may be. These years should be spent in school and in the open air in the factory permit physical, mental, moral and financial growth is stunted. If we must have men with a college education in the executive positions, it is equally necessary to have a proportionate amount of training throughout the entire force. I find it extremely difficult to get intelligent girls for responsible positions. I have tried to train them but their lack of education makes it impossible for them to go beyond that point." "It is true of course, that poverty makes it necessary for some children to go to work before they are 16. I think it might be advisable to permit exceptions to the 16-year limit for such children who are over 14 and are declared physically fit for work by a physician. Cases of actual poverty are not very numerous, however, for factory children are sent to work because their parents are not poor but avaricious." A repetition of your want ad, in the course of your quest for a cook, may be good policy.

When the nose you ought to be living in says he treated unexpectedly, and is for real, you'll get the new, smooth the classical columns.

HEALTH AND HYGIENE

Don't Spit Laws Should be Made More Than Jokes.

The dangerous and dirty habit of careless spitting, coughing and sneezing is without doubt the most costly carelessness that civilized society indulges in. The saying, "No spit, no consumption," is literally true, and this means that the consumption that we have with spittle deaths a year, would be largely avoided if this habit could be abolished.

It has been shown by careful scientific study that in the act of coughing or sneezing, unless a handkerchief or other object is held in front of the nose and mouth, micro-organisms of saliva and nasal secretion are discharged into the air in which even in a quiet room, may be carried a distance of from ten to fifty yards from the place where they were expelled. Many of these droplets can be seen if one will cough or sneeze in front of a mirror or windowpane. Most of them, however, are too small to be visible to the naked eye. One can now readily understand how very impure it is to cough or sneeze without holding a handkerchief in front of his face, for such a person literally spits on objects and people, perhaps on food, within a distance of from ten to fifty yards about him.

The germs of tuberculosis, diphtheria and perhaps grip, colds, pneumonia, whooping cough, measles and scarlet fever, are conveyed through expectoration. Many perfectly healthy people not suffering from the disease carry the germs of pneumonia and diphtheria and other contagious diseases in their mouths and throats. It becomes necessary that not only recognizably sick people shall abstain from careless spitting, but that the apparently well who may be "germ carriers," should also be careful in expectorating.

Towns and cities should make their anti-spitting ordinances more than jokes. As a matter of fact they should not pass such an ordinance until they are ready to enforce it. From a health point of view anti-spitting ordinances are not to be lightly regarded. They should be serious laws and the violation of them should be made more than a joke.

Before the discovery of Jenner, smallpox was a scourge of childhood. Only a few children

reached the adult age without having had the disease.

The front yard is a pretty good index to the people who live in the house, but the back yard is a better index to their lives, their health and their habits of cleanliness.

Dirt and filth accumulate all the time, and if neglected soon become ugly, unsightly and dangerous. Cleanliness and beauty can only be maintained by constant vigilance and labor.

Because a man has been paying fire insurance on his home for twenty years and never had a fire, he does not cancel his policy. Health insurance works on the same basis, except that it costs less and produces more.

Colds are getting to be a disgrace—rightly so. They indicate that in most instances the possessor of "a bad cold" (and we have yet to hear of a good cold) has disobeyed some ordinary rules of health. His ailment is noted out to him in the form of "a bad cold."

Why not clean up and stay clean? Spasmodic cleaning does not get a town the name of a clean town. Neither does one health lecture or one crusade against flies during summer make it or even get it the name of a healthful town. What you must do is to clean up and keep clean, bring about sanitary conditions and

keep them sanitary; have it somebody's business to look after these conditions, enforce laws and if needs be, punish the violators of the law.

"It's the cleanest town in the state" is about the most attractive advertisement a town could have. It would attract home-seekers and investors; it would draw visitors and become a health resort; it would be the stopping place of traveling men; and best of all, it would be a safe place for you to live and do business.

NEW YORK LETTER

Bulgaria, though she has mobilized her forces, is no longer the key to the situation on the Balkans. The center of difficulties is shifted from Sofia to Athens, where the Balkan problem could find a solution from the point of view of the Allies. Should Bulgaria attack Serbia and thus join the war on the side of traveling men, and best of all, it would be a safe place for you to live and do business.

Sir Edward Grey also hinted that such a turn could be taken, should Bulgaria declare for the Central Allies. But while Sir Edward Grey threatened Bulgaria with an attack from the rear and thus warned her to keep quiet, an official statement came from Athens and Sofia declaring that Greece in case of Bulgaria's entering the war, would oppose a policy suggested by the Central Allies.

This statement is the most surprising turn in the Balkan crisis during the last two weeks, because it was supposed that the Central Allies, in sympathy with the Allies, would join them should Bulgaria take a hostile attitude towards Serbia. This surprising turn has its explanation in the fact that Greece, though morally sympathetic with the Allies, can, under no circumstances make common cause with them, because of Italy's partnership with the Central Powers.

The Italians are holding twelve Aegean islands taken from the Turks during the Tripolis war. The Greeks have tried again and again to get these islands from Italy, because they are purely Greek, but in vain, and there is no prospect today that Italy will ever hand over the islands to Greece. Italy has great plans to carry out in Asia Minor and needs these islands as a base for future military and political enterprises.

The old dream of a Greek empire comprising the whole Greek population in Greece, Albania, Asia Minor and all the Aegean islands is thus doomed to remain a dream only, because in addition to Italy's holding the twelve islands, she plans to occupy those parts of Asia Minor that are inhabited by Greeks. Furthermore, Italy has also turned to become a competitor of Greece in Albania and the well known Greek Albanian leader, Mr. Zagoras, has pronounced the Italians as the arch enemies of his fellow countrymen.

If Greece should join the war, and if the Allies should win, she would not get the compensation she is claiming because England and France could not force Italy to give up the islands and could not drive her out of Albania. In fact, Greece would not gain anything by joining the war, because of Italy's competition and in joining the Allies she would lose all her future possibilities. This explains why Greece, though morally in sympathy with the Allies, not only cannot join them, but must do everything to prevent their emerging victoriously from the war.

It was said that Greece did not join the Allies because King Constantine is a brother-in-law of the Kaiser. That could be true on the supposition that the majority of the Greek people was not pro-ally. But after the election and after Venizelos' returning to power, there can be no doubt as to the sympathies of the overwhelming majority of the Greeks. King Constantine cannot have his will against the majority of his people, and he would consider it advantageous to join the Allies.

This not the influence of King Constantine, but purely political considerations are preventing the Greeks from joining the war on the side of the Allies and from giving assistance to them in case Bulgaria should attack Serbia.

WM. WIRT MILLS.

For Sale

Two 40 acre tracts near Hansen; each 20 acres of red and alkali clover. Good stand. Will sell for \$125 per acre if taken before November 1st.

J. R. Hinton
Hansen, Idaho.

Many of our farmer friends are beginning to tell their neighbors that our "Customers-Aid" Plans are a pretty good thing.

They think enough of them so that they are getting the habit of making use of them for even the simplest type of building.

If you are planning—and perplexed these drawings will start you right.

From stock burns down to the simplest structures, farm buildings are shown in complete working detail.

Our lumber yard is a mighty good place to come for building ideas.

Savory Sweetness

Nature varies the flavor she puts into the different grades of tobacco leaf—and the best of all is the flavor of choice red Burley that pleases you so mightily when you chew

SPEAR HEAD

PLUG TOBACCO

You get more savory sweetness in a chew of SPEAR HEAD than in a plug of ordinary tobacco.

And you get it in its purest form—for SPEAR HEAD is made amid the most wholesome surroundings in a great new factory that's as clean and sanitary as a pure-food factory.

THE AMERICAN TOBACCO CO.

How Do You Buy Roofing?

If you are in the habit of asking your dealer simply for some "Ready Roofing" or "Rubber Roofing," you will probably get a roofing that is not guaranteed, or one made by an unknown manufacturer, or one which will begin to leak a few years after it is put on your roof. You avoid all these risks, save money in the long run and get a manufacturer's guarantee of 5, 10 or 15 years, according to thickness, by buying the best roofing when you buy.

Certain-teed

Roofing

Why be satisfied with an unknown or poor quality roofing when you get Certain-teed for only a few cents more per square? Because of the enormous amount of our business in the largest Roofing and Building Paper Industry in the world we can well warrant roofing through our own central or a real outside or local.

ORCHARD CLEANINGS

WINTER WORK IN ORCHARDS

When Ground is Frozen is Favorable Time for Hauling and Spreading Manure—Add Bone Meal.

The winter when the ground is frozen hard is a favorable season for hauling out, with cart or sled the manure needed. In spring the ground is too soft to haul over and other work is too pressing; the result is this important matter is put off for another year. The manure should be hauled and spread evenly over the ground. Do not place directly around the trunks; it only affords a harbor for mice and insects. The manure should be sorted into horse manure, cattle or horse. Straw and cornstalks, mixed with a little animal manure, is poor stuff and is only valuable as a mulch. This kind of manure should be hauled out to the orchard and piled. Mix a half-bushel of raw bone meal in each two-horse manure load of manure as it is piled and make a compact heap, which will soon rot down, and, when well rotted, should be spread. About one to two bushels is the proper quantity for each large tree. The manure should be spread in a circle as far out as the branches extend.

Practical growers are now using from 400 to 800 pounds of animal bone and potash fertilizer per acre. The fertilizer is drilled in with rye in the early fall, the rye is turned under in April for green manure. This method is found to be the cheapest and best method of fertilizing the orchard.

SPRAY FOR SAN JOSE SCALE

Best Remedy for Pest is Thorough Treatment With Lime-Sulphur Mixture Late in Winter.

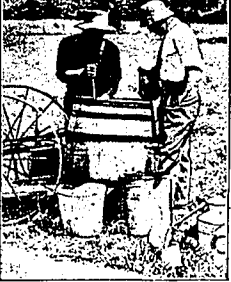

(By C. P. GILLETTE, Colorado Experiment Station.)

San Jose scale is one of the worst pests attacking orchard trees in this country. It is extremely important that orchards should be treated as to exterminate the scale from them and prevent its spread to surrounding orchards.

Undoubtedly the best remedy for this scale is a thorough treatment with lime-sulphur mixture late in the winter or early in the spring, before the buds begin to open on the trees. If the commercial, concentrated lime-sulphur mixtures are used they may be diluted in the proportion of about one part of the concentrated preparation to ten parts of water. If homemade lime-sulphur sprays are used, probably there is no better formula than the following:

- Good lump lime, 15 pounds;
- Flowers of sulphur, 15 pounds;
- Water, 50 gallons.

The lime should be slaked in warm water and, as soon as the slaking has been completed, the sulphur should be added and enough water kept in the receptacle to keep the mass thin and sloppy. Boil for at least forty-

Preparing Mixture for San Jose Scale.

five minutes, or until the liquid is a deep brick red in color; then dilute to fifty gallons and apply at once.

Protect Grapes From Mildew which may or may not attack them they should be dusted with sulphur. For a few vines of the family vineyard a good way to put the sulphur in is to dip the bunch of grain bag and shake the sulphur over the vines. A spray which will force the sulphur among the leaves more completely is of course more effective.

Combating Winter Insects. Grape leaf hoppers, which are the only way to combat it is by dipping the bunches of grapes in a solution of sulphur in the spring, and repeating several times during the season.

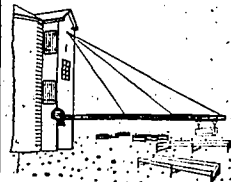

FOR REMOVING SILAGE

Description of Devices in Use for That Purpose.

Overhead Feed Carrier is Advisable Where Stock is Adjacent to Feed Yard—Much Depends on Number of Stock to Be Fed.

(By L. W. CHASE.)
From two to three inches of silage should be removed from the entire surface of the silo daily during the summer months and at least half of this amount in the winter. In the above-ground silos the silage may be dug loose with a silage fork and allowed to fall down through the chute to the ground, where it may be loaded into the cart or carriers and fed where desired; or it may be dropped directly into a cart, or wagon, and taken to the stock.

If the silo is adjacent to the barn and there is a smooth way from silo to feed manger, a simple silage cart is the most convenient device for

Illustrating How a Swing Silo May Be Attached to a Swing Silo and the Silage Distributed to Several Feed Bunks.

taking the silage to the stock. The cart can be left beneath the silo chute and filled from above without revolving the silage. Loose silage weighs about 18.5 pounds per cubic foot, and this should be given consideration when building a cart for a definite capacity.

More often than otherwise the silo stands either in or adjacent to the feed yard, in which case there is very seldom a smooth way from silo to bunk. An overhead feed carrier is then generally advisable. This depends upon the number of stock to be fed. Such a carrier may easily be arranged. If the yards are small a swing track may be attached to the silo and the silage distributed to several bunks in the yard.

When several carloads of stock are being fed silage, the most convenient scheme is to throw the feed into a wagon and distribute it to the feed bunks with a team.

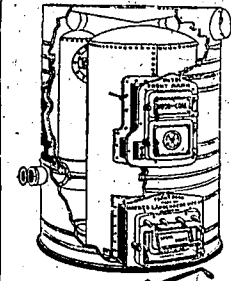

Some sort of hoisting device should be used in pit and empty silos. Where the pit is more than ten feet deep, hand hoists and power hoists are being used for this purpose. The simplest hoist is that of the bucket raised hand-over-hand, but this requires one person in the pit and another above ground. A better scheme and one which is practical where the silo is located in the barn between the mangers, is to obtain several baskets and equip them with stiff bands, then use them as follows: Fill the basket and place them in the silo convenient for raising, climb out of the silo, hook by means of a hook on the rope, hook a basket of silage to it and hoist it out. After the basket is emptied, drop it back into the silo, release the hook, and hook another basket.

A homemade hoisting device for empty silos and which can be adapted to pit silos as well, consists of a three-inch pipe carrying a wooden wheel and two drums. An old milk can, filled with water, is used as a counterweight. It should be slightly lighter than the weight of the cart and the silage.

A horse-power hoisting device is easily used for silos entirely below ground. These silos have an opening in the roof through which the silage is hoisted. The carrier is a hoist about four feet long by two feet wide, carrying a hinged bottom. The box is hoisted and pulled over to the dump chute by means of one horse. A trip rope allows the operator to dump the silage directly into the feed manger, silo, or cart. An ordinary hayfork can be used for this purpose. This same arrangement may be used for feeding into several bunks.

An Adaptation of a Feeding Arrangement which can be used as well for Above-ground Silos as for Bank Silos.

When the silage is hoisted into the feed manger, it is hoisted about four feet long by two feet wide, carrying a hinged bottom. The box is hoisted and pulled over to the dump chute by means of one horse. A trip rope allows the operator to dump the silage directly into the feed manger, silo, or cart. An ordinary hayfork can be used for this purpose. This same arrangement may be used for feeding into several bunks.
