BAND PLAY A WINNER

Home Talent Musical Comedy Well Received by Large Audience.

GREAT ABILITY SHOWN BY AMATEURS OF THIS CITY

Ralph Pink as Star in George Washington, Jr., is Ably Supported by Whole Cast.

The home talent musical comedy, "George Washington, Jr.," given at the Lavering, Wednesday evening, not only drew a packed house, but drew round after round of applause during the amusing situations developed in the plot.

Ralph Pink as "George Washington, Junior," the cast off son of a rich United States senator, played his part with the characteristic freshness of the American youth and made an exceedingly strong personality around which the play and other characters developed.

Miss Gladys Spight, as the vivacious and spoiled niece of Senator Hopkins proved her ability as a clever actress. Mr. and Mrs. Boyd Fuller as Senator Hopkins and Mrs. Stebbins, sister of the rich Senator Belgrave, were two of the parts which gave vim and energy to the entire play and the well known reputation of the two afforded nothing in the production Wednesday night.

NORTH AND SOUTH RAILROAD

Investors Say Building of Road is Practical.

Boise, Nov. 6.—That an eastern syndicate of railroad investors is investigating the feasibility of constructing a "missing link" in the north and south railroad from New Meadows to Lewiston was an interesting development during last week.

Mr. Leavitt viewed the route of the proposed road with a view of furnishing power for transportation purposes through the medium of gasoline motors which can operate on a grade as high as five per cent. He believes the "missing link" can be built from New Meadows to the present southern terminal of the Lewiston & Nez Perce railroad in which his group have become interested for not to exceed \$1,000,000 and it is his opinion that the Lewiston & Nez Perce offers the best route.

Mr. Leavitt promised Governor Alexander to make a further investigation and inquiry and to submit a proposition whereby the capitalists or representatives will undertake to back the construction of the railroad. He also promised to take up matters in connection with the road with members of the north and south railroad commission appointed by the governor.

In a report submitted to Governor Alexander by E. A. Faddock, a high member of the north and south railroad commission, the state made it is his opinion that the road is entirely practicable as far as the work to be done is concerned, and that the cost per mile will not be excessive; that such a road will open up settlement a large tract of good ranch and grazing land, as well as develop mineral lands and result in building up the lumbering industry.

A further recommendation is made that the federal government should be put in the best possible condition as preliminary to the building of the highway.

ALL-STARS DRAW LARGE CROWD

Tie Game Result of Major League Battle

COLD WEATHER PREVENTS FAST PLAY—MANY ERRORS

Many Players Prominent in Nationals and American League in Uniform on Local Grounds.

The much heralded coming of the big league baseball stars drew one of the biggest crowds ever on the local grounds—a larger crowd in fact than greeted the same players in Salt Lake or in any place where the teams have been playing in the west.

The game from the standpoint of fast baseball was somewhat disappointing due to the wintry blasts that crippled the hands of the players.

The game at the start went the way of the Nationals due to a number of errors by short and third in the second inning recording two runs for them. Klopfer for the Americans two other times pitched his team out of a tight hole by timely strikeouts.

The Americans, while hitting the heaviest of the two up to the eighth, was successively blanked. In the eighth, however, a fusillade of hits and clever inside baseball netted them four runs.

The Americans, while hitting the heaviest of the two up to the eighth, was successively blanked. In the eighth, however, a fusillade of hits and clever inside baseball netted them four runs.

WRONG CONSTRUCTION OF LAW

Owing to the fact that several state papers have taken it upon themselves to criticize the report of the state Irrigation Commission as exceeding its authority, the Times is running the Act passed by the legislature so that its readers may decide for themselves. It looks like a plainly worded and acceptable of much misinterpretation on the part of its critics. In the first place the most criticism is directed at the commission for making its report to the governor and the land board. If the critics will consult the following bill they will see that in three distinct sections the commission is directed to report to the Governor:

Another criticism was that the commission exceeded its jurisdiction in investigating personally the various projects. Section 5 plainly states that the commission shall have full power to employ legal, technical and clerical assistance to further the success of their investigation. If it was merely the codification of the irrigation laws then the employment of expert irrigationists would not have been required. As can be plainly seen the act was intended to do just what it did name, to investigate conditions and then report on its proposed remedies. The fact that the commission advocated drastic action on one or two projects is unfortunate for those projects, but nevertheless just to those who have invested their entire funds in land. The copy of the bill is herewith given.

AN ACT

To Authorize the Appointment of a Commission to Revise the Irrigation Drainage Laws of the State of Idaho, and to Draft and Propose Legislation Relating to the Industries of Irrigation and Drainage, and to Make Recommendations for the Relief of Settlers on Carey Act Lands Defining the Powers of Such Commission; the Number of Persons Who Shall Constitute the Same; Giving the Same Authority to Employ Such Assistance as May be Required; Providing for the Compensation of the Same; Making an Appropriation, and Declaring an Emergency.

Be It Enacted by the Legislature of the State of Idaho:

Section 1. The Governor of the State of Idaho is hereby authorized to appoint a commission to consist of five (5) members to revise and codify the irrigation and drainage laws of the State of Idaho, to draft such legislation relating to the industries of irrigation and drainage as may be deemed advisable to submit to a proper legislative body for enactment into law, and to make such recommendations as may be considered necessary for the better government and more rapid development of the said industries, and to make such recommendations and draft such legislation as may be deemed wise and expedient for the relief of settlers on Carey act lands.

Sec. 2. The members of the commission shall be selected from the various political organizations, and shall be persons selected and appointed because of their peculiar qualifications and fitness for the performance of the duties for which said commission is created.

Sec. 3. The members of the commission shall be selected from the membership of the Thirteenth Session of the Idaho legislature and two (2) of whom shall be from the membership of the Senate, and three (3) from the House of Representatives.

Sec. 4. The said commission shall hold meetings from time to time at such place or places as the chairman thereof may designate and shall expedite its labors with the greatest dispatch consistent with efficiency and at the earliest possible moment, report to the Governor of the State of Idaho its determination with recommendation thereon as to action in the premises.

Sec. 5. The said commission shall be and is hereby empowered to employ such legal, technical and clerical assistance as it may require to accomplish the purpose for which it is created and the compensation for such assistance shall be paid from the funds appropriated herein, for the carrying out of the provisions of this Act.

Sec. 6. The Governor shall designate the chairman of said commission.

who shall report to him from time to time the progress in the duties of the said commission, and the terms for which the said chairman and the other members of the commission shall be appointed shall terminate on the first day of January, 1916.

Sec. 7. The members of said commission shall receive their actual and necessary traveling expenses incurred in the performance of their duties, and a per diem allowance of Five Dollars (\$5.00) per day for each member while on business of the commission.

Sec. 8. There is hereby appropriated from any funds of the State of Idaho, not otherwise appropriated the sum of our Thousand Five Hundred Dollars (\$1,500.00) for the use of said commission, in carrying out the provisions of this Act, and any part of the said sum which may remain unexpended when the commission shall have finished its labors, shall be returned to the Treasurer of the State of Idaho.

Sec. 9. The commission shall keep or cause to be kept a true and accurate account of its expenditures and file the same with its final report and recommendations with the Governor of the State of Idaho, not later than the first day of December, 1915.

Sec. 10. An emergency existing hereof, this Act shall be in full force and effect, from and after its passage and approval.

Approved March 10, 1915.

COLORADO'S "REPUBLIC OF LABOR"

All the Rockefeller seem to be "reversing toward the idea of industrial democracy" observes the Philadelphia Public Ledger in noticing young Rockefeller's plan for a workers' organization of the Colorado Fuel and Iron company. His aim as quoted from him in our issue of the 9th, is to "reverse something absolutely democratic—something that will take in all workmen, whether they belong to the union or not." On this point The Ledger says it is "obvious that hearty acceptance of the plan by the miners would mean the slow death of the union"; and it adds that "indeed, the plan seems to have been drawn partly with a view toward destroying the cohesiveness of the miners." As this Journal analyzes the project, if the plan be accepted no miner would represent more than 150 others, the miners would be divided into five separate districts, and even when the representatives met they would not deal directly with the company, but with an equal number of the company's representatives. Then all would delegate their authority to committees. Such an arrangement impels The Ledger to describe Mr. Rockefeller's plan as "hyperrepresentative" and leaving so many chances for the desires of the miners to get lost in the shuffle that "probably they will prefer to fight on for recognition of their union, through which they can deal directly with the employers." For all that, the concessions which Mr. Rockefeller makes strike this journal as amazing "in view of the attitude shown by the Standard Oil company recently toward the Haywood strike." The plan involves improved social life and living conditions for the miners and their families, and forethrows the likelihood that on most questioning up the miners will have "equal representation on the committees." So The Ledger concludes that if the plan in sum means that "the Rockefellers recognize that employers are not wise enough or generous enough to govern large masses of employees with unlimited power," then the women and children of Ludlow had very fruitful deaths. Although leaders of organized labor look with more or less contempt on the Rockefeller proposal, as the press inform us, nevertheless it has been approved by a unanimous vote of mine officers and delegates of the miners employed by the companies. Returns of the referendum vote of the workers show that the plan has been adopted by a vote of 2,243 to 483. The attitude of the United Mine Workers of America toward the Rockefeller plan is unexplained in a statement issued by one of their committees and sent to the New York Times by one of its Denver correspondents. The statement reads in part:

"The proclamation fails to provide for meetings or conventions of the mine, except locally, and by no device insures company domination of its workings. All meetings, except local mine-meetings are to be joint meetings, where the company will have equal representation, thus eliminating the danger of the collective action that might result if the men from several mines met together free from company influence."

The committee also comment on the fact that many beneficial concessions are now granted that were contended for two years ago and express the belief that if the plan is carried out, the plan will no doubt eradicate some of the lesser evils of long standing. They claim that— "The evils that are fundamental will be eradicated when the men are represented by a labor organization powerful enough to compel recognition of the industrial and civic rights of its members, and capable of writing these principles into the joint agreement along with the rights claim-

TALKS ON THRIFT

No. 12.—PUBLIC AND PRIVATE ECONOMY

"The people of the state should appreciate that governmental efficiency and economy is their own personal concern. It vitally affects their interests and involves the future prosperity of themselves and their children, whether or not they now happen to be direct taxpayers. The ultimate effects of improvidence, waste and extravagance in public expenditures reach every citizen and, in fact, are always more injurious to the wage-earners and those of small means than to any other class in the community.—Governor Whitman, of New York.

A new York business house has taken to heart the truth of the old rhyme:

See a pin and let it lie,
Come to trouble by and by,
See a pin and pick it up,
All the day you'll have good luck.

This concern has a combination of devices that enables it to pick up, sort and retell pins that will leave no mark of dirt or metal upon the most stainless white goods. It believes it can save one dressmaking establishment one-half of its \$1,500 annual pin bills.

"All the day" this country will have "good luck" if it takes a lesson in simple thrift, the careful avoidance of waste that used to be a national characteristic.

Between the hen and the consumer there is an estimated waste in eggs of \$200,000,000 annually, in this country, according to William Mani, attorney for the New York Central Railroad company, who testified at the recent inquiry into the butter and egg business of the state made by the attorney general's office.

The witness said that no more than six out of ten eggs laid reach the consumer, making a \$200,000,000 waste. Of this amount, he said, \$50,000,000 is due to needless breakage in transit from the nest to the retailer. The balance of the loss represents unnecessary adding, spoiling and deterioration due to poor handling.

Director Joseph H. Holmes of the National Bureau of Mines estimates that the cost of the waste in mining exceeds \$1,000,000 daily and he urges additional appropriations by the government to prevent this loss and the continual loss of life and good health by the miners.

Waste is rampant everywhere we look in this country. In the case of individuals, families, industries, municipalities and states. The national government itself does not escape the accusation of being extravagant in some respects.

These grave conditions must be remedied if we are to maintain our industrial and national efficiency in these times of world trial.

T. D. MacGREGOR.

TWIN FALLS BANK & TRUST COMPANY
TWIN FALLS, IDAHO

YOUR SUCCESS

or failure in money matters depends largely upon yourself. You must have money to make money. Your chances of getting cash for your start any other way than by earning and saving it are very slim indeed. Few men have it handed to them—probably not one in a hundred.

Does this not prove to you how vastly important it is for you to build up your resources through a savings account in the Twin Falls Bank and Trust Company?

Scene from Act II, Oliver Morosco's delightful comedy, "Peg O' My Heart," at the Lavering, Tuesday, November 16th.

GARRISON OUTLINES DEFENSE

Organize 400,000 Trained Men and Build up Coast Defense.

Washington—An outline of the army's part in the national defense program to be submitted to congress in December by the administration was made public by Secretary Garrison, discussing for the first time details of the plan to raise a great continental, or citizenry, army to supplement the regular establishment.

In brief, it is proposed to increase the regular army from 198,000 to 141,923 officers and men, extending the term of enlistment from four years with the colors and three years on furlough to two years with the colors and four years on furlough; to organize a federal citizen army of four hundred thousand (to be enlisted 133,000 a year for three years); to strengthen the state militia by increased appropriations and closer cooperation; and to spend twenty million dollars a year for four years on coast defenses and twenty-five million dollars a year for four years in the accumulation of reserve material for use by a force of five hundred thousand men.

Many Difficulties.

Mr. Garrison says that the framers of the new policy are fully conscious of the possibility of formulating military theories much better in theory, but that "after concentrated consideration of existing legal and other conditions, they think it will be found that almost insuperable objections and difficulties arise in the carrying into practical operation suggestions that from the military standpoint might otherwise be acceptable."

The statement reveals that in the preparation of their plans, war department officials have called into consultation specialists in various lines of private industry.

Use All Trained Labor.

"It has been proposed," it says, "to make available in time of need the services of those in various lines of employment requiring special knowledge and skill, such as railroad men, bridge builders, engineers of all descriptions, etc., and leading men in these lines and professions have been collaborating with the war department in an endeavor to formulate by legislation or administrative action, an acceptable and useful plan with respect thereto.

Appeal to Employers.

"In this connection, and because of the patriotic spirit thus displayed, it seems desirable to suggest that if those who are employed in the various lines of the country cannot by reason of age or situation in life, give their personal service, they can do that which will be equally useful by encouraging in every way the participation of those in their employ in the plan of national defense. If the women will arrange their business that a certain proportion of those whom they engage could undertake this national service without sacrificing in the most public-spirited and patriotic manner possible."

The Citizen Army.

The citizen army would be recruited throughout the entire country and organized in geographic divisions. Its members, though enlisted for six-year terms, would be required to report for intensive training only for short periods each year for three years, and during the remaining three years would be furloughed, subject to the call to the colors in time of war. In addition to officers who may be developed in the course of its operation, Mr. Garrison proposed to draw officers for this force from men who are serving in the national guard or the regular army, or who have been trained in private military schools. Individuals or organizations in the existing national guard, if so would be permitted to come into the citizen army without change of rank.

Funds Necessary.

For the next fiscal year, when it is proposed to put this new policy into operation, congress will be asked to appropriate \$185,717,035, the second year the amount will be \$212,515,579; the third, \$229,215,879; and annually thereafter, if the policy were continued without change, the army budget would be \$184,254,559.

The additions to the regular army contemplated are 10 regiments of infantry, four regiments of field artillery, 2 regiments of coast artillery,

15 companies of engineers and four aero squadrons, to be brought in, half next year and half the following year.

Flueing of Troops.

This plan, when completed, would place in the Panama canal zone, Hawaiian Islands, the Philippines and Alaska, 1433 officers and 47,456 enlisted men. In the continental United States there would be in the regular establishment 2956 officers and 66,968 men, including 11 and two thirds regiments of infantry, seven regiments of field artillery, 170 companies of coast artillery and about four thousand officers and men in engineer and signal corps.

BIG FIRE DAMAGES POCATELLO

Store of Blythe and Fargo Guttered by Fire Monday.

Blythe and Fargo, corner of Center and Arthur streets, the largest and best mercantile establishment of Pocatello, was greatly damaged this morning by fire, the entire dry goods department being completely destroyed. The fire started this morning at 8:15 in the furnace room directly over the dry goods department and shortly after the entire basement was a sea of fire. The department was promptly responding to the call, but were compelled to call on the O. S. L. fire department for assistance. The dry goods stock was valued at \$50,000 and insured for \$30,000. The building is owned by C. A. Valentine, president of the First National bank, and was fully insured. The grocery department of Blythe and Fargo was not materially injured. Six streams were played on the fire with the assistance of the Short Line and this fact was largely responsible for the comparative small loss as it appeared as if the entire block would go especially as the neighboring buildings are under construction. Nobody was injured. Blythe and Fargo announce that they will immediately commence construction of a new building.

FIRE AT OFFICER HIT FRIEND

Two Mexicans Wounded by Shelley Officers. A dual in a refrigeration car, between two officers and two Mexicans, at Shelley caused considerable excitement in the community last night. In the melee the two Mexicans were shot, each of them seriously. It appears that two Mexicans had robbed one of their countrymen at Idaho Falls...

PATTERSON MAKES RECORD WITH HUDSON

E. C. Patterson, the millionaire amateur automobile owner and driver personally drove a Hudson with four passengers from Chicago to Minneapolis, via the northern route, a distance of 562 miles, in 20 hours and 20 minutes. He returned via Cedar Rapids and Clinton, a distance of 555 miles, and made the return trip in an adjustment of any kind. This is an average speed of considerably over 27 miles an hour for the entire distance. Mr. Patterson says the roads were as bad as can be imagined, that the Hudson performed as well as any car he has ever owned, and that it went through without a skip of the motor or an adjustment of any kind. "This," says Patterson, "is surely a remarkable performance." Patterson is well known for his enthusiastic participation in all kinds of amateur motor-car sports. His driver, Ralph De Palma, is a winner on many of the well-known amateur tracks. It was Mr. Patterson who recently made the record non-stop drive from Chicago to New York. He is an authority on motor-cars and motor-car performance, and his praise of the Hudson and the remarkable record that he made with it is therefore all the more interesting.

ing results, but their estimate is less than the maximum above stated. Reviewing the origin of the project, as set forth in the Commissioner's letter, it is seen how the government's policy concludes that the main engineer's report as to the feasibility of the project as planned and the sufficiency of the water supply to successfully reclaim 131,553 acres; and the blame as to the environmental supervision is concerned, is laid squarely at the state engineer's door. August 14, 1909, and January 10, 1908, the state of Idaho filed its segregation list No. 14, at the request of the Twin Falls-Salmon River company for 2,053 acres. April 10, 1908, said segregation list was approved for 12,701 acres. Subsequently, relinquishments were filed by the state water reclamation engineer for 99,468 acres. At the time the segregation was made government examination of applications for segregation was more or less superficial, extending only to the desert character of the land and leaving the question of feasibility, water supply and other crucial questions open. The state, accepting as conclusive the reports made available by the state engineer. It further appears that since the segregation, the Twin Falls-Salmon River company has sold water rights for 25,000 acres of land, including segregated lands, privately owned lands, state lands and donated land, homestead claims. This segregation was one of the Kuhn brothers' projects and upon the failure of these bankers, found itself in other hands. Irrigation projects in this district. If the company were turned over to a bondholders' committee, who have since been attempting to effect a settlement of the conflicting claims. While the engineering features of the project are admittedly practically completed, the state, in view of the many protests as to its way clear, apparently, to request patent for the lands said to be under irrigation and reclaimed or for any specific portion of the same.

SPUD CROP FALLS SHORT

Will Be Sixty Per Cent Short for the Past Season. S. J. Donaldson, general manager of the Southern Idaho Producers' association, has just returned from an extended inspection trip throughout the state. Mr. Donaldson said that on an average he found that this year's general crop was only six per cent as great as last year, and that in some localities it fell as low as fifty per cent. The Blackfoot and Shelley districts for example registered only fifty per cent of last year's crop, while the Pocatello and Idaho Falls country registered about sixty per cent. Although the crop this year is not large, nevertheless the potatoes are of fine quality. The dry weather caused them to come out of the ground

SHORTHORNS AT AUCTION

On Tuesday, November 23, W. O. Duell will close out stock and implements. Amongst his farm 2 1/2 miles north and one mile west of Plover, W. O. Duell will sell 30 Registered Shorthorns, registered mare, one registered yearling bull, and farm implements to the highest bidder. Write for catalogue. Adv. Nov. 13 pd.

MURTAUGH NEWS

E. D. Hunt transacted business in Twin Falls Friday.
Mrs. E. P. Hinman of Hansen visited with Mrs. Hunt Wednesday and transacted business here.
Mr. and Mrs. Hoyt moved into the Bates house Sunday.
J. E. Stenour was in Twin Falls Saturday.
Mrs. Francis Johnson visited in Purley Wednesday.
Ed. True sold some fine spuds to Harrow Brothers.
Heat hauling is over with now we are ready for a good rain to settle the dust.
Mr. McMillan and Mr. McCollum were through here enroute for the north side Tuesday. They were accompanied by E. D. Hunt. Having success with their mission, the bridge will be placed as soon as possible.
Ina Johnson spent a part of the week with Mrs. Hoffman, at Golden Valley.
Rev. Mr. Fletcher, of Boise, delivered an interesting sermon Sunday morning on helpfulness and telling how we may help the orphan children. Quite a cash contribution was made and we hope to help fill the car which he will bring through here Thursday for donations for the Children's home. Several of the Union Sunday school attended the rally held at Golden Valley. Many more would have gone had it not been for the bad roads from best hauling.
Prof. Davis made a business trip to Twin Falls and Buhl.

tops and abutments are all in one piece. The bars or rods must be shaped so as to be partly embedded in the abutment walls.

We have just finished four culverts 12 by 16 feet, after the plan of the illustration, at a cost of \$150. This may seem to be quite a price, yet if they last as we expect them to, they will be cheap in the long run. We use a lot of iron, any length, in these tops. We get them cheap from junk dealers.

This good roads move is a money saver to the people. More has been done to improve our highways in the last five years than in any 15 years before.

COMMON SENSE IN CARING FOR SWINE

Breeders Disagree on Age at Which to Breed Sows—Watch Litter Carefully.

(By G. WEATHERSTONE.)
There is a great difference in opinion among farmers—and good farmers at that—as to the age at which sows should be bred. Some men breed at ten or eleven months, while others do not breed until they are two years old.

Some farmers claim that a sow should not be bred after she is four years old, as she is then apt to kill her pigs by lying on them. This trouble is generally due to the sow being too fat rather than her age. Never select a brood sow with a long, lean, narrow head and wicked little eyes. She is apt to be nervous and cross and a pig enter. It is a good plan to feed a little grain to the growing pigs even though they are running on good pasture.

In the South many hog raisers turn their young hogs out into the swamps along the rivers and creeks and pay no attention to them during the entire summer, rounding them up in the fall only to feed them two or three weeks before shipping them to market. Some surprisingly good results are obtained in this way, too.

Sows with a young litter should be watched carefully, for there are many sows who do not give enough milk to start the pigs off well. In such cases the youngsters should be fed a little whole cow's milk at first and later skim milk with a handful of shorts in it.

The man who raises pigs for market and pushes them along with some grain, shorts and oats, even while they are running in rich pasture, will bring them in to perfection much quicker than if they are allowed to run on green clover until fall.
It takes more feed to make a pound of pork on a scrub pig than on a well-bred animal. This being the case, why should he continue to waste feed on scrubs?

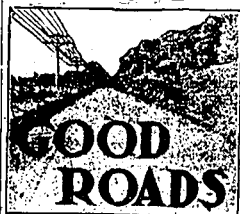

Keep a box full of charcoal, salt and sulphur where the pigs can get at it all the time. It may surprise you to find out how much they will eat, but it will pay to provide this food for them.

The boar should always be confined and never be allowed to run with the herd at all times. Keep him on the ground, but provide a warm and dry place in which to sleep. His bedding should be changed every day or two and kept perfectly dry and clean.

Pigs fed on skim milk must also have plenty of water. It turns into solid food almost immediately after entering the stomach and if fed on skim milk long enough they will suffer greatly from thirst.

When pigs are old enough to eat they should be fed in a separate pen from that in which their mother is confined. A door just large enough to admit the pigs and keep out the mother should be placed in the partition so they can come and go at will.

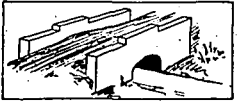

POWDER TREES Run High.
Young pear trees are inclined to run up high. They should be headed in severely every year while young. Bearing pear trees need but little pruning.
In order to secure all of the cream, milk must be kept sweet for 12 hours with the temperature as low as 50 degrees unless a separator is used.

CONCRETE CULVERT IS BEST

Flat-Top Style Being Built in Kansas. Is Shown in Illustration—Good Roads Save Money.

Had we begun not more than fifteen years ago to build concrete culverts and bridges in this township, and continued at the rate we have been building them the last three years, we would now have no place to put another one. Besides our expenses would not have been much more than they have been in building the wooden ones, writes J. T. King, trustee of Lincoln township, Lebo, Kan., in Farmers' Mail and Review. We began with the full-arch style of concrete culverts. That was before we knew the good of the flat-top kind. We now use the full arch only where there are high banks on both sides, so we can grade up to the top of the arch and make the road level. For all other places we prefer the flat top. We build them from 2- by 16 feet, to 20 by 16 feet. All concrete work must be well reinforced with iron wire.—We use any kind of bar iron in the tops, laid flat and miss lengthwise with the road. Heavy woven hog wire is laid crosswise of the top and in the wings, intermingled, so as to unite the whole culvert into one piece. The tops have

Flat-Top Style of Culvert an Approved Type.

a crowding of eight inches and are made 8 to 16 inches thick in the center, the thickness varying with the width. The forms are placed so the

PUBLIC AUCTION!

100 Well Bred Mares & Geldings

A. C. McMASTER'S BARN
TWIN FALLS, IDAHO

Thursday, Nov. 18, '15
Commencing Promptly at 1 o'clock

20 head of mares, 4 to 6 years old, weight 1350 to 1500
5 head of geldings, 4 to 6 years old, weight 1350 to 1500
5 head of mares, 7 years old, weight, each 1500
25 head of mares, 3 years old, weight 1400 to 1500
6 head of geldings, 6 years old, weight 1300 to 1400
20 head of mares, 2 years old, weight 1100 to 1300
9 head of geldings, 2 years old, weight 1100 to 1300
10 weanling colts.

This is all farm raised stock; big, flat bone, bred well, of Suffolk Punch, Belgian and Percheron stock. The best bunch of horses ever offered at Public Auction in this county. If you want good, high bred stock don't miss this sale. Most all this stock is either harness or halter broken, young and sound.
