

# TWIN FALLS NEWS

VOL. XI. NO. 25 ELEVENTH YEAR. TWIN FALLS, TWIN FALLS COUNTY, IDAHO, TUESDAY, JANUARY 4, 1916. SUBSCRIPTION \$2.00 PER YEAR

## KIMBERLY BANK TO REBUILD BLOCK

### Edifice Destroyed by Fire Will Again Be Erected

## IDAHO CALL WILL CONTINUE ITS PUBLICATION REGULARLY

Heavy Losses From Fire From Unknown Cause. Only Partly Covered by Insurance.

It has been authoritatively stated that the bank building in Kimberly, which was utterly destroyed by fire last Thursday night, will be rebuilt as soon as possible, and that the Idaho Call, whose plant was mostly wiped out by the conflagration will continue publication. It is not known whether C. E. Evans whose large general store stock was entirely consumed, will enter business in Kimberly or not. The money and papers in the bank vaults were not injured, not even a paper being scorched.

The fire broke out shortly after 6 o'clock from unknown cause in the furnace room under the rear of the building, and when it attracted the attention of Mr. Evans and his clerk, Marvin Gill, it was already beyond control. So rapidly did the flames spread through the store that the proprietor could rescue a sash and one or two minor articles when he and his clerks were compelled to abandon it. E. B. Barton, local editor of the Call heard the alarm when first given and turned his attention to getting out what he could. He saved much of the type and fixtures, and all the making galleys, but could not get out the large job press, which was ruined.

Dr. W. M. Fisher, the dentist, who had parlor upstairs, got out part of his material. C. G. Fick and Miller Evans with their families occupied rooms in the building and lost all that they had in them. The I. O. O. F. and the rest of all their paraphernalia and books.

When the fire was discovered, a bucket brigade was formed and when it became evident that the bank building was beyond saving, the fire department was called. The fire department arrived and tried to save the building but it was too late. The fire department was called and tried to save the building but it was too late. The fire department was called and tried to save the building but it was too late.

## BUHL DRY AND IMBIBED FROM LOCAL PARK LAKE

Breaks Lowline Resulted in Annoying Condition in the Metropolis for Several Days.

The break in the lowline last week left Buhl dry as a bone for several days and the people were not only compelled to get water from the big concrete pool in the park for their stock, but they had to use it in their houses. Farmers for miles around drove in to the big pond for their water.

## FILER FAIR BANQUET WAS MOST PLEASING OCCASION

One Hundred Braved Cold to Honor the Securing of Annual Fair for Thriving Progressive Town.

The winter blasts last Thursday night in no way chilled the ardor of the banqueters at Filer, who gathered at the Tanner hall to celebrate the securing of the Twin Falls county fair. There were 100 plates on the board and they were all occupied. Roast pig and numerous incidentals were much enjoyed, but not more than the talks, expressive of good will made by numerous citizens of Filer and Twin Falls.

Editor J. W. Tanner, of the Filer Journal, was toastmaster and filled the position admirably, making little witty sallies from time to time after an appropriate and eloquent word of greeting. All members of the board of county commissioners regaled in turn. O. H. Munyon, Guy Shearer, George H. Allen and J. A. Gifford, Mr. Gifford is 80 years old but has all the wit and optimism and vigor of youth. Speakers from Twin Falls were Arthur Peavey and Dan Connor.

The people of Filer declare that the securing of the annual county fair is the best thing which they have done to accomplish, but rather that it is something to inspire them to still greater achievements and that their town will continue to be a growing spot on the map that will attract attention more and more as time goes by.

## SCHOOL TRUSTEES TO MEET IN BUHL FEBRUARY 1-3

Gathering to be Held at Time of Meeting of University Extension Agricultural School.

A meeting of all the school trustees of Twin Falls county will be held in Buhl, on the second week in February, at which time, the traveling lectures of the agricultural department of the university will be in the west end city.

The program for the trustees will include a discussion of all matters pertaining to the school during the year in the county. The exact date for the meeting has not yet been set and the program has not been fully worked out.

## NOTED DAIRYMAN TO TALK AT CLUB ON JANUARY 13

A. J. Glover, Editor of Hoard's Dairyman Will Address all Interested on Afternoon and Night.

Dairymen and others interested in the milk and butter industry will be afforded an opportunity to hear an expert discuss the subject at the Twin Falls Commercial club on the afternoon and evening of Thursday, January 13. A. J. Glover, associate editor of Hoard's Dairyman, of Fort Robinson, Wis., will speak. A general invitation is being extended to all to be present and hear Mr. Glover, who is an authority on the subject which he discusses.

## PROGRESS TOWARD FACTORY

The papers have passed transferring the property purchased by the Amalgamated Sugar company for the factory site and complete arrangements have been made with the canal board for the use of water for the institution when constructed. The question of securing a right of way for the passage of the water along the highway will be taken up with the commissioners this week, probably by C. L. DeLong, attorney for the company. The matter to attend to will be the securing of the right of way for the Oregon Short Line spur to the site. This will soon be looked after so that the rails can be laid in time to haul the steel for the factory, which will arrive early in March.

## SNAKE WATER TO BE CONSERVED BY DAM

Wall 90 Feet High is Planned for Project.

## THREE MILLION ACRE FEET OF WATER IN RESERVOIR

Six Hundred Thousand Acres Between Bruneau and Salmon Will be Reclaimed.

Within the present month, details of the most gigantic irrigation and power project in Idaho will be perfected to an extent sufficient to enable the interests behind it to formulate their plans for co-operation, says the Boise Statesman. It involves the construction of a dam about 90 feet high at American Falls; the storage of three million acre feet of water; the irrigation of six hundred thousand acres of land between the Salmon and Bruneau rivers, and the generation of a tremendous amount of electric power. It will solve for all time the irrigation and power problems on the lower Snake river, providing it with an abundance of water for both. Its construction will necessitate co-operation between the United States government, the state of Idaho, the construction company and the settlers. This is gradually being brought about, while the United States government is ready to proceed with the preliminary work, notes the Statesman.

The condition of the national treasury and the "preparedness" program will probably make it difficult to secure the federal government, but the project has been so thoroughly engineered and is so feasible, so fully demonstrated that the co-operation is confidently expected.

Another important factor is the rural credit problem. Should it become a law, it would do much to assist in the financing, setting and development of irrigation projects.

The American Falls-Twin Falls-Bruneau, or whatever the big project will be called, is of gigantic proportions. The dam and reservoir have been completed by three different agencies and they are practically alike. The dam will be between 80 and 90 feet high. It will back the water up for a distance of about 20 miles, submerging seventy thousand acres of land and storing three million acre feet of water. The project is a part of the American Falls townsite will be submerged by back water. There are only a few farmers on the lands which will be submerged.

The water will be taken down the Twin Falls main canal on the south side of the river to the forks of the canal. From there a new canal of higher high line canal will be built and lined with cement. This canal will take in a small portion of the water of the Snake river and varying from five thousand to twenty thousand acres.

The great barrier will be the crossing of the Salmon canyon. At the proposed crossing point the Salmon canyon is about four hundred feet deep and eight hundred feet wide. It will be closed by a number of steel siphons at an estimated cost of one million dollars.

## BUCONIC LIFE IN CITY PERMISSIBLE

Forty Acre Urban Plots May Have Live Stock.

## CITY ATTORNEY DECIDES POINT IN FAVOR OF DAIRYMEN

"Mike" Cannon Appeals From Mayor - Gas Plant Plans Ready - Other Business Transacted.

The city council at its session Monday night held, on advice of the city attorney, that he declines prohibiting the keeping of hogs and the maintenance of a dairy in the city limits, except cases where located on ranches of 40 acres or more; authorized Mayor Sweezy to cast the vote of the city by proxy at the water meeting, but refused to instruct him how to vote; ordered a contract to be entered into with the telephone company for a police light; ordered the city attorney to draft an ordinance providing for the issuance of building permits; took the last steps relative to the gas franchise; constituted itself a committee for the investigation of Mayor Sweezy's action in refusing a pool table permit to D. C. Cannon; ordered the drafting of an ordinance licensing card tables, and listened to several reports.

The first business of the session was with reference to the dairy and swine raising industry within the city limits. Street Commissioner W. T. Porter reported that he had found two violations of the ordinance which was keeping a dairy inside the city limits and had disregarded some provisions of the sanitary ordinance, and were keeping hogs within the city limits.

J. Rydchak was running a dairy and raising porkers in the Rock creek canyon, also inside the limits of Twin Falls. Porter said he had ordered them to desist, but the order had been suspended by Mayor Sweezy pending investigation. J. A. Waters appeared before the council and said he was in Colorado with aged and sick mother, and could not attend the meeting. Mr. Waters said that he and his wife had a dairy and were raising pigs near the barn, which had constituted a violation of the sanitary ordinance. He said that Clark had not intentionally violated the ordinance and asked time to comply with the order to move, should it be confirmed. Mr. Rydchak asked time for a hearing on the violation of the original ordinance, as modified by an amendment passed last August.

Porter lived on tracts of 40 acres or over, it was held that they had not violated the ordinance in this respect. The first time to this session, New Year was already becoming familiar with its surroundings, after a two hour residence when they had goodbye and good luck for another twelvemonth.

Mr. Cannon complained that Mayor Sweezy had refused to grant him a permit for reasons which were insufficient to Cannon. The mayor had said that whiskey had been, according to common report, consumed on the premises that it was reported that there had been gambling with cards at the tables and that it was in an out of the way place. Mayor Sweezy (Continued on Page 4.)

## POTATO BREAKFAST AT THE ROGERSON

The potato breakfast planned by the Commercial club for January 21, will be held at the Rogerson cafe. The breakfast will be one of the events of the season and the committee in charge intimates that when its plans are perfected and the project is carried out, the people of Twin Falls Epicureans will all make a grand rush to get in on the feast.

## ROGERSON RECEPTION PROVES JOLLY AFFAIR

Music and Gay Cabaret at Function Held in Honor of Idaho Pioneer at Popular Hysteria.

The largest crowd that ever assembled in the spacious lobby of the Rogerson Hotel gathered New Year's eve to help the genial Californian proprietor greet the coming of 1916. The crowd was representative, the old school Idahoan who was here more than a generation ago when Bob Rogerson slept on the present site of Twin Falls in the shelter of a sage brush with the snow three feet deep and the thermometer threatening to go out of business, met with staid business men, active members of the professions and touched elbows with the gay social cavalier, who came to witness the advent of the cabaret dinner on the field for which the cowman and the sheepman battled with the red Indian and with one another when the host of the night arrived from the land of the heather.

The Italian Strollers furnished the music for the occasion and looked as if they were born under the shadow of Vesuvius and inherited the fiery fervor of that famous mount, but they were exhibiting the versatility of the Alentejo orchestra and its auxiliaries. Mr. Wilton Peck and Mr. Alfred Olsen, in the lobby the lango was the favorite dance, while in the adjoining cafe, the cabaret was the exclusive corpsicorphean feature. The dancing continued until about 2 o'clock in the morning. It was interspersed with singing. While the orchestra played for the dance in the lobby, Mr. Wilton Peck and Miss Alvina, vocalist, gave vocal solos in the cafe, after which the singers changed places with the musicians and the dancers in the lobby rested while their friends in the cafe indulged in the cabaret. A feature was the dancing of the cabaret in the lobby, where the dancers were seen among the diners by Mr. Peck and Miss Alvina, vocalist.

A troupe from the Orpheum added to the pleasure of the occasion late in the evening. The arrangement of the cafe reflects great credit on the taste and judgment of its proprietor, Mrs. Atroll, who planned everything from the decorations. It shows that Twin Falls has a dining hall equal to the best in Salt Lake City or Boise. Many requests have been received for making the cabaret a permanent feature, at least for a repitition of a similar entertainment in the near future. As the cabaret was a delightful and wholesome diversion during the dining hour.

In the lobby punch was served to the guests. The time of the New Year was already becoming familiar with its surroundings, after a two hour residence when they had goodbye and good luck for another twelvemonth.

## MRS. W. E. CROZIER BADLY BURNED AT HER HOME

Fire From Furnace Ignites Dress and Burns Her Hands and Arms Very Seriously.

Mrs. W. E. Crozier was severely burned by a flash of flames from the furnace at her home in this city at 9 o'clock Monday morning. Mrs. Crozier was cleaning a goose and threw part of the grease from the bird into the furnace with no bad results. A few minutes later she was standing near the furnace when suddenly the flames shot out and ignited her dress and burned her arms and face quite severely. A heavy dust cloud immediately protected her hair. She called for help but with rare presence of mind turned her attention to the burning dress and had the fire extinguished before the time her husband reached her. She is confined to her bed, but her injuries, while painful, are not serious.

## MRS. BARRETTE AND NEPHEW SMOTHERED IN THEIR ROOM

Former Resident of Twin Falls Killed by Explosion in Home at Crookston, Minnesota.

Word was received on New Year's morning by Mrs. H. Macaulay, of this city, that her mother, Mrs. Ed. Barrett and seven year old nephew, Raymond Barrett, had been asphyxiated by gas fumes in their home at Crookston, Minn., early on the previous night. Mr. and Mrs. Macaulay are relatives of Crookston on receipt of the news.

## IDAHO GOES DRY NEW YEARS DAY

Gem State Most Arid Spot in Union Since January 1

## NEW LAW IS VERY STRINGENT IN ITS PROVISIONS

No Commotion Marks Closing-Six Other States Desert Demon Rm For Plutian Charlot.

Idaho, the driest of the dry, led seven states into the prohibition column Saturday, when the saloons were closed in the wet counties and had not closed their drink parlors under the provisions of the local option law. Other states that became dry in varying degrees at the same time were Colorado, South Carolina, Iowa, Arkansas, Oregon and Washington. In several of these states, residents can obtain certain definite quantities of liquor, for use in the home or for personal use. In this state, however, even the possession of intoxicants is a criminal offense, the only exception being pure alcohol for use in the compounding of drugs and wine for sacramental purposes.

Reports from all parts of the state indicate that no effort was made anywhere to evade the provisions of the law during the last hours of the reign of King Alcohol. The saloon keepers had disposed of most of their stock before the end of the year and the wholesalers shipped out their surplus before the end came. Few drunks were reported anywhere in the state, the reports in Idaho contrasting strikingly with those described in some other states. It is generally considered by advocates of prohibition that the Idaho statute is a fair test, as it leaves no loophole for evasion.

It is the most stringent of all anti-liquor laws passed by any state in the union, for possession of liquor other than for medicinal or medical purposes is a criminal offense. Conviction on the first offense is made a misdemeanor; on the second a felony. The right of search of premises for liquor is given to the state, and evidence and are satisfied that liquor is being unlawfully kept and used. By certificate in the form of an oath that the liquor is for medicinal or medical purposes, pure alcohol can be procured from drug-lagers. They are placed under a heavy license and the sale of the liquor is the sale of the intoxicants offers a very severe penalty.

The law makes it unlawful for any person, individual, firm, corporation, partnership, association, organization or club to have in his, their, or its possession, the above said, more profane liquors of any kind, excepting wood or denatured alcohol, provided, that upon the proper permit pure alcohol can be procured from drug-lagers.

## MEETING OF THE AGRICULTURE CLUB

The high school agriculture club will hold a meeting on Thursday, January 6, in the auditorium. The program will be on an interesting line. A debate will be given, the subject of which is, "Resolved, that sugar be grown in more profitable to the Twin Falls farmers, than stock raising." The speakers on the affirmative are to be Noel Bailey and Mayor Rydchak. Those on the negative are Stanley Hodges and Paul Carlson. This is not only a subject of great interest at the present time but it is one that will show what the boys are doing in school.

A reading on the practical methods of keeping up the fertility of the soil will be given by Frank Houston. There will be some valuable information in this reading.

## PAUL AFTER PILGRIMAGE WILL MAKE HIS HOME HERE

W. S. Paul, the noted breeder of fine cattle, 6 in the audience, some time ago, thinking that he could do better in the Yakima country, is back to stay. He says that he found that the much greater Washington country was not in the race with the South Side tract, and that the Inland Empire was a poor second to the Twin Falls country. He will buy a place and settle down. With away Mr. and Mrs. Paul visited friends in Pendleton, Ore., and have many kind things to say of that city.

## STATE HORTICULTURISTS MEET HERE IN FEBRUARY

The State Horticultural association will meet in Twin Falls on February 13-14, at which time their annual session will be held. There will be members present from all parts of the state and an interesting program is being arranged.

# RUSSIANS WIN ON STRIPA RIVER

Dispatches Vary as to Operations But Agree as to Outcome

## RUMANIA'S FUTURE PLANS MAY HINGE ON RESULT OF CAMPAIGN

Bulgarians Not Anxious to Aid Attack on Saloniki If This Ends Progress, German Lines Pressed.

London—Latest dispatches from the southern extremity of the Russian front indicate that heavy fighting is continuing and that the Russian army under General Ivanoff is gaining ground. One correspondent reports that operations began with an offensive movement on the Austrians' part, designed to straighten their line, and that, after repulsing the attack, the Russian assumed the initiative. It is evident the Russian advance has now extended a considerable distance beyond the Stripa river.

Other dispatches assert that two great offensive movements claimed the Russians having advanced as a threat against the Austrians in the Balkan operations, while the Austrians and Germans felt the necessity of improving their positions against an attack expected from General Ivanoff's army in the spring. Whatever may be the facts, there is no doubt that the result of the operations will have an important effect on the Balkan campaign, especially in its influences on Rumania's future plans.

It is reported with increasing frequency that the central powers are planning an attack on Saloniki, but they are said to be experiencing difficulties with Bulgaria, which, according to reports, does not wish to participate in such a campaign unless it promises more than the allies' expulsion from Saloniki.

England awaits with greatest interest the details regarding the bill for compulsory military service which Premier Asquith will introduce Wednesday. It is announced that Ireland will come within the scope of the bill.

### FOR SALE

I have a large quantity of seed potatoes of the Rural and Notted Gem varieties that I am offering for sale, reasonable terms and prices. C. A. Robinson, Bank & Trust building, Twin Falls.

# BOISE SOUSED ON DAY OF DEMON DESTRUCTION

Twin Falls Educator Says Reports of Quiet Time in Capital City Not Supported by Facts.

"If New Years eve in Boise was a quiet time, as the papers have said it was, I should hate to have been there when the crowd was really celebrating," said Miss Bertha Noel, county superintendent of Twin Falls schools, speaking of the last day of the legalized sin business in the state capital.

Miss Noel reports that the meeting of the state teachers' association at which she delivered an address was in every way a success. The meeting of the county and city superintendents, which followed the association meeting, was not so successful, as President Markel resigned last year and his successor was not appointed, so that the program was not well arranged beforehand.

There is some talk of holding the next association meeting outside of Boise, perhaps in Twin Falls, but this matter will be determined later. At the association meeting, Superintendent Hal G. Blue, of this city, discussed the subject "Improvements of School Administration in the Smaller Cities." Miss Noel made a talk on the free loycom course. Principal I. H. Downman of the Twin Falls high school was chairman of the high school section in room 228 during its sessions. All received commendatory notices from the Boise newspapers.

## LATEST SUICIDE ROUTE PROVED BAD FAILURE

Grangeville, Ida.—A novel method of attempting self destruction was indulged in a few days ago by a Salmon river rancher according to advice received in White Bird Sunday, reports the Grangeville Free Press. The would-be suicide, who is reported to have grown morbid over domestic troubles, is said to have looped a piece of quarter inch hemp rope about his neck and made the other end fast to a wagon wheel. The wheel block was then kicked loose from its grip on the wheels and the vehicle permitted to roll down a hillside of fifty per cent incline. The momentum of the wagon, instead of breaking the man's neck as was planned, jerked his neck off his foot, and dragged him seventy feet into the creek bottom. A badly peeled neck and face tell the story of the poor fellow's failure to end his own life.

Large, clean cotton rags wanted at Timon office.

# LATEST CRISIS OF GREAT IMPORTANCE

President Hurries to Washington to Get at Bottom of Affair.

OFFICIALS HOPE FOR BEST BUT ARE MUCH WORRIED

Assurances of Austrian Charge That His Country Will Satisfy All Demands, Only Day of Light.

Washington—President Wilson started for Washington from Hot Springs, Va., Monday night, to take personal charge of the nation's foreign affairs in the new crisis brought about by the sinking of the British steamship Persia, with the loss of at least one American life. The situation is regarded in official circles as being the most serious to confront the government since the submarine operations of the central powers began. The president probably will not leave the United States until the crisis has been settled. The subject is expected to find its way to the floor of the house and senate Tuesday when congress reconvenes after the holidays.

Officials here are disturbed by the fact that they are attacked by the reports received from consular agents at Alexandria and Cairo, Egypt. Every effort will be made to establish the truth, but the reports are expected to be torpedoed without warning. Secretary Lansing contemplates taking no step until the complete details are known.

Officials find one source of gratification in assurances given by Baron Arich Zwiedinek, charge of the Austro-Hungarian embassy, to Secretary Lansing during a conference Monday at the state department. Baron Zwiedinek is said to have expressed the belief that the crisis would be satisfied by the United States. The subject was fully satisfied the United States. Baron Zwiedinek also sought information for the benefit of his government.

On Framing Pictures. A few years ago I had George Bernard Shaw give a lecture before the Camera club in London. The one thing that I remember that he said was that, in going into a house, he always took the degree of culture and refinement that he found in the pictures. The minimum of that house by the width of the mats on the pictures. Of course, Mr. Shaw was trying to be funny as usual, and as usual there was lots of truth in what he said. If every one would make a tour of the house with the mind to take down those pictures with the wide white or colored mats and have them reframed closer, or if a certain one seems to demand a mat, have a very narrow one put on it, they would really be surprised to see the improvement in the appearance of the rooms. In many cases the same frames could be used; they would only need to be cut down.—Philadelphia Public Ledger.

## Important Discovery.

The discovery of a prehistoric pueblo in Nitu canyon, in the Navajo mountains of Arizona, has added materially to the archeological developments of the year. It contains at least eighty-four rooms, and is a structure which are all more or less connected with each other. In some of these most interesting specimens of ancient handwork have been found. Among them is a large, hand-painted, decorated with elaborate embroidery which is in excellent preservation, although it is known to be at least a thousand years old.

Beads of jade and other material, baskets, prayer sticks, a large variety of pottery, including several good sized ollas in the rare black and white ware and some ornate moccasins of yucca fiber, are among the articles taken from the old ruins. They will be added to the museum of the University of Arizona.

## Tongue in Cheek.

George H. Stege, president of the Society for the Prevention of Municipal Waste, says that he could easily remove New York \$17,000,000 a year.

"To praise New York's economy," said Mr. Stege the other day, "one would have to speak with the tongue in the cheek—like the girl at the dance, you know."

"A fat man danced to a girl at the dance. 'It's very kind of you to be so kind to me,' the girl said, 'but I'm not in the room.'"

"Here he trod on her foot for the eleventh time, and the girl answered sweetly."

"Oh, how can you say so? Why, you hardly seem to touch the floor."

Bale your hay and store it now. Don't wait until the rain and snow causes a heavy damage. Lots of good storage room. Phone 708-W. John Pinke. —Adv. Dec. 31, 1917.

# THE HUDSON SUPER

SIX

was presented to the American public December 31st at the New York Show. Announcements are now appearing in the leading national magazines.

The knell of the many cylinder car has been struck—Every excuse for their existence vanished with the birth of the Hudson Super Six.

The Super Six has officially broken all the world's stock car records.

Our fondest hopes are more than realized—The Hudson is today the world's most popular medium priced car—it is destined to revolutionize the trend of automobile design—The powerful becomes omnipotent.

Watch for the announcement of the arrival of the first Hudson Super Six in Idaho—about January 15th.

In the meantime, write us for a catalogue.

# JOHNSON AUTO SALES CO.

Distributors for Southern Idaho

TWIN FALLS

"JOHNSON SERVICE"

## AUTOMOBILISTS WHY TAKE A CHANCE?

T. W. Rickard, Conductor and Safety First Committee, Oregon Short Line Railroad company.

"Let it not be overlooked that the number of highway crossing accidents has increased in the past year, due to careless driving of automobiles while on railroad property, and especially on highway crossings. It is estimated that one out of every five automobiles that cross a railroad track is involved in an accident. It is the duty of every automobilist to take the necessary precautions to avoid such accidents without the co-operation of the public in general."

"The engineer pulling the train is the direct representative of the railroad in approaching highway crossings, and the chauffeur driving the automobile approaching the railroad crossing on highway is the direct representative of the public. Now will these two important gentlemen holding responsible positions in their hands the lives of others, and in the hands of the engineer and the driver of the automobile to eliminate accidents on highway crossings. About all an engineer can do is to keep a close watch, ring the bell blow the whistle in accordance with the rules set up by the railroad company. In order to maintain proper train schedules the engineer must assume that the automobile drivers will either stop or else make railroad crossings in plenty of time to avoid any hazard of accident."

"At this time all over the country, railroads are being asked to abolish grade crossings or to install grade crossing signals and many other devices to protect the public. This requirement due to the large number of many recent accidents to automobiles at grade crossings. This, to the public's lack of knowledge of the cause, in the opinion of the railroad company, is justified by asking the immediate action on the part of the railroads to protect the drivers of machines. Should not the drivers, who are in the position to protect their own lives and those interested in their care? Statistics show that the majority of these accidents are due to carelessness on the part of the driver of the automobile driver. Should not the driver, who is in the position to protect his own life and those interested in his care, be asked to take the necessary precautions to avoid such accidents without the co-operation of the public in general?"

"How long will the public stand for these accidents? How long will the public stand for these accidents? How long will the public stand for these accidents?"

"Owners of automobiles as a rule are among our best and most highly respected citizens, and they will not hesitate to get back of any reasonable movement to protect the life and limbs of themselves and their friends."

"People, just at the present time, cannot seem to picture themselves lying dead or injured through careless driving, so they continue to detect death by a hair, to skip out of the way just in time when their machine crosses over railroad tracks. As a result, the public is in a state of panic, and it is not in time, all due to taking a chance. WHY TAKE A CHANCE?"

Few people seem to be on the job to preserve their own life. It's the same old story. They walk the tracks and cross them in a sort of trance apparently. They are not thinking of the train. The result is generally death. The only solution is: Watch out for yourself and in doing so you save others. Many times the life you have noticed that the line of the least resistance leads a person on to serious accidents. So don't take chances. It's a good warning. This is not in time, all due to taking a chance. WHY TAKE A CHANCE?"

The regular meeting of Twin Falls Lodge No. 7, O. W. will be held Wednesday evening, January 23. The annual election and installation of officers can be held at that time. Several candidates will be initiated. J. O. BLACKSTONE, —Adv. Dec. 31, 1917.

## STILL LOOK TO AEROPLANE

Military Experts Have by No Means Abandoned Faith in This Weapon of Warfare.

It is an acknowledged fact that a moving aeroplane is an abnormally difficult target, no matter from what distance it is aimed at, because the airman can easily adopt rapid and erratic flight and repeatedly alter the direction of his progress. In a recently published book, "Aircraft in the Great War," by Claude Grahame-White and Harry Harper, the authors discuss the possibilities of duels in the air.

"If against flying craft the land guns are largely impotent—and in this war they have been—there is still the air. The air is here and here as we have indicated, there is scope for daring work. But there is one adverse factor."

"Even a motor of 200 horse power—almost the limit today—gives none too much power for a large and heavy craft; and for this reason, if a machine has a gun and ammunition and carries in addition the weight of a pilot and a combatant, its speed may be so reduced that, when it seeks combat with some high-speed hostile scout, it will fly so slowly that the enemy, having no such burden to check his pace—can fly out of range and so escape."

"Had there been enough machines, air fighters would have played a leading role. But, as it is, the air scout has been hampered merely in his work, and this to no great extent, instead of being driven from the air."

## GET BEST MILK IN WINTER

Recent Investigations Serve to Show That Former Popular Impressions Have Been Wrong.

It has always been believed that milk, butter and other dairy products are at their best in the spring and summer, when the cows have the best pastures. But recent investigations conducted by the Massachusetts state board of health fail to bear out this widespread popular belief. They indicate, on the contrary, that under current conditions the milk obtained in summer is of a higher quality than that obtained in the winter when the cows are shut up in stables.

At a temperature of 50 degrees the bacteria in milk will increase in 24 hours from 100 to 100,000 times the initial number, while at 70 degrees they will multiply 40,000 times. This is why milk should be kept cold. Milk will not sour for several days if packed in ice.

## TEST IRON CASTINGS WITH PILE DRIVER

"MAN WITH THE SLEDGE" GIVES WAY TO MACHINE AT DODGE BROTHERS

Method Used in Testing Railway Car Wheels Now in Use in Big Motor Car Plant.

Shop practice at the ordinary foundry provides for testing the strength of iron castings by having a brawny workman try to demolish them with a sledge.

But his work is hardly uniform, as some days he feels stronger than others and some days he is not. It is not always available for the job.

Then, too, there are castings that a man with a sledge is not able to break. Railway car wheels are in this class and in the big car plants a modified pile driver is used. Each wheel, on the strength of which may depend many lives is required to show strength much greater than it will ever be called on to display in actual service.

Dodge Brothers have applied this pile driver system to testing iron castings used in the manufacture of motor cars. Some are taken from the castings of castings to the physical laboratory. One is subjected in a "big" to a solid base. A hammer weighing 50

pounds is lifted to a certain height, according to the strength of the blow to be given, and dropped on the casting. It must stay a given number of these blows if it shatters under the attack and if the other samples break the same way it means that the batch is not up to the standard demanded and the junk pile is augmented accordingly.

A table of standards has been worked out so that the laboratory experts know just how much each casting must stand. And, of course, the stress put on them is far greater than they will ever be called on to face in actual service.

## "FICKLE FATTY'S FALL" IN TRIANGLE'S BILL

Like all the Keystone comedies, which are under the sign of the Triangle, "Fickle Fatty's Fall" will appear exclusively at the Grahams the next Friday and Saturday. Jolly Fat Joscoe Arbuckle keeps things moving from start to finish, as the butcher boy, and his misadventures, which he manages to come out of with flying colors, are irresistible in prospect of laughter. While it is comical, there are some breathless and hair-raising adventures in runaway autos and falls off the dock and rescue from drowning, but the activity of the participants baffles all thought of possible tragedy.

Joscoe Arbuckle as the fat boy husband, is a sight to behold. In the picture, "Fickle Fatty's Fall" (Phyllis Allen) sends him to the kitchen to stop a fight between the cook and the butcher boy. Dishes, vegetables and his raising adventures in runaway autos and falls off the dock and rescue from drowning, but the activity of the participants baffles all thought of possible tragedy. Joscoe Arbuckle as the fat boy husband, is a sight to behold. In the picture, "Fickle Fatty's Fall" (Phyllis Allen) sends him to the kitchen to stop a fight between the cook and the butcher boy. Dishes, vegetables and his raising adventures in runaway autos and falls off the dock and rescue from drowning, but the activity of the participants baffles all thought of possible tragedy.

## OWNS NO PREDATORY ANIMAL, TAXPAYER KICKS

The state predatory animal tax which the Idaho body politic by the last legislature made it obligatory on all property holders of the state to pay their share, according to the amount of worldly goods they possess, has been paid to slayers of beasts of prey in this state. The item is small and is generally understood by the tax payers. There is evidently no taxpayer in Bonner county who did not understand the meaning of this assessment, as the following extract from the record to the county treasurer will show:

"Your notice concerning real estate, personal property and improvements speaks of a predatory animal for which you presume to collect 11c."

"Now I don't remember having such a tax in my possession. I had a Bull calf less than a year old and mentioned it to the deputy assessor, in fact he saw it and said it was simply a calf and not assessable, here comes a notice of predatory animal. Why?"

"Neither do I propose to pay tax on a predatory animal when I never had one not haven't now, even if it was only one cent. It isn't fair."

Pend d'Oreille Review.

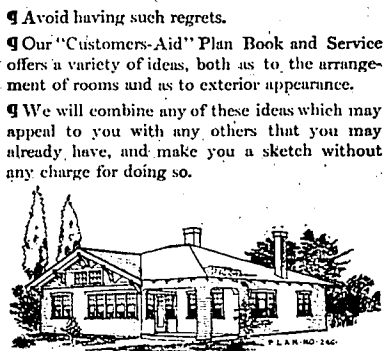

Bale your hay and store it for 5 cents per ton. Telephone 708-W. Do not wait for the rain and snow to cause a heavy damage. Lots of good storage room. Phone 708-W. John Pinke. —Adv. Dec. 31, 1917.

Aggressive use of the classified coupons will result in good properties, in or out of season, and practically cut out losses from vacancies.

A repetition of your want ad. is the course of your quest for a cook, may be good policy.

## A Farmer's Borrowing

Is a good sign. The average farmer who borrows money from his bank does so not because his farming is not profitable, but because he sees an opportunity to make more money.

Advanced methods, increased knowledge of soil and crop requirements, rotation, seed selection, improved tillage, modern machinery, bigger returns and higher prices for his produce—all these have combined to help the farmer and make him a desirable borrower at this bank.

### STORIES THAT DO NOT MIX

Tales of Spooks and the Valuation of Real Estate Should Be Told on Separate Pages.

The ghost story ranks with the immortals. Science, education, a strong skeptical view of the supernatural, have been unable to banish it. It digs its nails in and hangs on though all the winds of progress try to blow it out of existence.

A New York newspaper gives a first-page column to a ghost story. A fine old mansion in Connecticut is about to be torn down because the spooks and shades have rendered it untenable to the ordinary mortal. Until two years ago the house was occupied by an amiable and unexcitable matron. She heard ghosts clanking their chains in the halls. But she never bothered her head about it. The specters of her crinolines did not disturb her. When cannon balls came rolling down the stairs she merely said "Dear me," and rolled over and went to sleep again. Only one thing made her peevish. There was a trap door in the kitchen and when the cook made apple pie, that door would rise slowly and the cook would depart suddenly. It was always a lot of trouble hunting for new cooks. The lady said all this special playfulness was nothing to her, because it was carried on by her ancestors, and they couldn't possibly do her harm. But she is gone, and no one as courageous or indifferent has appeared on the premises. So the house has to come down.

Ghost stories are interesting reading. They will probably always be entertaining. But when they get mixed up with the real estate business an appeal ought to be made for an injunction.

### THEIR DUTIES TO "SOCIETY"

Women Would Find It Hard to Answer Why They Assume Responsibilities of Position.

Everyone knows what "society" is, although to anyone who did not it would be difficult to explain. Men laugh at it, but it is not to be laughed at. With a power as strong as the church, or stronger, it lies about us, impalpable, whimsical, almost irresistible. It may take all a woman has to give, and give her back, or it may give everything it has to give, and demand little. Whether it is woman's highest duty, or her toy, has apparently not been decided. Whether those who give themselves to it most entirely do so in an abandonment of self, or in a spirit of high sacrifice, one cannot say. The inveterate habit, common to all people, of dressing up whatever they are doing in a cloak of morality, has in this case no comparative advantage. The society critic that it is impossible to tell what is pleasure and what is crucifixion. Women dress, not because they like to look pretty, but because they "owe it" to their husbands, or their children, or to society. They make calls and give dinners, not because they like it, but because they feel themselves obliged to, and they are glad when it is over. They go to parties, not because they expect to have a good time—they profess to be bored by them—but because for various reasons it seems necessary to.—Atlantic Monthly.

### Gets Gun Lost Twenty Years.

A double-barrel shotgun with a peculiar nick in one of the barrels was picked-up for a small price several days ago in a pawnshop by Joseph Smith, detective in a New York hotel, who afterward went to Chief Engineer E. C. Bingham of the hotel to ask how the flaw could be removed. In the course of the conversation the chief engineer described an old type Green's shotgun he lost 20 years ago on a hunting trip in Illinois. He had borrowed the gun from his brother. Chief Bingham told Detective Smith to bring in the shotgun. As soon as he saw it he offered to trade him for a new shotgun and \$3 to boot. Mr. Smith accepted the offer without hesitating. Again the chief engineer inspected the weapon minutely, looked at the barrel, and told Detective Smith he was convinced the gun was the one he lost. He said he would have been willing to give \$100 to recover it. The shotgun was in a good condition.

### Slandereous Attack Resented.

"A historical writer has at last found the man who best Franklin Pierce at checker." No wonder. It has taken over half a century to find him," says the Montgomery Advertiser. As a stalwart defender of every son of New Hampshire, and as one somewhat acquainted with the temperamental checker players, we do not hesitate to say that no man ever bested Franklin Pierce at checkers. If the trick had ever been turned the fellow who did it would have been bragging about it from that day to this.—Manchester (N. H.) Union.

### Lord Sandwich's Drum Room.

The eccentric Lord Sandwich had, according to his biographer, a strange passion for the thunder of big drums, for the gratification of which passion he had caused the entire side of one large music room in his mansion at Hlinbrook to be covered with parchment, so that when it was struck with a massive stick it gave out a roar sufficient to terrorize any sensitive soul. Many who heard this drum once shook positively declined ever to enter the apartment again lest they should be given a second performance, says the St. Louis Republic.

### FROM A LOVER OF BOOKS

Advice and Instruction as to Their Proper Usage Which is Well Worth Consideration.

We are . . . exercising an office of . . . play when we treat books carefully, and again when we restore them to their proper places and commend them to the careful custody . . . We deem it expedient to warn our students of various negligences, which might always be easily avoided and do wonderful harm to books. And in the first place as to the opening and closing of books. It is a common error, that they be not unclipped in precipitate haste, nor when we have finished our inspection to be put away without being duly closed. For it behooves us to guard a book much more carefully than a book . . . But the handling of books is specially to be forbidden to those shameless youths, who as soon as they have learned to form the shapes of letters, straightway, if they have the opportunity, become unwhipped commentaries, and wherever they find an extra margin about the text, furnish it with monstrous alphabets, or if any other frivolity strikes their fancy, at once their pen begins to write it. There the latinate and sophist and every unlearned writer tries the fitness of his pen, a practice that we have frequently seen injuring the usefulness and value of the most beautiful books . . . moreover, the latter, who look at a book turned up the inside just as if it were open in the right way, are utterly unworthy of any communion with books. Let the clerk take care also that the scullion . . . does not touch the fly leaves of books, all unwashed, but he who walks without bloodstained minister to the precious volumes. . . . Whenever defects are noticed in books, they should be promptly repaired; since nothing spreads more quickly than a tear, and a rent which is neglected at the time will have to be repaired with usury.—From the Prolibion of Richard de Bury, King's Classics Edition.

### KNOWN AS FRIEND OF BIRDS

William Dutcher Remembered for His Unceasing Fight Against Their Enemies.

In the American Magazine appeared an article about William Dutcher, who did more than any other American to awaken people to the cruelty and stupidity of slaughtering beautiful and useful birds. He and others finally succeeded in having laws passed so far-reaching that they changed the whole aspect of millinery. In the hard struggle Mr. Dutcher sacrificed his health. Following is an extract from the article about him: "Nothing ever tired or discouraged him. Ending a day's work in his office, he would jump on a train to go and do another harder day's work before midnight among the legislators at Albany. Politicians live in in their 'bird crank.' The allegro trade, which he fought from the first, spiked his guns when it could with a paid lobby. He got hard knocks and many defeats, but in 1893 his efforts were crowned with success when the Empire state passed the plumage law forbidding the sale of the white badge of cruelty."

"He never wearied of preaching the great value of insectivorous and fruit growers of the United States probably never will realize how much his labors benefited them. He cared not a feather of his weight who got the story for any of his work, so long as it was accomplished. Even the military dealers and the 'game hog,' while they fought his reforms, admitted his unselfishness. There was nothing he would not do for anyone who showed the slightest interest in his hobby."

Breadth of Heart. But after all, what is happiness? Efficiency, wealth, material comfort? Many by their lives do so affirm; few are cynical enough to say so, and on their deathbeds none will feel so. Not even freedom in itself brings happiness. Happiness lies in breadth of heart. And breadth of heart is that inward freedom which has the power to understand, feel with and, if need be, help others. In breadth of heart are founded justice, love, sacrifice; without it there would be no special meaning to any of our efforts, and the tale of all human life would be still no more than that of supremely gifted animals, many of whose communities are highly efficient, and have an instinctive unity founded on experience of its utility, but none of that conscious altruism which is without perception of future benefit to self, and works from their recognition of its own beauty. It is not a matter of more and more, and each other, and all that this carries with it.—John Galworthy in the Atlantic Monthly.

### Cellulose in All Vegetable Tissues.

Of course, the extensive use of wood pulp for articles of clothing is not strange. Cellulose, which is employed in enormous quantities in the fibrous state in the form of cotton, linen, jute, hemp, etc., is the chief component of all vegetable tissues, in which it exists in elongated cells called fibers. Cotton wool and filter paper are almost pure cellulose. It is only a matter of technical skill to convert to textile uses the cellulose of the spruce tree. Instead of using that of the cotton plant, in the manufacture of hardware purity is not so essential, high pressure and a strong adhesive being the great factors.

### OLD NAMES FOR NEW SHIPS

Appellations of Famous Sea Fighters May Again Be Used in American Fleet.

Should congress provide for the construction of several battle cruisers the navy department will in all probability name the new ships after several famous old frigates which helped to make American history, the Cincinnati Times-Star states.

The starting of a new class of ships in our navy makes possible the carrying out of this idea. Under the present system of naval nomenclature battle cruisers are designated by letters, are after cities and torpedo craft after naval heroes. Colliers bear more or less classic names, while underwater craft have been designated by useful but not significant letters and numbers. Commemorative names have been taken great interest in ships bearing their names, but at the same time the present rule has been responsible for the disappearance from the navy lists of many names which are alive with historic interest and the flavor of naval tradition.

If the navy department puts into use the idea now under consideration Americans will in a few years glory in the spectacle of a Bonhomme Richard, Constitution or maybe a Hartford once more going to sea under the flag. The famous old Constitution is still carried, although nominally, on the naval lists. As long as she will float Americans will insist that she keep her place. But she is old. There are still left plenty of historic names which should be perpetuated and honored in our modern navy.

### LOCK OF NAPOLEON'S HAIR

Relic of Emperor, Obtained During His St. Helena Imprisonment, Sold in New York.

A lock of Napoleon Bonaparte's hair, obtained while he was at St. Helena, was bought by George D. Smith for \$187.50 from the John E. Ruston library sale in the Anderson galleries at New York. It is preserved within folio sheets of celluloid and was accompanied by a letter of Capt. Thomas Popleton of the Fifty-third regiment, who was "permanently ordered" over Bonaparte until the close of 1817.

The library of the Nebraska university paid \$280 for a fine copy of John Kingsborough's "Antiquities of Mexico," published in London in 1831-48. J. E. Lewis gave for a manuscript Korean written in the seventeenth century, in red and black on native glazed paper. Each page is within ruled gold lines and the first two pages are surrounded by ornamental borders in gold and colors.

### Seals Again Plentiful.

Under the precautions taken to prevent the extinction of the fur seals in Alaska, and the Pribilof islands the species has multiplied so rapidly that the bureau of fisheries now recommends that the killing of male seals be resumed.

Ever since the signing of the peacemaking treaty between Russia, England, Japan and our own nation, prohibiting the destruction of cow seals upon the high seas, the government has taken an occasional census of the seals. The last of those fixed the number of seals owned by the United States at 201,544, against less than twenty thousand in 1905.

Besides fur, other possible use of the seal is being considered by the bureau of fisheries. The scarcity of the world's meat supply and the tremendous increase in demand as revealed by the last census suggest the shipping of seal meat to the United States for food. Those who have tasted it say that meat from a young seal is delicious in flavor and that seal steak would be a popular addition to a fashionable hotel menu.

### English Writer's Ignorance.

Duke Chalmers, the essayist, was talking about war writers. "A great grist of English literary history," he said, "were thrown out of regular work when the war began, and so they all turned themselves into 'our military correspondent,' and landed out optimistic soothing sirups to the public, the daily prose at a gallop, a column. "One writer reminds me of the young lady who once carried on a glib naval argument with Admiral Mahan at a dinner. A third person said to her in some astonishment: "Why, how well you talk up to the admiral on these abstruse naval topics!" "Oh," said the young lady, "I've only been concealing my ignorance." "Not at all," said Admiral Mahan, gallantly. "Quite the contrary."

### First Telegraphing.

New world's records for fast and accurate telegraphing were made at the international telegraphic tournament in San Francisco a few weeks ago.

Richard C. Bartley transmitted the fastest and most perfect "Morse" by ticking off 40 railroad messages without an error in 20 minutes and 15 seconds, and beating the automatic transmitters.

George W. Smith, Jr., won the recording contest by taking and transcribing without an error 40 railroad messages in 21 minutes and 15 seconds.

### American Linotype to Africa.

The first American linotype machine has recently arrived in Tripoli, Africa, and been installed by La Nuova Italia, the only newspaper in the colony.

### HUDSON SUPER SIX CREATES BIG SENSATION

The announcement of the Hudson Super Six has created the big sensation of the New York Automobile show where it is now being exhibited. When the rumor became current that the Hudson people were going to bring out a new model the first of the year the motoring public was interested. When reports of the wonderful performance of the Super Six leaked out the public was enthused. And when the announcement came they were not disappointed. The Hudson Super Six has officially broken all the world's stock records under the supervision of the American Automobile Association, and this wonderful motor is embodied in the most beautiful car that ever left the Hudson shops.

Manager E. S. Johnson of the Johnson Auto Sales company, distributors for southern Idaho has some very interesting facts concerning the new car. He said yesterday:

"Naturally, we are very enthusiastic concerning the coming season's business. The Hudson people are putting out a wonderful car, a car which supercedes all their previous efforts. New design, patented by Hudson, they have almost entirely eliminated vibration and reduced friction to the lowest possible degree, and the power which is ordinarily wasted is converted into working energy. Hence the high efficiency which increases the power 80 per cent with the same size motor and the same fuel consumption."

The Johnson Auto Sales company will receive their first Hudson Super Six about January fifteenth. In the meantime the sales force is eagerly preparing for its arrival and they have already accepted several orders for early spring delivery.

### NOTICE

After this date I will not be responsible for any debts contracted by my wife, Mrs. A. Curtis, as she has left my bed and board, without just cause or provocation.

## RUSSIANS WIN ON STRIPA RIVER

Dispatches Vary as to Operations  
But Agree as to Outcome

### RUMANIA'S FUTURE PLANS MAY HINGE ON RESULT OF CAMPAIGN

Bulgarians Not Anxious to Aid Attack  
on Saloniki If That Ends Progress,  
German Lines Pressed.

London.—Latest dispatches from the southern extremity of the Russian front indicate that heavy fighting is continuing and that the Russian army under General Ivanoff is gaining ground. One correspondent reports that operations began with an offensive movement on the Austrians' part, designed to straighten their line, and that, after repulsing the attack, the Russians assumed the initiative. It is evident the Russian advance has now attained a considerable distance beyond the Stripa river.

Other dispatches assert that two great offensive movements, claimed by the Russians having advanced as a threat against the Teutons in the Balkan operations, while the Austrians and Germans felt the necessity of improving their positions against an attack expected from General Ivanoff's artillery in the spring. Whatever may be the facts, there is no doubt that the result of the operations will have an important effect on the Balkan campaign, especially in its influences on Rumania's future plans.

It is reported with increasing frequency that the central powers are planning an attack on Saloniki, but they are said to be experiencing difficulties with Bulgaria, which, according to reports, does not wish to participate in such a campaign unless it promises more than the allies' expulsion from Saloniki.

England awaits with greatest interest the details regarding the bill for compulsory military service, which Premier Asquith will introduce Wednesday. It is announced that Ireland will come within the scope of the bill.

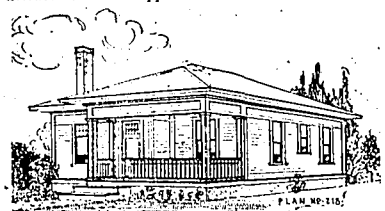

### FOR SALE

I have a large quantity of seed potatoes of the Rural and Nette-Gem varieties that I am offering for sale, reasonable terms and prices. C. A. Robinson, Bank & Trust building, Twin Falls.

—Adv. Dec. 31, 1915.

"I wish I had taken time enough to have planned the house a little more carefully."

"I realize now that it might have been more conveniently arranged, and that it would not have cost any more to have had a modern looking and a highly attractive outside appearance."

¶ Avoid having such regrets.

¶ Our "Customers-Aid" Plan Book and Service offers a variety of ideas, both as to the arrangement of rooms and as to exterior appearance.

¶ We will combine any of these ideas which may appeal to you with any others that you may already have, and make you a sketch without any charge for doing so.

¶ This is merely a part of the service which we as modern building supply merchants are rendering to our customers.

¶ Our lumber office is a clearing house of building ideas—the place to go for help in working out your building problems.

C. E. Lay, Manager, Twin Falls, Idaho.

## BOISE SOUSED ON DAY OF DEMON DETHRONEMENT

Twin Falls Educator Says Reports of  
Quiet Time in Capital City Not  
Supported by Facts.

"If New Years eve in Boise was a quiet time, as the paper, there said it was, I should have to have been there when the crowd was really celebrating," said Miss Bertha Noel, county superintendent of twin Falls schools, speaking of the last day the legalized gin business in the state capital.

"I walked up and down the main street and the sidewalks were crowded with drunken, reeling men, who sang and shouted in an intoxicated manner," she added.

Miss Noel reports that the meeting of the state teachers' association at which she delivered an address, was in every way a success. The meeting of the county and city superintendents, which followed the association meeting, was not so successful, as President Markel resigned last year and his successor was not appointed, so that the program was not well arranged beforehand.

There is some talk of holding the next association meeting outside of Boise, perhaps in Twin Falls, but this matter will be determined later.

At the association meeting, Superintendent Hal G. Blue, of this city, discussed the subject "Improvement of School Administration in the Smaller Cities." Miss Noel made a talk on the free library course, Principal C. E. Dewanna of the Twin Falls high school was chairman of the high school section in room 226 during the session. All received commendatory notices from the Boise newspapers.

### LATEST SUICIDE ROUTE PROVED BAD FAILURE

Grangeville, Ida.—A novel method of attempting self destruction was indulged in, a few days ago by a Salmon river rancher according to advices received in White Bird Sunday. The would-be suicide, who is reported to have grown morbid over domestic troubles, is said to have looped a place of quarter inch hemp rope about his neck and made the other end fast to a wagon wheel. The brake block was then kicked loose from its grip on the wheels and the vehicle permitted to roll down a hillside of fifty per cent. incline. The momentum of the crash, instead of breaking the man's neck as was planned, jerked him off his feet and dragged him seventy-five yards into the creek bottom. A badly bruised neck and face tell the story of the poor fellow's failure to end his own life.

Large, clean cotton rage wanted at Times office.

## LATEST CRISIS OF GREAT IMPORTANCE

President Hurries to Washington  
to Get at Bottom of Affair.

OFFICIALS HOPE FOR BEST BUT  
ARE MUCH WORRIED

Assurances of Austrian Charge That  
His Country Will Satisfy All Demands, Only Ray of Light

Washington.—President Wilson started for Washington from Hot Springs, Va., Monday night, to take personal charge of the nation's foreign affairs in the new crisis brought about by the sinking of the British steamship Persia, with the loss of at least one American life. The situation is regarded in official circles as being the most serious to confront the government since the submarine operations of the central powers began.

The president probably will lay the facts thus far established before his cabinet Tuesday. The destruction of the Persia following closely upon the crisis precipitated by the Ancon disaster, may result in the United States determining to settle immediately all the questions involved in the submarine warfare. The subject is expected to find its way to the floor of the house and senate Tuesday when congress reconvenes after the holidays.

The United States State department Monday night was kept busy preparing and determining to take any action that the facts concerning the Persia, yet to be disclosed, may warrant. Officials still are trying to view the situation with an open mind, but it is apparent that they are disturbed by the reports received from consular agents at Alexandria and Cairo. Every effort will be made to establish the truth of the report that the Persia was torpedoed without warning. Secretary Lansing contemplates taking no step until the complete details are known.

One's find one source of gratification in assurances given by Baron Arich Zwiedinek, charge of the Austro-Hungarian embassy, to Secretary Lansing during a conference Monday at the state department. Baron Zwiedinek is said to have expressed the belief that the explanation for the incident was the malfunctioning of the ship's gun. He said to have assured the secretary of his belief that if an Austrian submarine commander violated the rules of humanity, his government would be quick to take action which would fully satisfy the United States. Baron Zwiedinek's assurance is regarded by the public for the benefit of his government.

On Framing Pictures.

A few years ago I heard George Bernard Shaw give a lecture before the Camera club in London. The thing that I remember that he said was that, in going into a house, he would always tell the degree of culture and refinement there was in that house by the width of the mats on the pictures. Of course, Mr. Shaw was trying to be funny as usual, and as usual there was lots of truth in what he said. If every one would make a tour of the house with that in mind, take down those pictures with the wide white or colored mats and have them reframed close, or if a certain one seems to demand a mat, have a very narrow one put on it, they would really be surprised to see the improvement in the appearance of the rooms. In many cases the same frames could be used; they would only need to be cut down.—Philadelphia Public Ledger.

### Important Discovery.

The discovery of a prehistoric pueblo in Nitu canyon, in the Navajo mountains of Arizona, has added materially to the archeological developments of the year. It contains at least eighty-four rooms, or apartments, which are all more or less connected with each other. In some of these most interesting apartments the same handiwork have been found. Among them is a large, handsome shawl covered with elaborate embroidery which is in excellent preservation, although it is known to be at least a thousand years old.

Beads of jade and other material, baskets, prayer sticks, a large variety of pottery, including several good-sized ollas in the rare black and white ware and some ornate moccasins of suede, floor, and the articles were taken from the old ruins. They will be added to the museum of the University of Arizona.

### Tongue in Check.

George H. Stege, president of the Society for the Prevention of Municipal Waste, says that he could easily save New York \$17,000,000 a year.

"To praise New York's economy," said Mr. Stege the other day, "one would have to speak with the tongue in the cheek—like the girl at the dance, you know."

"A fat man parted to a girl at the dance: 'It's very kind of you to hesitation with me—me, the worst hesitation in the room.'"

"Here he trod on her foot for the eleventh time, and the girl answered sweetly:

"Oh, how can you say so? Why, you hardly seem to touch the floor."

Have your hay and store it now. Don't wait until the rain and snow causes a heavy damage. Lots of good storage room. Phone 708-W. John Pinke.

—Adv. Dec. 31, 1915.

# THE HUDSON SUPER SIX

was presented to the American public December 31st at the New York Show.

Announcements are now appearing in the leading national magazines.

The knell of the many cylinder car has been struck—Every excuse for their existence vanished with the birth of the Hudson Super Six.

The Super Six has officially broken all the world's stock car records.

Our fondest hopes are more than realized—The Hudson is today the world's most popular medium priced car—it is destined to revolutionize the trend of automobile design—The powerful becomes omnipotent.

Watch for the announcement of the arrival of the first Hudson Super Six in Idaho—about January 15th.

In the meantime, write us for a catalogue.

### AUTOMOBILISTS WHY TAKE A CHANCE?

T. W. Rickard, Conductor and Safety First Committee, Idaho Division of the First Committee, Oregon Short Line Railroad company.

"Let it not be overlooked that the number of highway crossing accidents has increased in the past year, due to careless driving of automobiles while on railroad property, and especially on highways crossing railroad tracks. It is no secret that the situation is more keenly than the average railroad manager, but he knows that it is impossible for him to eliminate such accidents without the co-operation of the public in general.

"The engineer pulling the train is the direct representative of the railroad in approaching highway crossings, and the chauffeur driving the automobile, approaching the railroad crossing on highways is the direct representative of the public. Now will these two important gentlemen holding responsible positions join hands for Safety First and promote it all the way. The railroad manager will plan and map out all the safety ideas in the world but the issue is really up to the engineer and the driver of the automobile. It is the duty of the engineer to approach highway crossings. About all an engineer can do is to keep a close watch, and to blow the whistle in accordance with the rules set up by the railroad company. In order to maintain proper discipline, the engineer must assume that the automobile driver will either stop or else make railroad crossing in plenty of time to stop. It is the duty of the driver to stop when the whistle is blown. At this time all over the country, railroads are being asked to abolish grade crossings or establish warning devices. The public is asked to protect the public. This requirement is due, in a large degree, to the many recent accidents to automobiles at grade crossings. This is the public's lack of knowledge of the cause, in a great many instances, seems to justify asking the immediate action on the part of the public. Statistics show that the majority of these accidents are due to the carelessness and thoughtlessness of the automobile driver. Should not the public take the same precaution that street cars do before crossing over railroad tracks—STOP, LOOK AND LISTEN? The public should long will the public stand for the chances being taken by automobile drivers when their lives are at stake? Statistics show that the majority of these accidents are due to the carelessness and thoughtlessness of the automobile driver. Should not the public take the same precaution that street cars do before crossing over railroad tracks—STOP, LOOK AND LISTEN? The public should long will the public stand for the chances being taken by automobile drivers when their lives are at stake? Statistics show that the majority of these accidents are due to the carelessness and thoughtlessness of the automobile driver. Should not the public take the same precaution that street cars do before crossing over railroad tracks—STOP, LOOK AND LISTEN? The public should long will the public stand for the chances being taken by automobile drivers when their lives are at stake? Statistics show that the majority of these accidents are due to the carelessness and thoughtlessness of the automobile driver. ## A Farmer's Borrowing

is a good sign. The average farmer who borrows money from his bank does so not because his farming is not profitable, but because he sees an opportunity to make more money.

Advanced methods, increased knowledge of soil and crop requirements, rotation, seed selection, improved tillage, modern machinery, bigger returns and higher prices for his produce—all these have combined to help the farmer and make him a desirable borrower at this bank.

### STORIES THAT DO NOT MIX

Tales of Spooks and the Valuation of Real Estate Should Be Told on Separate Pages.

The ghost story ranks with the immortals. Science, education, a strong skeptical view of the supernatural, have been unable to banish it. It digs its nails in and haunts on though all the winds of progress try to blow it out of existence.

A New York newspaper gives a first-page column to a ghost story. A fine old mansion in Connecticut is about to be torn down because the spooks and shades have rendered it untenable to the ordinary mortal. Until two years ago the house was occupied by an amiable and unexcitable matron. She heard ghosts clanking their chains in the halls. But she never bothered her head about it. The wish of invisible criminals did not disturb her. When cannon balls came rolling down the stairs she merely said "Dear me," and strolled over and went to sleep again. Only one thing made her nervous. There was a trap door in the kitchen and when the cook made apple pie, that door would rise slowly and the cook would depart suddenly. It was always a lot of trouble hunting for new cooks. The said all this spectral playfulness was nothing to her, because it was carried on by her ancestors, and they couldn't possibly do her harm. But she is gone, and no one as courageous or indifferent has appeared on the premises. So the house has to come down.

Ghost stories are interesting reading. They will probably always be entertaining. But when they get mixed up with the real estate business an appeal ought to be made for an injunction.

### THEIR DUTIES TO "SOCIETY"

Women Would Find It Hard to Answer Why They Assume Responsibilities of Position.

Everyone knows what "society" is, although to anyone who did not it would be difficult to explain. Men laugh at it, but it is not to be laughed at. With a power as strong as the church, or stronger, it digs about us, impalpable, whitest, almost irresistible. It may take all a woman has to give, and give little back; or it may give everything it has to give, and demand little. Whether it is woman's highest duty, or her toy, has apparently not been decided. Whether those who give themselves to it most ontologically do so in an abandonment of self-indulgence or in a spirit of high sacrifice, one cannot say. The inveterate habit, common to all people, of dressing up whatever they are doing in a cloak of morality, has in this case so confused all the phylology of social rites that it is impossible to tell what is pleasure and what is crucifixion. Women dress, not because they like to look pretty, but because they "owe it" to their husbands, or their children, or to society. They make calls and give dinners, not because they like it, but because they feel themselves obliged to, and they are glad when it is over. They go to parties, not because they expect to have a good time—but because to be bored by them—but because for various reasons it seems necessary to—Atlantic Monthly.

### Gets Gun Lost Twenty Years.

A double-barrel shotgun with a peculiar nick in one of the barrels was picked up for a second time, thirty days ago in a pawnshop by Joseph Smith, detective in a New York hotel, who afterward went to Chief Engineer E. C. Bingham of the hotel to ask how the gun could be removed. In the course of the conversation the chief engineer described an old type Green's shotgun he lost 20 years ago on a hunting trip in Illinois. He had borrowed the gun from his brother.

Chief Bingham told Detective Smith to bring in the shotgun. As soon as he saw it he offered to trade him for it a new shotgun and \$10 to boot. Mr. Smith accepted the offer without hesitating. Again the chief engineer inspected the weapon minutely, lock, stock and barrel, and told Detective Smith he was convinced the gun was the one he lost. He said he would have been willing to give \$100 to recover it. The shotgun was in a good condition.

### Slandering Attack Repeated.

"A historical writer has at last found the man who beat Franklin Pierce at checkers. No wonder it has taken over half a century to find him," says the Montgomery Advertiser. As a slandering defender of every son of New Hampshire, and as one somewhat acquainted with the temperament of checker players, we do not hesitate to say that no man ever beat Franklin Pierce at checkers. If the trick had ever been turned the fellow who did it would have been bragging about it from that day to this.—Manchester (N. H.) Union.

### Lord Sandwich's Drum Room.

The eccentric Lord Sandwich had, according to his biographer, a strange passion for the thunder of his drums for the gratification of which passion he had caused the entire side of one large music room in his mansion at Hinchbrook to be covered with parchment, so that when it was struck with a massive stick gave out a roar sufficient to terrify any sensitive soul. Many who heard this drum once struck positively declined ever to enter the apartment again lest they should be given a second performance, says the St. Louis Republic.

### FROM A LOVER OF BOOKS

Advice and instruction as to Their Proper Use Which is a Well Worth Consideration.

We are... exercising an office of piety when we treat books carefully, and again when we restore them to their proper places and commend them to inviolable custody. We deem it expedient to warn our students of various negligences, which might always be easily avoided and do wonderful harm to books. And in the first place, the opening and closing of books, let there be due moderation, that they be not unclasped in precipitate haste, nor when we have finished our inspection to be put away without being duly closed. For it behooves us to guard a book much more carefully than a boot. But the handling of books is specially to be forbidden to those shameless youths, who as soon as they have learned to form the shapes of letters, straightway, if they have the opportunity, become unhappy commentators, and wherever they find an extra margin about the text, furnish it with monstrous alphabets, or if any other frivolity strikes their fancy, at once their pen begins to titter. There the Latinist and sophist and every unlearned writer tries the fitness of his pen, a practice that we have frequently seen injuring the usefulness and value of many beautiful books. Moreover, the litty who look at a book turned upside down just as if they were open in the right way, are utterly unworthy of any communion with books. Let the clerk take care also that the reader does not touch the fly leaves of books, all unwashed, but he who walketh without hennish shall minister to the precious volumes. Whenever defects are noticed in books, they should be promptly repaired, since nothing is more quickly than a tear, and a rent which is neglected at the time will have to be repaired with weary. From the Philobiblon of Richard de Bury, King's Classics Edition.

### KNOWN AS FRIEND OF BIRDS

William Dutcher Remembered for His Unceasing Fight Against Their Enemies.

In the American Magazine appeared an article about William Dutcher, who did more than any other American to awaken people to the cruelty and stupidity of slaughtering beautiful and useful birds. He and others finally succeeded in having laws passed so far-reaching that they clanked the wings of any slayer. In the hard struggle Mr. Dutcher sacrificed his health. Following is an extract from the article about him:

"Nothing ever tired or discouraged him. Ending a day's work in his office, he would jump on a train to go and do another day's work in the forest midnight among the legislators at Albany. Politicians lived in terror of this 'bird crank.' The algreitte trade, which he fought from the first, spilled his guns when he came with a paid lobby. He got hard-knocks and many defeats, but in 1910 his efforts were crowned with success when the Empire state passed the plumage law forbidding the sale of 'the white badge of cruelty.'"

"He never wearied of preaching the great value of insectivorous birds to agriculture; yet the farmers and fruit growers of the United States probably never realized how much his labors benefited them. He cared not for the glory or the fame that he got for any of his work, so long as it was accomplished. Even the military dealers and the 'game hog,' while they fought his reforms, admitted his usefulness. He was not a man who would not do for anyone who showed the slightest interest in his hobby."

### Breadth of Heart.

But after all, what is happiness? Efficiency, wealth, material comfort? Many by their lives do so affirm; few by their cynicism, and few, and on their deathbeds none will feel so. Not even freedom in itself brings happiness. Happiness lies in breadth of heart. And breadth of heart is that inward freedom which has the power to understand, feel with and, if need be, help others. In breadth of heart are founded justice, love, sacrifice; without it there would be no special meaning to any of our efforts, and the tale of all human life would be still no more than that of supremely gifted animals, many of whose communities are highly efficient, and have instinctive unity founded on experience of its utility, but none of that conscious ability to understand, feel with and, if need be, help others. In breadth of heart are founded justice, love, sacrifice; without it there would be no special meaning to any of our efforts, and the tale of all human life would be still no more than that of supremely gifted animals, many of whose communities are highly efficient, and have instinctive unity founded on experience of its utility, but none of that conscious ability to understand, feel with and, if need be, help others. In breadth of heart are founded justice, love, sacrifice; without it there would be no special meaning to any of our efforts, and the tale of all human life would be still no more than that of supremely gifted animals, many of whose communities are highly efficient, and have instinctive unity founded on experience of its utility, but none of that conscious ability to understand, feel with and, if need be, help others. ## DRINK SIX GLASSES OF WATER DAILY

An Interesting Statement by One of the Big Men in the Drug Business

A. E. KIESLING  
of Houston, Texas, says:  
"If you have a muddy complexion and dull eyes, you are constipated. Six glasses of water daily and one or two Bexall's Tablets at night will correct this condition and make you 'fit as a fiddle.' Bexall's Tablets, in my opinion, are the best laxative to be had, and can be taken by men, women or children."

### SURPRISED McILLIAN'S

The neighbors of Mr. and Mrs. James McMillan surprised them on the fifth anniversary of their wedding, which occurred December 23, by surprising them at their home. The surprise was complete, as far as Mrs. McMillan was concerned, but there is a dark suspicion that her husband was in some way connected with the conspiracy, as he took a notion early in the evening that they should pay a visit to the home of a neighbor, and then took an equally sudden idea that they should return to their home just at the proper time to carry out the schemes of the visitors, who had found provisions made for their entrance on their arrival. However much truth there may be to this suspicion, there can be no doubt of the fact that the evening was spent in the most enjoyable manner imaginable, and that the luncheon served was appetizing and appreciated.

Mrs. Graycroft and Miss Kautz went to Filer today to visit friends.

H. W. Lehman, manager of the Farmers' Union at Buhl, was here today.

Manager F. S. Nevin, of the Modern market, is in Salt Lake City on business.

Mrs. O. Wyatt went to Buhl today to spend a couple of days with friends.

Mrs. R. E. Swain returned to Buhl today after a visit with Mrs. W. D. Southworth.

Mrs. King, of Buhl, returned to her home today after spending a couple of days in the city.

### LOCAL TALENT ENTERTAINS AT CURRY SCHOOL HOUSE

Christmas week Miss Viola Alfante, violin, Miss Mary Hungate, reader, and Mr. William B. Coburn, piano, gave a concert at the Curry school house, which was very much enjoyed. Each number received hearty applause, to which each performer responded.

The entertainment preceded a pie social and the 25c admission charged was turned into the piano fund. After the concert, pie and coffee was served and a social evening was spent.

The following is the program:  
Piano solo, "Caprice Espagnole".....Moskowsky  
Violin solo, "Mazurka".....Zarzynski  
Reading, selected.....Miss Viola Alfante  
Piano solo, "Polonaise".....Liszt  
Reading, selected.....Miss Mary Hungate  
Violin solo, "Gypsy Dance".....Natchez  
Piano solo, "Ballad, G. Minor".....Chopin

## You've hit the right tobacco

when you fire-up some Prince Albert in your old jimmy pipe or in a makin's cigarette. And you know it! Can't get in wrong with P. A. for it is made right; made to spread-smoke-sunshine among men who have suffered with scorched tongues and parched throats! The patented process fixes that—and cuts out bite and parch. All day long you'll sing how glad you are you're pals with

It's an easy job to change the shape and color of smoke. The Prince Albert tobacco is made to spread-smoke-sunshine among men who have suffered with scorched tongues and parched throats! The patented process fixes that—and cuts out bite and parch.

## PRINCE ALBERT

the national joy smoke

You take this testimony straight from the shoulder, men. You can smoke a barrel of P. A. without a kick! It hands out all the tobacco happiness any man ever dreamed about, it's so smooth and friendly. It's a mighty cheerful thing to be on talking-terms with your pipe and your tongue at the same time—but that's what's coming to you sure as you pin your faith to Prince Albert!

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

### LEGAL PUBLICATION

CITY OF TWIN FALLS, IDAHO, DECEMBER 27th, 1915.

The City Council of the City of Twin Falls met in adjourned regular session at the regular meeting place of said board to-wit: in the Commercial Club room, on Monday, the 27th day of December, A. D. 1915, at the hour of Eight o'clock P. M.

The meeting was called to order by the Mayor, and, upon roll-call, the following members and officials were found to be present:

Mayor: E. M. Sweeney,  
Councilman: C. M. Smith,  
F. E. Bracken,  
R. E. Bobler,  
R. A. Parrott,  
R. M. Williams.

Constituting the entire City Clerk. Also present: George Horrold, City Attorney; H. E. Rounds, City Treasurer; W. F. Porter, Street Commissioner; J. M. Chambers, Plumbing Inspector.

The following, among other proceedings were duly had and taken, pursuant to law:

Thereupon Councilman Smith moved: That "All proceedings of a regular meeting of the Council, held on November 15, 1915, and all previous affirmative action had and taken by the City Council, relative to the proposition of issuing bonds for the acquisition of a waterworks system for the City of Twin Falls be expressly confirmed and ratified; and that the Mayor put said motion to the Council, and vote upon said motion resulted as follows:

Councilman Smith, Aye.  
Bracken, Aye.  
Bobler, Aye.  
Parrott, Aye.  
The Mayor thereupon declared said motion unanimously carried and duly passed, adopted and approved and ordered the proceedings of the regular meeting of November 15th to be published together with the publication of the proceedings of this meeting.

Councilman Bobler introduced and moved the adoption of the following ordinance, which ordinance was read in full by the Clerk.

ORDINANCE NO. 171.

AN ORDINANCE PROVIDING FOR THE SUBMISSION TO THE QUALIFIED VOTERS OF THE CITY OF TWIN FALLS, IDAHO, AT A SPECIAL ELECTION TO BE HELD ON THE 3RD DAY OF FEBRUARY, A. D. 1916, OF THE QUESTION OF AUTHORIZING THE CITY COUNCIL OF SAID CITY TO ISSUE \$50,000 IN BONDS OF SAID CITY, TO BE PAID BY THE CITY OF TWIN FALLS, IDAHO, IN FULL BY THE 1ST DAY OF JANUARY, A. D. 1921, FOR THE PURPOSE OF ACQUIRING THE EXISTING WATER SYSTEM OPERATING IN SAID CITY, TO BE OWNED AND OPERATED BY SAID CITY, AND TO PROVIDE FOR THE PAYMENT OF THE INTEREST AND PRINCIPLE THEREOF BY LEVY OF THE NECESSARY TAX THEREON.

WHEREAS, in the opinion of the City Council of the City of Twin Falls, Idaho, it is necessary, in order to furnish to its citizens necessary protection from fire and for the furnishing of water for domestic and commercial purposes, that the City should own its system of water works, and that it is for the best interest of said City, that the same

should be owned and operated by said City, and that the question of the acquisition of said water works system, and the issuance of bonds therefor, should be submitted to the qualified electors of the City of Twin Falls; and

WHEREAS, the City Council does deem it advisable at this time and as approximately to this time as may be possible, to hold a special election and electors of the City of Twin Falls to determine by election whether such a waterworks system should be acquired by said City, by authorizing the issuance of \$50,000 in bonds, to defray the expense of purchasing and acquiring the complete water works system, and for said City, according to the provisions of a resolution of the City Council of said City, passed on the 4th day of October, A. D. 1915, and approved by the Mayor on the 6th day of October, A. D. 1915, and published in the official paper of said City on the 20th day of October, A. D. 1915, which said resolution and offer to purchase was duly accepted on the 9th day of October, A. D. 1915, by the present owners of said water works system, the Twin Falls Waterworks Company, Limited, a corporation organized and existing under the laws of the State of Utah and authorized to do business within the State of Idaho.

NOW, THEREFORE, BE IT ORDAINED BY THE MAYOR AND THE CITY COUNCIL OF THE CITY OF TWIN FALLS, IN TWIN FALLS COUNTY, STATE OF IDAHO:

SECTION II. That a special election of the voters of the City of Twin Falls, Idaho, for the purposes above set forth, is hereby called for Thursday, the 3rd day of February, A. D. 1916.

SECTION III. That at said election, the voters qualified to vote on the said proposition, shall be those duly qualified electors of said City who are taxpayers under the law and who have paid a property tax in said City in the year next preceding said election; and said election shall be held on the 3rd day of February, A. D. 1916, at which election, there shall be submitted to the voters the question of authorizing the acquisition of the existing water works system within the City of Twin Falls, including all existing and incidental rights, franchises, property and interests therefor, for the purpose of supplying said town of Twin Falls and its inhabitants with water, for fire, domestic and commercial purposes and to provide for the payment therefor by the issuance of bonds of said City, in the aggregate amount of eighty thousand dollars (\$80,000), to be hereafter issued pursuant to ordinance of said City, in the manner, form and terms as by law required; said bonds to mature twenty years and to become optional ten (10) years from issuance, to bear interest at not to exceed six per cent per annum. The City Council of said City of Twin Falls shall prevent the application of any or all of the net surplus earnings of said water works system to the payment of said principal or interest when such application of said earnings would result in the payment of the same.

SECTION IV. The question so submitted shall be voted on at said election, which shall be held at: What is commonly known as bond sale chapel in the new building at number 123 Second Avenue West in the said City of Twin Falls, for Ward No. 1, of said City, and in the West building at 211 Shoshone Street South in the said City of Twin Falls, for Ward No.

2, of said City, by the qualified voters of said City aforesaid, and shall be by ballot in the form hereinafter described, and said election shall be held and conducted in as near the same manner as that prescribed for general and special municipal and state elections as may be possible.

SECTION V. Separate printed ballots shall be procured by the City Clerk and supplied to the election judges to be furnished to the qualified electors, and ballots shall be printed according to the following form, to-wit:

"OFFICIAL BALLOT  
CITY OF TWIN FALLS, IDAHO.  
ELECTION UPON THE QUESTION OF PURCHASING WATER WORKS SYSTEM AND THE AUTHORIZATION OF THE ISSUANCE OF \$50,000 IN BONDS FOR SAID CITY."

TWIN FALLS, IDAHO, FEBRUARY 3rd, A. D. 1916.  
QUESTION: Shall the City Council of the City of Twin Falls be authorized to issue bonds of said City in the amount of (\$50,000) to become due 20 years from date, optional redemption 10 years from date, and to bear a rate of interest not to exceed six per cent, (6 per cent) per annum, for the purpose of raising funds for the acquisition by purchase of the existing waterworks system within and near said City, to supply said City with water for fire, domestic and commercial purposes, said system to be owned, maintained and operated by said City.

ANSWER: In FAVOR of issuing bonds to the amount of Eighty Thousand Dollars (\$80,000), for the purpose stated in Ordinance No. 171.

AGAINST issuing bonds to the amount of Eighty Thousand Dollars (\$80,000), for the purpose stated in Ordinance No. 171.

IMPORTANT INSTRUCTIONS  
The voter will place an (X) in the space opposite to the right of the answer to the question above submitted, which indicates his choice.

Said ballot shall be cast by each voter marking said ballot by placing an (X) in the square opposite his choice, in the same manner now provided by the municipal and general election laws of the State.

SECTION V. No ballot for or against the question submitted shall be received from any person who is not a qualified elector of the City of Twin Falls and a taxpayer in said City of Twin Falls, under the law and defined by statute. Said vote shall be canvassed as in the manner prescribed for general and municipal elections in so far as applicable.

SECTION VI. The following named persons, qualified electors of the said City of Twin Falls, are hereby appointed judges and clerks of said election.

Ward No. 1:  
Judges: Fred Wilkerson, Geo. Taber, D. A. Seaman.  
Clerks: T. M. Robertson, R. C. Letch.

Ward No. 2:  
Judge: P. E. Dean, S. B. Camp, I. H. Braashers.  
Clerks: Friedolph Olson, C. H. Stinson.

SECTION VII. It shall be the duty of the City Clerk to arrange for and supervise the holding of said elections, not otherwise provided for herein, and to provide for the proper registration of electors and the certification of the results of the said election, in the manner now provided by law governing the holding of general municipal or state elections; and the

City Clerk and the election officials herein designated are hereby authorized to procure from the County Clerk of Twin Falls County, any books, lists, forms, data, information, etc., as may be needed in order to properly conduct the election herein provided for.

SECTION VIII. The vote cast at said election shall be canvassed and made public in the same manner as nearly the same as may be possible, as provided by law for the canvassing and return of votes cast at elections of municipal officers of the State laws governing State and County elections.

SECTION IX. The City Clerk is hereby directed to cause to be published at least weekly a notice of said election after the conclusive passage and adoption of this ordinance, beginning with said publication at least thirty days before said election is to be held, and it is hereby made the duty of the Clerk of said City to issue and cause said notices to be published and posted, as required by law. Said notice shall be substantially in the following form, to-wit:

"PUBLIC NOTICE.  
CITY OF TWIN FALLS,  
WATERWORKS BOND ELECTION  
FEBRUARY 3rd, A. D. 1916.

NOTICE IS HEREBY GIVEN that pursuant to a certain ordinance duly passed and approved pursuant to law by the City Council of the City of Twin Falls, on the 27th day of December, A. D. 1915, and numbered 171, Public Notice is hereby given that a special election is hereby called in the City of Twin Falls, to be held at what is commonly known as bond sale chapel in the new building at Number 123 Second Avenue West in the said City of Twin Falls, for Ward No. 1, of said City, and in the West building at 211 Shoshone Street South in the said City of Twin Falls, for Ward No. 2, of said City, on the 3rd day of February, A. D. 1916, at which election there will be submitted to the qualified electors of said City, who are taxpayers under the law, defining same, the following question:

QUESTION: Shall the City Council of the City of Twin Falls be authorized to issue bonds of said City, in the amount of \$50,000, to become due 20 years from date, optional redemption 10 years from date, and to bear a rate of interest not to exceed six per cent, (6 per cent) per annum, for the purpose of raising funds for the acquisition by purchase of the existing waterworks system within and near said City, to supply said city with water for fire, domestic and commercial purposes, said system to be owned, maintained and operated by said City.

The polls will be open from 8 o'clock A. M. until 7 o'clock P. M. on the 4th day of election, to-wit: the 3rd day of February, A. D. 1916.

The ballots which will be used at said election will be supplied by the City Clerk to the judges of said election and by them furnished to the voter.

Said election no elector of the City of Twin Falls will be allowed to vote unless he or she shall be a taxpayer, under the laws of the State of Idaho, and he or she shall be subject to the law, means and includes those persons only who are qualified electors under the registration and election laws of the State of Idaho, and who in the calendar year last preceding the said election paid a tax or were liable to pay a tax upon real or personal property within the corporate limits of the City of Twin Falls, which has been assessed to them and belongs to them.

IN WITNESS WHEREOF, The City Council of said City of Twin Falls have caused this notice to be published and posted by law, this 27th day of December, A. D. 1915.

(Seal)  
City Clerk.  
SECTION XI. This ordinance, after its passage, shall be recorded in the Book of Ordinances, kept for that purpose, and the same shall be authenticated by the signature of the Mayor and City Clerk, and shall be published in the Twin Falls Times, a newspaper of general circulation within said City of Twin Falls, and shall be in full force and effect after said passage, and approved by the City Council.

Passed by the City Council this 27th day of December, A. D. 1915.  
Approved by the Mayor this 27th day of December, 1915.

E. M. SWEETLEY,  
Mayor, City of Twin Falls, Idaho.

Attest: REESE M. WILLIAMS,  
City Clerk.

It was then moved by Councilman Parrott and seconded by Councilman Smith, that all rules of the Council which might prevent, unless suspended the final passage and adoption of this ordinance at this meeting, be and the same are and are hereby suspended, for the purpose of permitting the final passage and adoption of said ordinance at this meeting. The question being adopted by the Council, the motion and the suspension of the rules, the roll was called with the following result:

Councilman Smith, Aye.  
Bracken, Aye.  
Bobler, Aye.  
Parrott, Aye.

Those voting Nay: none.  
The Mayor thereupon declared that all the Councilmen having voted in favor of the adoption of the ordinance, and the said ordinance was duly passed and adopted by the City Council, and he forthwith proceeded to approve same by signing, which was attested and sealed by the Clerk.

On motion duly adopted, the Mayor ordered the adoption of the foregoing ordinance, as moved by Councilman Bracken and seconded by Councilman Bobler, the Mayor called the roll, with the following result:

Councilman Smith, Aye.  
Bracken, Aye.  
Bobler, Aye.  
Parrott, Aye.

Those voting Nay: none.  
All members of the City Council having voted in favor of said motion, the Mayor declared said motion carried, and the rules suspended.

After thorough consideration, the Council, by unanimous consent of all members, made the following determinations:

That the election should be held on Thursday, the 3rd day of February, A. D. 1916, and be governed as to polling places and officials as follows:

Ward No. 1, polling place at what is commonly known as bond sale chapel in the new building at Number 123 Second Avenue West in the said City of Twin Falls, for Ward No. 1, of said City, and in the West building at 211 Shoshone Street South in the said City of Twin Falls, for Ward No. 2, of said City.

Judges: Fred Wilkerson, Geo. Taber, D. A. Seaman.  
Clerks: T. M. Robertson, R. C. Letch.
