# Who pays the wages?

Men and women who work for wages get their pay checks from the company. Where does the company get its money?

Obviously, from the sale of its products. In other words, from other men and women who buy what workers make.

Most of what the customer pays goes for wages, directly and indirectly

If workers ask too much for their services, the

prices of the products they make get too high. Fewer customers are able to buy.

The result is fewer sales and fewer jobs.

For the sake of employes, just as much as for the sake of investors, management must keep in mind the fact that the customer pays the wages.

Thus, in the long run sales and jobs grow from a proper balance between wages and prices.
