# SENATOR TAYLOR'S "CURE"

SENATOR TAYLOR'S "CURE" "Labor peace wil come to America when the basic industries are 'nationalized." says Sen. Gien H. Taylor, who has returned to Idaho to campaign for George E. Donart, candidate for the Democratic senatorial monination in the June 11 primary. Taylor was "excused" temporarily from the senate so he could attend to "important business" back home, his mission being to selle an old political score with Son. Charles C. Gessett by supporting the latter's oppo-nent.

nent. Senator Taylor leaves no doubt in anyone's mind when he comes out for the "nationaliza-tion" of the basic industries of the United

States. "By nationalization." he says, "I mean gov-ernment ownership of such industries as coal, steel, transportation, utilities, communica-tions and aluminum"--all of which he classi-fies as a. "unonpoly"

les as a "monopoly." Admitting that nationalization or socializa-ion would have to stop somewhere, Taylor expressed the belief that private enterprise represent the ballet that private enterprise (error the Canadan staff culture at the school wrung) should continue to function in the smaller industries. Labor, he pointed out, "could industries. Labor, he pointed out, "could force and handing of wayons among the live then strike against these smaller industries. Lark of uniformity in the real could's frequent-if it wanted to, without hurting the nations Could it possibly be that Sonator Taylor has the correct slant on the mentality of the an and and derror the school wrung.

It is wanted to. without nuture control of the second of t

logic? After turning over to the government what you micht call "the guts of American bus-ness," thus making it immune from taxation and labor troubles, and subsidized by the gov-ernment, the senator presumes that the re-maining small industries would continue on -paying the taxes, carrying the brunt of our labor troubles, and meeting the brunt of our labor troubles, and meeting the brunt of our labor troubles, and meeting the source of a senator that would stem from hundreds of angles with the government in control of all the basic industries.

Industries. Let's hope that the people of Idaho aren't Let's hope that the people of Idaho aren't that dumb, senator. We can't help but believe they are smart enough to know that with coal, steel, transportation, utilities, commu-incations, aluminum and the like "nation-alized," what then remained of private enterprise in this country would be as dead as a pickled herring. The gostraments is good for private enter-prise. Oive it the control Senator Thrior suggesta and we might just as well admit we have gone socialistic.

# SURPLUS MILITARY PROPERTY

SURPLUS MILITARY PROPERTY There is enough ominous rumor and dis-turbing evidences at hand to make the senate Mead committee's investigation of surplus property disposal highly appropriate. Whatever the excuses may be, the fact re-mains that a mountain of usable military property is moving out of military hands, though the senate senate ministration, and hands of a setting an initiariarian, and the source of the senate senate setting property misses a chance to give our failering economy a shot in the arm, automobiles and trucks, cloth and clothing, lumber and other scarce materials—which the army and navy surely had on hand in great quantities-production and also put some potentially in-flationary money into circuiation. In the first us the senate to delay in moving surplus property may bring its eventual re-lease up to a time when national production has finally got into strict. To aramp the as finally got ind strict to a production the source of miltiper competing goods from the source of miltiper competing goods from the source of miltiper competing approace interaction and also put some potenting goods from the source of miltiper competing from the competing for the competing fo

market then with cheaper competing goods from the store of military leftowers would be almost certain to deliver our limping recon-version another body blow. Without attempting to find too large a dilver lining in our present clouded economic picture, it might be pointed out that atrikes and anti-OPA sildowns did offer the surplus property people one way out of a dilemma.

and anti-OPA kitdowns did offer the surplus property people one way out of a dilemma. Burplus property presents a problem in any industrial country after any major war. There is the choice of dumping it all on the market immediately and exiting the damage over with at once, or of releasing it gradu-tional states and the state of the state of the exit of the country after and the state of the row. Either count housing of the market later out, the state and the state of the state and the first lead to unhappy re-uses tharm in the end. But the end of Word way carce i them sho the hands of people who needed them and had the cash to pay. These goods would not have offered on such problem. There was a snough pent-up demand to assure a good market for almalar products when they finally did get into retail channels. But instead, the has been deay all shore the the arket hor almap the here the bottom of the delay, finding the trouble and bottom of the delay carce the state of the delay of the state of the delay carce the bottom of the delay. (finding the trouble and bottom of the delay carce the delay all states could be the arket for almost the problem. The state of the delay of the
