We spent \$3,000 for you today

I. Every day of the year, today included, Union Oil Company spends over \$3,000 op prod-uct research. That morey is spent for the sole purpose of improving old products and develop-ing new ones-Iof you. Among other things, it resulted in new Triton-the mater oil you change only a times on new And mark on the spectra of the sole on the spectra of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the sole of the sole of the sole of the spectra of the sole of the spectra of the sole of the spectra of the sole only 2 times a year. And more recently it resulted in a very unusual grease we call Unoba

2. Most people think grease is just grease-a very uncomplicated product. But different types have quite different characteristics. Calcium base greases resist water but melt down under heat. Sodium base greases have a tendency to jell under high temperatures.

3. Sefore the discovery of Unoba, however, these three types were the only greases in gen-eral use. Consequently you had to select the type to combat the conditions under which your equipment worked. This was satisfactory in most cases. But some equipment-such as min-ing machinery-had to operate in heat and water both water both

. Under these conditions, equipment had to be lubricated as often as once every day. No one Be indicated as often as once very usy, no one liked this. It wasted time and it wasted money. So the market was wide open for a grease that would lick the problem. Our Research Depart-ment, spurred on by the chance to get some very nice business, went to work.

UNIÓN

5. The result was unoba-a barium base grease that would resist heat, resisting, Unoba solved those tough lube problems in mines, dredging operations, packing plants, steel mills, etc.; made it possible to lubricate a car with 1 grease instead of 5; became the first real all-purpose grease in the industry.

6. Neturally, we're happy about Unoba. But more important, we believe, are the commis conditions that inspired its development. Under anything but the American system of free, comanything out the American system of the com-petitive enterprise, we would never have had the incenties to put the time and effort we did be-hind Unoba, or behind the product research we're continuing to do today.

5. The result was Unoba - a barium base grease

AMENDING THE CHARTER

A wholesale revaluation of accepted the-ories of government, society and acience has been made necessary by the military aspects of atomic power. This need for revaluation conters inevitably on the United Nations. Why, then, must Mr. Gromyko talk as if the charter were a perfect and elernal instru-ment?

menta

gency . citizen.

2

The state of the second and section and section of the state of the second seco

ad above. The present charter is not permanent and imputable. It can be amended, and it must be, somehow, by the general assembly—even though Russia probably will endeavor to velo the right to veto the velo.

A COMMENDABLE DECISION

A hundred million words a minute by tele-graph is a predicted possibility of a new de-vise. With the same thing for the telephone some women might be able to hang up in three minutes.

The prices we see on new-built homes re-mind us of a famous nursery story—"This Is the House That Jack Built."

pleted, the Board of Equalization adjourned size die.

e die. E. V. MOLANDER, Chairman

TUCKER'S NATIONAL PEGLER WHIRLIGIG

que uman. The streamlining measure sets national defense committee

The attenuibing measure sets us a national defense committee 1 both house and senate, abolishin the arrangement under which each body has one group dealing with military questions and anothe handling naval affairs. They will only one committee on each side prepare and superise legislation ject of wars. Rey Tucker

AMENDING THE CHARTER AMENDING THE CHARTER If the United Natura charter were to be taken as Holy Wri, then Andrel Gromyko, Soviet delegate to the security council, would be on solid erond in the objection to the Brack and the solid erond and the objection to the plana and thermational Atomic Berel-opment Authority, says AN Gromyko, "would be independent of the security council and would have almost full autonomy. This can-not be reconciled with the charter of the United Nations," And Indeed the charter does state that the security council shall have "primary responsibility for the main-tenace of international peace and security." Mr. Gromyko compilates that the proposed AbA would infringe on the principle of sor-tine charter, which states. "Nothing con-tated in the present charter shall authorize which are essentially within the domestic buried Nations of thereme in matters which are essentially within the domestic the United Nations to intervene in matters which are essentially within the domestic ment under the present charter." Mr. Gromyko other as applied to pun-ting and the transformer as the proposed AbA would infringe on the principle of sor-tating in the present charter." Mr. Gromyko compilate or shall require members to submit such matters to settle-ment under the present charter." Mr. Gromyko domes applied to pun-ting and compy for dom to be proposed. AbA would infringe on the structure of the prim-ciple"—which unfortunately is not always the speaks of this as unalimity of the per-manent members of the security council." All this secored according to the letter of thot Holy Writ. It was written when only a handful of men even dreamind of the jun-phone of this new power which, as Mr. Ba-rup put h, has 'tammed every man to be prophone of governments united in the desire for peace but sharply divide by divergent interests. But sheroly divide by divergent interests. But sheroly divide by divergent interests. But sheroly divide by divergent inter He is capital hills antiheterity on the subject of maxi-variant contrasts M. Freyhound. HRNTATED-Predamt Truman's severe stack on Sen Robert A. Thi-me mentioned the Ohko hethis for II times in the viso of the original CPA elematon bill-hans been attributed to a witty waterenk uttered by Mrs. Taft is on sperch at Philadelphia. The attleft proker results of the History Statistics are then the been spence the rounds of Waldmaton remark which really irritated Mr. Truman was: "The Demonscript payts on a bill of a life af form, a rescionary next ad a know-nothing in the middle"

VIEWS OF OTHERS

IT ISN'T THE TOWN, IT'S YOU

A COMMENDABLE DECISION The decision of the UAW to shandon its threat of further stirkes and concentrate on preserving the dollar's present purchasing ower is no less commendable because the decision was so obviously necessary. UAW members feel that their 1813-cent wage gain of a few months ago has been would be rising prices. That is sun-doubtedly true, but they are not alone in that predicament. Not of us are feeling the dif-fource, to what we sent price is nothing, of unce of a new wave of stifts. Mowever, the manufacturing industries, not on the basis of production but of need. Now, owever, the triend of venits has presented workers with the duty of keeping production wolling and keeping it high. It is one of the most widble, instantiation and the meta-sure of the bound in the one of the most widble, instantiation and the emerg-generging this duty. And we hoppen the line stample labor for the duration of the emerg-generge and the benefits of every American etters. We heard about a man there here a bound and a second by a large company here, who is employed by a large company here, who doeant like particle. If here hold friends that he is houng he projects with a big horranh, and then leak here drop, no ther work, issers in Paycette do not earry proj-ects through to completion and he gave as instances of that fact the present delays in construction of the seminium pool and the no fty' campaign, the first estimates and the second soone monita sport and the second soone monita sport of the second
