

Calcutta Streets Strewn With Bodies As Ghastly Four-Day Riot Slackens

By DONALD HUTT

CALCUTTA, Aug. 19 (AP)—Moslems and Hindus killed each other at a slackened pace today in the stinking streets of Calcutta, which in four days have been strewn with 2,000 to 3,000 corpses.

The situation was the quietest since Friday when the rival factions started the most ghastly riots in Calcutta's turbulent history, quarrelling over differences regarding the British offer of independence.

Sporadic shooting continued, eerie cries rang through the streets. Bodies were piled here and there, many of them dead four days and picked up by vultures. Many were bloated. The danger of an epidemic which might dwarf the present number of casualties mounted by the hour.

Scientist Warns U. S. Against Atomic War

WASHINGTON, Aug. 19 (AP)—Dr. Harold C. Urey, one of the nation's foremost atomic scientists, has warned that the United States must begin immediate preparations for an atomic war unless some form of international control over atomic energy is perfected.

Urey, research director for the army's wartime atomic bomb program, said that failure to provide adequate safeguards for development and use of atomic power would lead to a world-wide atomic war which would destroy civilization.

"Either the United States must secure adequate international control which will prevent all countries of the world from developing atomic weapons and which may lead on to a complete control of war," Urey declared, "or we must make preparations immediately for the third world war, in which atom bombs will be used."

Necessary action "This is a position of no action. It is one that I cannot contemplate with any pleasure, but one which may be the only way to avoid a world-wide atomic war," Urey's views on atomic energy controls were contained in an article written in an issue of a new quarterly magazine sponsored by prominent international figures in the fields of government, science and education.

Urey now is professor of chemistry at the University of Chicago, has been awarded the Nobel prize in 1934 for his experiments with heavy hydrogen.

Writing in the same publication, Dr. James T. Fowler, war department intelligence expert, said that the "foreseeable future" of rockets powered by atomic energy would result in the development of 100,000 miles-an-hour. He said the planes could be used to transport whole armies into countries stunned by atom bomb attacks.

Lowry believed that the United States cannot be defeated by atom bombs as long as it controls the air space above its borders.

Utah Suspect Finds Slayer To Clear Self

GOODYEN, Utah, Aug. 19 (AP)—The hitch-hike slaying of a former Ohio auto apparently was solved today when the Utah state police arrested a man who was suspected of being the slayer.

Detective Capt. Clifford K. Kester announced that Elmer E. Kester, 30, of Goodyen, Utah, was arrested on the charge of slaying a man who was suspected of being the slayer.

Det. Kester credited Kester's arrest to Iner Wistler, who was picked up for questioning in the case in late July. Kester was arrested after an automobile identified as his in which Stallings had been seen.

Wistler had been released when he produced a bill of sale for the machine but explained that he felt he would remain under suspicion until the real murderer was found.

Wistler said he kept his eyes open and last Friday his vigilance was rewarded. He spotted Wistler, who he said was the one who sold him the car, and trailed him to the police station where he was arrested.

Truck's Exhaust Reported Cause Of Forest Blaze

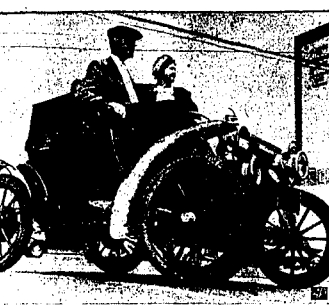

BURLEY, Aug. 19 (AP)—The Wilcox creek fire which burned for four days in the timber in Minidoka national forest Aug. 17 was caused by the exhaust of a truck, it was reported today by Forest Ranger E. A. Briggs, forest supervisor.

Briggs said the fire started when the exhaust of a truck owned by the Rasmussen brothers and pointed out that the exhaust had no muffler or tail pipe.

He said that other fires have been started from this cause, including some in the Butte National Forest.

"There this is a dangerous source of fire in chest-nut and brush areas we request drivers to check carefully exhaust pipes and to keep them from going into areas of dry brush and grass," Briggs stated, "and we suggest that drivers traveling in dry brush areas and canyons equip themselves with an axe, shovel and a fire extinguisher so that they may better suppress any fire they may observe."

Drove Coast to Coast

Lad Kadlec of Buhl Dies in Snake River

BUHL, Aug. 19—Trencherous water of Snake river 12 miles south of here today has claimed the life of 10-year-old Lad Kadlec, who drowned Sunday afternoon when thrown from a motorboat and whose body was recovered five hours later by Twin Falls county sheriff's deputies.

Mr. Kadlec, who came to Buhl seven years ago from Nebraska, was picked from the bow of the motorboat when it crossed in the wake of a speeding boat at 2:30 p. m. Other members of the group with which he

was riding were looking in another direction at the time he fell from the boat, and when they glanced back at the bow, he had disappeared.

Scene of the tragedy was three quarters of a mile down the river from Benbury's restaurant near Buhl, where the boys were expected to attempt again to restore peace. The Moslem league, which was held as spokesman for the 10,000,000 Moslems, disliked the British independence plan because the strongly-hindu Congress party, far the largest political organization in India, gained wide support for its demand for Pakistan, or partition of India between Hindu and Moslem areas, were rejected in the independence scheme.

Writing in the same publication, Dr. James T. Fowler, war department intelligence expert, said that the "foreseeable future" of rockets powered by atomic energy would result in the development of 100,000 miles-an-hour. He said the planes could be used to transport whole armies into countries stunned by atom bomb attacks.

Lowry believed that the United States cannot be defeated by atom bombs as long as it controls the air space above its borders.

Senator Asks For Revision Of Labor Act

WASHINGTON, Aug. 19 (AP)—Sen. Charles McNary, D-Ind., today urged revision of the Wagner labor relations act to give employers "free choice" in union representation.

McNary, who is chairman of the Senate subcommittee on labor relations, said that the act should be revised to give employers the right to choose whether or not they want a union in their plant.

He said that the act should be revised to give employers the right to choose whether or not they want a union in their plant.

British Move Added Troops To Palestine

JERUSALEM, Aug. 19 (AP)—British troop reinforcements moved into Palestine from Transjordan today, it was reported today by the British press.

The reinforcements were sent to the area around Haifa, where there had been a recent outbreak of violence between Jews and Arabs.

The reinforcements were sent to the area around Haifa, where there had been a recent outbreak of violence between Jews and Arabs.

Fourth Week Dies Without Action at Peace Conference

By R. H. SHACKFORD

PARIS, Aug. 19 (AP)—Six working commissions of the peace conference virtually completed their organizational work today, but another week—the fourth—of the meeting was all but killed by a new delay in actual consideration of treaties. The small-lake peace made it unlikely that any detailed discussion of treaty clauses would get under way until the beginning of the fifth week of the conference.

The big stumbling blocks in the way of taking up the draft treaties for the five axis satellites were long arguments over how the commissions themselves should proceed, how they should handle the former enemy states, and the fact that the deadline for amendments to the big four drafts is not until tomorrow midnight.

Delegates contended it would be pointless for the commissions to begin considering treaty clauses which after tomorrow night might have to be reconsidered in the light of any amendments submitted.

Ranking delegates remained away from the Luxembourg palace all day. Secretary of State James P. Byrnes was conferring with Cuban, Iranian and Greek officials in diplomatic talks.

Three conference commissions met this morning and three this afternoon. All engaged in long, dull sessions—those of the British, the French, the American and the Soviet.

The nearest thing to a flurry of excitement came in the afternoon when the British delegation, led by Lord Halifax, presented a draft of the proposed treaty for the five axis satellites.

The statement referred to a paragraph of the European treaty mentioning the "active part" in the war against Germany played by the Soviet Union.

The statement was a revival of previous ones by the Greeks, the British, the French, the American and the Soviet.

While the conference was plugging away at the treaty, the British delegation was working on a plan to revise the treaty.

He said that the act should be revised to give employers the right to choose whether or not they want a union in their plant.

Legion Opens Sessions for State Meeting

LEWISTOWN, Aug. 19 (AP)—Idaho Department of Commerce today opened the first business session of the state American Legion convention as delegates awaited the arrival of the state executive committee.

More than 500 delegates were expected to attend the convention, which will continue for several days.

Boy, 2, Injured In Fall From Car

HAILEY, Aug. 19 (AP)—Charles Garner, two-year-old son of Mr. and Mrs. Dean Garner, Hurley, Idaho, was injured today when he fell from his parents' car.

The child was rushed to the Hailey hospital where he was treated for a broken arm and a bruise on his head.

The child was rushed to the Hailey hospital where he was treated for a broken arm and a bruise on his head.

Two Agencies Rush Work on Price Ruling

WASHINGTON, Aug. 19 (AP)—Two government agencies—AOP and the price control board—hustled today to complete major assignments under the new price control law.

With "substantial progress" toward a decision reported, the three-man control board resumed deliberations on whether price ceilings should be set on meat, dairy products, oil, cottonseed, soybeans and hundreds of items made by other firms.

The board, which may wind up discussion by tonight, is planning to announce its ruling at 8 p. m. (MST) tomorrow—just five hours before the deadline set by congress.

Under the act, the board has the authority to set price ceilings on commodities. It also has the authority to set price floors on commodities.

New Vet Official Arrives for Job

He will succeed G. M. Ferguson, former Twin Falls resident who has been here on a temporary basis for the past month.

Erstad's office will be set up in the new veterans' administration office at 235½ Main avenue south, when official approval for the office space is received from Washington, D. C., and the building is ready.

Ferguson is moving his family to Pocatello when housing can be acquired there.

Colston Will Air Voting Franchise

He will discuss the question "Have We Earned the Right to Vote?" and point out that the American people have been lax with their voting franchise.

Discharges

HAILEY, Aug. 19.—A patent to George E. Mills for certain Ketchum lots signed by the late President Grover Cleveland was filed for record in the office of B. P. Thamm, county recorder.

NO SOAP

for dishes, for laundry

FOR A MONTH!

Unless **EVERY**
Housewife Gets

Back To Saving Used Fats

— Because what with, every person in America may lose a whole month's supply of soap *this* year unless the 2 out of 5 women who've stopped saving used fats get busy right away!

• During this world-wide shortage of fats and oils, the only extra source of fats to make soaps and other peacetime goods is your kitchen. Ask your neighbor . . . ask

yourself if you're turning in all you can.

• Remember, the fats you turn in help to make soap for you. Every pound helps prevent the soap shortage.

Cleaner Neck Averred Need Of Eva Braun

By TOM REEDY

TAUBENBERG, Germany, Aug. 19.—If Eva Braun had washed her neck more often and taken shorter strolls, she might have been a lady to her tailor.

But she didn't. Adolf Hitler apparently didn't mind, but Otto Kaimann, Poustier did. Otto disliked Eva's habits, and there was nothing he could do about it.

Otto, at 45, now lives here atop a 2,000-foot mountain an hour's drive southwest from Munich, quite satisfied to be forgotten as the tailor for Hitler's mistress, the woman der fuhrer married in the last days of the crumbling Nazi Reich.

Good Tailor

Otto is a good enough tailor to get along without such a reputation, and in present-day Germany such a reputation wouldn't help anyway.

He knew Eva Braun was back as just another girl in Munich.

"She was pretty, with a nice figure," Poustier said in an interview, "but she was what you would call a pretty stupid, nothing unusual. You never would turn around to look at her."

Eva never knew what was good and what wasn't, Otto said. As for style, Poustier is like most tailors; he imposes his own ideas until you let him know about yours. Then he tailors like a tailor who has had his home run.

Otto kept waiting for Eva to express just one slight thought about style, but she never did.

"She didn't have any idea," he said disgustedly.

Didn't "Heir" Eva was sent to Otto by an artist, 55 or 60 years old, always with her, and when she came to his shop. She never said "Hello, Hitler," she everyone else, just "good morning" or something like that. Apparently she was the only person in Germany those days who could open a conversation about Hitler.

Before that, Otto had heard about Eva. She worked as an apprentice for a Munich photographer, Heinz Hoffmann, who was Hitler's personal photographer for years.

Hoffmann remembers her as a worker on his staff, too, just as Otto remembers her.

"I never could impress on her that she should make a good appearance," says Hoffmann. "Her neck was never quite clean."

William R. Grey Rites Conducted

BURLEY, Aug. 19.—Funeral services for William R. Grey were conducted by Bishop Wilfred Sagers at the LDS stake tabernacle in Oakley.

Prayer at the home was given by Bishop Fred Adams. Invocation and benediction by President Leslie C. Critchfield. The speakers were: Fred Adams, Fred Critchfield, Bishop Sagers and President Charles Clark.

Music was by Ella Clark, Fortner Severn, Rhoda Beck, Maude Clark, Donna Fay Clark, Mr. and Mrs. Steve Paskett, Mr. and Mrs. John Martin and Norma Bates.

The grave was dedicated by Bishop L. E. Crane. Burial was in the Oakley cemetery. Masonic grave services were conducted by Alvin Lodge.

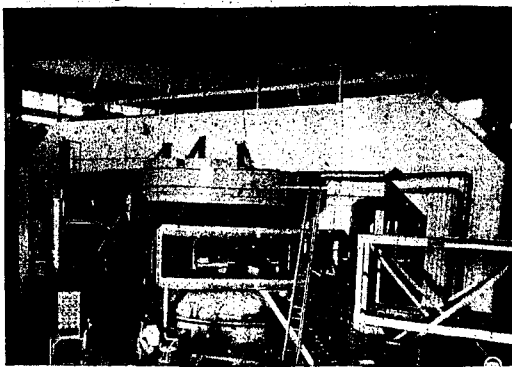

Flowers were under the arrangement of Dula Clark assisted by Carol Ann Grey, Sue Clark, Lillian Whittle, Anna Marie Jensen, Louis Wiegley, Gloria Whitley, Joan Clark and the Lou Eilon.

Balancers were Hyrum Fairchild, Omer Baker, George Poulton, Gene Emery, Ned Emery and Philip Emery.

LICENSE ISSUED

BURLEY, Aug. 19.—A wedding license was issued to Harley D. Price, and Millie M. Jones, both of Portland, Ore.

New Cyclotron Revealed at California

With the lifting of war time secrecy, photographers were permitted to picture for the first time the new 16-inch cyclotron at the University of California, Berkeley, Calif. This photo shows a general view of the huge machine, now in process of completion. Construction was started in 1940 but work was interrupted during the war. War time improvements, developed as part of the atomic research program, are being incorporated in the equipment. It can be noted by comparison with the man standing on top of the giant magnet. Peron Moving Argentina to View of U. S.

BUENOS AIRES, Aug. 19.—(AP)—Juan D. Peron's new administration is moving Argentina toward fuller political, economic and military cooperation with other American republics, particularly the United States.

Veteran diplomatic observers do not believe the change will be completed overnight, but President Peron, talking to newspapermen, repeated his own statement in favor of the "American line" for Argentina's future course.

There is every reason to be hopeful, these observers believe, for the success of U. S. ambassador George Messersmith's mission. Getting Argentina to look less to Europe and to bring her more into the western hemisphere orbit.

To open the way for complete collaboration with fellow members of the Pan American union, Argentina must ratify and then implement international obligations contracted at San Francisco and Mexico.

Peron already has started the ball rolling, sending all treaty documents approved by decree of the former revolutionary government to congress for action. Ratification of these documents—the United States charter, the act of Chapultepec, the Bretton Woods monetary agreement and a number of lesser accords—is expected soon.

The first and more important move since the U. S. state depart-

He's in Tokyo Now; Bride Stays Home

A bridegroom of only a few weeks, John P. Graham is in Tokyo now and his bride is in Jerome.

Graham, former reporter at the Minidoka relocation center, left Pacific City, Aug. 10 by plane for Tokyo on a one-year special assignment. Mrs. Graham will continue in her position at the Jerome Cooperative canteen of forces until his return.

Graham was formerly a newspaperman in the east.

DISCHARGED FROM NAVY

HAILEY, Aug. 19.—Harold August Drusel has been discharged from navy duty with the rating of warrant first class. Drusel is now residing with his parents near Grinnell.

Started Working

Peron already has started the ball rolling, sending all treaty documents approved by decree of the former revolutionary government to congress for action. Ratification of these documents—the United States charter, the act of Chapultepec, the Bretton Woods monetary agreement and a number of lesser accords—is expected soon.

The first and more important move since the U. S. state depart-

ment has said it will measure Argentina's compliance by acts rather than words. It will be the manner in which the Peron government carries out these obligations. The Mexico City communiqué, especially, requires Argentina to put her foreign policy in line with that of her American neighbors.

Grazing District Board Will Meet Friday at Burley

BURLEY, Aug. 19.—The advisory board of the Twin Falls Grazing District No. 2 will convene Aug. 23 at the grazing service office here, James P. Keith, district grafter, has announced.

Recommendations for fall and winter grazing applications will be made and plans outlined for the remainder of the year. Improvement projects to be considered include fencing, breeding, livestock water developments, drift fences and cattle guards.

Other business to be considered by the board, Keith said, will be transfers of grazing privileges and

permits to build improvements on the federal range.

Dan J. Cavanaugh, board chairman, Twin Falls, will preside. John P. Newman, Boise, is expected to attend. Other district advisers who will attend are Arthur D. Pierce, vice chairman, Malley; Russell G. Layton, Kimberly; Wesley B. Ward, Elba; Vern Barnes, American Falls; Max D. Cobb, Idaho; Milton T. Jones and Jesse H. Dredge, both of Malley; Fred E. Lavitt, Burley; Utah and George E. Booth, wildlife representative, Burley.

Lost Puppy Taken To City's Pound

There's a three-months-old puppy waiting in the city pound today for her owners to claim her.

The puppy was taken to the police station from city park after it had wandered away while its new owners were spending Sunday afternoon in the park.

persons at that point reported an unidentified mother and her two boys searched for the pup Sunday without finding their pet. When the pup returned after her owners had left, persons at the park took the pup to the police station. When no one appeared to claim the pup, she was sent to the city pound.

Geraldine Glodowski
WAVE Geraldine Helen Glodowski, 1 1/2, daughter of Mrs. Pearl Glodowski, Twin Falls, has been discharged at Washington, D. C., according to word received here Monday.
Miss Glodowski, who has been on duty at the bureau of ships, navy department, Washington, enlisted on Oct. 7, 1943.

Larson, Sam Larson, Preston Page and D. M. M'Clintock, all of Dietrich; J. H. Grimes, Boise, and E. W. Carroll, Idaho.

HAILEY, AUG. 19 - Ralph Yorky, 19, south of Ketchikan, Robert Jones, 20, and 44 Sun Valley.

Western Pine Men Worried About Future

SAN FRANCISCO, Aug. 19 (AP)—Scarcely a lumber is planted now, western pine timbermen are more worried about the demand a few years hence than about supply. That is the way Stuart Mott, chief forester for the Western Pine association, sees it.

"We can grow all the pine this country will need," Mott said in an interview.

Using Science

"We are growing it—on more than 70 per cent of the harvested pine lands in the western states—under scientific forest management planned for continuous production, at the rate of nearly five billion feet a year.

Mott pointed out that the lumber supply is growing. He said: "We have in reserve 40 per cent of the supply in the virgin stands. When we cut into that reserve we will increase new growth. These forests are static—lots of mature trees offsets new growth. When the big trees are cut, the small trees will get more water and sunlight, and will produce new timber faster."

The forester said tree growing was well advanced in other timber areas, such as the southern pine and Douglas fir regions. There need be no great concern over the future lumber supply, he declared, so long as fires and pests are kept down.

Gender Problem

Further, Mott asserted, pine men were pondering the probable trend of the market, once the building boom fades. He said they're asking: "Can the nation take anywhere near five billion feet of western pine, or 30 billion feet of softwoods a year, in the per capita consumption drop from around 350 feet when the country was growing fast, to a depression low of around 100 feet a warning warning on the wall? Will substitutes cut deeper into lumber demand? And will rising wages price lumber out of the market?"

Preacher Urges Sacrifice Spirit

Urging the congregation to follow the spirit of Queen Esther and take on the spirit of sacrifice, the Rev. Tracy Greer Olson, who has been commissioned a missionary to Russia Sunday, paralleled the story of Esther with modern-day conditions at the First Baptist church.

He pointed out that there are plenty of people willing to live like Haman of old—on a purely selfish basis without regard to the future which their greed or indifference may exact from others.

"Fortunately for the world, however, there are also many of the kind of Mordecai who see in the present situation a grand opportunity for us as Christians to fulfill God's purpose in life," the Rev. Mr. Olson said.

Grangemaster Tells Of Hospital Meets

JEROME, Aug. 18—Fred Helgeson, grangemaster, reported the two recent meetings of the hospital association held in Twin Falls at the Pleasant Plains Grange session here.

Mrs. Dave Block, lecturer, presented a program of games. Mr. and Mrs. Harold Meyers and Mr. and Mrs. Virgil Crowley served refreshments.

Pair Fined After Wreck at Jerome

JEROME, Aug. 18—Arrested Friday night and charged with operating a motor vehicle under the influence of alcohol, Vaughn Oeder, Jerome, was fined \$100 and court costs when he appeared before Judge William G. Conner yesterday. His driver's license was revoked for one year.

Oeder and companion, E. P. Thompson, Jerome, were arrested by

Jerome County Sheriff Lee Johnson

after their car overturned on highway 25 mi. east of here. Thompson was fined \$25 and costs.

BUYS HALEY LOT

HAILEY, Aug. 19.—William H. Kibbe has purchased a lot located on Main street adjoining the Service corner from Mrs. Josephine Kibbe and his brother, George Kibbe, who operate the Service corner, plan to remove a structure now at the site and convert the property to a parking lot.

A book exchange will be held before school begins. The date will be announced as soon as the books arrive.

Union School Plans Opening on Aug. 26

PIZZER, Aug. 19.—The Union school at Pizer will open Monday, Aug. 26, according to an announcement made by Mrs. Lela Parker, Pizer, Pizer, principal.

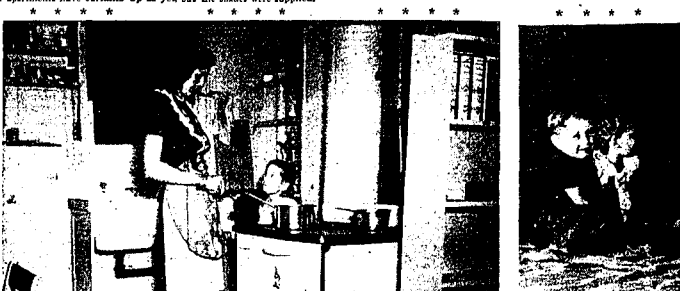

Teachers for the school are Mrs. Lucille Hyer, Pizer, first and second grade; Mrs. Margaret Stroud, Pizer, third and fourth grades; and Mrs. Parker, fifth and sixth grades.

Have a Look at Veterans' Apartment Units Here

Taken from the site of the fifth veterans' apartment building-to-be, this picture shows the first building completed and occupied. Residents can park their cars right by the steps and do. To the left of the doorways are coal boxes and stalls for ash and garbage cans. Only a couple of apartments have curtains up as yet, but the shades were supplied.

Taken from the site of the fifth veterans' apartment building-to-be, this picture shows the first building completed and occupied. Residents can park their cars right by the steps and do. To the left of the doorways are coal boxes and stalls for ash and garbage cans. Only a couple of apartments have curtains up as yet, but the shades were supplied.

Nancy Ann Karcher and Ricker Reddick, neighbors, went to be happy about a central playground as their parents will be. Kids can do so much wonderful things with dust—and it mixes so well with water. Nancy's daddy, Don Karcher, was with the army and airborne division and a military doctor. Dr. Faye Reddick, was a Navy motor mechanic's mate.

Patricia Alyn Nelson looks on wonderingly as her mother, Mrs. Bill Nelson, stirs up the coals for her first coal stove-cooked meal. The forbes, double sink and hot-water boiler can be seen in the background. The building is a built-in bookcase, seen in the foreground. (Photos by Bill Nelson's staff)

fore school begins. The date will be announced as soon as the books arrive.

Apartment Units Please Vets—but That Dust Is a Tough Housekeeping Problem

By BILL NELSON

Everywhere we go people plug us with questions about life in a veterans' apartment: "Is it true you have to sleep six in a bed?" "Do you have faucets or do you have to pump your own water?" "Do you have to walk far to the outdoors?"

To date 23 of the eventual 38 families have moved in lock stock and uniform, and will be in by Monday, filling three of the four single-story buildings. The fourth will be ready for occupancy in about a week.

Last of the five buildings, a two-story unit, was at this writing on route from Vancouver, Wash. The foundation of the building is finished but the completion date of the last unit is nebulous, contingent on the arrival date of the disconnected apartments-to-be.

Rest was NOT Uped

Once the VA doesn't pay the rent, it's not true that during the OPA vacation the rent was upped to 80, and it would be unfair to charge \$20 for two, three and four room apartments; they don't.

The apartments differ in size, the first varying according to number of rooms. The two room are \$20, the three room \$25 and the four room \$40.

The floors and walls of all the units were resurfaced before anyone moved in. Supplied with each unit are tables, chairs, kitchen, and a bed or two beds with each bedroom. Each bedroom has a partitioned off closet closet in addition to a large utility closet off the main room.

The main or front room extends across the width of the building, having both a front and back door, or two beds with each bedroom. Each bedroom has a partitioned off closet closet in addition to a large utility closet off the main room.

The kitchen, a part of the main room, is complete. In addition to a combination sink-wash-unit, there is an up-to-date coal range with built-in water heating coils and a large hob. There is also plenty of shelving in the kitchen and elsewhere in the apartment, that is, Nor do the apartments get over-ram during the day. A dead-end space above the ceiling is insulated but the completion date of the last unit is nebulous, contingent on the arrival date of the disconnected apartments-to-be.

Bedrooms have to pay for their own electricity and coal, but water and garbage service are supplied as well as maintenance.

Dust Is Plague

In fact there is only one complaint, one universal lament, one cause for teeth-grashing-dust. When the project is complete that problem will be taken care of by a road that will circle between the first and second buildings, behind the second and third and out again between the third and fourth. The space between the second and third buildings will be lawn and playground for the offspring.

But until that road goes through we'll have to wait till the dust settles after each caller before we can identify him as friend or bill collector. As one resident put it, "It's the only place I've ever been where

you can raise dust by emptying a pail of water."

Lately, however, the condition has been considerably remedied by a daily sprinkling.

No one is dissatisfied with his apartment and some would live there if "housing shortage" were an obsolete expression.

Many of the new residents were fortunate to have furniture, linens and cooking utensils. For them the set-up was ideal. Others, however, including us, didn't. Including what we have already spent, outlay for necessities and extra furniture comes to about \$150.

Divided on Stoves

As to the coal stoves—opinion is split. To quote one woman, "There's nothing better than a coal stove for cooking or baking."

"But I never cooked on a coal stove" another wailed. The problem of cooking over a hot stove in term of cooking over a hot stove in summer has been solved by a few. They simply purchased hot plates, using the stoves to heat hot water when needed. One woman was philosophical.

"At least we don't have to worry about the kids turning the gas on, she said—and we don't."
