TWO MORE EXAMPLES

37 TWO MORE EXAMPLES 7 Two more news items to illustrate the "sefficiency" of our recent state legislature: \$1.1. Sun Valley has been incorporated as a village, 135 residents of the farmed resort algo-ing the necessary polition. Obviously this came about as a result of the new legislation restricting sale of luguor-by-the-drink and operation of slot machines to incorporated areas after July 1. 2. Legel minds have discovered only one

Legal minds have discovered only one

2. Legal minds have discovered only one of two companion bills on the fee for drivers' licenses was passed during the last session of the legidature. One bill provided for increasing from 50 cents to 51 the charge for prevents gour drivers' license. This bill passed. The lawmakers failed to enact a brand new driver's license. As a result a new license costs you 50 cents, but a renewal sets back a back.

you back a buck. No. 1 serves as another example of the joke which the legislature buck-passed to every individual community in the state. No. 2, while it appears to be only a little oversight, is no more riducious shan some the laws which the legislature enacted after days of wranging and dily-dallying. Maybe before it's all over, the governor will have to call a special session of the legis-lature so it can correct its own mistakes,

HALF PRESCRIPTION FILLED Senator Vandenberg, in his speech which opened the senate debate on the "Truman Doctrine," made a concise and commendable statement of American policy, "We plot no offense against the Soviet Union. We are not onting world domination. We are not seek-ing dictation anywhere. But what we deny to ourselves as a matter of mornilty we also must deny to others as a matter of conquest," he said.

he said. If only a similar honest and forthright statement of Soviet policy were at hand, Mr. Marshall and Mr. Moladv, or perhaps even Mr. Truman and Mr. Sialla, could then sit down and conduct their negotiations on the basis of those two declarations. And the world, we think, would have small need to fear another war.
