WARM WORDS AT LAKE SUCCESS

TWO OLD SCAPEGOATS The ills of the world sometimes seem to dedy diagnosis. But at least we now have a line on what is wrong with one of its coun-tries. Italy's present plight, according to her former premier, Francesco Nitti, is the re-sponsibility of two accoundres named Christo-pher Columbus and Niccolo Machiavelli. Columbus crime was discovering America and thereby shifting "the axis of the world to he west." Machiavelli, Columbus' contem-porary and one of the most brilliant shyster politicians in history wrote a hook which made out a great case for croaked polities in which the end always justified the means. Interfore, any Mr. Nitl, the world has come to believe that Italians are men who are al-ways ready to lite.

Moreover, this was the minimum after peace should be secured throughout the world and Aome degree of disarmament achieved. Anyone who thinks we have arrived at that state today had better see a good spychiatrist. The figure of 3000 presupposed research and development on new types which would make it pos-able to go into quick production of these types in the event of a war. Flainly, then, the administration would have to ask, and compress would have to grant, meally write the amount make available for the cur-

would have on the amount made available for two current year. This was precisely the desperate lack we faced after Pearl Harbor. Experimental construction and research legged in the lac 30s. If one can lock through the irretemations and absurdities of the recent strate investigation, that is the transmotously months of the strategies of the recent strate which comes out-in splas, cas might almost as, of those who are conducting the investigation.

## HARNESSING THE SNAKE

HARNESSING TILE SNAKE The main interest of the Lawiston country in de-velopment of Snake river has always been from the standpoint of navigstion. That has been natural snough because the lack of adequate, for-cost trans-portation has more than any other factor relarded the economic development of this great landlecked empire and the open fiver is the key to moving our connerce into the world market. Another important phase of the Snake river devel-opment program was in the limelight when the corps of array engineers conducted a public hearing Lawiston for the generation of hydroelectifo power. While the engineers plant for three projects are by no means complete, they indicate a more through-going use of this water resource than previous inkings of the scope had revealed. To visualize something of the latter treasures of the upper Nuke for power power chapefly of one proposed than shout, at Moun-tain Silver and these is not the silver terest prover chapefly of one proposed than date, at Moun-tain Silver norwards, would be 1,00000 Ellowatts and the second suggested high dem, at Hell's caryon alte, would have a capacity of 1,330,000 Milowatts of the neutron would dever anything of the kind in the northwest. Mountain therp would lawer 600 caryon would be 700 free high. My way of comparison, Greand Goulde dam is 800 feet in height. Lawiston has taken the position, quite properi, that while it augnota the development of these power fam

, wereponent , were to encouraging projects and one may be autor they would be quick to take advantage of any auch division of strength. The important thing in divisioning and planning the many uses of this great river is that we should have advantage of the strength. The third the should have solution to the strength of the should be the solution of the strength of the should be the solution of the strength of the should be the solution of the strength of the should be the solution of the strength of the should be the solution of the strength of the should be the solution of the strength of the should be solution. The should be the should be should be should be should be solution of the should be should be

Princes Elisabeth and Ljeutenat Mount-batten are going to have a fancy wedding, with almost all the trimmings. But the poors work be required to wear all their robes and paraphernalia because the mobins have been in blem. to another if both can be subserved. That is the both challenge presented in plenning the full development of the mighty dense. We fortunate papels of the tri-fats empire posses here a gift of nature as valuable that we have only duty begun to valuable its worth and potentialities. The task of put-ting his river to the service of the people calls for an advanturesmon outlook and a deset differentimistion to keep and enhance this birthright.-Lewision Trib-ND. Wall, at least the varmints ate well in Eng-

ave beastfully probleming the transmission and the dress of a propulsion and hinted that the dress of a in the lead in the new of strarting the second strategies of the second strategies was build be set of the second strategies of the second strategies of the second strategies was build be set of the second strategies and the second strategies of the second strategies was belief in informed quarters have is that the second strategies and second strategies and the second strategies and second strategies of war.

"Washington Calling" By

In American surveys in a superimental models of jet bombers are being built, and they are under-going ists, dry and they are being poneers, and they are being built and they are under-going ists, dry nut from the point of view of eventual mass production it is highly desirable. Bombers powered with four jets are being produced by the North American and Consuldstate dompanies. Martin and Boeing are working on six-jet bombers. Only one type of jet fighter-the P-g0-m is ny pre-ent use in USAAF subdicing. We have laged con-stitute the subdicing dom and the P-g0 and the P-g0 are the power of the one type of jet fighter-the P-g0-m is ny pre-ent use in USAAF subdicing. We have laged con-stitute the power of the subdicing dom new types, the P-g1 and the P-g5, the in experimental construction. The new super-sonic planes get into the Buck

P-81 and the P-83, are in experimental construction. The new super-sonic planes get into the Burk Regers range. Boil strong to constructions the S-01 to construction to the super-nality. It's a small plotted plane carried in a B-30 bomber and relevised at 30000 rect. The X-81 carries rockets as offensive weapons. Its fying time is so abort, however, that it must still be considered as merely a tool for experiment. All this has the quality of a newared that is some-how familiar. In the pre-1030 days, the Russians par-ended giant guess and masses of the Russians par-ended giant guess and masses of the Russians par-ents fears, suspicion such hatred stay the same.

## VIEWS OF OTHERS

Therefore, anys Mr. Niti, the world has come to believe that Italinas are men who are al-ways ready to lie. The result, according to the former pre-mler, is the present Italian treaty—'one of the most unjust in modern history." We hesitate to take issue with the dis-tinguished and venerable Mr. Nitil, who is going on 80 now, But it does seem that he has tried to localize such general things as human curlosity and human cuasedness too much. Furthermore, in what might be called a burst of perverted nationalistic pride, he as given Italians credit for something that undoubtedly would have happened anyway. At the same time we can't help admiring Mr. Nitil for making a particularly mild brand of dangerous speech. He ddin't blame everything on the continuulate, perhaps be-cause italy has two or three million of them, and he is too good a politician to offend a large minority group that some day might be yead. Nor odd he blame everything on the yead. Nor any other minority group. But essentially his was a line of thought which, in our own day, we have come to think of as anti-Semetic, Witter blame Grer-many's plight in the '30s on the Jawa. And in spite of the targe failey of Hitter's argu-ment, there are too many people in the world atill willing to assign them the same blame today. canyon would be 700 feet high. By way of comparison, Crand Coules dam is 850 feet in height. Lowideon has taken the position, quite properly, that while it augments the development of these preventions is does not want that romatine the has been been been dama on the baser thank, which will not only generate power but will provide the alextwater marked onthe upper and lower fractions to the size, well and good, but if there is a choice involved priority must be accorded the lower thank, which will not only a mag of the lower thank, which will not only and good, but if there is a choice involved priority must be accorded in lower fractions. The com-mute and lower fractions of the issue, well and good, but if there is a choice involved priority must be accorded in lower fractions of the issue of marks acidly to delay of invitation the lower tracker functions in a single of the size of the issue of the river at all would not be averant on encouraging sectional invity and computition among the various projects and use may be aute they would be quick

by the late Gifford Finchei almost 40 years ago; Every five is a unit from like source to ita mouth. If it is to be given ita highest incluiness to all the people, and serve them for all the ince they can make of it, it must be developed with their idea olearly in mind. To develop a tiver for avaigntion slone, or power slone, or irrigation alone, is often like using away the leather and the wool. A river is a unit, a sheep for mution, or a size for bed, and hrowing buil to uses are many and, with our prevent knowl-edge, there can be not subserved.

Clark of the J's Symbilishig Augr. 6, 19, 18, 1847.
