

U.S. Presses for Censure of Three Russia Satellites

LAKE SUCCESS, Oct. 9 (AP)—The United States, apparently certain of victory in its fight for United Nations "watchdog" commission in the Balkans, made a bid today for intention to press for U.N. condemnation of three Soviet satellites accused of responsibility for Greece's border troubles.

An American spokesman declared that U. S. delegation would deviate from its position only if the three accused nations—Yugoslavia, Albania and Bulgaria—officially agreed to cooperate with the border commission, which was approved by the U.N. 67-nation political commission late yesterday by a 54 to 6 vote.

The spokesman added that the three nations had made it evident they had no intention of complying—an assertion which Bulgarian Delegate Boris A. Tsinis in a speech gave weight by telling interviewers:

"They (the U. S.) have the majority and can keep voting resolutions. We cannot do this if it is a black or white issue, and we refuse to take part in it."

The role on the Greek border watch case came at the point committee balloted clause by clause on United States' proposals for preventing violence in the Balkans.

The committee's decisions will go to the assembly for final approval after its completion on the U. S. proposals, but this was generally regarded as little more than a formality since the committee is composed of representatives of the same 57 nations which make up the assembly.

Say Greeks to Blame Russia, which has demanded the Greeks stop fighting, and Greece to stop fighting, cannot veto the proposals in the assembly because of the 67-nation vote in the 11-nation security council.

In yesterday's vote on the border watch case, the U. S. delegation supported in the opposition only by White Russia, the Soviet Union, Yugoslavia, Poland and Czechoslovakia.

The vote came after Andria Y. Paparollo, U. S. ambassador to the Greek government, and several U. S. officials were arrested during the riot.

2 More Face Atomic Photo Theft Charge

SANTA FE, N. M., Oct. 9 (AP)—Two former army photographers were arrested today on charges of stealing highly secret photographic data from the Los Alamos atomic energy center.

The men, George Wellington Thompson, 44, Riverside, N. M., and Ernest Lawrence, 34, Los Alamos, Albuquerque, N. M., were stationed at Los Alamos during the war.

U. S. Attorney Everett Grantham today said the men were arraigned after United States investigators yesterday.

The federal bureau of investigation said the alleged thefts occurred before the atomic energy act was passed and during the time the army was still in full charge of all security measures connected with the project.

Therefore, Paparollo and Thompson were charged with stealing government secrets, in violation of minimum sentence of five years imprisonment, \$5,000 fine, or both—rather than the 15 years and \$15,000 provided by the atomic energy act.

Enteris guilty plea. Thompson pleaded innocent to the charge of stealing government property, but pleaded guilty to a second count—removing records from a government agency. After his arraignment at Los Alamos, he was held under \$10,000 bond.

Paparollo faced similar charges, but pleaded innocent to all charges. He was held under \$10,000 bond.

Prices for Fall Produce in State Near 1920 Mark. Boise, Oct. 9 (AP)—Prices of some farm products received by Idaho farmers jumped 12 points between Aug. 18 and Sept. 15 to 223 and 1/2 cents on a 100-pound bushel of apples.

The U. S. bureau of agricultural economics reported today that the price of apples in Idaho was \$2.30 a bushel, up from \$2.10 a bushel. Hops were up from \$7.75 to \$8.75 a hundred, eggs gained two cents to 15 cents a dozen and butterfat in cream was up six cents to 15 cents a pound.

Top AFL Officials Attend Convention

These 18 men are top American Federation of Labor officials attending the annual convention of the labor organization in St. Francis, Ga. (Left to right): George Meany, President; William Green, Vice President; ...

WASHINGTON, Oct. 9 (AP)—Top American Federation of Labor officials attended the annual convention of the labor organization in St. Francis, Ga., today. The convention opened with a session of prayer and the playing of the national anthem.

Small Nations Ired by Quiet On Holy Land

LAKE SUCCESS, Oct. 9 (AP)—Mouthing small power resolutions against Greece and Turkey, the United States and Russia on their respective Palestine policies flared today in an open debate without haste.

Labor Papers "Safe," Padway Death Halts Stunned AFL Meeting

WASHINGTON, Oct. 9 (AP)—Senator Ball, R., Minn., told unions today that in his opinion there will be "no attempt to interfere with freedom of the labor press" under the Taft-Hartley act.

As chairman of the senate-house committee set up by the act to keep an eye on labor-management relations, Ball also said: "1. The 'watchdog' committee will avoid participation in any current labor-management dispute."

Some union leaders have raised the issue because they fear the act might strip them of funds for legal and expediting labor.

Partial returns from a survey to determine whether or not school vacations are planned in school districts throughout Twin Falls county were announced Thursday at the office of county Superintendent Robert M. Jones.

Also shown by the survey, based on decisions of school trustees and board of directors in their respective districts, are the dates during which the vacations are set to enable students to assist in relieving the labor shortage to harvest crops.

Provisions are being made to adjust spring vacations to compensate for time utilized for the harvest.

Noting that this committee is to be used as a sounding board where there is a current labor dispute, Ball said: "That would put the committee in the light of being biased, and destroy our usefulness. We want to do an objective fact-finding job."

Ball said a committee study of 600 unfair labor practice cases under the Taft-Hartley law shows that 322 were filed against employers, and 33 were filed against labor unions.

Finance Reports Called Most Vital Part of New Labor Act. SALT LAKE CITY, Oct. 9 (AP)—One of the most important features of the new Taft-Hartley bill is the provision requiring financial reports from labor unions.

Actually, heretofore nobody has ever known how the big labor groups spend their money. When John L. Lewis (President of the A.F. of L.) and Miners Workers of America) wanted to hand President Roosevelt \$500,000 as a campaign gift he didn't have to ask anyone. It was handed ahead and did it.

Chicken's Removal Off Flood Ban May Be Asked of U. S.

WASHINGTON, Oct. 9 (AP)—Agriculture department officials are the advisability of asking the citizens food committee to take chicken off the food-saving list, it was learned today.

Hike in Price Grets Initial "Eggless Day"

By The Associated Press. Egg prices climbed today in big wholesale markets as the nation's consumers observed the first eggless and poultry-free Thursday in the campaign to save food for Europe.

Compliance with the eggless and poultry-free request—as with the first meatless Tuesday—was reported spottily. Some restaurants reported compliance but many others said they served eggs if the customer requested them.

Advance on Markets. Egg prices advanced fully a cent a dozen in New York City and Chicago wholesale markets. Extra U. S. extra No. 2 sold at 58 to 60 cents a dozen in New York and 57 to 59 cents a dozen in Chicago.

Live Hog Prices in East St. Louis. Live hog prices in east St. Louis are reported about 15 cents higher than a month ago. (Continued on Page 11, Column 3)

53 Escape in Outside Loop Of Big Plane

EL PASO, Tex., Oct. 9 (AP)—Capt. Charles Stinson, Los Angeles, today rescued 53 persons in a looping air battle yesterday that margin was because his heart pumped a button and he died.

Proposed Delay. Finally, his friend Daniel J. Rubin, head of the teststers, proposed from the convention floor that Padway's resignation be continued Friday.

Threatened and Bruised. The 40th rescue crew were threatened and bruised, but none was seriously injured. Most were located on another plane in Los Angeles.

Thrown Against Butler. The plane went into an outside loop," he said. "It was traveling at 400 miles an hour and was hit against the fuel burner. That was a factor in saving us because it broke the engine."

He and Capt. Hugh Beck, Memphis, struck the top of the cockpit. Capt. Milton Lewis, Memphis, first officer and co-pilot, fought the cockpit. Finally the three rolled it back into normal position.

Printing Leaflets Brings Sentences. JERUSALEM, Oct. 9 (AP)—A Jerusalem court today sentenced five young men to prison for printing leaflets for the Jewish underground organization, Irgun Zvai Leumi.

California's Death Climaxes Series of Selway Tragedies. HAMILTON, Mont., Oct. 9 (AP)—The death of Ross Collins, 47, of Montana, who was killed by a bear while hunting Selway wilderness, west of here, was the latest in a series of Selway tragedies.

Taft Doubts New Aid Plan Bureau. CHICAGO, Oct. 9 (AP)—Sen. Robert A. Taft, R., Ohio, today said he thought the new aid plan was reluctant to create a new emergency corporation to handle foreign aid.

Ernest Franden, member of the Oregon hunting party, became ill with the flu yesterday after being taken to a hospital and returned to his Bend, Ore., home early this week. Franden died in a Hamilton hospital yesterday after being stricken with a heart attack in the Lost Hills mountains Monday.

Robot Rocket Planes Crash

WASHINGTON, Oct. 9 (AP)—An experimental robot rocket plane crashed today on a test flight at the National Advisory Committee for Aeronautics (NACA) facility at Langley field, Va.

The flights have been carried on for months from a lonely island of the North Atlantic. The robot plane is a small, unmanned aircraft that is launched from a ship and returns to a carrier ship.

Report Prompted. This disclosure of American progress in the field of supersonic speed was made faster than the speed of sound—and was prompted by publication Wednesday of accounts in the press of the 100-mile-an-hour flight of pilotless rocket craft.

At the English experiments, the American rocket ships are launched at high altitude from a fast-flying bomber. Their controls are pre-arranged to send them diving into the sea after a flight of 20 to 30 miles.

Piloted Craft Next. "It will not be many months before we will have a piloted aircraft break through the sound barrier at blistering speed," he said.

It was revealed that great progress has been made in recent months in perfecting control for the plane in perfecting control, whose wings are so flexible that they can be bent by the wind.

Finance Reports Called Most Vital Part of New Labor Act. SALT LAKE CITY, Oct. 9 (AP)—One of the most important features of the new Taft-Hartley bill is the provision requiring financial reports from labor unions.

Actually, heretofore nobody has ever known how the big labor groups spend their money. When John L. Lewis (President of the A.F. of L.) and Miners Workers of America) wanted to hand President Roosevelt \$500,000 as a campaign gift he didn't have to ask anyone.

Way to Tour Europe Area

WASHINGTON, Oct. 9 (AP)—Senator Dworshak, R., Ida., today proposed to the U. S. House of Representatives a bill to establish a 60-day holiday for the production of both livestock and poultry.

Committed Chairman Charles Lockman said 18 of the 29 districts that will be involved in the bill agreed to a complete 60-day "holiday" on the production of both livestock and poultry.

He predicted that the entire livestock would be closed down within a few days after the bill is passed. He estimated that the bill would cost the industry \$10,000,000.

Lockman said 21 distillery representatives (Continued on Page 11, Column 3)

1,160 Hunters Take Deer in Cassia Shoot

JEROME, Oct. 6—Of the 1,500 permits issued for deer hunting in the Cassia National Forest, 1,160 hunters bagged their quarry, an incomplete report today revealed.

F. J. McDermott, conservationist here, reported that up to Tuesday evening the hunters had bagged 1,160 deer. He said he believed the complete figures would be available after the shooting season is completed.

The high percentage of kill was made during a four-day hunt in the district.

McDermott said one elk had been shot illegally by a 15-year-old boy from the district.

McDermott said the complete figures would be available after the shooting season is completed.

Tests Urged To Discover Youth Talent

DETROIT (UP)—The vast majority of young people are failing completely to acquire the information they need about themselves to make a wise choice of their life work, according to a Detroit expert.

Richard Drescher, administrative assistant in the guidance and placement department of the Detroit board of education, says that only two out of 10 young persons of high school age in Detroit are better than five per cent—take advantage of the department's testing service.

Since few school systems elsewhere provide similar free service, Drescher said, he was fairly certain the testing that was being done was probably worse, in the rest of the nation.

Tests Not Feasible

"Nobody in the testing field argues that the system of vocational testing is an inalienable guide," Drescher said, "but there isn't much doubt that it is a good deal better than choosing an occupation just because it is the smart thing to do or because a good friend of yours has chosen it."

Drescher said the problem was the result only partly of general ignorance of the wide variety of modern testing techniques.

Cover Four Fields

The tests given an applicant by the department cover four general fields: achievement, intelligence, interests and mechanical culture, mathematics, literary comprehension, science, social problems, vocabulary, manual dexterity, various intelligence measurements, personality and others.

Drescher explained that the testing was only part of the program. A counselor sits down with the applicant after the tests are completed and analyzes the applicant's ideas about a job choice in the light of the findings.

If the young person has the qualifications for a professional job, it is the counselor's task not only to tell him so but to point out the handicaps to success.

State to Restore Quaint Cloisters Founded in 1732

EPHRAATA, Pa., (UP)—The home of an unusual religious community is being restored here by the state.

The community, known as the Ephrata Cloisters, was an experiment in communal living by Seventh Day Baptists. Founded in 1732 by Conrad Beissel, a German who emigrated to Pennsylvania in search of religious freedom, the cloisters reached their high point just before the American revolution.

The cloisters housed three semi-independent orders living in close cooperation. The brotherhood was composed of unmarried men, the sisterhood of unmarried women and the householders of married couples.

The Baron, a dormitory for the sisterhood, stands. The buildings are narrow to remind one of the straight and narrow path. The doors are set to look like a hallway. Residents slept on board benches, with wooden blocks for pillows. Their diet was meagre.

Although the members spent most of their time in the fields or attending to domestic duties, their culture reached a high level in music, printing and writing.

Beissel died in 1768. A typhus fever epidemic and the fading interest of the founders, together with the practice of celibacy led to the decline of the cloisters.

Life in the cloisters was austere, with the day divided between labor, meditation and prayer. Many of the buildings are narrow to remind one of the straight and narrow path. The doors are set to look like a hallway. Residents slept on board benches, with wooden blocks for pillows. Their diet was meagre.

Strength Shown For Cattle Sale

Market for all classes of cattle was reported stronger this week by the Twin Falls Livestock Commission company which sold 120 head at their weekly sale Wednesday.

In total which brought a sale total exceeding \$100,000, there were two cars of choice steers sold for G. D. McLane, Buhl, that brought \$2,500 and \$2,800.

Grain fed steers brought prices of from \$23.50 to \$26, killer from \$20 to \$22, common killers \$18 to \$20, good feeders to \$21.75 and common feeders \$14 to \$16.

Prices of \$18 to \$19.50 were paid for choice cows, \$14 to \$15.50 for good cows, and \$12.50 to \$13.50 for common cows and feeders.

Good heifers sold for \$21 to \$23 with common heifers bringing from \$17 to \$20 and feeder heifers from \$12.50 to \$20.50.

Buyers paid from \$14.50 to \$18 for bulls and \$14 to \$22.75.

Improper License Brings \$10 Fine

G. D. Starvos was fined \$10 and assessed \$3 costs when he pleaded guilty Wednesday before Justice J. O. Humphrey to the charge of permitting a truck to be operated without proper license plates.

The vehicle was operated by Fred Starvos and the violation occurred Oct. 2, the complaint shows.

Immigrants who come to America in sailing ships often required seven to 12 weeks for the trip.

Clean Cash

MILWAUKEE (UP)—Everything comes out in the wash, they say. William Moellendorf of suburban Watertown is convinced of it.

Moellendorf recovered \$433 he thought was gone forever. He left it in a pillow in his home and then sent some of his bed linen to the laundry.

The money, washed clean with the clothes, was discovered by a laundry employee, who turned it over to his employer, who gave it to Moellendorf.

Fighting Queen

No one could better typify the fighting spirit of the navy than Peggy Alice Harfield, 21, of Henning, Tenn. Flat on her back with infantile paralysis a year ago, she fought the battle of wheelchair and crutches, determined to walk again. She won, and on Navy day, Oct. 21, she will wear as Miss Navy the Miss Navy naval installations. (NEA photo)

Navy to Drop Trio of Units; Farragut One

WASHINGTON, Oct. 9 (UP)—Senator Dworkshak, R., Ida., said today the navy is abandoning three of its war-time naval training centers.

These are stations in Oklahoma and Texas and at Farragut, Ida. Five will remain for possible future use. Dworkshak did not name those being retained.

"Too Far Removed"

Dworkshak said the chief of the navy personnel branch told him the three stations are being given up primarily because they are too far removed from population centers.

At Farragut, he said, the navy is retaining 48 acres for its experimental field station. The remainder has been turned over to the war assets administration for disposal, but WAA told Dworkshak that the former hospital area which is under a five-year lease to the Farragut College and Technical Institute, will be preserved for possible future use by the government.

Judgment Is Won By Rexburg Man

POCAHELLO, Oct. 9 (UP)—Ross B. Covington, Rexburg, was awarded a \$30,137 judgment against the federal government yesterday in his suit for loss of six race horses and racing equipment.

Covington sought \$100,000 damages for his horses and equipment he claimed were destroyed Aug. 9, 1946, when two army bombers crashed during an air show at Great Falls, Mont.

To Sell 250 Buildings

The college lease contains a provision that it shall revert to the government in case of emergency and WAA said that provision will be retained in any future disposition of the property. The remainder of the area, including about 250 buildings of various kinds, will be sold without restriction. Dworkshak said.

The station, built the early years of World War II, is reported to have cost in the neighborhood of \$50,000,000.

You Get More Service From Peters WORK SHOES

England Sells More of Gold Hoard to U.S.

LONDON, Oct. 9 (AP)—Authoritative sources today said that Britain has sold \$50,000,000 more of its gold reserve to the United States to replenish its declining supply of dollars.

It was the second time in three weeks Britain had dipped into its gold reserve, the last defense against economic collapse. Britain sold \$20,000,000 of gold to the U. S. for dollars on Sept. 15.

The new sale was believed to have reduced the British gold reserve to about \$2,240,000,000. The exact total is a government secret.

Gold Shipped to U. S. To replenish British gold in New York, the government shipped 400,000,000 worth of gold to the federal reserve bank of New York on the liner Queen Mary, which arrived there yesterday.

British sources disclosed the new sale of \$50,000,000 worth of gold after Washington dispatches printed in Britain had reported this country was in the process of selling \$120,000,000 worth of its reserve.

Halloween Dance Planned at Carey

CAREY, Oct. 9.—Plans are under way for a Halloween carnival and dance to be held in the Carey high school gym Oct. 31 to raise funds for athletic equipment. Members of the student council, headed by Keith Hunt, president of the student body, and class officers are working on plans for a wide variety of attractions.

Taylor Reaffirms Stand on Politics

POCATELLO, Oct. 9 (AP)—Sen. Glen H. Taylor, D. Ida., last night termed the bi-partisan United States foreign policy as one "totalitarian in concept."

Rich Land Called U. S. 'Insurance'

POCATELLO, Oct. 9 (AP)—America's rich land in communism so long as it to conserve and work it, E. A. Norton, Washington, assistant chief of the U. S. soil conservation service, told a chamber of commerce meeting yesterday.

Hollywood Economy Campaign Axes Little Guys Off Payrolls

By VIRGINIA MACHESON HOLLYWOOD, Oct. 9 (AP)—Hollywood's beginning to feel the loss of the British market where it pinches—on the profit sheet. And everybody's falling over everybody else to economize—the Hollywood way.

Producers and stars and directors will rake in the heavy dough. But 12,000 carpenters, projectionists, set decorators, electricians and publicity boys are getting the axe. More than 20 per cent of the studio workers must go, it was reported.

The only actor to sound off on the subject so far is Barry Sullivan. He figures the studios would save more if they'd start chopping at the top—even if that includes him in.

How the BENDIX washer saved a million wives. BIGGEST SAVING OF ALL is the work and time the Bendix automatic Washer saves you. All you do is put in the clothes, set the dial, add soap... and RELAX!

THRIFTY WITH HOT WATER, TOO! The thirfiest way to get clothes cleanest is to tumble them hundreds of times in and out of a small amount of hot suds... then rinse them thoroughly. That's exactly what the wonderful Bendix washer does, all by itself.

KIND TO CLOTHING BUDGETS! The Bendix "Tumble-Action" principle saves wear and tear on clothes. No agitator... no rub, scrub and twist... "Tumble-Action" is gentle action... safe with the daintiest fabrics.

SAVED: \$1,000,000 A MONTH! Yes, the lucky owners of the million Bendix washers now in use are saving about \$1.00 a month each on laundry soap alone!

DO YOU HAVE A RUPTURE? IF SO: Come in for a demonstration! Learn about our easy payment plan! BENDIX automatic Washer NOW AVAILABLE AT DETWEILER'S OPPOSITE POST OFFICE PHONE 809

Briton Chiefs Switches Said Move to Right

By DEWITT MACKENZIE
All Foreign Ministers
Prime Minister Attlee's drastic shakeup of his labor (socialist) cabinet—the ouster of five ministers and the demotions of Fuel and Power Minister Emanuel Shinwell, powerful left-wing leader—is a notable development, both in the political life of England and in relation to the general European economic crisis.

Attlee's paramount object clearly is to secure the utmost governmental efficiency for dealing with Britain's life and death struggle against the great depression.

Strengthening Machine
Having recently created Sir Stafford Cripps as minister for economic affairs, with virtually dictatorial power in that field, Attlee's shakeup later now is surrounding his key men with men of executive talent to strengthen the machine.

Some 30 points are involved in the reshuffling and firing. All in all it's a complete reconstruction of the Cabinet.

Political aspect of the situation is perhaps even more important from the long-range viewpoint of world peace.

Political Aspect Important
However, the political aspect of the situation is perhaps even more important from the long-range viewpoint of world peace.

Small wonder, then, that the question immediately should arise whether Shinwell's demotion represents a socialist step to the right.

Robins Questions
Bureau's Survey
Of Hell's Canyon
BOISE, Oct. 9 (UPI)—C. A. Robins today questioned plans of the bureau of reclamation to do survey work next year in the area of the Snake river north of Council Bluffs.

Boise in North
On 'Egglers' Day
BOISE, Oct. 9 (UP)—George Cortes, president of the Idaho Restaurant Owners Association, said today that only about 20 per cent of the restaurant owners in Boise are complying with the voluntary eggs and poultry rationing plan.

Living Costs Are up in Canada, too, But Food Still Cheaper Than in U.S.

By JAMES MONTAGNES
TORONTO, Oct. 7 (U.S. Press)—The cost of living is going up here just as it is in the United States. But the rate between prices here and in the States has begun to narrow.

Such a situation is normal, and in a sense it represents the goal toward which the Dominion's planners have been working right along.

But even now clothing, electrical household appliances, automobile tires, leather goods, furniture and such items cost more up here.

The net result appears in average weekly earnings figures for the manufacturing industries.

in these two pictures the housewife, the butcher and the showman full of meat look very much alike.

Alaska Air Mapping Begun Again North, South of the Border

SEATTLE (UPI)—The world's largest multi-lens aerial camera is back in Nome, resuming a 20-year task of taking Alaska's picture. The photographer's subject is, of course, Alaska, which has sat patiently for 10 years while her picture was being snapped.

Designed by Comdr. O. S. Reading of the survey in 1938, the 300-pound gadget, which is the only one of its kind—cost \$400,000—requires such highly skilled photographers to keep its intricate setting apparatus from becoming disarranged.

Electric Brain Will Be Tried On Big Plane

WILMINGTON, Oct. 9 (U.S. Press)—Use of the air force's electronic brain in huge cargo planes like the Boeing C-77 strain-freighter was expected today to be one of the next major developments in automatic flight.

Engineers at the Clinton county air base began work on the push-button device immediately after it had flown a Douglas Sky-master onto the runway yesterday to complete an 8,000-mile round-trip to England.

May Take Two Years
It may take two more years to work out all the bugs, he said. He detected a number during the flight to and from Britain.

Iwo Jima Hit By Full Blast Of Big Storm

GHAME, Oct. 9 (U.S. Press)—A devastating tropical typhoon which "set down" on Iwo Jima leveled some buildings and left other little more than twisted steel and wood, a faint radio message picked up by the coast guard station here reported today.

The message, heard this afternoon, was the first communication from the volcanic island 800 miles north of Guam in more than seven hours.

Water damage was described as great.

Colorful Mum Show Opens at 1:30 Saturday

The chrysanthemum exhibit, to be held in the Twin Falls Garden club at the Idaho Power company Saturday, is one of the most interesting floral shows that Magic Valley offers.

The exhibit is not a competition, merely a showing of chrysanthemums in the area. It is divided into floral arrangements, special sections for disbudded specimens and decorative and artistic arrangements.

The display will be in the main floor show room of the Idaho Power plant and will open at 1:30 p. m. between 1:30 and 9:30 p. m.

It is expected that many of the exhibitors will display a wide variety of colors ranging from the palest tints to the warm red shades.

The chrysanthemum is used in ornamental planting all over the world. In Japan it is the national flower.

The camp fire guardians association is holding a meeting of the fall season Tuesday afternoon at the camp fire office.

The new 1948 holiday project, "Hello World" was reviewed and it was decided that requirements will be studied and outlined for the next meeting of the group in November.

One hundred guests were present for the reception which followed the ceremony. Mrs. H. C. Reinke, Mrs. Harold Olimber, Nadine Stromberg and Cleo Morris, Boise, assisted at the reception.

The bride departed wearing an ensemble of red with black accessories.

The couple are at home at 1628 Leaville street, Boise.

Seminole is a graduate of Fargo, N. D. high school and North Dakota State college. His bride graduated from Piler high school and attended St. Alphonsus school of nursing.

Guests at the wedding from out of town were Mrs. Elmer Gavilan and daughter, Spokane, Wash.; Eugene Semington and Mrs. Marjorie and daughter, Pullman, Wash.; Mr. and Mrs. F. L. Newman, Mr. and Mrs. Frederick Jones, Cleo Morris and Kathleen Wilson, Boise; Mrs. Bessie De Blose and daughter, Mr. and Mrs. Oren Nelson and family, Weiser, and Nadine Stromberg, Ogden, Utah.

Shirley Jones Is Married In Double-Ring Service

ALMO, Oct. 8—Shirley Rae Jones, daughter of Mr. and Mrs. Owen Jones, became the bride of Stanley Ward, son of Mr. and Mrs. Wallace Ward, Malia, at a double-ring ceremony performed by Rev. A. J. Williams, Sept. 28, at the home of the bride.

The bride was given in marriage by the bridesmaids, Mrs. Myrtle Jones, white allover satin train, and she carried a bridal bouquet of red roses and white hydrangeas.

Mrs. Rich Jones, sister-in-law of the bride, acted as maid of honor and wore a white gown with pink and white carnation corsage.

Charles Ward, brother of the bridegroom, was best man. Proceeding the ceremony Mr. and Mrs. Lewis Evans sang "Oh, Promise Me" and "If You Were the Only Girl in the World."

The mothers of the bride and bridegroom wore black dresses with white gardenia corsages.

A reception was held following the ceremony. A three-tiered cake centered the table.

DARLEEN WINKLER (Staff engraving)

Darleen Winkler To Be Wed With Autumn Service

BUHL, Oct. 8—Mrs. J. J. Winkler has announced the engagement of their daughter, Darleen, to Martin Petersen, son of Mr. and Mrs. Andrew Petersen, Wendell.

She graduated from Buhl high school with the class of 1947. She is a member of the National Honor Society, Girl Reserve, Pep club and Y-Yeens.

The couple left after the reception for a brief honeymoon. For a going-away ensemble the bride chose a blue suit with black accessories.

Fashion Review By Jay-C-Ettes Occurs Tonight

The Jay-C-Ettes fashion show opens at 8 p. m. today at the Radisson. A great variety of styles from the autumn collections of local merchants will be shown in the "Symphony of Fashions."

The Mayfair has contributed a butcher-boy brunch consisting of quilled black laffia lined with a bright red and white check.

Contra to the personal breakfast robes is a striking Kelly green slacks suit designed by Vera of Los Angeles for the sports woman.

The Paris committee has contributed a youthful evening wrap of natural gray lamb's paw with a rippled back, bracket-cuffed sleeves and gathered fullness over one shoulder.

The General Lawton auxiliary No. 7 of the United Spanish War Veterans will meet at 8 p. m. today at the Legion hall.

The Junior guild of the Brethren church meets at 7:30 p. m. today at the Ray Pike residence.

MRS. RENNO L. TEASLEY (Staff engraving)

Marlese Nelson Weds in Nevada

BUHL, Oct. 8—Mr. and Mrs. G. Nelson have announced the marriage of their daughter, Marlese, to Renno L. Teasley, son of Mr. and Mrs. V. R. Teasley, 1240 Addison avenue, Twin Falls.

Teasley graduated from Twin Falls high school in 1944 and attended Boise Junior college. He served two years in the army.

Teasley's bride plans to graduate next year from Buhl high school. She is organist at the Methodist church and is a member of the Theta Kappa Phi club.

Pinochle Party Held for BPOE

The Elks pinochle party was held last week in the Venetian room of the Elks hall. Winners among the men were in Martin who held high score; C. R. Dewar, second, and Ernie Bjork. Third, Mrs. Schmal was high for the women; Mrs. Wilbur Brown, second, and Mrs. Ernie Bjork, third.

Refreshments were served by the committee of hosts composed of Mr. and Mrs. Harry Tyler, Mr. and Mrs. Dale Henman, Mr. and Mrs. Ernie Bennett, Mr. and Mrs. Domes Bastes and Mr. and Mrs. R. W. Zimmerman.

Member Departs For Walla Walla

Fairfield, Oct. 8—Mrs. A. L. Lawson, entertained the WPCS last Friday afternoon at Mrs. Lawson's home, east of Fairfield.

Refreshments were served by the committee of hosts composed of Mr. and Mrs. Harry Tyler, Mr. and Mrs. Dale Henman, Mr. and Mrs. Ernie Bennett, Mr. and Mrs. Domes Bastes and Mr. and Mrs. R. W. Zimmerman.

Parents Tell of Fall Marriage Of Velma Delfs

FILER, Oct. 8—Mr. and Mrs. P. M. Wolfe have announced the details of the wedding of their daughter, Velma Delfs, and Victor E. Semington, son of Mr. and Mrs. S. E. Semington, Everett, Wash., which took place Sunday, Sept. 7, at the Immanuel Lutheran church in Twin Falls.

The ceremony was performed by the Rev. A. T. Lewis, Eden, before a background of pink and white gladioli and asters. The bride was given in marriage by her father.

White satin formed the wedding gown, and the fingertip veil of marquisette fell from a halo of orange gladioli and asters.

Nadine Stromberg, the maid of honor from Ogden, Utah, was dressed in white marquisette and carried a bouquet of white gladioli.

Flower girls, in pink and white flowered satin, were Toni DeBose, and Kathryn Olimber, Buhl.

Lowell Wilkerson, Boise, was best man and carried the bride. The bride was dressed in black and wore a corsage of roses.

One hundred guests were present for the reception which followed the ceremony. Mrs. H. C. Reinke, Mrs. Harold Olimber, Nadine Stromberg and Cleo Morris, Boise, assisted at the reception.

The bride departed wearing an ensemble of red with black accessories.

The couple are at home at 1628 Leaville street, Boise.

Seminole is a graduate of Fargo, N. D. high school and North Dakota State college. His bride graduated from Piler high school and attended St. Alphonsus school of nursing.

Guests at the wedding from out of town were Mrs. Elmer Gavilan and daughter, Spokane, Wash.; Eugene Semington and Mrs. Marjorie and daughter, Pullman, Wash.; Mr. and Mrs. F. L. Newman, Mr. and Mrs. Frederick Jones, Cleo Morris and Kathleen Wilson, Boise; Mrs. Bessie De Blose and daughter, Mr. and Mrs. Oren Nelson and family, Weiser, and Nadine Stromberg, Ogden, Utah.

Plan Silver Tea

HAGERMAN, Oct. 8—The Altai society met at the home of Mrs. Fred McCormick last week for a silver tea. Father Carrie, formerly of Boise, who has taken the place of the Rev. Father Tracy at Wendell, was a guest. Plans were made for silver tea which will be held at the Civic club rooms on Nov. 15. The next meeting will be Oct. 22.

Advertisement for Yates School of Dancing. The ad announces the addition of a new Ballet and Tap School with Kay Allred as teacher specializing in Ballet-toe-Tap and Toe-Tap and Acrobatics. Naming of Meyer Puts Two 'McCarthys' in Majors While Yankee Chain Losses Brilliant Strategist

By HARRY GRAYSON N.Y. Sports Staff NEW YORK, Oct. 9—Larry MacPhail, who a year ago was scoring the country for a manager, has done a remarkable job of supplying other clubs with standout strategists.

Warren Giles of the Reds, after carefully casing the situation, grabbed Meyer, and doesn't regret it. The manager in history, used all health as an excuse for chucking it, but by world series time last fall was the healthiest sick man you ever saw.

It also puts two McCarthys in the majors, for the methods of the upstate New York and Tennessee farmers are strikingly similar. That is only natural, for the soft-balled New York and Tennessee farmers are strikingly similar.

It was with the Athletics that stop coach the Pittsburgh opportunity and a three-year contract for \$100,000. In 19 years with the Yankee chain, Meyer managed clubs in Springfield, Birmingham, Oakland, New York and Kansas City, was extraordinary in developing youngsters and in returning players sent down, frequently at fancy prices.

GOLF CLUBHOUSE CAMPAIGN OPENS

Way back there in those dear, dear days beyond recall, Ye Oldie Sporter graduated from high school and happened on that great day which has been commemorated by the misty past—even the name of the commencement speaker. But the pudgy one does remember that the title of that speaker's address, forever quite steeped at the time, was "Education Not a Living, but a Life."

Although both Michigan and Texas sport more impressive records than Notre Dame, the experts placed Coach Frank Leahy's fighting Irish at the top of the list on the strength of their 40-0 triumph over Pittsburgh in their only performance to date.

Friday Grid Bill In Magic Valley A campaign with a new clubhouse at the Twin Falls municipal golf course as the goal was launched here yesterday by a group of golfers following a suggestion of Jim Henry, well-known Kimberly produce dealer.

Automobile body builder Walter O. Briggs of Detroit offered to purchase the Kansas City franchise to get Little Scooter Ruzeto and Friddy. Meyer had a hand in the bringing up of the bulk of the current Yankee.

On the SPORT FRONT With YOSS (The Pudgy One)

Irish Eleven Rated No. 1 on Nation's Grid NEW YORK, Oct. 9 (AP)—Notre Dame, Michigan and Texas are the big three in college football at this early stage of the fall campaign.

Friday Grid Bill In Magic Valley (Continued) According to Sinclair, the \$10,000 will be presented to the city council at its next meeting with the hope that the city will provide the remainder of the funds necessary to building the clubhouse—for which the council had made plans several years ago.

City Workers May Gripe About Pay, But Farmers Still Not Getting Share

(This is the second of three dispatches on the condition of the American farm today.) BY PETER EDSON...

WASHINGTON, Oct. 9 (NEA)—The \$2.5 billion, which is now estimated to be...

for the war. Based on 1940 and 1945 census of agriculture, a county-by-county survey was made to determine what city conveniences are now to be found on farms.

While these figures look good, given the American farmer the high standard of living of any rural people in the world, there is still a big gap to be closed to bring farm standards up to the city standards.

Though their wages are three and four times as high as prewar, they do not begin to meet the city wage which, in manufacturing industries, now averages close to \$100 a month...

Utah May Call Extra Session On Price Rise

SALT LAKE CITY, Oct. 9 (UP)—Gov. Herbert B. Mah tooled a threat over the Utah legislature into special session...

The governor said that the decision on the special session will be made when the division of marketing of the state department of agriculture finishes a special price investigation.

He said that if excessive profits are uncovered, something will be done to bring them under control.

Meyer Is Missing As Postman Calls To Deliver Letter

Markets and Finance

Markets at a Glance

NEW YORK, Oct. 9 (AP)—Stocks generally higher in today's market, after yesterday's first reaction to news concerning the government's plan to purchase surplus stocks and assorted pivots failed to make the grade.

Irregularly ruled in the forenoon with some volatility, the market then settled off in the fourth hour with a slight recovery. The Dow Jones industrial average closed at 100.48, down 1/8 from 100.66.

Some of the most active stocks were: General Electric, 67 1/2; IBM, 116 1/2; American Telephone and Telegraph, 38 3/4; United Fruit, 27 1/2; and International Paper, 26 1/2.

Robins Gives Opinions for Basin Report

BOISE, Oct. 9 (AP)—Gov. C. A. Robins said today he has instructed the bureau of reclamation its voluminous Columbia basin report should be considered jointly with similar reports from the army engineers and other agencies covering development of the great river system's resources.

In submitting his comments on the bureau report to Interior Secretary A. Frank Bohns said it contained "a remarkably complete and very valuable inventory" of basin resources. But he said reports from other agencies, particularly the army engineers, should be considered along with it so that "integration and coordination would thereby be accomplished."

Robins said that while a unified program for watershed development was desirable there should be no delay in carrying forward projects already authorized by congress, or which can be shown to be feasible or urgently needed.

The governor said it would be premature for the state of Idaho at this time to express a final opinion or offer recommendations as to the Columbia basin report.

The regional bureau of reclamation in Boise said comments on the big report had been received from the governors of Idaho, Wyoming and Nevada. Still to be heard from are the governors of Oregon, Washington and Montana. The Idaho Reclamation association recently asked for a further extension of time for submission of governor's comments.

ISC Homecoming Set for Saturday

POCAHELLO, Oct. 9 (AP)—Students and faculty will parade Saturday afternoon in the opening event of the Idaho State college annual homecoming celebration.

A large delegation of alumni is expected to participate in forming a permanent alumni association. Feature of the two-day celebration will be selection of a homecoming queen Saturday and the football game Sunday afternoon between the ISU Bengals and the Hawaiian All-Stars.

Carl Dallas, Buhl, Named Milk Tester

Carl Dallas, Buhl, was appointed milk tester and supervisor to the Dairy Herd Improvement association by members of the association at a meeting held in the Twin Falls county courthouse Tuesday night.

Twenty-one members of the association attended the open meeting which was presided over by President Mallory Fisher.

Eastern Lookout

Donald R. Heath, 53, of Topeka, Kansas, has been appointed by President Truman to be American minister to Bulgaria, despite strained relations between the two governments. Heath will act as official observer to watch out for American interests in communist-dominated Bulgaria. (NEA photo)

Japan Preparing Tourist Greeting

TOKYO (AP)—Transportation ministry plans for inviting the sightseeing industry have been disclosed, with foreign tourists expected to spend \$400,000,000 yen in Japan during the five-year period ending in 1952.

The ministry reports said tourists are expected to climb from 23,000 next year to more than 200,000 in 1952. The announcement pointed out that before the war the average visitor to Japan spent about \$1,000 here.

The tourist industry will be divided into two sections—government and private business. The government will build hotels, de luxe trains and better railways. Private interests will manage the bus lines, playgrounds, golf courses and resort hotels.

BENEFIT DANCE HELD HALLIXY, Oct. 9—Bellevue high school held a harvest dance Monday evening at the school auditorium, with Mrs. Mabel Walker's orchestra furnishing the music. Proceeds will be used to buy suits for the basketball team.

Iowa Farmers Have it Rough As Poor Weather Hits Crops

(This is the second of a series written by the Washington manager of the United Press who is traveling through the Midwest.)

BY LYLE C. WILSON
DES MOINES, Ia., Oct. 9 (AP)—John E. Brooks hitched his farm kitchen chair back on his hind legs and said, "You air, I been buying eggs, butter and even potatoes for us to eat."

"Now, ain't that a hell of a note?" Brooks added with a smile. Brooks is a dairy farmer on 240 acres west of Des Moines. We sat and talked at a big square kitchen table in a spic seven-room house as modern as jive. The brooker store is a Stetson electric, the refrigerator a Frigidaire. The sink is one of those modestly fancy units affairs sunk into a long counter with cupboards underneath.

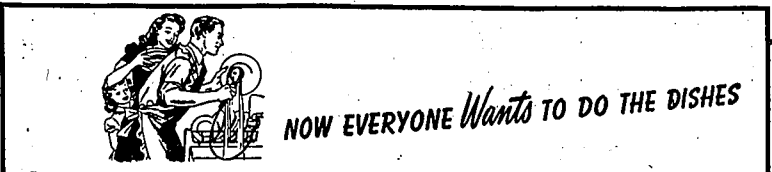

Iowa is rinding up farm income in excess of \$1,000,000,000 this year. But it hasn't been peaches and cream for everybody. Take Brooks.

after I cut it. Alfalfa hay, too." With better luck, Father Brooks crossed between \$1,000 and \$10,000 on those 240 acres last year and the son expects to get the breaks, too, and to do as well again. But this year was tough. To fill the Brooks' silo last year only six acres of corn was needed. It took 77 acres of this year's poor crop. Even so, the Brooks family paid \$20,000 for their 120 acres of land in 1943. They reckon it is worth \$40,000 today—which is not a bad capital investment. If young Brooks had made his corn crop this year he would have had \$37,000 or better in cash or feed for his stock. Better luck next year, maybe.

"But I like it," Brooks said. "I didn't I wouldn't be here. '700 damned hard work. But when you're bucking it up hill the way we are, it is a gamble."

PLATE MANUFACTURE SET
BOISE, Oct. 9 (AP)—Warden Louis Clapp said today that production of the 1948 automobile license plates will begin on schedule the middle of next week. He said all machinery necessary for the manufacture of the plates has been installed. The aluminum from which the plates will be made is en route to the plant from Seattle.

Observe Holiday
NEW YORK, Oct. 9 (AP)—Financial and commodity exchanges throughout the United States will be closed Monday, Oct. 13, in observance of Columbus day.

NOW EVERYONE Wants TO DO THE DISHES

HANDI-MITE

Copper rivets at points of strain. Double stitching for longer wear—regular 8 oz. denim. Extra full cut seat and crotch. Sizes 6 to 16.....\$1.89

BOYS' BALCONY

134,300,000 Dozen Eggs in Hands of U. S.

WASHINGTON, Oct. 9 (AP)—The government owns 134,300,000 dozen eggs, but they are not what you would eat for breakfast.

They are frozen and dried eggs. None are shell eggs, which the consumer buys for home consumption. These eggs, representing less than three per cent of this year's indicated total production, were bought by the government last spring during the normal heavy egg production season under a government requirement that the government support producer prices.

Was the period of surplus production has passed and not output—following the normal pattern—has dropped considerably below the quantity consumer would like to buy.

10 Per Cent Increase This is reflected in the fact that producers' prices of eggs have increased about 10 per cent over levels prevailing during the spring season of temporary surplus production.

The government bought 1.36 billion eggs at 90 per cent parity. Parity is a fluctuating price which under terms of farm legislation, is declared to be equally fair to producers and consumers.

Reason for Observance The government has asked Congress to observe a poultryless Thursday for two reasons: (1) Continued heavy buying would force egg prices higher and (2) encourage poultrymen to keep inefficient hens in production rather than sell them, as they normally do, for meat purposes.

Grain fed to inefficient hens to meet consumer demands during this low season of production would reduce the prospects of obtaining the desired quantity of cereals for export.

Consumers will get the benefit, however, of the government's frozen eggs, totaling 40,000,000 dozen. They will be sold to bakers and other food processors who use eggs in this form.

3 Sisters Receive Terms in Jail as 'Common Scolds'

PITTSBURGH, Oct. 9 (AP)—Three sisters, ranging from 23 to 39 years old, were given jail terms as "common scolds" in Allegheny county court after a neighbor played for the jury a double-sided record which testified contained their scolding.

Helen Znocko, 36, and Betty, 26, of West Natron, were given 12 to 23 months in Muncy industrial home for women, and Josephine, 23, drew three months in the county jail.

Francis Paster testified the women hurled "wile and abusive" remarks at him after a disagreement over shrubbery in the Znocko yard. Her record was made by her son, Francis, Jr., who said he placed the recording machine in the doorway of his home, turned on the power and then stopped his ears with cotton.

When sentence was passed, the sisters gasped audibly and burst into tears.

Assistant District Attorney James Philipps said "common scold" charges can be brought only against women. He said a similar charge brought against a man, about a year ago, was thrown out of court.

LEGAL ADVERTISEMENTS

PETITION
IN THE DISTRICT COURT OF THE ELEVENTH JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS.
I, **IRVING H. HARTLEY**, do hereby petition to CHANGE MY NAME TO **RUSSELL SEMA**, and petition the above entitled court to issue an order to that effect and alter the facts to be as follows:

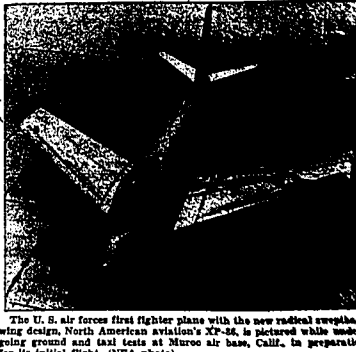

That petitioner is a resident of Twin Falls, Idaho, and has been for more than one year past.

That he was born on the 14th day of March, 1912, in Alderden, Pierce County, State of Washington. That his current name is **IRVING H. HARTLEY**, and that he desires to change his name to **RUSSELL SEMA**, and the reason for such change is that he desires to remain in the United States, as a citizen thereof, and should bear an American name, to the extent that his first name is changed as above set forth.

Witness my hand and seal at Twin Falls, Idaho, this 7th day of September, 1947.

D. P. DUVALL, Attorney for Petitioner.

U. S., Soviet Parleys Seen As Near End

By J. M. ROBERTS, Jr. AP Foreign Affairs Analyst
Next month's meeting of the council of foreign ministers in London may mark the end, for all practical purposes, of the two-year effort by the western nations to obtain an agreement with Russia on the future of central Europe.

It may even mean the end of the council itself, although U. S. policy in general is never to formally close the door on any hope, however remote, that Moscow may be persuaded away from its maverick role in world affairs.

There is still some question as to whether there is the slightest chance that agreement can be reached on the Russian side of the negotiation stage, and each side is now directing its efforts toward fixing the blame for the present state of the world and any subsequent worsening. Even the policy of keeping the door open is based more on the desire to establish a moral position than on any real hope that Russia will use it to enter the field of cooperation.

Moscow propaganda discussing the failure of the foreign ministers meeting has even led to some speculation, although not in the best informed quarters, that Russia might attend the November conference. Her final decision to come is being taken by some as evidence that there is still some possibility of common working ground. There is practically no chance for such an interpretation. It is far more likely that Russia will attend the council meetings, just as she attended the November meeting, as a propaganda device and a means of obstruction.

Actualities of the upshot of the London conference is likely to see the contending parties going entirely separate ways. Russia may make some formal moves to incorporate her occupation zones and some of the territories into the Soviet union, or she may just continue the de facto incorporation as at present.

Britain and the United States, with France excepted, are going ahead full steam with their plans to make western Germany a vital producing center, a virtual colony, for the reconstruction of western Europe.

Labor Act Author Misses Picketing

SEATTLE, Oct. 9 (AP)—The other member of the team sponsoring the Taft-Hartley labor act—Rep. Fred A. Hartley, Jr., R. N. J.—spent four hours in Seattle but without benefit of pickets.

His partner in the legislation, Sen. Robert A. Taft, R. O., was met with picketing here two weeks ago both at the union station and at his speaking place.

Hartley was met by anywhere from six to 6,000 pickets at other points, the congressman said.

Bogey of Relief Grain Haunts Anderson Fear of Price Hike

WASHINGTON, Oct. 9 (AP)—There's a bogeyman in the life of Clinton Anderson, secretary of agriculture. The fear that the administration will force him to buy extra grain for Europe before actual savings are made by President Truman's voluntary campaign.

Anderson never really quarreled with Secretary of Commerce Harrison on what this country should send to Europe.

His estimate of 40,000,000 bushels for next year's crop is on what we can spare at present rate of consumption.

Harrison's committee on foreign aid, with its 370,000,000 figure, was reported on what it thought Europe must have.

Their combat was this: Anderson didn't want the high figure because it would mean more grain price increases.

He wanted only a general statement made, saying more would be needed. He was shocked and surprised when Harrison announced it.

The result was what he feared: grain prices shot up the limit. The government's effort to curb speculation by higher margin requirements was nullified.

Not until days later did the White House announce that the extra 100,000,000 bushels were to be found through a voluntary rationing campaign.

Anderson is determined not to buy the extra grain for Italy and France until U. S. consumption actually drops, so as not to inject new inflationary pressures into the grain market.

But if Harrison, Secretary of state Marshall and the other all-outers persuade Mr. Truman that the increased purchasing should start right away, Anderson would have to yield.

Incidentally—agriculture department officials generally are not hopeful of success for the "buy wisely" campaign. They remember the fate of wartime "voluntary" drives. They will back it to the hilt but

Hang-Over Makes Bees Leave Hive

PATTERSON, N. J., Oct. 9 (AP)—The New Jersey Beekeeper association says it has found a solution to the problem of getting reluctant bees out of the hive: A "little nip" from some super-fermented honey will do it.

The high-powered honey is placed in the hive in sufficient quantities to satisfy all comers, a spokesman for the New Jersey beekeepers said.

The bees like it stinger about after a while and then come down with a "hang-over."

It's the hang-over then that does the trick. They swarm out of the hive, the association spokesman said.

But if Harrison, Secretary of state Marshall and the other all-outers persuade Mr. Truman that the increased purchasing should start right away, Anderson would have to yield.

Incidentally—agriculture department officials generally are not hopeful of success for the "buy wisely" campaign. They remember the fate of wartime "voluntary" drives. They will back it to the hilt but

Sears President Will Visit Idaho

BALT LAKE CITY, Oct. 9 (AP)—Gen. Robert E. Wood, president of Sears Roebuck and company, said the "United States should not go hog wild" in its aid to Europe.

The former quartermaster general of the army said spiraling prices are caused primarily by high food costs which he said will remain high as long as heavy shipment of food continues to Europe.

"This is not to say I disapprove of aiding Europe," Wood declared, "but we needn't go hog wild about it."

Wood is on a tour of the company's stores in Idaho, Utah, Nevada and Arizona.

He said the firm may establish three additional stores next year in Idaho. He declined to list possible locations and said "we can't tip off our competitors by publicizing our program now."

A beef animal on good range will eat his own weight in grass in seven or eight days.

Ship Destroyed

BOGOTA, Colombia, Oct. 9 (AP)—The navy department said three ships caught fire at the Pacific port of Buena Ventura and that one, the Canadian steamer Willcott, was a total loss.

The Peruvian ship Don Jose, with a large oil cargo, was reported to have caught fire from a nearby unidentified American vessel and was towed to the center of the bay where the fire was still raging. The fire on the American ship was controlled.

The crew abandoned the Willcott which was unloading 2,000 tons of wheat when the fire spread to it.

Visit Fairfield

FAIRFIELD, Oct. 8—Mr. and Mrs. Fred Orr, who now live in Walla Walla, Wash., were here to look over some business interests recently.

Mrs. E. W. Moody, Willow Creek district, is visiting her daughter, Mrs. Ellis Higginson and family, in Bannock.

LEGAL ADVERTISEMENTS

IN THE DISTRICT COURT OF THE ELEVENTH JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS.
I, **IRVING H. HARTLEY**, do hereby petition to CHANGE MY NAME TO **RUSSELL SEMA**, and petition the above entitled court to issue an order to that effect and alter the facts to be as follows:

That petitioner is a resident of Twin Falls, Idaho, and has been for more than one year past.

That he was born on the 14th day of March, 1912, in Alderden, Pierce County, State of Washington. That his current name is **IRVING H. HARTLEY**, and that he desires to change his name to **RUSSELL SEMA**, and the reason for such change is that he desires to remain in the United States, as a citizen thereof, and should bear an American name, to the extent that his first name is changed as above set forth.

Witness my hand and seal at Twin Falls, Idaho, this 7th day of September, 1947.

D. P. DUVALL, Attorney for Petitioner.

Fall-Winter Clothes—Penney-Priced!

MEN'S SUITS 42.50

Penney's tailored every one of these Town-lands from rich, all-wool worsted. And there's nothing like worsted for your hard-wearing, press-holding, neat-looking money's worth! Because the pure wool fibers are extra long, . . . twisted extra hard . . . woven extra firm! Tasteful shades of blue, gray and brown (being worned, the colors come through richer and truer!). MEN'S FLANNELETTE NIGHT SHIRTS 2.19

Here's warm winter comfort for you men who like flannel-ette night shirts. Superior styles in woven stripes. Small, medium and large.

Hens Termed Not Efficient In Producing

By ASHLEY EDSON
 "This was an eggless, poultryless Thursday under the voluntary rationing that went into effect today as good times to look into the eating habits of the hens.
 One of the who has been around one knows two obvious chicken facts:
 (a) hens is always (a) stupid, and (b) hungry.
 Fortunately, this is not the time nor the place to start an argument over a hen's I. Q.
 But every person who has tried to drive a hen back through this hole in the fence has some pretty decided opinions about what goes on—or, rather, doesn't go on—inside a hen's head.
 So let's hurry along to (b).
 The department of agriculture, which can get pretty specific about this sort of thing, discloses that a healthy, hungry hen can eat around 40 pounds of grain each year.
 Since the average hen lays only 115 eggs a year, this means that it takes about eight ounces of grain to produce an egg weighing approximately two ounces.
 It isn't enough that a hen has to be stupid; no, she has to go and be inefficient, too.
 Since the average cereal weight per each breakfast feeding is slightly over an ounce, it's obvious you can save considerable grain by eating cereals for breakfast.
 As a fellow at the agriculture department put it:
 "If you eat two eggs, you have eaten the equivalent of a pound of grain. And to eat a pound of grain by eating breakfast foods, you have to be a horse, literally."
 Of course, if the demand for eggs is still sufficient to keep the farmer keeps his hen, she'll go on gobbling 40 pounds of grain each year, no matter what you eat for breakfast.
 That's why, the agriculture people are giving grain-saving talks to the farmer.
 So far, they haven't bothered to reason with the hen. See paragraph 3 section 1 of our rationation if you care to know why.

Start Long Journey Home

Marines Cpl. Lawrence Follack, Chicago, stands at parade rest as the U. S. S. Honda Knot leaves Pearl Harbor, Hawaii, and slowly heads out to sea, bound for San Francisco with bodies of nearly 3,000 World War II dead. Many of the dead were killed in the Dec. 7, 1941, attack on Pearl Harbor and are being returned at request of next of kin. (NEA photo)

Prisoner Who Blinded Self Free on Bond

PHILADELPHIA, Oct. 8 (AP)— Jerome Foster, 42-year-old prisoner who, his attorney said, blinded himself with a hypodermic syringe so that he would never be tempted to commit another felony, was freed on \$500 bail subject to an eye examination.
 Foster was set by Federal Judge James P. McGranery at a habeas corpus hearing despite objections by U. S. Attorney Russell Hiller.
 Raymond Pace Alexander, counsel for Foster, said Foster blinded himself by drawing the fluid from his eyeballs while serving a one-year sentence in Holesburg prison for stealing and forging the pay check of a city employee.
 Foster's counsel quoted the prisoner as saying he blinded himself "because I would rather ruin myself for life than ever be confronted again with the temptation to do more felonies."
 Alexander contends that the sight of Foster's right eye is completely gone and there is only 20 per cent vision left in the other.
 Dr. Frederick Baldi, superintendent of the Philadelphia General Hospital, says the youth's sight was "completely restored" at the Philadelphia general hospital, where Foster was treated by John I. Weber, public health service officer, told the court "Foster is apparently blind in both eyes."

Curried Fish for Friday Suggested

WASHINGTON, Oct. 8 (AP)—The citizens food committee suggested curried fish as a meat conservation dish for Friday.
 The recipe is one of a series of cooking menus being issued by the committee to help housewives stretch food on the conservation program. It makes the most of foods in plentiful supply.
 The curried fish can be made with fresh, frozen or canned fish, the committee said, and the currying can be omitted if desired. It suggested baked potatoes, a crisp vegetable and a baked apple to round out the meal.
 The cigarette first became popular when soldiers in the Crimean war began to use them.

Wool Processing In West to Cut Production Cost

SALT LAKE CITY, Oct. 8 (AP)—Col. H. C. Anderson, Cheyenne, secretary-manager of the Wyoming Commerce and Industry Commission, said today that "processing wool in the west will make more efficient use of domestic wool and by lessening production costs permit wider distribution of domestic wool fabrics."
 Anderson was in Salt Lake City with Alexander Johnston, assistant wool specialist, department of wool technology, University of Wyoming.
 They have completed a survey of the wool industry in Idaho, Oregon, Washington and California.
 Anderson said the processing of western wool should go as far as the manufacture of wool top, the most refined form of wool fiber, ready for spinning into yarns.
 He said the present policy of shipping raw wool to Boston means freight charges of "50 pounds of dirt in the carry to 100 pounds of fleece."
 Anderson declared western states now have plenty of labor and have emerged from an agrarian status into an industrially minded region. He said western capital is available to back wool processing industries.
 The two wool specialists said they found a "solid nucleus" of wool processing and spinning industries in Salt Lake City, Pendleton, Ore., Portland, Washougar, Wash., San Francisco and Los Angeles areas.

Diploma Awarded After 30 Years

BOISE, Oct. 8 (AP)—After waiting over 30 years Admiral LeCouture of St. Marine was handed his high school graduation diploma here.
 LeCouture enlisted in the army during World War I where he served in France. After his discharge from the service he returned to his north Idaho home and for the last 27 years has been employed as a carpenter in St. Marie.
 LeCouture recently entered the veterans hospital here and during an interview with James C. Julius, chief of educational training, learned he could complete the high school requirements he missed when he enlisted in 1917.

Conservation Act To Bring Arrests

BOSTON, Oct. 8 (AP)—Attorney General Tom Clark said that he had advised President Truman that the department of justice would not prosecute under anti-trust laws any cooperative effort by business to conserve food.
 Clark told a Boston Chamber of Commerce luncheon meeting that he was making this announcement because "some business men have advised us that they fear any cooperative effort on their part would be in violation of anti-trust" statutes.

Long-Skirt Row Shunned by Taft

DES MOINES, Oct. 8 (AP)—In the midst of questions dealing with the food crisis, labor, communism, etc., a young feminine reporter suddenly asked Senator Taft, R., O. during a news conference whether he had any views on the new style long skirts.
 The senator roared with laughter and said: "That's one I don't have to vote on. I've had trouble dealing with enough questions without taking on ones that probably won't come before congress—although you never can tell."

Label for Truman Worn by Woman

WASHINGTON, Oct. 8 (AP)—President Truman smiled when Mrs. Lydia Edwards, associate director of the Women's Democratic Committee, called at the White House wearing a pair of "Truman for President" buttons.
 Mrs. Edwards went to the White House for the President's radio address on Democratic women's day. She posed for photographers with Mr. Truman, who noticed the buttons but only smiled.

Skirt Boycott?

WASHINGTON, Oct. 8 (AP)—The CIO took a cut at the new long-skirt mode, calling for a boycott of "this outrageous practice."
 "It's a conspiracy against you," the CIO's publication, Economic Outlook, advised its feminine readers.
 Workers' wives, it added, "cannot afford to throw out the excellent garments now hanging in their closets."

Girl Loses Legs, Arm on Railroad

NEWINGTON, Va., Oct. 8 (AP)—Six-year-old Gloria Forester's right arm and both legs were amputated by a Rutland railroad switching engine as she walked past a freight yard on her way to school.
 Police said the engine crew was unaware of the accident. Investigators said Gloria apparently was running along a walkway between the highway and the railway freight yard, but added that they had not determined how she was pulled beneath the engine wheels.
 The small girl was in critical condition at a hospital.
 There are about 37,000 steam locomotives in service on class one railroads in the United States.

Soldier Attempts To Reach Mother With Hughes Aid

PARADISE, Calif., Oct. 8 (AP)—A soldier reached the bedside of his critically ill mother after a cross-country trip assisted, on the last leg, by plane pilot Edward Hughes.
 Pvt. Clifford Rahm, 19, was at his station at Shaw Air Force Base, Columbia, S. C. when Mrs. Gladys Rahm, 67, Compton, Calif., was brought to a hospital here Sunday in critical condition. She called for her son.
 He obtained leave, hitched an army plane ride to Tucson, Ariz., but there he was stuck for transportation today. A family friend, Arthur Senior, Compton, appealed to Hughes, who offered out one of his planes to bring Rahm from Tucson to Los Angeles.

Idahoans See Steady String Of Candidates

By JOHN CORLETT
BOISE, Oct. 9 (AP)—This year of 1947 to date, Idaho Republicans have had a chance to look over some favored GOP candidate for the presidential nomination and two potential ones. That's a pretty good procession through the Gem state which can deliver 11 votes at the national convention next June. The last one to go through was Sen. Robert A. Taft of Ohio. He was preceded by Gov. Thomas E. Dewey of New York who visited Idaho Falls and Pocatello in July. The one announced candidate, former Gov. Harold E. Stassen of Minnesota, made a speech in Twin Falls last spring.

Stuck With Dewey
In 1940 and 1944, the Idaho Republicans stuck with Dewey. In the absence of a darkhorse candidate, they likely will stick with him in 1948.

But a good many of the Idaho Republicans are talking about that darkhorse. They have taken a new interest in Governor Eisenhower, for example, and there are plenty of reasons for this.

Stassen has considerable strength among the younger element of the party. But to the older and conservative members he is not so liberal. The more men who accompanied Taft on his western tour agreed that the Ohio senator had gained "considerable strength in the West. But they agreed, too, that the name of Eisenhower was on the lips of a lot of Republicans.

The Republican party's delegate convention will not be held for seven months and a lot can happen in that time.

Closing For Beer Taverns Is Issue

SANDPOINT, Oct. 9 (AP)—Over in Idaho Falls, the Bonnevillie county commissioners have closed beer taverns in Lemhi. Beer retailers and wholesalers have threatened to go to court.

In Sandpoint, the commissioners stuck together on that question and adopted at a meeting of the Association of Commissioners and Clerks a resolution urging a uniform law of regulation forbidding the sale of beer from midnight Saturday until 7 a. m. Monday.

An attempt was made in the 1943 legislature to pass a Sunday closing law but it failed. No doubt the issue will be raised in the next legislature.

Fairfield's Flight Instructor Named

FAIRFIELD, Oct. 9—Kenneth Clark has been named by the board of the Gamma Aero-club, Inc., as flight instructor at the local airport.

Rehearse Dramatic Fire Scene

The board of fire underwriters puts fire on the "boards" here. The drama class at New Rochelle, N. Y., high school rehearses a dramatic fire scene from a play, "The Intruders," written and distributed free to schools to aid fire prevention. (NEA photo)

Fire Fighters Aim Drives at School Children With Stories, Books, Play

NEW YORK, Oct. 4 (NEA)—Fire prevention officials are going all-out to get this story across to the juvenile set, the national board of fire underwriters hired two well-known writers of children's stories. The results are "Billy Barrett, the Fire Chief's Son," "The Twins and Mr. Jinx," both by Maud Hart Lovelace, and a one-act play, "The Intruder," by Emma Gelders Sterne.

All three would be in the best seller class except that they are distributed free. The underwriters have given several hundred thousand copies to the nation's schools.

"Billy Barrett" is written for teachers to read to their pupils in the first three grades. To prove how important it is to call the fire department as quickly as possible in case of fire, Billy Barrett, a neighbor's house by turning in the alarm and then standing by the fire alarm box to show the firemen where to go.

"The Twins" puts forth through several grades on their matter to see that their parents don't get careless. It tells how the twins' father, Mr. and Mrs. Jinx, a penny into the fire box, sets the house on fire and almost burns up the twins.

All things up in the kitchen when it rolls Romeo and Juliet and a couple of fires into one action-packed act. The play covers the rehearsal of a school production of Romeo and Juliet in a high school girl's home. Fire gets in as often as the hero.

It comes up in the kitchen when it rolls Romeo and Juliet and a couple of fires into one action-packed act. The play covers the rehearsal of a school production of Romeo and Juliet in a high school girl's home. Fire gets in as often as the hero.

The committee on education of President Truman's recent conference on fire prevention reported that "nearly all of these children would now be alive if adequate safety education had been provided in the elementary schools."

If "Billy Barrett," "The Twins" and "The Intruder" help save lives, that's all the underwriters want.

Lower-Cost Housing Calls for Price Slashes "All the Way"

By PETER EDSON
WASHINGTON, Oct. 4 (NEA)—Something seems to have gone slightly haywire with the many predictions of last spring that the cost of housing is so high its pricing itself out of the market.

New non-farm housing started in August at a record high of 83,000 units. Completions of 450,000 units last year may not be much above 1946.

But, according to Raymond H. Foley, new top boss of all government housing activities, prices have leveled off in recent months at a high plateau, and there is no reason why they should not decline gradually over a fairly long period.

This is what the National Association of Real Estate Boards said and the trend would be after its survey of 450 cities last March. It found costs coming down in about half the cities, registering an average third, rising in the remaining six.

The companion National Association of Home Builders puts out the line that present housing costs are not out of proportion to other advances in prices. The way NAHB figures it, based on 1939 levels the average individual's income is up 115 per cent, the cost of living is up 83 per cent. The cost of new houses is up only 52 per cent.

While this may be good arithmetic and good sales talk for the building industry, it isn't the whole story. The total cost of living has gone up but 55 per cent. And an 82 per cent increase in the cost of a new home is too much.

Principal reason these prices are too high is found in America's great unmet need for modern low-cost housing. It has been estimated as high as a million units a year for 20 years. This figure doesn't mean much because housing requirements are constantly changing. Also, it doesn't break down the need in terms of how many houses costing under \$6,000, \$12,000, \$18,000, \$25,000, \$35,000 or over \$50,000. That's one of the things Administrator Foley, as head of the new housing and home financing agency is trying to find out. This is the real problem.

In a recent speech before the U. S. Housing and Home Finance Administration, Foley went into some of the things causing today's high housing costs. He said that the government program on drive to bring down housing costs. He doesn't go in much for controversy, and he is out of tune of the cost of the veterans' housing program. Though Foley has been in government housing work for 13 years—first in Michigan, then in Washington—he says he is a champion of low-cost housing.

He looks at the housing industry as a complex collection of many independent businesses and many skills. It isn't unified like the auto business.

The final figure in home building—the general contractor—has little control over total costs. If there is to be any reduction in building costs, says Foley, there must be a cut at every step in the construction process.

"Land developers must cut margins on sites." Raising prices just because other prices have gone up is preposterous.

"Labor must justify high pay by full production." Efficiency and progress in building have gone up, but labor is now at an all-time low.

"Sub-contractors must sharpen their pencils in bidding." Now that prices are dropping, there is no need to add 30 per cent for protection.

"Material producers must reduce unit costs. Charging all the traffic will bear while demand exceeds supply is inexcusable.

"Outmoded building codes must go if they add to costs." This evil has been known for years, but nothing has been done about it.

"Restrictive labor practices must be done away with." Use of new prefabrication techniques and materials should be encouraged.

"Constant liberalizing of credit terms to support today's high prices and sock the home buyer is no excuse for a direct attack on costs.

Reduction of costs has been set as the number one objective of the new congressional committee to investigate housing. If this group, under Rep. Ralph Gamble, N. Y., and H. R. 100, can do anything to correct some of these abuses, it will earn every cent of its \$100,000 appropriation.

Prices grow from a large fleshy root lying in a horizontal position.

Cattle Feeder Gets Big Pay; Losing Money

By Hal Boyle
 CLEAR LAKE, Idaho, Oct. 9.—A farmer here recently received \$80,000—the largest single check ever sent to a cattle feeder in this area—yet today he doesn't know whether it is worthwhile to stay in business.

This is the dilemma of J. D. Richardson and many another mid-west farmer who makes a career of taking rangeland western cattle and fattening them into top grade heavy beef.

Undecided
 "I've been feeding cattle for 25 years and darned if I know what to do," said Richardson, a tall, thin, weathered farmer son of a farmer.

He and others like him are being scared into reduced activity by the high price of grain, the food-fuel that ripens lean, grass-fed steers into the juicy, fat-ringed cattle that command a premium in metropolitan markets.

Richardson figures that he can buy an 800-pound steer for \$12 but that it will cost him a dollar a day for 300 or more days to fatten it in corn and protein needed to plump it into a 1,400-pound target for the butcher.

Cost Too High
 "That makes it cost me \$118, not counting the hay and corn or my own overhead and labor costs," he said. "For does it include any interest for my money?

But such a steer, if sold on the present high Chicago market, would fetch him only \$54.

"There just no way you can figure out on pencil and paper," said Richardson, "it looks like a feedlot is better before a slaughter."

City folks sometimes blame the farmer for these high prices but the farmer didn't ask for them. He would be a lot better off if the prices stayed low. Now we're out on a limb.

Richardson got his check of \$80,000 for 138 high grade steers.

Designs Bring Prizes

Donald Stumpf of Buffalo, N. Y., gets a look at his prize-winning model on the super-highway of the city of the future. His design won him a \$2,000 university scholarship. (NEA photo)

Boy Designers of Autos Give Car Industry Modern Ideas

DETROIT, Oct. 2 (NEA)—The youths of America already are several years ahead of the nation's automobile designers with their ideas of what motor cars should be like.

Some of their ideas are impractical. Some probably will be incorporated in automobiles which will go into production within the next few years.

Taking their tip from war-bull fighter planes, these young designers are showing more streamlining than ever before, with fenders taking the contours of plane wings and in some cases extending behind the rear-shaped bodies.

One out of three of the boys who submitted prize-winning models to the Fisher Body Craftsman's guild competition designed rest-engine compartments and provided more interior body room. More glass was incorporated in the designs for better vision. Most of the models called for air conditioning. Rear engine models had air intakes along the forward edges of the back fenders.

Maybe it's because the boys usually have to do the polishing, but there was a definite trend against

large areas of bright work. Professional designers said this absence of chromium plating makes automobiles look smaller but shows refinement in basic bumpers were less massive and placed to increase effectiveness, sometimes even denting the car.

One change in headlight design was a solid bank of lights across the front similar to fluorescent lighting fixtures in homes and offices. Some of the young designers preferred a single locomotive-like headlight.

Most of the models were in conventional colors; a few had metallic paint like bronze.

The winners in the competition shared \$65,000 in prizes donated by Fisher body. Of this amount \$38,000 is in university scholarships.

Jaycees Chief To Visit Area On Week-End

John B. Shepperd, U. S. Jaycee president, is visiting Idaho this week-end on a "fifth freedom flight" which is taking him through half the states in the union, according to word received by members of the Twin Falls Junior Chamber of Commerce.

Purpose of the tour is to mobilize the young men of the nation "for a sustained campaign to strengthen democracy and the free enterprise system," according to information received from the United States Junior Chamber of Commerce.

Arrival Stated
 Shepperd is scheduled to arrive in Boise at 11 a. m. Saturday from Eugene, Ore. He will meet Gov. O. A. Robbins and then will attend a luncheon with Boise civic clubs. An address he is scheduled to make at the luncheon will be broadcast.

The national Jaycee president is scheduled to leave Boise at 2:30 p. m. by plane for either Healy or Gooding, taking a bus to Sun Valley. He plans to spend Saturday evening and all day Sunday at the famed resort leaving at 9 a. m. Monday for Helena, Mont.

"Everyone is talking about communism," Shepperd said at the start of his tour, "but Jaycees are doing something about it. Young men have their lives before them. They just have a form of government that provides the incentive of opportunity. Young men and free enterprise go together."

Started in 1944
 The "fifth freedom" — the opportunity of enterprise, was featured in 1944 by Jaycees at their national convention. Since then, one of the organization's major activities has been to instill in young men an appreciation of democratic ideals; a broader participation in the affairs

of their community, nation and world.

"Believing that the hope and responsibility for world peace lies with young men, Shepperd said that the plan for either Healy or Gooding en route to Sun Valley where he will spend Saturday evening and all day Sunday.

"Punjab, the name of an Indian province, means 'land of five rivers.'"

American Legion Members Discuss Changes for Hall

Tentative plans for remodeling the American Legion hall to provide improved facilities for giving large banquets were discussed during Tuesday evening's meeting of Twin Falls Legion post No. 7.

These preliminary plans include contemplated installation of a ceiling with indirect lighting, a stage, draped and adequate kitchen facilities to enable serving of a large gathering.

Also discussed was the possibility of erecting an appropriate memorial at the Sunset Memorial park in honor of World War II veterans.

The group also heard the suggestion of establishment of a wholesale commissary for purchase of staple foods by members in event of continued price increases, and a committee was appointed to investigate the feasibility of such a plan.

Members are urged to attend the approaching district convention to be held at Albion.

Joe Jenkinson, vice commander, presided in the absence of Commander H. C. Peterson, who was unable to attend.

Philip's Best Man

Lord Milford Haven, above, 25-year-old David Michael Mountbatten, who is a first cousin to Lient. Philip Mountbatten, will be best man at Philip's marriage to British Princess Elizabeth on Nov. 26. (NEA photo)

Talk on Profits Held at Meeting of 'Farm' Union

JEROME, Oct. 9.—A panel discussion on "Profits in the Farm Industry" was conducted at this week's meeting of the Farmer Union.

In connection with the discussion, Bob Nelson, Farmer Union field representative, explained the functions of the Mini-Casala Marketing association. He urged local members to attend the Washington, Idaho convention to be held at Puyallup, Wash., on Oct. 24 and 25.

Leon Ball, local vice president, gave a report on the meeting at Rupert during which a district advisory board was elected. Adels is a member of the board along with Harvey Davis, Jerome and Aldo DeLorenzo, Cassia county.

Rachel Hanvey, field representative, was a guest from Twin Falls.

Auto Dealers Set District Parley

The Idaho Automobile Dealers association will hold a series of district meetings throughout the state next week, the first being scheduled for Monday, President W. H. Barnard, Twin Falls, said Thursday.

Barnard said dinner meetings will be held at Coeur d'Alene Monday, Lewiston Tuesday, Boise Wednesday, Jerome Thursday, and Idaho Falls Friday.

Speakers at the meetings in addition to Barnard will be Charles Freese, Salt Lake city, vice president of the national association; El Weston, Boise attorney, and W. E. Shawalter, national association director.

Each district will nominate directors to be elected at the annual convention of the group Dec. 15-16 in Boise.

Bureau Chief Acts to Free U. S. Indians

PORT HAVEN, N. D., Oct. 8.—A long range program pointing toward the eventual social and economic freedom of the American Indian is being worked out here by the bureau of Indian affairs.

Glark, resident superintendent of the Standing Rock Indian reservation, said the plan will be submitted to the commissioner of Indian affairs when completed.

He said it calls for the establishment of the younger generation of Indians in the cattle industry—an industry to which they are adapted.

He said efforts to make "dirt farmers" out of Indians had so far been unproductive.

Glark said bureau officials are convinced that the Indian mind must be given the means to support itself before the government scraps its traditional guardianship.

He said it calls for the establishment of the younger Indians anxious to return to full rights of citizenship.

He said it calls for the establishment of the younger Indians anxious to return to full rights of citizenship.

Guard Against Uprising

Like occupation troops in a newly captured town, Gurkha soldiers with machine guns and bayonets guard the main entrance of Pahar Ganj, once a busy Muslim section of New Delhi, Nov 11's desert, (NEA photo by Bert Brandt)

Silent Wreckage of New Delhi Moslems Section Mute Reminder of India Strife

NEW DELHI, India, Oct. 4 (NEA)—In the heart of this Indian capital, 10 minutes from the government buildings, is a city of the dead.

The Pahar Ganj section, a sprawling shopping area, usually thrives with people. Now only silence reigns.

Some of the worst rioting in India took place when Sikhs and Hindus attacked this predominantly Moslem area. Since then nothing has been done to clean up the debris of disorder.

At the main intersections of the Pahar Ganj, which extends for nearly a mile in each direction, Gurkha troops man machine guns; soldiers stand by with fixed bayonets on their rifles.

Wreckage litters the streets. Roofs have caved in. The fronts of buildings are charred black and the gutters are strewn with bits of clothing and personal effects.

Near the end of one street stands an almost lifeless woman. Vultures are chattered black and she looks at its back. It cannot move, and doesn't try to protect itself.

As you walk among the ruins, dogs with ribs protruding through taut skin, scurry into holes beneath the shattered buildings and yelp plaintively as you pass.

The donkey with the broken leg may be their meal tomorrow. The doors have been torn from the shops. Inside one is a handloom, with the design on a bit of cloth just begun.

As you walk among the ruins, dogs with ribs protruding through taut skin, scurry into holes beneath the shattered buildings and yelp plaintively as you pass.

"Lottery" Decision for Slot Machines Worries Owners

Idaho's slot machine operators and barbers are disappointed. A district judge had held that slot machines are gambling devices and that barbers' construction are gambling devices.

Most attorneys are agreed that if the issue goes to the state supreme court that the lottery decision of Judge D. L. Soutphen in the Weber slot machine case will be upheld.

The body of whether a slot machine constitutes a lottery never before arose in Idaho until it came out of the Weber case.

That perhaps the highest main legal counsel for the Idaho Allied Grocers. For two years he has been preparing to get before the supreme court the issue of whether slot machines were lotteries.

While on the subject of the legislation, it should be pointed out that the lottery-legal law has been declared unconstitutional by District Judge C. F. Koobach.

Dewey, President Lead Farmer Poll

INDIANAPOLIS Oct. 9—President Harry S. Truman today commands more than 85 per cent of the total Democratic farm vote, a survey made for Successful Farming magazine reveals.

The poll, conducted among a cross-section of 4,000,000 American farmers, says Truman has the most overwhelming support he has had from American farmers since he became president.

Just for fun-try these SPERRY "MEMORY TEASERS"

WHAT DISTINCTIVE FEATURE EASILY IDENTIFIES ALL NATIONAL HIGHWAY MARKERS?

A welcome sight to the traveler is that sign that marks an unfamiliar road. When you see a golden-brown stack of Pancake and Waffle Mix, you know you're on the right highway.

Unmilled edges on two of our most common coins may be unimportant but it is important to you to know that every package of Sperry Pancake and Waffle Mix has a distinctive feature. The standards in a package of Sperry Pancake and Waffle Mix. The standards in a package of Sperry Pancake and Waffle Mix.
