8-Year-Old Burley Boy Drives Auto 12 Miles After Father Blinded in Explosion

By CASILDA STEELSMITH
BURLEY, Feb. 17 (AP)—Ability of a local 8-year-old boy to drive an automobile saved his father, brother and another man from possible blindness Saturday.

The boy, Roy Lee Grindrod, a pupil in the second grade at Miller school, drove the automobile while sitting on his father's knee after his father, Les Grindrod, and brother, Kenneth, 13, and Paul Cheney, 25, had been burned about the eyes in a gasoline explosion.

And the youth thought so little of his exploit that he said nothing about it until news of the midday freaked out Tuesday. Even his teacher at school had no previous knowledge of the youth's unusual feat.

The mishap occurred at 3 p. m. Saturday while Grindrod, his older son and Cheney were drilling a well for the government north of Paul.

The well had been sunk to approximately 55 feet when Grindrod dropped a gasoline soaked and burning tag into the 20-inch hole to determine if it was round and straight. When the tag hit the bottom of the hole, the fire went out. Grindrod poured gasoline into the hole, intending to drop a match into it to relight the gas. Suddenly there was an explosion and the two men and Kenneth caught the full force of it in their faces.

Roy, who was playing only five feet away, was uninjured. He said there was just one "big bang." Kenneth, he said, was still standing but his father and Cheney were knocked to the ground.

"My daddy got the worst of it," he said, "because he was bending over the hole."

Grindrod was crying but I knew my daddy had been hurt. They could walk but I had to show them where to go. I trust on my daddy's knee while I drove so I could see over the top. I drove about 15 miles an hour and Daddy couldn't see. Grindrod operated the gear shift and the foot pedal.

The boy drove the automobile 12 miles across the rock-strewn fields to almost a mile from the sugar factory. There he met a government well inspector who happened to be going back to check on something at the drilling.

Physical Education at Schools Found to Be Inadequate

(Editor's note: This is a feature in a series of articles designed to acquaint residents of Twin Falls with local conditions and overworked Twin Falls schools.)

By VERA SINEMA
The physical training of the young people of a community has come to be accepted as an important responsibility of the schools. In this phase of a youngster's schooling, Twin Falls is deficient—not through lack of attention but rather because no improvement can be made under present conditions. Active out-of-doors play in clean, safe playgrounds is a traditional part of all elementary school planning. Hindering the program in Twin Falls are the small playgrounds and the small school buildings. The Washington school grounds is considered adequate for the enrollment, but the grounds at Lincoln are much too small.

The young children, who use a different playground area, are let out in two groups. The playground is muddy and full of pits and holes. During bad weather it is so noisy that the short block of seventh avenue north behind the school is blocked off so children may play there. Many times in the past, school officials have struggled with a problem of a Lincoln playground.

As a result, the meat certain this summer—while it is not certain to be bad—may not be quite as good as the agriculture department prescribes. The officials said they underestimated the amount of meat that would be "held off" the meat counter this winter and in storage.

But they did improve in the summer supply outlook resulting from this miscalculation. It is not to assure any significant relief. For example, your share of the billion pounds of meat in storage is about 12 pounds to 14 and a half pounds.

Normally, the packers and wholesalers hold out about 22 pounds of meat, caplin from the heavy winter slaughtering to the store for distribution during the summer slump in meat output.

Good Business
But what is the impending meat shortage they figured it was good business to boost their storage holdings this year.

The packers' coolers were filled to 90 per cent of capacity and their freezers to 70 per cent of capacity. Private and semi-private warehouse coolers and freezers throughout the nation were three-fourths filled.

Police Swamped With Offers Of Home for Wandering Youth

Idaho generosity and big-heartedness was proved here when numerous calls were received by the Twin Falls police department regarding an unfortunate and homeless lad. Offers to give the boy a job and a chance to make something of himself were made by clergymen, businessmen, lawyers and others from Twin Falls and the rest of Magic Valley.
The big chance, however, came from a Twin Falls rancher who offered him a chance for employment and education as well as a home.
This rancher, whose own son died 12 years ago, has offered to give the boy a home on his ranch, let him complete his education and possibly adopt him.
The boy's plight was brought to the eyes of Magic Valley citizens through a story in the Times-News that told of his four or five years of making his own way after being neglected by his father.
Idaho generosity also was shown when he had spent eight days in an Arizona jail, where authorities learned the same story that was related here.
The boy will accept the rancher's offer if it is made again when the two are in the Twin Falls area.
Looking more than his 15 years after making his living as circus trapeze artist and farm hand, his eyes lit up when the chance was made known to him.
This youth, who declined to "hear train whistles calling" until he landed in Twin Falls is eager to work on the ranch and to continue his education that stopped with the eighth grade.
Since he left his home in St. Louis, Mo., however, the boy stated that he had been unemployed no more than two months in any year and when he asked for a bed in the city jail last week he was "broke" for the first time.
His father, in St. Louis, told authorities there, that he cared nothing for the boy and "had never seen him again." When related to Twin Falls police that message caused one officer to make this remark: "And they say juveniles are delinquent."

Honest, I Didn't Know

USED FATS WERE STILL BADLY NEEDED!
Lady, where have you been? Used fats are needed now more than ever, because the shortage of fats and oils today is the greatest in the world's history. Our government warns us that the supply simply cannot meet today's industrial needs. You can help prevent this supply from getting too low by continuing to turn in your used fats.
You say you re-use them for cooking? Fine! But even the drops left after that are worth salvaging. Then how about melting down fat trimmings, skinning gravies? Those tricks yield plenty!
And come to think of it, what other kitchen waste can you convert into good hard cash? It's a point to remember, these days of high food costs! You know, prize butchers pay for used fats are up, on the average, 50¢ per pound... don't throw your fats away. Save 'em, and turn 'em in!

Nichols Says To "Go Slow" On Oil Hunts

By HARMON W. NICHOLS

WASHINGTON, Feb. 17 (AP)—Thinking about digging a little hole in the back yard in search of a quart of oil or so? Well, don't do it, mister.

You'll spoil the petunia bed for one thing. For another, it'll cost you a heap of tall money. And for yet another, your chances of success are about as slim as a needle in a haystack right now and picking the winner among the three-year-olds, yet unborn, of the 1953 Kentucky derby.

The boys in navy blue have been digging like mad in Alaska since 1946 and haven't found enough oil to wet Alaskan streets in Fairbanks, Alaska.

Not only that, the navy has spent \$4,000,000 in operation up to there, and is coming back to Congress for more dough. Commodore W. G. Greenman appeared before a house subcommittee yesterday to talk about the matter. He fished along a lot of technical advisers and three samples of oil. The advisers, slicked up fit to kill, carried briefcases full of facts and figures and charts. The commodore had the samples in his pocket in little bottles, one a former strawberry jam jar.

Greenman adjusted his eye glasses, got a little pink around the ears and said that wasn't ALL the oil he and his lads had found. But darn near all.

Digging for oil, he said, was a gamble in any man's oil field. You go down 6,000 or 7,000 feet. Maybe you run into oil and maybe you don't. It all depends. And doing same in Alaska is twice as tough, particularly in the wilds of the Point Barrow region. After finding the oil there, he said, you'd have to worry about getting it back to the United States.

Rep. Carl Vinson of Georgia, drafted that wouldn't it be smarter to find the oil first and worry about transporting it after? Commodore Greenman said that cure was a fact.

Plants Closed by Strikes Can Sue

PHILADELPHIA, Feb. 17 (AP)—The U. S. Circuit Court of Appeals ruled that owners of wartime plants who suffered losses in strikes called prior to the 30-day "cooling off" period can collect damages from employers.

The circuit court's decision reversed a decision of U. S. district Judge Harry E. Kalodner dismissing a suit against three employees of the France Packing Co., Philadelphia, in October, 1946. The higher court ordered the suit re-instated.

Truman Tells Housewife to Slash Prices

WASHINGTON, Feb. 17 (AP)—President Truman advised today that women use their power over the household purse to fight "the high cost of living."

Mr. Truman addressed a conference of women leaders at the labor department. It was arranged by the department to commemorate the 100th anniversary of the movement for women's rights.

Ready Weapon
"Women's organizations have at hand a ready weapon which they have not yet used to its full capacity—the power of the consumer," the president said.

"It has been said over and over again that women control the bulk of the nation's wealth; they certainly should be able to hold conversations with relatives abroad via short wave radio if plans of Clarence Archer of Bridgeport, Conn., are successful."

Archer sent for his 300-watt short wave radio at Bridgeport and hopes to have it unit operating within the next two months.

"When I saw students here from Costa Rica, France, Hawaii, India and Canada I decided to send for the radio and arrange for them to talk to their folks," Archer explained.

Services Held for Frederick Miller

OAKLEY, Feb. 17—Funeral services for Frederick William Miller were held at 1 p. m. Saturday in the LDS tabernacle here. Bishop Wilford Baggett officiated.

Mrs. Lafe Poulsen played the organ prelude and postlude.

Prayers were offered by John A. Clark and Robert Smith. Speakers were Eugene Pickert and Bishop Baggett. Music was furnished by Donna Fay Clark, Norman Bates and Bishop Forrest J. Severs.

Palbearers were Rudolph Ambler, Ray Robinson, Kenneth Gray, Stanley Martindale, Clarence Matthews and George Poulsen.

Flowers were in charge of Nellie Hale, Lillie Bales, Hazel Bell, Phyllis Clark, Myrtle Sharp, Beth Pilger, May Williams, Vio Ambler, Lena Smith and Verda Ore.

Burial took place in the Oakley cemetery with Charles B. Clark giving the graveside prayer.

Rich Samples of Gold Are Listed

CRIPPLE CREEK, Colo., Feb. 17 (AP)—Max Bowen, superintendent of the Golden Cripple Creek mine, said today he had bought three shipments of rich gold ore from three Cripple Creek miners who had leased the 1,000-foot level in the old Mollie Kathleen mine near here.

Bowen, whose Colorado Springs mill refines the gold before shipping it to the mint at Denver, said one shipment of ore from the new strike assayed at \$110 a pound (56 ounces of gold per ton of ore).

Current price paid for gold is \$1241 an ounce.

The mill superintendent said the other two shipments assayed at 46 ounces of gold per ton of ore, and 19 ounces per ton.

Gas Nearly Burst Ribs

"My stomach bloated up so bad with gas I thought my ribs would burst," said a lady recently. "My whole abdomen was horribly sore from gas pressure. Now INNER-AID has relieved me. The gas pressure is GONE. This medicine certainly does everything claimed for it."

INNER-AID is the new, scientific formula containing 12 of Nature's Herbs. So it is like several medicines in one; it accomplishes several things at the same time, that is, it acts on bowels as a laxative and helps cleanse out old, foul substance that often causes headaches, dizzy spells, and nervous feeling. It brings forth gas and bloating from stomach and relieves gas pains and swelling. Miserable people daily write us they get such a cleansing and invigorating from INNER-AID they soon feel like different men and women. So like different men and women. So get INNER-AID. Sold by all drug stores.—Adv.

Senate Group Seeks to Sell Forts in U. S.

WASHINGTON, Feb. 17 (AP)—The Senate armed forces committee proposed the sale of old military forts for public parks at half price. A committee bill also would have over free to municipalities and states those forts classed as historic monuments.

Last year congress approved the sale of old forts and several similar installations following protests from local governments wanting to preserve them. The freeze expires March 1.

Headings Open
Public hearings have opened on the bill.

The committee listed 26 old-time army installations which cost roughly \$111,250,000, and set on them a "fair market value" of \$22,250,000.

The bill provides for sale of property for use as a public park, recreation area for 50 per cent of such fair value.

In addition, navy representatives called committee attention to the surplus navy properties, disposal of which was halted by congressional action last year. These include hospitals, airfields and other installations.

Priestly Get
In making purchases, localities would receive a priority just below that of federal agencies and airports.

A number of special bills were introduced last year covering individual projects. However, the committee's report said it would be cumbersome for congress to consider each request separately.

Forts Listed
Included in the committee's list of the 26 army installations, their fair value and suggested future use: Fort Douglas, Utah, \$1,252,970, various uses, including national monument and park.

Fort Missoula, Mont., \$1,611,471, national guard, university and county hospital.

Fort Stevens, Ore., \$600,000, state park, radio station and county hospital.

Fort Stevens, Idaho, \$142,000, state park.

Fort San Francisco, \$3,000, state highway.

Navy representatives gave a list, with the original cost and intended use (no "fair market value" was given) including:

St. Louis, Wash., navy hospital, \$6,700,000, county.

Tacoma, Wash., naval supply depot annex, \$2,618,574, city community center.

Hoquiam, Wash., training center, \$699,500, state park.

3-Power Parley
On Reich Delayed
LONDON, Feb. 17 (AP)—Three-power talks on western Germany's future were postponed until next Monday at the request of the United States.

There was speculation that the delay was arranged in order to play a bigger share for Germany in the Marshall plan for European recovery.

The postponement was sought by the state department only a few days after Britain and France, without American consent, began consultation of plans for a new meeting of the 14 European countries participating in the Marshall plan.

250 Miles on Gallon, He Says

James Monroe, of Bellevue, Calif., checks the fuel gauge he invented to make his car run 250 miles on a gallon of gas and a gallon of water.

Monroe's invention is the conversion of water into its hydrogen and oxygen components. These mixed with gasoline vapor, become a highly explosive product which is fed into the carburetor. Monroe hopes to perfect the device before it leaves him and his car sky-high.

128 Airfields in Idaho to Get Aid
WASHINGTON, Feb. 17 (AP)—Idaho will share in the national airport plan to the extent of 128 airfields and \$5,700,000 in the next three years, Gen. Henry Dornbach said Monday.

Current construction or that planned for the immediate future includes 41 airfields. The cost involves more than \$1,000,000 in the next three years, Dornbach said. The sponsors and the balance by the civil aeronautics administration.

Class four fields to be improved under the immediate program are Moscow and Pullman.

Fields that now have or will have class three ratings are Twin Falls, Burley, Gooding and Montpelier.

Granger, Kellogg, Kamah, Rexburg, Dubois, Caldwell and Weiser will have fields with class two ratings by the end of the year.

Class one fields are to be developed at Albion, Rosedale, Hazelton, Driggs, Blackfoot, Council, New Meadows, Shelley, Plogmire, Whitford, Donkey, Rookline, Newport, Cottonwood, Roberts, Shoshone, Bonanza Ferry and Grapeland.

Improvements on existing class one fields will be made at Jerome, St. Albans, Challis, Mackay, Priest River, Aberdeen, Preston, Emmett and Nampa.

The development program will include several fields in the national forests for emergency and recreational use.

Owner Recovers \$70,000 in Gems
HOUSTON, Tex., Feb. 17 (AP)—Mrs. A. M. Baxter of Los Angeles had a happy reunion today with her suitcase which contained, among other things, \$70,000 worth of jewelry and an emerald coat.

The suitcase bounced out of a taxi cab last Friday as Mrs. Baxter was riding to the Southern Pacific station here. It was picked up by A. M. Sparks, 23, Houston carpenter. Sparks reported his find to the station agent. After she had failed to locate her missing suitcase, Mrs. Baxter notified police. The station agent, A. M. Sparks, saw a resulting newspaper story and the suitcase was returned to Mrs. Baxter.

"I'm certainly going to see the Sparks and do something new for them," Mrs. Baxter told police.

Burley MYF Host To Ruptured Group
BURLEY, Feb. 17—Methodist Youth Fellowship group entertained the Ruptured M.Y.F. at a party Thursday evening at the church. Games were played and refreshments served. A Valentine theme was in games and decorations.

The group was charged with the game, and other arrangements were in charge of Dorothy Reid, Mary Frances Peck, Gerald Anna, Roger Steiner and Jean Marguerite. The Rev. J. R. Crowe, Ruptured minister, accompanied his young people here.

Robins Avows Funds Curtail Road Projects

BOISE, Feb. 17 (AP)—Idahoan demands for roads greatly exceed the state's funds available for construction during the year, Gov. C. A. Robins said today.

Demand of civil groups for road projects at the first of the year, which he has not been visited by the amount of money that will be available for construction this year, the governor said.

Weekly Requests
Rarely during his first 13 months of office has a week passed during which he has not been visited by a delegation seeking repair or construction of some highway project.

In addition, nearly every day brings a letter requesting additional road construction projects.

The governor said that since June 20, 1947, Idaho has invested a total of \$12,532,418 in roads. The highway department has increased the mileage of pavement from 129 miles to 1,300 miles, while counties have paved 672 miles.

Rebuilding Needed
Governor Robins said highway objectives today are largely rebuilding of existing roads. He said the cost of building and maintaining secondary highways rests heavily on the property tax and that the gasoline tax can no longer meet demands for more highways.

He also pointed out that the roads originally were constructed to handle lighter vehicles. The heavier vehicles now being used cause serious damage to flexible type pavement and low capacity bridges and makes necessary wider and heavier-based roads and stronger bridges.

Emergency Asked By Stock Raisers
SAN FRANCISCO, Feb. 17 (AP)—Stockmen's spokesmen asked Governor Warren to declare an emergency to help the industry face California's "worst drought in recorded history."

The appeal was made by the California cattleman's association, the California Wool Growers' association and a number of affiliated groups.

They asked Warren to declare an emergency drought area in the state's drought counties. This would permit stockmen to seek emergency freight rates for feed and stock into and out of the emergency area.

Bulgaria Dominated by Russia Like Son, Trip Shows Writer

(Editor's note: See Gallagher, AP story of return from Bulgaria, Feb. 17, page 1.)

It is one of the oldest in Europe. Since coming to power it has pushed its program. It reports on what he saw and heard.

BY WES GALLAGHER
SOFIA, Bulgaria, Feb. 17 (AP)—Soviet domination of Bulgaria is as complete as a father's influence over his young son.

There can be little doubt that this country is tied more closely to the Soviet union than any in Europe, even to the extent of turning the capital into a little Moscow.

Conversely, the influence of the United States and Britain is negligible. The communist government largely ignores Anglo-American diplomatic protests. The political opposition is virtually nonexistent.

Where the Anglo-American forces had some favor, has been liquidated.

The reasons for Soviet influence over phase of Bulgarian life are almost too numerous to mention.

Primarily there is Prime Minister Georgi Dimitroff, personal and political friend of Stalin and Lenin, a member of the communist international for two decades and a loyal disciple of the Stalin brand of communism.

Dimitroff is the ruler of Bulgaria. He is molding it as fast as possible into a little Soviet copy.

Among these top men now running Bulgaria are Foreign Minister Vasil Kolarov, who spent years in the Soviet union and was one of the top members of the communist.

Libert. Gen. Georgi Danilov, present minister of national defense, went to the Soviet union shortly after 1924. He was graduated by the Soviet military academy, held important posts in the Soviet army and was instrumental in the Soviet Press academy.

These men completely dominate Bulgarian political life.

Criticism of Bulgarian life to the Soviet union is a punishable crime. Not scarcely a peace-loving group among government officials attacking Anglo-American imperialism.

Solons Favor Extension for Rent Control

WASHINGTON, Feb. 17 (AP)—The senate banking committee unanimously favors extending rent controls 14 months with some changes.

The house banking committee has voted 18 to 5 to approve the existing law "as is" for one month. It will decide later about a longer extension and any changes.

Comptroller Bern.

Members of both committees predicted today the house and the senate will get together on one of the two proposals—or a compromise—by Feb. 29. The present law expires then.

The senate committee voted 13 to 0 late yesterday for continuing controls through April 30, 1949. Its bill would permit rent increases up to 15 per cent where tenants and landlords agreed on a lease running through 1949. The present law, up to the start of this year, allowed increases of the same amount in return for a lease good through 1948. Tenants who already have agreed to a 15 per cent rent increase will not be charged another one, said Senator Cain, R., Wash., chairman of a banking subcommittee on rental.

Explains Workings

Here is Cain's explanation of how the new law would work on those points:

In the case of tenants who accepted rent increases for leases running through 1948, their present rents would be "frozen" when those leases expire Dec. 31. The "frozen" rents would remain in effect through April 30, 1949—the expiration date of the proposed new law.

For those who signed leases under the new law, that is, after Feb. 29, 1948, there could be no further increase until Jan. 1, 1950.

Experts Seek Life on Mars 'Key' Tonight

MCDONALD OBSERVATORY, Ft. Davis, Tex., Feb. 17 (AP)—Astronomers at McDonald observatory hope to settle within the next 24 hours two key questions about the possibility of life on Mars.

As the planet swings closer to earth tonight than it will be at any other time in two years, they may determine:

1. Whether or not water, in the form of ice or water vapor, is present.

2. Are the green areas obvious on Mars trees or grass or weeds, like our own, or are they some other vegetable form?

The astronomers are also concerned about a very striking question. They hope the weather on the rounded summit of Mount Locke will be clear. Statistics show that McDonald observatory is in one of the most favorable locations in the world but Texas weather sometimes defies statistics.

The astronomers not only hope to settle some of the intriguing questions about Mars, but they want to put on a good show for President T. S. Painter of the University of Texas and other dignitaries. They plan some closeups of the moon and Saturn through the observatory's 82-inch reflecting telescope for these officials.

The observatory is owned by the University of Texas and staffed by the University of Chicago.

Proposals of Ike Give OK To U. S. Plan

By J. M. ROBERTS, Jr.
AP Foreign Affairs Analyst

General Eisenhower, in his valedictory as chief of staff, makes recommendations to the American people which amount, in effect, to his statement of approval on current American foreign policy.

His thesis is that everything must be done to avoid war, with the hope of eventually ending its use as a measure of diplomacy, and in the meantime be prepared so that if it comes America shall not be the loser.

Pending the time when the nation will be truly united for the welfare of all, he says, the only preventive measure that will work is to convince any would-be aggressor that he can resort to war only at the risk of his own total destruction.

Long-Range Program
Development of the United Nations into an effective defender of peace, which may require "a generation, or even a century," constitutes the general's long-range program.

For the short-range, to prevent an outbreak in the interim, he wants naked power, without which "the consequences could be disastrous for the moral and social principles which the United States has proven twice during my career, it has been regarded as more vital even than the blood of its finest young men."

He wants universal military training as the alternative to maintenance of a vast peacetime military organization. But at any rate, he says, the army must have 1,200,000 readily available men for the first day of hostilities, plus full mobilization of industrial, agricultural and financial resources.

His thesis is that the United States should in time have a selective force would be applied against an enemy.

One Clue
The general gives one clue as to why he may prefer the presidency of Columbia university to the possibility that he might become President of the United States.

"Where as much study and research has been done in the causes and prevention of war as has been done in the causes and prevention of disease, we should in time have a selective force would be applied against an enemy."

Famous Plane

The Kitty Hawk plane, in which the Wright brothers made aviation history 44 years ago, hangs in London's Kensington Museum. A letter found among the late Orville Wright's papers disclosed that he had decided in 1943 he wanted it returned to U. S. But Wright's will written in 1917 bequeathed plane to the London institution.

Russian Critic of U. S. Music 'Flipped His Lid,' Says

By HAL BOYLE
NEW YORK, Feb. 17 (AP)—The Russian critic who denounced American jazz as decadent and degenerate music has "flipped his lid" and said he was going to write a book about it.

The Soviet ruler was worried over the type of tunes the Russian masses like. Apparently no one has come along able to set the "communist masses" to music, so he could be sung or strummed on the balalaika.

The central committee of the communist party bawled out Dmitri Shostakovich and six other Soviet composers of advanced classical music for their "bourgeois ideology."

This didn't worry the denizens of swing street as all seven composers are "stuffed from long hair."

The man who started 32nd street blowing fresh "riffs" and "hot licks" in rebuttal was V. Gordinisky, a Soviet music critic who came down with both heels on jazz, which he feels corrupts innocent Soviet youth.

Citing a Russian educator who complained that modern jazz was "grinding our will into hamburger," Gordinisky wrote a Soviet magazine:

"Modern bourgeois music does not awaken strong joyous feelings. On the contrary, it extinguishes and suppresses them. It does not carry one away with impetuous passion, but hypnotizes on with the dead cold mechanics of its rhythm and the poverty of its melody."

Comrade Gordinisky was quoted further in a dispatch from a New York Herald Tribune correspondent as saying jazz has turned the violin

into a "clown's broom."

"Is this chaotic mixture of melancholy, exasperating tones and the roar of small and big drums—all this music?"

Here is swing street's answer: Lionel Hampton, bandleader and a top exponent of "be-bop," the latest vapid development of jazz.

"Man, that Mr. Gordinisky has really flipped his lid and ought to come over here and spend a big week on our music," said Rudolph, author and jazz critic, thought Gordinisky was blowing in the wrong end of his ideological candle.

"Actually jazz isn't bourgeois music but a proletarian protest of the worker," he said, "especially if the widespread Negro minority with whom it originated."

Duke Ellington said jazz was "live responsive, ever-changing and means freedom of musical speech."

Hansen Event To 'Kick Off' Scouts' Drive

HANSEN, Feb. 17—The annual fund campaign for the Kimberly-Hansen-Murphy Boy Scout district will be inaugurated by a "kickoff" dinner at the Hansen high school at 7:30 p.m. today, according to Garth Morrill, district commissioner.

Team captains and workers in the drive, to last from Feb. 18 through Feb. 25, are scheduled to attend the banquet along with district executives, Herbert West, Snake River council director, and Farrah A. Terry, Snake River council field executive.

Under finance chairman for the district, Don D. Olbbs, Kimberly, and the sub-chairmen, Glibb Miller, Kimberly, W. R. Muhlitz, Hansen, and Robert Breeding, Murtagh, the following team captains and workers will participate in the drive:

BACK IN CALIFORNIA
CASTLEFORD, Feb. 17—Mr. and Mrs. George Clement have returned to their home in Redmond, Calif., after visiting friends and relatives in Castleford. Their daughter, Mrs. Ada Becker, her children, returned to California with them.

That "maybe the Russian commentators didn't like American jazz but the Russian people did."

"The big trouble for the Russians," he said, "is to get the people to swallow Russian jazz instead of ours."

"I'm afraid the gentleman has spent more time studying politics than our music," he added.

A spokesman for Benny Goodman said that Goodman had found during his experience as director of popular music for American government-sponsored broadcasts to Russia

Wilmath Studyvin Weds At Her Sorority House

MRS. JACK ALAN LUHER (Staff engraving)

JEROME, Feb. 17.—Alpha Omicron Delta sorority house on the Washington State college campus, was the scene of the marriage of Miss Wilmath Studyvin to Jack Alan Luher, the son of Mr. and Mrs. H. J. Luher, Pullman, Wash.

The Rev. Alden K. Graves of the Methodist church performed the double-ring ceremony before a fire place flanked with lighted tapers in candelabra and lit baskets of white flowers. White roses and white carnations decorated the altar.

Given in marriage by her father, the bride wore a gown of white satin, fitted bodice trimmed with seed pearls, long-sleeved sleeves and full skirt extending into a sweeping train. Her white net veil was fastened with a tulle of seed pearls, and she carried a bouquet of red roses.

The bridegroom wore a tuxedo with a white shirt and a white bow tie. He carried a boutonniere of white carnations.

Bridal gifts, including a silver service, were presented by the bride's parents and other guests.

The ceremony was held at the sorority house, which was decorated with white flowers.

Florsheim

STILL AND ALWAYS . . . THE UNCHALLENGED LEADER IN

Shoes

You've heard it said that a certain shoe
is "not as good," or "almost as good as
a Florsheim." That very phrase acknowledges
Florsheim Quality as the final, absolute
standard of comparison. So why be satisfied
with second-best, when Florsheim Shoes
are admittedly the finest, and actually
cost you less per mile of wear?

HERE THIS WEEK!

*Miss
Hazen*

Factory Representative
of the

CAMP CO

... maker of fine
surgical garments

will be here all this week to give
special fittings on Camp Garments.
Avail yourself of this opportunity
to consult Miss Hazen on any foun-
dation garment problem that you
might have.
