Drive Carefully!

Buhl Girl Fatally Injured in This Wreck at Curry

The demolished Studebaker sedan in which Renee Hughes, 17-year-old daughter of Mr. and Mrs. H. R. Hughes, was fatally injured Friday stands on highway 30 near Curry where the state highway dump truck into which Mrs. Hughes drove the sedan. A deputy sheriff examines the wreck while curious spectators stand by. The truck was parked in the north lane of the four lane highway. Smoke from burning wheels along the highway obscured the driver's vision. (Staff photo-entourage)

Inquest Set After Buhl Girl Dies; Death Car Hit Truck Hidden by Smoke

A coroner's inquest will be held Monday in the traffic death of Renee Hughes, 17, Buhl, who died at 7 a.m. Saturday in Magic Valley Memorial hospital of injuries incurred about 3:30 p.m. Friday on highway 30 east of Curry. The daughter of Mr. and Mrs. H. R. Hughes, Buhl, was injured fatally when a Studebaker driven by her mother crashed into a smoke-hidden state highway dump truck parked in the north lane of the four-lane highway across from Union school. The death was the 55th in Magic Valley and the 20th in Twin Falls county since Jan. 1. Mrs. Hughes sustained forehead lacerations and a puncture wound in the right leg in the crash which demolished the Studebaker sedan. Her condition was described as "fair" Saturday night by a hospital attendant.

The Studebaker went through smoke from burning wheels along the north side of the highway to crash into the rear of the parked heavy duty Dodge dump truck. The girl was a passenger in the right front seat. The impact shattered the windshield, bent front door and drove the right front wheel and engine back into the rear of the truck.

Sheriff James H. Benham said the highway department truck was parked in the north lane while the burning sedan was in the north side of the road. The wind was carrying the smoke across the highway. Mrs. Hughes was traveling west and the parked truck was headed west.

Neither Mrs. Hughes nor her husband were injured.

Highways Chief Says Interstate Roads Shape up Well in Idaho

BOISE, Nov. 30 (AP)—Routes of interstate highways in Idaho are "pretty well formed up" except for a section across Boise valley and another west of Jerome, the chairman of the state highway board said Saturday. Roscoe Rich, Burley, made his statement at the board opened a four-day meeting. The board met with officials of the U.S. bureau of land management to discuss problems of moving livestock along and across interstate routes.

"The needs of livestock people and cattlemen for underpasses should be fully worked out," said Rich. "Before we build a highway for highway right-of-way and livestock access to the road."

Rich urged highway department personnel to present to the BLM the department's plans for the interstate route whenever they "are formed up." He said underpasses to get livestock across the road "are a great deal of money."

"We can't justify any unnecessary expense," said Rich. "And we must justify our plans to the bureau of public roads."

"The sooner we can get our firm-up plan, the better off we are," said Rich. "The BLM should hold up applications for entry on public land if we know about where the road will be located."

Rich said the highway department would have a right to appeal from such action, but added he did not think any appeal would hold up construction.

Rich said the highway department would seek to keep the right-of-way 200 feet to semi-arid land and 200 feet to irrigated and cultivated land. Earlier, the BLM announced a right-of-way width of 200 feet was needed for the interstate system.

Rich said there is a problem of providing stock trails parallel to the interstate route in some sections, such as between American Falls and Raft River. The interstate route "will be fenced pretty tight," he said.

The board authorized Robert Dym, right-of-way manager for the department, to include in right-of-way forms a clause requiring that any acre purchased from a proprietor must be used for the purpose specified.

Leonard Flinn, a member of the board, said such a clause was necessary.

Red Rocket Plunged, Astronomer Believes

CAMBRIDGE, Mass., Nov. 30 (AP)—The rocket of the first Soviet Sputnik probably plunged to its death Saturday night, possibly into the South Pacific hundreds of miles off South America, Dr. Fred L. Whipple, director of the Smithsonian Astrophysical observatory said. Whipple said rapid changes in the circling time of the rocket indicated it was losing altitude rapidly and heading toward the denser lower atmosphere that would burn it up.

This led Dr. John S. Hinchey, assistant director of the Smithsonian, to speculate that the satellite might have been starting to burn.

If the rocket was starting to burn up over California, Whipple said, it might last a few thousand miles but it would be unlikely to be seen again.

Whipple said that if the rocket should still be circling the earth Sunday and he doubted it would be then the proof would have to come from England or elsewhere in Europe. Britain has a radar telescope at Jodrell Bank which he added should stop when the rocket is seen.

Seven Cases of Topsy Driving Head Traffic Violator Parade

Seven cases of drunken driving headed the traffic violator parade in Magic Valley Saturday as all but three cases reported were in the nature of more serious offenses. There were four cases of reckless driving, three negligent driving, one failure to yield right of way, one stop sign violation and only one speeder. Idaho law specifies that persons convicted of drunken driving will lose their driving license for one year. The suspension is mandatory.

Edwin D. Watson, 35 Madison street, Twin Falls, was charged with drunken driving following a two-car accident at 7:15 p.m. Saturday at Sixth street and First. Watson was charged with a blood-alcohol test after being taken to the police station.

Edwin D. Watson, 35 Madison street, Twin Falls, pleaded guilty before Justice of the Peace Claude Brown, Jr. to driving while under the influence of liquor. Brown sentenced Watson to 30 days in jail and a \$200 fine.

State Patrolman R. Young arrested Watson at 2:30 a.m. Saturday about five miles west of Twin Falls on highway 30 after the Hollister port of entry had reported an automobile accident. Watson was on the road.

Nicholas J. Espinalini, 327 South avenue west, was sentenced to 30 days in the Twin Falls county jail and a \$200 fine for driving while under the influence of liquor. Brown sentenced Espinalini to 30 days in jail and a \$200 fine.

State Patrolman R. Young arrested Espinalini at 2:30 a.m. Saturday about five miles west of Twin Falls on highway 30 after the Hollister port of entry had reported an automobile accident. Espinalini was on the road.

Church Plans T. F. Meetings For Two Days

Sen. Frank Church has scheduled a series of meetings in Twin Falls and Jerome Monday and Tuesday as part of a swing through Magic Valley and southeastern Idaho.

The local sessions start at 11 a.m. Monday when Senator Church will meet with representatives of the Twin Falls Chamber of Commerce, All American Farmers, Grange and other farm organizations.

At 2 p.m. Monday, Senator Church will meet with the local business community. The session will be held at the local hotel.

On Tuesday, Senator Church will meet with the local labor union leaders at 11 a.m. The session will be held at the local union hall.

At 2 p.m. Tuesday, Senator Church will meet with the local agricultural community. The session will be held at the local agricultural hall.

On Wednesday, Senator Church will meet with the local educational community. The session will be held at the local school.

On Thursday, Senator Church will meet with the local medical community. The session will be held at the local hospital.

Attempt Made On Indonesia Leader's Life

JAKARTA, Indonesia, Nov. 30 (AP)—Assassins hurled four grenades at Sukarno, president of Indonesia, as he left an elementary school Saturday afternoon. He escaped injury.

Several hours after the attack, Sukarno made a radio speech, appealing to the nation to remain calm. He said that the attack was a "terrible tragedy" and that he was "deeply shocked" by the incident.

Sukarno's program for a united Indonesia for Indonesia has a solid foundation, he said. He said that the attack was a "terrible tragedy" and that he was "deeply shocked" by the incident.

Delay Okayed In Surgery of Shoshone Tot

DENVER, Nov. 30 (AP)—An ear infection has forced a two-week postponement of major heart surgery on a 10-year-old Shoshone boy.

Doctors at National Jewish hospital here said Saturday the infection is not serious. But they added that the boy's condition is in the best possible physical condition if he is to live.

The operation had been planned for Monday. Instead it will be performed on Tuesday.

Doctors say Carl has a hole between the lower chambers of the heart which prevent normal blood circulation. They give him only a 50-50 chance to survive the operation. But doctors give him only a 50-50 chance to survive the operation.

Algeria's Revolt Due to Continue

TUNIS, Nov. 30 (AP)—President Habib Bourguiba said Saturday the French-led Algerian revolution will continue until France is ripe for Algerian independence.

Bourguiba, known for his fiery, anti-French sympathies, said the French proposal for a cease-fire in the rebellious territory must be followed by elections. "shows that France does not want to abandon Algeria," he said.

In response to the Soviet threat in this area, the committee told the President, the United States must maintain its anti-Communist resources in company with other nations of the free world, not only for mutual defense, but to meet the broader challenges of the scientific age.

The committee chairman, Howard E. Brown, president-elect of Ohio State University, said in a letter to Eisenhower.

The committee believes that the American people have not grasped the magnitude of the threat to technological development, namely, that we have entered a new era of scientific progress and technological evolution.

Algeria said further that long-range nuclear power is an advance as the launching of a satellite.

Explosion Fatal For 14 Japanese

TOKYO, Nov. 30 (AP)—Fourteen workers injured today in an explosion at an explosives factory in Kagawa town in nearby Chugoku prefecture.

The blast of undetermined origin also destroyed four structures in the factory premises.

Three hundred persons were employed in the factory producing explosives for mining purposes.

The commander in chief of the Japanese Self-Defense Force, Gen. Yoshida, said that the explosion was a "terrible tragedy" and that he was "deeply shocked" by the incident.

U.S. Citizens Shouldering Average Of \$3,014 as National Debt Shares

WASHINGTON, Nov. 30.—U.S. citizens are shouldering a burden of about \$3,014, billion dollars of the national debt, according to figures shown today. This is a staggering \$3,014 for every man, woman and child in the country and does not include some 200 billion dollars in corporate and noncorporate business. The census bureau reported that state and local government debt alone of the nation rose to \$27 billion dollars as of June 30, an increase of 4 billion dollars over the previous year.

On the same date, the national debt stood at 270 billion dollars, mortgage debt was more than 150 billion, and consumer debt was al-

Satisfied

STOUL, Nov. 30.—Mr. Moon said that he was very satisfied with the results of the election. He said that he was very satisfied with the results of the election. He said that he was very satisfied with the results of the election.

The rise in total mortgage debt

most 42 billion dollars. Roughly \$100 billion dollars of this total debt has been added to the books in the past 11 years or so.

The census bureau report said that at state government owe 13 billion dollars in long-term debt, of which about 1 billion is scheduled for retirement before 1970.

Additional, just over two billion dollars is owed in short-term debt, most of it by the local governments.

Highway and sewer systems each look about 3.5 billion dollars. More than half of the long-term borrowing by the individual states was for construction of highways.

More than 1.5 billion was borrowed for educational facilities and a little less than that was borrowed to pay veterans' benefits.

Jobless Boost Reported for U.S. Industry

WASHINGTON, Nov. 30.—Small to medium size increases in unemployment were reported this morning in three-fifths of the nation's major industrial centers.

But the labor department said the number of jobs was near an all-time peak for the season in many parts of the nation.

Defense cutbacks in aircraft production caused the greatest jump in unemployment, the department said. Aircraft specializing in machinery and primary metals also reported significant increases in jobless totals.

Seasonal reductions in employment were reported in the food processing, lumber and construction industries. Most employers anticipated a temporary pick-up in hiring before Christmas but, the outlook for January was less favorable than was the case last year.

Further layoffs were predicted for the aircraft industry because of the "stretch out" in military buying. The sharpest cutbacks were expected in Los Angeles, Long Beach and San Diego, Calif., Wichita, Kans., and Columbus, O. Virtually all aircraft

Oops!

ST. LOUIS, Mo., Nov. 30.—Charles P. Galt, 46, like many another man, pulled the wrong bill from his wallet and accepted the wrong change.

But he ran back faster than most to collect the difference. Galt said he'd given the tire store cashier a \$1,000 instead of a \$100 bill.

Plans prepared to lower payroll before mid-January, the department said.

The survey found that no major industrial area had a labor shortage in November. Two Connecticut cities—Hartford and Stamford—were removed from the shortage classification after being in that category for one year. Lay-offs in aircraft, machinery and construction led in the downgrading.

Only two of the 149 areas surveyed showed less employment. They were Flint, Mich., which benefited from a pick-up in auto production, and Falls River, Mass., where textile plants and metal trade increased employment.

Appears in COURT. GOODING, Nov. 30.—Henry Root, 36, was fined \$10 and 45 court costs Saturday by Police Judge Joe Baumgartner for being drunk on a public street.

Flu Outbreaks Showing Drop

WASHINGTON, Nov. 30.—The public health service said Saturday there was a marked reduction in the number of cases of influenza and influenza-like diseases last week.

The number of deaths attributed to pneumonia and influenza was reported by 108 major cities was 601 in the week ended Nov. 25, down 12 per cent from the 702 for the previous week.

There was a marked reduction in the number of reported cases of influenza and influenza-like diseases in many states for the week ended Nov. 22. The service said in its weekly summary, "and estimates of incidence in some others were much below those for previous weeks."

On the basis of various reports from 33 states, the total for the week is estimated to be 450,000. There were numerous statements that there was a statewide decline, that no new community outbreaks had occurred, or that absenteeism in schools was returning to normal or had reached normal levels.

A few reports stated that a larger proportion of cases seemed to be occurring in adults. However, no increase in industrial absenteeism was reported.

Mine Concern Planning Test Of Taxes Act

BOISE, Nov. 30.—The validity of the revenue act passed by the 1937 legislature is being questioned in a suit filed in Ada county district court.

Suit is aimed at a section of the 1937 revenue act which halted the exemption from taxation on dividends paid by corporations which sold taxes on at least 50 per cent of their income earned in Idaho.

The act was filed in court yesterday by Goldens Lead Mines, Inc., of Wallace and its president, John Featherstone, and Vice President Harry F. Mendenhall against the state tax collector.

The complaint contends that the section in question attempts to "abrogate" previous statutes dealing with exemptions for dividends without following the method of amendment prescribed by the state constitution.

The suit also charges that the revenue law is confiscatory in that it functions multiple taxation. Featherstone and Mendenhall are large capital stock holders in Goldens Lead Mines, which in turn is a large stockholder in Lucky Friday Silver-Lead mines at Mullan.

Plaintiffs contend that Lucky Friday's income is taxed by the state; that Lucky Friday pays dividends to Goldens which also are taxed by the state as income; and that Goldens pays dividends to the two men which are in turn taxed by the state as income to them.

Ship Is Anchored After Sea Perils

SAN FRANCISCO, Nov. 30.—A small Filipino ship which was reported sinking in the South China Sea with 100 passengers aboard is now "safely anchored" and her passengers have been transferred to another vessel, Globe wireless reported here today.

The "SS Don Luis," which earlier sent out an urgent SOS, is safely anchored at Patongang Island, along the southern tip of Palawan, in the west-central Philippines—the radio dispatch received by Globe said.

The report added that "all passengers have been safely escorted to the SS Salanganan," which like the Don Luis, is owned by the Bartolome San Diego company of Manila.

Adenauer Delays Travel to Britain

BONN, Germany, Nov. 30.—West German Chancellor Konrad Adenauer today postponed his three-day state visit to Britain because of an attack of influenza. It was officially announced.

The visit had been scheduled for Dec. 4 to 7.

A government spokesman said no new date had been set for the visit but added it was "entirely impossible" it would take place before the NATO "summit" meeting in Paris Dec. 16.

Adenauer is 51. Burma, Indochina, Malaya, and Thailand are bordering states in southeast Asia.

The Real Secret of SUCCESSFUL MARRIAGE

Advice on how to be happily married is not so freely available as it is today.

Marriage problems are openly discussed in newspaper columns and on the radio. Marriage advice is available from the man next door, who speaks from experience, and from the paper psychologists whose views come from study and research. There is no topic... from etiquette to fidelity... on which advice and counsel are not available.

Yet with all this marriage education, the modern divorce rate continues at an appalling high!

This condition obviously is not due to ignorance of the so-called "laws of life." It cannot be attributed to economic problems, for good times have been repeatedly marked by a high divorce rate. Nor can it be blamed on the excess of personal "incompatibility," which so often appears in divorce petitions.

These and other practical problems undoubtedly contribute to marriage conflicts. But the basic, fundamental cause of marriage failures goes deeper. It is the failure of many people to realize the true meaning of marriage... no recognize that it is a life-long union of a man and a woman... no see that its main purpose is the begetting and rearing of children.

In Catholic eyes, marriage is, first of all, a contract which... as with all contracts, a man must be governed by justice. A purely sentimental and physical attraction between a man and a woman, which is not permeated by a sense of duty to each other and to God, is not the love upon which enduring homes are built.

But the Catholic Church teaches that marriage must be what God

Parley of U.S. Churches Set For St. Louis

WASHINGTON, Nov. 30 (AP)—The American "new meeting" of the churches will convene in St. Louis, Mo., this week-end.

The "new meeting" is the general assembly of the National Council of Churches. It meets every three years. A group of 2,000 church leaders representing 30 Protestant and Orthodox denominations will convene in St. Louis for a week-end session, which begins Sunday afternoon.

The main item of business is the election of a new council president to succeed Dr. Eugene Carson Blake of Philadelphia, stated clerk of the Presbyterian Church U.S.A.

Baptist Minister

A Baptist minister of St. Louis, Dr. Edwin Theodore Dahlberg, is the most likely candidate for the post.

Dahlberg, a former president of the Northern Baptist convention, has been pastor of the First Baptist Church in Syracuse, N. Y., from 1929 to 1938, and of the First Baptist Church in St. Paul, Minn., from 1939 to 1952.

The national council is the nation's largest religious body, with 82 per cent of America's Protestants represented in its constituent churches. The general assembly is the top governing body.

Before electing a president and other officers to serve through 1960, the assembly will review the 15-year program of the council, which is carried on by the council as a cooperative enterprise of the member denominations.

Programs Listed

A sample listing of these programs is available to the extent to which American churches are now working together on problems which concern all of them. They include:

- Ministering to the spiritual and physical needs of the aged.
- Helping the families of war veterans and their families, who "follow the crops" from one aquila to another.
- Resettling 100,000 Hungarian refugees who fled to America last year.
- Helping the families of war veterans and their families, who "follow the crops" from one aquila to another.
- Helping the families of war veterans and their families, who "follow the crops" from one aquila to another.

—Preparing uniform Sunday school outlines for 20 million U.S. Protestant children.

—Producing more than 1,000 radio and television programs a year for radio and television.

Sponsor Studies

—Sponsoring studies, conferences and training institutes in scores of fields from pastoral counseling to fund-raising techniques.

This list was chosen at random from the huge stack of progress reports of the council divisions which will be submitted to the assembly. It represents only a small portion of the total cooperative program.

One of the important functions of the national council since its establishment in 1950 has been to enable the churches to "speak with one voice" on many national issues.

Major Topics

Racial tensions and international relations in the dawn of a new space age, and the major topics of concern at St. Louis. The theme of the 1957 general assembly has been announced as "Peace in Christ" across the nations, the races, the denominations.

More than 25 major speakers at the assembly will be the Rev. Martin Luther King, Jr., Negro pastor who led the "peaceful protest" against bus segregation in Montgomery, Ala.

Mr. Martin D. Taylor, chief of staff of the army, will address the assembly on the "price of peace."

Richfield Notes

Journeys, Trips

RICHFIELD, Nov. 30.—Mr. and Mrs. M. V. Sumner, Mr. and Mrs. James E. Walther and daughter, Grace, and Mrs. W. G. Blumens, are spending the week-end with their sisters, Mrs. G. D. Caldwell, Richfield, and Mrs. W. G. Blumens, Orono.

Mr. and Mrs. Gene Padilla and family left Wednesday to visit her son, James Padilla and family, Baker, Ore.—until Sunday.

Mr. and Mrs. (Mrs. Pave) and Mr. and Mrs. Burl Atkins were in Salt Lake City Wednesday.

Mr. and Mrs. Paul Stubb and children, Pocatello, were guests of his father, Mr. and Mrs. Lester Gubb, over the holidays.

Mr. and Mrs. Lee Woods left Wednesday to spend the holiday vacation in Nevada.

Mr. and Mrs. Donald Blunder, Pocatello, are visiting with Sunday with Ruders parents, Mr. and Mrs. Charles Blunder and other relatives.

Mr. and Mrs. F. R. Blunder are celebrating Thanksgiving day guests of their son-in-law and daughter, Mr. and Mrs. Gary Blunder, Boise.

POPE TO ATTEND EXERCISES

VATICAN CITY, Nov. 30 (AP)—Pope Pius XII will attend spiritual exercises in preparation for the Christmas season beginning Sunday.

Idaho's Warring Labor Units Won't Get to Vote at Session

BOISE, Nov. 30.—Idaho's warring central labor organizations will have no vote at the national AFL-CIO convention which opens in Atlantic City, N. J., next Friday.

Speakers for the two groups, the State Federation of Labor and Industrial Union Council, said Saturday they have been invited to send non-voting guests to the convention, but have not decided whether to do so.

They said their decisions would be made, probably Monday, through labor council members.

Albert G. Beattie, secretary-treasurer of the council, indicated the CIO group would probably not send representatives. He said several of the council members, however, would be attending as delegates from member unions.

The federation is the state arm of the AFL-CIO merger has not been carried out. The others are California, Florida, Illinois, Indiana, Kentucky, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, Rhode Island and Wisconsin.

Black and local bodies were given two years to follow suit when the AFL and CIO merged nationally. Charters of those which have not done so expire just before the opening of the national convention.

Major Topics

However, an AFL-CIO spokesman said in Washington, they have all been invited to send non-voting representatives. The spokesman also said the AFL-CIO plans to call conventions in the 35 states to set up new central bodies.

Both Beattie and David Dorman, secretary of the federation, expressed confidence that this would lead to a satisfactory merger agreement.

The council, in a climax to lengthy negotiations, approved two weeks ago a merger agreement under which the president and vice president would be elected jointly.

COUPLE VISIT

FILER, Nov. 30.—Mr. and Mrs. Leonard Williams have been guests at the home of Mr. and Mrs. E. A. Brown. Williams has been transferred by the Mountain States Telephone and Telegraph company from Boise to Pocatello.

Camera Bugs Forget Facts For Pictures

UNIVERSITY OF IDAHO, Moscow, Nov. 30.—The most important thing in photography is often most forgotten. A well-situated professor of photography at the University of Idaho said today.

"Photographers, both amateur and professional, often get so immersed in gadgets and technical items that the most important thing, the picture, suffers," Professor Bell said.

Composition, picture quality and the "subject" which make up an outstanding photograph are often overlooked by a mere picture taking idea.

"Outstanding pictures are everywhere waiting to be recorded on film," Professor Bell added. "While photographs showing creative imagination are comparatively rare, it is heartening to realize that commonplace subjects are waiting to have their beauty shared with the rest of the world."

The professor said that the "subject" which make up an outstanding photograph are often overlooked by a mere picture taking idea.

"The cameraman's 'bug-a-bug' of over, under and double exposure the untimely movement of the subject or camera and faulty background are causes of poor pictures," he said.

"However, he never forgets," Professor Bell emphasized, "to think of the picture itself as the end result and to make out the picture itself as the end result."

Mrs. S. L. Thorpe Wins Club Series

THORPE, Nov. 30.—Mrs. S. L. Thorpe was winner of the Jerome Duplicate Bridge club's recently concluded five-week series. It was announced Saturday.

Second place went to Mrs. W. H. Egan. Mrs. Richard Cook was third. Mrs. Jerry Enoch, fourth, and Mrs. Charles Otto, fifth.

In Saturday play north-south winners were Mrs. Jack Carson, Mrs. Arvid Kelly, first; Mrs. E. W. Smith, second, and Mrs. A. D. McManis, third.

East-west winners included Mrs. John Woolley and Mrs. G. W. Wiley, first; Mrs. Herman Hall and Mrs. H. B. Smith, second, and Mrs. L. H. Vanisher and Mrs. Frank Thomas, third.

POTLUCK SLATED

BUIH, Nov. 30.—The sixth annual potluck dinner of the Masonic lodge and the Order of the Star will be held at 7 p.m. Monday at the Masonic temple.

'Peace' Ballot Is Scheduled For Colombia

BOGOTA, Colombia, Nov. 30.—After a decade of civil strife and an estimated death toll of more than 200,000 Colombians will vote Sunday on a plan designed to secure political peace for 12 years.

The proposal in a nationwide election would amend the constitution to permit the two traditional parties, Conservative and Liberal, to share political power equally.

It will be the first balloting in Colombia since 1950 and the first in which women participate.

The agreement between the two parties to share power is unprecedented in Colombia where an individual is born either Conservative or Liberal and never dreams of switching.

One of the bloodiest in the undeclared civil war of the past 10 years has been in the rural areas, but the bitterness between adherents of the rival parties has extended everywhere.

Gen. Rafael Nunez Urdano, one of the five members of the military junta that has been running the country since last May, is authority

Missile Said to Be Damaged, No Test

SAN DIEGO, Calif., Nov. 30 (AP)—An Atlas intercontinental ballistic missile scheduled for testing this week in Florida has been damaged and its launching has been postponed, the San Diego Union reported today.

The 4thth bombardment wing convert from B-45 Tornados to the new all-weather, craft during the first half of 1958. This will be accompanied by moving elements of the 17th bomb wing from B-45 to B-45 base, Fla., to Sculthorpe.

REPORT REVIEWED

SHOSHONE, Nov. 30.—The progress and accomplishments of Idaho as measured by Gov. Robert E. Smylie and reported by correspondents to the Chamber of Commerce this week.

E. J. Wills Treats His Friend

Shown above is a happy holiday scene with E. J. Wills sharing his Thanksgiving dinner with his friend "Fuzzy" Bury. Not being a snail-eater, "Fuzzy" was not too crazy about turkey, but E. J. had sent for some acorns from the Selway Forest, which is "Fuzzy's" favorite food. Strong liking for cottage cheese! Fortunately his new home is right back of a dairy, so he gets plenty of it. "Fuzzy" is making friends left and right in Twin Falls, and invites you all to come down to Wills' feed lot on Truck Lane West and see him. Jeanne Boyd will be there to make the introductions.

Ray's right, today's the day!

But that's not all. All the other times you have been at Horse Shu and put your tickets in the Horse Shu Barrel help you. If you haven't been down recently, make it today. We're giving money away, all right, but it's birthday party time, too. There's something going on all the time.

TIMES-NEWS PUBLIC FORUM—VOICE OF THE READER

Schools Must Change to Keep Up With Russians, He Claims

Editor, Times-News:
Now that the excitement from the Sputnik launch is beginning to dwindle, scientists, economists and educators are corroborating ancient beliefs that our schools must change in order to keep pace with the coming technological age.
The facts that Russian students in 10 years of schooling have taken five years of physics, six of math, three of biology and four of chemistry, are rapidly producing a scientific state which might ultimately surpass our own, should attract us from complacency which is said to be the "dry rot of democracy."
The schools of our nation and state can easily initiate a program to re-emphasize various aspects of their curriculum.
In each district there is a need for a special teacher to administer and evaluate aptitude tests to be given to eighth or ninth grade pupils. These tests rank the school's abilities in mathematics, English, mechanics, art and other categories and also enable counselors to channel students into the subject fields of their highest potential. Channeling, of course, is used after counseling, so that students can see the value of certain specializations.
A larger number of modern technical courses is also an imperative necessity to our nation's welfare. Improvements in existing technical methods for such pertinent subjects as reading is conducive to achieving success in a wide range of subjects. Daily reading spots, tests followed by comprehensive drills, along with instructions on proper reading technique, vastly increase all rates of learning. Reading speed accompanied with adequate comprehension are alarmingly low in most of our high schools.
Additional periods per day, plus a relaxing of improving of present accreditation standards, along with the easing of teacher loads to insure more thorough workmanship, are important. From these changes many vital and often neglected courses could be offered—particularly in the fields of math and science.
Students working in courses matching their personal aptitudes find school more interesting and assert more effort toward extra study and school cooperation. Especially is this true when more interesting courses such as scholarships are offered. A program for high school graduates, designed to replace the recently discontinued OI education program is feasible. The easing of this anxiety on move-and-work attitude of students in their chosen

Reciprocal Trade Measure Blamed For Job Scarcity

Editor, Times-News:
Congratulations for your item in the Sunday issue informing us of the expiration of the "reciprocal trade agreement act." We know that Senator Gore, D. Tenn., can be relied upon to support this legislation and with the support of eastern congressmen, labor leaders and President Eisenhower it has a good chance of passing.
The average layman knows little by nothing about this act because of its descriptive title (tariffs), so being of the common herd I tried to get a job mining—found the mine closed, because of one being imported that was mined by labor working for 50 cents to \$2 a day. The textile mill and was told foreign imports have closed their doors; the sheep men said we don't need any sheavers, wool isn't worth shearing (foreign import). So I quit for a big factory job and the farmer said "haven't got a hog on the place." Been eating Polish pork for two years.
The senator conceals that it is a disadvantage to industries, and industries employ labor—then who is the laborer? Laborers are working for the repeal of the "Waller-Carrigan" act that prohibits cheap labor from entering this country.
What beautiful legislation! Men who do not know what it is all about.
HUBER REES
(Twin Falls)

Times-News Photo Commended By Safety Council President

Editor, Times-News:
The feature concerned with the highway death toll which appeared in the Nov. 3 issue of the Times-News has come to my attention. (Editorial note: The feature was the seven-column photo of 49 people to illustrate the passing of Valley's highway death toll to that date.)
It is an excellent way of illustrating the terrible loss. We appreciate very much your continuing efforts in behalf of traffic safety.
NED H. DEARBORN
(President, National Safety Council)

Condolences on Kenneth G. Self Death Extended

Editor, Times-News:
I desire to extend my most sincere condolences to the family, the city of Twin Falls and the state of Idaho on the passing of State Representative Kenneth G. Self. It is a terrible loss unless it is made a stimulant of redoubled action to the things he represented and worked for.
Just to relate a little incident: some 10 or 12 years ago, at a meeting of the Twin Falls Public Health Commission, among others Mr. Self made an address. Several had spoken before him and really had mapped out a line of greater development for their city.
Mr. Self, in his speech, enlarged on it quite a bit. After the speech it was expressed by some that his suggestions were excellent but they feared unattainable.
But time has proven that they were in order. He has had the ever increasing ideals for state attainment and the only way that his location can be in a way compensated for by everyone putting his shoulder to the wheel and working for advancement.
W. L. FRIZZELL, M.D.
(507 E. Washington boulevard)
(Twin Falls, Idaho)

Much Debate Due on Education Program in U.S., Writer Says

Editor, Times-News:
In the next few months there is going to be much debate on the United States educational program. Especially in the fields of mathematics, science and language. This debate will have been brought about by the two satellites that are circling the Earth. At present, there are many congressional investigations as to the causes of our lack of supremacy in these fields. I would like to discuss some of these problems.
One of the leading problems is the lack of teachers. Most teachers we have now are qualified, but there are not enough of them. There are several reasons for this. First, teaching has little to offer outside the enjoyment of teaching. The salaries are small in comparison with the amount of training required. There is little chance for advancement.
Another reason is the amount of money offered by industry to graduating students. Industry also offers a greater chance for advancement. If we expect to expand the teaching profession to the point where we have an adequate number of teachers, we will have to offer more, a lot more, to them.
Another problem is lack of adequate scientific educational programs, especially in the first 12 years of school. There is not enough emphasis on mathematics and science. The modern world is now so complex that in order to understand the complexities of life caused by scientific advancement, a person should have at least four years of mathematics and two to three years of basic science. This would be compulsory in the first 12 years of school. The students who have aptitudes in these fields should be given even more of a scientific foundation before entering college. A third problem is that most school rooms are too crowded and to be given the proper amount of attention. This is true of all kinds of school and college.
I would like to quote a portion of Drew Pearson's column which appeared in the San Francisco Chronicle, Nov. 16: "Education: Breeding four years ago, the President publicly urged aid for education. Privately he gave congress no hint to pass aid to education. Scores of phone calls went to congress to block Hells chryon and to block the Pearson probe of high interest rates and Eisenhower fiscal policies. But not one to help secure aid for our schools."
The delay on military and scientific involved some other factors, but the so-called "translating" mood inside the White House was one reason for this bog-down. This is typical of the attitude and action that have been displayed toward the educational program. There is going to have to be a change in the attitude the people have toward education and it will have to be made in the near future.
DOUG MONTGOMERY, JR.
(211 Burton Street, Clifton, Calif.)

Writer Declares Typist Erred on Letter to Forum

Editor, Times-News:
In my letter in Sunday's paper an error in the warrants outstanding, my typist made a mistake and showed \$3,800, and the amount of \$3,807,911 for the 44 counties. I have had the one who had said his taxes was also paying interest on the delinquent warrants. It is my belief that it is proper to run this in case someone would question the figure I would appreciate it.

Mr. and Mrs. E. J. Marker and daughter returned to Pocatello Sunday after visiting Mr. and Mrs. J. J. Bruchsch.

Parents, Not Bar Owners Are Blamed in Teen-Age Drinking

Editor, Times-News:
The question of why teen-agers frequent bars, and are "allowed" to do so, has been presented by two local citizens.
This action is not condoned by the department of law enforcement, either city, county or state. They are, and have always been, ready to cooperate to prevent it. In defense of our licensed bar operators I will say this: No person who depends on his or her license to operate a bar to support a family will willingly jeopardize them by serving a minor who is under the age of 21. Therefore the utmost caution must be used in hiring a bartender. The employee must feel the same responsibility as the licensee.
So, if parents would teach their children to respect the laws and rights of others there would be less of this. They not only break the law by presenting false identification in order to buy a drink, they also endanger the right of the establishment to remain open. To many people the crime is not in the action itself, but in being caught. Since the state legislature passed a law making the minor subject to

Damages Are \$200 When Cars Collide

BURLEY, Nov. 30—Damages were estimated at \$200 to two vehicles following an accident at 8:30 a.m. Wednesday morning at Ninth street and Oakley avenue in Burley.
Alice Monson, 27, Burley, was driving a 1950 Buick sedan south on Oakley and A. P. McLawa, 40, Burley, was driving his 1955 Chevrolet east on Ninth street when the cars collided. The drivers said they did not see each other in time to avoid a collision.
Damage to the Buick was \$75 and to the Chevrolet, \$125.

Plates Go on Sale

GHOSHIONE, Nov. 30—Car, truck and motorcycle license plates go on sale Monday at the assessor's office.
Ray E. Oyer, county assessor, said purchasers should take their 1957 registration or title to the car when going to purchase the plates.
—The vehicle numbers will be held after Dec. 10, the assessor said.

HUDSON'S

New Sputnik Tracker

Officials at the army proving ground, Aberdeen, Md., unveiled this precision-tracking instrument (RMT), which they said was used in the first known precision-tracking of sputnik II. Believed to be the world's largest, most accurate tracking instrument, it incorporates a 30-inch mirror, a 100-inch focal length and both still and motion picture cameras. Shown operating is an unidentified member of special team of army scientists. (AP wirephoto)

Meeting Is Planned for Talks
In Idaho Rural Library Work

BOISE, Nov. 30.—Idaho's state librarian announced plans Saturday for a meeting in January to speed their expansion of rural library activities.

Eugene D. Hart said county library advisers from all of the state's 36 counties will be invited to the session.

Mrs. Merlin Moore, Little Rock, Ark., president of the American Association of Library Trustees, will address an opening banquet Jan. 9. She will be introduced by Gov. Robert E. Smylie.

"The next two days will be devoted to the role to be played by the county advisers in stimulating library development in their counties."

In general, Hart said, their job is to lead in the formation of so-called Friends of the Library councils. These councils can obtain the assistance of the state library, and federal aid, if they wish to work to aid formation of library districts.

Such districts, comprising part or all of a county, can be formed under a law enacted by the 1954 Idaho legislature.

Three have been formed.

One, with its library at Bonanza Ferry, serves in all of Boundary county. The library, formerly supported by a local women's club, has 8,000 books.

Another district library, situated at Grange, serves a district corresponding to a county commissioner's district, or one third of Caribou County. The library has 4,000 books.

The third district, centered at Council, corresponds to a consolidated school district, or a little more than a third of Adams county. There are 2,000 books in the library.

There are active movements afoot in a number of other areas where people wish to extend library service into rural areas.

Since coming to Idaho last summer Hart has met with such groups at Lapwai, Kendrick and Weiser.

Under a five-year program which expires three and one-half years from now, federal money is available for rural library expansion.

The 1958 legislation appropriated \$75,000 to the state library for the current two-year period. This makes Idaho eligible for \$45,000 in federal funds this year.

About 95 percent of this money, Hart said, will be spent strengthening the state library. Some will also be made available to local districts.

Already, in addition to the hiring of the new state librarian, additions to the staff and the book collection are under way.

U. S. Charity Is Becoming Big Business

NEW YORK, Nov. 30 (AP)—Has a friend or neighbor just "put the bite" on you for a worthy charity? If not, you're being neglected. This is the season for philanthropy, with the Christmas spirit and tax regulations being what they are.

Last year, 61 million Americans contributed six billion dollars to support 500,000 gift-supported institutions such as libraries, hospitals and universities.

35 Million Volunteers

Collecting this money were 35 million volunteers, nearly one out of every five people in our country. This army was directed largely by about 400 professional fund-raising firms and 12,500 trained fund-raisers who received about five and a half million dollars in fees last year.

It's a business that is behind our largest charity drives, for the fund-raising counselors set up and direct the machinery for collecting the cash. They operate on a fixed fee basis and do not collect money, which is the solicitor's job.

Score "Clean Best" Method

The fund-raising councils, many of whom belong to the American Association of Fund-Raising Councils, are made up of professional fund-raisers, accountants, lawyers, public relations men, and other business people. They are not very profitable or dignified, and one executive said one of the direct mail-solicitation people. Fund-raisers resort to the mails only as a last gasp, or "mopping up" operation.

In setting up a charity drive for funds, the fund-raisers start by working up "the case," or arguments to be used for raising support. They also seek strong leadership for the philanthropy, a solid corps of volunteer workers and, of course, an audience that has money to spare.

Largest Contributors

Millionaires, as a group, give the largest amounts to charity, percentage-wise.

Our fund-raising counselors have come a long way since the days of Benjamin Franklin, who raised money for a hospital in Pennsylvania back in colonial times.

World war I, with its liberty and victory loan drives, gave the fund-raising profession a big boost, and they've been doing well ever since. Some of our older, most experienced firms have become specialists. The Ward, Brethman and Reinhardt company, for example, handles only church appeals and church-related campaigns. The W. H. Folger and Smith firm specializes in hospitals.

At State Street East.

In order to squeeze out the crooks, 35 states have enacted laws that govern charity campaigns. In addition, 13 states are in the process of adopting regulatory legislation. In addition, many states have their own ordinances aimed at keeping out the phony charity.

One estimate said that in 1956, three per cent of our contributions went to racketeers. Because of state and federal laws and the work of such groups as the Better Business Bureau, the National Information Bureau, the Federal Bureau of Investigation and the AARP, the percentage is way down.

Jaycees Prepare Containers for Fund

J. A. Knowles and Kenneth Boyd prepare more than 100 milk bottles to be placed with merchants by the Twin Falls Jaycees in which to collect money for the Christmas presents for underprivileged children.

Members of the Twin Falls Junior Chamber of Commerce Saturday afternoon began preparing milk bottles which will be placed with Twin Falls merchants during the Christmas season. The bottles will be used to collect money to provide Christmas presents for needy children.

The program is called the "Christmas Shopping Tour." Prior to Christmas day, members of the Jaycees will take needy children on a shopping tour at which time each child will buy a present for himself and one for some other member of his family. The program is designed to teach the children to give as well as to receive.

Names of children to receive the presents will be obtained from the schools. The club tentatively hopes to help about 100 children in the Twin Falls area.

Idaho Cattle's Grub Control Test Is Slated

UNIVERSITY OF IDAHO, Moscow, Nov. 30—Seven hundred and fifty beef animals in 25 different herds representing all parts of Idaho will feature in a statewide demonstration featuring the newest methods in cattle grub control, reports Richard W. Portman, entomologist with the University of Idaho agricultural extension service.

Purpose of the demonstration is to test three new insecticides and methods of treatment for cattle grub control. To be tested are products of the American Cyanamid company and the Chemagro corporation. These companies also are providing funds for the demonstration. Grants for this purpose were approved by the university regents at their last meeting.

Starting at Sandpoint, Monday, the university demonstrators, Portman and J. W. Bailey of the department of veterinary science, will conduct 15 demonstrations during the first half of the month. At each one 10 animals will get a treatment with a new systemic spray. 10 will get a new pill treatment. 10 will get an insecticide injection while 20 will get no treatment as a check.

Up to now the only attack on the cattle grub problem, which causes estimated losses of \$4,000,000 throughout the United States each year, has been poisoning the grub or spraying during a comparatively short period of time after the grub emerges. Portman explains, "The new products promise a much longer period of control in fall and early winter. Animals can be treated with the new materials which are absorbed by the system in time so the control will be effective before the grubs ruin the hide and the hide."

Portman indicates that the new insecticides also show promise in the control of lice, flies and ticks. Demonstrations are scheduled for Sandpoint, Salmon, Challis, Dick, St. Anthony, Burley, Hayden, Blaine, Granger, Franklin, Heyburn, Burley, Twin Falls, Gooding, Caldwell and Lewiston. Cooperation of the cattlemen in providing animals for the demonstrations was secured through county agents, who also select the events in their respective counties.

By Land and by Sea

Ben Carlin, 45-year-old Australian mining engineer, waves from hood-hood of his amphibious jeep as he crosses the Pacific in the sea-going vehicle to Alaska and returned from Alaska highway from Anchorage. (AP wirephoto)

Railroads to Give Protest on Taxes

WASHINGTON, Nov. 30 (AP)—Eight top American railroad executives will present their industry's tax and regulation problems at a White House meeting Dec. 3.

Associate Press Secretary Anne Wheaton said the railroad men were appointed by 21 railroad presidents who said there was a "grave situation" confronting the industry and a need for action by both Congress and the executive branch. Mrs. Wheaton indicated the railroad executives would not meet with the President.

Kansas Town to Live up to Name By Salk "Shots"

NEW YORK, Nov. 30 (AP)—The town of Protection, Kan. (population 800), on Monday will become the first community in the nation in which every person under the age of 40 has received all three shots of the Salk polio vaccine.

Paul O'Connor, president of the National Foundation for Infantile Paralysis, will be on hand when Protection's only physician, Dr. L. O. Glenn, administers the final inoculations to 380 persons in the high school gymnasium.

Men and women and virtually all children in the community received their previous shots April 2 and April 24. O'Connor will present a bronze plaque in tribute to Protection, Kan., for leadership and inspiration in the nation's fight against polio.

Coincident with the final inoculations on Monday, 300 large pink balloons, the color of the Salk vaccine, will be released carrying the message, "We're all protected. Are you?"

Hiroshima Notes 35th Bomb Victim

HIROSHIMA, Japan, Nov. 30 (AP)—A 47-year-old electrician died today from what physicians described as radiation effects from the atomic bomb dropped on this city 35 years ago.

Masao Takeuchi was labeled as the 35th A-bomb victim in this city 35 years.

He had been suffering from trouble and anemia and had undergone treatment at the Hiroshima atomic bomb hospital since Sept. 7.

DIE IN CRASH

FRANKFURT, Germany, Nov. 30 (AP)—Boeings announced today that a French military air transport crashed yesterday in the high Atlas mountains, 50 miles south of Asni, killing all nine occupants.

The plane, a B-24, was carrying 10 balloons, the color of the Salk vaccine, will be released carrying the message, "We're all protected. Are you?"

Junior Chamber of Commerce Ready To Collect Funds for Holiday Project

Members of the Twin Falls Junior Chamber of Commerce Saturday afternoon began preparing milk bottles which will be placed with Twin Falls merchants during the Christmas season. The bottles will be used to collect money to provide Christmas presents for needy children.

The program is called the "Christmas Shopping Tour." Prior to Christmas day, members of the Jaycees will take needy children on a shopping tour at which time each child will buy a present for himself and one for some other member of his family. The program is designed to teach the children to give as well as to receive.

Names of children to receive the presents will be obtained from the schools. The club tentatively hopes to help about 100 children in the Twin Falls area.

Union Said Guilty On Unfair Labor

NEW YORK, Nov. 30 (AP)—The national labor relations board has found the International Brotherhood of Electrical Workers guilty of an unfair labor practice in the jurisdictional dispute which turned out the lights on a CBS telecast last April.

The board said the electrical union was not justified in insisting its members be assigned to light the scheduled telecast of the Antoinette Perry awards ceremonies instead of members of the International Alliance of Theatrical Stage Employees.

The telecast was called off because of the dispute and CBS said it has a \$100,000 damage suit pending against the electrical union. The union said it would appeal the NLRB decision.

Four Nabbed in Coast Dope Ring

SAN FRANCISCO, Nov. 30 (AP)—Four persons, including a San Francisco state college coach, were being held by state narcotics agents today for allegedly selling marijuana to peroxide test agents.

In custody for sale and possession of marijuana were Gail Davis, 24, sophomore psychology student at SFSC; John Carr, 33; William Young, 29; and Charles Johnson, 33.

State narcotics agent Clarence Coster said the arrests were made yesterday after he and another agent had obtained a total of eight pounds of the drug from Mike Davis and Carr in three different purchases in the past several months.

Red Exports up

LONDON, Nov. 30 (AP)—Russia now is exporting more than 20 times as much goods as it was before World War II, Moscow Radio claimed today.

The broadcast heard here said the Soviets are in fifth place behind the United States, Britain, West Germany and East Germany—in the export of industrial goods.

Honor Laika

RAPALLO, Italy, Nov. 30 (AP)—A group of animal lovers announced today it will erect a memorial brass plaque to Laika, the dog sent into outer space aboard Russia's second earth satellite.

The group plans to put up a small statue portraying the head of the spunkiest dog and a plaque recalling how Laika died in her man conquer-space. The memorial will be in the dog cemetery of this Riviera resort.

Teen-Agers Try Different Way of Fixing Popcorn

Popcorn is not only fun but good eating for the young in heart of any age who enjoy something temptingly different. Charlene Bengtson, left, daughter of Mr. and Mrs. A. Bengtson, and Linda Butler, daughter of Mr. and Mrs. Ray Butler, are eating the popcorn almost as fast as it is popped but if there is any left they plan to try the pie. (Staff photo-engraving)

Magic Popcorn Pie Is Fun, Good Eating for Everyone

BY GAYNOR MADDOX
MIA Food and Markets Editor

Looking for food stunts to delight teenagers? Try popcorn. The young in heart of any age will enjoy fun out of their two ideas and also enjoy eating them. Let them make them themselves.

For Magic Popcorn Pie use three-quarters cup granulated sugar, three-quarters cup molasses (light), one-quarter cup butter or margarine, three-quarters teaspoon salt, one-half teaspoon pure vanilla extract, 1 can of popcorn freshly popped, one-half cup chopped dried fruit, glazed fruit to garnish, if desired.

Pop cannot popcorn as label directs. In a two-quart saucepan blend sugar, molasses, water, butter and salt. Bring to boil, stirring constantly; reduce heat and continue cooking until mixture reaches 270 degrees F. on candy thermometer, or until a little mixture in cold water becomes slightly brittle. Stir in vanilla extract.

Pour the hot syrup over warm popcorn in large bowl, mixing and tossing until all the popcorn is well coated. Press one-half of the salt hot mixture into a well-buttered 9-inch pie plate; sprinkle with chopped sized fruit, cover with remaining popcorn mixture. Pressing the mixture down firmly. Bake in shallow pan at 350 degrees F. until brown and level top. Cut pie into 12 wedges with warm. Garnish with glazed fruit if desired.

Woman Visited

ALMO, Nov. 30 - The Rev. Miss L. B. Bowen, who is ill, visited Mrs. Mary Lloyd, who is ill. They presented a short program after which they gave Mrs. Lloyd a Thanksgiving basket of goodies.

COUPLE ENTERTAINS

Flu Outbreak Survey Makes World Center

UNIVERSITY OF IDAHO, Moscow, Nov. 30.—The fact that both students and officials of the University of Idaho are unusually susceptible to influenza is being studied by the U. S. public health service at Hamilton, Mont., recently being made a world health organization influenza center.

Continued cooperation, we hope, will lead to establishing the cause of any correlation between the A-type influenza and Asian types."

This statement was made here today by Mary L. Casey, surveillance officer with the U. S. public health service, who was on the campus this week to continue cooperative research studies on influenza.

Miss Casey explained that when there was an outbreak of influenza at the university last March, research investigators from Hamilton came here to conduct studies.

"Universally administrative officials, infirmity staff members, and faculty members of the department of bacteriology were highly cooperative," said Miss Casey. "But what was really amazing was the response of the student body."

Statistical information was being sought from both students who had had influenza and those who had not, and about 1,500 students—almost half the student body—answered a questionnaire.

Students who had had influenza also gave full cooperation in the obtaining of throat washings and blood specimens.

At the Rocky Mountain laboratory, specimens were placed in

fertile eggs and in living monkey kidney cells. It was determined that the outbreak of flu was primarily due to the A-prime type virus.

"Officials of the world health organizations were so impressed with the University of Idaho studies that it was decided to make the Rocky Mountain laboratory an influenza diagnostic center."

The laboratory thus has become one of nine such centers in the nation and the only one in the Pacific Northwest."

Miss Casey said that further checks on the influenza outbreak at the university earlier this fall, through the cooperation of University Physician J. Millard Fleming and students, had determined the primary cause to be the Asian type virus.

"We now want to check through questionnaires and other studies as many as possible of the 1,500 students who responded to the questionnaire last spring," added Miss Casey. "We also want a check on as many as possible of the freshman students who were not here last spring."

She pointed out that it is now generally believed that there is no

Mark Two Anniversaries

The first anniversary of Sen. Frank Church in the U. S. senate and the 8th birthday anniversary of A. H. Harshorn, retired Jerome postmaster and for many years county chairman of the Democratic party, will be observed Tuesday at the Smorgasbord served in the American Legion hall from 7:30 to 9 p.m. Senator Church will speak at 9 p.m.

Mrs. Robertson's Services Planned

Funeral services for Mrs. Beale J. Robertson will be held at 2 p.m. Wednesday at Twin Falls mortuary. Mrs. Robertson, wife of Harley Robertson, died Saturday morning at Sacramento, Calif., after a lingering illness.

Mrs. Robertson lived in the Buhl area for many years before moving to Chico, Calif., about six months ago. She was born July 10, 1883, in Indiana. Besides her husband, she is survived by her mother, Mrs. Katherine Scott, Chico, Calif.; two daughters, Mrs. Elizabeth Zornick and Mrs. Lora Rader, both Sacramento; two sons, Eugene Robertson and Arnold Robertson, both Chico, and 15 grandchildren.

Funeral services will be conducted at Sunset Memorial park.

Correlation between A-type and Asian influenza.

"It is important to medical science," she said, "to know whether or not there is a correlation— for sure."

Meeting Stated

JEROME, Nov. 30.—Malcolm Allred, curriculum director with the state department of education, Boise, will speak at 7:30 p.m. Tuesday at the fourth district elementary principals meeting at the Jefferson school.

Allred will talk on selection and utilization of instructional aids. Around 50 principals from Magic Valley are expected to attend.

Visitors Related For Valley Area

HAUGERMAN, Nov. 30.—Guests for dinner at the home of Mr. and Mrs. Chord Clarry on Thanksgiving were Mrs. Clarry's parents, Mr. and Mrs. Frank Pruitt, of Brownlee, Ore., and Clarry's parents, Mr. and Mrs. E. Clarry. Mr. and Mrs. Burt Hamilton and family at the city hall.

family, Eugene, Ore., visited on Thanksgiving with Mr. and Mrs. Rex McNulty. Other guests included Mr. and Mrs. Frank Markham and family, Mountain Home, Mr. and Mrs. Ralph Thompson and family, and Mrs. Rita Thompson and son, Clinton Perry.

COUNCIL WILL MEET

BOISE, Nov. 30.—The city council will meet at 8 p.m. Tuesday at the city hall.

Richfield Visits

RICHFIELD, Nov. 30.—Mrs. Katherine Heidy, Ponca, Neb., is visiting her son, John Heidy, and family. Mr. and Mrs. Morgan Klinta, Clearfield, Utah, were Thanksgiving guests of Mrs. Klinta's parents, Mr. and Mrs. Oscar Johnson. Mr. and Mrs. George Hooker, Puenne, Calif., and Leonard Popple, Buhl, were guests of Mr. and Mrs. Louisa Base this week.

Visits, Journeys Listed for Area

KING HILL, Nov. 30.—Sharon Green, student at the College of Idaho, Caldwell, is spending this week at the home of her parents, Mr. and Mrs. Arthur Greer, guests at the Greer home on Thanksgiving. Also included Mr. and Mrs. William Franke Timbers, Idaho State College.

Mr. and Mrs. Postello, visiting her parents, Mr. and Mrs. Ted Timbers, are spending the week-end with her parents, Mr. and Mrs. Don Loe, and her brother and sister-in-law, Mr. and Mrs. Ted Loe. Mr. and Mrs. Jerome Westman, Washington's brother-in-law, are visiting Mr. and Mrs. Loe. Mr. and Mrs. Loe are his mother, Mrs. Helen Westman, Jerome.

Pamper Her With Gifts from "The Mayfair" Christmas Wonderland

WE'LL CHANGE YOUR GIFT DAZE INTO "DAZZLING", PERFECT PRESENTS FOR HER!

SWEATERS
Heard only one of the latest selections in Magic Valley! All the smart, new colors in Jantzen's and other famous names.

SEPARATES AT HOME
Jersey weaves, velvet slights, shirts that cling and slacks that don't. On with the prettiest! A holiday collection brimming with color.

SPORTSWEAR
White Slacks and many other famous brands to see her through the winter's skiing and other outdoor sports. Car-cos, Jackets, Fendi pushers, Shirts and many others.

DREAMY FEMININITY
Exquisite styled gowns, alpine, half-alpine. Flowing and frilly nylon tricot in the color of her choice.

HEADWARMERS
Gay and colorful. Just as warm as they are equally. Since little hats and scarfs that will brighten anyone's holiday.

SKIRTS
Fabulous new arrivals set to the holiday tempo. Reversible in plaids and plain colors and many, many others.

BLOUSES
Ship in Slacks, Bobbie James, Jr. Mrs. and a host of other famous brands to mix and match with her favorite skirt or other separates.

ROBES
Robe robes, gay and full of color and comfort. Choose from a large new selection.

HOSIERY
Wonderful, sheer nylons. No girl ever has too many. By them by the box, beautifully wrapped and ready for gifting.

ACCESSORIES
Jeweled silk sets, collars, clutch bags, con-our belts and many, many others.

JEWELRY
Gay new holiday pieces set with rhinestones and other charming jewels. Choose from one of Magic Valley's most complete selections.

Little People's Christmas Coloring Contest No. 3 Solar Energy

Device Is Aim Of Local Man

(From Page 11)

heat, and the second pane prevents the reflected rays from leaving the chamber between it and the panel. A pocket of extremely hot air is produced. It is this pocket which provides the heat needed, the inventor told.

"One needs only to consider the fact that an area somewhat smaller than the size of the average kitchen table receives well over 1,000 watts of thermal energy on a clear day," says Butterfield.

This solar energy which plants use in photosynthesis to provide the basic foods for animal and human life upon earth is readily available in almost any inhabited area of the world, according to Butterfield.

The land has provided, must merely accept and use it.

Assuming that Idaho can expect 200 usable "heat days" per year, Butterfield figures that up to 60 and 75 per cent of the average heat and water bill can be saved.

"If you could use a solar absorber of proper size," he claims, "your monthly water heating bill could be cut from about \$6 a month to around \$2. Your furnace heat bill could be cut from \$25 to about \$8-25 a saving of \$16.75 a month."

Butterfield has a ready reply to the question of what happens if the sun falls to shine. "The answer is this: We can store solar heat economically for about four or five days." In cases where adequate sunlight is not available for four or five days, Butterfield adds that it is "simply a good practice" to have a "standby" heating unit to "carry through."

You may also wonder how hot the air or water will be which comes from a solar absorber. "It will vary somewhat according to design, from room temperature to about 200 degrees Fahrenheit."

"The hot air flowing into a home can be regulated from two to five degrees automatically by the use of thermostats, both by regular action and reversed action types," he explains. "That is, one will start at low and cut out at high and one that will start at high temperature and cut at low temperature."

Butterfield embraces two different types of heat storage units. "The excessive heat can be stored in many ways, including insulated hot water tanks and insulated gravel bins, about the size of coal bins. These can store about three or four days of usable heat."

As to cost, Butterfield believes that units can be installed for as

Camouflage

NEW YORK, Nov. 30.—For two rainy morning hours, four new parakeets \$2,500 worth of wicker's waters into eastern, carried the boxes down three flights of stairs and loaded them in a truck.

Turn the "boxes" in a dark decoy broke their chains, two bearded birds rose up from their "slumber" in the gutter, and jigs, it was the cops.

The wicker burglars gave up quickly. Police said they are suspected of at least 12 other similar robberies from camera plants.

FARM BUREAU MEETS
FILED, Nov. 30.—File community Farm Bureau will meet at 8 p.m. Monday in the Twin Falls hall.

little as \$125 and as much as \$1,500. He figures the life expectancy will vary from about five to 20 years, depending on design and materials.

Models of solar heaters have produced noticeable results. Last Feb. 10 Butterfield tested one of his "pilot" models. He reported 1,200 BTUs of heat were collected on a surface of one square foot in seven and one-half hours, with a peak temperature of 181° Fahrenheit.

Butterfield hopes to obtain a patent for his invention within a year to two and manufacture the units in Twin Falls. Asked if he felt a market would exist for the solar heaters he gave an emphatic "yes." "Certainly," he conceded, "the initial cost is pretty high. But the lower costs later definitely justify the expense."

Dr. Clingbeil's possible appointment for various age groups. These age levels must be considered only as approximations since children vary in growth and maturity at their own individual rates, he said.

The list includes: age one month to nine months—soft rubber balls, safe musical rattles with no removable parts, teething rings, floating toys for bath water, colorful toys to string across the crib.

Age one year—teething blocks, clunk toys, picture books, stuffed animals with no removable eyes, etc., records, toy telephones, push

and pull toys, large balls. Age two to four—building blocks, clayons, push-pull toys, simple instruments, musical instruments.

Age four to six—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes, audiotapes.

Age five to six—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age six to eight—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age eight to ten—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age ten to twelve—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age twelve to fifteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age fifteen to eighteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age eighteen to twenty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age twenty to thirty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age thirty to forty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age forty to fifty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age fifty to sixty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age sixty to seventy—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age seventy to eighty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age eighty to ninety—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age ninety to one hundred—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred to one hundred and one—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and one to one hundred and two—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and two to one hundred and three—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and three to one hundred and four—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and four to one hundred and five—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and five to one hundred and six—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and six to one hundred and seven—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and seven to one hundred and eight—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and eight to one hundred and nine—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and nine to one hundred and ten—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and ten to one hundred and eleven—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and eleven to one hundred and twelve—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twelve to one hundred and thirteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and thirteen to one hundred and fourteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and fourteen to one hundred and fifteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and fifteen to one hundred and sixteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and sixteen to one hundred and seventeen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and seventeen to one hundred and eighteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and eighteen to one hundred and nineteen—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and nineteen to one hundred and twenty—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty to one hundred and twenty-one—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-one to one hundred and twenty-two—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-two to one hundred and twenty-three—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-three to one hundred and twenty-four—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-four to one hundred and twenty-five—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-five to one hundred and twenty-six—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-six to one hundred and twenty-seven—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Age one hundred and twenty-seven to one hundred and twenty-eight—books of short stories, simple construction toys, modeling clay, low action toys, records, audiotapes, audiotapes, audiotapes.

Geese Lay Eggs on Snake River Islands

This goose nest is typical of those found on Snake river islands included in the Snake River national wildlife refuge to protect nesting grounds. These eggs were uncovered because the geese left the nest when a survey crew approached. If a goose leaves a nest at her own leisure, she usually pulls the surrounding mud and grass together, hiding the eggs fairly well. (Idaho fish and game department photo—staff—enraving)

Hunters Ask Questions About Snake River's Posted Islands

(From Page 1)

And around these refugees reflected the total picture for southwestern Idaho, of course. However, these refugees are desired for more than a mere reflection of the general waterfowl resource. More and more, as other natural habitat is reduced by development, these refugees increase in importance. Actually, through the habitat they furnish, these refugees now create and preserve a large portion of the general waterfowl resource in this part of the state.

In addition, through the public hunting area they furnish, they are also furnishing an important part of the available free hunting opportunity. Hence the department is glad to answer all those calls with the same replies as in previous years.

"Yes, the islands are posted the same as last year."

Probate of Giese Will Sought Here

A petition to probate the will of Herman A. Giese, who died Nov. 10 at Boise, was filed Friday in Twin Falls probate court.

The petition was filed by his widow, Mrs. Ella Giese, Twin Falls; his four sons, Frank, Theodore, Gliese, Buhl; John Herman Gliese, Gooding; James W. Gliese, Urbana, Ill.; and Joseph Thomas Gliese, Twin Falls.

The estate consists of real and personal property of an undetermined value.

A hearing is set for 10 a.m. Dec. 23 in Twin Falls probate court.

Payments Asked

Two separate complaints alleging indebtedness were filed Friday in Twin Falls probate court by the Professional Adjustment Bureau through its attorney, H. H. Jewell, Twin Falls.

In a complaint against Roy Roberts the bureau claims indebtedness of \$81 to Dr. Vern Anderson, Buhl, and \$150 to Magic Valley Memorial hospital.

The bureau says Steven E. Tiplon owes the Texas company, Talent, Ore. \$19.43; Dr. Luther Thompson, Twin Falls, \$6, and Leonard P. Hilsenhoff, \$13.74.

Sale of 1958 Auto License Plates to Start Monday at Courthouse, in Buhl

(From Page 1)

his 1958 license plates and July 1, 1958, he will be required to pay the increase amounting to the fee set for plates for that particular model.

\$149,000 for Valley Phone Firm Is OK'd

RUPERT, Nov. 30.—A \$149,000 loan was approved Friday by the rural electrification administration, Washington, D. C., for the Project Mutual Telephone association, according to telegrams from U. S. Senators Henry Dworshak and Frank Church.

At Bouthall of the telephone company said work would begin immediately on 22 miles of new line which will bring telephones to 200 households west and south of Buhl.

Staking and surveying work is almost completed by Associated Engineers, Billings, Mont., Bouthall said. The line will be a "long haul" into the Paul exchange as considerable expense can be avoided by not having a separate exchange, Bouthall stated.

At midnight on Nov. 16 the Norland culvert serving 244 subscribers was put into effect. The Norland exchange is 13 miles north of Rupert.

Line Builders, Billings, will put in the new line.

Project Mutual is a cooperative telephone company which serves 2300 families in Minidoka county. William J. Henchfield, Rupert, is president.

Heated Concrete
Dial RE 3-5500
Colonial Concrete
S&H Green Stamps

However, should the car owner purchase an older model car and trade in his newer model he cannot receive a refund. There also will be a \$2 fee for transfer of title.

Even traded in age of vehicle or price classification up until July 1, 1958, requires no fee. As an example, should an owner trade one 1951 model for another 1951 model he is not required to pay a fee for the transfer of title. Should the owner of a 1951 model car trade for a 1960 model he will be required to pay a \$2 transfer of title fee.

After July 1, 1958, all transfers of titles are \$2. The only increase possible in license plate costs after July 1 is \$128 on the difference between \$7.50 and \$8.75. This applies only to owners who currently have 1949 model or older cars who should purchase a 1958 or new model car before July 1, and after he has purchased his 1958 license plates.

Motorcycle registrations are similar to automobiles in fees. If a motorcycle owner purchases 1958 license plates then trades or sells his motorcycle and obtains a newer model he is not required to pay a fee.

pay the fee. After July 1, all transfers of motorcycle titles are \$2.

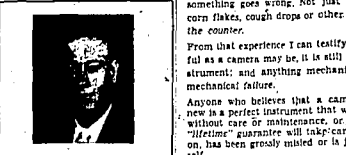

During the past week Thompson and employees in his office have been preparing for the early rush for plates. The assessor's office will be open from 9 a. m. to 3 p. m. through the week and from 9 a. m. to noon, Saturday.

Let's analyse objectively the reasons—

I have spent 15 years of my life working with cameras using them, and repairing them like something goes wrong. Not just selling them like corn flakes, cough drops or other expendables over the counter.

From that experience I can testify that, as wonderful as a camera may be, it is still a mechanical instrument; and anything mechanical is subject to mechanical failure.

Anyone who believes that a camera when brand new is a perfect instrument that will last a lifetime without care or maintenance, or that the factory "lifetime" guarantee will take care of it from now on, has been grossly misled or is just kidding himself.

ARE YOU SHOPPING FOR CAMERAS or LEMONS?

For many people the purchase of a good camera is a *once-in-a-lifetime* investment. All the more important why it should be purchased from a *bona-fide, reliable camera store*.

Such a guarantee does not cover:

1. Defects in design
2. Normal wear and tear
3. Dirs and grime getting into the mechanism
4. Getting out of adjustment
5. Shipping charges to and from the factory

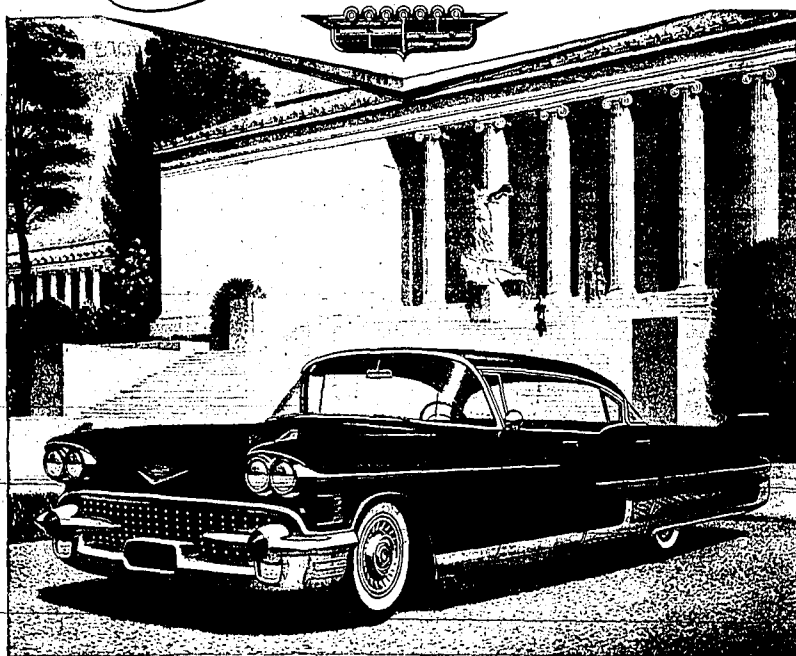

But these things are covered by Coronet Camera Center's new Gold Bond Certificate for a full YEAR PERIOD on every new camera whether it be a Box Brownie or a Leica.

Why, then, should change yourself by being hoodwinked into a "cheapie"? Actually our prices are no higher. Most advertised "specials" where you are supposed to save so many dollars are factory promotions and we sell them for the same price. The big difference is that you get something besides a receipt for your money when you deal with us. So don't buy a camera where you can get a lemon. Buy it from a regular camera store where you get local guarantee and service.

Cadillac

A Masterpiece... Even by Cadillac Standards!

The Cadillac car for 1958 is, clearly, a masterpiece in all the things that make a Cadillac... a Cadillac!

Certainly, it has had no adequate precedent insofar as beauty and majesty are concerned. In its graceful symmetry of line, in its tasteful use of chrome and color, and in its remarkable look of stature and substance, it is in a class all of its own.

Unquestionably, it is without counterpart in the way of interior elegance. Never before have Fleetwood coachcrafters combined such graciousness and luxury in a single interior design.

And, most assuredly, it has set its own pace in modern motor car

performance. Its dynamic new engine, its more responsive transmission, its improved power steering and its new air suspension, now available as an extra-cost option, are simply a revelation.

In the way it looks, in the way it rides, and in the way it drives—this is Cadillac's finest!

We earnestly hope that you will take the time to investigate all three aspects of this magnificent new Cadillac very soon.

Your Cadillac dealer will be delighted to give you full details on Cadillac's twelve new models, including the incomparable Eldorado Brougham. You will be most welcome at any time.

Nixon Arrives at White House

Vice President Richard Nixon, right, talks with reporters as he arrives at the White House Wednesday morning. He said he would confer with White House officials but does not expect to see the President who is recovering from blockage of a brain artery. (AP wirephoto)

Vice President's Statements Put Him On Record to Follow Policies of 'Ike'

(From Page 11)

philosophy of moderation or partnership," Nixon continued. "Call it what you will, we have something that is new and good. . . . Our is the real progressive approach. Our is this really forward look."

"If you believe in America's greatness and trust her future, stay on the liberal and truly progressive side."

This, presumably, is what Dick Nixon is on the record to work for should he take over "the duties" of President of the United States.

On foreign policy, Nixon is unquestionably an all-out internationalist. There may be some lingering doubts as to whether he is a modern Republican or a conservative on domestic policy. But in international

at affairs he follows the Eisenhower line 100 per cent.

During the 1956 Presidential campaign, Nixon constantly repeated the theme that President Eisenhower was the wisest and most experienced leader available. Last experienced men might easily have involved the United States in a major war, Nixon asserted.

That was the peace pitch for Eisenhower's reelection. But today the question is whether the young Nixon is himself the wisest and most experienced leader next to Eisenhower available to keep the country out of war and the world at peace.

Certainly, President Eisenhower has done everything he could to make his vice president an able

successor in the White House. Nixon has sat in on cabinet and national security council meetings and presided over both when the President was away from Washington.

"Even if Mr. Nixon and I were as good friends," the President declared in one of his press conferences, "I would have him in every important conference of government, so that if the grim reaper removed me from the scene he would be ready to step in without interruption."

Nixon has also been the President's personal representative "on six good will missions overseas. He has visited 14 foreign countries, six of them more than once—flying more than 110,000 miles.

Those tips have taken him twice

around the world. In 1953 and 1954, he went through Central America, to Brazil for the inauguration, to Austria to inspect the Hungarian refugee situation in 1956, to Africa in 1957.

In three countries Nixon met the heads of all governments. And he has been President Eisenhower's personal confidant and God-father for most high foreign dignitaries coming to Washington on state visits. So Nixon knows personally the free world heads of state he would have to deal with.

The communist leaders he does not know. But who does?

There is no doubt about Nixon's anti-communism. During the debate on the Eisenhower doctrine for the Middle East early in 1955, Nixon declared that Soviet opposition to this new policy illustrated dramatically why the free world must not leave a vacuum.

Nixon opposed a congressional proposal to act solely on the military aspects of the doctrine. He said the economic phase of the program "would reduce the chance of internal subversion, which is perhaps a greater threat than external aggression."

As vice president, Nixon has been a consistent supporter of all Eisenhower administration foreign aid programs.

In his Michigan State University commencement address in 1957, the vice president even declared that the Polish loan of \$5 million dollars was "a gamble worth taking in the hope that Poland would eventually turn away from communism."

Nixon rejected Senator Knowland's contention that the Polish loan might be the beginning of a Marshall plan for the communists.

"We are not writing off the Polish people or any of the other millions who are behind the iron curtain,"

Receiving the Jewish civil rights award, Nixon predicted that "the 1958 Polish and Hungarian uprisings were the beginning of an internal revolt that will ultimately sweep away the communist empire."

Nixon's stand on banning the hydrogen bomb—as stated during the 1956 political campaign—was to blast Gov. Adlai Stevenson, who had suggested it, as being naive and as damaging America's interests as "responsible."

The vice president has been an advocate of adequate U. S. defenses, with superiority in atomic weapons.

But Nixon has also expressed high praise for President Eisenhower's "Atoms for Peace" plan and his offer of a mutual inspection exchange with the Russians to bring about disarmament.

In summary: Nixon is on record as a dyed-in-the-wool Republican. In practice he remains to be evaluated under the tests of responsibility.

Valley Man Loses In Senior Revote

UNIVERSITY OF IDAHO, Moscow, Nov. 30 — Michael Patton of Payette was elected senior class president at the University of Idaho following a breaking class revolt. It was announced today.

In the regular class elections Patton and candidate Gary McEwen, Kimberly, each polled an identical 111 votes to deadlock the election.

Patton, in the second round of balloting, edged McEwen by five votes to become class president.

Dixie Smoke Still Rising Over Third Party but Real Fire Is Questionable

ATLANTA, Ga., Nov. 30 (UP)—Smoke is still rising in Dixie today over the possibility of a third party political party, but the question is how much real fire lies beneath the haze.

A few weeks ago, southerners were taking leaders, and plausibly, as the advocates of a new party. Political leaders reported "strong support" for a third party, "strong support" for a third party, "strong support" for a third party.

After all the smoke, the question is whether the Dixie smoke is still rising, or whether the real fire is still burning.

Incorporation Recorded for Valley YMCA

Articles of incorporation for the Valley Community Young Men's Christian Association were filed with the Twin Falls county clerk today.

The articles state the membership is open to any person of good moral character, without regard to race, color, creed or religious affiliation. The articles also state that the association is organized for the purpose of promoting the Christian religion and the welfare of the community.

All members must be at least 16 years of age and must be residents of the Valley. The articles also state that the association is organized for the purpose of promoting the Christian religion and the welfare of the community.

Koehler to Attend Meeting on Safety

BOISE, Nov. 30 (UP)—Idaho will send its Commissioner of Transportation, George Koehler, to a meeting on highway safety in Washington, D.C., today.

Koehler will attend the meeting with other state transportation officials. The meeting is being held by the Federal Highway Administration to discuss highway safety measures.

Delegates Attend State BYF Meets

HAILLEY, Nov. 30 (UP)—The Rev. Richard Williams, The Rev. Larry and Amy Ombak took members of the Junior and Senior Baptist youth organizations to the annual state BYF convention in Pocatello today.

The convention is being held at the Pocatello Hotel. Delegates from various churches are attending the convention.

enjoy a new world of Magnificent Magnavox High Fidelity

There's a realism and spaciousness in your favorite recordings you've never heard until you hear them on a Magnavox. These fine instruments reproduce all the glorious sound on today's extended-range recordings.

Continental AM-FM Radio Phonograph 3 Speakers—Diamond Stylus

Exclusive decorative grating top and front panels, richly marbled or in wood grain patterns, permit easy access to all operating controls—without disturbing decorative appointments. Impervious to stains, burns or scratches—afford lasting beauty.

• 25-watt dual-diode amplifier • 15" horn, 7" horn and 4" horn speakers, plus wide-angle high frequency horn

\$409.50

with traditional base shown

Super Magnasonic High Fidelity Phonograph 4 Speakers—Diamond Stylus

A superlative high fidelity instrument in smart, functional furniture. Top panel slides open to permit easy access to the record changer without disturbing decorative appointments.

• 15" and 12" horn, 4" and 5" high frequency speakers • Full-pod 20-watt amplifier • Precision internal record changer

\$289.50

also available with AM-FM radio

Expert Gives Hints to Help Spud Storage

Several suggestions for proper storage of potatoes are offered by Richard Ohms, potato specialist of the University of Idaho extension service, according to C. W. Delish, county agent.

A thermometer is a useful tool in a potato cellar. Ohms says, since temperature has a lot to do with stored potatoes so they will keep well.

"Tubers in the center of the bin must be below 40 degrees," he said. "If the storage period is to be later than February, at 40 degrees, with high humidity, sprouting may occur in late February or early March."

Under Idaho's environmental conditions, the specialist explained, rapid movement of air through the pile of potatoes is undesirable. All that is needed is enough air to move moisture to provide a cooling effect and exchange of gases. Any air movement that is excessive, Ohms said, will cause rot.

Relative humidity should be kept at 85 to 95 per cent, Ohms advised. "If the humidity is too low, the potatoes will shrivel and lose weight," he said. "If it is too high, the potatoes will rot."

Ohms said that the best way to maintain humidity is by using a pump to circulate air through the pile of potatoes. "This will keep the air dry and prevent rot," he said.

"Handle cold tubers with great care," Ohms says. "They are brittle and will shatter when they are handled. If they are handled roughly, they will be damaged and will rot."

Ohms said that the best way to store potatoes is in a cool, dark, well-ventilated place. "This will keep them in good condition for a long time," he said.

Skipper of Atomic Sub Relates How It Feels to Cruise Beneath Ice of Arctic

QUOTON, Conn., Nov. 30 (AP)—On a hot day last August the atomic-powered submarine Nautilus eased away from nearby New London and headed for a cold, silent, unexplored world.

She carried 15 officers, 27 crewmen and four scientists. Their destination: the Arctic ocean.

The Nautilus was to try something never before accomplished—cruise at length under the polar ice pack, seeking military and scientific knowledge about an area that men have rarely explored.

She carried with her a wealth of resources from various agencies for all kinds of information. She was sent asked to try to find out what the fish sounded like.

"But we didn't see any fish and we didn't hear much of anything," said her skipper, 36-year-old Cmdr. William Anderson of Waverly, Tenn. After they had been there for three days up there, they're pretty good fish. In fact, it's the most silent ocean in the world.

"The absence of any life and the absolute silence were tremendously impressive. Somebody remarked that he could almost believe we were on the moon because this area was so different from earth. Just ice and more ice."

When the Nautilus arrived at Arctic waters, she had a companion submarine—the Trigger, a conventional type vessel.

In her first hours under the ice the Nautilus moved gingerly. This was something new.

But as the crew got the feel of things and became more confident, they moved more boldly.

When the submarine left the states Aug. 19, Anderson carried orders that gave him two major responsibilities on the mission:

1. To make a preliminary investigation of the feasibility of exploring the Arctic basin by nuclear submarine.
2. To get scientific data on the area covered.

He found the first job brought a clear answer that exploration of the basin is easily feasible. The navy had hoped he could reach the vicinity of latitude 82 north. He got to 81 latitude, some 240 miles farther north.

As for the scientific side of the trip, he felt it produced a hundred times as much information as all previous explorations of the area.

One thing that surprised the Nautilus team was the variations in water temperature in the Arctic. They fluctuated according to the locality and depth. Even warm water was found.

Anderson won't discuss matters touching on the military phase of the trip.

It is no secret, however, that the navy long has been interested in the use of nuclear-powered submarines as launching sites for intermediate range ballistic missiles.

Anderson would not comment on whether the Nautilus could have any bearing on the missile program.

Use of the glasses increased tremendously after the invention of printing by Gutenberg around 1450.

When the submarine left the states Aug. 19, Anderson carried orders that gave him two major responsibilities on the mission:

1. To make a preliminary investigation of the feasibility of exploring the Arctic basin by nuclear submarine.
2. To get scientific data on the area covered.

He found the first job brought a clear answer that exploration of the basin is easily feasible. The navy had hoped he could reach the vicinity of latitude 82 north. He got to 81 latitude, some 240 miles farther north.

As for the scientific side of the trip, he felt it produced a hundred times as much information as all previous explorations of the area.

One thing that surprised the Nautilus team was the variations in water temperature in the Arctic. They fluctuated according to the locality and depth. Even warm water was found.

Anderson won't discuss matters touching on the military phase of the trip.

It is no secret, however, that the navy long has been interested in the use of nuclear-powered submarines as launching sites for intermediate range ballistic missiles.

Anderson would not comment on whether the Nautilus could have any bearing on the missile program.

Use of the glasses increased tremendously after the invention of printing by Gutenberg around 1450.

Keep Doors Open Carbon Monoxide Deaths Happen in Closed Spaces

BY EDWIN F. JORDAN, MD
(Written for NEA Service)

Every so often we read or hear about someone who was found dead while sitting in a car in a closed garage. The cause of death is usually carbon monoxide poisoning produced by running the motor of the car in a place without fresh air. Similar tragedies may come from faulty heaters.

The exhaust of a car produces and releases carbon monoxide. When this is breathed, the odorous gas, which combines with a portion of the blood known as hemoglobin which normally carries oxygen to the tissues. If carbon monoxide replaces oxygen in the hemoglobin, the tissues are starved for life-giving oxygen. It takes a long time for the body to get rid of carbon monoxide, and the victim quickly becomes unconscious and may die.

When only small amounts of carbon monoxide are present, warning symptoms may occur, such as "headache, dizziness, nausea, muscular weakness and a generally uncomfortable feeling. When large amounts of carbon monoxide are present, the victim becomes drowsy and unconscious so rapidly that these symptoms are lacking.

Chronic poisoning from carbon monoxide probably does not exist. A pound of carbon

One would expect it to be found in people who are exposed to small amounts of carbon monoxide for long periods of time, such as those working in certain mining operations, near furnaces, or in garages. But actually such persons do not seem to be harmed in any way.

The use of defective stoves or furnaces or running the motor of an automobile in a closed garage are more dangerous than playing with dynamite.

If a person who has been exposed to carbon monoxide is still alive, he should be removed from the bad air at once. Artificial respiration and giving oxygen as soon as possible are desirable. Fire department crews, police and gas company employees are usually trained to give rapid emergency treatment for this form of poisoning.

Taking a chance on being revived does not make much sense, however. Those who use gas heaters in their sleeping quarters should make sure that these devices are in good condition, sleeping with the windows open is an additional safeguard.

An ounce of prevention is worth a pound of cure.

DUE TO MY RECENT HEART ATTACK, I am compelled to retire from my present business at 812 Main Avenue South in Twin Falls! Drastic measures have been taken to completely liquidate my entire stock of fine used cars in just one day . . . Monday, December 2.

USED CAR AUCTION

MONDAY, DEC. 2

Over 20 used cars in stock . . . from Ford to Cadillac . . . 49 models to 57's . . . all to be sacrificed on the auction block. Every car **MUST BE SOLD** in just one day. Come early to arrange for terms or bring your checkbook and pay cash. This is a one-shot deal you can't afford to miss! Buy 'em at your own price. Dealers welcome! We'll be open all day today (Sunday) for your inspection.

TERMS ARRANGED ON-THE-LOT BY FINANCE CO. REP.
All Makes! All Models! All Good Clean Cars!
NONE RESERVED! NOTHING HELD BACK!

CHUCK'S USED CARS

812 MAIN SO.—TWIN FALLS—NEAR 5 POINTS EAST!
MESSERSMITH & HOLLENBECK, AUCTIONEERS

Sale Starts 1:30 p.m.
