PRICE 5 CENTS

# Sharon Zlatnik, 17, Is Miss T.F. County of 1958

Sharon Zlatnik, a blue-eyed 17-year-old Twin Falls high school senior, was crowned Miss Twin Falls County of 1958 Saturday night to climax the Lions club-sponsored pageant at the Twin Falls junior high school auditorium. Runners-up were Pat Larson and Helena Kline. The new Miss Twin Falls County was crowned by Lions club President Uriel Simmons. Simmons placed a crown on the winner's head and also presented a bouquet of roses to her, Miss Zlatnik, Miss Larson, first runner-up, and Miss Kline, second runner-up.

The five finalists who were selected from five finalists who also included Billie Sue Austin and Sherin Tajom. The final selection came after an evening of displays of talent, poise, personality and beauty by the five contestants. Judges were selected from a parade with the girls attired in evening dresses, talent displays and a review with the girls in bathing suits.

"What preparations did you make after you entered the Miss Twin Falls County pageant?" "What will you remember most about the activities of the past year?" "What would the title of Miss Twin Falls County mean to you?" The five finalists were asked these questions before the judges turned one by one to give their answers.

For her talent portion of the competition Miss Zlatnik played a classical piece, "The Storm," by Chopin. She also danced to "The Dream of the Night" by Chopin. Miss Zlatnik presented a selection of "St. John's" by Austin. She read the opening of the story "The Man Who Went to a Country."

Presentations by other contestants included Yvonne Fay, Miss Zlatnik's first runner-up, singing the song "If I Were a Rich Man" from "Fiddler on the Roof." She also presented a selection of "The Man Who Went to a Country."

The newly-crowned Miss Twin Falls County will represent the county in the state pageant in Boise next summer. (Continued on Page 2, Column 1)

# Market Crop Production West, Israel Drive Blast at Parley of Africa, Asia Bloc

BOISE, Dec. 26 (AP)—Idaho production of market crops showed to a new all-time record for the state during 1957, the U. S. department of agriculture reported today. The department's year-end report said new record yields were established for all field crops from grain and oilseeds, winter wheat, spring wheat, barley, and all fall crop potatoes. The above-average production boosted the year's index to 136 percent of the 1947-49 average, compared with 126 for 1956. Wheat production for the year was estimated at 42,550,000 bushels—nine per cent higher than in 1956. French beans, the late summer area east of Glenn Ferry and north of McCall totaled 2,024,000 sacks, about the same as in 1956. But fall crop production jumped to a new high of 33,600,000 sacks. Dry bean production was set at 23,800,000 bushels, slightly above last year.

Hay yield was about 30 per cent above average and was estimated at 3,255,000 tons, compared with the same as last year's crop. Barley production climbed to a new high of 20,100,000 bushels. The late crop, however, was down for the third consecutive year at 8,210,000 bushels. In the fruit category, peaches and sweet cherry crops were light again during the year with peach production at 21 per cent of the average and sweet cherries at 72 per cent. The department blamed freeze damage for the decline. South cherry, pear and commercial apple yields were all slightly higher than 1956. A 14 per cent decline was noted in onion production, which was set at 570,000 hundredweight.

For the first category, peaches and sweet cherry crops were light again during the year with peach production at 21 per cent of the average and sweet cherries at 72 per cent. The department blamed freeze damage for the decline. South cherry, pear and commercial apple yields were all slightly higher than 1956. A 14 per cent decline was noted in onion production, which was set at 570,000 hundredweight.

# Silhouette Display Wins Christmas Lighting Contest

This simple silhouette display of the three men following the for the display for a Christmas card sent by Dr. Kreilkamp's mother, Mrs. Bernard L. Kreilkamp, 1712 Maplewood drive, was first prize in the Christmas Lighting Contest. Mrs. Kreilkamp got the idea. (Staff photo-engraving)

# AEC Reports Another Red Nuclear Test

WASHINGTON, Dec. 26 (AP)—Russia is set off another nuclear explosion Saturday, the atomic energy commission announced. A brief announcement by the AEC said the Soviet Union is continuing its testing of nuclear weapons. The commission said the explosion occurred Saturday, Dec. 26, at the usual Soviet test site in Siberia. A brief announcement by the AEC said the Soviet Union is continuing its testing of nuclear weapons. The commission said the explosion occurred Saturday, Dec. 26, at the usual Soviet test site in Siberia.

# Gooding's Churches Oppose Liquor Plan

GOODING, Dec. 26—Representatives from six Gooding churches met Saturday and agreed to urge their congregations to register and vote against the liquor by the drink proposal at the Jan. 14 election. Bonding together to make an all-out fight against the sale of liquor by the drink were the Rev. Ted Silva, Assembly of God church; the Rev. Jack Foreman, First Christian church; Bishops Staley Chaney and Veri Dixon, LDS church; the Rev. Paul LaRue, Methodist church; and the Rev. Roy Franklin, Nazarene church.

# Airline Hopes For Non-Stop Plane Flights

BOISE, Dec. 26 (AP)—West Coast airlines said Saturday it hopes to start providing non-stop service between Pacific Northwest ports this summer. Ronald Gentry, president of the airlines, said the "skip stop" authority approved by a civil aeronautics board Friday will permit airlines to make possible if approved by the full board. Gentry said the airlines had ordered six Fairchild 77 turboprop passenger planes to supplement its fleet of 14 DC-3s. The turboprop planes have jet engines geared to propellers. Gentry said the jets would be used in non-stop flights to the "skip stop" procedure is approved by the CAB. The CAB will consider the report of the Federal Aviation Commission for the airlines.

# U. S. Is "Not Weak," Says Aide of Ike

GETTYSBURG, Pa., Dec. 26 (AP)—The United States is not "at this weak" in the current defense situation, a White House spokesman said Saturday. As for the future, President Eisenhower said he has no doubt that the U. S. is in a position of weakness at this time. He was asked to comment on the world reputation from reports that the United States is being led by the U. S. in the defense situation. He said the United States is in a position of weakness at this time. He was asked to comment on the world reputation from reports that the United States is being led by the U. S. in the defense situation.

# Twin Dead After Kidney Operation

BOSTON, Dec. 26 (AP)—Dorothy Huxley, 26, who was recovering from a kidney operation, died Saturday night after a long illness. She was the second person to die after receiving a kidney from her twin sister, who had been operated on for the same condition. The hospital reported that the patient had been in good health since the operation. She was the second person to die after receiving a kidney from her twin sister, who had been operated on for the same condition.

# West, Israel Drive Blast at Parley of Africa, Asia Bloc

(From the wires of Associated Press and UPI) Delegates to the African-Asian conference in Cairo, Egypt, showed resolutions on the West with Israel included as a new target. The Palestinian subcommittee of the non-governmental conference, drafted a resolution assailing Israel as "an American-British-French base" and demanded a concerted effort to get Palestinian refugees returned to their homeland. The draft resolution must be approved by a parent political committee before being voted on by the full conference of 400 delegates from 42 nations and dependent areas.

Another committee, including a representative who came here as an invited observer, was working on a resolution to denounce such a bomb test and foreign military bases. The anti-western line that has been the conference's main theme has been met with a strong reaction from the Arab and Asian delegates. The anti-western line that has been the conference's main theme has been met with a strong reaction from the Arab and Asian delegates.

# Early Start Is Predicted for Atomic Craft

WASHINGTON, Dec. 26 (AP)—The defense department was reported Saturday to be preparing an immediate start on building the first three nuclear-powered submarines specially designed for firing the navy's Polaris intermediate range ballistic missiles (IRBMs). Noting the 14 submarines by Africa and Asia, the defense department said the conference, "You see how divided were the Afro-Asian countries." (Continued on Page 2, Column 1)

# Defense Fund Hike Eyed With No Tax Boosts

WASHINGTON, Dec. 26 (AP)—National security spending could be stepped up to \$4 billion a year by 1960 without a tax increase, but a lower defense budget would be cut by \$1 billion, the House committee on defense reported Saturday. The privately sponsored research body said it advocates neither higher nor lower defense budgets but a steady increase in military spending to \$4 billion a year by 1960. The committee said it advocates neither higher nor lower defense budgets but a steady increase in military spending to \$4 billion a year by 1960.

# 5 Die in Crash

AN ANTONIO, TEX., Dec. 26 (AP)—Five persons were killed Saturday afternoon when a small plane crashed into a field near the town of Antonio, Texas. The plane was carrying five people and was flying at a low altitude when it crashed. The cause of the crash is not yet known.

## Manned Craft In Space Said Possible Soon

WASHINGTON, Dec. 23 (AP)—The president of the Aircraft Industries Association said Saturday this country could put a manned aircraft into space "in less than three years" by spending between 200 and 300 million dollars now.

Writing in the association's publication, *Aircraft Industries*, Dr. C. C. Cook said the aircraft industry has "most of the hardware and all of the basic knowledge needed to send a man into space."

There were trade reports in October that Lockheed Aircraft was working on a reconnaissance type satellite called the Pled Piper and that an unmanned type would be ready by about 1962.

Neither the air force nor Lockheed would comment on this report.

However, the impression has prevailed here that actual work on developing the first unmanned reconnaissance-carrying "Big Brother" satellite has been under way for some time.

In the past, some projects have been started by companies which used their own funds pending agreement on a formal contract. If it is the case in the Pled Piper project, some development work "already may be in existence."

The air force is known to have taken an interest in a surveillance type satellite more than two years ago, long before the launching of Russia's Sputniks gave thrust impetus to the American satellite program.

The Examiner said the Pled Piper would orbit around the earth at from 300 to 1,000 miles, and added: "When the Pled Piper reaches the manned-carrying stage, it is expected to orbit for a month with the big problem that of a safe return to earth."

## Women Voters Campaigning for Sewage Disposal Plant

Looking over one of the warning signs prepared by the Twin Falls League of Women Voters to call the public's attention to the sewage in Rock Creek are, from left, Mrs. Robert Haas and Mrs. Bert Morris. The league hopes to help obtain passage of a bond issue in April to finance a modern sewage disposal plant. League members will post the signs along Rock Creek. (Staff photo-engraving)

## How's That?

LONDON, Dec. 23 (AP)—The eastern electricity board's official magazine today published this letter from a dissatisfied customer:

"The bit what the water comes out of has come out of the bit what the water passes through before passing into the bit that it should come out of, and the result that the water now comes out of the bit that it used to pass through on its way into the part that it should come out of, and the result that the water now comes out of the bit that it should come out of."

## T.F. League of Women Voters Posting Rock Creek to Warn of Contamination

Signs are being posted by members of the Twin Falls League of Women Voters along Rock Creek warning the public that the stream is polluted by raw sewage.

The league hopes to help bring about the passage of a bond issue in April to finance a modern sewage disposal plant here.

Some four or five years ago the league voted to study the problem of the improvement of the sewage facilities of Twin Falls. Presently the eight-member league committee is directing all activities aimed at the erection in the area of a modern sewage disposal plant.

If federal permits about 10 signs will be posted along the creek before the first of the year. Each sign will be equipped with two of the warning posters so that it can be seen from either side. The signs are shellacked for protection against the elements.

Mrs. Ruth Morris, chairman of the committee, says if Twin Falls obtains a new sewage disposal plant, some 75 per cent of the people in the state will then be served by new disposal systems.

"Idaho Falls just approved a new plant," she notes, "and the voters in Pocatello are getting ready to vote. The plant in Idaho Falls will cost \$1,600,000."

It is anticipated that the Twin Falls plant would cost "about a million dollars."

## Orphans Flee Flames in Bus

DENVER, Dec. 23 (AP)—Fire broke out in a chartered bus with 70 children and seven adults aboard last Friday but all fled to safety while scores of spectators looked on.

Lou Kistoff, 37, halted his bus before the city and county building and calmly ordered the passengers out.

He was alerted to the danger minutes before when several of the youngsters, all orphans, cried "fire." The children, from Queen of Heaven orphanage, were being conducted on a tour of Denver's Christmas lighting display. They were escorted by six nuns.

The orphans were persons who themselves were fleeing the city and county building's yule lighting festival.

The bus, owned by the Denver-Boulder Bus company, was heavily damaged. Cause of the fire was not immediately determined.

## Court Grants Two Divorces

BURLEY, Dec. 23—Two divorces were granted this week by Judge Sherman Bellwood.

Mrs. Vada Bailey was divorced from Donald Bailey on charges of extreme cruelty. Mrs. Bailey was awarded household furniture and Bailey received an auto. Each was awarded half of some stock. They were married June 1, 1928, in Burley.

Mrs. Carmen S. Dayley was divorced from Erno A. Dayley on grounds of extreme cruelty. They were married April 16, 1953, at Tangiers, Spanish Morocco. Iloise Anderson testified on behalf of Mrs. Dayley.

A court order restraining Orville J. Kidd, Burley, from molesting his wife, Mrs. Rita M. Kidd, and two minor children was issued by Judge Bellwood pending a divorce action. Mrs. Kidd is asking a divorce on grounds of extreme cruelty. They were married in 1947 by common law.

Roy Beaman, Rupert, was ordered into court to show cause why he has not been complying with a court order Nov. 18 to pay \$50 per month for the support and maintenance of his wife, Mrs. Shirley Beaman, and minor child. After the hearing, Judge Bellwood ruled he owed \$250 but also found that he was not in contempt of court for his failure to comply with the court's order.

## Six TV Channels Assigned in Area

Six channels are assigned throughout Magic Valley by the federal communications commission for television broadcasting, according to the latest commission recapitulation of channel assignments published in the Federal Register and received here Saturday.

Only one of the channels, 11, utilized by KLLX-TV in Twin Falls, is used currently.

The other assigned channels, with their locations, are 15, Burley; 23, Gooding; 17, Jerome; 21, Rupert; and 19, Twin Falls.

Channel assignments also have been made by the commission for Blackfoot, Boise, Caldwell, Pocatello, Idaho Falls, Kellogg, Lewiston, Moscow, Nampa, Payette, Pocatello, Preston, Rexburg, Sandpoint, Wallace and Weiser.

Twenty-eight assignments have been made for Idaho.

## Barrage

MANORHAVEN, N. Y., Dec. 23 (AP)—Firemen had more than a blaze to contend with Friday while battling a house fire.

The heat of the flames sent 100 pounds of rifle and revolver ammunition flying in all directions. No one was hurt.

## Food Dropped

COLOMBO, Ceylon, Dec. 23—British and Ceylonese air force planes dropped food and other emergency supplies today to tens of thousands of starving provincial residents marooned by devastating floods.

The death toll reached 300. More than 300,000 were homeless. At least 50,000 homes have been washed away. Police said the figures probably would rise.

## C. G. Eldredge Is Paid Final Honor

Funeral services were held Saturday at the third ward LDS chapel for Clarence Glen Eldredge with Bishop R. Alan Smith presiding.

Invocation was given by D. Westley Bagley. The eulogy was read by Bishop Smith. Third ward singing Mothers next sang two numbers. Soloist was Val Leavitt. Speakers were Bishop Rex Hall and Clarence Lee. Organist was Mrs. Lloyd Hamilton. Benediction was given by L. A. Hansen.

Flowers were members of the third ward Relief society.

Palldressers were Vern Peterson, Robert Eldredge, Ben Eldredge, Clifton Sharp, Richard Eldredge and Lee Eldredge.

Concluding services were held in Sunset Memorial park where Reverend Hansen dedicated the grave.

## Outcome Is Given In Championship

JEROME, Dec. 23—Winners are announced for club championship play Saturday of the Jerome Duplicate bridge club.

Mrs. H. B. Smith and Mrs. W. H. Bernard were first; Mrs. Robert Weaver and Mrs. J. P. Magill, second; Mrs. H. E. Burgess and Mrs. Paul Thomas, third; Mrs. K. P. Thomas and Mrs. John H. Moore, fourth; Mrs. M. R. Peterson and Mrs. Keith Wickham, fifth, and Mrs. W. O. Miller and Mrs. Warren Kays, sixth.

Christy Macfar, Moscow, was a guest of the club.

The club will resume regular play next week.

## Hillary Group Reaches Area Of No Return

AUKLAND, N. Z., Dec. 23 (AP)—Sir Edmund Hillary's party has reached the point of no return on its overland trek to the south pole. The four-man group is now 210 miles from the bottom of the world.

Hillary's radio message to Scott base, his camp near McMurdo sound, was transmitted here. It said the band of New Zealanders is undergoing some strain at an altitude of 10,000 feet.

But he added that they covered 41 miles during the night, which means the group is keeping up a steady pace. They have averaged from 40 to 50 miles for the past few nights.

Hillary also reported he was about a day's journey from the 200-mile stretch covered by Capt. Robert F. Scott on his ill-fated trek to the pole 46 years ago. The Scott party died on the way back and no one has made it overland to the pole since then.

Reports from another team headed by British Dr. Vivian Fuchs were not so good. Traveling towards the pole from the opposite direction, Fuchs has made only 35 miles since Wednesday and has almost 500 more to go.

## Trial of Man Set In T. F. for Jan. 8

Trial of Ernest Deener, Twin Falls, charged with maintaining unlicensed premises for dispensing liquor, was set for 10 a.m. Jan. 8 after he pleaded not guilty through his attorney, Rayburn and Rayburn, requested a change of venue.

Deener was arrested Nov. 24 by city police after a police raid at his home, 216 Third avenue south. He was later released on \$200 bond. The complaint against him was signed by Police Chief Howard Gillette.

## Lower Water Not Affecting Power Output

BOISE, Dec. 28 (AP) — Below normal stream flows in the Northwest power pool are not affecting Idaho Power company's service to customers, an Idaho Power spokesman said today. The company has been able to fully service its customers and also supply some power to other areas within the Northwest.

He said this was being done through Idaho power production from its own hydroelectric plants and steam power, previously contracted from Utah Power and Light company.

The spokesman followed on the heels of a remark by Marshall Hall, vice president in charge of power supply for Washington Water Power company, that stream flows in the Northwest power pool were "dramatically" below normal and use of steam probably will continue for several days.

Hall said "the power supply problems of the future undoubtedly would be more severe than these now if it weren't for the increasing number of new power plants being made possible by new hydroelectric power facilities working in partnership with one another."

Idaho Power noted that its Brownlee project, scheduled to put 350,000 kilowatts on the line in 1958, "is the only major hydroelectric project that will be completed in time to avert a more critical power situation in the Northwest late next year."

## Foreign Loan May Forestall French Crisis

PARIS, Dec. 28 (AP) — France faces 1958 with inflation, a weak economy and a recession unless a foreign loan can be arranged to prop up a sagging economy.

Finance Minister Pierre Pflimlin is reported seeking a \$400 million dollar loan to help cover the country's material and head off a recession and unemployment.

Half of the loan would come from the European Economic Union (EEU) and half from the international monetary fund.

Pflimlin looks for a change of the present position in Paris of finance minister, but he is not expected to meet to sound out French prospects.

Contacts U. S. He may inform contacts with the United States on an international monetary fund loan, and with Great Britain, West Germany and The Netherlands over the European payment union. These negotiations will probably be carried through in January.

Premier Felix Gaillard's 3-month old government is trying to avert a crisis by securing a loan to put the nation's financial situation in order and to meet the needs of the 1958 budget, which cleared his final parliamentary hurdle in the upper house Friday.

The toughest presented since the war. It includes rigorous economies and increased taxes.

Price Record Named At the same time a three-man board of price directors was named to fix and hold skyrocketing prices as a first step in an all out battle against inflation.

Gaillard has had undeniable success until now. But there were growing signs that the honeymoon was ending. His broad coalition, built on an almost impossible compromise from the start, is threatening to split at the seams over a conflict between his left wing—the Socialists and his right, the Independents and Peasants.

Killing Independents Socialist Leader Guy Mollet along the Independents to fury with a claim that the French rightist was "the most stupid in the world."

Independents, headed by ex-Prime Minister Antoine Pinay, are deeply suspicious of Mollet's reform program, which can only be financed through new taxation.

The conflict may burst into the open soon after the national assembly erupts return from their New Year vacations, mid-January. Then Gaillard faces trouble from his reform bill.

The reform bill makes it harder to throw out a government unless the opposition has a majority ready to take over.

Almost everyone agrees reform is needed to change the system that has given France 24 different governments in 13 years. But no two parties see eye to eye about how it should be done.

## Some Tips for Safer Winter Driving

BE PREPARED FOR WINTER

Winterize your car, your driving technique and your attitude. Accept the fact that normal speeds are often too fast for winter conditions. Whenever weather is bad, slow down.

GET THE FEEL OF THE ROAD

Test road conditions right away. As soon as you start out (but away from other cars or hazards) try your brakes to find out how slippery the road surface is.

MAKE SURE YOU CAN SEE

Don't drive blind. Keep windshield and windows clear. Maintain wiper blades, heater and defroster in proper operating condition. Ventilate to keep inside of windows clear.

TAKE ALONG CHAINS

Check your tires. Whether you use regular or snow tires, keep them in good condition. Use reinforced tire chains for deep or hard-packed snow, ice, and in emergency situations.

DON'T FOLLOW TOO CLOSELY

Following too closely, especially in a hazard, is especially dangerous in winter. Keep well back of the vehicle ahead to give yourself plenty of room for an emergency stop.

PUMP YOUR BRAKES ON ICE

To stop quickly, pump your brakes in a series of stop applications. Jamming on the brakes will lock the wheels and throw the car into an uncontrollable skid. Keep your head.

NATIONAL SAFETY COUNCIL

## Yale Law Students Set Study of Area Traffic Case in Moot Court of Appeal

A Twin Falls county district court traffic case in which final judgment is pending after two and one-half years has been selected for study by Yale university law school students during the spring term of the students' moot court of appeal.

The case chosen is State of Idaho vs. Archie Parish, charged with failure to stop at the scene of an accident. The case stems from a hit and run accident the night of July 10, 1955, on highway 20 east of Murietta. Two Twin Falls, Ind., men were injured critically.

A letter from George D. Newton, Jr., Yale law professor, to Prosecuting Attorney James M. Cunningham requested copies of the case pleadings and a record of appeal.

Newton explained that the case is eligible to graduation from Yale law school, each second term student is required to write a brief and present an oral argument on a recently decided case.

The state vs. Parish case was selected for argument in the Yale moot court of appeals during the 1958 spring term, Newton wrote.

Currently, the case against Parish is under consideration by District Judge Sherman Bellwood.

In February, 1956, the case against Parish was heard by a jury in Twin Falls district court. District Judge Elmer A. Baker presided and the state's case was presented by Cunningham. Defense attorneys James Lowe, Durbin, and James Lowe, Durbin, represented Parish. Lowe is a former district judge for the 11th judicial district court.

Following the three-day trial the jury brought in a verdict of guilty after 12 minutes of deliberation. The prosecution charged that Parish drove his car through a red light and hit and killed two men while they were alongside the highway changing a tire and failed to stop and render aid.

Low maintained his client did not know the accident occurred. Ten months after the trial Judge Baker sentenced Parish to four months in the county jail and fined him \$500. Low immediately served notice of appeal to the state supreme court and Judge Baker granted a stay of execution until the appeal could be prepared.

In March, 1956, Lowe filed his appeal with the state supreme court. The case remained before the state trial court for 14 months before a ruling was made.

On May 3, 1957, in a 4 to 1 decision the supreme court set aside the district court judgment on the grounds the information filed against Parish "failed to charge him with knowledge on his part as an essential element of the offense and was factually defective inasmuch as it failed to state facts sufficient to constitute a public offense."

However, the lone dissenter, Justice C. J. Taylor, wrote "Even without repeated legislative admonition the state is not bound to state facts sufficient to constitute a public offense."

the courts should determine cases upon their merits rather than upon technicalities.

Upon receipt of the supreme court's decision Cunningham immediately filed an amended information and the trial was reset for the 1957 winter term of district court.

Judge Baker, a Yale law school graduate, withdrew as presiding judge because he had sat at the 1956 trial. Judge Bellwood was then called after 12 minutes of deliberation.

However, before the case could come before the court for retrial, the law school students of the Twin Falls area appeared for Parish and entered a plea of guilty. Judge Bellwood took the case under advisement.

Saturday, Cunningham said he did not know when Judge Bellwood would rule on the case for retrial, but he planned to send copies of the pleadings and record of appeal to the law school.

LDS Chief Places 'God Before Arms' GARDEN GROVE, Calif. Dec. 28 (AP) — The head of the Mormon church Saturday placed faith in God ahead of the use of arms of a nation.

David O. McKay, president of the LDS church, said he had no fear for the future of the United States as long as it serves God.

"Any nation that denies God, that breaks up the home, that robs men of their freedom, will sooner or later fall," he said.

The 84-year-old church leader came here from Salt Lake City to attend ground-breaking ceremonies for a \$100,000 church in the Garden Grove second ward.

Elder Preston Nibley, Salt Lake City, also spoke at the proceedings.

5 Hunters Drown LOUISIANA, Mo. Dec. 28 (AP) — Five young duck hunters whose small motorboat capsized in the treacherous Mississippi river Friday have been given up for dead.

No bodies had been found when rough water forced authorities to call off a search Friday night on Saturday. But the choppy water had yielded articles of clothing and two shotguns identified as the property of the young men.

Robert Bosworth Passes at Burley BURELY, Dec. 28—Robert Lawton Bosworth, 55, died Saturday morning at the Cottage hospital of complications following heart trouble.

He was born March 18, 1902, at Preston. He married Mary N. Bosworth in 1921, at Offit, La. They moved to Washington state, then to Rupert, and later to Burley. Since 1954 he has been operating the Bosworth motel in Burley.

Bosworth's widow, Mr. Bosworth is survived by his father, Robert Bosworth, Preston; one daughter, Mrs. Robert Bosworth, Burley; one son, Merrill L. Bosworth, Vancouver, and two brothers, Arlie Bosworth, Idaho, and Donald Bosworth, Layton, Utah, and two sisters, Mrs. Kenneth Anderson, Rupert, and Mrs. Woodrow Mendelhall, Hazelton.

Burials are pending at the McCulloch funeral home.

WOMAN DIES IN CRASH LETHBRIDGE, Alta. Dec. 28 (AP) — One woman was killed and another injured in a car accident today on a rural road near here.

## Acrimonious, Long and Busy Session Is Predicted for U.S. 85th Congress

WASHINGTON, Dec. 28 (AP) — The 85th Congress returns Jan. 7 for what is shaping up as a long, busy and probably acrimonious election-year session.

Its leaders expect it to work until mid-July or later, with a few recesses and a prolonged adjournment breaking the continuity.

For most legislators the July adjournment target is a must, for in the November elections all 435 House seats and 32 Senate seats will be filled and the candidates want lots of time for campaigning.

In adjustment time much legislation will be done in the last few days of the session. The new defense budget is expected to run some billions of dollars above last year's figure. Congress has enacted the first bill in 10 years to increase the federal aid for education in the field of social and mathematics.

All this will cost money and will be a difficult job for the House to do. It is difficult to get over-allocated appropriations. This year the House has passed a bill for \$4,000,000,000 from the amount requested by President Eisenhower. Use of previously appropriated funds brought the total estimated budget for this year to \$10 billion.

There is little probability for a big cut in spending requests during the coming session, particularly in the light of growing pressure for pay raises for government employees.

All this standing is hopes for a last reduction, a small victory, accomplishment as far as most congressmen are concerned. Indeed, congress may increase pay raises to feel the bill for any extended social security programs.

It also may have to boost the national debt ceiling, a harrowing prospect for election year.

Developing rapidly as one of the hottest issues of the session is the proposed land agreements act, which permits land cessions to foreign nations in return for other concessions from them.

Expanding rapidly as one of the hottest issues of the session is the proposed land agreements act, which permits land cessions to foreign nations in return for other concessions from them.

## Tot Imitates TV Show, Uses Gun To Slay Brother

PITTSBURGH, Calif. Dec. 28 (AP) — A 4-year-old boy killed his 3-year-old brother today with a .32 caliber revolver while imitating action on television.

Charles Silkkwood, Jr., was shot through the back and breast while watching a western movie. Mrs. Gladys Silkkwood, his mother, who was laughing at her 4-year-old son's imitation of the tragedy when her 3-year-old daughter yelled, "Charley is killing his brother,"

Then James, the 4-year-old, came into the yard and pleaded, "Mummy, don't spank me." Police said that after watching the show for awhile, James had taken the revolver from a bureau drawer where it had been left for his mother's protection by his father, a seaman now in Japan, loaded the weapon, and fired the fatal shot.

Doctor Named BOISE, Dec. 28 (AP) — Dr. Frank Jacobson, Columbus, O., will become the first psychologist to head the community service section of the state division of mental health, the division director, Dr. John Butler, said Friday.

Butler said the appointment fills the position for the first time since the post was created in 1953. Jacobson will arrive here the first of the year from his present post as director of training and research at Columbus State hospital.

Pick Hospital Aide OROFINO, Dec. 28 (AP) — Lefroy Williams, 30, will become business administrator of state hospital north of Boise. Dr. J. A. Myrick, W. Pullen, Jr., superintendent, said Friday. Williams will replace Gordon Wilson, 32, who has resigned to become senior administrative consultant with the Washington state health department at Seattle.

## Nixon Asserts U.S. Need Not Fear for 1958

MIAMI, Fla., Dec. 23 (AP)—Vice President Richard M. Nixon said Saturday he can "see no reason to approach the new year with fear."

At the same time, he warned the American people they must expect increased sacrifices.

"We must remember that much as we like lower taxes and higher living standards, it won't make any difference if we are not here to enjoy them," he said.

In a rare interview while vacationing in Miami, Nixon declared a tax cut is unlikely and added:

"It would be unwise when it is most important to maintain adequate military defenses. We cannot be thinking of reducing our income when we have our allies and problems in the defense field."

"The United States must maintain a basic striking power. Whether it is in the missile or long-range bomber force, that will be left to our military experts."

"Until we have the mobile capability to do what the strategic air command can do now, we have to build and maintain the strategic command. We must continue to put maximum effort into both."

"Although the Soviet Union in some areas is ahead of us, they are still building long-range bombers on a large scale."

"We must see to it that our overall superiority is maintained. It's going to cost money. We must make a 'hard headed' choice within the department as to how the money can best be spent."

## Holiday Visitors Told in Heyburn

HEYBURN, Dec. 23—A family gathering was held at the home of Mr. and Mrs. William Christensen Christmas eve. Guests included their daughter, Gladys Christensen, who recently returned from an LDS mission to the western states; their sons, Darwin Christensen, who attends BYU Provo, Marvin Christensen, Pocatello, and Mr. and Mrs. Forest Zemke, Burley.

Mr. and Mrs. Ned Warner are visiting Mr. and Mrs. Marian Warner and other relatives. Warner is in the machine and is stationed at Camp Pendleton, Calif.

Sharon Hayden, who is employed at Yakima, Wash., is visiting her parents, Mr. and Mrs. Kenneth Hayden.

Wally Ross left Thursday on a business trip to Scottsbluff, Neb., and Denver.

## August E. Berlin Paid Last Honors

RUPERT, Dec. 23—Funeral services for August E. Berlin were held at 2 p.m. Friday at the Goodman mortuary.

Speed Wall gave the invocation and Dean Wilcox the eulogy. Burial was in the cemetery and Carl Osterhout gave the benediction.

Lucille Darrington and Julia Darrington sang several duets accompanied by Mrs. Edna Wardle.

Palbearers were Elmon Kidd, Robert Adams, Roe Quamston, Herb Smith, Eddie Woolstenhulm and Ray Doman.

Flowers were cared for by Margaret Quamston, Linda Quamston, Wendy Wall, LaStella Wall, Luella Wall and Jane Kidd.

Concluding rites were held in the Rupert cemetery where Alfred Woolstenhulm dedicated the grave.

King Hill Notes  
Holiday Visitors

KING HILL, Dec. 23—Dina Datsela, Logan, Utah, is visiting her parents, Mr. and Mrs. William Cain.

Arthur Greer left Thursday for Davis, Calif., to visit his brother and sister-in-law. Mr. and Mrs. Frank Greer, and other relatives.

Mrs. Harold Anderson and children, Las Vegas, Nev., arrived Thursday to visit her parents, Mr. and Mrs. Terrell Foster.

Mr. and Mrs. James Gerke and children are guests of her parents, Mr. and Mrs. Clifford Blittick, Parma.

Mr. and Mrs. Robert Mackland and children spent the Christmas holidays with Mrs. Mackland's parents, Mr. and Mrs. Paul Fieger, Parma.

## Five Not Hurt In Auto Crash

Five persons escaped serious injury at 10:30 p.m. Friday in a head-on collision 150 yards east of the city limits on highway 30.

A 1957 Pontiac driven by A. E. Ruston, 27, Heyburn, Calif., spun on slick pavement from behind a Trailways bus and crashed head-on into a 1949 Ford driven by Robert T. Wright, 37, route 1, Hansen. Sheriff James H. Benham says Wright pulled to the right side of the road in an effort to avoid the crash.

Date Crawford and Don Billingsley, both California and passengers in Ruston's car, incurred minor injuries. Benham says the Pontiac was going west behind the bus when it changed gears to slow down and the Pontiac spun sideways and into the path of Wright's car. Damage to the front end of the Pontiac was estimated at \$400 and to the Ford at \$200.

## Talk Featured at Granger Meeting

Members of Knoll Community Grange 351 heard a talk by Richard Deam Friday night at the regular Grange meeting. Deam is born on Christmas eve from the West Point Military academy.

Herman Carrel, overseas, served as master at the meeting in the absence of Master Kenneth Park.

Reports were made to members that five of the Grange's members took 17 dozen cookies and tea and coffee to the Horton's Nursing home on Dec. 17. Members also were told that the Knoll Grange furnished Christmas dinner for the Bart Johnson family. Curry, Mr. Dotson was killed in an automobile accident Dec. 24.

Refreshments for the Friday night meeting were furnished by Mr. and Mrs. Warren Williams.

## Services Are Held For Jesse R. Ellis

RUPERT, Dec. 23—Funeral services for Jesse R. Ellis were held at 2 p.m. Saturday at the Goodman mortuary chapel.

Mrs. Ada Lindauer was Christian Science reader. Mrs. Ward Woolford was organist and accompanied Mrs. Charles Balch, who sang several numbers.

Palbearers were Webb Baffell, Spencer Parker, Dean Beay, J. F. Craven, Ed Miller and E. W. Craven.

Flowers were cared for by Lena Baffell, Rose Craven, Lois Miller and Dorothy Hollenbeck.

Concluding rites were held in the Rupert cemetery.

**Divorces Are  
Granted Four  
In T. F. Court**

Four divorce decrees were granted Friday in Twin Falls district court by Judge Hugh A. Baker. Mrs. Lois J. Wiley was granted a divorce from Ferris E. Wiley and her former name of Lois J. Sebold was restored. She was awarded household furnishings and he received a 1950 Mercury. They were married June 23, 1956, in Twin Falls. She was represented by Attorney J. Dean Mosher. A divorce was granted Mrs. Ellen D. Bernbach, Dole, from Lawrence O. L. Bernbach. She was awarded a 1953 Studebaker and household goods. A previous property agreement covering real property was approved by the court. They were married May 29, 1943, in St. Paul, Minn. She was represented by Attorney John Hepworth, Buhl. Mrs. Bernice Brandes was awarded a divorce from James E. Brandes. Her former name of Bernice O. Brandes was restored and a property settlement approved by the court. They were married in January, 1957, in Twin Falls. She was represented by Attorney J. Dean Mosher. A divorce decree was awarded Mrs. Theresa Jean Jayne from Fred D. Jayne and she was given custody of six minor children. He was ordered to pay \$100 monthly child support. She was represented by Kramer and Walker.

**College Students  
Enjoy Vacations**

HANSEN, Dec. 28—Students home for the holidays from the University of Idaho, Moscow, include Deney Naylor, Ivan Crockett, Clark Dedlow, Glen Walker, Mr. and Mrs. Leonard Daw, Joe McFarland, Larry McFarland, Glen Ross, Ronald Hollman, Kenneth Thayer, Arlene Frahm and Dean Moore. Edward Quito, Zequador, also a university student, is the guest of Dean Moore. Mrs. Fern Prior, Boise, is visiting her daughter, Mrs. Kenneth Daw, and family. Mr. and Mrs. Frank Wright visited their son, Eugene Wright, and family, at Boise, on Christmas. Eugene and his family brought the Frank Wrights back and are visiting them and Mrs. Wright's sister, Mrs. Kenneth Daw. Mrs. O. D. Simpson, of Pittsburgh, Kan., is visiting her son, Ora Simpson, and family. Simpson went to Kansas to accompany his mother here.

**Events Related**

PAUL, Dec. 28—Byron Broeder returned to Opa on Friday after his Christmas with his parents, the Rev. and Mrs. John Broeder. Mr. and Mrs. W. W. Dawson are spending a few weeks at Los Angeles as guests of their daughter and her family.

**HAROLD D. COOK  
ESTATE PLANNING**

In these days of high inheritance and estate taxes it is particularly important that you plan now to help assure that your estate will pass intact to your heirs. Too many of us are unaware even of the exact value and extent of our estate, whether it be property, partnership in a business or investment. One's estate should be reviewed periodically and measures taken to preserve it in the event of death. The best way to do this is through a properly planned life insurance program. Why not call me and talk it over? No obligation, of course.

**Serviceman Visits  
Relatives at Paul**

PAUL, Dec. 28—Lieut. and Mrs. Jack Baker and their son, Steve, left Friday for El Centro, Calif., where he will be stationed at a test air force base, after spending the past two weeks as guests of Mr. and Mrs. Roy Marquess, parents of Mrs. Baker, and with his parents in Nampa. The family just returned from Japan, where Lieutenant Baker has been stationed for the past three years. Their son was born in Japan. Thursday guests at the Marquess home also included Mary Marquess, Twin Falls, and Mrs. Floyd Nobson and son, Monte Hobson.

**Last Service Held  
For E. Barksdale**

RUPERT, Dec. 28—Funeral services for Elmo Barksdale were held at 10 a.m. Saturday at the Rupert Methodist church with the Rev. Wendell Cox officiating. Barksdale was sung by Lamar McCloy and Joan Bateman accompanied by Sharon Turner. Pallbearers were Paul Bateman, Clyde Ross, Clarence Swanson, Al Hula, Louis Swanson and Ben Rogers. Flowers were cared for by Mrs. Al Hula, Mrs. Ben Rogers, Mrs. Paul Bateman, Mrs. Larry Freeman, Mrs. Fred Sherman and Mrs. O'Dell McCloy. Concluding rites were held in the Rupert cemetery under the direction of the Goodman mortuary.

**Church to Slate  
Watch Services**

PAUL, Dec. 28—A watch service is being planned from 9 p.m. until midnight New Year's eve at the First Baptist church. The church program was held Tuesday evening before a capacity crowd. The Sunday school presented a program of songs, recitations and plays. A play, "An Old Fashioned Christmas," directed by Mrs. Henry Beckett, was given by the intermediate classes. The junior classes presented "Waiting the Gift Box," directed by Mrs. John Broeder. Treats were given to the children at the close of the program.

**Student Chosen**

CASTLEFORD, Dec. 28—John Heidel, son of Mr. and Mrs. Earl Heidel, is a member of a 17-student delegation from Williams university at Salem, Ore., which is attending the sixth quadrennial national assembly of Methodist youth at Lawrence, Kan. The assembly will be devoted largely to leadership training for 3,000 Methodist youth from every state in addition to 200 foreign students.

# Federal Fund Project Listed In School Aid

WASHINGTON, Dec. 18 (AP)—The  
administration reported today  
to Congress a program of  
matching grants to states to en-  
courage improved teaching of sci-  
ence and mathematics in the high  
schools.  
The plan calls for the federal  
government to provide more than  
100 million dollars to help the states  
supplement salaries of science and  
math teachers, employ additional  
teachers, purchase equipment and  
strengthen science education de-  
partments.  
Other proposals  
Other proposals also are being  
prepared to help meet the demand  
for more emphasis on scientific and  
technical training in the nation's  
schools and colleges. The demand  
has been growing since Russia's  
launching of two earth satellites  
embarked on an increasing Russian  
technical capability.  
The program, to be administered  
by the department of health, educa-  
tion and welfare, would be patterned  
after the present federal aid  
vocational education program.  
That department also would be  
authorized to set up a federal schol-  
arship program in the specialized  
graduate schools, help the states  
provide more and better training  
and counseling of high school stu-  
dents, and promote the teaching of  
foreign languages.  
Fellowship Scholarships  
College scholarships, to cost right  
to 10 million dollars the first year,  
would be provided for talented high  
school students who could not other-  
wise go to college. Fellowships also  
would be provided in graduate  
schools.  
In a related effort, more than 50  
million dollars a year would be pro-  
vided in the specialized training  
for expansion of its present effort  
to expand teaching of science and  
math at all levels.  
Most of that money would go for  
updating science textbooks, provid-  
ing more scholarships and conduct-  
ing seminars and institutes for  
teachers on these fields.  
While plans went forward for a  
program in the specialized training,  
the office of education reported a  
record enrollment in colleges and  
universities this fall.  
The office reported a preliminary  
total of 3,068,000 students en-  
rolled in 1953 institutions, a gain  
of 4.1 per cent over the 2,947,000 listed  
at the end of the 1952. The total by  
the end of this school year is expected  
to reach 3,460,000, the report said.  
The announced total is 45 per  
cent above that for the fall of 1951.

# All Eyes on Crosby

Bing Crosby and his wife of a few weeks, the former Kathy Grant, are the center of attention as they arrive at a Hollywood theater for the premiere of "The Bridge on the River Kwai." It was the newlyweds' first appearance at a Hollywood function since their surprise wedding in Las Vegas last October. (AP wirephoto)

# County Board Asked to Pick Date for Vote

RUPERT, Dec. 18.—Date for a  
special bond election for \$500,000 to  
construct a new hospital in Minidoka  
county is expected to be set on  
Jan. 12 at the regular meeting of  
the county commissioners.  
In the meantime the hospital  
planning committee will hear re-  
ports of a nominating committee on  
Jan. 2 to select a new chairman fol-  
lowing the resignation of Ed Ken-  
nedy. Thursday night, Rensmeyer  
said although his business interests  
are in Minidoka county, his home  
is located in Cassia county. Rens-  
meyer is a public accountant with  
offices in Rupert.  
The hospital board will vote on a  
new chairman on Jan. 9.  
Rensmeyer reported that suffi-  
cient names had been obtained for  
the petition for a bond election. He  
also stated that the board would  
ask the commissioners to call a spe-  
cial meeting before Jan. 13 to con-  
vance the names.  
A pulling that husbands or wives  
could not sign for each other can-  
didates for a bond election. He  
also stated that the board would  
ask the commissioners to call a spe-  
cial meeting before Jan. 13 to con-  
vance the names.  
The hospital board will vote on a  
new chairman on Jan. 9.  
Rensmeyer reported that suffi-  
cient names had been obtained for  
the petition for a bond election. He  
also stated that the board would  
ask the commissioners to call a spe-  
cial meeting before Jan. 13 to con-  
vance the names.

# Beck Counsel Hits Foreman Of Jury Panel

SEATTLE, Dec. 18 (AP)—Attorney  
for David Beck, president of the I.W.O.  
Teamsters union, have submitted a  
motion in court which accuses  
foreman of the jury which convicted  
Beck on a grand larceny charge of  
stealing before the trial "they can-  
not know the facts at Beck."  
The foreman denies making the  
statement.  
The affidavit was sworn to by  
Robert Paulson, of nearby Edmonds,  
who said in his signed affidavit that  
Charles Hickling, a Bellevue  
harpist and trial and assistant,  
made the statement in October.  
Beck went on trial Dec. 2 on  
charges he misappropriated \$25,000  
from the sale of a union-owned  
automobile. He was found guilty  
Burdell gave immediate notice he  
would seek a new trial.  
In his affidavit, Paulson said  
Hickling's alleged statement was  
made during a conversation they  
had while they were negotiating at  
Edmonds and while both were wait-  
ing at an Everett airport plane.

# Two Drowned Maracaibo, Venezuela

Two persons drowned, 18 in-  
juries and 22 were injured in a  
sinking Friday of an oil company

# Stock Market Has Rally for 'Yule' Present

NEW YORK, Dec. 28 (U. S. P.)—The Christmas season brought a gift of stock market rally to the nation's investors. The Associated Press average of 30 stocks rose \$1.00 to 123.63. There was nothing to do but to buy. The market was buoyant and the price of stocks was generally higher. In fact, it was a sturdy gift and it was judiciously received.

Gift of a traditional year end rally has been plentiful this month, but by the time the New Year comes, the market will be in a different mood. The market rally was in December, but it was not a sure thing. The market rally was in December, but it was not a sure thing. The market rally was in December, but it was not a sure thing.

# Hostess Notes Favorite Dip Recipe

Mrs. Robert V. Shaw, 253 Eighth avenue north, is looking for new ideas to supplement her favorite cocktail dip recipe for winter entertaining. The dip which Mrs. Shaw also uses for informal entertaining and television snacking for her husband, Mr. Shaw, a daughter, Susan, and sons, Larry and Jim, is made with one-fourth pound beef cheese, three packages cream cheese, juice of one lemon, juice of one onion, one teaspoon Worcestershire sauce and one-half cup coarse bread crumbs. The cheese are crumbled together, adding enough cream for a soft mix, the other ingredients added and chilled. (Staff photo-courtesy)

## Appetizer Ideas Here May Supplement Your Favorite

The annual season of increased party-going and much home entertaining is just reaching its peak with the winter entertaining season just beginning and New Year's in the offing with wet winters dropping in. The perfect hostess will always have an assortment of appetizers on hand to serve her guests.

Here are a number of appetizers that are mostly a matter of judgment, taste and most hostesses have their own favorite recipe and collection of appetizers to make an attractive tray.

With the commercial assortment of crackers, cheeses, variety meats and spreads available now on the markets it is a much easier task for today's hostess to prepare an unusual assortment of appetizers.

The many soft cheese spreads on the markets are a life-saver to busy homemakers and for extra flavor

and to be a bit different, add a tablespoon or two of sherry or port wine to any of these preparations.

For ripe olive - anami cubes use three slices large anami, one three-ounce package cream cheese, mayonnaise to moisten and three tablespoons chopped ripe olives and salt. Remove rind from anami. Blend together remaining ingredients. Chill thoroughly. Cut into cubes with sharp knife and serve on plates.

Burning hash is made of beef chopped very fine; an eight-ounce package of cream cheese cut into 25 cubes and rolled into a ball. Toss each ball in the chopped beef until evenly coated. Put cocktail pick or toothpick through each ball and stick onto a grapefruit or a large red apple.

Among the most tempting hors d'oeuvres are those made with mushrooms. They take a little time to prepare, but if the bulk of the work is done in advance, their serving is no problem at all. For all recipes in which mushroom caps are used, carefully wash mushrooms, remove stems. Place on absorbent paper to drain, rounded side up, then dip each cap in lemon juice or salad oil.

Here are some suggestions which require little effort. Fill mushroom caps with any canned shrimp; dot with butter, lemon juice and broil slowly. Fill caps with cut rounds of frankfurter or cubes of salami; sprinkle with salt, pepper; place one teaspoon ketchup or chili sauce on top. Broil slowly. Season mushroom caps with salt, pepper. Broil slowly until tender. Remove from broiler; spoon any type of prepared cheese spread or dip into cap. Return to broiler for a few minutes. They are good and pretty too.

For scallop and capers, use one pound sea scallops, fresh or frozen, three-fourth cup chicken broth, three-fourth cup tomato juice, few drops of Worcestershire sauce, one-half teaspoon Worcestershire sauce, one envelope unflavored gelatin, and one-fourth cup cold water.

Defrost scallops, if frozen; cover with boiling water; simmer seven to 10 minutes or until done; cool, then drain. Cut each scallop in halves; threads depending on size, to make about 24 half-inch chunks. Combine

# State Leaders of FFA Meet in T. F.

Being welcomed to Twin Falls for a meeting of the statewide Future Farmers of America organization's executive committee is Clifford Eldred, Fruitland, state FFA president, right. At left is James Hansen, Twin Falls, president of the south Magic Valley district FFA group. Officials from all over Idaho met here Thursday and Friday to make arrangements for their state convention scheduled March 27-29 in Boise. (Staff photo-engraving)

## Highway Survey Interviewers Start Winter Study on Trucks

**SIOGHONE, Dec. 22**—Interviewers for the Idaho motor vehicle survey, employed by the Idaho state highway department, are in the Magic Valley area for the fourth three-or-winter-survey season. Period of the survey, according to the district highway office here.

They will be conducting home interviews and interviewing registered owners of sample trucks generally in Buhl and in Jerome county, but there will be scattered interviews in Camas, Oodling, Lincoln and Twin Falls counties during the next two weeks.

Data obtained are essential in the long-range construction program required under the expanded highway program contemplated by federal highway legislation enacted in 1955.

One of the major objectives is to determine the extent of annual motor vehicle travel and its distribution among the various classes of roads and streets in the state. Travel characteristics also will be determined for various types of vehicles.

The survey is being conducted throughout Idaho by the state department of highways in cooperation with the U. S. bureau of public roads and is similar to surveys being made in other states.

All information will be considered confidential. None of it will be used for purposes of taxation, investigation or regulation.

The motor vehicle survey is designed to obtain estimates of average annual and total annual travel of automobiles and privately-owned trucks classified according to population groups of residence of vehicle owners, occupation and industry classifications of owners, road systems used, places of travel, purpose of travel, distribution of trips classified according to trip length, nature and amounts of commodities transported in privately-owned trucks; rates of fuel consumption of vehicles classified by type and age groups; age and weight distribution of vehicles classified by population groups and occupations and industries.

## Final Rites Held For Mrs. Pollard

**BURLEY, Dec. 22**—Funeral services for Mrs. Betty Lou Jackson Pollard who was killed Dec. 21 in a car accident in Nevada were held at 2 p.m. Friday at the Joseph Payne Memorial chapel with the Rev. Kenneth Deall of the Presbyterian church officiating.

John Wolf and Dorothy Cox sang, accompanied by Jane Rue. Pallbearers were Lloyd Cox, Jess Anderson, Floyd Clevenger, Clifford, Dick Arbogast and Ted Arbogast.

Flowers were carried by Lucile Anderson, Esther Arbogast, Patricia Arbogast, Nancy Howard, Ina Reese, Anna Grace and Virginia Hawks. Concluding rites were held at the Pleasant View cemetery.

## Two Men Facing Burglary Count

**ERIN HUSTAR, 21, Everett, Wash., and Tony Lopez, 27, San Antonio, Tex., charged with first degree burglary, waived preliminary hearing Saturday in Twin Falls justice court and were ordered to stand trial in district court. Both were held in the county jail on failure to post \$500 bond.**

The men are charged with committing burglary in the nighttime at Perrine Pharmacy, 105 Main avenue west. The complaint says they entered the pharmacy about 7:30 p.m. Thursday and while one of the men held a clerk's attention the other took a television set, light and music box valued at \$525.

Police Chief Howard Gillette Saturday said the men later tried to sell the light and box for \$3. The complaint says they "willfully, knowingly, feloniously and burglariously entered in the nighttime with the intent to commit the crime of burglary."

**LAWYER FORECAST.** FREETPORT, Tex. Dec. 22 (U. S. A. P. Reuter, general manager of the Texas division of Dow Chemical company, said Friday about 800 workers would be laid off in production cutbacks next year.

## Tales of Lighter Side of Life Spice News Stories for 1957

**NEW YORK, Dec. 20**—The biggest little stories of the year (sorted and classified for history's long run):

**GENIUS**  
In January, in Knoxville, Tenn., the FBI had to stop in and capture escaped convict Robert Huxley. He had made good his escape from a state prison by pouring disinfectant on his feet. The bloodhounds turned up their noses at his trail and walked off the job.

**MODERNITY**  
In February, in Los Angeles, Jerry A. Prod, 19, was arrested for shaving—while driving. The cop said Prod was hurrying to work trying to steer his car while using an electric razor.

**FORTITUDE**  
In March, in Erie-Comte-Robert France, Auguste Burble was a bel of a bottle of champagne by gulping more than four gallons of foam in the clams in less than an hour. Then he drank the champagne.

**NAIL GALS**  
In April, in Memphis, Tenn., a letter to a penal farm inmate was returned in the postoffice stamped "escaped." The postoffice returned it to the sender stamped: "Moved! Left no forwarding address."

**OUTRAGEOUS FORTUNE**  
In September, in Pacima, Calif., Virginia Schen, 34—who six months earlier had been rescued by the fire department when her hands got caught in a non-functioning garage machine—did it again. Barefoot, she tried to kick shut the refrigerator door, got her big toe caught in the hole left by a removed broken handle, got rescued by the same F. D.

**INVENTION**  
In June, in Brawley, Calif., farmer W. J. Pifford reported that a helicopter landed in his watermelon patch, the pilot jumped out, grabbed three melons, jumped back in, took off.

**MEDICINE**  
In July, in Tokyo, doctors pondered the case of the woman who was allergic to her husband. A top dermatologist flown from the U. S. to investigate the case reported only: "Whenever her husband would come near her she would break out in a rash similar to poison ivy."

**DOMESTICITY**  
In May, in Los Angeles, Mrs. Robert Biggs got a divorce on the ground that she was lonely. Her husband owned a burlesque theater.

**PHILOSOPHY**  
In October, in San Diego, bartender Pat Freeman unveiled a "putnik cocktail" designed for misanthropes working at nearby missile plants. Ingredients: Vodka and the juice of sour grapes.

**THE MILITARY**  
Again October, in London, it was disclosed in parliament that British has an enormous military stockpile—of "pants, woolen, long" for the surplus women's long underwear to last the corps 80 years.

**IDENTIFICATION**  
In November, in St. Paul, Minn., a son was born to Mr. and Mrs. Samuel Watkins and named Sputnik Elzenhower Watkins.

## Warren's Son Weds

Chief Justice Earl Warren, left, congratulates his youngest son, Robert, 22, after his marriage at Sacramento, Calif. Center are Mrs. Earl Warren and the bride, Carolyn June Macklin, 19, daughter of Mr. and Mrs. W. F. Macklin of Davis, Calif. (AP wirephoto)

## Unknown

**WAUSAU, Wis., Dec. 22**—No one at the Wausau police is talking about the Christmas card, addressed simply to "Mr. Jones," which was returned to sender marked "address unknown."

Neil Jones, the only person by that name in this city of 4,000, is a postmaster of Wausau.

## Holiday Visitors Told at Richfield

**RICHFIELD, Dec. 22**—Mrs. Weldon Folwell, Boise, and Mrs. Burns, Dumas, Tex., visited Mrs. and Mrs. Glen Hederich and family on Christmas.

Kay Hederich returned to Richfield, Calif., Friday with her mother, Ben Hederich, and other relatives accompanying her to where she left by plane.

Winnie Dwyer, Burlingame, arrived Christmas day to visit her parents, Mr. and Mrs. Clifford Dwyer, and family.

Many cases of measles are reported in the Richfield community. Ronald and Lloyd Fay Shultz turned Friday from Pocatello where they spent the Christmas vacation with relatives.

## COUPLE VISITS

**PAUL, Dec. 22**—Mr. and Mrs. Ed Sampe and daughter, Mrs. Sampe, visited Thursday with the Sampes, Mr. and Mrs. Arnold Sampe.

BUTTERICK AND SIMPLICITY PATTERNS. COMPLETE STOCK OF SEWING NOTIONS.

## COTTON SATINS

Soft satins in lovely, subtle patterns. Washable colors with crease-resistant finish. Controlled shrinkage. 36 inches wide.

**98c yd.**

## Ribolene Everglaze

Beautiful new patterns and colors with leno-type stripe. Crease-resistant finish in washable colors. 36-inch width.

**98c yd.**

## KORONET PRINTS

Soft, silky acetate and nylon prints in new spring patterns and shades. Crease-resistant finish that is washable. 45-inch width.

**1.98 yd.**

## Dynasty Prints

Rayon and silk in a new blended fabric with lovely new patterns. Crease-resistant finish. Washable ... 42-inch width.

**98c yd.**

## Rayon and Silk Linen Type Weave 1.49 yd.

## CUPIONI PLAINS

A shantung-type weave of combed cotton and cupioni benders in dark and pastel shades. Crease-resistant finish, washable. 38-inch width.

**98c yd.**

## GALWAY PLAINS

A linen-type weave of rayon in bright, new spring colors. Crease-resistant finish and completely machine washable. 45-inch width in dark and pastel.

**79c yd.**

## Filer Youth, 17, Proud of Collection Of Indian Arrowheads, Other Items

An Indian artifact collection with mile east of Filer near highway 30-head choppers, arrow warblers, a Bonnichsen, who spends most of his spare time hunting for additions to the collection.

Outstanding recognition of his achievements in artifacts collecting was his selection by the University of Idaho for an anthropological expedition to South Dakota where the group uncovered Indian mounds of three old Indian cultures.

As the Filer youth explains it, he was chosen for the expedition through the efforts of one of his friends, Gary Batey, who attended the University of Idaho last year and studied geology. Batey planned to be a member of the expedition and discovered the crew was one man short. He persuaded Dr. Alfred Bowers, who headed the crew, to take Bonnichsen along to complete the five-man crew.

After hearing of Robson's work in artifacts, Dr. Bowers consented to take him. "And it's a good thing, too," Mrs. Bonnichsen said. "Robson found one of the first of 26 Indian artifacts found in the excavations." He uncovered six more later.

Besides the Indian skeletons, Robson found other valuable things. Most of the discoveries were taken to the University of Idaho where they will be used in an Indian museum, Robson said. However, Robson kept some.

Among the artifacts kept by Robson is a buffalo head from a buffalo skeleton believed to be 200 years old. It was found in the bottom of an Indian cache.

"Probably the way the buffalo got there," Robson explained, "was that the cache was left open when it was abandoned by the Indians. The buffalo apparently fell into the cache and could not get out." Later, Robson said, "the Indians returned and found the buffalo in the cache, killed it out and took the meat, then covered it with sand."

The work in South Dakota, was centered near Mobridge in the northern part of the state where three Indian settlements were known to have existed.

It was into one of these settlements that the University of Idaho crew went to work. Their job was to uncover mounds made by the Indians.

"Three cultures of Indians were believed to have existed there," the first culture uncovered was called the Grand culture. The second, the Archaic and the third, the Heart River culture. The three cultures, one atop the other, covered a period of about 200 years, according to Robson.

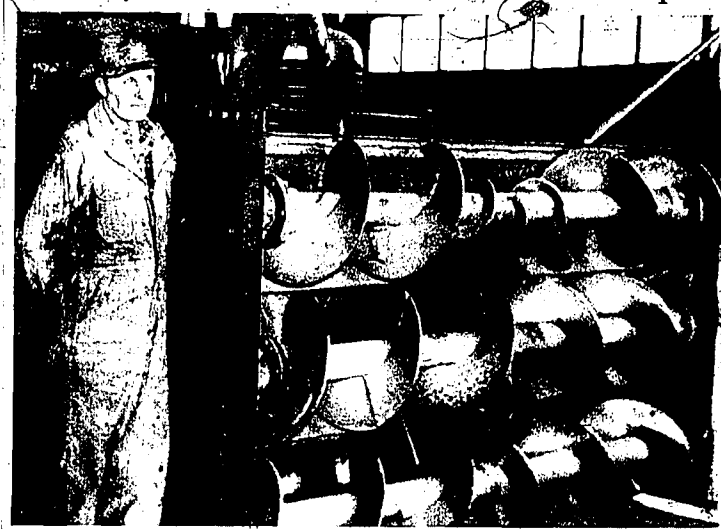

In the excavations were found many bones, pottery and shells. Most important were 26 skeletons. All were either females or children, Robson said. The men were buried on the plains.

In one of the female skeletons which Robson uncovered, he found an arrowhead lodged between the ribs. Whether the arrowhead was there when the skeleton was buried or whether it fell there during the excavations is unknown.

The Indians which inhabited the South Dakota region where Robson worked were mostly agricultural in nature.

Shown with his collection of Indian arrowheads, spearheads, sewing needles, choppers and bows is Robson Bonnichsen, 17, Filer. He has over 650 arrowheads which he has collected since he was 12 years old. Most of his collection has come from along the banks of Snake river. However, the bottom row of arrowheads are ones Bonnichsen made. (Staff photo-engraving)

## Rotary Snow Plow Called-Out When Snow Gets Deep

Twin Falls highway district's 12-ton rotary snow plow is the big gun in snow removal when snow gets deep. The eight-foot-wide blade can remove snow four feet deep without breaking it. It will throw the snow up to 80 feet, according to Ted Smith, equipment maintenance boss standing beside the plow. The blades are powered by a 185-horsepower engine mounted in the rear. (Staff photo-engraving)

## Well Over 100 Plows Available to Clear Valley Roads After Snowfall

More than 100 highway snowplows could go to work at one time throughout Magic Valley in event of a snowstorm. The value of the plows, making room for more snow, is about \$1 million.

Most of the snow removal equipment belongs to the second district of the state highway department. Sixty-three plows are owned by the state in this area, plus three rotary plows. The remainder comes from the highway districts and cities throughout the valley.

In Twin Falls alone, there is one rotary snow plow, one snow-fighter truck and seven road graders. The rotary plow is a four-wheel drive, smaller blade with widening wings. The nine other counties in the valley have an equal amount.

Most of the equipment has been used already this winter, operators report, although not much in the center of the valley.

In the northern part of the valley near Sun Valley and Gaiens, snow removal is an equal amount. Most of the equipment has been used already this winter, operators report, although not much in the center of the valley.

Rotary snowplows, each costing about \$25,000, move the bulk of the deep snow. They mount eight-foot wide blades four feet high, which have augers within to direct snow into the windrows.

A rotary plow is usually mounted on a four-wheel drive truck. The augers and blades are powered by a special motor carried on the back of the truck, and according to operators, the motor is just about taxed to its limit when the plow is in deep snow or drifts.

Powering one type rotary snowplow, mounted on a four-wheel drive truck is a 175-horsepower, six-cylinder engine almost twice as big as the engine powering the snow-fighter.

Three rotary plows are owned by district two of the state highway department. The three plows are stationed at Ketchum, Shoshone and Huxley.

Mainly the rotaries are used near the towns where stationed, but if needed elsewhere they can be moved, department personnel say.

The most common type plow used is called a "defroster." It is an eight-foot blade about three feet high, attached to the front end of a ton and a half dump truck.

## Odd Questions Asked in Calls to Information Operators for Valley

"What is playing at the local theater tonight?"  
"What day does Santa Claus come to town?"  
"What does NATO mean?"

Those are just a few of the questions asked of the Mountain States Telephone company's information operators in Twin Falls. Women who work the switchboards are asked every day.

"Sometimes we can answer their questions, but usually we don't have time or just don't know the answers," said one operator who has worked on the switchboard for two years.

"The only information we are supposed to give out is telephone numbers," they explain.

"We can give out addresses, too," they say, "but only if the party asks for the telephone number first and the number must be asked for by name."

"Sometimes we get questions like, 'What is the number of that store across the street from such and such a store?' one girl explained. We can't answer that because we don't know what store they are talking about and we have information for all cities and towns in Magic Valley."

The telephone system in Magic Valley is similar to a system in a big city with several different exchanges, only here, each exchange is for a different town.

All of the cities and towns in Magic Valley except Buhl and Hiley are connected to local switchboards and users call for information. They don't have information operators in their own towns, according to the chief operator, Mrs. Laura Towner.

When we get a call asking the number of a store or business establishment that should be familiar to a local operator, we can't give the answer because we don't know all of the business establishments in Magic Valley, it was explained.

Most of the time we have to ask what town people live in whose number is being sought, an operator said. "There, again, we don't know what town people are calling from or about."

The operators are assigned to someone wants information by a small light and a beeper sound in their earphones. Neither the light nor the sound indicates in which town the call originates.

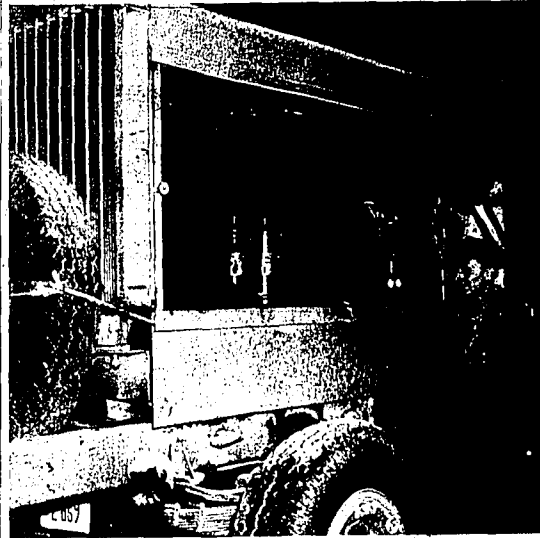

The telephone system serves 24 towns, most of the calls though, coming from Twin Falls.

"I couldn't pick out any group of people in particular which ask us questions other than for numbers," one operator said. "The calls come from men, women and children."

However, we do get some calls late at night from men asking for dates. It is against the rules for us to accept dates while working, the operator said. "Besides, two-thirds of the operators are married."

All men are friendly and polite to us, according to one girl.

(Continued on Page 24, Column 1)

Powering the rotary snow plow is this 185-horsepower, six-cylinder engine. According to operators of the Magic Valley Memorial hospital will be the fifth straight year that the Times-News from the circulation department.

Prices include:  
12 tickets from the Orpheum theater.  
Kidnie service set and bid holder from the...  
Chenille crib spread from Sears, Roebuck and company.  
A certificate entitling six siblings over a five year period for the baby from Albion Studio.  
A baby book from...  
A drum of baby announcement matches, blue if a boy, pink if a girl, from...  
\$5 credit for baby merchandise from Sweet's furniture.  
A camera from Kingsbury's pharmacy.  
William Rogers baby cup from Sterling jewelry.  
\$5 merchandise certificate from the Tiny shop.  
A \$10 savings account from the Twin Falls Bank and Trust company.

A \$10 savings account from the Twin Falls Bank and Trust company.

If another boy is born this year...

## Oldtimers' Pipes Featured in Collection

Al Lewis, Hailley, has been collecting pipes, among other things, for the past 30 years. When his collection passed the 1,000 mark he stopped keeping track, but all except the larger pieces are placed under glass in "the Snug" where Lewis keeps his collections and where many people come to browse each year. Often his visitors send him something new to add to his collection. Some of the pipes shown above belonged to pioneers of the Hailley section, others came from foreign countries. The two long pipes at the right are German pipes each of which measures three feet six inches. The stem is held with mother of pearl on one end and the other is topped with the maker's helmet. On the pottery bowl in delicate colors is a picture of a German fieldscape drawn by 10 horses. (Staff photo-enslaving)

## Life in MAGIC VALLEY

From Pekin, China, from Hamburg, Germany, from the wilds of Idaho from the early days of the great West, come the pipes that make up the collection of Al Lewis, HAILLEY.

It was some 30 years ago that Lewis first decided to start a collection of odd articles. As he had always been interested in pipes, that was where he began. However, he now has a collection which includes most every kind of an odd or unusual article one can imagine. After the numbers of his collection passed over the thousand mark he stopped keeping track. Many friends, knowing of his interest, bring him old or unusual pipes from other lands. All except those too large to fit, are enclosed in glass cases. Many persons visit "The Snug" where Al keeps his collection and remain for many hours to swap stories told by him, with views of their memory while viewing the collection.

The first pipe Lewis came by was a briar in the rough-smoked form many years by Fred Reinhardt, an early-day prospector in the CHOCOMA country of BIG WOOD river. Reinhardt, like most of the early-day prospectors, always wanted to dig for "another foot", knowing he would break into a vein of silver and lead ore. Like so many of the others, he died without achieving his ambition.

A bachelor, so many of the early-day prospectors were, after he finished his evening meal he would sit in the doorway of his log cabin and smoke his briar and feast his eyes upon the beauties of nature surrounding him, until the dusk began to fall. Then he would turn and shut his door, set a match to the pitch-soaked pieces of fir in the fireplace had built of native rock, fill his pipe with the special blend of tobacco he mixed, and settle down in his only chair to dream awhile of his native land.

Older pipes smoked for years by oldtimers of this locality were the long-stemmed German pipes of Charlie Sommerlander, who for years owned the town's only brewery, and

merly worked for Lewis at The Snug.

A calabash pipe, made of that squash-like plant, was donated by Dennis Altmeyer.

One inscribed "from 'Lil' Tim" was sent Lewis by a friend who visited The Snug while at SUN VALLEY and was traveling to MEXICO. It was sold to her by a native as an Indian peace pipe. "I'm afraid she bought a bill of goods," Lewis laughs, "but her intentions were good."

Carl Miller, Jr., donated two peculiarly shaped pipes with huge bowls and short curving stems. A corn-cob of tremendous bowl, was smoked by George Westlake, early day miner, who always smoked it while dealing farm. Many fortunes changed hands were the card table as he peacefully puffed on it and dealt the cards in the heavily-smoked room in which many of the players puffed eagerly.

Resembling pipes are the "Tagalog" cigarette holders in the collection.

Bits of the pipes of George A. Lewis, brother of Al, who for many years was watermaster in the Carey valley, are among the group. An odd pipe from the Japanese exposition of 1907 is included, a vase, a Japanese pipe given by William H. Lewis, of Sun Valley, and a silver Chinese pipe given by Kathryn Smith, are also in the collection.

A pipe which left the mouth of John Schad only long enough for him to sleep is there. Schad smoked it as he traveled over BLAINE county in the horse and buggy days from 1912 to 1926, ascending the land for fat purposes, and before that when he mined in the vicinity.

A German pipe given by Thomas Williams and a straw-covered bowl pipe, the gift of Dick Beardsley, are also oddities.

Joe Swanson, Jr., brought home a Chinese water pipe for the collection. Two compartments make these pipes different. One is for tobacco and the other for water to keep the smoke cool. The entire pipe is of wood.

A bison's pipe is among the collection. Lewis swears it was put there for a gift. Always the visitor asks the question how can you smoke that? And he explains that it is many kinds of pipes—some not to smoke, but to blow and call men aboard ship.

Perhaps the two most unique pipes in the collection are the long, German pipes, each of which measures some three feet six inches. One, the long stem is held in mother of pearl, on the other the bowl is topped with a maker's helmet. On the pottery bowl, in delicate colors, is the picture of a German fieldscape drawn by some 10 horses. Inscribed on the back of the bowl are the names of a dozen officers who were in the company of the general to whom it belonged during World War I. Hailway up the stem is a carving in relief of the same fieldscape in the picture. Long tassels hang from the stem-pieces. These two pipes were brought from Germany by Dick Beardsley.

Lewis has many more pipes which have been given him while he intends to place on display at a future date.

## Clothes Room to Remain Open for Rest of Holidays

Special arrangements have been made with the PTA for volunteers to keep the clothing room in the old hospital building open through the remainder of the holidays, announces Willard Swartley, school attendance officer.

Children and adults are available to persons and families with children, Swartley says. The clothing room will be open from noon until 1:30 p.m. Monday through Friday.

Swartley said there is a special need for overcoat, underclothing and jeans. Anyone having such items may leave them at the clothing room and they will be distributed, he said.

## 1957 Was Year of Fulfillment for Gem Agriculture Department, Chief Writes

BY ROBERT REICHERT  
(Idaho Commissioner of Agriculture)  
(Written for United Press)

BOISE, Dec. 20.—The year 1957 has been one of desires come to fulfillment for the Idaho state department of agriculture. "We have long been in the process are now bearing fruit."

Business clearly previous agricultural laws by amendments, the 1957 Idaho legislature passed two important measures, the most important bill and the bean commission bill.

The meat inspection service is administered by Dr. J. A. Skordahl, a man with over 25 years experience in meat inspection and grading work. Even though this program has been in active form only a little over five months, we now have every packing house in the state under inspection. This service sets up Idaho packing houses on the same standards as federally inspected plants.

Besides the meat inspection program, the bureau of animal industry, under the direction of Dr. A. P. Schneider, is working tirelessly towards the eradication of brucellosis of cattle. A federal-state mobile laboratory is now checking all dairy cattle by use of the Ring test twice each year. All Idaho counties have now requested the cooperative program within their counties. To date, 14 counties have been certified.

Immediately upon the creation of the Idaho bean commission, Gov. Robert E. Smylie took quick action in appointing representatives from both the growers and dealers to form a cohesive unit which is working towards producing and marketing superior beans and bean products not only for national but worldwide consumption.

Idaho is unique in having its own commission composed of both growers and dealers. The bean commission's primary interest is research and currently it is working on reducing the cooking time of beans. Already favorable results have been accomplished along this line and it will not be long until the housewife will find that she can prepare many appetizing bean recipes in her own kitchen in less than half an hour.

Along this same line of research, Idaho has secured funds for the carrot research program. This work will be done by the University of Idaho experiment station at Parma. This program, headed by Dr. DeLancey Franklin, will attempt to produce carrots which are uniform in size, color, shape and maturity for canneries and freezing plants. The researchers are endeavoring to develop carrot seeds which will produce increased yields, sugar and vitamin content and shorter growing season where desirable.

Idaho has recently entered into an agreement with the commodity credit corporation whereby it will store the taxpayers many hundreds of dollars both state and federal funds in the inspection of warehouses. Idaho is pioneering this field as many other states are looking to us to see what will be the outcome of this joint operation. We are confident the plan will be a success at both the state and federal level.

Idaho is unusual in having the most cooperative agreement with the agricultural marketing service for the inspection of all dairy and poultry products that are sold within the state with nearly 50 per cent of the manufactured dairy products sold to other states and foreign countries and, therefore, must meet the very highest standards of the federal food and drug act plus extra measures to insure the quality of the products. This has not been one simple procedure by the food and drug administration of any dairy products in the state of Idaho.

Idaho has its problems, too. This year we were faced with an infestation of the cherry fruit fly which was causing a great deal of damage to our cherries. The department was forced to add two new counties to the quarantine list. However, growers, knowing the value of stopping this infestation, cooperated wholeheartedly in setting traps to see where the infestation was spreading and in reporting their finds to the agriculture department. Spraying was started immediately to combat the fly.

Idaho's onion crop also was threatened this year by an infestation of the onion maggot. This is being checked speedily by the infestation office of power and working together to designate agricultural land fits for cultivation. Growers have agreed to plow their fields to a depth of eight inches in order to stop any reinfestation of the maggot.

showed a higher yield per acre than in any other state. The agricultural marketing service has raised Idaho hops as the cleanest of any checked on the Pacific coast. This is due to the fact that Idaho hop growers are using the most modern equipment and methods to produce beans which are quickly bought up by buyers because analyses prove them to be almost entirely free from debris.

"Honey production for Idaho is nearly eight per cent above the crop of 1956 and only one per cent below 1951, which was the largest crop of record dating back to 1929. The crop placed at 55 pounds, five pounds above last year and the same as the previous record high established in 1943.

Idaho's largest development has been its most famous product, the Idaho potato. Not only is Idaho growing and shipping millions of pounds of this delectable tuber in its natural state, but rapid growth is shown in producing potato products. Idaho now has one plant producing potato starch.

Potato starch is used for human consumption to replace corn meal and also in the manufacture of paper, cardboard and glue. Starch is also used in the manufacture of three different products: instant potatoes, minute potatoes and potato flour. There are four commercial freezing plants in Idaho producing frozen french fries and frozen potato patties besides freezing peas, corn and asparagus.

Growers have agreed to plow their fields to a depth of eight inches in order to stop any reinfestation of the maggot.

Idaho is chiefly a dairy exporting state with nearly 50 per cent of the manufactured dairy products sold to other states and foreign countries and, therefore, must meet the very highest standards of the federal food and drug act plus extra measures to insure the quality of the products. This has not been one simple procedure by the food and drug administration of any dairy products in the state of Idaho.

Idaho has its problems, too. This year we were faced with an infestation of the cherry fruit fly which was causing a great deal of damage to our cherries. The department was forced to add two new counties to the quarantine list. However, growers, knowing the value of stopping this infestation, cooperated wholeheartedly in setting traps to see where the infestation was spreading and in reporting their finds to the agriculture department. Spraying was started immediately to combat the fly.

Idaho's onion crop also was threatened this year by an infestation of the onion maggot. ## "Defroster" Plows Get Wide Use to Remove Light Snow in Area

A big portion of the state's snow removing equipment in the Twin Falls area is this four-wheel drive truck with a "defroster" plow and widening wing attachment. This sort of vehicle is used for snow removal work on state highways south of the Snake river between Blinn and Murtaugh. Looking at the plow are Wayne Molisee, right, filer, maintenance manager for the Twin Falls shop and Jay Wilson, Twin Falls, assistant. The plow is called a "defroster" because it won't handle much snow. (Staff photo-engraving)

## Well Over 100 Plows Are Available to Clear Valley Roads After Snowstorms

(From Page 17)  
used mostly in deep snow.  
The county crew use several "defroster" blades, too, many with widening wings.  
A plow which gets about as much use as any is one owned by Claude Jones of Twin Falls. It is mounted on the front of an old army half-track. Jones uses the plow for clearing the road to the Magic Mountain ski area up Rock creek.  
Blowing snow can be quite a job, according to Jay Wilson and Wayne Molisee of the Twin Falls shop of the state highway department.  
They report that snow plows can get stuck mightily easily if the operator isn't careful. If the blade is allowed to dig into the highway the truck might spin and go into the ditch.  
If snow is frozen or wet it is harder to plow. Frozen snow is just about impossible to remove with any plow and get a road completely clear.

"Sometimes we work 24 hours a day to keep the roads open," Wilson said. "It's not hard if we can get to the snow before it has had a chance to freeze or get wet. Powdery snow is easy to plow."  
Stalled motorists are sometimes helped by the road crews, although they aren't required to pull out stalled cars. "But we sometimes do pull cars out of the ditch because we can clear the road better if they aren't in our way," Molisee said.

### Idaho Power Pays 1957 County Taxes

RUPERT, Dec. 28—A check for \$18,927.11 was paid this week to Minidoka County Treasurer Anna Grace by the Idaho Power company.  
Almost \$1,100,000 in such checks are being paid to the treasurers of 27 counties in Idaho this week to cover the first installment on its 1957 property taxes.  
The second installment on property taxes will be paid in June and will boost the total property-tax payments in its counties to \$2,338 for 1957.

### Tuttle Visits Told

TUTTLE, Dec. 28—Hubert Evans and his sister, Mrs. Phyllis Sharp Aberdeen, left for Adrian, Ore., to visit the Ernest Eastman family.  
En route they stopped at Caldwell where Herbert Evans returned to his studies at the College of Idaho.  
Mr. and Mrs. Fred Mills, Emmett, and Mrs. Jerry Sullivan and their daughter, Kathleen, Boise, and Mr. and Mrs. Charles Skinner, Hagerman, were Christmas day guests at a family dinner at the home of Mr. and Mrs. Itallie Conklin.  
The Dead sea is 1266 feet below sea level.

### Extension Course Offered Teachers By State College

WENDELL, Dec. 28—Extension courses for elementary and junior high school teachers will be offered by the Idaho State college, according to Wendell school Supt. Alvin J. Ritter.  
The second semester education courses will meet state board of education requirements for graduation and for the renewal of certificates.  
An organization meeting is slated for 7:30 p. m. Jan. 9 in the Wendell high school. Teachers interested are asked to attend to help the instructor choose courses for which there will be the greatest enrollment. Meeting place for the course will be arranged for the convenience of the majority of the teachers, Ritter said.  
Among courses to be offered are human growth and development; educational psychology; audio-visual education; methods and materials for teaching elementary school arithmetic, social studies, language, arts or sciences.

### Holiday Visitors Listed for Declo

DECLO, Dec. 28—Mr. and Mrs. Jack Balch, Butte, Mont., spent Christmas with Mrs. Balch's parents, Mr. and Mrs. Wayne O. Lewis. They returned on Wednesday.  
Mr. and Mrs. Leonard Schank and daughter, Joan, Lake, Wash., are spending the holidays with Mrs. Schank's parents, Mr. and Mrs. Frances Perrod.  
Mr. and Mrs. Vocco Parke, Phoenix, Ariz., left Thursday morning after spending Christmas with relatives here.  
Mr. and Mrs. Ernest Dayley and daughter, Joan, and son, Gary, Klamath Falls, Ore., are spending the holidays with Mrs. Dayley's mother, Mrs. Hazel Schwagler, and her brother and sister-in-law, Mr. and Mrs. Edward Schwagler. The Dayleys are former Declo residents.  
COMPANY IS HOST  
SIOGHONE, Dec. 28—Local employees of the Idaho Power company attended a dinner Tuesday evening at the home of Mr. and Mrs. Lloyd Smith. Smith is manager for the company here.

## Banker Notes Idaho Income to Surpass Billion for '57, Predicts Repeat in '58

BY J. L. DRISCOLL  
(Chairman of Board,  
First Security Bank of Idaho)  
(Written for United Press)  
BOISE, Dec. 28 (UP)—Total personal income in Idaho in 1957 should pass a billion dollars for the first time in history. The total for 1958 should be almost the same.  
Total agricultural income and cash farm income should increase slightly over totals of 1957. This is a continuation of adjustments in 1957 which reversed the five-year downward trend in farm income. Drought has ceased to be a major factor, but farm surpluses, especially of crops, are of major significance and will affect crop prices and the feeding and marketing patterns of livestock for the next six months.  
Cash farm income in Idaho in 1957 was somewhat higher than last year. Increased prices were from livestock and livestock products. The price of milk was approximately the same, turkeys slightly lower. All other livestock were higher by 7 to 30 percent from last year.  
Three increases offset to a great extent decreased income from crops including the feed grains, potatoes and fruit. Some adjustments expected in the latter part of 1958 will probably mean some slightly lower prices for livestock and products, slightly higher prices for crops than are presently prevailing.  
The total cash farm income anticipated in 1958 should equal the estimated 1957 total of 948 million dollars. Almost 21 percent of all of Idaho's personal income originates in agriculture. Trends in these segments are of major significance in most other patterns in the state.  
Industrial production in Idaho, dominated by lumber, food products and chemicals should be close to 1957 levels.  
Lumber production has probably reached the low point and may increase slightly. The number of smaller marginal mills have ceased operations and part of the accumulated inventories should start moving into the markets after the first of the year.  
The total industrial production in Idaho should be at least equal to that of 1957. This applies to phosphate rock production for the fertilizer and chemical industries. Metal production, nationally and in Idaho, reached a low point in the latter part of 1957. National policy relative to lead and zinc are of major significance as applying to the non-ferrous metal industries. Cattle, sheep and reindeer production should increase with the expansion of the highway building program.  
Construction will be at a high level by any standards before 1955, but will be somewhat lower than totals of 1956 and 1957.  
The major portion of expenditures for natural gas pipelines has been completed in Idaho within the past two years. But other utilities construction should equal that of 1957.  
While industrial construction will be below the level reached in 1957, housing construction which in 1957 is slightly above that of the year, 1957 probably will increase slightly.  
Further increases in savings are anticipated at commercial banks and other institutions. This should have the effect of making long-term funds somewhat more readily available for industrial and commercial construction, and for mortgages.  
Funds for construction of industrial plants, commercial building and for housing have been inadequate for the past three years. A further increase in the amount of savings beyond 7 percent of personal disposable income would make more funds available in this industry.  
Retail trade should be fair, but there will be a considerable amount of selling at bargain prices for the shopper. Goods are available. Resistance to constantly increasing prices may become somewhat noticeable. Peak in consumer price index has probably been reached.  
Retail trade in food, apparel, clothing should be as great as in 1957. Trade in most items such as radio and TV should also be relatively high.  
Employment will be slightly lower, unemployment slightly higher than during the past three years.  
The year 1958 will be one of rather major adjustments in various economic segments as between saving and spending. It may well mark the end of the wage-price spiral.

### Movie Available For Public Use

Mrs. Sydney Knight, supervising nurse of the southeastern Idaho health department, announces that a film prepared by the National Tuberculosis association, "Are You Positive?" is available for showing by interested groups in the area.  
Mrs. Knight says the movie "is not a scare picture. It simply presents in an interesting manner the story of many diseases that can exist within a person being aware of them at first."  
"The emphasis is on tuberculosis of course," Mrs. Knight said, "but the subject matter of the film includes many diseases. The film can be shown suitably to any group. It is not intended for medical use but general public showing. We will gladly let any group that contacts us use our print," she said.  
The film is a 16-millimeter color print, requiring some 25 minutes to show.

# MAGIC VALLEY SHOPPING CENTER

now offers new modern office and business suites  
custom-built to suit each tenant's specifications

A new and modern addition of office and business suites is now under construction at the Magic Valley Shopping Center located at Filer and Fillmore Avenues. The 12 suites, encompassing 10,000 square feet will be of modern design. The exterior will be of stone, glass and glue-laminated exposed beams with exposed cedar decking. The interior will be custom-built to suit each tenant's specifications, and all suites will be air-conditioned. Designed to house medical men, beauty shops, barber shops, floral shops, and offices for real estate men, architects, engineers, insurance men,

accountants and attorneys, the suites are expected to be ready for occupancy in February.

One of the most important features of this new business addition is the black-topped parking area for 300 cars for the use of both tenants and their patrons. This is in addition to the adjacent parking lot for 500 cars in front of Okay Food Center and Save-On Drug. Prospective tenants are urged to make application immediately, so that the interiors of each office and shop can be finished to their own particular needs and specifications.

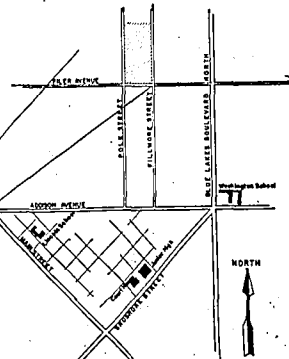

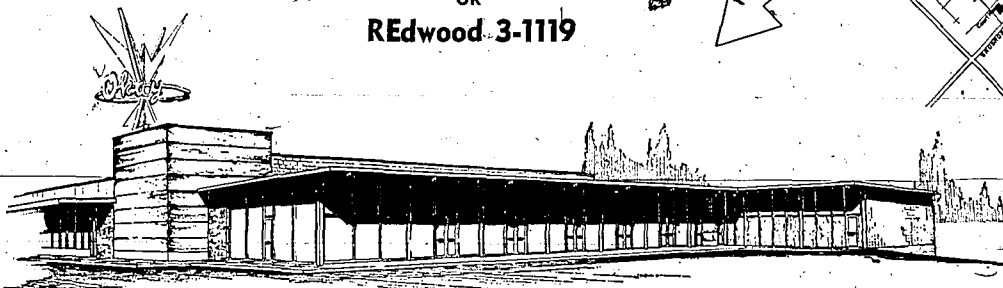

Make your application now so that your office or shop can be finished to suit your own particular needs. Remember there will be plenty of free parking for you and your patrons.

# Information Operators Get Variety of Questions Over Phones

Gladys Hoshaw and Doralee Updike are shown at the switchboards of the telephone company. They are asked a variety of questions and often are called to settle family arguments. (Staff photo-engraving)

## Information Operators at T.F. Phone Exchange Get All Sorts of Questions

There are more disgruntled men than happy men on the lines, it seems. Besides giving information, mainly telephone numbers, the girls operate what is called an "intercept" system. If a telephone number is disconnected or not in service yet, such a number dialed will ring on their switchboard. The girls have a book of all telephone numbers by which they can tell the caller if the number has been disconnected or connected.

The girls try to be helpful as possible to callers and if at all possible can usually give answers to most questions.

"Lots of children call information asking questions that have to do with their homework or even to settle an argument they are having at home," said a woman who had worked as an information operator but now is a supervisor.

"I think the girls are asked to settle many family quarrels," she added.

The source of the numbers given by the information operators are books similar to telephone books but are more complete. Every time a new number is added or disconnected it is recorded in the books.

One girl is kept busy all the time keeping the information operators' books up to date.

Each book is tabbed alphabetically and according to towns to make location of numbers faster.

Part of the criteria for a good operator is speed and so the girls must be able to give fast answers, according to the chief operator.

If a question asked of the information operator does not have to do with telephone numbers, and would require the girl some time to get the answer, then they usually don't give an answer, she said.

However, if the operator is asked a question and knows the answer right off, then it is permissible to answer.

"But we hope people don't take that to mean the telephone information operator is a general information service," she added.

From three to five operators are on duty most of the time although there is space for six. During the late hours of night the long distance operators handle the information duties, one of the supervisors said.

During the day there are usually five operators working and they are kept pretty busy with all the calls coming in, she said.

## Mrs. H. McMahon Paid Final Honor

SHOSHONE, Dec. 22—Gravestone rites for Mrs. Henrietta McMahon were held at 3 p.m. Friday at the Shoshone cemetery under direction of the McGoldrick funeral home.

The Rev. Bert Powell, retired Methodist minister, officiated.

Palbearers were Gilbert McNeill and Gordon Garlock, Twin Falls; Delma McMahon, Jerome; W. E. Grose, Rex; and Charles Pettib, Shoshone.

## Ex-Resident Dies

Word was received here Saturday of the death of Edward M. Nelson, former Magic Valley resident, in Phoenix, Ariz.

Mr. Nelson died Dec. 15 in Phoenix Veterans hospital after a four-year illness—Funeral services were held in Phoenix Dec. 18.

Mr. Nelson, 57, a veteran of World War II, lived in Kimberly from 1940 to 1943 and after marrying Ada Kulhanek in 1953 the couple lived in Rupert and flagman.

Surviving are his widow, two stepsons, Robert Kulhanek, Lovelock, Nev., and Lavorne Kulhanek, Phoenix; two daughters, Joann Larson, Rupert, and June Gerhardt, Phoenix, and 31 grandchildren.

# Filer Youth Accumulates Collection of Arrowheads in Indian Artifact Search

(From Page 17)

dians, he said. "We found many hoed made of bone which the Indians had used to cultivate their crops."

Chipping tools or flakers made out of bone, usually from deer antlers, also were found at Mortimer.

Bornichsen worked with the University of Idaho crew from June 18 to Aug. 18 last summer, for which he was paid \$12 per hour plus his travel expenses.

He lived in a house rented by the university and Dr. Bowser's wife cooked for them.

Another of the youth's achievements has been to learn to make arrowheads. He uses practically the same instruments as the Indians did, a prong of a deer antler.

He has made 700 or 800 arrowheads, giving many of them to his friends. He said many people have asked him for arrowheads and rather than give away the ones he has found he would rather make some.

Although Robson has found a great many Indian artifacts, he is still looking for more.

"Right now," he said, "I am looking for Yuma and Potosi culture arrowheads." He has found two arrowheads either from the Yuma or Potosi culture. Arrowheads from the Yuma and Potosi culture are much more in demand than regular arrowheads because they are made better, according to Robson.

It is believed the Yuma and Potosi cultures, although 8,000 years old, had a higher culture than the Indians of the 1800's.

The identifying features of a Potosi or Yuma arrowhead are the small chipping marks on them, Robson said.

The arrowheads of the later Indians had deep chip marks.

Hunting arrowheads and other Indian relics occupies almost all of Robson's spare time. He owns a pickup truck which he uses to get to the "good areas" for finding arrowheads.

Most of his finds have been along Snake river. There, in caves and camps known to have been occupied by the aboriginal Chippewas, Robson digs for arrowheads.

He uses a wire screen through which he sifts all the dirt he digs. When asked if his brothers help him in the search for arrowheads, he replied with a firm "no" and then explained that the collection was all his own work. He says he prefers to work alone.

Robson has an older brother Bill, 20, who is now at the University of Idaho studying geological engineering, a younger brother Joe, 14, who is a freshman at Filer high school and a younger sister, Janet, 8, who is in the second grade at Filer.

Robson's future plans are to attend college, probably Brigham Young university in Provo, where he plans to study archeology or anthropology. He is a junior now.

"I wouldn't sell my collection for any amount of money," Robson said. "All of the work I have put into it means more than money and besides, I don't think it could be replaced."

A 300-year old buffalo skull and half of an Indian pottery container are part of the collection of Robson Bornichsen, 17, Filer. The skull and pottery were found by Bornichsen last summer when he went to South Dakota to work with students from the University of Idaho uncovering Indian ruins. He found the two in an Indian cache. (Staff photo-engraving)

# Control Plans Reported for Grasshoppers

Efforts to control rangeland grasshopper infestation will be made only on Magic Valley property in this year by the plant pest control division, by the plant pest control division, agricultural research service, U. S. department of agriculture, according to Keith Evans, area division supervisor.

Evans says control measures will be carried out in cooperation with local farmers on some 8,200 acres of Blaine county rangeland near Pocatello.

According to a department of agriculture map dated Nov. 20, based upon the results of cooperative grasshopper adult surveys, Blaine county's grasshopper infestation is considered "light" to "threatening" in Lincoln county's infestation is rated "threatening" and Jerome county's infestation is termed "light" to "severe."

Evans explains that grasshopper control measures are not necessarily undertaken even in areas deemed "severe" or "threatening."

"In some areas," Evans says, "the degree of infestation may be fairly serious but the cost is not economically worth undertaking our control measures. That is, if the cost far exceeds the damage done, it is not worthwhile to start a program to get rid of the grasshoppers, then we don't go in with our services," he says.

"In Blaine county, there is sufficient agitation on the part of farmers to justify us helping them with their efforts to rid the area of grasshoppers," Evans says.

Department figures show Idaho has some 105,200 acres of infested rangeland to come under division control activities in 1958. The counties, with the number of infested acres slated for control include: Blaine, 20,000; Blaine, 8,200; Clark, 10,000; Fremont, 20,000; Lemhi, 5,000; Lewis, 10,000; and Nez Perce, 30,000.

The department estimates 450,000 acres are infested with grasshoppers in Idaho, including acreage not deemed suitable for economical control programs.

The survey which determined the infestation acreage was planned and carried out by the plant pest control division in cooperation with various state agencies concerned during the late summer and fall.

### WANTED: MORE SPACE

Families these days have a way of outgrowing their homes. When this happens it isn't always feasible to buy or build a new home, but it is often highly practical to expand the living area in the present home by transforming the attic into an added bedroom or a living-study-bedroom.

The attic room is almost certain to present architectural limitations that produce decorating problems... a low sloping ceiling, a jutting wall and more often than not, small windows. All of these can be turned into decorative assets when you give your imagination full play.

Etched above is an attic room that represents in its own way the triumph of taste and imagination over structural restrictions. The furniture has been judiciously arranged to follow the lines of the room—minus couch—the lowest piece, has been placed under the sloping roof against a jutting wall. Low bookcase serves also as an end table.

Scalloped border, cut from plain blue wallpaper and pasted around the room at the ceiling line, gives definition to the color scheme of luridly blue and golden yellow. Small hanging shelf adds importance to the desk group and provides a place for a lamp. Window treatment has been kept simple. Here is a happy combination room that the entire family can enjoy.

Would you like some experienced help in your room planning without outlaying your own ideas? Our trained decorators will be happy to help you develop and execute your own ideas with practical advice. Come in for a chat whenever it is convenient.

Making your own selections in the friendly atmosphere of our store is always a pleasant experience. We cordially invite you to come in and stop leisurely, have as much or as little help as you like. You're always assured of good taste, high quality and reasonable prices.

## University Student Serves as Moscow Judge

Moscow Police Judge Lamont Jones, a University of Idaho law student from Malad, consults a law book between cases. The 26-year-old student also serves as a justice of the peace. (University press service photo—staff engraving)

## University of Idaho Student Doubles As Judge, Says Most Citizens Honest

UNIVERSITY OF IDAHO, Moscow, Dec. 25—Most persons are good drivers and honest citizens, observes a University of Idaho senior law student who lives portions of the day in the justice of the peace court in Moscow.

He is Lamont Jones, Malad, who works part-time for the city of Moscow as a police judge and justice of the peace.

"There are no habitual offenders coming into the traffic court in Moscow," Jones said. "If a driver is brought into court on a violation, chances are you will never see him again in court."

The 26-year-old Jones, who handles mainly traffic cases, says, "Most persons do not realize the extent of their rights. This gives a judge tremendous responsibility."

How does a student acting the role of a judge work out? Apparently very well, for the practice has been continued since it was started in Moscow about 10 years ago. Jones is

## Woman Gets New Position For Russians

MOSCOW, Dec. 25—Mme. Ekaterina Purtyeva, the first and only woman to achieve a prominent position in the Soviet hierarchy, has been relieved of her duties with the Moscow city party committee to work full-time activities on a national level.

An announcement said Mme. Purtyeva has been "freed from her commitments" with the Moscow unit "in connection with . . . their transfer . . . to permanent work as a secretary of the spassky central committee."

Mme. Purtyeva will be succeeded as first secretary of the Moscow committee by Vladimir Ustinov, the announcement said. It said the shift had occurred at a "private session" of the Moscow committee.

Western observers today saw little significance in the move. They said it was simply a routine decision usually made when the leader of a subordinate party organization is elected to the secretariat of the Communist party central committee.

Mme. Purtyeva has been a secretary on the central committee since February of 1934. She also is the only woman member of the powerful party presidium.

It was recalled that Communist party leader Nikita S. Khrushchev told the United Press recently the central committee is more active at present than it has been for many years.

Under Khrushchev, the committee has full control of all the arms of Soviet power—administration, armed forces and security organs. Every member of the presidium and central committee has full supervisory control of one or more ministries or other state organizations.

## Holiday Visitors Noted for Valley

HAGERMAN, Dec. 25—Mr. and Mrs. Calvin Marsh and son, Calvin, spent Christmas with his parents, Mr. and Mrs. Howard Marsh, at Valley View, Idaho.

Mr. Marsh, son John, Jr., visited this week with his parents, Mr. and Mrs. S. Z. Thayer.

Week-end guests at the home of Mr. and Mrs. Howard Marsh were Mr. and Mrs. W. A. Benson, Naampa. Mrs. Benson has spent the past week with her son-in-law and daughter, Mr. and Mrs. Dunn Knicker, Pocatello. Mrs. Knicker was ill, but is improved.

## Man Is Jailed

SHOSHONE, Dec. 25—Captain Jones, north of Shoshone, is serving out a \$25 and \$3 court costs fine in the Lincoln county jail.

He is guilty of battery when he appeared in the court of W. L. Austin, justice of peace, Thursday morning.

Sheriff Thomas Conner made the arrest upon complaint of Mrs. Jones.

## Prominent Local Couple Moving to Utah

Mr. and Mrs. Harry Elcock, residents of Twin Falls since 1937, are moving to Ogdin, where Elcock is general agriculturist for the Amalgamated Sugar company. Elcock worked in Twin Falls as the Idaho general district manager of the sugar company. Both he and Mrs. Elcock have been prominent in local civic affairs. (Staff photo—engraving)

## Pair Moving to Utah After 20 Years Of Civic, Social Leadership for T.F.

Mr. and Mrs. Harry Elcock both of Twin Falls were changed from a toll bridge to a public bridge following its purchase by the state. Elcock had a hand in the change. As president of the chamber, he appointed a committee to study the possibility of the state buying the bridge and removing the toll.

From 1917 to 1945 Elcock served as president of the State Chamber of Commerce and in 1955, 1958 and 1957 he was a member of the state health board. During World War II Elcock served as chairman of the Twin Falls war manpower committee.

Mrs. Elcock has volunteered much of her time to the American Cancer society. She has been a member for 18 years. 10 of those years as Twin Falls district commander.

Mrs. Elcock has always been prominent in local and state organizations, and served as president of the Women's Republican club in Twin Falls.

The couple resided at their home on Minner street for 18 years. Prior to that they lived on Lincoln street. Each Christmas the Elcocks have been among the leaders in decorating their house for the holidays.

They have one daughter, Monica, who attended school in Twin Falls and the University of Idaho. She is now married to Tom Mackay, Moscow, 8 months old.

As general agriculturist for the Amalgamated Sugar company, Elcock will be in charge of all agricultural work undertaken by the company, such as growing beets, breeding resistant beets and production of seed for crops.

## Closure Voted Of Communist Daily Worker

NEW YORK, Dec. 25 (AP)—The American Communist party has voted to close down the Daily Worker as of next week.

The decision to stop publishing the party organ came at a secret meeting of the party's national executive committee last week-end.

But Daily Worker Editor John Gates said in a formal statement he would try to continue the 34-year-old paper. Gates said he did not consider the vote binding, and in any case, the Daily Worker will cease to exist only when it alone says so.

The Daily Worker in October printed a sworn statement that its average paid circulation in the preceding year was 5,274. This was a drop of 1,821 from the previous year and a slide of 15,200 from the paper's all-time high in 1931 of about 20,000.

Indications that the Daily Worker was operating deep in the red came recently when it was cut from eight to four pages and from five to four times a week.

Suspension of the newspaper would leave the Communist Party in New York City with only one newspaper, the Worker, the week-end edition of the Daily Worker.

Another apparent reason the national executive group voted to suspend the paper was the feeling in some party quarters that Gates has made it his personal sounding board instead of a party organ.

## DELEGATE LEAVES

PAUL, Dec. 25—Arnold Bampie left Christmas day for Lawrence, Kansas, to attend the youth conference for Methodist churches. Bampie, a student at the Idaho State college, Pocatello, is one of the four delegates sent by the Pocatello Methodist church to the conference. He is the son of Mr. and Mrs. A. H. Bampie.

Another apparent reason the national executive group voted to suspend the paper was the feeling in some party quarters that Gates has made it his personal sounding board instead of a party organ.

They have one daughter, Monica, who attended school in Twin Falls and the University of Idaho. She is now married to Tom Mackay, Moscow, 8 months old.

As general agriculturist for the Amalgamated Sugar company, Elcock will be in charge of all agricultural work undertaken by the company, such as growing beets, breeding resistant beets and production of seed for crops.

## State Cottontail Ranges in Size; Most Found in South Idaho

Cottontail rabbits in southern Idaho range from the little Idaho pigmy, left, to the full-sized equivalent in the midwestern species, right. The bunnies support more hunting than any other game species.

Common around farms in the East and Midwest, Idaho cottontails also are found in agricultural and willow. Bulk of the cottontails are found in southern Idaho. (Fish and game department photo—staff engraving)

## Hunters Don't Talk About Cottontail Rabbit, Yet Shoot 85,000 Every Year

By BETT RHODENBAUGH

(Idaho Fish and Game Department)

In some Idaho circles, announcements about cottontail rabbit hunting seasons are received with a certain distaste. Comment, if any, ranges from the exclaiming, "Oh, I hate that rabbit!" to the more polite, "I don't want to see any more of those rabbits."

The little cottontail actually is the most important game animal in the United States. In many states it is the only game animal existing in

substantial and consistently huntable numbers. Millions are taken annually, and seasons are carefully regulated in spite of the tremendous reproductive capacity of the species. In Idaho most of the cottontails are in the southern part of the state, though some attempts have been made to propagate midwestern species in northern Idaho. The transplants did poorly, for the most part, but there are good native populations throughout the Snake river plain in brushy draws and stream courses, woodland borders, farmland hedges, and even in the sagebrush.

The hunter questionnaire circulated by the Idaho fish and game department for the past two years indicates that hunters have been finding about 85,000 of them each year. This is a pretty fair harvest.

For the past several years cottontail hunting season has been open Oct. 1 through Jan. 31. The bag limit is four. Some are taken with shotguns, especially when the rabbits are encountered while hunting birds. The .22-caliber rifle is the favored rabbit gun in Idaho, as elsewhere.

Idaho has several species of animals commonly known as "rabbits." The most conspicuous of these are the big hares which depend upon running, rather than hiding, as their chief means of escape. Familiar to nearly all residents are the white-tailed and black-tailed jackrabbits and the snowshoe—all hares. In addition, there is the little pink or "rock rabbit" that lives in high mountain rock areas where it cuts and stores "hay" for its winter feed. This little animal looks like a chipmunk, or extra-furry guinea pig, but it is related to the general family of hares and rabbits.

The cottontail, familiarly known to millions of children as the "Peter Cottontail" of many popular animal stories, or as "Raggy," the pathetic hero of one of Ernest Thompson Seton's best known stories, is represented in Idaho by at least two species or races. The season is the same on all. The Idaho pigmy is generally classified with the others, even though its tail is not white as

all, but a sort of buff color. The color of all species has a short life span. On the average, it has been estimated that any individual has only one chance in 20 of living to be a year old. Often called "the bread of the woods," these species are preyed upon by every known predator, (animals or birds that hunt, catch and eat other animals or birds for food). To match this heavy turnover, the cottontail becomes mature at six months, and may have as many as five litters of young in a summer, with as many as five or six young per litter.

Hence, in spite of the heavy drain by predation, weather, natural causes, hunting and other dangers, there always are plenty of replacements on the way—provided the species is firmly entrenched in plentiful and appropriate habitat.

Poisoning is still a concern with many persons who would like to hunt rabbits, but are afraid to do so because of the disease. Actually, it is generally held that a hunter may safely take and use rabbits if he observes the standard precautions. Sick rabbits are languid, slow-moving, dull. They lack the alertness of well animals. Specialists advise hunters to dress their game carefully, examining the meat, and to make sure it is thoroughly cooked. While the department has received no reports of tularemia in Idaho for some time, it is always best to play safe.

## Final Service Held for Tiny Heart Victim

SHOSHONE, Dec. 28 — Funeral services for a tiny heart victim, Mrs. Elvin Rogers, north of Shoshone, who died following heart surgery in Denver, were held at 2 p.m. Friday in the local LDS church. Bishop Lloyd Smith officiated.

Speakers were Bishop V. W. Goodwin, Gooding, and M. J. Dilworth, Carey.

The invocation was given by Harold A. Thorne, Shoshone. Bishop Smith gave the eulogy. Musical numbers in Denver, were held at 2 p.m. Friday in the local LDS church. Bishop Lloyd Smith officiated.

The benediction was by Ralph Smith.

Concluding rites were held at the Shoshone cemetery under direction of Goldrick funeral home.

Flowers were handled by Mrs. L. T. Sorenson, Mrs. John Thorne and Mrs. Rosa Boyd. Relief society officers, Flower girls were Marilyn Hall, Jennifer Shortt, Judy Silva, Sharon Holley, Judy Mathison and Kristine Borenson.

Mrs. Harold Thorne handled the funeral box.

Palbearers were Ray Rogers, a brother and three cousins from Jerome.

High councilman J. O. Freeman gave the graveside dedication at the Shoshone cemetery.

Library Acquires  
More New Books

A new group of non-fiction titles has been catalogued and added to the collection of the Twin Falls public library, according to a list issued by Arthur L. DeWider, city librarian.

New books include "Ladies Home Journal Book of Interior Decoration" by Elizabeth Halsey; "The Seventeen Book of Young Living," Enid P. Haupt; "The Family Book of Humor," Helen Hoke; "To Live Again," Catherine Marshall; "Red-Headed Doctor," Herbert Fritzer; "The Century of the Surgeon," Jürgen Thierwald; "Her Name Is Mercy," Sister Marie Del Rey; "The Clubwoman's Manual," Kate and Isabel Munro; "How to Secure Copyright," Wm. C. Spencer; "How to Get Into Television," Spencer Solaire; and "Talk That Gets Results," K. C. Ingram.

## Miners in Idaho Found Promise, Real Disappointment in '57, Official Notes

By GEORGE A. McDOWELL

(Idaho State Mine Inspector)

BOISE, Dec. 28 — The year 1957 was one of great promise and equal disappointment for Idaho's mining industry.

On the credit side of the ledger was the steady expansion of phosphate mining, development of the huge alumina clay deposits in Latah county and continued development of our large deposits of rare earth minerals.

The debit side was weighed down with the closing of more than 200 small producers, two small and one large tungsten producer and continued slump in gold production.

Some of the miners that closed down prior to this year were relatively small producers. While they were hurt by the low metal market, there were undoubtedly other factors which forced their shutdown.

However, those which closed in 1957 were definitely victims of lower metal prices. The tungsten industry, which had prospered in the foreign market, for instance, after 17 years of continuous operation, the Triumph mine, a lead producer near Hatley, closed down and left 11 men jobless.

Through the failure of congress to appropriate funds for the continued purchase of tungsten, the Inn miner, Patterson, shut down June 20, leaving 100 men and their families to seek other means of livelihood.

Chap Afton, production of cobalt, is putting the squeeze on the Calera Mining company, now the largest cobalt producer in the western hemisphere.

Another factor affecting the future of the cobalt operation, which provides jobs for about 400 men, is the drop in the price of copper from 20 cents a pound to 10 cents. Since copper is an important product of the Calera mine, the drop in price delivered a hard impact on the over-all operations. The copper production at this mine accounts for about half the state's total output.

The sharp curtailment of lead and zinc production in Idaho is planned on dumping of unneeded quantities of these metals on the U. S. market. The foreign producers, "Foreign lead and zinc can be produced 5 cents a pound cheaper because of lower labor costs for 50 to 70 per cent of mining costs in this

country. Domestic producers hope that some relief will come through the U. S. tariff commission.

Brighter spots in the mining picture for Idaho were in the fields of phosphate, mercury, uranium, tantalum and xenon.

The large alumina clay deposits in and around Latah county in northern Idaho contributed little to Idaho's mining industry this year, but they hold much promise for the future. The Ansco company expects to have a one million dollar pilot plant completed by the first of the year. Results of the test in this plant will determine whether the company will go ahead with plans that call for construction of a full scale alumina recovery plant in the Moscow area at an estimated cost of about \$10 million.

With increasing demand for phosphate and elemental phosphorus, the mines and plants of southwestern Idaho continued to expand.

In addition to present operations, the Utah Fertilizer company broke ground for the construction of a \$750,000 phosphate plant near Georgetown. The overall value of the installation will reach \$14,500,000 and will provide permanent jobs for some 200 persons and add at least two million dollars a year to the payroll of southeastern Idaho.

Although the price of mercury has

dropped from an average of \$257 per 76-pound flask in 1956 to \$232 at present, it is still high enough to provide encouragement for continued mercury mining operations in Idaho. The price is still above the government price of \$23.

Great portion of Idaho's mercury production is coming from the Flare Metals corporation of America, property near Wiley. An open pit mine, it processes about 175 tons of ore daily. The Flare Metals corporation expects to have a new 200-ton mercury flotation mill in operation prior to the first of 1958.

Production of columbium, tantalum and vanate by Porter Brothers corporation in Bear valley is going forward. This dredging operation has provided proof that the mineral wealth can be recovered and the dredged area restored to as good use, and in some cases better use, than prior to the dredging.

Idaho, the wonder storehouse of mineral wealth, looks forward to the future with confidence.
