

Treasurer of State Dies of Heart Attack

Heart Attack

McCALL, June 20 (P)—Idaho's state treasurer, Mrs. Ruth G. Moen, died today of a heart attack even as she

was preparing to take a brief vacation to gain needed rest. C. A. Swensen, who once before was named a state official by appointment, was chosen to succeed her. He was appointed by Gov. Robert E. Smylie.

Mrs. Moon was a Democrat and Swensen, U. S. Republican.

Blythe, also a Republican, acted quickly to make the appointment. If Blythe had not made the appointment, Mrs. Moon's successor could have been named by Lieutenant Gov. William E. Drexler, Democrat, who is presently acting chief executive when Blythe leaves the state for a trip to Russia.

The 62-year-old veteran Democratic politician's letter had a fainting spell during her talk and was hospitalized later in the day. She

The body was taken to Boise by the Summers funeral home but funeral arrangements were not announced immediately.

RUTH G. MOON
Mrs. Moon, Idaho's state treasurer, died today of a heart attack. She died as she was preparing to take a vacation for a needed rest. The 62-year-old official became ill Friday during a speech at the annual meeting of the Idaho State Teachers' Association in Boise.

Mrs. Moon was serving her third

NEWS-BULLETINS

LAS VEGAS, Nev., June 20 (U)—American scientists made their first full-scale test of an atomic rocket engine today and described it as completely successful.

FORT LAUDERDALE, Fla., June 20 (U)—Tall, slender Mrs. Margaret Wright, Las Vegas, mother of four children, tonight was chosen Mrs. American of 1950.

BLACK ROCK BEACH, Utah, June 20 (UPI)—A 3-year-old boy drowned tonight while his father was teaching him to float on the salty waters of Great Salt Lake at this resort beach area. The victim was identified as Ralph Barrett, son of Mr. and Mrs. Dallas L. Barrett, of Salt Lake City.

Repeat Tipsy Driver Sentenced to Drive

Sentenced to Prison

Lucas O. Thomas, Twin Falls, was sentenced to not more than five years in the state penitentiary Friday afternoon by District Judge Theron W. Ward. Thomas was found guilty Wednesday by a 12-man jury of drunken driving, second offense. Thomas was arrested by State Patrolman D. L. Cain April 1.

* * * * *

1959, five miles southwest of Twin Falls on highway 74. He previously had been convicted of a drunken driving charge by

[illegible]

residents of the court, said they noticed a person looking in the back window of the trailer. They yelled and the person left Brown

in a 1957 Chevrolet, was coming out of an alley at Third avenue and heading west. The driver, according to his car, was estimated at \$125 and to the Kiser auto at \$100.

Gooding City Patrolman E. J. Gooding cited Jerry Irish, 13, Gooding, for recklessness driving when he was driving a pickup truck on Fourth avenue east and also another vehicle heading west on Fourth avenue. Gooding said the driver, about 20 years old, was driving about 20 miles an hour. About 20 miles was done on the pickup truck, which was taken to Fred Lock, and the same amount to Nels's 1958

then took his 410 gauge shotgun and went outside where he stood for two near the rear of his trailer.

In a few minutes the suspect returned, carrying a rifle.

Public Forum Completion for Road up Rock Creek Is Urged by Area Man

Times-News:
The Twin Falls highway district should complete the Rock Creek road by the end of the year or three years, according to a public forum held here today. The forum was held at the Rock Creek ranger station, where the highway district and local residents discussed the progress of the road and the need for its completion. The highway district representative stated that the road is being built in sections, with the first section completed in 1958. The second section, from the first section to the top of the Rock Creek, is being built now. The third section, from the top of the Rock Creek to the top of the mountain, is being planned. The highway district representative stated that the road is being built in sections, with the first section completed in 1958. The second section, from the first section to the top of the Rock Creek, is being built now. The third section, from the top of the Rock Creek to the top of the mountain, is being planned.

Utah Youths Are Sent Home After Area Gas Thefts

BURLEY, June 20 — Five Salt Lake City boys were sent home Saturday after being banished from Burley by Private Judge Vern Carter for stealing gas from cars on a parking lot near the town hall at 8:30 a.m. John Stane called the sheriff's office after seeing two of the youths taking the gas. They and three other companions, who were uprooted getting food, were brought into private court where the judge ordered them to return to Salt Lake City.

The boys, Norman L. Patter, 17; Jerry Roy McCurdy, 18; Raymond Carl Anderson, 18; Merrill Binnall, 19; and Wayne S. Pearson, 17, were to radio local officers from the Stevens post of entry to prove they were en route home. Sheriff LePage Layton said. A five-gallon can and hose the youths had in their possession were confiscated by the sheriff.

4-H Club Meets

DETCO, June 20 — Carolyn Whipple gave a demonstration on hand washing at a meeting of the 4-H club at her home Thursday. Plans were discussed for the 4-H picnic to be held at the 4-H picnic grounds. The 4-H club members were present.

1. The first group of people who are likely to be affected by the proposed project are the local residents who live in the vicinity of the project site. These residents may be affected by the project in a number of ways, including increased traffic, noise, and air pollution. It is important to identify these potential impacts and to develop measures to mitigate them.

Sunbonnet of Not too Long Ago Modeled by Miss

Mrs. A. E. Kunkel is adjusting a sunbonnet which is guaranteed not to "blow off" or "blow off" on Cynthia Loughmiller, a young Salmon tract neighbor. The sunbonnet is made from a pattern that was demonstrated at the second meeting of the Salmon Tract Homemakers club more than 25 years ago. The club was the first home demonstration club in this area. Mrs. Kunkel is the only charter member remaining in the club. (Staff-entertaining)

Subject Doesn't Change—Conditions, Methods Do

Subject matter for home demonstration club lessons hasn't changed much in the last 25 years but there is a vast difference in methods and the conditions under which they are given.

The Salmon Tract Homemakers club, the first in the area, no longer has to cut its meetings short when it rains because the road, once impassable, can now be driven on. It also has a collection of postcards to notify members of meetings because there are no telephone phones.

Mrs. A. E. Kunkel, the only charter member remaining in the club, recalls that the club was organized March 11, 1933, by 14 women who met in a rooming house on June 30, 1933, by the time the first year was completed.

Madeline Clements was home demonstration leader and at the first meeting, "cereal," both cultivated and wild, were discussed with members deciding to plant green onions at once for spring minestrone.

To the second meeting, Miss Clements brought a sunbonnet which was guaranteed not to "blow off" or "blow off."

She also gave each member a seed which they were to plant in the fall save the seeds to give to others.

The third meeting was attended by Marion Heworth, state home demonstration leader. She talked on the use of Idaho products, such as apples, potatoes, beans and dairy products.

A few meetings later, the use of pressure cooker was explained and emphasized. Other lessons that first year were given on salads, dressings, especially children's, canning lessons on meats, tomatoes, squash and one on tomato soup.

Those were not just demonstrations. They were real.

Charles of the Ritz

Sharon Bennett, Edward Dickson Mark September

Marking September for their wedding are Sharon Bennett and Edward Dickson, son of Mr. and Mrs. H. I. Dickson, Wilton, Calif.

The engagement is being announced by her parents, Mr. and Mrs. Elmer Bennett.

The bride-elect, a 1958 graduate of Twin Falls high school, attended Idaho State college, Pocatello, where she majored in business.

Her fiance is a senior business administration major. He attended Sacramento Junior college and Sacramento State college.

Group singing was led by Mrs. Bennett and accompanied by Mrs. Bennett.

Mrs. Ferna Weatherly was a visitor.

Launch was served by the hostess and co-hostess, Mrs. Gail McGee.

UNITY LAD FETTER

UNITY, June 20—Mr. and Mrs. Gayle Pate honored their son, Gayle, on his 21st birthday anniversary with a family gathering Tuesday. Three present were little Gayle's grandparents, Mr. and Mrs. John Drew, Heyburn, and Mr. and Mrs. Alfred Peters, Twin Falls.

improving the inside as well as outside of the home, and family life.

A lot of new homes have been built in recent years and most old homes have been remodeled with modern fixtures added and walls being drilled, so that water does not have to be hauled. However, some of the old homes, especially those on the south of River area were installed in 1907. Now, nearly every home on the tract has a phone.

There is constant change, the club keeps up on the latest trends in food preservation, sewing and

improving the inside as well as outside of the home, and family life.

Engagements Announced

SHARON BENNETT (left engraving) MARLENE DIEHL (right engraving)

COLLEEN PARR (left engraving) KATHLEEN HELEN BRAY (right engraving)

Colleen Parr is engaged to be married to Wendell, June 20—Mr. and Mrs. E. E. Parr announce the engagement of their daughter, Colleen, to Edward W. O'Brien, Jr., son of Mr. and Mrs. Edward W. O'Brien, Jr., Lewiston.

Miss Parr was graduated from Wendell high school in 1957 and has been attending the University of Idaho, Moscow. She is majoring in education.

O'Brien was graduated from Lewiston high school in 1957 and is a science major at the university.

AUG. 16 has been chosen as the date for the wedding.

CLASS HAS PICNIC

UNITY, June 20—The Keynote class of the Christian church in Lewiston met at the Mayor's park Sunday for a picnic.

The opening prayer was given by the pastor, Mrs. John Drew, class teacher. Mrs. John Drew, Mrs. Everett Johnson led the devotion and Everett Johnson gave the closing prayer.

He will be happy, too, to have a word, a note, a telephone call or even a telegram from those children far from home. This is his day and that is not too much to ask for one who has done so much.

He will be happy, too, to have a word, a note, a telephone call or even a telegram from those children far from home. This is his day and that is not too much to ask for one who has done so much.

Tidwell Sets New American Turdle Record, Two Other Marks Beaten in AAU Meet

BOULDER, Colo., June 20 (UPI)—Kansas university speedster Charlie Tidwell set a new American record in the 200-meter low hurdles today at the national AAU track and field championships here in a close race with Hays Jurek of Eastern Michigan university. Tidwell cleared over the distance in 22.6 seconds, shaving one-tenth of a second off his own American record of 22.7 and bettering the old AAU mark of 23.3 seconds set by Harrison Dillard in 1946.

Overlooked Badgers Win Rowing Regatta

SYRACUSE, N.Y., June 20 (UPI)—Wisconsin, the crew everyone overlooked, defeated Avered Syracuse and nine other rivals on sun-blasted Onondaga lake today to win the varsity three-mile race of the 57th annual Intercollegiate Rowing association regatta. In contention all the way after a good start, coach Norm Soule's heavyweights found a brisk 16-mile-an-hour head wind no obstacle. Wisconsin grabbed the lead at the halfway point and then blasted challenges by Syracuse and Navy to win the regatta Saturday.

Air Force Is Out to Scalp Service Teams

NEW YORK, June 20 (AP)—Col. John Miller, son of Gen. and Mrs. John Miller, of Goring, was a member of the Syracuse university rowing team which placed second in the Intercollegiate Rowing association regatta Saturday.

Grange Hears Opposition to Pending Bill

JANSEN, June 20.—Action taken by the Twin Falls Potomac Grange opposing proposed cuts in the mixed grain bill pending in the congress was reported at the Jan. 20 meeting of the agricultural committee. The committee noted that since more than half the grain grown in Twin Falls county is mixed grain, the bill will affect local farmers. The pending legislation would cut the proportion of wheat in mixed grain to 25 per cent.

It was reported that Mrs. C. M. Wenzel was ill.

Mrs. Don Dietz reported that a pair of vases with a three-step vase, which matched other also appointed at the Community Methodist church, had been ordered as a memorial to her mother, Mrs. Louise Holm.

The Grange had contributed to the memorial fund for the church.

During the lecture hour, Mrs. Maurice Capps and Carl Capps read poems. Women of the Grange sang "Silver Threads Among the Gold." Mrs. Capps dedicated a vase of roses to father in the Grange.

Roll call was answered with prices for safety at home and on the farm. Mrs. Jack Sanderson and Mrs. Capps read an article on the clothing thought.

Mr. and Mrs. Earl Barnes were hosts.

Weekly schedule for the Times-News sponsored Knott's lecture is announced by Larry Howe, league director.

Tuesday, 9 a.m. Idaho Power Shortcircuit vs. Willa Rumlars on diamond one; Stein-McMurray-Anderson vs. Arctic Circle Polar Bears on diamond two; Vellien Constructors vs. Jensen-Ulman on diamond four; Seven-up vs. Idaho Department store Willa Rumlars on diamond five and Oon-Oon Cuts vs. Valley Willa Rumlars on diamond six.

Board Notes Gooding Tops Cancer Quota

WENDELL, June 20.—Gooding county went over its quota in the April cancer crusade. Mrs. A. W. Williams, county treasurer and memorial chairman, reported at a meeting of the executive committee Thursday.

Quota for the county was \$2,250 and county workers collected a total of \$2,268.08 during the drive. Mrs. Edward Reay, Gooding, was named to the committee at a host luncheon.

Mrs. Ralph B. Fletcher, Gooding county chairman, announced the appointment of Mrs. S. K. Bunting, Wendell, as secretary to fill the vacancy created by the resignation of Mrs. Everett Lathrop, Wendell.

Board members declared to dispense with giving awards to workers by the state office.

Collections in the various communities include Tuttle, \$3,735; Idaho, \$1,063; Hagerman, \$2,115; Wendell, \$2,270 and Gooding, \$1,184. Memorials for the county totaled \$503.23 of the amount.

The resignation of Mrs. Nellie Hamilton, Wendell school chairman, was accepted and the vacancy will be filled by appointment.

Plans for Gooding county to host the spring training school was discussed. It was suggested the second week in March would be desirable. Specific plans will be announced by Mrs. E. E. Kelly, Gooding, and Mrs. Bunting, Wendell.

Publicity directors for their area, Mrs. Reay, Gooding county education chairman, reported 15 showings of films prior to the April crusade.

Mrs. Leland Fleischman, Gooding, service chairman, reported service for four county cases.

Postponed

KING HILLS, June 20.—Albert Schulz, King Hill school superintendent, reported Saturday the second \$400,000 school bond election for additional elementary school facilities was postponed to July 21 because of a legal technicality.

It was originally slated for last Friday.

A Glens Ferry school board meeting Thursday night decided the bond issue had not been put on for a sufficient length of time. The election was rescheduled for 1 to 8 p.m. July 21.

Village Attorney At Paul Resigns

PAUL, June 20.—CHAUNCEY PLATT, chairman of the Paul village board, disclosed today that William T. Goodman, Rupert lawyer, has submitted his resignation as village attorney.

No reason was given for the action, which will be effective July 1. Board members said Saturday.

Platts mentioned receiving the letter from Goodman at the special meeting Wednesday night but no action was taken by the group.

Goodman was in McCall Saturday attending the Municipal League meeting and was not available for comment. He has served as Paul village attorney since Sherman Bellwood became district judge.

Amounted to \$219.16, in addition to one sick room treatment patient.

Others attending were Mrs. Maynard Hill, Gooding city chairman; Mrs. Harold Johnson, Gooding rural chairman; Mrs. Hugh Caldwell, Wendell area chairman; Mrs. Orlando Jacobson, Wendell, city program chairman; and Mrs. Veronica Maud, county public health nurse.

Return Home

DIETRICH, June 20.—Mr. and Mrs. Ed Edwards and Mr. and Mrs. Jack Edwards returned home this week from Bellingham, Wash., where they visited relatives.

They also visited relatives in other Washington towns, including mother, Mrs. Edna McCune.

Picnic Facilities Provided at Hot Springs Now

The Rev. Mr. Kenny, Christian church pastor at Kimberly, one of the new owners of Magic Hot Springs, stands in the garden at a resort. The new owners have ambitious plans for the area resort. (Staff photo-engraving)

Expansion of Resort at Magic Hot Springs Slated by Owners

One of Magic Valley's oldest and most popular resorts, Magic Hot Springs, is now under management and in the process of being reconditioned and enlarged. The attraction is Magic Hot Springs, 42 miles south of Twin Falls.

Freak Gun Accident Took One Eye

William Anderson, torch operator for the L. L. Langdon Wool Warehouse scrap metal operation, lost a shot of one eye last fall in a freak gun accident. He was struck in the left eye with a pellet from a carbon dioxide gun from a distance of only two feet. The pellet hit at an angle or it could have killed him. Anderson reports he has had little pain from the accident, but he points out that it is an example of how an air rifle, or any firearm, can be exceedingly dangerous if it is not handled safely. (Staff photo-engraving)

Carbon Dioxide Pistol Blinds Man in One Eye

Anderson "didn't know he had been hit. He says it felt as if someone had lightly touched his eye with a finger. But his companion noticed the wound and within a few minutes Anderson was in a doctor's office. He lost the sight in that eye, but the miraculous thing about the accident is that he says he has never had one bit of pain as a result of the wound.

The pellet struck his eyeball and just underneath it, an angle, lodging just underneath his skull about two inches back of his eye.

"It's just a miracle that I'm here today," Anderson says. "Go far," and he reaches out and knocks on

by the Rev. Mr. Paul E. Kenny and his wife and the Rev. Lloyd M. Balfour and Mrs. Balfour. The Rev. Mr. Kenny is a state secretary of Christian Churches in south Idaho and Utah. They bought the resort from George Dallmeide, Twin Falls, who has owned and managed the resort for the past 16 years.

The Rev. Mr. Kenny became interested in the resort after he spent some time there in early March in an attempt to cure some arthritis that had been bothering him.

When he returned to Kimberly, he was soon visited by the Rev. Mr. Balfour, a friend who had helped get the Rev. Mr. Kenny for the Kimberly Christian church three years ago.

The Rev. Mr. Kenny was enthralled about the results of the hot water baths and told his friend about the springs. In the meantime, the Rev. Mr. Kenny had found out that the springs were for sale.

As they talked about the springs, both became interested in the possibilities of such a resort and eventually bought the place in late March.

Mrs. Kenny will manage the resort. The Rev. Mr. Kenny says he will have little time to devote to the resort since he became a full-time pastor for the Kimberly church beginning June 1. For the past three years he has taught at Hansen high school. He taught business classes and sponsored the school annual and newspaper.

Ambitious Plans Noted

The two couples have some ambitious plans for the resort. The Rev. Mr. Kenny says, "We want to develop the area and when we get it fully developed and paid for, we plan to channel a good deal of the profits into religious work."

He stresses that such a program is a long way off and that they haven't fully decided what type of religious program they will sponsor. But he explains that the money might be channeled into programs to support both overseas and home missionary work in the church, scholarships for students interested in taking training in religious work, church building and development funds, camp sites for church groups, and a church retreat and chapel might be constructed in the hot springs grounds.

Few Possibilities

These are just a few of the possible programs that could be supported by funds raised by the resort.

Professor Following Old Paths Of Man at Brown's Bench Camp

"To understand man you have to understand the path that he took. That concept was made last week in Twin Falls by Alfred Bowers, associate professor of anthropology and sociology at the University of Idaho.

Bowers was explaining the reason anthropologists and other scientists spent so much time and energy studying prehistoric cultures. Bowers arrived in Twin Falls on June 18 and will be in this area until Sept. 4. During that time he will direct study of an ancient Indian campground, the hot waters of Cedar creek on Brown's bench. Bowers will be assisted by a crew of students from the university.

Financed by Grant

The research is financed by a grant from both the National Science Foundation and general university research funds. Bowers explains this project is a cooperative project between his department and the college of mines and geology. They will work together in evaluating the data gleaned from materials found at the camp site. The site was first pointed out to Bowers in 1935 by Leslie V. Dean, a Twin Falls man who has been an ancient amateur anthropologist for many years.

Since then Bowers and a few students have worked at that site during the intervening summers. They have discovered the particular site was first inhabited by an ancient chopper culture—a culture named after the way they employed chopping stones to form their ancient tools and weapons.

Pointing out the ancient heritage in this area, Bowers says there are signs the campsite was inhabited long before some of the first human towns were found in Mesopotamia about 4,000 B.C.

Moving Indiana Lived Here

He says the first inhabitants of this area were small bands of roving Indians, descendants of a Mongolian race that originally crossed a span of land in the Bering sea region.

Judging from evidence at the campsite the first inhabitants were primarily gatherers—people who did little hunting and existed on what food they could gather from their environment.

Bowers says the campsite was occupied seasonally by these people, probably during the warmer summer months. After a few thousand years the chopper culture turned into a hunting culture.

This is evidenced by the type of hunting points that have been found at the site.

(Continued on Page 11, Column 1)

Dr. Alfred Bowers, director of the research currently under way on Brown's bench and professor of anthropology and sociology at the University of Idaho, watches as Paul Barnes, Kansas City, Mo., a recent graduate of the University of Idaho, scrapes soil from the excavation site. The soil will be screened for artifacts. After the surface soil is removed, Bowers expects to find many artifacts dating back to an ancient culture that used the campsite about 10,000 years ago. (Staff photo-engraving)

T.F. Resident Is Pleased Over His Contribution to Research

A resident of Twin Falls for many years was greatly pleased when he saw the fruits of his labor make a contribution to scientific history.

The man is Leslie V. Dean, a man who has been an enthusiastic amateur archeologist and has explored nearly every niche and cranny in this section of southern Idaho.

On June 18 work began on an ancient campsite Dean discovered about eight years ago on Brown's bench at the headwaters of Cedar creek. The site is being excavated by a group of students under the supervision of Dr. Alfred Bowers, professor of anthropology and sociology at the University of Idaho.

Information Expected

According to Bowers the site should reveal considerable information about a culture that existed in this area more than 10,000 years ago.

Bowers notes that many amateur students of ancient cultures who live in camp ruins for artifacts contribute nothing but confusion to the search for more information about ancient cultures. But he adds that the work of Dean has added the work of serious students to this area.

Bowers explains that Dean, unlike many potter and arrowhead hunters, kept records of the camp sites he found. When he found a site that he realized was truly ancient he contacted the university about his discovery.

Crew Works at Site

Now under a grant provided by the University of Idaho and the National Science Foundation there is a crew at the site to finish the work and determine the age of artifacts.

Bowers hopes if more amateurs took the precaution that Dean has taken in the past, the job of the hobbyist would be to offer an intelligent outdoor activity to his two sons, Leslie V. Dean, who lives in Twin Falls and is a plant pathologist for the University of Idaho, and Lee H. Dean.

From that time until now he has been an ardent student of the ancient history of this area. In recent years his health has kept him from engaging in longer expeditions.

Dean notes that most of his exploration was done in the area between Swan Falls and American Falls, and that about 20 per cent

(Continued on Page 11, Column 1)

Leslie V. Dean, Twin Falls, has devoted more than 20 years of his life to the study of this region's ancient history. As an amateur archeologist he has traveled from Swan Falls on the west to American Falls on the east, in search of artifacts that reveal more about the ancient history of this area. Dean has a collection of more than 4,000 artifacts found in old campsites. He holds one of 33 parcels of Indian arrowheads and spearheads. (Staff photo-engraving)

Sagebrush Monument Dedicated to Pioneer Families

Mrs. David L. Harrison, Jerome, a member of the Pioneer Ladies club, examines the newly erected monument dedicated to Jerome pioneer families. The monument was dedicated by Mrs. Frank T. Jones, president of the club. It is located on highway 25 on the southwest

corner of North park. The inscription says, "Dedicated to Jerome's pioneer families, created 1959 on their 50th anniversary, Pioneer Ladies club." The monument is a planter filled with sagebrush. (Staff photo—graving)

Life in MAGIC VALLEY

The Jerome Ladies Pioneer club celebrated its 50th anniversary by dedicating a brick planter, planted in the city of Jerome this week. The planter is in the southwest corner of the north park. This location was chosen because it was the site of Jerome's first church, which was built in 1909.

Dedication ceremonies were held Monday noon in the city park. Mrs. Frank T. Jones made the presentation address. She said the sagebrush was appropriate for the city park because 50 years ago that was the only vegetation to be found in this area.

She described the monument as being both friend and enemy. Friend because it was the only fuel of the first families, and because for hundreds of years it had protected the land from erosion of the wind; enemy because it was so reluctant to give up the soil and required hours of back-breaking toil with a grub hoe to clear the land.

Mrs. T. Jones likened the town of Jerome to the sagebrush—it was so barren, but an evergreening town, which has grown slowly but steadily, and like sagebrush, refuses to give up. Also like the sagebrush, Jerome and communities like it prevent the erosion of all that is good and wholesome, and constitute an ideal setting for raising the citizens of the future, she said.

Ted Bruckner, senior member of the Jerome city council and also a member of a pioneer family, ac-

cepted the memorial for the city. Bruckner, in his acceptance speech, praised the hardiness and the endurance of the pioneers, and pointed out the pride they should take in the fruits of their labors.

Mrs. Eva Wise gave the invocation for the dedication and Mrs. Stella Moore sang the song she wrote, "Carry Me Back to Old Jerome."

The Pioneer club was formed in 1909. The first meeting was held at the home of Mrs. Paul Karlake, who was the first president. There were 81 members the first year. Four years later this had dropped down to 51 because many could not endure the hardship and had returned to their former homes or sought pastures already made green.

The remaining members, with the exception of those who have died, have maintained a permanent residence in Jerome. There are 15 charter members still living in Jerome. Those attending the 50th celebration included Mrs.

Allice Lawless, Mary Speakman, Mrs. M. W. Wolfe, Mrs. Stella Moore, Mrs. Lela Garrett, Mrs. D. W. Fuhrman, Mrs. Lela Updegraff, Mrs. D. A. Harrison, Mrs. Margaret Callen, Mrs. H. D. Cook, Mrs. Bertha Fairman and Mrs. Eva Wise. Mrs. Sylvia Gleason, Mrs. Anna Jane Robinson and Mrs. Myrtle Bishop were unable to attend.

The idea for a memorial was conceived 20 years ago and the fund slowly accumulated within the group. When World War II started, the memorial funds were invested in war bonds, which were not cashed until this year. The memorial also represents the group's cooperation in financing a national emergency.

Original membership requirement was that a person had to be in residence in Jerome by April 1, 1909. Several years later this time was extended to April 1, 1910. At present, daughters and daughters-in-law of the original members have been added to the group at second generation members. There now are 38 members.

At the luncheon following the meeting it was decided that the minutes of the 50th meeting be included in the present minute book, which will then contain minutes of the first fifty years, and that it be put in a fireproof place to be preserved.

Officers of the past year have been Mrs. T. Jones, president; Mrs. Clara Hines, vice president; Mrs. Clyde Elliott, secretary and Mrs. Bertha Fairman, treasurer.

Aldrich Bowler, a teacher in the

AS YOUR MINISTER SEES IT

BY GEORGE H. BRIGGS
(Pastor, East Hebrew Church of Nazareth)

"Who is among you that walks in darkness, and hath no light? Let him trust in the name of the Lord, and stay upon his God." Isa. 60:1

A railroad engineer tells his experience of a foggy night. He said, "We could not see a rod before us. But I knew that the permanent rails were under my wheels and then we would catch a glimpse of some signal or other. In time we came safely to the end of the run, our journey's end."

"So we, as Christians, can say in our darkest hour, when friends and experience fails us, that if we hold to the permanent lines of truth on the one side and obedience on the

other, God will give us some encouraging signals, and guide us safely through the fog and darkness."

It comes to everyone of us this feeling of loneliness—not in actual mountains, but a greater isolation of uncertainty and bewilderment. The person who is described in the scripture text is a real Christian, one who "fears the Lord and obeys the voice of his servant."

But even the best Christians sometimes have the severe test of suffering through a period of darkness and discouragement. It is a severe test, yet the Christian walk must be continued. It must be continued in faith. When we walk in the dark we should trust God.

The words are, "Let him stay upon his God." It means let him trust upon his God; let him make God his stay, his rest, his rest.

God's promises are not made just for times that are bright, but may be utilized fully in the dark hours, when the fog is thick.

If we cannot trust Him when, we might wonder if we trust him at all. But if we do trust the commandments and promises of God, He will guide us and bring us safely through, for the promises of God are true and amen to those who believe. "Who is among you that walks in darkness, and hath no light? Let him trust in the name of the Lord, and stay upon his God."

God's promises are not made just for times that are bright, but may be utilized fully in the dark hours, when the fog is thick.

If we cannot trust Him when, we might wonder if we trust him at all. But if we do trust the commandments and promises of God, He will guide us and bring us safely through, for the promises of God are true and amen to those who believe. "Who is among you that walks in darkness, and hath no light? Let him trust in the name of the Lord, and stay upon his God."

God's promises are not made just for times that are bright, but may be utilized fully in the dark hours, when the fog is thick.

If we cannot trust Him when, we might wonder if we trust him at all. But if we do trust the commandments and promises of God, He will guide us and bring us safely through, for the promises of God are true and amen to those who believe. "Who is among you that walks in darkness, and hath no light? Let him trust in the name of the Lord, and stay upon his God."

The words are, "Let him stay upon his God." It means let him trust upon his God; let him make God his stay, his rest, his rest.

God's promises are not made just for times that are bright, but may be utilized fully in the dark hours, when the fog is thick.

If we cannot trust Him when, we might wonder if we trust him at all. But if we do trust the commandments and promises of God, He will guide us and bring us safely through, for the promises of God are true and amen to those who believe. "Who is among you that walks in darkness, and hath no light? Let him trust in the name of the Lord, and stay upon his God."

God's promises are not made just for times that are bright, but may be utilized fully in the dark hours, when the fog is thick.

If we cannot trust Him when, we might wonder if we trust him at all. But if we do trust the commandments and promises of God, He will guide us and bring us safely through, for the promises of God are true and amen to those who believe. RIGHT NOW IS THE TIME...
As you know, last winter was especially hard on many furnaces and boilers. This year, more homes than usual will need a new heating system. To help this situation, Sears Pre-Season Heating SALE brings you worthwhile savings right now, so you can buy ahead of the rush. In addition to low prices, you are assured of prompt delivery. We can arrange expert installation and finance it for you with the materials or you can install-it-yourself. Central heating is sold on terms of NO MONEY DOWN and NO PAYMENT 'TIL OCTOBER 1st... ask about SEARS MODERNIZING CREDIT PLAN.

HOMART
COMPLETE OIL HEATING SYSTEM FOR OVERHEAD FORCED WARM AIR...
Everything Included:
• HOMART "200" Oil Fired Furnace
• Protective fan and limit switch
• Primary control
• Barometric draft regulator
• Oil line filter with cartridge
• HOMART thermostat by Honeywell
• Warm off and return air plenum chambers
• 275 gallon oil tank
• One return air register
• Pipe and fittings for 5 warm air runs
• Ductwork for the return air run
NO MONEY DOWN—NO PAYMENT 'TIL OCT. 1st
up to 36 months to pay... ask about Sears

OTHER LOW-PRICED CARS WOULDN'T BE LOW PRICED IF THEY HAD WHAT CHEVY HAS!
CHEVROLET
SAFETY PLATE GLASS IN EVERY WINDOW
How much is this eye-comfort worth to you? Only a few dollars more on cost. But when you start figuring what you get for your money Chevy widens the gap in a hurry. Look over the accompanying list of Chevrolet exclusives, then make a conservative estimate of how much they're worth to you. You'll have to do your own arithmetic. How long would the other two be in the low-price field if they gave you what Chevy does?
CRANK-OPERATED VENTIPANES
A pair of real fingernail-savers, as you know if you've ever tried to open a ventipane without that handy little crank.
HYDRAULIC VALVE LIFTERS
No other low-priced car gives you this oil-hushed assurance of smoother, quieter performance on all standard engines.
OVERHEAD-CURVING WINDSHIELD
This one's a real neck-saver, as you'll find the first time you pull up to one of those odd overhead traffic lights.
HIGHER RESALE VALUE
Your Chevy's worth more now—and still be worth more when you trade it. A look at last year's used car prices* shows Chevrolet averaged up to \$150 more than comparable models of the "other two."
FULL COIL SUSPENSION
A few minutes behind the wheel will leave no doubt what this is worth. Chevy's only leading low-priced car that co-dies you with coil springs at all four wheels.
BIGGEST BRAKES IN THE FIELD
Chevy's new Safety-Master brakes are built for up to two-thirds longer lining life. And you actually get more lining area than on many heavier, higher priced cars. How much is this extra margin of safety worth to you?
'GREATER ROOMINESS'
Chevrolet seating space is up to a full 5.9 inches wider than other leading low-priced cars. And Chevy even outdoes most of the higher priced sedans in front seat head room.
Make sure you get the most for your money—see your local authorized Chevrolet dealer!

Twin Falls Youth Helps Evacuate Campsite

Ted Long, son of Mr. and Mrs. W. H. Long, Twin Falls, is one of the workers searching for artifacts at the ancient Indian campsite. He screens dirt taken from the excavation and looks for artifacts. Long will be a sophomore at the College of Idaho next fall. He is a history major, but he says he has an interest in anthropology. (Staff photo-engraving)

Graduate Has Own Career Well Started

RUPERT, June 20.—For a young lady who has just graduated from high school, Sharon Crandall, Rupert, has a good start on her chosen career.

For the past year and one-half, she has operated her own dance studio in Rupert. Before opening her studio, Sharon had studied for nine years with four different teachers, serving as an assistant with three of them, including Donna Mauldin and Beverly Hackney.

For the past three summers, Miss Crandall has gone to San Francisco where she studied with the Shipley and Smith of the Dance, and at other specialty studios. She is a member of the National Association of the Dance and Affiliated Artists, Inc. Last fall, she attended a teachers' conference at Los Angeles where she participated in a full week of intensive training.

"We danced all day every day," she said, "learning at least one new dance routine each hour. The top teachers from the association were the leaders of these workshop sessions, and we really worked a lot, but did not even get tired."

Miss Crandall is attending another session at the San Francisco school and plans to attend the National Dance Association's convention in Texas later in the summer.

In her studio, she teaches tap, ballet, acrobatic, freestyle and ballroom dancing, and plans to add Latin and Hawaiian dancing next season. During the first year, her classes averaged from 35 to 40 students, but for the past year, have almost doubled in size. Her students are from age 4 on up.

In school, Miss Crandall was active in band and chorus. She had two years of band, two with the dance band and three years in chorus and was a student director her senior year.

This past year she did the choreography for the musical "Oklahoma," which the high school music department presented. She has directed the dance numbers for various assemblies. She is a member of the Pep Club and the Three-Plains group.

"I plan to devote all my time to teaching for the next year," Miss Crandall said. "Then I will take a full year of training before really settling down to operating a dancing school."

Chinook Salmon Protected to Reach Spawning Beds

Regulations provide protection for migrating chinook salmon such as these. They have halted their way for nearly a thousand miles past natural enemies and man-made barriers to lay eggs in shallow gravel beds in the headwaters of the Salmon river and other Idaho streams. Season closures and other fishing regulations give the female the time needed to patiently have over a chosen spot, to

turn over on her side and gorge her after hour, with legs swept of her powerful tail until a depression has been dug, then turn to dig with her breast tail, she deposits eggs in the hollow of the redd, where they are fertilized by the male. She then dies, making ophons of their offspring before hatching. (Fish and game department photo—staff engraving)

Idaho Salmon Fishermen Get Answers To Questions on Salmon River Rules

By JIM HUMBIRD

Idaho Fish and Game Department officials yesterday gave answers to questions on the new salmon fishing regulations which will be in effect when the fishing season opens.

Regulations for the new season are being explained to anglers at a series of meetings throughout the state. The regulations are designed to protect the salmon population and to ensure that the fishery is sustainable.

One of the key changes is the introduction of a new fishing license system. Anglers will now need to purchase a specific license for salmon fishing, in addition to their general fishing license.

Another important regulation is the closure of certain fishing areas during the spawning season. This is to ensure that the salmon can safely reach their spawning grounds without being caught by anglers.

The regulations also specify the types of fishing gear that are allowed. For example, only certain types of lures and bait are permitted, and the use of certain types of fishing boats is restricted.

Anglers are encouraged to follow these regulations carefully to ensure that the salmon population remains healthy and that the fishing season is successful for everyone.

of the 1959 fishing regulations which should be obtained by every fisherman before going afield.

Exceptions to the general and nighttime movements of chinook salmon are to be found at all points where the fish are extremely vulnerable to poaching. These include the major portion of the river, the Snake river, and the Snake river delta.

On the Snake river, the major portion of the river is closed to fishing. This is to protect the salmon population and to ensure that the fishery is sustainable.

On the Snake river delta, the fishing season is open, but with certain restrictions. Anglers are allowed to fish from dawn to dusk, and only certain types of fishing gear are permitted.

Anglers are encouraged to follow these regulations carefully to ensure that the salmon population remains healthy and that the fishing season is successful for everyone.

The regulations also specify the types of fishing gear that are allowed. For example, only certain types of lures and bait are permitted, and the use of certain types of fishing boats is restricted.

Three such streams having major runs of fish. These are the Snake river, the Snake river delta, and the Snake river delta.

On the Snake river, the major portion of the river is closed to fishing. This is to protect the salmon population and to ensure that the fishery is sustainable.

On the Snake river delta, the fishing season is open, but with certain restrictions. Anglers are allowed to fish from dawn to dusk, and only certain types of fishing gear are permitted.

Anglers are encouraged to follow these regulations carefully to ensure that the salmon population remains healthy and that the fishing season is successful for everyone.

The regulations also specify the types of fishing gear that are allowed. For example, only certain types of lures and bait are permitted, and the use of certain types of fishing boats is restricted.

Anglers are encouraged to follow these regulations carefully to ensure that the salmon population remains healthy and that the fishing season is successful for everyone.

Authority for Closure

In addition, Governor Leonard has authority to make emergency closures whenever it appears that the resource is being overharvested.

Generally speaking, spring chinook are managed in Idaho by stream closures during the spawning season, with the angling harvest occurring during the migration.

A partial exception to this occurs on the Snake river where the salmon are co-managed. The Snake river is a special case, and the regulations are different.

Anglers are encouraged to follow these regulations carefully to ensure that the salmon population remains healthy and that the fishing season is successful for everyone.

The regulations also specify the types of fishing gear that are allowed. For example, only certain types of lures and bait are permitted, and the use of certain types of fishing boats is restricted.

Martin Home Has Woman as Guest

EDEN, June 20.—Mrs. Donna Larson Kellogg, who accompanied Lennie Martin to St. Benedict's hospital, Jerome, from the St. Joseph hospital by ambulance this past week-end, was a guest at the home of his parents, Mr. and Mrs. Larry Martin. She visited friends at Twin Falls and the Martins took her to the plane to return home. Lennie was seriously injured in an auto accident that claimed the lives of three young men May 10 at Kellogg.

Mr. and Mrs. Ivan Barr and Loretta were guests this past week-end at the St. Joseph hospital. The party was given by Mrs. Chambers.

WOMAN ILL.—Mrs. M. J. Macan, Prier, is reported ill at her home with the flu.

It was in this back country, on the "River of No Return," just over a century and one-half ago that the emigrants of President Thomas Jefferson found ocean-run salmon so thick in the spawning waters that they men could spear them with their hands.

The number of salmon in the river is incredible," wrote Mortimer Lewis and William Clark to their patron in the District of Columbia. "Never have so many fish been collected together in one place before."

If the two trailblazers could return to the Salmon river in a few weeks the peak of the chinook run up the historic spawning way, they would not be disappointed. The chinook changes have occurred on the broad Columbia down which Lewis and Clark paddled on the last leg of their phenomenal journey. While still one of the great fisheries in the world, the Columbia today can't hold a candle to its past supremacy.

Dams Slow Water

With a series of eight hydroelectric dams proposed, under construction or completed on the Columbia and Snake rivers, there will be little or no chinook system's salt water mouth at Astoria to Lewiston, a distance of about 400 river-rigged miles.

These physical changes have posed innumerable problems, some of which will go without solution. Will the chinook fish migrate this far in slow-moving waters? Will they be able to find all the fish-ladder entrances? Will they ascend a series of eight ladders in a row and not lose valuable time and energy in making a mistake?

The answers to these questions to date apparently are in the affirmative—the fish can and do—though an equally important question persists. Will sufficient young salmon, and, of course, steelhead, be able to pass downstream over the

need for protection, in other words, comes during the spawning season when the chinook are vulnerable to sport anglers.

General fishing regulations restrict the taking of salmon to hook and line and also control angling hours, seasons, bag limits, gear and stream sections open to fishing. It is unlawful to "poach," seine, shoot, snare or molest with club, hands or other devices built obstructions for catching, chase up or downstream in and manner.

Eight Years of Work

Forrest R. Hauk, fishery research supervisor for the Idaho fish and game department, says that eight years have been spent in a program to trap spring chinook on the headwaters streams of the middle fork of the Salmon, as well as to make observations in other areas.

The department has demonstrated that chinook spawning begins, the fish select themselves only rarely and reluctantly. They move upstream at night or during twilight hours.

When the fish begin to spawn, they move into riffle areas, migrating up or downstream during the daylight hours. For this reason, some streams are closed to all fishing just prior to spawning time, thus effectively protecting the fish from being caught before they have laid their eggs.

Protect Spawners

Just last week, to illustrate a new announcement from the fish and game department called attention to the closure of several streams to salmon fishing for 20 days to provide protection for an early part of the annual chinook run. Director Ross Leonard said that the closure was a standard procedure in the south fork of the Salmon region and has been effective on designated waters for a number of years.

The closure from the evening of June 20 to the morning of July 15 is not of an emergency nature," Leonard pointed out. "They are all listed in the official copy."

Dr. Alfred Bowers, professor of anthropology and sociology at the University of Idaho, holds two spearheads found at the ancient campsite. He explains they are termed Eden valley obolites and have been found. They are usually associated with the territory east of the Rocky mountains. They were used to hunt an extinct buffalo that Bowers says often weighed about two tons. They are called obolites because of the oblique flaking method used in their construction by ancient man from pieces of obsidian—staff photo-engraving)

University of Idaho Professor Finds 'Old Paths' to Help Understand Man

(Continued From Page 11)

found. The area was a hunting culture until just a few hundred years ago and then it turned back into a gathering culture.

"What this tells us," Bowers says, "is that the Snake river valley was a better gathering area than it is today. It is common sense that they would make hunting equipment only if there was something to hunt."

Earlier Knowledge

Bowers explains that when scientists enter such an area, they take with them a wealth of knowledge gleaned from studies of other similar sites. They know how to analyze the evidence that is found. They know the chronology of early man's development. For instance, they know that spear-throwing as a means of hunting preceded the bow and arrow. Each tool and weapon has its history.

A recent method of measuring the age of ancient artifacts is "carbon 14" dating. Carbon 14 is a radioactive isotope that is found in carbon particles. By measuring the loss of radioactivity of that isotope within a certain particle, an accurate estimate of the particle's age is determined.

Steady Simple Forms

He explains that the student doctor first works on traps and the simpler forms of life. When he understands them thoroughly, he then studies the human body, the most complex form.

The same method of study can be applied to anthropology—or any science that deals with ancient man. First you study the simple culture and try to understand it, then you apply what you have learned to the more complex modern culture.

By understanding the older culture you may better understand modern man.

Bowers notes that study of ancient man makes you better appreciate the traditions and knowledge inherited from ancestors. By possessing the knowledge of the ages people are able to remake regions of the world to their liking.

Composite of Knowledge

He explains that society in Magic Valley is a composite of knowledge gleaned from all over the world and throughout all time. He says that even crops raised in Magic Valley are legacies of ancient cultures. Wheat came from the early culture of Mesopotamia, potatoes from the highlands of the Incas in South America, and corn was a crop of the American Indian.

"And I believe applies got someone in trouble in the Garden of Eden," Bowers muses.

"We are people, who by accidents of history, have access to the knowledge of the world," Bowers adds that in addition to the sheer scientific reasons for studying the area, there is also satisfaction received from gathering more knowledge about the region.

Time, Temperature Flashed 12 Times Minute

This is one of the newest additions to the array of signs in downtown Twin Falls. It is the new time and temperature clock recently installed by the Fidelity National Bank. The clock alternately shows the time and temperature 12 times a minute. The temperature is measured electronically from a unit atop the bank building by a measuring device similar to that used by the U. S. weather bureau. (Staff photo—staff engraving)

Big Temperature-Time Clock at Bank Stimulating Weather Curiosity Here

With the addition of a temperature-time clock to the array of signs in downtown Twin Falls, the Fidelity National bank, citizens of Twin Falls, Idaho, become more weather-conscious.

The large time and temperature clock is the first of its kind in Idaho. The sign flashes the time and temperature 12 times a minute. The temperature is measured electronically from a unit atop the bank building by a measuring device similar to that used by the U. S. weather bureau. (Staff photo—staff engraving)

Stearley says the temperature is actually measured in an insulated box. This avoids measuring the exact heat from the direct rays of the sun and generated from the roof tops.

Stearley notes that the bank of officers have considered installing such a sign for several months. In the meantime a few of the bank officers saw a similar sign on the coast and decided that they would install one in Twin Falls.

"Until now, the bank has had no sign other than the conventional window signs," Stearley points out. "It's a little sign that says 'Fidelity National Bank' and that's about all."

Registrants Must Not Alter Papers

Selective service registrants must not alter their registration certificates as the alteration may result in their induction into the armed forces as delinquents, said P. V. Norstrom, vice chairman of the Twin Falls county local board.

Each registrant is required by law to carry his registration certificate with him at all times. A recent amendment to selective service regulations requires that this registration certificate must not be altered or changed in any manner after it is issued to the registrant.

Violation of this regulation will make the registrant subject to induction as a delinquent and order for induction absent of any other registrant by reason of the delinquency.

Dietrich Family Goes to Seattle

DIETRICH, June 20.—Mr. and Mrs. Gene Kling and family have moved to Seattle where he is employed by Boeing Aircraft. They visited his parents, Mr. and Mrs. Floyd Kling, and her parents, Mr. and Mrs. Duane Aslett, last week.

Mr. and Mrs. Bill Dietrich and daughter, Tabi Ann, left for home after visiting his parents, Mr. and Mrs. W. E. Holton.

Mr. and Mrs. Art Thiel and family spent the week-end in Ostron, Mont., with her brother, Karl Ostron, and family.

Mr. Ostron is visiting her sister, Mrs. Dorothy Spencer, to Spokane this week.

Local Man Is Pleased Over Report Result

(Continued From Page 17)

Dean did something most unusual. He had a collection of all his findings in a notebook. Every artifact he found was noted in the notebook. This notebook is the one that is being used by the archaeologists to record their findings.

He catalogued his finds more than 15 years ago. He has a collection of some 4,000 artifacts gathered from about 100 sites.

His collection consists of dila, avia, scapera, arrowheads and spearheads, knife blades and other tools.

He treasures the artifacts he found at the site at Brown's bench more than any others in his collection.

He believes this discovery is the most valuable one because it contains artifacts from several different cultures.

He has found everything from some implements that date to about 10,000 years ago to an 18th century American dinner.

Dean says the camp site has been used by man through many years since it is so well situated. He notes that campers used modern man, such as archaeologists and others who spend considerable time outdoors, are often the same campers formerly used by Indians.

Dean says that the comparatively new interest in such activity has presented a new problem. Many persons who take little or no scientific interest in the camps are destroying valuable scientific information. They have little or no sense of purpose.

"I've tried to tell some of these fellows to catalog their material and to become more interested in the scientific aspects of the subject," Dean says.

He adds that if more persons don't take a more scientific attitude towards the study, he is afraid laws will be passed to prohibit such amateur excavations.

He notes Nevada already has passed such legislation. According to Dean, Nevada has a \$500 fine for digging in an Indian cave, the result of irresponsible excavating.

Right now Dean is looking forward to watching the excavations progress at the site on Brown's bench, and doing some additional reading in books dealing with his hobby.

Local Man Is Pleased Over Report Result

(Continued From Page 17)

Dean did something most unusual. He had a collection of all his findings in a notebook. Every artifact he found was noted in the notebook. This notebook is the one that is being used by the archaeologists to record their findings.

He catalogued his finds more than 15 years ago. He has a collection of some 4,000 artifacts gathered from about 100 sites.

His collection consists of dila, avia, scapera, arrowheads and spearheads, knife blades and other tools.

He treasures the artifacts he found at the site at Brown's bench more than any others in his collection.

He believes this discovery is the most valuable one because it contains artifacts from several different cultures.

He has found everything from some implements that date to about 10,000 years ago to an 18th century American dinner.

Dean says the camp site has been used by man through many years since it is so well situated. He notes that campers used modern man, such as archaeologists and others who spend considerable time outdoors, are often the same campers formerly used by Indians.

Dean says that the comparatively new interest in such activity has presented a new problem. Many persons who take little or no scientific interest in the camps are destroying valuable scientific information. They have little or no sense of purpose.

MAGIC VALLEY PORTRAIT Retired Jerome Postmaster Hartshorn Recalls Varied Life in U.S. and Alaska

A. H. HARTSHORN

JEROME, June 20.—Hartshorn, blacksmith, boatman, power plant supervisor, logger, hunter and postmaster—all these are occupations that A. H. Hartshorn, Jerome, has had during his long and eventful life in both the United States and the Yukon territory during the past 60 years.

Hartshorn first came to Jerome in 1919, fresh from the Yukon territory where he had spent the previous 20 years. He farmed near Jerome for several years, and in 1925 he became postmaster of Jerome.

Retired in 1950 Hartshorn was postmaster from 1925 until his retirement in 1950. Ever since he moved to Jerome and Idaho, he has been active in the Democratic party.

Hartshorn was born in Dundee, Mich., on Dec. 3, 1899. He completed nine grades of public school there and then went to work for his father, who operated a sawmill in southern Michigan.

In 1920, Hartshorn and his new wife came West. They moved to Olympia, Wash. He worked in various towns in Washington doing construction work for several years. Eventually he started working for the Northern Pacific railroad, but was laid off after the 1929 strike.

Became Blacksmith Hartshorn searched about for something to do and eventually purchased a blacksmith shop and worked days, nights and Sundays working blacksmiths in an effort to make a living.

In 1928 the gold rush to the Klondike began, and the lure of the northland caught Hartshorn's eye. He rented his blacksmith shop and started out for Gakway, Alaska. After packing equipment overland to the headwaters of the Klondike he and the lure of the northland did not allow him to travel on the river for another two or three days.

Hartshorn was annoyed by the delay, but he made the best of the situation. He packed up his tools and started out for Gakway, Alaska. After packing equipment overland to the headwaters of the Klondike he and the lure of the northland did not allow him to travel on the river for another two or three days.

Harold J. Stearley, cashier at the Fidelity National bank, displays the electronic clock that is the "brains" of the new time and temperature clock recently installed on the building. Every 24 hours the unit will give 12:50 time and temperature readings. In the event of power failure the batteries will keep the unit operating for 10 hours without missing a temperature or time reading. (Staff photo—staff engraving)

Burley Music Unit Outlines Winter Series

URLEY, June 20.—Evelyn Outland, field representative of the Community Concert, Inc., with headquarters in New York, met with officers of the Mini-Cassia Community Concert association here today to plan the winter series.

The first concert will be in November and the association has a hold date on the "Revelers," a male quartet. This is to be confirmed by the New York office. The "Revelers" will appear here on March 30, 1960. Other dates and artists will be announced later.

New officers elected last week for the Mini-Cassia Community Concert association are: William Morgan, president; E. R. Hoff, vice president; Mrs. J. W. David, membership drive chairman; Mrs. Charles Terhune, secretary.

The summer for the ticket campaign of the new concert series, "Revelers," will be held the week of Oct. 19 and new memberships will be sold the week of Oct. 26. The seating capacity of the "Burley" high school auditorium is 700 and the association is allowed to sell 10 per cent over this capacity.

American Super-Soldier Is Trained as Guerrilla

PT. BRAGG, N. C., June 30 (UP)—Without much fanfare the U. S. army has developed a breed of super-soldier capable of operating as guerrillas up to 2,000 miles behind enemy lines.

These unconventional warfare specialists have already stalked out areas of the communist world, including the Soviet Union and China, into which they plan to go under cover of night by submarine, parachute or on foot in event of war.

Study for Years
Some of the army's guerrilla detachments have been studying the terrain, customs, economics, language and culture of red-held areas for as long as six years.

So expert are these men in the art of disrupting and confusing conventional forces, they have been barred from participating in maneuvers both here and overseas.

The soldiers who make up these units know there will be no rotation, that once they are committed they will remain in enemy territory for the duration, whether it be a year or 10.

While the United States in the past has had noted guerrilla fighters and has sent spies and saboteurs into enemy-held territory to cooperate with existing partisan bands, this is the first time it has trained guerrillas in a systematic fashion as an integral part of U. S. forces.

Behind the creation of these detachments lie two simple beliefs expressed by Col. Everett M. Smith, assistant commander of the special warfare center here.

Exploit Unrest
1. There is no adequate defense against well-armed, well-organized bands.
2. We believe that wherever communism exists, there is civilian unrest. We plan to exploit that unrest.

Guerrilla warfare is not the only concern of the center. It also operates a psychological warfare school.

The system is supposed to work like this: The psychological warfare unit will create the anti-government climate favorable to guerrilla operations. Central intelligence agency operators will make the contacts to insure a friendly reception for the guerrilla specialists.

The chief function of these specialists is to arm, organize, train and advise the anti-government civilians. If necessary they will provide leadership.

There now are three guerrilla outfits, known as special forces groups—the first in China, the 10th in Germany and the 7th here.

While the over-all strength levels of the three groups are classified, they probably number fewer than 2,000 officers and men.

Planned to Beat Area
Colonel Smith says there have been estimates that with between 6,000 and 10,000 units to special guerrilla forces, literally millions of communist soldiers could be pinned to rear area duty in a war.

In time of war Smith envisions each of his 9 to 15-man teams operating over 100-square-mile areas. The largest guerrilla force one team can train is placed at 1,000 men, though they would never fight in a body, but in 50- to 100-man groups.

"The idea," says Smith, "is not to fight pitched battles, but to hit where they ain't."
No other American soldiers are trained as intensively as the men who volunteer for special forces.

These men are trained to operate exclusively by night. They are qualified parachutists, frogmen and swimmers. Any one of them can live

off the land whether it be jungle, mountain, desert or Arctic waste. They are experts with bows and arrows and authorities on every type of small arm used in quantity anywhere in the world at any time since World War I.

The special forces have a reason for becoming experts on old weapons; they are the type most likely to be found in the hands of civilians in red-held areas.

Why the bows and arrows?
There are times when guerrillas must operate silently, either to gather food or knock over sentries. At 40 yards with a 60-pound bow, you can drive an arrow through a man.

An arrow with a dynamite cap can be used to explode gasoline dumps from 200 yards or more away.

Live Off Land
Most of the guerrilla forces receive their initial living-off-the-land training in the Pisgah National forest near Asheville, N. C. They learn to eat snakes, trap and skin small game, and to butcher animals from goats to bears.

No man is accepted into special forces until he has had at least a year in the army. He must be a regular. Before he is considered qualified as the with training of a guerrilla team, he must have undergone 23 months of rigorous training from Hsagh to the Panama canal.

The end product is a smart, tough and ruthless fighter. Guerrillas cannot afford mistakes and squeamishness.

Before a man really is accepted for guerrilla work he must have demonstrated to the satisfaction of psychiatrists and officers that he is mature and emotionally stable.

A basic nine-man guerrilla team consists of an officer, a medic, a team master sergeant, two weapons sergeants, two demolition experts, a radio operator and a radio repairman. Every man is cross-trained in one or more jobs.

Borrow Doctrine
For tactics and techniques, borrowed forces have frankly borrowed heavily from communist military doctrine. The communists raised guerrilla fighting to a high art in China, Southeast Asia and in the Ukraine during World War II.

Special forces have also drawn from the operations of the great Apache leaders, Cochise and Geronimo; from Ranger Mosby of Civil War fame; from British experiences in Malaya, and even the Spanish operations against Napoleon in the Peninsula war of 1808-18.

The U. S. army also has its own experts, men such as Col. Donald Blackburn, commander of the 7th, who organized "Blackburn's Head Hunters" after the fall of Luzon in the Philippines in 1945.

From 1951 to late 1955 the existence of special forces was hidden behind the peaceful facade of the psychological warfare school. Then the war came off, though the army has been slow to publicize their mission.

Club Meets
RICHFIELD, June 30—Richfield Rod and Gun club held their only summer meeting Monday night at the school cafeteria. Fishing, archery and fish planting were discussion subjects, as well as fish pheasant bag limit.

Russell McKeever, Carey conservation officer, attended the meeting. The group will meet next in September.
