Unusual Sports

Unusual Sports

Traditional Christmas presents of skis and ice skates pose something of a problem for youngsters in Twin Falls and other communities located in the lower parts of Magic Valley. Most years, chijdren have to prevail upon their parents to take them to some locale where the necessary snow or lee is available to test the gifts: For skiers, that means a trip to the nedrest hills or as far as Galena summit during snow-starved years. Skaters can face a more difficult problem.

Night after night, parks and recreation department personnel in Twin Falls worked to build a skating rink at Harmon park. A cold spell cooperated and an ice rink was available for local skates. Then after a few days, moderate weather and rains raised hob with the rink, Perhaps the consistent cold necessary to form and maintain an ice rink may exist again later in the winter.

Along the same line, Bert Havens, the kanting farmer who lives adjacent to Wilson lake north of Hazelton, goes to a great deal of trouble to prepare the ice for skaters. But more often than not, weather changes and the ice is ruined after a few days of skating. Mr. Havens, and the promise of colder weather immediately after Christmas, may hold a promise of holiday week skating, at Wilson lake. The lake 'ttelf illustrates limited facilities for skaters, drawing enthusiasts from miles in every direction.

Skiters and skaters might just as well resign themselves to travel if they plan to induke in their favorite winter sports.

direction,
Skilers and akaters might just as well resign themselves to travel if they plan to indulge in their favorite winter sports. And the family that includes either skis or ice skates among Christmas gifts might just as well schedule a Christmas day trip to the hills or someplace like Wilson lake.

SEARCH FOR WATER

SEARCH FOR WATER

Many minds are occupied these days with ways and means of Inding Irrigation water for the vast Bruneau desert. The problem is nothing new, but it acquired something of a sense of urgency when the air force announced recently that it will release 530,400 acres of the Saylor creek gunnery range.

The search for water can be expected accover the use of deep wells, but explorations of that nature havo failed already in some parts—of the Bruneau desert. Apparently the area has he such vast underground reservoir as exists north of Snako river between American Falls and Bills.

Bliss.

Use of stream flow is complicated by the deep caryons with porous lava wallshaft are common to the desert. Additionally, atreams slashing north through the lesert dufin relatively amall watersheis.

Snake river, which skirts the Bruneau clear to the north, has some water called the control of the

able problems involved in pumping the water up to the desert plateau.

All of these avenues of obtaining water are likely to be explored by those who would farm the Bruneau desert. The soil is every bit as good as that on the Twin Falls tract and the area being released is half again larger. Some of the original promoters of the Twin Falls tract envisioned a canel system extending onto the Bruneau desert, yet nearly 60 years later, only small portions have come under cultivation.

When the 330,400 agres of the Saylor creek range are released to public user there will be a flurry of filings under desert land rules, particularly for some districts which may appear to offer a better chance for irrigation wells. But there's reason to auspect that a vast portion of the gunnery range will not be brought under cultivation soon.

Sufficient water remains the big, unsolved.

JUNGLE DISPUTE

JUNGLE DISPUTE

Indonesian President Sukarno didn't minee words when he called on his armed forces to be ready to invade Dutch New Guinea at any moment. It was the second time recently that the jungles and mountains of Dutch New Guinea had broken into the news. The first time was the disappearance of the youngest son of Governor Rockefeller,

Natural resources of Management of Management of the Natural resources of Management of Man

Guappearance of the youngest son of Governor Rockefeller.

Natural resources of New Guinea may be considerable, yet what civiliation has touched the huge island has been confined largely to the coastline. Large regions of the interior are marked "unexplored" on most maps. All of which doesn't explain why President Sukarno is so willing to declare war against the Dutch. The natives of the area, mostly backward, aren't much of a prize, either.

U. S. veterans who saw action in the Pacific in World war II and who read of the threatened war for Dutch Now Guinea's jungles and mountains, are likely to zead with the fleeting thought that it's nice someone else is doing the Stating this time.

WONDERFUL NEWS FOR TWIN FA

Beginning February 18, you will be able to dial your own long distance calls within the state and across the nation!

There's a marvelous new experience just around the corner for you and your family. On Sunday, February 18, the miracle of Direct Distance Dialing will become a reality for thousands of homes and offices in Twin

You will be able to diet direct from either your home or office telephone on February 18 if you have a one- or two-party telephone line in the Twin Falls exchange area.

Before February 18, we'll mail complete information to you. The new Twin Falls telephone directory will contain a list of other cities — both within Idaho and throughout America—that you'll be able to reach when you start Direct Distance Dialing.

Meanwhile, here's a money-saving tip: Whenever you can, call station-to-station instead of person-to-person. You'll not only find it more economical, but you'll also be getting in practice for Direct Distance Dialing—since only station-to-station calls can be dialed direct.

In the coming weeks, we'll be telling you more about Direct Distance Dialing. We're proud to be able to bring its lar-reaching benefits to Twin Falls.
