Miners in France Snub Newest Offer

PARIS, March 15 (AP)—French 167,000 striking coal miners took a conciliatory move from President de Gaulle's offer of a 10 percent wage increase.

The cabinet, after a long discussion of the strike situation, decided to start a series of studies of the mine and fuel problem. A socialist union spokesman said the offer of such a study had been made three months ago.

A cabinet spokesman said de Gaulle no longer plans to make a radio-television appeal to the strikers to abandon their defiance of his government. The spokesman said the president has not yet decided when the state is in danger, and de Gaulle doesn't believe the mine strike is endangering the state.

Degree Work Conducted at K. H. Grange

KING HILL, March 15—First and second-degree work was given to new members of the King Grange No. 100.

New members are Mr. and Mrs. Charles W. Taylor, Mrs. Freeman Yingsit and Mr. and Mrs. Martin Finlayson.

Mrs. Charles Woodward, leader of the Grange, presided over the ceremony. She was assisted by Mrs. Yingsit and Mr. Finlayson.

The Grange is a fraternal organization that provides a variety of services to its members, including social and educational activities.

The Grange also provides a place for members to meet and discuss community issues. It is a place where members can help each other and their community.

The Grange is a place where members can find a sense of community and belonging. It is a place where members can help each other and their community.

CHERYL BLOSSOM PRINCESS from Idaho is Virginia Ann Blake, 20, who posed Thursday with her new crown and Sen. Frank Church, D. Ida., at the capitol. The princess was the guest of the senator and other members of the Idaho congressional delegation at a luncheon, Miss Blake, daughter of Mr. and Mrs. Richard Blake, Moscow, Ida., resides in Arlington, Va. (AP wirephoto)

Rotating-Wing Birds, With Voices, Lead Assembling of Yellowstone Elk

used in the past but herding the elk with "Innes" traps. Of the 1400 elk trapped, some escaped through an experimental fence installed under makeshift conditions in the cool peak of the winter. But 1000 were kept about 700 of them transplanted by the states of Wyoming and Montana and the rest handed for migration studies.

"Our hope is that in the future the national annual harvest required to keep the herd within the carrying capacity of the range can be accomplished by maintaining the hunting season north of the park until the animals have had a full opportunity to breed. A similar setup was installed on Slough creek, a favorite haunt of the northern elk herd of the park. Some 700 were captured here, he said.

The next vital step in the program will be an intensive elk and deer census in the immediate area of the park, he said.

Jerome Youths Urged to Apply For Alpine Camp

JEROME, March 15—W. C. Priest, Jerome county extension agent, announces all Jerome county boys interested in attending the Alpine A-H summer camp on Baldy are urged to apply.

This is the fourth annual University of Idaho conservation camp for boys. It will be held June 1-15.

Boys who have completed the freshman year of high school, from all southern Idaho counties are eligible and invited to apply.

The camp fee of \$25 includes meals, lodging, insurance and miscellaneous items. All phases of conservation such as fish, game, forestry, weathering, trees and soils are included in the program.

Application can also be made directly to Tom Chester, Box 280, Post Falls.

GIRL HONORED
DIETRICH, March 15—Janet Orr, a sophomore at the University of Idaho, Moscow, has been named to the dean's list for high scholastic achievement.

Miss Orr is the daughter of Mr. and Mrs. Franklin Orr, Dietrich.

Area Track Coaches Okay 20-Meet Spring Season; T.F. Will Host District

JEROME, March 15—Twin Falls high school was awarded the district track and field championship Thursday night as fourth-district coaches lined up the spring sports calendar for Magic Valley. In addition, the eight golfing schools set up a series of week-end schedules but that was a separate matter.

Horses Outdo People For Pan-Am Games

NEW YORK, March 15 (AP)—Horses are going to have it better than people at the Pan-American games next month in Sao Paulo, Brazil. There is a lot of work yet to be done but those who are really battling people working around the clock, said J. Lyman Birmingham, executive director of the U. S. Olympic association. "They say we'll be ready and I can believe it."

Clay Handler Looking Over New Offers

NEW YORK, March 15 (AP)—Next step for Cassius Clay is an open while he learns program. You can be sure he's going to earn plenty.

Defending Champion Oregon Opens Track Season vs. Bears

Defending NCAA champion Oregon launches its outdoor track season Saturday with a team that looks good enough to win again. The Ducks will host California in the feature meet of the West Coast's first full week-end of spike activity. Oregon State visits San Jose and Washington State conducts an indoor meet. In the Los Angeles area, Southern California and San Diego State are scheduled for April 23 at 3 p. m. with the seven regular members plus Valley competing. The meet will feature a type of elimination for the district meet. At that time the seven class A teams will eliminate one relay team and place only five in the 400-yard dash in the district due to limitation of seven teams around the curve in Twin Falls.

Bolt Seizes Early Lead In Golf Meet

PETERBOROUGH, N.H., March 15 (AP)—Tommy Bolt admits he has melonced a bit, but he still has the same old ability to hit a golf ball and the same old flair for a phrase.

Protest Is Made on Eve of Title Bout

LOS ANGELES, March 15 (AP)—Angeles, the manager of welterweight champion Emilio Grifflin, angrily protested again today the decision that the champ must weigh in at his challenger's ballpark for their Saturday night fight.

Eastern Division Wins Ski Event

JACKSON, Wyo., March 15 (AP)—Jerry Vermin, carrying the colors of the Eastern U.S. division, won the individual cross-country ski in the Junior National Ski Championships Thursday with the fast time of 39:48 minutes.

96 Lincoln Farms Sign For Program

SHOSHONE, March 15 — Through March 15, operations on 96 farms in Lincoln county had signed up to participate in the 1963 voluntary wheat wheat plan according to Eugene Alexander, chairman of the agriculture stabilization and conservation county committee.

The "intention-to-participate" forms filed by farm operators call for the diversion of 1,681.4 acres of spring wheat. Possible payments-per-acre are \$20.00 to \$25.00 in advance of program participation costs to \$20.00 to \$25.00. Of this amount, \$22.00 to \$25.00 is actually being paid to operators, Alexander said.

Pigs Saved Are Measure Of Success

IOWA STATE UNIVERSITY, March 15 — 2839 pigs were processed in the University's new modern wire production system, a livestock specialist notes a livestock specialist notes at one of the recent Iowa State University programs that the number of pigs, live weight and carcass weight, were all increased over the past 10 years.

The number that live to go on feed is the number that means profits or loss in modern pig raising. D. W. Stolley, head of the University's swine research farm south of Ames, Iowa, said the total number of pigs that remained practical was unchanged over the past 10 years.

Estimate Is Given For Feed Grains

WASHINGTON, March 15 — The agriculture department estimates the total supply of feed grains—corn, sorghum, milo and wheat—will be 216 million tons in 1962-63 at 216 million tons, 11 million tons below the 1961-62 supply.

DUMPED MILK is watched by a group of disgruntled farmers near Anandale, Minn. The dump was a protest against a boycott by a creamery association to buy milk from an Allentown, Pa. French Lake creamery which has a contract with the National Farmer Organization. Some 5,000 gallons of milk were poured out onto the ground. (AP Wirephoto)

Creamery Dumps Milk In Contract Protest

ANANDALE, Minn., March 15 — It was just like the old pre-dumping protesting on the creamery lawn. This is an example of efforts being made to keep farmers from pricing their products, said the NFO. He said the NFO will "throw its full strength into the battle."

The milk was poured into a ditch on the Martin Lampi farm near this creamery. Lampi, creamery president, said it was a protest to a processor's refusal to buy the milk unless the creamery broke its contract with the National Farmer Organization. Lampi, who presided at the milk-dumping ritual, asked the crowd how many wanted to see the milk. He said the milk had went up.

"We'll dump the milk into a ditch," he said. The milk was pumped out of trucks through a hose. NFO president Oren Leo Sta-

Federal Crop Insurance Signup Nears

Farmers in more than 1,000 counties in the United States including Twin Falls are finding that the new all-risk federal crop insurance is proving itself to be the best thing to do for a successful crop, Douglas H. Ber-

Bertho pointed out that farmers of Magic Valley will find the new insurance on wheat, barley, oats and potatoes for 1963 to be of interest to them. He stressed that farmers have until March 31 to sign up for wheat and barley insurance while May 31 is deadline for signing for bean insurance.

Potato counties added in Idaho for the 1963 season include Cassia and Minidoka. The Federal Crop Insurance Corporation has accepted in excess of \$1,000,000 in liability in Cassia county alone.

Bertho has recommended that Twin Falls and Jerome counties be added to the potato program for 1964. Growth of the corporation has been restricted nationwide to 100 new counties each year, and three new crops each year. Counties are selected according to the amount of the crop produced and the interest among the growers.

Crop insurance premiums are based on local risks, the official said. Administrative expenses of providing insurance protection are not charged to the policyholders.

Bertho said that full information regarding the program can be obtained from the Twin Falls office at 222 Blue Lake boulevard north, serving Twin Falls, Jerome, Gooding and Lincoln counties, or at 1240 Alhambra street, Burley serving Cassia and Minidoka counties. Twin Falls telephone is 733-8449 while that at Burley is 678-2172.

Norman Warren, Blaine county agriculture agent, said that by testing machines and adjusting them properly, much mastitis can be avoided in the cows.

Bureau Hears Opposition to Wheat Plans

WASHINGTON, March 15 (AP)—Farm Bureau members were urged to oppose the wheat program proposed by the Agriculture Department on Tuesday evening.

The bureau members were urged to write their congressmen and senators to delay the program. The bureau members also were urged to delay the program until the current year's crop is determined.

The program would require that the wheat reference price be set at a level that would allow the government to purchase wheat at a price that would be 10 percent above the world market price.

The program would also require that the government purchase wheat at a price that would be 10 percent above the world market price.

TWO NEW FEATURES have been added to the Innes company 15 L-C Finishing pickup. New windrow hold-downs are also new and standard on all 1963 models.

Omaha Leads Other Areas In Marketing

WASHINGTON, March 15 (AP)—The stockyards at Omaha, Neb., handled a larger volume of livestock than any terminal market in the United States during 1962, according to the agriculture department's market news.

More than five million head of cattle, calves, hogs, and sheep and lambs were sold in the Omaha stockyards last year. A market news summary showed:

—Omaha ranked first in salable receipts of cattle with 1,953,841 head, 14th in calves, 66,695 head; second in hogs, 2,436,750 head; and fourth in sheep and lambs, 50,231 head.

The Chicago market was second in the number of cattle—906,111 head, followed by Milwaukee, Wis., Sioux City, San Antonio, and Springfield, Mo.

The St. Louis National stockyards ranked first in sales of sheep with 1,859,292 head, and Chicago fifth with 1,724,007 head.

The Denver, Colo., stockyards held third rank in sales of sheep with 1,425,999 head.

Fort Worth, Tex., was second with 728,304 head, followed by Sioux Falls, S. D., with 643,702 head, and Omaha with 446,147 head.

Market news said 31 terminal markets in 1962 handled salable receipts of 16,518,878 cattle, 2,200,859 calves, 21,643,113 hogs, and 6,951,825 sheep and lambs.

The small interior markets of Illinois, Iowa, and Southern Minnesota, where practically every town in the livestock belt is a buying center, had total salable receipts of 21,838,800 head of hogs in 1962.

Salable receipts of goats in 1962 were 1,100 head.

Funds Exhausted

Carl Boyd, chairman Twin Falls county ASO committee, announced the official closing of the 1963 ASO program since all funds have been obligated.

This program includes such practices as grass seeding, installation of pipelines, land leveling and livestock water developments.

Official announcement will be made when the program will be reported again.

Boyd, further, states the noxious-weed control program has not yet been opened and official opening date will be announced when it is determined.

Innes Engineers Add New Features to 1963 Models

CLINTON, Ia., March 15 (AP)—Innes engineers have added two new features on 1963 models of the 15 L-C finishing pick-ups.

New Windrow Hold-downs are now standard equipment on all models.

The Hold-downs have been redesigned for even closer control of windrow, eliminating possible loss when combining on windy days or in extremely light grain.

A variable speed drive is also new, and standard, — on all 1963 Innes 15 L-C finishing pick-ups.

With the new drive, the farmer may set rotor speed at any point from 62 to 150 revolutions per minute. Rotor speed may be varied exactly to combining conditions.

Finishing L-C Finishing Pick-ups are offered for most popular combines. Four Regular models range to 84 inches.

Four extra W-1-d-e 15 L-C Pick-ups from eight to 14 feet ft. larger combines, and S. P. Shearers, pick up two windows at once.

Bag Machine Is Installed At Idaho Best

Galdwell, March 15 — D. O. Jones, general manager, Idaho Best, announces completion of the installation of new bagging equipment at the Caldwell Feed Mill.

Jack Toeller, Caldwell mill, branch manager negotiated the purchase of a new automatic bagger from a big terminal feed mill which ceased operations.

This purchase of a slightly used bagger allowed Idaho Best to completely install modern, automatic bagging equipment at a fraction of its original cost.

This bagger will automatically weigh, bag and saw 600 bags of feed per hour.

The high speed bagger will allow more speed and greater operating efficiency in all phases of production at the Caldwell Feed Mill.

Idaho Best is a farmer's cooperative with plants in Caldwell, Boise and Fayette, to manufacture and sell feed for livestock and poultry and market eggs.

Act Wouldn't Dent Present Farm Budget

WASHINGTON, March 15 (AP)—The new legislation the House passed today to reduce the federal deficit would not make a dent in the government's fiscal 1963 budget, 45 billion dollars, budget officials said.

Legislation that might be passed in the House would reduce milk production and feed grains production. It would also reduce the cost of the dairy program by 200 million dollars.

Department officials estimate the dairy program will cost about 20 million dollars for fiscal 1963, and about the same for fiscal 1964 under present law. If new legislation limits the cost of the dairy program to 200 million dollars, a sizable savings would result.

Had it congress authorize continuation of the present feed grain acreage diversion program, and adopt cotton legislation that would provide a subsidy to the dairy industry, the savings made by a dairy reduction program would be used up.

There is a possibility that new farm legislation would cost less than the estimated 550 million dollars for fiscal 1963. The cost in large commodities is being reduced, and there will not be the urgency to cut production that there was in 1961 and 1962.

It is possible that the department would adjust feed grain acreage diversion rates downward. If this should happen, the number of farmers who would be affected would shrink. The department estimates the loss to the government would be \$10 million.

Department thinking is that the million dollars in direct cost to dairy farmers to reduce production would help maintain their income even if they lose a million dollars now being paid to buy surplus dairy products. A considerable amount of the dairy subsidy now does not go to farmers. Much of it goes to processors.

Cold Weather Delays Crops

WASHINGTON, March 15 (AP)—General crop report as of March 15 said continued cold weather during February over the eastern half of the nation caused further losses of fall corn and winter wheat. Cold also slowed development of winter vegetable crops, delayed peach blooms and concentrated shortages of roughage for livestock by eliminating most of the winter pasture in the southeast. In sharp contrast, relatively mild February weather in western regions favored crops and livestock.

The winter potato crop grown in California and Oregon is eight per cent smaller than last year, the report said.

The start of field activities was delayed in most of the east and the Rockies.

1962 were 6,150 at Fort Worth and 5,774 at San Antonio.

Handling of Bulk Feeds Tapers Off

CHICAGO, March 15 (AP)—A tapering-off of changing to bulk handling of feeds and to the use of concentrates has been indicated in a bulletin issued by the American Feed Manufacturers Association.

The report, compiled by the market research department of AFMA, showed the bulk handling rate of feed increased only slightly in 1962 from 43 per cent to 44 per cent of the total. The remaining 56 per cent was handled in bags. The percentage

of the total, varied from a low of 46 per cent in the Western corn belt to a high of 93 per cent in New England.

Some 86 per cent of starter-grower egg feed was produced in the form of complete feed. Only about 30 per cent of hog and beef and sheep feeds were manufactured as complete feeds in 1962.

APPOINTMENT NEAR WASHINGTON, March 15 (AP)—Senate Republicans indicated today they would do nothing to stop Franklin D. Roosevelt, Jr., from becoming undersecretary of commerce.

"THE PLACE TO GO FOR THE PRODUCTS YOU KNOW"

Farmers Can Boost Income Says Official

CAMBRIDGE, March 15.—The destiny of farmers in large measure lies in their own hands. Farmers have the tools and techniques to get much closer to the share of the national income. If farmers ever get the vision of their own potential strength, they will learn to use their cooperatives more fully and effectively.

These statements were made here by Glenn H. Heits, deputy governor and director of the cooperative bank service of the farm credit administration, in a talk on effective communications at the Harvard Graduate School of Business Administration.

"One of the biggest communication problems is to get people, in this case farmers, to open their eyes, look ahead and see what can be done for themselves. They will not see their minds to it," Heits said.

"Farmers have proven time and again that they can reduce the cost and improve the quality of their supplies and services. They have also proven that by coordinating their efforts to get high quality merchandising, by modern brand identification, and by selling advertising, they can build larger markets and get a larger share of the consumer dollar," Heits reminded.

"But they have only scratched the surface of possibilities," he continued. "They need to do several things. They need to coordinate their efforts with the business and investment community. They need to get together to do forward-looking things. They need to do several things. They need to do several things. They need to do several things."

Information Bombardment Will Begin To Influence Wheat Referendum Vote

By G. H. CHAMBERS

Between now and the first part of June, southern Idaho farmers are going to have it all through a lot of circulars, bulletins, magazines, articles and newspaper stories telling the wheat grower what to do. The wheat referendum vote. The opinions of his neighbors and the area farm organizations will weight heavily upon him before he casts his ballot.

For many, it will be the first time they have ever participated in a wheat referendum vote. The farmer growing 10 to 20 acres will be asked to vote in the coming referendum. This could qualify an additional 7,000 or more voters in Twin Falls county alone.

Just as everybody can get into the act—the farmer and the landlord and tenant can vote. It would appear the referendum is designed to reach as many of the agricultural people as possible.

These new voters could affect the outcome of the referendum vote. The referendum must pass by a two-thirds "yes" vote. The organizations and individuals supporting a "no" vote could have the easiest road to follow. They must convince the voters to vote "no."

The battle lines already are beginning to form. Charles Shuman, president, American Farm Bureau, is leading that organization in the fight. Shuman has been killing the referendum in many of his speeches.

The major theme behind the Farm Bureau attack is that wheat certificate program, such as proposed in the referendum is further domination to a conserving use, will qualify them for special price-support payments and will support service support loans and purchase agreements if they do not exceed their wheat acreage allotments.

The price-support payment, Alford explains, is a new feature of the 1963 wheat program. It will amount to 15 cents per bushel on the normal production of the farm's 1963 wheat acreage. It is in addition to the regular price-support loan or purchase agreement, which will average \$1.22 per bushel.

Test Areas Designated For Program

WASHINGTON, March 15 (AP)—The agriculture department has announced that farmers in counties designated as test areas under the pilot crop conversion program may apply to take part through March 22.

Farmers in the test counties who are interested in converting their surplus wheat into other crops, such as alfalfa, are urged to apply to their county agricultural agent for information and to complete the application form.

The program is designed to improve family farm income by helping farmers convert hand not needed for the production of crops to some other long-range income-producing use such as farm pasture, grain, water storage, wildlife habitat, or recreational facilities. Under the phase of the program being conducted in the test counties, primary emphasis is being placed on conversion of land from production of winter wheat to other uses.

Farmers who participate in the program will receive adjustment payments, cost-sharing payments, technical assistance, and in some states, forestry incentive payments. These payments are not "income" payments, but rather are designed to assist farmers in complying to alternate income-producing uses.

The states where the test counties are located are: Georgia, Idaho, Iowa, Kansas, Maine, Minnesota, Missouri, Mississippi, North Carolina, North Dakota, Pennsylvania, Utah, and Wisconsin.

The program is designed to improve family farm income by helping farmers convert hand not needed for the production of crops to some other long-range income-producing use such as farm pasture, grain, water storage, wildlife habitat, or recreational facilities. Under the phase of the program being conducted in the test counties, primary emphasis is being placed on conversion of land from production of winter wheat to other uses.

53 Farmers Sign for '63 Wheat Plan

HAILEY, March 15.—The 53 Blaine county farm operators who signed up through March 15 to participate in the 1963 voluntary wheat stabilization program for spring wheat areas, said \$1,287 has been paid.

This payment will be made for the diversion of some 1,118 acres of spring wheat to other uses. The program will continue through March 22.

Alfred, chairman of the area conservation committee, points out the wheat stabilization program, in addition to deferring participating farmers' diversion payments for shifting wheat acreage from production to a conserving use, will qualify them for special price-support payments and will support service support loans and purchase agreements if they do not exceed their wheat acreage allotments.

The price-support payment, Alford explains, is a new feature of the 1963 wheat program. It will amount to 15 cents per bushel on the normal production of the farm's 1963 wheat acreage. It is in addition to the regular price-support loan or purchase agreement, which will average \$1.22 per bushel.

School Slated

SIDWORTH, March 15.—An alfalfa and clover seed production school will be held at 1:30 p.m. Tuesday at the courtroom in Sidwirth.

Howard Royce, University of Idaho extension agronomist, will discuss the value of alfalfa and other crops in the production of seed crops.

My 50 orphan lambs bloomed on Suckle

WILLIAM MIXEL, of Lake Crystal, Minn., put 50 orphan lambs on his farm. It's the first time he's gotten any bloom on bottle babies. Susie and Bill Manna had 'em on full feed at 6 weeks, but he held their own against lambs with mothers.

Come in for your FREE copy of the SELECTING, FITTING AND SHOWING SHEEP

Task of Explaining the forthcoming wheat referendum vote will fall largely on the shoulders of the Twin Falls county agricultural stabilization and conservation committees and state officials.

More, both county commissioners, Earl Hoop, state chairman, Carl Boyd, county chairman, and Phil Star, state commissioner. The referendum is scheduled for early June or late May. (Times-News photo)

Increased yield might have kept things in balance except for one thing—the surplus.

The surplus, according to market experts, depressed the market. With millions of bushels of wheat to storage, high prices will never be paid.

Giving away the surplus would upset foreign markets and if necessary, it would be necessary to pay the grain of every American man and woman to burn, bury or destroy the surplus wheat. Half of the world goes to bed hungry at night.

There are those who argue that some surplus is necessary to carry over from year to year; they say it should be thankful for an abundance, but it isn't putting dollars into the farmers' pockets.

Authors of the pending wheat referendum have provided for some surplus, claiming it is not enough to depress the market. The proposed program provides for disposal of the surplus wheat. If successful, it would work remains to be seen.

Between now and the first of June the farm publications will be full of articles encouraging a "yes" vote or a "no" vote. And with many small planters now qualified or who can qualify, the battle will get real intense.

Overfeeding Hurts Swine Nutrition

UNIVERSITY OF MINNESOTA—One of the most important factors in present-day swine nutrition is highly nutritive feeding program, a University of Minnesota livestock scientist says.

L. E. Hanson believes a little more stringent in feeding program is needed. Overfeeding, he says, would mean "good strong litter and some of the most economical hog production." Overfeeding, he says, adds to feed cost per pig weaned and may result in smaller, less healthy piglets.

For a pregnant sow, Hanson places protein intake is more critical than energy. He recommended limiting feed to 16 to 18 pounds per sow daily. And he pointed to recent research to support this point: sows don't need to make great gains during pregnancy. Hanson emphasized. Older sows, for example, need more protein. A little more gain is represented by the litter plus weight loss during lactation.

Young sows need to gain because they are still growing.

Bull-Grading Tour in Field

By Cattlemen
A group of cattlemen from the Twin Falls area held a bull-grading tour in the field on March 14. The group, which included members of the Twin Falls Cattlemen's Association, spent the day evaluating the quality of the area's beef cattle. The tour was led by several experienced breeders and provided an opportunity for cattlemen to compare their own stock with that of their neighbors. The group visited several farms and discussed the various aspects of bull-grading, including conformation, health, and breeding potential. The tour was a success and provided valuable information to the participants.

Plan Given For Hayley Field Plans

By Hayley
A plan for the development of the Hayley field was presented at a meeting on March 14. The plan, which was prepared by the Hayley Field Development Committee, outlines the proposed layout of the field, including the location of roads, utility lines, and building footprints. The committee members discussed the plan in detail and provided input on various aspects of the development. The plan is expected to be finalized in the near future and will serve as a guide for the construction of the Hayley field.

Survey Shows Fewer Farm Workers

A survey conducted by the Idaho Department of Agriculture shows that the number of farm workers in the state has decreased significantly in recent years. The survey, which covered the period from 1950 to 1960, found that the number of farm workers had declined by approximately 25 percent. This decline is attributed to a variety of factors, including the mechanization of agriculture, the migration of farm workers to other parts of the country, and the overall decline in the number of farms in the state. The survey also found that the average age of farm workers has increased, and that there is a shortage of young people entering the profession.

Pork Prices To Average Below 1962

Pork prices are expected to average below the 1962 level, according to a report from the Idaho Department of Agriculture. The report, which is based on current market conditions and supply and demand trends, indicates that pork prices will likely decline over the next several months. This is due to a combination of factors, including a decrease in the number of pigs raised in the state and an increase in the number of pigs that are culled. The report also notes that the price of feed grains, which is a major cost for pork producers, is expected to remain high, which will further contribute to the decline in pork prices.

The Idaho Department of Agriculture is currently conducting a survey of the state's livestock industry. The survey is designed to gather information on the number of animals raised, the types of animals raised, and the various factors that affect the industry. The information gathered from the survey will be used to develop policies and programs that will help to improve the efficiency and productivity of the livestock industry in Idaho. The survey is expected to be completed in the next few months.

DISCUSSING the possibility of getting drought emergency funds are members of the board of supervisors of the Twin Falls soil conservation district. They are, from left, Glenn Nelson, Lee Blitsenburg, Clarence Hedrick, Lyle Schlinker and Glen Whitney. In addition to seeking emergency funds, they discussed the program for the annual water forecast meeting to be held in the Hollister Grange hall at 7:30 p.m. March 29. (Times-News photo.)

Small Growers Quality For Referendum Ballot

Producers who have an interest in a referendum will be eligible to vote in the 1964 wheat referendum. The referendum, which is being held in the Twin Falls area, is a vote on whether to establish a wheat marketing cooperative. The referendum is being held in the Twin Falls area because of the high concentration of wheat producers in that area. The referendum is expected to be held in May or June of 1964. Producers who are interested in the referendum should contact the Twin Falls Soil Conservation District for more information.

Cooperatives Up Business, Lose Members

WASHINGTON, March 15 (AP)—Farm cooperatives did a gross volume of 163 billion dollars in the business of marketing farm supply, and related services in the period July 1, 1960, through June 30, 1961, according to the Department of Agriculture. The volume of business was up 25 percent over the previous year, while the number of cooperatives and memberships was down slightly. The department's farm cooperative service reported that the number of cooperatives was down 10 percent, and the number of memberships was down 15 percent. The department also reported that the average size of cooperatives had increased, and that the number of cooperatives that were operating in the field of farm supply and related services had increased.

The department also reported that the number of cooperatives that were operating in the field of farm supply and related services had increased. This is due to a variety of factors, including the increasing demand for farm supply and related services, and the growing interest in cooperatives as a means of providing these services to farmers. The department also reported that the number of cooperatives that were operating in the field of farm supply and related services had increased.

The department also reported that the number of cooperatives that were operating in the field of farm supply and related services had increased. This is due to a variety of factors, including the increasing demand for farm supply and related services, and the growing interest in cooperatives as a means of providing these services to farmers. The department also reported that the number of cooperatives that were operating in the field of farm supply and related services had increased.

Consumption Of Red Meat To Top Mark

WASHINGTON, March 15 (AP)—The agriculture department estimates total red meat production in 1963 will be a record 302 billion pounds. The red meat supply will include more beef and pork, but less lamb and mutton. The increase in red meat production is expected to exceed the rate of growth in population. In a review of the livestock and meat situation, the department estimated per capita consumption of red meat in 1963 will be 115 pounds, up from 110 pounds in 1962. The increase in per capita consumption is expected to be due to a number of factors, including the increasing demand for red meat, and the growing interest in red meat as a source of protein. The department also reported that the number of head of cattle and hogs raised in the United States had increased in recent years.

Richfield Bureau Discusses Wheat

RICHFIELD, March 15—Farm Bureau opposition to the proposed 1964 wheat referendum was discussed at the March meeting held Tuesday evening at the home of Jerry Johnson. Louis Vaughn, unit president, named a committee to call on local farmers and express the Farm Bureau view before the wheat referendum vote, sometime between March 22 and June 1. Members of the committee are Clifford Day, Kenneth Johnson, Grant Stevens, Fred Peterson, Lyle Vaughn, and John Johnson. Glen Sorenson, district met with the group as a county Farm Bureau consultant. Local unit members donated \$20 to the advertising committee for television and radio spots for reviewing the wheat referendum. Farm Bureau signs were purchased for the members. The April 6 meeting will be held at the home of Fred Peterson.

The committee will be responsible for contacting farmers and providing them with information on the wheat referendum. The committee will also be responsible for organizing a campaign to oppose the referendum. The Farm Bureau is opposed to the referendum because it believes that the referendum will result in the establishment of a wheat marketing cooperative that will be controlled by a few large growers. The Farm Bureau also believes that the referendum will result in the loss of the right of farmers to market their own wheat.

T. F. Soil District to Seek Emergency Funds

A motion to secure additional ACP funds under a drought emergency program was passed by the board of directors of the Twin Falls soil conservation district Tuesday afternoon. The drought emergency program would be similar to the one in effect in 1961, said Glenn Nelson, district chairman. Nelson, commenting on the motion, noted that the water outlook for many Salmon tract farmers is grim and ACP funds could better serve the area now than at a later date. "Too often, applications for additional funds arrive too late to be of any real benefit," Nelson said. "The water outlook for many Salmon tract farmers is grim and ACP funds could better serve the area now than at a later date." The motion was passed by a vote of 10-0. The board of directors will now begin the process of applying for the additional funds.

Blaine County Cattlemen's Group Elects at Yearly Fete

HAYLEY, March 15—Members of the Blaine County Cattlemen's Association elected officers for the coming year at their annual banquet held Saturday evening at the Hotel Haythwaite. Marvin Pearson, Shoshone, of the Blaine County Cattlemen's Association, reported that 1,000 acres of sagebrush were sprayed during 1962 and more of the same work will be done in 1963. He said there will be considerable maintenance work to do this year because of the early runoff of water which caused washouts of stock watering dams. A suggestion was made that the board of directors submit a proposal to the fish and game department recommending action concerning the \$100,000 of wildlife habitat and its effects on range lands. The fact that many hunters and sportsmen are very livestock friendly to property and livestock was brought out by the stockmen, who they feel are abusing the privileges afforded them by the stockmen. Wade Watson, extension agent from the University of Idaho, talked on the up-grading of the beef industry and the changes which have taken place in the past 10 years in the marketing of meat. He pointed out that the cattlemen will have to consider their feeding efficiency and the quality of their animals to continue to be competitive with other meats such as poultry and pork. He brought out the fact that select animals that transmit desirable characteristics to their offspring, thereby increasing the quality of the stock.

Turkey Mart Regaining Equilibrium

WASHINGTON, March 15 (AP)—The turkey market appears to be regaining its equilibrium, according to agriculture department economists writing in the "Poultry and Egg Situation." In 1962, the improvement in turkey prices from 1961 was much greater than could be accounted for by the moderate decline in supply. The weighted average price received by turkey producers in 1962 was about 21 percent higher than in 1961. On the other hand, per capita consumption of turkey in 1962 was down only five per cent from 7.6 pounds a year earlier. Under ordinary circumstances, the percentage increase in price would be expected to be only a little greater than the percentage decrease in per capita consumption. The economists said that if 1960 rather than 1961 is used as a reference point, the consumption-price relationship follows quite closely the expected pattern. Between 1960 and 1962, per capita use of turkey rose from 6.3 pounds to 7.1 pounds or 13 per cent, while the price dropped by farmers during the period 1961 was 20.4 percent, from 20.8 cents a pound to 16.5 cents or 15 per cent. The economists said this fundamental increase in price would be of benefit during the coming short water season, plus additional long range benefits. The laying of the cornerstone at the soil research center being constructed at Kimberly will be held at 3 p.m. Saturday and the supervisors were invited to attend the ceremony, said Nelson. The supervisors expressed a desire to assist the soil laboratory with future projects and to work closely with the staff at the laboratory. Clarence Hedrick reported that the annual water forecast meeting is set for March 29 at the Hollister Grange hall. June 14 will be the date of the annual district grass tour and the supervisors discussed the Alpine summer conservation camp. They plan to send two or more boys to the camp. Hedrick noted that the district has some grass available for use by the cooperators. Jack Walker, soil conservation service, will prepare some special displays showing farmers how to test for soil moisture at the annual water forecast meeting.

Farm Bureau Official Sets Wheat Referendum Address

The upcoming referendum on wheat will get a thorough discussion in Twin Falls next Tuesday evening when Dr. Warren E. Collins, assistant director, commodity division, American Farm Bureau federation, speaks at the O'Leary high school auditorium.

Announcement of the session was made jointly by Charles E. Harris, president of the Twin Falls County Farm Bureau, and Ralph Ormstead, county speaker leader in the planned wheat referendum.

The meeting will get underway at 8 p. m. with Harris presiding.

The leaders pointed out that any interested person is welcome to attend and all growers are particularly urged to be present. Both large and small wheat growers are included.

Importance of the proposed referendum to Twin Falls county is realized when it is pointed out that more wheat is grown in this county than in any other county in the state.

The speaker, Dr. Collins, is a native of Kentucky, where he grew up on a general farm. He held his college work at Western Kentucky State college receiving his B.S. degree in agriculture. He earned his M.S. and Ph.D. at the University of Illinois where he was a research assistant in the department of agricultural economics.

In the fall of 1950 he was employed by the U.S. department of agriculture and served for three years as coordinator of

DR. W. E. COLLINS

dairy marketing research with the southern association of land grant colleges.

In 1953 he joined the staff of the Illinois Agricultural Association as director of research, and in 1957 transferred to the American Farm Bureau federation as assistant director, commodity division. His responsibility with the national organization are primarily related to field crops including feed grains and wheat. He now resides in LaGrange, Ill., a suburb of Chicago.

Water Meet Set

The annual water Twin Falls county forum meeting will be held March 18 at 7:30 p. m. at the O'Leary high school auditorium. Glenn Westjohn, chairman, Twin Falls soil conservation district.

In addition to the regular meeting, films and special demonstrations will be held.

The meeting will be refreshments, Nelson said.

Diverted Acres Are Under 1962

WASHINGTON, March 15 (AP)—The sign-up under the voluntary 1963 wheat program indicates that operators of 315,660 farms have agreed to divert 5,533,000 acres from wheat production to conserving uses this year.

Of those totals, 25,892 operators agreed to divert 220,700 acres of spring wheat. The remaining acreage was diverted from winter wheat.

Last year under the mandatory 1962 wheat restriction program, 750,454 operators had signed as of March 1 to divert 11,292,800 acres of wheat.

For farms signed up thus far under the 1963 wheat program, possible advance payments come to slightly more than 47-million dollars.

EMERGENCY SACRAMENTO, March 15 (AP)—The emergency lettuce law rushed through the legislature last month will apparently expire days from now without ever having been used.

Record Amount of Farm Products Was Exported From U.S. to Other Nations

WASHINGTON, March 15 (AP)—The agricultural department estimates U.S. farms and ranches provided five billion dollars worth of farm products for the export market in calendar year 1962. This totals the record set in 1961.

The department's economic research service said export sales for dollars were 2.4 billion dollars, about the same as in the previous year. The value of food-for-peace exports amounted to an estimated 1.4 billion dollars in both 1961 and 1962.

There were major shifts in the export picture. Exports of wheat and flour totaled 600 million bushels, down 132 million from a year earlier. Cotton exports of 3.3 million bales were almost 2.8 million below the 1961 total.

There was a substantial increase in wheat production in Western Europe. Most of the decline in wheat exports was the result of reduced sales to the Western European countries.

Feed grain exports showed a sharp increase in 1962, rising to 1.67 million metric tons from 1.46 million a year earlier. Exports were equivalent to nearly one-third of U.S. farm sales of feed grains.

Most of the increase reflected a substantial gain in exports to the European Economic Community—commonly called the Common Market.

ERS said another bright spot in 1962 farm exports was the 50 per cent increase in exports of

products under the food-for-peace program.

Exports of soybean oil and meal were placed at a record 100 million bushels, considerably above the 125 million exported in 1961.

Exports of hides and skins were up sharply from the one billion pounds of 1961. This rise represented mainly sheepskins.

Exports of wool were up 10 per cent from the 1961 level.

Exports of other farm products were up 10 per cent from the 1961 level.

Exports of other farm products were up 10 per cent from the 1961 level.

Exports of other farm products were up 10 per cent from the 1961 level.

Western States Are Facing Grim Irrigation Season

PORTLAND, March 15 (AP)—The mountain snowpack in the Washington-Oregon-Cascade and the Sierra mountains of California is the lowest in 30 years, a water expert said last week.

R. A. Work, head of the soil conservation service's water supply forecasting station, said many areas of the Far West will depend on water already in storage instead of the snow melt for irrigation.

He bases this report on March 1 snow measurements in mountain areas.

Data for the first 11 months of 1962 show that Japan continued as the top market for U.S. farm exports in the calendar year, Canada (excluding intermediate commodities) was the second best foreign outlet for U.S. farm abundance.

The United Kingdom was the third best customer. There were increases in exports to Canada, West Germany, The Netherlands, India, Belgium, U.A.R.-Egypt, Turkey, Pakistan, United Kingdom, Italy, Spain, France, Brazil, Poland, Korea and the Philippines.

The sharp decline in exports of cotton to Europe and Japan was the main factor for most of the decrease in the more advanced countries.

U.S. farm exports to the Common Market in 1962 changed little from a year earlier. However, exports to the common market during the four months after July 30, 1962, when variable import quotas were imposed, declined by 15 per cent from the same four months a year earlier.

Show Moved

MALTA, March 15 (AP)—The annual show and sale has been moved from Ogden to the Utah state fairgrounds in Lake City.

The move was necessary because of the tremendous growth of the show in the past few years, he explained. Dates of the show will be Nov. 14-16 with the sale tentatively scheduled for around 60 per cent of the average.

FACTS--NOT "CHIN MUSIC"

2,193 cattle furnish "Built-In Roughage" facts!

An average of 47 actual field demonstrations show the kind of results the average feeder should expect on Purina's revolutionary "Built-In Roughage" program with milo and cottonseed hulls, barley or ground ear corn.

Cattle (both heifers and steers) in these demonstrations were fed an average of 123 days. They went into the feedlot at an average weight of 953 lbs. and finished at an average of 983 lbs.

Their average daily gain for the period was 2.70 lbs. A pound of beef was produced on only 7.00 lbs. of total feed. These are facts—not "chin music!"

Regardless of your feeding program—remember the supplement holds the key. Others have tried to duplicate our results—but only Purina Dealers have Special Steer Fatena, designed especially for "Built-In" Roughage" feeding.

Purina Special Steer Fatena is the original "Built-In Roughage" supplement. Ask for it at our store with the Checkboard Sign. Prove to yourself Purina feeding can cost you less!
