The Magic Valley Newspaper Dedicated to Serving and Promoting the Growth of Nine Irrigated Idaho Counties

TWIN FALLS, IDAHO, FRIDAY, MAY 10, 1963

TEN CENTS

VOL. 46, NO. 25

Water Prospect Brighter

BOISE, May 10 (AP)—The soil conservation service and the U.S. weather bureau said today the heavy April-rainfall has improved greatly Idaho's water supply outlook.

More than double the normal amount of rain fell during April, the reports said.

Anthony J. Polos, weather bureau hydrologist, said the situation was improved further by low temperatures which decreased evaporation of soil moisture and added snow cover at the higher elevations.

Michael W. Nelson, snow survey supervisor for the soil conservation service, said streams now carry more water than normal supplies but small streams and rivers still will experience shortages unless heavy rains continue during May and June.

The weather bureau report says residual flow forecasts may through September ranging from 35 per cent of normal at the Owyhee reservoir to 65 per cent at the Big Lost river at Richfield. A definite increase from April 1.

Nelson listed these indicated percentages of average April flow for the period from May to September:

Snake river near Hells, 65; Big Lost river at Richfield, 75; Salmon Falls creek near San Jacinto, 35; Henry's fork near Ashton, 85; Big Lost river, 65; Lost river, 65; Little Lost river near Howe, 61.

Hoffa Faces Charges for Bribe Attempt

NASHVILLE, Tenn., May 10 (AP)—President James R. Hoffa today faced new charges attempting to bribe jurors in his dedicated federal court conspiracy trial here last year.

A five-count indictment returned by a special federal grand jury accused the labor leader of "bribe, conspiracy and obstruction of justice to influence two jurors and a prospective juror to vote for his acquittal."

In Philadelphia, Hoffa was not guilty and declined comment because he had not seen the indictment. He appeared before U.S. Commissioner and posted a \$10,000 bond for a hearing next Monday.

Six other persons, most of them friends or associates of Hoffa, also were indicted.

Mental Health Center Requested for Area

LEWISTON, May 10 (AP)—A Twin Falls physician asked the state board of health yesterday for funds to help establish a mental health center covering the seven counties of southcentral Idaho. The mental health center would be the fourth in the state. Others are in operation at Boise, Lewiston, and Pocatello. Dr. Joseph Marshall said commissioners of Twin Falls, Jerome, Blaine and Cassia counties have agreed in principle with a plan to appropriate money for the center. He said the proposed center would have an estimated total annual budget of \$32,400.

Riding Club Horse Sale Set Sunday

The Frontier Riding club's annual horse sale will be at noon Sunday at Frontier field. All types of horses will be sold—geldings, and gelding horses, and fillies. In addition, there will be added, horse trailers, and other equipment of interest to the horseman.

There will be a concession stand operated by the Mounted Horse, the Frontier Riding club's horse show will be at noon Sunday at Frontier field. All types of horses will be sold—geldings, and gelding horses, and fillies. In addition, there will be added, horse trailers, and other equipment of interest to the horseman.

LONG TRIP IS AHEAD for Astronaut Gordon Cooper, who looks upward in Cape Canaveral, Fla., during preparations for his projected 22-orbit mission, scheduled Tuesday. It all goes as planned. Cooper will travel nearly 600,000 miles and cover more than one million miles of the Earth's surface in his "Faith 7" spacecraft. (NASA photo via AP wirephoto)

Cooper's Spacecraft To Carry Many Items

CAPE CANAVERAL, Fla., May 10 (AP)—Astronaut Leroy Gordon Cooper's "Faith 7" spacecraft is like a woman's purse. Reach in and you'll find almost anything. If Cooper rockets toward his 34-hour space flight on planned next Tuesday, he will carry along such items as an inflatable balloon, four cameras, an exercise device, medical monitoring gear, maps, star charts, medical monitoring devices, geiger counters, a 28-foot shark repellent, a raft, an alarm clock, parachutes and spaghetti and meat sauce.

He'll even carry his own private satellite—a baseball-sized object equipped with flashing beacons which he plans to release into orbit during the third of his intended 22 circuits of the globe.

The longest U.S.-manned flight—21 days—was scheduled to start from the roof of an Atlas rocket between 8 a.m. and 10:30 a.m. (EST) Tuesday if the mission goes the full distance. Cooper's space charter will parachute to a landing in the Pacific ocean 80 miles southeast of Midway island 34 hours and 10 minutes later.

Project Mercury officials predicted the long-duration mission to determine if a man's ability to perform is impaired by prolonged exposure to space weightlessness.

Final Rites

Full military rites for Marine Air Cadet Gifford Arthur Hoss, son of Dr. and Mrs. Gifford Hoss, who was killed in a mid-air collision Wednesday at Whiting air force base, will be held in a white mortuary chapel at 2 p.m. Saturday, followed by a funeral at Sunset Memorial park by the U.S. marine corps.

The body of Cadet Hoss was scheduled to arrive at Joahn field, Twin Falls, at 9:15 p.m. Friday aboard a military transport plane.

Success Noted For Control Of Pollution

LEWISTON, May 10 (AP)—The state health department reported yesterday that the first phase of its anti-pollution control program on the upper and middle Snake river has been virtually completed.

The department said the state should now turn its attention to streams in northern Idaho.

Hugh Waggoner, Pocatello, vice chairman of the board of health, said the first phase of the program has been virtually completed with cleanup of the Snake river and three communities along the river.

"In all cases, the communities and industries affected have cooperated with the department," he said.

Major Amphibious Assault Necessary Now to Take Cuba, Experts Declare

WASHINGTON, May 10 (AP)—It would take a major amphibious assault, coordinated with a powerful Soviet assisted defense of Cuba.

This is the current assessment by U.S. intelligence authorities as reported by the Senate Intelligence subcommittee.

The Senate group report, made public yesterday, said, "The communist Soviet state Cuban force in the island are quite powerful and could offer

White House Dinner Isn't Always Formal

WASHINGTON, May 10 (AP)—Dining at the White House is often a grand and formal affair—but not when President Kennedy is chief cook and bottle waiter.

The President, the Washington Post reported today, not only raises the temperature but often dismisses the servants early when Mrs. Kennedy is away and the President's friends are to share dinner in a warm, intimate setting.

One couple invited on short notice to such an affair, the Post said, arrived in black tie attire ready for a formal dinner in the elegance of Mrs. Kennedy's early 19th century dining room.

Instead of a butler they were served by the President who held out his soup while in shirt sleeves with a tea towel wrapped around his waist.

Mistrial Is Declared in Hospital Case

TERON, May 10 (AP)—Judge Jerome Ward Thursday afternoon declared a mistrial on the 42nd day of a court case against St. Benedict's hospital and Mrs. Margaret Clark, licensed practical nurse, by Mr. and Mrs. Arden Haberman.

A motion for the mistrial was made by Fred Schwartz, attorney for the Habermans, after the noon recess. He said the North Side News, local weekly paper, carried two articles and one full page advertisement about St. Benedict's hospital in observance of National Hospital Week. The attorney claimed this favorable publicity would prejudice the jury.

In ordering the mistrial, Judge Ward declared, "While such articles and advertisements are in keeping with the common tradition of the week, the unfortunate timing is such that I deem it impossible for the members of the jury not to be influenced in their judgment."

"Rather than permit the risk of prejudice for or against any party in the trial by continuing the trial under these circumstances, I deem it not only advisable, but mandatory that a mistrial be declared."

He added the articles were designed to praise the hospital and to emphasize its role in the community.

Judge Ward said his district court jury was booked solid until after Aug. 6 and the case could not be heard until that date.

Lipscomb's Death Blamed On Narcotics

BALTIMORE, May 10 (AP)—An assistant medical examiner said today there is a definite suspicion that narcotics are involved in the death of Gene (Big Daddy) Lipscomb, a team-mate of professional football player.

Dr. Richard Breinlecker said a preliminary autopsy failed to disclose what caused the death of the 34-year-old player who was found unconscious in a West Baltimore apartment.

But the assistant medical examiner said there were at least three needle marks above the veins on both elbows of the player.

He said a home-made syringe found near the body will be tested to see if it was used in the death.

Store Giveaways Okay in Oregon

SALEM, Ore., May 10 (AP)—The state's ban on grocery store giveaways promotions does not violate the state constitution or any federal law, Oregon Attorney General Robert V. Thornton said today.

Thornton said the recent Supreme Court decision that there should be no law violation because no purchase is required by participants.

Joint Committee Reaches Complete Settlement in Birmingham Race Strife

BIRMINGHAM, Ala., May 10 (UPI)—An agreement between whites and Negroes to end more than a month of racial strife in this southern steel capital was announced today. It contained provisions for desegregation of downtown eating facilities, an upgrading of job opportunities for Negroes and establishment of a biracial committee to plan further desegregation—including possibly public schools.

Three Negro leaders who directed the five-week campaign that saw more than 2,000 Negroes jailed during the demonstrations made a joint announcement of the settlement.

They were Dr. Martin Luther King Jr., the Rev. T. L. Shuttlesworth and Ralph Abernethy. The city of Birmingham has reached an accord with its own conscience, the three said.

They announced that "responsible leaders of the Negro and white communities had agreed to:

- (1) Desegregation of lunch counters, restaurants, fitting rooms and drinking fountains of downtown department and variety stores.
 - (2) Upgrading and hiring of Negroes on a non-discriminatory basis throughout industrial Birmingham, including the employment of Negroes as clerks and salesmen within the next 60 days and the immediate appointment of a committee to work toward the implementation of an area-wide program for job upgrading and the employment of Negroes in categories previously denied them.
 - (3) Release of all persons arrested during recent racial disturbances on bond or their personal recognition.
 - (4) Reneging of "communications" between Negroes and whites through the senior citizens committee within the next two weeks.
- "We have come to the climax of a long struggle for justice, freedom and human dignity in the city of Birmingham," King said.
- He emphasized it was not the end of the struggle because "there is still a strenuous and uncharted path before us."

T. F. Market Labor Voting Favors Union

Meat department employees at Shelly's market, 1813 Addison avenue east, voted Thursday to become members of local union No. 108, the United Meatcutters and Butchers Workers of North America, although the vote was closely divided.

The vote was taken after an all-day strike Friday morning. It has not been settled "one way or another."

Grange Declares All Must Sign New Oath

The Twin Falls Grange has sent a letter to Dr. D. R. Theophilus, president of the University of Idaho, requesting the dismissal of all professors who refuse to sign the loyalty oath. The letter declares, "Those refusing to sign a loyalty oath have no place on the teaching staff of any of our American schools. Signing the letter were Clifford Davis, Grangemaster; Reese Glick, chairman of the executive committee; and Mrs. Florence Creed, secretary. The letter states, "A news article in the April 23 issue of the Times News, Twin Falls, stating three of the instructors at the University of Idaho were resigning rather than sign the loyalty oath, recently caused by the Idaho state legislature, was called to the attention of the members of the Twin Falls Grange No. 216."

Death Asked For Russian In Spy Case

MOSCOW, May 10 (AP)—A military prosecutor today demanded the death sentence for Oleg Penkovsky, a Russian accused of spying for U.S. and British intelligence.

He asked 10 years "deprivation of freedom" for British intelligence officer, William Greville Wynne, Penkovsky's alleged contact man.

Stolets of sex and drinking parties since the close of testimony in this latest spy case show trials. Arguments by the prosecution and defense were to be followed by verdicts Saturday of the three-judge court.

Prosecutor Artem Gorny called Penkovsky, a former official in the foreign affairs department of a Soviet scientific research agency, a morally depraved agent who "adopted the road of irreparability, high treason" as a result of western intelligence service.

Goldwater Wins Most Applause During \$1,000-Per-Plate Republican Dinner

WASHINGTON, May 10 (AP)—Barry Goldwater won the biggest round of applause last night when Republican leaders gathered for a \$1,000-a-plate dinner.

But many of those who cheered the Arizona senator later in interviews said they thought the best vote-winner was the 1964 GOP presidential nominee would be the one who would win the vote.

There was some talk of California's Thelma H. Kuchel for vice president.

Goldwater himself has indicated he doesn't think the "kingmakers" would stand for him, as

BADGES, (BUT NOT GUNS)—are included with new uniforms which are being worn by the three women deputy sheriffs in Twin Falls. From left, Mrs. Clarence Wagner, Kimberly, and Mrs. John O. Rush-ton, 220 Second avenue north, both of whom work in the sheriff's office, and Mrs. Harold A. Clark, 623 Fourth avenue north, who works in the driver's license bureau, obtained uniforms this week as part of a statewide program for all women employees in sheriff's offices.

T. F. Women Deputies Get New Uniforms

New uniforms and badges being worn by the three women deputy sheriffs in Twin Falls county promise visible proof they really are deputies and not just office help or secretaries.

Mrs. Clarence Wagner, Kimberly, and Mrs. John O. Rush-ton, 220 Second avenue north, both of whom work in the sheriff's office, and Mrs. Harold A. Clark, 623 Fourth avenue north, who works in the driver's license bureau, obtained uniforms this week as part of a statewide program for all women employees in sheriff's offices.

Death Asked For Russian In Spy Case

MOSCOW, May 10 (AP)—A military prosecutor today demanded the death sentence for Oleg Penkovsky, a Russian accused of spying for U.S. and British intelligence.

He asked 10 years "deprivation of freedom" for British intelligence officer, William Greville Wynne, Penkovsky's alleged contact man.

Stolets of sex and drinking parties since the close of testimony in this latest spy case show trials. Arguments by the prosecution and defense were to be followed by verdicts Saturday of the three-judge court.

Kennedy, Canada Leader Talking

JYANNEPORT, Mass., May 10 (AP)—President Kennedy and Canadian Prime Minister Lester Pearson began two days of talks here in high spirits today.

The President, the prime minister and eight aides sat down to lunch today at the country club, 30 minutes after both arrived here to canvass all major outstanding programs involving American-Canadian relations.

Earlier, Kennedy welcomed Pearson as an old friend of the United States.

President Plans Tour in Berlin

BERLIN, May 10 (AP)—President Kennedy will make a seven-hour visit to West Berlin June 20, touring a 28-mile route that will take him along the communist wall and give an estimated 100,000 West Germans a chance to see him. It was announced here today.

Presidential Press Secretary Pierre Salinger outlined plans for the presidential visit after applying Kennedy's route through the city with a party of White House aides.

Nurses for Area Hospital Attend Meets

JEROME, May 10—Blair Mary Martin reported that the majority of the nurses on the staff of St. Benedict's hospital have attended schools and training sessions.

Blair M. Anella, nurse, and Sister M. Dewey Quintana, LPN, attended the Cushing school of Western Hospitals in Los Angeles, Calif. While there, they also attended the four day session of the Association of Western Hospitals.

Sister M. Germaine of St. Mary's hospital, Cottonwood, formerly was in Jerome, and Sister M. Cornelia, Jerome, attended the Western Institute conference of higher education for nurses at Homestead, Midway, Utah, last week. This is the third conference of the series of six, which are financed by the WICHE grant. The course is offered through the University of Utah extension division.

Sister M. Agnes attended the fourth of the series of nursing board in Idaho. She is one of the three new members appointed to the board. Sister M. Agnes is to serve a three year term, effective April 1.

Sister M. Agnes is the vice president of the nursing board. This board is responsible for the licensing of professional and practical nurses in the state.

Everybody's Money

By MERVILLE STANLEY
BUKESBER

Although investment entails varying degrees of risk, the hazards can be brought within manageable proportions through a few prudent principles. These include diversification as among industries, balance as between equities and fixed dollar investments, concentration on sound enterprises of proven managerial capacity, and the habit of seeking counsel from analytical dealers with integrity and research facilities.

To frequently find the answers between two conflicting extremes—positioning a search for "a sure thing" or "a riskless venture, and the other, a desire to make a killing out of a single almost-purchase decision—have been dramatic instances of extraordinary profit propensities, reputable sponsors do not represent such prospects in order to whet the speculative appetite. If an investor has sufficient capital funds to warrant such risk-taking, even he should limit such highly speculative commitments to a relatively small fraction of his total financial resources.

A relative family head, in preparing a life-time financial plan for living, is not ready to select security risks until he has taken preliminary steps, including adequate life insurance, health, disability and major medical coverage and adequate property and casualty insurance on household effects and protection of against liabilities, and has built up reserves consisting of liquid savings deposits or high grade bonds.

Once these preliminaries are out of the way, it is time to initiate systematic savings habits. If possible, it is desirable to let the principle of compound interest work for you. The more the less the investor has better than average skill in evaluating securities and judging market trends, he is likely to do better in the long run through following the plan of "buying average" than by putting some number of dollars periodically in precisely the same list of securities.

Nowadays the unsophisticated investor does not have to rely on do-it-yourself techniques. He can put professional investment management at his "elbow" in a variety of ways. If his means are moderate, this can be accomplished by buying "financial packages of convenience," such as open-end or closed-end mutual funds or Common Trust Funds operated by banks and trust companies.

Another approach is to acquire shares of property and casualty insurance companies, which in turn hold portfolios of diversified shares and bonds. Bill another avenue is to set-up a private living trust with banks or trust companies, or to engage in a real estate investment company.

When the Jones family averages recently reached a new high level for the year, investors began to wonder whether to continue to buy and hold common stocks. One group's answer was embodied in the first 1963 quarterly report of Lehman corporation, a closed end investment company, which reported that the end of the first quarter had had 62.4 per cent of its invested capital in stock, with 7.1 per cent in cash and bonds.

Numerous mutual funds will make arrangements automatically to reinvest dividends and interest in additional shares.

Lehman, like other sophisticated fund managers, has a portfolio of stocks, with a compilation of securities added.

News Around Idaho

IDAHO FALLS, May 10—Most spokesmen of the transportation industry at a panel yesterday of the International Transportation Council expressed opposition to de-regulation. Dismissing the view of Ed White, Chicago, general manager of Wisconsin Railway, who asked for congressional legislation to permit "railroads a free and equal opportunity to compete in the market place." Nearly 100 persons from Arizona, Montana, Utah, Idaho and Colorado attended the meeting.

IDAHO FALLS, May 10—Fourteen West German scientists who visited the nation last week said they are confident atomic energy will play a vital role in their country's economic development. "And not just in West Germany, but all the world," West Germany is a highly industrialized country. We must concern ourselves with energy. We must concern ourselves with energy. We cannot bypass this modern development," one of the visiting scientists said. As soon as practicable they will be working on energy supplementing conventional fuels in providing atomic power.

BOISE, May 10—A 31-year-old man wanted in Missouri on a charge of murdering his wife asked for his freedom yesterday in a petition for a writ of habeas corpus filed in third district court here. Charles M. Smith, who was arrested here March 31 when the car in which he was riding was stopped for a routine traffic check, claims in the petition he was not in Missouri at the time his wife's slaying occurred—Oct. 28, 1961, or "at any other time pertinent thereto." Judge Hamer Budge ordered a hearing for May 22.

IDAHO FALLS, May 10—Bonneville school district 83's proposed educational budget for 1963-64 will be \$1,282,245 less than this year's budget, even though the district anticipates an increased enrollment of about 200 students. Charles L. Clark, district superintendent, presented the proposed budget to the school board yesterday afternoon. He advised that the estimated decrease of \$1,011,141 for '63-'64 as compared to the 1962-'63 figure of \$1,112,285, was necessitated by this year's legislation changing the classroom unit type of state education funding to the average daily attendance (ADA) for next year.

IDAHO FALLS, May 10—An austere budget appears ahead for Idaho Falls school district 31, along with other districts which are experiencing sharp growth. Supt. John T. Orr arrived at these figures yesterday after a long session of the new school formula released by the Idaho department of education.

IDAHO FALLS, May 10—A 4-year-old child was killed for injuries received Wednesday when he ran into a car. Copper, son of Mr. and Mrs. Lynn Cooper, Idaho Falls, was hurt when he walked into the path of a moving car on highway 26 seven miles east of Idaho Falls. The boy and a small girl companion had gone to a mailbox across the highway at the time, according to state police. The Cooper's small daughter was killed at the same place when hit by a car some four years ago.

BOISE, May 10—A forecast of bad flying weather has prompted cancellation of a CHRYSLER Tour to state airport on the southern tip of Camanche Bay at Pikes Peak this week-end. But Chief Morrison, Idaho state aeronautics director, urged those who planned to make the flight to go by air. "The weather conditions this week-end is for rain and low clouds in the north Idaho area. Heavy traffic on the field could cause some problems so we've called off the fly-in but we urge everybody to drive in for the work project," he said.

ST. MARIES, May 10—An eighth district court jury here returned a verdict of innocent in the slaying of a young man. The son of a St. Maries, Idaho, was tried in connection with the shooting death last January of 37-year-old Robert Bjorkquist in an area cabin. Johnson told the jury, "I didn't want to shoot anybody but Bjorkquist threatened me."

POCAHELLO, May 10—More than \$400 in cash and pledges has been collected at a local hospital to finance a court fight against the state's new loyalty oath law. Dr. George Hecker, president of the Idaho State chapter of the American Association of University Professors, reports the war chest totals \$424.60.

Rodeo Results In T-F-Listed

Results of the jackpot rodeo held at the Park ranch, Twin Falls Sunday afternoon were announced Thursday.

First place winners included Larry Duncan, Twin Falls, barrel racing with 160 points; Larry Duncan, Twin Falls, 168 points, saddlebronc riding; Ben Freeman, Twin Falls, 140 points, bull riding.

Harvey Hilderman, Twin Falls, was first in the calf roping with a time of 10.9 seconds. Jerome, was first in the dogging with 6.3 seconds. Jasper Thomas, and Johnny Vance, both Nevada, were first in the team roping with a time of 4:1.1 seconds. The next rodeo will be held at 6 p.m. Sunday.

Death Takes Robert Burns

SHOENHE, May 10—Robert Burns, 74, died of a heart attack at his home in Shoehoe, Idaho, Thursday. He had been a patient there since 1958.

He was born March 20, 1888, in Salt Lake City and came to Shoehoe in 1924. In 1929 he was elected Lincoln county assessor. He held the post for 18 years. Mr. Burns was a member of the Shoehoe Odd Fellows lodge.

He married Angeline Weaver, Dec. 28, 1919, she taught school in Shoehoe for many years and died in 1957.

Survivors include four sons, Robert Burns, San Diego; Kenneth Burns, Lexington, Ky.; Darrell Burns, Los Alamitos, N.M.; and Keith Burns, Pocatello—one daughter, Mrs. Carol Rittinger, Yonkers, N.Y.; three sisters, Mrs. Mary Coburn, Salt Lake City; Mrs. Elizabeth Fox, Seattle, and Mrs. Myrtle Ellis, Dubois, and 10 grandchildren.

Funeral services will be held at 2 p.m. Tuesday in the Bergh funeral chapel. Concluding rites will be conducted in the Shoehoe cemetery. Friends may call at the chapel Monday evening and until time of service.

Junior Riding Club Sets Meet

PILER, May 10—Members of the Junior Riding club and prospective members are asked to meet at 4 p.m. Monday at the home of Mrs. Roger Vincent. Parents of members also are asked to attend.

This club is sponsored by the Piler Wranglers, Mrs. Robert Blasko, Jr., is chairman of the committee in charge of the junior club.

Officers will be elected at this meeting and a drill master selected. Other business will be transacted.

Dreylow Plans to Return to Home

(See Editorial on Page Four)
BOISE, May 10—L. J. Dreylow, 74, of Boise, will return to his home at Cragmont, Idaho, for the first time in five months.

The 73-year-old state official has been in Boise since last December when he arrived to get legislative halls ready for the 1963 legislative session. He presided over the senate during the 72-day session and then stayed on for the "voluntary" work. During his stay he also has served three times as acting governor while Gov. Robert F. Smylie has been out of state.

While here, Dreylow also has been hospitalized twice because of leg troubles.

Bids Called

WASHINGTON, May 10—Bids will be called for the reconstruction of the Washington State Penitentiary, which is located in the state capital.

Church said additions to the substitutions will include concrete foundations, steel structure and electrical equipment.

COWBOYS SPLIT TWIN BILL WITH BILLINGS

Locals Win First Game 9-4, Bow in Nightcap by 7-1

The Magic Valley Cowboys battered Billings in another display of power to win the first game 9-4 but ran into the two-hit pitching of Ron Cayll in the nightcap and bowed 7-1 Thursday in a Pioneer League doubleheader split. The Cowboys now take Friday off to travel to Montana where they will play three games each at Billings and Great Falls before returning to Javies park May 18 to host the Idaho Falls Yankees in what should prove the biggest series of the first half.

Right-hander Art Raffo had it in for his third win against no defeats in the first game but John Albright, seeking his fourth straight, ran into Cayll and a six-run, six-inning outburst and wound up with his first defeat instead.

The opening victory was apparent from the second inning when three walks loaded the bases and second baseman Dan Simons followed with a bunt clearing double. Mike Marshall followed up with a home-run to cap a five-run inning.

McGraw picked the third inning for his fifth home of the year and the Cowboys added three more runs in the fifth on a pair of rather routine fly balls left in for doubles when the billings centerfielder lost the ball in the twilight.

Raffo's toughest moment, after a pair of unearned runs in the third, came in the sixth when George Kernak and Jim Chambers unloaded solo home runs.

The nightcap was a beautiful pitchers battle through the first five innings, Cayll and Mollan bery having given up just one single apiece in gunning-for-shots.

But in the sixth Mollan couldn't get the side out as a combination of line drive singles and infield chases left him on the ropes. Dave Fritz and Jim Harris opened with singles before Otto Karmak was whiffed on a base hit by Simons whose throw cut Fritz down at the plate.

Kernak then delivered a one-run single and Mollan pumped another Mollanberry punch into the outfield for another hit. Will Taylor's two singles scored only one run, though as some nifty defensive work by centerfielder Bob Carmo.

Mollanberry was Mollanberry as Lane Phillips, who uncorked a wild pitch to bring Kernak home. After getting Tom Smith out, Phillips served up a lead to Jim Chambers, who powered it over the light tower in three-run homer.

The Cowboys, thanks to a gate-opening error, prevented what would have been their first shutout in the fifth year of their first inning. Jim Campbell, whose two hits spelled Cayll's bid for the no-hitter, led off with his second single and Carmo drew a walk. Fritz lived when his grounder went for an error.

After walking pitcher Brian Ross to force the Cowboys' lone run home, Cayll stamped his foot and twisted his arm in self-disgust.

Billings (First Game)
Harris 4-1-0-0
Fritz 3-1-0-0

Boise Sweeps Twin Bill Over Elects

BOISE, May 10 (UP)—With light pitching in the first game and a timely homer in the second game, Boise swept a doubleheader from visiting Great Falls 8-1 and 4-2 Thursday night.

Ray Orlikowski of the Braves gave up only one run in the first game and that was earned to pinch that contest and Dave Russell slammed a homer in the bottom of the sixth in the second game with one man on.

Track Meet

The southern regional track and field championships, again expected to have at least 100 of 35 event champions and the team titles in the class A and B divisions, will be run off Saturday at the Twin Falls track.

Field events will be run off in the morning with the running events scheduled for shortly after noon.

Boise is defending champion but will have trouble with the Twin Falls team while Oakley is given a slight nod over several other potential class B champions.

Card Homers Overpower Dodgers 10-7

ST. LOUIS, May 10 (UP)—The St. Louis Cardinals unleashed their home-run power, including Bill White's grand slam, in a 10-7 victory over the Los Angeles Dodgers 10-7 Thursday night.

St. Louis scored seven times in the fifth inning after Los Angeles starter Pete Rickert, who had a three-over-par 73 and took himself out for playing the wrong ball on the eighth hole.

Cardinals, who have been suffering from a neck injury for three years, said the hot sun that flooded the 7,000-seat Colonial country club course, reviled him from pain. He proceeded to put on a fantastic putting exhibition to lead the field of 60 into the second round.

Robinson Has Big Night as Redlegs Win

CINCINNATI, May 10 (UP)—Frank Robinson lashed five hits, including two homers, as the Cincinnati Reds won 10-7 Thursday night.

Robinson collected his seven runs batted in with homers No. 3 and 4, a double and two singles. Vida Pinson chipped in with four runs batted in on two singles and a double.

Backed by the two sluggers, Jim Maloney went the distance for his fourth victory in five decisions.

St. Louis scored seven times in the fifth inning after Los Angeles starter Pete Rickert, who had a three-over-par 73 and took himself out for playing the wrong ball on the eighth hole.

Sanders Takes Lead in Colonial Invitational

FORT WORTH, Tex., May 10 (UP)—Doug Sanders played without a slip for the first time since the Masters and shot a three-under par 67 for the opening round of the \$50,000 Colonial national invitation golf tournament Thursday.

Taking some of the play away from the competition was the individual of colonialist Don January, who disqualified himself.

January, invited to the tournament after a threatened player revolt had a three-over-par 73 and took himself out for playing the wrong ball on the eighth hole.

Sanders, who has been suffering from a neck injury for three years, said the hot sun that flooded the 7,000-seat Colonial country club course, reviled him from pain. He proceeded to put on a fantastic putting exhibition to lead the field of 60 into the second round.

Johnston in Pasadena Valley branded and sprayed cattle at the Earl Carnahan ranch last week so the cattle can be turned out early for summer grazing. Helping Carnahan were Martin Gresham and Charles Parish.

One of 11 coyote pups was destroyed at the Robert Speedy northwest of Richfield by a local trapper, "Little Joe" Aronson. His methods of catching the mother coyotes were quite however. At the Speedy ranch, he skinned one of them and placed a cyanide bomb inside the pelt-but the wily animal ran for such tricks. The trapper stated as many as 100 have been found in one coyote den.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Outcome of Wheat Referendum Ballot Could Decide Federal Role in Farms

Referendum will be held in the state of Idaho on May 11, 1963, to decide whether the federal government should continue to support wheat production in the state of Idaho.

WASHINGTON, May 10.—The nation's wheat farmers will vote May 11 in a referendum which could result in a new government philosophy for agriculture.

The specific question will concern what kind of 1964 wheat program the farmers want from the government. The implications are far-reaching.

Agriculture Secretary Orville L. Freeman has said the choice is one "between order and chaos."

Freeman also has said that the choice is one "between order and chaos."

Charles B. Shuman, president of the American Farm Bureau Federation, does not agree. In fact, Shuman has not agreed with Freeman's view of the choice.

which would be supported at \$1.20 per bushel.

The alternative, or stop-gap, program for wheat in the event the administration's plan is rejected would call for no limits on acreage or marketing.

Price support under the alternative plan would be 60 per cent of parity. This would amount to about \$1.20 per bushel and would go to growers who stay within their acreage allotments.

Freeman has said of the wheat plan: "If it is approved in the referendum, we've got the wheat surplus problem licked. He also has said of the plan: 'This is it. If it is turned down, there won't be another at this session of congress.'"

Freeman also has said that the choice is one "between order and chaos."

Charles B. Shuman, president of the American Farm Bureau Federation, does not agree. In fact, Shuman has not agreed with Freeman's view of the choice.

Shuman has said the choice is one "between order and chaos."

Freeman has said the choice is one "between order and chaos."

115 per cent of the support level except as offset by comparable open market purchases.

Representative department officials have said that if Shuman's plan is better than the one authorized by congress, "we don't see it that way. It is no plan at all."

Among the organizations that disagree with the Farm Bureau are the National Grange, National Farmers Union, National Farmers Organization, Missouri Farmers' Association, National Association of Wheat Growers, and a large number of grain co-ops.

UPI asked a knowledgeable member of the agricultural stabilization and conservation service for his views on the wheat referendum.

"What happens if the wheat referendum is defeated?" this is his reply.

"If the referendum is defeated, the national average price support will drop to 60 per cent of parity, or about \$1.20 a bushel."

"Farmers would have to plant within their acreage allotment to be eligible for the \$1.20 a bushel price. There would be no acreage compliance. Farmers would have to plant a lot of wheat to make up for the loss of income."

"The total wheat acreage probably would be 70 million acres, with about 60 million acres harvested. This is far more than the 55 million-acre minimum which produced a big surplus."

GARY SCHROEDER, left, and Von Potter get the rope off a calf's leg after dragging it out of the leading calf during "mowing day" last week for the more than 200 head of cows and calves owned by the Potters. The couple trucked the cattle to their new ranch home in the Lost River country, about 18 miles north of Mackay, where they will operate an 800-acre stock ranch. While the new home is just 40 miles from Halley over trail-creek routes, they had to travel via Carey and Arco, a distance of 135 miles, because the shortcut road is not open. (Times-News photo)

Office Open

Carl Boyd, chairman, Twin Falls county agricultural stabilization and conservation committee, announces committee will be open to farmers to discuss the wheat program on the following Saturdays: May 11 and May 18.

"This would mean that every rural county in the United States would be in trouble."

The nub of the Farm Bureau's opposition to the wheat plan appears to be the issue of government controls against complete freedom of action for the farmer.

"The department now proclaims that the farm board of Herbert Hoover's ERA said that it was impractical to support farm prices without an effective control program."

"And you may be sure" the pro said, "there were no wild-eyed Democrats on the Hoover farm board. That was quite a conservative outfit."

The Hutchinson, Kan., "News" published in the heart of the Kansas wheat country, said "it is doubtful that the Farm Bureau really wants government control."

The "News" said the Farm Bureau wants a system whereby the government must provide price support, but the farmer would voluntarily decide whether to limit his production, or produce all he could.

"The News" said the Farm Bureau "insists that under its plan farmers would voluntarily retire part of their land and would raise only a manageable amount of wheat."

"Experience does not support this optimistic view of human nature," the News concluded. The Springfield, Mo., "Leader-Press" said that on the outcome of the wheat referendum "Freeman may be making his career in the cabinet."

"It has been said that department may not see his job." The "Leader-Press" added that the Farm Bureau "may be gambling more than it reckons... defeat could cost the Farm Bureau considerably in prestige."

Hailey Rancher Trucks 200 Head of Cattle Some 100 Miles to New Home

HAILEY, May 10.—Mr. and Mrs. Von Potter have left for the new ranch home in the Lost River country, some 18 miles north of Mackay, where they will operate an 800-acre stock ranch. Last week they trucked, via Cody truck line, the more than 200 head of cows and calves from their ranch three miles south of Hailey to their new pastures.

They were assisted in rounding up the cattle and cutting out the calves by Mr. and Mrs. Carl Schoenley-Gannett.

Because the Trail creek summit road is not yet open, they had to truck via Carey and Arco, a distance of 135 miles.

The new ranch over Trail creek summit is 48 miles.

Of the 800 acres they have purchased, all is in pasture at this time. Some 400 acres is sub-meadow land. The Potters plan to cultivate the remainder of the land and raise hay.

They have a water right to 300 inches of Lost River water. One spring on the land runs approximately 1,200 inches.

The feeding time in this section of the country, which is one

year-old daughter, Marge, moved to the Potter ranch last week and will make this her home.

Michael Potter, a junior at Hailey high school, will live with them until the end of the school year.

They run Hereford cows and use Black Angus bulls.

Mr. and Mrs. Fred Parker, who owned and operated the Lost River ranch purchased by the Potters, together with their 8-

year-old daughter, Marge, moved to the Potter ranch last week and will make this her home.

Michael Potter, a junior at Hailey high school, will live with them until the end of the school year.

GRADING FAT lambs are Marvin Custer, left, and Marvin Lohr. The two men spent several days grading lambs for the Twin Falls Livestock Marketing association prior to sale time. The men look for size, uniformity and weight. (Times-News photo)

Twin Falls Livestock Association Markets Fat Lambs, Fleece Crop

Some 400 fat lambs were sold to Swift and company by the Twin Falls Livestock Marketing association for \$21.65 per hundredweight, report says. Donald Youst, Twin Falls county agent, said the lambs averaged 104 pounds.

Youst noted that the association was well pleased with the price and had hopes of receiving more.

The price paid for the fat lambs, plus the price paid for the fleece, improves the sheep picture in Magic Valley, Youst added. Some 2,800 wool fleeces were purchased by Carson Sewing company for \$9.17.

The wool price is several cents higher than the 1962 price and is one of the highest prices received for wool in the state.

Much of the success of the sheep sale was credited to the members of the association who work hard to insure top quality buyers, said Youst.

One of the many chores performed for members of the Twin Falls Livestock Marketing Association is the marketing of lambs prior to the flock's movement to Piler, where they are inspected.

Two members of the association, Marvin Custer and Marvin Lohr, move rapidly through the flock marking the top lambs with a piece of oil chalk.

The streak down the back of the young lambs tells the owner which lambs are desirable for market. The marks also speed loading and shipping.

Generally a quick grab along the backbone of the lamb tells the inspectors if the lamb is fat enough and ready for market. In addition, the animal is quickly loaded for sale and uniformity.

By encouraging the bringing of top quality lambs to the association pool the association pays a reputation for quality and this could be worth a few cents more in price.

Some 27 flock owners participated in the association in 1962, said Youst. There were three lamb and wool pools held in the association.

A. Winkie, Piler, is president of the association and Ralph Buhl, Hazelton, is vice president. Marvin Custer serves as chairman and Youst serves as secretary of the association.

Youst noted that the University of Idaho extension service

Two Gooding 4-H Leaders Given Awards

GOODING, May 10—Mrs. M. L. Jensen and Mrs. M. A. McClelland were awarded "best clovers" for 15 years of 4-H club leadership at the annual Idaho Power 4-H leader recognition banquet Tuesday night at the West Point Grange.

J. L. Graves, University of Idaho extension agent supervisor, praised Mrs. Jensen and Mrs. McClelland for their devotion to young people and the interest they have displayed in their development. Each of the leaders have worked with more than 150 4-H members in their leadership careers.

Mrs. McClelland has led clubs in clothing, foods, entomology and freetime and has also worked as an administrator for the entire Wendell Community club for the past three years. Mrs. Jensen has led clubs in clothing, foods, safety, health and has developed one Chicago trip winner.

Mrs. McClelland started in 4-H club work in 1947 and Mrs. Jensen in 1948. They are the first club leaders to receive such recognition in 4-H club work in Gooding county.

Other awards presented to club leaders included gold clovers to Howard Nicolson and Vernon Haverscroft for 10 years of leadership; and silver clovers for five years of leadership to Mrs. John Robertson and Mrs. George Rathke.

Stavenscroft, Gooding county state representative, was master of ceremonies for the event.

J. L. Graves spoke on "4-H Philosophy." He praised the leaders for the important part they play in helping young people develop into useful citizens and also thanked the leaders for volunteering not only their skills, but also a great amount of time and effort for the support of the club members.

Joe Hall, assistant county agent, presented the president pins to Oren Hutton and Ravenscroft for recognition of the fine leadership job they had done as president of the county 4-H Leaders' council.

Entertainment was furnished by the 4-H junior leaders and consisted of a piano solo by Jim Trueman, Wendell; musical numbers by the Silver Creek, Becky Butler, Gretchen Belcher, Sue Bright, Wilda Cline, Patricia Henderson and Doris Graves, accompanied by Dolores Lovitt, and a piano solo by Carol Robertson, Gooding.

Becky Butler, Richard Hagerman, Allan Gass, Susan Rice, Jerry Jolly, Susan Orth, Gloria Halka, Sandy Rathke and Ed Kester.

Table decorations were by the West Point Homebuilders 4-H club and the chicken dinner was served by women of the West Point Grange, with Mrs. Ron Tucker, home economics chairman, in charge.

DISCONTINUED MINNEAPOLIS, May 10—General Mills, Inc., announces its English subsidiary, General Mills Ltd., will discontinue the manufacture and marketing of its products in England.

For their efforts. Serving on this committee were Mrs. Dan Nielsen, Mrs. Richard Hagerman, Allan Gass, Susan Rice, Jerry Jolly, Susan Orth, Gloria Halka, Sandy Rathke and Ed Kester.

AUTOMATIC HOG feeding is possible, with a minimum of hand labor, with the new "Profil-matic" feeder now being offered by the H. D. Hudson Manufacturing company. With a flick of the switch the feeders can be filled.

Automatic Fill Is Feature Of New Hog Feeding System

CHICAGO, May 10—An automatic hog-feeding system which combines all the advantages of a "profil-matic" feeder with an automatic filling mechanism that saves time and labor is announced by H. D. Hudson company.

Feeders furnished with the system are made of two oz. "zeal of quality" galvanized steel with tapered sides to prevent bridging and deep troughs with feed-saver edges to keep feed in the trough and off the ground.

With the flick of a switch these feeders are filled in about five minutes per feeder. One 16-door feeder is adequate for 50 large hogs and up to ten feeders can be serviced by one auger.

The filling mechanism is available with either an automatic switch that turns on when the feed level drops or a manual switch that is turned on by hand and time-consuming task of and cuts off automatically when the feeders are full.

The system eliminates the hard labor of feeding two and one-half tons of feed per 100 hogs to market.

The filling mechanism is available with either an automatic switch that turns on when the feed level drops or a manual switch that is turned on by hand and time-consuming task of and cuts off automatically when the feeders are full.

EFFECTIVE ECONOMICAL CONTROL OF CANADA THISTLE AND WHITE TOP

Amino Triazole or Cytrol® work by systemic action... achieve a high degree of permanent control with one application at a one-time cost. Also control many other weeds and grasses

Amino Triazole and Cytrol kill roots and all

Sprays can be applied with power equipment, or hand sprayer for spot treatment

Amino Triazole Washbiller is available in 4 lb. canisters and 24-lb. pails.

Cytrol Amino-Triazole is packed in 1-gallon polyethylene bottles and in the handy new 5-gallon drum.

You'll have to go a long way to equal the efficiency of Amino Triazole or Cytrol Amino-Triazole, the liquid formulation based on Amino Triazole, in knocking out Canada Thistle. Results of several years' western use show that it does a thorough job where most other materials give only token control.

Amino Triazole and Cytrol get right into the plant system—killing roots and all. No other product so completely eliminates underground growth and new outcroppings.

*Cytrol is a trademark of American Cyanamid Company

For best results Canada Thistle should be sprayed in the spring when plants are 6 to 10 inches high. Follow application instructions carefully and note especially restrictions pertaining to cropland use.

Amino Triazole and Cytrol weedkillers also control Quack Grass, Bow Thistle, Cattails, Dock, Reed Canary Grass, Berry Vines, Cheatgrass, Poison Oak, Milkweed, Horsetail Rush, Leafy Spurge and many other weeds and grasses.

If desired Amino Triazole or

Cytrol can be combined with a soil sterilant on non-cropland. This will prevent later germination of certain weed seeds and in some instances provides a faster knock-down of weeds present.

For further information consult your pesticide dealer.

RPO Contract Is Favored By Dealers

ARMONA, May 10.—Dean Warren, president of the RPO contract, Tuesday night at the Magic Valley cattle convention, said the RPO contract, according to the dealers, is the best one for the farmer and the dealer.

Warren said the RPO contract is the best one for the farmer and the dealer. He said the RPO contract is the best one for the farmer and the dealer.

Warren said the RPO contract is the best one for the farmer and the dealer. He said the RPO contract is the best one for the farmer and the dealer.

Demand for Farm Items May Increase

WASHINGTON, May 10.—The demand for farm products is expected to increase in 1963, the agriculture department said in a review of the general agricultural situation.

Report shipments may be about the same as in 1962 and 1963, but the demand for farm products is expected to increase in 1963, the agriculture department said in a review of the general agricultural situation.

IT REALLY ISN'T SOAP BUBBLES that Kay Wells, son of Mr. and Mrs. Claude Wells, Oakley, is holding, but a sheep ready to be shorn. The youth, a high school sophomore, says he is one of the few who still shorn sheep by hand and this method is ideal for a farmer who has a small flock. He learned this art from his father and two older brothers and will graduate to electric clippers when he masters the art. Wells uses a pair of sheep hand clippers, a bucket of cold water to cut through lanolin secreted by the animal that accumulates in the wool and a whetstone to keep his clippers sharp. Ten to 15 minutes are all that is required to get the job done. He has done several bands in the Oakley area and has promises of future jobs. (Times-News photo)

Farm Youth To Be Gem State Guest

BOISE, May 10.—Eugene Snyder, an international Farm Youth Exchange student from Luxembourg, will arrive in August for a stay of three months at the Idaho State Fairgrounds. Snyder is a student who lives on a 1,200-acre farm. He is studying to become a teacher. Snyder speaks French, German and English in addition to his native Luxembourgish. Hobbies are music and sports.

Snyder's first visit will be in the home of Mr. and Mrs. Keith Amende, Albion, Aug. 15 to 20. Next he will be a guest of Mr. and Mrs. John New, American Falls, Aug. 29 to Sept. 12.

For the next two weeks he will be in the home of Mr. and Mrs. Ralph Jurgensmeyer, Rupert. Other hosts are Mr. and Mrs. Vernon E. Lassen, Piler, and Mr. and Mrs. Lewis Cogan, Horseshoe. The final two weeks will be spent in Ada county with a host family yet to be determined.

Bureau Reports Good Gains Made for Northwest Water

BOISE, May 10.—"Bureau of Reclamation reservoirs in the Pacific Northwest made important gains during April," regional director M. Boyd Austin bureau of reclamation said, according to reports covering 41 reservoirs throughout the Northwest.

Weather during the month was very favorable and precipitation was considerably above normal in many areas. This increased the inflow to the reservoirs and materially reduced the need for irrigation water deliveries during the month, making more water available for storage in the reservoirs.

SWEET MILK

WASHINGTON, May 10.—The dairy industry is using about five per cent of all the sugar, corn syrup and dextrose consumed in the United States and by 1966 at the present rate of increase will be using 65,000 tons of sweeteners, predicted the U.S. department of agriculture.

Research Director Named By Charter Seed Company

Thomas P. Kiely, 30, has been appointed research director for Charter Seed company and re-elected to Twin Falls from Colorado, where he was research director for the Kuerst-Empson company for the past nine years.

A graduate of Colorado State University, where he majored in vegetable crops production and breeding, Kiely has been actively engaged in vegetable development and selection, seed procurement and seed quality studies.

J. L. Mueser, Charter Seed company president, in announcing the appointment stated the company's ever-expanding requirements in plant breeding and research have made this position necessary.

Married and the father of three children, Kiely plans to move his family to Twin Falls upon the completion of the Colorado school term.

The appointment of Kiely will add greatly to the services of

Cash Totals From Markets Equal 1962

WASHINGTON, May 10.—The department of agriculture has estimated that cash receipts from farm marketings this year likely will not be much different than the estimated record high of \$4.7 billion dollars in 1962.

Marketings of livestock and livestock products will be a record high but prices will average well below the favorable levels of 1962. Crop marketings in 1963 may be slightly larger than in 1962, while prices probably may change little.

A large volume of marketings of cattle and hogs will help sustain income from meat animals despite substantial price declines in 1963, the department said. Prices for sheep and lambs should continue to improve this year and be well above prices of the past two years.

A slight gain in receipts from dairy products is expected due to an increased volume of milk sold to plants and dealers. The price of milk should be close to that of 1962.

Cash income from farm marketings of poultry and eggs may be up somewhat. Increased mark-

Revenue of Milk, Cream Is Declining

WASHINGTON, May 10.—The agriculture department has estimated cash receipts from farm marketings of milk and cream in 1963 totaled \$4,833,000,000. This is about one per cent less than the 1962 record.

The department's crop report on dairy cattle has averaged two per cent a year.

The decline in total cash receipts for milk and cream in 1962 was caused by a decline of nine cents in the average price received in terms of hundred-weight of milk.

DUNCAN LEAVES

The "Dollar Wheat" Myth

"\$1 vs. \$2 wheat is the issue in the forthcoming referendum." Nonsense! To obscure the real issue of government control vs. free enterprise, the Department of Agriculture is trying to scare wheat farmers into thinking they will only get \$1 per bushel if the referendum on May 21 defeats Secretary Freeman's certificate plan. The Farm Bureau asks these questions:

1. Since the support price under the certificate plans is a blend of two prices (\$2.00 for certificate wheat, \$1.30 for non-certificate) how can a farmer possibly get \$2.00 a bushel?
2. How can a farmer get \$1.00 a bushel if the certificate plan is defeated if the SECRETARY is required to support wheat at 50% of parity (about \$1.25)?
3. Who's in charge of mathematics in Washington?

Vote "NO"

Potatoes for Processing Show Dip

BOISE, May 10.—The volume of Idaho potato processing in the first time this year the current crop year was 20 per cent less than that of last year, the U.S. department of agriculture reported.

It said that from last July 1 to March 31 processing plants used 18,335,000 hundredweight of potatoes, compared with 19,584,000 in the corresponding period last year.

Processing for food products this year, however, was running ahead of that of last season with a total of 14,687,000 hundredweight. The 1931 crop figure was 19,857,000. Processing for starch, flour and alcohol used 1,452,000 hundredweight this season and 8,677,000 last season.

Committee Is Selected to Pick Winners

PLUMMER, May 10.—Earl McClellan, president, Idaho Association of Soil Conservation Districts, announced a three-man committee to select the state's outstanding conservation districts.

The judging committee, McClellan said, will review scores sheets of soil conservation districts entered in an annual recognition awards program sponsored by the Goodyear-Tire and Rubber company.

The "top" farmer-conservationist chosen and a member of the district's governing board will be guests of honor at a research trip to Arizona in December. Judges are Pete Taylor, soil conservation service, Boise; Youngstrom, extension service, Boise; and Don Williams, Northrup King and company, Boise.

Annual Meet Of Holstein Group Is Set

BALT LAKE CITY, May 10.—One of the nation's big June Dairy Month activities will be the Holstein-Friesian association of America's 78th Annual convention.

The annual business meeting of the world's largest dairy breed registry organization is expected to attract more than 1,500 leaders of the registered Holstein industry from all parts of the western hemisphere.

The association's 40,000 members will be represented at Salt Lake City by 204 voting delegates from 48 states and Puerto Rico.

Officers elections and new policy decisions are the primary business items scheduled for consideration.

The association's bylaws are scheduled for amendment. Chief among these is a new and simplified registration fee schedule. An increase in registration fees will be proposed.

anyone. Guess you would say I'm retired," he laughs.

He uses English blades, which used to cost \$1. During the war, when the shears couldn't get shears from England, and before the advent of electric shears, they used American-made blades, which cost \$3.75.

"The temper does not hold up in the American-made blades like it does on those made in England. It is only in the edges of the blades and the steel gets soft."

Reynolds says he shears about 200 sheep with one pair of blades.

Reynolds sharpens his blades every month and evening. Every few minutes while he is shearing he runs the edge of the blades over a whetstone on which he keeps a few drops of oil.

He then dips them into a can of water to cut the oil from the wool off the blades. He uses a mixture of kerosene and sperm oil to make the stone hard. So will coal oil and turpentine, which some shears use, he says.

The blades aren't straight when bought—but must be straightened before using. This is done by placing each blade in a wooden groove and bending it until it is straight.

Mr. Reynolds has contracted tick fever, rabbit fever, "Q" fever and undulant fever while shearing sheep.

Rabbit fever, which he had for 12 years, until the advent of the aureomycin in medicine, is contracted when a shearer scratches his hands or arms on rocks, bushes or sheep's wool and breaks the skin.

The germ is picked up in the sheep's wool when they bed down where rabbits have died from tularemia. The germ does not die in the air.

Reynolds remembers that while shearing crews showed tularemia in their blood when they took the jaundice and that they were not able to get rid of it until the so-called "miracle drugs" were put on the market.

Mr. and Mrs. Carter operate a 120-acre stock ranch. They have 12 sheep. They are lambing out 71 sets of twins from 139 ewes. They purchased lambing sheds last fall and lost only one ewe and 18 lambs during the lambing season. Their wool averaged about 10 pounds to the sheep, Reynolds advised.

quickly assemble and install the structure he needs, with no other tools or materials required. Very pointed out.

The size or elevation of any part of the headgate can be remedied simply by changing the number of standard-sized modular panels forming walls and chutes. Multiple turnouts of different sizes can be assembled in the same structure.

An important recent refinement is a solid gate frame to simply one all assembly and improve water tightness. Other innovations include heavier, more sturdy walkways that climb over the top of the chute to lock all parts in place, plus addition of steel frames for wooden flashboards, Verry said.

For added flexibility, the steel irrigation headgates are designed for use with solid steel gates, or with flashboards, wooden flashboards, or any of these interchangeably or in combination, to allow complete shut-off or diversion of the stream as needed, he said.

Field Tests Prove Value Of Using Steel Headgates

PANAMA, May 10.—The latest advance in irrigation—the adaptable steel headgate developed at Utah State University and perfected by two years of intensive field tests, will be marketed this spring for the first time. W. O. Verry, manager U. S. Steel Products division, announced here.

Start of sales climaxes a four-year research and testing drive on the new water control device that may become one of the greatest advances in irrigation since Mormon pioneers introduced the art in the west on a large scale, according to Utah State University engineers.

Panama Water Litter company of Panama and Butte will distribute the galvanized steel structures in Idaho to dealers in Blackfoot, Caldwell, Carey, Driggs, Hilly, Homedale, Idaho Falls, Malheur, Marsing, Nampa, New Plymouth, Rexburg, Rigby, Twin Falls and Weiser.

Now available to Idaho farmers and ranchers is a single, easily assembled, portable, adaptable, and compact ditch, stream, or culvert structure that can be quickly assembled and disassembled.

The new device also will be marketed this year in 18 other western states.

Promising to modernize one of the oldest agricultural arts, the headgate features three basic types that can be quickly assembled into a variety of sizes and shapes as easily as putting a lawn chair together.

The key component is composed of sturdy, modular panels that can be assembled in numerous sizes and designs to form such single or multiple outlet structures as:

—Diversions structures for diverting stream flow from a ditch to one or more channels;

—Check gates to dam up water so it will flow from the ditch onto the land;

—Drop structures for hillside or slopes to flatten grade and prevent soil erosion;

—Turn out structures for diverting part of the stream onto the field;

—Pump boxes and other box-like structures for receiving and distributing irrigation water from above-ground lines;

—Ditch and outlet boxes to compact ditches with underground water lines or outcrops.

Machinery Takes Toll in Mishaps

Complications by the department of agriculture and the National Safety Council show that in 1940-1949, machinery caused 153 per cent.

Causes of the remaining fatal farm accidents are drowning, 10.3 per cent; firearms, 12.3 per cent; fall, 8.1 per cent; blow, 1.2 per cent; animal, 4.4 per cent; electricity, 3.4 per cent; lightning, 2.2 per cent; poison, 1.8 per cent; other, 0.3 per cent.

SALMON DAM and surrounding area is shown in this photo on which the water canal is among landmarks designated. Located 11 miles west of Burley, the dam was constructed in 1903-10 and the first delivery of water was made in 1911. The water supply has always been short of the potential acreage available. Storage capacity of the reservoir is estimated at 150,000 acre feet. Available

water this irrigation season probably will be the lowest in history. Some canals in the district have never had water flow through them. Supplemental water, Salmon River Canal company officials say, would bring prosperity to this valley area. Potential would probably equal the Twin Falls tract. (Times-News and photo)

Credit Official Believes Co-Ops Must Gain Strength

PHOENIX, May 10—Despite the benefits from plans and programs—both proposed and in operation—the long-range goals of the nation's dairy farmers can best be realized through strengthening of their own co-operatives.

This was the view expressed here today by Glenn E. Helz, deputy governor and director of cooperative bank service, farm credit administration. He was here to address the Southwest Milk Marketing conference, attended by dairy co-op officials from 13-state areas. The credit official listed as "not the least of these goals—gaining a greater overall return for their products."

"It is no longer sufficient," Helz believes, "for a farmer to cooperate simply to provide a price and service yardstick in any given market. The co-op

must set the competitive pace to have the necessary impact upon that market."

Helz believes dairymen "have lost ground" in bargaining power in recent years. He noted that although the 1,500 dairy co-ops together have some effect on the marketing of milk, they are operating in an area where a few large non-cooperative firms are major factors in the industry and are growing rapidly.

He pointed out that the share of the total market for dairy products for the four largest dairy corporations rose from 29 per cent in 1949 to 32 per cent in 1960 and is probably still rising. "This represents a 23 per cent gain in the share of the market by these corporations. On the other hand, the four largest dairy co-operatives were barely able to hold a five per cent share of the market in the same period."

Helz sees a need for larger and stronger dairy co-ops which will be in a better bargaining position, and carry the farmer's members' production as far as

possible toward the consumer.

The credit official urged dairy association officials to "take advantage of opportunities" pointing out as one example how a dairy cooperative, through the purchase of two commercial-grade A outlets in a metropolitan area, had increased the returns on milk to dairymen by about 25 per cent.

"It has been demonstrated many times," Helz said, "that cooperatives can coordinate their efforts to get high quality products to consumers by smart merchandising, modern brand identification and by selling advertising. In so doing, they can expand their markets and gain a fairer share of the consumer dollar for their members."

At his post, Helz heads that part of the farm credit administration that supervises 13 banks for co-operatives, which provide about 60 per cent of the total credit needs of farmer co-operatives.

"Availability of credit represents no problem to dairy co-ops," plans for modernization and expansion," Helz said, adding, however, that "a lender's confidence in a farmer co-op is

in direct proportion to the farmer's confidence, as expressed by his investment and patronage."

Gem Farmers Plant Less to Major Crops During 1963

BOISE, May 10—Idaho farmers are planning fewer acres to major crops this year than they did in 1962.

A reduction of about two per cent is indicated by March 1 planting intentions, the University of Idaho extension service said in the May issue of "Economic Facts for Idaho Agriculture."

The summary by R. Wayne Robinson, marketing information specialist, said farmers plan reduction in corn, oats, barley, hay, and dry beans. Acreage increases are expected for spring wheat, dry peas, sugar beets, and potatoes.

For the United States as a whole, planting intentions indicated an increase of two per cent in acreage of 17 crops. However, if farmers carry out their plans for these crops and allowance is made for other crops not included in the survey, the 1963 total planted acreage of all crops will be the second smallest on record.

Idaho grain growers expect to plant two per cent fewer acres than in 1962. Spring wheat, which is

the only major grain crop for which an increase is planned, Idaho feed growers intend to plant 900,000 acres to barley, oats and field corn—a four per cent less than last year. All hay, estimated at 1,100,000 acres, is four per cent less than in 1962. Indicated acreage of Idaho potatoes is one per cent larger than 1962. The estimate is 207,000 acres. Acreage of fall potatoes is expected to remain about the same, but late summer acreage will increase.

The Idaho onion harvest of 2,100 acres is on a par with last year. A nine-percent increase in sugar beet acreage is expected, lifting the 1963 intended planting to 34,000 acres. A national increase of seven per cent is indicated.

CATTLE PAYMENT WASHINGTON, May 10—Payment of indemnity for cattle to be exposed to tuberculosis upon a determination that their destruction would contribute to the eradication program is permitted under an amended regulation of USDA.

Gardens Add To Plight Of Farmers

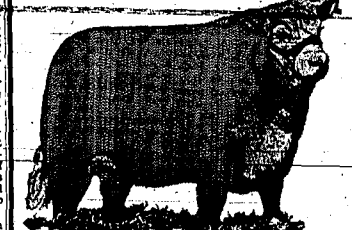

SACRAMENTO, May 10—Farmers in growing suburban California areas are discovering another major disadvantage of subdivisions—the careless gardener.

The subject became a major topic of discussion before the Stanislaus county planning commission last week.

County Agriculture Commissioner John Schrock said it stemmed from the faulty or non-existent spraying practices of homeowners. As a result, insects and plant diseases which abound in the subdivisions spread to nearby orchards.

Schrock said the problem stems partly from the purchase of orchards by subdividers. The buyers keep up spraying practices "until the subdivision is constructed and the homes are sold, but homeowners don't follow through."

He asked the commission to consider a subdivision zoning ordinance which would require the removal of all orchards before approval of the subdivision was granted. The commission agreed a problem existed, but decided the solution was beyond their jurisdiction.

Providing Supplemental Water Supply For Salmon Tract Key to Prosperity

(Continued From Page 1)

Snake river water in exchange for surface water diverted at Miller on a mutually acceptable basis.

The required new storage might become available through the future settlement of American Falls reservoir.

The possibility of enlarging American Falls reservoir is now under investigation by the bureau.

Providing the water for the Salmon tract (with the full recognition of, and without

change, to all present water rights, uses and entitlements and ownership of water supply by the irrigators of the Snake river basin.

Crop yields on the average are expected to increase with the future project. Grains would increase from five to 10 bushels, beans from two to five sacks, and alfalfa, hay from two to three tons.

The estimated average annual gross crop value exclusive of livestock, from irrigated lands in the Salmon tract, is now about

\$1,500,000. With the future project, the annual gross crop value is expected to be around \$4,000,000, an increase of over two and one-half times.

With adequate supply of hay and good, irrigated pasture, livestock production and feed operations would increase.

As to the effect on the economy of the entire area, it is pointed out in the bureau report that "one hundred farmers and hired farm workers may stimulate employment for anywhere from 170 to 240 non-farm workers."

One hundred dollars of income earned by farmers and hired farm workers may be associated with a range of \$200 to \$270 of income for workers in the linked and derivative sectors of the local economy.

It is expected that in Twin Falls county alone local non-farm economic values in agricultural product handling and processing would amount to an additional \$800,000 a year.

With the present season offering the "best amount" of water ever available for farmers on the Salmon tract, the fight for additional sources is getting into high gear.

The farmers agree that a project of this scope will take time to complete. When it is complete, however, the Twin Falls area will enjoy a greater degree of prosperity than ever before.

"The future of this area is tied up with the future of the Salmon tract," Jones said. "It is as simple as that."

"A supplemental water supply for the Salmon is definitely the right answer. This is an opportunity for Magic Valley and we intend to strive for that goal. We solicit the aid of everyone interested in the future of the area."

"The reason," he states, "is that the European agreement making the same technological improvements U. S. agriculture has to a large part already made."

"If our common agricultural policy did not exist and if there were still six separate national policies, you would still find production running ahead of demand. I believe you have first-hand experience with such a situation here in the United States."

Gem Farm Bureau Chief Hits Certificate Plan

POCATELLO, May 10—"Farmers have not been guaranteed a flat \$2 a bushel for so-called certificate wheat under a new wheat control plan, the Kennedy administration will submit to a congressional committee May 11," said B. Martin, president Idaho Farm Bureau federation.

"Reports from some producing areas indicate the plan is understanding exists among growers, regarding the proposal's price supports. The plan would provide a base rate of \$1.50 for the remainder," Martin said. He went on to say, "This proposal which requires approval by at least two-thirds of the growers voting in the nation-wide referendum, would set up two categories of wheat."

One would be 975 million bushels earmarked for the domestic food market and for a substantial part of the exports, this category is referred to as certificate wheat. Its base support would be \$2.

The other category would be wheat grown on federal acreage allotments in excess of a farmer's share of the certificate wheat. This grain could be used for feed, for commercial food use and for additional exports. Its base support would be \$1.50.

But actually supports for either category of wheat would vary by grade, quality and place of sale and storage, the farm leader continued. Price supports would be offered in the form of loans on stored grain. These supports would be built around the \$1.50 level.

It is possible that the individual price support rate might vary from less than \$1 to upwards of \$1.64.

Rates are set by counties as well as by quality factors. Rates in counties far distant from terminal markets are lower than those close to terminal markets. This difference is designed to reflect transportation costs.

millers and other first buyers must pay the 70 cent certificate premium," Martin said. "This year's wheat crop would be supported at a single rate averaging \$1.52 but county rates range from \$1.49 to \$2.00. Growers who voluntarily sell some wheat and will get supplement payments of 18 cents a bushel on the normal yield of their harvested acreage," Martin concluded.

Progress to Reduce U.S. Farm Exports

WASHINGTON, May 10—It will be difficult for the United States to increase its future farm product exports into Europe's common market, nations, but the reason has little to do with the common market itself, is the contention of Sisco Mansfield, vice president, European Economic Community commission.

"The reason," he states, "is that the European agreement making the same technological improvements U. S. agriculture has to a large part already made."

"If our common agricultural policy did not exist and if there were still six separate national policies, you would still find production running ahead of demand. I believe you have first-hand experience with such a situation here in the United States."

Horse Finds New Urban Dwellings

SACRAMENTO, Calif., May 10—The horse not only has found a new home in the city but is growing with the population.

This was one of the surprising facts found in a recent state department of agriculture survey of the San Francisco Bay area.

The bureau of animal health undertook the survey to find out whether disease-bearing ticks were a problem. Bureau officials were also curious as to whether there were enough horses in the area to provide business for the veterinarians who specialize in horses.

The survey showed that there are more than 20,000 horses in the bay area.
