

Murtaugh Man Is Appointed New County Fair Aide

Thomas Shouse, Murtaugh, was selected and approved unanimously Thursday as new secretary-manager of the Twin Falls county fair by the Twin Falls county commissioners during their annual budget meeting in the Twin Falls county courthouse. The commissioners also approved a raise of \$500 in salary for five elected county officials effective Monday. The salary increase raises the salary of the county assessor, clerk, prolate judge, sheriff and treasurer from \$6,500 to \$7,000. The complete budget will not be finished or approved until Monday morning, according to Harold Lancaster, county clerk.

W. W. Lowery, chairman of the commission board, noted that the board turned down a petition filed by Probate Judge Zoe Ann Shaub asking that her salary be raised to \$10,000. The petition was signed by several area attorneys. Shouse, 43, was selected to fill the vacancy left by the death of Thomas Parks Oct. 1.

Lowery said they were assured that Shouse will be able to handle the job. He said 45 applications were submitted for the position. The new appointment will be effective Feb. 1.

Shouse was born in Piler and has lived all his life in the Magic Valley area. Shouse stated, "It's going to be a rough job to try and fill the shoes of Mr. Parks, but I will do my best." He and his wife have lived in Murtaugh for the last nine years, moving there from Hansen. It was reported that the commissioners discussed several changes in the budget.

TWIN FALLS COUNTY commissioners selected and approved unanimously Thursday the appointment of Thomas Shouse, Murtaugh, as new secretary-manager of the Twin Falls county fair. The vacancy was left by the death of Thomas Parks in October. Shouse's appointment will be effective Feb. 1. Pictured are, standing, Harold Hove, Kimberly, left, and Shouse. Seated are W. W. Lowery, chairman of the board of commissioners, left, and Morris Klaus, commissioner. (Times-News photo)

Solons Try To Solve Money Issue

BOISE, Jan. 8 (AP)—The Idaho legislature enrolled both the house and senate today in the effort to solve one of the toughest problems of the 1965 session—where to get the money for the state's operation in the next two years. Rep. Arvid Miller, R., Hingham, chairman of the house revenue and taxation committee, formally invited the senate to send a committee to sit with the house group in discussing tax bills. Sen. Jack Murphy, R., Lincoln, senate president pro-tem, said the senate will accept and will appoint, under provisions of a rule adopted yesterday, a committee to meet with the house group. By constitutional requirement, all tax bills must originate in the house.

Salvation Army Appeal Nets \$1,628

The Salvation Army netted \$1,628 during the special Christmas appeal, it was announced Thursday. Earl Haroldson, chairman of the Christmas committee, gave the report on net income donated through letters, kettles and from service organizations. The Army gave special thanks to the Episcopal, Baptist, Nazarene, Valley Christian and Presbyterian churches; the Kimberly Grange and Rotary, Lions, and Kiwanis clubs for their donations. Thanks also went to Ag-grow Seed company, Piler. Judge Zoe Ann Schaub appointed John Roper, Mrs. Mel Dolling and Bert Larson as a central committee. Roper was appointed chairman. James Koutalik, property committee, reported action still is pending on purchase of a building to be used as a salvage store and shelter for transients.

GEORGE OLSON has been held in the Twin Falls county jail for 17 months on charges of first degree murder. Delays have caused postponement of the trial several times. This picture was taken the day after the shooting, Aug. 22, 1963. (Times-News photo)

Delays Many And Varied in Olson Case

Due to many different types of delays, George Olson has been held in Twin Falls county jail for 17 months. Olson is charged with the Aug. 22, 1963, murder of Keith T. Gates, Boise.

Twin Falls police arrested Olson this morning following the shooting in which Mrs. Anna Lou McKinnon was badly wounded. The news called for 500-Lynwood boulevard at 11:30 p.m. that fatal August day and when they arrived Mr. Gates was lying dead on the family room floor and Mrs. McKinnon was found on the kitchen floor.

Olson was arraigned on the afternoon of Aug. 23 on charges of first degree murder before ex-judge Dale J. Adamson. Appearing with his attorneys from the law firm of Rayborn, Lybourn and Rayborn, Olson requested a preliminary hearing. Preliminary hearing was denied because, according to the prosecuting attorney, it was necessary to wait until Mrs. McKinnon was able to attend. She remained in a Salt Lake City hospital for a little over three months.

On Jan. 30 Olson was bound over to district court on charges of first degree murder by Judge Adamson. Olson still remained in county jail without bond.

On March 9, 1964, Olson appeared before Eleventh District Court. See SOLONS, Page 2, Column 4.

Burch Says Party Didn't Have Chance

WASHINGTON, Jan. 8 (AP)—Republican National Chairman J. Lee Burch said today that only a "political miracle" could have elected a Republican president this year. But he admitted the GOP also had made some mistakes. Burch, who is battling to hang on to the job in which he was defeated by Sen. Barry M. Goldwater, discussed the past and future of the GOP in a speech prepared for a National Press Club luncheon. He said his party had suffered a "serious defeat" Nov. 3 because it was running against the late President John F. Kennedy. Burch said the GOP lost labor leadership, a 100 billion dollar budget, an 11 billion dollar tax cut and Democratic Party machines. Burch said the GOP could expect an improved environment and a bright future as the great flock of Democratic chickens come home to roost.

Cold Bird

TOMAH, Wis., Jan. 8 (AP)—Psychologists at Tomah Veterans hospital have failed to convince a cold, hungry robin in a bush outside their window that it's time to fly south. The bird has been shivering in a bush outside the psychology department window for more than a month, living on a few berries and spurning goodies ranging from suet balls to baby cereal.

Jobless Rate Decreases In Nation

WASHINGTON, Jan. 8 (AP)—The nation's unemployment rate dropped to 4.9 per cent in December for the second time in 1964, equalling the lowest jobless figure in more than four years, the labor department said today. At the same time, nonfarm employment rose about 350,000 to 66.8 million, an all-time high for December. The 4.9 per cent unemployment rate compared with five per cent in November, and also rounded out the rate for the last quarter of 1964 at an even five per cent, the lowest since the final quarter of 1957.

Magic Valley College Sets Board Meet

ALBION, Jan. 8 (AP)—An open meeting of the board of trustees of Magic Valley Christian college will be held at 7 p.m. Jan. 16 at Albion. H. R. Petrich, publicity director at the school, announced in South Viet Nam total 358 dead; 1,546 wounded, 10 missing and 10 held captive. From Jan. 1, 1961, through Jan. 4, 1965, 246 Americans were killed in battle against the Viet Cong, including 180 soldiers, four sailors, 11 marines and 51 airmen. Another 110 men died from non-combat causes, such as aircraft and auto accidents and illness. The defense department selected Jan. 1, 1961, to begin tallying U.S. casualties because it coincided roughly with the mid-January "upgrading" that year of U.S. participation in the Vietnam war. The first American service man was not killed in Viet Nam, however, until 11 months later in December, 1961. The final week of the four-year period, the seven days ending Jan. 4, saw U.S. servicemen take one of their heaviest beatings of the war. Ten Americans were killed during the week, 22 were wounded. Two were missing and one was listed tentatively as being "detained" by the communists because there was as yet no firm evidence he had been killed.

Skiing Is Excellent In Valley Areas

Excellent skiing is promised for this week-end in all four ski areas in Magic Valley. Magic mountain, Pomerele and Soldier mountain all will be open from 10 a.m. to about 4 p.m. Saturday and Sunday. Probably the best skiing in the history of the Sun Valley resort was experienced Thursday, Mrs. Dorice Taylor, head of the news bureau there, reports. The sun shone for the first time Thursday after several weeks during which time some snow fell nearly every day. Friday it was partially overcast, but no snowfall was reported. Since Dec. 18, opening day for the winter season at Sun Valley, 31 inches of snow has fallen there. It was clear weather on Christmas, New Year's day and one other Sunday, but otherwise snow has fallen daily from the opening through Wednesday, Mrs. Taylor noted.

For the first time in history Sun Valley has more snow than Alta, Utah. Record snowfall at Sun Valley was set in 1952, but this year's measurements are nearing that mark. There are now 135 inches of snow on top of Bald mountain, with 12 inches of new powder. There are 108 inches at the Round house and 80 inches on the valley floor. Lift lines should be shorter this week-end, as the ski train from California does not arrive until Sunday afternoon, so it should be a good time for local skiers to use the ski runs, Mrs. Taylor added.

All four ski areas have certified ski instructors available for beginning and advanced skiers. Snack facilities will be in operation. Sten Frostenson, Fairfield, one of the owner-operators of Soldier mountain ski area north of Fairfield, reported Thursday evening that the area will be in operation Saturdays, Sundays and Wednesdays throughout the remainder of the season. He said 18 inches of new powder was reported.

Hot Dogs and All Trimmings Ready For Tree Bonfire

Hot dogs and the trimmings will be furnished by the Twin Falls Jaycees at the annual Christmas tree bonfires to be held at 7 p.m. Saturday in five locations for children 12 years of age and under. The youngsters are asked to bring their own sticks for the wiener roast. There will be bonfires in a vacant lot behind the South Park Okay Food market, in Harmon park, Harry Barry park, in the high school parking lot and in the vacant lot behind O'Leary junior high school. The Twin Falls department of parks and recreation has been gathering the Christmas trees since Monday.

License Sales Steady In T. F.

Steady lines of vehicle owners were reported purchasing license plates at the Twin Falls county courthouse Friday. Sales at the courthouse reached the 10,300 for passenger plates and 67 for truck plates. Dales insurance agency, Bull, reported by noon Friday that 1,990 passenger and 171 truck plates had been sold.

Flood Damage for Gooding Area Listed

GOODING, Jan. 8—Preliminary reports of flood damage in Gooding county total approximately \$150,000. Glen Nielson, soil conservationist, reported at a meeting in the Gooding courthouse Thursday. Some 75 persons attended, including residents from Blaine, Lincoln, Jerome and Camas counties, as well as Gooding. It was stressed that this figure is based on preliminary reports and the exact amount will not be available for another week.

Damage to Gooding County Roads, Farmland and Feed Is Greater This Year Than in Any Previous Flood

Deputy Sheriff Bill Bunn, Gooding county civil defense director, said. The damage incurred during the Christmas week flooding was reported to irrigation ditches, drainage structures, fences, highways and bridges and stacked hay. Attending the Gooding meeting were James Imper, Boise, deputy director of the state civil defense; Ernest Steelsmith, Boise, state auditor's office, and Ted Nelson, Boise, bureau of reclamation. Representatives from the office of emergency planning, Denver, and local representatives of highway and irrigation districts, as well as an engineer from the corps of engineers, Walla Walla, Wash., also attended the report meeting. Procedures and eligibility for obtaining funds under public law 875, which provides for disaster reimbursement of taxing units, were explained. At Jerome a survey completed this week by a department of agriculture committee showed an estimated \$100,000 damage to roads, farmland and feed in Jerome county. Most damage was observed to road crossings where bridges and culverts were not able to handle the volume of water. An estimated 100 farms were affected by the flood, according to William Barnes, ASC chairman. Damage to farm land included washing of fields to plow depth, where there was no stubble cover, and "land leveling" was required before planting. An estimated 130 to 175 miles of ditches on farms either are washed out or filled with silt and will have to be rebuilt before the irrigation season. There was some damage to concrete irrigation structures and headgates, Barnes added. Many farm ponds, used for livestock and irrigation water, were damaged.

Youth Flees East Berlin Under Fire

BERLIN, Jan. 8 (AP)—A 16-year-old refugee yesterday fled to West Berlin under communist gunfire. He was cut by barbed wire but was not hit by a 20-round machinegun burst. As the youth escaped, the West German Refugee Ministry in Bonn disclosed that 3,155 East Germans fled in 1964. The total since the wall went up Aug. 13, 1961, was placed at 21,000.

These figures included both refugees who fled over the wall to West Berlin and those who escaped across the East-West border. The refugees braved gunfire, mines, dogs, watchtowers and barbed wire. The price for failure was high. A total of 121 were known to have died escaping. Of these, 63 were killed on the Berlin border, the rest on the East-West German border in the past 40 months. Western officials noted with interest that three-fourths of the refugees who fled last year were under 25.

Two Valuable Gems Recovered by N.Y. Detectives; Third Is Still Missing

MIAMI, Fla., Jan. 8 (AP)—The Miami bus station locker. But the third gem with a price label, the blood-red Delong ruby, apparently was not recovered. Reliable informants said an anonymous telephone tip sent the detectives rushing shortly after midnight to the downtown Miami bus station where they found the fiery blue, 563-carat "Star" and the deep purple 10.5-carat sapphire in a milkweed bag stuffed in the locker. This morning the officers and Allen Kuhn, one of three Miami men accused of the theft, jumped aboard a New York-bound plane at Miami International airport. Kuhn and his four escorts dashed from a compact automobile at the airport. With a detective running interference, they made for the loading ramp of Northeast flight 38. Kuhn was not handcuffed. It was learned that the detectives checked into a motel near the University of Miami late yesterday, after a day of hunting for the stolen gems. Kuhn reportedly made a deal to find them in exchange for leniency. The telephone call came shortly after midnight. A voice gave the location of the locker and hung up. The detectives raced for the bus station and found a bag partly rotted as if it had been buried or exposed to dampness. A glint of fire shone through the rotting fabric. It was the famed Star of India, Nestling next to it was the midnight sapphire. It was not learned what other jewels were recovered. Kuhn and the detectives came to Miami Tuesday in search of the gems.

Spy for Reds May Get Death Sentence

NEW YORK, Jan. 8 (UPI)—A possible death sentence awaits Robert Glenn Thompson, the former U. S. airman accused of giving defense secrets to two Soviet diplomats over a six-year period for \$1,700. Now a Long Island fuel oil dealer, the husky, impassive suspect was released in \$15,000 bond last night after arraignment on a three-count federal indictment charging espionage in this country and in Berlin between 1957 and 1963. Thompson pleaded innocent to all counts. The indictment bared a bizarre tale of short wave radio communication, code names, secret writing paper and clandestine contacts allegedly designed to transmit information about U. S. code books, military plans, and other intelligence secrets.

Man Caused Worst Fires In Sawtooths

Man-caused fires were responsible for nearly all of the 2,658 acres of range and forest destroyed by fire in the Sawtooth national forest last year, officials of the district report. A late fire season saw 13 lightning fires and 21 man-caused fires, for a total of 34 fires. Over a five-year period this compares to an average of 32 lightning fires, 16 man-caused fires and a total of 48 fires per year. Sawtooth forest service staff officers said none of the 13 lightning fires burned more than one-tenth of an acre. There also was an increase of aerial assistance, due to the large Nevada fires. About \$34,000 in aid was given to the bureau of land management and the forest service to help control these blazes. No aid was given to Nevada in 1962. A day-long fire replanning meeting for the Sawtooth forest has been scheduled for Wednesday at the Sawtooth national forest headquarters in Twin Falls. This meeting is held every five years to update plans for fire control and prevention.

The other Soviet conspirator, according to the charges, was Fedor D. Kudashkin, a high-living former United Nations secretariat employee who left the United States last year "for imperative family reasons." Kudashkin's return to Russia coincided with the beginning of the Thompson investigation. FBI agents have been examining his past for more than a year. His arrest yesterday came as no surprise, authorities said. The FBI charged that Thompson made contact with Soviet agents between February, 1955, and January, 1963, when he served with the office of special investigations in Berlin. In Bay Shore, N.Y., where Thompson lives and maintains his business, his German-born wife, mother of his three children, said he was innocent.

Johnson Favors Increased U. S. Trade With Reds

WASHINGTON, Jan. 8 (AP)—President Johnson on yesterday strongly endorsed increased U.S. trade with the Soviet Union. A group of American businessmen just back from Moscow told him the Russians wanted to improve commercial relations. To this he commented: "There is no better way than to come to know each other than to engage in peaceful and profitable commerce together." In a ceremony in the White House cabinet room, Johnson asked business and labor leaders to help make recommendations along this line. EXPRESSES DISCONTENT WASHINGTON, Jan. 8 (AP)—The state department has expressed its disappointment at Soviet newspaper reaction to President Johnson's State of the Union message.

### Catter Races Scheduled For Jackpot

JACKPOT, Jan. 8 — Catter races are scheduled for 1:30 p.m. Monday at Jackpot, Nev. The annual event is sponsored by the local catter club.

### Street Light Contract Is Approved

RICHFIELD, Jan. 8 — A new three-year contract for the present street light contract was approved by the Richfield village board at its January meeting Tuesday night.

### Two Men Are Rescued From Mountain Top

IDAHO FALLS, Jan. 8 (AP) — Two men were rescued today after being stranded on a 10,000-foot mountain top.

### Speakers Are Reported for Stake Confab

RUPERT, Jan. 8 — Jack R. Prince and Norma O. Nichols, both prominent leaders of the LDS church, Salt Lake City, will be featured speakers at the quarterly conference of the Minidoka stake Saturday and Sunday.

### Library Has New Material

### Report Given on Flag Etiquette

PAUL, Jan. 8 — Orla McGill presented the flag etiquette report which will begin soon in the Minidoka schools at the Paul American Legion Tuesday night.

### Annual Meet Set By Eden Church

EDEN, Jan. 8 — Annual congregational meeting of the Eden United Presbyterian church will be held Sunday afternoon at the church. A potluck dinner is planned for 12:30 p.m. with the business meeting scheduled for approximately 1:30 p.m.

### Notice! Annual Stockholders Meeting Twin Falls Canal Company

TUES., JAN. 12-10 A.M. New Idaho Power Co. Aud. Twin Falls Canal Company, Al Peters, Mgr.

TESTING CIRCUIT RESISTANCE on one of several rejected television sets donated to Explorer post No. 303 are, from left, Idaho state police Radio Technician Marvin Beasley, 204 Monroe street, and Keith Borah, 426 Washington street north, one of the Explorers in the state police-sponsored post. The television sets are being used as experimental equipment in an electronics course now being taught the youths. (Times-News photo)

### Old TV Sets Play Vital Role In Explorer Scout Training

By RUTH KOONCE — To walk into the Twin Falls office of the Idaho state police, a person unaware of the Explorer Scout training program currently under way would probably believe state patrolmen had just confiscated a roomful of loot from some busy TV thieves.

It is not very often that a state patrolman is called on an emergency television repair case, but should the occasion arise, Explorers in post No. 303, sponsored by the local state police unit, could probably do the job.

The Explorers, under the supervision of Sgt. Marvin Snyder, are members of one of a very few highway patrol-sponsored Explorer posts in the nation. They are undergoing training similar to that of any rookie patrolman.

Members of post No. 303 have entered the electronics segment of their training. Radio Technician Marvin Beasley of the Idaho state police is instructing 22 Twin Falls youths in various phases of electronics.

He said after they finish the course of study, which will probably take about a year, they will have studied television and two-way radios, among other things.

President of the group, Fred House, said other areas of police training they have studied are fingerprinting, automotive safety, first aid and marksmanship. He said an average of three class periods are spent on each subject.

The Explorers use their training in much the same way as do the state patrolmen in public service. House said for the last two years the post has been on ground patrol at the Twin Falls county fair and rodeo at Puer County. The boys aid in any way they can, from administering first aid to helping lost children.

He said they also help direct traffic during parades held in Twin Falls. Each Explorer in the post has worked one shift at the Hollister port of entry.

The television sets on which the group is now working were donated to the post by Factory Radio and Television center, 426 Main avenue south.

### Careful

DENVER, Jan. 8 (AP) — A local theater took extreme precautions to offend no one during its current showing of the James Bond thriller, "Goldfinger."

The movie has a scene in which a nude woman is covered with gold paint. A statue of the woman, displayed outside the theater, is adorned in a gold halter and a pair of shorts.

### 3 Indicted For Beating Young Negro

OXFORD, Miss., Jan. 8 (AP) — The first three persons arrested under the 1964 Civil Rights act were indicted by a federal grand jury yesterday in connection with the beating of a young Negro civil rights worker.

Those indicted were Willie Amon Belk, 47; his son, Jimmy Allen Belk, 19; and Sam Allen Shaffer, 37. All work as plumbers in Greenwood, Miss.

The three were charged with threatening and beating Silas McGhee, 21, July 16, 1964, because he entered a previously segregated movie theater in Greenwood.

The indictment charged "the defendants did unlawfully injure, oppress, threaten and intimidate Silas McGhee by striking and beating him because of his having exercised his rights and privileges."

All three of the suspects are free on \$1,000 bonds. McGhee told a preliminary hearing for the three that he was forced into a truck at gunpoint and driven to an auto repair shop where he was struck with a board and pipe.

\$498 Suit Filed In 2-Car Crash — Mr. and Mrs. Don A. Mann filed a \$498 suit against Justin Mack Smith in eleventh district court for payment of damages resulting from a two-car accident Feb. 12, near Wendell.

Mr. and Mrs. Mann filed the suit against Smith for recovery of damages incurred when the Manns' 1964 Chevrolet collided with a 1953 Chevrolet driven by Smith south of Wendell.

Flowers were under the direction of Heyburn ward Relief society, of which Thelma Christensen is president.

Concluding rites were held in the Shoshone cemetery with Robert J. Simpson giving the dedicatory prayer.

### Mrs. Squires Reappointed To Board

BUHL, Jan. 8 — Mrs. Frank Squires was reappointed to the Buhl library board for a three year term when the Buhl city council met Tuesday at the city hall.

Other library board members and their remaining terms are Mrs. Walter Sciffen, Mrs. Eva Walker and Dr. Myron Thompson, one year, and Mrs. Ted Ahim and Everett Martin, two years.

It was reported a new gas heater has been installed at a cost of \$415 in the city warehouse, replacing an old coal stove heater. Permission was granted to owners of hangars at the Buhl airport to install lights in the buildings.

City ordinance 475 was adopted amending ordinance No. 470, defining the word, "streets." The new ordinance defines the word, "streets" as including all streets, avenue, parking lots, driveways, alleys and boulevards, open to the public for travel or parking, whether publicly or privately owned located within the city limits.

In other business the council invested \$10,004.63 of sewer bond construction funds in U. S. treasury bills which matured Jan. 24, 1965, will net the city \$20,000 or a profit of \$395.37. It also invested \$11,526.88 of sewer sinking fund monies in U. S. treasury bills which will mature Dec. 31, 1965, will net the city \$12,000 or a profit of \$473.15.

Master plumbers license for 1965 were issued to Darrel Phillips of the West End Plumbing, Castleford; Charles Quigley, Sr., Frank Todd, George M. Stephens and Albert Tober, all Buhl. Journeyman's plumbers licenses were issued to Ray E. Quigley and Jack Peterson.

Gas fitting contractor's licenses for 1965 were issued to Charles Quigley, Sr., Marion Ambrose and Western Heating company. Twin Falls Journeyman's gas fitters license went to Marion Ambrose, Charles Quigley, Sr. and Frank Todd. An apprentice gas fitters license was issued to Joe Miezthner.

A special meeting was called for 8 p.m. Tuesday to meet with James Dunn, a representative of the Starline Equipment company to discuss and obtain information relative to purchasing a new fire truck to replace the present 25-year old truck.

Building permits were granted to Earl Tyree to construct a carport attached to residence at \$150; R. E. Bailey, re-roof residence with asphalt shingles at \$400; W. L. McCormick, construct and attach carport to residence at \$400.

SKIERS RETURN — MUNICH, Germany, Jan. 8 (AP) — Nineteen skiers stranded by avalanches in a cabin atop Germany's highest mountain since Saturday returned safely to a resort hotel yesterday. "We had lots of fun," a British girl skier said. "The company was good."

### Flushed

BURLINGAME, Calif., Jan. 8 (AP) — A workman clearing debris from a drain cover fell into an underground storm sewer last night and was flushed a mile through the drain into San Francisco Bay. He emerged virtually unhurt.

Police said the man, William John Selkirk, 54, fell into the rushing torrent of a two-foot-diameter, six-foot drainage pipe. Selkirk was found later trying to chamber out of a deep ditch at the mouth of the drain exit to the bay.

### Officials Start Probe Into Deaths

PAYSON, Ariz., Jan. 8 (AP) — The state health department today began an investigation into the jail-cell deaths by asphyxiation of four teenagers accused of stealing beer.

Dr. William Moore, the state health commissioner, conferred yesterday with Gov. Sam Donaldson in Phoenix, Ariz., and the announcement followed that one and possibly two investigators would come here to study the deaths.

Godard said the investigation was being made with approval of the Gila county board of supervisors. The deaths of the four youths left alone in the jail at least 11 hours—shocked most of the 800 residents of this community about 90 miles north of Phoenix.

### Highway Office Reports Changes

SHOSHONE, Jan. 7 — Two personnel changes in the Shoshone district office of the state highway department were announced today by E. L. Mathes, state highway engineer.

Effective Feb. 1, Dale Harding, assistant district engineer in the Rigby district, will become assistant district engineer at Shoshone. Also effective March 1 James L. Pitre, assistant traffic engineer in Boise, will become an assistant district engineer at Shoshone.

On April 1, Howard L. E. Johnson, an assistant district engineer at Shoshone, will be assistant construction engineer in the state headquarters in Boise.

### Buhl Woman Cites Intensity Of California Flood Damage

By SAMUEL DAVIS, Jr. — Buhl, Jan. 8 — "No one can start to imagine the hurt, the damage and the way the people of California withstood the recent floods and slides in the state," states Mrs. Virginia Harp, route 4 Buhl, who was stranded for a short time there.

Mrs. Harp was in Europe, Cuba and the surrounding area when the rains started. She had come there to be with her daughter during childbirth. Over 1,500 students were flown out of the flooded area so they could get back to school in time, Mrs. Harp said.

The regions were stunned. People refused to leave their homes, and some, even though some were completely destroyed, Mrs. Harp continued. "One example of how people worked together," she said, "was when churches and other organizations purchased blankets and food and tented shelter for the ones who were homeless."

Some babies were born outside of hospitals because the mothers had no way to get there if they would never have survived if everybody had not worked together as they did," she concluded.

OLDEST PERSON — CHESTERFIELD, England, Jan. 8 (AP) — Hannah Smith celebrated her 100th birthday in an old people's home here yesterday. She is believed to be the oldest person in Britain.

### Panel on School Legislation Is Slated by Group

There will be a luncheon meeting of the American Association of University Women at 1 p.m. Saturday at the YWCA hall.

The program will include a panel discussion on legislative problems in education. Panel members will include Mrs. Helen Dietz, representing the IEA; J. T. Anderson, school board chairman, and Mrs. Floyd Kisting, Dietrich, representing the PTA.

The public is invited to the program at 2 p.m.

### Last Rites Held For Mrs. Wilson

GOODING, Jan. 8 — Funeral services for Mrs. Anna Julia Wilson were conducted at 2 p.m. Thursday at Thompson chapel by the Rev. James Post of the Fairfield Community church.

Two songs were sung by Mrs. Zaide Harrison and Mrs. Guinn Rice, with Mrs. Keith Strom as accompanist.

Active pallbearers were Arlin Ashmead, Zane Harrison, Manlio Shaw, James Thornton, L. M. Davis and John Humphreys, with Glenn Miller as alternate. Honorary pallbearers were Charles Ashmead, Herman Miller, Clyde Martin, Les Ruby, Ed Harness, Charles Foster and Charles Thornton.

Concluding rites were held in Elmwood cemetery.

### Contract Awarded for Five Miles of Salmon River Road

SALMON, Jan. 8 — A \$364,439 contract for 5.83 miles of reconstruction of the Salmon river road has been awarded to Rocky Mountain Construction Company, Missoula, Mont.

F. E. Powers, Salmon national forest supervisor, said the work is expected to get under way around Feb. 1 with the contractor having 300 calendar days to complete the project.

The work will consist of 4.22 miles of widening the present river road below Shoup from the Pine creek to near Panther creek and extending the road from its present end below the mouth of the middle fork into Corn creek bar, a distance of 1.61 miles.

The undertaking calls for widening the present dirt road to 24 feet. The extension of the road will provide access to the Corn creek bar area, where the Salmon forest is planning a camping-area development. Plans call for extending the road across the Salmon river via a bridge to Cunningham bar where facilities will be developed for boating down the Salmon river and entrance into the Idaho primitive area.

Powers said the Salmon river road has been widened to 34 feet now from north fork to Shoup, a distance of 18 miles under two previous contracts. An eight-mile section from Indianola to Shoup was finished last year under a contract with Robinson Construction Company, also Missoula.

Still remaining will be a 1.6-mile section from Shoup to the Pine creek bridge and 3.3 miles from the end of the present contract just to Panther creek. No plans have been announced for improving the road from Panther creek to the end of the present road.

The Salmon river road runs some 48 miles from North Fork to its present end down the Salmon river canyon and provides access to the Idaho primitive area and for boating parties down the main Salmon river. Boating parties coming off the middle fork of the Salmon also use the road to return to Salmon.

### News Around Idaho

**BOISE, Jan. 8 (U)—**The bureau of public roads announced yesterday that Carl Woodall and Sons, Inc., Boise, submitted the apparent low bid on a foreign highway project in Boise county. Work involves grading of the roadway and construction of a bituminous surfacing on State Highway 21 and Forest route 25 near Lowman. The Woodall firm's bid of \$195,822 was the lowest of four offers received.

**FOCATELLO, Jan. 8 (U)—**Two legislative committees—general educational facilities and the joint senate finance-house appropriations committee, which passes on all state general fund appropriations, inspected Idaho State university in the morning and Highlands High School in the afternoon. Members of the house public health and welfare committee, who toured state hospital south in Blackfoot Wednesday afternoon, dropped over to Focatello to visit ISU yesterday even though the university is not within their jurisdiction. Chairman Carl Burt, R., Ada, explained that several legislators had never seen the school, and desired to do so.

**FOCATELLO, Jan. 8 (U)—**Power company workers were repairing a number of electric lines that snapped during an early morning storm here yesterday. About an inch of wet snow froze on the lines, and gusts of winds up to 40 miles an hour added to the strain. Several sections of the city were without electric power for brief periods. Many residents also reported eerie blue flashes of lightning in the sky about 6:30 a.m.

**BOISE, Jan. 8 (U)—**The Boise Cascade corporation announced yesterday the consolidation of its timber manufacturing divisions. The timber divisions, previously identified as Eastern and Western—now will be known as the Timber and Wood Products division, said R. V. Mansberger, president. Heading the consolidated division, which will coordinate operations in Idaho, Oregon and Washington, will be Stephen B. Moser. George H. Hott, Boise, will be in charge of the division's product and process development office.

**IDAHO FALLS, Jan. 8 (U)—**A request for a civil service commission hearing into the dismissal of an Idaho Falls city employee has been filed, according to commission officials. Earl McKittick, dismissed by the city Dec. 17 for reasons of health, through his attorney George Petersen is seeking an inquiry into the dismissal. McKittick was a maintenance crewman in the city's electrical department. His appeal marks the second time in three months an employee discharged by the city has appealed. The commission in December turned down an appeal by Lewis Wyatt, former zookeeper, fired by the city for incompetency in September. Civil service commissioners have yet to set a date for the hearing.

**BOISE, Jan. 8 (U)—**The new advisory council to the Idaho economic opportunity office has been introduced to the anti-poverty programs. It will direct. The office was created by Gov. Robert E. Smylie last month. I. Fred Garrett, executive director of the employment security agency who will coordinate the poverty programs, was chairman of the council's organizational meeting yesterday. The programs, adopted by congress last year, include the youth job corps, special programs to combat poverty in rural areas, work experience programs, and various administrative programs.

**CALDWELL, Jan. 8 (U)—**An Emmett mother and her North Carolina niece face arraignment Monday on charges of robbing the Bonanza variety store of \$142 Wednesday night. The women were arrested at the Emmett home of a relative after Caldwell police received telephone tips from Boise, Emmett and Caldwell, according to Charles W. Astleford, Caldwell police chief. The women were identified as Mrs. Georgia Ann Fisher, 34, Emmett, and her niece, Betty Pritchett, 21, Hendersonville, N. C. Two "neat and clean" looking women brandishing a pistol demanded all the paper money in the cash register Wednesday night, said Mrs. Carol Turner, the clerk who was robbed.

**BOISE, Jan. 8 (U)—**Opening of a permanent Idaho state Democratic central committee headquarters in Boise was announced yesterday by state chairman Lloyd Walker. Walker said the committee has maintained headquarters in Twin Falls since June, 1964, but that was now believed to be sufficiently "strange" to move to Boise. He said the new headquarters is located in the Hotel Boise. Walker said Maurice E. Lamont will continue as central committee executive director and that Mrs. Sylvan Jeppesen, Boise, will serve as administrative assistant. An open house of all Democratic members of the Idaho legislature is planned for next Monday at the new headquarters, Lamont said.

**IDAHO FALLS, Jan. 8 (U)—**Appointment of two new deputy sheriffs and resigning of one were announced yesterday by Sheriff C. H. Hoenes of Bonneville county sheriff-elect. Resigning was Larry R. Olson, who has served as sheriff for the past three years. The new deputies are Roy G. Rainey, 32, who was formerly an Idaho Falls police officer, and James L. Thomas, 23, who has operated a service station at Sugar City. Hoenes said Rainey will fill the newly-created position of detectives. Thomas will serve as radio operator and jailer.

### Jay-C-Ettes Donate Funds To Swim Pool

**SHOSHONE, Jan. 8 (U)—**A check for \$98.31 has been received by the city council from the Jay-C-Ettes for the city swimming pool fund.

Mrs. Hazel Haddock, city clerk, said the Jay-C-Ettes had made the money by sponsoring the talent show here in October.

At the city council meeting Tuesday night, the resignation of Mrs. Helen Garner as city police judge was accepted. Mrs. Marx Nielsen was appointed to fill the vacancy.

The city will purchase a new police car. Bids will be issued this week and opened at the February city council meeting.

An agreement was signed with the Shoshone highway district number two to share repair cost of the bridge over Little Wood river west of the city.

The maintenance also will be shared, according to the agreement. The bridge fell in October when a truck loaded with potatoes crossed it. Work will begin in the near future.

### Straw Burns

**BUHL, Jan. 8 (U)—**The Buhl fire department was called to the Dale Bower ranch, four and one-half miles southwest of Buhl when a straw stack caught fire about 1:40 p.m. Tuesday. Several hundred bales of straw were lost in the blaze, but the amount of damages is undetermined. The fire was attributed to spontaneous combustion according to city fire officials.

### Purple Heart Awards Given To 3 Nurses

**SAIGON, South Viet Nam, Jan. 8 (U)—**Three U. S. navy nurses, wounded in the terrorist bomb explosion at the American officers quarters on Christmas Eve were awarded Purple Heart today. They were the first American women to receive the award in South Viet Nam.

They were hit by glass fragments and thrown to the floor of their room by the explosion but refused medical help until all 60 wounded servicemen had been treated.

They were: Lewis Ruth A. Mason, Gothen, N. Y.; Lieut. Ann D. Reynolds, Dover, N. H., and Lieut. Barbara J. Wooster, Laurel, Md.

Another nurse, Frances Crumpton, Haleyville, Ala., was injured in the explosion and is eligible for the award. She is at Clark air force base in the Philippines undergoing treatment for ear injuries.

# V. I. Malone Heads County Dimes Drive

Virgil I. Malone, Twin Falls, will serve as county campaign director for the 1965 March of Dimes. Announcement of his appointment was made Thursday by James G. James, Boise, Idaho state campaign chairman.

Malone will organize and coordinate the efforts of volunteers in the 25th anniversary March of Dimes appeal which began Saturday and will close Jan. 31.

Malone, an excavating contractor, lives at 754 Eastland drive.

March of Dimes contributions are used to support research programs and for establishing special treatment centers. Current emphasis is on birth defects which kill and cripple more American children than any other human disorder, James said.

More than 50 centers which treat birth defects are set up in affiliation with approximately half of the nation's medical schools.

The March of Dimes originally was begun to fight polio.

# TV Schedules

**"Rawhide."** (5:30 p.m. CBS)—Pat Hingle portrays a gambler who trains young men to be gunmen.

**"Bob Hope Presents."** (Color, 7:30 p.m. NBC)—Louly Jourdan, Laura Devon and Jack Klugman appear in tonight's drama, "Clash of Cymbals." The romance between one of three finalists in a scholarship competition and one of the judges has the teacher of an aspiring concert pianist worried.

**"Valentine's Day."** (8 p.m. CBS)—Rocky runs into trouble in tonight's episode. Seems his girl friend claims he's proposed to her and if he backs down, she'll send her professional wrestler brothers to fix his wagon.

# FRIDAY, JANUARY 8, 1965

### Mrs. V. Porter Presents Unit's Bible Study

EDEN, Jan. 8 — Mrs. Violet Porter presented the Bible study from the book of Galatians when the United Presbyterian Women's organization met at the home of Mrs. Austin Matheny.

Mrs. Matheny presided at the business meeting and announced the annual congregational meeting of the Eden church will be held Sunday, Mrs. Lola Knifong was appointed to represent the United Presbyterian Women's organization on the nominating committee for church officers.

The women approved a donation of \$10 to the \$1,000 club, sponsored by Presbyterian. The \$1,000 club is a scholarship fund which provides financial assistance to ministerial students.

Discussion was held on providing babysitters during church services.

Next meeting will be Jan. 19 at the church, with Mrs. Curtis Metcalf as hostess. Mrs. Ed Louder will present the Bible study on the first chapter of Galatians.

Refreshments were served by the hostess.

### View LDS Ward Lesson Given

VIEW, Jan. 8 — "Individual responsibility as a member and a missionary" was the View ward LDS Relief society lesson given by Mrs. Leland Woodbury. This was the first lesson of the new year.

Mrs. Jerald Anderson presented the visiting teachers message. Mrs. Elton G. Hatch conducted the meeting. Prayers were given by Mrs. Harold Blauer and Mrs. Jess Seale.

MR. AND MRS. ROY LIVELY (Shig Morita photo)

### Betty Reichert Is Bride of Roy Lively

BUHL, Jan. 8 — The Buhl First Lutheran church was the scene of a candlelight wedding ceremony Dec. 30 uniting in marriage Betty Jo Reichert, daughter of Mr. and Mrs. Thomas J. Murray, La Mesa, Calif., and Roy Lively, son of Mr. and Mrs. Russell Lively, Buhl.

The Rev. Delmar M. Talley solemnized the double ring evening nuptials. Tiered candelabra with white tapers, pedestal baskets of red and white poinsettias and a lighted Christmas tree with colorful ornaments provided a holiday background setting for the ceremony.

Traditional wedding music was played by Mrs. Blanch Smith, organist. Mrs. Goldie Fawcett was soloist, with Mrs. Robert Slagel and Mrs. Smith providing a piano and organ duet accompaniment.

The bride was escorted down the aisle by Daniel Estey, brother-in-law of the bridegroom. She recited vows in a floor-length gown of white deau de aile de signed with an empire-midriff, bateau neckline and petit point sleeves.

Miniature self covered buttons accented the back of the gown to the waistline and wrists of the sleeves. The modified bell-shaped skirt cascaded into a chapel-length train. Crumple face applique with seed pearl highlights adorned the front of the bodice and skirt and was repeated on the train.

A queen's crown embellished with seed and tear drop pearls released her waist-length veil of sheer illusion. Her jewelry was a single strand cultured pearl necklace with matching earrings, a gift from the bridegroom.

The bride carried a white Bible topped with an array of pink roses with white ribbon accents and flowing satin streamers.

The bride's attendants were Mrs. Richard Bencken, as matron of honor, and Lee Bosworth and Mrs. Jack Jardine, as bridesmaids. They wore identical sheath styled gowns of pink crepe de chine fashioned with bateau necklines and cap sleeves. Each carried a white Bible topped with pink roses and carnations with multi-colored pastel ribbon streamers.

Richard Bencken was best man. Gerald Lively and Russell Lively, Jr., were ushers and candlelighters.

The bridegroom's mother was attired in a royal blue crepe dinner dress with white accessories and a corsage of pink carnations with silver bow trim.

Immediately following the ceremony the newlyweds greeted guests at a reception held in the church fellowship hall.

The bride's table featured a white lace tablecloth centered with a four-tiered wedding cake. The cake was iced in white and decorated with heart-shaped lattice work with pink rosebud trim, silver seeds, pink doves and leechy fleur-de-lis. White swans separated each tier and it was topped with a miniature bride and bridegroom under a floral archway of

### T. F. Federated Music Club Slates Meeting

The January meeting of the Twin Falls Federated Music club will be held at 1:30 p.m. Monday at the home of Mrs. James S. Kinney, 1501 Eleventh avenue east.

Program chairman is Mrs. Kurt Moss, who will present biographical material on the life of her grandfather, Arthur Nikisch, one of the great orchestra conductors of the world.

For over 25 years Arthur Nikisch conducted the Berlin Philharmonic and the Leipzig Gewandhaus and was an intimate friend of musical greats such as Tchaikovsky, Brahms, Liszt, Bruckner and Johann Strauss. Mrs. Moss will present original material including letters from Brahms and Liszt written to her grandfather.

Arthur Nikisch guest conducted famous orchestras all over the world, and from 1888 to 1892 was the conductor of the Boston Symphony. In 1897 he took over the Berlin Philharmonic Orchestra, where he resigned supreme until his death in 1922.

Mrs. Moss will play tape recordings of her grandfather playing Brahms Hungarian dances. These tapes were obtained by a special process that enabled them to be taken off of old player piano rolls cut by Nikisch many years ago.

Social chairman for the after-noon is Mrs. Dean Affleck, assisted by Mrs. C. R. Fox, Mrs. Keith Jenkins, Mrs. Russell Potter and Mrs. Age Stilling.

### Mrs. J. Mecham Presents LDS Theology Lesson

HAGERMAN, Jan. 8 — Mrs. James Mecham gave the theology lesson at the LDS Relief society meeting at the LDS church. Mrs. Ed Larson conducted the meeting. The lesson was on individual responsibility as a member and a missionary.

Mrs. Joseph Haycock and Mrs. Ethel Boyer were in charge of the music. Mrs. Gerrard Lutmer gave the invocation and Mrs. Nettie Moyes gave the benediction.

Stake visitors were guests at the meeting. They include Mrs. Elaine Dixon, stake president, and Mrs. Carol Rogers, stake secretary, both Gooding.

Mrs. R. K. Bendorf conducted the visiting teachers meeting, with Mrs. Jack Allen in charge of the lesson on taking improving. Mrs. Haycock and Mrs. Ernest Tolley gave the prayers.

The Tuesday meeting will be a work day starting at 10 a.m. Crushed rock butterflies will be made, demonstrated by Mrs. Brad Nieder.

### Social Events

Odd Fellows and Rebekahs of district No. 5 will hold joint installation ceremonies in Buhl Tuesday, in Twin Falls Wednesday, and in Piler Thursday. The services will start at 8 p.m. and the public is invited.

Magic Valley Saintpaula club will hold a luncheon meeting at 1 p.m. Monday at the Depot grill Caboose room.

HAGERMAN — Golden Age club will meet at 7 p.m. Monday at the American Legion hall.

Magic Valley barracks No. 509 Veterans of World War I and auxiliary, will meet at 8 p.m. Monday at the Odd Fellows hall. Members of the refreshment committee are Mrs. Doretta Atkinson and Mrs. Anna Branson. All veterans and their wives are welcome.

JEROME — Odds and Ends Square Dance club will dance at 8:30 p.m. Saturday at the Pioneer hall, Jerome. Vern Schroeder is the caller. Bring sandwiches or dessert.

HAZELTON — "Purposeful things for youth to do" is the topic for discussion when the United Presbyterian youth meet at 7 p.m. Sunday in the Hazelton church. The Rev. Robert Richards will lead the discussion.

MARIA JEAN TAUSCHER

### Miss Tauscher, Ollieu Reveal January Plans

RICHFIELD, Jan. 8 — The engagement of Maria Jean Tauscher, Los Angeles, Calif., and Michael (Mick) Ollieu, Portland, was announced to Richfield relatives and friends with whom the couple have been visiting recently.

Miss Tauscher is the daughter of Mr. and Mrs. Vern Tauscher, Los Angeles. Ollieu is the son of Mr. and Mrs. Theo Ollieu, Richfield.

Miss Tauscher and Ollieu are former University of Idaho students. She received her bachelor of arts degree in political science at UCLA, Los Angeles. She is a member of Gamma Phi Beta sorority.

Ollieu is a graduate of Richfield high school and the University of Idaho. He received his master's degree in forestry in 1963 after a two year assistantship for outstanding work in zoology. He is affiliated with Delta Sigma Phi social fraternity, Phi Sigma and Xi Sigma Pi forestry and biology honorary fraternities. He is associated with the insect and control branch of the U.S. lumber management division, Portland.

A January wedding is planned.

### Magic Valley Favorites

MRS. BILL NEUMEYER  
1134 Addison avenue east, Twin Falls

**EXTRA GOOD GINGERBREAD**  
1/2 cup molasses  
1/2 teaspoon cinnamon  
1/2 teaspoon ginger  
1 teaspoon soda  
1/2 cup sugar  
1 1/4 cups flour  
1 egg, unbeaten  
1/2 cup shortening, filled to cup with boiling water

Place all ingredients in mixing bowl and beat with rotary beater thoroughly. Bake in square pan for 30 minutes in moderate oven.

(The Times-News will pay for Magic Valley Favorites. If you have favorite recipe, just mail it to Recipe Department, Women's Editor, The Times-News and you will be returned.)

### Cooked Food Sale Slated

HAGERMAN, Jan. 8 — A cooked food sale is set from 9 a.m. to noon Saturday at Owlsey's Grocery store. It was announced at the Future Homemakers of America meeting. Terri Larson conducted the meet.

Kathy Larson and Robin Lemmon made posters to advertise the sale. Peggy Flinn and Sandra Wingar are in charge of the bulletin board in the classroom for the month of January.

A special FHA meeting is set for 7:30 p.m. Jan. 18 in the home economics rooms, with Laura Lemmon in charge. This will be work toward state degrees.

The next regular meeting will be Feb. 1.

### Ceremony Set

FAIRFIELD, Jan. 8 — Joint installation ceremonies will be held at 2 p.m. Sunday in the American Legion hall for the new officers of Orient lodge No. 15 IOOP and the Occident Rebekah lodge No. 58.

The installation will be conducted by teams from the Gooding and Jerome lodges. The ceremony is open to the public.

### Complexion Beauty

The secret of beautifying the complexion is said to lie in the saturation of the skin with a new type of tropical moist oil. The skin takes on an immediate healthy bloom as the tiny lines and blemishes are gently smoothed away. This saturation treatment with the moist oil of olay is recommended by beauty care consultants, who advise daily use as a powder base to give the complexion day-long beauty. Your druggist will help you to obtain a little for your personal needs.

# Along Fences and Canals

Mr. and Mrs. Larry and Randy, and Dean Funk and his sons called last week to their winter feedlot at the Fairfield ranch. The trip from the Fairfield ranch was made with an easy ride on the BLM corrals at the old Gwinn ranch.

Mr. and Mrs. Roland Muffley have sold their home in Fairfield and their country home and farm northeast of Fairfield to Mr. and Mrs. Dought Osborne, Jensen. The sale involved about 1,500 acres of land, the farm machinery and equipment. The families will move after the spring thaw. Mr. and Mrs. Muffley will move to a farm one mile west of Appleton, which was purchased by Mr. and Mrs. Osborne and four children will be included in the deal. Mr. and Mrs. Osborne are oldtime residents of the Muffley property. The Muffleys are oldtime residents of the Muffley property and have taken an active part in community affairs and will be greatly missed.

Mr. and Mrs. Ben Haubrich returned from a holiday in California to find some of their corrals washed away at their River ranch, between Shoshone and Richfield on Little Wood river. Haubrich's quarter horses, looked after by the Rupert Golchochea family, were all right, but the hay was ruined by the unusually wet weather. Horses are particularly susceptible to moldy hay, and weather reports.

BEAN-BLIGHT was the prime subject of a meeting of the South Central Idaho Bacterial Blight Control association. Principals at the meeting were, from left, Wilbur Priest, Jerome county agent; Dr. Leslie Dean, plant breeder; Dr. A. M. Finley, University of Idaho plant science department head; John Remberg, chairman of the control association, and Stanley Trenballe, Idaho commissioner of agriculture. Blight control was discussed at the meeting. (Times-News photo)

## Idaho Senator Asks Wheat Growers to Submit Ideas

WASHINGTON, Jan. 8—Idaho Sen. Len Jordan this week reminded Gem state wheat growers that those persons interested in submitting written comments on a USDA proposed revision in the official U.S. standards for wheat which would increase the percentage of "contrasting classes" permitted in grades No. 1, No. 2 and No. 3 must do so not later than Jan. 15.

The comments should be sent to the hearing clerk, room 112-A, U.S. department of agriculture, Washington, D.C. 20250. All comments submitted will be available for public inspection in the hearing clerk's office, Jordan said.

The changes are being considered at the request of wheat growers, grain elevator operators and exporters in the Pacific Northwest. At a series of meetings conducted by the USDA during September, producers stated that the rather-tight limits of contrasting classes were causing economic hardship to them.

USDA officials said the proposed amendment would be less restrictive on the grading factor, contrasting classes. Contrasting classes are those that are readily distinguished from others—such as hard red winter wheat as it occurs in white wheat, and durum as it occurs in hard red spring wheat.

The change would increase the percentage of contrasting classes allowed as follows: Grade No. 1 from one-half to one per cent; grade No. 2 from one to two per cent, and grade No. 3 from two per cent to three per cent.

## North Side Men Tour Headquarters

WENDELL, Jan. 8—Melvin Jones, technician for North Side Unit of Cache Valley-Breeding Association, accompanied by Bruce Provan, Wendell, Edward Griggs, Shoshone, and Darrell Schmitzer, Gooding, agricultural inspectors, and Warren Chandler, Wendell, toured the Cache Valley Association headquarters in Logan, Utah.

The vocational agricultural instructors saw new processes of collection and storage of semen of selected animals.

The semen is kept by storing in stainless steel tubs (about four feet high) in liquid nitrogen, a refrigerant which is a minus 329 degrees. The fluid is kept frozen and stored in capsules for shipping.

The capsule is prepared for use by thawing out in ice water. It is estimated there are about 10,000 live sperm in each capsule after thawing.

Bulls in service have been selected by performance, testing, conformation and blood lines.

The performance test is a method of record keeping on bulls, based on increase of production from his daughters.

Inbreeding is used as a method of obtaining tight blood lines which in crossing yields very good animals. But there is danger of dwarfism and mutation, Jones adds.

Genetics, nutrition, chemistry, veterinary practice, must be thoroughly understood by technical people who operate this concern, covering 11 states, he adds.

## Voluntary Measures and Year-Long Wait Fail to Halt Spread of Blight

By G. H. CHAMBERS

A year ago Idaho Commissioner of Agriculture, Stanley Trenballe announced there would be no quarantine of beans in Idaho and voluntary measures to control the spread of bacterial blight or halo blight would be used to curb the disease.

Most of the growers and bean dealers went away from the three public hearings held last year in Magic Valley hoping the hot dry summer would put an end to the disease.

The hot dry summer never materialized and the halo blight threat is still around to haunt the Idaho bean industry.

Evidently, according to comments circulating around the annual meeting of the South Central Idaho Bacterial Blight Control association, held at Hazelton Tuesday, much of the opposition to control orders has mellowed. Voluntary control measures simply didn't work.

Some 80 to 100 members of the association and representatives of the Idaho bean industry met at the Grange hall here to look at the past year.

One reason why voluntary control didn't work is that pathologists readily admit they don't know enough about bacterial blight in beans.

Dr. Leslie Dean, plant breeder, told the group there was some confusion. Lesloris' appearing on the crop were often confusing because of a fungus growth. These lesions were raised, rather than sunken as is the case of most symptoms concerning bacterial blight. Only laboratory tests can tell if it is blight.

Common forms of blight are easily recognized in the field. The disease is seed-borne and seed treatment will only remove surface contamination. The bacteria living below the coating of the seed escapes treatment.

Dr. Dean's observations on identification and detection were supported by Dr. A. M. Finley, head of the University of Idaho plant science department.

In fact, the two pathologists indicated it might be possible that a new race of bacteria is present in Idaho beans and this new race or strain of bacteria is capable of overcoming Idaho climatic conditions and in beans heretofore labeled resistant to bacterial blight.

"More research is needed because we simply don't know all the answers," the two men said.

C. Vissers, representing Agrow Seed company, told the group many bean customers are complaining of Idaho seed. Quality and disease-free seed is the only advantage Idaho has in marketing the seed bean crop. And this

## Resolution Asks Lawmakers For Aid in Blight Battle

WASHINGTON, Jan. 8—Members of the South Central Idaho Bacterial Blight Control association today voted to ask the legislature to take the legislative initiative to combat bacterial blight in Idaho beans.

The resolution stresses the need for control of the disease and that the disease appears to be propagating despite chemical barriers assumed to be in place.

The text of the resolution reads as follows:

"It is resolved that only the use of disease-free seed be permitted for distribution to growers and that the use of such seed be accomplished by the use of up-to-date testing and field disease methods available to this by voluntary action, but by control order should substantial performance be effective containment and control of bacterial blight."

"Clearly this is the prerogative of the marketing industry with bean dealers cooperating with the University of Idaho and the state department of agriculture in technical matters.

"The earliest possible detection of disease presence be accomplished by trained inspectors authorized to enter any and all bean fields and practicing proper strict sanitation upon themselves and their clothing, to insure against spread of disease continuing initial and repeated inspections through the harvest season, and reporting all suspicious or obvious infections to qualified pathologists for confirmation.

"Inspection is the prerogative of the Idaho state department of agriculture, supplemented by the Idaho Crop Improvement association for its participating members. Similarly, laboratory and pathologist services to both, be in the purview of the University of Idaho college of agriculture.

"Realizing the considerable cost to adequate reason-long inspections and tests.

"Be it further resolved that the finance committees of the present session of the Idaho legislature be memorialized to supplement the forthcoming biennial budget of the state department of agriculture in the amount of \$80,000, a line item for emergency expense in bacterial bean disease control, inspections, including windrow and similarly, a line item of \$9,000 to the University of Idaho college of agriculture for Idaho emergency expense in bacterial bean disease control laboratory supervisory expense during the biennium.

"That all bean fields, in which bacterial blight disease is detected and confirmed, shall be destroyed in the manner prescribed by the South Central Idaho Bacterial Blight Control association, for its participating members, or with equal effectiveness to prevent contamination of adjacent areas.

"Participation in the association, and voluntary and losses are compensated by assessment on the bean acreage planted by the participants. The association shall have no field agents, therefore, it hereby solicits the cooperation of all Idaho bean growers to make bacterial blight control effective without need for control orders.

"Finally, be it resolved that,

## Clinic Set

"How to analyze farm costs and profits," will be the subject of a day long meeting conducted by Virgil Kennedy, extension farm management specialist and will be held at the Rogerson hotel Roundup room Jan. 13. The meeting will start at 10 a.m. and a no host lunch will be served at noon.

## Pridmore's Herd Takes Top Honors

RICHFIELD, Jan. 8—December DHIA report lists Harold Pridmore's Holstein herd at the top of the list with 28 of his 29 milking cows going over the 40 pound average for butterfat.

His cows averaged 1,138 pounds of milk for the month and 44.5 pounds of butterfat. Roger Freeman's herd was second with 927 pounds of milk and 38.1 pounds of butterfat.

Cows averaging over 60 pounds of butterfat for the month were nine of Pridmore's herd, 7 Up, 67.7; Ada, 61.7; Babe, 82.4; Beauty, 64.4; Robin, 69.1; Queen, 72.8; Bev, 81.4; Blue, 87.1, and Brownie, 63.6.

Dee Wolverton had No. 16, 60.5; No. 21, 64.8; No. 23, 61.2 and No. 18, 63.6. Grant Stevens had Sally, 74.7; Elizabeth, 61.1; and Stub, 60.6. Roger Freeman had Chubby, 61.5; Beauty, 73.8; Buttercup, 65.0; and Spot, 60.9. F. M. Crowther had Freddy, 60.1.

# Productivity Rises; Farm Total Drops

WASHINGTON, Jan. 8 — Changes in agriculture since World War II were revealed in new data published this month by economic research service. A rise in productivity, it was reported, has been accompanied by a substantial drop in the number of farms from almost six million in 1945 to 3.5 million in 1963. "Relative few farms in the higher value-of-sales classes accounted for the bulk of cash receipts from farm marketings and realized net income," it was stated. "In 1963, for example, an estimated 1,867 thousand farmers with sales of \$5,000 or more accounted for 35 billion dollars in cash receipts out of a total \$8.8 billion dollars for all farms combined. This group, comprising 44 per cent of all farms, accounted for 79 per cent of total realized net income in that year.

Of the total 37 per cent increase in total farm production expenses since 1950-54, increases in prices account for less than one-half. Average prices paid by farmers for commodities, interest, taxes, and wage rates have risen about 14 per cent.

# Farm Prices Unchanged as Year Ends

WASHINGTON, Jan. 8 (AP) — Prices farmers received for crops and livestock were unchanged during the month ended Dec. 15, the agriculture department reports. This left farm prices one per cent below those of a year earlier. The department's monthly farm price report showed that the cost of production and living supplies purchased by farmers also was unchanged during the month. The index of prices paid by farmers was 2/3 of one per cent above a year earlier. A comparison of farm market prices and farmer costs showed that prices in December averaged 75 per cent of parity, compared with 75 per cent in mid-November and 76 per cent in mid-December a year ago.

Parity is the price needed to put the value of commodities sold by farmers on a par with the cost of things they must buy. Theoretically a fair return for their work.

The department said the most important price change was increases for potatoes, hogs, and corn, which were offset by declines for wholesale milk, cattle, and cotton. The mid-December index of prices received for crops and livestock was 254 per cent of the 1910-14 base period, compared with 254 per cent in mid-November and 237 per cent in mid-December a year ago. The index of prices paid by farmers stood at 313 per cent of the base period, compared with 313 per cent in mid-November and 311 per cent in mid-December a year ago. Average hog prices for the month were \$14.70 per hundredweight, compared with \$13.90 in mid-November and \$13.60 in mid-December a year ago. Average beef-cattle prices for the month were \$17.40 per hundredweight, compared with \$17.70 in mid-November and \$17.60 in mid-December a year ago. Average corn prices for the month were \$1.14 per bushel, compared with \$1.04 in mid-November and \$1.07 per bushel in mid-December a year ago. Average wheat prices for the month were \$1.39 per bushel, the same as in mid-November. This compares with \$1.27 per bushel in mid-December last year.

# Idaho Aides Will Attend Council Meet

UNIVERSITY OF IDAHO, Moscow, Jan. 8 — The Idaho Cooperative Council will be represented at the National Council of Farmer Cooperatives at Seattle, Jan. 18 to 20, by Lewis J. Phillips, Lewiston, president, and R. Wayne Robinson, Boise, University of Idaho extension economist, and Idaho council secretary. The national council is made up of more than 5,700 farm cooperatives in all parts of the country. Membership is nearly three million. Phillips is manager of the Lewiston Grain Growers. He was elected president of the Idaho council at a recent meeting in Boise. Robinson continued as secretary. "Because of the growth, both in size and complexity, of business organizations in other segments of the economy," Robinson said, "it is imperative that the farmer cooperatives meet the urgency for farmer cooperatives to attain greater bargaining power in the market place. Attention will also be given to developing leadership in cooperative activities, capitalizing the growth that is essential if cooperatives are to work effectively. This is being done by expanding markets for products at home and abroad," said Robinson.

# Grain Hit by Floods Can Be Salvaged

BOISE, Jan. 8 — Grain that has been flooded begins to mold and heat very soon. Steps to reduce loss were suggested this week to farmers in flooded areas of Idaho by county agents and Howard Tankersley, rural civil defense leader of the University of Idaho extension service. Dry portions of grain in the pile or bin should be removed and stored separately. The quickest method for saving wet grain is to get it to a commercial drier as soon as possible. If dry storage is available, use a natural air drying system with a metal perforated floor or a lateral duct system and put the grain over it to a depth of not more than six feet. Use a fan to force air up through the grain. Hay stored in flooded barns or in large stacks may pose two problems. Bottom bales may cause one or more layers to spoil. Spontaneous combustion could occur. Combustion is most likely if wet hay is stored in buildings. As soon as practical, the bottom layers should be removed in order to salvage the rest of the stack. If you need the feed badly, the bottom layers can be broken into a pile and treated with common salt. Feeding a little of this with other feed is a means of using the wet hay. If the temperature of baled hay reaches 180 degrees, there is danger of fire. You can take the temperature by driving a pointed pipe into the stack, lowering a thermometer and leaving it about 20 minutes. If the temperature reaches 200 degrees, call the fire department to stand by while you tear down the stack.

# Jerome FFA Sweeps Both Ends of District Contest

JEROME, Jan. 8 — Host school Jerome swept both ends of a double contest in West Magic Valley district Future Farmers of America competition. The two contests were in "insects" and "crops and weeds." Dennis Ricketts, scoring 252 points, was individual high point man in the insects contest and paced the Jerome high school FFA team to a 631 point total to win first place. Piler high school took second place with 553 points. Ricketts got a valuable assist from Leon Pielstick, who tallied 247 points to take second high individual scoring honors. Steve Thomas is the third member of the team. Wendell high school finished third in the contest. In the crops and weeds contest, Robert Ohlenschlaen scored 91.5 points to be high individual scorer and lead the Jerome team to victory. Several schools in the district entered more than one team, which enhanced the competition. Jerome picked up 273.4 points to win. Other team members for Jerome included Larry McGhee and Parry Dixon. Carey high school placed second in the contest with 280 points, while Twin Falls high school won third with 257.4 points. Lyle Fuller, Twin Falls, was second high individual scorer.

# Canal Meet

Twin Falls Canal company manager Alfred Peters said the annual stockholders meeting will be held Tuesday at the Idaho Power company auditorium. The morning session will start at 10 a.m. Trophies for the contest were donated by Twin Falls Feed and Ice company, Simplot Soilbuilder and West End Fertilizer company.

# Summary of 1964 Crop Production Shows U.S. Grows Many Obscure Items

WASHINGTON, Jan. 8 (AP) — The agriculture department's summary of 1964 crop production and values is fascinating reading. There is a great store of information in the agency's latest summary of the food, feed, fiber, and smoking material produced this year. Some of the values attached to obscure crops are eye-openers. The summary shows that the United States produces some crops usually thought of as foreign products. For example, 1964 production of coffee in the United States amounted to 13.5 million pounds and was worth almost four million dollars. This coffee was grown in Hawaii, the newest state. Hawaii also produced more than nine million pounds of bananas, worth \$707,000. Then there are Mung beans. Mung beans are a bushy legume, used for food and forage. The bean parts are used in preparation of Chinese-type foods. Mung beans are grown in Oklahoma. The 1964 production totaled 7,980,000 pounds and was valued at \$439,000. Mung beans originally came from Asia. "Taro is another crop you don't hear much about. Yet Hawaii turned out more than nine million pounds of this starchy food in 1964. It was valued at about \$681,000. It is used in making poi, a Hawaiian dish. The department listed Papaya production in 1964 at 24 1/2 million pounds, worth 114 million dollars, and almost entirely from Hawaii. The department ignored any production of Papaya in Florida and California as not large enough to cause a decimal point change in the total. Macadamia nuts, another prominent Hawaii product, totaled 6.8 million pounds worth \$970,000 in 1964. All these nuts came from Hawaii. Some planting has been made in California and Florida, but production in those states is not enough for commercial purposes. The U. S. popcorn crop in 1964 was sizable — 368 million pounds worth 10 million dollars. The crop is important to the economies of Ohio, Indiana, Illinois, Michigan, Iowa, Missouri, Nebraska, Kansas, and Kentucky. To say nothing of thousands of motion picture theater owners. Tung nuts weighed in at about 109,000 tons worth 6.6 million dollars. They were produced in Florida, Alabama, Mississippi, and Louisiana. The government offers price supports on Tung nuts, which give forth an inedible oil used in making paints. After checking production and value of such commodities as tobacco, maple syrup, hognut, mint for oil, nectarines, dates, avocados, and lespedeza, you could learn easily from the summary that California led all other states in value of 1964 crop production. California's production of field, forage, and miscellaneous crops, fruits and nuts, selected seed crops, and commercial vegetables was valued at \$2,101,369,000. There were three states with crop values of more than one billion dollars each. They were Illinois, 1.49 billion dollars; Texas, 1.41 billion dollars; and Iowa, 1.38 billion dollars. Other big crop-value states were North Carolina, \$946 million; Florida, \$922 million; Minnesota, 792 million; Indiana, 713 million; Nebraska, 636 million; Kansas, 626 million; Missouri, 624 million; Arkansas, 580 million; and Ohio, 564 million.

California was the No. 1 state for production value basis because of its wide variety of crops, including many citrus products. But Florida was the premier citrus state, with an orange crop put valued at 407 million dollars compared to 170 million dollars for California. The Florida grapefruit crop was valued at 18 million dollars, whereas California production was valued at 10 million.

# 28 Per Cent Dip Noted in Beef Imports

WASHINGTON, Jan. 8 (AP) — Imports of beef and veal during the first 10 months of this year totaled 682 million pounds, down 28 per cent from those of the like period last year. Secretary of Agriculture Orville L. Freeman had promised several months ago that this year's imports would be down at least 25 per cent. The foreign supplies have been blamed by some cattlemen as a major factor in a reduced cattle price level. Imports of pork held at about the same level as last year. Imports of cattle dropped a sharp 41 per cent, totaling 383,368 head during this year's January-October period, compared with 649,564 in the like period last year.

# Western Hemisphere Nations Purchase Record Amount of U.S. Farm Products

WASHINGTON, Jan. 8 (AP) — U. S. farm exports to western hemisphere countries reached a new peak of \$1,184,000,000 in fiscal 1964, according to the foreign agriculture service.

The total value of U. S. farm products sold to Canada and other countries in the Americas in fiscal 1964 was 18 per cent above a year earlier.

Major commodities exported were wheat and flour, 238 million dollars; corn, 113 million dollars; fruits and preparations, 128 million dollars; vegetables and preparations, 86 million dollars; soybeans, 79 million dollars; cotton, 63 million dollars; and products, 53 million dollars; and meat and meat preparations, 54 million dollars.

Canada was the biggest buyer of U. S. farm products—618 million dollars. This included an estimated 160 million dollars of in-transit shipments placed in bonded storage in Canada and used to finish loading ships moving through the St. Lawrence seaway. FAS said U. S. farm exports to Canada, excluding in-transit shipments, were eight per cent of total U. S. farm exports.

FAS said shipments to Canada included: meat, about half of which was fresh pork, 31.5 million dollars; corn, 88.9 million dollars; soybeans, 76 million dollars; vegetables and preparations, 60 million dollars; fruits and preparations, 106.4 million dollars; cotton, 58.3 million dollars; and wheat, 61.5 million dollars, and

large amounts of feeds, fodders, vegetable oils, rice, and tobacco.

Latin American countries took 536 million dollars in U. S. farm products in fiscal 1964. FAS said 343 million dollars represented commercial sales and 193 million dollars were under special programs, mainly public law 480, the surplus disposal act.

Brazil was the largest Latin American market for U. S. farm products. Brazil bought 106.6 million dollars worth of farm commodities. Dollar sales to Brazil totaled 135 million and P. L. 480 shipments 87.1 million dollars.

The sales to Brazil in fiscal 1964 compared to 109.4 million dollars a year earlier.

Venezuela was the second largest South American market, tak-

HOLLISTER, Jan. 8 — Salmon River Canal company board chairman reminds Salmon tract farmers that the annual stockholders meeting will be held in the company office here Monday afternoon.

83-million dollars in agricultural products. This was a 36 per cent gain over the previous year. The Venezuela sales included 68 million dollars for dollars.

Mexico was the third largest Latin American customer, taking farm goods valued at 78 million dollars. Dollar sales to Mexico totaled 65 million dollars.

### Idaho Seed Declines

Certified seed production in Idaho totalled 1,100,000 hundredweight in 1964, according to Idaho Crop Improvement Association records.

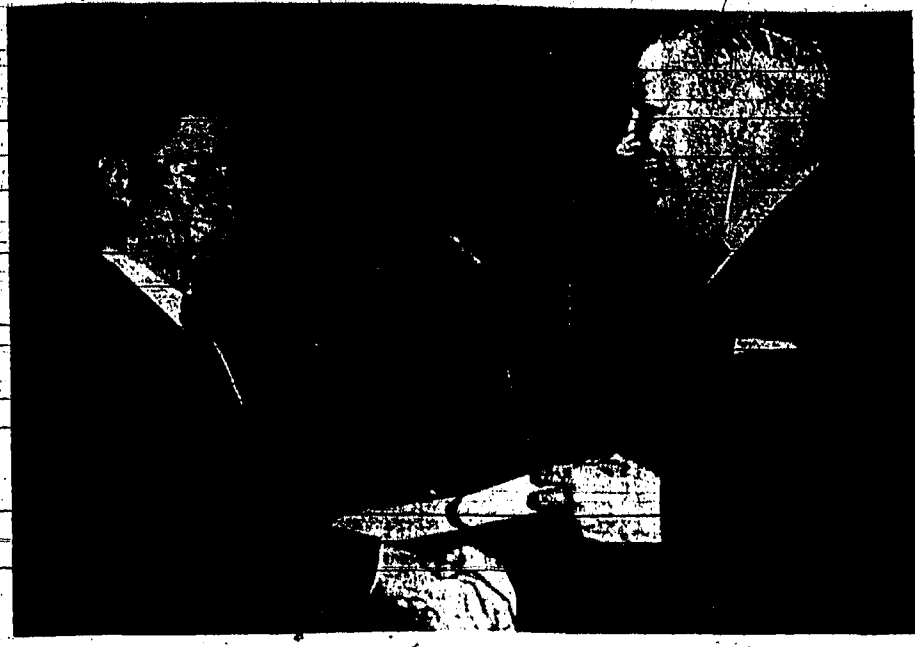

The year was 33 per cent below the 1963 production of 1,650,000 hundredweight, but 20 per cent above average.

The 1964 production was 5,800 acres, compared with 5,900 acres in 1963 and 5,800 acres in 1962.

The 1964 production was 19,000 acres, compared with 18,000 acres in 1963 and 18,000 acres in 1962.

The 1964 production was 41 per cent below the 1963 production of 1,650,000 hundredweight, but 20 per cent above average.

The 1964 production was 5,800 acres, compared with 5,900 acres in 1963 and 5,800 acres in 1962.

## Domestic Food Donations Hit 434.8 Million Pounds for First Quarter

WASHINGTON, Jan. 8 (AP) — The agriculture department said domestic food donations during the first quarter (July-September) of fiscal 1965 totaled 434.8 million pounds valued at 104.3 million dollars.

The cost of these foods was 33.5 per cent greater than in the first quarter of fiscal 1964.

Domestic food donations during all of fiscal 1964 totaled slightly more than 1.85 billion pounds valued at 370.3 million dollars.

The donations during the first quarter of fiscal 1965 were 7.8 per cent greater than during the same period a year earlier.

The cost of these foods was 33.5 per cent greater than in the first quarter of fiscal 1964.

Recipients of the donated

foods were schools, institutions, and needy persons.

Schools got 123.5 million pounds of food, 17.2 per cent more than in the first quarter of fiscal 1964. The cost of the foods in the first quarter of fiscal 1965 was 35.9 million dollars.

The department said the increase in foods donated reflected not only increased enrollments, but also continued federal-state cooperative action to provide lunches in economically depressed areas.

## Idaho Potato Conference Is Scheduled at Pocatello

UNIVERSITY OF IDAHO, Moscow, Jan. 8 — An Idaho potato conference bringing together all elements of the industry will be conducted March 16 and 17 at Pocatello, Richard Ohms, potato specialist of the University of Idaho extension service, announced today.

He said the meeting is the first of its kind in Idaho. Pro-

ducers, processors, shippers, research workers and extension personnel concerned with potatoes will take part.

The conference is sponsored by the University of Idaho in cooperation with the Idaho potato and onion commission. Ohms is program chairman.

"One of the main purposes," he said, "is to study Idaho's competitive position. We need to determine where we stand in production and marketing. The Idaho potato is recognized as the best in the business, but we must constantly keep up with trends of the times to maintain that position."

"At a meeting such as this we are planning, all segments will combine their knowledge in the interest of quality, increase yields per acre, and profitable marketing of both the fresh and the processed product. Year-round marketing is one of the goals."

## Extension Staff Meets

UNIVERSITY OF IDAHO, Moscow, Dec. 8 — Scientists of the University of Idaho college of agriculture are meeting the challenge of a new insect invader. Control of the mint flea beetle can be accomplished by use of insecticides and crop rotation, according to Norman Waters, an entomologist at the Parma branch experiment station.

He said the insect was found for the first time in Idaho last summer and was officially identified in October. Specimens were collected in several fields of southwestern Idaho where most of the state's relatively small acreage of mint is grown. The mint flea beetle eats holes in leaves and sometimes causes considerable leaf fall and browning of the plants. Larvae feed on the roots in the spring. Damaged plants are stunted. Some die.

Crop rotation or summer fallowing controls the beetle to some extent, Waters said. Under these practices the field and surrounding area should be kept free from volunteer or wild mints, as the beetles will survive on these. However, he said, soil treatment with insecticides is the most effective method of control.

## Extension Staff Meets Pest Threat

WASHINGTON, Jan. 8 (AP) — An annual convention of the National Farmers Union is held March. Consequently, the organization's recommendations concerning farm policy will be run are not ready for congress convenes.

Other two big farm groups, the Bureau of National Agriculture and National Farm Congress convenes. Their recommendations are ready and ready.

This year the Farmers Union is in its executive committee and is up with an eight-point program for the consideration of congress.

The NPU's program included: a plea for a legislative package to keep farm income; a proposal for a national policy of farm and strengthening the farm; relief of the short-term debt program of farm development; an end to the money policies of the Federal Reserve Board and industry; and repeal of the section of the Taft-Hartley act which prohibits union membership laws.

President James G. Patton said the NPU program is a continuation of long-time goals of the organization.

# 2nd ANNUAL DRUM LOT OIL SALE

## TOP QUALITY OIL - ROCK BOTTOM PRICES!

# Harvest King

HARVEST KING OILS AND GREASES ARE FAR SUPERIOR TO ANY LUBRICANTS EVER OFFERED IN MAGIC VALLEY BY ANY FARM SUPPLY STORE. Harvest King Oils are listed as "Approved" lubricants by International Harvester Co., the Caterpillar Tractor Co., and the Internal Combustion Engine Institute.

HEAVY DUTY DETERGENT HARVEST KING DHD 95 80° GALLON

FREE With Each Order Placed Before Feb. 15th

YOUR CHOICE OF ONE OF THE FOLLOWING ITEMS:

- 2 Bottles SPC Oil Conditioner
- Quart Brake Fluid
- 2 Pints Bolt Dressing
- Oil Filter to Fit Your Tractor
- 3 Tubes Mystic JT6 High Stability Gun Grease
- 5 Tubes Lithflex A-5 Lithium Gun Grease
- 2 Pints Mystic Lube

WE STOCK A COMPLETE LINE OF OILS, GREASES, AND SPECIAL SERVICE LUBRICANTS:

- Top Grade Non-Detergent Oil
- Heavy Duty Detergent Oil
- Super Heavy Duty Series 1 Oil
- 10-W 30 All Season Oil
- 5 W 30 Long Mileage Oil
- Series 3 Diesel Oil
- Hydraulic Oil
- Ford-Ferguson Type Hydraulic Transmission Oil
- John Deere Type Hydraulic Fluid
- L.H.C. Type Hydraulic Oil
- Automatic Transmission Fluid
- Outboard Motor Oil
- Transmission Greases
- Penetrating Oil
- H.D. Brake Fluid
- Pulsator Oil
- ... and many other Petroleum Specialties

## Average Boosted

WASHINGTON, Jan. 8 (AP) — Wheat in the harvest next summer is expected to be an estimated 860 million bushels, according to the U.S. Department of Agriculture.

This compares with only 800 million bushels a year earlier and 850 million bushels in 1963.

The increase is due to a larger fall planting since the crop.

The forecast of production for the winter crop in Idaho is 100 million bushels, the department compared with 90 million for the 1964 crop and a 1963 average of 20,184,000.

### Farm Safety Council May Have Survey

A survey of rural accidents in Minidoka county will be conducted at the annual meeting of the Idaho Farm Safety Council in Boise, Jan. 22, according to Donald Youst, Twin Falls county agent.

He said representatives of all counties are invited to the session that will be a part of the meeting of the Idaho Farm Safety Council. Ervill Jerome, Kuna, is chairman of the farm committee.

The study in Minidoka county, said Howard Tankersley, rural civil defense leader for the University of Idaho extension service and secretary of the safety committee, is expected to be planned along the same lines as a similar survey in Canyon county, the first in the state to undertake the program. He said response was excellent in Canyon and that the analysis of causes of accidents has been helpful in making residents aware of the need to prevent accidents.

FIST awards will be presented to persons and groups that have given outstanding service to the cause of safety in 1964. FIST stands for "Farm Idaho Safely Today."

The award is a ceramic flat and a certificate. Nominations are still being accepted by the state committee, the county agent said. Forms are available from Tankersley in the Boise office, or from the county agent.

### Italy Agrees To Import U.S. Poultry

WASHINGTON, Jan. 8 (AP)—The Italian government has agreed to permit imports of poultry parts from the United States for the first time. Secretary of Agriculture Orville L. Freeman said this action opens up the Italian market for the complete line of U. S. poultry products.

Freeman said the freedom of entry of U. S. poultry parts into Italy followed visits by Italian poultry experts to U. S. poultry processing plants and production facilities earlier this year.

He said the Italian experts observed first hand that U. S. poultry parts are cut from whole birds of the same quality as those from which they had been buying as whole carcasses.

The poultry parts include the breasts, drumsticks, and thighs for direct consumption and the backs and wings for the production of poultry extracts.

The agriculture department said U. S. poultry meat exports in 1964 are expected to reach 220 million pounds. This is 81 million pounds below the 1963 record but up more than 10 million pounds from 1963.

West Germany was the biggest buyer this year, taking 95 million pounds. Other large volume buyers included the Netherlands, 15 million pounds; Canada, 13 million pounds; Hong Kong, 15 million pounds, and Switzerland, 8.5 million pounds.

### Oleo Purchases Are Announced

WASHINGTON, Jan. 8 (AP)—The agriculture department has announced purchase of 2,018,000 pounds of oleomargarine for distribution to needy families and institutions. This was the first purchase the government ever made of margarine.

The department purchased 90 cents of margarine in 14-pound cartons. Prices ranged from 13.78 cents per pound to 14.43 cents per pound. The total cost was about \$415,000.

The department said earlier this month it would buy margarine because it needed the commodity for welfare purposes.

### FAS Estimates Rice Production

WASHINGTON, Jan. 8 (AP)—The Foreign Agricultural Service said world rice production in 1964-65 (August-July) may total 164.1 million metric tons. This compares with 162.6 million tons in 1963-64 and 153.4 million tons in 1961-62. The estimate excludes production in communist China.

FAS said the current crop forecast was based on conditions as of October, 1964, with more than 90 per cent of the acreage planted.

World rice acreage in 1964-65 is expected to be about 228 million acres.

**PURCHASE ENDED**  
WASHINGTON, Jan. 8 — Late December purchase of about 30.8 million pounds of spray nonfat dry milk completed requirements for milk packed in 56-pound multwall bags.

PROGRESS REPORT is examined by members of the Twin Falls county extension staff. From left are Olan Genn, assistant Twin Falls county agent; Donald Youst, Twin Falls county agent, and Mrs. Agnes Hurst, county home demonstration agent. Each year the county staff summarizes its activities. (Times-News photo)

### County Agent's Office Serves Area Under Law Created 50 Years Ago

Some 50 years ago President Wilson signed the Smith-Lever act, directing extension personnel "to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics, and to encourage the application thereof to persons not attending college."

This was born the cooperative extension service after 11 years of nurture starting with Dr. Seaman Knapp's historic farm demonstrations in Texas in 1903.

People needed and demanded informal, out-of-school, voluntary education in agriculture, home economics and related fields, to help raise the level of living and develop their communities.

In 1914 congress created an educational arm from land grant colleges and universities to individual farmers and ranchers throughout the nation. This arm was known as the "agricultural extension service" extending new ideas and methods in agriculture in the form of education directly to the point of application.

Fifty years later, in 1964, the agricultural extension service has become more valuable and remains in good standing over the nation. This method of extending agricultural education to the point of application has been duplicated by other countries of the world.

As Secretary of Agriculture, Orville Freeman said, "The agricultural extension service is an education agency created by congress and turned over to the local county people wherever it is needed. It is the only agricultural agency entirely in the hands of local people and it becomes more valuable each year."

The man known as the father of extending education from places of higher learning to farms and ranches was Dr. Seaman A. Knapp of Texas A and M college. He reasoned that knowledge gained through agricultural research was of little value unless it could be taken immediately to the point of application.

He also insisted that writing and talking about new discoveries and developments was not enough. From his wheelchair he developed the demonstration method of applying new things. He included young people as well as adults in his program which resulted in the present-day nationwide 4-H club program.

While speaking in Fresno, Calif. in 1958 Secretary of agriculture and former University of Idaho agricultural extension service employee, Ezra Tarr Benson commented "The agricultural extension service has long been known to have the answer to everything. Even though this is not true, many people, when asked a question automatically say, 'Call the county agent.'"

"You don't earn this kind of confidence," the secretary said, "by being an expert clockwatcher. You must have technical understanding—extension workers have to have an unusual sense of dedication to their jobs."

The people of Idaho requested the extension of agricultural education from the University of Idaho as early as 1915. Since the service is rendered only on request, the present extension service staff has reached its present number over a period of 49 years.

Even though Idaho is 12th in size of all states, its sparse population requires one of the smallest extension staffs in the nation. Two counties still do not have a county agricultural agent and many counties do not em-

ploy a home agent.

The other two divisions of the college of agriculture, teaching and research, constantly feed new information into each county agent's office. The information is then disseminated to the public and individuals in each county. Besides new information, many of the ideas and methods discovered in the past must be repeated for those farmers and ranchers who are new to the state and those without training or experience in agricultural production.

Twin Falls county was one of the first in Idaho to employ a county agent. W. N. Birch reported for work Nov. 1, 1915, and remained until the spring of 1917.

He was followed by D. L. McLean for a period of two years.

In the period following, 11 men were employed for periods of five months to 13 years.

Then 4-H club agents were employed by an off and on basis beginning as early as 1919 with Donald F. Youst serving the longest period of eight years. He is the current chairman of the extension service office.

Past records on file in the county office show that great progress has been made and constant change has prevailed.

There was a time when great emphasis was placed on proper fitting of shoes in 4-H club work today stress is put on ways of creating things and training in leadership.

A time was when the county agent was busy at harvest time helping set the difference in prices for threshing grain with a straw burner and a wood burning engine.

Records show that the county agent in Twin Falls county used to help pool several carloads of beans for sale and then ride the train to San Francisco and help market them. Today the same job includes problems of production from the lay-out of pens to animal health which services are available the year-round.

Past records show that with more knowledge and faster transportation a county agent may serve in special educational

visitation basis only. Public announcement of her lessons and activities because of large attendance.

Educational programs by both men and women extension agents require long hours. Often as many as three or four night meetings in one week aside from a full workday every day. During 4-H club activities in the summer season—Saturday and Sunday work is more usual than uncommon.

All extension work in Twin Falls county is planned and done in cooperation with the local people. Each year a county advisory committee goes over the work done and helps plan and schedule the work for the next year. The plan always demands full time without allowing for unforeseen emergencies which often create additional responsibilities requiring more and more time.

Each major educational project is done in cooperation with a special committee such as work on cereal grains, soil management and 4-H club.

After 50 years of cooperative extension work there is still no blue print of what each county agent will do on a national or state basis. Each county's requirements are different and the only permanent thing is "change" for progress.

Forty-nine years ago the first county agent in Twin Falls county kept up with changes by reading books and inquiring about new developments by correspondence. Today the same office has a direct telephone line to the state extension office in Boise

**NAMED TO POST**  
MINNEAPOLIS, Minn., Jan. 8 —James F. McFarland has been named executive vice president of General Mills. Gen. E. W. Rawlings, president, announced. In his new position, McFarland will be responsible to the president for all operating divisions of the company.

### Concentrated Advertising Campaign Launched by U. S. Poultry Industry

WASHINGTON, Jan. 8 (AP)—The U. S. poultry industry mounted a concentrated advertising campaign in West Germany and Austria during the holiday season to combat keen competition from European suppliers.

The foreign agricultural service (FAS) said the poultry promotion campaign in the two countries during 1965 will be of paramount importance. FAS said there is a possibility that U. S. poultry sales to West Germany may continue to fall off as they have for the past two years under the common market's levy system on whole birds coming into the European Economic Community.

The current campaign has emphasized frozen turkeys and poultry parts, which only the United States is in a position to supply in quantities needed. The common market recently lowered the levy on non-EEC poultry parts while raising it on whole birds.

The focal point of the promotion during the holiday season was concentrated and repetitive advertising.

FAS said advertisements aimed at the consumer were carried at frequent intervals in 48 German and Austrian daily newspapers with a combined circulation of about 12 million, and in more than 30 hotel-restaurant journals.

The U. S. poultry industry provided about 500 recipe kits suggesting new ways to prepare poultry and egg dishes as well. These went to food editors of newspapers, women's journals and consumer and trade publications. In addition, a prominent women's magazine in its December issue featured a six-page story in full color on favorite American recipes for poultry.

FAS said a West German food chain with stores in 250 cities estimated sales of American poultry during the holiday season would total 130,000 pounds.

The U. S. poultry industry advertising heavily on the theme that once the West Germans and Austrians get accustomed to the taste of American poultry, they will be firm customers, regardless of common market actions.

The advertising campaign was extended to Austria because the country is currently severe price competition from the Dutch, Danish, French, and West German poultry industry wants to displace the Austrian taste for poultry toward American birds.

**Plastic Milk Containers Is Marketed**  
 WASHINGTON, Jan. 8 — The plastic milk bottle is here, various sources have announced. It is a new, more sanitary, and more durable container for milk. The plastic bottle is made of a special type of plastic that is safe for food. It is lighter than glass and does not break. It is also more sanitary because it does not have to be washed and sterilized like glass bottles. The plastic bottle is being marketed by the National Milk Producers Federation. It is expected to be widely used in the near future.

**OPEN FIELDS** still provide adequate feed for sheep during winter months. This band west of Burley browses on harvest leftovers before the sheep are moved to pens for lambing. Lambing operations for farm flocks will be getting under way soon, with the range bands lambing later in the spring. (Times-News photo)

**Greater Protection From Chemicals Is Highlight of U.S. Control Work**

WASHINGTON, Jan. 8 (UPI) — The agriculture department considers its regulations which provide greater protection for people from pesticides to be a highlight of 1964 regulatory and control work.

The department said other bright spots in progress in regulatory and control programs for 1964 include headway against animal diseases, increased meat inspection activity, and a new dosage technique for insect control.

The department boasted proudly that federal regulations for pesticides were strengthened to provide greater protection to consumers. The changes require that key warning and caution statements be displayed on the front panel of pesticide labels, restrict safety claim usage on labels, and required labels to bear government registration numbers.

The revised regulations also provide for submission of additional toxicity data on pesticides by manufacturers and strengthen safety requirements in tests of new compounds. "Protest registration" has been eliminated. Heretofore, "protest registration" had been used by some manufacturers to sell pesticides after failing to refund agriculture department registration on them.

Using malathion, the department's agricultural research service scientists developed a low-volume technique in plant pest control programs. The technique showed that the chemical was more effective at lower dosages when applied undiluted by water, oil, or other diluents. The low-volume technique cuts the amount of material (insecticide plus diluent) needed to control boll weevils, grasshoppers and cereal leaf beetles.

The department said campaigns to eradicate specific animal diseases continued to show encouraging results in 1964.

Vermont became the first state officially free of hog cholera. Outbreaks of hog cholera decreased nationally by 29 per cent from outbreaks in 1963. Utah became the first major beef-producing state to achieve eradication of cattle brucellosis. This disease, known as undulant fever to humans, now has been eradicated from 326 counties in 26 states.

The department said the campaign to eradicate the screwworm from the southwest continued to show good results in 1964. During the first half of 1964 there were only 104 cases of screwworm-infested animals reported during the same period in 1963, more than 1,800 cases were reported. In 1962, there were more than 23,000 cases reported in a half year.

Progress also was made in eliminating sheep scabies and tuberculosis in cattle.

The department said 89 meat-packing and processing plants in 30 cities and towns asked for federal inspection of meat and meat products in fiscal 1964. They joined 1,590 other establishments in 672 cities and towns. Federal inspection is mandatory for meat being shipped interstate.

**Efficiency Study Shows Runoff Losses in Water**

UNIVERSITY OF IDAHO, Moscow, Jan. 8 — A five-year study of irrigation efficiency on a southern Idaho irrigation project showed that approximately 30 per cent of the water delivered was lost in field runoff.

Results of the research by three Idaho agricultural scientists are published in a University of Idaho college of agriculture bulletin.

Conducting the study on 4,840 acres of the 76,800-acre Mindoka project were C. L. Tyler, former assistant irrigator, Idaho agricultural experiment station, presently with the U.S. soil conservation service, Rupert; Gilbert L. Corey, university professor of agricultural engineering, and L. R. Swarner, agricultural engineer with the bureau of reclamation, Boise.

The authors state that knowledge of irrigation requirements is essential to new irrigation project planning. When the study began in 1957, two questions were outlined for answers: What are the existing farm application efficiencies on an irrigation project, and what are water requirements for an irrigation project?

In summarizing the study, the researchers explain that irrigation efficiency ranged from 42 per cent in 1958 to 54.8 per cent in 1961, making an average of 49.0 per cent. Efficiency refers to the ratio of water consumptively used to that applied.

An attempt was made to correlate irrigation efficiency with measured variables. An average of 3.18 acre-feet of water was delivered to each crop acre.

Crops used an average of 1.57 acre-feet; run-off averaged 50 acre-feet. An average of 1.02 acre-feet per cropped acre was unaccounted for and considered lost in deep percolation, conveyance and late fall irrigations.

However, thoroughness of the study was, the authors emphasized that many items not measured must be considered before irrigation efficiency can be predicted with any degree of accuracy.

**Cooperative Money Total Increases**

WASHINGTON, Jan. 8 — Farmers increased the dollar volume of their cooperatives more than six per cent in one year, according to latest available figures. Total business volume of 183 billion dollars was registered by marketing, purchasing and related service cooperatives in fiscal year 1963, the U.S. department of agriculture reported in December.

Dairy, grain and livestock products led in value of products marketed, with Minnesota, Wisconsin and Iowa accounting for three states in total number of cooperatives. First-ranked dairy product marketings—at 3.5 billion dollars—showed a 2.1 per cent increase over the previous fiscal year and gained 81 per cent over 1950-51 totals.

During the reporting year, 1,490 cooperatives handling dairy products represented 32 per cent of the total business volume of farmer cooperative marketings.

Total number of cooperatives rose to 8,507, a decrease of 1.5 per cent from the previous fiscal year. Total number of cooperative memberships, however, increased 1.7 per cent to 7.2 million, including farmers who belonged to more than one cooperative.

Of the total, 5,502 cooperatives primarily marketed farm products; 3,211 handled farm supplies; and 194 performed related services such as trucking and storing.

**Unit Estimates World Hops Crop**

WASHINGTON, Jan. 8 (UPI) — The foreign agricultural service estimated the 1964 world hops crop at 194.5 million pounds.

Hops are used in the production of beer. The estimated world hopping rate for beer is 0.45 pound-per-barrel.

FAO estimates a total 1964 world brewery requirements of 189 million pounds of hops in the production of an anticipated 400 million barrels of beer. Each barrel contains 31 gallons.

FAO predicted the 1965 world beer production would be more than 450 million barrels, thereby necessitating a world hops supply of some 195 million pounds.

**Index of Prices Registers Gain**

WASHINGTON, Jan. 8 — The index of prices received by Idaho farmers which had declined for two consecutive months rose to 239 per cent of its 1910-14 average during the month ended Dec. 15, reports the USDA crop reporting service.

The all crops index continued to improve during the month and the livestock and livestock products index which had dropped substantially during the past two months also showed slight improvement.

The all crops index at 215 per cent showed a 10 point improvement over a month earlier and a three point improvement over a year ago. Average prices received were higher for all commodities in the index except wheat, apples and alfalfa seed which were lower and oats which was unchanged.

**CHEESE PURCHASED**

WASHINGTON, Jan. 8 — Purchase of just under two million pounds of pasteurized process cheddar cheese was reported by the U.S. department of agriculture in late December.

**LIST ANNOUNCED**

WASHINGTON, Jan. 8 (UPI) — The agriculture department's listed foods list for February is headed by red tart cherries and includes apples, canned pipe organs, prunes, eggs, broiler-fryers and split peas.

**Jaycees Start Program to Pick "Outstanding Farmer"**

Twin Falls Junior Chamber of Commerce members are looking for an Outstanding Young Farmer for Twin Falls county. The local Jaycee organization is going to participate in a national Jaycee program where four winners are picked across the nation.

According to Darrell Sweet, local OYF chairman, "there is no reason why we can't find a Twin Falls county farmer worthy of national and state competition."

The local club decided this year to participate in the national program, which is co-sponsored by the National Junior Chamber of Commerce and the National LP Gas association. The local contest will be sponsored by local LP Gas companies.

The OYF county winner will be announced along with the distinguished service award and the outstanding boss award event which is held locally each year in Twin Falls.

The OYF program will be added to the regular schedule of the evening.

Sweet said the Twin Falls county agent, the county Farm Bureau and the Granges have been notified of the contest and the groups are seeking nominees. He solicited entries from Twin Falls county farmers. The participants must be between the ages of 21 and 35.

The participants must have records verifying their farming operation. They must show work in soil improvement, erosion control, water management, and reforestation, woodland improvement, wildlife and recreational land uses.

All information gathered on the contestants concerning the farming operation is confidential, and is for the judges' information only.

Closing date for the contest is next Friday and the winner will be announced Jan. 20 at the annual Jaycee banquet.

Street parade participation in the program and those interested in participating or knowing of someone who would qualify should contact the Twin Falls Junior Chamber of Commerce.

**NFO to Hear Publisher Talk**

JEROME, Jan. 8 — "The Critical Financial Situation Facing the Southern Idaho Farmer," will be the topic of K. J. Robinson, publisher, Southern Idaho Examiner, Paul, who will speak at the Jerome county National Farmers' organization (NFO) meeting at 8 p.m. Friday in the Catholic parish hall, Jerome. A question and answer period will follow his talk.

An election of officers will be held at the end of the meeting. All farmers and interested people are invited to attend.

**ALLISON FEED MILL**

FILER CUSTOM SERVICE 326-4315

LOCALLY OWNED and OPERATED

FOR FAST SELLING RESULTS TRY TIMES-NEWS WANT ADS

**AUCTION SALE**

As I am quitting farming I will sell the following at public auction, located seven miles east of Jerome, Idaho, on highway 25 then 1 mile north and 3/4 mile east. Watch for markers.

**MONDAY, JAN. 11**

STARTING TIME: 11:00 A.M. LUNCH ON GROUNDS by SUGAR LOAF GRANGE

**TRACTORS**

1963 International 504 diesel tractor with less than 750 actual hours—Comfort cab

1953 International Super M tractor with double front end, good rubber and in A-1 shape—Comfort cab

1951 International tractor with double front end, good shape, good rubber and has a single wheel

**MACHINERY**

12-ft. IHC tandem disc No. 37, wheel carrier, seal bearings—like new, used very little

10 ft. IHC tandem disc, 20" blade—like new

IHC No. 39 roll over trail plow, 16" IHC 3 section spring tire harrow, 10 sections of IHC wood harrow, purchased in May

IHC mowing machine for H or M No. 24

IHC 6 row No. 401 bean cutter, blades were not used after sharpening

6 planter units, No. 185, with beet, bean and corn plates and has semi-automatic markers

6 row cultivator for H or M No. 669 IHC beet and bean cultivator—fits 504, 706, 806 or 606

2 sets of bars for cultivator

**OTHER MACHINERY**

10 ft. Kirchner scraper with hydraulic land plane

Towner Martin 7 ft. scraper

14 ft. PTO corrugate cleaner, heavy duty

Ezee Flow phosphate spreader

Western roller 12 ft. single cultipacker

7 ft. Chaffin ditcher

2 row Oliver spud digger

50 gal. capacity sprayer with hand gun and sprayer

Oliver 21 plow

Steel drag John Deere side rake

IHC two-row spud planter

Ford SKO bean cultivator

John Deere bean cutter, mounts on cultivator fits any John Deere

Rubber tire 16 ft. wagon & rack & has PTO drive

Hydraulic Ram

**TRUCKS PICKUP**

1957 Ford 1/2 ton pick up

1953 Chevrolet truck with big motor, 8 1/2 rubber and 13 1/2 ft. beef bed

1958 Ford truck, 2 speed axle, PTO with beat 1 bed and stock rack

Old 3/4 ton Chevrolet pick up, tires are all up

**Squeeze Chute**

Powder River squeeze chute 1 year old

2 Seal automatic hog loaders 6 and 4 hole

Bonnie flower wagon (Box wagon)

10x12 frame building to be sold & moved

Some new lumber suitable for carroll work

Several piles of posts & poles various sizes and lengths

Lots of syphon tubes 3/4" and 1"

Acetylene welder

Marquette welder — spring shanks

1,500 ft. of outside wire

Bolt bins, shop furnace, lots of shanks, cultivator tools, hog waterer, 156 gal. butane tank and burner

**Miscellaneous Lumber**

Wire—300 gal. overhead gas tank

Twenty years of accumulations

**STEEL GRAINERIES STRAW**

2 — 1,000 bushel round steel grainery

1 — 2,000 bushel round steel grainery

1,000 Bales of straw

**SHEEP SHED & PANELS**

12x50 sheep shed and canvas (2 yrs. old) complete with shed panels

**HOUSEHOLD GOODS**

There will be some household goods and one set of all steel kids swings.

**Buildings**

**FARM FOR SALE — NOT AT AUCTION**

520 Acres, two modern homes, four feet of water. For more details call. The owner, M. J. Smith, Burley, Idaho. Phone 678-6841.

**TERMS: CASH DAY OF SALE**

**M. J. "Matt" SMITH, Owner**

AUCTIONEERS: HAROLD KLAAS & JOE DUFFEK CLERK: DALE HOPPER

**4-H**

**AMERICA'S FARM FUTURE Depends On The Youth of Today!**

Will America still be the leading food producing nation of the World in future years?

The answer lies with the younger generation coming up today . . . How will we succeed in training and helping our youth now to learn and love the farm . . . the growing of crops and livestock . . . therein lies the answer of how America will stand as the food basket of the World when the next generation takes over.

**We Salute You,**

**FUTURE**

We owe much to our two farm youth organizations. The 4-H Clubs and the FFA in building the love of farm life into the youth of America today.

Let us salute these leaders of tomorrow today as they face the future well aware of the great responsibility that rests in their hands.

## Two Elected For Oakley Canal Board

OAKLEY, Jan. 8 — Thurlow Smith and Frank Speckman were elected to fill the vacancies at the annual meeting of the Oakley Canal company Tuesday afternoon at the company office.

The group discussed the possibilities of a ditcher being hired for Goose creek through the irrigation season to protect the water rights of the users in the Oakley valley.

Company officials reported that as of Tuesday, the Oakley reservoir showed a gauge height of 53.8 or 11,420 cubic feet compared with a gauge height of 55.77 acre feet.

The inflow for 1965 is 157.5 second feet or 24.25 second feet with a net gain since the close of the irrigation season of 7,535 acre feet compared with 5,346 acre feet for 1964.

Members of the soil conservation district, Burley, noted that the group discussed the measurement taken the first of the month showed an average depth of 21 inches with a six inch water content.

Howell canyon had a 63 inch average depth with 21 1/2 inch water content. The Boy Scout camp on Mount Independence had 45 inches average depth while the Vipert meadow had 41 inches on the level.

Both of these readings were taken by aerial survey and the water content is unknown at this time.

## Alfalfa Seed Production Decreases

BOISE, Jan. 8—Production of alfalfa seed in Idaho is estimated at 13,278,000 pounds according to the crop reporting service. Production at this level compares with 14,345,000 pounds in 1963 and the 1958-62 average of 12,491,000 pounds.

Alfalfa seed was harvested from 45,000 acres this year compared to 61,000 in 1963 and 38,000 for the five-year average.

Yield per acre in 1964 is placed at 295 pounds and compares with 245 in 1963 and the five-year average of 333 pounds.

The higher yields in 1964 as compared to 1963 are largely due to concentration of the seed acreage in the higher yielding areas as growers in lower yielding areas switched to other crops.

Cool and wet weather delayed cutting of first crop alfalfa hay. This delayed bloom of the seed crop and resulted in a late maturing crop.

In addition the wet weather favored weed growth in early cutting seed. Harvesting weather was generally favorable during the main harvest, although frost rendered some damage in eastern Idaho. Some very heavy cleaning losses occurred.

Red clover production in 1964 is estimated at 6,970,000 pounds compared to 4,550,000 pounds in 1963 and the five-year average of 5,256,000 pounds. Crover seed production in 1964 is estimated at 1,800 acres this year compared to 14,000 in 1963 and the 5-year average of 24,800.

Yield per acre is estimated at 365 pounds compared to 323 pounds a year ago and the average of 317 pounds.

Cool wet weather retarded first crop hay cutting which delayed blooming. While the crop generally matured late, 1964 was a good year for alfalfa. Harvesting weather was generally good during the main harvest.

White clover seed production is estimated at 3,675,000 pounds compared to the record high 1963 crop of 6,750,000 pounds and the 1958-62 average of 3,051,000 pounds. Growers harvested an estimated 15,000 acres compared to 24,500 in 1963 and 13,400 for the five-year average.

The cool wet weather in north Idaho—where the bulk of this crop is grown—delayed maturity but favored late blooming. Harvesting was delayed in most areas by wet weather. Some acreage was not harvested until after mid-October.

Yield per acre in 1964 at 245 pounds compares with 270 last year and the five-year average of 295 pounds.

The 1964 crop of alfalfa seed nationally is estimated at 142,373,000 pounds, 11 per cent below last year's crop of 160,388,000 pounds, but eight per cent above average. Harvested acreage was down 25 per cent from a year earlier, but the yield reached a record high of 200 pounds per acre, 30 pounds above last year.

Following the sharp decline in production last year, 15 of the 31 states harvested seed from fewer acres in 1964. The record yield resulted from the concentration of acreage in the high yielding Western States as a majority of the States had lower average yields than in 1963.

1964 production of red clover seed is estimated at 74,354,000 pounds, seven per cent below the 1963 and two per cent above the average. There were 806,200 acres harvested for seed, seven per cent less than in 1963, and the lowest since 1957. At 97 pounds per acre, this year's yield was a record high.

Continued dry weather had a major effect in reducing acreage for harvest in areas where hay was in short supply only the best acreage was harvested.

Yield in all but three states equalled or exceeded 1963 yields.

The 1964 production of white clover seed is estimated at 4,993,000 pounds, 34 per cent less than the 1963 crop, but 13 per cent above the average.

## Idaho Cattlemen's Group Pays Reward for Rustling

BOISE, Jan. 8 — The Idaho Cattlemen's association paid its second reward in a month for conviction of two cattle rustlers in Eastern Idaho.

IGA Director Ralph Steele presented the \$100 reward check to Rex Holden, Dubois, for notifying the sheriff of suspicious blood on the hands and clothes of the two convicted rustlers, Laverne E. Bochert and Ronald Rose.

CHAM COUNTY SHERIFF REX HOLDEN and IGA Director Ralph Steele, Boise, and Rex Holden, Dubois, and Laverne E. Bochert and Ronald Rose, Boise, were seen at the reward ceremony.

Holden and Steele, who were seen at the reward ceremony, were seen at the reward ceremony.

## Extensionist Says Trend Is to Dwarf Fruit Trees

BY TONY HORN  
University of Idaho extension horticulturist

Not only in back yards, but in commercial orchards the trend is toward smaller apple trees. Why in the back yard, it is because the trees take up less space, are easier to spray, prune, and thin, and because it comes into production sooner.

The commercial orchardist looks to dwarf trees because of the following advantages:

—By growing more and smaller trees per acre, the yield per acre can be doubled;

—There is more extra-fancy fruit per tree;

—The dwarfs come into production two to five years before the standards; and it is easier and cheaper to spray, prune, thin, and harvest the fruit.

Growers like the idea of picking from the ground and with short ladders.

There are also disadvantages. Because their fruit is close to the ground, dwarf trees are more susceptible to injury from late spring frosts. In many orchards standard-tree blossoms on lower branches are frosted while the tops escape injury.

Generally speaking, the more dwarfing the rootstock, the weaker the root system. Dwarf trees require more frequent irrigation than standard trees because of the smaller root system. They need more care. Cost of the trees is greater and since more trees are planted per acre, the initial cost of the trees is high. Staking is an added cost.

Some of the dwarfing stocks are tender at high altitudes, as for example, Malling IX. But it appears hardy enough for most of our orchards. Pruning is different on the dwarfs. In general, we can say prune them to the central leader system.

The size-controlling rootstocks came from Europe. The East Malling IX rootstock is fully dwarfing. It makes a tree about seven feet tall. The Malling VII and Merton Malling 106 restrict a tree to the size of a peach tree, half the size of a standard apple tree or 12-foot high. The Malling II and Merton Malling 104 will produce a tree about 1/2 the size of a standard tree.

Trees on Malling IX can be planted 3 by 15 feet which results in 363 trees per acre. Spacing depends a lot on the grower. We must decide now many trees he wants per acre.

According to experiments, trees cannot be permanently dwarfed by removal of a complete two-inch ring of bark from the trunk of a one-year-old apple tree and replacing the bark upside down. It does restrict vegetative growth, but this is temporary.

Interstem pieces of Malling IX and Malling VII have been used to dwarf trees. There are many Clark dwarf trees back yards. Orchards of these trees have not been generally successful. A longer interstem piece is more dwarfing than a short piece.

In planting dwarf trees, the rootstock union should not be below the ground level because rooting will occur from the variety.

## Official Eyes Many Changes

MIAMI BEACH, Jan. 8—The prospect of a continuing and perhaps even an accelerated period of change within agriculture was predicted here by a national farm credit official—Glenn O. Browne, deputy governor and director of farm credit service for the farm credit administration.

Here to address a conference of directors of the nation's 37 farm credit banks, through which farmers and their cooperatives borrow six billion dollars a year, Browne told the directors:

"While we have seen many changes within agriculture in the recent past, our greatest changes may still lie ahead."

Current conditions, he said, have wide implications for lenders, such as the land banks, and he urged credit officials to "be alert to the opportunities for constructive change."

## PROTECTION EXPANDED WASHINGTON, Jan. 8—Mexican territory protection was to be extended to Hawaii, Puerto Rico, the Virgin Islands, and Guam, and additional protection afforded to Louisiana parish, under an amendment to federal quarantine regulations proposed in late December by the U. S. department of agriculture.

## Agriculture Engineers Knock Theory Concerning Hogs and Perspiration

CHICAGO, Jan. 8 — Another popular belief—that hogs do not perspire—has been exploded by agricultural engineers.

F. E. Beckett, professor of agricultural engineering at Louisiana Polytechnic Institute, Ruston, La., told the 1964 winter meeting of the American Society of Agricultural Engineers that results of his research indicate that contrary to common belief, hogs have an appreciable amount of moisture through the skin.

"Although perspiration from a hog is much less than that from a man under similar conditions, it cannot be ignored in heat-balance calculations," Beckett said. "Evidently the reason that a hog's skin is never wet from perspiration is that even under the most adverse conditions the small amount of moisture perspired is easily evaporated."

A 350-pound Landrace sow was used for the study which showed that hogs do perspire. A bag of silica gel was weighed and placed in a box lined with aluminum foil and sealed to the surface of the sow with adhesive tape. After a period of time the box was removed and the silica gel weighed again. The difference in "before and after" weight indicated the amount of moisture given off by the hog's covered skin.

The studies were conducted on three days, with the sow both resting inside a building and resting about outside. As a check, the same procedure was carried out on a GIBBS surface and on the forearm of a man.

Beckett's studies on hog perspiration were part of his research to develop an index of the effects of temperature and humidity on swine, and to find "a wine effective temperature." The index developed is somewhat similar to the U.S. weather bureau's temperature humidity index for humans (sometimes called the "Discomfort Index") and apparently with hogs, as with humans, "it isn't the heat, it's the humidity."

"Humidity affects hogs in somewhat the same way that it affects humans," the Louisiana agricultural engineering professor said. "Hogs become increasingly uncomfortable as humidity increases." He found, however, that relative humidity had little effect at 80 degrees, but above 90 degrees, the effect was pronounced.

For example, at a temperature of 86 degrees, with a relative humidity of 30 per cent, hogs weighing over 200 pounds survived for long periods but lost weight. When humidity was increased to 94 per cent the experiment was stopped because the hogs suffered extreme heat stress.

Young pigs present another problem, as they require warmer and more constant environmental temperatures than the sow. A. F. Butchaker, assistant professor of agricultural engineering at North Dakota State University, Fargo, and Milton J. Shanklin, professor of agricultural engineering at the University of Missouri, Columbia, told the same session on farm structures at ASAE that "individual newborn pigs cannot maintain constant body temperatures below 75 degrees without supplemental heat, despite a well developed shiver mechanism."

The study on which they reported indicates that newborn pigs have difficulty in maintaining constant body tempera-

## Tax Meet Set

Income tax and estate planning will be the subject of an all-day meeting for farmers in Jan. 14. The meeting will begin at 10 a.m. at the Rogers Hotel Round-up room with Virgil Kennedy, extension farm management specialist, conducting the meeting.

A no host luncheon will be held at noon and farmers who prepare their own tax returns or keep records for tax purposes are invited to attend the session, said Twin Falls county agent Donald Youtz.

## Report Is Given On Tumbleweeds

HAGERMAN, Jan. 8 — Mrs. William Scruggs reported on converting tumbleweeds to cattle feed at a meeting of the Hagerman Grange Monday night in the Grange hall.

She said Ira McKinley, Duff, N. M., author of the article in the magazine, "Furor," said the protein content in the tumbleweeds rates 17 per cent. By using a hammer mill and pulverizing the weed and adding moisture, one has cheap feed, she reported.

Mrs. Scruggs conducted a quiz game and Ted Hell reported the home economics committee will meet to make up the yearbook.

Mrs. Stacey Foskovec and Mrs. Way Cook served refreshments. The next Grange meeting will be Jan. 18.

constant body temperature despite fluctuations in environmental temperature.

Knowledge of how the temperature regulating mechanisms develop in young pigs and how they adapt to the temperature of their environment as they grow older "may ultimately lead to a reduction in farrowing losses and an improvement in growth rate by providing the optimum environment to newborn pigs," they forecast.

# Weather Conditions Will Govern Success of Area "Bonus" Hunting Season

Although goose hunting is definitely over and most of the U.S. duck season has closed, Magic Valley hunters may be just beginning the best mallard harvest in several years. Despite a rather wide-spread movement of ducks out of Idaho during December, Charles Blake, district bird biologist for the Idaho fish and game department, said only a little toughening of weather conditions is needed to make

## Namath Will Start Despite Knee Injury

MOBILE, Ala., Jan. 8 (AP)—Joe Namath, who owns the highest priced arm in the history of football, has done so well in practice this week that he will start for the South in the Senior bowl Saturday despite a knee injury that limits his movements. Coach Tom Landry told a civic club Thursday that he had changed his mind and would go with the Alabama star instead of Steve Tenet of Florida State. Landry had said before he would use Namath only in spot situations.

## Gilmer Hired As New Coach By Detroit

DETROIT, Jan. 8 (AP)—The Detroit Lions got a new coach Thursday — one-time passing wizard Harry Gilmer of Alabama and more recently a National Football league player and assistant coach.

The Lions, whose coaching ranks were wiped out last month in firings and head coach George Wilson's subsequent angry resignation, took Gilmer away from the rival Minnesota Vikings of the NFL.

Gilmer, 38, a quarterback for the Lions in 1955 and 1956, has been top aide to Coach Norm Van Brocklin at Minnesota.

The Vikings didn't object greatly to Detroit's action. Van Brocklin congratulated the Lions and Gilmer, though deploring the Vikings' loss, and wished Gilmer well.

Owner William Clay Ford made the Lions' announcement of Gilmer's signing.

Gilmer accepted a three-year contract, Ford said. Its terms were not made public.

When Wilson quit the Lions, after seven years, he gave up a contract reportedly paying him about \$47,000 a year. The contract had a year to go.

For the past two seasons he pleased to get Gilmer, record-setting passing star of the 1940s for Alabama's Crimson Tide and bowl games hero. He played in the NFL with Washington, Detroit and Pittsburgh before joining the Vikings as Van Brocklin's aide.

## Faux Remains Unbeaten in City League

Undeclared Faux Cigar Store, Bum, picked up 44-0 fourth straight win in the Twin Falls city adult basketball league Thursday night by whipping Cappella's Texaco 45-36.

Dave Erickson paced with 11 points but gave up scoring honors to Texaco's Mike Gray with 18.

Mildon's evened up its record at 2-2 by defeating the winless Twin Falls Recreation department 41-35. Don Walkup got 14 for the winners, Larry Anderson 13 for the losers.

The league standings include:

A Division			
Faux Cigar Store	4	0	0
Westcott Oil	3	1	0
Valley Napping Home	3	1	0
Samuel's Texaco	0	4	0
Dean's Richfield	0	4	0
Stradley's	0	4	0
B Division			
Times-News	2	1	0
Miner's	2	1	0
Sapphire Lounge	0	2	0
Recreation Dept.	0	2	0

## Coach Quits

HONOLULU, Jan. 8 (AP)—Len Casanova, co-coach of the North team in the Hula bowl football classic Friday, has pulled out of the game. He was to leave for the mainland Friday night.

The reason for his quitting was reportedly over the use of Ika Grisham and Ralph Neely of Oklahoma who were recently banned from the Sooner's Gator Bowl team for signing pro contracts.

Grisham and Neely were also banned from the Hula Bowl, then reinstated. Casanova, Oregon's grid mentor, is president of the American Football Coaches' association.

## Pros Take, Give Ribbing In All-Star Bowl Social

LOS ANGELES, Jan. 8 (AP)—"Did those big ends bother you in the championship game?" The question went to Baltimore's quarterback, Johnny Unitas, in reference to the recent Colt-Cleveland Brown championship game in the National Football league.

## T. F. Slates Games With Buhl, Jerome

Twin Falls, holding a 6-1 record and rated fourth in the last state basketball poll, opens the new year at home Friday night by hosting the Buhl Indians but then starts a month of road trips by traveling to Jerome Saturday. Twin Falls will be seeking its second straight over Buhl, which

extended the Bruins before falling 53-50 in the season opener. It will be the first meeting with Jerome.

This is going to be a telling month for us," says coach Pat Ostyn. "We enter it in good shape with that 6-1 record but we're only going to be home once. We have eight games in that span and three of the teams are rated in the top five."

Coach Ostyn spent the holiday vacation stressing rebounding and free throw shooting. "We aren't the tallest team around but we've had the height advantage in several games. Still our rebounding totals don't indicate it. We have to get smarter on the boards," he said.

"As a team we're shooting only a little above 50 per cent from the foul line and that is inexcusable for as much time as we spend on it," said the coach whose teams at Shoshone and Filer set district free throw shooting records and last year led the SIC with 63 per cent. "We will be having a lot of close games and these will always be settled by the club that can make the clutch free throws."

Looking at the week-end Ostyn said "our primary target against Buhl will be trying to hold (Clark) Griffith. He's been scoring very well from the outside. Buhl gave us as much as we wanted in the opener and then knocked off Burley last (Wednesday) night so they are a capable club."

Jerome is quite similar to last year—it should be since it has almost everyone back with the

exception—they're a year more mature, wiser and stronger. They defend very well and have that good average height to test any team under the boards.

Ostyn pronounced his team in good shape. It is led by senior Kirk Williams, who is averaging 18.4 points per game but over 20 in his last three. "We need somebody to take the pressure off him," Ostyn pointed out. "He's got to be one of the most marked men around."

None of our other boys have scored consistently enough to keep opponents from focusing on Kirk.

Twin Falls is expected to start John Astorquia, George Smith, Paul Stover, Williams and Alan Brown with Ned Williams and Bill Johnson ready replacements.

## Parseghian Signs 5-Year Contract

SOUTH BEND, Ind., Jan. 8 (AP)—Ara Parseghian signed a new five-year contract as football coach at Notre Dame Thursday. It replaced his year-old contract covering a four-year span.

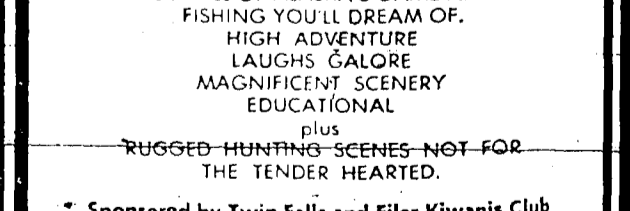

If there were other changes in Parseghian's contract besides a two-year extension of tenure, they were not disclosed.

Parseghian, former Northwestern university coach, signed in December of 1963 as Notre Dame's third football coach.

"This past season the Irish chalked up nine victories and one defeat, and Parseghian was named coach of the year by the Football Writers Association of America."

## Utags Stun Utah 86-84 on Goal in Last 17 Seconds

SALT LAKE CITY, Jan. 8 (UPI) — Guard Leroy Walker hit a jump shot with 17 seconds remaining in the game Thursday night to give Utah State an 86-84 upset victory over the University of Utah. Walker, who hit a career high of 33 points, teamed with burly Wayne Estes to lead a dramatic second half rally that produced the pulsating triumph.

Estes, the nation's number two leading scorer, chipped in 32 points. Between the two of them, they scored all but nine of Utah State's points in the second half. Skip Kroeger took a shot at the final buzzer which spun around the rim and dropped out as Utah made a valiant effort to tie the game.

It was a great triumph for the Logan team which was down 14 points at one time in the contest, hitting 57 per cent of its shots in the first half, rolled to a 46-35 halftime lead.

The Aggies pecked away at the Utah lead and finally caught them with 11:42 remaining when Walker stole a pass and scored on a layup to tie the count at 60-60.

From that point on, the two teams traded basket for basket with Jerry Chambers giving Utah a slight edge in the closing minutes until Estes hit a field goal followed with a free throw to tie the score with two minutes left.

At that point, both teams went for the special play for the game winning shot with Walker's field goal the only points in the final 30 minutes.

Chambers was Utah's leading scorer with 28. Granny Lash followed with 20 and George Fisher had 15.

The loss was Utah's first at home this season and only the second setback in 12 games for the nationally ranked Redskins. Utah State boosted its record to 14-4.

## Outside Help Won't Settle Track Dispute

CHICAGO, Jan. 8 (AP) — The executive director of the National Collegiate Athletic Association minimized Thursday the importance of announced backing by the International Amateur Athletic Federation of the U.S. Amateur Athletic Union.

On the eve of the NCAA's annual convention, Walter Byers said the IAAF's statement, made in London Wednesday, failed to alter "the situation."

This was reference to the long dispute between the NCAA-backed sports federation movements and the AAU for control of amateur athletics.

"My only comment is that a similar statement has been made by the IAAF in the past and I see nothing new here that alters the situation at all," said Byers.

"This dispute is an internal matter to be settled within the United States. It should be emphasized that the cooperative sanctioning issue has nothing to do with any international rule."

The NCAA convention, formally beginning Monday, is scheduled to consider an amendment proposing strong penalties to back the U.S. Track and Field Federation's bid for at least a share of sanctioning control of major competitions.

The issue probably will come to a head next Wednesday, further spiced by a proposal by the Eastern College Athletic conference for a national track and field coalition under which the AAU would hold its "zealously guarded" right of international sanctioning.

## Deadlock Hits Lane-Finley Money Suit

CHICAGO, Jan. 8 (AP) — Frank Lane's \$14,000 breach of contract suit against Charles O. Finley, owner of the Kansas City Royals, wound up in a closed federal court chamber deadlock Thursday.

The session to discuss Lane's suit for salaries he claims he should have been paid after he was dismissed as general manager of the A's resulted in a three-day, no-decision conference in the chamber of Judge James E. Parsons.

Two of baseball's most talkative personalities, Lane and Finley, emerged from Thursday's session virtually speechless.

"No comment," Finley said. "I was just a listener," said Lane. "This is the new Frank Lane," he added.

After hearing Finley's "no comment" remark, Lane blurted: "It's the new Charles Finley, is it?"

"We just shot the breeze and aren't come close to anything," Lane said.

Just before they left the courtroom, Lane joked that "Charles won't eat with me tonight. He's had it."

Earlier, attorneys for both sides said "legal fine points" were discussed.

## Collier Says West Can't Beat East

LOS ANGELES, Jan. 8 (AP) — Each Blanton Collier expressed great mystification Thursday over a routism bestowed on the West by the East team in the National Football League Pro Bowl Sunday.

His opposite number, young Shula, said he would prefer to change positions and go into the 15th annual postseason all-star game as the underdog.

Collier, speaking with Shula at a Pro Bowl luncheon, referred to the fact that his Cleveland Browns trounced Shula's Baltimore Colts for the NFL championship game, 27-0.

Collier has the nucleus of his team here, notably quarterback Frank Ryan and fullback Jim Brown.

Shula has several of his stars on hand, too, including quarterback Johnny Unitas and halfback Lenny Moore.

"I realize we are the underdog," said Collier, "but I don't know how they arrived at the odds of five to seven points. I think neither team should be favored."

"I'd much rather change positions after what happened in the championship game," said Collier.

## Torrid Bullets Smash Pistons

BALTIMORE, Jan. 8 (AP) — Kevin Loughery scored 31 points, high for his professional career, and led the streaking Baltimore Bullets to a 110-106 victory over the Detroit Pistons Thursday night.

Loughery sank 12 of 21 shots from the floor and was credited with 10 assists and eight rebounds from his backcourt position.

High individual game, Jack Duran, 244; high individual series, Jackie Duran, 887; high scratch team game, Title and Trust, 805; high handicap team game, Hertz, 847; high handicap team series, Title and Trust, 3705; high scratch team series, Title and Trust, 22128.

Bowler of the week with a 483 was Pat Williams.

## Changes

Two changes in schedules for next week's games were announced Thursday afternoon.

The Richtfield - Castleford game, originally slated for Jan. 23, has been moved up to Jan. 12 and will be played at Castleford. Another Tuesday game, Hansen and Murtaugh, has been shifted to Hansen with the return match, Feb. 5, slated for Murtaugh. The latter change was caused when the new Murtaugh gymnasium was not completed on time.

## Mtn. Home Nips Bruin Matmen 23-22

Mountain Home's Tigers built up a big lead in the middle divisions Thursday night and then withstood a late bid by the Twin Falls Bruins to claim a 23-22 wrestling victory. It was the second time Mountain Home defeated Twin Falls by a single point.

The difference came when Dave Campbell, Rich Fisher and Rich Boesiger racked up three straight pins to give the Tigers an 18-8 lead. Twin Falls won the last four matches but couldn't get the pin required to overcome the one-point deficit.

Results of the matches, Twin Falls men listed first, include: 98 pounds, Brent Jacobson was decided by Phil Graflet 9-8; 108 pounds, Jim Braun pinned Tom Wood; 115 pounds, Mike Ford decided Dennis Edson 9-4; 123 pounds, Tony Steckline was pinned by Dave Campbell; 130 pounds, Roger Emmons was pinned by Rich Fisher; 136 pounds, Mike Greer was pinned by Rich Boesiger; 143 pounds, Jim Lichlitter tied John Sharp; 148 pounds, Terry Ruhter was decided by Rick Kelly 6-4; 156 pounds, Ed Williams decided Tom Kelly 9-5; 165 pounds, Reed Williams decided Larry Covey 4-3; 183 pounds, George-McAdams decided Jim Lemmon 5-1, and heavyweight, Mike Baird decided Charles Stump 5-1.

## Barry, Estes Are One-Two In Scoring

NEW YORK, Jan. 8 (AP) — Rick Barry, Miami of Florida's 6-foot, 7-inch star, has increased his lead in the major college basketball individual scoring race and Duke's Blue Devils have taken over first place among the teams.

Latest statistics compiled by the NCAA service bureau were released Thursday.

Barry scored 79 points in two games during the Hurricane classic last week, raising his average to 36.9 points for 10 games. This is 4.1 points a game higher than runner-up Wayne Estes of Utah State.

Estes, with a 32.8 mark, is followed by Steve Thomas of Xavier of Ohio 32.0, Dave Schellhase of Purdue 31.7 and Princeton's Bill Bradley, 30.4.

Tommy Woods of East Tennessee State took over the top spot in rebounds with a 23.7 average and Len Schnappert of Manhattan leads in free throw percentage with .923. Dayton's Henry Finkel is first in field goal accuracy, hitting on 64.2 per cent of his shots.

Duke streaked into the lead among the teams on the strength of a 121-88 rout of Penn State. The Blue Devils are scoring at a 98.8 points a game pace. Brigham Young is second with 96.0, followed by Notre Dame 95.5.

## \$450,300 Paid For 33 Horses

LEXINGTON, Ky., Jan. 8 (AP) — Stoner Creek Stud sold 33 thoroughbreds for \$450,300 Thursday night at Keeneland's winter sale of horses of all ages.

Stoner Creek sold 14 mares in foal, nine barren mares and 10 young yearlings for an average of \$13,645.

Top price of the consignment and the evening was \$40,000—the same as the best bid of the afternoon session. The sales end Friday.

## COWBOYS SIGN FAIR

DALLAS, Jan. 8 — End Doug McDougal of Oregon State, 18th round pick in the draft, and 157 pounds, Randy Butler, lined up at center, and Jerry Givens, 180 pounds, drafted a year ago as a future prospect, were signed Thursday by the Dallas Cowboys of the National Football League.

## Nips Filer In Wrestling

FILER, Jan. 8 — Wood River took five pins to four, by the Filer Wildcats Thursday night and used that two-point advantage to claim a 28-26 wrestling victory.

Filer now looks forward to two matches next week, traveling to Buhl Monday night and then moving into Twin Falls Thursday.

Results of the Wood River matches, Filer men listed first, include:

98 pounds, Brooks Graves was pinned by David Byington; 108 pounds, Mike Hadley pinned Ben McCoy; 113 pounds, Kent Henstock was pinned by Doyle Byington; 123 pounds, Lee Olson defeated Mike Davis; 130 pounds, Walt Taylor pinned Bill Schumteger; 136 pounds, Mark DeLuca was pinned by Fred Gray; 141 pounds, Steve Paylor was pinned by Ted McCoy; 148 pounds, John Allen pinned Ed Richard; Wardner, 157 pounds, Steve Ward was decided by Steve Rayborn; 168 pounds, Russ Deiton decided Rex Dorius; 183 pounds, Glenn Fisher was pinned by Fred Bradshaw, and heavyweight Pat Touchette pinned Tom Fico.

## Brodie Wants More Pay Than Rookie

HOLLYWOOD, Jan. 8 (AP) — Quarterback John Brodie of the San Francisco 49ers said Thursday a regular player in the pro football leagues is "silly" to work for less money than a rookie playing behind him.

Brodie experienced this problem when Georgia Mira of the University of Miami was hired by the 49ers at the start of last season for a reported \$100,000 three-year contract.

"I asked Lou Spaldin (San Francisco general manager) who was going to be the No. 1 quarterback," Brodie said. "He said I was. I then told him I expected to be paid more money than Mira."

"Yes, I got it. Until I'm beaten out, I expect more. Any regular is silly if he doesn't demand more than some rookie behind him is getting."

Brodie said Joe Namath, the Alabama quarterback who signed with the New York Jets of the American Football league for a reported \$300,000 in salary and bonuses for three years, was "fortunate in joining a club that is counting on him to win for them immediately."

"In the National Football league, with established quarterbacks' status of being worth so much," Brodie said, "But Brodie doesn't resent the fact contracts rookies are getting."

"I don't begrudge Mira anything," he said. "He's a real fine fellow and a fine athlete."

## Pascual and Twins Hit Salary Snag

ST. PAUL, MINNEAPOLIS, Jan. 8 (AP) — Minnesota Twins pitcher Camillo Pascual is in another contract dispute with owner Calvin Griffith, this time over what Griffith called a "pretty good cut" in salary.

The Cuban right-hander got an estimated \$46,500 last season, when he had a 15-17 record.

Pascual came out of a meeting with Griffith Thursday saying he got nowhere in their talks.

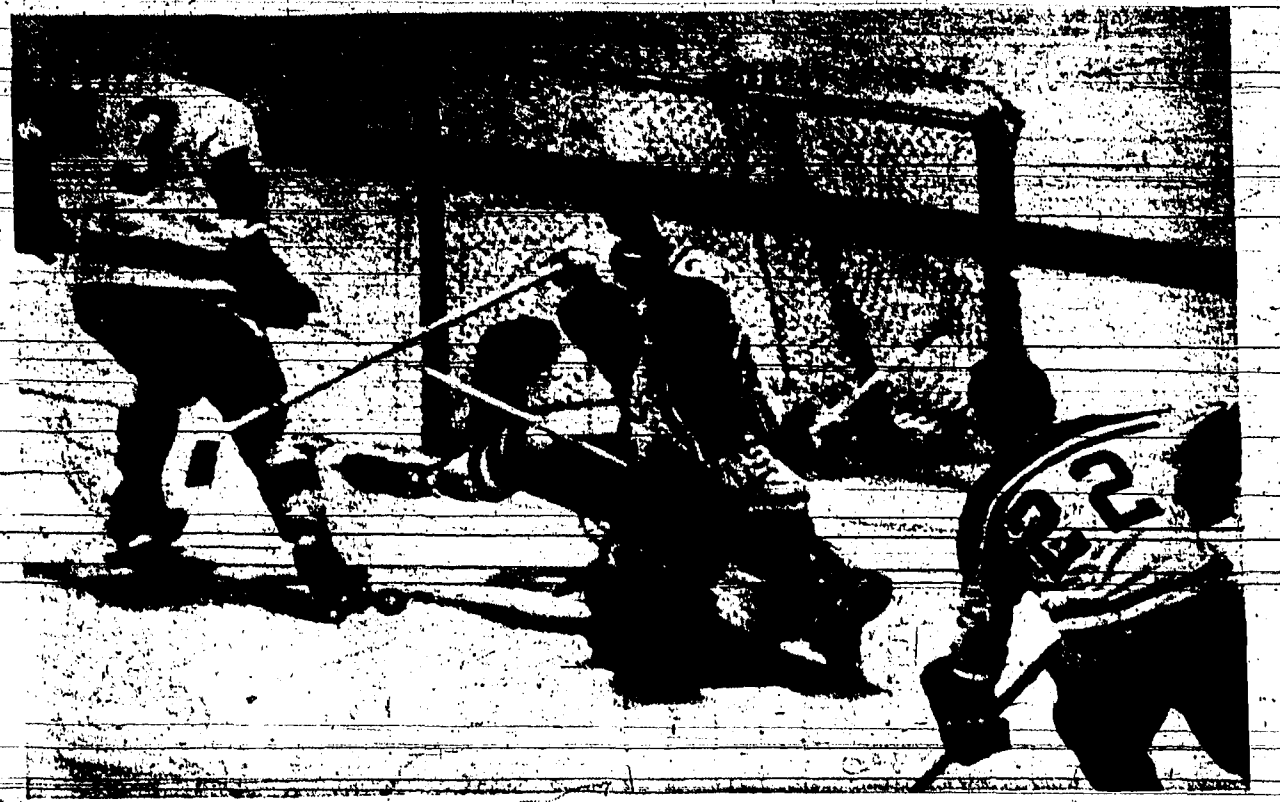

"Pascual is not going to receive what he got last season," said Griffith. "His record was not much better than '50."

Said Pascual: "I don't feel I should take a cut. I won 15 games and pitched well enough to win 20. I struck out more batters than usual—213 against 202 in 1963. I was second in the league in completed games with 14 and lost seven by errors three times we lost leads after I was taken out in late innings."

Griffith reminded that Pascual walked 88 batters compared to 81 in 1963 and added "a pitcher must pitch his way out of trouble after errors."

Pascual, highest-paid Twin pitcher, was a holdout in the spring of 1962 and briefly last year.

Griffith said player contracts this year offer raises to only a few and salary cuts to a number. The Twins dropped from third place in the American league in 1963 to sixth last season.

SAVING A GOAL the hard way, defenseman Reg Fleming (19) falls over Bruin goalie Ed Johnson in stopping a shot off the stick of Marcel Pronovost (3) of the Detroit Red Wings Thursday night. Coming in on the play is Bill Kuthbs (22) of the Bruins. Boston went on to claim a 5-2 victory. (AP wirephoto)

## Braves Sell Only 36 Season Tickets

MILWAUKEE, Jan. 8 (AP) — The Milwaukee Braves have received orders for 36 season tickets so far for their lame duck season in Milwaukee. Ralph DeForge, the club's secretary, said Thursday: A year ago, more than 3,000 tickets had been sold by this time.

DeForge, who heads the Milwaukee office operation in this last season before the Braves move to Atlanta, said the club would wait "for an expression of interest on the part of the public" before deciding whether to launch any ticket selling program.

## Griffith Reminded

Griffith reminded that Pascual walked 88 batters compared to 81 in 1963 and added "a pitcher must pitch his way out of trouble after errors."

## WHY DO MORE PEOPLE BUY At Union Motors WITH FULL CONFIDENCE

IF THE AUTO DEALER'S REPUTATION is important to you... then Union Motors is the place to buy your cars. No amount of "big deal" or "low price" can make up for purchases that go sour when failing to back up a car once it has been sold. We consider our long established reputation for fair, honest dealing as our most priceless asset and refuse to jeopardize it by entering into any "deal" that could easily go sour. It is important to us that each of our friends and customers continue to think highly of our business practices.

- '63 VOLKS 2-door Huge savings on this nearly new car.
