

## Survey on War In Viet Nam Is Started By Aide

SAIGON, March 5 (UPI)—Gen. Harold K. Johnson, U. S. army chief of staff, began an extensive survey of the American-supported war against communism in Viet Nam, Johnson's arrival in Saigon coincided with the arrival of a bold daylight attack yesterday by communist forces against American and South Vietnamese troops in the jungles along the Laotian border. One U. S. army special forces soldier was killed and four other Americans wounded in the Viet Cong assault on 25 miles northeast of Saigon. A sixth American was wounded in a clash with guerrillas 25 miles south of the capital. Johnson termed his visit "a complete inspection trip" prompted by the recent upheaval in the south Vietnamese military. In giving the order of Lieut. Gen. Stephen Khanh as commander-in-chief, Johnson told newsmen at Saigon airport he wanted "to see how things are matching up changes in the command structure." The general was accompanied by Carl Rowan, director of the U. S. information agency.

## Negro Loses Move to Get Out of Jail

NEW YORK, March 5 (UPI)—Norman 3X Butler, a Black Muslim "enforcer" charged with homicide in the slaying of Malcolm X, lost a legal move yesterday to get out of jail on a writ of habeas corpus.

Butler's lawyer, John Williams, argued, before supreme court Justice John Mullen that his client had never been linked by testimony or witnesses to the assassination of Malcolm and should therefore be granted his freedom.

Butler, 28, was brought into court under maximum security guard, ostensibly to prevent possible retaliation by followers of Malcolm who have sworn to avenge their leader's death.

Extreme precautions also were taken earlier yesterday when a third Negro suspect in the slaying faced arraignment in criminal court.

He was Thomas 15X Johnson, 30, a Muslim strongman man who was arrested at his home Wednesday. The first suspect arrested in the slaying, Talmadge Hayer, 22, was captured near the scene of the killing after he had been wounded in the leg, allegedly by a Malcolm X bodyguard.

## U.S. Closes Libraries In Indonesia

WASHINGTON, March 5 (UPI)—The United States announced yesterday it is closing immediately all U.S. information agency (USIA) libraries and reading rooms in Indonesia. USIA personnel stationed there will be withdrawn.

The action followed new demonstrations and seizure of U.S. libraries in Jakarta and elsewhere by the Indonesian government in recent weeks.

U.S. officials said all other American information activities in Indonesia, including distribution of films and magazines, were being halted. U.S. Voice of America radio broadcasts to that country will continue, however.

The announcement was made in the name of USIA Director Carl T. Rowan. It said: "This is a decision that we take most reluctantly. These libraries have been a symbol of man's search for knowledge, and for the mutual understanding without which peace is difficult, if not impossible, to achieve."

"We have made it clear," he said, "that we regard book burnings and the banishing of films and musicians a step backwards."

## Supreme Court Upholds Ruling In Cassia Case

BOISE, March 5 (UPI)—The supreme court upheld Friday a ruling by district court in Cassia county in an estate case.

The lower court ruled for the plaintiff, J. J. McLaws, in a suit the latter brought to quiet title to a 40-acre tract of land sold to him by his father.

After the father's death, the supreme court said, an adopted daughter, Marvella Casey, challenged McLaws' right to the property, contending that an earlier deed gave her an interest in it. The trial court ruled that the earlier deed was not a conveyance.

**ADDITION CONSIDERED**  
WASHINGTON, March 5 (UPI)—The house ways and means committee is considering an addition to the administration's bill for hospital care for the elderly.

U. S. ARMY CHIEF OF STAFF Gen. HAROLD K. Johnson is shown leaving Twin Falls airport in Saigon Friday after his arrival in South Viet Nam. He will lead a four-day, on-the-scene inspection of the war there. At right is Gen. William C. Westmoreland, commander of U. S. forces in Viet Nam. (AP wirephoto by radio from Saigon)

## City to Make Blue Lakes North 4 Lanes

City Attorney William Langley is expected to draft an ordinance to be presented to the city commissioners on March 15 which will prohibit parking along Blue Lakes boulevard north and spark the way for marking the boulevard to carry four lanes of traffic.

City Police Chief M. Frank Barnett has recommended that the boulevard be marked with four lanes in an effort to cut down the number of accidents on the roadway.

Chief Barnett explained that although the number of accidents north is no greater, or less, than any other section of the city, by marking the roadway as four lanes the number could be cut down.

Blue Lakes boulevard north, which runs from Five Points north to the city limits, is wide enough—44 feet—for a four-lane roadway.

During heavy traffic hours on the boulevard drivers occasional drive as if the road has four lanes and this causes a number of accidents, Chief Barnett said.

In 1962 action was started to mark the boulevard for four lanes but the city commissioner decided not to do it at that time.

The state highway department office in Shoshone in a letter to City Manager H. L. Derrick, offered to provide four-lane marking if the city agrees.

## Vance Airline Cancels Its T. F. Flights

The Vance International airways flights, which have been making weekly trips from Los Angeles and San Francisco to Twin Falls, will be canceled as of March 20. It was announced in Sun Valley by the Janss corporation.

The last flight to Twin Falls from California cities will be Saturday, March 13—exactly one month from the date of the first flight. The last flight out will be the following day.

The Sun Valley news bureau said Friday morning that while the week-end flights have proven most convenient for those using it, Sun Valley is so tightly booked for the rest of the season that passengers from Los Angeles and San Francisco who might use the flight have been unable to get reservations.

A spokesman for the Janss corporation said the company would continue to investigate ways and means to improve air transportation to the resort.

The Vance airlines flights were the first ever to provide a direct commercial link from the Los Angeles area to Twin Falls. The flights were tentatively scheduled for week-ends during the skiing season.

One advantage of the flight was that passengers were permitted a 50-pound weight limit to allow for their skiing equipment. The usual limit is 45 pounds.

## Unusual Gift

BOISE, March 5 (UPI)—Rep. Phil Batt, R. Canyon, celebrated his 39th birthday yesterday and it touched off some "monkey business" in the house.

Rep. Max Rogers, R. Gem, presented Batt with a gift of a rhesus monkey on behalf of Batt's colleagues. He also presented some nuts and bananas so that the animal may grow and be intelligent if needed to decide critical issues still before this house.

Said Batt when he received the gift: "On my 39th birthday I appreciate being given something which reminds me of my ancestors."

## Sentencing Of Robbers Set March 12

Two Oregon men found guilty of armed robbery of the Safeway store, 512 Main avenue north on Dec. 12, will be sentenced on March 12, in Eleventh district court before Judge Theron W. Ward.

Donald H. Collins, 25, and James Jacobs, 26, both Eugene, Ore., attorneys for James Jacobs, 26 and Donald H. Collins, 25, both Eugene, Ore., concluded his final arguments and the case went to the jury at 2:45 p.m.

The jurors returned with the verdict about 4 p.m.

Five witnesses were questioned during the two-day trial. Some \$4,000 was taken in the armed robbery and the money has never been recovered.

## "Wild Horse Of Osage" Dies; Age 61

MCALISTER, Okla., March 5 (UPI)—Pepper Martin, whose base-running and off-the-field antics sparked the old St. Louis Cardinals "Gas House Gang," died today of a heart attack.

Martin was stricken last night at his father's home, OKLA., and died this morning at McAlester general hospital.

One of baseball's great competitors, the "wild horse of the Osage" joined the Cardinals in 1928 as a utility man. He worked up to the job of regular center field in 1931.

As the story goes, Martin told Branch Rickey shortly after the 1931 season began: "Play me or trade me."

Rickey decided to play him. Martin batted .300 that year and sparked the Cardinals to a world series victory over the Philadelphia Athletics. During the series he got 12 hits and stole five bases.

## Skiing Good To Excellent On Week-End

With continued mild weather, being the trend throughout the area, spring skiing is getting into full swing at the five Magic Valley ski areas.

Good to excellent skiing, which has been the byword the last few weeks, seems to be holding true again this week at all the ski areas.

A junior ski race will be held at Magic mountain this week-end, with teams from the Sawtooth Racing association participating. A light covering of powder is reported on all runs at the area and skiing there last week-end was reported as being as good as any this season.

About four inches of new snow fell at the area over last week-end.

Pomerelle ski area also will host ski races this week-end, with youngsters from the area competing in a Lions club-sponsored race.

About eight inches of snow fell at the area last week-end and skiing is reported as very good. Some runs are packed and some have loose powder.

Final plans are under way for the second annual Soldier mountain ski patrol sponsored spaghetti dinner. The dinner, which was highly successful last year, will be held March 14. Tickets for the affair can be obtained from any ski patrolman or at the desk in the Soldier mountain lodge.

Skiing at Soldier mountain remains very good and snow is forecast before the week-end.

Rotarun reports continually good skiing, although the area has no new snow. The weather at the area is sunny and warm.

Sun Valley's ski outlook for this week-end is generally excellent. Snow depth on Baldy is 30 inches and on Dollar, where skiing is very good, the snow depth is 44 inches.

# Budget Is Okayed By Senate; House Delays Tax Action

BOISE, March 5 (UPI)—Senate Democrats cast a baleful eye on the governor's budget today as the 38th legislature tackled the appropriations issue in the first overtime day of the session. Democratic leaders complained during debate on a \$2,029,334 appropriation for state capitol agencies that the governor's budget was up 30 per cent over the previous biennium. They also contended he was "illegally" using funds from other departments. The budget survived the drumfire of criticism. It was approved 23-17 and sent to the house.

## Burley Court Action Declared Mistrial

BURLEY, March 5—Eleventh district Judge Lloyd Webb declared a mistrial Thursday afternoon in the court action here involving two men charged with the shooting of a motel employe last Aug. 14, after refusing to admit evidence resulting from the use of sodium pentothal (truth serum). During the jury trial, conducted in Cassia county courthouse, Judge Webb ruled that such evidence could not be admitted. But during a cross-examination Thursday afternoon James Anest, attorney for the two men charged with assault with a deadly weapon, attempted to admit results of a sodium pentothal test as evidence.

Judge Webb said that in no court can the results of the test be admitted into evidence, and added that psychiatrists also feel the use of the serum is dependable.

He said the trial will be rescheduled at another time before another judge.

The defendants, Donald O. Cypher, 25, and Robert W. Mueller, 23, were apprehended in Pittsburgh two weeks after the incident in which Mrs. Norma Newcomb was shot twice at the Parish motel.

She has recovered enough to do most of her own housework after several months of hospitalization, but is still under doctor's care.

## 2 Rivers in Idaho May Be Listed 'Wild'

WASHINGTON, March 5 (UPI)—The administration asked congress today to establish a national "wild rivers system."

It asked that wild rivers status be given immediately to 600 to 800 miles of six rivers.

The purpose of the wild rivers system would be to preserve conservation, scenic, fish, wildlife and outdoor recreation values.

A bill sent to congress defined a wild river as a "stream or section of a stream, tributary or river—and the related land area—that should be left in its free-flowing condition, or that should be restored to such condition, in order to promote sound water conservation, and promote the public use and enjoyment."

Streams in Idaho that would come immediately under the proposed system would be the Salmon river and the middle fork of the Clearwater river.

## Union Will Not Extend Deadline

PITTSBURGH, March 5 (UPI)—United Steelworkers President David J. McDonald has refused to grant an immediate extension of the union's May 1 strike deadline against the steel industry, leaving the two sides eight weeks of pressure bargaining for a new contract.

However, McDonald, under fire from business, government and labor itself to grant an extension of the current contract, left the door open to such a possibility.

McDonald met yesterday with other top union officials and later announced: "The union reaffirmed its belief that discussion of an agreement extension is premature."

He refused comment when asked if he would consider an extension when bargaining resumes here next Tuesday.

McDonald made the remarks at a brief news conference following a meeting with industry negotiators. Noticeably absent was R. Conrad Cooper, chief management bargainer.

Talks were broken off Jan. 8 when the industry decided it could accomplish little while the million-member union conducted its presidential campaign and election. The industry wants the two months that were lost added to the present pact.

## Troubles Are Noted in New Government

LONDON, March 5 (UPI)—Discontent with Prime Minister Harold Wilson's foreign, defense and home policies seems to be spreading through the rank and file of Britain's Labor movement. It doesn't appear likely to drive him from office, however.

Troubles for Wilson's four-month-old government have shaped up mainly but not exclusively on Labor's left.

Already a sizable group of his followers in the house of commons have criticized the prime minister openly on certain issues. But the Labor legislators at all times have made clear they would not carry their grumbles to the point of voting against their own government. Thus the danger of Wilson's losing his water-thin margin in the commons, and so being compelled to resign, does not seem serious at this time.

There are currently three chief sources of difficulty:

1. In the international sphere the problem of Viet Nam is the most pressing. Labor leftists and middle-rollers are accusing Wilson of slavishly backing the Johnson administration's tough posture in that embattled land.

2. In the defense field, dissatisfaction with the government's transitional program has been expressed.

The Laborite ranks held fast in commons last night to defeat a Conservative motion censuring the government's defense policy. The margin was only five votes, and only one vote has been tallied narrow since Labor took office last October.

3. On the home front there have been signs of unrest among key labor unions that want more pay and better working conditions. These—have shown up among busmen, auto workers, dock workers and in the building industry.

## Three Plead Innocent to Conspiring

NEW YORK, March 5 (UPI)—Two men and a Canadian woman charged with conspiring to blow up the Statue of Liberty and two other American shrines pleaded innocent yesterday.

The three fallen in their moves for lower ball. The attorney for one of the alleged conspirators, blonde Michelle Duclos, 27, a former Canadian television personality, argued that she figured in only one count of the indictment—transporting 30 sticks of dynamite into the U.S. by air.

"That one overt act was enough to blow up the whole town," U.S. district Judge Irving Ben Cooper replied.

Mrs. Duclos is being held in \$100,000 bail.

The pleading by the alleged ringleader of the plot, Robert Collier, 28, was held up because his lawyer was absent.

Arraigned yesterday with Mrs. Duclos were Walter A. Bova, 32, and Khalael S. Sayeed, 22, both held in \$50,000 bail each.

## Flood Danger Lessened by Good Weather

BOISE, March 5 (UPI)—Favorable February weather at this time lessens the danger of flooding along the Boise river. Gov. Robert E. Smylie reported yesterday.

A report from the U. S. Corps of Engineers cut the expected peak flow at Lucky Peak from 750,000 acre feet of water to 500,000.

The Corps predicted earlier that flood runoff and reservoir under capacity loads would cause dangers in the Boise valley the middle of next month.

Gates at Lucky peak dam have been wide open since last month and the Boise river brim full of body mountain runoff to make room available for next year.

## Officials in Louisiana Probe Ruins

MONROE, La., March 5 (UPI)—Police and gas company officials searched the ash-covered ground where children once played to find the cause of an explosion and fire which killed 17 persons.

A Tennessee Gas Transmission company pipeline blew out last night yesterday in a small residential community near Natchitoches. Four homes and 17 people were demolished by the force of the explosion and the fire which followed.

Size of the dead were children, others escaped but four of survivors were hospitalized with second degree burns.

Officials from the Houston area visited the site yesterday, but were unable to say what caused the blast. But a company spokesman said pressure in the inch line was "normal" and that conditions were routine before the explosion.

Those who escaped were injured by the force of the blast or the size of the fireball.

Mrs. John Hilton and her husband live about 50 yards from the site of the explosion. Hilton said he was awake at the time and heard the explosion but thought his firm was blowing off pressure.

Mrs. Hilton said she looked out her bedroom window, saw the fire and screamed. "Oh, my God, the world's on fire."

## U.S. Economy Must Continue Growth In Order to Reach Full Employment

WASHINGTON, March 5 (UPI)—John F. Kennedy says the U.S. economy must continue to grow if it ever has before in order to reach full employment on its own. The "Greater Society," the President yesterday stressed the importance of winning full employment in a special message to congress.

He called for programs "to improve the caliber of our work force" so that the goal of full employment can be reached without inflationary or adverse balance of payments side effects.

Listing the programs he wants, the President repeated his earlier promises to ask congress to increase in federal job training grants by up to 90 per cent, to bring more workers under the \$1.25 an hour minimum wage and to modernize the federal-state unemployment benefit system.

Such actions are taken to remove present handicaps, the message said, employment problems of Negroes and unskilled workers will become worse.

Johnson said the task of reaching full employment would not be an easy one. "We will have to try, adapt, try anew, and adapt again," he said.

## ROCKET MAY BE USED CAPE KENNEDY, March 5 (UPI)—The space agency hopes to use its Atlas-senior rocket to shoot a lunar landing robot to the moon this fall despite a launch pad explosion on a moonshot rehearsal Tuesday.

A PALM TREE or an illusion? Jerome residents rub their eyes and look again as they travel past 608 East Main street in Jerome. However, when one looks closer he discovers they are huge pine trees which have been trimmed to look like palm trees. Oscar Johnson started to trim the trees in preparation for removing them, but had had so many favorable comments that he decided to leave them as they are now and give tourists the illusion they may be in Florida. (Times-News photo)

**WOMAN OF ACHIEVEMENT** for the Twin Falls Business and Professional Women's club, Mrs. Greeta Smith, right, is congratulated by Egon Kroll, city commission chairman. Looking on is Mrs. Vera Rauch, president of the Business and Professional Women's club. Kroll signed a proclamation designating Business and Professional Women's week. (Times-News photo)

### Woman of Achievement Fete To Honor School Accountant

The Business and Professional Women's woman of achievement for the year, Mrs. Greeta Smith will be honored at a banquet at the Johnson Hotel Tuesday. She was chosen for this honor because of her wide experience in various fields of business and for her personal qualifications. Mrs. Smith is presently accountant and clerk-treasurer for Twin Falls school district. No. 411. The "club's" woman of achievement is designed to serve as an inspiration to young women entering the field of business. At the banquet, four members who have secured five or more new members will be presented with gold card awards. They are Mrs. Smith, Mrs. Vera Rauch, president, Mrs. Marian Langdon and Mrs. Beulah Wegener.

### Counselor Training Session Held

A training session for head merit badge counselors of the Southside district, Snake River Area council, Boy Scouts of America, was held Thursday night in the Scout service center auditorium. Head counselors and individual merit badge counselors are being organized and trained in accordance with new advancement policy initiated by the council advancement committee, headed by Dr. James McMillin, BPH. Head counselors present included Jerre Cover, Eleventh district Judge Theron Ward, Cig Manager H. L. (Herb) Derwick, Sawtooth National Forest Supervisor Max Rees, Mel Carr, Ralph Harris, Richard Brize and Dr. John McNeese. The training sessions are organized by the district advancement committee, composed of O. J. Smith, chairman; John Bopp, Vernon Davidson, John Okeberry and Rees, with cooperation of Roger Sprague, district Scout executive. Next session is scheduled for March 26.

### Clarence F. Orth Honored at Rites

WENDELL, March 5—Funeral services for Clarence F. Orth were conducted at 2 p.m. Wednesday at the Wendell Methodist church by the Rev. Earl V. Fargues. Mrs. Fargues Eaton played the prelude and postlude and accompanied soloist Arthur (Jim) Bennett. Floral arrangements were directed by Mrs. Mason Moore and Mrs. Lee Robinson. Active pallbearers were Robert Caldwell, Robert Burks, Howard Niccum, Francis Casper, Dean Williams and Edward Bowman. Honorary pallbearers were Henry J. Barton, Hugh Caldwell, J. H. Sibbald, G. C. Weinberg, R. O. Ward, Everett French, Glen Jenkins and Pester Andersen. Last rites were held in the Wendell cemetery.

### OUTING SLATED

EDEN, March 5—Eden Boy Scout troop 82 will hold a shotgun and rifle shoot followed by a cookout Sunday. The troop will meet at the Eden Legion hall at 1 p.m.

### LEGAL ADVERTISEMENTS

**NOTICE TO BIDDERS**  
The State Purchasing Agent will accept sealed bids at his office, Room 200, State Trust Building, Idaho, until 10 a.m. March 16, 1965 for the following items: No. 118 for prefabricated house for the Fish & Game Dept., Blaine; No. 119 for prefabricated house for the Fish & Game Dept., Blaine. All bids will be publicly opened and read at the above time and place. Bidders should refer to the specifications and conditions must be obtained before bidding. These are available from the State Purchasing Agent's Office. The State reserves the right to reject any or all bids.

### Banquet Held For Wendell Cub Scouts

WENDELL, March 5—The 55th anniversary line and gold banquet for Cub Scouts pack 95 was held Thursday evening at the First Presbyterian church. Invocation was given by the Rev. Jack Jennings. A potluck meal was served at tables decorated with the work of the Cub Scouts. Decorations consisted of cherry trees, peanut Cub Scouts, and paper airplanes suspended from the ceiling. A huge birthday cake, made by Mrs. Dale Gilbert and Mrs. Fred McCloud, was served. Den one presented and retired the flag, den two presented pantomimes and songs. All three denes joined in the singing of the Scout song. Den three explained the Scout badge and displayed a large replica of the badge. The Rev. Mr. Jennings is chairman of the sponsoring institution. New committee members, Dale Bitterli and George Benson, were introduced by Richard Thompson. Mrs. George Benson, den mother, announced coming events for the Cub Scouts and thanked the parents for their participation and help.

### Gem Show Is Scheduled March 13-14

Magic Valley Gem club is sponsoring its annual show March 13-14 at the national guard armory, Frontier field. The hours will be from 10 a.m. to 9 p.m. on March 13 and from 10 a.m. to 6 p.m. on March 14. Among the specials to be shown will be faceted stones by Dr. Ellwood Rees. He will feature birth stones with which he has won national awards. Dudley Stewart will feature star garnets and Howard Duncan will display a fine opal which he found. Don Crabtree will show a duplication of artifacts from South America. James Henry will show spheres that he has made. Several other items also will be featured at the showing.

### Manager Named For Area Store

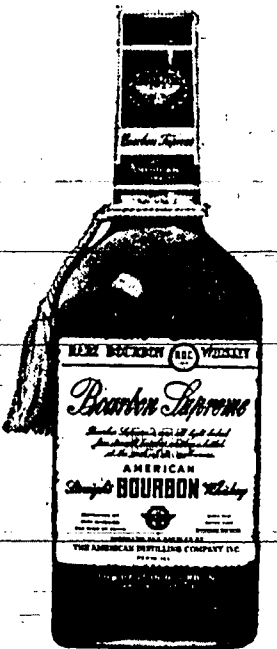

HAZELTON, March 5—Clarence Tongish, who has been with the Bestway Building Centers for the past 30 years, has been appointed as manager of the Hazelton branch of the company, filling the vacancy made when Wayne Walker was transferred to Blackfoot. Tongish was with the division in Puer for the last six months which he spent in Tremonton, Utah. Mr. and Mrs. Tongish are residing in Twin Falls but plan to move to Hazelton soon.

### Date Changed

CAREY, March 5—A new date, Saturday, June 19, was chosen for the Carey Valley Horse show, sponsored by the Carey Riding club at a meeting of the board held at the Craters Coffee shop Wednesday night. Still in the planning stage is a riding club sponsored community talent show for the near future.

### Men's Chorus to Appear at T. F. Church Thursday

The Men's Chorus of Berkeley Baptist Divinity school, Berkeley, Calif., will lead a worship service at First Baptist church, 910 Shoshone street east, at 7:30 p.m. Thursday. Composed of 18 young men, the group is directed by John T. Burke, instructor in church music at the school and minister of music for the First Congregational church, Berkeley. The chorus has appeared in churches throughout the Pacific coast and Rocky Mountain states as well as on special radio and television programs. The public is invited to attend the sacred music worship service, announced the Rev. Ernest Hasselblad, pastor of the First Baptist church.

### Class Slated

WENDELL, March 5—Mrs. Melvin S. Jones recently has completed a training course at the Red Cross headquarters in Twin Falls. She is asking for a class of interested persons to make up a class for a Red Cross first aid course for next month. Those interested in such a course may contact Mrs. Jones.

# NATIONAL WHIRLIGIG

**By ANDREW TULLY**  
**HONG KONG, March 5**—Old Far East hands here are bemused that in all the defeatist talk about the Viet Nam war, no one has suggested a method of policing an agreement on neutralization.

Yet in the past few weeks, the communist regime in North Viet Nam has made it plain it has no intention of honoring any piece of diplomatic paper guaranteeing South Viet Nam against aggression. It has done so with its order for the withdrawal of observers of the international commission from North Vietnamese territory.

Cynical observers including this one, see the order as a means of concealing new military aid to the Hanoi regime from Red China and the Soviet Union. The guilty man—or government—still runs where no man pursueth.

**NO CONTROL**—Be that as it may, the fact is that the ICC has been operating in North Viet Nam for a long time. Theoretically, it should have been able to check on the flow of men and supplies from North Viet Nam into South Viet Nam and Laos. In fact, it has done nothing of the sort. For the past several years, the Hanoi government has sent its armed aggressors into the south at will.

Yet Hanoi has now decided it should take no chances of any official news of its aggressive operations leaking out to the world. The ICC has been booted out, as a needless risk. And the aggressors in Paris and elsewhere who whimper about U. S. "intervention" in South Viet Nam apparently consider Hanoi as being well within its rights.

**DIDN'T WORK LAST TIME**—Francis Charille de Gaulle, whose foreign policy seems to be nourished on sour grapes, talks wistfully of an agreement on neutralization enforced by all the powers concerned. But that was the principle behind the 1954 Geneva agreement. If the reds can defy one set of policemen, what makes de Gaulle think they can't and won't thumb their nose at another if the U. S. is unable to deal effectively with North Viet Nam intervention today, no new "agreement" will make the job easier.

From here, where France's colonial adventures in Southeast Asia are viewed with considerable cynicism, the conclusion is that de Gaulle's solution to the mess in Viet Nam is to negotiate now, at this point. In his polite language, de Gaulle is plumping for the surrender of Southeast Asia to communism.

**FALSE PREMISE**—De Gaulle's attitude, of course, is based on the ignominious defeat suffered by the French in Indochina 10 years ago. Since the French couldn't win, de Gaulle naturally assumes that the United States' effort is doomed. It is his premise that the longer we wait the more the situation will deteriorate.

That premise is untenable if Washington holds firm and refuses to negotiate on communism's terms. As the Thai foreign minister, Thanat Khuman, put it: "What do they propose to negotiate? They propose to negotiate the freedom of the people of South Viet Nam?"

**IT WON'T LAST**  
 It's nothing especially rare, but Idaho might be getting another law that can't be effective because enabling funds haven't been voted. Gov. Robert E. Smylie announced he would permit the bill providing for colored photographs on drivers' licenses to become law without his signature. He explained his action by noting the bill passed both houses of the legislature by fairly good margins, hinting that if he vetoed the bill the legislature probably could pass it over his veto. But the governor also pointed out no funds have been provided to finance the photograph project.

**IT WON'T LAST**  
 It's nothing especially rare, but Idaho might be getting another law that can't be effective because enabling funds haven't been voted. Gov. Robert E. Smylie announced he would permit the bill providing for colored photographs on drivers' licenses to become law without his signature. He explained his action by noting the bill passed both houses of the legislature by fairly good margins, hinting that if he vetoed the bill the legislature probably could pass it over his veto. But the governor also pointed out no funds have been provided to finance the photograph project.

# "Now Take It Easy"

**POT SHOTS**  
**IT WON'T WORK**  
 Dear Pots:  
 Before "Wonderer" wastes a lot of flower seeds by planting in the fall, someone should wise her up to Idaho weather.

You see, "Wonderer" or the weather in early April or March and even sometimes in February, turns real warm and fools a lot of seeds into sprouting and starting to poke up out of the ground to get into the sunshine and air. Then, bang, the weather turns again and all the little sprouts get frozen up, and so no flowers.

So, follow the instructions on the flower seeds and "plant in the spring after all danger of frost is over."

Incidentally, the reason the weed seeds do not disappear is because Mother Nature can afford to be generous. She plants millions, yea billions, of weed seeds. Many start to sprout in the early spring and get clipped by the frost, but there are so many seeds around that some of them always grow up into weeds.

Also, through the rough school of nature, the weed seed has become adapted to colder weather, while the cultivated and domesticated flower seeds are still fragile. So wonder no more.

Tried it Oct (Jerome)

**PUPS FOR KIDS DEPT.**  
 Pots:  
 Cute little black puppy needs new home. Should be quite small when grown. Phone 934-5307 or pick up four miles east of Gooding.

Mrs. Bill Arkoosh

**REALLY THINK SO?**  
 Dear Pot Shots:  
 In all the speculation about the moon in the wake of the Ranger satellite probe, the experts have overlooked one excellent possibility, namely, perhaps the moon isn't there after all. It could be a mirage, you know.

Can't you just imagine the astonishment that would result if the U.S. sends a couple of men to land on the moon and they go right through the place where it appears to be? Nothing solid, no dust, nothing at all except a shadow, a place that actually isn't?

It certainly should be considered as a possibility, shouldn't it? And if it isn't a mirage, if the moon actually exists, who's going to have the franchise for mining green cheese?

Star Gazer (Twin Falls)

**FAR TOO MANY**  
 Pot Shots:  
 I know a few people who lie when the truth would serve the purpose better. I suppose the experts have a name for this sort of thing, but why do people grope for the lie that can be exposed when it would be so simple to just tell the truth?

I. M. Puzzled (Burley)

**OUR BULLETIN BOARD**  
 1. Wonder, Twin Falls—We're not too familiar with the district at which you're pointing a finger, but we sort of get the idea there's an ulterior purpose. If we're wrong, feel free to correct the impression. Thanks, anyway.

**By PHIL NEWSOM**  
**UPI Foreign News Analyst**  
 The widely-heralded "unity" conference of communist parties in Moscow succeeded only in showing how badly split the world communist movement actually is.

Primarily it was a meeting of second-raters, including a group of "observers" from the United States and a delayed delegation from Great Britain where the communist party exerts little or no influence.

The shabby climax to what had been planned by Nikita Khrushchev as a showdown session leading to party excommunication of the Chinese reds succeeded only in demonstrating the loss of Moscow leadership.

The Red Chinese did not attend, nor did any Asiatic delegations except Mongolia and India.

Prominent among the missing was a delegation from Romania—the "neutralist" within the communist block, and Indonesia which has the largest communist party outside the communist world.

**By HAL BOYLE**  
**NEW YORK, March 5**—"My father is in politics," sang Peter O'Toole.

"A fine and upright man."  
 "My mother is an acrobat."  
 "And I do the best I can."  
 The philosophy of doing the best he can has worked well lately with the tall, yellow-haired, young Irish actor, who says his other mottoes are:

"Kick it about until you lose it."  
 "To hell with the burglars."  
 "Stroll gently on."  
 "Wake me when it's over."

O'Toole has had a wonderful year. He starred in a film epic; he and his Welsh pal, Richard Burton, received Academy award nominations; and O'Toole had the landmark pleasure of turning down several hundred thousand dollars for 12 weeks of work in a film he didn't want to do.

That's pretty good for someone who was a newspaper copy boy at 14 and whose first take-home pay as an actor was \$2.80 a week.

"Success has changed my way of smell."

# TAYLOR'S VIEWS ON WORLD NEWS

**By HENRY J. TAYLOR**  
**Fellow, American Hellenic Society**  
**Senate Finance Committee Chairman**  
**Harry F. Byrd, D. Va., will lift his veto for ordinary, plain American travelers and drivers.**

treasury about the counterparty funds, bonanza abroad that this column recently described.

Greece calling — say the travel posters, with there's 57 million dollars (U.S. taxpayers' money) in Greek drachmas wall. Henry J. Taylor in Athens, India calling — our taxpayers have \$71.8 million dollars stowed away in rupees there and another 106.9 million in rupees in nearby Pakistan, Yugoslavia? Egypt? More than 47.8 million in dollars and 75.8 million in Egyptian pounds are on tap — say these.

While our depleted gold reserve goes down — and down and out and hits another new 26-year low — this doughty fighter who takes no nonsense from anybody will zero in on the bonanza.

The total U.S. government (that is, taxpayers') dollars that lay accumulating abroad in foreign currencies exceed \$3.5 billion.

Official junketers traveling bureaucracy and whatnots that money they tap these funds abroad — free. A little-known law requires U.S. consulates to hand them the taxpayers' money in this form and the free loaders need not even account for it.

There are many legitimate withdrawals, but the over-all result is a world-wide scandal occasionally spoken of in the news papers but never fully exposed and never stopped.

The great bonanza arises from commodities and goods our government has sold abroad — chiefly agricultural products under public law 480. Then continued government sales overseas further ballooned the funds like a bloated balloon gone berserk.

The catch is that the payment money must be spent inside the countries. Some of such funds are also restricted by treaties that should be renegotiated. Former Secretary of the Treasury Robert B. Anderson proposed their renegotiation, but his proposal was utterly neglected when he left that post.

Some counterpart currencies are earmarked for building new American embassies and other U.S. construction. Even more are earmarked for such backdoor extensions of our free foreign aid, as parts of Pakistan's Indus

Basin program which was somehow slipped in on March 4, 1964, and likewise attributed to local currency overabundance.

Yet — hey! That's our money, stowed away all this — our money — the remaining overabundance available for U.S. use and officially defined as "nonrestricted" — is gigantic — at the very time that courageous federal reserves board Chairman William McCh. Martin calls the "balance-of-payments problem" the most important and most serious of all the problems President Johnson faces.

We must attack on all fronts. Mr. Martin insists, and ignores nothing. "We're in an emergency situation," he warns, "and unless it is solved there is a very real danger that we could have a world depression."

I have obtained all figures herein from the treasury department itself and the Budget, 1964 budget bureau bulletin No. 65-3. Beyond the countries mentioned there's 489.9 million dollars stowed away in Poland, 317 million in Israel, for example, and all of it designated as excess currency.

There's 19.6 million in Turkey — one of the world's most interesting countries — and 63 million in Brazil. More than \$1 billion of our taxpayers' money is stashed away in Tunisia, 23 million in exile, Moscow — and 2 million in Mexico, 2.5 million in remarkable little Finland, 43 million in Colombia and the same amount in lush Ceylon.

Why, there's even \$2 million waiting in Switzerland, although no counterpart funds whatever are generated in that hard-core currency country. And so it goes.

As this column stated, if U.S. treasury counterpart funds are good enough to hand out free to official free loaders abroad, what's the matter with selling — selling — treasury drafts on these deposits to plain Americans who have no inside track?

Our nation would achieve benefits: The treasury would retain American travelers' dollars right here at home and give value to our foreign billions at the same time.

Travel agencies and international airlines can cooperate. Corporations operating overseas would do their part. For example, Wilcoxon, a D. D. P. company owns mills in Caracas and Cuba. It must meet the payroll and construction costs in Venezuelan bolivars and Japanese yen. Such companies buying counterpart funds from the treasury would help keep dollars at home and transfer the scandal-ridden bonanza back to our taxpayers' account where it belongs.

More than 47.8 million in dollars and 75.8 million in Egyptian pounds are on tap — say these.

While our depleted gold reserve goes down — and down and out and hits another new 26-year low — this doughty fighter who takes no nonsense from anybody will zero in on the bonanza.

The total U.S. government (that is, taxpayers') dollars that lay accumulating abroad in foreign currencies exceed \$3.5 billion.

Official junketers traveling bureaucracy and whatnots that money they tap these funds abroad — free. A little-known law requires U.S. consulates to hand them the taxpayers' money in this form and the free loaders need not even account for it.

There are many legitimate withdrawals, but the over-all result is a world-wide scandal occasionally spoken of in the news papers but never fully exposed and never stopped.

The great bonanza arises from commodities and goods our government has sold abroad — chiefly agricultural products under public law 480. Then continued government sales overseas further ballooned the funds like a bloated balloon gone berserk.

The catch is that the payment money must be spent inside the countries. Some of such funds are also restricted by treaties that should be renegotiated. Former Secretary of the Treasury Robert B. Anderson proposed their renegotiation, but his proposal was utterly neglected when he left that post.

Some counterpart currencies are earmarked for building new American embassies and other U.S. construction. Even more are earmarked for such backdoor extensions of our free foreign aid, as parts of Pakistan's Indus

# Rupert Chamber Hears Report on Red Cross

RUPERT, March 5—A report on services performed by the county chapter of the American Red Cross was given at the Rupert Chamber of Commerce during a luncheon meeting Thursday at the Hirling cafe.

John Hirling, chairman of the Red Cross chapter for Minidoka county, emphasized that March is Red Cross month and a special effort will be made to meet the goal of \$2,000 set for the county.

Last year only \$600 was donated by county residents and one-half of this amount went to the national Red Cross with the services performed by the blood program requiring over \$400.

According to Hirling, the Red Cross has received some bad publicity since World War II and most of it is completely unfounded.

He pointed out the organization is controlled by the department of defense and an audit is made each year by the army.

Disaster aid was not felt necessary during the recent flooding in Minidoka county, and rumors that recipients are required to pay back disaster aid is false, he asserted.

The chairman commented on the services performed by the home service of the Red Cross with Mrs. Forrest Badger as chairman, as a connecting link between local residents and service personnel. Communication is much quicker through Red Cross facilities than can be obtained by an individual, he noted.

Mrs. Dean Anderson is first aid chairman for the county and Hirling reported little success in

this area. A class has been given nurses aides and the police force. The chairman pointed out all firemen should have this service, and plans are being made for further classes in this service.

The swimming classes under the chairmanship of Mrs. Elsie Burton offered lessons to 941 children last year, not including adult classes or private lessons. A two-week program was originally and was lengthened to eight weeks last year.

All instructors were Red Cross trained and one man received aquatic training. Four in water safety and two in water safety aid. Hirling praised volunteers who have made this program successful.

A total of 471 pints of blood were drawn in the county last

year with 240 pints being used locally. Hirling said 50 people in the county are using gamma globulin all the time.

Actually the county is using more blood than is drawn, Hirling said.

The chairman pointed out a patient is not charged for blood received through the Red Cross although a charge is made for administering by the doctor or the hospital.

All finances in the county have been stopped for the month because of the unavailability of money and people needing aid are either sent to Burley or Pocatello.

The chairman pointed out the chapter's finances are in very poor shape and "if we are continually unable to meet the fi-

nanacial obligations we will lose the chapter in the county or consolidate with another chapter."

Roger Poulton was introduced as finance chairman for the county. He reported some 80 workers have been obtained to solicit for the organization. A question period followed the report.

Richard Bohle reported on purchase of property for the Rupert Development corporation which was formed in 1962 under the auspices of the Rupert Chamber of Commerce. He said property has been purchased from Emil Meyer west of Rupert next to the railroad track. One industry in Salt Lake City has already been contacted and purchased ground for a plant.

Oliver Hanzel, chairman of the

city relations committee, reported on a meeting held with the new hospital administrator and reported plans are being made to improve the local hospital with additional medical staff.

Hanzel also reported contact had been made with two doctors in hopes of increasing the medical staff at the hospital.

Grant Catmull reported briefly on the sales tax bill and other legislative information. Don Dickson reported on the equalization tax bill.

## Rev. Jackson To Be Pastor At Emmett

The Rev. and Mrs. Robert O. Jackson leave Twin Falls this week to assume pastorate of the Church of the Nazarene at Emmett.

The Reverend Mr. Jackson has pastored the First Church of the Nazarene here for the past five years. Before coming to Twin Falls he was pastor at Nyssa, Ore., and the couple served as missionaries in Argentina and Africa.

They plan to leave May 21 for South Africa, where they will spend three months nursing and teaching. Both are registered nurses.

Mrs. Jackson is district missionary president and a general officer in the church. She has spoken to various churches and service organizations while living here.

The Jacksons were honored at a special dinner by the congregation of the Twin Falls First Church of the Nazarene last Sunday, with over 200 persons present. The Twin Falls Ministerial Society also honored the couple at a tea in the Methodist church Fireside room.

## Wendell Rangers To Meet Monday

WENDELL, March 5—A meeting of the Wendell Rangers has been scheduled at 8 p.m. Monday at the home of Toni Meyer.

Their first meeting of the season was held earlier this week at which time the members discussed apparel and saddle blankets. A decision will be made whether or not the riding club will purchase the blankets and let members use them for performances.

Announcement was made that a clock radio will be given away April 10 at the city park. Sandra Astle and Cathy Kuhn serve as reporter and assistant reporter for the riding club.

## Pair Sentenced For Auto Theft

William Dean Wesley, 19, and Melvin Earl Ponder, 22, were sentenced to five years in the state penitentiary by Eleventh District Judge Theron Ward for grand larceny (auto).

Wesley and Ponder pleaded guilty to stealing a 1962 Chevrolet owned by Ronald McDowell on Jan. 31.

They were apprehended about three hours after taking the car near Buhl.

### News Around Idaho

**IDAHO FALLS, March 5 (UP)—**Ernie Joint school district 257 has been certified payment of \$4,387 by the federal government, U. S. Rep. George Hanger, R-Idaho, said yesterday. The amount is of the total tentative allotment of \$5,317 for those school districts as provided under public law 875 which gives federal money for students whose parents are employed on federal projects, such as the Idaho AEC project.

**BOISE, March 5 (UP)—**Publication of a 72-page illustrated booklet, Natural Resources of Idaho, was announced yesterday by Secretary of the Interior Stewart L. Udall in a statement released in Boise. The booklet is the eleventh in an informational series describing natural resources of various states.

**RIGBY, March 5 (UP)—**The commander-in-chief of the Veterans of Foreign Wars of the United States, John A. (Buck) Jenkins, Birmingham, Ala., will pay his official visit to Idaho March 13. He will speak at a testimonial dinner sponsored by Rigby VFW post 3004, which will be honoring Dee Summers, Rigby, who was elected junior vice commander-in-chief of the VFW of the United States, at the convention last year in Seattle, Wash. Jenkins is engaged in general law practice at Birmingham with a law firm he heads.

**IDAHO FALLS, March 5 (UP)—**The condition of John (Ducky) Wilhelm, Pocatello, was reported by Sacred Heart hospital spokesmen last yesterday as "slightly improved" following a Wednesday report of "critical." The 28-year-old victim of a .38-caliber pistol slug was still paralyzed from the waist down yesterday, but he had "some feeling in his legs." He was injured in a shooting during a party in Pocatello Tuesday and was brought to Idaho Falls for surgery.

**POCATELLO, March 5 (UP)—**Vocal quartets from nine LDS stakes in this area will be judged here Saturday in a mutual improvement association quartet festival. Taking part in the festival will be quartets from the Portneuf stake, the American Falls stake, the two Blackfoot stakes and the five Pocatello stakes. Eighteen groups will be competing, a junior and senior division quartet in each stake. All have been chosen in previous festivals at the ward and stake levels. The harmonizing will start at 7:30 p.m.

**POCATELLO, March 5 (UP)—**Southeast Idaho Potato Growers were urged today not to sign contracts with processors for less than \$1.75 average per hundredweight, which the district Potato Growing and Marketing association claims is the minimum to make a profit. Ray Funk, Aberdeen, president of the district four of the association said the average for the last crop was only \$1.22 per hundredweight for medium-weight potatoes. He added that the leading processor in the area has offered \$1.31 average per hundredweight on a new contract. Growers who did not contract crops last fall reacted from \$3 to almost \$5 per hundredweight from a market on a field run basis, Funk said. He claimed Idaho processors are importing California potatoes and paying considerably more than is offered in Idaho.

**POCATELLO, March 5 (UP)—**Deb Young, dean of boys at Pocatello high school and veteran in teaching and coaching, has resigned effective March 15 to accept a post with the office of economic opportunity's job corps. He will take a two-week course at Portland before moving to Oquirrh, Wash. He has been in charge of agriculture work at Pocatello high school. Young has been with the organization camp for youth operated by the state of Idaho. During the past year he was director. He has been engaged in school work since 1932.

**REXBURG, March 5 (UP)—**The Rexburg city council granted a 30-year franchise to Intermountain Gas company Wednesday in connection with a 1.5 million dollar proposal to extend a natural gas line from Idaho Falls to Rexburg. The council also took under advisement a request from a Ricks college delegation to construct a separate high pressure water line from the main city reservoir to the city. The council passed the ordinance, providing that the city will receive three per cent of the gross sales. Officials predicted the new line will be ready for operation Aug. 1. Only a week ago, R. K. Rose, president of Rogers Brothers company of Idaho Falls, had announced intention of reopening its 1.8 million dollar potato products plant north of Rexburg this fall, with plans to use natural gas. The plant suspended work in November, 1961, after about a year's production.

### 4-H Builders Club Elects New Officers

**RUPERT, March 5—**New officers have been elected for the 4-H Builders club, according to club officials. Lois Abo was elected president of the group for the new year with Elaine Kraemer, vice president; Linda Butler, secretary; Barbara Jurgensmeyer, assistant secretary; Linda Montgomery, treasurer, and Mary Ann Asson, fifth year.

was Olan Genn, county agent from Twin Falls who spoke on the topic, "What Constitutes a Good Project." Genn pointed out that the projects themselves are already good; but it is what the 4-H member does with it that counts. He also spoke on techniques of leadership. Mrs. Leon Mehlenbacher and Mrs. Paul Pedersen, 4-H leaders, spoke on the development of boys and girls through competition. Dorothy Hois, assistant state 4-H leader from the University of Idaho, spoke on "Effective Demonstrations." All interested persons are invited to attend the 4-H training sessions held each Tuesday evening in the Rupert Orange hall. A banquet will climax the series of training meetings on March 16.

### News of Record

**MINIDOKA COUNTY District Court**  
The court ordered judgment withheld for Glen Morrison, appearing for sentencing on grand larceny charges. Defendant was placed on probation for one year and is liable for any loss sustained for theft of baled hay. The defendant may appear after one year and request dismissal.  
Larry Mickelson pleaded innocent of issuing checks without funds and instead pleaded guilty to obtaining money under false pretenses. Defendant was sentenced to county jail for six months with sentence reduced to 10 days. He was placed on probation for one year.  
James Graves, Heyburn, was sentenced to five years in the state penitentiary for violation of probation. The court committed sentence to 12 months in the county jail with a review ordered in six months.  
William John Miller pleaded innocent to first degree burglary and was given time to obtain an attorney. Hearing was set for the first part of April with Miller free on bond.  
Mrs. Beulah Lukens was denied a divorce from Frank Lukens, both Rupert, because of inadequate proof in the case.  
A default judgment was entered in the case of Idaho Bank and Trust company, vs. R. H. Dunn on two notes, one for \$750.00 and the second for \$1,874.00.  
A default judgment was entered in the case of Western Loan company and Allen Schwandt. Plaintiff judgment entered against the defendant was in the amount of \$574.77.  
The court entered a default judgment in the case of Westcott Oil company vs. Marion D. Wright for \$229.87.

**MINIDOKA COUNTY Probate Court**  
James Brauburger, Rupert, and Richard Jacobsen, Rupert, waived preliminary hearing on grand larceny charges and were bound over to district court. Bond was placed at \$2,000 and the two men are being held in the county jail.  
The Magic Valley Credit Bureau filed civil action against Mac Reyes, Rupert, for \$202.22; Paul Granada, for \$142.90, and Kenneth Altun, \$302.35.  
The Jack Murdock Finance filed civil action against Walter Amen to recover judgment for \$329.20 plus interest and reasonable attorney fees.  
Roper Clothing Store filed civil action against LeRoy Germann for \$1,000 plus attorney fees and costs of suit.  
Marriage licenses were issued to Larry J. Benn, Rupert, and Jane Mary Chase, Paul, and Brent Rex Hamilton and Judy Mae Bott, both Rupert.

**QUAKE HITS ISLAND**  
ST. HELIER, Isle of Jersey, March 5 (UP)—A 2.5-second earthquake hit this English channel island yesterday, collapsing a 30-foot section of pier into the sea and carrying away an unmanned lighthouse. No injuries were reported but the quake shook homes and office buildings.

# Legislature Activity

**BOISE, March 5 (AP)**—A tabulation of county populations shows that the 24 senators who voted against the sales tax bill in the Idaho legislature Tuesday night represent 237,271 persons. The 20 who voted for the bill represent 461,909, about 68 per cent of the state's population. In the house, the 49 representatives who voted for the bill represent 541,300 persons while the 30 opposed represent 183,100.

**BOISE, March 5 (AP)**—A bill intended to benefit small and remote school districts was approved yesterday by the senate. It is a supplement to the house-approved school formula bill that will be on the senate's final reading Tuesday. Sen. Perry Swisher, R., Bannock, said the supplemental formula has two aims. One, he said, is to encourage consolidation of small districts by giving them extra state aid in the first year after consolidation. The second is to give additional state money to small and remote high schools which are in genuine need. The bill gives the state board of education authority to determine which districts need such help. Swisher said that no more than two or three could qualify in a biennium.

**BOISE, March 5 (AP)**—Annual license renewal fees for a wide range of professional people would be increased by a bill passed in the senate Thursday. Sen. J. Cecil Sandberg, D., Bingham, said the increased fees would pay higher cost of examination expense allowances. Increases in licensing board members' had been set for architects, chiropractors, chiropactors, dentists, embalmers, funeral directors, optometrists, osteopaths, psychologists, sanitarians and veterinarians. The fees would be increased to \$8 from \$5 for barbers and to \$4 from \$3 for cosmeticians. The bill already had passed the house and now is ready for the governor's approval.

**BOISE, March 5 (AP)**—The Idaho house's Brothers McDevitt came through with flying colors yesterday. The 69th legislature supposedly the final day of the session. The bill passed by Rep. Larry Mills, R., Ada, to have their pictures taken to be included with those of other legislators, the brothers presented Mills with their photographs. Reps. Herman McDevitt, D., Bannock, and Rep. Charles McDevitt, R., Ada, noted Mills had used nearly every kind of trick and means to have their pictures taken. "Now," said Herman McDevitt, "we have complied with his wishes and if other members of the august body desire reprints we shall be glad to accept orders at commercial rates."

**BOISE, March 5 (AP)**—A bill that would make the state mine inspector an appointive instead of an elective official was started on the floor in the Idaho legislature yesterday. A similar proposal was defeated earlier in the session by the senate but house Republicans revived it in a move that has led to strong partisan feeling in that chamber. Democrats have repeatedly said they believe it is a "waste of time" to reconsider bills defeated by the senate. Republicans contend, however, that it is needed legislation, and used their numerical superiority to pass the measure, 41-37. The bill also sets forth qualifications for a mine inspector, similar to those listed in a senate bill that would keep the office elective.

**BOISE, March 5 (AP)**—The Idaho senate refused yesterday to concur in amendments made by the house to a bill making terms of county sheriffs four years instead of two. A constitutional amendment permitting the change was approved by voters at the general election last November. As passed by the senate, the implementing bill would make the longer terms apply to sheriffs elected in November, 1966. The house changed the measure to make it apply to sheriffs elected last November. Sen. Jack Murphy, R., Lincoln, said if the house plan is accepted it would mean that sheriffs would be elected as presidential-year, whereas county officials would be elected in off years. Murphy said he doubted the wisdom of that procedure.

**BOISE, March 5 (AP)**—Two memorials won approval by voice vote yesterday in the Idaho senate. One urges that the proposed Asotin dam on the Snake river six miles upstream from Lewiston include navigation locks. The other urges the Western Interstate commission for higher education to arrange by contract for a specific number of Idaho students to be accepted in medical schools in other states represented by the commission. Sen. Carl Moore, D., Nez Perce, presented the Asotin dam memorial. He said navigation locks would extend slackwater upstream from Lewiston to provide transportation for minerals and timber. Sen. Jack Wood, D., Bonneville, sponsored the medical school memorial. He said that at present students from Idaho, and other WICHE states which lack medical schools, are finding it sometimes difficult to gain admission to existing medical schools.

**BOISE, March 5 (AP)**—The Idaho senate approved a change in the state's primary election law yesterday that the Democratic party says will give it more control in nominating its candidates. The bill requires candidates for governor, U. S. senator and representative to receive 25 per cent of the votes at a party nominating convention to get their names on the primary election ballot. Sen. Cecil Andrus, D., Clearwater, had said flatly that the bill was intended to prevent nomination of candidates such as the last two Democratic candidates for governor. The candidates—Vernon K. Smith in 1963 and A. M. Dorr in 1958—campaign on pre-gambling platforms and were defeated by Gov. Robert E. Smylie. Both had earned Democratic candidacy under the present law which requires only 25 per cent of the convention votes.

**BOISE, March 5 (AP)**—Idaho's 13 judicial districts would be consolidated into seven by a bill introduced yesterday in the senate. But Sen. Harold Ryan, R., Washington, chairman of the judiciary and rules committee, which introduced the measure, said it was unlikely it could gain enactment in this session. He said it would, however, provide a forum for discussion among Idaho attorneys prior to the 1967 legislature. There would be no reduction in the number of district judges. Six of the proposed seven districts would have three judges each and one district would have four judges. Ryan's committee also introduced a bill revising the nominating procedure under the nonpartisan judicial election law. The bill would authorize incumbent district judges and supreme court justices to seek reelection simply by filing a declaration of candidacy. Supporting petitions signed by electors would not be required.

**BOISE, March 5 (AP)**—The Idaho house rejected 37-39 yesterday a senate-passed bill which would have created an Idaho Underground Water Users and Pumpers association. Opponents of the measure said they didn't have enough information on it and one pictured it as a scheme to provide funds for political purposes. "There appears to be a tremendous amount of money being collected by the commission which could be used for political purposes," said Rep. Vernon Ravenscroft, D., Gooding. Ravenscroft also said he felt the commission's services would be a duplication of those provided by the University of Idaho college of agriculture. Rep. Phil Batt, R., Canyon, said he was opposed to the bill because he did not believe many of the 6,000 to 8,000 pumpers in the state had been fully informed about the bill and its implications. "I believe," he said, "this should have been put before the pumpers in referendum form so pumpers could state whether or not they favored the forming of a commission."

**Youth Bruised As Motorcycle and Car Collide**  
A 15-year-old Twin Falls youth escaped serious injury Wednesday afternoon when the motorcycle he was riding collided with a car on Main avenue west. Clifford C. Saunders, 15, 1336 Poplar avenue, was riding a 1963 motorcycle from Eighth street onto Main avenue west when the two-wheeled vehicle collided with a 1964 Mercury driven on Main avenue by Mrs. Doris Hendrix, 23, 261 Addison avenue.

According to city police Saunders was only bruised and did not require hospitalization. No citation was issued.

**Workshop Set**  
WENDELL, March 5 — The Wendell Art group will sponsor a workshop from 9:30 a.m. to 3 p.m. Monday at the Civic club rooms in the city hall. Figure drawing with live models is scheduled. Those attending are to bring easel, paint, water colors, charcoal and their lunch. Coffee will be furnished. There will be special arrangements to be used for future exhibit expenses.

DALLAS, Tex., March 5 (AP)—The Miss Tan America pageant, the first nationally sponsored Negro beauty pageant, will be held in Dallas April 7-10. Local, regional and state winners are now being selected through pageants in 66 cities to compete here for "Miss Tan America 1965."

**Flu Epidemic In U. S. Is Decreasing**  
ATLANTA, March 5 (AP)—The influenza epidemic that swept much of the United States is now on the decrease, the U.S. communicable disease center reported today. A spokesman said all geographic areas except for the New England states are now well below the epidemic threshold. The New England states continue to have excessive mortality from flu and pneumonia, the CDC spokesman said. But the Middle Atlantic states, previously well above the epidemic threshold, are now within normal limits. Only new state added to the list this week was Georgia which was reported to have experienced a widespread outbreak of respiratory diseases during the past several weeks. Flu virus has been isolated in Atlanta during the past week.

**Couple Asks \$14,881 in Damage Suit**  
Mr. and Mrs. Robert Alworth, Twin Falls, filed a \$14,881.73 suit against Selmar Thompson and Annabelle Thompson, Buhl, which stemmed from a two-car accident Oct. 25, in Twin Falls. Alworth was driving a 1960 International pickup truck on Addison avenue and stopped to let a vehicle in front of him turn into the Arctic Circle drive-in. After he stopped, his truck was struck from the rear by a vehicle driven by Annabelle Thompson and owned by Selmar Thompson. Mrs. Alworth was reported injured in the accident. The Alworths are asking \$4,800 for loss of work by Mrs. Alworth; \$4,800 for pain and suffering incurred and \$5,281.73 medical expense. In the suit they are also asking for \$100 future medical expense and \$113.73 damage to the auto.

**Legislative Log**  
Introduced in Senate  
SB241 (Judiciary and rules) — Revising judicial districts by consolidating present districts into a total of seven.  
SB242 (Judiciary and rules) — Revising nonpartisan judicial election law to provide varying nominating procedure for incumbents and for challengers.  
SB243 (State affairs) — Authorizing mutual fire insurance companies with surplus of \$50,000 to collect assessments on advance premium basis.  
Passed by Senate  
SJM8 (State affairs) — Urging that navigation locks be included in Asotin dam on Snake river upstream from Lewiston.  
HJM7 (Education) — Urging western interstate commission for higher education to conduct negotiations with medical schools aimed at a reciprocal agreement.

**Wall Burns**  
BUHL, March 5 — The Buhl fire department answered a summons to the John McCallister residence, 625 Ninth avenue, when an overhead oil stove set fire to the wall around the chimney around 5:30 p.m. Wednesday. Damages were limited to the wall, according to local fire officials.

# TELEVISION SCHEDULES

**SATURDAY, MARCH 6**  
"The King Family," (5:30 p.m. ABC) — The group has a bundle of new songs and new sets, with the spotlight on the singing King Sisters.  
"The Entertainers," (7 p.m. CBS) — Ed Wynn, actor-comedian, is featured guest tonight. He and Carol will do a parody on "Cinderella."  
"Gunsmoke," (8 and 9 p.m. CBS) — Jean Arthur makes her television debut in the role of a former New Orleans saloon owner who finds herself torn between the love of her outlaw son and her newborn grandson. This is Miss Arthur's first role since she appeared in the classic 1953 western, "Shane."  
"Hollywood Palace," (9:30 p.m. ABC) — Eddie Fisher is host, with guests Connie Stevens, Jack Carter, the Marquis-Champs and the Airline Korean ballet.

**BEST SATURDAY NIGHT MOVIES**  
"Battleground," (1949) Van Johnson, John Hodiak, George Murphy, Denise Darcel, Ricardo Montalban and Marshall Thompson (8:30 p.m. KUTV, KIFI and KBOI) — World War II drama of the 101st airborne division's stand at Bastogne. Well-made and exciting.  
"It Happened to Jane," (1959) Doris Day, Jack Lemmon and Ernie Kovacs (7:30 p.m. KCPX) — Delightful little comedy with Doris portraying the widowed owner of a lobster farm in Maine. She becomes a nationally-known celebrity when she sues a railroad tycoon. Good performances.  
"Francis," (1950) Donald O'Connor, Patricia Medina and ZaSu Pitts (10:30 p.m. KUTV) — Hilarious movie, the first of a popular series involving the famous "talking mule." But Francis manages to get into more trouble than his TV counterpart — Mr. Ed. Entertaining flicker.

**SATURDAY, MARCH 6, 1965**  
Information below is given the Times-News by stations and questions should be directed to the station concerned. (Note: "TBA" indicates program is To Be Announced.)

# JEROME OUSTS WILDCATS FROM A-2 MEET

## Tigers to Host Gooding In Finals Tonight After Lopsided 64-42 Victory

JEROME, March 5—The Jerome Tigers held the Filer Wildcats to only two field goals in the first half Thursday night and earned a shot at the fourth district A-2 title with Gooding Friday night and a lopsided 64-42 victory. It was the teams' second meeting and Filer's second loss of the tourney. The Tigers took an 8-3 first period lead on two buckets by Bob Thackeray and one apiece from Mel Tinker and Clarence Phillips while the Wildcat scoring came on charity shots by Lloyd Garey, Steve Sharp and Lindsay Johnson.

## Hagerman Continues Winning in A-4 Meet

GOODING, March 5—Hagerman's Pirates became the only undefeated team remaining in the fifth district A-4 basketball tournament Thursday night by dropping the Dietrich Blue Devils 62-52 in the feature of a triple-header. That was the only tight game of the night as Camas County massacred previously-ranked Bruneau 62-35 and Bliss hammered down suddenly punchless Carey 75-59. Unlike other tournaments, Hagerman will have to remain in action Friday night and that stipulation will pit the co-favored clubs, Hagerman and Camas County, in the fourth night game.

## Terrell Still Holds as 7-5 Bout Favorite

CHICAGO, March 5 (AP)—Tall Ernie Terrell of Chicago held steady Thursday as a 7-5 favorite over Eddie Machen for their World-Boxing association heavy-weight title bout Friday night.

The 15-round bout will be held at the International Amphitheater. The WBA stripped Cassius Clay of recognition because he agreed to a rematch of the WBA's no-return-bout rule. The second Clay-Liston fight is slated for May 25 at Boston.

Terrell has a 36-4 record since he turned pro in 1957. The 25-year-old fighter's chief accomplishments have been 10-round decisions over Cleveland Williams and Zora Polley in 1953. His last start was a six-round knockout of Henry Walltisch in St. Louis last Oct. 23.

Machen, 32-year-old father of four, has had a roller-coaster career, even though marred by only five defeats in 54 bouts. His fifth defeat came in his most recent start, a 12-round against former champion Floyd Patterson in Stockholm last July 5.

Machen, noted as a cautious boxer although he has scored 20 knockouts, also lost to two other former champions, Ingemar Johansson and Liston, as well as to former light-heavy champion Harold Johnson and Polley.

Clay entered the game with the district's top scoring quintet and was beaten at its own game by Bliss. The Panthers managed only five points in a frigid first quarter while Bliss was rolling up a 13-point lead. From then on the game was a matter of being played out.

Camas County held a fairly comfortable lead throughout the first half and then turned it into a rout with 20 points in the third quarter against Bruneau.

# VIKINGS TEST PILOTS IN A-3 FINALS

## Valley Eliminates Shoshone With 61-53 Decision

SHOSHONE, March 5—The Valley Vikings strove into the fourth district class A-3 tournament final Thursday night with a 61-53 victory over the cold Shoshone Indians. Valley now goes against Glens Ferry Friday night in the Shoshone gymnasium with the Pilots needing only one victory to wrap up the title.

Only one of the teams will advance to the state tournament at Caldwell. Valley jumped into a comfortable lead in the first quarter when the Indians opened ice cold and managed only eight points. The Vikings, getting big points on inside drives by Rick Kelly and the all-around gunning of Lawrence Huettig, used that period to fashion a 10-point lead and then roared into a 17-point margin at intermission.

Shoshone started warming up in the third period and pulled to within eight points at the quarter rest. Early in the fourth quarter Larry Haddock hit two quick buckets and Pat Lecrurn added another field goal as Shoshone cut the margin to four.

But that was the last Shoshone shot as Valley straightened out with some clutch shooting and then matched buckets over the final minutes.

In the Jayvee portion of the tournament, Valley dumped Wendell 87-81 for the title. Wendell will play Shoshone for the runner-up trophy beginning at 6:45 p.m. Thursday.

## Wall Shoots Record 65 to Lead Tourney

MARACAIBO, Venezuela, March 5 (AP)—Art Wall, former Masters champion from Pocono Manor, Pa., shot a course record 65 Thursday seven-under-par, and took the lead in the first round of the Maracaibo open golf tourney.

Wall, last year's over-all winner on the Caribbean tour, hit his seven birdies and 11 pars in his second round over the Maracaibo Country club course, hitting all but one green in regulation figures.

He had birdies on the fourth through sixth holes, 10th, 12th, 13th and 18th holes, and had only one really long putt, a curling 20 footer on the 13th.

But even that superb display put him only one stroke up on young Jay Dolan, whose excellent putting brought him five birdies in a row starting at the fifth and a first round total of 66.

Locked at 87s were blond Al Bealnik, winner of last week's Caracas open and current leader in overall-points, Bob Ross of North Hills, Pa., and Archie Dadian of Milwaukee.

## Clay Wants Machen or Terrell Bout

MIAMI BEACH, Fla., March 5 (AP)—The manager of Cassius Clay, the man who won the heavyweight boxing championship in the ring, said Thursday Clay wants to fight Ernie Terrell, Eddie Machen and any other logical contender.

But Angelo Dundee dismissed as hearsay reports that a Clay spokesman had proposed a September bout between the champion and the winner of Friday night's Terrell-Machen fight at Chicago.

"One mind is wide open," Dundee said. "Clay wants to be a fighting champion. He tells me to 'just line 'em up.'"

"We are interested in all offers. We'll fight Terrell, Machen, Floyd Patterson—anybody."

The Terrell-Machen fight is for the World Boxing association version of the heavyweight title. The WBA lifted Clay's crown after he agreed to a rematch with Sonny Liston for May 25 at Boston. Clay remained the champion in New York, in Massachusetts and in popular opinion.

## Rangers Defeat Bruins

BOSTON, March 5 (AP)—Gene Rattelle's second goal of the game, a deflection with less than five minutes remaining, capped a New York comeback for a 4-3 victory over Boston Thursday night.

# BURLEY NIPS MINICO, GAINS STATE BERTH

## Bobcats Invade T.F. Tonight in A-1 Hoop Finals

RUPERT, March 5—Senior John Schorzman hit a free throw with 12 seconds left to let the Burley Bobcats withstand a garrison finish by the Minico Spartans in a 57-56 victory Thursday night. The squeaker, which saw Burley holding an 11-point lead with less than three minutes remaining, put the Bobcats in the state A-1 tournament at Pocatello and gave them the right to meet the Bruins at Twin Falls for the regional championship Friday night.

### Bowling

**MAGIC BOWL**  
Ladies Tag League:  
Gen. State Paper defeated Drive Market 4-0; Myrtle defeated Jensen's Jewelers 3-1; Stella defeated Old Hall Construction 3-1; Boyd's Cafe defeated Russ Wells Trucking 3-1; Albertson's defeated Haselton 3-1; Bertway Bldg. 3-1.  
High individual game, Norma Fine, 107; high scratch team game, Norma Fine, 499; high handicap team game, Norma Fine, 164; high handicap team series, Gem State Paper, 213; high handicap team series, Haselton, 213.  
Triple series bowled by June Cooper. Bonnie Lines was bowler of the week with 465; Mary Jensen picked opponent and Mary Anderson picked 4-10 split.  
**Valley League**  
Habo Frozen Foods defeated Langley 3-1; Perrine, Leona defeated Shrin's club 3-1; Kay's Scarlet Lounge defeated Union Motors 2 1/2-1 1/2; Asa Production defeated Times-News 1-1; Dean's Electrical defeated Haney 3-1; United Electronics defeated Sealed's 3-1.  
High individual game, Tom Roberts, 110; high handicap team game, Tom Roberts, 461; high handicap team game, Dean's Electrical, 3130.  
Stallite League  
KTYI defeated Sapphire Lounge 4-0; Young's defeated Tavern 3-1; Yule's defeated Fox Floral 4-0; Depot defeated Royal Lounge 3-1.  
High individual game, Gail Quinn, 107; high handicap team game, Bertie's, 893; high handicap team game, Bertie's, 2287; high handicap team series, Bertie's, 2788.  
Connie Willman bowled three consecutive games of 151.

But Minico regained possession when Schorzman missed two free throws and Kerbs hurried down court for another clutch bucket and this time he tacked on a free throw to complete a three-point play.  
That came with 18 seconds left and cut the margin to 66-64. On the ensuing inbounds pass, Schorzman was fouled and awarded two free throws. He missed the first but canned the second one.  
That proved decisive as Minico again hurried downcourt, missed long shot but Rich Nielsen was there to put the rebound through with four seconds left. After that Burley was content to hold the ball out of bounds and let the clock run out.  
Less than five points separated the two teams throughout the first half, although Burley held sway much of the time. The big difference in the game came early in the fourth quarter when Russ Mallory Jones and Church hit nine points with only one Minico reply to open up an 11-point lead.  
Twin Falls jayvees whipped Burley in the preliminary and will meet Minico at 6:30 p.m. Friday for the sophomore title.

# MURTAUGH LEADS IN ROUND-ROBIN MEET

JUST THE OPPOSITE of what appears to be the case is pictured in this sixth district A-1 action at Murtaugh as the seemingly shooting Jerry Hopwood, Castleford, grabs a rebound over the outstretched hands of Murtaugh's Brian Ward (10). Others pictured are Castleford's Nolan Carter (24) and Phil Blick and Murtaugh's Del Rose (14). Murtaugh won 69-57 to become the only undefeated team in the tournament. (Times-News photo)

## SPORTS

### Montana State Nips Utah State

BOZEMAN, Mont., March 5 (AP)—Sophomore Bill Gillespie drove for a last-second basket to give Montana State a 71-69 victory over Utah State Thursday night, the windup for both clubs.  
Montana State finished with a 15-10 season and the Aggies 12-12.  
The game was tied 69-all for the last minute of play, with 13 seconds left, the Bobcats took a time out. Gillespie took a long shot from the corner and missed, but he got the rebound and drove in for the score.  
Utah State had a 69-67 lead with two minutes left. Bob Gustafson, MSC center, left in a rebound to tie the game. Utah State tried to go for a last shot but lost the ball on a traveling violation.

### Four Tie for Lead In Pensacola Open

PENSACOLA, Fla., March 5 (AP)—Four players—Jack Nicklaus, Doug Sanders, Ken Nagle and Dave Marr—tied for first place with four-under-par 68s Thursday in the opening round of the \$65,000 Pensacola open golf tournament. Nicklaus, who played the compact, 6,142-yard Pensacola Country club layout in the morning, had the lead all to himself with six birdies until the afternoon rounds came really got me going," he said. Nagle, who said he has been having trouble with his driving, chipped and putted well, going down with one putt on the first six holes.  
Nicklaus bogied only the second and ninth holes despite a strong wind that sent temperatures into the low 40s.  
WINS FEATURE  
ARCADIA, Calif., March 5 (AP)—Admirably performed in just that way Thursday to win the featured \$15,000 Arhoretum Foundation purse at Santa Anita.

### Weber Rips Gonzaga for Big Sky Title

OGDEN, Utah, March 5 (AP)—Weber State college Wildcats won the Big Sky conference basketball championship Thursday night by defeating second-place Gonzaga university 86-67 at Ogden.  
The Wildcats opened up a close ball game midway in the first half on the inside shooting of Eddie Tillman and Gene Vischer.  
In the second half the new Big Sky champs continued to hold their lead, and increased it to 19 points on two occasions.  
Big Sky guard Jerry Trice was Weber's high point man, with 24 points, most of them coming from close in shots. Vischer ended up with 10, and did a tremendous defensive job on the conference's leading scorer and rebounder Gary Lechman.  
Lechman scored only 11 points in the game. Eddie Tillman tallied 17 for the Cats, and was the game's leading rebounder with 18.  
Weber's lone senior, John Silbernagel, leading scorer in the last three contests, got into foul trouble early and left early with only three points. He received a standing ovation for leaving the games on fouls and completing his collegiate career.  
Gonzaga's John Brodsky scored 25 points to take game honors; most of his baskets coming on far-out jumpers.  
The Wildcats ended the season 8-2 in league play and had an over-all 22-3.

### Devils Smash Cold Castleford For Key Victory

MURTAUGH, March 5—Catching Castleford ice cold in the opening quarter, the Murtaugh Red Devils ran off with a 69-57 victory Thursday night and took the inside track on the sixth district A-1 basketball championship. In beating the Wolves, Murtaugh became the only undefeated team in the round-robin schedule. They need a win over Hansen Friday to clinch the championship. Castleford sits Friday night out. In the second game of Thursday night, Hansen ran over Raft River 77-59.  
But the feature was the opener. Castleford opened well, hitting its first two shots from the field and then struggled through seven minutes, 47 seconds before getting another field goal.  
In the meantime Murtaugh, icy at the start, began warming up and by the end of the quarter was driving the Devils pushed on top 17-4 and they blew that into a 22-point lead just before halftime.  
Castleford finally began hitting in the third quarter but could do no better than match baskets. The Red Devils still had 20 points left to open the final quarter and coach Devon Anderson went to hit bench.  
The Wolves quickly went to work on the second unit and whittled the count to eight points before the first team came back in to clinch it.  
All five starters for Murtaugh hit in double figures, headed by sophomore Jim Hopper with 15.  
Raft River gave Hansen trouble throughout the first half but fell back rapidly in the third quarter. With four men hitting in double figures, Hansen pushed a six-point intermission to 15 in the third quarter and coasted in Jerry Johnson and Larry Anderson combined for 41 points to pace the attack.

### Vandals Eye Trophy, Win Over Bengals

UNIVERSITY OF IDAHO, March 5—King Spud is the object of the Idaho Vandals' affection this week-end as they travel to Pocatello in defense of the perpetual trophy awarded annually to the winner of the Idaho vs. Idaho basketball series.  
Idaho took a big step toward retaining the bauble last weekend in a record-smashing 120-94 victory over the Bengals in Boise. The trophy has never left Moscow since it was first put into circulation during the 1961-62 season.  
It goes to the team winning the series, or, in case of a tie, the one with the largest margin of victory in the two-game match. With a 28-point cushion the Vandals are in good shape. However, another victory would cement Idaho's fourth-place finish in the Big Sky conference standings as it closes league play on Friday night.

### St. Louis, Bradley Fill NIT Field

NEW YORK, March 5 (AP)—St. Louis university and Bradley, the second and third-place basketball teams in the Missouri Valley conference, accepted invitations Thursday to play in the National Invitation tournament, completing the 14-team field.  
The NIT opens in Madison Square Garden March 11 and runs through March 20. Bradley will defend the tournament title it won last year by beating New Mexico 80-54.  
St. Louis, 17-7 for the season, has an outside chance to tie Wichita for the Missouri Valley championship and Johnny Bach, Fordham coach who is chairman of the NIT selection committee, did not say how the Garden tournament would be affected if this should happen. The conference champion automatically qualifies for the NCAA tournament.  
Teams previously named for the tournament are, Boston college, Villanova, Detroit, St. John's of New York, Texas Western, New Mexico, Army, Western Kentucky, New York university, Fordham, Manhattan and LaSalle.  
Villanova and New Mexico were seeded 1-2 and drew byes into the quarter-final round.

### Big 10 Polices Loop Athletes

CHICAGO, March 5 (AP)—The Big Ten officially approved Thursday a ruling that a conference athlete will lose all eligibility if he competes in an event not sanctioned by the NCAA-sponsored sports federations.  
The NCAA is in a moratorium feud with the Amateur Athletic Union over sanctioning of national competitions.  
Actually, Big Ten leaders—meeting in a regular business session—formally okayed a policy first adopted last spring, but which required review by the individual league members.  
If a Big Ten athlete enters a competition not sponsored by the federation, he will forfeit all remaining eligibility, as well as financial aid which is renewed yearly.

### Canadiens and Leafs Tie 2-2

MONTREAL, March 5 (AP)—Claude Provost's 25th goal of the year gave the Montreal Canadiens a 2-2 tie with the Toronto Maple Leafs Thursday night.  
The tie moved the Canadiens into sole possession of second place, two points behind league-leading Chicago and a point in front of idle Detroit. Forth place Toronto is five back of Detroit and eight behind Chicago.

**HITS RECORD SIZE**  
KANSAS CITY, March 5 (AP)—The National Collegiate Athletic Association said Thursday its membership had increased to a record high of 628 with the addition of 12 new members.

...AND YOU OF THE VIET CONG TOO! SO CLEVER WITH YOUR FERY DRAGONS IN THE NIGHT SKY!

WHO CANNOT MAKE A DRAGON FLY IN THE NIGHT? EVEN I, TUY TAM, CAN DO THIS! WATCH ALL OF YOU!

THEN THE CHOPPER CLIMBS TO A HIGHER ALTITUDE AND... BOMBS AWAY!

Stocks NEW YORK, March 5 (U)—The stock market closed sharply lower in active trading today.

However, many early heavy losses were shaved, and the decline was paced by the international oils but they made somewhat of a recovery late in the session.

Steel, motors and chemicals were mostly declined. Aircrafts were also advanced.

General Motors was off nearly a point in a group that was generally off fractions.

Gains of a point or more were posted by U. S. Smelting and Eastern Air Lines.

Du Pont lost more than two points, putting down the average.

Volume was estimated at 6.3 million shares compared with 7.1 million Thursday.

Here was the picture near the close: International oils paced the decline but their losses were reduced as the session wore on.

Jersey Standard, down more than three points at one stage, shaved its loss to a point and a half.

Royal Dutch was down a point, and Texaco about a half.

Hupp, which had an accumulation-of-order appeared headed for the most active list by a wide margin.

Disney and Motorola were strong with Dome and American South African up more than a point and Campbell Bed Lake ahead by a point.

MARKETS AT A GLANCE NEW YORK, March 5 (U)—The stock market closed sharply lower in active trading today.

Grain By WILLIAM A. DOYLE Q. You keep saying that the Dow-Jones Average of 30 industrial stocks is simply an indicator of whether stock prices in general are up or down. Nevertheless, that average rose 99 points last year.

And I suspect that you are right. The Dow-Jones Industrial Average with dollars. This column has also stressed that those points are just statistical points—not dollars.

The Dow-Jones 30 went from 762.95 to 874.13 last year. That was an actual gain of 111.18 "points." The right way to look at that is as an average gain of 14 per cent in the prices of the 30 stocks used in the average.

So, if you go through with your plan and the D-J 30 does go up 14 per cent, the only thing you will be sure of will be that the total value of the stocks you buy (10 shares of each of the 30) will be up 14 per cent.

I am well aware that the Dow-Jones is the most widely-used stock market average. But I do think that it is ridiculous to be mesmerized by any stock market average.

I bought four new issues of stocks from a securities firm which is in the business of underwriting such issues. All of these stocks are now quoted at higher prices than the prices I paid. But they are very speculative types and I am not in a position to hold them.

I never received my stock certificates. The securities dealer said it would be better to leave the certificates with his firm, so that I could sell in a hurry, any time I wanted to.

Well, I do want to sell. I told the dealer that five months ago, I have told him, again and again. But he ignores me. What shall I do?

A. Repeat your order to sell, just one more time, by registered mail. If you get no action, get yourself a lawyer.

Your letter is a bit different from others that have come in lately about new issues. Some readers are complaining that brokers won't sell them some of the new issues coming out. I'm beginning to wonder if the "hot new issue" craze isn't reviving.

Some of the necessities and sidelines have risen 300 per cent since 1950. And some 40 million Americans, spending varying sums for modest garden plots or for huge landscaping showpieces, make up the three billion dollar market that is the target of nurserymen, makers of lawn mowers, garden tools, insecticides, pesticides, fertilizers and the purveyors of services of various kinds to gardeners whose thumbs are only a pale green.

The Standard Research Institute estimates that the rate of growth in home gardening spending will expand the market to seven billion dollars within 10 years.

A. Repeat your order to sell, just one more time, by registered mail. If you get no action, get yourself a lawyer.

Your letter is a bit different from others that have come in lately about new issues. Some readers are complaining that brokers won't sell them some of the new issues coming out. I'm beginning to wonder if the "hot new issue" craze isn't reviving.

Some of the necessities and sidelines have risen 300 per cent since 1950. And some 40 million Americans, spending varying sums for modest garden plots or for huge landscaping showpieces, make up the three billion dollar market that is the target of nurserymen, makers of lawn mowers, garden tools, insecticides, pesticides, fertilizers and the purveyors of services of various kinds to gardeners whose thumbs are only a pale green.

The Standard Research Institute estimates that the rate of growth in home gardening spending will expand the market to seven billion dollars within 10 years.

Faith and Will to Live By BOB MORGAN

For 17 years as a Hollywood stunt man I lived with danger. I was a good stunt man who had to have three qualifications: good nerves, good physique, and a liking for your job.

Of the three, good nerves are probably most important, for every time you go to work you are in danger. This is the way I think of it. One of the flatcars hit me so hard that it jumped the track.

When they picked me up I understand that I was more like a mangled rag doll than a human being.

My injuries were beyond the scope of a smalltown hospital, so I was rushed by ambulance to Phoenix, 70 miles away. There nine doctors stuggled frantically to keep me alive.

The doctors told me later my heart stopped twice while they were working on me. Something got it going again. By this time a lot of people were praying for me, so maybe it was prayer.

My wife, Yvonne De Carlo, flew to Phoenix. Yvonne stood by that hospital bed looking down at what was left of her husband, and when I mapaged to open one eye I saw her there smiling and telling me that everything was going to be all right.

Now, I have a theory about faith. Faith isn't just believing in God, although it certainly includes that. Faith is also a reaching out toward a goal and believing, despite all the evidence to the contrary, that you can arrive at it, that you will arrive at it.

When I looked up saw Yvonne, I knew I wasn't going to last. I had in my mind not to die. I had a goal. I reached for it and touched it. "Now hang on, Bob," I told myself. I like to think—and I believe it was an act of faith.

For a long time, I hovered between life and death. Gangsters set in; they had to amputate my leg and thigh.

Gradually, I began to come back. I got used to pain, but there were other demons: depression, despair. I found that I didn't want to eat. And so, I had to set myself another goal.

One that food down, Morgan. I'd say to myself, "There's no use achieving the goal of life if you're going to be weak and helpless." So I forced myself to eat—and later to exercise.

NEW YORK, March 5 (U)—Market comment: The market shows no evidence at all of "turning furred" because of the situation in Viet Nam or the steel strike threat, several market letters observe. W. E. Hutton and company says that, on the contrary, investors and speculators "are getting more brave."

The Hutton letter speculates on how large market volume must get before it looks suspiciously like "selling area." Hutton analyst's own estimate is an average of better than six million share a day maintained for the better part of a month.

The January service continues to be quite bullish, saying (1) money conditions won't tighten, (2) the business boom will gather momentum on a broad front, and (3) there will be no general European slump growing out of the sterling crisis.

International statistical bureau says the situation in electronic stocks is favorable now. It says many of them are still selling at what must be considered desirable prices considering the performance and outlook of the industry.

reaching out toward a goal and believing, despite all the evidence to the contrary, that you can arrive at it, that you will arrive at it.

Gradually, I began to come back. I got used to pain, but there were other demons: depression, despair. I found that I didn't want to eat. And so, I had to set myself another goal.

One that food down, Morgan. I'd say to myself, "There's no use achieving the goal of life if you're going to be weak and helpless." So I forced myself to eat—and later to exercise.

The trick, I found, was not to reach for everything at once. Just one thing—a little beyond your grasp—and keep fighting until you touch it.

People have asked me if I am bitter about my accident. How can I be bitter when I've been helped so much by so many people? Blood donors who never had heard of me. Letter writers who never knew me. Doctors and nurses who worked themselves past the point of exhaustion for me. People who prayed for me.

I'm back with my family, now, slowly working out a new way of life. I'm standing up on my artificial leg and hit a golf ball quite a distance. And I think I've been able to help a few people too; people who have encountered tragedy or loss; people who have had to endure the hammer blows of life.

NEW YORK, March 5 (U)—The stock market closed sharply lower in active trading today.

However, many early heavy losses were shaved, and the decline was paced by the international oils but they made somewhat of a recovery late in the session.

Steel, motors and chemicals were mostly declined. Aircrafts were also advanced.

General Motors was off nearly a point in a group that was generally off fractions.

Gains of a point or more were posted by U. S. Smelting and Eastern Air Lines.

Du Pont lost more than two points, putting down the average.

Volume was estimated at 6.3 million shares compared with 7.1 million Thursday.

Here was the picture near the close: International oils paced the decline but their losses were reduced as the session wore on.

Jersey Standard, down more than three points at one stage, shaved its loss to a point and a half.

Royal Dutch was down a point, and Texaco about a half.

Hupp, which had an accumulation-of-order appeared headed for the most active list by a wide margin.

(HELEN) '59 4-door Wagon V8, stick shift, overdrive. Lots of good miles left.	\$ 795	\$ 730
(GRACE) '59 4-door Sedan V8, automatic, sport model. Fry this one.	\$ 895	\$ 695
(OPAL) '63 4-door Sedan V8, stick, overdrive, air, Premium tires. A little fast.	\$2395	\$2185
(MARIE) '59 4-door Sedan V8, automatic. Has been a wall flower.	\$1095	\$1050
(ALICE) '61 4-door Sedan 6-cylinder, stick, overdrive. Doesn't drink much, but it shows.	\$ 890	\$ 750
(RUTH) '59 4-door Sedan V8, automatic. Runs well. Has been around.	\$ 595	\$ 450
(RAMONA) '62 4-door Sedan V8, automatic, air. Rather a showy type, plenty of paint.	\$1895	\$1650
(JUDY) '63 4-door Wagon 6-cylinder, stick, overdrive. Has a record, but no one knows.	\$1950	\$1795
(ANN) '59 4-door Sedan V8, automatic. Quiet, but classy. Social drinker.	\$ 745	\$ 675
(NANCY) '59 4-door Sedan V8, automatic. Not showy, but really gets around.	\$ 995	\$ 850
(DOLLY) '60 4-door Wagon 6-cylinder, automatic. Will go most any time.	\$1095	\$ 850
(VIRGINIA) '61 4-door Sedan V8, automatic, air. Dances a little, likes to shimmy.	\$1295	\$1215
(BARBARA) '62 2-door Sedan 4-cylinder, 4 on the floor. Old enough and big enough.	\$1395	\$1250
(TOOTS) '56 4-door Sedan V8, automatic. Loves 'em and leaves 'em.	\$ 345	\$ 295
(BABE) '60 4-door Wagon Automatic, 6-cylinder. Is separated at the present.	\$ 695	\$ 580
(HAZEL) '55 2-door Sedan V8, automatic. Had the law on this one. Real shaky.	\$ 195	\$ 145
(MABLE) '63 4-door Sedan V8, automatic, air. Shakes, rattles, and rolls maybe.	\$2350	\$1985

# Along Fences and Canals

Lambing is just about completed for the 2,000 sheep at the [unclear] farm five miles north and three and one-half miles west of [unclear]. The sheep will remain at the farm until [unclear] of April when they will be taken to the [unclear] east of the [unclear] where they will graze on [unclear] wheat grass for 30 days before being moved to the summer range in the Black Pine area near [unclear]. The lambs will be sold early in July and the sheep will remain on the range until November when they will be brought back to the [unclear] and put on best top pasture. Triplets are not uncommon at the [unclear] sheds and he reports about three out of five ewes are having twins this season.

Mr. and Mrs. Floyd Dais have purchased the family ranch six and one-half miles southwest of Buhl from Mrs. Ora Dais. However, the Dais family will not move until remodeling work is completed at the ranch. A new basement has been dug and the completed residence moved onto the foundation. The home will feature an addition as well as other remodeling work. The 80-acre ranch will be operated by Mr. and Mrs. Fate Griggs and sons.

Mr. and Mrs. Bruce Peeler have purchased the Floyd Dais residence east of Buhl on highway 10.

Mr. and Mrs. Charles Hill, Jr., who farm southeast of Buhl, have installed a new large aluminum covered machine shed at the ranch.

Mr. and Mrs. J. A. McGraw and family have purchased and moved to a farm northeast of Declo formerly owned by W. D. Yarbrough and family. The Yarbroughs moved to their ranch in the Malta area.

Mr. and Mrs. Arthur Hoeg and family have moved on the place owned by Mrs. DeJores Crookham near Berger. They will farm the place this year.

Ralph Lerman is building a number of new corrals on his farm southwest of Filer.

Keith Strom, Hill City farmer and a member of the state wheat commission, is reported recovering after delicate cranial surgery at Mayo Clinic, Rochester, Minn. His father and his hired man are taking care of his farm and cattle raising.

Milk cows and young cattle on the estate of Mrs. Lella Brown, Tuttle, were sold Monday. The Tuttle Grange served lunch at the sale at the Brown ranch.

Harold Gooch, north Shoshone farmer, received a broken ankle when a cow he was milking kicked him. The animal first kicked him in the ribs and then the ankle. He was assisted by his son, Ivan Gooch, who was in the barn.

Vern Oylar, Garland, Utah, trucked the 33 head of his Shetland ponies to Garland Saturday. The ponies have been at the Albert Smith ranch at Connor in the eastern end of the Elba valley for the last two months and are a part of Oylar's Poe-Wee rodeo stock.

Mr. and Mrs. Marvin Wageman and family moved to north Shoshone this week from Covina, Calif.

## Staff Members at Kimberly Station Author Articles

KIMBERLY, March 5—Staff members of the Snake River conservation research center have recently prepared several technical publications as a result of their research. These studies cover many phases of soil and water problems both in this area and in the region. In order to make the results of the research available for use by the public as quickly as possible several different means are used to get the information into print. Technical society journals and transactions are a common means of publication. U.S. department of agriculture, technical bulletins, information bulletins and conservation research reports are also prepared. USDA bulletins are available from the extension service, soil conservation service, U.S. government printing office, and from the authors.

A supply of bulletins and pamphlets which were authored by staff members at the Snake River conservation research center and published are available at the center. Publications which have recently been prepared include three USDA conservation research reports by M. E. Jensen. These are on the subjects "Effects of alfalfa, crop sequence and tillage practice on intake rates of pullman silty clay loam and grain yields," "evapotranspiration and soil moisture-fertilizer interrelations with irrigated winter wheat in the southern high plains" and "evapotranspiration and soil moisture-fertilizer interrelations with irrigated grain sorghum in the southern high plains." These will be published soon. Jensen also assisted in preparing two chapters in an American Society of Agronomy book on "Irrigation of agricultural lands."

A. Bowers has written an article which has been accepted for publication in "Soil Science." The article is in the subject "Transmission of radiant energy from plants."

A. S. Humphreys co-authored USDA technical bulletin No. 1309 on "hydraulics and geometrical relationships of hydraulic structures."

Humphreys and A. R. Robinson also teamed to write a chapter in the American Society of Agronomy book "Irrigation." This chapter is titled "water control and measurement on the farm."

C. H. Fair was an author of a report published last month in Agricultural Engineering Journal. The article "community-type sprinkler irrigation systems" dealt with systems designed to serve several farms at one time. Another article which Fair helped to prepare is being published in the transactions of the American Society of Agricultural Engineers on "measurement of intake rate for sprinkler irrigation design."

Warren W. Rasmussen along with two University of Idaho faculty members, G. C. Lewis and M. A. Fosburg, authored a recent U.S. department of agriculture publication on "improvement of slick spot soils in southwestern Idaho." Rasmussen has prepared several other reports not yet published dealing with the reclamation of saline-alkali soils.

A. R. Robinson has prepared two reports on water measurement which have been accepted for publication. One of these on Parshall measuring flumes is to be published in Civil Engineering magazine. The other one "water measurement in irrigation channels using trapezoidal flumes" is scheduled to be published in the transactions of the American Society of Agricultural Engineers.

NORTH DAKOTA QUALIFIES WASHINGTON, March 5—North Dakota has qualified as a modified certified brucellosis free area, the U.S. department of agriculture announced in late February.

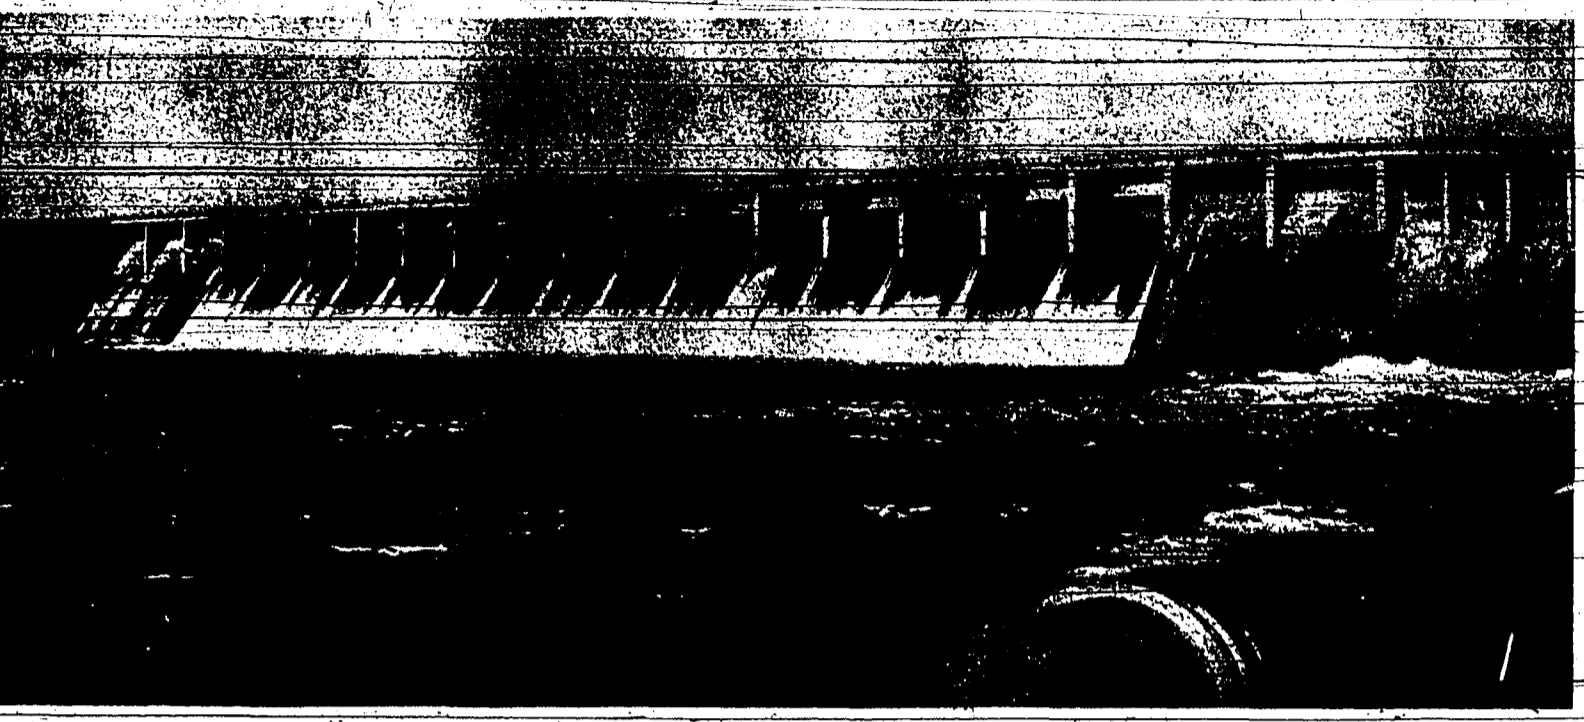

# Farm AND Ranch

Magic Valley's Week-End Farm Paper

SECTION

March 5-6, 1965  
Twin Falls Times-News 19

SOME 15,000 second feet of water is spilling past American Falls dam this week and the reservoir is nearly full. In recent years there has been discussion about raising the dam to impound water such as this for additional storage and use on other lands such as the Salmon tract. (Times-News photo)

## Trees

Twin Falls County Agent Donald Youtz reminds county residents they have until March 15 to order trees from the University of Idaho nursery. Information can be obtained from the county agent's office.

## Proposal to Alter Dam Affects Half-Million Acres

More than a half-million acres of fertile southern Idaho farmland is directly involved with American Falls dam. The structure is the main regulating and storage facility on Snake river between its source and Shoshone Falls. Anything that affects, alters or changes anything at the dam also affects the half-million-plus acres below the dam. Thus, any discussion to raise or repair the structure is immediately noted in many irrigation districts. In addition, there are the many complicated exchanges of water and original contracts in and around the dam. In a sense, if there was one irrigated structure which could be singled out as the most important to Idaho's agricultural economy it could well be the dam at American Falls. The hopes of the Salmon tract rise in talk to build a higher dam. There has been discussion of an Oakley fan project which would take supplemental water from Snake river, and at one time there was talk of a diversion at Raft river. At present there are eight irrigation tracts in southern Idaho depending on the dam. They are the Twin Falls tract, with 202,708 acres; Northside tract, 159,400 acres; Milner Low Dam, 13,750 acres; Gooding tract, 84,000 acres; Burley irrigation district, 43,000 acres; Minidoka irrigation district, 72,050 acres; Minidoka Northside pump, 14,668 acres; and the Michaud project, 8,068 acres.

## Milk Could Help Oldster's Diet

WASHINGTON, March 5—Too much food and the lack of calcium, available in milk, are two of the major dietary problems of individuals 65 years or older, according to an agricultural research service survey. About one-third of the older people interviewed were overweight, more women than men, and evidently ate too much food, the study revealed. About one-fourth had diets with nutrient deficiencies, most often short in calcium and ascorbic acid. Vitamin-mineral preparations were used in over one-third of the households surveyed, but half of these households were consuming foods that already furnished ample nutrients, it was stated. Others used supplements.

## Scale Damage Is Enormous, Warns Agent

Twin Falls County Agent, Olan Genn says, "damage from several species of scale on shade and fruit trees and shrubs in this area is enormous and now is the time to control this pest." The only way to do a good control job is by use of dormant spray oils before the leaves start out on the trees and shrubs. Now is the time to get the job done, Genn said, because control materials will do damage to plants after the leaves start to grow. There are several materials recommended for use in the control of scale which can be purchased from local suppliers and there are several commercial people who do custom spraying for scale control. Genn says the problem comes from the fact that many people own trees and shrubs badly infested with one or more species of scale and never see it until

the plants begin dying. Oyster Scale for example, Genn said, appears so much like bark on trees that many start dying and the owner still does not recognize it. The three species of scale doing much damage in southern Idaho are Oyster, Cottony Maple and San Jose scale. Cottony Maple scale is most easily detected especially after the shell has raised and a cotton like material begins to show. However, at this point it is too late to control the scale because the eggs have hatched and the young scale have moved out over the plant. Now is the time to inspect all trees and shrubs and where present scale should be controlled by applying a dormant oil. Genn estimates that one or all three species of scale is present in one of every five backyards or farmsteads of Twin Falls County.

When a soil fumigant can raise sugar beet yields by as much as 16 tons an acre, you don't have to say much more.

Ours does. And we won't. Except to mention that Telone soil fumigant has proved itself in tests. Cleared sugar beet cyst and root-knot nematodes from highly-infested sugar beet fields where yields can dip to less than 10 tons an acre. Boosted crops to 26 tons an acre. Telone soil fumigant really controls nematodes for you. And, one preplant application of this clean, clear-flowing formulation should do it. Enough said? Your Dow Farm Chemicals supplier has Telone soil fumigant. Test it yourself. The Dow Chemical Company, Agricultural & Industrial Bioproducts Sales, Midland, Michigan.

# Meat Index For Idaho Decreases

**BOISE, March 5**—The index of meat animal and poultry numbers in Idaho farms, as reported on Jan. 1, was two per cent below the record index for Jan. 1, 1964.

The Idaho meat animal and poultry index, based upon the economic importance of each species in the 1956-59 period, was 167.7 on Jan. 1, compared to the record high of 171.1 for Jan. 1, 1964.

The number of all cattle and calves on hand Jan. 1, totaled 1,508,000 head. This is a two per cent decrease from last year's record high, but still 1 per cent above the 1959-63 average for Jan. 1, 1964.

All beef classes show increases over last year except other calves and steers one year.

All sheep numbers totaled 1,049,000 head—an increase of 4,000 head from Jan. 1, 1964. Stock sheep numbers were unchanged from a year ago and remain at the lowest level since 1964.

The number of hogs and pigs on hand Jan. 1, 1965 is estimated at 121,000 head—a eight per cent less than last year and 10 per cent less than the five year average. The Jan. 1 total this year is also the smallest since 1965.

An estimated 1,829,900 chickens were on Idaho farms Jan. 1. This is a decrease of three per cent from the previous year and is five per cent below the five year average.

The gross value of livestock and poultry, excluding turkeys, on hand Jan. 1, was placed at \$200,636,000. This is 11 per cent below a year earlier and 12 per cent below the 1959-63 average.

The average value per head for all classes of cattle and all chickens was below both a year ago and the five year average, while the average value per head of stock sheep was above both a year ago and the average. The average value per head of all hogs was slightly above a year ago, but well below the five year average.

# Feed Grain Exports Are Increasing

**WASHINGTON, March 5**—U.S. feed grain exports continued their upward trend in the first 10 months of fiscal 1965, according to a statistical report by the foreign agricultural services.

Exports of U.S. feed grains total 8.7 million metric tons in the first six months of fiscal 1965. This was nine per cent above exports for the same period a year earlier. All shipments were high with the exception of oats.

Corn exports of 6.5 million tons were up 11 per cent from the previous year. Sorghum grain exports of 1.4 million tons were up slightly from the previous year. Exports of oats totaled 42,000 tons, down 25 per cent from the 56,000 tons shipped during July-December, 1963. Barley shipments were up 13 per cent.

# Rural Roads Aid Traffic Losses

**WASHINGTON, March 5**—Rural roads and highways were targeted for about 75 per cent of all U.S. traffic fatalities in recent safety statistics compiled by the council on rural health. One major reason given was the danger inherent in slow moving vehicles.

"In this particular category are such things as tractors, self-propelled farm equipment, and animal-drawn vehicles, all of which present certain problems in traffic safety," the council said.

**SIGN ON FENCEPOST** illustrates that all isn't rosy down on the farm. National Farmers organization county chairman have been pointing out to their groups that farmers are not starting in the prosperity boom. (Times-News photo)

# Farmers Do Not Enjoy Prosperity in Comparison, Says Area NFO Chairman

**JEROME, March 5**—Love Spenser, Jerome county National Farmers organization county chairman, said today that farmers do not generally enjoy the prosperity which abounds in much of the United States. The farmer is in the spot where practically every farmer would be classified in the bottom half of the nation's prosperity, said Spenser.

"The economic opportunity act of 1964 provides for eight programs. Each one of the programs is an approach to coming to grips with poverty. In a beginning and nothing is intended to belittle the effort that has been started. Let us observe a number of facts in the relationship to agriculture and the small rural farmer," said Spenser.

"The rural farm families, comprising seven per cent of all families in the United States, but accounting for 16 per cent of all poor families, receive 35 million dollars, or 1.5 per cent of the total money provided in the act.

"From 1951 through 1963 national income has undergone an increase of 1,136.5 billion dollars more than it would have been had the 1951 national income remained constant.

"The rural farm families have not enjoyed even one penny of the 1,136.5 billion dollar expansion in national income from 1951 through 1963. To compound this loss, they have actually contributed 33.5 billion dollars that they might have earned had their earnings remained even stable with the 1951 level. Every other segment of the economy did participate in this expansion as profits, without exception," said the local chairman.

The results are apparent: 4.2 million rural farm and rural non-farm families comprising 16 per cent of all poverty families are living in real poverty, and the other rural and non-farm families are living in relative poverty.

"In the past 13 years, while society was led to believe that farm-price supports were a subsidy to the farmer, agricultural underpaid 323 billion dollars. Underpayment is based on a comparison for gross farm income with the principal cost factors in operating our economy as computed in the national income as total wages and salaries and net interest.

"As the newly earned income from farm production was reduced the effect was to force the economy as a whole to operate at a heavy loss and substitute

been pointing out to their groups that farmers are not starting in the prosperity boom. (Times-News photo)

# High Seller

**GOODING, March 5**—Andy Kendall, Gooding, had the high-selling bull at the recent Gooding bull sale. It had been reported to the Times-News that a bull sold by Blaine Curtis, was the high seller.

Kendall's bull sold for \$1,075.

# Dossett Named Land Bank Chief

**Federal land bank association of Twin Falls stockholders re-elected Elmer Dossett, Twin Falls, and elected Melvin Jagels, Clover, to the FLBA's board of directors.**

Dossett was elected association president at an organization meeting of the board following the stockholders' session. Clarence Hollifield, Hansen, was named president, and W. R. Nutting was re-elected manager. Walter Reese, Castorford, Hollifield, and W. M. Whitlington, Eden, are holdover directors.

quarter of 1965 are going to be the highest in history, at a time when food processing and retailing will show the highest profits in history," said Spenser.

"The president of the Independent Bankers association, said 'Every time we lose 10 or 12 farmers, we lose the people, who would spend the income to sustain one average small size town business, roughly \$100,000, which would represent the total gross income of farm families involved.'

Spencer noted in spite of the fact that the remaining farmers are operating larger farms and spending more for operating costs, the community is still hurt. Ten fewer farm families means 30 fewer people to buy shoes and groceries and other necessities. This smaller profit is spread throughout the community just a little thinner so that everyone is operating on less profit."

"Magic Valley is a typical example and business men in the Valley report 33 per cent less volume in 1964 than in 1963."

# Report Shows Agencies Intend to Buy 3.3 Million Acres in 5-Year Period

**WASHINGTON, March 5**—A congressional report indicates that federal agencies expect to acquire about 3.3 million acres of land in the next five years during a five-year period ending Dec. 31, 1969.

The federal land-buying program would be at an annual rate of 666,667 acres. Virtually all of the land the agencies expect to acquire is rural and agricultural land. Only 11,111 acres are in urban areas.

The biggest buyer will be the defense department, according to a house subcommittee on public works. The defense department's corps of engineers would be responsible for tying up almost 300,000 acres a year in civil works. The subcommittee said total purchases by defense would average more than 400,000 acres yearly to June 30, 1969.

The interior department probably will be the second largest buyer, taking 211,000 acres a year to Dec. 31, 1969, the subcommittee said. The fish and wildlife service would be the main beneficiary, taking 139,000 acres annually.

The subcommittee said that its study of real property acquisition did not account for emergency programs necessitating heavy accumulation of land.

The subcommittee said the agriculture department's forest service, for example, plans to buy about four million acres with money provided by the land and water conservation fund and wants 25 million acres more, mostly in private ownership, within the exterior boundaries of national forests.

The interior department has plans for 34 new national parks, but there are no definite time-tables or acreage estimates.

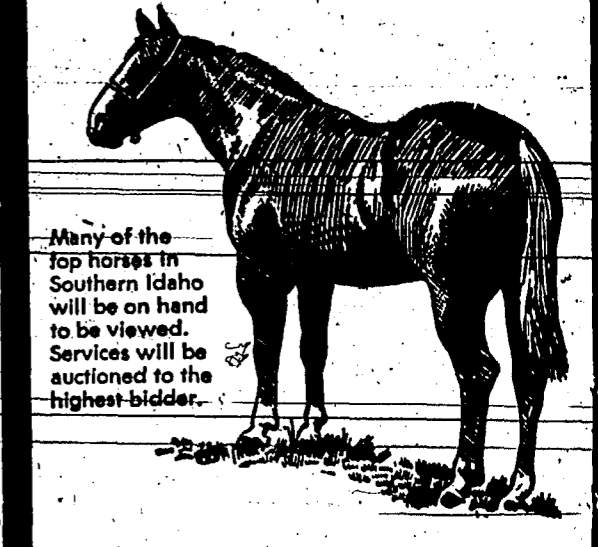

The general services administration has reported that federal agencies as of June 30, 1963, owned 769 million acres. This is one-third of the total land surface of the 50 states. Two-thirds of the total, or 615 million acres, is classified as forest and wildlife land.

The magnitude of the amount of federally-owned land is pointed

**New Program May Affect Dairy Mart**

WASHINGTON, March 5 (UPI)—A government dairy specialist predicted that the common market's new milk program may get heavy pressure on the commercial world market for dairy products.

The new common market program for protecting European prices enters April 1. The protective program will go into effect in stages, reaching full effect by 1970.

Under the program, a so-called "target" or support price will be set for all milk produced in the common market area. There will be no direct price support to farmers, but prices will be kept around the target level by two devices.

One is a system of export subsidies to drain surplus milk out of the European market and into foreign markets.

The second is a system of protective import levies. These will keep outside milk from entering the European community.

Ronald Anderson, an agriculture department expert on dairy trade problems, said the effect of the new system on other countries will depend on the level of the European target price.

Anderson said that if the price is set near the high end of the range now under consideration, milk production in Europe will go up, especially in France. This will increase potential export supplies in France and Holland.

If this happens, Anderson said, the European export subsidy program will have a strong impact on other dairy exporting nations.

The agriculture department specialist said the new common market program will not have much effect on American sales of dairy products to Western Europe.

In the past, the United States has found substantial dairy markets in Europe only on an occasional basis when European production was low and other exporting countries could not fill the gap.

**Near Record Corn Crop Is Reported**

WASHINGTON, March 5 (UPI)—The foreign agricultural service estimates the 1964 corn crop at 7,735,000,000 bushels. This is second only to the record harvest of 8,030,000,000 bushels in 1963.

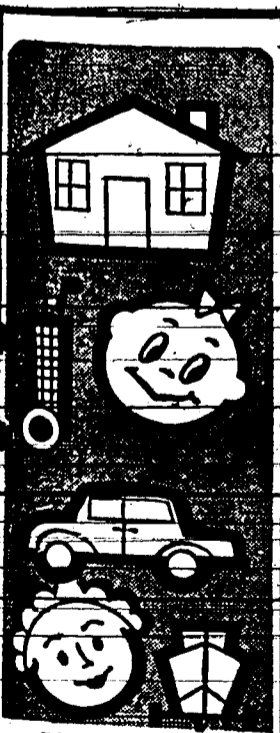

FAS said the predominant factor in the four per cent decline in world production was a 13 per cent drop in the United States crop. The U.S. corn crop in 1964 represented 46 per cent of the world production as compared with 51 per cent in 1963.

FAS said the Western European crop declined moderately because of a sharp drop in output in France. All other major producing areas showed gains.

Corn production in North America last year was 3.93 billion bushels, down 510 million bushels from a year earlier. Production in the United States was down 45 million bushels, due largely to reduced acreage and smaller yields in the corn belt.

Canada had a record crop of 53 million bushels, up 45 per cent from 1963. Mexico also produced a record 263 million bushels, up five per cent from the previous year.

**Western Hemisphere Food Production Dips in 1964; Remains World Leader**

WASHINGTON, March 5 (UPI)—Farm output in the Western Hemisphere during 1964-65 was down significantly from the record production of the previous year, yet the area remains the world's major agricultural supplier.

In a review of the 1965 Western Hemisphere agricultural situation the agriculture department's economic research service said farm exports from Canada, the United States and Latin America to the rest of the world will continue high because of large stocks of most commodities that had declined in output.

Weather kept farm production from matching or approaching the record output of 1963-64.

ERS said both total and per capita farm production for 1964-65 are down. Food production probably is about the same as a year earlier, while most of the decreased output is in export crops. ERS said per capita food output in Latin America is down somewhat from the previous year.

The unfavorable weather in the Western Hemisphere in 1964-65 was widespread. ERS said drought in Canada and the United States cut so deeply into crop production that increased livestock output could not take up the slack. Drought, floods and some frost reduced Latin American output.

Argentina, Brazil, Chile and Costa Rica were the Latin American countries hit hardest by decreased farm production.

Grain production dropped in all major growing regions. The declines included bread grains and feed grains in Canada; feed grains in the United States and all grains in Latin America countries. Other decreases were mostly in U.S. vegetables and tobacco, and Latin American coffee production.

ERS predicted a recovery in farm output during 1965-66, hinging on a boost of normal weather.

The crop reporting board said the number of stocker and feeder cattle and calves shipped into the eight north-central feeding states during January totaled 428,000 head. This was down 19 per cent from the same month in 1964.

Cattle and calves shipped into the eight states during all of 1964 totaled 7.1 million head, seven per cent more than in 1963.

The principal feeding states include Ohio, Indiana, Illinois, Michigan, Minnesota, Iowa, South Dakota and Nebraska.

**1964 Idaho Lamb Crop Decreases**

BOISE, March 5—The 1964 lamb crop in Idaho is estimated at 872,000 head, reports the crop reporting service. This compares with the 1963 crop of 966,000 head and the 1958-62 average of 1,002,000.

The number of breeding ewes one-year-old and older on Jan. 1, 1964, was estimated at 779,000 head, compared to 847,000 a year earlier and the five-year average of 884,000. The percentage lamb crop, number of lambs saved per 100 breeding ewes one year old and over on Jan. 1 was 112. This is two per cent below the 1963 percentage and one per cent below average. However, the current 112 per cent lamb crop ranks second highest in the western states and is exceeded

by only five states in the nation. The 1964 lamb crop nationally totaled 17,905,000 head, a seven per cent decline from the 1963 crop of 19,224,000 head. The 13 western sheep states produced seven per cent fewer lambs than in 1963 and 11 per cent less than average.

The lamb crop in the 35 native sheep states was six per cent smaller than in 1963 and 20 per cent below average.

In Texas, which annually produces approximately 15 per cent of the nation's lambs, the lamb crop was seven per cent below last year and 15 per cent below average.

The western states lambing percentage, at 88, was down three points from the 1963 percentage, but the native states lambing percentage, at 106, was up two points from the previous year.

**Advance Payment Available For Feed Grain Program**

Advance payments again this year are available to growers signing up to participate in the feed grain program, Carl Boyd, chairman, Twin Falls county agriculture stabilization and conservation committee, announced today. \$1 million payments were available under the 1964 program.

According to the chairman, the advance payment will represent one-half of the estimated total diversion payment to be earned under the 1965 program. The rest of the diversion payment and all of the price-support payment earned under the program will be made next fall.

The 1965 feed grain program again covers corn, barley, and feed grain based maximum diversion is 50 per cent of the base crop or 25 acres if this is more.

While participation in the 1965 feed grain program is voluntary, Boyd pointed out, the price-support payments and loans, as well as the diversion payments, will be available only to growers who sign up and carry out the program's provisions.

Signup for the program started Feb. 8 and will continue through March 26.

Each farm has a total feed grain base, representing the combined acreage of the three feed grains grown on the farm. A producer may divert one or more of the feed grains, and his diversion payment will be based on the pre-acre rate which applies to the grain diverted. Minimum diversion under the program is 20 per cent of the total feed grain base.

**PACIFIC CO-OP'S SPRING TIRE SALE!**

Read the Whole Story and Know Why Co-op TIRES ARE THE BEST ALL AROUND TIRE VALUES

**HEY DAD! LOOK AT THAT RUBBER MAKE MILES!**

AT THE **LAREDO TESTS CO-OP. Custom HI-LEVEL**

Tires really make miles around the five-mile circular Texas track at more than normal speeds (80 to 100 m.p.h.), 1000 miles a day, 500 miles to a driver. To "kill" the tires sometimes takes weeks, and they endure tortures of heat build-up, chipping gravel roads, rocky tracks and other brutal tests. They prove CO-OP Tires — and in comparative tests with other major brands the test drivers say "CO-OP Tires are the Stars of the Laredo Run."

HERE IS WHY:

- More mileage is due to premium 12% more tread depth than new car tires; tough, heat-resistant nylon cord; premium long mileage cooler running polybutadiene rubber compound; and C.M.A., the most powerful bond between tread rubber and cord rubber known.
- Greater safety comes through the five-row tread design and thousands of interlocking tread segments which open up when the brake is applied and stop the car now; long cord plies stabilize the casing; and ozonegard protects against ozone, weathering and flex fatigue.
- Premium quality is the sum of many features and gives you a softer ride; a quieter ride on straightaways and curves; and sleek, modern styling.

**TRUCK TIRES That Can Take These Tests Can Give You Top Performance Much Longer**

At the World's Largest Tire Test Grounds at Laredo, Texas . . .

**CO-OP TRUCK TIRES**

**MATCHED EVERYTHING THE MOST EXPENSIVE BRANDS COULD OFFER — AND THEN SOME!**

Heavily loaded trucks brutalized tires on high-speed tracks, on rocky roads, and special punishing hurdles — like the T-rail impact test shown above. CO-OP Tires, matched against the best known brands in the same price class, far outshone competitive tires — in mileage, endurance and recoverability.

**SUPER ALL PURPOSE**

Excellent high-speed highway traction and rough road operation; 1 1/2" better lateral skid resistance; 30% better traction; tough nylon construction; lower initial cost; better recapping.

**HEAVY DUTY**

The quality tire for highway, farm and delivery service in the popular price field. Long wearing tread rubber; shoulder ventilation; rugged carcass.

### Price Index In Idaho Increases

PODS, March 4 — The index received by Idaho farmers rose during the month ending Jan. 15, 1965, to 100 per cent of the 1910-14 average, reports the crop reporting service.

The All Crops Index and the Livestock and Livestock Products Index both show a considerable improvement over last month.

The All Crops Index, which continues the steady increase of the past five months — showing the first rise since 1953, and 11 point increase from 89, to 100.

When compared with Jan. 15 of last year, an increase of 11 points is noted.

The Livestock and Livestock Products Index improved eight points during the month to 278 per cent of its 1910-14 average. The 1965 mid-January index is above the index of a year earlier by three points. Compared with a month earlier, higher average prices were received for all commodities except lamb and hogs.

The broiler feed ratio, at 2.8 for Jan. 15, was unchanged from a month earlier but is below the 3.0 of last year. The egg-feed ratio of 1.95 was below both the 2.0 of last month and the 2.04 of last year. Price ratios reflect the number of pounds of poultry feed that are equal to one pound of chicken or one dozen eggs.

### Lamb Dinner

Twin Falls county sheep growers will entertain the Piler Kiwanis club with a lamb dinner March 30 at the Piler Methodist church, announced Donald Youst, county agent.

The dinner is an annual event to promote better understanding between farmers and city residents.

### School Cafeteria Becomes Major U. S. Food Customer

WASHINGTON, March 5 (UPI) — The school cafeteria is an important way from home market for food, just about one billion dollars worth.

The agriculture department has calculated that the value of food in the three billion meals served to children in U.S. public and private schools in the 1962-63 school year was just over one billion dollars.

The food served in public school lunch rooms had a wholesale value of 929 million dollars. Private schools added another 77 million dollars to the school food market. Five years ago the value of foods served in the schools was 597 million dollars.

Most of the meals are eaten in schools that participate in the national school lunch program, a joint venture of the agriculture department and state friends.

The agricultural marketing service has calculated in pounds the amount of many products served at school cafeterias. The figures include 445 million pounds of meat, poultry, and fish; 268 million pounds of potatoes and sweet potatoes; 944 million pounds of fruits and vegetables; and additional millions of pounds of bakery products, juices, fats and oils, eggs, flour, and cereal products. AMS said all this was washed down with more than 2.8 billion pounds of milk.

Of this huge mass of food,

POTATO CLINIC held last week in Twin Falls attracted more than half the potato growers in the county. Speakers for the clinic included, from left, Richard Olms, extension potato specialist, Leonard Hepworth, Minidoka growers, and W. C. Sparks, extension service specialist. (Times-News photo)

### Twin Falls County Potato Growers Hold Spud Clinic

Over half of the potato growers in Twin Falls county attended a special clinic held last week at the Bogerson hotel. The county growers were introduced to several new techniques in storage of potatoes to reduce sprouting and late.

Walter O. Sparks, extension service, showed the group slides on potato storage and discussed storage problems. Sparks pointed out that correct circulation and temperature control reduce sprouting and showed pictures of sprout-free potatoes which had been held in storage for two years.

Circulation and temperature control was a factor in isolating and preventing the spread of rot in a storage bin under tests conducted by Lamb Weston, said Sparks.

The meeting had several highlights, one being a panel discussion on grain rotation in a potato program. On the panel was Leonard Hepworth and Warren Heins, both Minidoka county growers. Heins, for example, has raised alfalfa for a rotation crop with potatoes since he went on his farm almost 10 years ago. His yield last fall was well over 300 sacks to the acre of high quality potatoes.

A second high spot was a discussion by Dorrel Larsen, extension irrigationist, on irrigating potatoes.

### CCC Funds Suspended In February

WASHINGTON, March 5 (UPI) — The agriculture department's commodity credit corporation wrote a new chapter in its history last week when it suspended most payments for three days.

The suspension was ordered on Feb. 8 when the corporation ran out of funds for price supports and most similar operations. It continued to make payment on some of its bills out of daily operating receipts, but there were not enough of those to carry on major programs such as dairy price support purchases.

The CCC went back into business late on February 11th when a supplemental appropriation bill was signed into law.

### Magazine Poll Reports Farmers Want Fewer Controls, Less Price Supports

WASHINGTON, March 6 (UPI) — The magazine Farm Journal said its latest farm opinion sampling poll showed strong backing for less government controls and lower support prices on some major crops, including wheat and feed grains.

Farm Journal editors told a news conference here they believed their sample poll was representative of the trend in thinking among most American farmers.

The poll results would indicate opposition among most farmers to President Johnson's proposal to continue current government wheat and feed grain programs with minor changes. The results also indicate opposition to an administration-backed plan for stiffer production controls for tobacco.

Among feed grain producers, 29 per cent favored programs, while 34 per cent voted for reduced supports with no controls. Another 24 per cent favored no supports at all. And three per cent voted for price supports coupled with tough, mandatory controls.

The poll returns were based on a regionally balanced sample of 5,000 votes. They were selected at random from the first 25,000 replies to a questionnaire printed in Farm Journal a month ago.

The poll showed a 56 per cent preference in favor of reducing or eliminating direct government farm support payments to farmers.

### Dairy and Machinery Auction

We will sell the following dairy cattle and machinery at public auction on the farm located at 500 West and 75 North of Rupert, Idaho, or 1 mile North of the Sugar factory.

## TUESDAY, MARCH 9

SPRING FLOWING activity stepped up this week in Twin Falls county. Typical of the activity is these two tractors in action east of Twin Falls. Moisture conditions and clear skies have started many farmers to taking care of springtime chores. In addition to plowing, many farmers are burning weeds. (Times-News photo)

# Transportation and Marketing Review Shows Cost Had One Per Cent Boost

WASHINGTON, March 5.—The agriculture department said charges for assembling, processing, and distributing farm-originated food products in 1964 rose less than one-half of one per cent over 1963.

In a review of the marketing and transportation situation, the department said the small increase in marketing charges reflected relative stability of costs of goods and services used by marketing firms.

Department economists noted that hourly earnings of food marketing employees averaged about four per cent higher in 1964 than in 1963. But increases in output per man-hour prevented unit labor costs from rising as much as hourly earnings.

Transportation rates in 1964 averaged about as much as in 1963, and prices of goods and services purchased by food marketing firms averaged about one per cent higher than in 1963. The department said prices received by farmers for food products in the typical "market basket" were about the same in 1964 as in 1963. Decreases in the farm values of meat products and poultry and eggs were offset by increases for other product groups.

The farmer received 37 cents of the consumer's retail food dollar in 1964, the same as in 1963. The farmer's share averaged 39 cents in 1957-59, ten years ago the farmer's share was 42 cents. In 1948, the share was 54 cents.

The "market basket" is a department yardstick which contains the average quantities of domestic farm-originated food products purchased annually per household in 1960-61 by wage-earner and clerical-worker families and single workers living alone. The "market basket" does not contain imported foods or fishery products.

The farm value is the return to farmers from the farm products equivalent to the foods in the market basket. The farm retail spread is the difference between the retail cost and the farm value.

The retail cost of the "market basket" in 1964 was \$1,015, up \$2 from the previous year. The farm value was \$373, down \$1 from 1963.

The farm retail spread was \$642, up \$3 from the previous year. The farmer's share was 37 per cent, the equivalent of 37 cents of the consumer's retail food dollar.

## 33 States Participate In Program

WASHINGTON, March 5.—The agriculture department reports the government's livestock feed program now is operating in 33 states and 678 counties.

Under the program, the government offers feed grain at reduced prices to eligible farmers in areas where natural disasters have severely affected feed and forage crops.

The agricultural stabilization and conservation county committees are charged with responsibility for determining eligibility of producers for assistance.

## Eased Credit Endorsed by Farm Group

WASHINGTON, March 5 (UPI)—All three of the nation's big general farm organizations have endorsed a pair of bills aimed at expanding the supply of farm credit.

One of the bills would expand the lending power of the Federal Intermediate Credit Banks, institutions which raise money from the private market and supply funds to local production credit associations.

The second bill would more than double the volume of real estate loans which can be guaranteed by the farmers home administration. At present, the FHA can insure up to 200 million dollars of these loans annually. The bill would push the total up to 450 million dollars a year.

Both credit bills were endorsed at a house subcommittee hearing by officials of the Johnson credit administration, which oversees the intermediate credit banks.

The bills were also endorsed by spokesmen for the American Farm Bureau federation, the National Grange, and the National Farmers Union. The farm bureau suggested one change in the bill dealing with lending by the farmers home administration. It proposed expanding the agency's lending ceiling by 100 million dollars instead of by 250 million dollars.

## Commission Plans Spring Food Study

WASHINGTON, March 5 (UPI)—The national food marketing commission plans to take a close look at marketing and processing margins in the food retailing industry.

That industry, according to agriculture department estimates, sold American consumers about 48 billion dollars worth of food in 1964. The figure is expected to be higher this year.

The food marketing commission has announced that it will hold public hearings on the retail food industry in Washington sometime in May. In particular, the commission said it will be looking for an explanation of the increase in the retail margin for foods during the past 10 years.

The agriculture department, which collects volumes of reports on food marketing costs, said that it does not know exactly how much the retail food margin has gone up.

A department expert said today that government economists assume there has been an increase. But they have no precise measure of the increase for the retail food industry as a whole.

USDA reports do show that the margin between farm and retail food prices has been expanding steadily in the past decade. In 1964, farmers got 42 cents of the consumer food dollar. In 1964, only 37 cents of the retail food dollar was passed through to the farmer. The rest went into costs and profits in food retailing, wholesaling, and processing.

These figures measure margins in all segments of the food industry beyond the farm gate.

USDA experts say they believe that trends in the retail sector of the industry have been in the same directions as those in other segments.

One factor, according to an agriculture department official, is the wage level in food retailing.

The specialist said those wages have increased over the past decade, while the productivity of food retailing workers has probably not gone up as fast as their wages.

If this estimate is correct, it would mean a net increase in retailing costs — one of the charges that make up the food-retailing margin.

USDA economists have produced food retailing margin reports on a few individual commodities.

## Congressional Economist Says Plan To Divert Land Needed to Avoid Dip

WASHINGTON, March 5 (UPI)—A veteran congressional economist said that average annual production programs for major crops will be needed indefinitely to avoid a sharp decline in farm income.

The statement was included in a report by Dr. Walter Wilcox, an economist for the Library of Congress, for Sen. George McGovern, D., S. D., Eugene J. McCarthy, D., Minn., and Milton R. Young, R., N. D.

Wilcox said the productivity of American agriculture is increasing three times as fast today as 30 years ago. He added that at current prices, wheat farmers can probably increase seed grain yields 20 to 40 percent by using more fertilizer and pesticides.

The economist predicted that wheat production can be boosted five to 10 bushels an acre within a few years and that cotton yields can be raised by 60 to 100 pounds an acre.

Under these conditions, Wilcox said, farm income will decline sharply unless federal acreage diversion programs are continued.

The report also predicted that in the near future, 40 per cent of total farm production will be made by 150,000 farms with annual sales of \$40,000 a year or more. Another 50 to 55 per cent of the farm output will come from about 15 million smaller commercial farms. From five to 10 per cent will come from small farms that get most of their income from non-farm sources.

Wilcox said that farm support programs are designed to help commercial farms during a period of technological change.

### McVey's Buys Mixer-Feeder

Stouffville, Kans. March 5 (UPI)—McVey's Inc., Twin Falls, has purchased a model 600 mixer-feeder, made by B. J. Manufacturing, Inc., Don Fisher, sales manager of the firm announced.

The unit features a patented three-auger mixing system. It has 180 cubic feet of capacity and weighs about 3,000 pounds.

### U.S. Steel Schedules Four Meetings to Boost Product

UTILIZATION of irrigation water despite abundant supply will be discussed at a meeting co-sponsored by Simplot Soil-builders and United States Steel. The meeting will be held March 8 and 9, Utah State university engineers developed the steel headgate under a grant by the steel company.

About 150 Idaho farmers and irrigation dealers will be invited next week to study new irrigation techniques using U. S. Steel's adaptable, all-steel irrigation headgates.

This was announced by Merle Cherry, assistant sales manager of Simplot Soilbuilders here, who gave the schedule of four separate meetings to be held in south central and southeastern Idaho.

The first two meetings will be held at the Rogerson hotel in Twin Falls on Monday and Tuesday, the third meeting at the Skylark restaurant in Idaho Falls on Wednesday, and the last meeting at Stan's grill in Blackfoot on Thursday. All dinner-meetings will start at 7 p.m.

The March 9 and 11 meetings will be specifically for farmers, the other two for dealers.

The water control device, first developed by irrigation engineers at Utah State university, is known as one of the greatest advances in irrigation in recent years. Research was carried out under a special grant from U.S. Steel Products.

H. E. Hoyer, product manager, U.S. Steel Products, Los Angeles, and other top U.S. Steel agricultural specialists will attend the Idaho sessions to demonstrate recent refinements to the modular unit, Simplot Soilbuilders officials said.

From simple pre-formed steel panels, a headgate can be easily assembled to fit nearly all ditch sizes, stream conditions and soil types, they explained.

The few basic, modular components of the unit will form such a variety of single or multiple outlet structures—as diversion headgates, check gates, drop gates, turnout structures, pump boxes, intake and outlet boxes, as well as complex structures combining several of these, or other, water control functions.

The heavy-gauge headgates also can be permanently located or easily removed to meet water control needs at various points. One man can assemble and install a structure, using only a screwdriver, pliers, level and shovel, officials pointed out.

Development of the unit was under direction of Dr. Vaughn E. Hansen, Utah State university engineering experiment station.
