VOL. 66, NO. 12

TWIN FALLS, IDAHO, FRIDAY, APRIL 25, 1969

TEN CENTS

THE BODY OF JESS E. HURLEY is seen here between the front seat and the engine of his car. He was killed Thursday when the car he was driving slammed into the side of a slow-moving freight train a half mile west of South Park Avenue West. Idaho State Police officers investigated. Mr. Hurley, 40, worked at the St. Regis Club in Twin Falls. The accident happened shortly after noon.

Probe Continues In Train-Car Fatality

The investigation of a car crash a half mile west of South Park Avenue West on Thursday that claimed the life of a 40-year-old Twin Falls man continued today.

Jess E. Hurley lost his life when the car he was driving slammed into the side of a slow-moving freight train about noon Thursday. Investigating State Police Officer Everett Waddell said Mr. Hurley's car hit the train at a speed estimated at more than 60 miles an hour.

There were no skid marks at the scene, indicating Mr. Hurley might have been attempting to get past the train, Mr. Waddell said.

Clayton Edwards, Twin Falls County coroner, said X-rays revealed Mr. Hurley died of massive chest and head injuries.

Mr. Hurley's body was wedged between the front seat and the engine of his car for nearly half an hour before workmen could rip the seat out and free him.

Mr. Edwards said Mr. Hurley apparently died instantly.

It's That Time—Daylight Saving—Coming Up Again

Daylight savings time is happening for youngsters, bookshelves, lawn mowers and extra hour in the yard for dad. And it's coming in Idaho for the third time Sunday.

The time change started in 1917 when Congress passed the Uniform Time Act. The plan was to give the working man an extra hour of daylight during the summer months.

The time change comes at 2 a. m. Sunday.

That means all clocks should be advanced one hour. People who go to bed at 10 p. m. Saturday usually move the clock up an hour, yawn, and go to sleep.

It will be the fifth turn around for Idaho since the law became effective. The clock is advanced an hour in April, then turned back an hour in October.

In the mid-summer months in Idaho the sun is still glowing an hour in April, then turned usually at their wife's nod at this time.

The window shade business booms during this time and there can always get in another nine holes of golf.

Daylight savings time is nothing new in the world. Great Britain has been using it for years, but now has stepped with the clock set ahead an hour permanently. Washington, D.C., started on daylight savings time 12 years ago, but only recently the time change came at 4 p. m. the last Friday in April.

Workers would move their watches and clocks ahead one hour at 3 p. m., and get off an hour earlier. There were many cheers of approval, but they had to work nine hours instead of eight. There were many groans.

Hawaii and Arizona don't take part. The latter by legislative

De Gaulle Battles For 'Life'

PARIS (UPI)—Fighting for his political life, President Charles de Gaulle today mounted an eleventh-hour campaign in his national reforms. Public opinion polls indicated they will be defeated.

De Gaulle, 78, and president of France since 1958, readied a final appeal to the country on French radio and television tonight. Government sources said it would be short and dramatic.

They said De Gaulle would warn again that if his constitutional referendum on reforms is rejected, he will resign. He probably would tell Frenchmen such an act could plunge them into chaos and communism, the sources said.

The referendum would virtually abolish the national senate, of late a center of dissent, and disperse its power to regional executives. It also would give De Gaulle the right to pick his successors.

De Gaulle's government was beset by economic troubles again. The Bank of France announced its gold and foreign exchange stocks rose another \$1 million drop in mid-April. Reports of inflation have touched off a flurry of consumer buying in the past week. Both economic developments served to spur the government drive to keep De Gaulle in office, sources said.

North-Viets Attack U. S. Tank Column

SAIGON (UPI)—North Vietnamese soldiers hurling hand grenades and bundles of explosives charged a U.S. and South Vietnamese tank column camped wagon train-style near the Cambodian border today. The Allies leveled their guns and broke the attack, killing 30 guerrillas.

Military spokesmen announcing the three-hour battle also disclosed more heavy B52 raids against Communist bivouacs along the Cambodian border and a U.S. air and artillery attack against a Communist bunker complex inside the Demilitarized Zone (DMZ).

Three Americans died and 12 were wounded in the fighting, while South Vietnamese headquarters listed losses to its 20th division as "moderate," meaning that up to 30 could have been killed or wounded.

Israeli Troops Kill Six Arabs

By United Press International

Israeli troops killed six Egyptian commandos early today in a clash at the northern end of the Suez Canal, a military spokesman said in Tel Aviv.

The spokesman said the Arab commandos were about 20 miles north of Qantara and the Israelis suffered no casualties in the engagement.

An Israeli spokesman also said a military court in Ramallah sentenced eight captured Arab guerrillas to life imprisonment. The 28-year-old leader of the group said he told his men to surrender when he found them surrounded by Israeli troops, police said.

COLLEGE OF SOUTHERN Idaho student body elections are being held today, as are elections for Sophomore class officers. Susanne Batsch, candidate for representative at large, is shown here during a rally Thursday afternoon which ended several days of campaigning by CSI students. The student body, of more than 2,000 academic and vocational students, will cast ballots all day to determine next year's student leaders.

Murtaugh Okays Three Mill Levy

MURTAUGH — Murtaugh school patrons Thursday voted overwhelmingly to extend the school tax levy ceiling from 30 mills to 33 mills. The vote was 81 for, 32 against, easily besting the required two-thirds majority needed for the increase.

According to Murtaugh Schools Supt. Florin Hulse, the increased ceiling was necessary to "maintain the schools at the present level." He earlier blamed "insufficient funding for the local district at the state level" for the increased local tax levy need.

School officials said prior to the vote that curriculum cutbacks would have to be made, holding out the possible elimination of music, home economics or vocational agriculture from the school program.

The increase in state financial support for the Murtaugh school district was under \$6,000, the smallest increase in state support for any school district in Twin Falls County. According to the controversial secondary education school financing formula for distributing state money to local districts, those districts with the largest tax base per student receive proportionately less state support. Murtaugh schools, having a proportionately high valuation for each of the 300 students in the district, receive little state money.

The vote to increase the ceiling on the school district mill levy was permitted by a law approved in the 40th legislature which permits taxing districts only a 4 per cent increase in tax revenue per year. Any additional revenue sought by a local district is permitted only if it follows one of two courses of action:

The local taxing unit can choose to put the levy before the property owners of the district in question by holding an election.

The alternate course of action would be an appeal to the Idaho Tax Commission.

Under the Murtaugh district, the increase approved is effective only for one year. Annual elections will be required to maintain the artificially high tax ceiling.

State support for the Murtaugh School System increased \$5,308 from last year as a result of the Legislature's School Appropriation. The total state support jumped from \$33,097 to \$38,405.

The tax increase for the Murtaugh district will amount to about 18 per cent. About 7 per cent of the increase will result from the automatic increase in property assessment from 14 per cent last year to 15 per cent at present.

The 3-mill increase — an increase of 10 per cent over last year's levy — added on to the automatic increase provided in the new assessment ratio account for the additional taxes.

Lebanese Cabinet, Premier Resign

BERRUT (UPI)—Premier Rashid Karami announced Thursday the resignation of his cabinet and today turned in his resignation to a coalition cabinet.

Parliamentary critics of government force against Arab demonstrators.

It was the second government crisis in 13 weeks and left the nation in perhaps the worst political turmoil since it won independence from France in 1943.

Karami submitted his resignation to President Charles Helou at the presidential palace.

There was speculation Helou would try to persuade Karami to stay on.

Karami told parliament Thursday night the issue of Palestinian commandos could split Lebanon. He said the nation was in a "critical and difficult phase" and announced he was resigning along with the 18-man cabinet.

Two days of cloting by groups demanding government support for Arab guerrillas against Israeli troops 17 times and injured more than 100 persons.

Neighborhood Center Is Sought By Jerome Board

Pending Closure Of Unit Poses Problem

The Jerome Community Action Committee Board of Directors voted to make an application for a Neighborhood Center in Jerome. The announcement was made Thursday by Lawrence Mack, director of the South Central Community Action Agency.

Mr. Mack said the Jerome board expressed interest in a Neighborhood Center with child care and outreach facilities. Being a "one-stop center" but they wouldn't be accurate enough for our heat allowance," he said.

The station is one of 12 which is being phased out at the end of the fiscal year because of a budget cut in the Department of Commerce, the weather bureau's parent agency.

"We can get readings from Boise on a regular basis but they wouldn't be accurate enough for our heat allowance," he said.

The station is one of 12 which is being phased out at the end of the fiscal year because of a budget cut in the Department of Commerce, the weather bureau's parent agency.

County Picks New Zoning Administrator

Appointment of a new Twin Falls County Zoning Administrator has been approved by the Twin Falls County Commissioners and County Zoning Board.

He is Joseph LaVallee, a building contractor, 706 Sunrise Blvd. N.

Mr. LaVallee has resided in Twin Falls since 1963 and currently serves as president of the Building Contractors' Association in Twin Falls.

A native of Augusta, Me., he attended schools there and spent eight years in the U. S. Air Force, where he was assigned projects as a civil engineer. He was stationed at Hamilton Air Force Base, Calif., and also served in Korea. Mr. LaVallee moved to Twin Falls on completion of his Air Force service.

The new administrator will work with George Ottens until May 1, when Mr. Ottens will leave to accept a similar position in Caldwell. Mr. Ottens has held the post since it was created in 1965 and prior to that time was county surveyor.

Mr. LaVallee is married and he and his wife, Dorothy, have two sons, aged 8 years and 2 months, and a daughter 7 years of age.

As a building contractor, the new administrator has had considerable experience with zoning regulations and building requirements.

Light Freeze Doesn't Hurt Area Crops

Damage to crops in Magic Valley from the cold temperature experienced Thursday night in most areas was very light.

Several alfalfa fields in the Hollister area were reported knocked down by the frost, but were not damaged, Mrs. William Luning, Hollister, said their alfalfa was flattened by the frost, but will recover when the weather warms up.

Richard Kelley, owner and operator of the Gurley orchard, near Piler, and the Orr orchard, near Hillman, Mont., were slightly damaged into Thursday night when the landing gear apparently collapsed as the plane landed at the Twin Falls airport. The plane is used to mail fruit in this area under government contract. The pilot, Ed Ward Graf, was not injured and there was no damage to the mail cargo. The mishap occurred about 10:30 p. m., airport officials said.

Plane Damaged In T. F. Landing; No One Is Hurt

An Aero Commander twin-engine plane, owned by Connie Alway, Hillman, Mont., was slightly damaged into Thursday night when the landing gear apparently collapsed as the plane landed at the Twin Falls airport. The plane is used to mail fruit in this area under government contract. The pilot, Ed Ward Graf, was not injured and there was no damage to the mail cargo. The mishap occurred about 10:30 p. m., airport officials said.

The Jerome Community Action Committee Board of Directors voted to make an application for a Neighborhood Center in Jerome. The announcement was made Thursday by Lawrence Mack, director of the South Central Community Action Agency.

Mr. Mack said the Jerome board expressed interest in a Neighborhood Center with child care and outreach facilities. Being a "one-stop center" but they wouldn't be accurate enough for our heat allowance," he said.

The station is one of 12 which is being phased out at the end of the fiscal year because of a budget cut in the Department of Commerce, the weather bureau's parent agency.

As a building contractor, the new administrator has had considerable experience with zoning regulations and building requirements.

Big Wood River Drops At Hailey

Big Wood River was five inches lower at Hailey Friday morning because of the continued cold weather, but several ranchers along Fish Creek in the Carey area have water through their farmyards.

Since it takes some time for changes in temperature to be reflected in larger bodies of water, the report from Magic Reservoir, showed 180,730 acre feet with 4,000 second feet coming out of the spillway and gates, just a slight rise over Thursday.

It was reported that the Big Wood River below the reservoir showed no drop, and one farmer reported it appeared some four inches higher, but the Little Wood through Shoshone was reported about lower.

Only area which reported any flooding of consequence was east of Carey, where ranches of June Farnsworth and Shirli Allen had water from Fish Creek through their yards.

Leo Peterson, who lives about seven miles northeast of Carey, also reported water from Fish Creek through his corral. It was explained the creek overflowed when water into the high line canal was diverted back into the creek recently.

Water also was over Fish Creek at the bridge over Highway 93 at the bridge over Highway some six miles east of Carey.

ONE OF SEVEN PEOPLE who took an oath of citizenship in Fifth District Court Thursday is seen here, at right. He is Manuel Zulueta, Kimberly, who came to the United States from Spain in 1927. Administering the oath, at left, is Judge Theron Ward, and in the middle is Gerald Crowley, general

attorney of the Immigration and Naturalization service, Helena, Mont. About 60 people watched the seven people take the oath of citizenship and become Americans. Mr. Zulueta works for the Noh Sheep Co. of Kimberly.

Seven Area People Awarded Citizenship

Seven people from three different countries took an oath of citizenship Thursday afternoon in a solemn ceremony and, after years of study and hope, became Americans.

The ceremony was conducted in Fifth District Court by Judge Theron Ward.

Gerald Crowley, general attorney of the Immigration and Naturalization service, Helena, Mont., presented the petitions for approval by the court.

One petition for citizenship was denied and another was a continued because the applicant wasn't able to appear.

Taking the oath of citizenship were Jaime Iruarte, Rupert,

Wyoming Boy Charged With Slaying Four

SHERIDAN, Wyo. (UPI)—A 16-year-old high school sophomore was formally charged Thursday with the murders of his parents, brother and grandfather.

Sheridan County Atty. James Birchby filed the first degree murder charges against Louis Dean Cosco. The youth was to be arraigned in Justice of the Peace Court today.

Birchby said each of the victims had been shot three times in the head with the exception of the mother, Nadine, who was hit once in the neck and twice in the head.

The other victims were Louis Cosco, 39, a service station attendant; Frank Cosco, 19, and Frank Cosco, 81. The bodies were in the family's small four-room home on the western edge of the city.

Auditors found a .22 caliber bolt action rifle inside the locked home along with some spent cartridges.

Sheriff's officers went to the home Tuesday after a relative, John Cosco, looked through a window and saw the bodies. The boy was outside working on a car when officers arrived.

Bird Flops

NEW YORK (UPI)—Firemen are occasionally called on to rescue cats from trees, but Manhattan firemen Thursday had to rescue a pigeon.

The bird, its feet tangled in string, was spotted hanging upside down from a branch 40 feet above a sidewalk near City Hall.

A ladder company of the New York Fire Department was ordered to the scene, and, as 200 bystanders applauded, two firemen climbed a ladder and retrieved the bird.

ASPCA employe Dag-Moroff, who took the pigeon to an animal shelter, explained that the bird probably entangled its feet in pieces of string lying on the ground and became snarled in the branches as it flew up into the tree.

Salmon Man Appointed As U. S. Attorney

SALMON, Idaho (UPI)—Sen. Len Jordan informed Salmon attorney Sherman Furey Jr. on Thursday that he has been named by President Nixon as the new U.S. district attorney for Idaho.

The 48-year-old Furey, married and the father of four children, held the same position between 1953 and 1957. He has also served as an assistant attorney general for Idaho and assistant U.S. Attorney for Idaho. He has been in private practice in Salmon for the past 12 years and from 1957-59 served as mayor of Salmon.

At the present time, Jay Bates is serving as acting U.S. district attorney following the resignation of Sylvan Jeppesen from the post.

The appointment must be confirmed by the U.S. Senate and Furey said he and his family planned to move to Boise following the confirmation.

Air Show Program Set For "Y" Benefit

A special airlift program designed to raise funds for the Magic Valley YMCA-YWCA building program in Twin Falls will be held Sunday.

Two skydiving exhibitions and rides for the public will be featured. The airlift will be at the Twin Falls City-County airport between 1 and 5:30 p.m. Sunday.

It is sponsored by the Twin Falls Jaycees.

The program had to be canceled two weeks ago because of high winds. Jaycee officers said this airlift will be held, providing the weather is good. However, if the airlift has to be canceled this time it will not be re-scheduled, it was reported.

The public will be given rides in airplanes at the cost of two cents a pound per passenger. Eight airplanes will be available and the planes and services of the pilots have been donated.

All funds collected at the event will be given to YMCA-YWCA officials and placed into a building fund.

The proposed addition to the YMCA-YWCA building in Twin Falls will include a swimming pool, hand ball courts and additional space for recreation and classes.

Twin Falls merchants have donated gifts to be sold at auction during the afternoon program. Airlift operations will start at 2:30 p.m. and George deTillot will make his first leap from a plane about the same time.

He will jump from about 4,000 feet over the airport.

Pilots donating their time and planes for the benefit program are Warren Barry, Robert Barney, Kirkman Brothers, Otto Florence Jr., Robert Wills and William Powell. Reader Flying Service will donate two planes and supply two pilots.

Merchants who have donated gifts are Zimmerman's, Singer Sewing Center, Snyder's Office Equipment Co., Ace Fringing, Duch's Furniture, Price Hardware.

Scout Exposition Is Scheduled Saturday

Nearly 1,000 Scouts from 31 units in Magic Valley will participate Saturday in the annual Scout Exposition.

Alan Hutchison, field director, said the Scouts participating are from Cub Packs, Scout Troops and Explorer Posts in the Southside District of the Snake River Area Council.

The 31 units will set up booths at the Twin Falls High School gymnasium Saturday morning. The exposition opens at 4:30 p.m. Saturday and will run until 9 p.m.

The units will display Scout skills. Each of the 31 booths will be no duplication of exhibitions, Mr. Hutchison said.

Some of the crafts displayed in the booths will be pottery, leatherwork, papercraft, first aid, cooking, map reading, aviation and archery.

A 10-minute film of the theme, "America's Manpower Begins with Boypower," will be shown every 30 minutes.

The manpower theme is that currently being used by the national Scouting program, Mr. Hutchison said.

Tickets are on sale from all Scouts in the district and will be available at the door. Mr. Hutchison said ticket sales are running about 30 per cent ahead of last year.

Proceeds from the tickets will be divided individually between participating boys, the units involved and the show.

The portion going to the show will revert to the council's camping program, Mr. Hutchison said.

Scouts involved will be from Twin Falls, Kimberly, Hansen, Burtaugh, Eden, Hazelton, Hunt, Jackpot, Nev., and Hollister.

Sen. Percy Plans Bill On Mining

WASHINGTON (UPI)—Sen. Charles Percy, R-Ill., said Thursday he would introduce a bill Friday to provide for research and development of safer methods of mining and preparing coal.

In a statement, said the bill would provide \$5 million to the Office of Coal Research to finance research which would promote "miners' health as well as improving the safety conditions in their work area."

The Illinois Republican said new research should be aimed at the two goals—health and safety. He hoped mechanical devices could be created to allow coal to be extracted and transported by surface control, thus precluding the present necessity of sending large groups of miners underground for lengthy periods of time.

He also said he hoped the research could provide artificial underground environment to prevent "black lung" and minimize the possibility of explosions.

APPLICATION FILED
BOISE (UPI)—The Union Pacific Railroad has filed an application with the Idaho Public Utilities Commission to discontinue its agency service at Cambridge, Idaho.

Members of the cast, from left, are Theodore Florence, as "Hansel"; Valorio Wheeler, as the Sandman, and Karl Cronk, as "Gretel."

Rupert Crews Will Install Sewer Line

RUPERT — Rupert city crews will begin work Wednesday on the main sewer line installation to the newly annexed Grandview Addition in northern Rupert. Mayor Wendell Johnson said today.

Mayor Johnson said city crews will be installing the lines and two lift stations, all part of the recently formed Local Improvement District 13 in the area. Estimated cost of the sewer project is \$36,000. The city, however, will receive 30 per cent matching funds for the project, Mayor Johnson noted.

He said the work would begin right away to enable the crews to avoid the sub water problem in the area. The installation is expected to take from three to four weeks. The lift stations will be located across the main canal on the north side and near Pine Street in the Grandview area.

Mayor Johnson said the council will set up the LID during their next regular meeting in May. The LID will involve the installation of water and sewer lines to the area.

The city will install the main line and the individual land-owners will pay for hook-up and secondary lines. Estimated cost of the total improvement will be \$110,000.

Also during the council meeting in May, the group will determine what will be done toward the development of the proposed 11-acre Big Valley ball park, which recently received the okay from the state park board. The city this week received notification that matching funds for the development

were available—Estimated cost of the five year development is \$175,000.

Koutnik Gets FHA Post In Valley

L. James Koutnik, Twin Falls real estate appraiser, has been named area management broker for properties acquired by the Federal Housing Administration through its mortgage insurance program.

Doctor Presents Data On Cancer

The contract calls for the management of all properties FHA acquires in Twin Falls, Gooding, Jerome and Lincoln Counties, and was effective April 1.

E. H. Carpenter, director of the FHA, Boise, who made the announcement of the appointment of Mr. Koutnik, said that such a contract does not include the exclusive right to sell these properties.

Persons interested in purchasing an FHA-owned home can deal with any real estate broker and those wanting bids on repair or having questions to refer to these properties should contact Mr. Koutnik.

Tribunal Denies Plea Of Prisoner

RUPERT (UPI) — The Idaho Supreme Court has upheld a decision by fifth District Judge Sherman Holloway to deny a writ of habeas corpus to James R. Murphy.

Murphy, 39, has been charged with first-degree murder in the slaying death of his stepson, Darryl Hunter, 24, last fall at the family home.

Murphy is out of Minkata County Jail on \$10,000 bond and is scheduled to appear before Holloway May 1 to set a trial date.

TF Building Remodeled By Glass Firm

A building at 148 Second Ave. S. is being renovated to house a new glass-firm which is locating in Twin Falls.

Crews from Radtke Construction Co., Twin Falls, will have the remodeling completed by May 1, according to Jack Radtke, superintendent.

Howell Rules Played By Club

The Howell Movement was played by The Magic Valley Duplicate Club Wednesday afternoon. Winners were Mrs. A. J. Marks and Mrs. M. E. Saunders, first; Mrs. Lyle McEwan and Mrs. M. Hogg, second; Mrs. Harmon Munyon and Mrs. L. J. Robertson, third, and Mrs. D. R. Tillery and Mrs. H. M. Wycott, fourth.

Anderson Lumber Co. Has Moved

ANDERSON LUMBER CO. HAS MOVED TO ... Addison Ave. East

The firm deals mainly in glass service rather than large installation jobs.

Installation of automobile glass is a specialty of the company, Mr. Leigh said. The firm will carry one of the largest stocks of this type of glass in Southern Idaho, he said.

Mr. Leigh said two men besides himself will be employed initially at the firm.

Mr. Leigh, his wife and children have moved to Twin Falls from Logan, Utah.

Legislative Error May Invalidate Police Retirement Law

By RICHARD CHARNOCK

BOISE (UPI) — If you're a city policeman planning to retire after 20 years on the force under provisions of new law passed by the 40th Idaho Legislature — forget it.

It appears the bill never really passed the legislature even though it was signed by Lt. Gov. Jack M. Murphy, president of the Senate, House Speaker William J. Lantieri, Hollister, and Gov. Don Samuelson.

Introduced by the Local Gov-

ernment and Taxation Committee of the senate, SB1178 was approved of the upper chamber and was sent to the House of Representatives for consideration.

Primarily, the bill did two things — it reduced from 25 to 20 years the accumulated service a city policeman must have to earn his retirement benefits in Idaho and it increased the benefits to reflect changes in the cost of living.

When the bill reached the House, the representatives amended it — restoring the 25-

years service requirement for retirement. Then the bill was returned to the Senate for concurrence in the House amendments.

Trouble is, Senate Secretary Art Wilson discovered while cross-checking the House and Senate journals after the legislature adjourned sine die that the Senate never concurred in the amendments. It simply enrolled the bill and sent it to the governor after the Senate president and House speaker signed it.

Nobody has yet asked the attorney general for a formal

ruling on the question but Murphy and others seem to think the bill is dead. To become law an amended bill must be read three times — just as though it were a new bill — and be acted upon by both houses. This did not happen in the case of SB1178.

"It isn't for me to venture an opinion on it," Murphy said, "but obviously it can't become law."

He said he has alerted the Industrial Accident Board, which helps administer the policeman's retirement fund,

about the error.

UPI questionnaires working on the legislative cleanup about how the error occurred and nobody seemed to know how it happened.

Murphy said usually a bill returned from the House will bear a slip which states the measure has passed the House, a "d" whether the bill has been amended.

"On this particular report it said 'We return herewith Senate Bill 1178 which has passed the House,'" Murphy said. "It did not mention the bill was amended."

Attaches who handled the bill also say they cannot recall seeing the amendments which normally are clipped to the bill when it is returned from the House.

Whether the amendments fall off for some reason inadvertently were left off the bill when it was returned to the Senate, nobody seems to know, but barring an attorney general's opinion to the contrary, the bill appears to be dead — even though the governor supposedly signed it into law.

Tribunal Endorses Ruling

BOISE (UPI) — The Idaho Supreme Court ruled in favor of the Industrial Accident Board Thursday in denying a petition by Claudia Fountain to reopen a claim against the Choptick Cafe in Pocatello dating back to September of 1963.

The Industrial Accident Board had also refused in the case involving Argonaut Insurance Company to set aside a lump sum settlement which had previously been entered into by the parties.

The High Court said in its unanimous opinion, written by Justice Fay V. Starr, that in September of 1963 the Fountain woman injured her back while lifting a tray of dishes at the cafe.

After three operations to correct symptoms of pain and numbness the woman's condition was evaluated by a panel of three surgeons who determined that she should be rated for a partial permanent disability.

The woman and her employer and the insurance company entered into a lump sum settlement by terms of which Mrs. Fountain relinquished all further claims against the Choptick Cafe.

A year after the agreement was approved by the Industrial Accident Board the woman suffered a recurrence of her symptoms and was again operated on. She then brought proceedings before the board to have expenses paid for the operation.

The court held, however, that the condition was not a continuing one.

Under Idaho law when an injured employee enters into a lump-sum settlement agreement the employee is not entitled to have the case re-opened when he or she subsequently undergoes a change or worsening of condition.

'Gurning' Test Spurs Challenge

HELENA, Mont. (UPI) — After the completion of their first annual gurning contest, Carroll College in Helena, Mont., issued a challenge to Harvard to a national gurning contest.

Gurning is a Welsh sport in which individuals compete to make faces, and the person who makes the best, or worst, face depending upon one's point of view, is the winner.

JOINING A PICKET line at Minot, N. D., to give support to his father and other teachers who are in their fourth week of a strike, young Tom Frost, all of 3 years old, rides instead of walks. Six striking teachers were jailed when they defied a court order to return to their classrooms. (UPI telephoto)

Striking Teachers Continue To Press Demands At Minot

MINOT, N.D. (UPI) — Six striking teachers were ordered from a picket line in this flood-ravaged city Thursday and fined and given maximum 90-day jail sentences for violating a court injunction against a walkout.

Some 150 other striking members of American Federation of Teachers local 302 vowed they will ignore the court injunction, issued by Ward County District Court Judge Roy A. Iveson, when junior and senior high schools reopened.

"The city's 10,000 public school students have been out of school since April 8 because of

Hippies 'Executed' In Military Style

SAN FRANCISCO (UPI) — The victims once again were young hippies. Two were girls, one a man. The arms of all three were punctured the usual, takeable sign of a hard-drug user. All were found in kneeling positions, shot in the head in a Haight-Ashbury apartment.

A suspect, arrested shortly before midnight Thursday, was identified as a 35-year-old artist named Robert Jahnke, who was hounded on suspicion of murder. Police said he was apparently the last person to see the young people alive.

They were executed Thursday in the dingy flat, the latest victims in a string of more than 20 murders reported this year in the rundown neighborhood. Two years ago Haight-Ashbury was a haven for thousands of youngsters dropping out of the establishment and tripping into the hippie movement.

Police identified the man as Joseph Oswald, 24, of Martinez, Calif., and said he had a previous record for narcotics. When found, he was wearing only a green T-shirt and underpants.

Margaret Jo Fochtman, 18, was the youngest of the three found in the apartment where the only furniture was mattresses scattered around the floor. She was wearing only a shortie nightgown.

The other girl was Cindy Marie Taylor, 21, of Daly City, Calif., a San Francisco suburb. Police said she also used the name Barbara M. Taylor. She was wearing jeans and a blouse.

Ellis said the gangland-style "execution-type murder" has overtones of a "narcotics-type operation." He said equipment for shooting drugs was found in the two-room flat four blocks off Haight Street and the victims, apparently, were drug users.

Ellis said each of the victims was shot once in the forehead and being forced to kneel on the kitchen floor. The murder severe flooding along the Mouse River.

The six teachers were picketing an elementary school which reopened Thursday when they were placed under arrest and ordered to pay \$250 fines after spending the next 30 days in ward county jail.

Robert Crosier, national field director for the AFT here, counseled the teachers who first went on strike April 1 in a wage dispute, said this is the first time they have been jailed for violating a state ban against teacher strikes.

weapon was believed a .38 caliber pistol. Police said it was not recovered.

The owner of the apartment building, Alvire Lewis, told police he wasn't even sure of the name of the person who rented the flat.

Judge Allows Schools To Set Dress Rules

POCATELLO (UPI) — Sixth District Judge Gus Carr Anderson has ruled that a school board has the right to insist on certain standards of dress and decorum.

Judge Anderson handed down the ruling in a case brought against Pocatello School District 25 by Chris Murphy, 18, a senior at Highland High School.

Murphy was suspended from classes April 7 for refusing to cut his hair as required by the school authorities. He was permitted to attend school under a restraining order issued by the court pending outcome of a hearing on the matter.

Wednesday, Judge Anderson ruled the boy must get a haircut before he can return to his classes. The ruling followed a three-hour oral presentation Monday in addition to briefs submitted earlier.

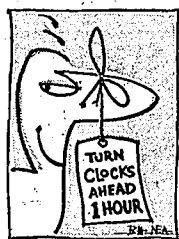

The judge held that the school board and the principal have the right to make their own regulations as to decorum and dress.

Elmore Officer Plans Drive On Young Smokers

BOISE (UPI) — Elmore County Prosecutor Fred Kennedy has announced a crackdown on youthful smokers.

The prosecutor cited a state law which provides that every minor under the age of 18 who buys, accepts or has in his possession any cigarette, cigar or tobacco in any form is guilty of a misdemeanor.

Under the law it also is a misdemeanor to sell, give, or furnish such items to any person under the age of 18.

DAYLIGHT SAVING TIME begins at 2 a.m. Sunday, April 27. Turn clocks ahead one hour.

Applicants Asked For Zoning Post

County commissioners in Twin Falls are still accepting applications for the post of zoning administrator.

The applications are for the office now held by George Otens, who has resigned and will leave May 1 for Caldwell, where he will become Canyon County zoning director.

Mr. Otens has held the local office since it was created with the advent of county zoning in 1965.

School Project Integrates Art Topics With Education

BOISE (UPI)—The Idaho Association of School Superintendents, including Idaho school business officials, began a two-day meeting in Boise Thursday with a talk by Jack N. Teale, San Francisco, district director for the U.S. Department of Labor.

Teale told delegates the great concern of Idaho schools with relation to his work and his department is not just complying with the minimum wage standards set by law but with the overtime provisions.

He said before the Fair Labor Standards Act became effective in February of 1967 to include school employees, the employer and employee made their own arrangements as to hours to be worked.

Now, however, he said they have to start meeting the provisions as set forth by the law. Teale said his department will make more investigations to make sure that the standards are being met in Idaho as well as other places.

Many of Idaho's school districts are complying with the 40 hour work-week but some of them did not immediately start complying after the law became effective and in some cases there will be retroactive back wages available through legal means.

Teale said school district employees could ask the Department of Labor to bring suit to get their back wages.

Districts not now meeting the requirements are going to have to make plans to meet them, he said.

Jim Bravold, business manager of the Pocatello School District, said it would not affect the Pocatello district since that is a labor oriented area and that they immediately started complying with the law when it took effect.

Rep. R. Dee Merrill, D-Elk River, superintendent of the Elk River School District, said his district also met the provisions of the law.

Californian Named Top Speechmaker

BOISE (UPI)—Benjamin G. Davidson Jr., 17, Tracy, Calif., won \$4,000 Thursday as winner of the 32nd annual American Legion National High School Oratorical Contest.

The contest, based on the Constitution of the United States, emphasized the duties and obligations of citizens in a representative form of government.

Davidson, discussing how the Constitution could be misinterpreted, spoke before four judges and approximately 1,200 Capital High School students.

Second, third and fourth place winners were Howard E. Senter Jr., 18, W. Va., \$2,500; Arthur T. Poulos, 17, N.J., \$1,500; and Daniel R. Stanley, 17, Kan., \$500.

Sen. Frank Church, D-Idaho, a contest winner in 1941, distributed the awards to the youths.

Judges for the contest included Dr. Gerald Wallace, director of the School of Education, Boise State College; Dr. Albert E. White-

Traffic Courts

Hubert M. Herrington, 23, Ketchum, was fined \$125 by Blaine county Probate Judge Bill Grant for drunk driving. He was involved in a one-car accident three miles south of Ketchum on Highway 93 in which his car hit a Forest Service signpost after going out of control on a curve.

Emphysema

BOISE (UPI)—Idaho physicians were reminded at a recent respiratory disease seminar that Idaho has a slightly higher rate of emphysema cases per capita than metropolitan Los Angeles.

The meeting was sponsored by the Idaho Thoracic Society.

Dr. Charles E. Reed, director of the School of Inhalation Therapy at St. Luke's Memorial Hospital, said obstructive pulmonary diseases are increasing, with the highest instances in the nation in Idaho, Nevada, Utah and Wyoming.

Bible School Plans Class For Teachers

Training sessions for teachers of the Cooperative Bible School, slated in Twin Falls next June will be held at 1:15 p.m. May 7 in the United Methodist Church.

Lotus Joy Schumaker, chairman, said the training sessions will be conducted by Gaylord Hasselblad of the Associated Baptist Conventions of Idaho and Utah. Mrs. Robert Nelson, First Christian Church, will be in charge of the primary section and Mrs. Keith Maxwell, assisted by the Rev. Mr. Mackwell, will lead the kindergarten section.

The school will begin June 9 and run 8:30 to 11:30 a.m. for five days. Kindergarten classes will be held at the United Methodist Church while primary and junior-age groups are to meet at the Presbyterian Church.

The Church of the Brethren will have all three age groups for children living in that part of the city.

Participating churches include the Valley Christian, First Presbyterian, Episcopal Church of the Ascension, United Methodist and Church of the Brethren.

All the churches involved are obtaining teachers for the school and should have a complete list ready by May 7.

Registration blanks will be available after May 1 from the pastor of each participating church. Registration fee will be 50 cents a child or \$1 a family.

Whitworth College Students Will Seek Peaceful Changes

SPOKANE (UPI)—Whitworth College's Black Students Union gave notice Thursday it was not satisfied with the administration's response to eight demands but for the meantime, indicated it would use peaceful means to seek changes.

After picketing the Administration Building Thursday morning, the BSU held a rally in the afternoon, attended by 300 of Whitworth's 1,200 students. Some of the students said they would stage a counter rally on the campus today.

During a heated but orderly discussion between black students in the panel and white students in the audience, BSU members said they felt the college had "reneged on its promise" to the students and that demands which were presented as requests last year.

"Some things are being done but we don't feel it's been enough," Frenchy Lamont, a spokesman for the BSU, said.

The demands ranged from placing a person in the school's admissions office who "can relate specifically to non-whites" to formation of black study groups on campus.

The black students presented the demands to the school early this week.

In a position statement issued by the college Wednesday, Dr. Mark Koehler, president, said most of what the BSU had demanded had either already been carried out or was in the process of being done.

However, Lamont said the students felt the administration's response was too vague and non-committal.

One area of contention was the administration's firm support of Admissions Director Kenneth Proctor. The black students had demanded he either be replaced or supplemented with someone who could relate to non-whites, preferably a black.

Koehler's statement said the administration felt Proctor had done a good job overall but said the school was continually looking for a qualified person to supplement Proctor.

Mrs. Farris To Head PTA Unit

GLENN'S FERRY — Mrs. Charles Farris was elected president of the Glens Ferry PTA at the last meeting of the year. Junior high science fair displays also were exhibited.

Mrs. Richard Hoagland was named vice-president; Mrs. Donald Kent, secretary, and Mrs. Harold Wert, treasurer. Mrs. Jack Craig, a past president, was installing officer.

Super. George Powell spoke on finance problems faced by School District No. 192. The phase-out of the inventory tax and devaluation of utilities has placed the district in a real bind, he said.

A three-mill plant facilities levy is slated for May 6.

Registration blanks will be available after May 1 from the pastor of each participating church. Registration fee will be 50 cents a child or \$1 a family.

HIGHWAY 99, JACKPOT, NEVADA

VOLUNTEER AUDITORS RECEIVED a briefing on their duties Wednesday evening for the upcoming kickoff of the YM-YWCA Capital Fund Campaign Tuesday. From left are Vern Riddle, chief auditor Mrs. Helen Cannon, seated; Ludell Waldron and John Peterson. There will be a total of 15 auditors giving their services.

THE RUBBERMAID SPACEMAKER carter, a single unit only 6 1/2 inches wide by 4 inches high by 11 1/2 inches deep, provided ideal storage for any oft-used dried food. It will hold, for example, seven pounds of sugar or five pounds of flour. The frame attaches to the side of the wall cabinet with just one fastener, and the drawer slides out and lifts down for easy access. It is easily removed from the carrier for filling or cleaning. A clear lid that automatically opens and closes with the drawer, keeps contents fresh. The single unit carter is available in white with decorative strips in woodgrain, avocado and gold and is very inexpensively priced.

DEAR ABBY: I am 66 years old and could retire any time, but I like to keep busy. I have one business which nets me about \$50,000 a year. I own two homes, some good rental property, and a little real estate. I lost my wife two years ago. I am all alone, and would like to get married again. My friends think I'm crazy — that I should "enjoy" life for a while. What's to enjoy all alone? There are several women who are after me, but they are too young. I want a lady about 50 who wants to get married and who wants to be a wife again. I want to be a husband again. **CALIFORNIAN**

DEAR CALIFORNIAN: There are probably more women in the state of California who are "about 50" and want to be wives again than anywhere else in the world. My advice to you is to keep your eyes open and your mouth closed. And quit talking about your assets or you'll start a "Gold Rush" in California that will make the original look like a Girl Scout picnic.

DEAR ABBY: When a kid goes wrong, what factor is more responsible? His heredity or his environment? **NEEDS TO KNOW**

DEAR NEEDS: It's a toss-up. But one thing is certain. His parents will get blamed for both.

DEAR ABBY: Girls like to be alone sometime. I know do. I lock myself in my bedroom and listen to the radio. Sometimes if I have a boyfriend he's mad at me, or I think I've lost him, I cry. But my mother won't leave me alone. I can't be in my room for more than five minutes until she will make me come out. What am I supposed to do as she will leave me alone? I don't want to break up and cry in front of her. **CRY BABY**

DEAR CRY BABY: Your signature told me more than that letter. Are you sure your mother makes you come out of your room if you're in there for more than "five minutes"? I doubt it. Perhaps she thinks you spend too much time brooding and feeling sorry for yourself — which is unhealthy and unproductive. Yes, girls need some "privacy" — but be honest. Haven't you been overdoing it?

DEAR ABBY: I used to encourage my teenage children to read your column, but lately I've had to hide the paper. All I've been printing it seems are letters from unwell mothers, unfaithful husbands, and some crazy nut who likes to sleep in his wife's banyan pajamas. Are you picking more sensational letters just to make more lively reading, or is there more of this stuff going on now than before? **ALBANY MOTHER**

DEAR MOTHER: I doubt that there's more of this "stuff" going on than before, but one confession implies another, and people are less inclined to be ashamed of their problems — which realize that someone else has the same problem.

Everybody has a problem. What's yours? For a personal reply write to Abby, Box 67000, Los Angeles, Cal. 90060, and enclose a stamped, self-addressed envelope.

Marian Martin Pattern

9102 SIZES 8-10
by Marian Martin

SUMMER'S SHAPES
Choose summer's most becoming silhouette — the smart, slender, ocean-angled skirt that looks fresh in pastel colors as well as a city navy and brown.

Send to Marian Martin, Times-News, 383 Pattern Dept., 232 West 18th St., New York, N.Y. 10011. Print name, address with zip, size and style number.

New Instant Sewing Book — shows you how to sew it today, wear it tomorrow. Over 500 pictures. Only \$1.

Alonna Rice Will Spend Several Months In Europe

RUPERT — Alonna Rice, a student at Brigham Young University and the daughter of Mr. and Mrs. Harry Ridge, Rupert, left recently for Europe to spend several months.

She flew from Boise to Fairbanks, Alaska, where she was joined by a college roommate, Diane Laird. They traveled by train to Anchorage. From there they flew by KLM Dutch Airlines over the North Pole, then to Amsterdam, Holland.

After several days traveling through Scandinavia, they will be joined in Frankfurt, Germany, by Alonna's cousin, Dale Lincoln, of California. Mr. Lincoln has ordered a Volkswagen from the Frankfurt factory.

From Germany, the trio will visit several other countries including France, Spain, Belgium, Switzerland, Austria, Italy, England, Scotland, Wales and Ireland. Highlights of their trip will be meeting Brigham Young students studying at the University of Madrid, Spain, the University of Grenoble, France, and the University of Salzburg, Austria.

They also will visit with LDS missionaries serving in those countries and with several former Minico High School exchange students in Germany. The students include Lisa Stobbe, Sabine Peters, Jutta Huttenlaender and Heidi Ruge.

In England they will spend some time with friends Mr. Lincoln made while serving an LDS mission in the British Isles. They will then fly from Shannon, Ireland, to New York City, and arrive home in June.

Alonna will be a senior at BYU this fall, majoring in elementary education.

Junior Prom Set May 3

DIETRICH — The Dietrich Junior Prom will be held at 8 p.m. May 3 in the school gymnasium. "Half Way Paradise" is the theme song.

The gymnasium will be decorated in purple and white. Music will be provided by Dale Plot's Originals from Twin Falls.

On May 2 the seniors and their parents will be honored at a banquet hosted by the junior class.

Social Calendar

GLENN'S FERRY — Lady Trainet will meet in the Glenns Ferry City Hall at 8 p.m. Monday, with Mrs. Clarence Mayberry and Mrs. Ernest Messery as hostesses.

FOOD SALE SET

SHOSHONE — Magic Home Economics club members planned a food sale to be held Saturday Jan. 8 and a sale. Mrs. Ed Sheer, president, conducted the meeting held at the home of Mrs. Lawrence Tewa. Mrs. Wilma Kerner Sr. received the hostess gift.

Magic Valley Favorites

MARATHA WADDELL
2164 Highland Ave., Twin Falls

M and M COOKIES

2/3 cup shortening
2/3 cup granulated sugar
1/2 cup brown sugar
1 egg
1 teaspoon vanilla
1 cup sifted all-purpose flour
1/2 teaspoon salt
1/2 teaspoon soda
1/2 cup broken walnuts
1 7/8-ounce package plain chocolate candies
Cream together shortening, sugars, egg and vanilla until light and fluffy. Sift together dry ingredients. Stir into creamed mixture, blending well. Add chocolate pieces and nuts.

Drop from teaspoon two inches apart on greased cookie sheet. Bake in 350 degree oven for 10 to 12 minutes. Remove from pan immediately. Makes about three and one-half dozen cookies.

(The Times-News will pay \$5 each week for the best recipe submitted for Magic Valley Favorites. If you have a favorite

Fashion Parade Slated May 1 In Twin Falls

JEROME — A "Fashion Parade" is coming. On May 1 the County Extension Service and the Simplicity Pattern Co. will present a new series of colors and fabrics as well as sewing tips at a special fashion workshop.

Marlene Resler will be inspiring 4-H leaders to be a model every day. The program will include methods of teaching fashion accessories and grooming and how to plan a well-coordinated wardrobe.

Miss Resler will bring with her a wardrobe of current fashions to illustrate the spring-summer 1969 fashion story. She will show how smart teens can "dress right" in a group of casual designed in fling waving colors.

4-H teens will raise their flags for fun and freedom in a "spirit of sportiveness." They start with a feminine, ruffled pinafore over a sheer dress and style a gay pleasant look with bright, pastel "rickracks." Each girl can be at liberty to change her mind with vests, shirts and stacks, all creating a new system of checks and balances.

The 4-H stylist will prove how everyone can enjoy new fashion this spring as they plan a "bunny wardrobe." Capses and coats will get your vote to top this season's dresses and suits. A new basic dress will create a variety of new accessories — all sure to make a versatile candidate for a girl's wardrobe plan.

"Sports wear a r e h e s o n" with a sailor pant dress teens will salute. 4-H girls will love slouchy skirts and sharp bell bottom trousers all featured in this exciting program.

Your "party platform" will be fun to see when you include in your future one of the latest fabric dimensions, a sheer or lace, both perfect party-mates for fashion's newest silhouettes.

"Fashion Parade" will be presented by Miss Resler at the Idaho Power Auditorium in Twin Falls from 1:30 to 4:30 p.m. May 1.

Women's Section

KATHY REEDER
Kathy Reeder, Carlson. Reveal Wedding Date

Mr. and Mrs. A. Reeder announce the engagement and forthcoming marriage of their daughter, Kathy, to Randy Carlson, son of Mr. and Mrs. Ken Carlson, all Burley.

Miss Reeder is a 1968 graduate of Burley High School and was graduated last December from Link's Business School, Boise. She is presently employed at Rogers in Burley.

Mr. Carlson was graduated in 1967 from Scottsdale High School in Scottsdale, Ariz., and is a sophomore at Idaho State University, majoring in drafting.

A June 14 wedding in Zion Lutheran Church is planned by the couple.

Foster Homes Discussed By County Agent

Mrs. Alice Reed, county home extension agent, and Mrs. J. J. Boss, president of the Twin Falls County Home Extension Council, were special guests at the recent meeting of the County Fair Club at the home of Mrs. Jess Jones.

Mrs. Reed told the group of the great need for foster homes in the county and explained how she has been working with low income families in Twin Falls. She has trained eight aides to go to the homes and inquire how she can help.

It was noted volunteers are needed to work at the Neighborhood Center for preschool children.

Mrs. Irene Childers reported on the district meeting held in Twin Falls and showed her tote bag that all who registered received.

Mrs. J. H. Sharp attended the spring luncheon of the Minidoka District at Rupert, which was held on June 15. Approximately 75 persons attended. It was reported.

Mrs. Boss announced the next County Council meeting is June 15 and all clubs are asked to have nominees for officers on the council.

Mrs. Eloyd Sharp showed her spoon and fork plaques made of plaster-of-paris and Mrs. Maurice Allen received the white elephant gift.

Mrs. J. H. Sharp demonstrated how to make gingham flowers and displayed a rose made of egg cartons.

The next meeting is at the home of Mrs. Childers.

EILEEN INGRAM
Eileen Ingram Is Engaged To Dale Krumm

Buhl — Mr. and Mrs. Walden Ingram, Buhl, announce the engagement and forthcoming marriage of their daughter, Eileen, to Dale Krumm, Buhl.

Miss Ingram is a 1967 graduate of Filer High School and is employed at Speck's Cafe, Twin Falls.

Mr. Krumm is sales representative for the Idaho Power Co. in the Buhl-Wendell districts.

A June 5 wedding is planned at Lynwood Chapel, Twin Falls.

Demonstration Is Presented

DEITRICH — Dietrich Hobbyettes viewed a demonstration on making paper mache by club president, Carol Heiken at the April meeting at the home of Mrs. Mervyn Ridinger.

Members held a bulb, seed and plant exchange, and several quick craft items suitable for small gifts were shown.

Mrs. Peggy Haga brought her birthday gift from her secret sister, a pair of satin pillowcases, to show to the group. Refreshments were served by Mrs. Ralph Towne, and Mrs. Ridinger.

The May meeting is at Mrs. Walter Riechert's home.

Original Poems Read At Meet

Original poems were given by members of the CountrySide Flower Club when they met recently at the home of Mrs. John Pastoor.

Mrs. Jessie Davis was a guest. Mrs. S. W. Smith presented a program of colored slides of flower arrangements, describing them as they were shown.

Refreshments were served during the social hour.

The next meeting will be a luncheon at a luncheon at the Colonial House.

Club Director Named At Meet

GLENN'S FERRY — Mrs. Gwen Harper was elected a three-year director when the Hammett JOC Club met recently in the Koffee Kup Cafe, Hammett.

Mrs. Bea Lidgren was elected secretary. Mrs. Marsh Hoast continues for another year as president.

Celia Black whom the club is sponsoring in the Elmore County Fair Queen contest gave a reading, as well as what she will present at the contest events and was presented with a gift.

The May 15 meeting is the final meet for this year's a summer birthday party at the Koffee Kup, when Pollyanna will be revealed. Mrs. Harper is chairman of the business committee for this meeting.

Pinocle Played

St. Theresa's Pinocle Group of St. Edward's Catholic Church, met recently at the home of Mrs. Jo Berks, with three tables in play.

Mrs. Martha Jankowski was co-hostess. Score prizes went to Mrs. F. C. Odell, first; Mrs. Bernice Hamilton, second; Mrs. Jankowski, third, and Clara Murphy, low.

Seniors!

WILL YOU BE LOOKING FOR EMPLOYMENT SOON?

If so, now is the time to seek the answer to some important questions.

The first — What must I do to get a good job? The answer in most cases is additional training.

This raises the second question — WHERE DO I GET THE TRAINING?

If you are interested in business, we will be happy to outline a course for you that will give you quality training in a relatively short period of time — training that will open the door to career opportunities. The United States Chamber of Commerce states that over one-third of all people working are working in some capacity in business. Just 36 to 48 weeks of training could be the best investment you will ever make.

T.F. County Grain Plan Signup Listed

With high levels of producer participation indicated nationally for the 1969 wheat and feed grain programs, latest figures for Twin Falls County sign-up show less farms have been enrolled in the programs this year, according to Carl Boyd, chairman of the Agricultural Stabilization and Conservation County Committee.

Mr. Boyd said that it's important that growers follow through with their indicated intention to divert crop land from production to realize improvement in farm prices for the commodities.

Signup figures throughout the United States show that national goals for participation in the wheat program and diverting acres under the feed grain program have been surpassed. Mr. Boyd said this gives added strength to the price picture, providing farmers comply with their intentions.

The Twin Falls county sign-up shows that 1370 farms have been enrolled in the programs. This compares with 1336 in 1968. The 1969 feed grain program 123 farms were signed up to divert 2159 acres or 42 per cent of the total base of enrolled farms. Program benefits include price support payments and loans and payment for additional diversion below the farm allotment.

Farms signed up under the 1969 wheat program total 1360,

Group Formed

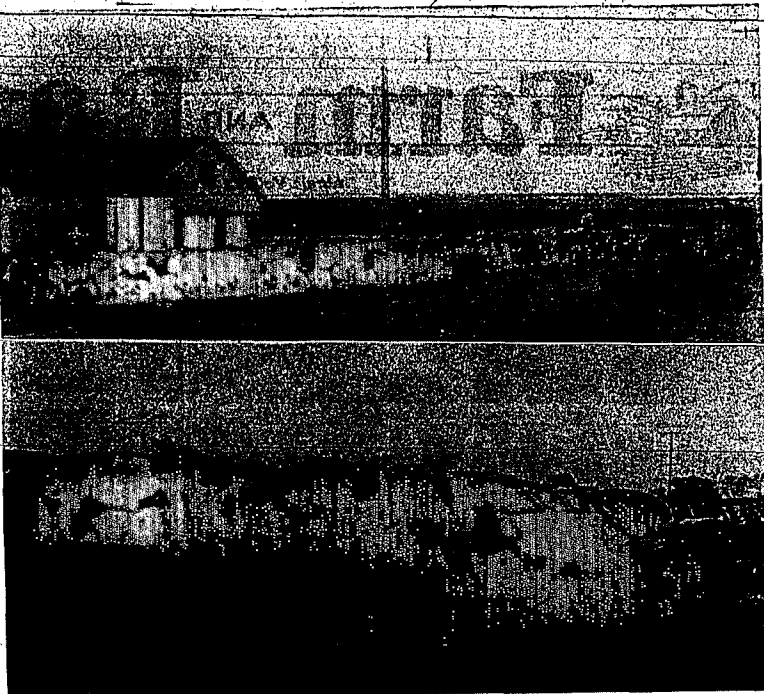

Formation by General Mills of a national Bakery Flour Sales organization and appointments to key positions in the new structure have been announced by D. J. Woodland, company vice president and general manager of its Sperry Division, of which the new organization is a part.

F. B. "Barney" Wallace, former general sales manager for Bakery Flour and Mixes for General Mills' Western Operations, has been appointed Bakery Flour Sales director. Wallace, who will move from Palo Alto, Calif., to Minneapolis, Minn., in June to direct the new national organization, has been with the company since 1940.

representing 67 per cent of the county's total wheat, or 86 per cent of the total county allotment.

As of April 4, national farm program sign-up showed for 1969 feed grain program, 1,645,393 farms had been enrolled—145,000 more than in 1968. These farms have a base-acreage totalling 92,307,705 acres, and a total intended diversion of 40,726,579 acres. Intended diversion is 6.4 million acres more than last year.

National figures for the 1969 wheat program on April 4 indicated more have been enrolled compared with 642,134 for 1968. The enrolled farms had wheat allotments totalling 45,125,907 acres, or 87.5 per cent of the national wheat allotment. Agreed diversion on signed-up farms totalled 4,869,367 acres.

SALMON RIVER Cattlemen's Association members trailed several hundred head of cattle into Nevada this week. Here cows and calves owned by Art Reinsteil, Kimberly, and Roy Jensen, Twin Falls, are being moved along county roads

toward their destination in Nevada. It took this combined herd about six days to reach the San Jacinto ranch near Contact where the association's cattle will graze this summer.

Electronic Thinners Evaluated

BURLEY — Ever since the first commercial sugarbeet field planting men have been dreaming of the day when this crop could be successfully grown without hand labor.

Steady progress has been made toward this goal through the combined efforts of plant breeders, chemical engineers, sugar industry engineers and cooperative beet growers.

Significant steps along the road to no hand labor were: the development and introduction of monogram and pellet seed; precision planters spraying lime harrows; and herbicides. Recent years have seen the advent of several types of mechanical thinners. While they did a good job of stand reduction, they were not selective enough for thinning to a final stand.

The search continued for a machine that could equal a good hand thinning job. The dream has become a reality—it is called the electronic thinner.

Walter Tollefson, fieldman for the Mini-Casalia district, Amalgamated Sugar Co., says there

are four different models available this year. They all have one thing in common—all four feature an independent electronic program unit for each row.

The John Deere and Faise Monomat thinners both select beet plants with a "sensor" bar and remove unwanted plants with hydraulically activated knives. Eversman and Agron employ the electric eye principle for plant selection. Eversman has an air activated knife, while Agron "Electro-Blo" thinners use a Di-Nitro spray solution.

Tollefson said last year, the John Deere and Faise Monomat machines thinned several thousands of acres of sugarbeets in California with great success. Reports from growers were enthusiastic.

"We had the opportunity of seeing the Faise Monomat in action in our Mini-Casalia area," he said. "It was demonstrated on several ranches in the Kenyon and Warr districts south of Burley, it was an impressive sight."

Several field conditions are essential for top electronic thinner performance. The field must be weed-free with beets precision planted to singles spaced two or more inches apart. Soil surface in the row should be smooth for the gauge wheels to hold the knives at the proper depth.

It should also be free of large clods that could trip the sensor bars. Surface smoothing can be accomplished by rolling the ground with a smooth roller at day ahead of thinning, to allow the beets time to recover.

Tollefson added, "Having had no advance notice of the machine's arrival, we were fortunate in being able to find a field that met all of the above requirements at the Anderson Brothers' Land Ranch near Oakley."

Staulfer's new weeder for sugar beets gives control of annual grasses and broadleaf weeds without ever letting soil residues crop up. Control that makes thinning and blocking faster and easier by starting early and lasting long. And this year, 7 new weed pests come under RO-NBET control, bringing to 20 the total number of profit-robbars you can keep out of your rows. Nightshade is just one!

With RO-NBET at work, you can cut cultivation costs, increase tonnage and profits. Available as liquid or granular material. And available right now. We have a full supply and would like to serve your needs.

Three Join T.F. Grange

Three persons became members of the Twin Falls Grange during a recent meeting.

They are Mr. and Mrs. John Thiebert and Mrs. Virginia Elbridge. A discussion on what farmers are facing in labor and bargaining power was held.

It was announced that a style show will be held at the next meeting and all ladies are asked to bring their cotton dresses.

It was announced that some of the members have started the remodeling of the Grange Hall.

Local 4-H Club Has Special Demonstration

A special demonstration was given during a recent meeting of the Happy-Go-Lucky 4-H Club by Mrs. Richard Reed, extension home agent.

She discussed egg pastry and gave tips on making pastry tarts and pastry strips.

Also giving demonstrations were two club members, Diane Schrank, banana bread, and Cathy Roper, banana cream pie.

Sugar Production

JOHANNESBURG, South Africa — The South African sugar industry had produced 1.6 million short tons of sugar from 15 short tons of cane by March 1, says the South African Sugar Association's monthly report.

Host Family For Honduras Pupils Sought

BURLEY — Idaho is again having an International Farm Youth Exchange student this summer. Reynaldo Endorrado is from Honduras and is coming to stay in Idaho for three months.

The Casalia County Agent's office is looking for a host family for a two-week period.

This must be a farm family who is willing to accept the International Farm Youth student as a family member and expect him to do productive work.

Any farm family in Casalia County who is interested in having the Endorrado youth come for two weeks, starting May 1, contact the County Agent's office by phone 678-9401 or stop in the office in person, for further details.

Projects Aired

Fund-raising projects were discussed during a recent Highline 4-H Club meeting at the home of Jean Marshall.

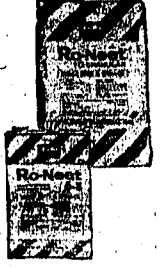

Also discussed was record books by Sandoe Sommer. The next meeting will be held May

Tuckers Are Members Of Knull Grange

Mr. and Mrs. Richard Tucker became members of the Knull Grange recently.

It was announced during the meeting that the building and grounds committee will build a farm to make a flower bed in front of the building.

Grange members voted to have Elmer Annis represent the grange on the Sportsman Council. The Knull Grange will be decorating the State Grange Convention in December.

Mrs. Bryan Platt was appointed program chairman for Mother's Day and Elmer Dossett for Father's Day.

Glen Dossett, lecturer, talked briefly on the safety emblem for slow moving vehicles.

WELL-MARKED Appaloosa in the Salmon area is this 8-month-old colt owned by Axel Sorensen. Sorensen says this is an "unusual" coloring for an Appaloosa in this area. He raises animals as a hobby.

Exchange Program Held By Grangers

MURTAUGH — Members of the Murtaugh and Knull Granges presented an exchange program for the Lucerne Grange under the sponsorship of Pomona Grange.

A flag and globe were presented to Mrs. Stewart, Lucerne lecturer, and on May 10 Lucerne and Knull Granges will present them to Pomona Grange.

The program included a "Mother of the Evening" contest conducted by Glen Dossett, Knull lecturer, which was won by Mrs. Earl Young, Murtaugh Grange. She received a pink carnation corsage.

Saxophone numbers were presented by Henry Petersen, Murtaugh, accompanied by Mrs. Bryan Platt, Knull.

Norman Jones, son of Mr. and Mrs. Leslie Jones, Knull, spoke of his travels in England and France while he was studying there last year.

Murtaugh Grangers presented a tableau, "The Grange Foundation," with Mr. and Mrs. James Kirkpatrick, Jimmy Kirkpatrick, Debbie Kirkpatrick, Mrs. James Sargent, and Mrs. William McCoy taking part.

Songs were sung by Mrs. Ralph Breeding and Norman Petersen, Henry Petersen and Mrs. Norman Petersen took charge of the lights and curtains.

Declo 4-H Club Has Annual Fete

DECLO — Members of the Leading Lassie 4-H Club held their annual banquet recently at the home of Mrs. Austin Walker, leader.

New officers of the club include Carolyn Zollinger, president; Anita Engstrom, vice president; Carla Walker, secretary; Debra Hurst, treasurer; Rayetta Mosso, first representative, and Jackie Adams, second representative.

Members selected art, sewing, and cooking as this year's projects.

SIGNUP SET

KIMBERLY — The Kimberly Recreation Department will have registration for baseball and softball from 9 a.m. to noon Saturday in the city hall meeting room.

Value Increases

WASHINGTON — The Crop Reporting Board says the U.S. livestock and poultry are worth a record high \$20.2 billion. The total is seven per cent higher than last year's combined value. The previous high was \$19.2 billion on Jan. 1, 1952.

COWS CLASSIFIED

JEROME — Gordon M. Martin, Jerome, recently had his registered Holsteins classified for body conformation by an official of Holstein-Friesian Association of America, Brattleboro, Vt.

Wildlife Federation Aide Raps DDT Use

WASHINGTON, D. C. — The National Wildlife Federation has charged that the continued widespread use of DDT and related persistent pesticides is a game of environmental roulette with the gun pointed at the heads of the world's wildlife and human populations.

Thomas L. Kimball, head of the 2½-million member Federation, called the continued use of DDT simply because it is the "cheapest" pesticide, a cruel joke on humanity. He urged an immediate ban on DDT and its close chemical relatives except where there is no technological alternative to combat an imminent threat to human health and welfare.

"We have forever passed the point where DDT's record of good works can camouflage the existing and potential environmental horrors that its manu-

facturers and their lobbyists would have us forget, ignore or study further," Kimball said.

DDT has played a valuable role in combating agricultural pests and disease-carrying organisms throughout the world. However, DDT and related chlorinated hydrocarbons remain toxic for many years after application, and accumulate in increasingly heavy quantities as they are passed through the natural food chain.

The wholesale and indiscriminate use of DDT has contaminated every corner of the world and is blamed for drastic reductions in certain wildlife populations. In fact, birds of prey at the top of the natural food chain, such as falcons, eagles and ospreys, are believed threatened with total extinction.

Rapidly accumulating DDT residues have seriously jeopard-

ized Lake Michigan's \$15 million per year salmon sport fishery which is revitalizing shoreline communities and providing millions of hours of sorely needed outdoor recreation. In the latest pesticide scare, the Federal Food and Drug Administration confiscated more than 2,000 pounds of coho salmon carrying dangerous levels of DDT and its ever more toxic relative dieldrin.

"The interception of extremely poisonous coho salmon from Lake Michigan is but the latest in a long series of increasing incidents exposing the real threat of DDT and other persistent chemicals not only to wildlife, but to man," Kimball said.

Soviet scientists reportedly have demonstrated that repeated exposure to DDT causes changes in the human liver

which interferes with elimination of waste products from the body.

Experiments with laboratory animals have revealed that DDT nullifies the effect of life-saving antibiotics; incites cancer; affects sex hormones, and in large doses, attacks the central nervous system. Fear mounts in the scientific community that DDT may have similar effects on humans.

"If an exploding medical technology can sustain human life with an artificial heart, what hitherto hidden secrets will it discover about the 12 parts per million DDT the Public Health Service tells us the average American carries around in his body?" Kimball asked.

"At that, the FDA would rule the average American is unfit for human consumption." The fact that current tech-

nology only "inspects" the casual use of DDT to be poisoning humans is a hollow, ever ghostly argument when safe substitutes are available, he said. When faced with the possible, even probable heinous side effects of DDT and other persistent pesticides, the argument smacks of inhumanity, he emphasized.

"The insidious threat of DDT recently prompted a total ban on its use in Sweden, the first country to do so. In the United States, however, the chemical industry and its supporters in state legislatures and the Congress say conservationists have exaggerated DDT's effect on wildlife, and emphasize there is no absolute proof that it is a human threat.

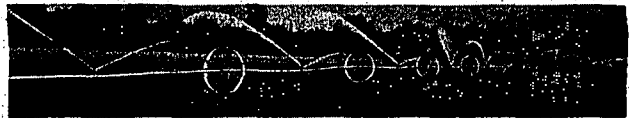

Spokesmen for the National Agricultural Chemicals Association have defended the multimillion dollar DDT business by calling DDT opponents "anti-social," "neurotic" and "preoccupied with the subject of sexual potency."

HIGH INDIVIDUALS IN the recent West Magic FFA District farm mechanic's contest were presented trophies by Tom Yadon, left, representing Norco, Twin Falls, which donated the trophies. The high individuals were from left,

Mike Chojnacky, rafter cutting, and Ronald Crozier, electric arc welding, both Jerome, and Phil Jensen, Hagerman, acetylene welding.

MEMBERS of the West Minico FFA judging team which won the East Magic FFA District farm mechanics contest are, from left, Paul King, Randy Short and Lonnie Swearingen. The East Minico Chapter was second and Declo was third.

TOP TEAM DURING the Farm Mechanic's Contest for FFA members in the West Magic Valley FFA District was this Hagerman team. Frank Flint, right, represents Motor-

Mercantile, Twin Falls, which donated the team trophies. Team members include, from left, Phil Jensen, Ray Lapp and John Elliott.

West Minico FFA Chapter Wins Contest

RUPERT — The West Minico Future Farmers of America chapter, with Keith Merrill as adviser, placed first in the East Magic Valley Farm Mechanic Contest held recently at the Minico High School.

The contest consisted of arc welding, vertical up; horizontal fillet and flat butt for tensile strength; tool sharpening; acetylene welding and cutting; soldering; rafter cutting, and tool identification.

Members of the winning team were Paul King, Randy Short and Lonnie Swearingen.

The East Minico chapter placed second and Declo was third.

4-H Club Has Demonstration

DECLO — A demonstration of docking lamb tails was given during a recent meeting of the Declo Junior Feeders 4-H Club at the home of Mr. and Mrs. J. A. McGraw.

Eddie McGraw gave the demonstration and Danny Phillips explained the best way to prepare a stick for roasting weiners. Also discussed during the meeting were the proper ways of fitting and showing lambs.

New officers of the group include Kenny Bailey, president; Dan Kidd, vice president; Debra Keiser, secretary-treasurer; Gaylen Smyer, reporter, and David Lewis, refreshment chairman.

Attends Meet

WENDELL — John A. Steppert, pastor of the United Presbyterian Church, attended a Pastors-in-Residence training session at the San Francisco Theological Seminary.

The week long seminar will concern itself with the "New Man: A psychological study of the Generation Gap, Sexuality and Violence."

PRICE INDEX UP

BOISE — Idaho farmers paid more for feed on March 15, 1969, than a month earlier, the Idaho Crop and Livestock Reporting Service reports. The mid-March price index was 91 per cent, five per cent more than the mid-February index.

JUNIOR MEMBER

JEROME — Del Royce Rømer, Jerome, is a junior member of the American Hereford Association.

Hagerman And Jerome FFA Chapters Win District Event

The Hagerman and Jerome FFA chapters came out on top during the West Magic FFA District's annual Farm Mechanic's Contest held earlier this week in Twin Falls.

The Hagerman three-member team won the team event. Second place team was Jerome and Wendell was third.

Members of the Hagerman team were Ray Lapp, Phil Jensen and John Elliott.

High individuals were Ronald Crozier, Jerome, electric arc welding and tool reconditioning; Phil Jensen, Hagerman, acetylene welding and soldering; Mike Chojnacky, Jerome, rafter cutting and tool identification.

Trophies for this contest were donated by Norco and Motor Mercantile, both Twin Falls. Presenting the awards were Frank Flint, Motor Mercantile, and Tom Yadon, Norco.

Sheer Honored By Magic Grange

SHOSHONE — Ed Sheer, north Shoshone, was honored by Magic Grange with a 25 year pin and certification presentation.

Mrs. George Horn was in charge of the program, during which films were shown by game conservationists, Larry Keeney, Shoshone, and Dee Hubbard, Twin Falls.

Mrs. Lawrence Tews was in charge of arrangements for the dinner, a potluck service held as part of the open meeting event.

STEAK FRY HELD

DECLO — Members of the Declo FFA chapter held their annual steak fry at Twin Falls park recently with their girlfriends as special guests. Accompanying the group was the chapter advisor and his wife, Mr. and Mrs. Richard Garrard.

Chairmen Named

FILER — Committee Chairmen were selected for the Better Livestock 4-H Club when it met at the home of David Ramsayer.

Committees in operation include recreation, decorating, ways and means, and health and safety. The April 29 meeting will be at the home of Mark Bowen, Twin Falls.

PARTICIPATING

FILER — Monroe Hays, Filer, president of the Idaho Farm Bureau Federation, will be taking part in a regional farm policy discussion with Clifford M. Hardin, secretary of Agriculture, next week in Pullman, Wash.

CORRUGATING ALFALFA was one of the many farming practices Yoshinobu Arima, a Japanese trainee, learned on the Art Reinstein farm, south of Kimberly. Yoshinobu will stay with the Reinsteins until June, 1970, learning modern farming and ranching practices so he might help improve Japan's agriculture.

CONVENTION SET
KANSAS CITY, Mo. — The 1969 American Feed Manufacturers Association annual convention and biennial Feed Industries Show and Production School will be held May 25-28 in Kansas City. Over 5,000 people are expected for these events.

69 American Rose Annual Is Available

The world's largest rose tree is 83 years old and covers 1,750 square feet. This interesting phenomenon has been researched and described in the 1969 American Rose Annual. Every home gardener will find delight in this comprehensive publication that contains a host of articles dealing with every phase of rose growing and numerous other subjects of interest to the home gardener.

A complete report of the 4th International Rose Conference held in London, England, July, 1968, reveals many new developments and innovations in the field of roses. Another article tells the gardener how to get the most from his soil. One complete section is devoted to descriptions and numerical ratings of all new roses introduced in the United States in the past five years.

ASTRIDE his trusty steed, Yoshinobu Arima, a 20-year-old Japanese trainee in this country for two years, helps the Art Reinsteins trail several hundred head of cattle to Nevada to summer rangeland. Yoshinobu is in this country learning modern ranching techniques.

Japanese Trainee Learning Farming, Ranching Techniques

KIMBERLY — A 20-year-old Japanese man has been busy the past four months learning the "ropes" of raising beef cattle and farming.

Yoshinobu Arima is staying with the Art Reinstein family and learning modern agriculture techniques and management in hopes of operating a beef ranch in Japan.

Copies may be purchased from the American Rose Society, 4048 Rosales Place, Columbus, Ohio 43214 for \$5.00 or will be received free with a membership in the American Rose Society. Membership fees are \$7.50 per calendar year or \$5.00 during April, May and June and also includes a subscription to "The American Rose" magazine.

Yoshinobu is getting much experience in handling and feeding beef cattle. During January and February, he handled the feeding chores of the cattle on the Reinstein farm, south of Kimberly.

205 Lambs Sold

RUPERT — The Mindoka Lamb Pool sold 205 head of spring lambs recently for \$30.10 hundredweight. These lambs, weighing 104 pounds, were purchased by Jack Newman for the Idaho Falls Livestock Auction Co. Last year the first shipment of lambs from Mindoka Pool were \$27.60 hundredweight.

Plans Trail Ride

A trail ride was discussed by members of the Twin Valley 4-H Club at a recent meeting. The ride will be held May 3 with Linda Damos and Rust Jasser in charge. Project and record books were given to each member. The next regular meeting will be May 10 at the home of Kris Annis.

Besides ranching experience, Yoshinobu also is getting experience as a farmer of both irrigated and dryland. On the irrigated farm, south of Kimberly, he helped Mr. Reinstein in corrugating alfalfa and various other types of farm work this spring.

BRIDGE

By Jacoby

DISCARD SIGNALS ROAD TO DEFEAT

The discard of a high card to show strength or a low card to show weakness is as old as the game of bridge. In fact it's a lot older, because whist players used that same signal.

A far more modern variation is the suit-preference signal in which a high card calls for a high-ranking suit and a low card for a low-ranking suit. The expert needs to use both but must temper it with common sense. Nothing can be more disastrous than the play of a high diamond to ask your partner to lead a diamond, only to find that he assumes you were calling for a spade.

Therefore the first principle of discarding is common sense and the best players employ that commodity at all times.

South won the spade opening, entered dummy with the king of hearts and let it ride. West took his king and cashed the queen of spades. East wanted his partner to shift to a club. How could he tell him to do so? He couldn't. A lot older, because whist players used that same signal.

Finally West figured it out and led his 10 of clubs. South had discarded a club and ended playing East. If West had led a third spade South would have made the hand by ruffing in dummy, drawing trump, stripping the hand, leading a club and ending playing East.

West looked at that queen of diamonds in utter fascination. What could East be doing? Obviously he didn't want a diamond led to him. He didn't need to ask for a spade continuation. West almost had a third spade on the table as it was. Then what could that astonishing play mean?

West looked at that queen of diamonds in utter fascination. What could East be doing? Obviously he didn't want a diamond led to him. He didn't need to ask for a spade continuation. West almost had a third spade on the table as it was. Then what could that astonishing play mean?

Finally West figured it out and led his 10 of clubs. South had discarded a club and ended playing East. If West had led a third spade South would have made the hand by ruffing in dummy, drawing trump, stripping the hand, leading a club and ending playing East.

Today's Question: You do bid three no-trump and your partner continues to four clubs. What do you do now? Answer next issue.

Today's Market And Financial Report

Stocks

NEW YORK (UPI)— Stocks were making a bid for a higher Friday in the absence of motivating influences. Selective issues again were responding to bright corporate news and a lack of any additional market developments on the Korean front might have been another plus factor.

As activity moved into the final hour, the UPI stock market indicator, measuring all issues traded, showed a gain of 0.36 percent on 1,500 issues on the tape. Advances held a solid edge over declines, 745 to 492.

The Dow Jones average of blue chip industrial was up 1.53 at 922.73. Volume was approaching the 10-million share mark.

50 YEARS AGO

Building of big theatre being revived. Ophium management encourages public to open auxiliary showplace pending completion of new home.

THE HOME LAWN: The old question is here again: Should I rake lawn clippings or leave them to rot and build up humus? I belong to the old school which says "leave them on." The only time we remove the clippings is when they are so long (such as you see when grass has been neglected) they are apt to smother the roots. In the course of an average year, you will mow a total growth of about 35 inches of grass and this clipped material contains nutrients. One acre of lawn can have up to 3 or 4 tons of grass returned to the soil and that's a lot of nitrogen and other nutrients. The main objection to clippings is that they're unsightly. The "chatch trauma" which most home owners fear is largely imagination. That is supposed to be a buildup of clippings to the point where water rolls off the lawn like it does on the roofs of the huts in the jungles of Africa. We've had that in our lawns ever since the time man invented the lawn mower and we don't know where it's right now which doesn't have that.

To me, raking off humus loaded with nutrients from the lawn is a waste. Many lawn experts don't believe that clippings return organic matter, but I disagree. If that's the case, why do other weeds? You can buy (or rent) aerating machines which punch holes in the lawn to allow moisture to move in, and you can buy dethatching machines. If you have other things to do, forget the dethatching machine. **GOING GROWING STRAWBERRIES:** More and more gardeners are becoming discouraged with their strawberry patch. They think they are causing plants to dry up in summer, even though the plants get plenty of water.

Summer "drying" (or "dying") usually due to verticillium wilt organisms. It builds up in soils where crops such as tomato, potato, egg plant, pepper and cucumber are grown. That's why it's a good idea to rotate your strawberry patch, and not grow plants following crops that must be rotated.

Some varieties are more susceptible than others. For example, Earliwanda is highly susceptible, along with Redstar, Jolie, Jersey Belle, Armore, Pochantans, Midway and Dixieland. Among the resistant varieties are Sunfire, Premier, Catskill Surecrop and Robinson. Most other varieties fall somewhere in between, with an intermediate degree of resistance.

There is no spray control for summer drying, so your best bet is to try the resistant varieties. Incidentally, if like to remind our friends that irrigation of the strawberry patch will pay in spring if you want to save a crop from severe frost damage with temperatures as low as 20 degrees F. during the bloom period. Ice will form all over the patch, but this will save the crop.

TREE ROOTS IN LAWN: Quite often a maple tree (Maple has shallow roots) with some roots which are exposed, practically growing on the surface. Can such roots be cut off? Often when these roots show through the ground—they are a nuisance.

Suggestion: take a sharp axe or an Adz and chop off the roots or level them so they are flush with the soil surface. It won't do them a bit of harm. Some gardeners cope with the problem by covering the roots with a couple inches of soil, but sooner or later the roots will rise above this layer. Chopping the roots out, either wholly or partially is the only way I know of to handle this.

QUESTION OF THE WEEK: D. R. of Twin Falls: "We have a planting of flowering shrubs which have been badly neglected. There is growth on top, but the canes are bare and leggy, and some are dead. Can we cut the bushes back about half or will it hurt them?"

Sometimes flowering shrubs such as barberry, spirea, privet, lilac and many others, are allowed to go unpruned for years. Result—they are full of dead, intermingling wood which is almost impossible to improve by a pruning job. In the wood old, thick, and unkempt, I would cut the shrub back to within six inches above the ground and let new growth come up. This gives the shrub a new lease on life, and will produce canes you can manage. If you cut the bush back as you suggest, you'd have a row of sticks resembling a picket fence, and even some of the wood here might be dead. If the shrub has only a few dead stalks, but has grown thick and gangly, you might try reaching in and cutting out the dead wood first, then take out

STANDING OUT IN a well-managed pasture near Richfield is Mont Johnson, an advocate of a well-managed pasture program for all livestockmen in Magpie Valley.

Richfield Rancher Advocates Well-Managed Pasture Program

RICHFIELD—A pasture program for both irrigated and dry land as a means of gaining the maximum return from the land, and at the same time keep the land intact for future generations, is advocated by Mont Johnson, Richfield soil conservationist and rancher.

At Richfield as well as in other areas of southern Idaho, especially where fields are smaller, more farmers are finding pasture rotation to be most profitable, Johnson said.

Pastures are providing the major portion of livestock forage produced in the state, and are a cheap source of mineral, vitamins, proteins, and other nutrients, Johnson says. This is a better balanced ration for a longer time than other feed, and requires less labor than other forage crops fed to livestock. It is also soil building, improves tilth, and adds organic matter to help reduce erosion.

"Fit your pasture to the ranch and area in which it is located," Johnson advises farmers or prospective buyers. "Consider what is there and what is entailed in establishing a pasture system."

Climate, soil, both dry and irrigated land, proper grasses to plant, and type of grazing to follow, are all highly important, he states. Types of grazing are either mainly continuous, rotational, strip, and daily ration. The daily ration will give the most production per acre, but may not be too practical with large numbers of cattle.

The rotational method of grazing is preferred with field size to be determined by the number of cattle to be grazed, not exceeding four days on any pasture. Alfalfa may be planted with Lataf Orchard grass and grazed without much danger of bloat. This combination matures about the same time and gives more pasture per acre.

Johnson believes only one grass and one legume should be planted in the same field for good pasture. It can then be managed without detriment to the grass. He got this idea from observations while grazing his own cattle.

"Management is the most important part of a pasture program," Johnson thinks.

The returns from management, preparing the seed bed, planting, irrigating, fencing, and grazing, run from one acre per animal unit month to as high as 30 animal unit months per acre.

Since people are on the increase and, generally speaking, there is no more land, Johnson thinks it is up to the stewards of the land to use it in such a way as to receive the maximum return.

As a real estate representative in the Richfield area, Johnson uses his ranch and soil knowledge to advise prospective buyers or farmers wishing to sell out.

He came to Richfield as an infant with his parents, the late C. A. Johnson and Mrs. Dolores Johnson. His father was a rancher and Mont grew up on the farm. After attending the University of Idaho he became a farmer on his own.

After many years as chairman of the Soil Conservation Board in Lincoln County and recipient of local, district, and north-west grassman of the year awards, Johnson has become very well known and in demand as a public speaker in many Southern Idaho Agriculture events.

Now retired from active ranching, Johnson formerly was in partnership with his brother-in-law, L. W. Sanders. Sanders now operates the 133-acre irrigated ranch and large dairy operation which is a point of interest at Richfield. Johnson traveled widely in Washington, Oregon, and California inspecting dairy farms before building the Richfield dairy barn which is a modern and functional as any in the southwest.

Johnson's 2550 acres of dry

Merits Of Sanfoin Explained

MOSCOW—Sanfoin, a perennial legume similar in many ways to alfalfa, has been grown in the United States because, unlike alfalfa, it does not cause bloat in livestock. But it has never gained the acceptance in this country that it has in its native European areas.

In the last 10 years or so, however, research scientists have taken new interest in this legume as a forage crop in areas where temperature and moisture limit alfalfa to a single cutting.

Dr. Glen A. Murray, assistant research professor of agronomy at the University of Idaho, says sanfoin appears to have good potential for many areas of Idaho. Murray and Dr. A. E. Slinkard, associate research professor of agronomy, have been studying the legume's performance in the state.

Limited research suggests it may be a good substitute for alfalfa in one-cut hay areas and that it may be valuable as a green manure crop if seedling.

Two cuttings of Vernal alfalfa at the Moscow location yielded just 2.6 tons per acre.

Improved varieties of sanfoin have been developed. Available may make the legume even more valuable as a forage and seed crop, Murray believes.

Sanfoin establishes a taproot and has growth habits similar to alfalfa, but it begins growth earlier in the spring and matures more rapidly than alfalfa, Murray points out. Thus, warm and wet spring months provide an environment that encourages rapid, early growth of the legume.

Idaho's relatively dry summer months also are favorable for sanfoin seed production. There is little danger of rain damage while the seed crop is maturing.

Murray says research in other areas shows there is very little difference between sanfoin and alfalfa in chemical composition and feeding value and palatability.

Potato weeder No.1

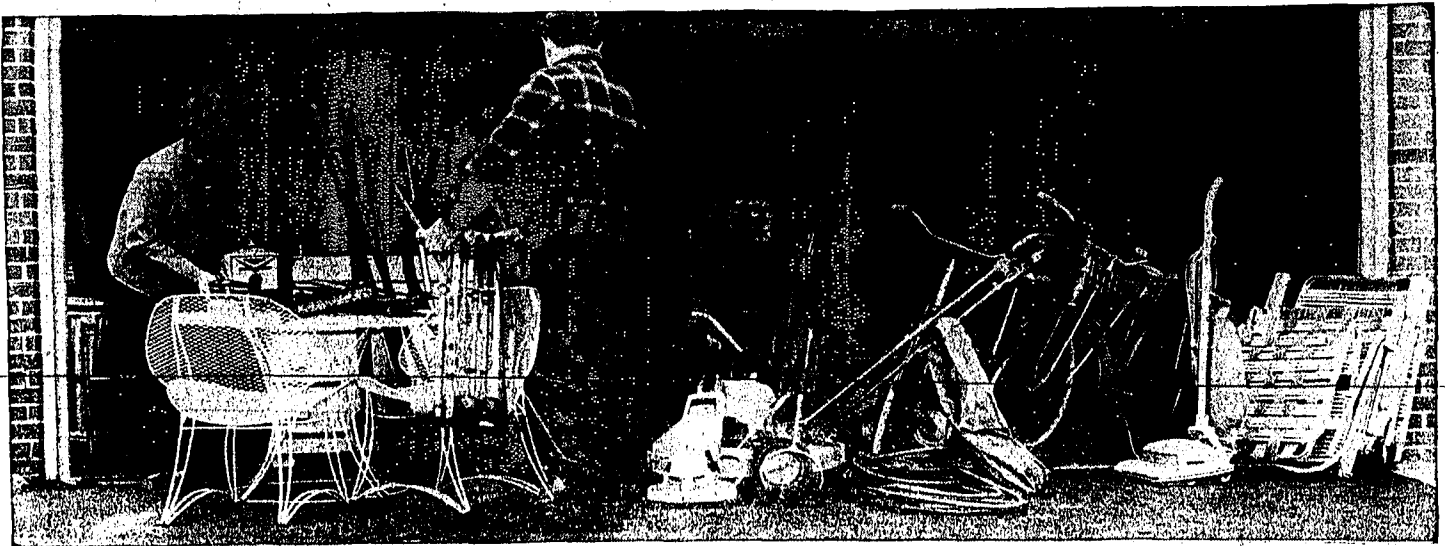

That's what you growers have made EPTAM®. And for good reason. EPTAM is the only selective herbicide available for effective control of nutgrass (nutgrass) in potatoes. But that's not enough to make it No. 1.

A single application of EPTAM... liquid or granular... before you plant, at drag-off, at next to last or last cultivation controls annual grasses and many broadleaf weeds. The EPTAM label gives full details on application and incorporation methods. Pick the one best suited to your operation. Use it to control barnyardgrass, nutgrass, quackgrass (wildgrass), lambsquarters, pigweed, foxtails, and many others. It leaves no soil residue.

This season, put your seed potatoes to bed with EPTAM... the No. 1 weeder. It's the best growing partner they'll ever have. See us soon.

Unknown Pro Grabs Early Lead In Nelson Classic; Boros, Blocker Second

DALLAS (UPI)—Bert Greene, a slender Georgian on his third tour campaign, scratched at 11, scrambled for a four-under-par 31-66 from Preston Trail Golf Club's thorny layout Thursday for a one-stroke first round lead in the \$100,000 Bryon Nelson Golf Classic.

Robinson, Johnson Pace Oriole Win

BALTIMORE (UPI)—Frank Robinson hit his seventh home run of the year and Dave Johnson slammed a two-run double Thursday night as the Baltimore Orioles defeated the Detroit Tigers 5-2.

Padres Edge Astros On Late Homer

HOUSTON (UPI)—Nate Colbert, a Houston Astro castoff, left unprotected in the expansion draft, slammed a three-run homer to give the Padres a 3-2 league career-to snap a 1-1 tie in the eighth inning Thursday night and give the San Diego Padres a 4-1 victory over the Astros.

Shakespeare Joins Butkus In NFL Battle

CHICAGO (UPI)—Dick Butkus, who makes his living being mean to people on behalf of the Chicago Bears, Thursday revealed the gentler side of his nature.

Murcer Bats Yankees Past Indians 11-3

CLEVELAND (UPI)—Bobby Murcer drove in four runs with his sixth and seventh home runs of the season and Dick Simpson doubled home three more Thursday night as the New York Yankees handed the Cleveland Indians their 11th defeat in 13 games, 11-3.

three straight birdies, and rank unknown Bob Menne of Andover, Mass., who finished at 117. Mike Greene, tore up the first finishing holes with birdies for his 32-35-67, while the methodical Boros got four birdies on the back side of the 1,080-yard, par 35-35-70 Preston Trail course for a 36-31-67. Boros birdied the 9th through 11th holes, but "maced" the 12th hole. Menne, who had the day's only eagle—on the 590-yard, par 5 third hole—birdied the final hole. Boros pulled in a tie with Boros and Blocker. He shot a 34-33-67.

Cards Edge Cubs; Javier, Giusti Shine

CHICAGO (UPI)—Dave Giusti set down the Chicago Cubs on three hits Thursday and Julian Javier collected four RBI's in scoring twice to lead the St. Louis Cardinals to a 3-2 triumph.

Jackson's Homers Push A's By Twins

MINNEAPOLIS (UPI)—Reggie Jackson belted a pair of home runs Thursday before being ejected from the game for slugging relief pitcher Dick Woodson to pace the Oakland Athletics to a 5-1 victory over the Minnesota Twins.

Murcer Bats Yankees Past Indians 11-3

CLEVELAND (UPI)—Bobby Murcer drove in four runs with his sixth and seventh home runs of the season and Dick Simpson doubled home three more Thursday night as the New York Yankees handed the Cleveland Indians their 11th defeat in 13 games, 11-3.

Horsemen May Boycott Races

Burley Studies Proposal To Establish Historical Museum

BURLEY — The Burley City Council is investigating a proposal submitted by the Soroptimist Club to make a library, youth lounge and historical museum of the Burton estate which was built by the city by Mrs. Bessie Burton.

Vivien Odney, member of the Soroptimist Club, told the council this week that the provisions of Mrs. Burton's will could be complied with and at the same time make a place provided to preserve historical items of the area.

The Soroptimist Club will spearhead a community drive to support a historical showplace of the Burton home," stated Miss Odney.

Mrs. Norman Nielson, city library trustee, and Mrs. Elwood Rich expressed opposition to the proposal because there is not enough money available to sup-

port two libraries in the city. The present library requested \$18,000 for operation this year and only received \$15,000.

"If we don't get more funds for our existing library, we will have to cut down the number of services available," Mrs. Nielson said.

Mrs. Nielson also said another library would compete with the present city library, the type of youth center would not draw the youth of today and they would not use the facility and it would cost at least \$10,000 to maintain the proposed Burton estate according to Mrs. Burton's will.

Miss Odney said she has a list of local residents willing to donate historical items for a museum if a place available, and others have offered their time and money in establishing a museum in our area.

Mrs. Don Chisholm, a local resident and school teacher, said the area is in need of an historical site where items of our early history can be viewed by the school students.

Al Dawson elited other communities much smaller than Cassia County which have developed historical museums.

"A library, youth lounge and historical museum would not conflict with the present city library nor would it become a financial burden to the city," stated Miss Odney.

After a brief discussion by the council the matter was tabled until the city attorney could obtain a copy of Mrs. Burton's will and read it to councilmen. Eleven persons attended the council meeting concerning the proposed historical plan.

The council passed a resolution for renting office space in the airport building for Air West and Air Utah. Presently both airlines have hangars and arrivals at the Burley Airport. Each airline will pay \$50 per month for office space.

Mayor Joe Peters reported both city sprinkling trucks are

now operating, a new fence is built at cemetery, the park at city parks and the well at the sides, Harvey Green and Clyde for golf course has stopped pumping sand and has a good stream being prepared for installing of sprinkling system; Lions Club Building permits issued were to Jerry L. Hines, Robert Burn-chler, the park at city parks and the well at the sides, Harvey Green and Clyde for golf course has stopped pumping sand and has a good stream being prepared for installing of sprinkling system; Lions Club Building permits issued were to Jerry L. Hines, Robert Burn-chler, plumber license was approved for David K. Medsgar, operator of Kirk's Foodland and Warehouse renewed for Henry of Forscher and a Journeyman plumber license for Mr. Fors-

Councilmen approved purchase of a new compressor for the Fire Department for \$1,395 minus the trade-in on present compressor from Starline Equipment, Boise.

Science Fair Held By PTA At Shoshone

SHOSHONE — Officers were installed and the second annual science fair was featured by the Shoshone PTA meeting of the year.

Mrs. M. Hatmaker, past president, was installing officer. Officers installed were Rev. James Holt, president; Rev. Wesley Johnson, first vice president; Carl Kinney, second vice president; Mrs. Robert Ballard, secretary and Mrs. Clarence Peterson, treasurer.

The science fair is a yearly project sponsored by the PTA. Entries are by students in the elementary, junior high and high school. Three cash awards are given in each division.

In the elementary division, Bonnie Laughlin and Donna Jacobsen won first. Their entry was incubation of eggs. Bryan Kinghorn was second, with an expansion meter and finger motor. Danny Churchman, third, electro magnet; and Dan Dallas, honorable mention, worm garden.

Junior high winners were Rod Boon, first, electric welder; Larry Mabbutt, second, rockery; Wanda Faught and Brenda Hubbs, third, learning machine.

High school awards went to Jim Thorpe, Randy Johnson and Del Lowe, first, skeletons; Chuck Solanga, second, heart models and Keith Mabbutt, third, mice and mice.

Dale Chatterton, Shoshone High School science and mathematics instructor, was general chairman for the fair. Judges were Ivan Hopkins, Lincoln county agent; Kenneth Dixon, Dietrich High School science instructor; and Kenneth Blackburn, Shoshone, Idaho Power manager.

A new handmade gavel was presented by Mr. and Mrs. Farrell Clark to the PTA during the business meeting. Mrs. Burton Thorne was presented a past president's pin by Rev. Holt, new president.

Delegates to the fourth District Conference were instructed as to how to vote on proposed by-law changes. The conference will be held Saturday at the Dietrich High School auditorium. Workshop sessions for new officers and committee chairman will be conducted. Luncheon at noon will be served by the Dietrich unit.

Delegates will be hosts at the conference and the Richfield and Shoshone units will assist them.

Mrs. Elveth Webb, membership chairman, reported a membership of 83 for the year.

Educator Speaks On Elections At LWV Meeting

F. M. Acree, political science instructor at the College of Southern Idaho, spoke on "The Electoral College" at the League of Women Voters meeting at Heritage Manor.

The league has chosen the electoral college as one of its study topics.

Mr. Acree viewed the history of the electoral college, Supreme Court decisions on the appointment of representatives, controversy and criticism of the electoral system. Members discussed the system and alternative methods of electing.

During the May 7 meeting the league plans to visit the courthouse and see the new voting machines.

Mrs. James Hughes will host further discussion of the study topic at 8 p.m. May 7 at her home, 936 Shoshone St.

Pilots In Utah Search For Plane Believed Missing

SALT LAKE CITY (UPI) — Utah Civil Air Patrol aircraft prepared today to join the search for a light plane missing on a flight from Fresno, Calif., to Eagle, Colo.

The plane, a Cessna 180, left Fresno Thursday morning and had scheduled a stop in Salt Lake City.

The pilot was identified as Dr. F.H. Wynnan, who was believed to be from Carson City, Nev. It was not immediately known whether Wynnan was carrying passengers.

The spokesman for the Utah CAP said the missing aircraft was silver with green trim.

'MISS UNIVERSITY' NAMED MOSCOW (UPI) — Kathy Jo Jacobs, a sophomore from Lewiston, Idaho majoring in home economics, Thursday was named Miss University of Idaho.

*Enjoy Safe,
Carefree Driving...*

CARE FOR YOUR CAR

The road to pleasant motoring starts with
a smooth-running car.
Here's how to travel in safety, economy, and comfort.

Time To Check Car For Warm Weather Driving

By JOHN ECK

Director, Emergency Road Service, American Automobile Association

A long winter of commuting back and forth to work, schools and shops — often under severe weather conditions — has left your automobile "out of condition" just at a time when you're all set for the pleasure trips of spring and summer.

To plan well for warm weather travel you need to know what has happened to your automobile during the stresses of winter, and how to help insure that the trips you plan to take will be safe and trouble-free.

Nearly 72 million U. S. motorists had some problem with their automobile in 1967, the American Automobile Association's annual survey showed. Forty-three per cent of them were due to battery, starter and ignition system failures, an increase of 20 per cent over the previous year.

The 14 million flat tires motorists in 1967 was the second highest figure on the list of all troubles. There also were 581,000 incidences of brake failure.

Sixty years of experience in

auto repair, and our day-to-day observation of the repair needs of 11 million AAA deliverment members, lead us to recommend:

— **TUNEUP.** An engine tune-up is a wise investment. Have the ignition, points, spark plugs, battery, voltage regulator, generator and all wiring checked.

— **LUBRICATION.** A thorough lubrication job will lessen wear on vital moving parts. Change to the grade of oil recommended for the driving conditions you expect to encounter. Install a new oil filter cartridge. Check all hydraulic fluid levels.

— **COOLING SYSTEM.** Have the cooling system cleaned and flushed; refill with a good permanent-type antifreeze or add a rust inhibitor. Have the thermostat, fan belt and water pump checked.

— **BRAKES, TIRES AND WHEELS.** Have the brake linings inspected and check the brake seals. Have the tires rotated; replace worn or damaged tires to eliminate blowouts and flat tire worries. Check the wheel alignment and balance — unaligned and unbalanced tires cause excessive and uneven wear.

Be sure shock absorbers are in good condition. In addition to causing discomfort, bad shock absorbers can be dangerous.

— **VISION.** Windshield wipers, headlights, turn signals, backup and brake lights should all be checked for perfect operation.

That is a fairly thorough examination! You may have recommendations as to what your car is essentially in good working order — that you do not have the time or the need for the entire check-up routine.

There are certain minimum precautions AAA suggests before any long-distance travel by automobile, however. They also can be presented as a checklist, which we call a "Trip Check". The points constitute a simple "make-ready" to assure you of a dependable car:

- INSPECT AND ADJUST all fan belts.
- CHECK AND ALIGN front end.
- LOAD TEST battery and clean terminals.
- INSPECT AND TIGHTEN all lines.
- INSPECT ALL TIRES.
- ADJUST BRAKES, check linings.

You should consider these additional services, and have your mechanic perform them according to your car manufacturer's recommendations:

- DRAIN AND FLUSH cooling system, adding rust inhibitor with refill.
- CHANGE motor oil.
- LUBRICATE.
- CLEAN OR CHANGE air, fan and oil filters.
- CLEAN AND CHECK crankcase ventilation system.
- CHECK OR CHANGE transmission and differential fluid.
- CHECK AND GREASE front wheel bearing.

Losing Your Grip, Tire-Wise?

If you hear your tires talking, perhaps a few days fishing will help — or a week in the mountains. On the other hand, if you see them talking, you're tire-wise, and you'll heed their message.

Talking tires. They'll tell you when your pocketbook is being hit. And in most cases you can tell you exactly who the culprit is, too. Like improper alignment, worn shocks, overinflation, underinflation, and many other conditions that rob you of the tire mileage that you pay for. Besides accelerated wear, there's also the safety factor — something that's even more important than the money you may waste.

What are the tires on your car telling you? Study the pictures and try the little test below, then check the answers to find out how tire-wise you are.

When the tire is worn in patches, particularly on the shoulder, it means:

- (1) the brakes tend to grab
- (2) the tire is out of balance
- (3) the tire is overinflated

The tire is worn evenly, but the treads are feathered. It means:

- (1) the tire is overinflated
- (2) too much front end toe-in
- (3) you take corners too fast

Both shoulders are worn white the center still has some tread. It means:

- (1) new shocks are needed
- (2) slow down on corners
- (3) tie rod is loose

Tire is wearing more at each shoulder; tread is "stepped" from the center tread toward each side. It means:

- (1) tire is out of balance
- (2) tire is underinflated
- (3) tire is overinflated

Tire shows extremely uneven wear. It means:

- (1) faulty brake system (needs fluid, adjustment)
- (2) faulty wheel alignment (too much camber)
- (3) tires need rotation (including spare)

The center treads of the tire are wearing faster than the shoulders. It means:

- (1) worn out shocks
- (2) overinflation
- (3) wheels need balancing

Photos courtesy of Popular Science and Rubber Manufacturers Association

How do you rate with your tire talk?

The answers, in all cases, are No. 2

Shower Can Make Roads Slippery

Summer showers, especially after a long dry spell, can make road surfaces as slippery as winter ice, a special safety bulletin issued by the Rubber Manufacturers Association warns.

The danger of skidding is greatest, says the trade-group, during the first 15 to 20 minutes after it starts to rain; up to an hour or more in a light drizzle.

This is due to the little-known fact that rain tends to float up onto the road surface a greasy film of oil, gasoline and rubber residue, which becomes a treacherous ice-like lubricant between the tires and the road until enough rain falls to wash it away.

The possibility of an accident on a wet road, says the Association, is between 5 and 10 times as great as on a dry road. In terms of the likelihood of a skid and loss of control of a car, in terms of stopping distance, it may take up to four times as far to stop on a wet road as a dry road.

"CUSTOMER SATISFACTION IS OUR
GUARANTEE . . . ASK YOUR NEIGHBORS"

Time To Check Car For Warm Weather Driving

By JOHN ECK

Director, Emergency Road Service, American Automobile Association.

A long winter of commuting back and forth to work, schools and shops — often under severe weather conditions — has left your automobile "out of condition" just at a time when you're all set for the pleasure trips of spring and summer.

To plan well for warm weather travel you need to know what has happened to your automobile during the stresses of winter, and how to help insure that the trips you plan to take will be safe and trouble-free.

Nearly 72 million U. S. motorists had some problem with their automobile in 1967, the American Automobile Association's annual survey showed. Forty-three per cent of them were due to battery, starter and ignition system failures, an increase of 20 per cent over the previous year.

The 14 million flat tires motorists had in 1967 was the second highest figure on the list of all troubles. There also were 581,000 incidences of brake failure.

Sixty years of experience in

auto repair, and our day-to-day observation of the repair needs of 11 million AAA driver-members, lead us to recommend:

— **TUNEUP.** An engine tune-up is a wise investment. Have the ignition, points, spark plugs, battery, voltage regulator, generator and all wiring checked.

— **LUBRICATION.** A thorough lubrication job will lessen wear on vital moving parts. Change to the grade of oil recommended for the driving conditions you expect to encounter. Install a new oil filter cartridge. Check all hydraulic fluid levels.

— **COOLING SYSTEM.** Have the cooling system cleaned and flushed; refill with a good permanent-type antifreeze or add a rust inhibitor. Have the thermostat, fan belt and water pump checked.

— **BRAKES, TIRES AND WHEELS.** Have the brake linings inspected and check the brake seals. Have the tires rotated; replace worn or damaged tires to eliminate blowouts and flat tire worries. Check the wheel alignment and balance — unaligned and unbalanced tires cause excessive and uneven wear.

Be sure shock absorbers are in good condition. In addition to causing discomfort, bad shock absorbers can be dangerous.

— **VISION.** Windshield wipers, headlights, turn signals, backup and brake lights should all be checked for perfect operation.

That is a fairly thorough examination. You may have your car essentially in good working order — that you do not have the time or the need for the entire check-up routine.

There are certain minimum precautions AAA suggests before any long-distance travel by automobile, however. They also can be presented as a checklist, which we call a "Trip Check." The points constitute a simple "make-ready" to assure you of a dependable car.

— **INSPECT AND ADJUST** all fan belts.

— **CHECK AND ALIGN** front end.

— **LOAD TEST** battery and clean terminals.

— **INSPECT AND TIGHTEN** all hoses.

— **INSPECT ALL TIRES.**

— **ADJUST BRAKES,** check linings.

You should consider these additional services, and have your mechanic perform them according to your car manufacturer's recommendations:

— **DRAIN AND FLUSH** cooling system, adding rust inhibitor with refill.

— **CHANGE** motor oil.

— **LUBRICATE** — CLEAN OR CHANGE air, gas and oil filters.

— **CLEAN AND CHECK** crankcase ventilation system.

— **CHECK OR CHANGE** transmission and differential fluid.

— **CHECK AND GREASE** front wheel bearing.

Losing Your Grip, Tire-Wise?

If you hear your tires talking, perhaps a few days fishing will help — or a week in the mountains.

On the other hand, if you see them talking, you're tire-wise, and you'll heed their message.

Talking tires. They'll tell you when your pocketbook is being hit. And in most cases they can tell you exactly who the culprit is, too. Like improper alignment, worn shocks, overinflation, underinflation, and many other conditions that rob you of the tire mileage that you pay for. Besides accelerated wear, there's also the safety factor — something that's even more important than the money you may waste.

What are the tires on your car telling you? Study the pictures and try the little test below, then check the answers to find out how tire-wise you are.

When the tire is worn in patches, particularly on the shoulder, it means:

- (1) the brakes tend to grab
- (2) the tire is out of balance
- (3) the tire is overinflated

The tire is worn evenly, but the treads are feathered. It means:

- (1) the tire is overinflated
- (2) too much front end toe-in
- (3) you take corners too fast

Both shoulders are worn while the center still has some tread. It means:

- (1) new shocks are needed
- (2) slow down on corners
- (3) tie rod is loose

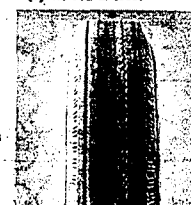

The tire is wearing more at each shoulder; tread is "stepped" from the center "tread" toward each side. It means:

- (1) tire is out of balance
- (2) tire is underinflated
- (3) tire is overinflated

The tire shows extremely uneven wear. It means:

- (1) faulty brake system (needs fluid, adjustment)
- (2) faulty wheel alignment (too much camber)
- (3) tires need rotation (including spare)

The center treads of the tire are wearing faster than the shoulders. It means:

- (1) worn out shocks
- (2) overinflation
- (3) wheels need balancing

Photos courtesy of Popular Science and Rubber Manufacturers Association

How do you rate with your tire talk?*

The answers, in all cases, are No. 2

Shower Can Make Roads Slippery

Summer showers, especially after a long dry spell, can make road surfaces as slippery as winter ice, a special safety bulletin issued by the Rubber Manufacturers Association warns.

The danger of skidding is greatest when the roads are dry, during the first 15 to 30 minutes after it starts to rain; up to an hour or more in a light drizzle.

This is due to the little-known fact that rain tends to float up onto the road surface a greasy film of oil, gasoline and rubber residue which becomes a treacherous ice-like lubricant between the tires and the road until enough rain falls to wash it away.

The possibility of an accident on a wet road, says the Association, is between 2 and 10 times as great as on a dry road. In terms of the likelihood of a skid and loss of control of a car. In terms of stopping distance, it may take up to four times as far to stop on a wet road as a dry road.

Make A Magic Carpet Of Your Automobile

William Lyon Phelps, the celebrated educator and author, once remarked, "What I wouldn't give to drive through the 'Fins' for the first time again." It was Phelps' way of yearning for the thrill of discovery, in the one of America's greatest novels.

The typical motorist, could well paraphrase Phelps' remarks, "What I wouldn't give to be driving for the first time." The thrill most of us felt the first time behind the wheel is hard to capture ever again.

Perhaps too much driving has faded our appreciation of the miracle that is the automobile. Maybe too much time in traffic jams, too many hours through the windshield vistas of monotonous stretches of freeways have robbed us of our enthusiasm.

However, there is a way to bring back the joys of driving. Some time this year, get out of the traffic jams and off the super-highway. Take your family on some lightly traveled road. Even in the most populous areas of this nation, there still remain unspoiled stretches of green fields, blue sky and water — just a few hours from home.

Travel through these areas with a light foot on the gas pedal, stopping often to enjoy the view and savor the fresh air. Make your car, not a convenience to get you from here to there, but a kind of magic carpet to lift you above the humdrum and the state of tension.

There is also a way to bring the maximum enjoyment of motoring into everyday driving. And that is by maintaining your car in showroom condition. By

doing so, your car can feel like a new car no matter how long you drive it.

For example, there are those who swear that their cars seem to drive better after a wash. While this may be a matter of vivid imagination, it is no secret that a car that is running sluggish could feel like a new model after a thorough

tune-up. Also maintaining other vital comfort components like tires, shocks, front-end alignment and smooth transmission are indispensable to a smooth, enjoyable ride.

There is at least one more factor in maximum enjoyment of a car. That is the security of mind in knowing that yours

is a safe car.

It is not enough to know your car has just passed vehicle inspection. While passing inspection is a good sign that all basic safety components check out, there are other factors to be considered. The day after inspection, hitting a jarring pothole could help put headlights back out of alignment. An

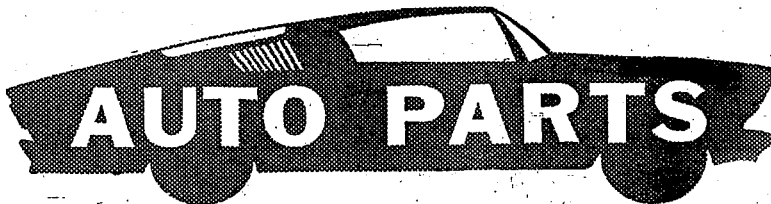

expected leak of brake fluid could pose a serious hazard.

The answer is to stay attuned to the condition of your car. More important, maintain a regular system of car care to forestall possible troubles. This Car For Your Car section is intended to help you capture the total pleasure that motoring can offer.

YOUR DEALER'S
WHOLESALE SUPPLIER

MACKENZIE AUTO EQUIPMENT

THE HOUSE THAT SERVICE BUILT

THERE'S NOTHING LIKE THE SECURITY OF KNOWING YOUR CAR IS IN TOP RUNNING CONDITION AT ALL TIMES!

an untuned car is trouble . . . trouble you can't afford.

CHECK LIST

for trouble-free summer driving!

Let your service man check over all of the items on this list to put your car in top shape for summer motoring . . .

- ENGINE TUNE-UP—This is the best way to bring your engine back to life for car-free summer driving. Tune-up includes a new set of Champion spark plugs plus whatever basic tune-up items your car needs. Your service man checks points, condenser, rotor, distributor cap, compression, wiring and electrical connections, oil and air filter.
- BATTERY—Have it checked for full power, make sure terminals are tight and clean.
- VOLTAGE REGULATOR—Check it. Over or under charging can ruin battery.
- STARTER AND ALTERNATOR OR GENERATOR—Remove any corrosion and check brushes.
- AUTOMATIC CHOKE—Check idle adjustment.

- CARBURETOR—Your service man will check, remove and clean it if necessary.
- FAN AND PULLEY BELTS—Check adjustments, if belts are badly worn they should be replaced.
- CRANKCASE—Change dirty oil — put in proper grade oil for summer driving.
- LIGHTS AND WIPERS—Summer storms can mean dark and dangerous driving. Make sure that headlights, parking lights, taillights, stop lights and directional are all working properly. Also check wiper operation to see that blades wipe clean without streaking, fill windshield washer tank with cleaning solution.
- TIRES—Have them examined carefully. Worn tires can spell trouble on crowded vacation highways.
- BRAKES—Your service man will check for proper adjustment—a slight pull to one side can slide you off the road.

Overheating Can Be Forestalled By These Checks

While most cars made today have cooling systems that are "sealed" in the factory, a wise motorist still takes precautions against engine overheating. Here are some basic precautions to take to make sure your car keeps its cool.

Test the anti-freeze to make sure it hasn't lost its rust-inhibiting elements. If it has, drain and flush the cooling system before installing new anti-freeze.

Test the condition and tension of all drive belts as well as radiator hoses. Check the radiator and hoses for leaks. Also check pump gaskets and tightness of the pulley hub on the water pump.

Check to see that there is no foreign matter on the cooling fins and that the overflow tube is not obstructed.

First Test Track Built In 1915

Proving grounds were introduced by the industry in 1924. But what probably was the first test track designed specifically to test and evaluate production vehicles was built by Detroit auto maker back in 1915. A half-mile planked track circled a steel-fabricated "hill" more than 40 feet high, which cars had to climb prior to leaving the factory.

Cars were also required to plow through a sand pit and travel around the track at all speeds before being approved for shipment. Before this track was built, newly-assembled vehicles were tested on nearby city streets.

See your favorite auto dealer service department or service station now . . . Before you begin your Summer Vacation!

Safe Driving Is A Three-Legged Stool, Expert Says

Amos E. Neyhart, for more than 35 years a tireless ambassador for traffic safety, likens his field to a three-legged stool.

"You take a properly educated driver, give him a well-maintained vehicle and then design a modern highway that can handle the traffic and you'll see a terrific reduction in the accident rate," says the director emeritus of the Institute of Public Safety at The Pennsylvania State University.

"Eliminate one of these factors and you're in trouble. It's like a three-legged stool, knock a leg out and the stool will fall."

For all his considerable achievements in his chosen profession, Neyhart is best remembered as the father of driver education in the nation.

For it was in 1933 that Neyhart, equipping his 1929 Graham Paige with dual controls and footing, the bills himself, taught the first driver education course in the country.

There were 31 State College High School pupils in that class. Today the estimate is that almost 15 million students have learned to drive from courses modeled after Neyhart's original edition of 35 years ago.

At last count, 13,311 of the nation's 17,954 high schools — or 73 per cent — offer approved courses in driver training. By the same token, latest statistics also show that 56 per cent of the nation's pupil population — 1,725,370 or 3,993,348 students — are enrolled in driver education programs.

How did the whole thing come about?

"W.H." said Neyhart as he sipped a cup of coffee in the campus offices of the institute. "I'm an industrial engineer by profession."

"But from my years in industry, I learned that you made

AMOS E. NEYHART
Father of Driver Education

no headway with your safety programs until you convinced the employe that he had a personal stake in accident prevention.

"The same thing applied to driving. If we were going to make traffic safety work, we had to work with the individual."

"We had to get 'em before they learned bad habits. And when was the best time for that? Just as soon as they're old enough to drive, and that meant high school."

Today, at an age (69) when most men would be thinking of a relaxing afternoon on the front porch, Neyhart is almost, if not quite as active.

"I just can't sit back when there's a bit of work to be done and—potentially—a lot of lives to be saved," he said at the time of his retirement.

Looking back, while Neyhart is impressed with the variety of sophisticated aids and machinery to be utilized through the years in the teaching of safety education, he still acknowledges some shortcomings.

"Why don't we teach people how to drink and drive?" he asked recently. "We know they are not going to stop drinking so why don't we teach 'em that it takes the physical system 1½ hours to throw off a flogger of whiskey?"

"For the incurrigibles, there's only one way to handle them with a stiff jail sentence and a high fine."

Another area which has been left unexplored, Neyhart says, is teaching people to drive at high speeds. "With these new superhighways, everyone should know how to decelerate a vehicle from the legal speed limit," he stresses.

And finally, he advocates the construction of community driving areas — simulated obstacle courses to give drivers experience in handling an automobile

when "they go into a skid; when their tires blow; when they run off the shoulder; when their brakes give out on a windy roadway, things like that."

He says: "We've been teaching manipulative skills; how to start, steer, back up, make

turns. We have not been teaching accident prevention skills. This is a criticism of the program I accept. We haven't gotten into this, and I won't be satisfied until we do."

To Neyhart, there is only one way for a youngster to learn

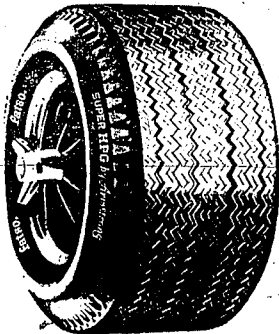

how to drive and that's the way.

"What good is geochemistry to a young man gets killed on the highway? Driver education not merely a preparatory life — it's a way to stay

the ARMSTRONG RUBBER CO. & DON PIEPER

Present . . .

fatso

Armstrong has a new cool tire — a wide track made with belts of fiberglas that may look fat but it's as tough as nails, can give you over 40,000 miles of so dry driving.

NOW ARMSTRONG introduces Fatso, a wide track made with belts of fiberglas that lasts a long, long time. Fatso is really built. Underneath his thick rubber hide, and above his nylon cords, he's got two belts of fiberglas that help the tread firm and tough. Fatso resists heat at high speeds. He virtually eliminates blowouts. And he can give you over 40,000 miles of wear. Fatso, a too cookie available at your Armstrong Dealer, Don Pieper's Gas and Tire Cent

Sports Car Roar Signals Trouble

Has your family sedan started to develop a sports car "rap"? Instead of taking it to Watkins Glen or Lemans, better check your exhaust system. That deep-throated roar under the chassis undoubtedly means your exhaust system is defective.

Not only might it earn you a traffic ticket for making too much noise but it could mean a death sentence for you and your family. A leaky exhaust is a potential source of lethal carbon monoxide.

When you hear a noisy exhaust, head straight for your favorite service outlet. Better yet, have a mechanic check your exhaust system next time your car is on the hoist.

That must be the flock that summers at St. Benedict's

Guess What Tops List Of Careless Car Owner Woes

In planning your car maintenance, it's wise to know where trouble is likely to strike. A list of the most frequent causes

of trouble is contained in a survey of the Missouri Auto Club in the U.S.

The Club's recently opened St. Louis diagnostic center tabulated

defects found on the first 1,603 cars to pass through its lanes. According to the results revealed by F. B. Githam, Club technical services director,

these were the most frequent critical faults:

lights and retraction) — 1,055 or .66 defects per car.

The tip of this coil was so badly eroded it had completely disappeared on one side. Plastic tape to the rescue . . . temporarily.

Heavily encrusted with deposits, this spark plug was still firing . . . sometimes.

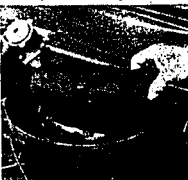

What do you do when the spark plug insulator breaks? Wrap it with some plastic tape and keep on driving . . . but probably not for long.

This is an oil filler cap. It is supposed to breathe through a wire mesh filter. This one choked to death long ago and its engine suffered the consequences.

This distributor rotor was so badly cracked it was falling apart. The owner wrapped it with cord so that it managed to hold together and somehow kept on delivering its spark.

When the air filter is so badly clogged with dirt it can't be cleaned any more, you have two choices: buy a new one or ventilate it, as was done here.

1. **IGNITION** — (points, condenser, dwell and variation, coil, timing, spark plug performance, ignition under load) — 1,500 defects or .94 per car.

2. **FRONT END** — (including alignment, front suspension pivots and shocks) — 1,450 defects or .90 per car.

3. **B R A K E S** — (including brake lining thickness and condition, adjustment, hand-brake, drum or disc condition, brake hoses, pedal pressure, brake balance and progression) — 1,354 or .85 defects per car.

4. **HEADLAMPS** — (including candle power, aim, warning

5. **TIRES** — (including tire pressure, tread depth and walls) — 922 or .58 per car.

6. **STEERING LINKAGE** — (including steering box, tie-rods, steering arm and ball joints) — 402 or .25 per car.

The St. Louis facility, first of its kind ever run by an Auto Club, performs only diagnostic work. Repairs, if needed, are performed at area facilities with the Club making no recommendations on where to go.

The Club will perform re-checks of work performed; consulting, on request, with the mechanic doing the repair work.

Even in the early days of driver training, students were taught basic mechanics of a car. Driver training founder Amos E. Neyhart explained workings to his 1933 State College High School class.

Today, driver training is offered at more than 13,000 high schools. Participating in approved classes are 1,725,350 students. Since 1933, 15 million have attended driver education courses.

Better Ways To Summer Driving Comfort Cited

The pleasures derived from owning an auto air conditioner are many and varied. However, as with any mechanical unit on your car, there are ways to increase satisfaction and improve performance. The Automotive Air Conditioning Association offers these suggestions on the care and service of your car air conditioner.

During hot summer days always park in the shade — or leave your windows open. Your car will cool down much quicker if the interior doesn't become super-heated. Parked in the sun on a 90 degree day (with windows closed), the temperatures inside your car can soar to a tremendous 140 degrees — the highest degree to which most people are ever subjected.

Should the interior of your car become super-heated, turn your air conditioner on "high" and place the temperature control at its highest setting. Drive a few blocks with all windows rolled down. This quickly removes hot air and permits quicker cooling. Air must circulate through the condenser coil before your unit will function at maximum efficiency, thus your car must be moving for it to cool properly.

When you park, remember to turn your air conditioner off — this makes starting your car much easier.

If unit doesn't cool, move temperature control to coldest setting. If cooling doesn't occur then, turn unit off (to avoid

possible damage) and see your service man for a check-up.

Sometimes on a long trip, frost may form on the cooling coil. This may be evident by a lack of cold air, since frost will prevent air circulation. To correct, move temperature control toward off position and turn fan control to high. This will melt ice and allow unit to again cool properly.

Don't be alarmed at water draining from under your park-

ed car. This comes from the condensate drain hoses and has been removed from the air inside your car by the dehumidifying action of the evaporator coil.

Service and maintenance of all air conditioners is necessary to maintain maximum performance. Periodic checks for the purpose of routine preventative maintenance will assure satisfactory operation of your air unit.

Helpful Tips On How To Get More Miles Per Gallon

Two drivers of the same automobile may get different gas mileage due to the differences in driving habits. Other factors include driving conditions and mechanical condition of the automobile.

It costs almost 50 per cent more to drive 80 mph than it does to drive 50 mph. Cost of Driving 80 mph is 25 per cent higher than cost of driving 30 mph.

— Wet driving conditions: Slowing down under wet or snowy conditions conserves fuel. Wet pavement can reduce mileage by 1 mile per gallon.

— When parked, turn off engine. One minute of idling uses more fuel than restarting uses.

— Starting and stopping. Avoid "jack rabbit" starts, sud-

den stopping and racing on the green light.

— Windy conditions. Drive slower if you're interested in better fuel economy.

— Here are some suggestions on care and mechanical condition of your car for better fuel economy:

— Use good grade of gasoline recommended by the manufacturer of your automobile.

— Be sure the thermostat isn't stuck in the open position. A warm-running engine is more efficient (uses less fuel) than a cold-running engine.

— Be sure tires are inflated properly.

— Balance and align tires.

Drugs, Driving Don't Mix, Association Warns

Drugs and driving don't mix, says the National Association of Retail Druggists.

So important is respect for safety that N.A.R.D. is providing fact sheets for driver education teachers in and out of high school, according to executive secretary Willard B. Simmons, who represents 30,000 independent drugstore owners.

Druggists are teaching the public the power of drugs. Drugs save lives, Simmons points out. He adds facts of interest to all drivers:

"When doctors prescribe some valuable medications they insist that no driving be done for a specified number of hours," he says. "I need their advice and the advice of the druggist who reminds you of that fact."

In addition to urging respect for the life-saving drugs of daily life, members of N.A.R.D. are lending their professional efforts to schools to forward the work of drug education. The dangers of drug abuse are being brought to students' attention at the request of the Bureau of Narcotics and Dangerous Drugs of the Department of Justice.

BARBITURATES, for example — known as "goofballs" and by other terms — produce slurred speech, impaired motor responses, sensory distortion and more. A person withdrawing from barbiturate abuse may have spasms and convulsions, particularly dangerous behind a car wheel. Barbiturates, even when plus alcohol can cause sudden death.

AMPHETAMINES — stimulants which have respected medical uses but are known as "pep pills" or "co-pilots" to drug abusers — can cause severe hallucinations on the road. Truck drivers, wearabouts, long distance drivers may take too many amphetamines to stay awake. Too frequently the driver will then hear "voices," see "ghost vehicles" and have other aberrations that can cause a crash.

Marijuana, thought by some to be harmless, is a major villain when it comes to highway safety. Unlike an ordinary cigarette, "grass" causes sensory distortions. A car 10 feet away may sum 100 feet away. Sideswipe accidents are common and more serious collisions can occur.

LSD PRESENTS DOUBLE DANGER. Not only does taking cause an immediate disoriented "high" and bizarre hallucinations, but the same effects can occur with no warning six months of a year later. The "afterglow" effect can jeopardize not only the driver but his passengers as well as other drivers and pedestrians nearby. If a driver exhibits drunken behavior but there is no amount of alcohol, drug abuse may be suspected.

These and other facts are being called to the attention of students and faculties at all schools as well as concerned parent groups.

What can the safe driver do to protect against these hazards?

STUDENTS ARE BEING URGED to seek medical facts and study recent clinical research so that objective data can be given to all. Poster contests and slogan contests in high schools and other student efforts are being encouraged to turn the cold light of reason on drug abuse. And parents, teachers and his adults are being urged to call for drug education in the schools.

EVERY PARENT CAN AID by checking his child's whereabouts, knowing the identity of group drivers, and making strict rules about car use, experts advise.

Race Drivers Show Importance Of Belts

Young people, supposedly at odds with their generation, have at least one area of agreement with their parents. Both are ignoring the life-saving use of car seat belts.

Champion Spark Plug Company, through its Highway Safety Program, queried nearly 12,000 high school seniors on seat belt wearing habits. In cars equipped with belts, well under 50 per cent use the restraining devices.

Only 14.8 per cent said they used them most of the time. The biggest percentage, 37.5, said they seldom used belts. Some 17.7 per cent said they never used seat belts.

There was little difference in use between boys and girls, with less than a percentage point difference in their answers.

In addition to youngsters driving cars equipped with seat belts but not using them, large percentages are driving cars which have no seat belts. Of those driving their own cars, less than half of the vehicles are equipped with belts. Over 63.6 per cent of all cars, including those belonging to parents, were equipped with belts.

The students' failure to wear seat belts was not because of their failure to recognize the consequences, the survey found. Almost two-thirds of them identified not wearing belts as a major contributing cause of traffic fatalities.

Estimates by the National Safety Council show that about one out of five fatalities could have been avoided if seat belts were being worn.

According to J. R. McGeorge, Champion's Public Relations Manager and Director of the Highway Safety Program, "In our presentation to school groups we have Indianapolis race drivers stress the responsibilities as well as the skills of operating a car.

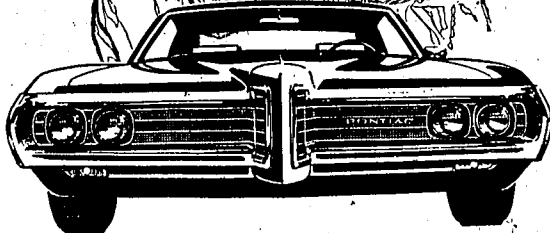

"A race driver would no more think of operating a car without a seat belt than he would with-

out a steering wheel," McGeorge said.
The 1968-69 Champion Highway Safety Program, to be conducted in schools throughout the U.S. and Canada, is stressing seat belt use as well as other safety aids.

Short Takes On Car Care

In cleaning your windshield, don't forget the inside. Tobacco smoke can put a film of residue on the glass and distort vision. So, if you smoke, periodically clean the windshield with a window washing solvent.

"Let's See How Fast She Can Go" — Famous Last Words . . . Drive Safely.

What's a safe distance to follow another car? Experts recommend one car length for every 10 miles per hour of speed on dry pavement. On slippery roads, the distance between should be doubled.

Safety experts advise never driving more than three hours without stopping to rest on a long trip. Getting out of the car to stretch or stopping for coffee is recommended to avoid excessive driving strain.

The average spark plug will fire 15,000,000 times in 10,000 miles of driving. The effects of the electrical charge wear down the plug's firing end. Plug manufacturers recommend servicing plugs at 5,000 miles and replacing them at 10,000 miles.

WHEN TO REPLACE

How often should spark plug cables be replaced? According to ignition system experts, the cables should be replaced after every third spark plug change or at 30,000 miles — whichever comes first.

Just look out the car window to see sights such as (top row, left to right) Lone Cypress at Midway Point along Monterey Bay Drive; Bear Grass on the "Going to the Sun" Highway in Montana; Elmer the Elk in Jasper

National Park, Alberta, Canada; and the Appalachian Trail in Great Smokies Park, North Carolina. Bottom row, left to right: snow-capped mountains in Canada's Banff-Jasper National Park; Lake Angeles in Olympic

National Park in Washington State; San Juan mountains in Colorado; or Hawaiian bays in Honolulu Park on Oahu. These are only a few of the beautiful views to be seen in North America as you travel along.

Hold It, Mister, Your Battery May Be Okay

Blaming starting trouble on the battery can be like blaming a broken leg on bone failure. In both cases, something is wrong but something other than the affected part is causing the problem.

A well-maintained battery that hasn't outlived its usefulness should not cause starting problems. More likely some other electrical component is at fault and is draining the battery power. For example, faulty wiring, worn spark plugs or malfunctioning distributor may be overworking the battery during starting.

As a result the battery wears down to a point that it may seem dead. The alert service man will look beyond the battery as the cause of the starting failure, especially when he is reminded to do so by the customer.

To keep your battery in top operating condition, here are some pointers: A quick visual inspection every time you gas up and a voltage test every six months should assure you maximum efficiency battery life.

It's a simple job for the service attendant to check battery water level and condition of cables and terminals. This should be done at least once a week to guard against premature deterioration.

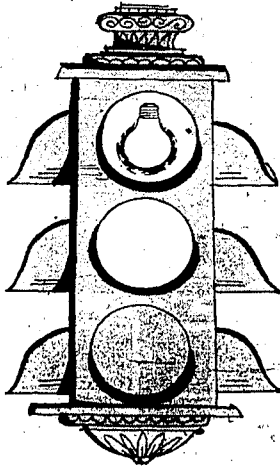

Twice a year, the battery should be tested. At the same time, terminals should be cleaned thoroughly to get rid of corrosive materials and dirt. Foreign matter on the terminals or cable clamps can cause battery failure.

If the battery shows premature loss of power, chances are other components may be at fault. For example, wiring may be short circuiting or you may have a problem in the charging. Have your service man conduct an electrical check.

Corroded terminals can shorten effective life of your battery. Clean off the corrosion with a solution of baking soda and water, applied with a stiff wire brush.

ROUGH DRIVING COSTS

An Australia television network staged a two-car run where one car was driven in a normal, safe manner and the other was driven hard to make faster time. While finishing the 238-mile course in 40 minutes quicker time, the hard-driving motorist used 86 per cent more tire tread (61 cents worth); 65 cents more in fuel and 31 cents more in brake wear. So, the 40 minutes saved cost him \$1.77. The moral: take it easy and save.

Seek New Vistas To Restore The Joys Of Driving

Nothing restores the joys of motoring more than getting away from everyday driving chores and traveling

through unspoiled countryside. Also adding to the spirit of freedom is having a car that is in top shape.

Economy Car On Luxury Budget? You Can Save

Are you driving an economy car on a luxury car budget? Chances are this is the case if you aren't driving and servicing your car properly. Getting the best performance from your car at the least possible expenditure depends on how you drive and how you care for your

car. Take the matter of gasoline consumption: Tests conducted on an international basis by Champion Spark Plug Company last year showed how condition of the car affects gasoline mileage. Champion transported a dynamometer on wheels to shopping centers in the United States, Canada and Mexico to test effects of tune-up on gasoline mileage.

Cars were tested for gasoline consumption before tune-up, after installation of new spark plugs and after a complete tune-up. Average improvement after installation of new spark plugs alone was 6.2 per cent in the U. S. and Canada. Average improvement after complete tune-up was 8.2 per cent.

Thus, close to two gallons in every tankful of gasoline can be saved when the engine is kept in tune.

Proper maintenance can also save as much as 20 per cent in tire life. Keeping tires at recommended air pressures not only saves wear on tires but actually helps improve gasoline mileage. Under-inflated tires, especially, are thieves of gasoline.

In addition to proper inflation, balancing the wheels and correct wheel alignment are essential to maximum tire wear. Experts estimate that tires subjected to unbalancing and wrong alignment could easily wear out six months prematurely.

Another ingredient to econom-

ical driving is using the best grade of oil available and changing that oil and filter at recommended intervals. Good oil, properly maintained, can save inestimable yet substantial wear on vital engine parts. Neglect of oil could lead to a premature deterioration of rods and pistons and could require a major engine overhaul.

In fact, any program of preventive maintenance is the most economical investment you can make. Lubrication performed on time saves steering and chassis components. Attention to brake condition makes each service reasonably priced instead of excessively costly as in cases where drums are scored through neglect.

The above are but a few ex-

amples of potential savings through systematic preventive maintenance.

The biggest payoff for a well-cared-for car would come at trade-in time. A car that is in good condition could bring an

additional several hundred dollars over a neglected car. There's another bonus that can't always be measured in dollars and cents. That's the security realized from driving a safe, well-performing auto.

Brake Check Easily Made

Brakes, like all-day suckers, have a habit of wearing away slowly. So, it's a good practice to test your brakes periodically to make sure they can stop your car safely.

Every week, test the hydraulic system by firmly pressing your foot against the pedal. If the pedal moves gradually towards the floorboard, you are losing vital pressure. Have the problem corrected immediately.

Periodically, test stopping ability in a flat, open area where no other cars or obstructions are present. Accelerate to 30 miles per hour, then apply the brakes with your hands off the steering wheel. If the car pulls to one side, you may have brake trouble.

In any case, have your servomechanism perform a complete inspection of the brake system every six months.

An untuned car is horns in your ears.

Horns in your ears . . . a missed appointment . . . a tow-truck ride . . . a pounding head and a lot of other things to spoil your driving. That's what an untuned car is.

Untuned car trouble results from old worn spark plugs in an untuned engine. The cure is quick and effective. It's a Champion Tune-Up: a new set of Champion spark plugs plus other basic tune-up items you may need.

You'll feel the difference pronto. Trouble-free starting. Quicker acceleration for safer highway passing. More power. Dependable performance. And an average saving of over a gallon of gas per tankful—proved in United States Auto Club certified tests.

For trouble-free driving, get a Champion Tune-Up now—and every 10,000 miles. Because an untuned car is trouble!

The heart of a tune-up
