BY BONNIE BAIRD JONES
Times-News Writer
TWIN FALLS — Thirteen candidates have announced for four Twin Falls City Council vacancies to be filled Nov. 2.

A slate of four men running on the "Citizens Committee for Good Government" ticket took out petitions Wednesday afternoon and announced plans for a campaign on a basis of continued programs and policies of the present administration.

The ticket includes Michael Gray, Stephen Lincoln, Stephen Bancroft and incumbent Winston Jones who had previously announced his plans to seek reelection. John Rosholt and Robert Alexander, co-chairmen of the committee, are circulating the petitions.

At the same time, incumbent Mayor Frank Feldtman announced he will not be a candidate for reelection. This brings to three the number of present office holders who are stepping down. Frank Cook who had served two terms will not seek reelection. Eugene Stacey previously had announced he would not be a candidate.

Others who took out nominating petitions Wednesday are Stephen M. Carter, assistant professor at the College of Southern Idaho; Bill Waggoner who resides at 601 Main Avenue West, and William F. Hoops, Route 2, Twin Falls. City Clerk Edythe Koontz said 5 p.m. Monday is the deadline for filing nominating petitions, but cautioned prospective candidates many persons who believe they are registered voters may have missed the last city election and therefore have been dropped from the registration books.

She said she plans to check all petitions over the week end which have been filed by Friday evening and will return them to the candidates on Monday if additional signatures are needed. Forty valid signatures are required.

Two petitions which are filed this week contained about 50 signatures each, of which only about 20 per cent of the signers were currently registered city voters.

Mayor Feldtman said today in reviewing the field of candidates he feels there are many competent persons seeking office and he is confident the voters will have a wide selection of good candidates from which to choose.

"In view of this I feel eight years is enough for one person to hold city office and I am declining to run again," he said.

Mayor Feldtman has served on the council for two terms. He has been mayor for the past two years.

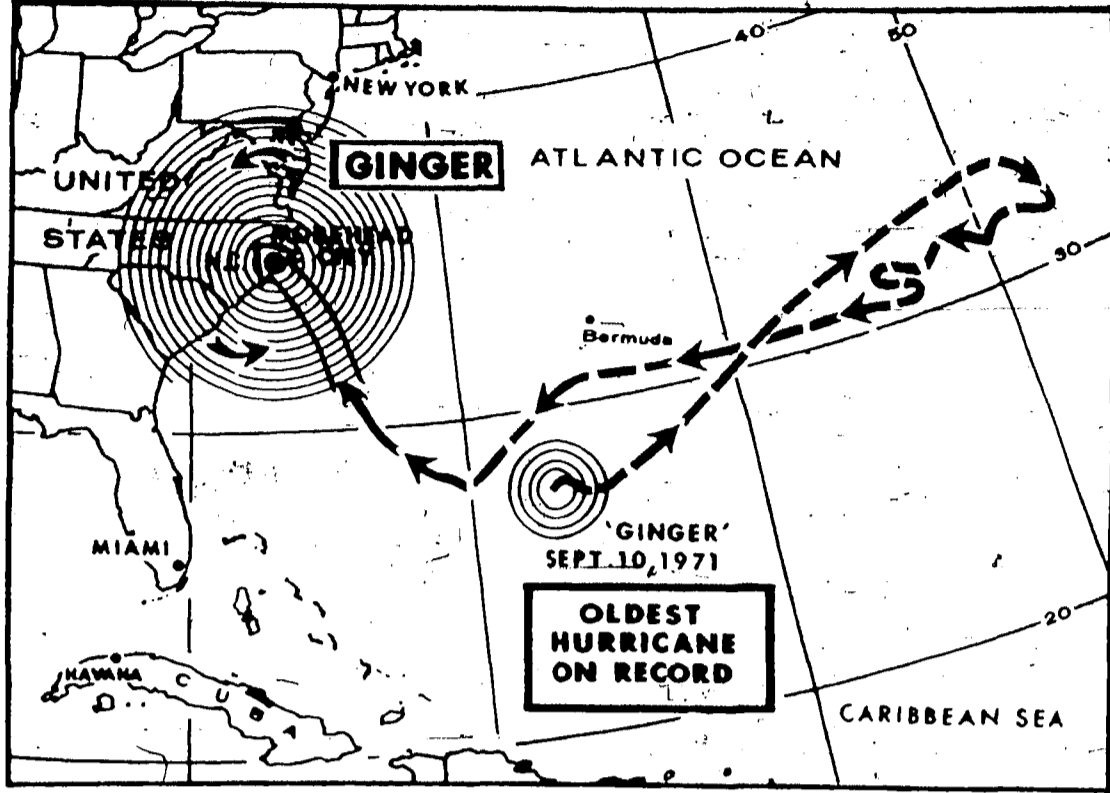

Two of the men on the "Citizens Committee" expressed interest in progressive city government. Gray, 31, is a native of Twin Falls, a graduate of the Twin Falls High School and attended the University of Idaho. He graduated from St. John's University, in Minnesota.

He served as an administrative assistant to Congressman Ralph Harding in Washington, D. C., and in 1966 joined the Twin Falls Title and Trust Co., becoming president of the firm prior to its sale recently. He is now vice president for trust development for the Twin Falls Bank and Trust.

He has been active in the Golden Eagle Boosters, is a director of the Industrial Development Corp., is Twin Falls Chamber of Commerce legislative committee chairman, and member of United Fund board of directors, Twin Falls County Fair Board and Rotary Club.

Gray said he is interested in a progressive development of the city and feels there should be greater communication between residents and the city government.

'Lady' meanders

Aging 'Ginger' strikes

MOREHEAD CITY, N.C. (UPI) — Hurricane Ginger slammed into the North Carolina coast today with 90 mile-an-hour winds that ripped off store fronts and leveled power poles and trees. A cargo ship off Cape Hatteras was reported in trouble.

The Coast Guard said a 500-foot cargo ship identified as the Caribbean Enterprise was in difficulty with shifting cargo, but did not appear in immediate danger of sinking.

Morehead City, a coastal resort town of 9,000 population, best known for its charter fishing operations, was in the center of the hurricane's path as the storm began moving ashore before daybreak.

Morehead City lost electric power as the winds ripped down power lines and poles in the streets, littered with signs snatched off buildings and parts of store fronts and glass.

The Red Cross said several thousand persons were in its shelters set up at a number of coastal points, including about 500 who were moved from low areas to Morehead City.

In nearby Beaufort, Civil Defense Director Harry Williams looked out his window as dawn broke and said, "It looks like an obstacle course out there."

The Coast Guard station at Ft. Macon next to Morehead City was operating on emergency power and Marlan Murphy,

WANDERING PATH followed by Hurricane Ginger from birth on Sept. 10 until storm moved ashore in North Carolina today is shown on this map. Eye of huge storm, which survived aerial "bombing" attempts to weaken it, is about 80 miles across. (UPI)

the operations officer, was mainly concerned with the Caribbean Enterprise, headed for the Dominican Republic with tractor-trailer rigs loaded on its deck.

"It radioed it was having difficulty with heavy seas and the cargo shifting," Murphy said. "It lost one trailer reported over the side and reported it was steaming at four to five knots east trying to avoid the full force of the hurricane."

Murphy did not know the ship's point of registry, but said it was located about 115 miles east-northeast of Cape Hatteras.

New Bern, a short distance inland from Morehead City, also lost its power as the storm

ripped ashore, along with Atlantic Beach adjacent to Morehead City. Some minor flooding was reported on low-lying streets near the Neuse River at New Bern.

The sheriff's office at Beaufort said there were "some trees down and a lot of electric lines down" and a house trailer was overturned. It had been evacuated before the winds came.

The National Hurricane Center in Miami warned that tides would run as high as seven feet above normal during the hurricane.

Hurricane warnings were displayed from Wilmington to Virginia Beach, Va., and gale warnings flew as far north as Rehoboth Beach, Del.

Jaycees ponder recycle center

TWIN FALLS — A recycling center for aluminum cans, paper goods and glass bottles may be in the works for the Twin Falls area.

The Twin Falls Jaycees are discussing sponsorship of the project with area beer distributors, who have handled recycling of their own cans for some time and are acquainted with the operation, according to Brian Coleman, chairman of the project for the Jaycees.

Coleman said the potential is "tremendous." Western Beverage Co., the distributors of Coors beer in the Magic Valley, is currently packaging and shipping "about two tons of cans per week," Coleman said. The cans are sent back to the aluminum foundries to be processed.

The Jaycee center would accept the used recyclable products, shred the cans to reduce bulk, then hold them

until a carload is accumulated, Coleman said. The products would be shipped to the proper processing centers.

The Jaycees will establish a schedule of payment for the recyclable products, recouping their expenses through sale to the processors, Coleman said.

"We don't even know yet what expenses are involved, however. It's still rather tentative," he told the Times-News today. He and Matt Smith, a beer distributor, who has accepted the role of spokesman for his industry, are researching costs of shipment and the cost of acquiring shredding equipment for the Twin Falls Center.

Information on costs is on the way from recycling centers in Las Vegas, Nev., and Phoenix, Ariz., which are operating similar units, Coleman said. Until more is known about the overall costs of the operation, no firm plans can be made.

land and he said he replied it had but the department did not plan to appraise it because it did not think it should be sold.

Trombley said he gave the "transitory land values" in the Sun Valley area as a reason for not making a formal appraisal and for recommending the state hold and not sell the land.

He said he was instructed to acquire additional data about the proposal and land in the area and report back to the board members prior to their next formal meeting. He did so, he said, at a "breakfast meeting" in a Boise hotel.

At that time, he added, the board members indicated to him they wished to go ahead with the sale.

Huge blast kills 2 Irishmen

BELFAST, Northern Ireland (UPI) — A bomb which wrecked a pub full of celebrating football fans and killed two of them contained the largest charge of explosives used against a civilian Belfast target in recent memory, an army spokesman said today.

He said the charge of about 75 pounds of gelignite blasted the Four Step Inn in the predominantly Protestant Shankill Road area of Belfast Wednesday at about 10:30 p.m.

It went off as crowds of soccer fans hoisted glasses of beer over a close 3-2 victory by Standard of Liege, Belgium, over Linfield in Northern Ireland in a European Cup match.

The explosion killed two persons outright and injured another 27, 12 of them seriously enough to be taken to nearby hospitals where they spent the night, police said.

Past TF sheriff succumbs

HAGERMAN — Jesse Carlton, about 65, former Twin Falls County Sheriff, died Wednesday night in the Twin Falls Clinic Hospital. He had recently undergone surgery.

Mr. Carlton had lived in Hagerman since retiring from law enforcement work last year. At the time of his retirement he was employed as a deputy sheriff in Elko County, Nev., working in the Jackpot area. He was also a former member of the Twin Falls Police Department.

Carlton became a deputy sheriff in 1949 and in 1950 was elected sheriff on the Democratic ticket.

He was reelected and served in the office until resigning in August, 1955.

Import barrier may be lower

WASHINGTON (UPI) — Treasury Secretary John B. Connally said today the United States would drop its 10 per cent import surcharge in exchange for "tangible progress" toward lowering of trade barriers by other countries and for a totally free world money market.

But in a speech to the free world's top finance ministers and bankers Connally said the United States remained strongly opposed to formal devaluation of the dollar by raising the price of gold.

Connally's speech to the International Monetary Fund appeared to represent a slight softening of the U.S. position on the import surcharge, but no change on the question of gold.

Of the import surcharge, Connally said: "If other governments will make tangible progress toward dismantling specific barriers to trade over coming weeks and will be prepared to allow market

realities freely to determine exchange rates for a transitional period, we, for our part, would be prepared to remove the surcharge."

Meanwhile, Arnold R. Weber said recommendations of President Nixon's Cost of Living Council on economic controls to follow the 90-day wage-price freeze would go to the White House some time today.

In a speech to 250 delegates

to the annual meeting of the International Monetary Fund (IMF) in Washington Wednesday, he said he took action to put American goods in a better trade position to save the United States from "going isolationist."

"A weak United States will be isolationist without question," Nixon said. "A strong United States will continue to play a responsible role in the world."

Viet battle buildup on

SAIGON (UPI) — Fleets of U.S. and South Vietnamese helicopters flew thousands of South Vietnamese into Cambodia border areas northwest of Saigon today to try to stem a Communist offensive, but the South Vietnamese said one division of Communists had entered South Vietnam.

Pilots reported intense anti-aircraft and mortar fire in the border area and a U.S. helicopter gunship escorting supplies into besieged U.S. Firebase Pace near the border was shot down. The two crewmen leaped from 400 feet without parachutes when the craft burst into flames. Their fate was not known.

UPI correspondent Kenneth J. Braddick, who witnessed the incident, said his own helicopter was forced to turn back because of the intense gunfire. He said .51 caliber anti-aircraft fire shot down the nearby Cobra gunship.

Braddick said the helicopters were part of a continuous aerial shuttle of supplies into Pace and another U.S. artillery base at Katum. The two bases are inside South Vietnam 15 to 20 miles from the Cambodian rubber town of Krek where the Communist offensive began on Sunday.

Maj. Gen. Nguyen-Van Tinh, commander of the South Vietnamese 25th Division, said the heavy government troop reinforcements were moving in "to block two North Vietnamese divisions" but that another division "has already crossed the border into South Vietnam."

Anti-Thieu riot plays fizzling

SAIGON (UPI) — Efforts to whip-up opposition to President Nguyen Van Thieu and his one-man presidential election on Sunday appeared to be running out of steam today.

A series of demonstrations and firebombings of vehicles by students, Buddhists, disabled veterans and opposition politicians during the past few weeks diminished to the vanishing point today.

A radio call for renewed demonstrations by Nguyen Huu Tho, a top leader of the Viet Cong's National Liberation Front also fell on deaf ears. His appeal, broadcast by the clandestine Viet Cong radio, asked opposition elements to unite against the "bellicose tyrant" Thieu.

Fire rips drug store at Oakley

OAKLEY — Fire believed to have started near a basement furnace destroyed the rear portion of the building housing the Oakley Drug Store today.

Volunteer firemen controlled the blaze, which spread through the basement before being discovered about 9:45 a.m. by Mrs. Jerry Stanger, an employee.

Mr. and Mrs. Alonzo Stringham, owners of the building, said the structure and contents were covered by insurance. No damage estimate was immediately available. Firemen said there was heavy smoke damage in the front portion of the store and in a second floor apartment occupied by the Stringhams.

Details, p. 20

Board ignored pro's on S.V. land

By RICHARD CHARNOCK
BOISE (UPI) — Land board members and not professional personnel in the land department put the \$575 per acre valuation on 620 acres proposed for sale near Sun Valley, UPI learned Thursday.

Land Commissioner Gordon C. Trombley said in an interview that he discussed the proposed sale twice informally with board members prior to the Sept. 8 meeting when they formally considered it.

He said one of the board members first brought it up in August during a land board tour of Priest Lake. He said the member asked him if the department had received an application for purchase of the

land and he said he replied it had but the department did not plan to appraise it because it did not think it should be sold.

Trombley said he gave the "transitory land values" in the Sun Valley area as a reason for not making a formal appraisal and for recommending the state hold and not sell the land.

He said he was instructed to acquire additional data about the proposal and land in the area and report back to the board members prior to their next formal meeting. He did so, he said, at a "breakfast meeting" in a Boise hotel.

At that time, he added, the board members indicated to him they wished to go ahead with the sale.

He said the board members told him the land department "was not now and would not be sufficiently funded in the future" to develop the land itself. He said they felt the state had a "legitimate offer" to buy and fell the land should be sold.

While proposed land sales have been discussed informally with board members in the past prior to formal consideration by the board, he said, this was the first instance he could recall it happening in the current administration.

On Sept. 8, the board met and formally considered the application of Harry Holmes, president of Sun Valley Co., Inc., and Gayle Holmes to buy the land and unanimously approved

it for sale — setting the \$575 per acre figure listed in the land department memorandum as a minimum price.

Afterward, however, Secretary of State Pete T. Cenarrusa and others had second thoughts about the matter and Cenarrusa asked Gov. Cecil D. Andrus, the board president, to call another meeting for reconsideration of the proposed sale. Last Monday, the board met, reconsidered its action and ordered a professional, outside appraisal and environmental study as soon as possible.

Trombley sent out letters Thursday to 17 appraisers asking for "time-cost" quotations from them. He also

said the department has begun developing a model for an environmental impact study that will be part of the total consideration.

Attorneys for the applicants told the land board last Monday that Sun Valley Co. in a joint venture with Johns-Manville plans to use the acreage in question, in connection with its 1,900-acre Elkhorn at Sun Valley resort village development in the area.

Last May, after receiving the land sale application, the department asked its State land Agent, Fred L. Baucher, Jerome, to look into the matter and make a report.

Whats a Ms.?

A rose by any other name, may not only smell as sweet, but satisfies Mrs. Richard Skyeckler, Madison, Wis., who has received court permission to reject her married name but not her husband. She will now be known as Ms. Stephanie Twin, her maiden name. She uses "Ms." instead of Mrs. because she feels women should not be labeled as separated by their marital status. (UPI)

Pope backs teachings

VATICAN CITY (UPI)—Pope Paul VI opened the third and largest World Synod of Bishops today with a warning to delegates to ignore or reject pressures to change Roman Catholic teaching or tradition.

Some Vatican sources said the 74-year-old Pope was making a veiled appeal for 210 cardinals, bishops and other churchmen not to bend under pressure to change the law banning married priests.

The Pope told delegates during a mass in the Sistine Chapel there was a particular danger that delegates might come under pressures which would affect their judgment—and perhaps even the freedom of debate in the synod.

"This danger consists of pressure," he said, "The pressure of opinions which are

in doubtful conformity with the teachings of the faith, the pressure of tendencies which seemed unconcerned with traditions which are authoritative and which now are part of the authentic vocation of the church."

Observers said this was an indirect reference to the controversy over celibacy in the priesthood, an issue which liberals are pressing the Pope to allow discussed fully and freely.

The priesthood and justice are the two themes of the synod, but conservatives—and the Pope—have indicated they would not welcome discussion of the 700-year-old celibacy law.

The Pope spoke in the Sistine Chapel during a solemn mass, seen throughout Europe on television, and gave Hungarian Cardinal Jozsef Mindszenty his first opportunity in 15 years to publicly profess his faith.

Mindszenty, 79, who arrived from self-imposed exile in the U.S. embassy in Budapest two days ago after 15 years' silence, joined the Pope and four other high-ranking churchmen in concelebrating mass.

Funeral Services

BURLEY—Funeral services for Burl Moore will be conducted at 10 a.m. Saturday in the McCulloch Funeral Home chapel by Rev. Willis Blair. Final rites will be held in the Pleasant View Cemetery. Friends may call at the McCulloch Funeral Home Friday afternoon and evening and Saturday until time of services.

FILER—Funeral services for Winfield Scott will be conducted at 2 p.m. Saturday at the White Mortuary Chapel, rather than at the graveside as previously announced. Rev. Walter Darby will officiate. Military rites will be held at the Filer IOOF Cemetery by the Filer American Legion Post. Friends may call at the mortuary Friday night and until 1:30 p.m. Saturday.

Minidoka Memorial

Admitted
Henry Clark, Rupert; Mrs. Leslie Trevino, Paul and Nona Jacobs, Declo.
Dismissed
Mrs. Gary Rasmussen and daughter, Burley; Nona Jacobs, Declo; and Maria Tello, Rupert.
Births
A daughter was born to Mr. and Mrs. Leslie Trevino, Paul.

Fisher joins firm

TWIN FALLS—Leonard Fisher, Twin Falls, is now associated with LeMoyno Realty, 1130 Lawndale Drive, Twin Falls, according to an announcement made by Harry LeMoyno.

Fisher is a lifetime resident of Idaho. He was born and raised in the Kimberly area where he now lives.
After serving as a pilot in World War II, Fisher farmed until 1959. Since then he has been in banking, farm management, credit and real estate.
LeMoyno said experience in all these fields gives Fisher a broad range of ability in the real estate business.

Obituaries Council field hits 13

Lillian Miller

TWIN FALLS—Mrs. Lillian May Miller, 86, Twin Falls, died this morning at Magic Valley Memorial Hospital of an illness.
She was born Dec. 6, 1884, at Thompkinsville, Ky., and married Earl David Miller on June 26, 1912, at Davenport, Nebr. He died on Feb. 22, 1959.
The family lived in Montana for six years following their marriage, then moved to Idaho in 1919.

Mrs. Miller was a member of the Twin Falls First Christian Church.
She is survived by one niece, Mrs. George Wall, Idaho Falls. Services will be conducted at 11 a.m. Saturday at White Mortuary by Rev. Ray Jones. Final rites will follow in Sunset Memorial Park.
Friends may call at White Mortuary Friday afternoon and Saturday until 10:30 a.m.

Audrey Walton

TWIN FALLS—Mrs. Audrey H. Walton, Twin Falls, died Wednesday in a Boise hospital of a short illness.
She was married to Benjamin Walton in Boise on July 26, 1934. He died on Nov. 24, 1969. They came to Twin Falls from Nevada in 1945. Mrs. Walton was a member of the Presbyterian Church. She worked in the construction business with her husband until his death, and had been owner-manager of the firm since.

Survivors, all of Elko, Nev., include her mother, Mrs. Helen Hunt; two brothers, Robert J. Hunt and Richard Z. Hunt, and one niece, Tonya A. Hunt.
Funeral services are pending at White Mortuary.
The family suggests memorials to the charity of choice.

Burl Moore

BURLEY—Burl Roy Moore, 53, Burley, died Tuesday at his home of a short illness.
He was born Feb. 5, 1918, in Missouri. On Oct. 12, 1955, he married Betty G. Oliver at Green River, Wyo. He and his family moved to Burley five years ago from Albion Okla. He was employed by Swift and Co. and was a veteran of World War II.

Survivors include his widow; five sons, David Moore and Marty Moore, both Burley; Burl Moore Jr., Phil Moore, and Gene Moore, all Scappoose, Ore.; one daughter, Mrs. Wanda Bowen, Scappoose; one step-daughter, Mary Oliver, Idaho Falls; his mother, Grace Baugh, Albion, Okla.; four brothers, Lon Moore, Myrtle Creek, Ore.; Dallas Moore, Crane, Mo.; Melvin Moore, Pilot Hill, Kan.; and Orville Moore, Toolson, Okla.; four sisters, Mrs. Viva Harkey, Albion, Okla.; Mrs. Agnes Cranford, Moore, Okla.; Mrs. Juanita Engles, Ogden, Utah and Mrs. Margaret Smith of Oklahoma and five grandchildren.
Funeral services will be announced by the McCulloch Funeral Home, Burley.

Canada is the world's biggest producer of nickel.

Stability said illness cure

SALT LAKE CITY (UPI)—Society is sick largely because of divorces and other causes of unstable families, a Mormon leader said Wednesday.

Elder Marlon G. Romney of the Council of Twelve said the scriptures show that the family is divine and not a man-made institution.

"That God's plans and specifications for the building of families are not understood and followed accounts in a large measure for the instability of the family in our modern society," Romney said in a speech to the opening session of the Relief Society General Conference.

"At the heart of society's fatal sickness is the instability of the family," he said.

Romney said families "are of more value than the earth itself."

"The idea that marriage is a man-made social custom,

which may be done away with at will, is of the evil one. Not only is marriage God-ordained—His plan calls for it to be enduring, as it must be for the building of stable and enduring families," Romney said.

"If the teachings of Jesus as they are found in Bible scripture were followed, honorable marriage would be the objective of all men and there would

be no divorce. This would eliminate a major cause of family instability."

Another speaker was Elder Mark E. Petersen, also of the Council of Twelve.

"Homemaking—24 hours a day. That is the work of Relief Society," Petersen told the members.

"It is the creation of an atmosphere in a home wherein

good character can be formed, faith may be instilled and young people may have the opportunity of being taught how to fulfill their eternal destiny," Petersen said.

He criticized those who advocate abortion and limiting the number of children in families to two.

Benito Mussolini was the son of a blacksmith.

Crime climb continues

WASHINGTON (UPI) — The FBI reported Wednesday that violent crime in the United States increased 11 per cent in the first half of 1971. This compared with a 10 per cent increase for the first six months of 1970.

But despite the 11 per cent increase in murders, aggravated assaults, rapes and robberies, the over-all crime increase for the first half of this year was 7 per cent. The big increase in violent crimes was offset by a relatively modest 6 per cent increase in property crimes.

The FBI's uniform crime report said that murders increased 10 per cent, rape 7 per cent, aggravated assaults 10 per cent and robbery 14 per cent. In property crimes, burglary was up 7 per cent, larceny 6 per cent and

automobile theft 2 per cent.

The report said that crime in the nation's six largest cities—New York, Chicago, Los Angeles, Philadelphia, Detroit and Houston—was up 7 per cent. But in 19 cities with a population between 500,000 and 1 million, the over-all rate of serious crime decreased by 4 per cent.

Geographically, the crime rate increased 11 per cent in the west, 10 per cent in the northeast, and 3 per cent in the south and the north central region.

Including data on police slayings for the first time, the report said 80 law enforcement officers were murdered during the eight-month period ended Aug. 31. This compared with 67 murdered in the same period of 1970.

FBI Director J. Edgar Hoover said 96 per cent of the officers were killed with firearms. Thirty-three were slain in the south, 18 in the north central region, 16 in the northeast and 13 in the west.

In a statement accompanying the report, Attorney General John N. Mitchell said serious crime in Washington, the only city under federal jurisdiction, fell 16 per cent, compared with a 16 per cent rise in the same

period a year ago.

Other cities comprising the group of 19 which showed an over-all drop were Baltimore, Dallas, Indianapolis, Cleveland, Milwaukee, San Francisco, San Diego, San Antonio, Boston, Memphis, St. Louis, New Orleans, Phoenix, Columbus, Seattle, Jacksonville, Denver and Pittsburgh.

TF airport opens Friday

TWIN FALLS — The City-County Airport will open to Air West's big DC-9 jets Friday morning as scheduled, it was announced today by Jean Milar, city manager. He said broadcast reports Wednesday evening to the effect the opening might be delayed were not correct.

Milar said the government inspection team from Seattle, due Wednesday, did not arrive because of weather on the coast but was in Twin Falls today. However, this inspection is routine because the new runway

was inspected daily during construction. The government inspection, he said, is mainly to authorize payment of funds due the contractor.

Paul Shoaff, station manager for Air West at the field, said flight schedules are "firm" and that the first plane to land on the new runway is due from Seattle and Boise at 10:40 a.m. Friday. He said the departing flight at 10:55 a.m. out of Twin Falls for Salt Lake City, Las Vegas and Los Angeles is "practically sold out." The DC-9 carries more than 90 passengers.

Gem unit avoiding tax clash

IDAHO FALLS (UPI) — The manager of the Idaho Falls Chamber of Commerce said today the chamber has "no plans for any retaliation" against an out-of-town taxing policy used by Jackson, Wyo.

Bill Brooks said Jackson had levied a tax "for years", including a \$100 tax for out of town business making local deliveries into Jackson. He said taxes for local businesses range from \$25 up.

"We have opinions this is unconstitutional," he said. "This discrimination involves interstate commerce to some extent."

But, he added, "In our opinion this is an internal Jackson problem. Our chamber's position has been to stay out of it. We refuse to have a part of it."

He said, however, the chamber would "work hard to help Jackson to come up with a revenue plan or whatever the community needs."

Brooks criticized a news story which indicated the chamber might have plans for retaliation. He said the article was "created" by someone "who loves to see controversy."

Vietnam, inflation top solon's polls

WASHINGTON (UPI) — Rep. Orval Hansen, R-Idaho, said Wednesday results of a poll conducted in the Second District show the Vietnam war and inflation to be the national problems of greatest concern to those responding.

Hansen said members of all 109,000 households in his district were asked to select the three problems they believe required the most immediate

attention by the federal government.

He said of those responding, 29 per cent indicated ending the war in Vietnam deserves top priority.

Controlling inflation ranked second with 24 per cent, followed by reducing crime with 13.5 per cent, reducing air and water pollution with six per cent, and reducing unemployment and increasing farm income, each with four per cent.

Hansen said, however, when first, second and third choices were combined, inflation came out on top of the priority list by 10 per cent of the respondents.

Prisoners arraigned in slaying

BOISE (UPI) — Three inmates of the Idaho State Penitentiary were arraigned Wednesday in Magistrate's Court here in connection with the stabbing death of another inmate on Aug. 14.

Ada County Prosecutor James E. Risch issued a complaint charging Ronald L. Macik, 23, William L. Burt, 24, and Danny R. Powers, 21, with the first-degree murder of William H. Butler, 28.

The case was continued until Monday, Oct. 4 to allow the accused time to consult with an attorney. A date for the preliminary hearing will be set at that time.

Nominated

BOISE (UPI) — James D. McClary, executive vice president and director of Morrison-Knudsen Co., has been nominated for president of the Associated General Contractors of America for 1972.

McClary, now senior vice president of the organization, was nominated for the top office at the association's mid-year board meeting in Atlanta.

ISP officers receive awards

TWIN FALLS — Idaho State Police officers assigned to Magic Valley's District 4 received certificates Wednesday from the State of Idaho Law Enforcement Planning Commission, Peace Officers Standards and Training Advisory Council.

Capt. Dean Bennett, supervisor of District 4, said all 20 men assigned to the district have received basic certificates. Capt. Bennett, who received the highest certification, an advanced certificate, received his earlier this year from Gov. Cecil Andrus. To be certified the officers had to pass a written examination, fulfill other requirements and be recom-

mended for certification by their supervisory officers.

Those receiving certificates during a department meeting Wednesday were Sgt. Bob Wright, Sgt. Ralph Sifford, Cpl. Chester Hillman, Cpl. William Van Dyke, Cpl. Frank Mogensen, Cpl. George Blackburn, Cpl. Everett Waddell, Cpl. Coleman Watkins, Cpl. Bill Green and Trooper Don Hiebert, all Twin Falls; Cpl. Bill Watts, Jerome; Cpl. Duane Owen, Buhl; Cpl. Jim Finch, Gooding; Cpl. Gene Bolton, Halley; Trooper Leslie Stimpson, Shoshone; Cpl. Gordon Mills, Rupert, and Cpl. Chuck Peugh, Trooper Omar Brannan and Trooper Tom Thompson, all Burley.

Gem site proposed for meet

BOISE (UPI) — Gov. Cecil D. Andrus met with the chairman of the Boy Scout Jamboree, Arch Monson, San Francisco, Wednesday and said he is seeking the 1973 Jamboree for Idaho.

Andrus said after the meeting he has asked Lloyd Howe, executive secretary of the Department of Commerce and Development, to pursue a commitment from Boy Scout officials to hold the 1973 event in Farragut State Park.

Farragut is a former site of national and world jamborees.

UP agency at Mackay to close

BOISE (UPI) — Idaho's Public Utilities Commission has given Union Pacific Railroad authority to close its agency at Mackay, providing the railroad gives 15 days public notice before it does so.

In granting the railroad's request to close the agency, however, the PUC also ordered the Union Pacific to make a representative available on livestock sale days at Mackay if requested.

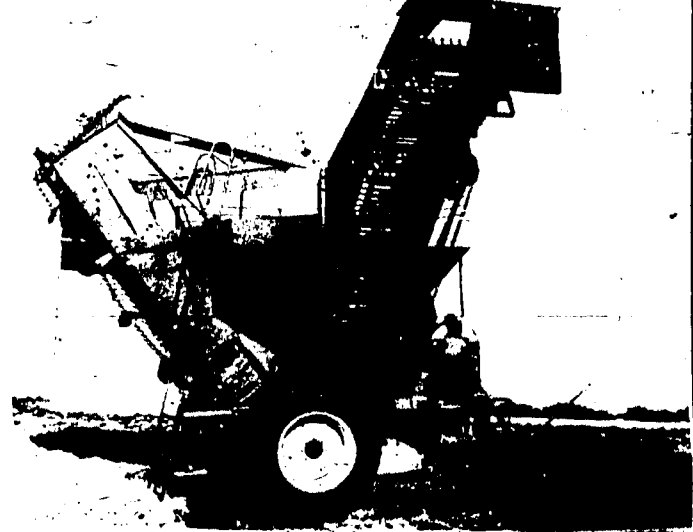

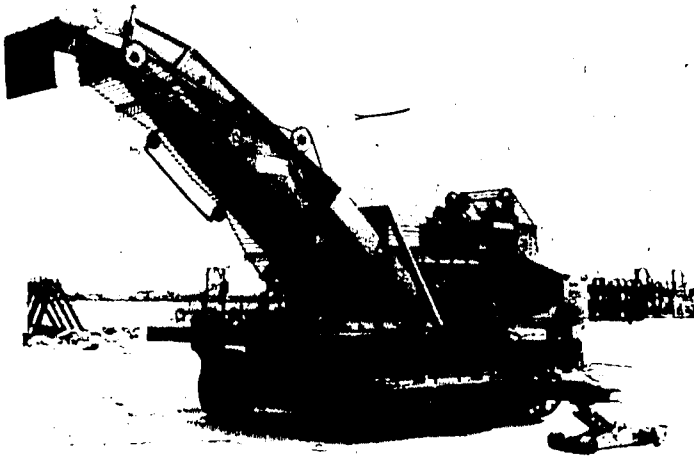

It also ordered the Union Pacific's Arco agent and train crews to provide certain other services.

HERE THEY COME... HARVEST RECIPIALS

FROM LOCKWOOD CORP. OF RUPERT, IDAHO

LOCKWOOD BEET HARVESTER MODEL 6306 - 6 ROW

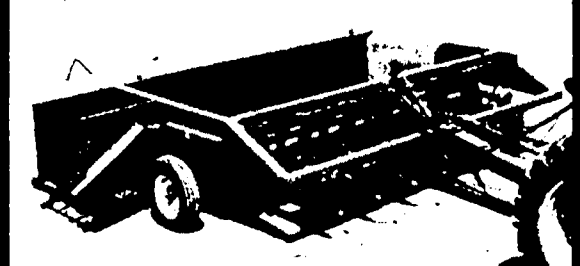

LOCKWOOD TANK HARVESTERS MODEL 6323 - 2 & 3 ROW

- * Design balanced solid construction
- * Heavy-duty PTO & main drive trains
- * Sure beet-lifting puller wheel action
- * Rubber flail beet ejection
- * Capacity, self-cleaning of a hugger chain chain side elevator
- * 7' long top-side beet cleaning area
- * Fingertip controlled deep bed loading elevator

- * Solid rim 28-inch puller wheels with Timken bearing hubs — mud scrapers.
- * Weight centered over pulled wheels design.
- * Split design, offset steel paddles work as secondary rim scrapers.
- * Wide 36" roller chain powered rear elevator with 2.25" pitch steel rod chain supported by flange rubber idlers molded on to bronze bearing surfaces.
- * Thorough beet cleaning by 6 rows of powered rinks.
- * 3/4 ton capacity tank with replaceable side wear plates and chain conveyor bottom.
- * 12 volt electric clutch gives fingertip control of unloading elevator and chain tank bottom — simultaneous harvesting and unloading flexibility.
- * 80 to 112-inch wheel tread adjustment of 11.25 x 24 tires and tubes to accommodate bed or 20" through 36" row spacings.

Wood River resources study due

BY LEE TREMAINE
Times-News Writer

GOODING—Improvement of all available resources including human resources and industrial growth in the four-county, 3.2 million-acre Wood River Resource Area, will be explored through a Resource Conservation and Development Assistance program, the Times-News learned today.

The program, which will provide assistance in Blaine, Lincoln, Camas and Gooding Counties, in 1972 through the U. S. Soil Conservation Service, was announced Tuesday by members of Idaho's congressional delegation. The area is among only 20 new areas designated.

Idaho Sen. Len B. Jordan said today that the secretary of Agriculture selected the area under the control of the Wood River Resource Association for the assistance, with specific funds to be determined when anticipated costs are computed.

Sen. Jordan said a major factor in winning the favor of the government was the "high degree of local participation" exhibited by taxpayers in the area who approved construction of the new Gooding County High School and the Hailey sewer system. The federal resource development program aims to improve all available resources, including human resources through industrial growth.

In Gooding, Idaho Sen. Don Fredericksen told the Times-News today that the Wood River Resource Association, of which he is chairman, has been working on development of the area for nearly five years, but this is the first time the federal government has offered assistance.

A major area of concern, now under the scrutiny of the Army Corps of Engineers, is the flood potential in the Wood River watershed. Development of flood-control projects is a vital goal in the overall resource program, Fredericksen said.

Construction of additional storage facilities to contain

runoff water each year is also essential, since "we are losing 100,000 acre feet of water each year through lack of storage," he said.

"The water doesn't do us any good when it is allowed to run off into the Snake River without being used for agriculture or industry," the Idaho legislator explained.

Industrial growth in the four counties is another goal of the group. "We are losing population everywhere except, I imagine, in Blaine County around Sun Valley. More industry would help keep our people here and could draw new people in."

Industrial growth could also serve to increase income opportunities for residents of the four counties, Fredericksen said.

Solid-waste disposal is a growing program, particularly in Blaine County, he added. The association has "signed a request for a study grant" to probe ways and means of solving the program and funding treatment facilities. The federal grant could help in this area.

Fredericksen said his understanding of the federal offer is that funds will be granted to pay salaries of a coordinator and a secretary to help the local association with its work. He emphasized that the projects will be developed and controlled locally, "not from the top down."

The Wood River Resource Area covers 3.6 million acres in the Big and Little Wood River drainage basin, including the upper reaches of the South Fork of the Boise River.

Supporting the federal project are the counties of Blaine, Camas, Gooding and Lincoln and the communities of Bellevue, Bliss, Dietrich, Fairfield, Gooding, Hagerman, Hailey, Ketchum, Richfield, Shoshone and Wendell, and the Soil Conservation Districts in the four counties, according to Sen. Jordan.

NY prison reform continuance vowed

ALBANY, N.Y. (UPI)—State Corrections Commissioner Russell G. Oswald, vowing "we're not going backwards." Said Tuesday prison reform would continue in New York State despite the five-day Attica State Prison revolt which claimed 42 lives.

"It would be less than honest to say it (the Attica uprising) hasn't slowed probable progress," Oswald said, "but over a period of time—say three years—I am confident we will reach the same point" of reform.

Oswald told reporters he was considering creation of a separate facility for "violently and personally aggressive" prisoners to segregate them from convicts undergoing rehabilitation. Inmates would not be sent to such an institution, he said, if they are "politically aggressive."

The commissioner met with seven reporters for 90 minutes. The interview was limited to Oswald's actions before the Attica disturbance which erupted Sept. 9 as well as his plans for the future. Discussion of events during the prisoner rebellion, as well as current investigations, was prohibited.

"We're not going backwards," he said.

White discussing a "maximum" security facility, Oswald also discussed institutions with lesser security. He said he would resign in three years if

more than 10 per cent of the state's inmate population remained in maximum security prisons.

In his only direct comments on the events at Attica, Oswald said:

"There was a report there would be some sort of uprising July 4, but nothing happened. There must have been some plans made for the disturbance. It was reasonably well organized. We found a calendar inside one cell with Sept. 9, the day the riot started, circled. And they were able to get a large number of hostages."

Oswald said he had no timetable for setting up an institution for troublesome prisoners, but it was something he had been considering for a long time.

"The hardest thing is to set up a clear criteria of who should be in there," he said. "One criteria would have to be the individual who is aggressive to others and to himself—not necessarily someone who is eloquent in political rhetoric."

He said such an institution would house up to 500 of the 12,278 prisoners in the state institutions.

Winners announced

TWIN FALLS — Monday Afternoon Duplicate Bridge club winners are, north and south, Mrs. E. A. Peterman and Mrs. A. J. Meeks, first; Mrs. V. R. Teasley and Mrs. M. Hogg, second; Mrs. L. R. Dunken and Mrs. Thomas Marzocca, third, and Mrs. M. McCall and Mrs. H. G. Lash, fourth.

East and west winners include Mrs. C. K. Brown and Mrs. Dudley Driscoll, first; Mrs. T. T. Greenhalgh and Mrs. Jack Stephens, second; Mrs. R. R. Williams and Mrs. A. W. Schrank, third, and Mrs. A. C. Victor and Mrs. B. E. Standlee, fourth.

Starting Oct. 4, the club will meet in the Episcopal church auditorium.

Road bids date set

BOISE (UPI) — Bids will be opened Oct. 19 by the U.S. Department of Transportation for construction of a 22.837-mile stretch of forest highway between Mountain Home and Hill City.

Located about 30 miles east of Mountain Home, the project has an estimated price range of \$500,000 to \$1 million.

Non-aligned Germany, Japan seen peace key

NEW YORK (UPI)—A neutralized Germany and Japan could be the key to peace between the United States and the world's two Communist giants, China and the Soviet Union, a political historian believes.

Alfred R. Tyrner-Tyrnauer, journalist and political analyst who teaches at New York's New School for Social Research, contends that the future U.S. role in Europe and Asia will be to help guarantee that neither Germany nor Japan builds a nuclear arsenal.

In exchange for such a guarantee, the Soviet Union could be willing to take its chances with a reunified Germany. Communist China, in turn, might choose to ignore the Nationalist Chinese government on Formosa, Tyrnauer said in an interview.

After World War II, Stalin's plan "was to establish a Communist government in Germany as a whole and bring it under Russian tutelage," Tyrnauer said. "It wasn't successful. The Marshall Plan and NATO strengthened Western Europe and West Germany. Now West Germany has become the most important

member of NATO in Europe." He said that today the Soviet Union, with an eye toward rising nationalism in other Eastern European satellites, is "not quite so sure about Eastern Germany."

"The Russians don't really believe that the Communist regime in Germany might be pliable forever, and would greatly prefer a neutral belt consisting of the two Germanys, Poland, Czechoslovakia and Hungary, as has been indicated in various plans put forward in recent years."

While the United States was once opposed to mutual withdrawal of troops from Central Europe, today the situation has changed, he said.

"NATO is willing to reduce its commitment in armed forces in Europe, and the NATO of today is no longer as strong or as reliable as it was 15 or 20 years ago.

"A reunification of Germany

is and will remain a political issue, although nobody believes it will happen very soon," said Tyrnauer, who was arrested and expelled from his native Austria by Nazi Germany in 1938. "But I am convinced that in both East and West Germany it will be one of the main problems with which the two governments have to contend.

"Of course," he added, "peaceful reunification could be only a loose confederation that would provide autonomy for East and West Germany. But it is not impossible.

"Russia's greatest worry, is that Germany as well as Japan might get the nuclear bomb. Therefore, neutralization and guaranteed non-proliferation is for Russia of far greater value than is a part of Germany under Communist government."

Tyrnauer said that the same idea applies to Communist China.

EDD H. BAILEY, who started with the Union Pacific in 1922 beating rivets for a car repair crew, has retired as president and director of the road. Bailey predicted the future of railroading is bright, despite troubles facing industry. In more than 49 years with the line, Bailey served as machinist's helper, special agent, brakeman, conductor, trainmaster and front office executive. (UPI)

Early season TV ratings hint 'Laugh-in' on comeback track

HOLLYWOOD (UPI)—Although two top NBC-TV series, the Jimmy Stewart Show and "Bonanza," fizzled surprisingly in the premiere week ratings, another program on the network, "Laugh-In," indicated signs of a strong comeback.

Toward the end of last season, it looked as though "Laugh-In" was finally about to make a steep plunge in the ratings after several years of ranking near the top. It was definitely not helped by the competition of ABC's new Monday night pro football games. On the other hand, even a failure this season would not have diminished admiration for the ability of "Laugh-In" to continue as long as it has with such a demanding amount of weekly material.

But the premiere week ratings reveal that "Laugh-In" ranked 10th among all shows, which is very strong. What is ironic is that it came in back-to-back with its head-on CBS competition, "Gunsmoke,"

which placed ninth. There is obviously a demographically divided audience at this viewing hour, with "Laugh-In" viewers undoubtedly younger, though not necessarily wiser. "Gunsmoke" is a fine show too.

On Nov. 1, "Laugh-In" will present its 100th show, featuring "graduates" of the series—Arte Johnson, Judy Carne, Tiny Tim, Henry Gibson, Jo Anne Worley, Teresa Graves and the program's first cameo guest, John Wayne.

The ratings also reveal that Flip Wilson's show seems more popular than ever this season, finishing second only to "Marcus Welby, M.D." The Wilson hour, on NBC, simply murdered ABC's "Alias Smith and Jones" and CBS's new Rod Taylor series, "Barefoot in the Park." Both "Alias Smith and Jones" and "Barefoot" are derivatives of the Butch Cassidy-Sundance Kid type of light hearted western. Tony Curtis, meanwhile, has had a peculiar reaction from audiences in his new ABC adventure series, "The Persuaders," which costars Roger Moore. The premiere episode fared very well in the overnight ratings in New York and Los Angeles, yet in the national rankings the series came in a dreadful 56th.

The ratings failure of movie stars Curtis, Taylor, Stewart, Shirley MacLaine, Gene Kelly and Anthony Quinn in the premiers of their new series has already been recorded (Glenn Ford and James Garner did all right with their new shows).

Areas grow

BOISE (UPI)—Idaho's Public Utilities Commission has amended the certificates of two radio common carriers to include the City of Blackfoot in their territories.

Tel-Car, Inc., Meridian, and Intermountain Mobilfone, Inc., asked for the additional authority.

But there was another surprise in the poor rating of another movie name, Henry Fonda, whose returning ABC show, "The Smith Family," about a police officer, his wife and kids, was a strong contender last season. In this season's premiere, it came in 59th.

Fonda got knocked off in this

rating by CBS-TV's "Medical Center," still popular, and the new "NBC Mystery Movie," with Peter Falk as a detective. "Medical Center" and Falk also clobbered Miss MacLaine's new series, and Falk and Carol Burnett combined to wallop "The Courtship of Eddie's Father," which deserves a better fate.

Almanac

By United Press International

Today is Thursday, Sept. 30, the 273rd day of 1971, with 92 to follow.

The moon is between its first quarter and full phase.

The morning stars are Mercury and Saturn.

The evening stars are Venus and Jupiter.

On this day in history:

In 1846, Dr. William Morton, a dentist in Charleston, Mass., extracted a tooth for the first time with the aid of anesthesia, ether.

In 1938, Germany, France, Britain and Italy met in Munich for a conference at which English Prime Minister Neville Chamberlain promised "peace in our time." That "peace" lasted 337 days.

In 1953, Earl Warren was appointed chief justice of the United States Supreme Court.

In 1962, two persons were killed in riots marking integration at the University of Mississippi.

A thought for the day: American playwright Louis Kaufman Anspacher said: "Marriage is that relation between man and woman in which the independence is equal, the dependence mutual and the obligation reciprocal."

Safeguard preserved

WASHINGTON (UPI)—The Senate, in a vote of confidence for President Nixon's efforts to achieve an arms control agreement with the Soviet Union, overwhelmingly rejected legislation that would have scuttled the Safeguard Antibalistic Missile (ABM) system Wednesday.

Encouraged by prospects of an agreement for a mutual limitation on the ABM, long-time critics of the weapon joined in beating down an amendment by Sen. Harold Hughes, D-Iowa, to bar further deployment of the computerized missile interceptor.

The action came as the Senate plowed through a \$21 billion Military Procurement Bill, shuffling off all major efforts to trim it. An amendment by Sen. William Proxmire, D-Wis., to scrap the Navy's new swept-wing fighter, the F14, was rejected 61 to 28. A vote was scheduled for late Thursday on Senate Democratic Leader Mike Mansfield's amendment to set a six-month timetable for withdrawal from Vietnam.

Hughes' amendment to scrap the ABM was beaten 64 to 21. In past years, the Nixon administration has had to struggle to get ABM money past the Senate. Initial deployment of the \$7.1 billion system in Montana and North Dakota was narrowly approved in 1969 after efforts to stop it were rejected on a historic '50-50 tie vote.

But this time, Sen. John Sherman Cooper, R-Ky., and other longtime ABM opponents urged their colleagues to back the \$1.1 billion in the bill earmarked for Safeguard. They contended that the possibility of an agreement at the Strategic Arms Limitation Talks (SALT) in Vienna and Helsinki was near enough that rejection of the ABM now might upset a major step toward disarmament.

Cooper, who had been the major sponsor of anti-ABM legislation in past years, said he still thought the system would never work but "I believe it best that we do not alter the basis upon which negotiations are taking place."

Big bang

AERIAL RECONNAISSANCE photograph (above) taken from RF-4 plane shows North Vietnamese automatic weapons positions atop hill in Laos, defending key road segment used to move supplies along Ho Chi Minh trail. After being struck by well-aimed 3,000 pound bomb (below), the position is marked only by huge crater. Bomb was delivered by another Air Force F-4 Phantom. (UPI)

Rogers, Soviet ink arms pacts

WASHINGTON (UPI)—Secretary of State William P. Rogers and Soviet Foreign Minister Andrei A. Gromyko sign two arms control agreements today. One is designed to prevent accidental nuclear war and the other will establish a satellite-borne "hotline" between the capitals.

Gromyko invited Rogers to lunch at the Soviet embassy following the ceremony. The social event was the final step in a series of high-level American and Soviet consultations on world issues.

President Nixon conferred for two hours with Gromyko at the White House Wednesday. White House spokesmen said that both statesmen agreed that "some steady progress" had been made on reaching an agreement to limit costly anti-ballistic missile systems.

But White House Press Officer Ronald L. Ziegler left

the impression at his news briefing that the United States and Soviet Union were still divided over what measures to take on limiting offensive strategic weapons. Ziegler said that Nixon remained "hopeful for additional forward movement" at the Strategic Arms Limitation Talks (SALT) which reconvene in Helsinki, Finland, in November.

On May 20, 1971, Nixon, in a formal White House statement, said that the United States and Soviet Union would concentrate this year on seeking an agreement to limit anti-ballistic missile defense systems.

On other issues, Gromyko and Nixon discussed the Middle East situation, the Vietnam war, and prospects for improving European security through reduction of NATO and Communist forces in Central Europe.

Nixon, Russ cite arms talks gains

WASHINGTON (UPI)—President Nixon and Soviet Foreign Minister Andrei A. Gromyko agreed during a two-hour meeting Wednesday that their arms control negotiators had made "some steady progress" in agreeing to limit costly antiballistic missile (ABM) systems.

Nixon called the meeting "very constructive" although he said he and Gromyko talked of "many differences" between their countries.

Press Secretary Ronald Ziegler, reporting on the meeting in Nixon's oval office, said they agreed that "on the main elements of the SALT agreement, there has been steady progress," and that Nixon expressed hope "of additional forward movement" when the Strategic Arms Limitation

Talks (SALT) resume at Helsinki in November.

Following the meeting, Nixon told world bankers at a White House reception that the meeting had reminded him of "talk about one world, politically."

"This probably is not going to happen in our lifetime," he told the bankers, "but as we look at the free world today we can think of the possibility of one world economically."

Gromyko, in the United States for the United Nations General Assembly session, met Nixon at 3 p.m. EDT. Also present at the meeting were Soviet Ambassador Anatoly A. Dobrynin, Secretary of State William Rogers, National Security Adviser Henry A. Kissinger and one Russian interpreter.

Chinese in Paris

PARIS (UPI)—A nine-man Chinese delegation arrived Wednesday in France for official talks aimed at improving relations between Peking and the West.

The Peking delegation, headed by Foreign Trade Minister Pai Hsiang-juo, received a regal welcome at Orly Airfield from French officials headed by Industry Minister Francois-Xavier Ortoli and a politely clapping group of Communist Chinese diplomats headed by Gen. Huang Chen, ambassador to France.

An oversize Chinese Communist flag draped the VIP lounge, carefully guarded by armed French police. A warm handshake from Ortoli and a host of leftist diplomatic missions welcomed the group of Peking officials, who wore army tunics.

Pai, in a brief statement, pledged his visit was the symbol of an ever increasing Franco-Chinese friendship. But he and other delegation members firmly refused to answer newsmen's questions on what was happening in Peking.

More flights due

WASHINGTON (UPI)—The Cuban government has informed the United States the Havana-Miami airlift removing persons who wish to leave Cuba will continue at least through next week, the State Department said Wednesday.

A department spokesman said the U.S. government was not sure precisely when the airlift would terminate or

exactly which Cubans would be leaving for the United States. Earlier in the summer, Cuban Premier Fidel Castro advised the United States there no longer were enough persons wishing to leave Cuba to justify continuation of the airlift. It appeared likely then that the flights would soon be terminated at Cuba's request.

New 1974 belts ordered

WASHINGTON (UPI)—Delaying the installation of impact-absorbing air bags for two more years, the government ordered auto manufacturers Wednesday to put seat belts on 1974 cars that must be fastened before the vehicle will start.

Auto safety critic Ralph Nader claimed pressure from the manufacturers made the administration overrule its own national highway traffic safety experts who recommended the air bags—or something equally as effective—be provided on 1974 model cars.

"Henry Ford has spoken, Richard Nixon has jumped, and 200 million Americans have been deprived for another two years of the most important life

saving device developed in recent automotive history," Nader said.

Indicating that the battle to get the air bags installed is far from over, Nader added "this decision ... may have to be challenged in the courts at the earliest possible time."

Douglas Toms, national highway traffic safety administrator said, "everyone agrees that passive restraints are the most important breakthrough in auto safety in our time, but we can't expect them to appear in 10-million cars overnight. It is a production problem, not a scientific or technical problem."

The anti-start seat belts, which would be required only in the front seats, would add

about \$33 to the car's cost, according to Ford Motor Co., which conducted an advertising campaign against the air bag and took its case to court.

It was the fourth time that the government had pushed back the effective date for a safety standard requiring that a driver or passenger must be able to survive a front end crash at 30 miles an hour.

In announcing the two-year postponement in this "passive restraint" standard, Transportation Secretary John A. Volpe, said these must now be installed in front seat and back on cars produced after Aug. 15, 1975. That is the starting date for production of the 1976 models.

Kidnapers free air chief after ransom

MEXICO CITY (UPI)—Mexico's director of airports, Julio Hirschfeld Almada, was freed unharmed Wednesday night by kidnapers who had held him captive in a dark room for more than two days awaiting payment of \$240,000 ransom.

"I'm convinced they would have killed me if the ransom had not been met," the 54-year-old millionaire industrialist told newsmen. He had arrived at his mansion by taxi several hours earlier, saying he had been treated well by his four abductors, who described themselves as revolutionaries.

During the news conference, Hirschfeld said he was blindfolded after his abduction from his car Monday and had no idea

where he was taken. He said he was placed in a small room with newspapers over the windows and blindfolded again whenever it was necessary to move him through other rooms of the building.

His only reading material was a biography of Ernesto Che Guevara, the Cuban revolutionary, and other "left-wing literature," he said.

Pure gold is 24 carats.

Boise miss assigned to T.F. school-work program

TWIN FALLS — Kathe Wenske, Boise, with graduate training in sociology, is new counseling rehabilitation specialist assigned to the Twin Falls School-Work Program, Ray W. Turner, Idaho vocational rehabilitation service director announced. She replaces Gregg Otto who resigned to attend Idaho State University graduate school.

KATHE WENSKE

Miss Wenske completed course work for a masters degree in sociology at Utah State University, Ogden, in 1970. She has been employed as a teaching assistant at Utah State.

The School-Work Program with which Miss Wenske is employed is a vocational training project sponsored by the Twin Falls School District No. 411, Idaho Department of Education and Idaho Vocational Rehabilitation Service. Conducted at Robert Stuart Junior High School, about 25 students ages 15 and older from Twin Falls, Filer, Jerome, Wendell and surrounding areas receive class instruction in vocations usually one-half days and have on-the-job training in community businesses for half days. "Eligibility for this program is established as a result of a

physical or mental impairment," Turner said, "interfering with employment potential, professional examination being required for admission to the class. Miss Wenske will locate job training opportunities, counsel students about personal and employment problems and place students in work after they have successfully completed the course. Special education teachers counsel students as part of the formal class-room activities."

Vows repeated in candlelight rites

TWIN FALLS — Judy Kuykendall, daughter of Lawrence Kuykendall, Twin Falls, and Mrs. A. O. Becker, Pocatello, became the bride of Dave Sommer, son of Mr. and Mrs. Elmer J. Sommer, in rites performed Sept. 11 at the First Baptist Church.

The candlelight double ring ceremony was performed by Charles E. Graves before an altar flanked by decorated baskets of white gladioli, babies breath and blue pom poms.

The bride, escorted by her father, wore a white floor-length gown of slipper satin covered with lace. The gown featured an empire waistline and Juliet sleeves. The overskirt and train were edged by a bias strip of slipper satin. Thirty five tiny covered buttons accented the back and extended onto the train. A tiara of traditional Juliet style covered with tiny seed pearls held her veil of bridal illusion. The gown was designed and made by Arline Sommer, sister-in-law of the bridegroom.

The bride carried a cascade bouquet of white gladioli with tiny blue pompons and babies breath. Long blue satin ribbons cascaded from the bouquet.

Ellen Fuller was maid of honor. Mrs. Patty Jones and Penny Kuykendall, sisters of the bride, and Shirley Sommer, sister of the bridegroom, were bridesmaids. Jodi Jones, niece of the bride, was flower girl. Mrs. Francis Rider was organist and Kathy Brackett was soloist.

Dean Siren was best man, with John Sommer and Jim Sommer, brothers of the bridegroom, and Bob Kreigh, brother of the bride, as ushers. Sandy Sommer and Susan Sommer were candlelighters.

Mrs. Jessie Lingnaw registered the guests. A reception was held after the ceremony in the basement of the church. The bride's table

was covered with white lace and centered with a three tiered wedding cake accented in blue with white sugar bells and lace sugar hearts. It was topped with three white satin bells. Blue gladioli, babies breath and green fern encircled the base of the cake. It was flanked by blue candles in candelabra decorated with blue gladioli, babies breath and blue satin ribbons.

Mrs. Arline Fuller out the cake and Mrs. Denise Siren and Mrs. Helen Swartley served the blue ice fruit punch and coffee. Guests were served at tables covered with white lace and centered with gladioli and blue mist floating in oval white dishes.

Mrs. Vida Campbell and Miss Tere Jones carried gifts. Mr. and Mrs. Wayne Ehresman and Mr. and Mrs. Chuck Kriegh were special out-of-town guests.

The couple went to Canada for their honeymoon and will reside in Twin Falls, where the bridegroom is employed by Continental Baking.

A rehearsal dinner was held at the home of the couple by Mr. and Mrs. Elmer Sommer. A pre-nuptial miscellaneous shower was given for the bride by Ellen Fuller.

Elects

ALBION — New officers for the Albion-Grange have been elected with Walter Amende, master; Jon Fillmore, overseer; Julius Goettsche, steward; Mark Bowlden, assistant steward; Zella Chatburn, Chaplain; Zelana Mahoney, treasurer; Mary Amende, secretary; William Chatburn, gatekeeper; Bethea Chatburn, ceres; Bessie Amende, pomona; Alma Bidgood, flora; Mrs. Mark Bowlden, lady assistant steward and Vard Chatburn, executive committeeman.

PTA fun night slated

TWIN FALLS — Members of the Bickel PTA have announced plans for the annual Family Fun Night to be held Oct. 29 as a fund raising program.

The PTA's annual "Meet Your Teacher Night" was held Monday at the school, with Mrs. Harry Merrick, president, conducting the meeting, followed by visits to the teacher rooms. The event Monday night attracted a record turn out of parents. Refreshments were served by Charlene McKay and Margie Deters.

Survey

Area community concert membership sale under way

BURLEY — Memberships in the Mini-Cassia Community Concert Association will be sold all this week ending Saturday evening, announced Robert Hamblen, president.

Membership drive headquarters is at Wood Music Center downtown Burley. Hamblen noted that membership in a community concert association entitles the member to attend any community concert in any city in the nation belonging to the association. A list of concerts and dates for nearby cities is sent to each association member.

Presently two great concert attractions have been put on hold by the Mini-Cassia Community Concert Association for this season. They include the Ballet West and Duo Romeros, guitarists. Exact dates for the two concerts have not been cleared, according to Mr. Hamblen.

Two other fine concerts will be added to the season tickets, and the selection will be made by the executive committee at the close of the 1971-72 membership campaign.

Membership in the association will be sold in Burley and Rupert all this week. Admission to the concerts is by membership only, and memberships are open to all residents in the Mini-Cassia area.

All officers and campaign workers attended a kickoff dinner this week at the Ponderosa Inn.

Ballet West, which is centered in Salt Lake City is one of the

leading dance companies in the world today. Last year the company presented 170 performances for over 200,000 people, traveled some 20,000 miles throughout the United States, bringing great dance to adults and children.

The Duo Romeros are Celin and Pepe Romero, who since their arrival in this country have been showing American audiences the musical potential of the guitar.

The two are members of the world famous Romero family of the Guitar. With their younger brother, Angel, and their distinguished father, Celedonio, the family has been described by Time Magazine as "indisputably one of the best guitar ensembles around."

Officers of the Mini-Cassia Community Concert Association who will be working with Hamblen, president, include Alfred Thaxton, vice president; Mrs. Gerald Budge, membership chairman, with her committeemembers, Mrs. Darold Krieger, Mrs. Paul Wood, Mrs. James Martin, Mrs. J.W. Young and Mrs. Walter Povlsen; Mrs. Grover Newman, secretary; Mrs. Loren Nelson, campaign headquarters chairman; Ernest Blauer, treasurer; Mrs. Harlow Cheney, publicity, and Mrs. Thaxton, dinner chairman.

Iceland's telephone directories list people by their first names only because last names there change with each generation.

Temple date set

RICHFIELD — The engagement of Dusty Dixon and William Arthur Phillips, both Salt Lake City, is announced by her parents, Bishop and Mrs. Ken Dixon, Richfield. Phillips is the son of Mr. and Mrs. Dean Phillips, Rupert.

Miss Dixon is a 1969 graduate of Richfield High School, where she was salutatorian. She attended Ricks College for one year and is presently taking her second year of training in radiological technology at the LDS Hospital, Salt Lake City.

Phillips is a 1966 graduate of Minico High school, attended the LDS Business College in Salt Lake City, where he was student body president. He completed a Southern States Mission for the LDS Church, and is a member of the Rupert National Guard. He is employed at Stark Automotive, Salt Lake City.

The couple plans an Oct. 22 wedding at the Idaho Falls LDS Temple.

Open house set Sunday

DUSTY DIXON

Miss Wool

Margie Sharp, the nation's new Miss Wool of America, graduated magna cum laude from the University of Utah college of nursing. She is five feet, seven inches tall and wears a size eight dress.

SHOSHONE — Mr. and Mrs. Claude D. McKissick will observe their Golden Wedding Anniversary at an open house Sunday, Oct. 3, from 2 to 4 p.m. at the Baptist Church Fellowship Hall, Shoshone.

All friends and relatives are invited and the couple requests no gifts.

John McGiver

John McGiver, fine character actor being seen this season as a chemistry professor on NBC's "The Jimmy Stewart Show," commutes from Hollywood to his home in New York's northern Catskills as often as his work schedule permits. McGiver is a reconverted former Baptist church that is now a 12-room dwelling. McGiver needs the space — he has 10 children.

Miss Messner, Roberts wed

DEAR ABBY: I am a 15-year-old girl who never misses your column. I read those letters about V. D. and have a few questions I want to ask you:

- 1. In which states can doctors treat minors for V. D. without telling their parents?
- 2. How old does a person have to be before he is no longer considered a minor?
- 3. Will you please come right out and describe some of the symptoms of V. D. I have heard so many stories, I am confused. For instance, I have heard that if a sore on the lips or in the mouth, or on the private parts doesn't heal up, it is probably V. D. I've also heard that a person can have other signs of V. D.—like a burning sensation when urinating, or an unusual discharge from private parts, and these signs sometimes go away without treatment, but the disease is still there and keeps on getting worse. Is that true?
- 4. Can V. D. really cause crippling, blindness and insanity, or are these just stories adults made up to scare kids?
- 5. Is it true that once a person is treated for V. D. he can never get it again?
- 6. One last question which I hope you won't think is too dumb to answer. Can a person get V. D. without going all the way?

With questions like these, I can't have a letter from you coming to my house, so will you please answer this in the paper? I am sure there are lots of other kids who would like to know the answers. Thank you very much.

WORRIED IN ATLANTA

DEAR WORRIED:

- 1. If you want to know whether the physicians in your state are required by law to have parental consent before treating minors for V. D., telephone any doctor and ask him. Or telephone the Department of Public Health, or your County or State Medical Society.
- 2. The age of a minor differs from state to state. It differs also for particular purposes. And in some states, the age of a minor is not the same for a male as it is for a female. [Your local Legal Aid Society can tell who is considered a minor for specific purposes.]
- 3. All the symptoms you describe can indicate V. D.—but these symptoms can also be present where there is no V. D., so the only way to determine positively whether or not you have it is to be examined by a physician.
- 4. Yes. But the conditions you describe are found only in extremely advanced cases.
- 5. Absolutely not!
- 6. Positively yes!

And may I add, no question that is asked in sincerity is "too dumb" to answer. I urge any minor who suspects that he (or she) has V. D., and cannot face his parents with the problem, to telephone the Department of Public Health and ask to see a doctor. Don't be afraid. You won't be lectured and you won't be punished. And if you don't have the few dollars to cover the cost of the examination, it will be free. V. D. is curable, and the earlier it is treated, the better. If anyone has any questions related to this subject, write to me. I promise you a prompt, straight and confidential answer.

ABBY

What's your problem? You'll feel better if you get it off your chest. Write to ABBY, Box 63700, Los Angeles, Cal. 90069. For a personal reply enclose stamped, addressed envelope.

TWIN FALLS — Barbara Denise Messner, daughter of Mr. and Mrs. Eugene Messner, Twin Falls, became the bride of Charles E. Roberts, son of Rev. and Mrs. C. E. Roberts, Estacada, Ore., in a candlelight ceremony Sept. 14 at the First United Pentecostal Church, Twin Falls.

Rev. G. Wallace Vos performed the double ring ceremony, with prayer given by Rev. C. E. Roberts before a background of Candelabra with arrangements of coral gladioli and a large beauty basket of matching gladioli. The pews were marked with large green bows centered with coral flowers. Lighted pillar candles and greenery in front of the stained glass windows completed the church decoration.

The bride, escorted by her father, wore a traditional styled gown of Chantilly lace, fashioned with a jeweled neckline, fitted bodice, beaded with seed pearls, and long full sleeves with deep fitted cuffs. The full skirt featured a straight gathered front panel, deep ruffled tiers ending in a chapel train and accented at the back waist with a flat bow. Her elbow-length, three tiered veil of bridal illusion was held by a fitted crown of lace flowers beaded with seed pearls.

The gown and veil were designed and fashioned by her mother and her grandmother, Mrs. Weston Dennis. She carried a cascade of coral gladioli with moss-green velvet ribbon, and wore an heirloom necklace belonging to her aunt, the late Mrs. R. R. Merrell.

Beverly Messner, sister of the bride, was maid of honor. Bridesmaids were Sandra Roberts and Alfreda Roberts, sisters of the bridegroom. Candlelighters were Marla and Nathan Roberts.

Darl Messner, cousin of the bride, was best man. Groomsmen were Wallace Dennis uncle of the bride, and Everett Messner, cousin of the bride. Ushers were Benny Jones and Larry Perry.

Bethany Vos was flower girl and Kevan Vos carried the ring. Mrs. Everett Messner and Mr. and Mrs. Don Stansell were vocalists, accompanied by Mrs. G. Wallace Vos.

Kathy Vos was in charge of the guest book, with Sharon Messner distributing thank-you scrolls. A reception was held in the church basement after the ceremony. Gifts were carried by Linda Bowen, Geraldine Laughlin and Brenda Laughlin. Mrs. Harry Belton arranged the gifts assisted by Debba Gemmette, Penny Creekmore and Eva Creekmore.

Whitenylon chiffon formed a backdrop and canopy for the bride's table which was covered with white lace featuring a full, floor-length skirt of lace trimmed with garlands of

MR. AND MRS. CHARLES E. ROBERTS
(Shig Morita photo)

boxwood greenery and white pillar candles. The table was centered with the five-tiered wedding cake surrounded with four heart-shaped cakes. The cake was topped with white satin wedding bells and trimmed with coral flowers. The gift table was decorated with large hanging baskets of boxwood greenery and white chrysanthemums, and centered with an arrangement of candles, coral and white gladioli. Quartet tables for the guests were centered with white candles and candle rings of greenery.

The cake was served by Mrs. Dale Messner and Lorene Messner. Mrs. Warren Bowen presided at the punch bowl, with Mrs. Newell Stallone at the silver coffee service. Assistants were Mrs. Leroy Messner, Mrs. Dale Orr, Mrs. Lowell Gard and Mrs. Wallace Leonard. Background music for the reception was played by Mrs. Keith Johns.

After a wedding trip to Yellowstone National Park, the couple reside in Portland, Ore., where the bridegroom will complete his education at Conquerers Bible College.

The bride was honored by a lingerie shower given by Mrs. Warren Bowen and Mrs. Eddie Kimball.

The bride was honored by a lingerie shower given by Mrs. Warren Bowen and Mrs. Eddie Kimball.

Beauty Hint

HOLLYWOOD, Calif. — If you have been on a long, busy schedule, and your mirror is reflecting a worn, tired and drab looking you, the following "7 Day Beauty Schedule," suggested by beauty authority Max Factor, is sure to make a new woman of you.

Plan to get at least eight hours sleep every night. Then watch the lines, shadows and drawn, tired look begin to vanish. Plan to eat the most healthful foods possible. Every evening before retiring, luxuriate in a relaxing beauty bath filled with Swedish Formula Moisturizing Bath Oil.

1971 BMI awards open

NEW YORK, N. Y. — A total of \$15,000 is available to young composers in the 20th annual BMI Awards to Student Composers competition sponsored by Broadcast Music, Inc. (BMI), a performing rights licensing organization.

Established in 1951 by BMI in cooperation with music educators and composers, the BMI Awards project annually gives cash prizes to encourage the creation of concert music by student composers (under the age of 26) of the Western Hemisphere and to aid them in financing their musical education. Prizes ranging from \$250 to \$2,000 will be awarded at the discretion of the judges. To date, 163 students, ranging in age from 8 to 25, have received BMI Awards.

The 1971 BMI Awards competition is open to student composers who are citizens or permanent residents of the Western Hemisphere and are enrolled in accredited secondary schools, colleges and conservatories or are engaged in private study with recognized and established teachers. Entrants must be under 26 years of age on Dec. 31, 1971. No limitations are established as to instrumentation or length of manuscripts. Students may enter as many as two compositions, but no contestant may win more than one award.

The permanent chairman of the judging panel for BMI Awards to Student Composers is William Schuman, distinguished American Composer.

Others who served as judges in the 1970 competition were Sergio Cervetti, Chou Wen-chung, Edward T. Cone, George Crumb, Charles Dodge, James Drew, Karl Hampton Porter, John Sweeney, Lester Trimble, Frank Wigglesworth, Charles Wuorinen and James Yannatos.

The 1971 competition closes Feb. 15, 1972. Official rules and entry blanks are available from Oliver Daniel, director, BMI Awards to Student Composers, Broadcast Music, Inc., 589 Fifth Ave., New York, New York 10017.

Special

ABC will give an early 1972 air date to "The Enchanted World of Danny Kaye," an animated one-hour special in which the star will be host-narrator for a retelling of the classic Hans Christian Andersen story, "The Emperor's New Clothes."

Cultivation of pearls

The cultivation of cultured pearls is a long and arduous process. Small mother of pearl beads are inserted into the oysters which then are placed into wire-mesh cages and suspended from floating rafts into the water. After three

years of constant care — cleaning cages of plankton, moss, seaweed and barnacles — the oysters are taken out of their cages. Experts open them swiftly and remove the pearls. Only the better ones are retained for jewelry.

Article reviewed for TOPS

HANSEN — Mrs. V. L. Wilson was program chairman and hostess at the Slim and Trim TOPS Club meeting this week at the home of Mrs. Thomas Steelsmith. She gave a review of an article by Dr. Phillip White, from "Today's Health" magazine which exploded many myths concerning various types of diets and fad diets.

He stated the high protein diet is not new but was used a couple of centuries ago. He also stated that too much protein as well as not enough protein in diets can be injurious to one's health.

He stated a well-balanced diet containing all food factors, but cutting down on the portions consumed, is the best diet, and changing one's eating habits to incorporate the vital foods is the only way to lose weight.

She presented a game and then had members write penalties to be given to gainers.

Mrs. Paul Bowman served as leader in the absence of Mrs. George Golay, and Mrs. James Wright was acting secretary.

Mrs. Reed Lyons was best loser for the week.

The penalty march was given and gainers from last week reported on their penalties. New ones were given to gainers this week.

In the Slimmer Silhouettes contest, Mrs. Fred Howard's group removed another silhouette, giving them a slight lead over the other group led by Mrs. Roy Dopson.

The weight-losing contest between the Twin Falls Measure-ups and the local group will be started with next week's weights and will end Nov. 15.

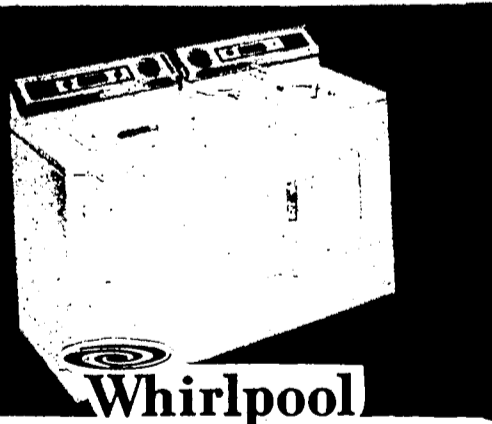

Mrs. Fred Nicholson, Stanley, was a visitor with her daughter, Mrs. Hazel Schutte.

Conquer Blues

18 queen candidates announced

Plans made for annual meet in Buhl

Valley Briefs

NEW YORK, N.Y. — Depression is one of mankind's most common diseases. So says an article, "How to Conquer the Blues," in the October issue of Family Circle magazine.

According to the article, everyone experiences some form of depression in his life. But, the article goes on, depression is not easily recognized, for its symptoms are very often disguised as other complaints.

In addition to the difficulty in diagnosing depression, there are many different types of depression. Among them:

The simple, down-in-the-dumps depression, experienced by everyone at one time or another. This type of depression does not last very long.

Reactive depression, usually caused by an external event, such as the death of a close one, the loss of a job, or a sudden change in one's social standing. This depression is the most common, accounting for approximately 80 per cent of the serious cases now in treatment.

Endogenous depression, the least common, can be triggered by an external event. Usually, it is an inherited genetic disease, transmitted from parent to child. It is probably of a biochemical nature, and can be treated by drugs, which brings the body chemistry back to normal.

The major problem, the Family Circle article states, is the fact that depression has a tendency to feed upon itself. One who is depressed becomes quite passive and inactive. As a result of this, he becomes more depressed, retreats, becomes more self-critical, and the cycle becomes more vicious.

MOSCOW (UPI) — A total of 18 coeds at the University of Idaho have been chosen by their living groups as candidates for 1971 Homecoming Queen, the university announced today.

This year's queen will be the first to reign in the new Vandal Stadium during homecoming Oct. 9 when Idaho meets Idaho State University in the first football game in the new stadium built to replace Old Neale Stadium which was condemned in 1969 and later burned by arsonists.

Candidates for homecoming queen this year include Kathleen M. Church, Boise; Shannon K. Flin, Boise; Cynthia M. Houck, Bonners Ferry; Peggy R. Dresser, Caldwell; Barbara J. Benner, Coeur d'Alene; Susan E. Crea, Fenn; Kathleen E. Riener, Grangeville; Lynn O. Macri, Kellogg; Kristine A. Frandsen, Lewiston; Beth L. Otto, Melba; Nancy L. Helbling, Moscow; Linda S. Bergman, Moscow; Virginia L. Shrt, Moyie Springs; Marilyn A. Campbell, New Meadows; Lois K. Zook, Osburn; Priscilla Rusdahl, Upland, Calif., and Denise D. Nesemeier, Casselton, N. D.

Finalists in the Homecoming queen contest will be announced this weekend with the final voting taking place Oct. 7 and crowning of the queen during the pre-game rally Oct. 8.

BUHL — Plans for the annual meeting of the Idaho Unit of the Good Shepherd Auxiliary Board were made during the auxiliary meeting this week at the home of Mrs. Del Butterfield, Twin Falls.

The annual meeting will be held at 1:30 p.m., Oct. 22, at St. John's Lutheran Church, Buhl. Mrs. B. Barton, a registered nurse at the Good Shepherd Home, Terra Bella, Calif., a home for the mentally retarded, will be the guest speaker.

Reports were given on the anniversary picnic attended by 150 persons during which a freewill offering donation of \$61 was made for the home. Over \$100 has been realized from the Good Shepherd Gift Shop located in the home of Mrs. Wayne Schroeder.

On Sept. 19, "Connie Day" was held at the Buhl church. A sale of handiwork, baked goods, toys and produce realized \$206 to be donated to the home for the care of Connie Adams, daughter of Mr. and Mrs. Virgil Adams, Buhl, the only Idaho resident of the home.

Mrs. Robert Adolph, Hagerman, reported on the business meeting at Terra Bella which she attended earlier in September. Plans for the new Good Shepherd home at Cornelius, Ore., are presently awaiting approval from the state of Oregon.

SHOSHONE — Wood River Center Grange will elect officers at 8:30 p.m. Oct. 9 at the next grange meeting. All members are urged to attend.

TWIN FALLS — The Magic Valley Hospital Auxiliary Guild will sew pinkies Friday at 9 a.m.

SHOSHONE — The Shoshone Episcopal Church Guild will hold its fall rummage sale at the Scout House in Shoshone from 9 a.m. to 4 p.m. Saturday.

TWIN FALLS — The I Do (ESP) Research Center, 519 Main Ave. W., meeting is open to the public from 7 to 8 p.m. Thursday.

FAIRFIELD — The Prairie Schooners Couple's Club held a progressive dinner for its September meeting. Juice was served at the home of Mr. and Mrs. Bruce Robbins; salad at the home of Mr. and Mrs. Donald Groff; a roast beef dinner at the home of Mr. and Mrs. Lonzo Baldwin, and dessert at the home of Rev. and Mrs. Dave Gaurnitz. Mrs. Bruce Robbins conducted games and a devotional lesson was given by Rev. Gaurnitz. A Halloween party is planned for October.

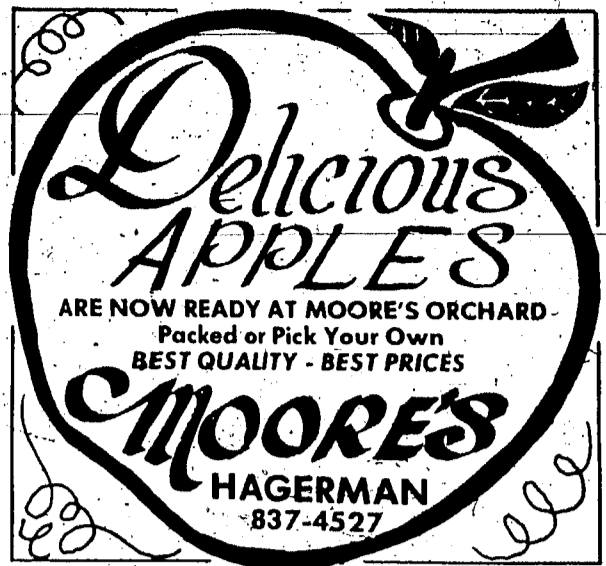

TWIN FALLS — Janice Cook and Lori Thompson, both Twin Falls, were among the 107 sorority pledges at Utah State University. Miss Cook pledged

Chi Omega and Miss Thompson, Kappa Delta.

TWIN FALLS — Royal Neighbor Lodge will meet at 8 p.m. Friday at the IOOF Hall.

GOODING — Melody Squares dance has been canceled for this week.

BURLEY — The Burley Music Club will hold its annual salad bar from 11 a.m. to 2 p.m. Friday at the Idaho Bank and Trust Conference Room. The public is invited. Proceeds will be used for the Music Club's camp scholarships. Mrs. Frank Bauman is chairman of the salad bar.

Rebekahs hear report

JEROME — Members of Syringa Rebekah Lodge No. 110, Jerome, met this week to hear Lois Jenkins, daughter of Mr. and Mrs. Harold Jenkins, report on her trip to the United Nations.

Members were reminded to meet at 8 p.m. Oct. 5 at the IOOF Hall to prepare for the program to be presented to the Order of Eastern Star.

Refreshments were served by Mrs. E.E. Adams and Mrs. Leroy Thompson.

A Lovelier You

YOUTH IS NOT AN AGE

By Mary Sue Miller

There really is no such thing as age any more. But being young and being teen are worlds apart. A woman past 30 sometimes does not grasp that fact. She becomes confused by teen fashions, fads and life styles. Then she is in danger of adopting them—to her detriment.

What a waste it is to join the teen kick. A woman rarely fulfills her loveliness potentials before reaching adult years. It requires a "heap o' livin'" to cultivate one's looks, talents and charm to a degree of excellence.

Besides, the secret of continuing youthfulness is making no age impression whatever. Teen gambits only call attention to the candles on a birthday cake. If you look at a woman and think—I wonder how old she is—her age is showing.

But if you think—my, she's attractive—she knows the score. She makes the most of her looks and talents in the magical ways now provided by modern medicine and technology. Thus she is willowy, smooth-skinned, distinctively coiffed and dressed, lively in her mind and manner. Young!

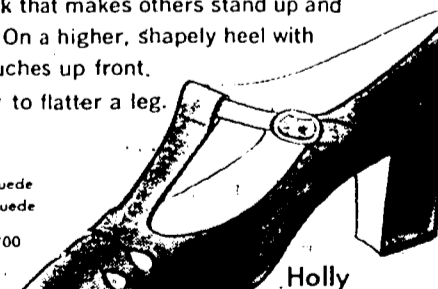

So think twice, Milady, before you join up with character part get-ups. You've got everything going for you. Your name is on this season's handsome, classic clothes and glowy makeup. Don't join 'em, lick 'em!

BEAUTY KNOWS NO AGE

Some women age before their time; some retain their youthful beauty and charm. Why? The secrets of non-stop attractiveness are revealed in BEAUTY KNOWS NO AGE. Advice covers ways to a youthful figure, skin and hair; to flattering makeup, hairstyles and fashions. For your copy write to Mary Sue Miller in care of this newspaper, enclosing a long, self-addressed, stamped envelope and 25 cents in coin.

Espionage an ancient profession

By PHIL NEWSOM,
UPI Foreign News Analyst

Even in this age of automation and electronics, the individual still plays a prominent role in the business of one nation spying upon another — so

prominent indeed that it takes a story like Britain's ouster of 105 Soviets at one fell swoop even to raise an eyebrow.

So recognized is the spy's role in international affairs that no one even gets very indignant about it.

For example, last April Richard Helms, director of the Central Intelligence Agency, told newspaper editors meeting in Washington of the "major and vital" role U.S. intelligence would have to play in any agreement reached in the U.S.-Soviet SALT talks on limitation of strategic weapons.

He said the United States could undertake such an accord "only if it has adequate

intelligence to assure itself that the Soviets are living up to their part."

So far as is known the Russians made no protest to this slur upon their gentlemanly conduct.

The British case involved a certain amount of usual British sportsmanship. The Soviets' mushrooming spy activities in Britain were said to have been known also to the Labor government of Prime Minister Harold Wilson which preceded the present Conservative government under Edward Heath.

The British had suggested to the Russians in a quiet way

several times that they should cut back on their spying and Heath apparently acted only after the Russians seemed to indicate spying was among their international privileges.

It was a large figure, as a matter of fact, comprising approximately 20 per cent of all the Russians in Britain, diplomatic, business, tourist, or what have you. On an international scale, it almost took the spy business out of the individual category and placed it in mass production.

So well established is the spy business, that Russian indignation over the British action must be taken simply as part of the act.

In 1970 the Soviets awarded a military medal and the Order of Lenin upon George Blake, a double agent who escaped in 1968 from Britain's Wormwood Scrubs prison. The awards cited his "selfless activity."

Electronic spying is so commonplace as to be taken for granted.

For example, electronic devices litter the ocean floors reporting the passage of potential enemy submarines. American and Soviet spy-in-the-sky satellites regularly photograph each others' and Red China's military and nuclear installations.

Russian trawlers report on the U.S. Apollo space program.

Despite the almost open nature of international spying, it is rare that a real international incident develops.

One such came in the U-2 incident of 1960 when the Soviets shot down the spy plane piloted by Francis Gary Powers. It broke up a Big Four summit meeting in Paris and prevented a visit by President Eisenhower to the Soviet Union.

President Nixon's administration is taking no chances that a similar incident might prevent his own scheduled visit to Red China.

The United States has let it be known that flights by U.S. drone spy planes over China have been halted.

A Check List Of A Total Discount Food Store!

Does Your Food Store Qualify?

Simply stated, a Discount Store is one which gets the business of selling food down to brass tacks. All frills, such as trading stamps and long store hours, are eliminated. Costs of operating the store are reduced in every way possible. All savings which result from doing these things are reflected in the prices of the food sold. This permits lower prices on each and every item. These low prices are maintained every day. Prices are as low on Monday as they are on Saturday, so you can decide on the day you want to shop. And you save on every shopping trip!

*Except government controlled and fair trade items

- ✓ **NO STAMPS**
Don't look for trading stamps, free prizes, contests, etc. Without them, we can offer lower food prices.
- ✓ **SENSIBLE STORE HOURS**
Long store hours can add greatly to the cost of doing business. By maintaining reasonable hours, we can sell food for less.
- ✓ **LESS PRODUCT HANDLING**
It costs money to stack up merchandise and re-mark prices for week-end sales. Also to remove and re-mark when the sale is ended. Our low prices are in effect every day. Price changes occur only when costs change.
- ✓ **ALL OF THE ESSENTIALS - NONE OF THE FRILLS**
We've cut out costly and unnecessary activities to cut your cost for food!

Prison riot laid to 2 key causes

WASHINGTON (UPI)—Nineteen years ago, an untrained prison guard in Michigan made a mistake and a professional warden in New Jersey tried to correct some errors of the past. Riots erupted at both penitentiaries. The uprisings at Jackson, Mich., and Trenton, N.J., in the spring of 1952 were the first in a series of riots that rocked 25 prisons across the country in two years. It was the worst

wave of prison violence up to then, but all of those outbreaks lumped together were not as bloody as the blowup at Attica, N.Y., this month. It may be some time before exactly what happened at Attica Sept. 9-13 is revealed. The facts may point toward someone to be blamed for the revolt and the death of more than 40 hostages and inmates. But they are not likely to give any blinding new insights into the reasons for prison riots. The four-day Jackson uprising in 1952 began when a rookie guard let a knife-wielding prisoner out of his cell. There were three riots within three weeks at Trenton when a new warden attempted to tighten discipline that had gone so

slack under his predecessor, a former liquor dealer with political connections, that inmates were operating a jewelry business inside the walls. Prison professionals learned something from Jackson and Trenton and the riots that followed, but uprisings continued, always seeming to catch wardens and guards by surprise and shocking the public. The experts say a smart prison management can tell when the conditions for a riot are building up, but can't predict what might set one off. Overcrowding in antiquated, run-down facilities is often given as a prime cause of prison riots. Jackson, the world's largest walled prison, held 6,500 men in space designed for 5,500, but Attica's 2,250 population was 120 under capacity. 'New York City's Tombs, a jail described by a congressman as "a decrepit dungeon, 200 percent above capacity with three men jammed into tiny cells," was wracked by revolt last year. But so was Utah State Prison in 1957 when it was only six years old. The Trenton prison was 146 years old when it had its riots; Attica was just over 40. Riots occur at prisons where the treatment is brutal, but also where it is relatively humane. There have been revolts over bad food, but many prisons spend a dollar-a-day or less to feed inmates and have no violence. The American

Correctional Association, in a report on prison disturbances published a year ago, says riots are "too complex and varied to be attributed to any one cause or group of causes." Still, the association study said, there were two recognized "basic general causes... the unnatural nature of the environment in a correctional institution and the antisocial characteristics of inmates." The environment in a prison can range from conditions so brutal that inmates are driven to mutilate themselves, as happened in 1951 when 30 men at Louisiana's Angola prison cut their own achilles tendons, to their "ordinary" routines of management. Attica, for example, decreed punishment for an inmate caught whispering a request to another man for a match after the 7:30 p.m. "all quiet." What kind of people are in prisons? Dr. Karl Menninger, the psychiatrist and prison reform advocate, described them this way in a 1959 magazine article: "It is not the successful criminal upon whom we inflict our antiquated penal system."

Reorganization plan postponed

BOISE (UPI)—Overriding the wishes of Chairman Fred Humphreys, Boise, the State Board of Health voted 2-1 Wednesday to postpone any decision on a Health Department reorganization plan until gathering more information.

The decision came only after Humphreys and Dr. Merrill Sharp, board member from Pocatello, disputed over whether to accept the original proposal which came under fire during a morning public hearing.

Mrs. Sally Donart, Weiser, secretary of the Mental Health Advisory Council, said she was concerned the plan to combine the present eight divisions and five sections into three main divisions was a "mechanistic reshuffling" rather than a complete reorganization.

Sharp asked that before the plan be adopted the board contact its various advisory councils and district health boards for comment.

"We're asking for a positive suggestion from them... not criticism of what somebody has already decided."

Sharp objected to adopting the plan despite criticism voiced at the morning hearing and from responses received by mail.

"We've solicited opinions," he said. "Now, are we going to do something about those opinions or are we just going to go ahead with the plan?"

"What do we do?" Humphreys asked. "Do you give everybody a do-it-yourself organization chart?"

Dr. John Van Orman, Jerome, first moved that the board accept the plan, but his motion died for lack of a second. Sharp then moved to ask for more recommendations, and he and Dr. Lester Petersen, Rexburg, voted for the motion while Van Orman voted against it.

Earlier in the day, Sen. Mike Mitchell, D-Lewiston, told the board reorganization "is going to take more than merely moving people around, changing titles, or painting new names on old office doors."

Instead of a reorganization,

he said, the plan may be "an attempt to take the heat off the board and the department, hopefully to win back some legislative support that has been lost by this department."

He said his criticism stemmed from the fact that there was little detail accompanying the reorganization plan.

Mitchell warned that if the health board does not take more "drastic steps" he will introduce legislation to remove youth rehabilitation and the Idaho State School and Hospital from the board's supervision.

He also said he had discussed with Gov. Cecil D. Andrus the possibility of an executive order to move mental retardation and child development into public assistance.

Mrs. Donart criticized placing all non-administrative and non-environmental services into one division, that of personal health services.

She suggested instead combining mental health, mental retardation-child development and youth rehabilitation into one unit.

Engineer assails C5A purchasing

WASHINGTON (UPI)—Henry M. Durham, former employee No. 526 798, confronted a corporate vice president with a \$66 bolt Wednesday and accused Lockheed of massive waste and mismanagement of the C5A cargo plane contract.

Durham, who said he quit his job in disgust as a production engineer at Lockheed-Georgia's C5A plant in Marietta, Ga., told a congressional committee that 42½ tons of valuable steel were left to rust and corrode on outdoor racks, needless expenses were incurred by purchase of hardware at "exorbitant" prices and "thousands of thousands of parts and assemblies were misplaced and left out of the planes."

The C5A program has exceeded its original cost estimates by \$2 billion. The Air Force jet transport is the world's largest aircraft.

Durham said he tried to correct the situation but "I was told to shut up."

Lockheed-Georgia Executive Vice President H. Lee Poore defended his company.

"We are only people," he said. "... and as other people in other endeavors, we are not perfect."

Poore contended that despite the problems with the plane's escalating costs, the T5A is working and is regarded as "a great bird" by the pilots who fly it, and a "dream to service" by the mechanics who work on it.

Durham, however, contended that the assembly of the planes was "chaos."

Aircraft would arrive at the flight line as "a virtual shell, missing thousands and thousands of parts and assemblies," he said, and Lockheed was unable to determine which parts were missing because installation papers had been deliberately falsified.

Snow clouds sweep low over Bellevue

Snow blankets Blaine region

KETCHUM — Snow was falling today in the high regions of Magic Valley, including Ketchum where personnel at the ranger station reported six inches of snow on Bald Mountain.

At Ketchum there was three inches of snow on the ground. At Galena Lodge north of Ketchum there was two and a half inches, with three to four inches at Galena Summit.

At Fairfield, where snow fell Wednesday, but melted by evening, snow was still falling this morning and a covering of two inches was reported on the floor of Camas Prairie.

At Hailey, Blaine County Sheriff Orville Drexler reported one snow-related accident this

morning.

He said Louise Rathke, Hailey, was traveling north on U. S. Highway 93 south of Ketchum when her car skidded into the south-bound lane, skidded back into the north-bound lane and went off the highway, tearing out about 30 feet of a pole fence at the Chalet Trailer Court. The woman was not injured. Officers estimated damage to the car at \$350.

Freezing readings hit valley

KIMBERLY — The United States Weather Bureau Agricultural office reported today that all points in Magic Valley have received freezing or below temperatures this month.

Fairfield, which received a trace of snow Wednesday morning and about an inch at Soldier Mountain Ski Area just north of Fairfield, reported a 32 degree or lower temperature on Sept. 4.

Other points around the valley receiving freezing or below temperatures were Castleford on Sept. 16; Twin Falls, Rupert, Jerome, Buhl and Gooding on Sept. 18; Kimberly, Sept. 19 and Burley, Sept. 22.

Speaker selected

MCCALL (UPI) — Mrs. Florence Steiner, director of instruction and developmental services, Glenbrook (Ill.) high schools, will highlight the Idaho foreign language teachers fall convention Oct. 7-8.

Mrs. Steiner, a leading advocate of individualized foreign language instruction, will conduct a workshop on classroom methods that allow students to progress at their own rates of learning.

Jerome plant rite set

JEROME — Groundbreaking ceremonies for the new Tupperware plant south of Jerome will be at 10 a.m. Oct. 13, according to Al Mencher, Chamber of Commerce director in charge of the ceremonies.

A meeting will be held at Wood Cafe at 9:30 a.m. the day of the ceremony and those at the meeting will then go to the construction site, Mencher said.

Among those who will attend are John Ainsley, president of Tupperware International; Jim Hagen, vice president in charge of industrial relations, and Robert A. Bussiere, who will be plant manager in Jerome. Rep. Orval Hansen and other members of Idaho's congressional delegation also are expected to attend.

City well bid call by Buhl

BUHL — The City of Buhl has issued a call for bids for drilling, casing and test pumping a municipal water supply well, according to city clerk, Peggy McArthur.

Bids will be received by the city council until 8 p.m. Nov. 2 at which time they will be publicly opened and read.

Detailed description of the work and requirements are given in the specifications, instructions to bidders and other contract documents covering the work. Copies may be obtained by interested bidders from the city clerk upon deposit of \$10.

Bids may be delivered in person or by mail but no bids will be allowed to be withdrawn for 30 days after the scheduled closing time for the receipt of bids.

Autumn schedule adopted

KETCHUM — The Ketchum Library will be open to the general public 34 hours per week as the library shifts to its fall and winter schedule Friday.

The new hours are Tuesday, Thursday and Friday, 11 a.m. to 1 p.m., 3 to 8 p.m.; Wednesday and Saturday, 1 to 6 p.m.; closed Sunday, Monday and holidays.

Hemingway school children will continue to visit the library each Wednesday morning.

In keeping with Cong. Orva Hanser's recent Sun Valley trail seminar, the librarian, Mrs. Daniel Hart, has compiled a list of books of interest to local hikers. The list includes: "The Complete Walker—The Joys and Techniques of Hiking and Backpacking," Fletcher; "Backcountry Camping," Riviere; "The Complete Book of Camping," Miracle; "Introduction to Backpacking," Colwell; "The Complete Book of Outdoor Lore," Ormond and several other books on mountains and mountain climbing.

Bus buying notes OK'd

RUPERT — The Minidoka School District No. 331 Board of Trustees Wednesday approved tax anticipation notes amounting to \$30,000 to help finance the purchase of four new school buses for the district.

The action came at a one-hour breakfast meeting at the Ramada Inn in Burley.

The district's plant facilities are not expected until the beginning of the next calendar year, Dr. Darrell J. Hatfield, superintendent of schools, said today, necessitating the board's action to provide the capital funds for the new buses.

In other action at the meeting, trustees approved in principle the establishment of a night educational program. Under discussion at the present time,

Hatfield said, are sewing, typing, shorthand and welding classes for interested district residents. Official notice of the classes, now in their planning stages, will be made in the near future.

The trustees also continued their discussions of the proposed kindergarten program for the district.

The next regularly scheduled meeting of the school board, originally set for Oct. 11 has been rescheduled for Oct. 18 to compensate for the annual harvest school vacation and to allow Dr. Hatfield and other officials to visit a symposium to be held in Texas on the subject of special problems surrounding the education of children of migrant workers.

Minico sets poll for tot classes

RUPERT — A poll underway among parents of kindergarten-eligible students in School District 331 will soon disclose the fate of a proposed kindergarten program for the district.

Dr. Darrell J. Hatfield, district superintendent of schools, Wednesday called upon all parents to indicate whether they would be willing to provide one trip to or from school each day for their children, with the district providing the other trip.

Noting that federal funds are available to pay salaries of three kindergarten teachers and that other money anticipated to cover the costs of furniture and study materials, Hatfield said the unexpected cost of transporting the five-year olds could run as high as \$3500-\$5000 a year.

"A possible solution," Hatfield said, "is to have the regular elementary buses pick up the kindergarten students in the morning and have parents pick them up at noon and have

second session parents bring students in by 1 p.m. and we'll deliver them home on the elementary bus in the afternoon."

He urged parents to inform the principal at the nearest elementary school whether such an arrangement would be satisfactory to them, and whether they would be interested in kindergarten classes in general.

At present, Hatfield said, one qualified kindergarten teacher has been found, with the search for as many as two more continuing. Each of the teachers could hold classes for two sessions per day, enough to accommodate up to 120 kindergarten students.

Hatfield estimated the number of district children eligible for the program at "about 360," an estimate based on the district first grade enrollment for the current year, he said. Children reaching their fifth birthday by Oct. 16, are eligible for the program.

Court to hear 3 cases today

TWIN FALLS — Three appeals were scheduled to be heard in Twin Falls today by the Idaho Supreme Court in the final day of its current session here.

Justices of the high court met here Monday for a schedule including 15 appeals on cases heard in Fifth Judicial District courts.

On the schedule today were the case of Leo Weber, plaintiff respondent versus the Eastern Packing Corp., Heyburn. The packing firm and Anderson-Martin Farms, Burley, appealed the decision of District Judge Sherman J. Bellwood in foreclosing mechanic's liens on farm land owned by the appellants in Cassia County. The litigation arose from rock work done by Leo Weber, Heyburn, and W. H. Croft, Paul, on the property and a dispute over the contracted price for the work.

Another case scheduled today involves the appeal of John F.

Chisholm and C. M. Manning versus J. R. Simplot Co., Simplot Soilbuilders and I. E. Dupont DeNemours and Co. The case was also heard by Judge Bellwood, and involved to a potato field from the use of weed killer. A jury deliberated 13 hours without reaching a verdict and the trial judge granted a defendant's motion for judgment. Chisholm and Manning appealed on grounds there were questions of fact which should have been decided by the jury.

The third case on today's schedule involved an appeal from Harold Patterson versus Twin Falls County as a result of his damage suit in which he alleged he suffered permanent damage as a result of dye injected into his spinal column during examinations at Magic Valley Memorial Hospital. The case was heard by Judge Theron W. Ward, who granted a motion for dismissal.

Cottages planned at Nampa

BOISE (UPI) — The State Board of Health set as its top building priority Wednesday construction of 10 new resident living cottages at Idaho State School and Hospital.

The decision on building priorities came after members overrode the wishes of Chairman Fred Humphreys, Boise, and voted 2-1 to delay approval of a reorganization plan.

Items not on the priority list included more work at the state school and hospital, replacement of sewer and water lines at State Hospital South in Blackfoot, and construction of three satellite centers in Rexburg, Kamiah and Burley-Rupert.

The Health Department's requests for fiscal year 1973 from the permanent building fund have already been turned over to the permanent building fund advisory council.

But, following recommendations made by state health administrator Dr. Terrell O. Caver, the board set its own priority for expenditures.

Included as top priority of the \$1.3 million worth of requests were the new cottages for the Nampa institution, estimated to cost \$340,200.

The other four priorities, in order, were remodeling for a mental health facility at the new penitentiary, \$79,842; construction of a detention and diagnostic center for youth rehabilitation, \$450,000; construction of a regional laboratory building at Idaho Falls, \$85,000; and construction of an addition to the health - agriculture building, \$690,630.

Carver told the board he preferred to wait until already authorized centers are operating before approving new construction.

Idaho work rate slows in August

BOISE — Though employment in Idaho rose slightly in August, keeping unbroken the month-to-month string of higher employment, the increase slackened sharply while unemployment continued at a considerably higher figure this year than during the summer of 1970.

The monthly survey by the Idaho Department of Employment listed a 5.7 per cent unemployment rate for August, down three-tenths of one per cent over the July figure of 6 per cent.

The drop was brought about by an increase of 500 in working people, coupled with a decrease of 1,100 in unemployment.

However, the dark side of the picture showed an increase in jobless throughout Idaho in August of one per cent above the 4. per cent figure in August, 1970. This was the greatest discrepancy for any month in 1971, as compared with the

same month in 1970, the survey indicated.

The July-to-August increase of 500 workers was virtually a standstill, when compared to the average increase over the past 11 years of 2,400 new jobs between the two summer months. This increase, in fact, set a new record, as the lowest July-to-August increase previously had been 700.

Two major factors kept employment lower than expected in August. The combination of a sizeable drop in agricultural employment and a slower expansion by food processors kept the increase down.

Agricultural employment dropped by 2,200 workers below July with the completion of most hand-labor work by midsummer. Nonagricultural jobs increased by 2,700 workers over July, bringing the net increase of 500 workers.

Board takes realistic look at regional plan

JEROME — George Forschler, president of the Interim-Regional Airport Board of Trustees, said Wednesday the board wants to take a realistic and an honest look into the regional airport.

In a speech at the Jerome Chamber of Commerce, Forschler said the board will go in the front door and not the back to see if a regional airport is needed. He said the board must decide how it is going to go about it and what it is going to do.

He said the voters will make the decision when they go to the polls on Oct. 26.

He emphasized his group is operating in the best interests of the public and efforts are being made to answer all questions posed about the airport.

The major questions have been submitted to the Idaho Attorney General's office, he said. Forschler said they would ask that the Oct. 26 elections be postponed if the answers to these questions had not been obtained by that time.

State Rep. Earl Greenawalt, R-Jerome, asked if the airport site is firmly set. Forschler said

he has been informed in an opinion issued by the Idaho Attorney General's office that the board would have the power to select an alternate site if the Federal Aviation Administration does not approve the present location.

Forschler also was asked if three adjoining counties approved the authority if the assessment to these counties would be one mill. He said results of the Oct. 26 election could indicate financial support of a regional airport is unfeasible if enough counties do not join.

He said as far as his board is concerned, the authority would be created, but for practical reasons would not be functional in such a situation.

He also said he would presume there might not be a levy at all. However, Forschler said the opinion of the interim board might not be binding on members of the permanent board who would be elected at a later date.

Criticism of the one mill levy which could be imposed was made by Greenawalt, who indicated there would be nothing

to prevent the imposition of the levy year after year.

Forschler said Twin Falls County has "X" number of dollars which it is being assessed now. He said taxpayers are being assessed by both the city and county of Twin Falls, for the Twin Falls City-County Airport. He said many people in Twin Falls are not aware of this. He said his board is going to find how much Twin Falls taxpayers are being assessed now and "tell the people the truth."

But, Forschler said, for us to say right now "you pay 'X' number of mills for the Twin Falls Airport and now we want you to come into the regional airport and add that onto what you are already paying — well, who am I to do that," Forschler said, "any more than anyone on the board. There must be an answer for it and it is our job and our policy all along that there is a need for an airport like Twin Falls."

Forschler said an alternate airport is needed for the use of spray planes and a "million and one other things." We have never said that the Twin Falls airport is not needed, he said.

Talks on airport

GEORGE FORSCHLER, left, Burley, president of the Interim-Regional Airport board of trustees, and James Keith, Jerome Chamber of Commerce president, compare data at the Wednesday luncheon meeting of the Jerome chamber at Wood Cafe.

Air pollution index 44

The pollution reading was taken by the staff of the South Central Health District at the Twin Falls City Hall. The reading is expressed as the number of micrograms of particulate material per cubic meter of air for the 24 hour period.

Federal pollution regulators say pollution levels should be kept below 75 micrograms over any 24 hour period, and should not be permitted to rise above 700 micrograms for even a short period of time.

This forecast provided by the Idaho Department of Health indicates the ability of the atmosphere to disperse

pollution. Burning as permitted by law should be curtailed when the air is poorly able to disperse air pollutants.

Attend meeting

SWEDISH visitor at the annual Simplot sales seminar in Idaho, Eric Holmquist, left, visits with Hugo DalSoglio, Burley, vice president and Burley area manager for J.R. Simplot Co.

Cassia Red Cross committees named

BURLEY — The Cassia County Red Cross Chapter held its regular meeting Tuesday at Ponderosa Inn. Three new board members introduced were Rev. George Trobough, Jerry Voss and William Wetzstein.

Palmer Saterstrom, chapter chairman, announced committee for the coming year. Service to military families, Mrs. Jean King, chairman; Mrs. Sheila Hubschmidt and Rev. Earl Hunter assistants; blood program, Mrs. Linda Halouska, chairman; disaster control, Rev. Trobough, chairman, and water safety, Jack Keen, chairman.

Civil defense, Lyman Martindale, chairman; fund drive, Mrs. Ruth Terhune, chairman, Mrs. Fae L. Stoddard, assistant; first aid and safety, Jerry Voss, chairman; publicity, Mrs. Georgia Layton and Mrs. LaRue Cheney; public health nurse, Mrs. Mildred Nielson.

Board members include Mrs. Carleen Clayville, Declo; Mrs. Helen Coffey, Jack Holland, Sr., Mrs. Dorothy Künau, and William Wetzstein, all Burley; Jim Chatburn, Albion; Dale Pierce, Malta, and Farnum Warr, Murtaugh. George Forschler, immediate past chairman, is advisor to the board.

Special guest during the meeting was Jesse V. Haws, Pocatello, area field representative.

Other officers serving with Saterstrom are William McGill, treasurer, and Mrs. Joyce Rucker, secretary.

The Red Cross fund drive for Cassia County has been set for Oct. 24 through Oct. 30. A meeting for captains of the fund drive will be at 2 p.m. Monday in the conference room of the Idaho Bank and Trust Co. All volunteer workers are urged to attend, announced Mrs. Terhune, fund drive chairman. Fund drive packets will be given out at the volunteer workers meeting, according to Mrs. Terhune.

In other business the chapter discussed the home nursing courses. Mrs. Nielson reported instructors need to be trained

every two years, so they may teach classes.

Keen reported water safety pamphlets have been given out all summer. When a person purchases a boat and licenses it, a booklet on boating safety is given at the assessors office. He also reported that after the eight persons drowned at the Oakley Dam this summer the county commissioners purchased a boat for the sheriff's office to use in water rescue and safety.

Rev. Hunter related working with military families in need of help, and Mrs. King also reported serving military families.

Haws told the chapter members that the group is operating better than most chapters in the area. He also reminded the chapter that one of its main duties was to serve as communications link for military families.

He also will meet with the various committee chairmen Tuesday when he is in the area.

The presidency of the United States was the first and only public office ever held by Zachary Taylor, who had been a soldier for 40 years.

Mini-Cassia

Winners at Burley announced

BURLEY — Master Point Special Event was held Tuesday by the Burley Duplicate Bridge Club at Elks Lodge hall with nine tables in play.

North-south winners were Mr. and Mrs. Gail Wolf, first; Mrs. Margaret Hogg and Mrs. Ellen Saunders, second; Mrs. Gladys Feldhusen, and Mrs. Polly Procter, third; Mrs. Val Gierisch, and Mrs. Nanette Woodland, fourth.

East-west winners included Mr. and Mrs. Rex Wood, first; Mr. and Mrs. Bill Goodman, second; Mr. and Mrs. L. C. Hunter, third; Mrs. Clair Holmes and Mrs. Neta Whitesides, fourth.

Overall winners were Mr. and Mrs. Gail Wolf, first; Mrs. Margaret Hogg and Mrs. Ellen Saunders, second; Mr. and Mrs. Rex Wood third; Mr. and Mrs. Bill Goodman, fourth; and Mr. and Mrs. L. C. Hunter, fifth.

Hansen to be in Rupert

RUPERT — Rep. Orval Hansen, R-Idaho, will visit here on Friday, with two stops planned.

The Congressman will be at the Minidoka County Court House from 10:30 until 11:30 a.m., then will spread to American government classes at Minico High School at 1:30 p.m.

MINIDOKA COUNTY Clerk's Office
Marriage licenses were issued to Rymfido Monroy and Isabel Prieto, both Minidoka; Juan Pinto and Maria Ambroela Berneder, both Hazelton; Robert Alfred May, Heyburn and Sheryl Crane, Hazelton; Steve Otto Maier and Vicki Lynn Reed, both Rupert; James Dave Trujillo and Gerrildine Belinda Herrera, both Rupert, and Rodney C. Smith, Paul and Sheryl Lynn Nielson, Rupert.

Simplot sales meet starts in Gem State

BURLEY — About 60 brokers and distributors from 24 states and one foreign country are attending the 12th annual Simplot Sales Seminar, Tuesday through Friday in Idaho.

Eric Holmquist, Fjalkimge, Sweden, is representing the one foreign country this year.

The four-day event began Tuesday evening with a welcome to Idaho dinner at the Ponderosa Inn at Burley.

Bob Haney gave the welcome and served as master of ceremonies.

Jack Simplot, president of the J. R. Simplot Co., spoke briefly telling the brokers and distributors that the Simplot business was started in 1939 and has come along ways to the present organization. "You are the people that push the product, we are here to help you help yourselves. In turn you help us stay in business,"

Simplot said.

R. Starr Farish, sales Department, told the group "you are in the home of the Idaho potato. In the next few days you will have product knowledge, take part in discussions, have class work and take tours," Farish said.

Don Robertson, field manager, narrated a slide presentation, dealing with the potato from the time the seed is planted, growing season, harvest, and the finished product. Also included was research presently going on to make the potato better.

LeMonte Herbold, quality production, discussed potato blending for size and quality. Fred Jens, Heyburn plant manager, outlined plans for touring the Heyburn plant and the Burley processing plant. Jens urged the brokers and distributors to ask questions at

any time during the tour of the two plants.

Wednesday morning the group toured the new secondary treatment plant which was dedicated and put into operation Tuesday afternoon.

The group traveled by charter buses to Buhl Wednesday where they toured the Snake River Trout Farm and had lunch there.

In the afternoon they took a field trip through potato growing area between Buhl and Caldwell.

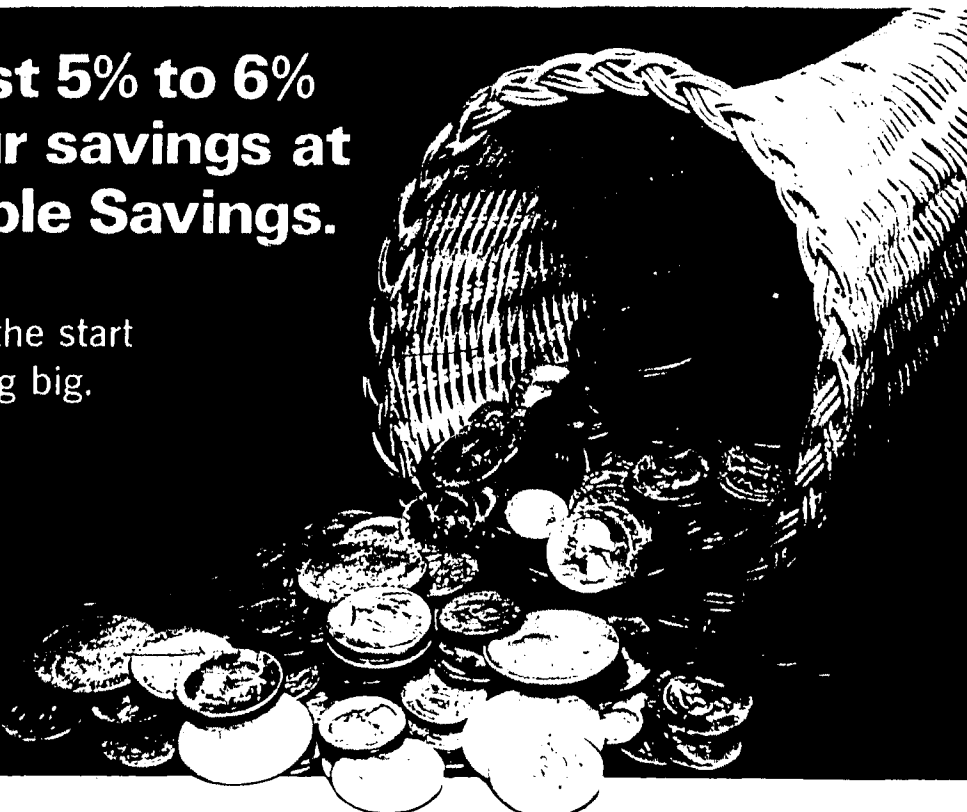

Dinner was served in Caldwell and Thursday they toured the Caldwell plants.

Also scheduled for today was an ecology program.

Class sessions are planned for Friday. Buzz sessions and dinner at the Rodeway Inn, Boise, also will be held and Simplot was to speak to the group.

Harvest 5% to 6% on your savings at Equitable Savings.

It could be the start of something big.

When it comes to making your money grow, Equitable Savings has a very green thumb.

Equitable offers savings accounts that provide high earnings—5% to 6%—and are insured for safety up to \$20,000 by the Federal Savings & Loan Insurance Corporation.

Savings accounts like the Equitable 2-Year Savings Certificates that pay a big 6%* on a \$1,000 minimum deposit.

Or the 5 1/2%* Lifeguard Savings Plan with life or accidental death protection.

And the 5%* Open Passbook Account which combines high earnings with the convenience of a regular savings account.

Current annual rates at maturity, compounded quarterly.

See an Equitable Savings Officer for sound advice on the right savings account for your needs. It could be the start of something big for you.

Blaine tract only tiny bit of state land near resort

By RICHARD CHARNOCK
BOISE (UPI) — That controversial 620-acre tract of state land near Sun Valley is only a fraction of the state-owned acreage within a 12-mile radius of the resort.

Land Department maps show there are 7,240 other acres of state holdings in the general Sun Valley - Ketchum - Hailey-Bellevue area, including seven full and unbroken sections of public school endowment lands.

missioner for land, minerals and grazing, said most of the other land is "not valley floor stuff." But he said there is "no question" much of it has definite potential and value for recreation and resort purposes.

and ordered both an outside appraisal and an environmental study of the land. But Samson said the board has given his department no direction on the rest of it — that his field personnel are "just taking it as we come to it" in routine inventory and reclassification prior to lease renewal.

From the standpoint of its proximity to the resort itself and the planned complex of resorts on the drawing boards of the Sun Valley Company-Johns Manville joint venture it is the choicest piece of ground.

Yet, he said, in response to a question, the Land Board has given the department no instructions regarding eventual disposition of this land — most of which primarily is leased for grazing.

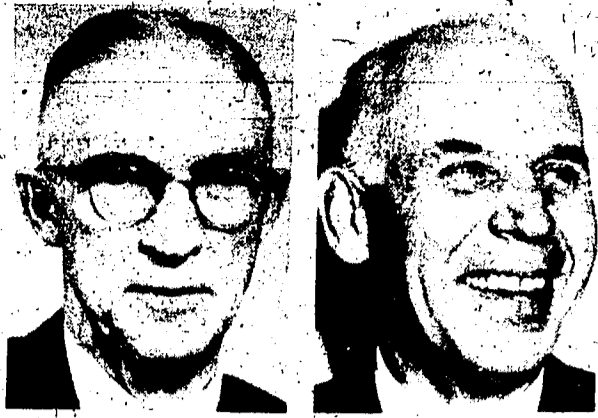

"If we should get increased appropriations," Samson said, "we'll do more of it in blocks so we won't have to run out there each time a piece of it comes up for renewal."

This all may not be as potentially valuable as the land Sun Valley and Johns - Manville want to buy for their projected Elkhorn Valley Village. But a highest and best use study might be interesting — especially to those charged with deriving the most from the acreage or the school endowment funds.

Ralph Samson, Assistant Commissioner for land, minerals and grazing, said most of the other land is "not valley floor stuff." But he said there is "no question" much of it has definite potential and value for recreation and resort purposes.

Board members Monday reconsidered temporarily their plans to sell the controversial acreage adjacent to Sun Valley

In the townships bordering the road between Hailey and Ketchum, state maps show there are five full sections and

RALPH CALDWELL

R. E. NEYMAN

Caldwell ends utility service

HAGERMAN — Idaho Power Co. announced Wednesday that Ralph Caldwell, superintendent of its Upper Salmon plants, is retiring after 40 years service.

He will be succeeded by R. E. Neyman, now assistant superintendent of the 39,000-kilowatt development near here.

The change is effective immediately, according to T. R. Heikes, Superintendent of power.

A retirement party honoring Caldwell was scheduled today, at the Hagerman Methodist Church. Company associates and friends were invited to attend.

"Mr. Caldwell's retirement concludes a distinguished career devoted entirely to efficient maintenance and operation of Idaho Power generating plants," Heikes said.

Neyman, he continued, "likewise has spent all of his many years with the company in plant maintenance and operation, and the excellent

record of dependable service set by the Upper Salmon development can be expected to continue under his supervision."

Neyman, a veteran of 30 years of service with Idaho Power, began his career as a laborer at the now-retired Horsehoe Bend plant.

He later was an operator at Horsehoe Bend and Lower Salmon before being promoted to chief operator at Upper Salmon in 1956.

A year later, Neyman became superintendent at the utility's Shoshone Falls plant, where he remained until returning to Upper Salmon as Caldwell's assistant in 1970.

Caldwell also joined Idaho Power as a laborer, being assigned to the Swan Falls plant.

He advanced to the position of operator at Swan Falls and then served in the same capacity at Twin Falls and Upper Salmon.

Promoted to superintendent of the Twin Falls plant in 1940, Caldwell subsequently directed operations at Thousand Springs and Bliss.

He became superintendent of the Upper Salmon development in 1956.

The development consists of the "A" plant, with a capacity of 20,000 kilowatts, and the "B" plant, capable of producing 19,000 kilowatts.

Upper Salmon "A" was built in 1937, while the "B" plant was added to the development 10 years later under a post-World War II construction program that completed six new hydro projects nearly quadrupling Idaho Power's generating capacity.

Awards set

STOCKHOLM (UPI) — The Nobel foundation said Wednesday that the 1971 Nobel prizes will be announced in October and November.

The prizes this year will be worth 450,000 kronor (\$87,300) each which is 50,000 kronor more than last year.

The award schedule: Medicine or physiology, Oct. 14; economic science, Oct. 15; peace prize, Oct. 20; literature, Oct. 21; and physics and chemistry, Nov. 2.

August construction figures up

NEW YORK — New construction contracts throughout the nation posted another gain in August, the F. W. Dodge Division of McGraw-Hill Information Systems Co. said today.

A total of \$7.71 billion in contracts for future construction in August raised the seasonally-adjusted Dodge Index to 153 from July's 151. The level achieved in August reflected a substantial improvement over the depressed conditions of a year ago, when the index registered 135, according to Dodge.

"The rate of growth of construction contracting has

slowed during the past few months, after a period of especially rapid expansion which began in the summer of 1970," pointed out George A. Christie, vice president and chief economist of F. W. Dodge.

"Housing and electric utilities, the two categories which have been running strongest all through 1971, still dominate construction statistics in August," he said. Nonresidential building, however, which has been gradually recovering from its sharp decline during last year's recession, suffered a setback in August.

Two huge electric utility

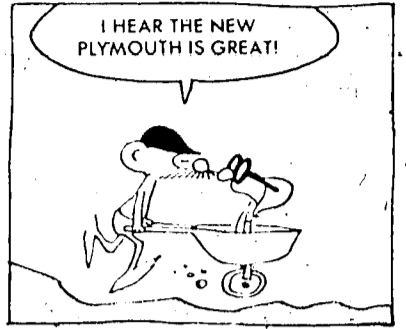

projects, one valued at \$488 million and the other at \$350 million, sent August non-building construction contract value soaring to a near record of \$2.326 billion, 52 per cent above the year ago total, the Dodge economist reported. Highway contracts were also up sharply in the latest month.

"In what is becoming a repetitious but nonetheless welcome pattern, August housing data showed that the two million unit level is here to stay for a while," Christie said. Contract value for housing reached \$3.255 billion, a 4 per cent increase over the August, 1970, total. "It was the fifth

consecutive month that housing value topped \$3 billion, a level never attained until this year," said the Dodge economist.

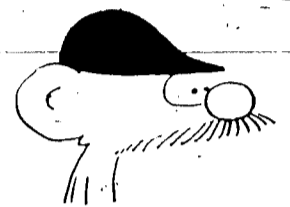

While August contracts for one-family housing and apartments both showed similar gains of better than 40 per cent, nonhousekeeping residential contracting showed only a six per cent gain over the year-ago value.

Nonresidential building contracts in August slipped to \$2,119,539,000, eight per cent below last year's amount, and temporarily interrupted the trend of recovery that has been underway for the past year, according to Christie.

Reservoir at full allowable capacity

AMERICAN FALLS — The American Falls Reservoir is now filled to the full allowable capacity, reaching the level of 1,282 million acre feet on Monday. The storage fills the reservoir to a point eight feet below full capacity. Filling the reservoir above this level is not allowed during the winter, since formation of ice on top of the water could threaten the dam structure in its deteriorated condition.

A flow of 1,500 cubic feet per second is passing Milner Dam as the American Falls Reservoir inflow is passed downstream intact. As irrigation diversions are reduced at Minidoka Dam and Milner Dam, the flow in the Snake River below Milner will increase to about 4,500 second feet by the end of October. Reservoir storage elsewhere includes Island Park, 94,500 acre feet; Grassy Lake, 12,500; Jackson Lake, 598,000; Fallsades, 1,082 million, and Minidoka, 94,100.

The combined storage in Fallsades and American Falls Reservoirs at the end of the water year on Thursday will be the greatest on record, with a carryover of 2.35 million in the two. Total reservoir capacity is 3,984 acre feet, with 3,145 million in storage.

Farm

Reduced output reported by gem apiaries

BOISE — Commercial apiaries of 300 or more colonies each in Idaho indicate a reduced 1971 output of honey due to cooler temperatures during the spring, followed by an extended period of high temperatures.

The total "honey flow" is predicted to reach 3,276 million pounds in 1971, according to the Idaho Crop and Livestock Reporting Service. This production will come from 91,000 colonies, with an average of 36 pounds per colony.

Throughout the nation, commercial apiaries in 20 major home-producing states expect to produce 85.9 million pounds from 1.525 million colonies producing 56 pounds each on the average.

California, with 384,000 commercial colonies, is expected to produce 15.36 million pounds, for more than one-sixth of the 20-state total.

Moths threaten trees

WASHINGTON (UPI) — Forests from northeastern states to the Gulf of Mexico are threatened by an ugly, greedy, dirt-brown insect, the gypsy moth.

Agricultural scientists have concocted a devious method they hope may slow, if not eliminate the next generation of the pest.

Moth eggs winter in a mass that sticks to just about any inanimate object. Come spring, caterpillars emerge from the mass, apparently ravenous.

In a pinch, they will eat shrubs but they prefer trees. The caterpillars defoliate about 400,000 acres of trees annually in the northeast, stripping and killing an evergreen by a single defoliation. Hardwoods like Oak, Birch, and apple trees can be killed by two.

Around mid-June they rest, and the well fed caterpillar becomes a moth. Females are too fat and lazy to fly. They generally remain in quiet repose, emitting a substance which male moths find wildly exciting.

They mate, and the male then flies away to die. The female lays a mass of eggs before she departs this life.

The moths were brought to this country from Europe in the middle 1800's by a naturalist who dreamed of mating the gypsy moth with the silkworm, and producing silk. It was a good idea, but silkworms are partial to mulberry leaves which were not to be found around Medford, Mass., where the experiment was conducted.

The matter might have ended there, but a northeasterly wind blew up and swept the gypsy moths out into the countryside. The naturalist conducting the experiment, identified only as Trouvelot, recognized that this was a disaster and warned in speeches and writings of the threatened dangers.

His warnings largely were ignored until apparently healthy trees became leafless in the growing season. The war between man and moth began.

Professionals dominate singles play to claim initial Idaho Cup win

The professionals of Southern Idaho, after blowing a chance in the morning to sack things up early, won six and tied two afternoon singles matches to beat the amateurs in the first annual Idaho Cup tournament.

No salvage planned on Richfield canal

Backed with the knowledge of a big water carryover year and returns from last year's tagging studies, the Idaho Fish and Game Department will not salvage any part of the Richfield Canal this year, reports Regional Biologist Robert Bell.

Orioles edge Sox for 11th straight

BALTIMORE (UPI)—Brooks Robinson's 20th home run gave the Baltimore Orioles their 11th straight victory, a 1-0 decision over the Boston Red Sox Wednesday night.

OAKLAND (UPI)—Curt Blefary's two-run double in the ninth inning Wednesday gave the American League play-off-bound Oakland A's an 8-7 victory over Kansas City in the final game of the regular season for both teams.

The Royals, bidding for the best won-lost record ever by an expansion club, carried a 7-6 lead into the ninth.

WASHINGTON (UPI)—Mel Stottlemyre survived a shaky start to continue his lifetime mastery over Washington as the New York Yankees exploded for four runs in the fifth inning to beat the Senators, 6-3, Wednesday night.

CLEVELAND (UPI)—Rookie Vince Colbert, the only Cleveland pitcher to pitch a complete game since Aug. 17, did it again Wednesday night when the 25-year old right-hander scattered

day Idaho Open Friday. Among the amateurs, only rodeo champion Dean Oliver, Boise, was all victorious while Jim Packard, Twin Falls won the other singles match. Oliver nipped Hillcrest Country Club pro Arnold Haneke in probably the best match of the day when he fired a one-under par 67—the only sub-par round of the tournament—and edge Haneke on the last two holes.

The fortunes and misfortunes of most of the singles matches pivoted around the tough eighth or 17th hole (depending on first or second round on the nine-hole layout). Playing to par three from 200 and 165 yards, the green has tremendous slope and sits on a knoll that invites disaster to anyone to the right and-or beyond the putting surface.

Pro Keith Stanwood came from behind the hill for a bogey four to event up his match with Paul Wynes, Ontario, who needed four shots to get down from 55 feet and send that match into a split. Haneke hit two off the hillside there to give Oliver a 1-up lead going into the 18th, which Oliver also won.

Clyde Thomsen, Twin Falls, trailing by three holes late in the front nine, caught up with amateur Joe Flower, Boise, on the 26th and then took his first lead on the 17th enroute to a 2-up decision.

But the 17th also was the saving of Pocatello pro Mike Renshaw. Renshaw, playing extremely well, fired a two-under 32 on the front side and went three up on Bayhouse. The Boise amateur kept coming back and cut his deficit to one on the 16th. Both hit the 17th with their tee shots and Bayhouse looked like he might have winning momentum going when he stroked a 25-footer in for a birdie two. But Renshaw took all the wind out of the charge when he calmly dropped a 13-foot downhill to halve the hole. Renshaw then won the 18th.

Paul Davis, Lava Hot Springs, came within an eyelash of duplicating Oliver's all-pluses effort. Trailing by three holes going into the second nine against Ontario pro Marv Hipkins, Davids reeled off three straight threes.

They were even going up the 18th when Davids, thinking his ball was on the green, marked it for cleaning purposes. The spot wasn't on the green and although Davids won the hole with a par, the rules committee took the hole away from him but left the final result tied.

In the morning Scotchball competition, all five professional teams turned the front nine ahead but couldn't withstand the amateur closing charge that tied it 2-2 all going into the singles.

Amateur Jim Packard, Twin Falls, over John Kinsey, Boise, 3 and 2.

Pro Mike Renshaw, Pocatello, over Paul Bayhouse, Boise, 2 up.

Pro Lenny Stroup, Payette, over Willie Peterson, Twin Falls, 2 up.

Pro Clyde Thomsen, Twin Falls, over Joe Flower, Boise, 2 up.

Pro Al Jones, Montpelier, over Gordon Crockett, Boise, 3 and 2.

Amateur Paul Wynes, Ontario, split with Keith Stanwood, Caldwell.

Amateur Paul Davids, Lava Hot Springs, over Marv Hipkins, Ontario.

Amateur Dean Oliver, Boise, over Arnold Haneke, Boise, 2 up.

Pro Ray Honsberger, Boise, over Wayne Peterson, Boise, 3 and 1.

Pro Ken Sparks, Nampa, over Newt Carter, Boise, 4 and 3.

Amateurs Packard and Bayhouse split with Haneke and Renshaw.

Pros Kinsey and Stroup over Willie Peterson and Flower, 6 and 5.

Amateurs Wynes and Davids over Stanwood and Hipkins 2 and 1.

Amateurs Crockett and Oliver over Jones and Thomsen 1 up.

SPORTS

AMATEUR DEAN OLIVER, eight-time Rodeo world champion, added another first to his athletic list, as he became the first Idaho amateur to win both matches in the initial Idaho Cup tournament. Oliver is congratulated on his victory by opponent Arnold Haneke, Boise's Hillcrest Country Club professional, on the 18th green. Oliver won 2 up but his amateur team lost 9-5 1/2.

Cowboys fume over punch at Staubach

DALLAS (UPI)—The official Dallas Cowboys family kept a tight lip Wednesday about a controversy which appeared to be brewing as a result of a knockout blow administered to Cowboys quarterback Roger Staubach by Philadelphia defensive end Mel Tom last Sunday.

Cowboy players publicly accused Tom of taking a "cheap shot" at Staubach with a forearm blow to the head seven seconds after the start of a play in which Staubach threw an interception to the Eagles' Bill Bradley.

Tom countered the charge by saying he had "never done anything dirty in my playing career and this (the blow) wasn't dirty." He didn't deny hitting the quarterback, but said it was "just a block."

Films show that Cowboys lineman Ralph Neely had blocked Tom out of the original play and that the two linemen were standing together back of the line of scrimmage when Tom suddenly grabbed Staubach and hit him with a forearm.

"It was ridiculous," Staubach said. They (league office) should have thrown him out of the game. They've got to fine him (Tom) when they see what happened."

Tom contended that after Bradley intercepted the pass, "we (the Eagles) became the offensive team and I was blocking. It wasn't a cheap shot. I hit him from the front."

Mind Your Money

BY PETER WEAVER

Q — What's the best way to block out expressway noise that filters into our apartment? It's so bad it drowns out the TV. — L. G., Buffalo, N.Y.

A — Best bet is to install double-glass windows and weather-strip the frames. Plate glass is thicker and will help block out more noise. If it's used as the inner layer, heavy, lined drapes will also help.

Q — I read about a product that can be brushed on the inside of basement walls to prevent moisture from causing the paint to peel. Know anything about it? — Mrs. M. A. R., Boonton, N.Y.

A — Waterproof cement paint will help for three or four years. If you plan to panel over it, you'd have problems after that period of time.

To get a moisture-proof wall suitable for paneling requires the work of a professional contractor. The metal frame which provided the base for your original concrete foundation has probably rusted away, allowing water to use the empty holes to get inside the wall.

A contractor can use drain piping to get the water level down. Afterward, the old paint can be sandblasted off and the wall can be coated with cast portland cement covering with ironite. Paneling can then safely cover the cement. Obviously not a job for an amateur.

Q — Three years ago we installed a new carpet, wall to wall. It continues to give off an offensive odor, something like wet burly. The company inspected it, but has no answer. Any suggestions? — Mrs. D. F., Los Angeles, Calif.

A — The National Institute of Rug Cleaning says such odors are caused by many different substances such as dyes, backing compounds, growing fungus or liquids spilled on the carpet.

Odors coming from the manufacturing process are apt to be strong when the carpet is new but will fade away if the carpet is aired. Airing the room for several days might help, or a professional cleaning job may be called for. Ask a cleaner to come in and give an estimate as to the source of the odor and the cost of its removal.

Q — The top of our maple stereo cabinet has been coated with so much wax polish it streaks when you rub it. How can I remove the old wax without damaging the finish? — Mrs. R. P., Los Angeles, Calif.

A — The Department of Agriculture's Extension Service suggests rubbing the cabinet with turpentine. This will cut the wax without harming the surface.

For additional cleaning suggestions, you might get "How to Clean Everything" by Alvin Chesnut Moore. It's published by Simon and Schuster and costs 75 cents in paperback.

Q — I have three locks on my front door and a chain. Burglars still got in. Is there anything I can install to keep them from opening the door? — Mrs. F. M. P., Philadelphia, Pa.

A — Professional locksmiths say a dead lock and a double-cylinder lock should do the trick. You get even more protection if you get locks with oddly shaped keys such as tubular keys. This makes them difficult to pick. The locks cost from \$15 to \$20 each plus installation charges.

Consult a locksmith in your area (yellow pages of the phone book) to get the right set of locks and keys for your particular needs. Make sure you don't get a lock that's so tricky to open from the inside it poses a fire escape hazard.

Airport ghostly in ebb

QUI NHON, South Vietnam (UPI) — Grass grows through cracks in the tarmac at the Qui Nhon Airfield now, and the barbed wire on the perimeter is collapsing from rust and is covered with trash.

In the center of the field lies the bulk of a cargo plane that crashed a while back — too big to move and too badly damaged to repair. The paint flakes off abandoned quonsets, and their glassless windows stare out like empty, unseeing eyes.

Qui Nhon Airfield, 250 miles northeast of Saigon and one of the busier strips in Vietnam during the heyday of American involvement in the war, has been abandoned by everyone but a few Vietnamese, and is reminiscent of one of those ancient aerodrome relics of World War II that litter southeast England.

Somehow it seems to speak volumes about another day and age in Vietnam, when tens of thousands of American, Korean and Vietnamese troops bombed and blasted their way the length and breadth of Binh Dinh Province, searching for an enemy they occasionally found but never defeated.

Qui Nhon is the capital of Binh Dinh, the biggest province in the country in both population and area, and keystone of any government plan in both population and area, and keystone of any government plan to control the central part of Vietnam.

It was the potential seizure of Binh Dinh and the consequent loss of control of the seacoast end of Highway 19 into the Central Highlands that the Americans feared most back in 1965, when they spoke of the Communist effort to cut Vietnam in two.

The allies tried in this province — tried hard but apparently failed. Binh Dinh is the most recalcitrant province in the country, and even after six years of allied effort, it appears to be slipping backward rather than moving forward, even if only a bit at a time.

Recently, to cope with the effects of withdrawal of the last U.S. troops from the South Vietnamese at American urging, have launched yet another effort to pacify Binh Dinh province.

The new effort, named Tang Bat Ho, after a famous general who comes from the province, seems on the surface better planned and more rational than any of the allied efforts that were made here.

Even so, there are serious questions about parts of the strategy, and about whether there is enough time left in the war for any army to pacify the toughest territory in Vietnam.

Radioman transferred by BLM

SHOSHONE — DeLen Stears was transferred to his new headquarters at Idaho Falls on Sept. 6. His assignment involves maintenance and repair of all radio facilities in the Bureau of Land Management stations in the Salmon, Burley, and Idaho Falls districts.

Stears transferred to Shoshone from Boise as electronics technician in 1967 and was responsible for radio maintenance and repair in all B.L.M. districts, except Boise and Coeur d'Alene.

Jim Bishop, with headquarters in the Boise District, is assigned the Shoshone area to carry out Stears' past duties.

News Of Servicemen

TWIN FALLS — Lt. and Mrs. Brent Jacobs and son, Brian, are visiting at the home of his parents, Mr. and Mrs. Ben Jacobs, Twin Falls. Lt. Jacobs has been stationed in the Pentagon for the past two years. After a brief assignment in Maryland he will transfer to the Naval base in Jacksonville, Fla.

RICHFIELD — Seaman David Estock has been promoted to educational petty officer assistant at the Navy base in San Diego. The promotion was received Sept. 21, eight days after he was inducted into the service. He is the son of Mr. and Mrs. Jack McKeown, Richfield.

2 Gooding boys win 4-H honors

GOODING — Two Gooding 4-H boys have been named state 4-H winners and will receive expense-paid trips to the National 4-H club Congress in Chicago. They are Rory Scanlon, son of Mr. and Mrs. Claude Scanlon, state automotive project winner, and Tom Bishop, son of Mr. and Mrs. Paul Bishop, all Gooding, state 4-H swine winner. Scanlon has completed four automotive projects and currently is president of the Gooding County 4-H Junior Leaders Council. Firestone Co. will sponsor his trip. His leaders, Mr. and Mrs. Hugo Etchelberg, Gooding, have coached at least four state winners during their years of service, Ed Koester, county agent said. Bishop has been county champion fitter and shower for four years with his swine projects and is a junior club leader. His trip will be sponsored by Moorman Manufacturing Co., Quincy, Ill.

the modernists. It asks partner to bid a grand slam with two of the three top trump honors. Z obliged.

West opened the three of trumps. Z won with dummy's eight and tried to count to 13 tricks. There were 11 in top cards. Two more could be obtained by ruffing twice in either hand and Z decided to attempt to ruff two of dummy's diamonds.

He cashed dummy's ace and king and ruffed with the ace of trumps. West discarded a heart. This worried Z a trifle but he still led a heart toward dummy. When no one ruffed that he was home. He simply ruffed the last diamond with his king of trumps; led his last trump to dummy; drew West's trumps and claimed the grand slam.

A—Pass and hope you aren't too high.

TODAY'S QUESTION

Instead of bidding two clubs your partner has responded two hearts. What do you do now?
Answer Tomorrow

By Oswald & James Jacoby

Since getting back into bridge Y and Z have been learning as many modern bidding gadgets as possible. Thus, when Y jumped to four clubs, Z realized that his partner was using a splinter bid to establish spades as the trump suit and to show a singleton club.

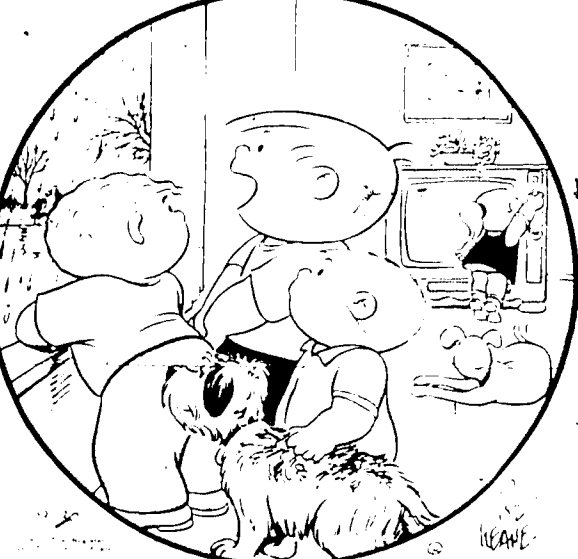

Z didn't have much of a hand but a singleton club fitted with his weak club suit. Anyway Z is an over-bidder so he cue bid four hearts.

This gave Y a chance to use another gadget. He bid five no-trump. This is the grand-slam for e invented by Ely Culbertson almost 40 years ago and revived by

PASS IT ON
by L.M. Boyd

ON MATRIMONY: Bacon said, "A man finds himself seven years older the day after his marriage." Balzac said, "A woman must be a genius to create a good husband." Disraeli said, "It destroys one's nerves to be amiable every day to the same human being." Mme. de Rieux said, "Marriage is a lottery in which men stake their liberty, women their happiness."

"ALL OF OUR recorded geniuses have been men." Am asked to name the authority for that intriguing claim. Dr. Amram Scheinfeld is the fellow. ANOTHER MATRIMONIAL SPECIALIST named George R. Bach, Ph.D., contends "falling asleep" is that single act most responsible for divorce.

A SAN FRANCISCAN asks if our Name Game man has found any common characteristic among girls called Elizabeth. Certainly. Most Elizabeths tend to possess the gift of polite double talk, and it's as valuable to them in romance as, say, absolute pitch to the musician. AMONG THE PECULIAR cosmetic customs of the dandier men in old Rome was a varicose affectation. They traced the veins in their arms with blue paint. History does not tell us why. They also pouged their knees and elbows, twitwete.

CUSTOMER SERVICE: Q "I've got a little Shetland filly. How much weight can she be expected to carry?" A Fifty pounds, if she's more than one but less than two years. Seventy pounds, if she's more than two but less than three years old. So say the horsemen. Those figures sound a little light, don't they?

"IF A YOUNGSTER can't learn to swim," contends a Fort Worth psychiatrist, "I immediately suspect serious neurosis. Occasionally, you find a child's anxiety, so tense so fearful he can't trust the buoyancy of water. Interestingly enough, such children oftentimes possess intelligence at the genius level."

THAT Dr. Harvey D. Thatcher of Potsdam, N.Y., invented the first glass milk bottle, is widely known. But exactly who invented the first cardboard milk carton remains a mystery. Odd. THE RECORD SHOWS that literary Love and War man of yesterday, Robert Louis Stevenson, advised women never to marry teetotalers who don't smoke. Keep it in mind, young lady. IF A MACK drops into a piggy bank each quarter he finds in his pockets every day, he can be expected to wind up the year with an extra \$30 stashed, at least. Or such is a money man's claim.

FOR SOME WOMEN, life begins at about 12. Evidently a Pittsburgh psychiatrist named Dr. William Brown points that out. He cites Saint Theresa, Florence Nightingale, Dorothea Dix, Jane Addams. These ladies, he says, tended to be fairly disconsolate, down in the mouth, downright droopy until middle age. At which time they became galvanized by ambition. He says it's not uncommon for a lethargic lady to turn into a fireball at just about this age. When she seems ready to give up on herself.

Your questions and comments are welcomed and will be used in PASS IT ON wherever possible. Please address your letters to L.M. Boyd, P.O. Box 17076, Fort Worth, Texas 76102.

Former examiners indicted

WASHINGTON (UPI) — Two former federal bank examiners were indicted today on charges they accepted illegal loans from financier Frank W. Sharp, central figure in a stock fraud scandal that has touched almost all the top political figures in Texas.

Attorney General John N. Mitchell announced that four indictments were returned in U.S. district court in Houston.

Also indicted were two former Texas state bank examiners and four former officers in Sharp's Sharpstown State Bank, which collapsed in January.

The indictments charged that the men misapplied funds of the bank, falsified records and accepted or made nearly \$105,000 in illegal loans to Sharp, who has been fined

\$5,000 and given a suspended sentence for falsifying an entry in a bank record, was granted immunity from future state or federal prosecution in return for testimony to the federal grand juries. He was not named in any of the four indictments.

A one-count indictment charged Ted Bristol, a former Federal Deposit Insurance Corp. (FDIC) examiner with accept-

ing a \$10,000 loan in February, 1969, from Sharp.

A separate three-count indictment charged former state bank examiner John B. Hooper with accepting a \$57,000 loan from Sharp in May, 1969. Another 23-count indictment named John T. Knight, an assistant bank examiner for the FDIC; Welton Adler, a state bank examiner; Douglas N. Lane, a former bank president.

Views of meeting

DAHOMEY MINISTER of Finance Pascal Chabi-Kao, above, brought his camera to International Monetary Fund and World Bank meetings in Washington D. C., to film proceedings. But R.D. Muldoon, below, New Zealand's finance minister, appeared less than interested in activities at one session. (UPI)

Cleveland lawyer wins primary race

CLEVELAND (UPI) — With the help of outgoing Mayor Carl B. Stokes, attorney James M. Carney upset the endorsed party candidate Tuesday to win the Democratic mayoralty primary.

Carney's victory almost assures that a Stokes-backed candidate will win the Nov. 2 general election.

Carney, one of the city's most prominent businessmen, polled an unofficial total of 74,031 votes to 60,141 for City Council President Anthony J. Garofoli, the endorsed candidate, and 6,149 for former police chief Patrick L. Gerity.

Stokes, the first black mayor of a major American city, announced earlier this year, he would not seek a third two-year term. He has not revealed his future political plans.

Stokes had feuded bitterly with Garofoli during his terms and had asked the city's black voters, who make up 35 per cent of the electorate, to support Carney, whom Stokes called a "decent man."

The blacks responded by voting overwhelmingly for Carney.

Pollution ruled fatal

NIIGATA, Japan (UPI) — Niigata District Court today ruled that pollution from one of Japan's largest chemical plants caused the deaths of seven people from mercury poisoning.

The court ordered the Showa Denko Co. to pay damages of \$820,000 to 77 persons in the pollution case. The plaintiffs had asked for nearly twice that amount.

The charges against the firm, which deals primarily in agricultural chemicals, said that seven persons died, 54 people were paralyzed and others made ill by eating mercury-poisoned fish from the Agano River which was polluted with industrial wastes from Showa Denko.

THE SAU-CHEEZ HOUSE

Cheese explained

Are you confused about cheese? Do you know the difference between a natural and a process cheese? Do you know what a good cheese should look like?

We do. And we're going to tell you. So when you're shopping for cheese, you'll know what you're shopping for.

What can you get for your cheese money?

You can get great taste. And great value, too. Because when you buy a whole milk cheese like Cheddar or Colby or Camembert, you're getting a food that, ounce for ounce, has the same high quality protein as meat. So half a pound or so of Cheddar or Gruyere can give you a macaroni and cheese casserole or a puffy soufflé or a delicious fondue that will make four people happy. And your meat budget, too.

Tip: if your kids are milk-haters, try letting them off a glass a day with an ounce of Cheddar cheese instead. It has plenty of calcium and Vitamin A, and most of the nutrients in a glass of whole milk.

How to spot good cheese.

The cheese, quite simply, should look good. A firm cheese like Cheddar shouldn't have any cracks. Cracks mean the cheese is dry. A blue-veined cheese should look moist. Not hard and granular.

The same goes for your medium firm cheeses like Muenster, Gouda or Edam. If they look good, they are good. With soft-ripened cheeses like Lamburger or Brie, make sure they fill up their boxes, and that the centers aren't sunken. With packaged cheese, if the wrapper is gummy or sticky or stained, forget it.

Fresh Cheese, what's that?

All cheeses start out as fresh cheeses before they're cured or processed. Cottage cheese is one of your fresh cheeses. So is farmer's cheese or pot cheese, which is a bit drier. Or cream cheese, which is what no bagel and lox should be without.

What makes a natural cheese natural?

A sharp, firm Cheddar. A sweet nutlike Swiss. A rich, buttery Blue. These are some of the harder, natural cheeses. The softer ones like Bel Paese and Port du Salut and Camembert are natural cheeses too. It's just that they have more of the watery part of the milk, or whey, left in.

What makes these cheeses natural is that they're in their original form. They haven't been blended, or cooked, with other cheeses. Our cheese man likes to call these living cheeses, because they continue to age and sharpen in flavor right in your refrigerator.

Process cheese, why is it so economical?

Process cheeses are a blend of natural cheeses which have been shredded, mixed and pasteurized, and which keep for a very long time. And because there's no rind and no waste on a process cheese, you only pay for what you can eat. The kids go for these cheeses, because they tend to be nice and mild. And they make great cheeses for cooking, because they melt smoothly and won't get stringy.

Does Provolone go with Purple Plums?

Want to know more about cheese? Want to know everything from how to store it to what cheeses go with what fruits. Just come in to the Sau-Cheez House next time you're downtown Twin Falls. It's chock-full of marvelous cheeses, both imported and domestic. And you'll find many helpful tips to make sure you're as smart about cheese after you get it home as you are when you buy it.

Provolone? It goes best with pears or green grapes.

Care for
Your Car

Fall-Winter 1971

TWIN FALLS, IDAHO, THURSDAY, SEPTEMBER 30, 1971

Page One

Don't let
rough weather
catch you

Care for your car

Proper car care maintenance now can protect your car from cold and damp-weather troubles all winter long. It can save you money, too.

Maintenance Is a Good Investment

Keeping Car in Best Condition a Must For Winter Driving

A penny saved is a dollar squandered.

That's not how Poor Richard stated the case, but Poor Richard lived in an era before the automobile. If Destitute Dick had been a car owner he probably would have applied another of his famous sayings to the situation — "A stitch in time saves nine."

While most of us today are more careful than ever about how we shell out our money, neglecting needed car maintenance is a false saving. Let's look at the facts.

Most of us depend upon our cars for our livelihoods. Cars take 82 percent of us to work and back. Most of us seek out recreation by automobile, with 86 percent of all travelers using automobiles.

Most Important for Season

So, particularly in the coming months of winter weather, it is important to keep your car in top running condition, whether we're going to work or play.

How, exactly, does stinting on maintenance lead to potentially major expenditures? Consider these examples:

- Merely washing and waxing your car to keep its body rust-free can mean a savings of several hundred dollars at trade-in time.

- Changing the oil and filter at recommended times can prevent premature and expensive engine wear.

- Regular tune-ups can cut gasoline bills, prevent road service bills and, in some cases, head off engine damage.

- Wheel alignments, rotating and balancing tires can make your tires last 25 percent longer.

- General car care makes your car safer and helps prevent accidents. Some estimates state that 10 percent of all fatal accidents can be attributed to neglect of maintenance.

Today, there are even stronger reasons for good car care. A well-maintained engine, tuned to manufacturer's specifications, pollutes significantly less than a neglected one. Even with pollution-reducing improvements on the new cars, maintenance is the key to keeping pollution levels low.

Best Car Expenditure of Winter

Your investment in keeping your car in condition may be the best expenditure you make this season.

Visit your favorite service outlet soon to begin reaping the rewards of that investment — safer, surer performance from your car.

Correct Use Of Car Wash Saves Paint

Coin-operated car washes must be used correctly to protect paint surfaces from serious damage, according to E. J. Hartmann, president of Ziebart Process Corporation.

Hartmann said, "A number of people have complained to us recently that the paint on their automobiles is not retaining its brilliance and, in some cases, that it is actually pitting and deteriorating. On further investigation, we have found that these people are frequent users of coin-operated car washes.

"Questioning these complainants, we have found that they have the habit of trying to get in and out of the coin-operated washes as quickly as possible in order to save spending an extra coin for additional minutes of wash time.

"The result," said Hartmann, "is that they may have saved an additional quarter but they leave the wash without completing the job. Rather than spend the money needed to do the job right, they will try to squeeze a complete job in the metered wash time purchased with one or two coins. Often when they leave, their cars carry with them a layer of filmy soap. This remains on the cars and dries, only to liquefy later with rain.

"The soap solutions used in these car washes are fine to clean away road film, but they are not meant to be left on the paint surface. I would warn motorists that they should use the coin-operated washes correctly. Take several coins with you and spend what is needed to do the job right," Hartmann said.

Avoid Battery Problems With Quick Check

Ever wonder why sometimes during starting, your car's battery sounds like it's dying — then suddenly kicks off?

A major source of the problem could be dirty battery terminals or loose connections.

Open the hood of your car. Are the battery terminals covered with what looks like a green moss? If not, are they loose? The green substance is acid build-up. When it reaches a saturation point of covering the lead terminals, energy transmission is impaired and starting becomes a problem.

In advance stages of acid build-up, not enough energy is transmitted to even turn the engine over once!

Corroded or loose battery terminals are easy for your local service station mechanic to fix.

The investment will be nominal and you'll be free all season long from this "won't start" cause.

Machine Gives Driver Test

DrivoTEST, the nation's first automated drivers' license testing system, is in operation in Des Moines, Iowa. Robert Ray, Iowa governor, is shown at the dedication ceremonies of the installation manufactured by Visual Educom Inc. The test is designed to train drivers and reinforce safe driving attitudes.

Driver Licensing Test Scraps Old Traditions

Iowa has a head start on a new traffic safety program designed to provide identification and reinforcement of safe-driving attitudes and techniques. Called DrivoTEST, it is the nation's first automated drivers' license test.

The new examination, which scraps the traditional paper and pencil for automated audio-visual techniques, is being used in Des Moines, Iowa. DrivoTEST builds safe-driving attitudes by training as well as test-

ing, because answers to the questions are explained.

An applicant enters one of the 20 separate booths and presses a button that starts a color movie shown on a personal TV set. The film dramatizes a series of traffic situations that call for knowledge of legal and safe-driving requirements.

DrivoTEST is not designed to replace the entire licensing procedure. Iowa will continue to administer individual vision and on-the-road examinations.

ADVICE TO WOMEN

who DRIVE...and MEN, Too...

from DE DE BENSON... a woman who does

Dear DeDe:

I am the mother of three school-age children and it seems like I spend half my time chauffeuring them to school, music lessons, Scouts and a dozen other places.

My neighbor has children about the same age and we try to share the driving when the youngsters are going to the same place. Lately, however, it seems that every time it's her turn to drive she claims she has starting trouble. I don't believe her. We live in a warm climate so I don't see how she has starting trouble.

How can I get across to her that I resent her excuses without starting an unwanted neighborhood feud?

DISGUSTED DORIS
Long Beach, California

DEAR DORIS:

Before getting to the core of your problem, don't assume that because you live in a warm climate you can't have starting problems. Statistics show that drivers in your part of the country have just as much or more starting trouble than car owners in colder areas. Why? People in the frigid zones tune their cars more faithfully than people in your balliwick.

Tell your neighbor that you just had your car tuned and that it really runs better and that you start more eas-

ily than ever. Also tell her that your tune-up is helping cut pollution levels. She may just get the hint and you'll gain a co-pilot on your driving chores.

Dear DeDe:

I'm a single girl, just out of college and I've bought my first car.

Frankly, every time I take it in for service, I feel I am being condescended to, because I am a woman. I have no complaints about the service, but I resent being told, in so many words, "You wouldn't understand" when I ask exactly what was done to my car.

Where can a girl learn the basics of auto mechanics?
DIANE J.
Astoria, Long Island

DEAR DIANE:

Check your local YWCA. Many YW's offer classes in Powderpuff Mechanics. They are not too technical, yet they do give you a basic understanding of what makes a car tick and what services are needed.

You may not be able to repair your brake system after the course, but you should be able to put a stop to what's bothering you.

NO "IDLE" RUMOR

According to a University of Michigan engineering school study, hydrocarbon emission from an automobile engine is reduced an average of 55% at idle after a tune-up.

CLOGGED CLEANER

A clogged air cleaner can help cause a 75 percent increase in hydrocarbon emissions from a car's engine.

Drivers Neglect Tires

More than one-third of all automobiles checked in a recent study conducted by Northwestern University had one or more tires in unsafe operating condition. Common faults included under-inflation, overloading, excessive tread wear or damage.

Check these conditions regularly and replace tires when they have:

- **TREAD WORN BELOW** 1/16" depth in any two adjacent major grooves, or where ply cord shows. Measure depth with top edge of a penny. If you can see the top of Lincoln's head, replace tires.
- **TREAD WORN DOWN** to the level of tread wear indicators, built into late model tires, which appear as solid bands across the tread surface.
- **TREAD OR SIDEWALL** cuts, cracks or snags deep enough to expose tire ply cords. Also fabric breaks or temporary blowout patches or "boot" repairs.
- **BUMPS, BULGES** or knots indicating possible separation of tread or sidewall from tire body. Tire should be removed from the wheel and examined by your car service man.

University Study... Says Tune-Up Is Cure for Air Pollution

They came to get a free tune-up. They left with the realization that a neglected engine is a major contributor to the air pollution problem.

When engineering students at the University of Detroit decided to help observe Engineering Week by offering free tune-ups to the public, the students did not anticipate the response.

Seeking to dramatize the effects of undermaintenance on harmful emissions, the students found 150 cars waiting in line at a campus facility. It was more than they could handle so they invited excess numbers of car owners back for a tune-up the following week.

Additional openings for the second week's clinics were exhausted in 15 minutes as the public phoned in for appointments.

What was the result of the Clinic's study?

After tune-up the average hydrocarbon emissions were reduced 52 percent.

And the average carbon monoxide emissions were reduced 58 percent.

According to clinic organizers Bob Kaczorowski and John Smreker, "The goals that were set for the tune-up were 400 parts per million of hydrocarbons and 2.0% car-

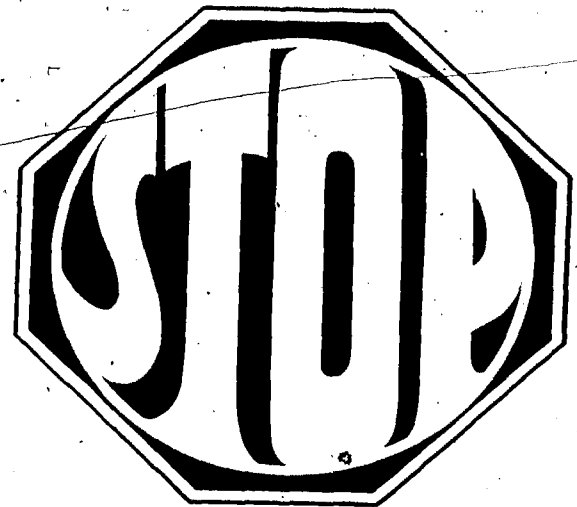

bon monoxide. The average HC reading coming in was 844 PPM. The average CO count was 3.06 percent.

"After tune-up the average HC count was 312 and the average CO count was 1.3 percent."

While most of the car owners were more motivated to bring their vehicles in for free service rather than concern for pollution, the proj-

ect directors were somewhat optimistic.

Kaczorowski and Smreker commented, "After seeing what a difference a tune-up can make in their car's performance, mileage and pollution, we have won a few converts."

Why does your car need Tune-Up No. 2 now?

Engines generate heat. Lots of it. Only a properly operating cooling system can remove that excess heat, keep your engine at the proper temperature.

Drive with a worn V-belt, faulty radiator cap or thermostat, or a leaking hose and you're asking for trouble, overheating, inconvenience, road breakdowns, possible expensive repairs.

You can avoid trouble with a Tune-Up No. 2, a thorough check of the entire cooling system plus replacement of worn or defective parts.

Ask your service station operator to give your car a Tune-Up No. 2, and insist he replace worn-out components with Gates top-quality cooling system parts. They're available everywhere.

TUNE-UP NO. 2

Exploring Safe Driving Rallies Organized Nationwide by Scouts

How would you like to drive into the winner's circle, only you don't know where it is, and you don't know how to get there, but you have to arrive exactly on time?

Such is the task for entrants in the Exploring Safe Driving Road Rally, a national program for Exploring-age boys and girls organized by the Exploring Division of the Boy Scouts of America.

With national sponsorship by Lincoln-Mercury Division of the Ford Motor Company, up to 36 rally teams compete in a fall final event for \$7,000 in college scholarships and the use of a new car for a year.

Industry Sponsorship

Finalists are selected from local rally winners, organized by Exploring divisions in area Boy Scout Councils, often with the sponsorship of local industry. For example, the Toledo, Ohio area council rally, which sent the only all-girl team to the 1970 finals in Detroit, is sponsored by Champion Spark Plug Company.

Rallying, a favorite pastime for many in the "sports car" set, is not a speed event, but a competition involving driving and navigation skill, plus the ability to observe local traffic laws, against a clock.

Competitors run on a pre-selected course, encounter all types of driving conditions, and progress is established against a time factor known to the rally master — via a number of checkpoints situated along the route.

Cars are sent from the starting point at one minute intervals and the navigator—the passenger—is handed a detailed instruction and direction list which will guide the rally team to the finish point.

Points are scored for arriving at checkpoints and the finish too soon or too late, and the team with the least points is the winner.

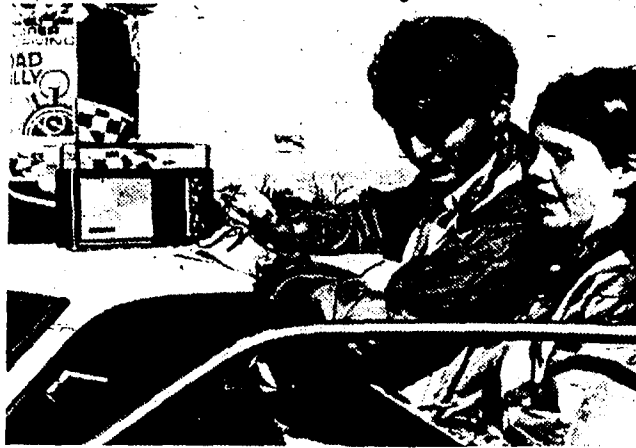

Classes are also a factor. Since time is the enemy, cars with elaborate expensive timing equipment are considered the "equipped" class. Cars using standard equipment, and perhaps stop watches and a slide rule, fall into the "unequipped" class. Normally, the two classes do not compete against one another, but do run in the same event. The Exploring rallies are all "unequipped."

Up To Navigator

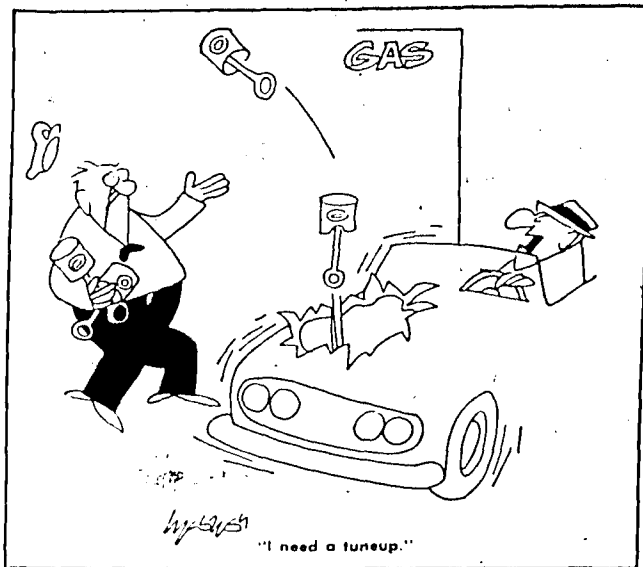

One important factor in rally success is the navigator. It's up to him — or her — to advise the driver where to go, how fast to proceed and for how long. In the Exploring events, an observer is also allowed in the car to aid the navigator.

The Exploring rally program is an example of the modern, creative activities available to young people.

Entrants need not be an Explorer Scout to compete, but if they qualify for the national event, are required to join. And the rally program demonstrates to the competitors all racing does not rely on high speed, that careful driving and concentration is important for winning, especially in a broad rally.

TWO PARTICIPANTS IN THE EXPLORING Grand National Safe Driving Road Rally mapped strategy before start of the six-hour, 125-mile ordeal. To get there, finalists had to master series of elimination competitions involving more than 23,000 rallyists and 10,000 cars. The final runoffs are sponsored by the Lincoln-Mercury Division, Ford Motor Company.

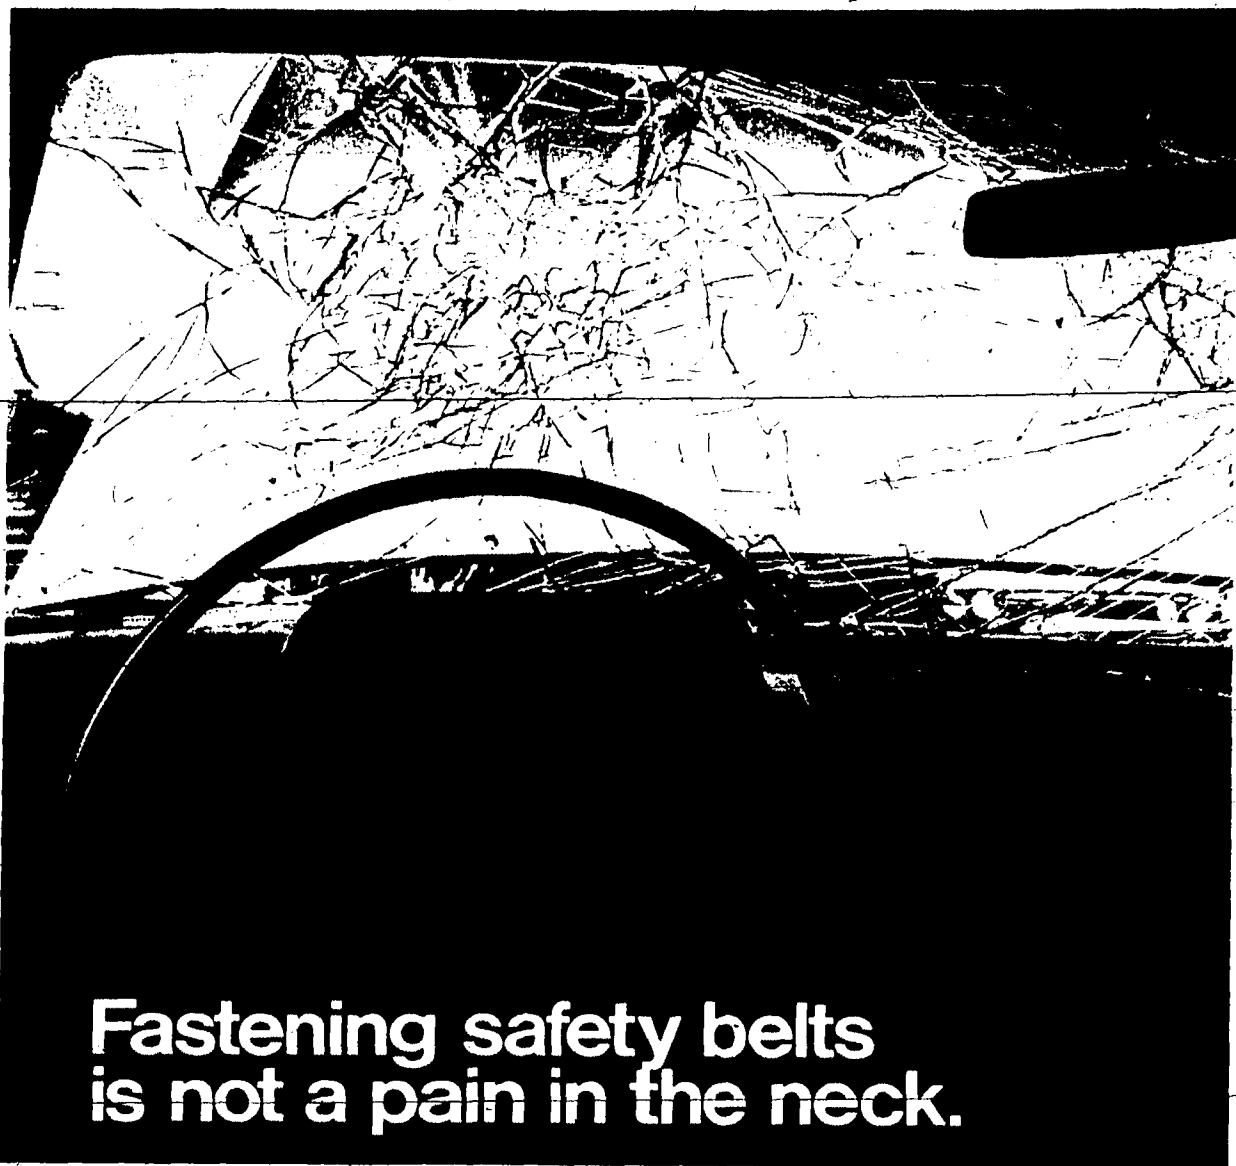

POLLUTING PERCENTAGE

Three out of every five cars on the road are in need of tune-up work at any given time, according to Champion Spark Plug Company.

AVOID PROBLEMS

Dirty battery terminals can cut off your car's power quicker than an unpaid electric bill.

Fastening safety belts is not a pain in the neck.

Fastening safety belts saves necks

Not to mention lives.

We estimate that 8,000 to 10,000 lives could be saved every year if everyone used safety belts

As new car dealers, it's not only frustrating for us to see people ignore their safety belts — it's heart-breaking when we think of the serious injuries that could be prevented.

And the lives that could be saved

Buckling your safety belts should be the first thing

you do. Every time you get in your car. It takes only a second. And it's a habit that becomes second nature. So please get the safety belt habit.

For the ride of your life

A Ten Count Guide to ... Your Car Safety

From Canada Safety Council

In boxing, a 10-count signifies a knockout. In driving, according to the Canada Safety Council, your car is subject to a 10-count too. That is 10 basic safety flaws and any one of them could count your car out of action.

The Council provides a list of the following ills and how you can detect them while driving. It also suggests having the symptoms corrected by your favorite service outlet as soon as you detect them.

1. The brake pedal sinks to the floor under light foot pressure. This could mean worn brake linings or a leak of fluids in the system.
2. The car pulls constantly to one side when stopping. Possible causes include poor wheel alignment or brake lining worn on one side or oil soaked on one side, both due to wheel cylinder defects.
3. Excessive play in steering. Likely causes are a worn or faulty steering box, or worn or faulty ball joints, tie-rod ends, relay rods or idler arm.
4. Your car vibrates at 50 to 65 mph. Chances are defective tires, incorrect wheel balance or incorrect alignment is the cause.

'Certified Car Care' Experts Plan Launched

A private industry program to certify automobile technicians was announced by Henry Sorenson, President of the Independent Garage Owners of America (IGOA).

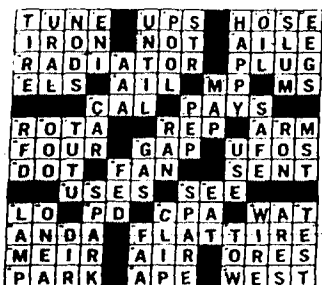

IGOA, along with the Automotive Service Industry Association and the National Congress of Petroleum Retailers, have formed the National Automotive Technicians Certifications Board (NATCB).

To receive certification, a technician must have at least two years' experience in his specialty. He must also pass an examination in one or more of 15 categories of car components.

Mr. Sorenson believes this system of certifying mechanics preferable to government certification. Said Mr. Sorenson, "This industry knows better than anyone else what the needed requirements for a mechanic are and we alone should establish them. I believe this is our industry's responsibility and I know we accept it."

The NATCB certification plan is based on one begun by the Independent Garage Owners of Arizona.

5. Steering column shimmies at high or low speeds. Check for looseness in front end, defective shock absorbers or out of round tires with some flat surfaces.
6. Rear wheel locking upon light application of the brakes. The cause is probably a faulty or leaking oil seal.
7. Too much play in the steering while driving. Improper tire inflation or faulty front or rear

suspension should be suspected.

8. Excessive noise from the exhaust system. Check exhaust-pipe, muffler or tail pipe for damage.
9. Unusual odors inside the car. This could have many sources but signals some engine defect.
10. Directional signal light not working. Check for burnt out bulb or defective flasher unit.

Clinics Trace Air Pollution to Its Sources

Three Basic Adjustments Furnish Keys to Converting Average Car for Cleaner Operation

By DAVID L. WALKER

Director, Technical Services, Champion Spark Plug Company
 Good things — or bad things — come in "threes." Three is the number of key tune-up adjustments that can convert an average car from a polluter to a relatively pollution-free vehicle.

The basic steps in reducing air pollution involve correcting spark plug misfire, maintaining correct fuel/air mixture and making sure timing is set correctly.

Through a series of Cleaner Air Clinics, Champion Spark Plug Company is instructing auto technicians throughout the

nation in how to recognize and correct these laws. The clinics will reach more than 60,000 technicians with the latest information on controlling air pollution from automobiles.

SPARK PLUG MISFIRE

A two percent rate of misfire can more than double the amount of unburned hydrocarbons.

The two percent misfire is critical since the average motorist cannot detect that his engine is acting up with that rate of malfunction. So he is not aware there's anything wrong, let alone the fact that his car is polluting excessively. Causes of spark plug misfire include worn out spark plugs, deficiencies in other ignition components, such as points, distributor caps, rotors or cables.

OVERRICH FUEL SUPPLY — The function of the carburetor is to mix the gasoline with air and feed the mixture to the combustion chamber. An overrich mixture can result in 200 to 300 percent increased unburned hydrocarbons.

Typical causes of an overrich fuel mixture include clogged air filters restricting the supply of air, improperly adjusted idle mixture and a carburetor in need of servicing.

TIMING — With the new anti-pollution devices on cars, some motorists complain about loss of power.

Some auto service technicians will try to compensate for this condition by advancing the timing settings beyond what car makers recommend. As a result the production of unburned hydrocarbons can increase from 10 to 30 percent. In addition, the over advanced timing can shorten spark plug life and damage the engine, thus increasing pollution even further.

Other incidents of neglect-ed maintenance can increase air pollution. These include using spark plugs of incorrect heat range, use of improper fuel for the engine and failure to keep anti-pollution devices in good working condition.

EDITOR'S NOTE — Internal combustion engines have been the cause for much of the air pollution in the United States.

To combat that pollution, some manufacturers have modified their engines, by reducing compression ratios and retarding ignition timing, to aid in reducing pollutants by better accepting the new low-lead or no-lead gasolines.

Other measures have also been introduced to aid more complete burning of the fuel/air mixture and to stop evaporation of fuel.

All of these steps, while helping to accomplish the intended purpose, require additional care by the individual motorist to keep the engines

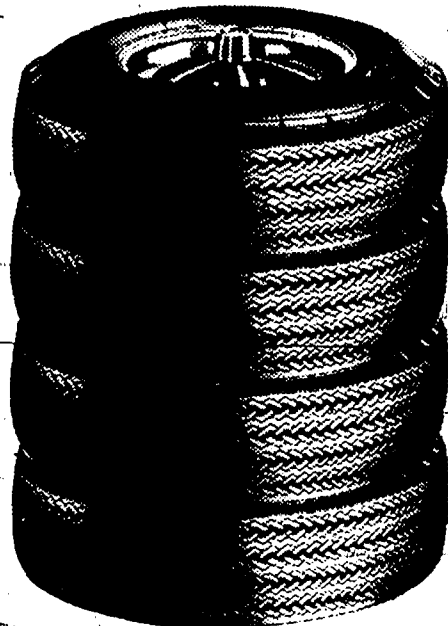

within critical tolerances necessary for clean operation.

A University of Michigan research program has shown one of the best ways to keep an engine clean — as well as the air we must breathe — is to keep it tuned.

That means spark plugs must be replaced at regular intervals, as well as the air cleaner and other replaceable parts. And it's vitally important that the engine be tuned to manufacturers' specifications.

The accompanying report notes some of the problems that can increase pollution and how critical tuning is today.

Why Change Spark Plugs at 10,000 Miles

Advised Not Because They Wear Out, But Rather as a Safety Factor Against Misfirings

Ever wonder why you should change the spark plugs in your car after every 10,000 miles of driving?

There's a good reason. The 10,000-mile plug change recommendation is not actually based on the fact that spark plugs are "worn out," in the strictest sense, after 10,000 miles.

This figure—selected after extensive spark plug life tests—merely represents a safety factor beyond which plugs are likely to misfire under the sudden demands of peak acceleration or extremely heavy load. It also represents the point at which gas economy begins to drop and starting becomes more difficult.

Champion Spark Plug Company engineers consider a spark plug worn out when it reaches the point where it is likely to misfire—regardless of its appearance. And, contrary to popular opinion, misfiring doesn't necessarily mean the plug failed to create a spark. It simply means that the plug failed to ignite the gasoline properly, whether a spark was produced or not.

Many Drivers Ask

How can a spark be produced and the plug still misfire? Because "spark tracking" (or high-tension current leakage) through carbon deposits on the spark plug's firing end can result in a weak spark, which in turn causes incomplete burning of the fuel mixture, and results in a loss of both power and economy.

High resistance, which develops as the spark plug electrodes become rough and uneven and the gap between the electrodes increases, also can result in the spark being too weak. Here, too, the gasoline isn't ignited properly and incomplete burning of the fuel charge can result.

A new spark plug with the correct gap setting needs about 5000 volts to fire. However, as the plug remains in service, constant heat and chemical attack plus electrical erosion cause the gap to become wider, thus increasing the amount of voltage to fire the plug.

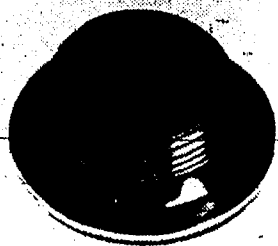

Spark plug gap growth occurs at a rate of about .001 inch for each 1000 miles of driving. Consequently, a set of plugs that has been in service for 10,000 miles generally will have gaps that are about .010 inch wider than the original settings and higher voltage is needed to make them spark.

This is only for normal driving.

Operating the engine at very high speed can decrease the amount of coil voltage available to fire the spark plugs by 30 to 40 percent. Accelerating to pass on a highway may practically double the voltage burden on the spark plug.

Slow Acceleration

That's why misfiring is first noticed while accelerating because it's here that the plugs actually can re-

Carbon Fouled Plug

quire more voltage to produce a spark than the ignition system is capable of producing—especially if the plugs are badly worn.

Now, back to the 10,000 miles change recommendation.

Most spark plug engineers agree that a safety factor is needed in the spark plug to ensure proper plug performance under every possible operating condition. Consequently, they try to keep the amount of voltage necessary to spark the plugs well below the amount of voltage that the coil is capable of producing. And keep in mind, this safety factor must take into consideration the fact that as the ignition system becomes older, its potential high voltage output drops off.

A new ignition system, for example, may be able to produce over 30,000 volts of electricity. The same system after 20,000 or 30,000 miles without replacing any of the parts may only be able to produce 15 to 20,000 volts.

Pre-Winter Tune-Up Insurance Against Hard Start Problem

A pre-winter tune-up remains the motorist's best insurance against starting problems.

This was one of the findings of the most recent study of hard starting problems conducted by Champion Spark Plug Company. Motorists in the United States and Canada were surveyed on their winter-time starting experience and on maintenance performed on their cars during the winter.

Results of the survey indicated:

Motorists who corrected hard starting by charging their batteries had up to three times the incidence of repeated failures than those who had tune-ups performed. Motorists who replaced batteries to correct starting problems still had from 28 percent more repeated trouble (in the U.S.) to 90 percent more (in Canada) than tune-up purchasers.

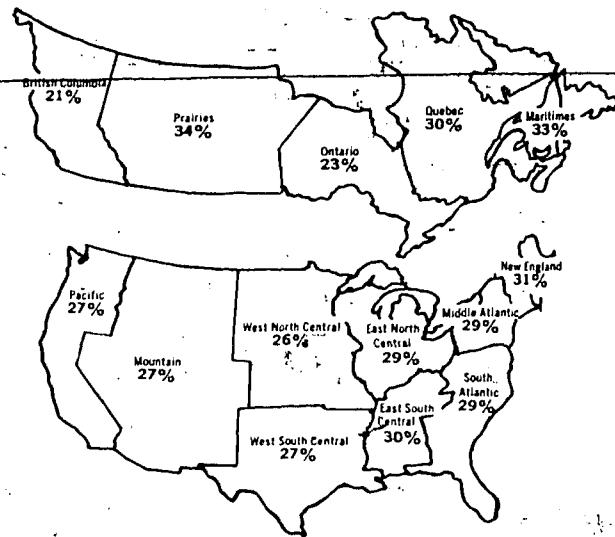

The effect of pre-winter maintenance was also demonstrated in the survey. In the United States, 28 percent of all motorists had starting problems at least once during the winter. Canadian car owners, living in a considerably colder climate, had a 27 percent rate of "won't starts."

Key factor in these statistics, according to Champion, is the comparative rate of tune-up purchases. In the U.S., less than one out of every three motorists (33.1 percent) purchased a pre-winter tune-up. In Canada, 41.6 percent bought tune-ups.

The fact that residents of colder areas are more tune-up conscious than their warmer-climbed counterparts is reflected in regional breakdowns of starting problems.

Motorists in the West North Central U.S. (including Minnesota, the Dakotas, Iowa, Kansas, Missouri and Nebraska) had four percent less starting trouble than motorists in Kentucky, Tennessee, Alabama and Georgia.

No Area is Immune

No region of the United States or Canada is immune from starting trouble. Motorists in warm California or Florida are as likely to have difficulty as car owners in Montana and Michigan. In fact, motorists in cold Ontario have only slightly more starting trouble than their British Columbia counterparts who enjoy a mild winter climate. When comparing the two provinces in terms of tune-up purchases, the reason is apparent. Ontario has a high incidence of tune-ups while British Columbia has a low one. Compared to the U.S. average, Ontario has about five percent less starting trouble.

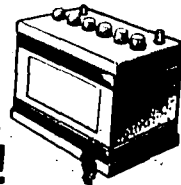

Car owners in Ontario, Canada, had four percent less difficulties than California, Oregon and Washington

State drivers.

The message seems to read, for trouble-free winter driving START with a tune-up.

Everybody's talking about pollution

but did you know you really can do something about it?

A recent tune-up clinic conducted with a large number of cars by engineering students at the University of Michigan found this: A tune-up did reduce exhaust pollution—a big 55% on the average. Of course, in some cars the reduction was less. But in others, exhaust pollutants were reduced even more.

Please. Won't you make it a point to take your car in for a tune-up? At least once a year or every 10,000 miles.

Toledo, Ohio 43601

Further clinic results are in the free factbook, **WHAT YOU CAN DO ABOUT YOUR CAR'S EXHAUST POLLUTION**. Send a self-addressed, stamped envelope to: Tune-Up Clinic Factbook, P. O. Box 910, Toledo, Ohio 43601
