TF sheriff candidate criticizes incumbent

Editor, Times-News:
I am not a man who enjoys making waves. I like the establishment.
There does come a time in most people's life, however, when they must take a stand, when they must no longer ignore practices their moral code rejects.

I have dedicated my life to law enforcement in Twin Falls County. Every person does have standards he must live up to in order to be acceptable to himself. This is why I filed for sheriff and am doing every honest thing within my power to win the August 3rd election.

The people of Twin Falls County have been deceived. The sheriff's office is not an efficient, quality law enforcement agency. Citizens are not getting their tax money's worth.

Mr. Conder has increased his staff of deputies from 10 in 1968 to the present 17. His budget of county tax money has increased from \$142,950 in 1968 to the current \$24,944.

However, the quality and effectiveness of the sheriff's office has not been raised; rather it has been lowered through the hiring of untrained, untried deputies.

There is no standard hiring procedure, even to the point of no application forms, no background checking, and no record of past applicants.

Sheriff Conder does not encourage his deputies to better themselves through education and law enforcement classes.

No departmental meetings are held; neither is there any discipline action taken even when badly needed.

An example of this is the autographed bullet holes in the ceiling and filing cabinet in the sheriff's office as well as the same in county cars put there, not by law-breakers, but by Twin Falls County deputies during duty hours.

All this plus numerous other problems add up to the all-time low morale of the well-trained, professional deputies.

I'm sure many Twin Falls County citizens would be amazed to learn that during peak crime hours - 12 a.m. to 8 a.m. - there is only one county car and one deputy patrolling the entire county.

However, during daytime hours, 8 a.m. to 5 p.m., there are six deputies plus office help - the deputies often leave the crowded office and spend most of their shift in coffee shops.

The Sheriff has consistently refused to cooperate with other law enforcement agencies within the county in the investigation of

crimes which affect both city or town and county residents. The feelings of resentment and jealousy have been fostered and flourish between all city-town agencies and the sheriff's department.

The accounting practices and wasting of county funds has tormented the responsible deputies for several years. I could no longer stand by and let this continue especially since the Sheriff recently assured me he intends to serve only a year or two if re-elected and they recommend a deputy in the office be appointed to serve the remainder of his term. Again, the trust of the residents of Twin Falls County would be betrayed by having a Sheriff they did not elect.

I believe I can correct the incumbent sheriff's abuses of this office and restore professional and honest law enforcement to the citizens of this county, without further waste of their county tax money.

I will also significantly increase their protection especially during high crime hours. Law enforcement is my life - a life I want to be proud of.

Spain police make arrests

MADRID, Spain (UPI) - Police investigating the wave of bombings that hit Spain over the weekend have made a number of arrests, the Spanish news agency Europa Press said.

Authorities, who say no details will be revealed until the case is cleared, did not immediately confirm the report.

Democratic opposition politicians, those Spaniards who stand to suffer most from the wave of bombings, pressed the government to determine and announce publicly who was responsible for the violence. Newspapers make the same demand.

A previously little-known leftwing "October 1 Antifascist Resistance Group" claimed credit for the bombings but some leftists blamed the extreme right.

Right-wingers have often cited "left-wing violence" as a pretext to oppose political reform.

Reagan predicts triumph for Carter

PIERCE (UPI) - Ronald Reagan has predicted Gerald R. Ford will win the GOP presidential nomination next month at Kansas City and went one step further to predict that Jimmy Carter will be the next president.

Reagan, 75, will be a freshman at Timberline High school in this north central Idaho community and is the relative to his namesake, the former California governor.

Soviets flexing new sea muscles

WASHINGTON (UPI) - The Soviet aircraft carrier Kiev, out of Russian waters for the first time, moved south of Crete and into the eastern Mediterranean Tuesday, U.S. Navy analysts said.

The analysts believe the Kiev's movements are a "significant development" that represents an additional increase in attempts to project Soviet power throughout the world.

The Kiev, the Soviet Union's only full-fledged aircraft carrier in operation, left the Black Sea through the Bosphorus Straits about dawn Sunday. It is about 900 feet long, between 30,000 and 40,000 tons, and roughly the same size as a U.S. aircraft carrier in World War II.

It is accompanied by two cruisers and two destroyers. One intelligence analyst said it appeared the Kiev had some command and control ability.

"It looks like they've got themselves a little carrier task force," he said. "This isn't any sea trial."

Intelligence reports reaching Washington say the Kiev is equipped with 25 to 30 Yak-36 short-takeoff and landing aircraft and about two dozen "Hormone" twin turboprop helicopters. The Yaks are similar to the British-built Harrier aircraft now being flown by the U.S. Marines.

A U.S. ship is reported in the neighborhood of the Kiev, the

same way the American carrier task forces are always shadowed by Russian vessels.

"It's a significant development," said one Navy source, explaining that the Russians have not had a place to land and take off airplanes in the Mediterranean since Egypt denied them landing rights last year. All they had then was land-based aircraft, easy to spot and track by radar intelligence experts say.

The Soviets have one other carrier at sea, one nearly built and a couple more in earlier construction stages. "This represents a national decision to take one more step," one expert said. "It has moved from a coastal power to a blue water navy, and now it is moving into a position where it can project power ashore. It represents a challenge for us, a decision we must make."

Handful of US advisers only Yanks in Thailand

BANGKOK, Thailand (UPI) - The United States Tuesday sent home its last combat troops from Thailand, leaving 245 advisers and \$388 million in equipment as the only vestige of its 15-year military presence in mainland Southeast Asia.

In the privacy of his last flight, a command headquarters Brig. Gen. Henry C. Mohr left Bangkok and folded his personal flag, symbolically closing the U.S. Military Assistance Command, Thailand.

"It's a little sad," said the last of 25 servicemen to leave. "I've been here since 1961." Sgt. George L. Davis, 40, of Cincinnati.

"I would have liked to stay a bit longer," Davis said. "These people (the Thais) could have used our help. But it's government policy and I'm the last man to go."

In March, the Bangkok government rejected an American request to accept the presence of 3,000 U.S. troops in the country indefinitely and ordered out all but a maximum 270 advisers by Tuesday.

The withdrawal left Thailand - the only non-Communist country in Indochina - with 245 American military advisers, \$388 million in equipment and bases, a few Marines at the U.S. Embassy and several servicemen at a laboratory of the Southeast Asia Treaty Organization, itself due to be phased out this year.

MSGT. GEORGE DAVIS ... last Yank from Thailand

The pullout ended 15 years of military involvement in mainland Southeast Asia beginning with the dispatch of U.S. advisers to South Vietnam in 1961.

The only operational U.S. troops and the only American command in Southeast Asia now is in the Philippines. The American closedown went quietly, without fanfare or threatened demonstrations by leftwing student groups.

Police reported students threw two bombs at a right-wing vocational school, but there were no injuries.

Security at the U.S. Embassy was increased slightly, with low barricades manned by two uniformed policemen, but traffic in and out of the sprawling grounds continued as usual.

The American withdrawal from Thailand began shortly after the Aug. 15, 1973, halt in U.S. bombing of Indochina ordered by Congress. At that time there were 48,000 American GIs in Thailand.

In the ensuing two years, South Vietnam, Cambodia and Laos all fell to the Communists.

If there are men on Mars . . .

Probe finds water clues, little Argon gas

By WALTER SULLIVAN
N.Y. Times News Service

PASADENA — The first definitive analysis of the Martian atmosphere has provided long-sought clues to the planet's history including the possibility that enough water is hidden beneath its surface to cover the planet one mile deep.

The chief surprise has been Viking's discovery that argon, an inert gas, constitutes far less of the Martian atmosphere than scientists previously believed. Whereas estimates of the argon level on Mars had been as high as 30 per cent, data from Viking indicate that it is only about 3 per cent, compared with about 1 per cent in the earth's atmosphere.

This and other detailed determinations should help explain why the air of Mars has so little nitrogen and should bear on such questions as the history of the earth's known atmosphere including the proposal that the atmospheres of both the earth and Mars were formed in catastrophic eruptions very early in each planet's history.

Such an early formation of the atmospheres would mean, as well, the early appearance of oceans or smaller water bodies suitable for the evolution of life.

When the Soviet Union's Mars 6 plunged into the Mars at-

mosphere in its unsuccessful landing attempt in 1974 it was thought that perplexing features of its data transmissions could be explained if 30 per cent of the Martian air consisted of argon.

The possibility of so large a percentage also offered an explanation for observations made near one of the Martian poles a few days ago by the Viking mothership that cast loose the lander Tuesday.

Tuesday's measurement, which is considered definitive, showed the argon level to be in the vicinity of 3 per cent.

The lower abundance of argon is good news for those experimenters hoping to learn the composition of Mars's surface materials. Their instrument aboard the lander will determine such compositions with a gas-chromatograph mass spectrometer that could have been rendered useless by an atmosphere rich in argon.

The project scientists believe Tuesday's measurements will help clarify whether, as some of them believe, there is still enough water hidden beneath the surface of Mars to cover that planet to a depth of one mile.

The amount of argon in the air of Mars is a critical index of the atmosphere's history. If volcanic eruptions and other processes generated the same atmospheric constituents as those produced

by such activity on earth, the present abundance of argon could have been as high as reported by the Russians, it was argued, in the neighborhood of 25 per cent.

The reasoning is that since argon is chemically inert and too heavy to diffuse away from either the earth or Mars, all of it originally in both atmospheres should still be there. On earth it constitutes only 1 per cent of the air, which is 78 per cent nitrogen.

If, however, the original atmosphere of Mars resembled the initial atmosphere of the earth, and then was robbed of its nitrogen and oxygen, the Martian argon would be relatively abundant.

Tuesday morning's observation was a direct measurement made as the lander plunged from 180 to 60 miles above the surface and should be definitive. The analysis was by mass spectrometer, which not only discriminates between various elements but between the various forms or isotopes of each element. The latter differ only in slight variations in weight.

The present atmosphere of Mars is very thin and cold with only one-thousandth the amount of water vapor in the earth's air. Its primary constituent is carbon dioxide. For many years

it was assumed that the Martian air is dry because the planet has lost almost all its water through diffusion into space.

It turns out that assuming these rates have remained steady and other factors such as the heat of the sun have not changed greatly, the process throughout the 4.6 billion year history of Mars could have removed only enough water to cover the planet to a depth of about 300 feet.

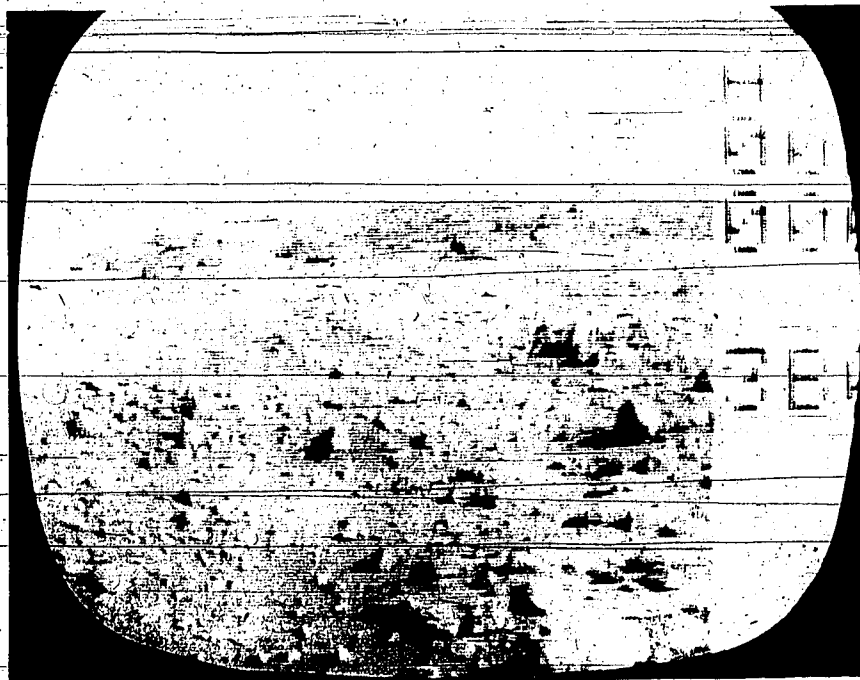

Yet if Mars, presumably formed from about the same mix of materials as the earth's, produced proportionately as much water, there still should be enough to cover it at least one mile deep.

The earth's water — in the air, ground, oceans and lakes — is sufficient to cover the globe to a uniform depth of two miles. The surface of Mars tends to become dry because at so low an atmospheric pressure, water evaporates rapidly. While the Mariner 9 pictures showed evidence of snaking riverbeds and other water action, the new and far more detailed Viking orbiter pictures show a landscape widely scoured by what are assumed to have been great floods.

The number of craters dug by occasional meteorites into these presumably water-formed features is sufficient to indicate that the flooding occurred many millions of years ago.

... this is the desert they see

Scientists jubilant over Viking success

PASADENA, Calif. (UPI) — The scientists and engineers who led the Viking project to a successful culmination after eight years of work, voiced their pleasure and excitement today amid bursts of applause from guests and news people at the Jet Propulsion Laboratory.

"We've gained one more important objective in our space mission," Dr. James Fletcher, NASA Administrator, said, "with the promise of more to come."

He congratulated his colleagues for, "this almost miraculous, but certainly stunning even."

Dr. Noel Hinners, associate administrator for space science, said he was almost speechless.

"Really, I can't think about the science right now. My heart's beating fast and I really had tears in my eyes for the first time since I got

married. It's mind boggling, what happened."

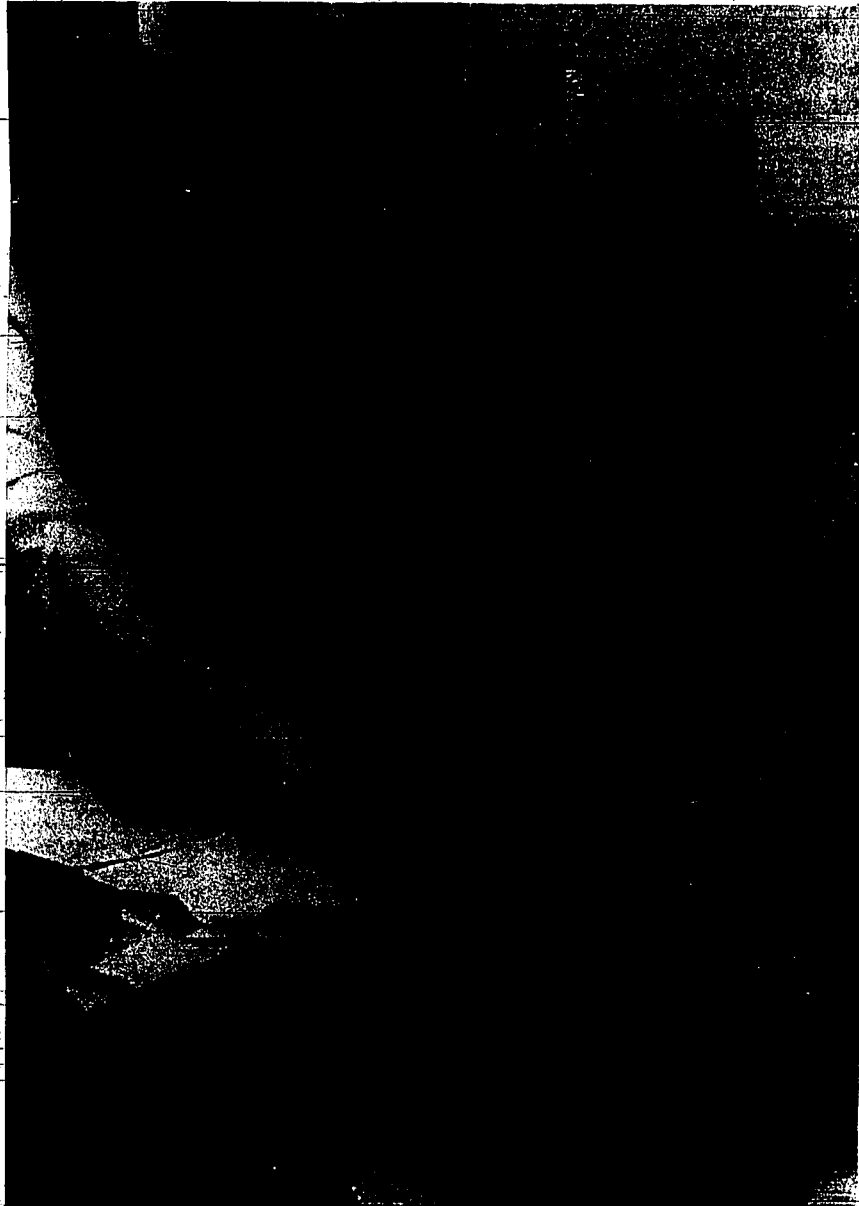

Robert Kraemer, director of planetary programs, compared Mars to the mythological god of war named for the planet.

"It had a shield of surface roughness. We found some holes in that shield," he said, "only to find that he was wearing a coat of armor plate behind that shield."

Jim Martin, project manager, received a loud ovation from the assembled news people and his colleagues.

"I want to say this has got to be the happiest day of my life. It's just incredible to me that all this worked so perfectly."

Dr. Thomas Young, project director, said that now the search begins. "The Viking lander is just the beginning."

Tension, cheers

NASA officials show tension (at left) as they see first pictures from Mars. Then at right, a hearty round of congratulations follows the spectacular pictures of the stony Martian desert. (UPI)

Little 'grazing' on Mars

WOHLAND, Wyo. (UPI) — A rancher who filed a claim 30 years ago for five sections of grazing land on Mars says pictures of the planet from the Viking 1 spacecraft convinced him to abandon his claim.

"It looks like it's kind of badlands and wouldn't range many cattle anyhow," Smoky Rauchfuss said of the pictures showing rocky deserts and sand dunes.

Rauchfuss, who owns a ranch on Heart Mountain, said he filed the claim with the Bureau of Land Management in February, 1946, to gain publicity for his outfitting business. He and his partner also requested permission for a street-car concession on the moon.

"Neither of these land uses is under the jurisdiction of this office," Fred Johnson, BLM commissioner at the time, said. But he promised to announce the findings if Mars and the moon ever came under BLM authority.

Rauchfuss said the scheme was successful since he and his partner received the national publicity they had sought.

"The caper was fun," he said. "It worked and didn't cost us a dime."

Pictures hint life conditions

(Continued from p. 1)

Dr. Michael McElroy, an atmospheric scientist from Harvard University, said the data suggest that Mars had a nitrogen-rich atmosphere billions of years ago. Nitrogen is a key to the origin and support of Earth-type life.

Although there is only three per cent nitrogen in the Mars atmosphere now, according to the preliminary data, McElroy said it is more easily broken down in Mars' upper atmosphere into nitrogen atoms than it is on Earth. Atomic nitrogen is the form that organisms need.

He said there is now enough nitrogen in Mars' atmosphere "to allow biology to go well if other conditions are right."

"The ionosphere is producing a shower of fertilizer for Mars," he said at a news briefing.

The presence of argon in the atmosphere, although far less abundant than some earlier data indicated, means Mars must have expelled gases from its hot interior at a rate about 25 times less than that which occurred on Earth, McElroy said, would suggest that Mars lost about 25 times less water than Earth.

But since Earth has so much water, McElroy said this means Mars still must have large amounts of water in a subsurface reservoir, probably in the form of ice.

Asked what this all means about the possibility that Viking might find some kind of life on Mars, McElroy said:

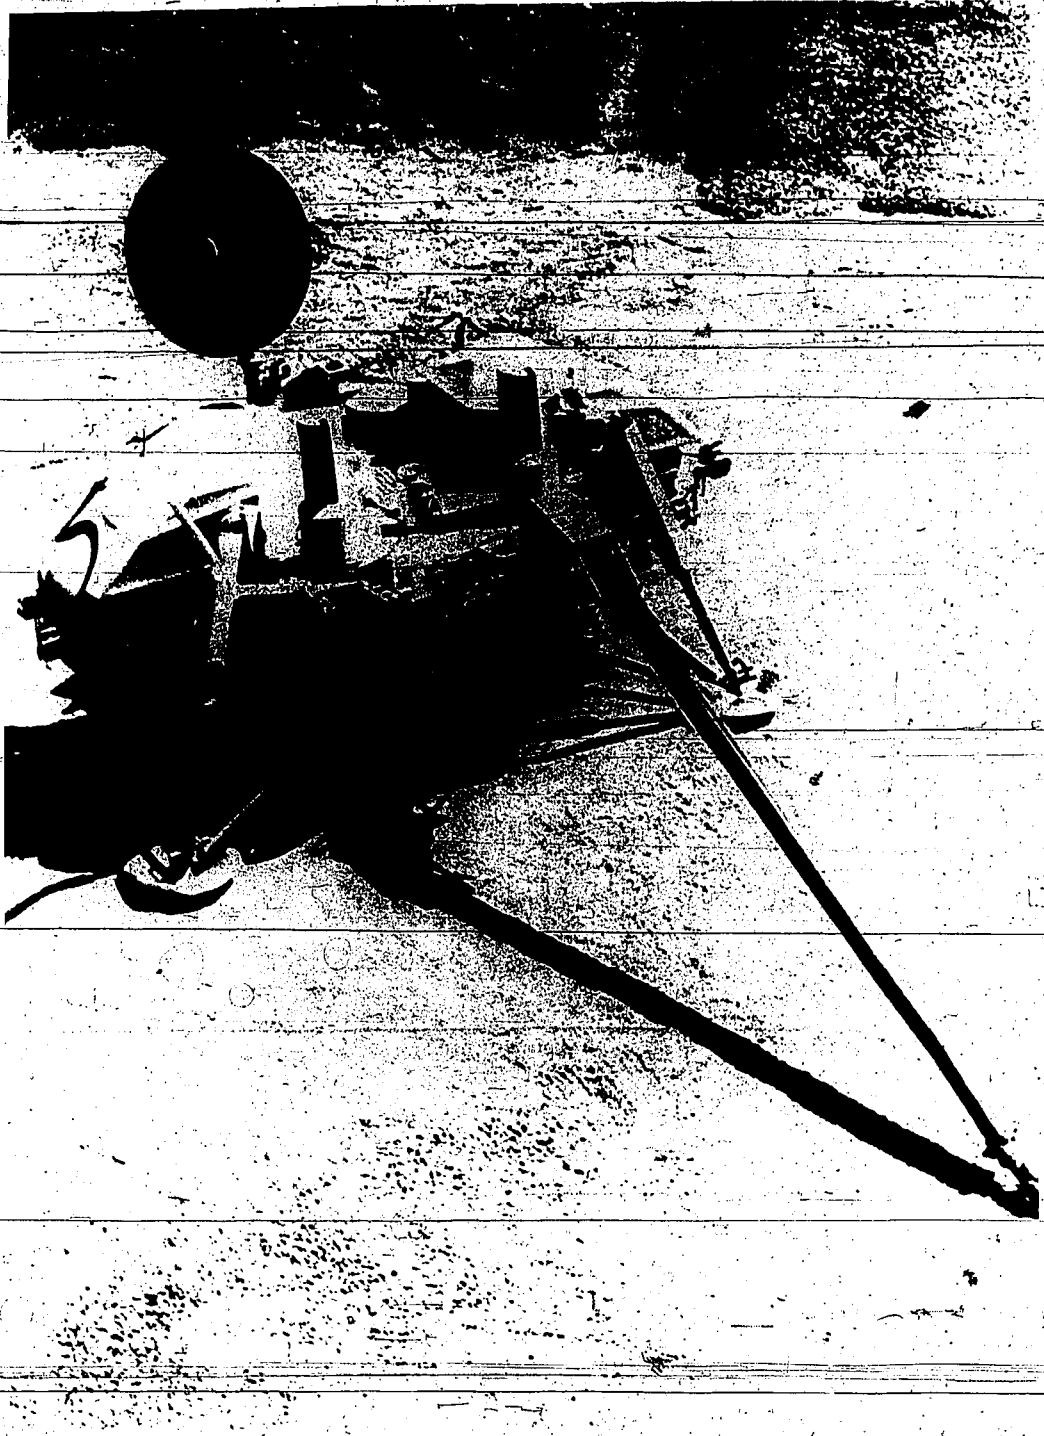

"If you look at what you need for life as we understand it, you need energy, that we have in form of sunlight; you need water, that we have; you need nitrogen, that we have; you need carbon, and we've got lots of that; and you need phosphorus and phosphate which almost certainly are present in the rocks.

"I see no reason, from anything that we know, to exclude the possibility of the evolution of life.

He said a serious question is how long was liquid water present on Mars in its early days when the atmosphere was thick enough to support it.

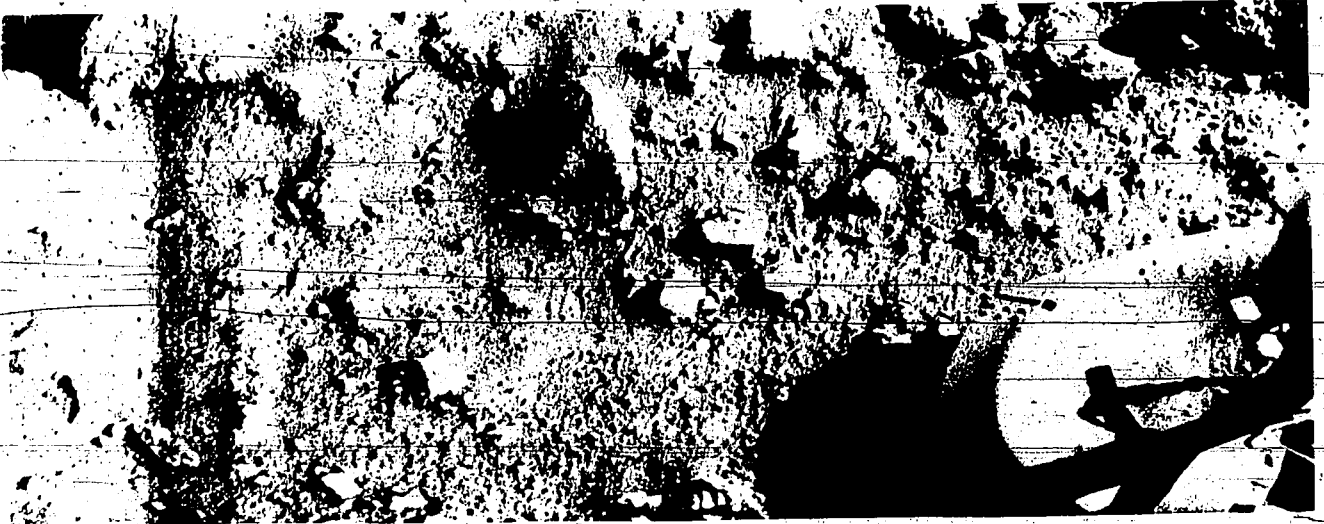

"Was there enough time to get things started, and if it got started, was it smart enough to protect itself when things got harsh?"

"If I were a Martian I would probably want to grow roots and slick my head up periodically to get some energy for photosynthesis," McElroy said.

Space pioneer

THIS IS what the Viking Mars Lander looks like. This full size working model of the craft which set down on Mars Tuesday is on display at the Jet Propulsion Laboratory in Pasadena. The model shows the long arm designed to scrape up samples of the red planet's soil.

Historic first picture of Mars is here 'enhanced' by a computer for a clearer image

World press cheers 'stupendous' Viking

By United Press International

Newspapers around the world praised the American landing on Mars today, calling it a "stupendous achievement" and "a technical masterpiece of historic dimension."

"The impeccable landing on Mars is a stupendous achievement—almost too marvelous for words," the London Daily Mirror said. "This peaceful mission in quest of knowledge is a stirring tribute to America in its bicentennial year, and a reminder of man's great genius for overcoming the seemingly impossible."

Even the conservative Daily Telegraph joined the enthusiasm with its headline: "No one about on the red planet."

In Dusseldorf, West Germany, the Rheinische Post said, "We should not deny the Americans recognition of their somewhat belated contribution to the Bicentennial."

"They have achieved a technical masterpiece of historic dimension," it said.

The most reserved comment came from Soviet papers, that carried only a brief account of the Viking landing, offering no praise or comment of any kind. The Soviet papers were dominated by two cosmonauts orbiting earth in Salyut 5.

La Stampa newspaper of Turin, Italy's second largest newspaper, said the information gathered by Viking 1 "may

help transform our lives in a way and to an extent we are far from imagining."

Asian newspapers gave prominent display to the landing. Most major newspapers in Hong Kong, both English and Chinese-language, displayed the story prominently.

The feat received similar attention in Japanese, Singapore and South Korean newspapers.

The Express of Hong Kong ran the story under the headline: "A New Era If Man's Space Probe is Successful."

The left-leaning Ta Kung Pao newspaper of Hong Kong also printed a lengthy report on Viking's touchdown.

Two major South American newspapers gave good coverage to the landing and ran a commentary written by biology professor Chang Nam-ki of the Seoul National University.

"A probe for life on Mars, which is regarded as one of the most scientific projects in human history, has just begun," Chang wrote.

He said the Viking robot would provide vital information on the existence of life on the red planet, but said he believed no human beings existed on Mars.

All six major Japanese daily newspapers reported extensively on the Viking touchdown with accompanying pictures.

Amazing camera needed to transmit Mars photos

© N.Y. Times News Service

PASADENA, Calif.—When President Ford telephoned Tuesday to congratulate the Viking flight team, as the Viking 1 landing craft was transmitting its first panoramic view of the landscape at Chryse, he asked the Project Manager James Martin what type of camera had sent back the first photographs from the surface of Mars.

The camera, Martin told the President, was designed to collect its images of the desert-like plain "one line at a time."

"That's why it takes so long to take a picture," Martin said.

The conversation left no more time for explaining the complexities of a photographic system that was designed to be lightweight, use little power, and take its pictures slowly enough so information could be radioed at once across 200 million miles to Earth.

The facsimile system chosen six years ago by project managers and scientists records its information differently from both a conventional still-picture camera and a television tube. The system is comparable to the one used on the two Soviet craft that radioed back the first pictures from the surface of the planet Venus.

The two cameras on the lander are able to take pictures of sky, sun and soil in black-and-white, visible color and infra-red light. They started their work Tuesday with a high-resolution close-up of a Viking foot pad and nearby soil and a low-resolution panorama of a landscape stretching out toward a horizon nearly two miles away.

Because black and white pictures take only one-third of the time needed to transmit color signals, scientists eager to assure immediate return of at least some information about the Chryse site—in case of some early failure after landing—postponed the first color picture until Wednesday. At that time, color picture-taking would be aided by sunlight from nearly directly overhead.

The first color image has been described by the imaging team leader, Dr. Thomas Mutch, a geologist from Brown University, as "potentially the most important of the entire mission." The image is expected to begin building up on television screens at the Jet Propulsion Laboratory here shortly before 1 p.m. EDT.

Unlike a still-picture camera, the two identical cameras aboard the Viking lander are designed to use a moveable mirror to take their pictures on a scene on Mars, dot-by-dot and line-by-line.

The light intensities of each dot are recorded by one of an array of 12 silicon semiconductor devices called diodes, each designed to be sensitive to different wave lengths of visible or infra-red light. A number are placed in order to focus accurately at fixed distances between six and 43 feet from the lander.

Because all the light goes to a pre-selected diode, some measurements with such facsimile camera are several times more accurate than those of a television image-recording tube, with many light-sensing dots over its surface that are exposed to light in sequence.

According to engineer Friedrich Hück of the Langley Research Center, who was credited with the basic design of the lander camera system, manufacturing of dots on a television tube inevitably produces variations in the dots' ability to record light intensity.

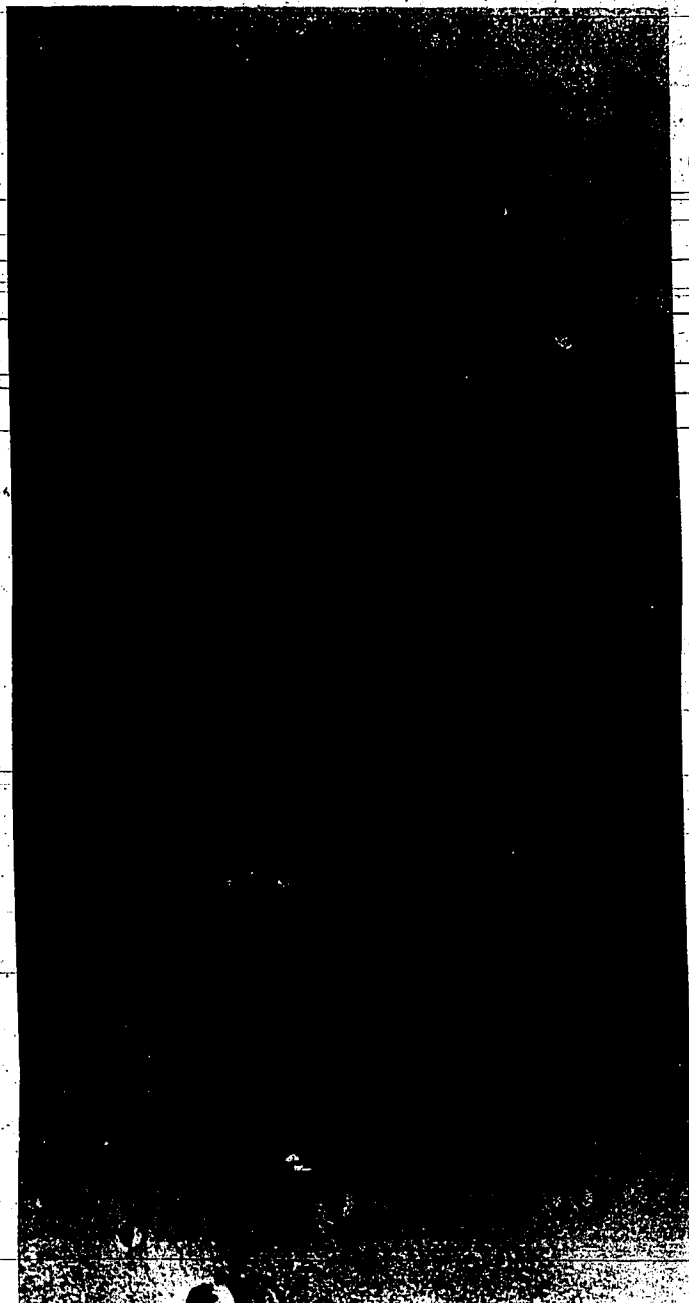

Because of this, a television camera could not have been used for infra-red radiometry studies of the Martian atmosphere, Hück said. This was confirmed by two engineers of Itek Corporation of Lexington, Mass., which manufactured the cameras. They are Charles Ross, Itek project manager for Viking and Robert Penninger, technical director.

A television camera able to scan across a 360-degree panoramic view, Hück said, would have needed a moveable mirror that would have added weight.

The 15-pound camera assemblies on Viking, he said, weigh less than half of the television cameras employed on the Surveyor craft that landed on the moon from 1966 to 1968. Their maximum demand for 35-watts of power is only a fraction of Surveyor's, he said.

Although the 120-million imaging system, like other Viking systems, was supposed to use existing technology to insure reliability, Hück said, the components had never been put together before in this way. The cameras not only had to meet limits on weight and size. They had to withstand 40 hours of heating to beyond the boiling point of water to kill any terrestrial organisms that might contaminate Mars or spoil the results of Viking life-search experiments.

As engineers and workers of Itek made six units capable of flying to Mars, they encountered "1,001 problems," Hück said Monday in an interview.

Pictures reveal Mars vistas unlike Moon's

PASADENA, Calif. (UPI)—The first picture from the surface of Mars, showing small rocks and an apparently hard sandy terrain, moved line by line across television screens at the Jet Propulsion Laboratory today.

"Here's rocks and surface," Dr. Thomas Mutch, lander imaging team leader said. "This certainly doesn't have the feel of a lunar surface. This is a very distinctive surface."

The transmission continued from Mars, 214 million miles away, showing next a scan of the horizon.

Dr. Al Hibbs of JPL mission control said "The resolution is fantastic."

The first photo scanned slowly from left to right disclosing small rocks and medium sized boulders lying on the desert like floor in late-afternoon sun.

When it moved to the far right, the lander's footpad came into view so clearly, the rivets could be counted.

"To think the view of the horizon is yet to come," Mutch said. "The view of the horizon is going to be mind boggling."

Minutes later, the second photo, with the camera pointed slightly higher, panned slowly,

showing a clear sky, a field of light and dark rocks and in the distance a flat mesa.

"We landed late in the afternoon. The sun is coming from the northwest," Hibbs said. "Sensational."

Mutch said the boulders appeared similar to ones seen in southwestern United States deserts. "Here is a geologist's delight," he said.

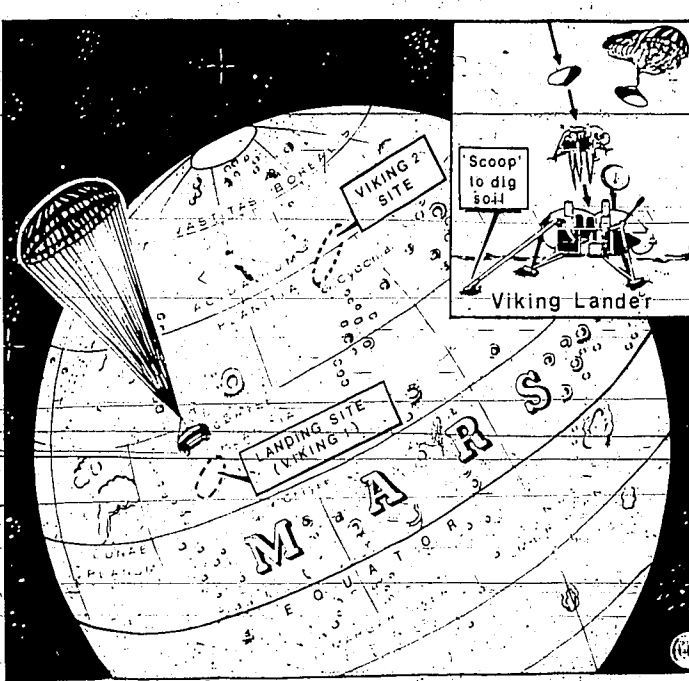

Mutch said scattered light, possibly from the atmosphere and possibly reflected from the lander, filled in the shadows. Dust from the Martian surface pooled in the concave bowl of the footpad.

The description of the photos was interrupted by a telephone call from President Ford in Washington to project manager Jim Martin and NASA Administrator James Fletcher. The voices carried over the slowly expanding view of the Martian horizon.

A few minutes later the Martian sky brightened, sharply outlining the distant rocky horizon.

"We're looking of the first Martian sunset," Mutch said, his voice high with excitement. "Or something very close to it."

MARTIAN surface around the area of the landing site, above, marked with a cross, shows a flat plain pocked by small craters and crossed by north-to-south rills. Below, UPI map shows location of the landing site on face of the red planet. (UPI)

Radio network accurate

PASADENA, Calif. — Radio astronomers in Maryland, California, Australia and the Soviet Union have banded together to form an observing system as wide as the earth. It is capable of determining the angular width of objects as narrow as a human hair 100 billion miles away.

The system has already been used to chart small regions of intense microwave radiation in two distant clouds of dust and gas where new stars and planets appear to be forming. In one of the clouds there seem to be more than 100 such regions, each only 50 million to a few hundred million miles wide — very small on an astronomical scale.

The method used, known as long-baseline interferometry, consists of simultaneously observing a source of radio emissions from two or more stations and determining the time delay of each recording with hydrogen clocks accurate to one second in a million years.

That is considerably more accurate than the cesium clocks used in earlier observations of this sort. In both cases the vibration rates of the atoms serve as the timekeeper.

The recordings are then "played" against one another, the

extent to which the converging waves "interfere" with each other determining the angular width of the source.

The observations are described in a report issued for release Tuesday by the Naval Research Laboratory. They were made at a wavelength of 1.31 centimeters with the laboratory's dish-shaped antenna 85 feet in diameter at Maryland Point in Maryland, the 130-foot dish of the California Institute of Technology at Owens Valley, the 210-foot antenna of the National Aeronautics and Space Administration at Goldstone, Australia and the 75-foot dish of the Crimean Astrophysical Observatory at Simeiz in the Soviet Union.

Only two or three of these stations could observe the targets under study at any one time. The Maryland-Tidbinilla separation almost equals the earth's diameter.

Both of the target areas studied, lie within the constellation Aquila and are known as radio sources W30M and W31.

The observed emissions are generated by clouds of water vapor that act in the manner of a maser, generating signals of great intensity. A maser functions in much the same manner as the laser, but at microwave frequencies rather than those of visible light.

people

—Truck van unearthed

WORKMEN prepare to raise the 30-foot truck van that was used to entomb 26 kidnaped children and their bus driver for 18 hours until they managed to escape late July 18. The van was 6-feet wide and 8-feet high after the top was crushed in by the weight of the earth above. The van's tires were still inflated when it was pulled from the hole. (UPI)

Kidnap van hidden in broad daylight

LIVERMORE, Calif. (UPI) — The kidnapers of 26 children, apparently buried in broad daylight a moving van which was used last Thursday to entomb their victims.

Newsmen Tuesday went to the rock quarry where the kidnapers took the children and the school bus driver they abducted 100 miles away at Chocoma. Investigators dug up the van, which bore a sticker reading: "Find us first. In the yellow pages."

The kidnap victims were forced to enter a tiny hole and descend a ladder into the van from which driver Edguy and some of the older youngsters climbed their way out 16 hours later.

Madera County Sheriff Ed Bates, who held a joint news conference with Alameda County Sheriff Tom Houchins, said the kidnapers used heavy equipment, such as a bulldozer, to bury the 30-foot-long van.

"I always say if you are

going to commit the crime, be obvious as hell," said Bates. "If they had snuck around here with shovels at night, they would have been caught."

Bates said he still had no idea of the motive for the crime. "Whoever did it put a great deal of planning effort and even money into it," he said.

The kidnapers prepared the van by cutting a hole in the top for an entry and bored two five-inch holes that held exhaust fans. A 4-inch flexible hose 45 feet long extended from one of the holes into tree branches where it could not be seen. The van also was equipped with mattresses, a small amount of food and water and an improvised toilet.

The vehicle was originally owned by the Palo Alto Van and Storage Co., which sold it last November. The sheriffs declined further comment.

The Fresno Bee newspaper Tuesday quoted a "source

close to the investigation" as saying that at least eight persons were involved in the kidnap plot.

In Chowchilla, police escorts were provided district school buses. Authorities said that residents' mall "also is being checked for ransom demands."

City officials declared Sunday Aug. 1 "Edguy Day," at which time the veteran driver will be honored for his heroism during the ordeal.

About four hours after the sheriff's news conference, it was announced that all future comments on the case would be handled through a task force made up of representatives of the district attorney's offices of Alameda and Alameda County and California Ass. Atty. Gen. Marjorie Parker.

Siamese twin case studied

GALVESTON, Tex. (UPI) — Doctors say it will be at least two weeks before they know if Siamese twin girls, born last week may be separated.

The University of Texas Medical Branch said Tuesday girls were joined at the chest and abdomen and were sure the two shared a liver.

Dr. Charles Powell Jr. said they could be separated at the liver, but it was too soon to tell if they also shared a heart or other aspects of their circulatory system.

He said the infants were in good condition.

The mother, Barbara Ann Jones, 24, and the father, Fred Jones, have three other children, ages 6, 7, and 8 years.

Star goes west

SEATTLE (UPI) — Melissa Hayden, star ballerina with the New York City ballet from 1949 to 1973, will become ballet mistress and school director of Seattle's Pacific Northwest Dance Company.

SINCE her retirement from dancing at the age of 50, Miss Hayden was worked as a lecturer, dance educator, and has written five books, including an autobiography entitled "Off Base and On."

Her appointment with the Seattle company was announced Tuesday by executive director Leon Kallimos.

Royal visit

CHICAGO (UPI) — Mayor Richard Daley was on hand to personally welcome Prince Jean, Grand Duke of Luxembourg, and Duchess Josephine Charlotte at their arrival at O'Hare Airport Tuesday.

Prince Jean praised Chicago as a "striking example of modern America" and noted humorously that there are almost as many Luxembourg descendants living in Chicago as there are citizens of Luxembourg.

Thomas in hospital

DENVER (UPI) — Radio commentator Lowell Thomas Sr. from California to Colorado by private jet with an undisclosed illness, Tuesday said he will undergo tests for seven to 10 days.

"Apparently I have an infection of some sort and I don't know if the doctors are sure they know what it is," Thomas, 54, said from his hospital bed. "They are testing for pneumonia and other things as well."

Cohen home

LOS ANGELES (UPI) — Former gangster Mickey Cohen, 60, was released from UCLA Medical Center Tuesday following two weeks of treatment for fatigue and jaundice.

Cohen underwent surgery late last year for stomach cancer. A triple bypass in the 1940s and 1950s, Cohen served 11 years for income tax evasion in a federal prison, where he was severely beaten and partially crippled by another prisoner.

N-weapon spread called world stability threat

CHARLES YOST
warns of instability

WASHINGTON (UPI) — Charles Yost, the former United Nations ambassador, said today the spread of nuclear-weapons could bring about a world "more unstable than any world known by the human race since the Ice Age."

Yost was a witness before the Nuclear Regulatory Commission, which winds up testimony today on whether to sell about 25,000 pounds of uranium fuel to India. The commission controls all U.S. exports of atomic technology and material.

Yost, a retired career diplomat who served as U.S. ambassador to the U.N. from 1969 to 1971, said he is convinced that nuclear proliferation is "the most critical threat to our national security."

"If my fears are realized,"

he said, "we may well be on the verge of a world in which political confrontation almost anywhere could be nuclear armed. This world would be more unstable than any world known by the human race since the Ice Age."

In the first of two days of public hearings on the sales, question Tuesday, two former high officials of the Arms Control and Disarmament Agency — Herbert Scoville and Adrian Fisher — said other countries, including Pakistan, are almost certain to go nuclear.

They said the proposed sale to India's Tarapur Power Plant would be a signal to other countries on the brink of developing their own nuclear devices. But if the sale to India is stopped by the United States, they said, there is at least a hope that Pakistan and other countries might hold

back.

Scoville said the United States at least should impose strict controls which would force India to give back the plutonium she has stockpiled. Scoville estimates that India's nuclear power plant manufactures enough plutonium for 10 to 20 nuclear bombs a year.

He listed other countries

with the same level of technology as Iran, Egypt, South Africa, and Argentina.

George Kristianovsky, a Harvard professor who helped design the first atomic bomb, said countries like these which have both uranium fuel reactors and reprocessing facilities to separate plutonium from the other spent fuels, "is separated from its

atom bomb only by a political decision and a year or two of intensive technical effort."

Testifying in favor of the sale for the State Department, Acting Assistant Secretary of State Myron Kratzer said chances are remote that India would use plutonium produced by the Tarapur Power Station since other material is available.

Connally outlines job rule

N.Y. Times Service
HOUSTON — John B. Connally says that he would consider accepting the Republican vice-presidential nomination, only if he was assured that he could play a major role in the administration.

He also said that he is "just not that eager" to be vice president, but that his popularity appears to be growing among Republican leaders and delegates.

Connally, 62, was in the United States as chief of protocol at a ceremony at the White House. (UPI)

Demos get campaign fund

N.Y. Times Service
WASHINGTON — The first publicly financed presidential election in American political history was formally set in motion Tuesday with approval of a Treasury Department grant of \$18 million to the Democratic candidates, Jimmy Carter and Walter F. Mondale.

From now until Nov. 2, no private contributions, large or small, can be made to the Democratic ticket, which is thus freed from the traditional political obligations that national candidates owed in the past to the wealthy men and women who financed their campaigns.

A limited amount of private money, about \$33 million, may be raised and spent by the Democratic National Committee on behalf of the Carter-Mondale ticket, and totally uncoordinate support efforts are permissible, but the basic presidential campaign will be fully subsidized and strictly limited to the size of that subsidy.

It took the Federal Election Commission just nine minutes Tuesday morning to agree unanimously to certify the eligibility of the Democratic nominees, thus establishing for them a credit of nearly \$22 million with the Treasury Department.

A little more than a month from now, the commission will make the same allocation to the Republican candidates. Under the law, they could choose to reject the federal subsidy,

finance their campaign entirely with private contributions and escape any spending ceiling in the process, but there is no sign this will happen.

Both President Ford and Ronald Reagan accepted the partial subsidies available for the primary campaign. However, neither has received more than \$7.5 million of the \$29.9 million the commission has approved so far in 1976 for 15 eligible candidates of both parties.

Aides scored
BURLINGTON, Vt. (UPI) — Economist John Kenneth Galbraith Tuesday said that President Ford's economic advisors are "fine men with 18th century minds — men who believe God is a Republican and if they leave things to Him, things will work out."

"But they don't," he said at an informal news conference at the University of Vermont.

Pardon issue dominates Carter news conference

PLAINS, Ga. (UPI) — Jimmy Carter says he believes President Ford will get the GOP nomination but was politically ill-advised to pardon Richard Nixon before his "inevitable conviction" for Watergate crimes.

The pardon issue dominated Carter's first formal news conference Tuesday since his acceptance of the Democratic presidential nomination.

Meeting with newsmen before the start of a top-level staff meeting, Carter also said he will run against "the inclination of Governor Reagan to get militarily involved in Panama, Lebanon, Rhodesia," if Ronald Reagan is the Republican presidential nominee.

Despite his remarks, Carter said he will not raise Watergate and the pardon in the campaign should Ford get the nomination. Rather, the former Georgia governor said, he will run against Ford's "record as president, his ability to govern."

Sen. Walter F. Mondale, Carter's running mate, will come to Plains Saturday night for four days of briefing on foreign and domestic issues by key persons, including a secret briefing by a representative of the CIA.

"Had I been President I would not have pardoned Richard Nixon until after the trial had been completed in order to let all the facts relating to his crime be known," Carter said in response to reporters' questions.

"I don't think there was a secret deal ... Carter said. But he added: "They were ob-

viously very close because Ford was very deeply indebted to President Nixon for choosing him to be the future president. I still think the action he took was improper, ill advised."

Carter said he would have reserved the right to pardon Nixon after the trial and "I think the inevitable conviction of President Nixon."

He said he would not make it a campaign issue because "the American people know who pardoned Richard Nixon ... They don't need to have it raised by a candidate. They would resent it if it was."

Carter also said:

— He saw nothing "illegal or improper" in Mondale's sponsoring legislation to give investment diversified services Inc. special tax privileges. Carter compared it to his own efforts as governor to strengthen industries in Georgia.

— He did not see "anything wrong or improper" in pollster Pat Caddell, who is on his staff, selling survey data to Saudi Arabia because Caddell is not a policy maker. He said Stuart Eizenstat, his issues director, is Jewish and a strong proponent of Israel.

— He would be glad to meet with any group that "substantially represents" the Roman Catholic Church, on the controversy over abortion. Carter reiterated that he believes abortion is wrong but he opposes a constitutional amendment banning it.

— Criticized Canada for its role in the withdrawal of athletes from Taiwan at the Olympic games in Montreal.

GOP ready

KANSAS CITY, Mo. (UPI) — The Republican National Convention news media director Tuesday said he conservatively estimates between 7,000 and 8,000 representatives of news media organizations will attend the event.

"Media-wise, I think we're in very good shape," said Michael V. Miller.

Miller said transportation problems still exists for some foreign press representatives housed in outlying hotels and motels.

Moves up

FORMER ambassador to Ghana Shirley Temple Black was sworn in Tuesday as the United States Chief of Protocol at a ceremony at the White House. (UPI)

Hunt pushed

TAMPICO, Mexico (UPI) — Mexican sailors using helicopters, amphibian vehicles and boats today searched for hundreds of victims believed still stranded by the port's most catastrophic floods in two decades.

Dozens were believed drowned in and around Mexico's second most important port, located 250 miles south of Brownsville, Tex., on the Gulf coast.

At least 50,000 had been evacuated from Tampico by late Tuesday.

Alumni votes to save O'Leary

TWIN FALLS — The Twin Falls High School 50-year alumni met in Twin Falls on Friday and voted unanimously for the Idaho Board of Education to put forth every effort to save their old high school building, which is now O'Leary Junior High.

A motion made by John T. Parish and seconded by Noel B. Bailey received an unanimous vote from the 81 members present.

The alumni consider the building a treasure and beautiful in its location near the city park and the courthouse.

To keep the building preserved if not for a school, but for some other use is what the alumni is asking the board of education to do, said Mrs. Esther Biel, secretary of the association.

August rites planned

TWIN FALLS — Mrs. Melvin Orr, Blackfoot, announces the engagement and forthcoming marriage of her daughter, Gerry, to Thomas D. (T.D.) Loveland.

Loveland is the son of Mr. and Mrs. J. Robert Loveland, Twin Falls.

Miss Orr is a graduate of Madison High School, Rexburg, and has attended Stevens Heninger College in Ogden, Utah. She is employed as an auditor in Salt Lake City.

Loveland is a 1972 graduate of Twin Falls High School and is presently employed at Dixon Paper Co. in Salt Lake City.

The couple plans an Aug. 13 wedding in the South University St. LDS Chapel, Salt Lake City.

your health

By LAWRENCE E. LAMB, M.D.

Dear Dr. Lamb:

My husband is 45 years old, 6 foot 3 and weighs 190 pounds. He runs about eight miles a week in four periods, swims a mile three times a week, plays tennis at least once a week, often two or three hours on Saturday and Sunday in summer.

I am very conscious of nutrition and he has a good diet. Even so, for a number of years he has been taking vitamin supplements, including extra vitamin C (500 milligrams per day) which I don't feel necessary in view of his balanced diet.

Recently he had a company physical and has received \$35 worth of pills with no explanation except to take daily. He gets Cyclospasmol for his Raynaud's disease which I assume he will take only in coldest weather.

The disease does not really bother him except that his fingers turn white when it is cold. He is to take Sierazolidin for his occasional complaints of tennis elbow, which has never been severe enough to prevent him from accepting any invitation to play.

Wife worries

He also gets Coltenemid because on three separate occasions during a three week period his uric acid count has been high. He had been complaining about a sore second toe during the jogging and tennis.

The doctor who prescribed all these pills is a board certified internist and undoubtedly capable.

"But I feel that he may be catering to mild hypochondria and I am somewhat concerned about the interaction of all these pills, since at the moment my husband is taking all three in addition to his vitamins. Have you any comment?"

Dear Reader:

Yes, I have a comment. I appreciate your concern but it is misplaced. It is easy for you to say your husband's white fingers in cold weather don't bother him but he may be a better judge of how his fingers feel. It so happens that Cyclospasmol is not effective if used sporadically as you suggest only in coldest weather.

Anyone, particularly a man, since men are more susceptible to its complications, with abnormally high uric acid levels should be taking medicine to control it.

This goes double if the man has symptoms. Untreated high uric acid levels often lead to gradual changes that can be prevented by the good treatment your husband is receiving.

Your husband would not be the first person with some elbow problems who persists in playing tennis and that is no argument against him living happily for it.

You needn't worry about the interaction of the various medicines and vitamins that your husband is taking. You are probably right that he doesn't need the extra vitamin C but in that amount it is not likely to hurt him either. I would be more concerned about the eggs you feed him regularly that you mentioned in the rest of your letter describing your healthy diet for him.

It sounds to me as if your husband is fortunate to have a good doctor who is doing his best to not only help your husband with his present problems but help keep him in good health for the future. You should be pleased, not concerned.

For information on Spack Blues send a long, stamped, self-addressed envelope with 50 cents for The Health Letter number 5-10. Address your letter to me in care of this newspaper, P.O. Box 1551, Radio City Station, New York, NY 10019 (Newspaper Enterprise Assn.)

Twin Falls teen selected for Up With People tour

TWIN FALLS — A Twin Falls youth will spend the next year on tour as a member of the 1976-1977 cast of "Up With People."

Tim Driscoll, son of Mr. and Mrs. Thomas W. Driscoll, Twin Falls, applied when "Up With People" came to Twin Falls in October, 1975, and was among 450 young persons accepted out of 17,000 who applied nationwide.

According to R. Michael Redman, a local attorney and "Up With People" alumna, the program is "education in the broadest sense." In three groups of 150, the students travel around the world almost totally unsupervised, producing a dynamic and exciting two-hour production every day.

"I often describe 'Up With People' as a motivation machine," said Redman. "Because of the way in which it is run and the philosophy that backs it, it really does bring the very best out of those involved in very short order."

"It stretches the individual to the outer limits of his or her capacity and then takes him one step further. It demands a great deal of those involved, and those involved are expected to take responsibility for the operation, and they do, he said."

"It is leadership training at its best in a microcosm world that involves people of nearly every race and nationality," Redman continued. "Everything is done by students like Tim Driscoll."

Driscoll, a 1976 graduate of Twin Falls High School, has been active in many theater productions in Twin Falls, the Magic Valley and throughout Idaho. He made a summer tour with Antique Festival Theatre, appeared in Hoise in the opera "Rachael," has performed in many local school productions, the last being the lead role of Jesus Christ in "Godspell," the first musical staged by the T.F.H.S. Drama Department. Tim has also been an active participant in local Dilettante productions.

Up With People is an independent, non-profit educational corporation. UWP headquarters is in Tucson, Arizona and it is there that Driscoll will train for four or five weeks. Near the end of this period, he will receive a tentative schedule of his year's tour.

Following his stint with UWP, Tim hopes to gain a teaching degree in the performing arts, but his goal is to someday perform in New York City.

"Following their intensive initial staging, the three shows go on the road with two or three staff people running alongside," Redman explained.

At their own expense (and on rare occasions, at a sponsor's expense) they make countless free presentations to nursing homes, hospitals, prisons and special institutions. In the Magic Valley, the cast went to the Gooding State School for the Deaf.

TIM DRISCOLL selected

The \$4,000 plus sponsorship tuition for UWP was raised by local businessmen; the fundraising drive for sponsorship was spear-headed by James Sinclair, John Angertbauer and Earl Faulkner. Jack Muldon provided interim employment for Driscoll at Pennywise Drug.

Redman said UWP is incorporated as an educational institution in Arizona, and is associated with the University of Arizona. College courses are provided by traveling professors.

Up With People began as a creative response to the unrest of the '60s. It was the determination of a group of young people to try to offer a positive alternative to that unrest through a musical presentation that told the world what they believed in and what they intended to do.

Kingman's injury hurts Mets' gate

It's over—not through

APREHENSIVE Argentino Molino of Argentina had a rough split second when his mount "crashed" through a barrier during Olympic grand prix jumping Tuesday. Neither horse nor rider was injured seriously. (UPI telephoto)

Mets. Expos swap players

MONTREAL (UPI) — The Montreal Expos Tuesday night traded outfielders Jim Dwyer and Pepe Mangual to the New York Mets in exchange for infielder Wayne Garrett and outfielder Del Unser.

The announcement was made during Tuesday night's rainedelayed game between the Expos and the Atlanta Braves by Montreal President John McHale.

Dwyer, who has been used primarily as a pinch-hitter, was batting only .185. He appeared in 50 games, had 92 at-bats, seven runs, 17 hits three doubles, one triple, no home runs and five RBIs.

Mangual, who had jolted down a regular outfield job with Montreal, was batting .260 in 67 games. He had 215 at-bats, 34 runs, 56 hits, nine doubles, one triple, three home runs and 16 RBIs.

Buoniconti makes retirement official

MIAMI (UPI) — Middle linebacker Nick Buoniconti of the Miami Dolphins ended a 14-year pro career Tuesday in favor of his law practice and a weekend broadcasting contract.

"For the best interests of myself, my family and my price, I have decided to call it a day in the NFL," Buoniconti said.

The 5-11, 220-pounder had sat out the entire season last year after he shattered a thumb in an exhibition game, but said Tuesday that at that time expected to return to football this year.

He said the biggest factor in his decision to retire was Shula's announced intention to go with second-year man Steve Towle for Mike Kolen in the middle this year. Shula had made it plain that if Buoniconti had returned, he would be competing only as backup.

"There's no way Nick Buoniconti is going to sit on the bench behind someone else," Buoniconti said. "I've always been No. 1 on the teams I've played on and I intend to go out as a No. 1."

Buoniconti said he was not embittered by Shula's decision to go with Towle and Kolen.

"How can I be bitter against a man who's been instrumental in getting me two Super Bowl rings, a great deal of money and prominence in the community?" he said.

He said he had signed a contract with CBS to do the color from three to eight NFL games during the regular season.

NEW YORK (UPI) — With Dave Kingman's home run ball and gate appeal out of the lineup for six weeks after an operation for a torn ligament in his left thumb, the New York Mets said Tuesday they probably would not utilize a replacement player in their roster until Thursday.

Kingman was injured in the third inning of Monday night's game when he fell while chasing a soft fly ball hit into short left field by Atlanta pitcher Phil Niekro. He jammed his thumb, still in the glove, into the ground and the ligament was "folded" into the joint, said Mets' club doctor

James Parkes.

"He was operated on two hours after the time of the injury," said Dr. Parkes. "He has left the hospital and the cast may be changed in approximately a week, but that won't affect the total time in a cast—four weeks."

Parkes said Kingman would

need another two weeks to get the hand ready for baseball after the cast is removed.

For the Mets, who had started the baseball season with hopes of being a pennant contender, it was another major disappointment, since Kingman's pursuit of the home run records of Babe Ruth and Roger Maris was about all that was left of the season for them.

The Mets are 14 1/2 games behind the Philadelphia Phillies in the National League's East Division, but attendance remained good

because Kingman's 32 homers in 92 games had put him three games ahead of Ruth's pace in 1927, when he hit 60 homers in a 154-game schedule, and only four games behind Maris' pace in 1961 when he hit 61 homers in 162 games. Kingman was three games ahead of Huck Wilson, who's 56 homers in 1939 is the NL record.

Kingman was batting .234 with 72 runs batted in. The Mets left on a road trip after Monday night's game and will play in Cincinnati Tuesday and Wednesday nights.

TF tops Valley, hosts Minico

TWIN FALLS — The Twin Falls Legion defeated Valley 10-3 and 18-3 Tuesday night.

Clint Bingham was fouled for his hits and three runs in the first inning and then finished without allowing any more of either. Mike Kay, having a little control trouble, won the second game.

Twin Falls will entertain the Minico Saps in a nine-inning game at 7:30 p.m. Wednesday

at Jaycee Park.

Valley started well as Wray opened the game with a walk and Fuller followed with a hit. After Heaber flied out in error, Torres sent the second two runs of the frame home with a single.

Twin Falls evened it in the same inning when Clay Bingham singled. Scott Williams walked. Gene Turley singled to load the bases and

Tim Crist unloaded them with a triple. Twin Falls led it in the third with three more runs, as Clint Bingham walked and Williams got another hit.

Turley sent both home with a triple and scored seconds later on a wild pitch.

Consecutive hits by Scott Swafford, Rick Sterling and Clint Bingham added two more in the fifth.

City pairings set

TWIN FALLS — Pairings for the first round of the Twin Falls city golf championship are announced.

Twin Falls many pro Don Hamblin said the first-round matches should be completed by Aug. 1 at the mutual convenience of the players.

Championship flight

Kevin Packard vs. Tom Ratchford; Gary Dineen vs. Doyle Morrill; Fr. Cosmas White vs. Mark Mueller; and Tom Call vs. Gary Roland.

Bottom bracket

Mike Hamblin, Dave Samuels vs. Ray Doy-Phil-Melbors vs. Jay Empey and Steve Ballard vs. Mike Schlanghauf.

First flight

Howard Allen vs. Wayne Ballard; Don Hutelings vs. Matt Boghan; Bob Young vs. Arnie Hingstberg; and Cliff Saunders vs. Dutch Standley.

Bottom bracket

Bob Skredreiter vs. Don Haven;

Don Grubb vs. Bryan Masoner; Doug McKay vs. Fred Pearson, and Gary Rene vs. Rick Budge.

Second flight

Jack Carlson vs. Bruce Cameron; Ace Hansen vs. John Pfarr; Ron Boyd vs. Godel Sweet and Wes Startin vs. Vern Dasher. Bottom bracket, Nick Hansen vs. Brock Leazer. Ken McClain vs. John Lonetti; Jerry Hobson vs. Art Selin, and Bert Bollinger vs. Don Featherston.

In the second game, Valley again bounced into the lead in the third inning with a three-run burst. Wray and McBride singled and one run scored on a wild pitch while Wasko was walking. Torres plated the next two with a triple.

But Valley's pitching and defense collapsed in the bottom of the frame as Twin Falls scored six times. They largely came on an assortment of walks and errors until Alan Bullock unloaded a two-run double to highlight things.

Twin Falls added 11 more in the fourth inning. Valley again contributing several errors and walks.

Jones blanks Phils for 17th win

SAN DIEGO (UPI) — Randy Jones Tuesday night shut out the Philadelphia Phillies for the third time this season as he pitched the San Diego Padres to a 3-0 win over the Eastern Division leaders of the National League.

Montreal ends losing streak
MONTREAL (UPI) — Barry Foote singled home a run and Pepe Frias drove home another run with a sacrifice fly in the third inning Tuesday night when the Montreal Expos snapped their five-game losing streak by defeating the Atlanta Braves 4-3 in a rain-filled contest marred by delays, totalling over two hours.

LA outlasts Cards 2-1
LOS ANGELES (UPI) — Dave Lopez hit his first home run of the season in the second inning Tuesday night to spark the Los Angeles Dodgers to a 3-2 triumph over the St. Louis Cardinals.

A's rally past Indians
CLEVELAND (UPI) — Phil Garner's bases-loaded triple capped a four-run ninth inning Tuesday night that gave the Oakland A's a 7-4 victory over the Cleveland Indians.

Brewers snap Angels' skein
MILWAUKEE (UPI) — Jerry Augustine and Danny Frisella combined for a five-hitter and George Scott and Hank Aaron hit back-to-back homers Tuesday night to lead the Milwaukee Brewers to a 6-2 victory over California that snapped the Angels' four-game winning streak.

Mets hit early, nip Reds 2-1
CINCINNATI (UPI) — Jerry Koosman pitched a five-hitter Tuesday night as the New York Mets made a pair of first inning runs stand up for a 2-1 victory over the Cincinnati Reds.

Cubs edge Giants 3-2
SAN FRANCISCO (UPI) — Rick Reuschel pitched a no-hitter for six innings then combined with Joe Coleman and Darold Knowles on a threehitter to outduel Ed Halicki Tuesday night and lead the Chicago Cubs to a 3-2 victory over the San Francisco Giants.

Grieh sparks Oriole win
KANSAS CITY (UPI) — Bobby Grieh drove in five runs and Lee May hit two home runs and Wayne Garland scattered seven hits for his 12th win Tuesday night to lead the Baltimore Orioles to a 10-3 victory over the Kansas City Royals.

Brewers snap Angels' skein
MILWAUKEE (UPI) — Jerry Augustine and Danny Frisella combined for a five-hitter and George Scott and Hank Aaron hit back-to-back homers Tuesday night to lead the Milwaukee Brewers to a 6-2 victory over California that snapped the Angels' four-game winning streak.

Astros split with Pirates
PITTSBURGH (UPI) — Eno Sosa's triple and scored on a ninth inning sacrifice fly by Ed Herrmann Tuesday night to give the Houston Astros a 4-3 victory over the Pittsburgh Pirates and a split of their doubleheader.

Carroll Righter

FORECAST FOR THURSDAY, JULY 22, 1978

GENERAL TENDENCIES: The early part of the day is likely to be filled with tension or broken promises.

ARIES (Mar. 21 to Apr. 19) Take particular care in driving or travel today.

TAURUS (Apr. 20 to May 20) You are concerned over a money matter in the morning, but later it all works out satisfactorily.

GEMINI (May 21 to June 21) Make plans to handle important matters early in the day.

MOON CHILDREN (June 22 to July 21) Ideal morning to take care of chores so you have time later for recreation with a loved one.

LEO (July 22 to Aug. 21) You need to establish more rapport with friends.

VRGO (Aug. 22 to Sept. 22) An important matter has to be handled in the morning so think cleverly and then settle it wisely.

LIBRA (Sept. 23 to Oct. 22) Morning finds you nervous, but by calm and tensions ease and you accomplish a great deal.

SCORPIO (Oct. 23 to Nov. 21) Have a more sensible approach to all business and government matters that concern you.

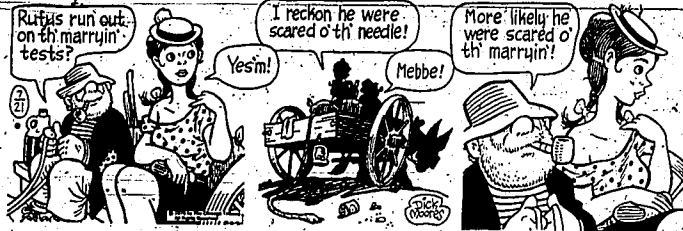

SAGITTARIUS (Nov. 22 to Dec. 21) Don't argue with associates in morning.

CAPRICORN (Dec. 22 to Jan. 20) You think you have much work to do, but by scheduling it wisely, you can get it all done.

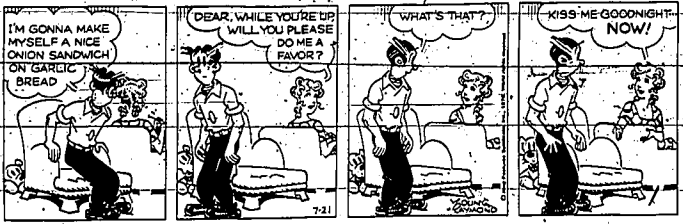

AQUARIUS (Jan. 21 to Feb. 19) Plan your day so that everything goes smoothly.

PISCES (Feb. 20 to Mar. 20) Avoid arguments in the morning at home so that your evening at home with friends is enjoyable.

IF YOUR CHILD IS BORN TODAY... he or she will require a good deal of rest during formative years because the mind is restless and the energy is burned up quickly.
