TF teachers ponder strike

By GEORGE WILEY

TWIN FALLS — Angry Twin Falls teachers may strike if their wage and working condition demands are not given better attention by the school board.

The Twin Falls Education Association (TFEA) reported to teachers in strong language that it has been duped in negotiating sessions with the school board, and it is now taking a hard line with the board.

Last week the TFEA circulated blue survey slips asking teachers if they would "withhold services, if necessary, to obtain settlement for the teachers of School District #11."

A TFEA letter to teachers last Friday said 80 per cent of teachers returning the slips said "withhold services."

"The negotiations were thrown into turmoil when TFEA representatives discovered last week that a nine-point agreement tentatively agreed to by the board had been altered before it was given to the teachers to sign."

The Friday TFEA letter, headed "CRISIS," was subtitled "The Board Has Played Us the Fool!!!"

"Do you remember that the Board's negotiations team and our team had reached tentative agreement on nine proposals?" the letter began. "These were finished and ready to sign. Fred Decker (the school board's attorney) took the agreements on July 14 to type them preparatory to signing."

"After numerous delays and unexplained procrastinations the copies were delivered to our team (TFEA) Wednesday night, September 1," the letter continued. "There were numerous changes made by the Board. These changes were not outlined by their spokesman, but he simply asked Bob (TFEA negotiator Bob Klus) to come to sign these mutilated documents. We have been the victim of extremely bad faith bargaining."

"This type of action is an insult to the INTELLIGENCE and DIGNITY of teachers," the letter said. "The Board unilaterally dropped whole paragraphs and altered the meaning of many items from those tentatively agreed to by the teams. Hours and hours were spent by these teams on each detail and to find their altered has destroyed our belief that the School Board of Twin Falls is ethical, honest and sincere in their negotiations with teachers."

"I have nothing to say at this time," School Board Chairman Howard Rank said this morning.

Dr. Rank added that it was public comment which "got us in trouble a while back."

He said all future news releases on

negotiations would be made jointly by the board and the TFEA, as the parties agreed before the sessions began.

Mrs. Ruth Day, trustee serving on the school's negotiation committee, refused comment today. "Other officials" involved in the negotiations were not available for comment.

The next negotiating session is scheduled for Thursday, and the letter asked teachers to make a show of support before then.

The Friday letter followed two earlier letters mailed to teachers by the TFEA Wednesday.

In the earlier letters, the TFEA outlined the items still under negotiation with the school board. These items reportedly include:

— Class size: The TFEA is asking extra pay for teachers whose class size exceeds a stated maximum. The maximum allowed would vary with the level of instruction with the kindergarten classes kept small and high school and junior high classes allowed to be larger.

— Non-professional duties: The TFEA is seeking to eliminate outside class duties (monitoring, bus lunch and clerical duties) from the teachers' job roles.

— Working hours: The TFEA wants a class preparation period for all teachers and no after-school duty without extra pay.

— Salary: The TFEA wants an increase in the base salary from \$5,200 to \$6,400 with a new salary index giving a base raise of 5 per cent, an average raise of 13 per cent, and a top raise of 28 per cent for teachers with the most education or seniority.

The TFEA also is asking for changes in sick leave policies, privileged leaves and extra pay rates.

The letters of last Wednesday presented comparisons with wage increases in other Idaho school districts which claim the 2.5 per cent wage hike already approved for Twin Falls teachers is the lowest increase in the state.

The TFEA negotiations with School Board representatives Byron Snyder and Ruth Day and board attorney Decker began behind closed doors last spring. The negotiations remained closed until late August when a comment by Mrs. Day that teachers had already signed contracts and therefore salary negotiations were over drew the ire of TFEA spokesmen, who responded that salary negotiations were still going on and that the contracts signed by teachers remained open to amendment.

The TFEA was also upset by public comments by Decker concerning the base pay being asked and a claim that the cost of O'Leary double-shifting was preventing the school board from giving more money to teachers.

Valley traffic accidents on weekend claim 5 lives

By BOB ZUCKERMAN

Times-News writer

MAGIC VALLEY — Five Magic Valley people have been killed in traffic accidents since the Labor Day holiday began.

Paul D. Klier, 16, Murfreesboro, was killed about 2 a.m. Sunday when the car he was a passenger in left the roadway, rolled an estimated seven times and threw him about 25 yards about 17 miles north of Shoshone on U.S. 91, Lincoln County Sheriff William Anderson said today.

The driver, Rick Lee Quastrom, 16, Burley, and another passenger, John Ostrander, 19, Burley, were taken to St. Benedict's Hospital in Jerome. Both suffered head injuries, the sheriff said.

Quastrom was driving the car at speeds in excess of 100 miles per hour when the vehicle left the roadway on the left side of the road, returned to the roadway, rolled two times and then left the roadway again on the right side, rolling at least three more times, the sheriff said.

Quastrom and Ostrander were listed in stable condition at the hospital this morning. Michel Layne Garrett, 10, Burley, was killed Saturday when the three-wheel motorcycle he was driving, and a car driven by Geraldine Anderson, 48, Murfreesboro, collided about six miles west of Burley, a Cassia County deputy sheriff reported. Garrett apparently failed to

stop at a stop sign while he was driving north on 600 West Road, and the Anderson car hit him head-on on U.S. 30, the deputy said. The deputy reported no other injuries.

Steven Craig Smith, 23, Gooding, was killed when he lost control of his motorcycle Saturday near Gooding while trying to outrun police. Gooding County Sheriff William Boyer reported.

About 1:20 a.m. Saturday, Smith's cycle skidded, hit a power pole, guide wire, killing Smith instantly, the sheriff said.

Further details were not available. Jeffrey Wahl, 23, Ketchikan, was killed about 5:30 p.m. Saturday when he was driving rolled over on the road to Trail Creek within the Sun Valley city limits, state police reported.

Wahl was driving at excessive speed when he lost control of his car, causing the accident, police said.

Mike V. Stewart, 21, Burley, was killed in a head-on collision Friday night when he was hit by a car as it rounded a curve near Nevada City, Calif., the California Highway Patrol reported.

A 32-year-old Lakeport, Calif., man was also killed but his name was being withheld pending notification of relatives, police said. Dennis W. Zallo, 21, a Navy seaman, was killed aboard the U.S.S. Niagara and driver of the car that struck Stewart, was booked in the Nevada County Jail on a charge of felony drunk driving.

Body of missing Jerome man found near Wendell

WENDELL (UPI) — Gooding County sheriff's officers have apparently recovered the body of a 58-year-old Jerome man missing since April 3.

Jerome County Prosecutor Eugene Fredericksen refused to confirm that the body of Ralph Wilson had been found but reliable sources said Wilson was found buried in the desert near the Wendell Dam in Gooding County on Friday.

Sources said a suspect in the case led officers to the body after confessing to the killing.

Wilson was first reported missing when he

failed to pick up his mail in Jerome in early April. Later Wilson's car was located and officers learned the car had been sold when Wilson's name was allegedly forged on the automobile title.

Dave Hickay, 23, Wendell, was convicted in connection with the forgery incident and is serving a term at the Idaho State Penitentiary. Hickay's mother, Mrs. Betty Strain, and her daughter, Karen Wood, are being held in the Cottonwood Correctional Center on seven counts of forgery brought by Gooding County authorities in connection with the incident.

Sources said when the body was exhumed it appeared the man had been struck on the head with a blunt object and a cord was attached to the neck as though Wilson had been strangled.

The body was apparently exhumed by sheriff's officers and state investigators.

Jerome County Sheriff Elmer Hall and Gooding County Sheriff Earl Brown were both out of town and unavailable for comment.

Fredericksen said he would have to document the findings and would not be prepared to issue further comment until late Tuesday or early Wednesday.

Pickets set

BUIH (UPI) — Some 20 women angered over what they call discrimination against women plan to picket the Green Giant Plant in Buhi Tuesday.

Spokesman Melody Goodenough, Jerome, said women are angry because the firm is allegedly hiring migrant workers and passing them over for employment.

Injured Wendell football player dies

By CHRISTOPHER BOGAN

Times-News writer

HAGERMAN — A 16-year-old Wendell High School football player died Sunday after he was injured in a football game at Hagerman High School.

Sheridan Swenson, one of the starting halfbacks for the Wendell team, died Sunday at 3:45 a.m. in St. Alphonsus Hospital in Boise. An autopsy is being conducted to determine the cause of the boy's death.

Swenson was injured Friday night in the season-opening game against Hagerman High School.

The injury reportedly occurred when the young halfback had taken a plichot, turned upfield and ran head-on into a waiting Hagerman cornerback.

Kevin Lancaster, a Wendell team captain and

the split end around whose end the play was run when Swenson was injured, said no one thought the player was hurt after the tackle.

"He hit head-on with the corner back," Lancaster said. "And then he jumped right up after the play and yelled 'lets go!' and ran right back to the huddle. They didn't think he was hurt. But they think that was the play that hurt him."

One more play was run after the plichot around the split end before Swenson left the game. He did not run the ball on that play, but when it was completed he took himself out of the game.

"Nobody had to help him off the field," Lancaster said. "He came off the field himself."

"He went to one of the coaches," and complained his head hurt and one of his legs was numb," Lancaster said. "They told him to go home. It wasn't too long after that that he went

into convulsions and they got him a stretcher right after that."

Swenson was rushed first in a station wagon to Gooding County Memorial Hospital, and later was taken by ambulance to St. Alphonsus Hospital. He reportedly never regained consciousness after being taken from the Hagerman High School field.

In addition to being a fine athlete, Swenson was also a good student and well liked among his friends.

"He had a lot of friends, a great many," Mrs. Rodney Swenson, the boy's mother, said. "He was a good student, too."

"He started playing football for the Optimists in Mountain Home," his mother said, when he was only about 10 years old.

Swenson was a freshman this year but was a good enough player to make the Wendell star-

ling team. Wendell football coach Robert Rannels is reported as saying Swenson was "one of our finest athletes."

Both the Wendell coach and the Wendell players say Swenson was playing a good game when he left the game Friday night.

"It was good clean, football," Rannels is reported as saying after the Friday game.

The tackle wasn't a cheap shot, and Swenson wasn't in a bad pile where someone comes in late. It was one of those fluke things that you read about in time to time, but you never think it will happen around you," Rannels said.

"He was a good player and he was fun to be around," Lancaster commented. "Everybody in the school liked him. He didn't try to make any enemies with anybody. He had a lot of friends."

The results of the autopsy are expected to be released in a day or so.

There's nothing like laboring on Labor Day.

Reunion in Vegas

DEAN MARTIN, Frank Sinatra and Jerry Lewis appear on stage in Las Vegas, Nev., Sunday during Lewis' muscular dystrophy telethon. Sinatra engineered the reunion of Martin and Lewis, who starred together before breaking up over 20 years ago. (UPI)

Valley obituaries

Michael L. Garrett

BURLEY — Michael Layne Garrett, 10, son of Mr. and Mrs. E.J. Garrett, Burley, died Saturday near his home following a car-motorcycle accident.

Born Feb. 14, 1966, at Burley, he attended Dwyshuk and Mountain View schools in Burley. He was a member of the LDS Church, active in primary and Sunday School. He was active in Cub Scouting and the Little League football. He was the best third grade wrestler in last year's junior wrestling clinic.

Surviving are his parents, Burley; four brothers, F. Gale, Mont J., J. Paul, and Alan H.; all Burley; two sisters, Mrs. Blaine, (Julie), Tanner, Burley; and Mrs. Larry M. (Marcia) Preece, Midvale, Utah; and grandparents, Mr. and Mrs. Samuel Ray Garrett, Burley.

Funeral services will be at 2 p.m. Tuesday at the Star LDS Ward Chapel with Bishop Denny Beck officiating. Burial will be in Gem Memorial Gardens. Friends may call at the Payne Chapel this afternoon and evening and after 11 a.m. Tuesday until time of services.

The family suggests memorial contributions to the primary children's hospital in Salt Lake City.

Darryl Kloor

PAID — Darryl Kloor, 16, Murtaugh, died Sunday morning in a car accident 18 miles north of Shoshone.

Born March 13, 1960, in Burley, the son of Mr. and Mrs. Harold Kloor, he was a junior at Burley High School. He was a member of the Catholic Church.

He is survived by his parents, Murtaugh; six brothers, James and David Kloor, both Burley; Jed Kloor, Los Angeles; John, Robert and Andrew Kloor, all Murtaugh; one sister, Anne Kloor, Murtaugh; grandparents, Mr. and Mrs. James Sargent, Murtaugh.

Funeral services will be held at 2 p.m. Tuesday in the Little Flower Catholic Church, with Father Steinhoff officiating. Mass of the Resurrection will be recited at 11 a.m. Wednesday in the church with Father Steinhoff celebrating.

Burial will be in Sunset Memorial Gardens.

Funeral services will be at 2 p.m. Tuesday at the church and Wednesday morning at the church from 10 to 11 a.m.

The family suggests memorials to the Idaho Youth Ranch.

Steven C. Smith

GOODING — Steven C. Smith, 23, Gooding, was killed Sunday morning in a motorcycle accident on the west side of the city.

Funeral services will be conducted at 2 p.m. Wednesday at the Thompson Funeral Chapel, Gooding.

Burial will be in the Glen Rest Cemetery, Glenns Ferry, Idaho.

A full obituary will follow Tuesday.

David D. Moorehead

TWIN FALLS — David Dean Moorehead, 22, Twin Falls, died Sunday after a short illness. White Mortuary will announce arrangements.

Funeral services will be at 2 p.m. Tuesday at the White Mortuary Chapel. Burial will be in Sunset Memorial Park.

Funeral services for Lawrence J. Sackett, 73, Filer, who died Wednesday in Los Angeles, will be at 11 a.m. Tuesday at the White Mortuary Chapel. Burial will be in Sunset Memorial Park.

Funeral services for Harriett K. Taylor, 85, Heyburn, who died Thursday, will be at 11 a.m. Tuesday at the Jerome First Ward LDS Chapel. Burial will be in Gem Memorial Gardens.

Funeral services for Harriett H. "Dottie" Tupper, 66, Jerome, who died Thursday, will be at 11 a.m. Tuesday at the Jerome First Ward LDS Chapel. Burial will be in Gem Memorial Gardens.

Funeral services for Harriett H. "Dottie" Tupper, 66, Jerome, who died Thursday, will be at 11 a.m. Tuesday at the Jerome First Ward LDS Chapel. Burial will be in Gem Memorial Gardens.

Funeral services for Harriett H. "Dottie" Tupper, 66, Jerome, who died Thursday, will be at 11 a.m. Tuesday at the Jerome First Ward LDS Chapel. Burial will be in Gem Memorial Gardens.

Funeral services for Harriett H. "Dottie" Tupper, 66, Jerome, who died Thursday, will be at 11 a.m. Tuesday at the Jerome First Ward LDS Chapel. Burial will be in Gem Memorial Gardens.

LAS VEGAS, Nev. (UPI) — Frank Sinatra, who reportedly planned it for three months, gave a few songs first on Jerry Lewis' annual telethon Sunday night and gave him some money to distract Lewis from the gongs-on-backstage before surprising the comedian with a line that wasn't on the cue cards.

"I've got a friend I wanted you to meet," said Sinatra.

And onto the stage strolled Dean Martin, Lewis' longtime partner.

The embrace that followed appeared to end a legendary show business feud.

It had been 20 years since the easygoing singer and the bouncy comic split up one of the most popular entertainment teams of the 1950s in a welter of insults and complaints. So far as anyone knows, they had not spoken to each other since the breakup in 1956.

Lewis dabbed at his eyes after embracing his former partner.

"Come on, I thought it was about time you guys got together again," Sinatra said.

Backstage, one of those waiting to go on, a baseball type named Durocher who has been known for his way with words, dubbed Sinatra "the Kissinger of show business."

Tricycle race set by solons

GRANDVIEW, Idaho (UPI) — Six state legislators will take to their tricycles Sept. 19 for a relay race during Grandview's third annual "Almost Anything Goes" celebration.

District 19 state legislators have challenged lawmakers from District 22 to a tricycle relay race with obstacles. The contest will see District 19's Sen. Walt Yarbrough, Rep. Gene Winchester and Rep. John Reagan pitted against District 22 politicians, Sen. J. Wilson Steen, Rep. Virgil Kraus, and Rep. Karl Koch.

The celebration will begin Sept. 18 and other activities include a human meringue ramp, a sky jumper jumping without a parachute, a bankers' dollar pitch and a demonstration with "Iron Jaw" Gary Holland using his teeth to pull a four-wheel vehicle loaded with two horses.

Roger Elam, Grandview chairman for the event, said a one minute welcome speech by Mayor Ben Johnson will be followed by "Iron Jaw" Gary Holland's demonstration Saturday afternoon.

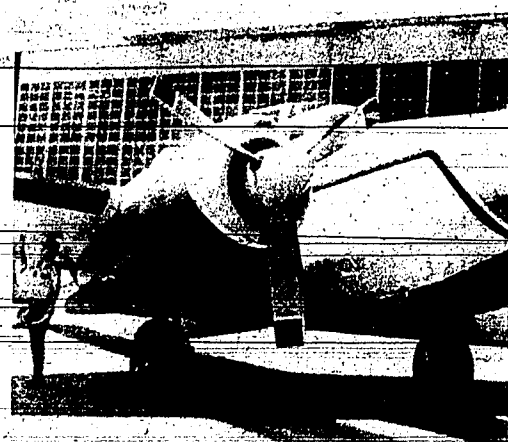

The celebration began three years ago at Lion's Park and a spokesman said activities are now held throughout the town on the week-end when the town's population of 450 swells to two or three times normal size.

First class postponed

STRIKE DAM, Idaho (UPI) — The opening of Rimrock schools for Bruneau, Grandview area pupils has been postponed a second time because of construction delays at the new school site.

School registration will be held Sept. 11 and school officials said they are "reasonably sure" the new school at Strike Dam will be finished by that time.

The opening was originally scheduled for Aug. 30 but later changed to Sept. 7 after construction was hampered by bad weather, trouble getting building materials and initial site selection problems.

Scheme spoiled

POLICE OFFICER Charles Imel scrapes dirt from the underside of the wing of a twin-engine plane which was impounded at Columbus, Ind., with 3.75 pounds of Colombian marijuana aboard. One suspect has been arrested and five others are sought in connection with the smuggling scheme. (UPI)

Embrace ends show biz feud

Teton report scheduled

JACKSON, Wyo. (UPI) — A member of the panel appointed to investigate the Teton Dam collapse will report on the panel's findings Sept. 9 at a meeting of the Pacific Northwest River Basins Commission here.

R. Keith Higginson, director of the Idaho Department of Water Resources, Boise, will present the material. Higginson was appointed to the panel by Gov. Cecil D. Andrus and Interior Secretary Thomas Kleppe.

The detailed reports will come before the commission for the first phase of a 90-day formal review process. The reports are on the Flathead River Basin in western Montana and Big Bend Basin in central Washington.

Synthetic oils tested

BACCHUS, Utah (UPI) — Few people are willing to pay \$4.50 for a quart of motor oil. But Hercules Inc.'s Bacchus "Bacchus maintenance" oil is being tested here.

The Bacchus maintenance crews are using oils made from both synthesized hydrocarbons and from ester-based synthetics in its vehicles, to see if either is better than regular high-grade motor oil.

"Ester-based oils are pure synthetics, chemically created from organic acids and alcohols. They are the Cadillac of synthetic oils," Gard says.

"Since they lack a petroleum base, they don't generate sludge, varnish and gummy in the high qualities that ordinary motor oils do."

He says the synthetics flow in temperatures ranging from 60 degrees below zero Fahrenheit up to plus 300 degrees. They also cling to metal up to nine times longer than regular oil, have 28 per cent less evaporation, run 55 per cent cooler, and don't break down under high engine heat.

In fact, Gard says, "When changing from conventional oil to synthetic, a noticeable increase in engine life speed is experienced, due to the very low coefficient of friction of the synthetics."

"The brand names" of the synthetics now under test at Bacchus are "Amcol," a pure ester based synthetic, and CDS E, a synthetic hydrocarbon manufactured by Texas Refinery Corporation.

Mishap injures 4

BOISE (UPI) — Four people were injured Sunday night above Arrowrock Dam when their pickup truck missed a curve, rolled over a 200-foot cliff and flipped six or seven times.

The two most seriously injured victims were flown by National Guard helicopter to St. Alphonsus Hospital in Boise. Sonja Elde, 17, Payette was in serious condition Monday morning while Steve Lamb, 21, also of Payette, remained in critical condition.

Two other passengers, Jacquelyn and Douglas

Warner, Boise, were taken to the hospital by ambulance where they were treated and released.

Poor weather conditions and steep terrain hampered rescue operations and Boise County Sheriff's Deputy Mike Johnson said the Warners were not in the ambulance until two hours after the wreck was reported.

Deputy Albert Lewis said the accident occurred 2½ miles above the dam when the pickup apparently failed to negotiate a curve. He said no other car was involved.

Woman faces charge

POCATELLO, Idaho (UPI) — Gerylyn Thomas, 31, has been charged with second degree murder in the shooting death of her husband early Saturday morning at their home in Pocatello.

Larry Thomas, 34, died after he was shot through the chest with a 30-30 rifle.

Mrs. Thomas is being held in Bonanza County Jail and County Prosecutor Garth Pincock said an arraignment is pending.

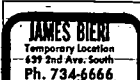

The couple's children were sleeping in the home when the shooting took place.

Controlled

WARREN, Idaho (UPI) — The U. S. Forest Service said the Jeannette Creek fire that burned 1,620 acres in five days, was brought under control at 6 p.m. Sunday.

The blaze in the Payette National Forest was caused by lightning and rain pouring over it.

Involved in the firefighting effort at its peak.

Question...

From my observation it appears that funerals are in jeopardy of becoming charity drives. Couldn't this ultimately lead to abuse?

Answer...

It is the feeling of those associated with legitimate organized charities that if this trend continues it will seriously endanger community fund projects. In certain large cities a very high percentage of noncharitable organizations include a request that contributions be made to various charities.

It appears out of harmony with the concept we have of a funeral as a religious service that these fund raising projects be associated with funerals.

As a Philadelphia clergyman said in his pastoral letter, "No matter what others may say, and no flowers and don't use my last mortal remains as a charity income tax deduction."

Lands in Japan

PARTLY shrouded by canvas, a Soviet MIG 25 Foxbat stands on an airport in Northern Japan today after it was flown there by a pilot who said he wanted political asylum. The photo was taken from a Japanese television screen (UPI)

Palestinian hijackers give up

LARNACA, Cyprus (UPI) — Three Palestinian hijackers who threatened to blow up a Dutch jetliner in flight gave up without a fight late Sunday, ending an "absolutely terrifying" ordeal for 81 captives, including three Americans.

The gunmen commandeered the plane just after it took off from Nice, France, forced it to make a bumpy landing at a darkened airport in Tunisia and fly on to Cyprus, then headed toward Israel, demanding the release of eight pro-Palestinian

Israel refused and sent two jet fighters to shadow the plane. The guerrillas later surrendered to Cypriot authorities in return for a guarantee of safe passage out of the country and were led blindfolded from Larnaca airport and turned over to a Libyan diplomat.

The freed hostages — 76 passengers and a crew of five — spent the night in hotels in this Mediterranean island before flying on

to Holland. American businessman Otto Horsting, who was with his wife on the KLM-Royal Dutch Airlines DCB, said the 18-hour hijacking was "absolutely terrifying."

"They (the guerrillas) had handgrenades and automatic guns which they were brandishing about like toys," Horsting, of Selma, Ala., said. "They said they were all from the Palestine Liberation Organization and had a mission to carry out."

Another American, Steve Schmidt, born in Waterbury, Conn., but now working with a shipping company in Spain, said the hijackers "threatened to pull the pins off their handgrenades." He said one of the hijackers told the passengers "We have been treated badly so far and this is our answer."

The guerrillas seized the plane shortly after a stopover in Nice Saturday night on a flight from Malaga, Spain, to Amsterdam and ordered it flown to Tunis.

Battles menace Lebanon truce talks

BEIRUT, Lebanon (UPI) — Intense artillery and machinegun battles in the rugged mountains northeast of Beirut today threatened to undermine truce negotiations and plunge Lebanon into a new round of all-out war.

Rightists and leftists fought with machineguns, heavy field artillery and ground-to-ground missiles on a front stretching 29 miles northeast from Beirut through steep ravines and cedar forests to the ski resort of Ayoun Simin.

Each side accused the other of touching off the outburst in the long-tense area with bouts of deadly shelling that turned into what one rightist radio station called "one of the worst artillery battles of the civil war."

Rightist and leftist reports said the fighting continued nonstop into the night. "The situation is heading toward a major explosion," a military spokesman for the leftist-Palestinian alliance said. "The combat is very intense."

The escalation in the mountains touched off hit-and-run skirmishes between leftist and Syrian forces in the southern hills east of Sidon, 30 miles south of Beirut, the reports said.

Beirut's devastated downtown district and the shell-gutted apartment buildings along the suburban front lines rang to machinegun bursts and mortar blasts as gunmen hammered at each other's fixed positions.

Pilot lands MIG in Japan

TOKYO (UPI) — A Soviet MIG 25 fighter plane, the most advanced in Russia's arsenal, landed in northern Japan today and the pilot asked for asylum in the United States, Japan's Kyodo news agency said.

Other sources said that the government's National Police Agency had notified Prime minister Takeo Miki of the pilot's request.

The pilot landed the plane without advance radio warning at the commercial airport at Hakodate City, 500 miles north of Tokyo, just before 1 a.m. EST.

Police reported that he disembarked from the cockpit, fired a pistol into the air, and surrendered. They quoted him as saying, "I was out of gas and made an emergency landing. That plane is top secret. Please cover it with a canvas."

However, later reports by Kyodo and the Japan Broadcasting Corporation said the pilot told police he wanted to go to the United States.

The Hakodate airport was closed to the public shortly after the plane landed. A squad of 60 policemen was rushed to the scene to mount guard on the Mig. The Japan Air Self Defense Force rushed an investigation team from its base at Chitose on Japan's northern island of Hokkaido, where Hakodate is located.

The plane's unexpected arrival caused a near panic among employees of Japanese domestic airlines stationed at Hakodate and a handful of persons awaiting flights in the terminal.

"The noise was much greater than a regular jet. It had a terrible, piercing metallic sound," said an employee of Toa Airways, a Japanese domestic carrier.

The grey plane overshot the runway and the pilot stopped it by opening two parachutes after the wheels were on the ground. However, the MIG ran off the landing strip and collided with two radar antennas used to monitor approaches of incoming planes.

No one was injured.

Like the United States' SR-71, the MIG 25 is used as a high altitude reconnaissance plane.

The plane was not immediately covered as the pilot had requested. Television cameramen shot pictures of it from a

distance with telephoto lenses. They later appeared on nationwide television in Japan.

They revealed the MIG 25 as a plane with an unusually lean fuselage. The wings are set far back near the tail. The plane has high twin rudders marked with the red star used to denote Soviet military aircraft.

Sources in the Japan Self-Defense Agency said MIG 25s have been detected by military radar in Japan since the spring of this year. They have been in use much longer in Europe and the Middle East.

Up to now, there has never been a case of a Soviet pilot defecting to the West by landing his plane in Japan. Also, there has never been a case of one making an emergency landing on Japanese soil.

The Japanese foreign ministry said that the plane probably would be returned to the Soviet Union.

Several years ago, an American military plane based in Japan made an emergency landing on Soviet-controlled Etorofu Island in the southern Kuriles chain. The Soviets promptly released the plane and the pilot.

At the time, the agency called it the third intrusion since 1954. In Moscow, a military source was asked today if getting "close look at the MIG-25 would be a breakthrough for Western intelligence."

"Very much so," he replied. "It would cause a holiday in a lot of hearts."

The source said he did not believe Western experts had ever before seen the inside of the plane.

The high-flying MIG-25 — which goes by the NATO code name of Foxbat — was described in 1973 by then-U.S. Secretary of the Air Force Robert Seamans as "probably the best interceptor in production in the world today."

That same year, a Soviet pilot set a world record by climbing in a MIG-25 to nearly 119,000 feet — about 23 miles.

Other pilots set unofficial time-to-height records in 1975 by climbing to 25,000 feet in two minutes 34 seconds and to 30,000 feet in three minutes nine seconds.

Killer earthquakes jolt entire globe

By ROBERTA HORNIG
© Washington Star

WASHINGTON — Few things are as frightening or leave one so helpless as the unexpected wrenching of the ground—the shaking and twisting that topples mighty buildings and opens gaping chasms—the phenomenon called the earthquake.

And this year it looks as if the world is trembling more than ever.

Between Feb. 4 (when Guatemala City was struck almost dead center and 23,000 died) and July 27 (when a catastrophic quake killed at least 100,000 in an industrial center of Hopi Province in Northern China) earthquakes — the many of them killers — have been reported in the Philippines, Ecuador, Russia, Turkey, Bali and numerous islands spread throughout the Pacific.

There are also chilling statistics from the U.S. Geological Survey: the federal government's earthquake watcher.

For example, this year there have been twice as many "great" earthquakes, those of magnitude more than 8 points on the quake-measuring Richter scale.

The long-term average, meaning a 50-year time frame, for these giant shakers is 1.5 a year. So far, there have been three — in the Kermadec Islands just north of New Zealand last January, in China in July and in the Philippines earlier this month.

All of this raises the question of whether something is going on in the earth's crust that people need to worry about.

Dr. Robert Hamilton, who heads USG's Office of Earthquake Studies in the United States, does not think so.

While the number of "great" quakes may have doubled in 1976, "major" quakes — those registering between 7 and 7.9 on the Richter scale, are just about on target, he reports.

Normally the world can expect about 17 of these annually. So far this year, there have been 10: two each in China and the Soviet Union; and one each in Guatemala, the Panama-Colombia border, the Kermadec Islands in the Southwest Pacific, the Kurile Islands in the Western Pacific, Sumatra and New Guinea.

What is really raising people's earthquake consciousness, Hamilton contends, is simply that "they're killing more people."

In effect, he says, earthquake awareness is really a byproduct of the population explosion — "They're happening close to cities and towns and so you're now getting big death tolls," a situation that's likely to continue, he says.

This year quakes around the world have killed about 130,000 people, the greatest number in 50 years. It is the largest tally since 1923 when about 143,000 persons were killed in an earthquake near Tokyo, and 1920, when about 180,000 fatalities were reported in the Kansu-China region, both heavy population centers in their day.

Earthquakes have always been killers, particularly when they happen where people live. The largest death toll on record, for example, dates back to 1556, when nearly a million died in China.

"What's happened in all these cases is that we've had some unfortunate locations," the scientist says.

Hamilton's office does more, though, than just keep track of depressing statistics. What he conceives as one of its major roles is a relatively new art, but one aimed at saving lives — earthquake prediction.

Scientists now know, or strongly believe they do, what causes quakes. "They're caused when stresses build up in rocks buried deep in the earth's crust. What happens is the rocks can't be held in their slips because of their excess energy and they begin moving, setting off tremors."

Hamilton's explanation for the layman is a scientific fiction developed in the last 15 or so years, called "plate tectonics." According to the theory, the earth's crust is not a single, uniform layer. Instead, it's a discontinuous series of about a dozen vast, shifting plates, each 30 to 90 miles thick.

Floating on the earth's semi-molten core, and propelled by as yet unidentified forces, the plates are in constant motion.

Because of the friction between the plate movements, stress builds up in the earth, rocking it, and eventually, the rock fractures, releasing the pent up energy that causes earthquakes.

What scientists don't really know at this point — but hope to in the future — is how to forecast accurately when and where earthquakes are going to happen.

"We're just in the development stage, not a refined state yet," says Hamilton. "In the United States, few earthquake predictions have been successful," he says.

Four nations, the United States, China, Japan and the Soviet Union, are involved in attempting to improve the science, with China way out in front.

"The Chinese have made a major commitment and have over 10,000 people involved in many Apollo programs. There's just nothing like it elsewhere."

There is a good reason for the interest by the People's Republic. China suffers more quakes than any other nation. For example, it has 10 times the rate of tremors that the United States does.

The impetus for the current research program came in March 1966, when two killer quakes struck Hopi Province. And the advanced state of the art there has apparently paid off a couple times.

The most cited incident was in February, 1975, when in the early evening hours, Liaoning Province in the northeast was rocked by a major quake. That demolished the town of Haicheng. More than a million people lived near the quake's center, and nearly 90 per cent of the houses collapsed. Yet apparently there were few casualties.

Why? Because, Hamilton says, the quake was predicted, and people in the area were ordered to stay outside their houses.

While it has not been verified, it is generally believed the Chinese predicted the latest quake, a massive aftershock really, that shook the mainland July 28, the day after the big quake.

While the state of the predicting art is in the novice stage in the United States, scientists have a few telltale signs that they believe forecast the likelihood of quakes.

One is land deformation, "a detectable rise of the land along a well-known fault. A second is a change in "electrical resistivity," a change in the electrical property within the earth. Third is magnetic field changes and, lastly, changes in the speed of seismic moves.

Americans visiting China nearly two years ago for more data on predictions were told also to pay close attention to the activities of animals that appear to precede earthquakes. For example, the visiting Americans were told that snakes, lizards and burrowing animals leave their underground homes shortly before quakes strike.

Most major United States earthquakes have occurred in the West in recent years, such as those in California and the big one in Alaska in 1964.

But, Hamilton warns, people on the East Coast are wrong if they believe they are earthquake-safe.

The two principal "high risk" areas, according to the scientist, are Boston and Charleston, S.C., and if quakes do occur there — and he says they are likely to, within the next hundred years or so — they'll be felt, perhaps severely, throughout the East Coast.

Further, he warns, damage would likely be far greater than in the American West. "It's particularly serious because of the population density, building construction that is not as quake-resistant as buildings in the West and because of the land makeup that would send shockwaves a far greater distance," he says.

Hamilton's ruler point is that the West is much more mountainous than the East and therefore can "soak up" more earthquake waves.

Labor Day, 1976

Arizona slaying motive unclear

By ROBERT LINDSEY
© N.Y. Times Service

PHOENIX, Ariz. — Almost three months after the murder of Don Bolles, an investigative reporter for the Arizona Republic, the motive for the assassination is still uncertain.

Bolles died June 13, 11 days after a bomb exploded under his car in the parking lot of a Phoenix hotel. Police arrested John Harvey Adamson, a 32-year-old Phoenix resident, and charged him with the murder. Adamson reportedly boasted that he would be paid for the bombing, but the police have not yet arrested anyone for ordering Bolles' death.

But, Hamilton warns, people on the East Coast are wrong if they believe they are earthquake-safe. The two principal "high risk" areas, according to the scientist, are Boston and Charleston, S.C., and if quakes do occur there — and he says they are likely to, within the next hundred years or so — they'll be felt, perhaps severely, throughout the East Coast.

Further, he warns, damage would likely be far greater than in the American West. "It's particularly serious because of the population density, building construction that is not as quake-resistant as buildings in the West and because of the land makeup that would send shockwaves a far greater distance," he says. Hamilton's ruler point is that the West is much more mountainous than the East and therefore can "soak up" more earthquake waves.

The now-prosecutor, Donald M. Harris, who was appointed this month following the abrupt resignation of County Attorney Moose Berger, said he was particularly puzzled over why two of the bank's legal representatives had received key jobs in the Treasury Department during the Nixon administration at a time when the bank was making questionable loans to a major contributor to Nixon.

"I've seen enough in this office in two weeks to scare me," Harris said.

"We talk about organized crime and the Mafia, but what I've seen are crooks who belong to the country club, who are from prestigious old-line law firms, from the best families, who helped found this state, from people who work at banks," he said in an interview. "I've got a feeling that there's a web that controls these politicians, lawyers, bankers, wealthy people who move in the best circles."

"We have a sub-strata of dirty criminals who use guns to rob people," Harris continued, "and we have a higher strata of guys who wear Brooks Brothers suits and button-down shirts, and in the middle we have the public, and they're getting squeezed by both sides."

Bolles had written extensively of business crime.

Adamson, a racing dog owner, is scheduled to stand trial for murder beginning Oct. 1. At a preliminary hearing, a close friend alleged that Adamson had confided to him that he was to be paid \$10,000 by unidentified people to kill the reporter. Adamson, however, has pleaded not guilty to the murder charge.

From the outset of their investigation, the police have contended that the murder was planned by a group, probably including people with important political connections in Arizona. Investigators say they have strong suspicions of who (at least some participants) were involved in the planning of the murder here. But their failure to make further arrests suggests they have been unable to develop evidence strong enough to prove their theory in court.

Their present strategy appears to be to hope that additional evidence will surface during

Adamson's trial. And, if Adamson is convicted, it is hoped he will provide information about the crime in exchange for a lighter sentence.

"We're looking at some other people," said Jon Sellers, a Phoenix detective who has been on the case since the bombing. "But we don't expect any arrests before the trial; we're trying to get Adamson first, and then we'll turn to the other people."

The police have questioned a wealthy contractor who admitted agreeing to help finance Adamson's legal defense, and a close friend of the contractor, a rancher who was one of Arizona's wealthiest men who had lost an important state appointment as a result of Bolles' reporting.

The police have theories on a number of possible motives — revenge, an effort to silence Bolles on subjects ranging from dog racing to land fraud; to the possibility that friends of a person harmed by his reporting were attempting to avenge him.

"Although Bolles mentioned the word 'Mafia' moments after the blast, the authorities have generally discounted Mafia involvement. One detective said: 'It just doesn't seem to be their style to kill a reporter.' Bolles also said 'Emprise,' a Buffalo, N.Y., company that dominates dog racing here, and is said to have ties to organized crime."

In direct and indirect ways, another investigation possibly the most intensive in the state's history, has helped authorities uncover a number of other possible crimes. "I can't tell you what they are, but it has already led us into a number of areas that weren't obvious before," said William Schafer III, an assistant state attorney general who was named special prosecutor for the Bolles case.

The state attorney general's office is said to be looking into the acquisition and development of the large Lake Havasu City development by the McCulloch Oil Corp. more than a decade ago. Other local investigators are checking into possible conflicts of interest connected with the huge \$2 billion Central Arizona Project, a federally sponsored plan to bring Colorado River water to this area and turn virtually worthless desert into land suitable for residential and agricultural development.

Harris was appointed county prosecutor to fill the five-month unexpired term of Berger, who had long been under fire here and who resigned

after a number of his assistants threatened to quit unless he did. Their action came after the New York Times published excerpts of a tape-recorded conversation in which a senior official in the prosecutor's office attributed lack of vigor in prosecuting land fraud to pressure from a powerful "coalition" of leaders dominated by a local Republican party figure.

Harris, a 38-year-old native of Brooklyn who served as a Marine captain in Vietnam, and who said he does not want the prosecutor's job after the current term, said he had ordered his staff to undertake investigations into a number of areas that he said had been largely disregarded by the office in the past — land fraud, securities and bank fraud, illegal political contributions and others.

He said he had turned over to the FBI information developed by his office regarding the defaulted \$6-million loan to Smith, the California financier, Valley National Bank in a major economic force in Arizona, with assets of \$3.7 billion. One of its directors is Robert Goldwater, a brother of Arizona Sen. Barry Goldwater. Bank officials have said earlier investigations had found no crimes committed by bank officers.

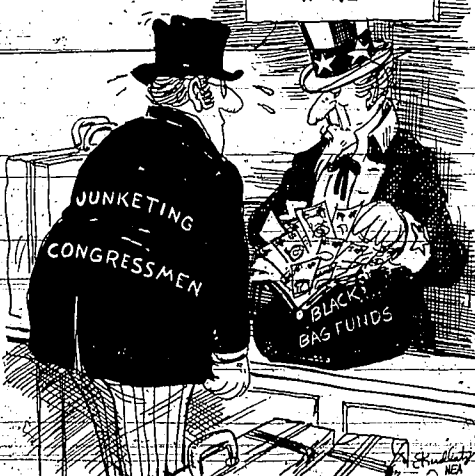

Harris said he could not understand why no one at the bank had ever been prosecuted in a case where the bank had clearly violated its own regulations in making loans.

He said he had turned over to the FBI information developed by his office regarding the defaulted \$6-million loan to Smith, the California financier, Valley National Bank in a major economic force in Arizona, with assets of \$3.7 billion. One of its directors is Robert Goldwater, a brother of Arizona Sen. Barry Goldwater. Bank officials have said earlier investigations had found no crimes committed by bank officers.

"Why Phoenix? Why these two guys?" he asked. One of the lawyers he referred to was Edward Morgan, who served both in the White House and as an assistant secretary of treasury. He was later convicted of falsifying income tax documents for former President Nixon.

He said he had turned over to the FBI information developed by his office regarding the defaulted \$6-million loan to Smith, the California financier, Valley National Bank in a major economic force in Arizona, with assets of \$3.7 billion. Carter cites leadership need

WARM SPRINGS, Ga. (UPI) — Jimmy Carter officially opened his race for the presidency today as Franklin D. Roosevelt's retreat, declaring the nation again needs the strong Democratic leadership Roosevelt provided to heal its divisions and end the scourge of unemployment.

Traveling 25 miles from his home in Plains to stand before Roosevelt's summer home, the Democratic nominee invoked memories of both The Depression era president and of John F. Kennedy.

He recalled Kennedy campaigned here in 1960 and, not unlike himself, had been considered an "outsider" in presidential politics.

"This year, as in 1920, our country is divided. Our people are out of work and our national leaders do not lead," Carter said in his prepared speech. "This year as in 1960, our nation is drifting, without inspiration and purpose."

The 51-year-old Carter said that "as in those critical years, it is time to restore the faith of American people in our own government and to get our country moving again." He said this

requires "strong leadership" and added:

"Political leaders must be willing to tackle economic problems head-on, without timidity or fear. We must not lower our standards to accept high inflation, high unemployment and huge deficits as a normal circumstance."

Carter's Warm Springs speech marked the start of the first week of a 5-day campaign which leads to the Nov. 2 choice by Americans between him and President Ford. In this first week, Carter campaigns in 11 states and the District of Columbia.

The opening speech contained a run-through of pledges of programs which helped win Carter the nomination, including comprehensive health care, welfare and tax reform and a balanced budget.

As he has many times since the beginning of his presidential drive last year, Carter also called for decentralization of power, curbs on government secrecy and the restoration of public confidence through the doctrine that "people should control government, and not the other way around."

Liking Republicans to "terrible economic and social ills," Carter said the national inflation rate was 1 per cent when President Truman left office, and 2 per cent under Presidents Johnson and Kennedy, but that "unfortunately under this Republican administration, the inflation rate has averaged more than 6 per cent."

"When President Johnson went out of office unemployment was less than 4 per cent and at the end of Truman's term less than 3 per cent of our people were out of work," Carter said. "But the unemployment rate today is 7.9 per cent. Under this Republican administration the unemployment has been the highest since the Hoover Depression."

Carter declared what he sees as "a lack of presidential leadership," "no one seems to be in charge," Carter said. "No one is responsible. Every time another ship runs aground — CIA, FBI, Panama, unemployment, deficit, welfare, inflation; medicare — the captain hides in his stateroom while the crew argues about who is to blame."

Police 'rescue' Medicaid probers

DETROIT (UPI) — Three undercover Senate staff in Michigan are trying to document Medicaid abuses got caught redhanded at a clinic in Detroit with false Medicaid identification cards.

But Detroit Police cooperating with the probe "rescued" them from embarrassing exposure, state officials said Sunday.

The incident, which occurred about two months ago, involved aides to Sen. Frank E. Moss, D-Utah, who himself posed as a Medicaid recipient in New York City recently — raged clothing and all — to call attention to widespread abuse in the program.

It came to light Sunday after

David Mathews, secretary of Health, Education and Welfare, told a national television audience he understood that Moss and his aides "got arrested in the state of Michigan for using those cards." He had been asked if he felt it was illegal for Moss to use a Medicaid card.

However, an official of the Michigan Department of Social Services said later that Moss himself had not been involved in the incident and that nobody really got arrested — thanks, primarily to police.

Paul Allen, deputy director of the department, said three aides to Moss posed as Medicaid recipients at a Detroit clinic that has been under investigation by the agency. He said clinic officials questioned the validity of their Medicaid identification cards and took them away for a check.

The incident was witnessed by investigators from Allen's agency, who immediately telephoned Detroit Police officials who had been cooperating with the probe.

Officers dispatched to the scene picked up Moss' men got their cards back and released them.

"They were rescued from a very difficult situation," Allen said. Allen said the clinic in question, which he declined to name, has been under the scrutiny of his department for some time and that investigators have "compiled considerable evidence of Medicaid abuses there."

Solitary confinement rare today

WASHINGTON (UPI) — Solitary confinement may be a hard place to find in the nation's prisons, according to a government study.

Some inmates now are being jailed in old hospitals, an airplane hangar, vacant buildings, trailers and tents, the Law Enforcement Administration says.

Tents are being pitched for convicts in Florida, which also is using an old mental hospital and a converted airplane hangar.

Those jailed in Michigan may find themselves in a Salvation Army hostel.

Eleven states are using trailers, some of them originally to house Pennsylvanians driven from their homes by Hurricane Agnes in 1972.

Between 1973 and 1975, the agency said, in a weekend report, federal and state prisoners increased by 11 per cent — from 192,092 to 218,205 — and the total in January was estimated at 250,000.

A recent study forecast 377,000 by 1985, requiring extra space that would cost \$3.5 billion to \$4.7 billion in permanent housing.

"A lot of areas just don't have the economic means to keep up," Administrator Richard Velde said. "Some judges have been reluctant to send persons to jail because of overcrowding problems."

States are trying virtually everything to handle the prison population explosion, the agency said.

Other factors that could increase the vote are the Ford-Carter debates and interest in the looting South in the Democratic candidate's Georgia.

The pollsters found a large percentage of the nonvoting population was in the West, the Northeast and the Middle Atlantic states, 60 per cent of the dropouts was concentrated in those regions.

The survey, which reached 1,486 persons in 42 states, found nonvoters to be less likely to be believed as "lost generation."

Another group was in the 24-35 group which came to voting age after 1964. Pollster Peter Hart said this could become a political "lost generation."

Cross aflame

KU KLUX KLANSMEN lights one of three crosses at foot of Stone Mountain, Ga., Saturday at the close of the annual KKK convention. About 200 spectators and Klansmen attended the meeting in a cow pasture. (UPI)

Klansmen oppose Carter because of rights view

STONE MOUNTAIN, Ga. (UPI) — The Imperial Wizard of the National Knights of the Ku Klux Klan says his group will try to put a political "kiss of death" on Jimmy Carter because of his stand on civil rights.

The Democratic presidential nominee was criticized several times Sunday in speeches at the Klan's annual Labor Day weekend rally at the foot of Stone Mountain, legendary home of the hooded order.

"The Klan is going to fight him," said Imperial Wizard James Venable, head of the National Knights.

"Every Klan member throughout the nation is going to do everything they can to defeat him. If we can put the kiss of death on him, we're going to do it."

"Sometimes when we want to put a kiss of death on someone we endorse him," he said.

"But we're not going to endorse him. We have other ways."

About 200 Klansmen from 17 states and a group of spectators gathered in a cow pasture owned by Venable, a Stone Mountain attorney, for a Saturday night cross burning.

After the speeches, about 30 hooded Klansmen encircled three crosses, lighted them and marched around to recordings of church bells.

"God Bless America" and "The Old Rugged Cross."

Mist rose from the pasture as the Klansmen, most of them in white hoods, held torches in their right hands and extended their left arms in salutes towards the blaze. The mountain rose in the background.

Venable, 71, told the gathering Carter opposed school busing five years ago as governor of Georgia but supports integration now.

"He said he was against busing but yet a few months ago he said this was the greatest law that ever passed — this civil rights bill," he said. "Can you trust him? The Klan won't endorse him!"

William Morrison, grand dragon of the Tennessee Klan, blasted both Carter and his "young-old double agent, Amy."

"I'd like for him and his daughter, Amy, and all those niggers she goes to school with in stay down there on their peanut farm in Georgia," said Morrison. "With the way things are going, I'm just liable to vote for that grand old Georgia governor, Lester Maddox."

But Venable said Maddox, the American Independent Party candidate, "is as bad or worse than Jimmy Carter. He's a disgrace to Georgia. He teaches violence. He's always done that. He's not capable or competent."

The Hart firm, interviewing numerous in July, found only 30 per cent agreed — "Watergate proved that elected officials are only out for themselves."

And, by 87 to 8 per cent, nonvoters agreed: "What this country needs most, more than laws and political programs, is a few courageous, fearless, devoted leaders in whom the people can put their faith."

The committee said nonvoters preferred Carter to Ford by 50 to 15 per cent, but neither candidate got more than 1 per cent among political figures most admired in the group's lifeline. John Kennedy, Franklin Roosevelt, Dwight Eisenhower and Harry Truman were the leaders.

The committee worked with \$69,000 — from companies, unions and individuals — including Abraham Olin, the Machinists union, C. Douglas Dillon and Stewart Alt.

Eyes change

DAVID Mathews, Health, Education and Welfare secretary, said in a television interview Sunday his department may seek a larger staff to prevent Medicaid abuses. He said the best solution would be to change system management. (UPI)

First Lady works hard

CHICAGO (UPI) — While President Ford holds off on an official campaign start, First Lady Betty Ford is working hard already to garner support for her husband.

Mrs. Ford campaigned here for ethnic votes Sunday, opening the Fifth Lithuanian Folk Dance Festival. She also was scheduled to speak at a church in a northern suburb, but failed to win over the pastor.

Mrs. Ford attended Waukegan's Shiloh Baptist Church, joining in the singing of "For a Thousand Tongues to Sing" and bobbing her head in rhythm to the 75-voice choir's rendition of "Swing Low, Sweet Chariot," sung at her request.

Kepone developer may face big suit

WASHINGTON (UPI) — Allied Chemical Corp., the developer of Kepone, may face a \$500,000 suit by the federal government's expenses in cleaning up contamination caused by the firm's pesticide manufacturing.

Lawsuits for the Environmental Protection Agency and the Justice Department must this week to discuss a Kepone cleanup strategy involving a suit against Allied and the defunct Life Science Products Co., an Allied Kepone subcontractor.

The EPA, the Army Corps of Engineers and Virginia authorities are considering dredging out tainted bottom sediment as the best of several alternatives to stem the tide of contamination in state waterways, but the project is expected to be very costly. A dredging study, expected

to cost as much as \$500,000, has been ordered, but Gov. Mills E. Godwin Jr. says Virginia cannot pay without federal aid.

Screen queen III.

ANBURY, Conn. (UPI) — Actress Sylvia Sidney, 66, the movie queen of the 1930's who played a succession of hardluck ladies and gangster molls, has been released from Danbury hospital after treatment for an unspecified illness.

Miss Sidney was admitted to the hospital Aug. 27 and released Saturday. A hospital spokesman said she was a private patient, so he could not say what she was treated for or what condition she was in when admitted.

In 1969, Miss Sidney moved to rural Roxbury in western Connecticut because, she said, New York streets no longer were safe after 5 p.m.

"I used to finish a show, come home after midnight and walk my dogs. When I couldn't do that any longer, I decided to give up my apartment," she said.

Soccer beauty wins title

SCALEA, Italy. (UPI) — Paola Bresciano, 16, the soccer-playing beauty who recently won the Miss Sicily title, Sunday captured the Miss Italy crown.

Paola plays center forward on the Trapani, Sicily, girls soccer team, which last season won 14 straight games.

Sikes praised

CRESTVIEW, Fla. (UPI) — Ignoring a formal House reprimand given to Rep. Robert Sikes, House Speaker Carl Albert praised the congressman Saturday and said he expects him to easily win re-nomination in Tuesday's Florida primary.

"The only votes he won't get are the people who can't read or write," Albert said. "Sikes and I were close personal friends, called Sikes a 'true patriot.'"

Earlier this year, the House, by a vote of 581-3, gave the Democratic congressman a formal reprimand for conflict of interest violations.

Tarbela tour

RAWALPINDI, Pakistan (UPI) — Margaret Thatcher, leader of Britain's Conservative Party, was guest of honor at a banquet hosted by Pakistan Prime Minister Zulfikar Ali Bhutto Sunday, government officials said.

Mrs. Thatcher, who arrived earlier in the day for a two-day visit to Pakistan, also visited Tarbela, the world's largest earth-filled dam 69 miles northwest of here on the River Indus.

She described her visit to Tarbela as a "wonderful experience" and met the families of British workers at the dam. Later, she took the 36-mile helicopter trip to Taxila, where she visited the museum that houses rare exhibits of the ancient Gandhara civilization.

Economy blueprint

RAWALPINDI, Pakistan (UPI) — Prime Minister Zulfikar Ali Bhutto has renewed a call for a summit conference of impoverished nations to "dismantle the present economic order."

The Pakistani leader's proposal seeks to bring together the world's poor nations regardless of regional, racial or ideological differences. Bhutto first made the suggestion during a state visit to North Korea three months ago.

Susan takes spotlight

HAGERSTOWN, Md. (UPI) — Susan Ford, dressed in colonial garb and riding a 19th century horse-drawn carriage, will be featured at the Washington County Bicentennial celebration.

The President's 19-year-old daughter reigns today as "Belle of the Washington County Bicentennial Parade." She is a sophomore majoring in photojournalism at Mr. Vernon College in Washington.

Refugee dismissed

A MONTH ago, 21-year-old Tu Van Le happy with his success in finding a job where he was advancing, moved his family into an apartment away from his American sponsors. However, one day before his probationary period was up, he was fired. Le poses with his family, wife, Chinh Tai Nguyen, baby boy, Thoai Van Le, and Thao Thi Le, girl 3. (UPI)

Patriotic con artists hit US

DETROIT (UPI) — The Bicentennial year has spawned a special breed of patriotic con artist.

One of the most popular and successful of the swindlers cited by a Detroit banker who keeps track of such things is a cruise aboard the S.S. United States, called the "John Paul Jones Special."

It sounds like a great way to get into the "Spirit of '76" and hundreds have signed up for reservations. The only trouble is, the luxury liner has been in mothballs since 1962.

Here are a couple other common schemes to look out for, according to William J. Kilmair, assistant vice president in charge of auditing, at Detroit Bank & Trust.

— A "Whiff of the Past." An enterprising New Yorker has been selling bottles of air he claims was collected on July 4, 1776, and saved for posterity. The bottles sell for about \$30 each.

— Crafty ideas. The selling of nonexistent space for Bicentennial arts and crafts exhibitions in persons who wish to display some of their works—and skills in colonial crafts. Kramer, who collects information on swindles as part of a bank project to enlighten the public, said the main problem in putting con artists out of business is that many victims are too embarrassed to admit to police or law enforcement officials that they've been had.

Vietnamese refugee finds new home, then loses job

PITTSBURGH (UPI) — With a job that kept him independent, Tu Van Le and his family moved out of their American sponsors' home and into an apartment located closer to work.

But the day before his 60-day probationary period at Westinghouse Electric Corp.'s Blairsville plant was up, the Vietnamese refugee was dismissed.

Le, 24, says it was because of his national origin.

Westinghouse says Le was unable to speak English well enough to handle his duties.

He was hired May 24 as a janitor and had been promoted twice to a position polishing the stainless steel tubing manufactured for atomic power stations.

"Le's difficulty with English became clearer and clearer as his job—responsibility increased," said Brent Smith, a Westinghouse spokesman.

"During the probationary period, we got a chance to appraise and review any new employee," Smith said. "But no real amount of progress was being made in overcoming Le's language problem."

He said a part of all jobs at the plant is following verbal and written instructions. If Le improves his English and if the company is still hiring, Smith said, "We would reconsider his application."

Le's American sponsor, Robert Cunningham, said he knows Le was doing all right at Westinghouse.

"We thought he was unjustly fired," he said. "They promote a man until his lack of English makes them release him."

"It's a flimsy excuse."

Once fired, the only alternative for Le, his wife, their 3½-year-old daughter and 5-month-old son was to apply for welfare and file a complaint with the state Human Rights Commission.

Cunningham said he was unable to resume supporting Le and his family, who moved to his home July 1975 and lived there for about a year.

"It's just impossible for us," Cunningham said. "Le com-

mitted himself to paying rent and started to buy a few things like a washer and dryer and small television set."

"If we were to take him back we'd be committed to make those payments also. I can see no way to continue the relationship as it once was."

Le told the Cunninghams he liked his job very much.

"I need job. I have a family," he said haltingly. "We all were unhappy. My

wife cried very much. "I want to tell you I did not make mistakes when I worked. I would rather go to work than go on welfare."

Soviets say grain crop could meet 1976 needs

© N.Y. Times Service

MOSCOW — The Soviet Union, while still feeling some pinch from last year's agricultural disaster, is looking forward to a relatively abundant harvest this year that could cover domestic needs.

The Soviet party chief, Leonid I. Brezhnev, said in a speech Friday in the Central Asian city of Alma-Ata, the "crop of grain gladdens our hearts. It is evidence that the country will have enough grain this year."

Brezhnev did not offer any statistics to buttress his assertion. But his appraisal follows a summer of timely rains and good weather in much of the Soviet Union that has persuaded some Western agricultural analysts here to

improve their estimates of the harvest outcome closer to the Soviet government's target of 207 million tons in 1976.

At a same meeting of party and economic officials in Alma-Ata, Dimukhamed Kunayev, the Kazakhstan party chief, announced that it was possible for the crucial republic to produce 27 million tons of grain, according to the official press agency Tass. Over the last five years, Kazakhstan's yield has averaged slightly less than 22 million tons.

An earlier note of confidence was struck last month when Valentin K. Mesyals, the new Soviet agriculture minister, reportedly told a visiting Yugoslav delegation that the nation's grain harvest would exceed 200 million tons.

Brezhnev reported Friday that more than half the grain had already been harvested despite "torrential rains" that had "beaten down crops in some regions and was bound to add to the total bunker weight of the harvest."

But the official optimism

already being reflected from the Soviet leader on down contrasted with a tight-lipped silence that was the harbinger of last year's harvest failure. The return was slightly less than 140 million tons or a shortfall of more than 75 million tons.

The miserable showing was attributed to a drought that scorched crops across the country.

In the wake of the harvest disaster, the nation's economic targets for 1976 were trimmed to their lowest growth rate since World War II. Friday, Brezhnev, looking fit and vigorous after his summer vacation in the Crimea, reported that industrial production this year was already running 5 per cent over last year, or well above

the Soviet leader also pointedly noted that production of consumer goods, a sensitive subject, was running 3.4 per cent higher as against the 2.7 per cent increase targeted. Brezhnev concluded that there was "every reason

to believe" that the 1976 industrial targets would be exceeded.

The principal agricultural problem this year lies in central Russia, particularly the region surrounding Moscow, where a cold, wet summer has left crops sodden and stunted. But regions farther south have reportedly benefited from a good summer after a cold winter believed to have killed at least 25 per cent of the winter grains.

"Now the crop is there if they can get it in," said one Western specialist, taking note of the emergency push that seems to mark just about every Soviet harvest.

The Soviet Union is still expected to purchase about 15 million tons of grain from the West, which about 2 million tons will probably be re-exported to allies such as East Germany and Czechoslovakia. So far, Moscow has bought nearly 30 million tons from the last harvest, according to a Western agricultural source.

But the country is still plagued by a shortage of meat and poultry in the stores as a result of distress slaughtering last fall for lack of fodder. By

contract, the party newspaper Pravda reported that farmers this year have cut more fodder than in 1975, when the Soviet Union produced its best harvest to date.

Friday, Brezhnev conceded for the first time that "in a number of localities there are interruptions in the supplies of meat and other animal products to the population," but predicted an improvement by the end of the year. He asserted that there were nonetheless more beef and dairy cattle than last year but said only that "matters are improving in poultry, sheep and pig-breeding."

Unreleased figures for the first seven months show cattle at only 1 per cent more than a comparable period last year, which would mean a net loss of 15 per cent of the year. Numbers of hogs have declined 15 per cent, sheep and goats 4 per cent and poultry 8 per cent from the same period in 1975.

Meat production also dropped slightly more than 20 per cent from last year, creating shortages for consumers. In Moscow, some stores are no longer kept open on Sundays.

Awards conferred

OUTSTANDING agri-business students at the College of Southern Idaho were awarded Censar scholarships valued at \$800 each. The presentation involved, from left, Lane Bean, Teton; Bob Holloway, Censar spokesman; Doug Johnson, Valley View; and Paul Wetter, CSI agri-business instructor. The awards are based on outstanding achievement in 4-H and FFA activities. CSI is the only Idaho college to receive the scholarships, which are awarded in 13 Western states.

Judge keeps fertilizer case

SPOKANE (UPI) — U.S. Dist. Judge Marshall Neill Friday refused to sign an order vacating a class-action fertilizer antitrust case from the docket of Judge George Boldt, Tacoma.

Attorneys representing defendant fertilizer companies argued that Boldt should be removed from the case.

They questioned the legal correctness of an opinion Boldt rendered in a sugar antitrust case.

"Judge Boldt could not give

our clients an evenhanded hearing in this matter," Carl Schuck, Los Angeles, contended.

"Judge Boldt is well intentioned, but because of his handling of the sugar case, there is a question of his impartiality," Schuck contended.

Judge Neill said the question of Boldt's impartiality in the case would have to be up to him.

Neill also declined a defense request to set back the hearing from Sept. 9 as scheduled.

Farmers from Montana, Idaho, Washington and Oregon seek treble (but unspecified) damages against seven fertilizer firms which they claim conspired to fix fertilizer prices over the past ten years.

Huge spud surplus in Northwest

KENNEWICK, Wash. (UPI) — Overproduction and a resulting dip in prices could leave eastern Washington and northern Oregon potato growers with a \$50 million surplus in spuds.

The surplus is now estimated at \$500 per acre on fresh market potatoes.

"We can't manipulate

supply and demand and are stuck with this market," Byard Sloum, marketing manager for Oregon Potato, Inc., Boardman, explained.

Another grower, Charles Cox, Pasco, said some growers will be luck to recover seed and fertilizer costs because of the current selling price of potatoes.

Washington farmers planted 124,000 acres of spuds, 24,000 more than last year while in Oregon, 35,000 acres of crops are in the ground up from 20,000 acres last year.

The overproduction shows in the marketplace where last year premium bakers are selling for \$5-7 per 100 pounds now and drew \$10-15 per 100 pounds last year.

Gem meat down

BOISE (UPI) — Idaho red meat production was down three per cent in July from the 29 million pounds produced in July, 1975, the Idaho Crop and Livestock Reporting Service said today.

The number of cattle slaughtered was down by 2,000 and the hog slaughter was down four per cent from the previous July.

The July average cattle live weight was up 14 pounds, but the hog weights averaged about two pounds less than a year ago in July.

Japanese drenched

TOKYO (UPI) — Drought plagued Britains may be praying for rain, but the farmers of northern Japan just wish they could turn off the downpour.

The coldest and wettest summer in 63 years is playing havoc with crops in the Tohoku region, the six northern provinces of Japan's main island of Honshu.

Morioka City, 300 miles north of Tokyo, had only 84 hours of sunshine during the entire month of August — an average 2.7 hours per day — according to data gathered by the government meteorological observatory at Sendai City.

The average temperature in the six provinces in August was 69 degrees, five degrees below normal. Rainfall in the Tohoku has been two to three times above normal in most locations. At Morioka, capital of Iwate province, officials calculated that unless the weather dries up soon, the rice harvest will be 30 per cent below par, costing farmers \$66 million and giving the region its worst crop failure since 1941.

Livestock

NORTH SALT LAKE CITY, Utah (UPI) — Utah's eastern Nevada feedlot and range cattle sales for the week ending Friday, Sept. 3: Weekly trade at area feedlots generally slow with demand narrowing as packers' needs for the Labor Day holiday-shorted period next week were met.

Slaughter steers closed mostly steady. Slaughter heifers steady, instances of 50 lower than last week's best time. Confirmed sales this week on 2,410 slaughter steers: 7,915 slaughter heifers, average price of choice steers sold, job feedlots this week 39.62 and 1,110 lb; last week 39.84 and 1,100 lb; last year 47.02 and 1,147 lb.

Slaughter steers, good and mostly choice 2-3 1,000-1,200 lb 39.00-40.00; some mixed good and choice 1,000-1,100 lb 38.00-39.00; good and choice 1,200-1,450 lb holsteins 31.00-32.00. Slaughter heifers, good and mostly choice 2-4 875-1,000 lb 36.00-37.00; few lots 37.00.

Feeder cattle trade moderate as seasonal offerings increase; feeder steers and heifers under increasing pressure and closing 1.00-2.00 lower than last week. Choice low prime 650-900 lb steers ranged 38.00-40.00; but most late sales 39.00-39.50; choice few prime 800-950 lb 37.00-39.00; choice 600-700 lb heifers 33.00-35.00; 33.00-33.50 late. All for September and early October delivery.

Sheep: Sales of mixed slaughter and feeder lambs about 1.00 higher than last week's low time; moderate volume of mixed choice and fancy feeder lambs and choice slaughter lambs for delivery over the next couple of weeks 40.00 net to buyer.

BOISE—Valuable shade trees in backyards and campgrounds may be saved from the threat of mountain pine beetle attack if Forest Service entomologists are successful in their efforts to obtain EPA registration for three chemicals.

Lindane, Sevin and Dursban were tested during 1975 and 1976 in eight states and 1976 in nine of the western states for their effectiveness in reducing tree mortality.

These "insecticides show great promise for providing protection from the small bark beetle that is causing a large number of trees to turn red, lose their needles and eventually die."

"Registration of the three chemicals is not being sought for widespread forest application," said William E. Murray, deputy regional forester for state and private forestry, Intermountain Region, Forest Service.

"But, we hope that one or all of the pesticides might be used to protect high-value trees in campgrounds or on private lands."

When and if the chemicals are registered, it may be possible for a homeowner to have his trees sprayed in the spring to protect them from attack for from one to several years. Treatment costs would prohibit large-scale application, but in areas such as campgrounds cost of treatment would be offset by the ornamental value of the trees.

The mountain pine beetle feeds in the phloem layer of a tree just beneath the bark. It attacks several species of pine trees, including those in Utah and Idaho, its principal host and lodgepole pine. Once inside the bark, the beetles mate and the female constructs a vertical gallery several inches long where she deposits her eggs.

The eggs soon hatch and the young larvae begin making vertical galleries along which they feed in the phloem of the tree. This feeding activity, which essentially girdles the tree, would ordinarily be fatal alone; however, death is assured by the histamine fungus introduced by the beetle. The fungus grows within the waterconducting system of the tree and actually clogs off this life-sustaining system.

Approximately 90 percent of the trees attacked by the beetle are dead by the following spring. The summer following the attack, the trees "fade"—or turn red, the year after the attack. The needles fall. More important than individual tree mortality is the fact that each tree attacked and killed adds hundreds of new adult beetles to the following year's attack force.

Much testing and gathering of data remains to be done by Forest Service entomologists engaged in this work. Present results indicate that progress is being made in the battle against these destructive insects.

WASHINGTON (UPI)—Inches by inch, or millimeter by millimeter to be more accurate, the Agriculture Department is edging cautiously toward wider use of metric measurements which eventually are expected to replace traditional measurement systems in all phases of American life and business.

The department said today its Crop Reporting Board, which has quietly been listing national production of many major crops in both bushels and metric tons for several years, is now planning a dual reporting system by next year to national estimates covering livestock, poultry and vegetables.

Next month, a regular department report which lists highlights of farm export and import developments will have recording data in a dual system showing both metric tons and old-style bushels.

And when an annual hand-

book of agricultural outlook charts appears for 1977, an official added, sections on world conditions will use metric units "in as many cases as feasible" combined with a conversion table allowing readers to translate the figures back into bushels if they wish to do so.

Under a federal law enacted last December, the U.S. officially adopted the metric system, becoming the world's last developed nation to do so.

The law did not make use of the system mandatory. Instead, it provided that the federal government should coordinate a voluntary shift to using metric measurements such as meters and kilometers instead of feet, yards and miles, hectares in place of the traditional acre, and liters in place of quarts.

Agriculture officials said the legal direction to make the transition voluntary as far as private citizens are concerned is forcing many of their

agencies to move very cautiously.

The department's Rural Electrification Administration, for example, is beginning to write specifications for equipment used by local REA cooperatives in metric units. But these must be treated as "interim" official standards because, the agency must compel a crop to specify millimeter screws instead of half-inch screws when ordering equipment.

In another case, the department's Packers and Stockyards Administration is reviewing regulations based on the accuracy of thousands of livestock scales. But it cannot force livestock sales agencies to adopt metric-unit scales, the official pointed out.

Spokesmen noted that one, the Farmers Agency in the Fôreign Agriculture Service, last month converted all its reports on foreign grain

production into the common metric ton units used abroad.

The conversion of U.S.A. domestic data of more common use by the farmer and consumer is expected to begin in 1977 after an extensive public familiarization program," a department report added.

Internally, the government agency is using metric units increasingly, like many other federal and private organizations. Officials said most department scientific measurements were switched to metric years ago, and regional research units of the Foreign Service have already begun using metric measurements for timber alongside the old land-measure system.

Not all agriculture officials are ready for the leap into the metric age immediately, however.

The department's Agricultural Conservation and Stabilization Service, which

operates many farm support and conservation programs dealing directly with farmers, noted in a recent report it was "not prepared to convert from acres to hectares (which equal 2.47 acres)."

The service said it was considering a proposal to issue its reports in both acres and hectares. But officials stressed that no final decision had yet been made.

Idaho First's MONEYMANAGER plan ties five banking services into a control system that can save you time and money!

This new Idaho First system shows your financial picture through a combined statement and it gives you all these banking services in one handy package: 1. Checking* 2. Savings* 3. Line-of-Credit 4. E-Z Balance, and 5. Telephone Transfers of Money.

With Idaho First's **MONEYMANAGER**, your savings and checking dollars join forces to save you money.

You simply add the minimum balance of your checking account to one-third of the minimum balance of your savings. If the sum of the combined accounts is \$300, or more, you pay no service charge, regardless of the number of checks you write. Should your balance come to less than \$300, there will only be a \$.30 per month charge.

With Idaho First's **MONEYMANAGER**
your savings and checking dollars join forces to save you
money.

You simply add the minimum balance of your checking account to one-third of the minimum balance of your savings. 1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and putting them into practice. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas for improvement.

... ..

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

DEAR ABBY: In reading about your 40th high school reunion, we were most interested in learning that your nickname is "Popo."

We lived for a while in Micronesia (a Pacific Island) where Trukese is spoken, and "popo" in Trukese means "pregnant."

We have a loyal and sensitive dog, which we appropriately named Popo. Just thought you would like to know about your namesake.

DIANE

Namesakes discussed

DEAR DIANE: Thanks. I have several other namesakes. Popo is short for Popocatepetl, a volcano in Mexico. And it's also the German word for that part of the anatomy on which one usually falls.

DEAR ABBY: My only grandchildren (a boy, 14, and a girl, 15) live in a distant state, and I always remember them handsomely at Christmastime.

Last March I received a letter from their mother (my daughter-in-law) that said, "Barby and Sonny have asked me to thank you for your fabulous Christmas gifts, and they're terribly ashamed that they never got around to thanking you themselves."

I replied to that letter as follows: "As far as I'm concerned, Barby and Sonny have not as yet acknowledged my Christmas gifts properly; furthermore, they are old enough to write their own thank-you notes, and it's high time they learned some manners."

Next thing I knew, I got a snippy letter from my daughter-in-law, saying, "If you're going to make such a big deal out of thank-you notes, please don't send the children any more presents."

Abby, you know perfectly well that I'm not going to forget my grandchildren at Christmastime. Was I wrong to complain?

HURT NANA

DEAR HURT: Yes. And your daughter-in-law was also wrong to have written that snippy letter. What motivates your giving? Is it the pleasure of giving? Or the pleasure of being thanked?

There is no excuse for the rudeness your grandchildren showed, but if their lack of appreciation irritates you, you should tell THEM, not their mother.

DEAR ABBY: I'm 9 years old and I want a horse more than anything in this world. Dad said, "You can have a horse if you can pay for it, plus all the equipment and the upkeep."

The horse I want costs \$150, but I don't have the money. I don't get an allowance, and I can't earn money doing chores for the neighbors because they say I'm too young and I might get hurt.

I can't earn any money doing chores around my own house because my folks say I live here and should do whatever I can for nothing.

I have run out of ideas. How can I get the money?

HORSE-CRAZY IN INDIANA

DEAR HORSE-CRAZY: I'm afraid you will have to be patient until you are able to EARN the money—unless you can persuade your dad to lend it to you with the understanding that you will repay him when you become a wage earner.

your health

By LAWRENCE E. LAMB, M.D.

DEAR DR. LAMB:

Could you please give me some information on plantar warts. I have had one for about one-and-a-half years. Now I notice I'm getting others. I went to a podiatrist about eight months ago but at the time I was severely allergic so he didn't want to begin treatment. He told me no matter what I do I shouldn't have them cut out because the scar formation can be more painful than the wart. Others have told me the only real way to cure them is to have them cut out. What do you advise?

Dear Reader—The podiatrist gave you good advice. Plantar warts are different than other warts and the treatment is not the same.

Warts, regardless of location, are mildly contagious. They seem to have a life cycle and will disappear on their own in time. Unfortunately, a wart may last five years, but many disappear within a year.

Although there may be several warts they may all disappear about the same time, suggesting that the body has finally developed an immunity to them and literally expels them.

Plantar wart advice sought

One of the problems about removing a wart is that a new one may then develop. It is not a regrowth of the old one if it has been completely removed, but a new wart. It is advisable to remove most warts because the presence of one may lead to a spread with new wart formations.

The plantar warts are caused by the same virus, but the location, in the dense tough tissues on the bottom of the foot, makes the usual means of destruction unsatisfactory because you may be left with a painful scar. It is better to live with a painful wart for as much as five years than to live the rest of your life with a painful scar on the bottom of your foot.

Liquid nitrogen to freeze warts, electrocautery to burn them out, and other treatments are used to destroy warts in other locations.

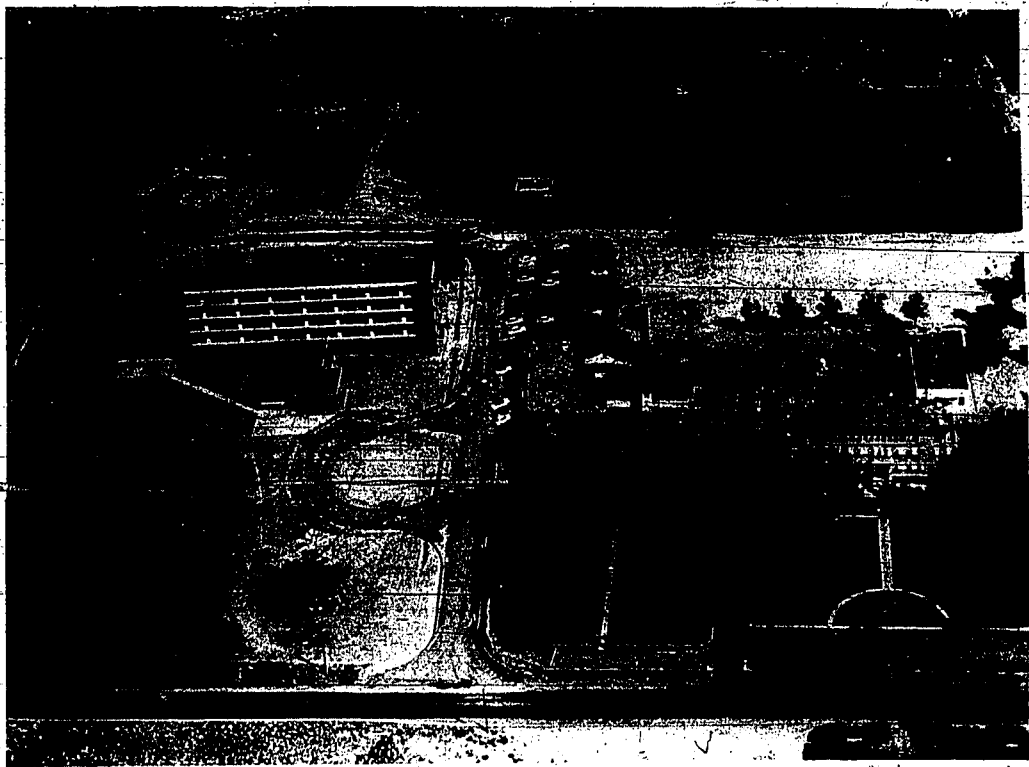

A good method is to apply a small piece of 40 per cent salicylic acid plaster the size of the wart. The plaster is held in place by a piece of waterproof tape and then replaced every three days. The wart tissue will turn white and can be pared away each week. This will keep the size of the wart down and eliminate some of the discomfort. In some cases it will eventually cure the wart. Applications of cold cream containing five per cent formalin can also be used in some cases.

Some patients develop a sensitivity to formalin and if there is any sign of a rash the treatment should be stopped.

For other warts, removal by liquid nitrogen is usually successful. All of the methods to destroy warts must be done under a physician's supervision. A strong medicine called cantharidin can be applied to a wart and the area covered with collodion and properly dressed. Regardless of the method, the successful ones depend on destroying the wart-infected tissue.

Some of the medicine cures seem to work on occasions. Usually this is a happy coincidence with the treatment being applied just at the time the wart was all through anyway.

(Newspaper Enterprise Ass'n.)

Old and new

AERIAL view of the present Magic Valley Memorial Hospital, center, left, after construction was completed in 1951 but before lawns and landscaping were installed. Building in right foreground is the old hospital, used from 1918 till 1951, adjoined by almost hidden nurses' residence to the left. Behind the old hospital is an annex used for obstetrics and infant nursery prior to the move into the new building. Back of nurses' quarters stands a steam plant formerly used to heat all of the old buildings.

TF hospital built 25 years ago

By MARY GOE
Special to the Times-News

TWIN FALLS — It was warm that 10th of September in 1951 when four ambulances arrived to begin shuttling 31 sick and injured patients from the old to new facilities of Magic Valley Memorial Hospital.

Most of the physicians in Twin Falls and 23 volunteer nurses recruited by the Red Cross helped hospital staff gather up patients from stuffy rooms and a sleeping porch in the mouldering lava rock structure at 634 Addison Ave. W., and see them ensconced in spacious

sunny quarters of the streamlined five-story glass and brick medical center just up the hill.

Since that day 25 years ago, the "new" Magic Valley Memorial Hospital has gone about the business of delivering daily services to all who need them, trying to adapt and adjust its personnel, funds and focus to accommodate the changing pattern of medical service and health care delivery.

According to James Rosenbaum, hospital administrator, when this hospital was on the drawing boards there was a need to tool up to meet the threats of serious communicable disease — a very real concern as demonstrated

by the 1952 polio epidemic in Twin Falls — and to try to estimate the fundamental needs which developing medical technology might bring in the next couple of decades.

"The capability of the hospital to respond to demands of increasingly more specialized treatment and diagnostic modalities is a credit to the early planners of the hospital," he said.

"There are still developing needs and stress points which the hospital board and management are attempting to provide solutions to," he said, "one of the greatest being the totally inadequate emergency room."

Rosenbaum pointed out that in 1952, the first year of full operation in the present building, 314 patients were treated in the emergency room. "This many people are now seen every two weeks there, he said, with an annual total of well over 8,000 emergency visits.

Over the past 25 years, the hospital has had several "modernization" and "expansion" programs, sometimes to meet new federal standards and requirements for insuring patient safety, others to allow for the growth in numbers of patients and types of service offered.

Rosenbaum paid tribute to the officials and hospital board who were responsible for providing a facility with such long range potential for serving this community.

County commissioners in office when the

present hospital was dedicated included George A. Childs, Frank Palmer and I. W. Hawkins.

The hospital board in 1951 consisted of T. Clyde Bacon, chairman, Twin Falls; Glen Briggs, Meridian; Mrs. Henry Davis, Twin Falls; Theodore Gilling, Clover; Mrs. Gordon Gray, Twin Falls; Mrs. Rachel Miller, Castelford; E. Hunsstock, Hollister; C. D. Hight, Twin Falls; Carl Leonard, Filer; Charles Lunte, Buhl; Ted Sandmeyer, Buhl; W. B. Savage, Kimberly; Mrs. C. Smithson, Buhl; Gan L. Thompson, Buhl, and N. V. Sharp, Filer.

Since a hospital is a "people business," the people who work in it are its most important asset, Rosenbaums aid. Eleven hospital staff and 12 physicians who began their affiliation with the hospital in the old building are still working at the present hospital.

Hospital personnel include Lucille Chatterton, Exeter; Honderich, Ruth, Malone, Belfra Michaels, Bernice Fillmore, Gladys Perkins, Nell Wheeler, Beverly Richardson, Chester Allen, Ben Roberts and Clara Van Houten.

Physicians still on the active medical staff are Drs. Dean Affleck, Vern Anderson, Max W. Carver, Martin Culler, George Davis, Glenn Hesse, C. McWilliams, W. H. Peterson, Vaughn Pond, Douglas Schow, F. Wayne Schow and George Warner.

Iron lung demonstrated

THE 1951 Magic Valley Memorial Hospital staff demonstrated the then new iron lung — hardware put into active use during Twin Falls' last major polio outbreak in 1952.

Three who remain

STILL together are three members of the Magic Valley Memorial Hospital staff who were working in the old hospital at the time of the move to the new facility. L to R are Ruth Malone, R.N.; Dr. C. R. McWilliams, for 26 years chief of radiology; and Clara Van Houten, credit manager.

MR. and MRS. DAVID HATTON

LDS Temple rites unite Utah pair

JEROME — On Aug. 20 in the LDS Temple at Provo, Utah, Evonne Halladay, Jerome, became the bride of David Hatton.

Miss Halladay, Provo, is the daughter of Mr. and Mrs. Carl W. Halladay. Jerome and the bridegroom's parents are Mr. and Mrs. Melvin Hatton, Provo, Utah.

An open house was held for the newlyweds in Bonifield, Utah, the day of the wedding. A reception was held Aug. 28 at the LDS Institute in Twin Falls.

The bride wore a nylon organza gown with lace appliques trimming the front and train. Her shoulder-length veil was trimmed with lace appliques which matched those on the gown.

She carried a nosegay bouquet composed of carnations, baby's breath and greenery accented by ribbon streamers.

Maid of honor was Karen Scott, Rupert, and bridesmaids were Diane Frederickson, and Jan Halladay and Kathryn Jensen.

both Jerome.

Best man was Lamont Warden and usher was Tracy Jensen.

"Gilt" bearers were Curtis Leavitt and Brett Allen.

The "bride's" table was covered with a white sheer cloth and a pale yellow linens which was caught at the corners with bouquets of yellow flowers.

The wedding cake was covered with pale yellow frosting featuring darker yellow flowers and was topped with wedding bells.

The wedding party greeted guests before sheer Austrian curtains accented with large vases of yellow and white flowers.

Reception assistants were the bride's sisters Cheryl Leavitt, Sheila Allen, bride's aunt Lois Jensen, Julia Powell, Selma Powell, Lola Egbert, Barbara Weaver and Kathy Bulmer.

The couple will live in Provo where the bridegroom is employed at Zion's First National Bank.

Footwear takes big step back

© Chicago Daily News
Get ready to rebel or suffer this fall, ladies.

Spike-heel and pointed-toe shoes have stepped out of the shadows of low-life and right back into high class footwear.

They're keeping strange company, too. The deepest other shoeprint in the fall fashion sand is being made by the brogue that looks just like a man's.

Don't expect to cop out with boots. They're stepping to the same two different drummers.

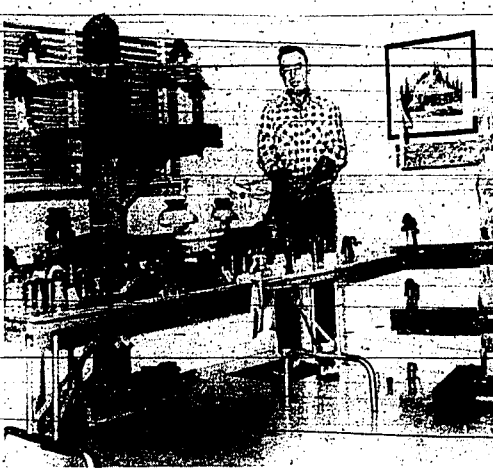

While heels could hardly get higher than those on some of the platform models many women have been wearing the last few years—unless you revert to childhood and play around on real stilts—what's happening in the trend-setting shoe factories is the spike, with a tissue-thin sole and a heel so high and so thin it has to have a steel rod inside it.

The toe is needle-pointed—the kind that has to be half a size longer if you don't want nagging corns. And it's eventually going to turn up despite diligent efforts with shoe trees.

Heels rise to a full 4 1/2 inches on various styles—the low-cut stiletto, pump, instep pump, T-strap pump, the "bracelet" sandal and boots.

In case some of you have forgotten since the last time they were around in the 1950s and early 1960s, the "bracelet" is the thin stiletto pump known in polite society at that time as the "come hither" shoe. It has since picked up another tag more in keeping with modern slang terminology.

In any case, the super-high-heel shoe that's light aloft is the one reputed to be a big turn-on factor for the leg-watching society of males.

Collection displayed

ROSS Sheppard of Idaho Power Co. shows display of insulators he has collected the past nine years. They include power, telegraph and telephone line insulators that date back to the 1860s. Some are broken bottle tops. The display can be seen at Idaho Power Co.'s Salmon office.

Lineman collects insulators

SALMON — Ross Sheppard, journeyman lineman for Idaho Power Co., has been collecting various kinds of insulators the past nine years.

They include power, telegraph and telephone line insulators dating back to the 1860s when they first started making them.

The collection now is on display in the Salmon office of Idaho Power.

Some of the insulators are attached to the type of cross arms used at the time. At one time old broken bottle tops served as insulators.

Sheppard collected the insulators mostly from Idaho Power Co. lines. They had become obsolete or outdated.

Sheppard has worked for Idaho Power the past 19 years, starting in Gooding, then went to Jerome. He worked eight years in Twin Falls before coming to Salmon.

Some of the old insulators came from the Gold Stone and Harmony mines in Lemhi County and a few from the old telegraph line that followed the railroad when it came to Salmon. He also has some from the old townsite of Hahn which was just beyond Gilmore summit on the right.

Sheppard says the display shows the development of the insulator down to the present time.

Miss America pageant begins

ATLANTIC CITY, N.J. (UPI) — Here she comes, Miss America 1977, a bit more outspoken, liberated and career minded, but still cautious of controversy and very much the "goodwill ambassador."

The girls arrive in Atlantic City today for this year's pageant, each hoping it will be she who walks the runway Saturday night with the winner's crown on her head.

For Iowa's Ronda Frongley, the pageant is special. "Most contestants will talk very highly about it — very rarely."

will you find one who cuts it down," said Miss Frongley. "It's such a good program and there are very few good things left in life."

But Miss Illinois, Betsy Jamison, said contest officials are bombarding her with questions about her recent trip to Manila for Muhammad Ali's fight with Joe Frazier.

All's manager is a personal friend of the family, she said, and she has attended several fights and spent a month in Manila as All's travel secretary.

Rhode Island's Deborah Cerroni believes in astrology and has commissioned a friend in Boston to study her charts for guidance.

And even if the stars are propitious — she is a sagittarius — perhaps the judges aren't, so, "I don't discuss politics, drugs, abortion, premarital sex and . . . other touchy subjects. I'm supposed to be an ambassador of good will. One of the judges might hear about it and hold it against me."

Missouri's Virginia Kolch answered a question about marijuana smoking thusly: "Well not regularly. Should I say that. I guess I should say it's none of your business."

Miss South Carolina, Lavinia Meri-Cox sees the bathing suit competition as an expression of physical fitness and courage, not a chauvinistic "beef show."

ROTC stipends given students

MAGIC VALLEY — Two Idaho State University students from the Magic Valley have been awarded U.S. Army scholarships to enable them to attend college and to seek commissions through the Reserve Officer Training Corps (ROTC) program.

daughter of Mr. and Mrs. Leo Allin, Jerome, is a sophomore pre-law major who received a three-year, \$6,000 scholarship. She is a graduate of Jerome High School.

David Miller, 19, the son of Mr. and Mrs. Thomas Miller, Gooding, is a sophomore in general studies who won a three-year, \$6,000 scholarship. He is a graduate of Gooding High School.

Four other ISU students received Army scholarships bringing the total for all six to \$40,000.

Four CSI students given scholarships

TWIN FALLS — Four students have each been awarded \$600 Laura Moore Cunningham Foundation scholarships to attend the College of Southern Idaho during the 1976-77 school year.

It was announced today by Paul E. Ostyn, chairman of the scholarship committee, that two of the students are returning sophomores.

They are Valerie Dee Van Patten, daughter of Mr. and Mrs. Ronald Van Patten, Jerome, who is majoring in medical science and maintained a perfect 4.00 grade point average during her freshman year, and Sheri Lou Vance, daughter of Mr. and Mrs. George Vance of Wilder, who has maintained a 3.37 grade point average and is majoring in special education.

The other two students are incoming freshmen and were chosen for their outstanding academic and extra curricular activities while in high school.

Brenda Lorraine Bailey, daughter of Mr. and Mrs. Ralph B. Bailey, Kimberly, was valedictorian in her graduating class at Kimberly High School and was active in student government.

Nancy Louise Bruns, daughter of Mr. and Mrs. Arthur Bruns of Idaho, was co-valedictorian of her graduating class at Valley High School and was also active in extra curricular activities.

The Laura Moore Cunningham Foundation scholarships are made available entirely from the earnings on the foundation's Idaho First National Bank stock in memory of members of the prominent Christopher W. Moore family, founder of the bank.

Briefs

HAILEY — Volunteers in Corrections will meet at 8 p.m. Sept. 15 in Judge Alban's courtroom. All members are urged to attend.

TWIN FALLS — Barry M. Isilda, Twin Falls, was among those students listed on the dean's list for the summer session of Idaho State University's College of Business. Dean James M. Kelly has announced.

Tri-state regulations for Bear River offered

SALT LAKE CITY (UPI) — Utah Gov. Calvin Rampton says he will meet with Govs. Ed Herscher of Wyoming and Cecil Andrus of Idaho during the Western Governors' Conference Sept. 18-22 to finalize plans for a three-state Bear River Compact.

The plan includes proposals for states water rights, and uses of water storage in Bear Lake. Talk of modifying the original 1958 Bear River Compact began as early as 1969. Under the proposal tentatively agreed to by the three states, Idaho would receive a guaranteed 125,000 acre-feet of water annually from drainage runoff below Bear Lake, and 4,500 acre-feet above the lake.

Utah and Wyoming would receive an additional 35,000 acre-feet of water each from above Bear Lake, and Utah a minimum guaranteed 125,000 acre-feet from below the lake. Bear Lake, which straddles the Utah-Idaho state line, has a maximum storage capacity of 1.4 million acre-feet.

In wet years, Utah and Idaho would both receive additional shares of up to 75,000 acre-feet of water from below Bear Lake.

The proposal also calls for a doubling in size of the Woodruff Narrows Reservoir on the Utah-Wyoming state line to provide the added upriver water shares for the three states.

The Bear River's headwaters are in Utah's Uinta Mountains. The river meanders north through Summit County, into Wyoming's Uintah and Lincoln counties, and curves back west and south to include drainages in Idaho's Bear Lake, Caribou, Franklin and Onda counties, before returning to Utah through Cache and Box Elder counties, where it spills into the Great Salt Lake.

From source to the Great Salt Lake, the 506-mile long river moves only 90 air miles to the west.

Other rivers draining in the basin include the Smith's Fork River in Wyoming, the Malad in Idaho, and Utah's Little Bear, Cub, Logan and Blacksmith's Fork.

Rampton and Andrus are also scheduled to join with Washington Gov. Dan Evans Sept. 20 in a conference seminar on state-federal relationships. Andrus is chairman of the National Governors' Conference, and Rampton and Evans are past NGC chairmen.

Clouds and chance of rain

Twin Falls, Nampa, Burley, Rupert area: Much cooler. Considerable cloudiness today and early tonight with chance of a few rain showers. Partly cloudy late tonight and Tuesday. Windy days. Highs today low 70s and Tuesday 65 to 70s. Lows tonight mostly in the 40s. Wednesday's outlook: fair and continued cool. Spraying and dusting conditions will be generally poor today and Tuesday due to gusty winds. Haying outlook is fair to poor through Tuesday due to poor temperatures and scattered

showers, becoming good Wednesday through Friday. Hailey, Camas Prairie, Lower Wood River Valley: Much cooler. Numerous showers and a few thunderstorms likely today and tonight. Partly cloudy Tuesday with a chance of a few showers. Windy days. Highs today in the 60s, Tuesday in the mid-50s to mid-60s. Lows tonight 25 to 35. Wednesday's outlook: fair and continued cool.

United States through northern and eastern Idaho: These showers are associated with a cold front, which is moving into Wyoming tonight and Tuesday. Showers and thunderstorms should occur in southeastern sections of the state this afternoon. They are also possible over western and northern mountains today, as the upper level cold low moves slowly east from the Pacific coast.

High pressure with clearing skies and windy conditions will follow this low to give much cooler but sunny conditions in western sections of the state on Tuesday. Nighttime temperatures will be in the 40s and 40s tonight in southwest Idaho and eastern Oregon. These low temperatures will spread to the remainder of Idaho Tuesday night.

Canada develops surplus of gas

OTTAWA — Accelerated exploration for new Canadian sources of natural gas, undertaken in expectation of a severe shortage of fuel, and other factors have produced a temporary surplus here "in sight."

With more gas on hand in Western Canada than the big consuming areas in the East can use for the time being, a dramatic change in the marketing pattern is taking place.

TransCanada Pipelines Ltd. of Toronto, the principal buyer of Alberta gas, has announced that it will stop taking deliveries of new supplies until Nov. 1 next year. The Alberta Gas Trunk Line Company of Calgary, which transports the gas in the province, has estimated the glut in Alberta at nine trillion cubic feet.

However, a spokesman for TransCanada, speaking by telephone from Toronto, stressed that the surplus was considered temporary in the industry. Neither the price, which is fixed by the government, nor the official resource conservation policy will be affected, he said.

Nor will the present surplus become a factor in exports of Canadian natural gas to the United States, he said. The movement is regulated under limits set by the National Energy Board, a government policy-making agency that controls the output and sale of fuels here.

According to industry sources, the present surplus is a result of reduced consumption here last winter, which was unusually mild for Canada. Higher prices, now \$1.05 for 1,000 cubic feet at the wellhead compared to about 14 cents for the same amount five years ago, are also thought to have inhibited consumers.

The upswing in exploration probably set a record this year, the spokesman for TransCanada said, adding that the company had asked the National Energy Board to authorize the construction of additional handling facilities next year.

"Starting in 1978, under the present availability, we are going to be in a difficult situation again until we get frontier gas," he said, referring to the development of known resources in northern Canada.

Commercial recovery of the huge natural gas reserves in the Canadian Arctic is still years ahead. The several plans for pipelines into the area are still undergoing protracted public hearings. The project is opposed by environmentalists and many of the Indians and Eskimos living in the area who will be affected.

Should you call me today?

Maybe you should this very minute. Particularly if you have some doubt that your present life insurance program can cover your present needs. I've helped many of your friends and neighbors bring their protection programs up to date. For sure I can help you. Of course, there's no obligation, except to those you love.

Better labor image goal today

NEW YORK — A new crop of union leaders arrives at Labor Day worried about labor's sagging public prestige and determined to lift it.

Labor's top leadership is undergoing the most far-reaching transformation since the 1950s. This year and next mandatory retirement rules will bring wholesale vacancies in the executive suites of organizations long criticized for frozen leadership and outdated ideas.

Opinion polls continue to show organized labor sliding downhill in public esteem. A steady decline in the proportion of the labor force in union ranks—only one worker in every four now holds a union card—is cited as evidence that the movement has run out of idealism and social purpose.

Another line of criticism sees labor as too strong rather than too weak. Unions are in control of vital industries or public services are accused of misusing their monopoly power to strangle the economy through protected strikes or inflationary wage settlements.

The new generation of leaders moving into command posts in some of the country's most strategic unions are assigning top priority to the task of reversing these negative public estimates of labor.

Interviews with a dozen of these new leaders indicate virtual agreement on the importance of achieving more favorable "community" perception. They differ on how much of the turnaround in sentiment can be achieved through image building on the Madison Avenue model and on a willingness to reassess labor's time-encrusted approaches and practices.

One school of upcoming union chiefs is convinced that misunderstanding is fostered by union-busting employers and excessive media concentration on trouble spots inside a generally healthy movement. Labor must persuade the public that unions want only what is good for all Americans, they maintain.

A second school asserts that labor must prove its right to

heightened respect by broadening its social and political horizons and altering many of its approaches to its rank and file, to industry and to the community.

Where the focus is fixed between changed image and changed substance is likely to be crucial in shaping the labor movement of the last quarter of the 20th century.

Of course, no-age rule applies at the summit of the American Federation of Labor and Congress of Industrial Organizations. There George Meany, still sharp of mind and wit at 82, continues to hold absolute sway. But there is an increasing expectation among his intimates that Meany may decide to step down voluntarily when his personal and union calendar, especially if he can cap his career by an impressive mobilization of labor in support of Jimmy Carter and other union-backed candidates this fall.

His heir apparent, Lane Kirkland, the federation's 54-year-old secretary-treasurer, believes that the key to marshaling more affirmative community support lies in an intensification of labor's political and legislative efforts. He sees no need for a basic policy overhaul. On the contrary, he feels strongly that American labor is pursuing sound principles with all the administrative and tactical flexibility a changing economy demands.

"The value of an institution lies in the fact that it lives on its inherited memory, plus hopefully a capacity to adapt to change; I believe we've met that test very well," says Kirkland.

A less satisfied appraisal comes from William W. Winesinger, the 52-year-old vice president and chief of staff of the million-member International Association of Machinists. "Wimp, as he is called, is expected to succeed Floyd E. Smith, the machinists president when he retires next July."

"We won't reverse" the downturn in membership and public regard till we can add some sparkle and allure to the things for which we rightly

stand," says Winesinger. "We've got to get rid of the lethargy, and much of that is a reflection of the general age level of the leadership."

He believes the presidency of the AFL-CIO provides an exposure point, with potentialities almost as great as those offered by the presidency of the United States, to build community backing for labor's goals.

He wants labor to sponsor a regular television show of its own design in prime time.

He also would like labor to move away from a fragmented "leapfrog" bargaining structure he thinks is made obsolete by the concentrated economic power of multinational conglomerates.

He favors experimentation in increased worker participation in efforts to make the job more satisfying, though he draws the line at co-determination on the German model or on massive extension of employee stock ownership.

"The conventional industrial wisdom is, 'Let's sell workers the losers, not the winners,' he says.

An open more sweeping dissent comes from David J. Fitzmaurice. He moved up to the presidency of the International Union of Electrical Workers two months ago and swiftly led it to successful negotiation of a new master agreement with the General Electric Co.

The leadership seems out of step with the rank and file," says the 62-year-old Fitzmaurice, who will have to fight to hold his own post at the union's convention later this month. "There seems in many of our smaller negotiations to be dissatisfaction with what we do. Radical movements are springing up in some of our plants under such names as 'The Spirit of '76,' many of them led by college graduates or Vietnam veterans."

Union leaders, he says, should not put down these anti-establishment elements but to listen to their complaints and re-energize the labor movement with some of the crusading spirit that animated it in the early New Deal years.

He is now instituting an educational program, with just that aim, for its own officers and staff, he said.

Sol C. Chidkitt, who became president of the International Ladies Garment Workers Union last Labor Day, is another advocate of substantial change. He wants an income policy that will help achieve a more equitable distribution of wealth. Part of that policy would embody a social compact under which the union would agree to renounce wage rates in the \$14 to \$16 an hour range in return for a government guarantee of year-round

effectiveness, politically as well as economically.

"The strange thing," he observes, "is that, unlike all the rest of the world's labor movements, ours is not an adversary of the system in terms of direction and philosophy. It is not socialism; it wants to be part of the system. Yet it can't develop the kind of social contract that is helping to relieve the frustrations and promote survival of governments abroad."

Wurf cited the lack taken by the leadership of the United Steelworkers of America in responding last week to a rebel faction's condemnation of its pioneering no-strike agreement in the steel industry.

Report says US colluded with firms

WASHINGTON — A Congressional report examining the impact of the Arab boycott against companies doing business with Israel asserts that the U.S. Department of Commerce acted in collusion with some American concerns to uphold the boycott.

On the basis of the investigation Rep. James H. Scheuer, D-N.Y., who helped draft the report, charged that "several billions of dollars" in American exports to Arab countries in 1974 and 1975 had been conducted in compliance with boycott restrictions.

He said the report would demonstrate that the Department of Commerce "subverted" U.S. law regarding the Arab boycott—specifically the Export Administration Act, which declares opposition to "restrictive trade practices or boycotts fostered or imposed by foreign countries."

Scheuer said investigation alleged that for 10 years, until last fall, the Commerce Department confidentially advised American

Last few days

LISA Hood, 5, of Philadelphia, wants all the protection she can get from her life jacket while learning how to swim on one of the last few days of summer. Lisa is one of 300 children from south Philadelphia who went to Bellmar Lake to spend the last few days of summer in the water.

Attica conditions still bad on riot's fifth anniversary

ATTICA-N.Y. (UPI) — The cells are six feet wide and eight feet tall. "You stink trying to live in one," an inmate says.

"Somewhere" off in the distance hands reach out between the bars in "E" Block—"I want to get the hell out of here," a voice bellows. Others shout obscenities. Little has changed.

It's been five years since the powerhouse whistle sounded at the Attica Correctional Facility signaling Sept. 9, 1971, the start of the nation's bloodiest prison riot. Over the next 100 hours 43 persons died, most of them cut down by State Police bullets during the Sept. 13 retaking of the maximum security institution.

Residents of this tiny village 30 miles east of Buffalo were stunned that sunny Thursday morning. Moments earlier they packed the kids off to school. Thousands left home to work inside the cold, gray, 30-foot concrete walls—the prison is Attica's prison industry.

Over the years the shrill whistle normally signaled a "walk away" from the prison farm outside the facility's 30-foot high concrete walls. Once again, six months earlier, it meant a much less pleasant escape from the prison itself.

But there were rumors of trouble. Tension was high among inmates and guards. Now, pillars of smoke rose into the clear blue skies from behind Attica's walls.

In the superintendent's office, a nervous secretary told a caller: "No, I can't put your call through. Something's happening here. No, I don't think it's the guards. They say all hell's breaking loose. I've got to get out of here. They told me to go home, to get out of the

Farmers' market

TWIN FALLS — The Magic Valley YM-YWCA holds a farmers' market each Monday, Wednesday and Saturday, from 9 a.m. until noon, on the lawn west of the "Y" building on Elizabeth Boulevard, across from Harmon Park.

The YM-YWCA reports there has been a great deal of interest on the part of buyers and not much response from people having things to sell.

If anyone has fruit or vegetables to sell and cannot come to the "Y" building, call the office and your number will be referred to interested buyers.

For more information, call 733-4384.

Boston officials hope school opening easy

BOSTON (UPI) — The third year of court ordered school busing begins Wednesday and officials are hopeful, the pattern of tension and sporadic violence seen in the past two years will be broken this year.

About 22,500 of 78,000 students will be bused to 150 public schools in the third phase of a bitterly resented desegregation program ordered by U.S. District Judge W. Arthur Garrity Jr.

The first two years were marked by riotous resistance, mass and small violent confrontations between blacks and whites. Most officials think this year will be calmer.

"I am optimistic that the opening of schools in Boston will be peaceful and successful," said Gov. Michael S. Dukakis.

"I am particularly encouraged that more and more attention is being paid to the key issue of the quality of education in the Boston schools," he added.

Boston School Committee Chairman John J. McDonough said, "I'm hopeful we will have a peaceful opening of schools this fall, with more teaching and learning taking place. In most schools I feel there will be less racial tension."

McDonough said after two years students should be "more relaxed" with each other and their teachers. He said education should improve.

Fifteen hundred fewer students will be bused this year than during 1975 — to increase educational continuity and minimize disruption — but since school enrollment has dropped by more than 6,000 the percentage will increase slightly.

In addition, Phase III will not significantly expand desegregation into still untouched communities — for example the high school in

Battle brews over water deposits

WASHINGTON — A battle is brewing between oil drillers and environmentalists over federal regulations designed to protect underground water deposits that supply half of the nation's drinking water.

The regulations, proposed this week by the Environmental Protection Agency (EPA), would require oil and gas companies to obtain permits for disposing of large amounts of salt water that shoot up the wells during oil production. There are more than 500,000 operating wells in the country.

Oilmen usually reject the brine waste down oil wells, abandoned wells or use it to recharge producing oil wells as part of a process known as secondary recovery. Faulty reinjection has polluted portions of aquifers in half a dozen states, including Ohio, West Virginia, Kansas, Michigan and Texas, according to EPA.

"The regulations are nothing serious," Oklahoma City oil official Kim Dowd said.

"Undoubtedly, some wells will have to be plugged when the rules go into effect, but it's going to be an insignificant number — less than a thousand," he said.

Dowd, executive director of the Interstate Oil Compact Commission, which represents state oil regulators, said the wells expected to close down are all stripper wells drilled 30 or 40 years ago. None produces more than 5 barrels of oil a day, and it would be uneconomical to upgrade them or dispose of the brine in any other way, he said.

Dr. Robert Harris, a water pollution specialist for the Environmental Defense Fund, charged that the EPA regulations are drilled through with escape clauses tailored to

fit the needs of industry. He said the environmental law group "is considering legal action."

The regulations already are 14 months overdue. The final rules are not expected to be promulgated for another three months until after hearings are held — in Denver, Dallas and Washington — and until after written comments are reviewed. Provisions of the landmark Safe Drinking Water Act of 1974, which Congress enacted to protect surface and underground water systems, required that the regulations be proposed by June 30, 1975.

Edwin Hochman, senior civil engineer in EPA's office of water supply, said the regulations were "worked and reworked" through several dozen drafts and were finally published in the Federal Register Tuesday, only after they appeared to be acceptable to oil-producing states. He said EPA adopted 12 to 14 revisions that the Interstate Oil Compact Commission proposed. He said they were "clarifying"

changes in wording rather than anything substantive.

The very same revisions had been sought in an exchange of letters and a meeting last spring between EPA Administrator Russell E. Train

EAGER SPECTATORS sat on buildings like birds on a telephone line to get a good view of the Blaine County festivities. Sometimes the

spectators were as much a part of the show as the rumbling wagons, dance hall girls and gunfighters in the streets below.

Bellevue fete on

BELLEVUE — The Bellevue Labor Day celebration was set to kick off at 11 a.m. today. The annual event goes back many years to the pioneer days of the Wood River Valley.

A shoot-out and parade were scheduled first, followed by a barbecue picnic and music by the Old Time Fiddlers in the city park. A carnival was to have been set up and street races were scheduled.

The Bellevue celebration is the last part of the weekend festivities in the Wood River Valley.

Wagon Days, held in Ketchum, began Friday evening with a shoot-out and street dance in Ketchum's Main Street.

Saturday a 30-minute parade featured hor-

sedrawn carriages and massive Lewis and wagons. An estimated 10,000 people jammed into this city of 3,000 for the festivities.

The parade was followed Saturday by an Old-Time Fiddlers' contest at Trail Creek Cabin and the fiddler finals on Sunday until dusk.

The Wood River scene was described as generally peaceful, in contrast with some of the rowdier celebrations of the past.

The Idaho Open Tennis Championships took place Saturday and Sunday at Elkhorn, with teams from throughout the West competing.

A short antique car parade Sunday morning drew crowds of enthusiasts to Ketchum's Main Street.

Fire still out of control

MALTA — A brush and grass fire continued to rage out of control today north of here after burning more than 3,500 acres.

Two 40-man crews moved into the area early this morning from the Boise Inter-Agency Fire Center to relieve the 20 men from the Burley area who fought the fire through most of Sunday and overnight.

The fire started along the McClendon Spring about two miles north and two miles west of Malta on Cottler Mountain Sunday.

The fire had traveled about four miles by this morning along a front one and one-half mile wide through juniper, sage and other brush. The fire started on the east slope of the mountain and moved uphill to the north before it crowned.

The Bureau of Land Management (BLM) said it had 85 men on the fire today, including four air retardant craft.

TF rodeo to open Tuesday

FILER — Rodeo fans in Twin Falls County will see the nation's top-ranked professional cowboys this week in the five-night rodeo opening Tuesday at the Filer Fairgrounds.

Competition will be keen for the \$16,000 purse, which makes the Filer event one of the largest rodeos in the Professional Rodeo Cowboy Association circuit.

Some 50 of the 200 entered here were 1975 finalists in the professional ranks and top money winners of last year. Most of them also lead in winnings for the 1976 circuit.

Bob Borton, public relations representative for Cotton Rosser's Flying U rodeo, says some of the top performers this year will include Tom Ferguson, Miami, Okla., whose winnings this year already total more than \$67,000.

Ferguson will probably become the nation's first \$100,000 a year cowboy, says Borton. He currently leads the ranks as number one all-around cowboy for 1976, a title he also held at the close of the 1975 season.

"These cowboys of today are real athletes. They work at it. Some of them even film some of the top bulls and broncs in action, study their motion and style to gain extra points," Borton said.

He said the type of cowboys appearing in the rodeo arenas today have changed over the past few years.

"Many of our professionals are college graduates who took to rodeo in the high school and college competition. Many have other businesses and professions as well," he said.

Dean Oliver, long-time champion calf roping and a cowboy who probably won more money in the rodeo business than anyone, Borton says, will be roping in this year's event.

Other top-ranked professionals competing for points and purse money will include Don Gray, Mesquite, Tex., 1975 bull riding champion with some \$25,000 to his credit this season in rodeo winnings, and Joe Alexander, Cora, Wyo., five times world champion bareback rider now in top standings for this year and with about \$39,000 in winnings this season.

He also holds second place in all-around standings through winnings in the team roping events as well as bareback riding.

Jeff Copenhaver, Spokane, Wash., 1975 calf roping champion with about \$17,000 in 1976 winnings, and Bob Marshall, Chowchilla, Calif., with about \$34,000 this year and in the number two position in steer-wrestling in the national championships, will also be performing.

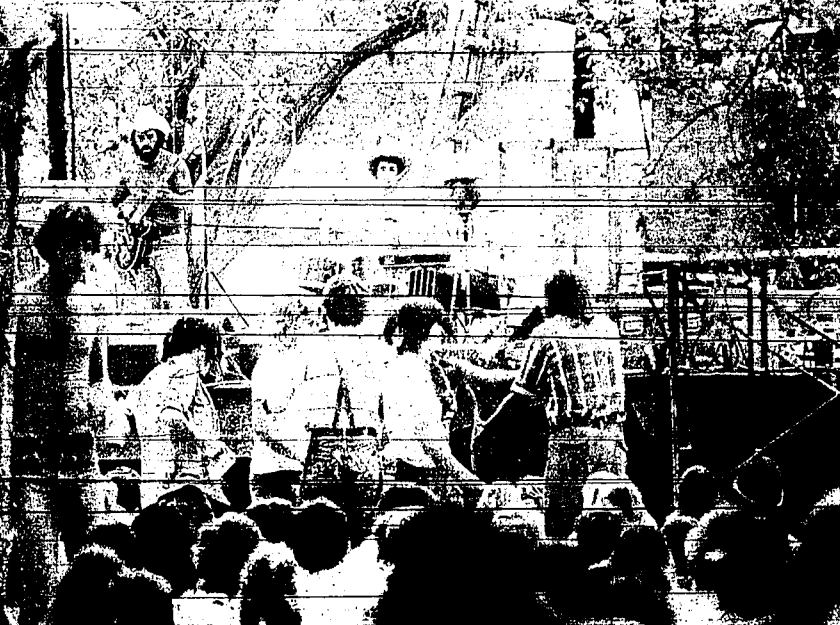

Roy Smith, Challis, currently number three in national standings in bareback, will be here to increase his \$12,000 in 1976 winnings.

Other specialties of this year's night shows will include two bullfighting clowns, D.C. Coburn; Guthrie, Okla., and his "Harlem Dog Trotters" and Quail Dobbs, Coloma, Tex., with one of the top old car acts in the rodeo business, says Borton.

The Dog Trotters consist of two teams of spotted boxers trained to play basketball by their own rules, of course.

Coburn also will bring his top dog Oklahoma Jackrabbit to the Twin Falls show.

Red Steagall, a soil chemistry graduate from West Texas University and well-known western music recording artist will be performing each night during the rodeo.

Jamboree crowd

SITTING on blankets and sprawled in the grass, about 2,000 people enjoyed the music of several Idaho country music bands at Nat-Soo Park Sunday. While some individuals slept off

the effects of their Labor Day celebrating, others were dancing in the dust in front of the bandstand.

2,000 attend music jamboree

TWIN FALLS — An estimated 2,000 persons attended a country music jamboree at Nat-Soo Park Sunday.

Featuring performers included hard country rock groups Turwater and the Snake River Country Band, Wilson Fairchild, banjo picker Mike Wendling, Jon Reynolds and the Country Boys, Dodge Roblinette and Jubilee also

filled the park with their country-western sounds. Dancers filled the area in front of the bandstand and raised dust as their feet and occasionally clumsy boots kept time to the beat of the music.

Elsewhere in the park, youths pitched horseshoes and played with frisbees. Children and dogs played among iceboxes filled with beer cans and occasionally the fragrance of marijuana drifted through the trees.

Several young men carrying walkie-talkies and wearing t-shirts with "security" stenciled on their backs maintained security. There were no uniformed policemen in evidence and the crowd remained peaceful.

The jamboree, organized by Tree of Life, was financed by cancellation until the organizers paid a required \$15,000 bond to the county.

"That's what we're trying to get away from (the comprehensive plan), okay, it's all right, okay, it isn't," Clark said.

But Clark agreed the condominium should not be stopped, "as long as there's not any legal reason to refuse."

Exhibitors busy as entries readied for TF fair opening

By MARJORIE LIERMAN

Times-News writer

FILER — Sunday was another busy day at the Twin Falls County Fairgrounds as exhibitors continued to bring in their entries in all disciplines.

Judges in the art building started looking at the nearly 200 entries in the art show Sunday morning and had by noon awarded Best of Show honors to Dan Barsness, Twin Falls.

Merchants are bringing in farm machinery for an exhibit on the grounds north of the grandstands. This display is always a popular one for farmers.

Antiques were to be entered until noon today, and other department entries must be in by 6 p.m. tonight. All livestock will be on the grounds by that time, except for open class horses which must arrive by 9 p.m. tomorrow.

Open class fair animals were to be weighed this afternoon. Steers must be weighed before 6 p.m. and market lambs and hogs from between 4 and 6 p.m.

Last minute touches are being put on 4-H Club exhibits as all projects, including livestock,

livestock record books and secretary books must be in today. Horses will be judged for fitting and showing, as well as quality, beginning at 1 p.m. today.

Dairy fitting and showing for 4-H Club members will get underway at 8 a.m. tomorrow, followed by dairy quality. All home economics and miscellaneous projects will be judged, beginning at 9 a.m. with horse performance classes also set for that time.

Beef fitting and showing and poultry and rabbit judging is scheduled for 10 a.m., followed by goat breeding classes.

The beef breeding class will get underway at 3 p.m. Tuesday, calves first followed by heifers and cows, then ewes and does.

Showing and fitting will be held at 5:30 p.m. Thursday in the showing and fitting area for horses.

Judging will begin at 9 a.m. tomorrow for most fair departments. Dogs will be judged at 1 p.m. behind the dog show building. Junior members will exhibit their produce for the judges at 4 p.m. The Junior Short-horn Show also is scheduled for tomorrow afternoon.

Minidoka zoners to study 6-unit condominium plan

RUPERT — An exclusive six-unit condominium project goes to the Minidoka County Zoning Commission Thursday with one official nod.

The Minidoka County Zoning Commission voted unanimously this week to recommend the location near Heyburn along the Snake River for approval.

The vote came despite some reluctance on the part of one commission member to use the word "approval" in the motion.

"I don't feel, as a commission, we should be in favor of against this thing," Charles Clark said.

Clark, one of the key men in drafting the proposed Minidoka City-County Comprehensive Plan, argued that the commission should not approve or disapprove individual projects.

"That's what we're trying to get away from (the comprehensive plan), okay, it's all right, okay, it isn't," Clark said.

But Clark agreed the condominium should not be stopped, "as long as there's not any legal reason to refuse."

Chairman George Falkner pointed out the recommendation for approval is the formal mechanism for informing the zoning commission the planners have no objections.

Commission member Ron Klebe had sought delay to determine if any objections might be raised by neighbors to the property. However, he made the motion for approval after zoning Administrator William McClung said there has been no and said several area residents are investors in the proposed project.

Frank Jensen plans to build the one-story condominium in the triangle created by River Drive and 600 South Road. The 13 acres are now pastureland zoned residential-agricultural.

The condominium would be located across the street from houses along River Drive in the Jensen subdivision. McClung said most of those houses are priced in the \$100,000 price range.

He said Jensen assured the commission there would be no objection from people in the area.

Three couples and three single persons are interested in the six-unit structure, he added.

H.L. Hunt employee sues for \$1 million

DALLAS (UPI) — A Washington lobbyist who claims he was H.L. Hunt's most-trusted employee goes to court Thursday seeking \$1 million he said the oil billionaire promised would be bequeathed him for loyalty and service.

Walter Tabaka, 56, of Bethesda, Md., filed suit in state District Court against Ray Lee Hunt, the oilman's youngest son and executor of his estate. In addition to the \$1 million, Tabaka wants \$300,000 plus interest and legal fees for 10 years of influence peddling and letter writing on Hunt's behalf.

"For 9 years he promised you don't have nothing to worry about. You're my best worker and I'm the richest man in the world," Tabaka said in a telephone interview. "To prove that, he took my three children into his home and they worked for the Hunt Oil Co."

"I know more about H.L. Hunt than his first wife or second wife, his children or second children. I have 700 letters about him."

Attorneys for the Hunt estate said Tabaka's claims were unfounded.

"We consider his claims frivolous," said George Canyus. "But he can come to court and make them. That's the beauty of the system. But it will come out in the wash."

"H.L. was an ar-

chconservative who sponsored radio programs and literature warning of the subversion of the nation by Communism."

Tabaka said he was introduced to Hunt, who died in 1974, by Sen. James O. Eastland, D-Miss.

"I was recommended to him by the highest man in Capitol Hill," Tabaka said. "He (Hunt) sent me \$2,000 and I went to work for him."

Tabaka said he worked for Hunt from 1965 until the oilman's death, performing "nightmare relations" work, corresponding for Hunt with the news media, lobbying with elected officials and serving as his adviser and confidant.

"H.L. Hunt advanced various sums to plaintiff to cover expenditures for travel, mailing and telephone bills and other similar expenses related to promotional and public relations work."

Tabaka claims in his suit.

"Tabaka said the sums totaled about \$50,000."

He said the alleged promise by Hunt to leave him \$1 million was made on a porch of Hunt's home in Dallas.

"He said, 'Walter, I'm going to leave you money.' And I said, 'How much, Mr. Hunt?'"

He said, "At least \$1 million." I said, "Thanks, Mr. Hunt, you're not going anywhere."

Tabaka said Hunt's wife and children "knew he loved me." He said he would try to subpoena Hunt's widow to testify during trial of his suit.

Photo of 'Squeaky'

LYNETTE Fromme, in a previously unpublished photo released by the Sacramento Bee, sits in an interrogation room shortly after she was taken into custody Sept. 5, 1975, after an attempt to assassinate President Ford. Miss Fromme is now serving a life term for the attempt.

Retiring admiral speaks on US military defense

WASHINGTON — In old imperial China, Adm. Noel Gayler recalls the strength of foreign gunboats was judged by the number of smokestacks. "When somebody showed up with a seven-stacker, he was king of all he surveyed," he says.

These simple days are long gone, and now there are shrewd military appraisers everywhere. They can not only count smokestacks, but also discern the power of the guns, bombs, and missiles below deck.

The admiral, retiring after a distinguished 31-year career, has been U.S. commander in chief in the Pacific and Indian Ocean areas, directing Army, Navy, Air Force, and Marine operations over a 100-million-square-mile domain.

In his farewell message, Gayler reminds us that, as in the era of gunboat diplomacy, a foreign government's impression of American intentions can be almost as important as our weapon inventory. Since the end of the Vietnam War, the United States has been scaling down its military presence in the Pacific, Gayler describes some effects:

"I see a great many of the policy-makers in many of the countries of the Far East. Privately or publicly, they are all concerned by what they perceive as the American withdrawal from the Pacific and from Asia."

"I can wave my hands all I want to and tell them about squadrons and ships earmarked back home, in case of necessity, but it makes no impression at all in their view."

"I have to tell you I don't think they're wrong. The presence that's there, where they can see it, is what counts to them."

"The basic idea of the military component is the perception of power. I don't for a minute think that any of the countries in the region are necessarily going to start interpreting each other's tankers of make aggressive incursions across the borders or amphibious attacks."

"What I do believe is that the perception of who has the power is a vital political fact. If it is perceived that a major military power is diminishing, it is a critical area, then that is a fact to which all the nations in the area must accommodate."

Smallwood to chair Planning and Zoning

TWIN FALLS—Jim C. Smallwood is the newly elected chairman of the Twin Falls City Planning and Zoning Commission for 1976.

By a 4-3 vote of the members of the commission, Smallwood was elected over Max Mueller. Mueller was later elected vice chairman of the Planning and Zoning Commission for 1976.

At the monthly Tuesday meeting, a "10 point letter" was presented to the commission by member Jack Muldoon.

The letter is intended to help the city update and increase the effectiveness of all city planning and zoning.

The commission also agreed to make recommendations to the City Council for three new commission members. A list of names will be compiled and presented to the Council.

The terms of Tom Schaffer and Jerry Slane expired at the end of August and Muldoon's term will end in September.

Pictures of Squeaky released

SACRAMENTO, Calif. (UPI) — Two photographs released by police show Manson cultist Lynette "Squeaky" Fromme with an empty holster strapped to her leg shortly after she pulled a gun on President Ford last year.

One of the police photos, distributed to the news media Friday, shows Miss Fromme sitting, in an interrogation room and the holster strapped to her left leg below the knee. In the other, the holster was visible below a knee-length dress as she stood.

Miss Fromme was wearing a flowing red robe which extended to her feet when she was taken into custody Sept. 5, 1975, after thrusting a semi-automatic revolver at Ford as he walked through Capitol Park in Sacramento.

She was convicted of the assassination attempt, sentenced to life in prison and sent to the Metropolitan Correctional Center in San Diego.

LEGAL NOTICE
The City of Kelchum and the Sun Valley-Water and Sewer District have jointly petitioned the Department of Health and Welfare to obtain an INCREASE IN POLLUTION DISCHARGE LIMITS for the Kelchum wastewater treatment facility. The current limits set by a Federal NPDES discharge permit, are based on the State-of-Idaho anti-degradation requirement stipulated in Section III-D of the Water Quality Standards and Wastewater Treatment Requirements adopted by the Board of Environmental and Community Services (now Board of Health and Welfare) on June 28, 1973.

Basically the anti-degradation standard requires that the waters of Idaho will not be lowered in quality unless and until it has been demonstrated that such change is justifiable as a result of necessary economic and/or social development and will not interfere with or become injurious to any protected uses made of such waters. In addition, it is required that any industrial, public or private project which would constitute a new or increased source of water pollution will be required to provide the highest and best degree of wastewater treatment available under existing technology.

A report prepared by Parametrix Inc. (May, 1976) indicates there would be a major negative impact on social-economic development in Blaine County if the Kelchum SFP discharge limits are maintained at the levels established in the NPDES permit. The report states "disallowing the County to grow normally will result in the loss of nearly 4,200 new jobs in all areas of economic activity." The following additional statements are made:

"The forecasted decline in assessed values of undeveloped property would force higher taxes on the other property owners. This would create hardships to those who own income families. Overall, the low and middle income Blaine County families would be the most heavily affected by the denial of any of the County's population."

The petition by Kelchum and Sun Valley Water and Sewer District requests the discharge limits be raised as follows:

NPDES Permit: BOD5/day 250; Suspended Solids 15/day 250; Ammonia as Nitrogen 15/day 200; Total Phosphorus 15/day 200.

Requested by Petition: BOD 5/day 500; Suspended Solids 15/day 250; Ammonia as Nitrogen 15/day 200; Total Phosphorus 15/day 200.

A report prepared by Parametrix Inc. (February, 1976) substantiates the fact that the Big Wood River is currently a high quality water body. The report states "the oxygen demanding wastes from the Kelchum sewage treatment plant would have a negative impact on the river's oxygen resources." An addendum to this report dated June 1976 states, "the sewage treatment plant is a very minor contributor year-round to the nitrogen budget of the river, a significant contributor to the phosphorus budget during the winter months and a minor contributor of phosphorus during spring runoff."

Based on available information and that provided by the above reports, the Department proposes the following discharge limitations:

Discharge Limits Initial (1976-1981) BOD 5/day 350, Suspended Solids 15/day 250, Ammonia as Nitrogen 15/day 200, Total Phosphorus 15/day 200.

Final Limits: BOD 5/day 375; Suspended Solids 15/day 275; Ammonia as Nitrogen 15/day 225; Total Phosphorus 15/day 225.

These limits are designed to allow the City of Kelchum and Sun Valley Water and Sewer District to undergo normal growth in the five-year period, minimizes further degradation of the Big Wood River and Magic Reservoir, and provides up to 15 years for the addition of a process to remove phosphorus from the sewage treatment plant discharge.

A Public Meeting scheduled for September 22, 1976, 7:30 p.m. at the Holiday Inn in Sun Valley to receive comments on the proposed increase in water discharge limits. Written comments will be received from now until September 25, 1976.

Send your comments to: Mr. Murray, Chief, Bureau of Water Quality, Division of Environment, Department of Health and Welfare, Statehouse, Boise, Idaho 83726.

Mr. Jerry Yoder, Supervisor, Regional Division of Environment, Department of Health and Welfare, 801 Reserve St., Boise, Idaho 83720.

PUBLISHED: Sept. 6 & 9, 1976.

Inspection facility Vehicle study to begin in Idaho

BOISE — The Idaho Transportation Department, Bureau of Highway Safety, will begin a study Tuesday to determine the mechanical condition of randomly selected vehicles throughout the state.

The information gathered during the study will provide a data base on vehicle condition, determine the existence of a mandatory vehicle inspection program.

This study is unique for the nation and being jointly funded by the Bureau of Highway Safety and the U.S. Department of Transportation.

The mechanical condition of vehicles will be determined by completing an inspection utilizing mobile motor vehicle inspection facility on loan to the state from the National Highway Traffic Safety Administration.

Local police agencies will assist in coordinating the study in their respective cities and counties. Randomly selected Idaho vehicles will be tested in the inspections.

Study locations will be in 22 areas of the state. Local traffic safety and law enforcement officials are supporting the inspection study in their jurisdictions.

The above experimental mobile vehicle inspection facility will become a familiar sight to motorists in Idaho soon. The Idaho Transportation Department, Bureau of Highway Safety, has been loaned the \$44,000 U.S. Department of Transportation facility to conduct a roadside study on the condition of vehicle equipment and safety components.

The inspection will cover the same components as were inspected during the mandatory inspection program. A copy of the inspection report form will be given to the vehicle driver who will be urged to correct any defects which are found.

Resulting police as a result of the inspection is not required.

Citations for vehicle defects will not be given at the study locations.

Orioles defeat Yankees

BALTIMORE (UPI) — Ross Grimsley posted his fourth victory over Jim Hunter and the New York Yankees this season Sunday, when the Baltimore Orioles used a wild pitch and an error by second baseman Fred Stanley to score three runs in the eighth inning and earn a 5-3 victory.

Angels top A's

ANAHEIM (UPI) — Nolan Ryan walked the first three Oakland batters but survived to complete a three-hitter for his 12th victory and Tony Solanta clubbed his eighth home run Sunday as the California Angels edged the Oakland A's 3-2.

Ryan couldn't control his fastball early, but settled down after giving up one run in the 12th to improve his mark to 12-1. The right-hander walked five but fanned leading strikeout total to 260 as he attempts to become the first pitcher strike out 300 or more in four seasons.

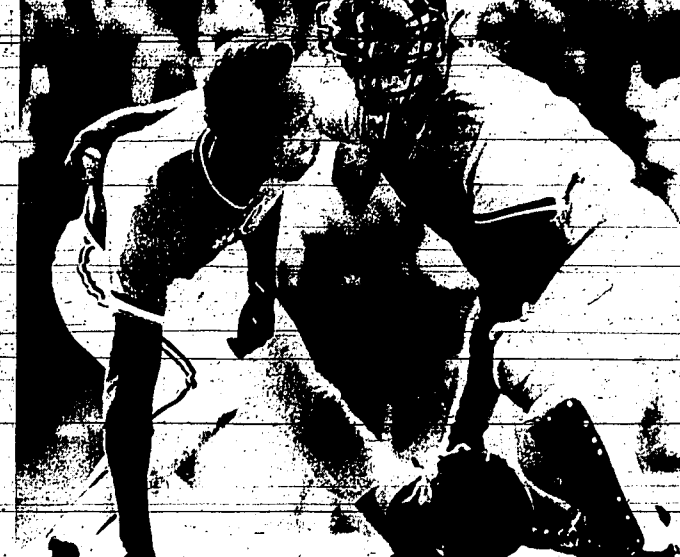

The Orioles, who edged the Yankees' East Division lead to 10½ games, began their eighth inning rally when Bob Grich walked and took third on a single by Reggie Jackson. Hunter—14-11, wild—pitched erratically with the leadbreaking run and then walked Lee May and Ken Singleton. Tony Muser grounded to second base but Stanley booted the ball allowing Jackson and May to score.

White's single and Roy's double tied the game. Consecutive singles by Graig Nettles, Elliott, Madock and Sandy Alomar gave New York a 2-1 lead in the fourth but Baltimore tied it again on Miller's pop to a run-scoring single to Munson before Martinez came in to get the final out.

REDS TRADING POST

Sorry, pal

Expos shut out Pirates

MONTREAL (UPI) — Bombo Rivera scored the winning run on second baseman Rennie Stennett's eighth inning error Sunday as the Montreal Expos' 10-game winning streak, 14-0, on Woodie Fryman's Jerry Reuss surrendered a single to Rivera to open the eighth. Del Unser sacrificed Rivera to second and he moved to third on Tim Lincecum's pinch-hit double. Morales grounded to Stennett, who bobbed the ball, allowing Rivera to score the run that snapped the Expos' six-game losing streak. It was the first victory for Montreal under new manager Charlie Fox, who replaced Karl Ruchel after Friday night's doubleheader loss to the Pirates.

Fryman, 11-10, completed his second game of the season, walking two and striking out six. It was his eighth loss in 20 decisions. The loss, coupled with Philadelphia's victory over the New York Mets behind the division-leading Phillies in the NL East.

on a wild throw by Coleman on an attempted pickoff play and Keith Hernandez walked. After Willie Crawford flied out, Fairly baited for Don Kessinger and singled to right. Al Hrabosky went 1-13 in innings to gain his eighth win against six losses. He struck out Rick Monday in the 10th inning after the Cubs had runners on first and second.

home runs and scattering eight hits in 8-13 innings to lead the Phillies to a 3-1 victory over the Mets.

Giants split with Padres

SAN FRANCISCO (UPI) — Rick Sawyer pitched a shoddy Sunday as the San Diego Padres ended an eight-game losing streak with a 6-1 victory over the San Francisco Giants and a split of their doubleheader.

John Monticello pitched a fourth-inning error in the opener, which the Giants won 5-0. Sawyer, picked up in mid-season from the New York Yankees, walked two and struck out six for his fourth triumph in five decisions.

San Francisco's 10th game of the season, which the Giants won 5-0. Sawyer, picked up in mid-season from the New York Yankees, walked two and struck out six for his fourth triumph in five decisions.

San Francisco's 10th game of the season, which the Giants won 5-0. Sawyer, picked up in mid-season from the New York Yankees, walked two and struck out six for his fourth triumph in five decisions.

Dodgers blank Houston Astros

HOUSTON (UPI) — Reggie Smith drove in two runs with a triple and home run and Los Angeles received a three-hit performance from left-hander Doug Rau as the Dodgers beat the Houston Astros, 4-0, Sunday.

The Dodgers have now won six of their last seven and 10 of their last 12 games. It was also the fourth straight win for Rau, who has a 2-0 record in his first four starts.

The Dodgers have now won six of their last seven and 10 of their last 12 games. It was also the fourth straight win for Rau, who has a 2-0 record in his first four starts.

Cards top Cubs

CHICAGO (UPI) — Ron Fairly's pinch-single in the 11th inning scored Lou Brock Sunday to give the St. Louis Cardinals a 1-0 victory over the Chicago Cubs.

Brock opened the 11th with a single off losing pitcher Joe Coleman and moved to second

Brock opened the 11th with a single off losing pitcher Joe Coleman and moved to second

Brock opened the 11th with a single off losing pitcher Joe Coleman and moved to second

Phils top Mets

NEW YORK (UPI) — Pitcher Larry Christenson personally ended Philadelphia's eight-game losing streak Sunday by belting a pair of

home runs and scattering eight hits in 8-13 innings to lead the Phillies to a 3-1 victory over the Mets.

home runs and scattering eight hits in 8-13 innings to lead the Phillies to a 3-1 victory over the Mets.

Indians clip Boston Red Sox

CLEVELAND (UPI) — Buddy Bell's bases-loaded two-run single triggered a four-run sixth-inning Sunday and reliever Dave LaRoche picked up his fifth save as the Cleveland Indians took a 6-3 victory over the Boston Red Sox.

After the Red Sox tied the score at 2-2 in the fifth on Rick Burleson's sixth homer, the Indians filled the bases in the sixth on a double by Carver Blank.

Brewers defeat Detroit Tigers

DETROIT (UPI) — Von Joshua opened Milwaukee's six-run first inning with a single and closed it with a run-scoring base hit Sunday to help the Brewers' split within a game of the fifth-place Detroit Tigers with an 8-6 victory.

Twins blast White Sox

BLOOMINGTON, Minn. (UPI) — Rod Carew had four hits to spark a club record 12-run attack and help the Minnesota Twins to an 18-1 victory over the Chicago White Sox Sunday.

Carew, who raised his record to 332 in his bid for a fifth straight American League batting title, slapped two of his singles in the fifth inning when the Twins scored 10 runs.

THINKING ABOUT TAKING THE RADIAL ROUTE?

Why Not Look To The Leader? Michelin X The Original Steel-Bolted Radial

There's only one quality Michelin radial tire we can sell you — THE BEST — the Michelin X. Michelin makes tires only one way — steel-bolted radials and they're all the same quality — THE BEST. You get the smooth ride, long tread life, puncture protection, proven road performance and dependability with every Michelin tire because those are the distinctive radial tire characteristics that Michelin pioneered over a quarter century ago. The only thing we have to know is the type of car you drive. That tells us which Michelin tire you need.

Stop in today and we'll tell you which Michelin tire you should have on your car. Then have a set installed.

Think radial... and look to the leader

MICHELIN

STUART MORRISON TIRE CO.

206 4th AVENUE WEST (Truck Lane) Twin Falls 733-1464

horoscope

Carroll Righter

FORECAST FOR TUESDAY, SEPT. 7, 1976

GENERAL TENDENCIES: The daytime is fine for expressing your talents and gaining the goodwill of others. Be sure to use your most compassionate qualities if anyone is in trouble. A word of encouragement can be helpful.

ARIES (Mar. 21 to Apr. 19) Study a course of action before putting a new project in motion. Take no chances with one who is jealous of you.

TAURUS (Apr. 20 to May 20) A good day to contact your good friends and improve your relationship with them. Use more tact with others and don't talk too much.

GEMINI (May 21 to June 21) If you show more courtesy toward higher-ups, you can easily gain your objectives. Show others you are an excellent citizen.

MOON CHILDREN (June 22 to July 21) You want to get ahead faster, but you need to be more open-minded to be successful. Show a liking for new allies.

LEO (July 22 to Aug. 21) Your hunches are fine and you can rely on them implicitly right now. Have a good talk with loved one and come to a better understanding.

VIRGO (Aug. 22 to Sept. 22) Try to please your associates more and be sure to find out what is expected of you for best results. Show that you are a worldly person.

LIBRA (Sept. 23 to Oct. 22) Plan time for all that work ahead and show that you have a real knack for the jobs you have to do. Be kind to others.

SCORPIO (Oct. 23 to Nov. 21) Make plans for recreation, you enjoy in the company of congenials. You can relieve pent-up emotions, but don't lose your temper with anyone.

SAGITTARIUS (Nov. 22 to Dec. 21) Try to be more understanding with kin and have more harmony at home. Study a new outlet that will bring greater income.

CAPRICORN (Dec. 22 to Jan. 20) Talk with associates of ways to improve mutual operations that will produce greater benefits in the days ahead.

AQUARIUS (Jan. 21 to Feb. 19) Show good sense in handling practical matters and you will have more success in the future. A business expert can give you good advice.

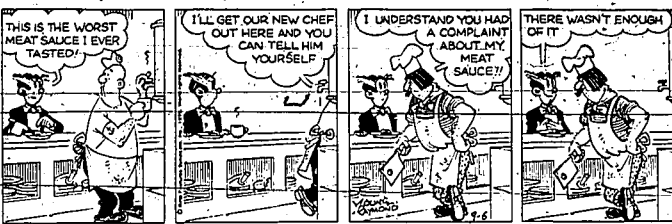

PISCES (Feb. 20 to Mar. 20) Morning is the best time to handle an important business deal. Take no chances with one who has an unusual influence over you.

IF YOUR CHILD IS BORN TODAY... he or she will be able to please others because of the intuition in this nature. The imagination is great, but this is coupled with the ability to bring matters down to a practical level. Teach to have more compassion for others.

THE BORN LOSER

REX MORGAN

what's what

L.M. Boyd

Early football players wore a leather nose guard held in place by an elastic band around the head. But that nifty little piece of equipment was last long in the leagues. Opposing linemen took to grabbing it, pulling it far out, and then hitting it.

The word "cardi" originally in French meant "rain dance." Add to the never-die one-liners: "Old chemists never die, they just quit reacting."

College students who bed down at home generally do considerably better in the studies department than do the dormitory sleepers.

QUERIES FROM CLIENTS

Q. "Louis, do you recall a horse named 'Appassionati'?"
A. Do indeed. That was a filly out of "In Our Time," one of Louis B. Meyer's stable. He had a pretty tricky way of naming his thoroughbreds, you may recall. "Whoa" was his filly out of "Stopper." "Complicity" was his filly out of "Smirk." And "Forever After" was his colt out of "Happy Ending."

Q. "It's widely known that Leonardo da Vinci designed the first military tank, but what did he call the thing?"
A. "A secure and covered chariot with guns."

Q. "What's a 'scissorsbill'?"
A. Used to be any bird with an upper and lower beak that scissored instead of closing flush, thus causing said fowl to behave like an oddball. Now it's just any oddball.

Q. "Does the female ant mate annually?"
A. No, that little beast will mate continually for 10 maybe 15 years after mating just once.

The characteristics of a gentleman can be described as the five C's, says a North Carolinian: Courtesy, consideration, candor, compassion and courage.

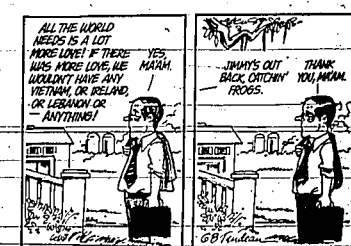

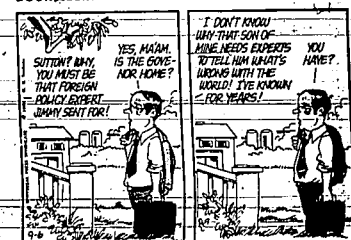

Among the several things that the diggers in ancient graves have discovered is the fact that the cavemen almost never took out the garbage.

Thing about Capricorn girls, they have a large sense of the dramatic, tend to exaggerate considerably, particularly when something goes wrong. And when they fall, they fall hard. Or so says our Zodiac man.

Am advised that bees aircondition their hives by posting at all the aperture guards who do nothing much but stand around beating their wings.

"Shouldn't you go home now, Robby? We're going to have dinner."

"That's okay. I'll just stand here and watch."
