## Men accused of harboring Dallas released

### U.S. attorney cites lack of evidence

By LEE SIEGEL  
The Associated Press

LOS ANGELES — Two cowboys arrested on charges of harboring Claude Dallas Jr., the fugitive killer who was recaptured after roaming in disguise from Oregon to Mexico for nearly a year, were freed Monday for lack of evidence, officials said.

Curry Martinez were released from Riverside County Jail after the U.S. attorney declined to prosecute them, said FBI spokesman Jim Neilson.

The decision was based on lack of evidence, Neilson said. Earlier Monday, Richard T. Bretzing, the FBI chief in Los Angeles, said authorities succeeded in catching up with the trapper, who fled

side, 50 miles east of Los Angeles. Bretzing said 38-caliber ammunition was among the items recovered from his motel room.

U.S. Magistrate Lek von Kaesborg denied bail for Dallas at a hearing in San Bernardino on Monday and ordered him back to Riverside pending extradition to Idaho.

Dallas, 36, was using the alias Al Schrank when arrested and denied his identity until it was confirmed by fingerprints, Neilson said. He also had apparently attempted to alter his appearance from the

bearded, bespectacled man shown in widely distributed photographs, Bretzing said.

"At the time of his arrests he was clean-shaven with very short hair and a tuft mustache," Bretzing said. "He was also wearing contact lenses rather than his usual eyeglasses. There was some indication he might have had face-alteration surgery."

FBI officials had arrested Davis, a 35-year-old cowboy from Perris, and Martinez, 35, a cowboy and a welder, on charges they "knowingly har-

bored, transported and supported Dallas."

Both had been arrested Sunday night at Martinez's home in Riverside.

"We set up a web around Martinez to catch Dallas," Bretzing said, adding that Martinez had been here for only a matter of weeks or months and that Dallas arrived in just the past few days.

## Officials hope capture kills hero image

By MARILYN HAUKE ESSEX  
The Associated Press

BOISE — Authorities hope the recapture of convicted killer Claude Dallas will allow his image as a folk hero and a Wild West wanderer to fade into the sunset.

"When he comes back to us, we're going to put him in maximum security," said Corrections Director Al Murphy, who earlier had joked that the hunt for Dallas might last 100 years.

Dallas, who had the reputation of a survivalist able to live off the sprawling desert of northern Nevada, was captured Sunday by the FBI in Riverside, Calif., near Los Angeles.

Bill Mauk, the attorney who represented Dallas in his first trial, said he received a call from his former client after his arrest and expected him to decide whether to waive extradition within 48 hours.

Asked about Dallas' state of mind, Mauk said, "He just seemed the way he always is — in control."

Dallas, who turned 37 Wednesday, had been on the loose since last March 30, when he used a pair of boltcutters to climb through two fences at the Idaho State Penitentiary.

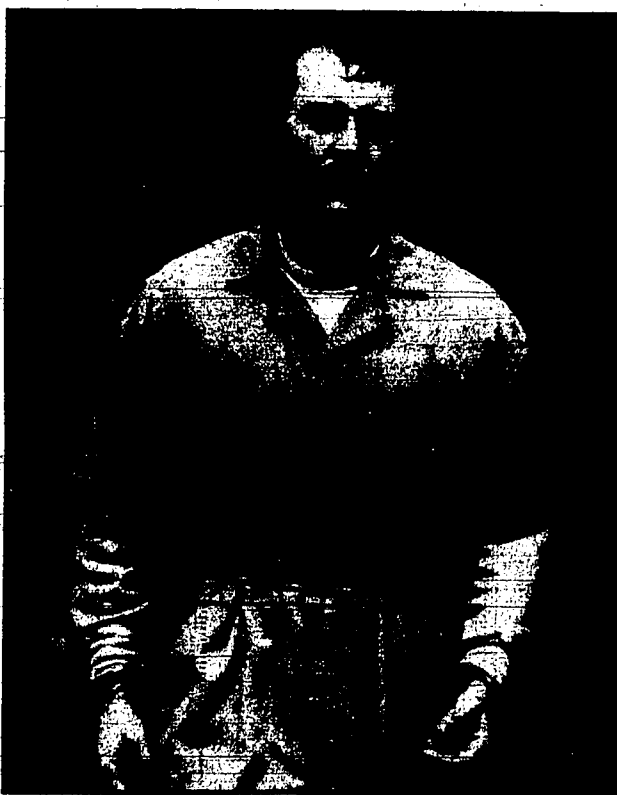

He was serving 30 years for manslaughter in the shooting deaths of Fish and Game officers Conley Elms and William "Bill" Pogue. They confronted Dallas at his Bull Camp in southwestern Idaho's remote Owyhee County in January 1981 about taking game out of season. They were gunned down and then shot in the head at close range.

The killings sparked a nationwide manhunt, but Dallas eluded authorities for 16 months before his initial capture in Humboldt County, Nev.

People in the area became divided between those who romanticized him and those eager to see him behind bars.

Jerry Conley, director of the Idaho Fish and Game Department, who has followed the case since his officers were killed, said some saw Dallas as a hero, who defied a system that put rules above that they saw as the divine right of a man to live off the land.

Dallas testified he shot the officers in self-defense. But the only witness said Dallas shot one officer who was holding bobcat furs and the other while he was looking away.

Claude Dallas is escorted Monday by FBI agent to hearing in San Bernardino, Calif.

## Dallas arrest relieves local game officers

By BONNIE BAIRD JONES  
Times-News writer

HAILEY — A Hailey game conservation officer who helped promote a reward fund for the capture of convicted killer Claude Dallas said the Idaho Fish and Game Department's annual enforcement conference in Boise saw a lot of happy faces Monday.

"We are overjoyed by the capture," said Lee Frost, of Hailey. "It was incredible timing that it came while the fellow officers of Dallas' two victims are all here together."

Frost and Jerry Baltazar, of Shoshone, were among the Idaho Fish and Game Department officers who helped to raise a \$22,000 reward for information leading to the capture of Dallas.

"We are anxious to give the reward money if it was in fact a tipster who provided information about Dallas' whereabouts," Frost said. "At this time, I'm not 100 percent sure the reward will be used, but we understand the reward money is in the hands of the state."

At the time they said that if they could collect about \$20,000, it would probably be enough to prompt someone to turn in information about Dallas.

Frost said in addition to the \$22,000 raised in Idaho, there is another \$10,000 reward offered by the federal government.

"We've heard a lot of talk about the capture at our meeting today," Frost said, when contacted in Boise. "It's a relief to all of us to know he's back in custody."

"I said before that when things get quiet, it's a good indication the FBI is getting close. It's been awfully quiet the past couple of weeks," Frost added.

Frost said he and his fellow officers are also pleased to learn that two other men are in custody for assisting Dallas.

"It's important that people know they can't just help hide a fugitive like this because of his popularity with some people. You can't just do that and walk away," Frost said.

## Scientists issue warning on ozone-destroying chemicals

By DAVID GOELLER  
The Associated Press

WASHINGTON — Prompt international action is needed against widely used ozone-destroying chemicals that are indirectly causing skin cancers at an almost epidemic pace, scientists warned a House hearing Monday.

"At the current rate, about one in seven Americans will develop (some form of) this disease during their lifetime," said Dr. Darrell Rigel, a research physician from New York University Medical Center.

"The rate of skin cancer in the United States is increasing at a near epidemic pace," Rigel told an Energy and Commerce

health and the environment subcommittee hearing on depletion of the Earth's stratospheric ozone layer.

He said physicians believe the major cause of skin cancer is the ultraviolet rays of the sun, which are filtered by stratospheric ozone. Other witnesses said that while there is still scientific uncertainty, it appears that the ozone layer is being destroyed by chemicals such as chlorofluorocarbons.

Rigel said the estimated number of cases of malignant melanoma — the skin cancer new type most often fatal — has risen eightfold in the last seven years, making it the fastest rising type except lung cancer in women.

He said that five years ago New York University researchers estimated that one in

250 Americans would develop malignant melanoma during their lifetimes and projected an increase to one in 150 by the year 2000.

"The recent surge in skin cancer rates, Rigel said, has forced revisions — the lifetime risk is now one in 135; the year-2000 projection is one in 90; and for 2015, it is one in three.

"He told the subcommittee that not only is the skin cancer rate rising, the disease is being found in people of increasingly younger age.

"Five years ago, it was unusual to see persons under the age of 40 with skin cancer, Rigel said. "Now we will often see persons in their 20s with this disease."

He said that although many factors have been linked to skin cancer, "the generally accepted most important factor is exposure to ultraviolet light."

One would expect skin cancer rates to increase as the ozone layer is destroyed, other witnesses warned, is exactly what is happening around the world, both in the much-publicized ozone hole appearing several months a year over the Antarctic, but also to a lesser extent in warmer latitudes.

They said that although the exact cause is not scientifically proven, the situation probably stems from emissions of ozone-destroying chlorofluorocarbons, which are used as aerosol spray propellants, refrigerants, and industrial solvents and in home foam packaging.

"There is now compelling observational evidence that the chemical composition of the atmosphere is changing at a rapid rate on a global scale," said Dr. Robert T. Watson, acting manager for upper atmospheric research at the National Aeronautics and Space Administration.

He added that "protecting the ozone layer is one of the most important environmental issues of our time."

Joining the call for international curbs on chlorofluorocarbon production and use were Dr. Susan Solomon of the National Oceanic and Atmospheric Administration; Dr. Donald Heath of NASA's Goddard Space Flight Center; and Sherwood Rowland, a chemistry professor from the University of California-Irvine.

## NASA says advanced computer marks new era in aviation design

By STEVE WILSTEN  
The Associated Press

MOUNTAIN VIEW, Calif. — NASA scientists on Monday dedicated what they called the world's most advanced computer system, saying it marks the start of a new era in aviation design and shows the space agency "is back on track."

"The system's importance to flight design rivals the advent of wind tunnels and the first flight by the Wright Brothers," said Victor L. Peterson, director of aerodynamics at the National Aeronautics and Space Administration's Ames Research Center.

"This is an historic day in aviation," said NASA Administrator James C. Fletcher. He said the new computer "will help ensure U.S. leadership in aeronautics."

The Numerical Aerodynamic Simulator, built around a Cray-2 supercomputer from Cray Research Inc., is an evolving system capable of making 250 million calculations per second and has enough memory to hold data equivalent to 256 million words.

The system, which cost nearly \$100 million to build, will be upgraded to one billion computations per second by next year and four-billion-per second within a decade.

Although largely intended for aerospace research and design, the system's abilities in physics, chemistry, weather modeling and biology will "show people that they're getting their money's worth," said Raymond S. Colladay, NASA's associate administrator for aeronautics and space technology.

## Administration moves to require farm worker sanitary facilities

The Associated Press

WASHINGTON — The Reagan administration, operating under a court order that condemned past government inaction, moved Monday to require farms to begin providing toilets, drinking water and other sanitation facilities to field workers.

After years of legal wrangling, the new standards requiring field toilets, handwashing and drinking water facilities for half a million farm workers could be in place in six weeks, said Labor Secretary William B. Brock.

"We plan to move as expeditiously as possible," Brock said. "Barring unforeseen developments during a 20-day comment period, we will issue a standard by the end of April."

In October 1985, Brock reversed a finding by his predecessor, Raymond Donovan, that federal standards were not needed. However, as a preferred option to federal regulation, he gave states 18 months to come up with rules of their own to address the unacceptable health risks posed by the lack of such facilities.

At the time, only 12 states had any kind of regulations of their own. Since then, another 10 states have adopted some form of standards, but Brock said Monday that 52 percent of the nation's field workers still lack adequate protection.

"Less than half of the field laborers in the country are covered by adequate sanitation requirements," he said. "Basic human decency demands that farm workers have access to sanitation facilities available to other working Americans."

# Budget writers shift health agency spending proposals

BOISE (AP) — Legislative budget writers Monday gave Democratic Gov. Cecil Andrus and the additional child protection workers be proposed for the Department of Health and Welfare as they shifted the governor's general tax spending recommendations for the state's largest agency.

The Joint Finance-Appropriations Committee also backed the governor's plan to fully underwrite the estimated \$26 million state cost of mental care for the needy in the spending year that begins July 1 and then went beyond the governor's recommendations by authorizing an increase in prescription drug benefits for the poor from \$30 to \$50 a month. That benefit hike will cost another \$200,000 in state tax money to be funded by nearly \$500,000 in federal funds.

The panel met Andrus' recommendation to finance cost-of-living increases for the aged and disabled receiving supplemental security income payments and tapped over \$500,000 in federal and non-general tax revenues to bolster the child support enforcement division.

The committee cleared the way for financing all those program improvements by scaling back the number of mental child protection workers and by replacing general tax support for the state emergency medical services program with a surcharge on driver's licenses that has yet to win legislative approval.

But in a key decision that could put the committee in a revenue crunch later this week, the gov-

ernor's proposal to finance environmental programs out of the Water Pollution Control Fund instead of with limited general tax receipts was rejected when the panel set the Air Quality Division budget.

"We're all getting a lot of heat for robbing this Water Pollution Control Fund," Sen. Lee Staker, R-Idaho Falls, said in defending the move to continue using general tax money for environmental program operations despite the pressure that will be put on those tax receipts. "This is an area we ought to leave alone."

While that decision shifted just under \$200,000 back onto the general treasury, it more importantly set the stage for the same shift in financing water quality and hazardous materials programs, and that would add over \$1.3 million in general tax expenditures that Andrus had planned to finance from another source.

Earlier, the committee endorsed the governor's recommendations for beefed up anti-drug and welfare fraud units as Rep. Mack Nelbaur, R-Paul, said, "Somehow, I would hope we could control some of this stuff."

The budgeting decisions came despite earlier statements by

Nelbaur and others on the committee that already-agreed-to spending commitments were running some \$10 million ahead of the revenues that will be available for the new budget year without some sort of major new tax increase.

Republican legislative leaders have been trying to trim general tax spending in many areas to hold the overall 1988 state budget at around \$650 million, about \$12 million below Andrus, while still matching the governor's ambitious recommendations for education spending.

But the governor, in his addresses to the Legislature two months ago, emphasized the need for society to take care of those who, through no fault of their own, cannot care adequately for themselves.

The committee approved only 10 of the 20 child protection workers that the governor had asked for, calling the reduction a compromise between those wanting to underwrite the entire Andrus plan and those who wanted to defuse it completely.

Health and Welfare Director Rich Donovan, in pressing for the extra help, told lawmakers that the magnitude of the child abuse problem in the state remains extreme, over the past three years, the number of abuse cases has risen 39 percent, he said.

"As far as I'm concerned, our services to abused and neglected children remain the most important we have in the department," he said. "Every day our staff faces life-or-death situations involving children who can't protect themselves."

# Andrus names PUC nominees

BOISE (AP) — A Coeur d'Alene accountant and a Caldwell lawyer were nominated by Democratic Gov. Cecil Andrus on Monday to fill the two vacancies on the Public Utilities Commission.

The appointments, both subject to confirmation by the Idaho Senate, are Ralph Nelson Jr., 46, a Republican from Coeur d'Alene, and Joe Miller, 38, a lawyer from Caldwell.

"I believe we have two highly qualified professionals who will complement the intelligence and commitment of the current commission chairman," said Andrus. Perry Swisher, a Democrat, is the only carryover member of the three-member panel and serves as its president.

"I am convinced that Idaho will continue to have an outstanding Public Utilities Commission that will remain committed to the future of Idaho," he said.

State Rep. Gary Robbins, R-Dietrich, had applied for one of the PUC openings.

Robbins said he thought the job would have been "challenging."

But when the nominations were announced on Monday, Robbins said he was disappointed.

"I was very interested in doing it, but I would have had to drop out of the Legislature, so I'm just as glad I didn't get it," Robbins said.

The governor's office confirmed that Robbins was one of several state legislators expressing interest in the PUC job.

Nelson will succeed Republican Richard High in a six-year term. Miller was nominated to serve the remaining two years of the unexpired term of Democrat Conley Ward Jr., who recently resigned.

Nelson has operated his own CPA firm in Coeur d'Alene since 1979. His practice has involved extensive work with corporations and individuals, small business accounting and advisory service.

Miller said he had appeared before the PUC on various cases and because of that is familiar with the commission's operations. He said he has not held any party posts or run for public office.

Both men are Idaho natives, with long family histories in the state.

# Panel approves anti-terrorist bill

BOISE (AP) — A bill attempting to curb the rise of terrorist or racist organizations in Idaho has cleared its first hurdle, over the objections of the National Rifle Association.

The House Judiciary and Rules Committee voted Monday to send the anti-terrorist measure to the House floor for a vote. It should come later in the week.

The action came despite opposition by two spokesmen for the National Rifle Association, who said the measure "could interfere with the constitutional right to own and bear arms."

The key vote was 8-5 against holding the bill indefinitely, usually

a killing motion. Voting to hold the bill were Republicans Pam Bengson, Robert Fry, Mike Simpson, Jerry Deckard and Mary Hartung.

"I'm concerned about gun ownership myself," said Rep. Tom Giovannelli, D-Coeur d'Alene. "But we don't live in a vacuum. Constitutional rights will be protected."

Sponsors, which included the office of Gov. Cecil Andrus and Attorney General Jim Jones, touted the measure as a way to "send a message" to terrorist organizations that they are not welcome in Idaho.

A white supremacist organization, The Aryan Church of Jesus Christ Christian, is located at

Hayden Lake in northern Idaho.

"The number one thrust of this legislation is to deter this type of activity," said Pat Kole, deputy attorney general. He called it a "unique and different" approach than used by the 14 other states with anti-terrorist laws, because it includes forfeiture of any property or firearms involved.

The legislation declares it to be state policy that terrorist activity or training to promote civil disorder will be a crime in the state of Idaho.

Brian Judy, Sacramento, Calif., regional representative for the National Rifle Association, urged the committee to defeat the bill.

"The NRA in no way supports terrorists, and in fact, supports strict penalties," he said.

But Judy contended the law with racist or terrorist organizations in Idaho is not the lack of laws, but the lack of enforcement.

# Fuel tax bill hits roadblock

BOISE (AP) — A bill calling for a \$19 million increase in state fuel taxes has run into a roadblock in the Idaho House.

Opponents contended the bill ignored an agreement made earlier on how the tax revenue was to be divided, and won a 53-27 vote to put the measure on permanent suspension.

Earlier in the day, the House at first defeated a proposal to boost the state fuel tax by two-cents of a cent per gallon, but later reconsidered by a 45-33 vote.

Rep. Dean Haagenson, R-Coeur d'Alene, argued that bill would be a way to pump much-needed revenue into tourist facilities such as recreation vehicle, off-road vehicle and boating centers. Besides boosting the state fuel tax, the measure also calls for an extra \$650,000 in general state revenue.

The vote Monday morning against the Haagenson bill was 40-38, but he won reconsideration late in the day with little debate. The measure was to be held until at least Tuesday before a final vote is taken.

Opponents also noted that it was in conflict with the 3-cent fuel tax bill. If both pass, the one that passes last will be the one that counts, House members said.

Rep. John Sessions, R-Driggs, tried to get House members to approve a 3-cent per gallon increase in

the state motor fuel tax, boosting it from 14.5 to 17.5 cents per gallon.

The increased tax would generate about \$19 million, including an extra \$1.5 million to cities and \$3.8 million to counties and highway districts.

Robbins said when the fuel tax increase was discussed earlier, the counties and highway districts were promised half the new revenue that didn't go to the highway agency; not one-third as outlined in the bill.

## The Big Brackets are with us again

While scouting through the almanac the other day, we rediscovered the fact that the zodiacal sign covering most of the month of March is Pisces.

Given the showers and dampness of the past few days plus the fact that this is often the time of year when dedicated anglers start thinking about breaking out the tackle for early season fishing, the sign of Pisces may be fitting for March.

But in considering the focus of another segment of the sporting world, we'd suggest that a more fitting sign for the month might be The Big Bracket. For, after all, March is the month of basketball tournaments.

Think about it. Here we have the 64-team NCAA bracket announced a day or so ago in preparation for a protracted playoff which will wind up on March 30. And the national junior college tournament, the National Invitational Tournament and at least one other major-collegiate tournament will be played this month.

Toss in a couple of rounds of state high school tournaments and a raft of church-league and city-league playoffs and March is, indeed, the month of The Big Bracket. By the time it's been dribbled away, even the most interested basketball fan is likely to admit that he's had enough jump shots.

But this week and next, a lot of Magic Valley basketball fans will be enjoying to the fullest the windup of the season — and keeping a close watch on those brackets to determine who's playing who and when and where.

At the collegiate level, Idaho State University is in the NCAA playoffs after a surprising Big Sky Conference tournament. The College of Southern Idaho is once again bound for Hutchinson, Kan., and the national junior college tournament. And Boise State, knocked out of the Big Sky in one of its several upsets, drew an invitation to take part in the NIT — even playing a first round game in Boise.

At the high school level, Shoshone came home from north Idaho this past weekend with a state championship and a perfect season record. Two other Magic Valley teams — Jerome and Minico — carry the area's hopes into this week's remaining high school playoffs in Boise.

So as March swings along its course, some fans are exulting over championships won, while others are preparing to cheer their teams on to — they hope — continued success.

And by the time the last of those big brackets has been followed to its conclusion, March will have brought about winter's passage and the arrival of spring — and with it a long-awaited switch in emphasis from indoor to outdoor activities.

## Bitter medicine facing Americans

WASHINGTON — It now looks to us as if the trade deficit has at last begun to shrink as the falling dollar makes American goods more attractive in world markets.

This is good news for industries that have lost export markets and competed unsuccessfully with imports from abroad.

But ironically it also means that, for the United States as a whole, there will be a slower growth of our standard of living over the coming years.

Although everyone agrees that our trade situation is terrible, for most Americans the five-year deterioration in our trade position has been relatively painless.

That's because, except for workers and shareholders in trade-sensitive industries, the increasing trade deficit has actually meant more total consumption of goods and services and lower prices for imports than would have been possible in a more balanced trade position. The necessary future transition back to trade balance will therefore inevitably involve a slowdown in the rising standard of living of most Americans.

The dramatic decline in the U.S. trade position developed only in this decade after many years of trade surpluses. But in just the past five years, foreigners have shipped to the United States more than \$500 billion of goods for which we have yet to pay.

The increase in the U.S. merchandise trade deficit from \$25 billion in 1980 to \$170 billion in 1986 is equal to 3.5 percent of our current GNP.

These extra net imports from the rest of the world make it seem that the economy has grown by 3.5 percent more over these years than it actually has. Thanks to borrowing from abroad, the goods and services that are available in the United States have increased faster than the volume of goods and services that are actually produced here.

Martin Feldstein  
Kathleen Feldstein

Thus, the recent borrowing from abroad has allowed Americans as a whole to enjoy a higher standard of living than would otherwise have been possible.

But the bill for all this foreign credit eventually has to be paid. Our trade deficit in these past few years has been financed by a massive inflow of foreign capital. As a result, we have had a growing accumulation of debts to foreigners and a growing level of foreign investment in the United States. The United States has switched from being a net creditor at the beginning of the decade to being a net debtor with \$200 billion of net debt to the rest of the world. Last year alone, that debt rose by some \$140 billion.

In 1986, we depended on foreign capital to finance two-thirds of all the net investment in the United States. But now, the falling dollar and shrinking trade deficit will mean a smaller inflow of capital from the rest of the world.

For several foolhardy years, the temporarily high dollar allowed shortsighted policy makers, concerned more with election returns than with long-run growth, to avoid most of the cost of running a huge budget deficit by postponing payment to the 1990s. But now that the dollar is reversing and our trade deficit is starting to shrink, the United States is going to have to endure a period of substantially slower rise in our standard of living. It's going to be bitter medicine.

### Same answer in prospect

I had a carload of kids last Saturday that were very disappointed in our local YFCA. The "Y" offered a swim coupon for the Drug Awareness Fun Pack. This coupon was good for one of two Saturdays. They YFCA chose to cancel the second Saturday swim because of the good turnout the first week.

As to supporting the "Y" in any of its future needs, our answer will be the same as theirs was Saturday — No!

### City government ineffective

We would like to respond to the news article in the Times-News regarding the amending of Ordinance No. 5-303-M, which allows liquor sales within the city of Eden on Sunday.

The statement in the release to your paper states, and I quote: "Without incident or even major objections from within or outside the community, the city of Eden recently passed an ordinance allowing liquor by the drink within the city limits on Sunday."

Having had no prior knowledge that the city board was even considering this issue, we consider this a poor way of conducting city business. It is the right of the citizens to know beforehand of any planned major changes in governmental policy. We object to the board's high-handed decision to amend this ordinance without having first given the citizens of the community a chance to add their input on the subject.

The statement was made by a spokesperson for the board, stating in your article, quote: "pressure was put on the city council by local bar and tavern owners."

No only is this statement ridiculous, it is misleading as well. Our response to such a statement must be, if the "pressure" from two bar owners is capable of causing the board to take this action so precipitously, without first giving the rest of the citizens of the community a chance to at least be aware of such a change, then the kindest thing we can say about the Eden City Council is to have a very basic governmental problem in Eden. "Pressure," indeed!

We have long been residents of Eden; by "long," we mean well over 30 years, and we have watched in dismay as this town and the quality of life here, have gone steadily downhill during

the past few years. This decline has taken the form of loss of businesses, sales (or inability to sell) homes, lower numbers of new homes built, and increasing numbers of temporary residents. Perhaps a more community-oriented board could help change this trend. The Jerome City Council saw no need to pursue the course of action the Eden City board chose to take. We commend the Jerome City Council for the action they took on this same issue, as it affects our city: at the same time, we fail to see why the citizens of Eden were not accorded this same very basic right. As to the unfortunate decline in the lifestyle in Eden, we fail to see how having an increased number of inebriated people crowding Main Street, and speeding up and down the normally quiet residential back streets on Sunday afternoons, could possibly help reverse this downwardly-mobile trend; having a fair and effective city government sound far more feasible to us as citizens.

entrust the care of our pets to these professionals and we pay good, hard-earned money for their care.

I had a recent experience with my family pet. The veterinarian didn't even show any concern about the condition of my cat even though he had never seen this condition in any animal before.

Nobody can even be sure that my cat didn't have feline leukemia because no tests were done to see if he had it before he started his shots.

We should be able to have the choice of having blood tests done even if the veterinarian doesn't think it is necessary. I wasn't given the choice to have blood tests taken nor was I talked to in detail about the exam. I was only told that there was nothing wrong. Well, I had to put our family pet to sleep, because his condition finally got so bad I couldn't ever get proper lab report results, because there weren't any.

As owners, you have the right and responsibility to your pet to do a background check on the veterinarian before making your final decision.

Some youth needed on farm

I'm writing about your editorial lengthening the school year. Why don't you think of the people that need their children on the farm? They might have to skip the last month of school and then they will flunk out. And besides it would be nice if you would think of the farmers and the children going to school. Some people have 4-H, but no, you just couldn't think of it. Well, start, OK? And I and some other people have that first month to get ready for the rodeo.

Sorry I told you what I thought, but would you just think of the school children and other things, like farmers and the rodeo?

She needs her free time

My name is Andrea Miller. I am a 13-year-old 8th grader. I am writing my opinion of the proposed longer school year. I can see why you might want it. When my dad was a boy, there wasn't any football, baseball, basketball and all those sports. They spent their time working and doing homework because that's what their parents wanted. My dad expects me to do my best. I go to school 180 days a year. I listen and learn all those things they teach. Coming home and do my homework every night. I work hard and do my best. I get A's as a reward. I put up with the pressure of school and there's a lot of pressure. But I go and do my best. I look forward to my summer vacation, where I can relax and not worry about homework and teachers. I feel that if I want to watch the so-called "wasteland" that "pollutes my mind," I have every right to. I will go my 180 days and give it my best, but don't ever ask me to give up my free time. I get to spend the days with my family enjoying the summer sun. I would take your vacation away from you so don't take mine from me. A vacation is as important to me as yours is to you.

## Mixed expectations, reviews for wives

Ellen Goodman

pushing for an arms-control agreement. Oh no! Heaven forbid! What a threat to the state of the union!

Granted, there has always been a certain paranoia about pillow talk. Power is the aphrodisiac in Washington. The White House inner circle is often jealous of the first lady's access to the one presidential organ they're interested in: the ear.

Nobody really cared as long as Nancy's role was, as advertised, that of the traditional wife whose pollies were the cult of husband-worship. It was within her jurisdiction to protect his physical well-being, but not his political well-being. That subtle distinction, that borderline between wife and dragon, was written in the invisible ink that usually accompanies the description for the non-job of first lady.

During the week of Nancy-bashing, I kept thinking about Elizabeth Dow. If the rap against Nancy is that she was uneducated and unappointed, what will happen to the Liddy Dow of the world if they get to the White House as wife? Would a former secretary of transportation be limited to best-selling billboard? Would we permit a President to appoint his wife the way

we permitted Jack Kennedy to appoint his brother? Could the first lady kiss her husband good-bye in the morning and go downtown to work in a private office?

The Doles are the most visible example, but there are dozens of other two-career couples populating the staterhouses and halls of Congress. By-and-large, the husbands go on leading their own work lives, but the expectations are more mixed for wives. And so are the reviews.

Campaigning is so demanding that it becomes, with only a family apogee in an era when men and women assume a level of participation, is more common to find a spouse who doubles as adviser or campaign manager. If they make it to the top, will the spouse get to be an official adviser or get forced into retirement? Or will the spouse be allowed only to be seen in public and heard in private?

We do not elect our first ladies. We don't elect first friends or first advisers either. They, too, come with the territory. But the way we accept spouses may be particularly important. It may determine how many of the new couples get into the running.

It is ironic that such questions emerge from this self-proclaimed traditional wife. Nancy Reagan is a woman accused of having just acquired a taste for power. Right down the road there are a lot of couples breaking political ground together as normally as they break bread. Some of them are wondering what will happen when they slide in higher office.

# Cassia County sets jail bond election April 7

By RONDA TAYLOR  
Times-News correspondent

**BURLEY** — Cassia County Commissioners voted Monday to hold a special \$2.845 million bond election on April 7 to expand the existing Cassia County jail from its current 34 beds to a 66-bed facility.

The proposed extension would include a section where 20 juvenile offenders could be held separately from adult offenders, including separate booking and recreation areas. The design would conform to a November 1986 ruling against Bonneville County in U.S. District Court that found it illegal to jail juvenile offenders without adequate separation from adult inmates.

The commissioners met with Cassia County Sheriff Billy Crystal and Twin Falls architect H. Richard Heindel, who drew up the expansion plans, before passing a resolution to 466-Cassia voters to decide the jail issue in April. If the measure is passed, construction should be completed in about two years, Heindel said.

"You're never going to get it for less money," Heindel told the commissioners. Interest rates are down now, but they could increase next year, he said. However, "jails are always tough to sell to people because they're always somebody else's problem," he added.

Landowners would pay about 72 cents per \$1,000 of assessed valuation for the proposed

10-year, 6 percent bond, said County Administrator Tim Hurst. For the average \$60,000 homeowner with a 50/50 exemption, this would amount to about \$25 per year, he said.

The jail is part of the county-owned Law Enforcement Building built in 1976. Crystal said that the inmate population has consistently increased and that the county has had to make arrangements with neighboring Mindoko County six times during the last year because of overcrowding. The jail currently holds an average of 25 inmates per day, he said.

Crystal, along with Commissioners Weidon Beck, Norman Dayley, and John Adams, have been holding meetings throughout the

county with civic groups and other interested parties since January to get some public reaction to the project. Officials have said the present size of the jail would not be enough to make the county subject to lawsuits if the facility is not expanded.

Crystal described reaction to the public meetings thus far as "very good," but added that many people are concerned about paying additional taxes in the present struggling farm economy. County officials plan to continue to hold public meetings to build support for the jail expansion until election time, he said.

Heindel said the project would include approximately 20,000 square feet in new construction and 5,000 square feet in renovation.

Proposed security improvements include an sally port where vehicles could deliver prisoners at one arrival point and an elevated control center where one staff member could observe every inmate.

The central control area would "reduce the number of staff needed day to day most dramatically," Heindel said. In addition, the extension has been designed so that any future jail expansion could be built as a second level of the proposed expansion area, reducing the cost per square foot, he said.

Heindel said the special election must be residents of the county for 30 days, but do not have to be registered voters. An electors' oath attesting to residency in the county is all that is required to vote. The polls will be open from 10 a.m. to 8 p.m.

## Magic Valley

Tuesday, March 10, 1987 Times-News, Twin Falls Idaho A-5

### Informative greeting

"Welcome to Twin Falls!" After getting a deep view of the Snake River Canyon, visitors now also can get their bearings at the Perrine Bridge. The Greater Twin Falls

Chamber of Commerce points to 34 landmarks, parks, shopping districts and public facilities on a new, \$4,000 directory, donated to the city Monday. "We felt a one-stop

local-it-all service would be appreciated," says project head Dale Quigley. The map at the city's north gateway may be the first of two or three showing the way for travelers.

## Peavey seeks to ease rules for director

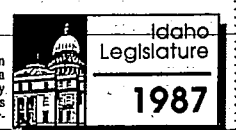

By MARK PRATTER  
Times-News writer

**TWIN FALLS** — State Sen. John Peavey, D-Carey, has introduced a bill into the Senate that some say could influence how the Swan Falls water rights agreement is interpreted.

Now the state requires that the director of the state department of Water Resources be a licensed civil or hydraulic engineer with not less than five years of experience.

Peavey's bill would drop that requirement, which he says unnecessarily restricts who might be appointed to the position and has cost the state money. Senator director A. Kenneth Dunn, an engineer who has worked for the state since 1967, makes \$66,222.40, while the governor earns only \$55,000, according to the State Auditor's office.

LaIRD Noh, R-Kimberly, chairman of the Senate Resources and Environment Committee, said while the bill might have paved the way for a sharp

Secretary of State's office. In 1986 IPC also gave \$2,000 to Citizens for Idaho, an Andrus organization; state records show.

Greg Panter, IPC's lobbyist at the capitol, said Peavey asked him to comment on the bill. "I think it's a good bill. The day has come and gone when we need to director a Kenneth Dunn, an engineer who has worked for the state since 1967, makes \$66,222.40, while the governor earns only \$55,000, according to the State Auditor's office."

He didn't agree with Noh's point on interpreting the agreement and questioned why an attorney or a person with a master's in business administration would take a different view of Swan Falls than an engineer, he said.

"As one enters the era of interpreting the Swan Falls water rights agreement, a favorably inclined director of DWR could be a real ally to Idaho Power Co. by ensuring a lock on minimum stream flow and trust water," Noh said.

Peavey said his bill is just good business for the state. "If you want an administrator, hire an administrator," Peavey said. He took the same side as IPC in the Swan Falls dispute, but for different reasons.

Both Peavey and Gov. Cecil Andrus, who will appoint Dunn's successor, received campaign contributions in 1986 from Idaho Energy Resources, an IPC political action committee. Peavey received \$250 water in the Snake River Plain and Andrus \$2,000, according to the

anything to do with Swan Falls, Panter conceded. "The DWR director will have an influence on how the agreement is interpreted, he said the people in a position to make a decision regarding Swan Falls will be full-time employees of DWR." The Swan Falls agreement came after IPC won a series of court victories and there was deadlock in the Legislature. In 1984 IPC concluded an agreement with the state that guaranteed the utility a minimum stream flow to turn its hydroelectric turbines at Swan Falls and other locations on the Snake River. Some water in the Snake River Plain

## Twin Falls to try for drainage grant

By PAT MARCANTONIO  
Times-News writer

**TWIN FALLS** — Damaging flooding of basements near Flier Avenue and playful tubing in the swollen gutters near Addison Avenue should both be eliminated if the city successfully obtains a block grant for a storm-drain expansion project.

The Twin Falls City Council on Monday asked city staff to prepare applications for a Community Development Block Grant to expand the drain system from Flier Avenue to Van Buren Street, and to further improve the Twin Falls Seniors Citizens Center.

As it is, area residents complain often about flooded basements and lawns because the present system is inadequate, Young said.

The problem is that about 211 acres drains into one point — an access to the Orcharah Tunnel near Tyler Street and north of Flier Avenue, which in turn empties into Rock Creek, Young said. The pipe, feeding the tunnel, however, is only 27 inches at one point.

The flooding occurs mostly to people residing near the point where the water collects to enter the system. "It is nothing life-threatening," he said, "but aside from flooding and storm-drain damage every year to one extent or another."

With more building in the area, there are less places where the water can drain into the ground.

The grant application deadline is April 15. The estimated cost of the storm-drain project, which will fall under a large public-facilities grant category, will be about \$373,000. City Engineer Gary Young told the council. The money will buy about 1,350

## House panel kills center licensing bill

By Times-News writers

**BOISE** — Another blow against a private Jerome youth detention center was struck on Monday in the Legislature.

A bill brought by Rep. Jerry Callen, R-Jerome, to allow the Southern Idaho Youth Center to be licensed by the county died in the House Judiciary and Rules Committee.

Callen said the Jerome facility "was a good facility" that the state Department of Health and Welfare "won't license because they hate to see kids put in detention facilities."

But Ray Winterrowd, with DHW, said the Jerome facility never formally applied for licensure. "House committee members objected to making counties liable for inspection of facilities when there seemed to be no problem."

"I don't know why the Jerome facility didn't apply for licensure," said Rep. Bob Fry, R-Horeshore Bend. "We don't need to increase the cost to counties with this bill."

Rep. Patty McDermott, D-Pocatello, said the bill would open up counties to "extraordinary potential liability" and was unnecessary.

"This is a response to a problem when apparently they haven't tried to get a license," she said.

Rep. Pam Bengson, R-Boise, said the measure would have done the opposite of what the state and the Legislature was trying to do. "This would be a step backwards," Bengson said. "We're trying to maintain the quality and upgrade juvenile facilities." See CENTER on Page A6

## Burley wants direct road link to INEL

By RONDA TAYLOR  
Times-News correspondent

**BURLEY** — Construction of a road that would directly link the Idaho National Engineering Laboratory in southeastern Idaho with the Mini-Cassia area could aid all of Idaho, Burley Area Chamber of Commerce President Paul Matthews said Monday after the chamber's monthly meeting.

The chamber has been working with state legislators and has contacted Gov. Cecil Andrus in its push for the proposed 45-mile route that would travel from the city of Minidoka through Afonic City and into the INEL, he said.

It is not a road project, he said. An exact route has not been made for the proposed two-lane highway. However, "the selection will be crucial" because of the fragile environment in that area, Matthews said. Most of the land is owned by the federal government and run by the Bureau of Land Management, he said.

However, "funding is the major obstacle," he said. Although the chamber has been working with area legislators to examine state funding

construction will probably have to be federally funded, he said.

"The state doesn't have that kind of money," he said. Working with state legislators is still important because U.S. Department of Transportation monies are distributed through the Idaho state Department of Transportation, he said.

The INEL currently runs buses as far away as Malad, and "could in theory have Twin Falls workers bused." If the road is constructed, he said.

INEL tour director Harlan Summers, who spoke at the chamber meeting, said that Idaho's bid to be selected as the site of the Superconducting Super Collider "was going to be a real fight."

"We have to be realistic," he said. "We may not get it — it's such a political plum that everybody wants it."

Currently the INEL provides employment for about 10,000 people and has an \$800 million annual budget, he said. If the proposed route is constructed it is possible that some of those workers could live in the Magic Valley, Summers said.

## School closure issue to reappear

By JANE ROBISON  
Times-News writer

**BOISE** — A bill to force the closure of small, inefficient rural schools died in committee on Monday, but the issue is certain to return.

Deputy State Superintendent Gus Hein proposed a bill to eliminate extra state money automatically given to small schools that are 10 miles or more apart but have less than 300 students.

The measure was vehemently opposed by the Cassia County School District.

"The bill would have required school districts to apply for extra state money where a real need exists," Hein said.

"The measure would have redistributed \$3.5 million from 29 school districts, 'taking from the haves and giving to the have-nots,' Hein said.

The bill was supported by Ed Davis, assistant superintendent of Boise schools, and Sen. Gal Bray, D-Boise.

"The bill was drafted by a task force of 20 superintendents studying the school equalization formula," Bray said. If school districts want to keep open small, inefficient schools, they should be allowed to do so, but at local expense, "not at state expense."

know they should close small, rural schools. The superintendents can't sell the idea to the local school board, because the district would actually lose money.

Davis said the bill "would allow superintendents to do what they know they should do, but can't politically."

But Burley Superintendent Norman Hurst called the measure "a step in the face" to school districts that consolidated.

Hurst said the proposal would cost Cassia County School District \$368,000 a year.

"It would be devastating to Cassia County," Hurst said during a heated presentation. He said if the measure passed, it would encourage districts to deconsolidate.

Hein said the state Board of Education would not allow school districts to deconsolidate.

State Sen. Mary Lou Reed, D-Coeur d'Alene, said the bill was premature. "I agree with small town values," Reed said.

State Sen. Lynn Tominga, R-Rupert, also said the measure was premature. He said the Legislature needed a companion bill to force consolidation of small school districts in the same county.

Bray said if school districts want to keep open small, inefficient schools, they should be allowed to do so, but at local expense, "not at state expense."

Davis did not name superintendents, but he said some of them, "Noh said.

# History conference set at CSI

**TWIN FALLS** — The annual Idaho History Conference will be held Saturday in Room 115 of the Shields Building at the College of Southern Idaho.

Purpose of the conference is to give all Idaho historians an opportunity to share research and friendship, says Jim Gentry, CSI history professor. It is an informal organization of historians, which meets at sponsoring colleges or universities. The program is divided into half-hour sections, which run from 9 a.m. to 3:30 p.m. Chairmen of the sessions will include Merwin Swanson, Idaho State University; Robert Woodward, Northwest Nazarene College; Gentry; Larry Quinn and Robert Alire, all CSI; and Robert Sims and Errol Jones, both Boise State University.

Harold Bauman, University of Utah, will be the luncheon speaker. Times of the individual topics are as follows:

9 a.m.: "Refreshing the Tree of Liberty with the Blood of Patriots and Tyrants: Thomas Jefferson and Origins of the U.S. Constitution," Ronald Hatzenbuehler, ISU.  
9:30 a.m.: "The Artificial Heart: Predpositions for Historical Scholarship," Kris Koford, University of Utah; 10:30 a.m.: "The Millennial Star, the Indians and the Missionary Herald: A Comparison," Lawrence Coates, Ricks College.  
11:30 a.m.: "German Missionary Influences in the Volta Region 1847-1884," Peter Buhler, BSU; 11:30 a.m.

"Frank Church and the Latin American Policy Debate," Russ Tremayne, BSU.  
1:30 p.m.: "In the Name of Tim, Moneylending in Devon in the 1560s," Norm-Jones, Utah State University; 2 p.m.: "Public History and Land Management: Land Use in the Birds of Prey National Area, 1860-1990," Todd Shallal, BSU; 2:30 p.m.: "Rhetoric of the Age of Bush and Rebellion," Brant Short, ISU, and 3 p.m.: "Observations on Recent Idaho Elections," Hatzenbuehler.  
Registration fee is \$7.50 which includes lunch and refreshments.

## Briefly

### Crash kills motorcycle rider

**RUPERT** — A Rupert resident was killed late Sunday when his speeding motorcycle went out of control and crashed into a power pole, throwing him to the pavement.  
Rupert police said the accident occurred at 5:36 p.m. Sunday in the city of Rupert, near the junction of State Highway 24 and State Highway 25.  
The victim, Stanley Carl Rogers, 24, was traveling at an estimated 106 miles per hour, police reports showed. His eastbound 1983 cycle failed to negotiate a curve on State Highway 25, went into a skid and then struck a power pole, officers said. He was thrown to the pavement some distance from the impact with the pole.  
Although ambulance personnel and officers attempted to revive Rogers, he was pronounced dead at the scene by Mindoko County Coroner John Fisher. State and county officers assisted, as did Rupert Mayor Bill Whitton, who happened by the scene shortly after the accident.

Another burglary was reported at an office in Doctors Plaza, 468 Harrison St. Jon Jensen told police items were taken after someone forced open a door and entered the building during the weekend. Missing were \$800 worth of telephone answering equipment and telephones.

Thieves took two color television sets from rooms at the Western Motel, 1201 Kimberly Road. Loss was estimated at \$300 with an additional \$50 damage caused by the burglars.

### Census Bureau to seek data

**SEATTLE** — The U.S. Census Bureau will collect employment, income and poverty data from area residents March 16-21, the bureau has announced.  
The local labor force data will contribute to the March national employment report, scheduled to be released April 3. Various agencies also will use the information to study changing structure of American families, Seattle Regional Director Leo Schilling said.

### BID meeting on Wednesday

**TWIN FALLS** — The Twin Falls Business Improvement District will hold its monthly membership meeting at 8 a.m. Wednesday in the Rendezvous Inn, 149 Main St. E., Twin Falls.  
The meeting will include discussions of a collection of overdue assessments on vacant downtown buildings and a proposed new city ordinance on business liquidation sales.  
The meeting is open to the public.

### Daffodils to help raise funds

**TWIN FALLS** — There will be daffodils in nearly every Twin Falls business and on some street corners in Twin Falls Thursday as the American Cancer Society members in Magic Valley start another annual daffodil days fund-raiser.  
Jerry Miller, chairman of the spring fund-raiser, said early sales have found homes for about 1,000 bunches of the bright yellow flowers.  
Stores, banks and restaurants will be displaying the flowers and some will be giving them to customers.  
Miller said there are a half dozen or more flowers in each 33 bunch. All of the money goes to the society programs of research and assistance to cancer victims.

### Youth dies from gunshot

**BURLEY** — A 13-year-old Cassia County boy died of a self-inflicted gunshot wound Sunday evening at the family's farm home south of Burley.  
Cassia County Coroner Paul Young said Kenneth Loveland, a son of Don Carlos Loveland and Katherine Loveland, died of a head wound inflicted by a rifle. The youth was found at 7:30 p.m. behind the residence, Young said.  
Young Loveland had been hospitalized in Salt Lake City, Utah, for 20 days earlier this year and was still experiencing health problems, Young said.

### Thieves strike firms, homes

**TWIN FALLS** — Thefts continued during the past weekend in Twin Falls with several businesses and homes hit by burglars.  
Floyd Hazen of Blue Lakes Sporting Goods, 1236 Blue Lakes Blvd. N., reported the theft of a canoe. He told police someone removed the canoe, valued at \$199, from a display rack outside the building. The theft occurred during the weekend.  
Peggy Landrum reported she lost \$600 worth of stereo and other sound equipment when someone entered her unlocked home at 1839 Skyline Dr. The burglary was reported Saturday morning.

## Van skids on black ice, injuring driver, rider

**HAILEY** — A southbound van carrying six residents of Michigan skidded on black ice early Monday morning south of Ketchum, injuring the driver and one passenger.

Deputy Sheriff Pat Pigeon of Blaine County said it had been raining in Blaine County, and the water turned to black ice by morning. The accident occurred at 7:22 a.m. on mile south of Ketchum on State Highway 75.  
Pigeon said the van skidded on the ice, went off the right side of the roadway, then back onto the pavement, across three traffic lanes and left the road again on the left side. It crashed into a power pole, then rolled onto its top, with the power pole and downed lines across the overturned vehicle.  
The driver, Paul D. Fisher, 39, of Birmingham, Mich., and one passenger, Scott McDonald, 25, of Harel Park, Mich., were both taken to the Sun Valley hospital with burns. Both were listed in stable condition Monday afternoon.  
Pigeon said the two were burned by electricity when the hot wires dropped on the vehicle and around the scene. The other four individuals escaped injury. Pigeon said both were unconscious when they arrived at the scene, but had regained consciousness by the time they arrived at the hospital.  
A number of small fires were started at the scene, but the van did not burn, the officer said. The two injured men and other passengers were extremely lucky to escape the situation, Pigeon said, adding that the driver came in contact with the hot power line with the back of his head.

## Obituaries

### Lella Brown

**FILER** — Lella Brown, 75, of Lookout, Calif., and formerly of Filer, died Saturday, March 7, at her home.  
Born June 19, 1911, in Filer, she graduated from Filer High School in 1929, and as a registered nurse from DePue Memorial Hospital Nursing School in Ogden, Utah in 1932. She worked at the Twin Falls County Hospital from 1932 until 1942 and at several hospitals in Northern California until retirement.  
She married E. Kimball Brown at Lookout, Calif., on March 6, 1944. They owned and operated a cattle ranch at Lookout from the time they were married until retirement in 1973.  
Surviving are: her husband of Lookout, one son, Melvin, Brown of McKinleyville, Calif.; two sisters, Ruby MacMillen and Wilma Frazier, both of Twin Falls; and two grandchildren. She was preceded in death by her parents, William A. and Lennie Lincoln; one son, Phillip Brown; and one brother, Ray Lincoln.  
A graveside service will be held at 3 p.m. Wednesday at the Lookout Cemetery. The family suggests memorial contributions may be given to the American Heart Association.

### Inda L. Moisee

**FILER** — Inda L. Moisee, 91, of Filer, died Sunday evening, March 8, at the Magic Valley Regional Medical Center in Twin Falls.  
The funeral will be conducted at 2 p.m. Friday at the White Mortuary Chapel in Twin Falls. Burial will be at the Filer IOOF Cemetery.  
Friends may call at the White Mortuary Wednesday and Thursday from 3 to 6 p.m.  
A complete obituary will appear in the Wednesday Times-News.

### Stanley C. Rogers

**RUPERT** — Stanley Carl Rogers, 24, of Rupert, died Sunday, March 8, from injuries received in a motorcycle accident.  
Funeral arrangements are pending and will be announced by the Hansen Mortuary in Rupert.  
**Orlin Gunter**  
**JEROME** — Orlin Gunter, 81, of Jerome, died Monday, March 9, at St. Benedict's Family Medical Center in Jerome.  
Funeral arrangements are pending and will be announced by the Howe-Robertson Funeral Chapel in Jerome.  
**Kenneth Loveland**  
**BURLEY** — Kenneth Loveland, 13, son of Don Carlos and Katherine Loveland of Burley, died Sunday evening at his home.  
Funeral arrangements are pending and will be announced by McCulloch's Funeral Home in Burley.  
Burial will be in Paul Cemetery, conducted today at 3:30 p.m. in the White Mortuary Chapel. Cremation will take place at the White Crematory. The family requests memorials to the Alpine Boys Ranch in Leavenworth, Wash. They may be left with the White Mortuary.

### Elizabeth A. Hall

**JEROME** — Elizabeth A. "Toots" Hall, 70, of Garden Grove, Calif., and formerly of Jerome, died Wednesday, March 4, in Garden Grove.  
Born Dec. 18, 1916, in Madras, she lived in Salt Lake City for several years before moving to Jerome, where she graduated from high school. She married William H. Hall in 1935 in Jerome. They traveled on government irrigation projects, settling in Corvallis, Ore. He died in 1975. She moved from Corvallis to Garden Grove in 1985.  
She was a member of the Eagles Lodge, serving as past president at

### Percy Brown

**GOODING** — Percy Brown, 77, of Gooding, died Monday, March 9, at Gooding Memorial Hospital in Gooding.  
Born April 21, 1899, in Bereasba Springs, Tenn., he moved with his family to the Kimberly area in 1910. He graduated from high school there. He attended the Gooding College. He later farmed with his father for several years. He married Mabel A. Pounds on May 19, 1934, in Nampa. In 1935 they moved to Gooding, where they farmed, north of town for several years before moving to their present farm south of

### Paul

**PAUL** — The funeral for Melvin Connor, 56, of Hayward, Calif., and formerly of Paul, who died Friday, will be held Friday at 2 p.m. in McCulloch's Chapel. Burial will be in Paul Cemetery. Friends may call at McCulloch's in Burley Thursday from 2 to 8:30 p.m. and on Friday prior to the time of the service.  
**TWIN FALLS** — The funeral for Beatrice G. Durfee, 92, of Twin Falls, and formerly of Hagerman, who died Sunday, will be held Thursday at 2 p.m. in the Hagerman LDS chapel. Burial will be in Hagerman Cemetery. Friends may call at the White Mortuary today and Wednesday from 5 to 8 p.m. and at the church Thursday from 2 p.m. until the time of the service.

### Services

**TWIN FALLS** — A graveside service for Jerome "Tex" Adams, 74, of Twin Falls, who died Thursday, will be held today at 11 a.m. in the First Baptist Cemetery. Service arrangements are under the direction of Reynolds Funeral Chapel.  
**GOODING** — A graveside service for Alta S. Henderson, 96, of Gooding, who died Saturday, will be conducted at 11 a.m. today at the Elmwood Cemetery in Gooding, under the direction of the Demaray Gooding Chapel.  
**BURLEY** — A graveside service for Nelle S. Morgan, 105, of Burley, who died Saturday, will be conducted at 11 a.m. today in the Sunset Memorial Park in Twin Falls. Arrangements are under the direction of the Payne Mortuary. Service memorials should be sent to the First Presbyterian Church in Burley.  
**PAUL** — The funeral for Anna Virginia Duff, 72, of Paul, who died Saturday, will be conducted at 11 a.m.

### Funeral for Helen Pauline

**TWIN FALLS** — A funeral for Helen Pauline Hill, 79, of Sacramento, Calif., and formerly of Twin Falls, who died Friday, will be held at 1 p.m. today in the White Mortuary Chapel. Burial will follow in the Sunset Memorial Park.  
**TWIN FALLS** — The funeral for Donald B. Hine, 77, of Twin Falls, who died Thursday, will be held today at 2 p.m. in the First Baptist Church in Twin Falls. Burial will be in Sunset Memorial Park. Friends may call at Reynolds Funeral Chapel today until 6 p.m. The family suggests memorial contributions to the memorial fund of the First Baptist Church.

### Funeral for Branda-Faye Goodrich

**TWIN FALLS** — The funeral for Branda-Faye Goodrich, 36, of Twin Falls, who died Thursday, will be conducted today at 3:30 p.m. in the White Mortuary Chapel. Cremation will take place at the White Crematory. The family requests memorials to the Alpine Boys Ranch in Leavenworth, Wash. They may be left with the White Mortuary.

**MAGIC VALLEY REGIONAL MEDICAL CENTER**  
Admitted  
Clifford Bullock and Mrs. James Hutchison, both of Twin Falls; Mrs. Herbert Beard of Kimberly; Melvin Carlton Daniels and Inda Moisee, both of Filer; Mrs. Andy Studer of Rupert; Scott VanVierah of Mountain Home; and Mrs. Shane Olney of Hagerman.  
Released  
Stephanie Lane, Rex Silcock, Mrs. James Hutchison and daughter and Sphorina McGehee, all of Twin Falls; Mrs. Scott Beike and daughter of Oakley; Mrs. Elsie Borba and twin daughters of Hagerman; Mrs. M. O. Milose of Kimberly; Mrs. Alan O'Connell and daughter of Jerome; Mrs. Nell Bow and daughter of Three Creeks.  
Deaths  
Daughters to Mr. and Mrs. Richard Beard of Kimberly; and

Mr. and Mrs. James Hutchison of Twin Falls.  
Home Birth  
A son to Terry and Cathy Roemer of Jerome.  
**CASSIA MEMORIAL**  
Admitted  
Velma Ballard and Elnora Carrick; both of Burley; Kevin Feltz of Heyburn; Rebecca Clark of Oakley; and Sylvia Jafek of Declo.  
Released  
Edwin Wight and Kathleen Farnsworth and baby, both of Burley; Shaun Harris and Harriet Crank, both of Malta.  
Deaths  
Babies to Mr. and Mrs. Dennis Jafek of Declo; and Mr. and Mrs. Harlo Clark of Oakley.

## Grant

Continued from Page A5

Young said. After rainfall, water runs under the sidewalks and pokes through manholes and water. "It's a constant battle with water and, it's not going away."  
With the grant money, the city would replace the section of 27-inch pipe near Filer Avenue with larger pipe and add a parallel pipe near the city water line, Young said. The parallel line would connect to a newer drain system near Van Buren Street and Addison Avenue, installed by the state as part of the Addison Avenue improvement project.  
If the drain system is expanded, pressure will be eased on the sewer system, which is often at capacity, and that will have a positive effect all the way to Sixth Avenue North and Shoshone Street, he said. Last fall he saw children with intestines floating down the gutters of Sixth Avenue North near Addison Avenue.  
Altogether, about 587 acres will be affected.  
"Even before the announcement that the grant was available, city engineers have been working on ways to solve the flooding problems, he said. But it was too large a project for the city to fund, considering the annual street budget is only about \$900,000.  
"To me, it's just the kind of project made for this kind of funding," Young said of the grant.  
City Development Director LaMar Orton said projects funded by block grants must have a positive impact on low and moderate-income areas and others like it, and a grant would fit the bill, he said.  
After Young's report, the discussion turned to grant-application strategy. For instance, the city may consider including another storm-drain expansion project to the west.  
Orton said he feared the addition of another section could dilute the application for the more critical expansion project discussed previously.

## Center

Continued from Page A5

Center officials have maintained the center met the state requirements for holding juveniles, such as placing them out of sight and sound of adult inmates.  
But youth advocates questioned whether more and specific requirements were needed for the center and others like it, and a grant should enforce those regulations.  
The report, prepared by two juvenile-detention operators, also recommended that the Southern Idaho Youth Center not be used for a secure detention facility because of inadequacies. But the center was considered better for youths than holding them in county jails.  
A report initiated by the Idaho Commission on Children and Youth and funded by an office of the U.S. Justice Department recommended an "intensive" effort to develop licensing rules for all facilities holding children and that the judiciary take a lead role in development of criteria for the use of detention facilities.  
The report, prepared by two juvenile-detention operators, also recommended that the Southern Idaho Youth Center not be used for a secure detention facility because of inadequacies. But the center was considered better for youths than holding them in county jails.

## Water

Continued from Page A6

aquifer system was set aside to be held in trust for the state.  
The DWR director is responsible for interpreting the agreement, which could have a large role in the state's development decisions.  
Sen. Phil Batt, R-Wilder, chairman of the State Affairs Committee, thinks Peavey's bill is a good one, and he said he will probably support it. The bill should not put severe restrictions on possible appurtenances, he said. Among qualifications Batt said he would look for in a new director are knowledge of water matters and excellent administrative ability.  
It is highly unlikely an appointee could be plucked by a special interest group, he said. However, Batt said it might be possible for a special interest to get someone in who was "a little more amenable to its view."

**IN-EAR HEARING AID ...**  
**NEW CONCEPT**

- Handles all sound levels clearly - even in noisy places or groups.
- Brings whispers and soft voices up to your hearing level.
- Cosmetically pleasing - fits all in the ear with no external cords, tubes or wires.
- Individually made to your personal hearing requirements.
- Controls unwanted background noise so you may hear and understand again!

# Compound could cut collider's cost

CHICAGO (AP) — A new compound that conducts electricity at warmer temperatures than ever before could significantly reduce the cost of the proposed \$4.4-billion atom smasher project endorsed by President Reagan, scientists say.

Several states are competing to be selected as the host for the Superconducting Supercollider project. The actual building phase of the project isn't expected to begin for two to four years, but will bring major economic and employment benefits to the host state.

The new compound was announced last month by physicist Paul Chu of the University of Houston. Chu found that combining yttrium, barium, copper and oxygen in a compound yields a superconductor of electricity at 93 degrees Kelvin, minus 285 degrees Fahrenheit, or four times warmer than the temperature needed by current superconductors.

"I think it's time to evaluate the (supercollider) project to see what the impact of the new, emerging technology might be on it," said Arthur Freeman, a physicist at Northwestern University and one of several scientists who have duplicated Chu's work.

But other scientists already doing

preliminary work on the supercollider question—whether the new materials will allow the project to be built for less than the targeted \$4.4 billion.

And they contend the current building schedule allows scientists enough time to determine whether the new materials should be used for the project.

"We can explore the application of these new materials quite quickly," said John K. Hulm, director of corporate research for Westinghouse Electric Corp. in Pittsburgh.

"I don't think it pays to slow down at all," said Leon Lederman, director of the Fermi National Accelerator Laboratory near Batavia, which operates the world's largest atom smasher. The atom smasher at Fermilab is a circular, four-mile track that uses powerful electromagnets to guide beams of protons and anti-protons into each other with such force that the collision creates other subatomic particles.

Scientists study the debris of these collisions for clues to the nature of matter itself. That, in turn, helps scientists move farther and farther back into the history of the nearly universe.

## Swensons liked TV movie

BOZEMAN, Mont. (AP) — Karl Swenson's mother, Jan, and former Gallatin County Sheriff John Onstad liked the TV movie, "The Abduction of Karl Swenson," but both said they wished accuracy could have come before drama.

"Lots of parts (of the movie) were very accurate," said Onstad, who was Gallatin County's sheriff when Swenson, a member of the U.S. 8th Air Force team, was kidnapped in 1984. "But when you take the movie away from its original setting and put in snow and tracks when they weren't there, you get a change."

Onstad, now a Whitehall insurance agent, said some of the Hollywood touches, like snow in July, were downright amusing.

"I laughed through some parts," he said. "If we had had an inch of snow, the Nicholoses would have been caught on the first day, not five months later."

"I think they could have done a little more for France," Onstad said. "Everyone has wondered why I didn't thank Johnny France," Jan Swenson said Monday. "When I asked him why he didn't come and help us the night Karl was kidnapped, France said, 'I don't believe in night searches—You can't find nobody in the dark.'"

"And then France said to my husband and me that we had no right to be out searching for Karl because we were not law enforcement officers and only law enforcement officers were allowed to do that."

"He can whine to the press as much as he wants about us not saying thank you. But he knew we were reorganizing at 4 a.m. to search for Karl, and he didn't come to help."

France responded: "I don't think anybody is going to believe that I didn't say that."

## Jury picked for trial of teen-ager accused in Duffy murder

BOULDER, Mont. (AP) — A jury of seven women and six men was picked Monday for the trial of Kenneth A. Miller, one of two teen-agers accused of murdering the parents of actor Patrick Duffy.

"I must say it's going a lot faster than I thought it would," said District Judge Frank Davis. "Hopefully we'll get this case over this week."

Miller, 19, of Helena, is accused of two counts of deliberate homicide, robbery and assault in connection

with the slayings Nov. 18 of Terrence Duffy and Marie Duffy during an apparent robbery in their bar in Boulder, a ranching community of about 1,400 people 30 miles south of Helena. His co-defendant, Sean A. Wentz, 19, also of Helena, faces trial on the same charges later.

Onstad and Jan Swenson both commented on the difference between the roles of Onstad and then-Madison County Sheriff Johnny France, who captured the Nicholoses single-handedly months later.

## Rancher charged in trucker's death

CANYON CITY, Ore. (AP) — An Eastern Oregon man was in jail Monday after a body believed to be that of a Kansas trucker was found buried among cattle carcasses on his ranch.

The body tentatively was identified as Delbert W. Angleton of Chanute, Kan., who was 28 when he vanished three years ago. Angleton was on a cattle delivery from Edna, in southeast Kansas, to Leoti, in western Kansas, when he disappeared Feb. 5, 1984.

Acting State Medical Examiner Larry V. Lewman said Monday that an autopsy had not yet been conducted to confirm the man's identity.

Gary Lee "Blue" Hall, 33, was arrested on preliminary charges of conspiracy to commit felony murder, first-degree theft, first-degree robbery and unauthorized use of a motor vehicle. Grant County sheriff's deputy Fred Reusser said

Monday. Hall's bail was set at \$25,000 pending an arraignment.

Reusser said a charge of attempted escape also was being prepared. He said Hall tried to jump from a jail window before being placed in a cell.

Angleton was driving a truck carrying 75 head of cattle when he disappeared. The empty truck was found about two weeks later abandoned at a truck stop in Cheyenne, Wyo.

Grant County District Attorney Foster Glass said in a statement that his office and Oregon State Police were informed March 3 that a cattle theft and slaying occurred in Kansas in early 1984 and that a man's body was buried near Dayville.

State police, sheriff's deputies, and investigators from the Oregon state crime laboratory carrying search and arrest warrants raided the Battle Creek Ranch near Dayville Saturday.

What's what

WHAT IS SO EVIL?  
Wrote author John Brunner: "If there is such a phenomenon as absolute evil, it consists in treating another human being as a thing."  
Several University of Iowa Football players in 1978 reported for practice with shaved heads. The State Barbers' Examining Board filed a suit against them for "...barbering without license."  
You know how there are primary

arabic Koran. Their teachers, the mullahs, read the arabic, though.  
On Thanksgiving, no gratitude may be greater than the gratitude breaking tradition by buying their the most wine is drunk.  
Q. What's the most consecutive ringers any horseshoe pitcher ever got?  
A. 72. Ted Allen did it in the 1955 World horseshoe pitching meet at Murray, Utah.  
Stand by until 1999 -- that's the next time February has no full moon.  
FUR COATS  
Madam, at what age did you get your first fur coat, if any? Wait, too personal. In 1977, average age of the

first-time fur coat owner was 50. This year, it's 26. The why of this is not clear. Evidently, a growing group of affluent young women are breaking tradition by buying their own fur coats.  
Q. What kills the most young people, say, between ages 15 and 24?  
A. Car wrecks. First, murders second.  
There are those who say that when archivists 50 years from now replay the television tapes of today, the only noteworthy footage they'll find is the work of Charles Kuralt.

GENERAL TENDENCIES: It's a great day to find out from others exactly what they expect from you and what you can expect from them. Also, learn how to increase your holdings.  
ARIES (March 21 to April 19): If you ask an influential person for advice on improving your position in life, you get excellent advice.  
TAURUS (April 20 to May 20): Be with associates, and good-pals and better organize your affairs. Contact friends you have been neglecting.  
GEMINI (May 21 to June 21): Dive into some worldly matter that is important to your welfare. Become a more dynamic person.  
MOON CHILDREN (June 22 to July 21): Get busy working on new ambitions and make real progress. Make sure you drive with care.  
LEO (July 22 to August 21): It's a good day to have a long talk with your mate that can make the future brighter for both of you.

## Daily Horoscope

VIRGO (August 22 to September 22): Associates and friends now understand your views and the relationship improve considerably.  
LIBRA (September 23 to October 22): Bigwigs give you the OK now for any activities you want to engage in. Be active and happy.  
SCORPIO (October 23 to November 21): You are highly inspired to gain your wishes, whether they be of a personal or practical nature.  
SAGITTARIUS (November 22 to December 21): Show your kin your devotion is for them and gain more affection accordingly.  
CAPRICORN (December 22 to January 20): Get in touch with out-

side partners and improve the relationships. Gain more prestige with civic matters.  
AQUARIUS (January 21 to February 18): Study the benefits you are receiving from the work that you do and plan how to make them greater.  
PISCES (February 19 to March 20): Study whatever pleases you the most and get your friends to agree with you. Make big headway now.  
IF YOUR CHILD IS BORN TO IDEAS ... be or she will be able to get ideas across easily, so be sure to give as fine an academic education as you can afford at the most modern schools. Your progeny can do very well in the field of "merchandising" whether a male or female. Travel would be wise during early youth.

# High court eases asylum requirements

WASHINGTON (AP) — The Supreme Court on Monday made it easier for illegal aliens to seek political asylum in this country, ruling they need only show "a well-founded fear" of returning to their native country.

The Reagan administration had argued that applicants (or asylum seekers) should have to show "a clear probability" of persecution.

It remained unclear, however, whether the 6-3 ruling will lead to the granting of asylum for more illegal aliens because the ultimate decision remains with the attorney general. The verdict means only that more refugees are eligible for asylum consideration by him.

The court ruled in the case of a Nicaraguan woman living in Nevada who says the leftist Sandinistas would persecute her if she is forced to return to her native country.

In other actions, the court: —Ruled, by a 5-4 vote in a New Hampshire case that criminal suspects sometimes may be asked to give up the right to sue authorities

in return for having the charges against them dropped. —Said, in a new relaxation of the so-called "exclusionary rule," that evidence need not be excluded from a trial when police act under an unconstitutional law. —Declared, in a constitutional case, that the state's refusal of unemployment compensation denied the two men their freedom of religion.

The asylum decision was praised by the Rev. John Fife of Tucson, Ariz., a sanctuary movement leader convicted last year in a federal alien-suiting case. "It sounds like our position for six years has been vindicated by the Supreme Court," he said. "It sounds like a real setback for the current administration."

The Immigration and Naturalization Service declined comment until officials read the decision.

Justice John Paul Stevens, writing for the court, said "a well-founded fear" of persecution is easier for illegal aliens to demonstrate than "a

"gay pride" demonstrations and counter-protests from the sidewalk in front of St. Patrick's Cathedral.

—Said it will decide whether Oregon must pay unemployment benefits to two drug and alcohol abuse counselors for using payoffs during a religious ceremony. The Oregon Supreme Court said the state's refusal of unemployment compensation denied the two men their freedom of religion.

The asylum decision was praised by the Rev. John Fife of Tucson, Ariz., a sanctuary movement leader convicted last year in a federal alien-suiting case. "It sounds like our position for six years has been vindicated by the Supreme Court," he said. "It sounds like a real setback for the current administration."

The Immigration and Naturalization Service declined comment until officials read the decision.

Justice John Paul Stevens, writing for the court, said "a well-founded fear" of persecution is easier for illegal aliens to demonstrate than "a

clear probability" that persecution will occur.

"To show a well-founded fear of persecution an alien need not prove that it is more likely than not that he or she will be persecuted in his or her home country," Stevens said. "It is clear that Congress did not intend to restrict eligibility for (asylum) to those who could prove that it is more likely than not that they will be persecuted if deported."

The court in 1984 allowed the government to deport illegal aliens who fail to show a clear probability they will be persecuted in their homeland.

That ruling said that when Congress amended the immigration laws in 1980 it did not intend to make it easier for aliens facing deportation to remain in the United States.

But Monday's ruling allows more lenient treatment for asylum cases, which are covered by a different provision of the law than deportation.

# Koehler resigns as communications chief

WASHINGTON (AP) — After just one week on the job, John O. Koehler resigned as President Reagan's communications director Monday, saying that newly named White House chief of staff Howard H. Baker Jr. should be allowed to have his own team in top jobs.

Koehler was one of five senior officials appointed in the final days of Donald T. Regan's troubled tenure as chief of staff, but there was no indication of other changes immediately.

"I think everybody can assume their jobs are safe unless they hear otherwise," said presidential spokesman Martin Fitzwater, himself a recent appointee under Regan. Fitzwater has said he has been assured his job is safe.

While not ruling out further changes, Fitzwater said Baker "didn't indicate when or if, even, there would be more announcements along this line."

Other senior officials named shortly before Regan resigned under pressure Feb. 27 are political adviser Frank Donatelli, domestic affairs adviser Gary Bauer and Nancy Ritske, the secretary to the Cabinet.

Bauer, in a brief interview, said he met with Baker last week and came away with the clear impression he wanted to stay. Baker's job security likely is enhanced by his close ties to Republican conservatives, a group that Baker has indicated he does not want to alienate.

There was no immediate announcement of a new communications director.

# Teen-agers arrested in slayings of two priests

BUFFALO, N.Y. (AP) — Two teen-agers have been charged in the slaying deaths of two inner-city Roman Catholic priests who were slain 12 days and less than a mile apart. One of the young men confessed, police said Monday.

The deaths had prompted warnings that priests should not let strangers into their homes.

Investigators arrested Milton E. Jones, 17, in Buffalo late Sunday. Police Commissioner Ralph V. Degenhart said at a news conference.

The second defendant, Theodore Simmons, 18, also of Buffalo, was

picked up early Monday in California by San Diego police after information was obtained from his family on his whereabouts.

Homicide Chief Richard T. Donovan said robbery was the motive in the slayings of the Rev. A. Joseph Bissonette, 35, in the rectory of St. Bartholomew's Church on Feb. 24, and of Monsignor David P. Herlihy, 74, in the rectory at St. Matthew's Church. Herlihy's body was found early Sunday.

After his arrest, Jones "provided the homicide bureau with a confession to both priest murders," Degenhart said.

Simmons and Jones were each charged with two counts of second-degree murder, two of first-degree robbery, and third-degree criminal possession of a weapon.

Dennis Vacco, an assistant district attorney of Erie County, said he was filing papers to arrange Simmons' extradition.

Both priests had been stabbed repeatedly in the chest. The rectories are less than a mile apart on Buffalo's East Side.

"These were cold-blooded killers," Chief of Detectives Angelo P.

# Study says job programs successful

WASHINGTON (AP) — More than two-thirds of laid-off workers helped through the federal Job Training Partnership Act are being placed in new jobs with wages considerably higher than those under previous government job programs, according to the General Accounting Office.

GAO, in a 91-page report to Congress this month, said 66 percent of the dislocated workers reached under the program in 1985 were placed in jobs averaging \$6.61 per hour.

While the pay of the new jobs was significantly higher than that earned

by participants in other government job programs, it also was generally lower than the dislocated workers' prior wages and the average hourly scale of \$8.52 for all non-supervisory workers in 1985, the congressional watchdog agency said.

The 69 percent placement success rate compares favorably with 36 percent placement rate under the Work Incentive program aimed at helping welfare recipients find jobs and the 42 percent rate under the old Comprehensive and Employment and Training Act.

The Comprehensive Employment and Training Act was abolished in

1982 with the passage of the Job Training Partnership Act.

The new law shifted control of programs helping laid-off workers train for and find new jobs from the federal government to states and local "private industry councils."

The GAO, however, said the average \$205 million spent annually on the new law's assistance during the program's first three years enabled it to reach only 7 percent of the 2.2 million workers a year who lost their jobs to business closures or permanent layoffs.

# Group seeks federal plan for children

WASHINGTON (AP) — A child advocacy group on Monday proposed a five-year, multibillion dollar "Children's Defense Budget" it said was necessary to assure a productive U.S. workforce in future years.

The Children's Defense Fund said a major "preventive investment" is needed in proven federal programs for children and families in order to prepare youngsters for the 21st century.

More than 30 percent of our youths do so badly on skills tests that they would be turned down for enlistment in our armed forces, except in special circumstances," fund chairman Marian Wright Edelman said at a news conference.

"Yet in the president's budget priorities, by 1992, each American will be spending 52.4 percent more on the military and over 16 percent less on low-income families and children," she said. "No moral or sensible nation can dare write off a significant portion of its human capital."

Of today's 4- and 5-year-olds, Edelman said, one in four lives in poverty, one in five is at risk of becoming a teen-age parent, one in six lives in a family where neither parent has a job and one in seven is at risk of dropping out of school.

"Of every 100 children born today, she said, 20 will be born out of wedlock; 15 will be born into a household with no one working and 25 will be on welfare at some point before adulthood.

# Experts work on arms verification

WASHINGTON (AP) — The United States, moving to complete a proposed treaty eliminating medium-range nuclear missiles from Europe, summoned defense experts from five allied nations Monday to help devise a verification system to present to the Soviets.

Representatives from Belgium, the Netherlands, Britain, West Germany and Italy met at the State Department to study details of proposals the United States will make to the Soviets at Geneva arms talks.

The five countries invited to the talks are those providing sites for the U.S. intermediate-range missiles that would be eliminated under the proposed treaty.

Department spokesman Charles E. Redman said the participants discussed "verification provisions of an intermediate nuclear force draft treaty. These verification provisions obviously have a direct interest in the basing countries."

"Given the importance of verification we envision future meetings similar to today's, as needed," Redman said.

**Mudslides bury entire villages**

QUITO, Ecuador (AP) — Earthquake-spawned mudslides buried entire villages and killed hundreds of people in this Andean nation's remote eastern jungles, a provincial official said Monday. "There are hundreds of dead," Jorge Gonzalez, a senior administrator in Napo province, said of last week's disaster in a telephone interview with The Associated Press. "Medical attention is needed urgently for the injured."

He said he could not be more specific in his estimate of casualties, but several newspapers in the capital published unconfirmed reports that more than 300 people had been killed.

The United States was the first foreign country to provide assistance, officials said. Two U.S. Air Force planes arrived in Quito on Sunday carrying 50 tons of supplies. The U.S. Embassy said the supplies included 5,000 blankets and 500 tents that could shelter up to 3,000 people.

"Thousands were left homeless by the slides, which destroyed bridges, covered stretches of road and virtually cut off the affected area from the rest of the country."

"In the region of the epicenter, there are dozens of dead, villages entombed, buses filled with people buried by mud," said Ramiro Perez, director of education in Napo province.

The mudslides were caused by a series of several earthquakes, at least two of them very strong, that began Thursday night and continued Friday.

**Shamir says spy case closed**

TEL AVIV, Israel (AP) — Prime Minister Yitzhak Shamir said Monday he will not report to a Parliament committee on the Pollard spy case because the matter has been investigated enough and those involved have been severely punished.

Thousands were left homeless by the slides, which destroyed bridges, covered stretches of road and virtually cut off the affected area from the rest of the country.

Other Israeli officials demanded the resignations of those involved in hiring Jonathan J. Pollard when he was a U.S. Navy analyst and permitting the espionage operation, which has damaged U.S.-Israeli relations.

Pollard, 32, was sentenced last Wednesday to life in prison for selling Israel hundreds of classified U.S. military documents.

Four Israelis allegedly were involved in the spy ring, which Israel says the government did not sanction. A U.S. federal grand jury indicted one of the four, air force Col. Aviem Sella, on espionage charges last week.

Shamir said Monday on Israel radio: "I think that this affair, disclosed and made public 15 months ago, has been investigated enough. It is known to those responsible for such matters in the country, and I don't see any need to investigate further, and the majority of ministers" thinks like I do."

Right-wing Cabinet minister Ariel Sharon said Israel must "stand firm and not give in to any (U.S.) pressure."

"Israel has expressed sorrow for what it has done and by that has fulfilled its duty," he said on army radio.

**Demjanjuk's treatment blasted**

JERUSALEM (AP) — John Demjanjuk has been kept in a cold cell, watched constantly and deprived of his rights during interrogation, a lawyer defending the retired U.S. autoworker against Nazi war crimes charges said Monday.

Demjanjuk, 56, is accused of being the brutal Ukrainian guard known as "Ivan the Terrible" at the Treblinka death camp in German-occupied Poland, where 850,000 Jews were killed in 1942-43.

The defendant, born in the Soviet Union, claims he is a victim of mistaken identity. His lawyers contend that Ivan died in an uprising of Treblinka inmates in August 1943.

Mark O'Connor, Demjanjuk's American attorney, told the court his client was not told of his rights, was observed by three guards and was not given a heater for his cell because police believe he might try to commit suicide.

"They look at him 24 hours a day. He has absolutely no privacy or human dignity ... and nowhere to hide in that cell," O'Connor said of Demjanjuk's 13 months in Ayalon maximum security prison. Demjanjuk was extradited from the United States in February 1986.

O'Connor made the assertions while cross-examining Alex Ish-Shalom, head of a city court in Tel Aviv that questioned Demjanjuk more than 60 times in six months. Ish-Shalom confirmed the prison conditions but said he had no authority to change them.

Demjanjuk insists he became a prisoner himself at a Nazi camp near Treblinka after being captured in 1942 while serving in the Soviet army.

**Office recommends charges**

MANILA, Philippines (AP) — The government prosecutor's office recommended Monday that charges be filed against 11 soldiers and three former officials in the 1983 assassination of President Corazon Aquino's husband.

The recommendation was in a motion filed in an anti-corruption court, which is to decide whether to charge the 14 before a pre-trial hearing begins April 5. All 14 men worked for the government of ex-President Ferdinand Marcos.

Benigno Aquino, Marcos' chief political foe, was returning from self-imposed exile in the United States when he was gunned down Aug. 21, 1983, minutes after his plane landed at Manila Airport. Soldiers killed his alleged killer, Rolando Gaiman, immediately afterward.

The motion said 10 sergeants should be charged as principals in Aquino's slaying. It said Sgt. Clemente Casta Marcos' former personal guard, should be charged with "carrying out the common objective to assassinate" Aquino and Galman.

The prosecutor also recommended charges against former Tourism Minister Jose Aspiras, former Air and Transportation Minister Jesus Singson and "public information officer" Gregorio Centina.

The motion cited affidavits from waiters who said they heard the three discussing a "concerted action" to dissuade Aquino from returning to the Philippines.

**Syria, Iran on collision course**

BEIRUT, Lebanon (AP) — Syria appears to be on a collision course in Lebanon with Iran, where the Syrian army has cracked down on pro-Iranian Shiite Muslims.

Syria, which supports Iran in its war against Iraq, sent troops into west Beirut on Feb. 22 to end a week-long factional war in the Muslim sector and killed 23 members of the radical Shiite group Hezbollah (Party of God) two days later.

Iran's new ambassador, who arrived over the weekend, called the killings an "unjustified, ugly crime (that) serves American imperialism and Israel."

Thousands of people turned out in the city's heavily Shiite southern neighborhoods Saturday to welcome Ambassador Ahmad Dastmalchian, 30. Banners waved in the crowd and sheep were slaughtered for the occasion.

**Irish emigration skyrocketing**

DUBLIN, Ireland (AP) — High taxes, shrinking job prospects and a new-found cosmopolitan spirit are fueling the biggest wave of emigration this island republic has experienced since the 1920s.

In January, when the U.S. government offered an extra 10,000 immigration visas worldwide on a first-come, first-serve basis, the Irish swamped Washington with 100,000 applications. They won 3,112 visas, the most of any country.

The outflow of people is nothing new in Ireland, with its high birth rates and meager natural resources. In the Great Famine of 1845-49, nearly 1 million fled to North America and even after independence from Britain 65 years ago it averaged 22,000 a year until 1930.

But after the booming 1960s, emigration is back to an estimated 25,000 to 30,000 a year out of a population of 3.5 million as unemployment approaches 20 percent.

**Salvage crews prepare to right British ferry**

ZEBBRUGGE, Belgium (AP) — Survivors and "victims' relatives joined in an ecumenical prayer service Monday for those who died when a water rushed through a British ferry three days earlier and turned it on its side.

Salvage crews prepared in the partially submerged vessel to be used as a sandbar. More than 130 people are thought to have died in the shipwreck. Olivier Vanneste, governor of West Flanders province, said one more survivor had been located: someone who escaped the disaster but did not report to authorities immediately.

From inside, The Herald of Free Enterprise, which capsized Friday and presumed dead. Vanneste said night while leaving Zeebrugge harbor for Dover, rests starboard-side on a sandbar. More than 130 people are thought to have died in the shipwreck. Olivier Vanneste, governor of West Flanders province, said one more survivor had been located: someone who escaped the disaster but did not report to authorities immediately.

Transport Minister John Moore of Britain said Monday in Parliament that a public inquiry will be conducted into the disaster and the government will donate 1 million pounds (\$1.5 million) to the survivors and families of the dead.

Paul Ellis, spokesman for the Townsend Thoresen line that owns the ship, announced a plan beginning Monday night, to return bodies to Britain by ferry. Most of the dead were British.

It's free, no driving, no fuss.

**IT'S CACTUS PETE'S FABULOUS FUN BUS!**

Round up your friends, there's a fun new way to get to Cactus Pete's — FREE!

Get a group of 30 or more together and we'll provide free round-trip charter bus transportation from The Magic Valley to Jackpot. Just sit back, enjoy the ride, and let us take care of the driving. You don't pay a penny! Plus, everyone in your party will receive \$9 in gaming and merchandise coupons upon arrival. What are you waiting for? Organize your Free Fun Bus to Cactus Pete's today! **Diet Pill System Sweeping U.S. Super Dream Pill Guaranteed Weight Loss**

SALT LAKE CITY, UTAH — An amazing new Super Dream Pill System has recently been perfected that guarantees rapid weight loss. Best of all, it allows you to eat your favorite foods while losing weight from the very first day until you achieve your ideal weight and figure.

The Dream Pill System features the extraordinary Dream Pill. The Dream Pill combines natural substances L-arginine, L-lysine and L-ornithine which can stimulate the body's production of growth hormone. Dr. Robert Harris, a specialist in nutritional medicine was recently quoted as explaining: "Growth hormone may be what's responsible for allowing teenagers to down thousands of calories in hamburgers, and other foods and still be thin as a rail."

"Growth Hormone is present in people up through the teenage years, then slowly diminishes with age. But L-arginine and L-ornithine make the body 'think' it belongs to a teenager again, allowing adults to eat as much as they want — and still be thin and wiry."

**Life Extension Authors Confirm Results**

Durk Pearson and Sandy Shaw, graduates of MIT and UCLA respectively, introduced these miracle substances to the public in their runaway best selling book, *Life*

Extension. They discovered the weight-loss effect by accident. Sandy fell and broke her foot and started taking L-arginine because of its well-known healing qualities. Much to her amazement Sandy lost 25 pounds of fat and put on 5 pounds of firm-toned muscle in six weeks. According to Durk's calculations, the pill caused Sandy to lose 400 times as much fat as she would otherwise have lost — without dieting!

**Extraordinary Guarantee**

Place your order now. If you are not completely satisfied with the thinner "new you" simply return the empty container within 45 days for a full refund of your entire purchase price. No questions asked. Now what could be fairer than that?

You can order the Dream Pill System and a 30 day supply of remarkable Dream Pills for \$19.95 or a 60 day supply for \$34.95 (plus \$3 handling and shipping).

To order simply call Dream Pill 24 hours a day, 7 days a week. TOLL FREE: 1-800-321-6208 and use your VISA or MasterCard. Dream Pill will also accept C.O.D. orders right over the phone! But please don't wait. Order today. You won't risk a thing. Either you get a slender new you — or you get a full refund of your purchase price. 1-800-321-6208

Usitalo big reason for BSU success

By STEVE CRUMP
Times-News sports editor

DOUG USITALO
3rd in nation in steals

BOISE — As Boise State University Coach Bobby Dye tells the story, he knew he was on to something with point guard Doug Usitalo...

"I used to put him in during practice and he'd just totally disrupt our offense," says Dye. "It was hurting our confidence, so I kept having to take him out..."

steals with 97 through 28 games. "He's the premier point guard in the conference," says University of Idaho Coach Tim Floyd...

The evidence of what he can do are most evident in the Broncos' offensive statistics. Through the regular season and its Big Sky Conference tournament loss to Idaho State last Thursday, Boise State averaged 73.8 points per game, outscored opponents by a whopping 11.7 points, on the average, shot 49.7 percent from the field and stole the ball five times a game more often than it turned it over...

game, was outscored by 3.5 points a game, shot 46.5 percent from the field and had a takeaway-to-giveaway ratio of 1.3. "He's made Boise State's offense more productive because he's taken the pressure off (sophomore off-guard Chris) Childs," says Idaho State Coach Jim Boutin...

ly, he's not a bad shooter, but his assets are quickness and competitiveness. He came to camp I gave when he was in the ninth grade. He was about 5-4 then, and I told him I was going to recruit him one day. He's a great defensive player and a tireless worker..."

Luckily for both Usitalo and Boise State, he found a program where overplaying the basketball is part of the canon. "I think a lot of our offensive success this year has come from our defense," says Usitalo. "Our defense depends on putting pressure on other teams and forcing them to make mistakes. When you're only giving up 40 or 50 points a game, you've got an opportunity..."

See USITALO on Page B2

MSU faces Washington in Bozeman

NIT offers Bobcats 2nd chance

The Associated Press

BOZEMAN, Mont. — It's a long way from Bozeman to the Big Apple, but the Montana State Bobcats hope that's where their 1986-87 season will end.

"New York. It's the place to be," said junior guard Ray Willis after Montana State was one of 32 teams selected for the opening round of the National Invitation Tournament.

If the Bobcats can win three games, they'll make the NIT's Final Four and play in Madison Square garden March 24.

Montana State will play Washington at 7:30 p.m. Wednesday in Bozeman, and the players are viewing it as their chance to redeem themselves from losing to last-place Weber State in the opening round of the Big Sky Conference tournament last week in Flagstaff.

A 106-101 defeat cost the Big Sky Conference regular season champions a chance at their second straight appearance in the NCAA tournament.

"I didn't want it (the season) to be over," said Kral Ferch, a forward and Montana State's lone senior. "I didn't want to go out like that; I wanted to go out on a good note."

"I don't know if we can play any worse than we did against Weber so I'm looking forward to coming back and giving it our best shot."

"It's a chance to redeem ourselves," added Willis. "If the season was going to end, we didn't want it to end on that note, playing like we did against Weber State."

Most of the Bobcat players weren't surprised by the call from the NIT on Sunday.

"I was pretty sure, but there's always that fear. It's nice that we got picked," said Shawn Ferch, a sophomore guard and Kral's brother. "As far as the NCAA, Stu (MSU Coach Stu Starnier) discounted any of our hopes. But I think it (the NIT) is a good second chance, even if we don't win, to at least go out with a better night."

The news of the NIT bid was a relief to sophomore forward Calvin Andrews. "I feel good now," he said. "My goal was to play post-season ball all four years here. After that Weber game I was pretty disappointed. I thought 'There it goes, down the drain.'"

Andrews, who was part of MSU's NCAA team last year, can now keep his post-season string alive and also fulfill another wish. "I always wanted to play against a Pac 10 team, not necessarily to compare leagues but just for a chance to go up against that type of school to see how strong we are," said the Richmond, Calif., native.

"It's a good opportunity to extend our season with some good post-season play," said junior guard Chris Conway. "It should be good experience for the team, playing a nationally-known opponent."

Sophomore center Mike Fellows said it will be "awesome" playing a team like Washington, and Willis said he's excited at the prospect of another post-season. "It's an experience, just like last year," he said. "We might as well test some new ground at the NIT."

Washington, which accepted an NIT invitation Monday, Johns Stephen F. Austin in rounding out the NIT field; the latter school chosen after Louisville spurned a NIT invitation.

Bengals to 'slow down' for UNLV

By The Times-News

Idaho State University basketball Coach Jim Boutin chose to look at the bright side Monday of his team's impending encounter with top-ranked Nevada-Las Vegas Thursday in the first round of the NCAA Western Regional Tournament.

ISU, which won the Big Sky championship in Flagstaff, Ariz., Saturday, will meet the 33-1 Runnin' Rebels, the top seed in the Western Region, Thursday afternoon in Salt Lake City's Special Events Center in the tournament's first round.

"I think we'll represent the Big Sky well in the playoffs," said Boutin. "We'll slow down the tempo and work for good shots."

"I think we're a better team than our record shows," continued Boutin, whose Bengals went into the Big Sky

tournament seeded seventh and came out with a 15-15 record along with the league championship. "I'd like to think we do belong in the NAAs. We played almost a perfect game against Reno (in the league championship game)."

Meanwhile, Boise State sold 7,000 tickets Monday for Wednesday's first-round National Invitation Tournament game against the University of Utah. The game is scheduled for 7:30 p.m. in the 12,220-seat Pavillion.

Magical Valley residents can purchase tickets for the game by telephone by using a Visa or Mastercard. Ticket prices are \$8 for adults, \$5 for BSU students and \$4.50 for youngsters, plus \$1-per-ticket telephone charge. The number is 385-1766.

The BSU ticket office will be open today from 8 a.m. to 8 p.m. and Wednesday from 8 a.m. until 4:30 p.m.

Rigmania
Upper Snake Valley town
passionate over A-1 Trojans

By MARK WARRIS
The Associated Press

RIGBY — In a state where high school basketball usually is just a minor sport, Rigby, Idaho, is a town possessed. The cramped cinder-block gymnasium in this Upper Snake Valley community has erupted with excitement as a frequent flyer's suitcase for every boys home game. Hundreds of fans, of all ages, are turned away at the door.

"If you don't get there by 6:30, you might as well not go," said LaPrad Hinckley, who heads the Rigby High School Booster Club with her husband Guy. The Hinckleys' son Theron is on the team. But in Rigby, you don't have to be related to be a booster.

The club has sold its 25 reserved seats at midcourt each of the past two years, at \$25 each, plus the price of admission. "We've got people who are 70 and 80 years old who are going to these ballgames who don't have kids or grandkids in there but they just love it," Mrs. Hinckley said. "He works those boys hard and are there and we have to share them, and we're glad to."

Rigby won the class A-2 state championship in 1986. It was the sixth A-2 title in 10 years for the Trojans and head coach Elliot Anderson, a coaching man who is an "intense" style reminiscent of Indiana University's Bobby Knight. Anderson's friend and fishing companion.

This season, Rigby was moved up to the large-school A-1 division, which includes such behemoths as top-ranked Lewiston, a school with almost as many students as Rigby has people. "It wasn't a popular decision with local residents, many of whom saw it as a conspiracy to end their team's domination of A-2 opponents."

Anderson's coaching credo is "But shed no tears for the Trojans. With an 20-4 record heading into the playoffs, Rigby was ranked third by Idaho sportswriters and broadcasters in the final Associated Press A-1 poll of the season. No Idaho prep basketball team has ever won a state championship, then stepped up a bracket and won again the following year. But if it can be done, Rigby and Anderson might be the ones to do it."

A strong work ethic is central to Anderson's coaching credo. Occasionally a player will ball out, but in a town where indoctrination to the basketball system begins with Anderson's summer clinics as early as the third or fourth grade, intensity often becomes second nature. "He works those boys hard and puts them under tremendous pressure, but he prepares them not only for basketball, but for life," Mrs. Hinckley said.

In Rigby, basketball is life. At least it seems that way on game nights, when the 31-year-old gym is a "intense" style reminiscent of Indiana University's Bobby Knight. Anderson's friend and fishing companion. The gym's creating bleachers extend practically onto the court,

ELLIOT ANDERSON
300 wins and counting

and the close-range epithets hurled at referees often take on the quality of profanity, including the use of first names. There is the almost obligatory technical foul — on Anderson, which is protested loudly by fans who know that after 17 years and about 300 victories, their coach can do no wrong.

"He's a great coach, a great draw for the fans," Mrs. Hinckley said. "People come just to see his professionalism." The feeling is mutual. And although Anderson said he would consider an offer to coach at the college level if the right one came along, he's not exactly beating the bushes.

"I really enjoy Rigby because we've got great fan support and we've had such great players," he said, pointing with pride to the fact that 15 of his 15 players are on the honor roll.

About a dozen of Anderson's past players have gone on to play college basketball, including current Brigham Young University center Tom Gnetting and Ricks College guard Trent Shippen. The old gym where all that tradition was established has seen its last game. Students conducted a mock funeral last month. A new high school is being built with a gym that will be able to hold more than 3,000 Trojan faithful.

Nobody doubts it will be just as packed or that Rigby and Anderson will continue to crank out some of the best basketball teams in Idaho.

Holston All-Big Sky a 2nd time

The Associated Press

BOISE — Idaho State senior Donn Holston was named for the second straight season and Montana State junior Tom Domako was a unanimous selection on the Big Sky Conference all league basketball team announced Monday.

The Big Sky Conference eighth head basketball coaches selected the all-conference team but were not allowed to vote for their own players.

Joining Holston and Domako on the first team were Weber State senior forward Harry Willis, Nevada-Reno junior guard Boris King and Boise State sophomore guard Chris Childs.

Holston, a 6-foot, 5-inch native of Pocatello, made the team for the second straight season, the 19th player in Big Sky history to be so honored. He averaged 18.8 points a game this season and helped lead Idaho State to the Big Sky title by winning last week's post-season tournament and a berth in the NCAA tournament against top-ranked Nevada-Las Vegas on Thursday.

Holston averaged 3.5 rebounds and made on every coach's ballot. Domako, a 6-8 junior from Livonia, Mich., led the Big Sky in scoring during the regular season with a 20.5 point per game average on his way to unanimous selection.

Domako shot over 50 percent from the field and led the Bobcats in three-point field goals with 56. He was named Big-Sky Conference player of the week four times this season.

Willis, a 6-8 senior from Stockton, Calif., led the Big Sky in rebounding

-DONN HOLSTON
Averages 18.8 points a game

CHRIS CHILDS
Back for 2 more years

with 10.4 per game. He also averaged 14.6 points a game and led the Big Sky in blocked shots with 32. The 27-year-old father of four was his team's leading shooter at nearly 52 percent.

King, a 6-2 junior from Palm Springs, Calif., averaged 18.5 points per game for the Wolf Pack this season. He transferred to UNR from College of the Desert and Cal-Intwine. King was among the league leaders in just about every individual statistical department.

Childs, a 6-3 sophomore from Bakersfield, Calif., is the eighth sophomore in Big Sky history to be named to the first-team. He's the first since the 1983-84 season when

Montana's Larry Krystkowiak was selected. Childs averaged 15.4 points per game, led his team in free throw percentage at 84.3 percent, hit 42 three-point shots and averaged 2.2 steals per game.

Members of the second team were Boise State forward Arnell Jones, Montana guard Scott Zanon, Montana State forward Kral Ferch and guard Ray Willis, and Northern Arizona forward David Duane.

Given honorable mention were Jeff Kelley and Doug Usitalo of Boise State, Andrew Jackson and Ken Lockett of Idaho, Wayne Tinkie and Steve Vaneek of Montana and David Wood of Nevada-Reno.

Poor cousin ISU shakes Big Sky with tourney triumph

I got a story, ain't got no moral
The bad guy wins every once in a while
— Billy Preston

Idaho State University's basketball team, described by others in the Big Sky Conference with epithems like "overachievers" and "non-predictors," poked a finger in the eye of the Big Sky last weekend when it won the league's tournament in Flagstaff, Ariz.

The Bengals, seeded seventh in the eight-team tourney, will now take their 15-15 record into the NCAA tourney, where they will face top-ranked Nevada-Las Vegas in Salt Lake City on Thursday.

It's a great story, as much for what it says about the rest of the conference as for what it says about the Bengals. Idaho State, last in state funding, last in athletic budget and last in size of media market, is frequently regarded with discreet disdain by the better-heeled members of the Big Sky.

Idaho State is the school that takes football players that Idaho and Boise State

Steve Crump

rent members of the league. In the recent past, Idaho State's basketball program has had trouble shooting straight. The Bengals spent a year on NCAA probation for recruiting violations committed by a coach — Jim Boutin's predecessor Wayne Ballantyne — who compiled a 37-35 record at the school. ISU gave up Chris Blocker, who had made the conference all-tournament team as a freshman, to the College of Southern Idaho as a sophomore and to Texas-El Paso as a junior. It missed the chance to host a first-round tournament game during the 1983-84 season because it had to forfeit a conference game for scheduling more than NCAA rules allow.

This year, the Bengals even had trouble winning in the Mindome — one of the most feared venues around the Big Sky for its ferocious, vocal fans and the deceits they produce.

Never mind, Jim Rhode, Toros Yetenikan, George Davis, Gordon Bean, Troy Miles — all too small or too slow to play Division I basketball — to make better

players on better teams look foolish in Flagstaff, while the one legitimate star of the team, senior forward Donn Holston, conducted a clinic for Boise State, Idaho and Nevada-Reno on the dribble drive and the three-point shot.

Behind it Boutin, a straight-arrow 44-year-old coach with a Ph.D. in education who spent 15 years laboring in the thankless precincts of NAIA basketball. Former ISU Athletic Director Babe Caccia hired him to clear up the mess left by Ballard. In this first season, Boutin produced ISU's first winning record in five years and in his second the Bengals' first conference championship in 10.

Boutin preaches hand-in-the-face, pass-it-once-more defense and distains gunners, which has brought him into conflict more than once with Holston, the Big Sky's sixth-leading all-time scorer. Still it's a mistake to think ISU could have come as far in the last two years without Holston, who is quiet, intensely self-critical and absolutely fatal from 15 feet.

It's a far cry from the last ISU team that

went to the NCAA in 1977, led by 7-foot Steve Hayes, 6-10 Jeff Cook and the irrepressible Jim Killingsworth, now head coach at Texas Christian University. The only similarity is the Bengals' what-have-we-got-to-lose attitude.

The story made the rounds after ISU upset UCLA 19 years ago in the first round of the NCAA Western Regional that Killingsworth caught a timeout with his team holding a precarious lead in the second half. The youngster charged with keeping an eye on Marques Johnson came back to the bench wide-eyed and reportedly said, "I'm guarding the best college basketball player in the country. I'm not good enough to do that!"

Killingsworth allegedly looked up, smiled and replied, "I know, son, I know."

As the rest of the Big Sky can attest this Tuesday morning, Jerry Tarkanian had no fury like a basketball team with nothing to lose and something to prove.

Steve Crump is the sports editor of The Times-News.

# Injury knocks Series winner Hurst out in 3rd; Cards move to 3-0

The Associated Press  
 WINTER HAVEN, Fla. — Boston left-hander Bruce Hurst, who won two games in the 1986 World Series, left the mound in the third inning Monday when he felt "a twinge" in the groin area during an exhibition game against Philadelphia, won by the Red Sox 4-2.

Hurst, who missed seven weeks last season because of a pulled groin muscle, walked off the mound after walking Gary Redus to start the Philadelphia third.

With the scored tied 2-2 in the eighth, Boston's LaSchele Tarver lined a single to left and Dave Scahill for Don Baylor sacrificed. Todd Benzingler walked on four pitches and Mike Greenwell followed with a double to right-center field scoring Tarver. After Benzingler was thrown out at the plate trying to score on a grounder to short, Glenn Hoffman lined a single to left, scoring Benzingler.

ST. LOUIS 12, DETROIT 0  
 ST. PETERSBURG, Fla. — Andy Van Slyke homered again, doubled to help St. Louis beat Detroit.

St. Louis, improving its spring record to 3-0, received a combined five-hitter from starter Danny Cox and relievers Rick Horton, Gregg Bargar and rookie Scott Arnold. Cox, who suffered a hairline fracture of his right ankle near the end of 1986 spring training, struck out one and walked none.

LOS ANGELES 6, BALTIMORE 3  
 Los Angeles' Brad Wellman and Mike Scioscia drove in two runs each as Los Angeles beat Baltimore and dealt the winless Orioles their third straight defeat.

Len Matuszek hit a solo home run for the Dodgers, while Mariano Dun-

can had a run-scoring sacrifice fly in addition to contributing a double and a triple.

CINCINNATI 17, PITTSBURGH 5  
 Bradenton, Fla. — Terry Francona hit a two-run homer and Curt Stillwell collected two hits and scored two runs as Cincinnati defeated Pittsburgh by sending 10 men to bat and scoring six runs in the eighth inning to erase a 2-1 Pirate lead.

MONTREAL 19, HOUSTON 3  
 KISSIMMEE, Fla. — Luis Rivera and Andre Galarraga drove in five runs each to pace Montreal's rout of Houston. Bill Moore, Dave Engle and Altonzo Powell each had three hits to aid in the Expos' 21-hit attack.

The Expos scored 18 runs on 17 hits through the first four innings against Astro pitchers Bob Knipper and Jeff Heathcock.

TORONTO 12, NEW YORK METS 11  
 DUNEDIN, Fla. — Rookie catcher Matt Starik drove in five runs as Toronto scored 11 runs in the first three innings off left-hander Fernandez — including seven in the third — in sending New York to its third straight exhibition defeat without a victory.

ASU, SEATTLE 3  
 SAN DIEGO 7, SEATTLE 5  
 TEMPE, Ariz. — Senior shortstop Mike Benamini hit two solo home runs and senior first baseman Tom Mattia hit a solo shot as Arizona State beat the Seattle.

And Mark Parent and Stan Jefferson doubled to key a two-run inning as San Diego beat a Seattle split squad.

Parent led off the inning with a double off pitcher Rich Monteleone, who then made a wild pickoff throw to second, allowing Parent to reach third base.

Joey Cora put the Padres ahead 6-5 with a sacrifice fly to right, and Jefferson followed with the second double of the game. Shawn Abner drove Jefferson home with a two-out single.

SAN FRANCISCO 11, CLEVELAND 6  
 CHICAGO CUBS 5, CLEVELAND 4  
 OAKLAND 8, SAN FRANCISCO 1

SCOTTSDALE, Ariz. — Rookie third baseman Matt Williams drove in five runs with a grand slam and a single to power San Francisco over Cleveland. Williams, the club's No. 1 draft choice last year, hit his home run in a four-run fourth inning, breaking a 6-6 tie.

While in Mesa, Ariz., pinch-hitter Jody Davis' one-out, bases-loaded double in the bottom of the ninth lifted Chicago over a Cleveland split squad.

Pinch-hitters Thad Bosley and Jerry Humphrey singled with one out in the ninth before pinch-hitter Ryne Sandberg was hit with a pitch from lesser Mike Murphy to load the bases for Davis.

Cub starters Rick Sutcliffe, Dennis Eckersley and Steve Trout combined for seven innings without giving up an earned run.

At Phoenix, Ariz., Moose Hoas pitched three hits, including two to second, allowing Brandon David Giants pitchers for 14 hits, including

five during a four-run sixth.

First baseman Bob Nelson, one of four A's with two hits, hit a solo homer off Jeff Robinson in the eighth.

MILWAUKEE 8, CALIFORNIA 5  
 CHANDLER, Ariz. — Cecil Cooper's three-run homer during a

five-run seventh inning broke a 5-5 tie and lifted Milwaukee over California. Cooper had four hits in the game.

Juan Castillo, who will open the regular season at second base for the Brewers if Jim Gantner isn't back from knee surgery, singled in a run in the third inning and also tripled and scored in the fifth.

MINNESOTA 5, NEW YORK 4  
 FORT LAUDERDALE, Fla. — Pinch-hitter Tim Laudner hit a three-run homer off New York reliever Dave Rightt in the ninth inning lifting Minnesota over New York.

The Yankees scored all their runs in the first three innings of Mark Portuga, including Dan Pasqua's three-run homer in the first.

CHICAGO SOX 4, TEXAS 3  
 PORT CHARLOTTE, Fla. — Orville Guillen and Jerry Royster singled home seventh-inning runs to help Chicago beat Texas.

Frank Pastore, invited to the Rangers' big-league training camp on Saturday, made his Texas debut to start the seventh and gave up successive singles to Ivan Calderon, Tim Lulett and Guillen, tying the score at 3-3. Royster's single scored the fourth run.

ST. LOUIS 12, DETROIT 0  
 ST. PETERSBURG, Fla. — Andy Van Slyke homered again, doubled to help St. Louis beat Detroit.

## Home opener today against BYU JSB CSI starts 1987 campaign with a split

By The Times-News  
 ONTARIO, Ore. — The College of Southern Idaho's baseball team opened its 1987 season here Saturday with a non-conference doubleheader split with Treasure Valley Community College.

The Eagles won the opener 10-8 behind three-run homers by freshman catcher Chris Hanks and sophomore third baseman Jeff Moe. They dropped the nightcap 11-6, giving up six unearned runs in the process.

CSI will open its home season this afternoon at 1-1 at Frontier Field with a scheduled twinbill against the Brigham Young University junior varsity. Sophomore right-hander Jason Adams will pitch the opener, while sophomore right-hander David Carter will work the nightcap.

at the plate with three RBIs. Sophomore Kirk Slater went 3-for-4 for the Eagles.

In the second game, TVCC pushed across four runs in the second and five in the third to doom CSI, which committed five errors for the game. Offensively, the Eagles slammed 12 hits, but three Chuck pitchers scattered just six runs.

Kophs went 3-for-3 at the plate in the second game, ending the day with five RBIs. Moe went 2-for-3 and Hanks 2-for-4.

CSI 10, TVCC 8  
 TVCC 11, CSI 6

CSU, SEATTLE 3  
 SAN DIEGO 7, SEATTLE 5  
 TEMPE, Ariz. — Senior shortstop Mike Benamini hit two solo home runs and senior first baseman Tom Mattia hit a solo shot as Arizona State beat the Seattle.

And Mark Parent and Stan Jefferson doubled to key a two-run inning as San Diego beat a Seattle split squad.

Parent led off the inning with a double off pitcher Rich Monteleone, who then made a wild pickoff throw to second, allowing Parent to reach third base.

## Usitalo

Continued from Page B1  
 a lot of points and win a lot of games.

Through a season that was marked by a two-week bout with the flu and a series of leg and ankle injuries, Usitalo has averaged 67.7 points a game, hitting a more-than-respectable 53.9 percent of his field goal attempts. But he's only shot the ball 123 times in 48 games — or about a third as much as Chiles; last year's third guard who is now BSU's primary offensive weapon. Usitalo ranks seventh in the Big Sky in points with an average of 4.2, but that's less than half of other starting point guards in the conference.

"I'd like to see him get a more solid concept of the offense and controlling the game," says Dye. "I'd like to see him take more responsibility for the offense."

take better care of the basketball (Usitalo ranks sixth in the Big Sky in turnovers) and develop his outside shot.

Defensively, Dye would like very much for Usitalo not to change a thing.

"I don't know that I've ever seen a player with a better combination of quickness and anticipation," Dye says.

Usitalo says the steals didn't come as a surprise to him this year, but that playing defense is a lot harder work in the Big Sky than it was back at Edmunds.

"In high school and in junior college you can just react," he says. "You can't do that here. You have to anticipate, to set up the offense. A lot of it is just observation and homework. You see a team play once and you remember who to expect."

For that reason, both Usitalo and Dye believe Usitalo's redshirt season was a godsend.

"We knew pretty much all along he was going to be our point guard this year," says Dye. "There's no better training for a point guard than having him in the program for a year."

"When you've been around for a year, you know what he takes to win," says Usitalo.

"I can't help but thinking that's been a big plus for him this year," says Kingsbury. "He learned the system, and he's become a dominating defensive player in that conference. Boise State was lucky to get him. Twenty-four hours later and (the University of) Washington would have signed him."

In short, Usitalo was something of a steal for the Broncos.

POGATELLO — The College of Southern Idaho on Saturday had two more athletes qualify for the national junior college indoor track and field championships during the Intermountain Indoor Championships at the Idaho State University Midvale.

Tom Schulte, a freshman from Kimberly, was the men's 400-meter dash in a time of 48.75 seconds, just ahead of teammate Charles Tennant, a freshman from Buhl, in 49.02. Both earned the right to compete in the quarter mile in the National Junior College Athletic Association Indoor Championships, which start next Friday in Warren, Mich.

Tennant also won the men's 800 meters in a time of 1:56.5; he's headed for the indoor nationals in that event.

Teresa Wright, a sophomore from Kimberly, won the women's 400 in 52.73 seconds in the women's 400-meter dash for nationals in the event.

CSI also got a pace-setting 3:20.79 performance out of its men's 4x400-meter team of Schulte, Tennant, Ken Rainge and Rob Barlow and a 4:08 out of its women's. She had already qualified for nationals in Rainge, Rhonda Ferkovich, Oralla Castaneda and Debbie Espino, which was good

## 2 more Eagles qualify for nationals

By The Times-News  
 POGATELLO — The College of Southern Idaho on Saturday had two more athletes qualify for the national junior college indoor track and field championships during the Intermountain Indoor Championships at the Idaho State University Midvale.

Tom Schulte, a freshman from Kimberly, was the men's 400-meter dash in a time of 48.75 seconds, just ahead of teammate Charles Tennant, a freshman from Buhl, in 49.02. Both earned the right to compete in the quarter mile in the National Junior College Athletic Association Indoor Championships, which start next Friday in Warren, Mich.

Tennant also won the men's 800 meters in a time of 1:56.5; he's headed for the indoor nationals in that event.

Teresa Wright, a sophomore from Kimberly, won the women's 400 in 52.73 seconds in the women's 400-meter dash for nationals in the event.

CSI also got a pace-setting 3:20.79 performance out of its men's 4x400-meter team of Schulte, Tennant, Ken Rainge and Rob Barlow and a 4:08 out of its women's. She had already qualified for nationals in Rainge, Rhonda Ferkovich, Oralla Castaneda and Debbie Espino, which was good

enough for third place.

The Eagles had two second-place individual finishes at the Intermountain Championships in Rainge, a freshman, in the 66-meter dash (7:07), and Ferkovich, a freshman, in the women's 800 (2:23.2).

Freshman Robert McGovern placed

ed fifth in the men's 3,000 (16:49.6), while sophomore Clifford Hudson was sixth in the triple jump (45-46, 5'3, inches).

In all, CSI turned in 11 season-best performances at the Intermountain Championships, plus four personal bests, and a school record in Schulte's 48.75 quarter mile.

Five CSI women have qualified for the national indoor meet in eight events, while two men have qualified in three events.

Track and field  
 enough for third place.

The Eagles had two second-place individual finishes at the Intermountain Championships in Rainge, a freshman, in the 66-meter dash (7:07), and Ferkovich, a freshman, in the women's 800 (2:23.2).

Freshman Robert McGovern placed

# Runnin' Rebels unanimous No. 1 headed into hoop tourney

By The Associated Press

Once-beaten Nevada-Las Vegas, the No. 1 seed in the NCAA tournament's West Regional in Salt Lake City, was the unanimous choice Monday as the nation's top college basketball team in the final points.

the ranking most of the season," Coach Jerry Tarkanian said. "I think the kids deserved it because they played super West basketball in Los Angeles last week." They won the Pacific Coast Athletic Association tournament with victories by 35, 34 and 24 points.

"We know the rankings won't mean that much when the regionals begin because that's where we've got to prove ourselves all over again." The Runnin' Rebels, who used the 3-point goal to their advantage all season, meet Idaho State in the first round of the NCAA tournament Thursday at Salt Lake City.

"If the ball bounces right for us, I feel we have a chance this year," Tarkanian said. "We play real good defense. Our intensity and

our defense have just been super. If we snoot well, we'll be OK."

The UNLV Rebels, 33-1, received all 65 first-place ballots and 1,300 points from the nationwide panel of sportswriters and broadcasters. During the season, they were ranked No. 1-12 times, including the final six weeks.

North Carolina, Indiana and Georgetown, the other top seeds in the NCAA tournament, were second through-fourth in the final poll.

DePaul wound up No. 5 and Iowa No. 6, the same spots they held last week.

Purdue, 24-4, dropped from third to seventh after losing the regular-season finale 104-68 to Michigan.

## New tax law changes patterns, holds January borrowing down

WASHINGTON (AP) — Americans took out \$536 million more in consumer debt than they paid off in January, up only slightly from an "extremely small" December increase, the government reported Monday.

Analysts said the weakness in both months stemmed in part from changing borrowing patterns brought on by the new tax law.

The Federal Reserve said consumer installment debt advanced at an annual rate of 1.1 percent in January after a gain of \$144 billion in December, which had been the smallest monthly increase in six years.

By contrast, installment debt climbed 10.5 percent for all of 1985 as Americans borrowed heavily to finance purchases of cars and other big-ticket items.

Part of the slowdown the past two months was attributed to changes in the tax law, which phases out deductions of interest payments for anything but home mortgage loans.

Credit card debt fell by \$366 million in January after a December increase of \$552 million while the

category which includes cash loans from banks dropped by \$250 million after a huge \$2.44 billion decline in December.

The Federal Reserve report on installment borrowing does not cover loans secured by real estate, such as home mortgages and home equity loans, but consumers have been turning to it in order to qualify interest payments for tax deductions.

"Consumer borrowing for car loans rose by \$1.02 billion in January, down from a December advance of \$2.06 billion.

Sandra Shaber, an economist with the Futures Group, an economic management firm in Washington, said that the slower growth in consumer credit provided further evidence that consumers, burdened with high levels of debt, will not be spending as much in 1987.

"People are borrowing less because of the economic environment," she said. "Pen-up consumer demand has been exhausted, the overall economy is sluggish and personal income growth has been meager."

## Chrysler to acquire stock of ailing AMC

DETROIT (AP) — Chrysler Corp. announced Monday it has agreed to buy out Renault's interest in ailing American Motors Corp. and to buy all outstanding AMC shares for a total of \$757 million in cash and stock.

The No. 3 automaker also would assume \$767 million in AMC debt, said Chrysler spokesman John Guiniven. The deal must be approved by the U.S., French and Canadian governments, by the three corporations' boards and by AMC stockholders, but analysts saw few obstacles to approval.

"For Chrysler, the attractions are Jeep, the best-known automotive brand name in the world; a new, world-class assembly plant at Brampton, Canada, and a third distribution system giving us access to a larger market," said Chrysler Chairman Lee Iacocca.

Under the terms of a letter of intent signed by Chrysler and Renault, Chrysler would trade \$522 million of its stock for outstanding AMC shares, give Renault a \$200 million, 10-year, 8 percent note for its AMC interest and pay Renault \$45 million in cash, said Chrysler Vice President James Tully.

Chrysler also agreed to a payment ranging from zero to \$350 million to Renault based on future AMC profits and sales.

## Stocks suffer sharp setback

NEW YORK (AP) — The stock market suffered its biggest setback in more than six weeks Monday, yielding to sellers after last week's rise to record highs.

But a fresh round of takeover developments kept the bull-market pebble bubbling.

The Dow Jones average of 30 industrial stocks dropped 20.11 to 2,260.12, for its biggest one-day point loss since it fell 44.15 in a wild session Jan. 28.

Volume on the New York Stock Exchange came to 185.43 million shares, down from 181.59 million Friday.

Analysts said some investors concluded that the market was overdue for a pause or pullback after its runaway rise since the start of the year.

Pressure on prices apparently was intensified by selling on the part of professionals engaged in computer-program strategies involving options and futures on stock indexes.

Among the blue-chips, American Express fell 3/4 to 76 1/4; International Paper 1/4 to 97 1/4; RJR Nabisco 1/4 to 59 1/4; Minnesota Mining & Manufacturing 1/4 to 125 1/4; and Digital Equipment 1/4 to 167 1/4.

Meanwhile, on the mergers and takeovers front, American Motors rose 3/4 to 4 1/4, and Chrysler was up 1/4 to 53 1/4. Chrysler said it signed a letter of intent to acquire AMC, under a plan calling for the exchange of Chrysler stock with a market value of \$4 for each AMC share now in public hands.

Elsewhere in the auto sector, General Motors gained 1 to 78 1/4 and Ford Motor 1/2 to 61 1/4.

USAir Group, which made a 569-a-share offer to buy Piedmont Aviation, fell 3/4 to 47 1/4. Piedmont was down 1/2 to 67 1/4, and Trans World Airline, which had previously made a hostile bid for USAir, dropped 1/4 to 28.

Caesars World climbed 2/4 to 27 1/4. Martin Sonoff, a New York money manager and Caesars's biggest shareholder, offered to buy the company for \$28 a share.

Supermarkets General was up 6/8 to 41 1/4. Dart Group said it had made a \$41.75-a-share bid for the company.

Allegheny International jumped 8/8 to 24 on word that the company agreed to a \$24.50-a-share acquisition by First Boston Corp. First Boston's shares dropped 1/4 to 49 1/4.

## Utilization review system is not a cure-all for health care

George was informed by his doctor that he needed surgery to remove polyps from his colon, but that it was a routine procedure—nothing to be alarmed about.

When asked if he could check into the hospital the following week, George answered that the doctor would first have to telephone a firm to receive certification for his hospital admission. This call to a utilization review board was required by George's company health plan.

When the doctor phoned, he spoke to a nurse reviewer. After noting the details, she said that she was unable to certify that George would be entitled to reimbursement for this admission and that one of the firm's physicians would call back. Later that day, George learned that the surgery could be performed on an outpatient basis and he would not have to stay in the hospital overnight.

What had happened is that the reviewer had discussed the case with the doctor and both finally had agreed that hospitalization was not necessary for the procedure. The resulting George avoided an unnecessary hospital stay and his employer saved on hospital expenses.

Sylvia Porter

If you, like George, are among the millions of Americans whose health care benefits are, to a greater or lesser degree, underwritten by employers in a group policy, you may have noticed that new options—which may seem more like barriers—are being placed between you and your medical care.

To combat soaring medical costs, "alternative delivery systems" are the rage among health care providers. The new health care lingo reflects these changes, which are often confusing: Employees now seek "managed care" and "preferred arrangements" to cut costs.

One example you've probably heard of, and perhaps even joined, is the health maintenance organization (HMO), which provides comprehensive care for a flat fee. While this alternative has received much at-

tention recently, the largest percentage of insured employees are still in conventional indemnity group health plans, where you pay some portion of the cost with deductibles and copayments.

A major criticism of HMOs is that, in some cases, the type of care provided does not promote the personal doctor-patient relationship that the traditional fee-for-service system offers. This is one reason why employers are examining ways to maintain fee-for-service medicine, but still reduce costs. Utilization review (UR) is a way to accomplish this goal.

Simply put, UR is considered a cost-saving measure based on the premise that checking on a doctor's orders may avoid unnecessary medical services.

It's difficult to say exactly how many employers include UR in their health plans, mainly because it depends on how UR is defined. UR can take various forms: It can be offered by the insurance company, or an employer may contract with a UR company, or employers even may have their own medical staff conducting utilization review, says David Gluck of Powers, Perrin, Forster and

Crosby, a management consulting firm. What's more, it can occur before, during or after hospitalization.

According to an Equitable Healthcare Survey, one-fourth of companies had preadmission reviews that required employees to obtain approval before admission to hospitals for non-emergency care. And almost one-third required employees to get a second opinion from non-emergency surgery and treatments.

"We are notoriously overmedicated, over-treated, over-hospitalized and over-surgicalized society," warns Dr. Robert J. Becker, chairman of HealthCare Compare, a utilization review company in suburban Chicago.

A health insurance experiment conducted by the Rand Corp. disclosed that a startling 40 percent of the 112 hospitalizations examined were avoidable. Published in the New England Journal of Medicine, the study looked at more than 100 hospitals across the country and judged 23 percent of admissions to be inappropriate. An additional 17 percent could have been avoided by using outpatient surgical facilities.

While utilization review appears to be one way to control unnecessary hospitalization and regulate length of hospital stay, it is by no means a cure-all. Follow-up after hospitalization and focus on overall quality of care are essential to utilization review, says Andrew Webber, executive vice president of the American Medical Peer Review Association, the national trade organization of peer review organizations.

The key question from the employer's perspective: How is cookbook medicine or formula medical care avoided? If a nurse consults a data base to determine if the hospitalization meets nationally accepted criteria, what if in a particular case, despite statistics, the patient needs the additional treatment? Would a doctor feel intimidated to conform to the review board's judgment? Exactly how effective may these review boards are in cutting costs is certainly a question. As it stands, much commercial review is done over the phone.

Complains Webber: "There's more to UR than an 800 telephone number."

Sylvia Porter writes on matters of interest to consumers.
