House sustains phone deregulation bill veto

By QUANE KENYON The Associated Press

BOISE — Telephone deregulation, a topic finally approved by the Idaho Legislature after weeks of discussion but vetoed by Gov. Cecil Andrus, appears dead for the session. Andrus vetoed the controversial bill Monday afternoon. Tuesday, the House sustained the veto on a 54-29 vote. That was two votes short of the required two-thirds majority needed to override.

Ten Republicans, all but one of whom voted against the bill in the first place, joined 19 Democrats in upholding the veto. The legislation was sponsored by Mountain Bell. It would have allowed the Public Utilities Commission to order deregulation

Roll call — A5

of most phases of the telecommunications industry. Before that could happen, the PUC would have to find that the action would not lessen competition, and would promote the goal of universal, affordable service.

Sponsors argued it would open the way for technological advances needed in Idaho. Opponents claimed the bill's impact was largely unknown, and it could cause huge rate increases for customers.

Later Tuesday, Andrus told a news conference he did not make up his mind to veto the bill until Monday morning. But he said again he felt the uncertainties of the legislation justified the veto.

"It's a complex issue. It does not have to be resolved this year, but it has to be resolved properly," Andrus said.

"I hope we can bring all the people involved together and see what we can come up with. I see no reason why Idaho has to be the first state with deregulation," the governor said.

Andrus confirmed Monday that he received \$15,000 from Mountain Bell in 1985 in what he termed a private business transaction that had nothing to do with the deregulation bill.

He said he did not feel that produced anything resembling a conflict of interest.

"The people knew me and my background pretty well when they elected me," Andrus said. "I don't see that as a problem."

Andrus said anyone who is not born rich will have to work for a living before running for public office. He said he would be glad to make public his personal tax returns for recent years, if all other elected state officials, including state legislators, do the same.

Rep.-Pam Bengson, R-Boise, chairman of

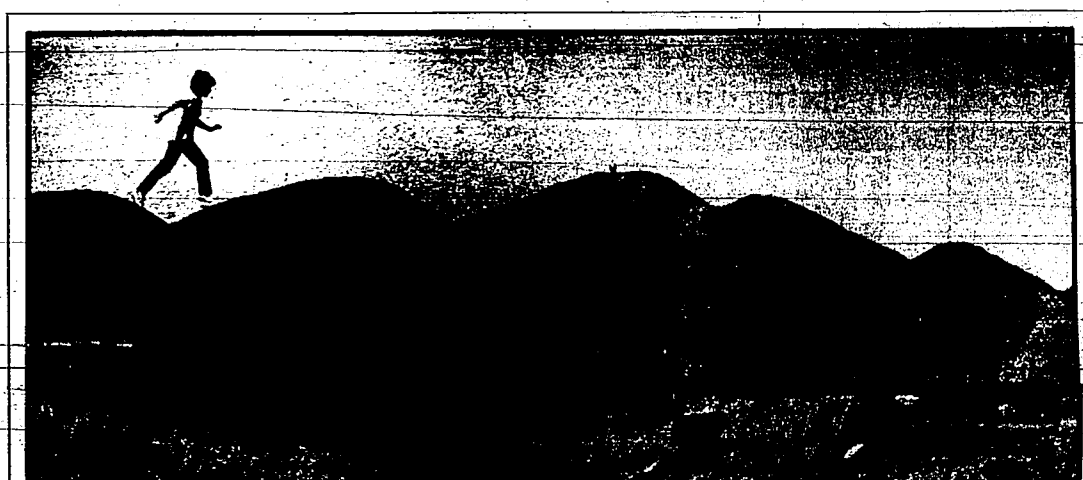

the House State Affairs Committee which originated the bill this session, argued to save it. But after the override vote confirmed the Andrus veto, she said it didn't appear the subject could come up again this session.

Andrus said he would be "amazed" if the Legislature could come up with a new deregulation bill this session.

Andrus said in his veto message he was concerned that the bill would lead to big rate increases, which in turn would price low-income families and senior citizens off the telephone system.

Andrus urged a "deliberate, cautious and above all correct" approach to telephone deregulation, and suggested another interim effort to come up with compromise legisla-

Striding the skyline

Looking something like a giant troll walking over a series of gravel hills in the Falls Tuesday, Martinez and cousin Brandon O'Connor spent a day of their spring break from school to go on an outing with family members in the desert.

President calls highway bill 'lemon,' pledges veto

The Associated Press

WASHINGTON — President Reagan, moving toward a key test of his political strength since the Iran-Contra affair, said Tuesday that an \$87.5 billion highway bill is "really a lemon" that he will send back to Congress with a veto note reading, "Stop the spending spree."

The measure, including a provision allowing a new 65 mph speed limit for rural interstate highways, sailed through Congress with broad support among Democrats and Republicans.

Now, GOP lawmakers who voted for the bill are being urged to reverse themselves because the issue is politically important for Reagan, trying to rebound from the Iran-Contra affair.

"I think the stakes are very high for the president," said Senate Minority Leader Bob Dole, R-Kan. "This is very important for the

Gem Senate gets 65 mph speed measure

The Associated Press

BOISE — Legislation raising the speed limit to 65 mph on 570 miles of rural Idaho interstate highways has been sent to the state Senate for consideration.

The bill, contingent on enactment of federal legislation permitting the higher speed limit, was endorsed Tuesday by the Senate Transportation Committee. Only Pocatello Democrat C.E. Blyen, concerned that raising the limit would only encourage motorists to drive even faster, opposed the bill.

If approved, the measure would still need House endorsement and the signature of Gov. Cecil Andrus before it takes effect.

Under the bill, the state Transportation Board would be authorized to raise the 55 mph limit to 65 after federal

approval. It's important for his leadership," said Senate Minority Leader Bob Dole, R-Kan. Talking with reporters after Reagan conferred with GOP

authorities to boost the limit had been in effect for 30 days.

Under the state plan, the limit could be increased to 65 mph on all interstate mileage except some 29 miles around the Boise area and short stretches through Pocatello and Idaho Falls. Because of severe curves, Transportation Department officials also said the higher limit would probably not be authorized on the grade east of Coeur d'Alene up through 4th of July Canyon.

But the congressional-approved bill containing that authorization is under consideration for a veto by President Reagan. The higher speed limit provision is attached to an \$88.6 billion federal highway aid proposal that Reagan's advisers have called a budget buster.

On Capitol Hill, House Speaker Jim Wright, D-Texas, said, "If the president and his new chief of staff (Howard Baker) are serious about repairing the administration's tattered relationships with the Congress, then the president should rise above the temptation to pick petty fights and provoke needless confrontation in order to appear tough."

Wright and Rep. James Howard, D-N.J., chairman of the House Public Works and Transportation Committee, argued that the highway bill does not contribute to the deficit because most of the money comes from a trust fund collected from a 9-cent-per-gallon federal gasoline tax.

Wright said Reagan has endorsed the concept of a trust fund in other cases, such as Social Security.

Soviets firing lasers at planes

By NORMAN BLACK The Associated Press

WASHINGTON — The Soviet Union continues to deploy new models of nuclear missiles with an eye toward achieving military superiority while conducting laser experiments against U.S. airplanes, the Pentagon said Tuesday. Russia is also devoting almost three times as much of its gross national product to weapons purchases compared to the United States. And it shows no signs of slowing that build-up, "no matter who is general secretary, no matter what proposals are made, no matter what public relations activities are undertaken," said Defense Secretary Caspar W. Weinberger.

The Soviet weapons drive also extends to its conventional arsenal, with dozens of new MIG-29 Fulcrum jet fighters along with tanks, artillery pieces and ships having been produced over the past year.

This grim assessment of Moscow's military might was released by Weinberger in the form of the Pentagon annual publication, "Soviet Military Power." Now in its third edition, the magazine-size, glossy booklet has become the Reagan administration's primary vehicle for releasing information about Russian force developments and, in turn, buttressing calls for higher Pentagon spending.

"We must realize that we are competing with a dynamic, and an expanding, Soviet military threat," Weinberger said.

He added, "We do not need to match ours as we are trying to match the Soviets weapon for weapon. But we must have an adequate defense program — one that is grounded on a clear understanding of the nature and character of the threats posed to national interests."

Overall, the booklet concludes that Soviet military expenditures are consuming between 15 percent and 17 percent of Russia's gross national product.

Closure, service cut may be in future of Gooding hospital

By BART JANSEN Times-News writer

GOODING — Gooding County Memorial Hospital has run out of choices.

Frustrated officials were told Tuesday that the facility is broke and probably faces closure or a cut-back in services. The hospital's survival depends on Hospital Corporation of America building it out with money. In addition to management skills, said an attorney and a county commissioner.

That conclusion surprised the hospital's administrator and members of the proposed taxing district board, who had thought a management contract alone would remedy the hospital's ills. The hospital's chief of staff, who was recruiting two new physicians, wounded the table after hearing ser-

VICES would probably be cut back instead of expanded.

Without an HCA investment far greater than the \$15,000 the taxing district could provide, hospital attorney Fred Decker and Gooding County Commissioner Bob Thackeray said the county hospital would have two months to live. Decker, who is negotiating with HCA's psychiatric division to manage the county hospital, said there will be nothing left to manage without an immediate infusion of capital.

Even with the additional money and a management contract that may be proposed in two or three weeks, the hospital is not expected to continue providing the same services. Thackeray expects HCA representatives to recommend decreasing acute-care and emergency room

services that are bleeding hospital profits dry.

Temporary HCA hospital administrator Janet McKinney, who is studying hospital organization, apparently agrees. She said that during the last six months, while the 24-bed hospital suffered from caring for an average of less than eight patients a day, overhead remained constant.

The revelations sparked heated discussion from hospital officials who felt they were kept in the dark about the hospital's financial standing.

"That's a new concept to me," said Dr. Mary Ann McAfee. The chief of staff pounded the table at the "lack of communication between the people involved in this deal and the people who are supposed to make decisions."

"My biggest complaint is that we

Swaggart newest storm center in uproar involving evangelists

The Associated Press

NEW YORK — Fiery TV evangelist Jimmy Swaggart was sued by one evangelist and accused by another Tuesday of seeking their downfall by spreading tales of sexual misconduct. Several leading lights of the "electronic church" were caught up in the controversy that began last week with the ouster of Jim Bakker as head of the \$172 million PTL empire. Some pointed to Swaggart as the provocateur and others defended the Louisiana preacher.

In New York, Bakker's lawyer accused Swaggart of masterminding a bid to take over PTL, which he said triggered Bakker's resignation and confession of an extramarital affair.

Meanwhile, Swaggart was sued in New Orleans for \$30 million by Marvin Gorman, who said he resigned in July as pastor of an Assembly of God Church after Swaggart joined church officials in a conspiracy to defame him.

But Swaggart denied any involvement in ousting Gorman or desire to take over PTL. And Jerry Falwell, who stepped in at Bakker's re-

quest to head the 500,000-member PTL organization, said he believed that Swaggart had no such takeover intention.

Swaggart "told me his only goal was to clean up a very embarrassing situation on behalf of the Assemblies of God, and I believe him," Falwell said in a statement released in Charlotte, N.C., home of the PTL Club.

Swaggart, president of Jimmy Swaggart Ministries in Baton Rouge, La., Bakker and Gorman all are ministers of the 2 million-member Assemblies of God, based in Springfield, Mo., and the country's largest Pentecostal denomination.

According to the A.C. Nielsen Co., Swaggart is the second-highest rated evangelist in broadcast television, behind the Rev. Robert Schuller of the Crystal Cathedral in Garden Grove, Calif. Falwell, founder of the Moral Majority, has the sixth-highest rated program, "The Old Time Gospel Hour," and Bakker's "Jim and Tammy" program ranked 13th in a November survey.

Bakker's lawyer, Roy Grutman, said Swaggart had gone to prominent believers and at least one

# Blizzard blocks travel, cuts off power across Kansas plains

By The Associated Press

An unusually strong spring snowstorm shut down part of the Plains on Tuesday with blinding wind-driven snow and drifts up to 8 feet closing highways and schools, stranding travelers and pulling down power lines serving thousands of people.

Kansas Gov. Mike Hayden declared a disaster for the western third of his state, where National Guardsmen already had been rescuing people and hauling supplies and had opened armories for stranded travelers.

Nearly all roads in western Kansas were closed, with drifts 5 to 7 feet high, and little attempt was made to clear them because of the unrelent-

ing wind and blizzard conditions, the state Highway Patrol said.

As many as 10,000 homes in northern Kansas were without electrical power, with the road conditions hampering efforts of utility crews to restore service, utility officials said.

Early spring snowstorms are not rare in western Kansas, but to have one of this intensity is unusual, said Jim Johnson of the National Weather Service in Dodge City, Kan. The last storm of such intensity was 30 years ago, he said.

The Oklahoma Panhandle was virtually closed off, highways in central Nebraska were closed and others were nearly impassable. In Colorado, 10 miles of Interstate 70 from the Kansas border to Burlington were

closed. About 165 miles of I-70 was closed in Kansas.

State crews trying to plow I-70 in Kansas were pulled off at midday because of high winds. "It's drifting over as soon as they move their plows through," said Errol Wuerz, Ellis County spokesman.

"The main thing we've got just stranded motorists here in town," said Lt. Larry Warrick of the Oklahoma Highway Patrol in Guymon. He said there were a couple of hundred cars parked in town, and the state Transportation Department reported drifts 8 to 8 feet high.

The National Weather Service posted blizzard warnings for part of western Kansas. Snow also fell in a

belt across Kansas and Nebraska into South Dakota and Oklahoma and the Texas Panhandle had blowing snow.

Kansas' blizzard followed a series of hand-to-hand snows, one of which produced a tornado Sunday that destroyed several buildings in Rooks County.

"We're in a mess," said Rooks County Sheriff Frank Skovold. "It seems like we're fighting all the elements at one-time today. We're kind of just holding our own at the moment."

The Finney County, Kan., sheriff's department said 75 to 100 vehicles were stranded on highways around Garden City. Officials said many motorists complicated the problem

by going around barricades and then getting stuck. Schools, the courthouse and many businesses were closed.

Schools across central Nebraska dismissed early Monday and were closed Tuesday. Some schools also closed in southeastern South Dakota.

"Everybody was bolting three weeks ago 'Man, we need moisture,'" said Harry Roby of Burwell, Neb., which had an estimated 12 to 14 inches of snow. "Now they're saying 'Why'd we have to get it all at once?'"

On the eastern side of the snow belt, heavy rain flooded streams in parts of Iowa, South Dakota and Nebraska.

In eastern Nebraska, where at least 5 inches of rain had fallen since Sunday, a threat of flooding forced school closings from Memphis to Des Moines to Cedar Rapids. U.S. Highway 136 west of Beatrice was closed because of high water. The Big Blue River was expected to crest 10 feet above flood stage Wednesday in Beatrice.

Thousands of people in western Kansas were without electricity Tuesday because of downed power lines and poles. At least 300 poles were knocked down by wind gusts to nearly 80 mph Monday in the Dodge City area, said Bill Ohlemeyer, spokesman for an association of a dozen rural electric cooperatives.

## Soviets

Continued from Page A1  
By continuing the Pentagon spending cuts about 6 percent of America's GNP.

The report was released hours before Weinberger went to Capitol Hill to push for the administration's request for a 3 percent increase after inflation in the defense budget for the next fiscal year.

Weinberger referred to the booklet on several occasions, telling the House Armed Services Committee that it outlined the "very real threat, the growing threat—presented by the Soviet military machine. That threat, rather than domestic considerations, should be used as the basis for the Pentagon's budget, Weinberger told the panel.

The 1987 edition of "Soviet

Military Power" contains little in the way of new disclosures. One exception involves continuing Soviet work in the field of laser technology. Without elaborating, the booklet states that "recent Soviet irradiation of Free World manned surveillance aircraft and ships could have caused serious eye damage to observers."

Included is a picture of an "electro-optic sensor laser device" aboard a Soviet destroyer that "has been used to irradiate Western patrol aircraft."

A senior Defense Department official, in discussing that reference, said laser devices had been fired in the Middle East, Afghanistan and "other parts" of the world. While no

U.S. personnel have been blinded, there have been reports of individuals from other countries being temporarily blinded by such laser beams, the official said.

"We've had several reports from various parts of the world—Middle East and other parts—indicating that either from Soviet equipment, Soviet vessels or Soviet-provided equipment, there have been incidents of lasering against ground equipment and aircraft," said the official, who briefed reporters before Weinberger's appearance on condition he not be identified.

The reports have provided evidence of "an impact, both in terms of blinding pilots and in terms of some physical burning."

## Phone

Continued from Page A1

That's what happened last year. The Senate passed a deregulation bill that went even further, but it arrived in the House a week before the end of the session and the House refused to give it serious consideration.

This year, the bill originated in the House. An early version was withdrawn for changes. The House State Affairs Committee held 15 rounds of hearings, then approved the bill.

But senior citizen groups and independent telephone companies battled the bill all the way. "Opposition to this legislation is widespread and runs very deep," said Andrews.

If I am not aware of a single consumer or senior citizens group that has not expressed serious concerns about this approach," the governor said.

But Rep. Janet Hay, R-Nampa, said the bill has a lot of built-in protection for consumers, and the bill should enhance competition.

"It is only fair that Mountain Bell should be allowed into the competitive arena unfettered by restraints," she said.

Rep. Dean Haegenson, R-Coeur d'Alene, said "self-serving consumer groups" preyed on the fears of senior groups to convince them to oppose the bill. He said he even heard that "food trays were held back in a senior center until members signed petitions against the deregulation bill."

"This is a balanced approach," said Mrs. Bengson. "It is well drafted legislation.—This is a good bill and people's fears were unfounded."

It sent 4,000 messages to the Legislature in opposition to the deregulation bill.

Voting to sustain Andrews' veto were: Rep. Ron Black, R-Twin Falls; Rep. Doug Jones, R-Filer; Rep. Russ Newcomb, R-Twin Falls; and Rep. Bruce Newcomb, R-Burley.

Voting to override the veto were: Rep. Steve Antone, R-Rupert; Rep. Jerry Callen, R-Jerome; Rep. Cella Folkhna, R-Buhl; Rep. Waldo Martens, R-Jerome; Rep. Mack Neibaur, R-Fault; Rep. Ralph Peters, R-Jerome; and Rep. Gary Robbins, R-Dietrich.

Antone, Martens and Neibaur originally voted against the phone deregulation bill, but on Tuesday, voted to override the veto.

Martens, saying he changed his mind on the bill, said he thought it was a good bill and people's fears were unfounded.

## Today's weather

### Sounds like an ideal early spring day

Twin Falls, Burley, Rupert, Jerome and Gooding:  
Fair today with westerly winds from 10 to 15 mph. Highs from low to mid 50s. Fair tonight and Thursday. Lows from 25 to 30. Highs in the mid 50s.

Camas Prairie, Halley and Lower Wood River Valley:  
Fair today. Westerly winds from 5 to 15 mph. Highs from 45 to 50. Fair tonight. Increasing high clouds Thursday. Lows from 15 to 20. Highs from upper 40s to low 50s.

Northern Nevada and Utah:  
Utah: Partly cloudy through Thursday. Isolated snow showers over the mountains. Breezy north winds during the daytime. Lows in the 20s to 30s. Highs in the upper 40s to mid 50s today and mainly in the 50s on Thursday.

Nevada: Mostly sunny today and Thursday. Warmer with highs in the mid 50s to low 60s in the east and the mid 50s to lower 60s in the west. Overnight lows from the mid teens to upper 20s.

Synopsis:  
Partly cloudy skies were the rule over Idaho Tuesday afternoon. Some mountain rain and snow showers were observed in southeast and central Idaho.

Temperatures were in the seasonal 40s and 50s. Lewiston was the warmest at mid-afternoon with 56 degrees, while McCall was coolest at 39.

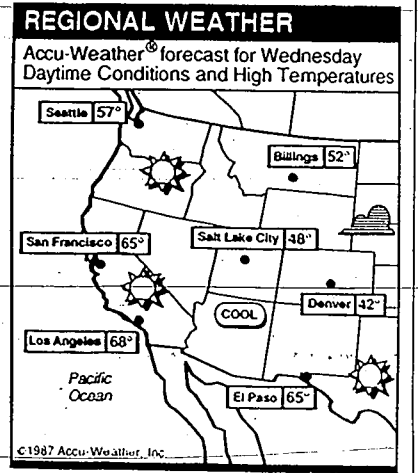

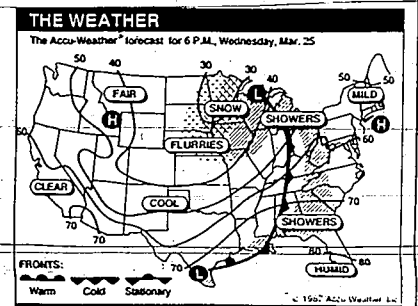

Gusty winds in the 10 to 20 mph range were the most notable wind on Tuesday afternoon. Potomato had the strongest winds with gusts of nearly 30 mph.

The highest temperature in Idaho Tuesday was 62 degrees at Payette, while Deadwood registered the state's low of 12 degrees.

The pollen count in Twin Falls Tuesday was 4 particles per cubic meter of air.

The extended forecast for Southern Idaho: Friday through Sunday, generally partly cloudy through the period. A slight chance of showers Friday and Saturday, mainly in the eastern portions. Highs mostly from 50s in the west and from 45 to 55 in the east. Lows from 20s.

Elsewhere in the nation, Tuesday's high temperature was 86 degrees at McAllen, Texas, and the low was 2 at Yellowstone Park, Wyo.

don't know what's going on here," echoed Administrator Duane Cutright. "We've got two or three people who know what's going on and 10 to 12 people who don't know what's going on."

"This is the first time I've heard that in essence, we're defunct," said Joyce Scanlon, chairman of the seven-member taxing district board which had planned to run the hospital after county commissioners transfer it to them.

But Thackeray said the threats of paying back services have been in their for months behind the clouds of mounting debt—two previous management proposals, including one from a separate HCA division, each suggested cutting acute-care and emergency room service in favor of long-term care.

The conclusion that the hospital may be forced to close came only during the past three weeks, as "shocked" HCA officials pored over hospital and Walker ACT financial records. Previous bookkeeping problems between the adjacent facilities forced a court to order the coun-

ty to pay Walker Center \$300,000 in unpaid bills.

"I don't think HCA understood the financial operation as bad as it was," said McKinney, who characterized regional HCA officials' reactions as "shocked."

The facilities' share laundry, dietary and housekeeping services. Occasional overflow patients from Walker ACT also stay at the hospital.

HCA psychiatric division plans to buy Walker Center. The sale is expected to occur regardless of whether it also manages the hospital. The facilities would continue to share services, including bookkeeping under a common controller, if HCA manages the hospital.

Randy McVay, a temporary HCA comptroller researching bookkeeping for the two facilities, will report to HCA psychiatric division officials in about three weeks. Those officials will then decide whether to invest in the hospital in addition to buying Walker Center.

Cutright said the hospital is losing about \$20,000 a month and may have trouble meeting payroll and ex-

penses in April. And Decker said the hospital has exhausted its assets.

"You're out of working capital—period," Decker said. He estimated that \$500,000 could carry the hospital for between six months and a year, until HCA's new collection policies and organization could turn the hospital into a money-making operation, he said.

That success is not a foregone conclusion. McVay said the hospital's bad debt may not be collectable.

Thackeray echoed that concern, saying other people have tried and failed to make the hospital profitable for five years.

"We've tried to keep the wolves away from the door so far," Thackeray said. He agreed that there apparently won't be any choice to cutting back services.

Without HCA, no banks will lend to the hospital because of its financial standing, Decker said. And issuing tax anticipation notes against the taxing district's potential \$150,000 would also be a bad idea while the hospital continues to lose money, he said.

"You start counting on that, you're going to go under," Decker said.

"What you're talking about is you're whipping a dead horse," said the Rev. Jim Davis, a member of the proposed taxing district board.

Unless they (HCA) commit capital, yes, that's right," Decker said.

## Swaggart

Continued from Page A1

newspaper with "exaggerated and distorted" information about Bakker in its coverage, he said.

"It was part of a plan that would have accomplished the ouster of Jim Bakker and if that had occurred, would have enabled Jimmy Swaggart to take over PTL," Grutman said.

Swaggart was not involved in blackmailing Bakker for \$115,000, Grutman said, but claimed that Swaggart found out about it and tried to use the information against Bakker.

When Bakker stepped down as pastor of PTL, he said a rival tried to usurp the organization by exposing the affair and that Bakker paid to cover it up. He and Grutman did not identify the rival then.

Swaggart told The Charlotte (N.C.) Observer in an interview published Tuesday that he was the one involved in the takeover.

But Swaggart denied being involved in an attempt.

"That's about the absolutely most absurd accusation that could ever be made," Swaggart told CNN's Larry King in an interview Tuesday night. "I don't know what I would do with PTL."

Meanwhile, Charles Cookman, the district superintendent of the First Assembly of God Church, said in Dunn, N.C., that the church stands by Bakker and his wife, Tammy Faye, and that the door is open for Bakker to return to the ministry.

Grutman said at news conference at his New York office Tuesday that Swaggart was the one involved in the takeover.

But Swaggart denied being involved in an attempt.

"That's about the absolutely most absurd accusation that could ever be made," Swaggart told CNN's Larry King in an interview Tuesday night. "I don't know what I would do with PTL."

## Casey linked to aid efforts

WASHINGTON (AP)—Congressional investigators have indications W. Jam J. Casey, the former CIA director, masterminded White House efforts to help the Nicaraguan rebels get military supplies, according to a published report.

The New York Times, quoting two senators and a representative, all unidentified, and all members of the special committees investigating the Iran-Contra affair, said in Wednesday's editions that the lawmakers did not say what specific evidence they had.

But the newspaper said other legislators and staff assistants asserted that actions taken by Casey, who is being treated in a hospital for a brain tumor, had become a central focus of the committees' investigation.

"They did not know whether Casey was involved in chattering money from the secret weapons sales to Iran to the Contras."

# House approves resolution clearing way for state lottery

BOISE (AP) — For the first time, the Idaho House has approved a resolution designed to clear the way for a state lottery.

Now the battle over the lottery shifts to the Senate, which earlier in the session approved a different lottery proposal by a vote of 32-10.

But the action doesn't mean Idahoans soon will have a chance to join the neighboring states of Washington, Oregon and Montana and take part in a state lottery.

Even if the Senate approves, the resolution to remove a constitutional ban on lotteries would have to be passed by voters in the next general election, in the fall of 1988. Then it would be up to the 1989 Legislature to enact a lottery.

The House vote was 56-28, exactly the two-thirds majority needed to approve a

proposed constitutional amendment. And the proposal didn't pass until the last minute, when Rep. Ron Slater, R-Boise, cast the deciding ballot.

Voters last fall approved a lottery initiative, even though that process is being challenged in the courts. The resolution approved on Tuesday amends the Idaho Constitution to remove a lottery ban.

"We should honor the overwhelming will of

the voters," said sponsor Rep. Pam Bengson, R-Boise. She said since more than 60 percent of the voters approved the lottery initiative last November, the Legislature has an obligation to carry out that desire.

"It is a good idea," she said. "We need to represent the overwhelming wishes of the majority of the people."

She said 32 of Idaho's 44 counties approved the lottery. Based on acceptance of the lottery, Mrs. Bengson said 64 of the 84 House members should approve the lottery resolution, if they voted the same way their district voted.

"It is the overwhelming desire of the people of the state to vote on the issue," said cosponsor Rep. Patricia McDermott, D-Pocatello.

She said the resolution approved by the House on Tuesday was tighter than the resolution written by the Senate earlier in the session.

As passed, it will outlaw gambling, except for three types, she said. One is a lottery conducted under state laws. The second is pari-mutuel wagering and the third is charitable games of chance, such as bingo.

"A substantial, overwhelming majority of the people of the state have said they want the constitution changed to allow a lottery," she said.

Rep. Gary Montgomery, R-Boise, tried to put the resolution up for amendment, but lost a 50-33 vote. He claimed that as the latest lottery proposal was drawn up, it would allow casino gambling, slot machines and roulette wheels.

"I can't see in good conscience how we can turn our backs on the way the people voted," said Rep. Rubby Stone, R-Boise. "What are we afraid of?"

Rep. L. Ed Brown, R-Pocatello, called the whole lottery proposal "a rip-off," that would produce little state revenue and would bring nothing but problems.

"There is no evidence from the history of lotteries in this country that a significant portion of education can be funded from the lottery," he said.

Brown argued again that it boiled down to the simple fact that people want to play the lottery for entertainment, and they want the state to provide the entertainment.

"The people have spoken. The people have voted to vote on this," said Rep. Harold Reid, D-Craigmont.

## Senate majority reaches consensus on school funds

BOISE (AP) — After more than two hours behind closed doors Tuesday, the Senate's Republican majority reached a working consensus on publicly financing the \$343-million 1988 school year.

But Peavey said the minority, while generally opposed to modifying the bill, will have its own amendments to be considered.

Overall, the \$343 million plan, a 10 percent increase over this year's allotment, would include money to make the first of four teacher salary hikes aimed at bringing average Idaho salaries up to the national average and funds to offset huge property tax increases many districts had to obtain last spring after an inadequate state allocation. Both were major components of the governor's plan.

While the debate continued on the spending side of the budget, legislative leaders were trying to put together a tax package that will raise up to \$15 million needed to close the gap between the \$657 million in spending commitments and the revenue anticipated from the current tax structure.

Republicans on both sides of the Capitol said they believed their was growing support for a plan to boost corporate income tax rates by a full point to 8.7 percent and then make a fractional increase of just under two-tenths of point in every bracket of the individual income tax.

But Democrats have indicated objections to the individual income tax portion of that package. Peavey said the 16-member minority sees the increase, even fractional as it is, in all individual tax rates regressive.

He said at this point the Democrats were holding out for the individual tax portion of the new revenue to come from increased tax rates at the higher income brackets.

The disagreement over extracting the extra money from individual taxpayers, if it persists, could be enough, leaders on both sides indicated, to push final adjournment of the 1987 session into next week.

criticism for earmarking \$8 million of the measure as so-called one-time money, a tactic some lawmakers believe will give them flexibility when they draft a 1989 budget next year.

## Gem income tax code now matches federal

BOISE (AP) — Democratic Gov. Cecil Andrus late Tuesday signed legislation bringing the state's income tax code into compliance with the new federal tax law and generating \$7 million in new state revenue for the 1988 budget.

The governor signed the bill, critical to underwriting the ambitious spending program he and the Republican-dominated Legislature have generally agreed on, without comment.

Among 10 other bills signed by Andrus was legislation ending what has become perennial local property tax hikes to finance the state-mandate circuit-breaker property tax relief program for needy senior citizens and the disabled.

The bill calls for the tax credit to be financed directly from sales tax receipts without the need for annual legislative appropriations. In five of the six years, those state appropriations have been inadequate to cover all the relief claims, and counties have been forced to make up the difference through property tax hikes. This year, officials estimate nearly 18,000 people will receive an average tax credit of nearly \$200 to help offset their property taxes.

But the tax conformance bill was a key part of the financing scheme Andrus outlined to underwrite the state budget. He has already signed legislation making the state sales tax permanent at 5 percent, and bills were awaiting final legislative action that will repeal some past tax breaks and double the cigarette.

The \$7 million raised by the tax conformance bill will generally be paid by higher income taxpayers who have relied heavily on shelters and deduction to keep past tax bills down. The new federal law, and now the Idaho code as well, repealed most of those breaks.

Tax analysts estimate that the vast majority of Idaho taxpayers will actually see their state tax bill fall under the new code because of increased personal exemptions and standard deductions.

But with the pending 1988 state spending blueprint running some \$21 million over the estimated revenues the present tax structure was expected to produce, some lawmakers have proposed scaling back the breaks provided most taxpayers under the conformance bill as a way of closing that revenue gap.

But no final decision has been made by lawmakers on how that disparity will be covered.

## Andrus signs PUC pay bill

BOISE (AP) — Democratic Gov. Cecil Andrus has signed legislation giving the three members of the Public Utilities Commission a \$13,500-a-year pay raise.

The bill, which takes effect this summer, will boost the salary, now among the lowest paid any state utility regulator in the nation, to \$50,000 a year, near the average being paid regulators in other northern states.

Since the pay raise bill began winding its way through the Legislature two months ago, the governor has won the confirmation of Cour d'Alene — accountant — Ralph — Nelson and Caldwell attorney Joe Miller as new members of the regulatory board.

## Nuclear waste train, car collide

ST. LOUIS (AP) — A freight train carrying two casks of waste from the Three-Mile Island nuclear power plant struck a car at a crossing Tuesday, but the radioactive cargo was unaffected by the accident, authorities said.

The waste is on its way to the U.S. Department of Energy's Idaho National Engineering Laboratory, near Idaho Falls, Idaho.

The train resumed its journey about 50 minutes after the accident occurred at 4:35 a.m. MST, said police patrolman Kevin Condon, who was at the scene.

## Women's commission loses funds

BOISE (AP) — It appears a small appropriation for the Idaho Commission on Women's Programs will not make it through the House.

After a long debate Tuesday, the House voted 46-37 to put an appropriation bill up for amendment.

Rep. Mack Neubaur, R-Pauli, sponsor of the move, said he intended to remove a \$6,500 appropriation for the commission.

The appropriation is in a \$7.1 million budget bill for social services. Also in the budget bill is funding for the Commission for the Blind, the Human Rights Commission and the Office on Aging. But opponents said they do not want to be forced to vote to fund the commis-

sion because its appropriation is in a bill funding other agencies.

The Legislature has refused to fund the commission since 1981, and opponents argued it is anti-family. But backers praised the commission, saying it publishes a booklet with valuable advice for women.

Rep. Preston Brimhall, R-Idaho Falls, contended that the commission's efforts could lead to the break-up of families.

"The victims, ladies and gentlemen, are going to be little children," said Brimhall. He said the family is based on three legs, the mother, the father and the children. "When we promote independence for one of the legs of that triangle,

we're going to destroy that triangle. There has to be a degree of dependence. If we really want to help women...we'll start training men to be better husbands. We'll train women to be better wives," he said.

Rep. Mary Lloyd, D-Pocatello, told House members she is strongly opposed to abortion, but supports the commission. But Rep. Joan Wood, R-Rigby, said women in her group don't feel they are represented by the Women's Commission and do not support the commission's objectives.

Rep. Ron Slater, R-Boise, called the commission "the ladies' auxiliary of liberalism in Idaho."

### Governor should explain \$15,000 fee

Back during the 1986 campaign, gubernatorial candidate Cecil Andrus faced vague allegations of conflict of interest in two incidents raised by supporters of his opponent, Republican David Leroy.

One incident involved campaign contributions from California irrigators, whose interest in Idaho politics was unclear.

The other involved title to property on a North Idaho lake in which, it was alleged, Andrus received special treatment from a federal agency.

In both cases, Andrus brushed aside the criticisms, effectively treating them as not worthy of his consideration, and certainly not worthy of any public accounting.

Now, another question has surfaced, and again, Andrus has treated the issue as if it were unimportant. It is not.

We wonder what he will say, if anything, about the \$15,000 consulting payment he received in 1985 from one of Idaho's major lobbies, Mountain Bell, for services he now declines to describe.

Asked about the payment this week, Andrus in effect told the questioner to take a hike, saying that since he (Andrus) was in private life at the time, it was no one's business.

Yes, Andrus was in private life and like any private businessman, he has a right to a certain level of privacy concerning his personal financial affairs.

But Andrus was not just any "private businessman." Even then, there was little doubt that he would probably be a candidate for governor. Indeed, he declared his candidacy only a few months later.

When a person seeks public office, he or she loses some of the natural privacy which they enjoy as a private citizen. That is particularly true when the privacy involves financial affairs, involves what for most Idahoans is a large amount of money, and involves companies which have multiple interests in state policy and leadership.

Andrus' constituents, the people of Idaho, have the right to ask what he did to earn a \$15,000 consulting fee from Mountain Bell.

We think he should answer the question, and if he declines, the company should provide an explanation.

## Higher limits will mean higher speeds

Many people accept the need for the 55 mph national maximum speed limit, but they don't always observe it.

They support retaining 55, according to national polls, but at the same time many people—even a majority of them on some roads—don't comply with it.

We who support 55 have no illusions about this. We know official speed limits are being exceeded. But we also know they still make a difference because they, in effect, set an unofficial upper limit of speed that most motorists won't exceed.

If the speed limit is raised to 65 mph, most motorists who now drive between 55 and 65 will speed up. They're likely to drive between 65 and 75 because, as the superintendent of Idaho's state patrol recently explained, motorists "determine the 'police tolerance factor' for speed variations and travel at speeds equal to the sum of the legal limit plus the assumed tolerance."

Although compliance is a problem, the reason for favoring 55 is simple—higher limits will mean higher travel speeds and more deaths and injuries.

The truth, according to the most comprehensive analysis of international experience with speed limits, is that in all cases when reductions in the posted speed alter driver behavior, lives are saved and injuries averted. The reverse is generally true as well—increases in posted speeds increase the frequency and severity of accidents.

Despite the overwhelming evidence of benefits, though, some people continue to claim 55 doesn't save lives or serve any other useful purpose. Either. These claims are far from the truth.

One of the most common claims against 55 is that it's creating a nation of lawbreakers. So many otherwise law-abiding citizens violate 55, opponents say, that it's the most abused and disregarded law since prohibition. It's true that many motorists go faster than 55, but they don't break this law any more often than earlier speed limits of 65 and 70 mph were broken. In fact, speed limits are being broken on all kinds of roads with widely varying legal limits.

Insurance Institute for Highway Safety researchers recently measured traffic speeds on suburban streets and rural interstates with speed limits ranging from 30 to 55 mph. And the findings might surprise you: More motorists were found to be exceeding the limits on suburban streets, compared to those exceeding 55 on rural interstates. On one residential street with a speed limit of 30 mph, every single one of the nearly 500 vehicles measured was going faster than legal limit. Two-thirds were going 10 mph or more above the limit. In contrast, 18 percent of all motorists on rural interstates go 65 mph or faster, according to the Federal Highway Administration.

Safety isn't even a serious consideration for many speeding motorists. This is illustrated by some writers in the auto enthusiast press who say their self-proclaimed "superior driving skills" enable them to handle very high speeds safely.

No matter what speed limit is—whether it's 30 mph, 55 mph, or higher—it requires effective enforcement in order to work. A study in Sweden indicates that intensified speed enforcement on roads with high crash rates reduces the number of speeders and, in turn, crashes.

Yet enforcement of 55 is less than vigilant in many U.S. jurisdictions. And, in some cases, penalties for violating 55 have been reduced. In South Dakota, for example, the penalty for speeding on interstates has been reduced to a mere 10 fine "for unnecessary waste of fuel" as long as the speed is under 70 mph. In a number of other states, too, penalties have been reduced for stated reasons tied to the 55 mph speed limit.

So it shouldn't surprise anyone that compliance with 55 is poor in these states where authorities have, in effect, told people they're not serious about the law.

Enforcement of all speed limits, not just 55, is being impeded by the increasing use of radar detectors, devices that serve no purpose other than to help speeding drivers avoid detection by police. New insurance Institute for Highway Safety research indicates that the faster the speeding vehicles are going the more likely they are to slow down rapidly when hidden police radar is activated. This strongly indicates the presence of radar detectors, especially because serious violators are more likely than others to slow down rapidly.

More than one in four vehicles traveling 70 plus mph is likely to be equipped with a radar detector.

ban streets, compared to those exceeding 55 on rural interstates. On one residential street with a speed limit of 30 mph, every single one of the nearly 500 vehicles measured was going faster than legal limit. Two-thirds were going 10 mph or more above the limit. This strongly indicates the presence of radar detectors, especially because serious violators are more likely than others to slow down rapidly.

More than one in four vehicles traveling 70 plus mph is likely to be equipped with a radar detector.

lor. Yet these devices are prohibited in only three U.S. jurisdictions: Connecticut, Virginia, and the District of Columbia.

Without legal curbs on the sale and use of radar detectors, they proliferate and make speed enforcement increasingly difficult. On the other hand, if they're banned and enforcement improved, the already considerable benefits of the present speed limit would increase.

Highway design speed. Another myth often dredged up to support raising the speed limit is that highways are designed for fast travel, so why go only 55? But, contrary to intuitive definition, a highway's design speed isn't the one at which motorists should routinely travel. It is "the maximum safe speed that can be maintained... when conditions are so favorable that the design features of the highway govern," according to the American Association of State Highway and Transportation Officials. On most rural interstates, it's 70 mph, but on many other sections of interstate it's 60 mph. These are the speeds that shouldn't be exceeded, and 55 keeps most motorists, even speeders, traveling under design speeds. Raising the speed limit to 65 mph would result in many motorists exceeding highway design speeds.

Why not raise the speed limit on rural interstates where the open road makes fast driving safer? This might sound logical, but it doesn't make sense because fatality rates are actually higher on rural interstates than on urban ones, and they're especially high on rural interstates in the western part of the country. In Nevada, for example, the rural interstate fatality rate in 1985 was 3.9 per 100 million vehicle-miles, or about three times the national average. The 10 states with the highest fatality rates on rural interstates in 1985 are western states: Alaska, Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming.

So, from a safety standpoint, it doesn't make sense that the loudest demands to raise the speed limit are coming from these very states.

The cost of raising the speed limit to 65 mph on rural interstates would be 300 to 400 additional highway deaths each year, based on estimates by the National Academy of Sciences. The actual cost would be even higher because of the spillover effect.

Ultimately, of course, the decision about keeping or abandoning the 55 mph speed limit on selected highways is a political one. If policies dictate that the increase in deaths and injuries isn't enough to retain 55, then an important issue to take up is whether there are ways to prevent the anticipated deaths. Some people may claim that tougher enforcement of a higher speed limit is all that's needed. But, as I indicated earlier, compliance is hard to achieve regardless of what the speed limit is. Whether it's 55 or 65, banning the way devices that help speeders avoid detection prove compliance, but other measures would be needed, too.

If 55 is raised on some highways, why not consider allowing motorists to drive faster than 55 only if they and their passengers are wearing safety belts? Motorcyclists could go faster than 55 only if they're wearing helmets. Another option would be to make higher speed limits conditional on high levels of observed belt and helmet use. If enforced, these are the kinds of trade-offs that might help prevent the extra deaths and injuries caused by raising the present 55 mph speed limit. On the other hand, if 55 is raised unconditionally, the consequence undoubtedly will be several hundred additional lives lost each year.

Motorcyclists could go faster than 55 only if they're wearing helmets. Another option would be to make higher speed limits conditional on high levels of observed belt and helmet use. If enforced, these are the kinds of trade-offs that might help prevent the extra deaths and injuries caused by raising the present 55 mph speed limit. On the other hand, if 55 is raised unconditionally, the consequence undoubtedly will be several hundred additional lives lost each year.

Ultimately, of course, the decision about keeping or abandoning the 55 mph speed limit on selected highways is a political one. If policies dictate that the increase in deaths and injuries isn't enough to retain 55, then an important issue to take up is whether there are ways to prevent the anticipated deaths. Some people may claim that tougher enforcement of a higher speed limit is all that's needed. But, as I indicated earlier, compliance is hard to achieve regardless of what the speed limit is. Whether it's 55 or 65, banning the way devices that help speeders avoid detection prove compliance, but other measures would be needed, too.

If 55 is raised on some highways, why not consider allowing motorists to drive faster than 55 only if they and their passengers are wearing safety belts? Motorcyclists could go faster than 55 only if they're wearing helmets. Another option would be to make higher speed limits conditional on high levels of observed belt and helmet use. If enforced, these are the kinds of trade-offs that might help prevent the extra deaths and injuries caused by raising the present 55 mph speed limit. ## Regulatory Flexibility Act can help Idaho business climate

Gov. Cecil Andrus can take a major step forward in improving Idaho's business climate by signing H.B. 100a, the Regulatory Flexibility Act, now on his desk.

This act would reduce the cost of future regulatory requirements on state businesses. The bill would get regulators and regulated businesses together to work out alternatives to unneeded or overly costly new rules.

Sounds simple, doesn't it? Getting state agencies and private businesses to work together more closely seems like a common-sense approach. In fact, 19 other states and the federal government have enacted regulatory flexibility measures, either through legislation or by executive order.

### Pete Skamser

However, a number of state bureaucrats, zealously protecting their turf, have dug in their heels and are urging Andrus to veto the bill. They believe they should have the right to issue new regulations without considering the economic impact on the business involved.

The problem is that Idaho business owners are getting buried in an avalanche of rules, regulations and permits. Some new regulations are valuable in protecting consumers or ensuring safety in the workplace. But

many new regulations are unnecessarily burdensome or redundant, greatly increasing costs for business owners while producing no significant benefit to the public.

Under the new law, state agencies would first issue their estimate of what degree of economic impact a new regulation would have on business. The business affected could then suggest alternative, lower-cost methods of achieving the same goal. If the agency proceeded to go with the more expensive way, it would have to state the reasons behind the decision.

The statements and alternative methods would then be submitted to the appropriate state legislative committee for the tradi-

tional regulatory review. The designated House and Senate committees have the authority to review, and if necessary, overturn new regulations.

The state bureaucrats complain that the new economic analysis requirements of the bill will add to their individual agency budgets.

But we believe these additional costs will be more than balanced out by savings to agencies due to fewer contested rulings and reduced litigation.

For example, in 1985 the state Department of Lands issued complicated new regulations on easements. Power companies soon realized that the new rules were un-

workable and began fighting their implementation. The rule was overturned two weeks after being issued, but only after the state had spent \$12,000 putting it in place. If H.B. 100a had been in effect, the costly fiasco could have been avoided.

Given current economic conditions, we need to do everything we can to create a positive business climate in the state. The last thing we need is to go on creating volumes and volumes of costly, unnecessarily burdensome rules.

Pete Skamser is state director of the National Federation of Independent Business, Idaho, the state's largest business organization with 7,200 members.

## Letters/ Ads, pro and con, park use prompt comments from readers

### A great piece of work

I would like very much to thank The Times-News for their fine advertisement on page B4. That was a real great piece of work, thank you.

I know of a bug-eyed, pot-bellied, obnoxious person on the evidence, that tries to make his limits as his.

Times-News, tell it like it really is. And with no surprises. Thanks again.

I would also like to thank all the business people and companies who sponsored the CSI Golden Eagles. That was very nice of all who were concerned. Thank you.

### Quick change is helpful

Is anyone else tired of hearing yelling car salesmen? I can sure change to the next channel in a hurry anymore.

KATHY COOPER  
Eden

### Keep cars, cycles out

It appears that many people are not aware that Rattlesnake Canyon, between Magic Valley Regional Medical Center and the Singing Bridge, is a city park designated for use by hikers, bicyclers, fishermen and horses. Motor vehicles are specifically forbidden to be in the canyon in this area by City Ordinance No. 1920. Also, since the area is

a public park and within the city limits, use of firearms is forbidden.

Four-wheel drives, motorcycles, and flying bullets, do not mix with children, horses, and joggers. In addition to the obvious danger, motor vehicle drivers bring in trash and broken bottles which pose further hazard to people and animals.

On Sunday, Saturday afternoon involved a motor vehicle in the canyon revving its engine causing a horseback rider to be thrown and injured. Police were also involved this weekend with gun violations in the park.

I think violators of the park ordinances should be sentenced to picking up glass in the Nature Park or repairing some of the damage done to public property there by vandalism.

Let's all enjoy the City Nature Park in a way that insures its best and safest use by the greatest number of people. Keep cars and motorcycles out of the canyon.

### Monopoly needs no help

The state Legislature has just voted to deregulate Mountain Bell Telephone Company. This bill will remove the control of the Idaho Public Utilities Commission from telephone charges and rates.

Sen. Larry Anderson was one of the floor leaders seeking passage of that bill. The

statements made by him quoted in the press make absolutely no sense. He stated that the deregulation bill is necessary to protect Mountain Bell from its competitors. Mountain Bell has demonstrated no need to be protected from competitors; it has none and there are none, in the foreseeable future.

Mountain Bell is an extremely healthy monopoly that needs no protection. The only purpose for this legislation is to provide a multi-million dollar annual windfall to its officers and shareholders.

An immediate and huge increase in telephone charges to the public will result. The increase will be so great that emergency relief must be provided for the people on Social Security and fixed income so that they won't lose their telephone service.

It is difficult to imagine why Anderson would accept the responsibility for carrying this bill. The only answer is that in his 8-county district his seat is certainly considered safe. This he can support this boondoggle and expect a major contribution from Mountain Bell in his next political campaign.

### Speeders want 65 limit

You and every other driver on motor vehicles on the interstate know that speed kills, as has been determined by government and private highway safety engineers.

We have been warned in the Idaho Drivers Manual that speed is a major factor in many

motor vehicle accidents.

The news is becoming widespread that Senator Steve Symms is sponsoring a bill in Congress to raise the highway speed limit from 55 to 65 mph, and in recent days the evening news has been giving some details.

There has been no public clamor or mandate to increase the speed. Very little discussion has been heard at club meetings and coffee breaks.

The cry for increased speed is made by the speeders themselves and by dealers and manufacturers who profit on highway radar and CB devices. The speeders pervert and misuse the devices to thwart the police. The devices are advertised across the nation in slick paper magazines read by the affluent and elite.

Congressmen and their aids travel extensively on the interstate with tight schedules and many appointments to meet. The grass roots has not spoken yet.

Burley

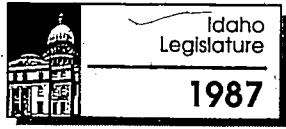

### Cartoon brings offense

As Catholic Christians, my husband and I are deeply offended by O'Donnell's cartoon of March 23 depicting Pope John Paul "giving orders" to a statue of Mary, the mother of Christ.

True followers of non-Christian faiths would shrink from such insult and blasphemy. Obviously O'Donnell has absolute-

Brian O'Neill is president of Insurance Institute for Highway Safety.

# Senators want gas tax hike cut back

BOISE (AP) — Concerned about the potential impact on struggling farmers and other Idaho businesses, a Senate committee has recommended that the House-passed three-cent increase in the state fuel tax be scaled back to just two cents.

On a 7-4 vote Tuesday, the Senate Transportation Committee sent the measure to the full Senate with a recommendation that the reduction be made in the proposed hike. Critics of the tax increase acknowledged the deteriorating condition of the state's transportation network, but they warned that the Idaho economy was too fragile to withstand the shock of the House-passed hike.

If the committee's recommendation is endorsed by the full Senate, the bill would have to go back to the House for consideration of the change, and some officials feared with the

to adjust picking up steam any tax hike might be to do for the year.

With the backing of needed highway maintenance and other work constantly growing and building to near \$1 billion, state Transportation Department officials said more state revenue is needed if the highway system is to be preserved.

In addition, Department Chief Dean Tisdale

pointed out that the federal government is gradually withdrawing its support through distribution of federal fuel tax money back to the states. The \$8.6 billion federal highway distribution bill President Reagan now considering a veto on Tisdale said, would actually provide Idaho with \$11 million less in federal road money than it has received in the past.

Under the House-passed version, the three-cent increase, pushing to overall fuel tax to 17.5 cents a gallon, would generate an extra \$7.6 million for the state. \$5.4 million for counties and local highway districts, \$2.2 million for cities and \$700,000 for the state police. The reduction recommended by the Senate panel would cut those amounts by a third.

Supporters of the higher increase pointed out that fuel taxes in surrounding states are already higher than Idaho's current tax.

### Tax removal up for vote

BOISE (AP) — Legislation removing the sales tax from food stamps is on its way to the House floor for a vote.

The Revenue and Taxation Committee on Tuesday sent two bills on sales taxes to the floor for a vote, which should come late this week under normal procedures.

One bill removes the sales tax from food stamps to meet a federal requirement. But it also says

If the federal government approves, Idaho will use an offset program giving food stamp recipients an extra 5 percent to cover the cost of sales tax.

A companion bill removes the sales tax from a federal program providing supplemental nutrition to women, infants and children.

Idaho has been advised that if it does not quit charging sales tax on food stamps, the state could lose the \$36 million per year program.

## Legislative log

**By The Associated Press**

**SB1077 (Judiciary and Rules)** — Eliminates imprisonment as possible penalty for an employer who penalizes an employee because of prospective jury service.

**SB1084 (Education)** — Changes the calculation of elementary support units for enrollment of less than 300 average daily attendance.

**SB1064 (Commerce and Labor)** — Includes computer programs within definition of a trade secret for inclusion under the Idaho Trade Secrets Act.

**HB154 (Health and Welfare)** — Provides for the measure of occupational therapists.

**HB126 (Revenue and Taxation)** — Eliminates property taxing authority of auditorium districts of 100,000 or more population.

**HB33 (Health and Welfare)** — Provides for appointment of an administrator for the Commission for the Blind.

**HB40 (Business)** — Repeals archaic law of governance of mutual benefit associations.

**HB41 (Business)** — Amends existing law to correct a code citation for the Idaho Securities Act (Blue Sky Law).

**HB44 (Commerce, Industry and Tourism)** — Excludes land surveyors when acting in their professional capacity; from licensure under the state Public Works Contractors Law.

**HB73 (Transportation and Defense)** — Confirms the filing time limits for candidates for countywide highway district commissioners with general election requirements.

**HB74 (Transportation and Defense)** — Clarifies requirements for contracts and bids of highway districts.

**HB78 (Revenue and Taxation)** — Further defines alcohol for the purposes of the motor fuel tax.

**HB83 (Judiciary, Rules and Administration)** — Changes certification period for certified shorthand reporters from two years to one year.

**HB87 (Business)** — Eliminates requirement that bank in liquidation proceedings be notified of court proceedings on the part of the director of the Department of Finance to sell, compromise or compound any bad or doubtful debt or claim.

**HB98 (Business)** — Allows a credit union to purchase another credit union.

**HB107 (Local Government)** — Increases minimum requirement for competitive bids on port district purchases or works.

**HB103 (State Affairs)** — Provides that

members of a policeman's retirement fund may include retired and active policemen.

**HB205 (Appropriations)** — Supplemental appropriation to Department of Lands for fiscal year 1987 for Range and Mineral Resource Management Program.

**Veto Sustained**

**HB149 (State Affairs)** — Deregulates certain phases of telecommunications industry.

**SB136 (Transportation and Defense)** — Makes it a misdemeanor to operate a nonauthorized emergency vehicle.

**HB147 (Appropriations)** — Raises the teacher certification fee from \$20 to \$35 every five years.

**HB56 (Resources and Conservation)** — Provides that a gully plea is the same as a conviction in a violation of fish and game laws.

**HB129 (Education)** — Provides that application for an absentee voter must be filed with the clerk one hour prior to the opening of the polls.

**HB163 (Agricultural Affairs)** — Creates Idaho Horse Board.

**HB185 (Transportation and Defense)** — Prohibits smoking on buses, with the exception of chartered buses.

**HB14 (Resources and Conservation)** — Provides that a gully plea is the same as a conviction in a violation of fish and game laws.

**Legislative Action Completed**

**HC121 (Resources and Conservation)** — Directs the Parks Department to set up a bank reservation system with preference for Idaho residents.

**HC122 (Resources and Conservation)** — Endorses the minimum stream flow agreement between the department of Water Resources and Fish and Game for the Wood River upstream from Bellevue.

**Confirmed By Senate**

**HC123 (Resources and Conservation)** — Creates the Idaho State Public Employees Retirement System Board.

**Introduced in House**

**HC127 (Revenue and Taxation)** — Authorizes Legislative Council to undertake interim study on Idaho's sales and income tax laws.

**HB359 (Appropriations)** — Allows individuals to donate to certain accounts.

**HB360 (Appropriations)** — Appropriates income tax to Department of Parks and Recreation for fiscal year 1988.

**HB361 (Appropriations)** — Appropriates \$7.6 million to Department of Transportation for fiscal year 1988.

## State's high court decides EnviroSAFE decision proper

BOISE (AP) — The Idaho Supreme Court has upheld a district court decision enjoining the state from enforcing an ordinance regulating hazardous waste dumps operated by EnviroSAFE Services of Idaho Inc.

Tuesday's unanimous high court opinion backed up 3rd District Judge George Reinhardt's finding that the Owyhee County's April 1984 ordinance covers areas already addressed in the state Hazardous Waste Management Act and regulations developed by the Idaho Department of Health and Welfare.

The court's decision was based on the federal Resource Conservation and Recovery Act and the Toxic Substances Control Act.

It included requiring operators of hazardous waste facilities to file disclosure forms indicating truck delivery routes, the kinds of wastes and materials received, and the names of the generators of the waste. It also imposed a one-cent-per-pound fee on waste deposited at the county's two dump sites, both operated by EnviroSAFE.

## How they voted

BOISE (AP) — Here is the roll call vote by which the Idaho House upheld Gov. Cecil Andrus' veto of the telephone deregulation bill. The vote was 54-29, two short of the required two-thirds majority to override a veto.

Republicans for overriding veto (53) — Allan-Hodge, Antone, Bengson, Boyd, Brimhall, Brown, Burt, Callen, Childers, Crow, Davis, Duffin, Folsing, Fry, Geddes, Gurnsey, Haagenen, Hale, Hartung, Hartung, Hay, Hill, Hooper, Kellogg, Kennick, Lintford, Loertscher, Loveland, Lucas, Mahoney, Martens, Montgomery, Nebraska, Parks, Peters, Reynolds, Robinson, Seales, Schaefer, Sessions, Simpson, Slater, Smock, Sorenson, Steele, Stone, Strasser, Struhl, Sutton, Taylor, Wood.

Republicans against (10) — R.Black, Brockme, Deardoff, Field, Infanger, James, R.Newcomb, E.Newcomb, Steger, Wood.

Democrats for overriding veto (1) — Johnson.

Democrats against (19) — Adams, P.Black, Brockme, Clavann, Givens, Hall, Herndon, Horvath, Judd, Lassen, Lloyd, McCann, McDermott, Reid, Robison, Stoelche, Tucker, Vickers, Vincent.

Absent — Crane, H.

BOISE (AP) — Here is the roll call vote by which the Idaho House voted 56-28 for a proposed constitutional amendment clearing the way for a state lottery. It was exactly the number of votes, two-thirds, required for approval.

Republicans for (37) — Allan-Hodge, Antone, Bengson, Boyd, Brimhall, Brown, Burt, Callen, Childers, Crow, Deardoff, Field, Folsing, Fry, Gurnsey, Haagenen, Hartung, Hay, Hill, Hooper, Jones, Kellogg, Kennick, Loveland, Lucas, R.Newcomb, Peters, Reynolds, Robinson, Seales, Schaefer, Slater, Smock, Sorenson, Stone, Strasser, Sutton, Wildie.

Democrats for (19) — Adams, P.Black, Brockme, Clavann, Givens, Herndon, James, Judd, Lassen, Lloyd, McCann, McDermott, Reid, Robison, Stoelche, Tucker, Vickers, Vincent.

Republicans against (27) — Brimhall, Brown, Burt, Callen, Clark, Davis, Duffin, Geddes, Hale, Hansen, Hawkins, Infanger, Lintford, Loertscher, Mahoney, Martens, Montgomery, Nebraska, P.Black, Reynolds, Robinson, Seales, Steger, Struhl, Taylor, Wood.

Democrats against (1) — Hall.

Absent — None.

### Governor should explain \$15,000 fee

Back during the 1986 campaign, gubernatorial candidate Cecil Andrus faced vague allegations of conflict of interest in two incidents raised by supporters of his opponent, Republican David Leroy.

One incident involved campaign contributions from California irrigators, whose interest in Idaho politics was unclear.

The other involved title to property on a North Idaho lake in which, it was alleged, Andrus received special treatment from a federal agency.

In both cases, Andrus brushed aside the criticisms, effectively treating them as not worthy of his consideration, and certainly not worthy of any public accounting.

Now, another question has surfaced, and again, Andrus has treated the issue as if it were unimportant. It is not.

We wonder what he will say, if anything, about the \$15,000 consulting payment he received in 1985 from one of Idaho's major lobbyists, Mountain Bell, for services he now declines to describe.

Asked about the payment this week, Andrus in effect told the questioner to take a hike, saying that since he (Andrus) was in private life at the time, it was no one's business.

Yes, Andrus was in private life and like any private businessman, he has a right to a certain level of privacy concerning his personal financial affairs.

But Andrus was not just any "private businessman." Even then, there was little doubt that he would probably be a candidate for governor. Indeed, he declared his candidacy only a few months later.

When a person seeks public office, he or she loses some of the natural privacy which they enjoy as a private citizen. That is particularly true when the privacy involves financial affairs, involves what for most Idahoans is a large amount of money, and involves companies which have multiple interests in state policy and leadership.

Andrus' constituents, the people of Idaho, have the right to ask what he did to earn a \$15,000 consulting fee from Mountain Bell.

We think he should answer the question, and if he declines, the company should provide an explanation.

The Times-News welcomes letters to the editor but will reject those it considers libelous or in bad taste. Each letter must be signed and should include the writer's mailing address. Letters of more than 400 words may be edited for length.

## Higher limits will mean higher speeds

Brian O'Neill

Many people accept the need for the 55 mph national maximum speed limit, but they don't always observe it.

They support retaining 55, according to national polls, but at the same time many people—even a majority of them on some roads—don't comply with it.

We who support 55 have no illusions about this. We know official speed limits are being exceeded. But we also know they still make a difference because they, in effect, set an unofficial upper limit of speed that most motorists won't exceed.

If the speed limit is raised to 65 mph, most motorists who now drive between 55 and 65 will speed up. They're likely to drive between 65 and 75 because, as the superintendent of Ohio's state patrol recently explained, motorists "determine the 'police tolerance factor' for speed variations and travel at speeds equal to the sum of the legal limit plus the assumed tolerance."

Although compliance is a problem, the reason for favoring 55 is simple—higher limits will mean higher travel speeds and more deaths and injuries.

The truth, according to the most comprehensive analysis of international experience with speed limits, is that in all cases, when reductions in the posted speed alter driver behavior, lives are saved and injuries averted. The reverse is generally true as well—increases in posted speeds increase the frequency and severity of accidents.

Despite the overwhelming evidence of benefits, though, some people continue to claim 55 doesn't save lives or serve any other useful purpose, either. These claims are far from the truth.

One of the most common claims against 55 is that it's creating a nation of lawbreakers. So many otherwise law-abiding citizens violate 55, opponents say, that it's the most abused and disregarded law since prohibition. It's true that many motorists go faster than 55, but they don't break this law any more often than earlier speed limits of 65 and 70 mph were broken. In fact, speed limits are being broken on all kinds of roads with widely varying legal limits.

Insurance Institute for Highway Safety researchers recently measured traffic speeds on suburban streets and rural interstates with speed limits ranging from 30 to 55 mph. And the findings might surprise you: More motorists were found to be exceeding the limits on suburban streets, compared to those exceeding 55 on rural interstates. On one residential street with a speed limit of 30 mph, every single one of the nearly 500 vehicles measured was going faster than legal limit. Two-thirds were going 10 mph or more above the limit. In contrast, 18 percent of all motorists on rural interstates go 65 mph or faster, according to the Federal Highway Administration.

Safety isn't even a serious consideration for many speeding motorists. This is illustrated by some writers in the auto enthusiast press who say their self-proclaimed "superior driving skills" enable them to handle very high speeds safely.

No matter what speed limit is—whether it's 30 mph, 55 mph, or higher—it requires effective enforcement in order to work. A study in Sweden indicates that intensified speed enforcement on roads with high crash rates reduces the number of speeders and, in turn, crashes.

Enforcement of all speed limits, not just 55, is being aided by the increasing use of radar detectors, devices that serve no purpose other than to help speeding drivers avoid detection by police. New Insurance Institute for Highway Safety research indicates that the faster speeding vehicles are going the more likely they are to slow down rapidly when hidden police radar is activated. This strongly indicates the presence of radar detectors, especially because serious violators are more likely than others drivers to slow down rapidly.

More than one in four vehicles traveling 70 plus mph is likely to be equipped with a radar detector.

Without legal curbs on the sale and use of radar detectors, they'll proliferate and make speed enforcement increasingly difficult. On the other hand, if they're banned and enforcement improves, the already considerable benefits of the present speed limit would increase.

Highway design speed. Another myth often dredged up to support raising the speed limit is that highways are designed for fast travel, so why go only 55? But, contrary to intuitive definition, a highway's design speed isn't the one at which motorists should routinely travel. It is "the maximum safe speed that can be maintained... when conditions are so favorable that the design features of the highway govern," according to the American Association of State Highway and Transportation Officials. On most rural interstates it's 70 mph, but on many other sections of interstate it's 60 mph. These are the speeds that shouldn't be exceeded, and 55 keeps most motorists, even speeders, traveling under design speeds. Raising the speed limit to 65 mph would result in many motorists exceeding highway design speeds.

Why not raise the speed limit on rural interstates where the road makes fast driving safer? This might sound logical, but it doesn't make sense because fatality rates are actually higher on rural interstates than on urban ones—and they're especially high on rural interstates in the western part of the country. In Nevada, for example, the rural interstate fatality rate in 1985 was 3.9 per million vehicle miles, or about three times the national average. The 10 states with the highest fatality rates on rural interstates in 1985 are all western states: Alaska, Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas, Utah, and Wyoming.

From a safety standpoint, it doesn't make sense that the loudest demands to raise the speed limit are coming from these very states.

The cost of raising the speed limit to 65 mph on rural interstates would be 300 to 400 additional highway deaths each year, based on estimates by the National Academy of Sciences. The actual cost would be even higher because of the spillover effect.

Ultimately, of course, the decision about keeping or abandoning the 55 mph speed limit on selected highways is a political one. It politics dictate that the increase in deaths and injuries isn't enough to retain 55, then an important issue to take up is whether there are ways to create the anticipated deaths. Some people may claim that tougher enforcement of a higher speed limit is all that's needed. But, as I indicated earlier, compliance is hard to achieve regardless of what the speed limit is, whether it's 55 or 65; banning the sale and use of radar detectors would improve compliance, but other measures would be needed, too.

If 55 is raised on some highways, why not consider allowing motorists to drive faster than 55 only if they are wearing helmets. Another option would be to make higher speed limits conditional on high levels of observed belt and helmet use. If enforced, these are the kinds of trade-offs that might help prevent the extra deaths and injuries caused by raising the present 55 mph speed limit. On the other hand, if 55 is raised unconditionally, the consequence undoubtedly will be several hundred additional lives lost each year.

Brian O'Neill is president of Insurance Institute for Highway Safety.

## Regulatory Flexibility Act can help Idaho business climate

Gov. Cecil Andrus can take a major step forward in improving Idaho's business climate by signing H.B. 100a, the Regulatory Flexibility Act, now on his desk.

This act would reduce the cost of future regulatory requirements on state businesses. The bill would get regulators and regulated businesses together to work out alternatives to unneeded or overly costly new rules.

Sounds simple, doesn't it? Getting state agencies and private businesses to work together more closely seems like a common-sense approach. In fact, 19 other states and the federal government have enacted regulatory flexibility measures, either through legislation or by executive order.

**Pete Skamsner**

However, a number of state bureaucrats, zealously protecting their turf, have dug in their heels and are urging Andrus to veto the bill. They believe they should have the right to issue new regulations without considering the economic impact on the business involved.

The problem is that Idaho business owners are getting buried in an avalanche of rules, regulations and permits. Some new regulations are valuable in protecting consumers or ensuring safety in the workplace. But many new regulations are unnecessarily burdensome or redundant, greatly increasing costs for business owners while producing no significant benefit to the public.

Under the new law, state agencies would first issue their estimate of what degree of economic impact a new regulation would have on business. The business affected could then suggest alternative, lower-cost methods of achieving the same goal. If the agency proceeded to go with the more expensive way, it would have to state the reasons behind the decision.

The statements and alternative methods would be submitted to the appropriate state legislative committee for the tradi-

tional regulatory review. The designated House and Senate committees have the authority to review, and if necessary, overturn new regulations.

The state bureaucrats complain that the new economic analysis requirements of the bill will add to their individual agency budgets.

But we believe these additional costs will be more than balanced out by savings to agencies due to fewer contested rulings and reduced litigation costs.

For example, in 1985 the state Department of Lands issued completed new regulations on easements. Power companies soon realized that the new rules were un-

workable and began fighting their implementation. The rule was rescinded two weeks after being issued, but only after the state had spent \$12,000 putting it in place. If H.B. 100a had been in effect, the costly fiasco could have been avoided.

Given current economic conditions, we need to do everything we can to create a positive business climate in the state. The last thing we need to do is on creating volumes and volumes of costly, unnecessarily burdensome rules.

Pete Skamsner is state director of the National Federation of Independent Business/Idaho, the state's largest business organization with 7,200 members.

## Letters/ Ads, pro and con, park use prompt comments from readers

**A great piece of work**

I would like very much to thank The Times-News for their fine advertisement on page B4. That was a real great piece of work, thank you.

I know of a bug-eyed, pot-bellied, obnoxious person on television that tries to make it as simple as he is.

Times-News, tell him it really is. And with no surprises. Thanks again.

I would also like to thank all the business people and companies who sponsored the CSI Golden Eagles. That was very nice of all who were concerned. Thank you.

a public park and within the city limits, use of firearms is forbidden.

Four-wheel-drives, motorcyclists, and flying bullets, do not mix with children, horses, and joggers. In addition to the obvious danger, motor vehicle drivers bring in trash and broken bottles which pose further hazard to people and animals.

An incident Saturday afternoon involved a motor vehicle in the canyon revving its engine causing a horseback rider to be thrown and injured. Police were also involved this weekend with gun violations in the park.

I think violators of the park ordinances should be sentenced to picking up glass in the Nature Park or repairing some of the damage done to public property there by vandalism.

Let's all enjoy the City Nature Park in a way that insures it's best and safest use by the greatest number of people. Keep cars and motorcyclists out of the canyon.

CAROL MARSHALL  
Twin Falls

statements made by him quoted in the press make absolutely no sense. He stated that the deregulation bill is necessary to protect Mountain Bell from its competitors. Mountain Bell has demonstrated no need to be protected from competitors, it has none and there are none—in the foreseeable future.

Mountain Bell is an extremely healthy monopoly that needs no protection. The only purpose for this legislation is to provide a multi-million dollar annual windfall to its officers and shareholders.

An immediate and huge increase in telephone charges to the public will result. The increase will be so great that emergency relief must be provided for the people on Social Security and fixed income so that they won't lose their telephone service.

It is difficult to imagine why Anderson would accept the responsibility for carrying this bill. The only answer is that in his district this year is certainly considered safe. Thus he can support this boondoggle and expect a major contribution from Mountain Bell in his next political campaign.

motor vehicle accidents.

The news is becoming widespread that Senator Steve Symms is sponsoring a bill in Congress to raise the highway speed limit from 55 to 65 mph, and in recent days the evening news has been giving some details.

There has been no public clamor or mandate to increase the speed. Very little discussion has been heard at club meetings and coffee breaks.

The cry for increased speed is made by the speeders themselves and by dealers and manufacturers who profit on highway radar and CB devices. The speeders never mention the devices to thwart the police. The devices are advertised across the nation in slick paper magazines read by the affluent and elite.

Congressmen and their aids travel extensively on the interstate with tight schedules and many appointments to meet.

The grass roots has not spoken yet.

**Business tries to survive**

I am writing in regards to the Independent Meat Co. and the letter from Mrs. Cox of Rupert.

This is another case of small independent businesses trying to keep their heads above water and survive. You read often of small packing plants and also other businesses (you name it) having to close their doors. Farmers and ranchers have taken a whole lot more than a 15 percent cut in earnings. What I want to say, having been in business and handled Falls Brand products for several years and done business from the opposite direction, selling to them for 21 years is this: Independent Meat is an asset to the entire west—a good supporter of 4-H and civic groups. Their pluses far outnumber their minuses.

In my opinion if Mrs. Cox refuses to buy any more of their superior products, that is her loss.

**L.M. Boyd**  
What's what

Need a raise? People most dissatisfied with their paychecks are those who earn about 25 percent more than average. This, from a University of Illinois sociologist who says his studies also indicate a raise in salary rarely makes anybody happy. He claims those who get raises quickly adjust to higher levels of dissatisfaction.

Not every bartender wants to be called a "bartender." Here's one who says he has been dissatisfied with that nomenclature for 30 years.

So he's tried out some synonyms: Bartarian, Mixologist, Keg Keeper. One he likes best is Tap Master. Still uses it.

The operator of a computerized dating service contends it's no harder to get a date for a thin smoker than for an obese fresh-air fiend.

**BREATHALYZER**  
A car can be rigged with a breathalyzer that automatically lights up the vehicle's turn signals, if the driver has had too much to drink. Such a device was recently demonstrated in China. Sorry, the list of ways to beat this little rascal is too lengthy to itemize here.

In western Turkey, you can make a lot of money with a wrestling camel. If it's any good, I mean. What a camel needs to be good at wrestling is not in the references at hand. A winning attitude maybe. There's not a lot of literature on it. Anyhow, a farmer with a good camel can go to market poor and come home rich.

# Queen Mother Elizabeth talks 'Dynasty' with Joan Collins

LONDON (AP) — When soap opera queen Joan Collins met Queen Mother Elizabeth they found they had "Dynasty" in common.

Miss Collins, wearing sugar-pink satin bows and a bustle, and television's mother of Queen Elizabeth II, dressed in a lemon yellow gown and white fur stole, at a charity showing Monday of the movie "84 Charing Cross Road."

Afterward, the actress who portrays Alexis in the glibly soap said: "We discussed 'Dynasty' and the queen mother said she loved it."

Miss Collins, accompanied by developer Bill Wiggins, also was introduced to Prince Charles and Princess Diana, but refused to say what they talked about.

Members of the royal family also met two of the stars of the film, Anne Bancroft and Judi Dench, and American author Helene Hanff, who wrote the book upon which the film and an earlier play were based.

The charity showing will raise \$144,000 for the Cinema and Television Fund which helps needy people who have spent their lives working in film and television.

**Glenn Close tells aspiring actors to ignore critics**

GREENWICH, Conn. (AP) — Critics are just waiting to pounce on a failure, says acting Glenn Close, who advises aspiring actors to try it anyway.

Close blamed critics for the failure of her 1985 film "Maxie," a comedy with Mandy Patinkin as a private secretary who becomes possessed by the spirit of a fun-loving flapper.

"Critics wait for you to fail," she said. "They can make you think you

GLENN CLOSE Proud of her work

HARRY CARAY Breaking 44-year record

failed. I was crucified for 'Maxie.' I don't understand it. I don't respect it. I am proud of my work and I have no apologies."

Close spoke Monday in her hometown as part of a lecture series sponsored by the Greenwich Arts Council.

Anyone who wants to should try to act," she said. "You have to get it out of your system. If you don't ever try it, you'll wish you had."

Close's most recent film is "Fatal Attraction" with Michael Douglas, to be released in September. She has been nominated for Oscars for her roles in "The Mirror" and "The Big Chill" in 1983; and "The Natural" in 1985. She won a Tony in 1984 as Annie in "The Real Thing."

**Leslie Caron stirs trouble in 'Falcon Crest' episode**

LOS ANGELES (AP) — Two-time Oscar nominee Leslie Caron will play a mysterious French philanthropist in the California wine country of CBS-TV's "Falcon Crest."

On "Falcon Crest," Miss Caron, who received Oscar nominations for "Lili" and "The L-Shaped Room," has performed on American network television. She had a feature role in the television miniseries "QB VII."

On "Falcon Crest," Miss Caron stirs up trouble between Chase Gohbert, played by Robert Foxworth, and his wife, played by Susan Sullivan, said show spokesman David Stapi.

**Stroke keeps broadcaster from calling Cubs opener**

CHICAGO (AP) — Chicago Cubs broadcaster Harry Caray, who is recovering from a stroke he suffered last month, won't be behind the microphone on opening day for the first time in 44 years.

"It's frustrating because I feel so good, but I know I need more time," Caray, 70, said Monday in Palm Springs, Calif., where the Cubs were playing an exhibition baseball game against the California Angels. The Cubs open April 7 against St. Louis.

**Prince Hiro of Japan meets Thai princess on cave tour**

BOMBAY, India (AP) — Prince Hiro of Japan was touring some ancient caves when he encountered another royal visitor, Thai Princess Maha Chakri Sirindhorn.

The two were introduced Monday by Indian officials as they viewed wall paintings dating from the 2nd century B.C. to the 8th century A.D. in the Ajanta and Ellora caves in Aurangabad, 65 miles northeast of Bombay.

Prince Hiro arrived Thursday, and the Thai princess arrived March 10 on an 18-day visit.

The prince on Tuesday met students and professors at Bombay University.

"He was open and friendly and he called himself a historian. His commitment to history is considerable," said Mariam Dossal, a lecturer in the history department.

Prince Hiro was presented with a silver plate, a set of history books and a sandstone statue of Saraswati, the Indian goddess of learning.

Brothers and Dire Straits leader Mark Knopfler.

The 60-minute special, announced Monday, will be taped in Nashville on May 2. It is tentatively set for broadcast this fall.

The show is part of the Cinemax "Sessions" series, which has featured Willie Nelson, Waylon Jennings, Frank Zappa, James Brown and Carl Perkins.

NASHVILLE, Tenn. (AP) — "Sessions" series, which has featured Willie Nelson, Waylon Jennings, Frank Zappa, James Brown and Carl Perkins.

## Wake battle survivor installs M-K monument

BOISE (AP) — A survivor of the Wake Island battle has helped move earth to install a monument honoring the 1,200 Morrison-Knudsen Co. construction workers who defended the island against the Japanese during World War II.

Bill Taylor of Provo, Utah, delivered the 2½-ton monument to Wake Island in January, 45 years after he and hundreds of other construction workers were herded onto Japanese prison ships.

Taylor and many others spent the war in Japanese prison camps. The Japanese overran the island where employees of the Boise-based engineering and construction company were building an airstrip.

About 150 members of Survivors of the Wake Island Battle Association

Woke, Guam and Cavite live in the Boise area.

The organization decided to sponsor the monument after several of its members made a pilgrimage to Wake Island in 1985 and found monuments put up by the U.S. Marines and the Japanese. But they found nothing that told the story of the civilian construction workers who fought and died to defend Wake, Taylor said.

On Jan. 1, Taylor left Provo driving a rented truck that carried the monument. He was accompanied by the granite creation depicting company founder Harry Morrison and period construction equipment on a Navy plane to the island.

The monument was installed in

three weeks by Taylor and a crew on the island.

Most of the members of the construction team who survived the battle spent the war in Japanese prison camps throughout Asia.

Taylor was taken to a prison camp in China, where he escaped twice from the Japanese and was captured once by Chinese Communist forces. Before he reached the United States in July 1945, he had been nearly to Mongolia and had met Communist leader Mao Tse-tung.

Taylor said his recent visit included the 45th anniversary of the day he and others were loaded onto prison ships on Jan. 12, 1942.

"I can see that prison ship and all

the guys going on there, and we don't know what's going to happen. You have no freedom when you are a prisoner; you are just in their power," he said. "If you don't want to jump, they beat you. We live with these memories; this is a very traumatic thing that happened."

PG-13 Rating Introduced

A new rating category to be placed on July 1. This new category is designed to help parents and guardians make informed choices for their children. It is designated as "PG-13." Parents are strongly cautioned to give special guidance to their children under 13. Some material may be inappropriate for children under 13.

The revised three-category system of the voluntary film industry rating program is now in effect.

General audiences, all ages admitted.

## Secretary confirms Bakker affair

NEW YORK (AP) — A 27-year-old secretary has confirmed she had a sexual encounter with evangelist Jim Bakker in 1980, but she denied any use of blackmail against him, according to a report published Tuesday.

Bakker resigned last week as president and chairman of the board of PTL, which stands for "Promise Keepers" and "People That Love," after revealing that he had paid money in "blackmail" to cover up an extramarital affair seven years ago.

On Monday, however, Bakker said that a "takeover" attempt of his empire was the underlying reason for giving up his multimillion-dollar

PTL empire.

Jessica Hahn confirmed the 1980 encounter with Bakker and said she later received "a few dollars" of the \$115,000 that PTL officials reportedly paid after she complained to them about the encounter, New York Newsday reported.

She insisted there was "no blackmail" but refused to give a detailed account of her alleged part in Bakker's downfall, the newspaper said.

"I just want this whole thing to blow over and for my family to be left alone," she said.

"I didn't come forward in the first place," Ms. Hahn told Newsday. "There were other people who used

the information. But I didn't want to hurt anybody. I didn't want to hurt Jim." She refused to elaborate.

Ms. Hahn portrayed herself as a sincere churchwoman who has spent most of her adult life working for the Massapequa Tabernacle Church on Long Island, east of New York City.

"I've spent my life in the church," she said. "I was in at nights and working in the office during the day. My first job was cleaning the toilets. Nobody asked me to. I just did it."

A traveling evangelist, John Wesley Fletcher, who came to Massapequa occasionally in the 1970s, set up the Dec. 6, 1980 encounter between Ms. Hahn and Bakker in a hotel room in Clearwater Beach, Fla., Newsday said.

## Kniewel's table talk erupts in fisticuffs

MOSES LAKE, Wash. (AP) — Former motorcycle stunt rider Robert C. "Evel" Kniewel was involved in a minor altercation at a Moses Lake restaurant, police said.

A police spokesman said no arrests were made after the incident Sunday evening.

Raymond A. Silva of Moses Lake told police he and Kniewel, 46, of Butte, Mont., were talking at a table.

Silva reported that he said Kniewel couldn't ride a motorcycle as well as

another rider. Kniewel then hit Silva in the cheek, and Silva hit Kniewel in the face, Silva told officers.

Silva said he went back and finished his dinner, while Kniewel went to the restroom to wash his face.

Kniewel didn't give police a statement, but two witnesses said Silva hit Kniewel for no reason.

One of the witnesses, Jerry Dillon of Moses Lake, told police that Kniewel asked Silva to leave his table and that's when Silva hit Kniewel.

## CHICKEN DINNER \$1.30!

WE'RE ROLLING BACK PRICES TO THE 50's

Enjoy three pieces of tender fried chicken, soup or salad, mashed potatoes, the chef's vegetable, and rolls, from 5 p.m. 'til 9 p.m. in the Desert Room, Wednesdays only.

### CARTER'S LAYETTE

**30% OFF**

REG. 3.50-12.50.

Stock up now on Carter's layette basics. Carter's sturdy fabrics and quality construction are important to mom while baby appreciates Carter's famous touch. Make your selection from our colorful collection or prints and warm solid colors of pink, blue, maize or white. Limited to stock on hand. Youngworld.

### CENTURY & GRACO STROLLERS

**59.99**

REG. 85.00. SAVE 29%!

Enjoy the convenience of one-step easy-fold strollers with sturdy swivel action tires, full lie-back position, reversible carriage and multi-rotate design. Century stroller (illustrated) in navy blue, Graco stroller in grey. Special orders welcomed. Youngworld.

### ENTIRE STOCK OSHKOSH

**30% OFF**

5 DAYS ONLY!

New spring playwear in soft faded denims, fun bright prints, pretty pastels and more! Enjoy classic OshKosh style and durability in overalls, shorts, pants and tops. Limited to stock on hand. Youngworld.

## UNDER \$8

### TERRY STRETCH SLEEPERS

**5.99 OR 2 1/2**

Practical and comfortable terry stretch sleepers for sleep and play. Footed style in solid colors and prints. Newborn sizes s-m-l.

### ENTIRE STOCK TERRY CLOTH BIBS

**2.99**

Reg. 3.50-5.50. Save now on bibs for your baby or for gift giving! Great selection from Mother Maid, Alexis and LaRu.

### TRIMFIT BOOTIES, 1.29

Reg. 1.95. Save 33%. Protect your baby's little feet with Trimfit booties that won't bind or fall off. Choose medium (0-9 mos.) or large (9-18 mos.).

### MAM PACIFIERS, 2/2.29

Reg. 2/3.75. Save 38%. Recommended for newborns everywhere. Pacifiers are orthodontically correct with safe, comfortable button front.

### STERN-CRAFT BLANKETS SLEEPERS

**3.99**

Reg. 6.00. Save 42%. Popular blanket sleepers with safety non-skid soles. Washable flame-resistant 100% polyester in your choice of pastels and brights. Infant to toddler sizes, s-m-l-xl. Limited to stock on hand.

## UNDER \$10

### DIAPER BAG, 9.99

Reg. 14.00. Save 28%. Durable, washable nylon diaper bag, perfect for quick changes with padded changing pad, front drop organizer, roomy pockets for bottle and toys, sturdy shoulder strap and waterproof dirty duds pocket. Assorted colors.

### INFANT & TODDLER SUMMER PLAYWEAR, 9.99

Reg. 14.00. Save 29%. Summer sunsuits, rompers and short sets for boys and girls. Print and appliqued styles.

### NEWBORN SWEATER SETS, 9.99

Reg. 14.00. Save 29%. Soft knit sets that baby will love. Sets include sweater, hat and booties.

### NEWBORN SPRING DRESSES 9.99

Reg. 12.00-16.00. Timely savings on pretty rosebud prints and solids colors. Two and three piece sets.

### CREEPERS FOR NEWBORNS, 8.99

Reg. 12.00. Save 25%. One-piece creepers with snap crotch and elastic leg closures. Assorted prints for boys and girls.

### KNIT COVERALLS, 9.99

Reg. 14.00. Save 29%. Soft and sturdy coveralls with cute applique designs. Infant sizes 3-24 months.

### SLEEPERS FOR NEWBORNS, 9.99

Reg. 14.00. Save 20%. Stretch interlock knits in soft pastel prints and applique designs. Youngworld.

## Coors to hike barley contracts

By BOB FREUND  
Times-News writer

BUHL — Buhl farmer Gary Grindstaff began sowing more acres of malling barley on Monday to fill beer mugs in New York and New Jersey in 1988.

Adolph Coors Co. will buy at least one-quarter more barley from Grindstaff and other growers in four states this year as part of the largest crop increase in the company's history.

"We're increasing our barley production by 75 percent across the board," said John High, commodities manager for the Golden, Colo., brewer. The increase is likely to be larger in Idaho because of a freeze that trimmed its 1986 purchases.

Coors now is completing contracts to purchase 3.8 million bushels of Idaho barley this summer and fall at an estimated cost of close to \$13.5 million. That is about 30 percent of the company's use, he said.

The brewer makes contracts with 450 Idaho farmers like Grindstaff to raise three special varieties of malling barley.

The bigger crops will propel Coors' move into new markets along the East Coast and supply sales increases of its labels nationwide. Coors' sales last year topped 15 million barrels for the first time.

It also expanded into the populous New York and New Jersey markets, which account for 10 percent of the nation's beer consumption. "We plan to be in all 50 states by the end of the decade," said Wendy Goald, Coors' spokeswoman.

The barley that comes out of the fields late this summer will be brewed and sold as beer in 1988 and 1989. Farmers in Idaho, Colorado, Wyoming and Montana will grow about 12.7 million bushels on 150,000 acres, based on company figures.

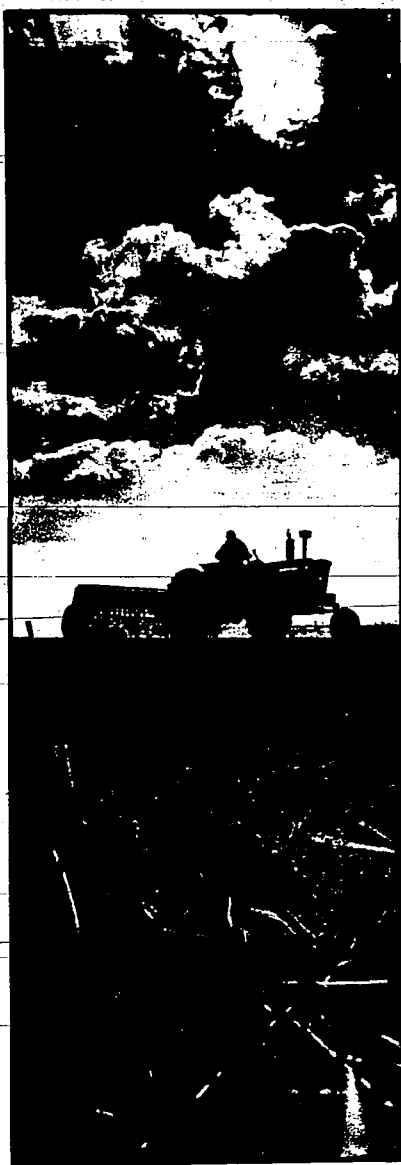

In Idaho, Coors will book more acres of barley from 430 farmers the "line" at least another 20 growers, most of whom have been on a waiting list to land a Coors contract.

The farmers will be earning about 15 cents per bushel less than last year. Prices will range between \$3.15 and \$3.25 per bushel, depending upon the variety. But farmers also are paid more for better quality grain, and Coors guarantees to buy the barley.

"It's still better than other grains," said Grindstaff, who began planting on land at the farm elevator in Buhl on Monday. "It's a good cash crop."

## Committee readies jail bond campaign

By PAT MARCANTONIO  
Times-News writer

TWIN FALLS — A new Twin Falls County Jail will soon be the topic of discussion at civic clubs and town meetings. The Jail Advisory Committee launches its promotional campaign.

The committee, composed of county residents, formed a strategy on Tuesday for promoting a bond to finance a new 90-bed, 27,833-square-foot jail costing approximately \$3.8 million. But the group is waiting for further information to pass on to the public, such as how much revenue from reinvestment of the bond money the county could obtain.

The larger jail proposal of two years ago would have cost \$8.8 million to build, County Commissioner Marvin Hempleman told the committee. But with estimated revenue from reinvestment, the amount of the bond issue was knocked down to \$6.2 million.

He said the County Board of Commissioners expected today to obtain reinvestment information from bankers. The commissioners are also expected today to approve May 12 as the date of an election for county residents to approve a 10-year bond, which would make a lease-purchase agreement "impossible," considering potential lease payments of \$300,000 to \$400,000, she said.

Other committee members said they had been asked about selling with them.

jail committee.

At the Tuesday meeting the business at hand was promoting the bond issue.

Committee members agreed to make presentations to civic groups, organize town meetings, put together a brochure and provide copies of the proposed floor plan of a new jail.

Part of the information the public will see is hearing is how much will cost the county if the bond fails and the jail is reduced to a holding facility.

County officials estimated an annual cost of \$454,200 for adult and juvenile inmates, based on 1986 figures. Project Manager Jack Mudd said the costs include boarding at \$20 a day for adults, boarding at \$40 a day for juveniles and transportation costs.

Some committee members said they had already been questioned about the project, including whether the commissioners had looked at funding alternatives.

Even with a lease-purchase agreement, said Felton, the county would have to come up with payments. Under budgeting restrictions, the county would be allowed to increase its budget by about \$30,000, which would make a lease-purchase agreement "impossible," considering potential lease payments of \$300,000 to \$400,000, she said.

Other committee members said they had been asked about selling with them.

county property to finance a new jail.

The county had lots of acreage, but little of it was available to sell, Felton said, using landfills as an example. At any rate, the county assessor was making a list of county holdings for review, she said.

Some people wanted to know about the possibility of a regional jail. Hempleman said surrounding counties might not participate in a regional plan because, unlike Twin Falls County, they are not being "pressed" into obtaining a new jail.

Twin Falls County Commissioners agreed to put another bond issue before the public, as soon as possible, as part of a court order resulting from a lawsuit against the county over the present jail.

The court agreement includes a cap on the jail population. Because of the cap, the county must transport inmates frequently into the housed in other jails.

Muddoon suggested the commissioners reply in writing to the questions to use in a brochure.

After the discussion of printing a new jail through brochures and meetings, Muddoon urged the committee members to use an individual approach as well.

"We need to communicate with people about the jail," he said. "If there are questions, go one to one with them."

## Irrigators approve formation of Oakley Fan area district

New district free to offer plan to recharge 'critical' aquifer area

By RONDA TAYLOR  
Times-News correspondent

BURLEY — Irrigators in the Oakley Fan area Tuesday voted overwhelmingly in favor of forming the Southwest Irrigation District.

Of the 167 pumpers who voted, 142 approved the proposal, while 25 opposed it. The measure needed a two-thirds majority to pass, and received the approval of 85 percent of the voters.

Results were unofficial Tuesday night. The Cassia County Commissioners must meet within the next 10 days to ratify the vote, according to Southwest Irrigation attorney Bill Parsons. He believes the commissioners will hold a special meeting on Monday to make the vote official, he said. The district may begin operating soon after gaining the commissioners' approval.

The newly approved Southwest Irrigation District covers 135,000 acres in Cassia and Twin Falls counties, which about 100,000 acres of irrigated land.

Tuesday's election followed four years of studies and proposals on how to recharge the Oakley Fan aquifer, which has been decreasing in depth an average of between 2 to 4 feet a year since the 1950s.

The state has declared the Oakley Fan a "critical area," and state officials have said that the land may be adjudicated if proposals aren't enacted to stabilize the ground water level. Prior to the election, U.S. Bureau of Reclamation Study Coordinator Ron Golus estimated that up to half of the area currently farmed could be forced out of production if the Oakley Fan is adjudicated.

With the formation of the new district, local irrigators are free to recommend a plan that can be introduced to the U.S. Congress with a request for federal funds, probably in spring of 1988.

Most of the proposals currently under analysis involve bringing additional surface water into the district by diversion canals. The additional water could be used either directly for irrigation or used to aid existing wells. Water brought into the area could also be used in injection wells or in percolation ponds that would recharge the aquifer.

In addition to voting on the district proposal, pumpers selected directors for the newly formed district. Galen Myers was chosen as director of District 1, Grant Wyatt for director of District 2, and Gary Wayment for director of District 3.

## Minidoka rejects 10-year school levy

By ADELL HARVEY  
Times-News correspondent

RUPERT — A 40-year tradition ended in the Minidoka School District Tuesday, when the district's proposed \$455,633, 10-year plant facilities levy went down to defeat.

The levy, which required a two-thirds majority vote, garnered only 59.3 percent of the 1,259 votes cast. Some 512 people voted against the levy, and 747 voted for it.

Voters at only two of nine polling places gave the measure strong support. Those were voters, including many high school seniors, casting ballots at Minico High School and voters in the Memorial Elementary School neighborhood in Rupert, where many young families reside.

Voters at other polling places were either fair-

ly evenly divided on the issue or against it. The atmosphere when the School Board trustees canvassed the ballots Tuesday night was grim.

Trustee Harold Short said, "Well, a long-standing tradition just went down." Voters have passed the 10-year, renewable levy each time it has come up since 1948.

"There's no way we could take this amount of money from our regular funds," Superintendent Gene Snapp said. "We're struggling to hold things together with our budget already." Failure of the levy means there will be no money for new buses or for routine plant maintenance, such as painting, furnace repair or roof repairs, school officials said.

"It's a necessity for the district for building maintenance and bus costs," Audrey Nelwerth,

the school board clerk and treasurer, said before the vote. "The regular school levy just carries enough funding for salaries and small items."

"They say an ounce of prevention is worth a pound of cure. I'm afraid the patrons are going to find this pound is going to be mighty expensive," said Trustee Russ Holland Tuesday night.

Board Chairman Bob Harmon agreed. "It's like a farmer telling his machinery go completely down without regular maintenance. It's an expensive proposition," he said.

"It's disappointing," Snapp said, "but we've had a lot of patron support in the past. We realize the economy is bad right now, but we did think we could get more support in that this would not be an increase in taxes, but simply a renewal of a long-standing levy."

See MINIDOKA on Page B2

## Residents back child's request for admission

By The Associated Press  
and The Times-News

KETCHUM — The fear that so often accompanies consideration of admitting children infected with the deadly disease AIDS to public schools seems not to have spread to this south-central Idaho resort community.

Blaine County School Superintendent Dave Noonan announced Monday that a local couple had asked that their AIDS-infected child be enrolled in Hemingway Elementary

School. It was believed by officials to be the first case of a student seeking admission to Idaho public schools after being diagnosed with acquired immune deficiency syndrome. Tuesday, the district office had received no calls from parents in response to the announcement.

And local residents interviewed on Tuesday expressed nothing but support for the child, whose name and age were withheld to protect the student's privacy. Noonan said the child had no brothers or sisters attending district schools.

"I can understand the fear, but everyone used to be afraid of the measles," said Sheri Roghaar, who has two daughters attending Hemingway to punish the child.

"I think a lot of people just don't understand it," said Steve Walker. "People are fearful of things they don't have knowledge of."

Richard Meyer, a teacher at district schools, said the greater danger was from the publicity the case could bring.

"I hope the press doesn't make a big issue out of this, with this child having to go to school," Meyer said. "I think that would be about as inhumane a thing as possible."

Information about the manner in which the student contracted AIDS and how far the disease had advanced also was being withheld.

Noonan said that the district would learn the case much like any other infectious disease, except for the high profile status of AIDS.

"We look at each individual on a case-by-case basis."

Callen's proposal was opposed by the Idaho Education Association, which said reducing the student-teacher ratios would do more to help children learn than keeping them in the classroom.

Rep. Herm Steger, R-Boise, a member of the Education Committee, also opposed the idea, calling parent-teacher conferences a "vital part of the relationship" between parents and teachers.

The committee killed the bill with Rep. Cella Folkings, R-Buhl, and Rep. Russ Newcomb, R-Twin Falls, voting to support Callen's idea.

## Computer problems at H&W continue to draw complaints

BOISE (AP) — The Idaho Department of Health and Welfare said it is making strides to correct a long-standing problem of payments experienced since start-up of a new computerized welfare eligibility system last October.

But the Idaho Hunger Action Council schedules a news conference at the state Capitol on Monday to demand that the Idaho Legislature investigate continuing Health and Welfare problems it contends are hurting the state's poor.

"The department prioritizes its work in making this computer system work, regardless of the social consequences of leaving 15 to 20 percent of our low-income population in financial chaos," Council Executive Director Wanda Nicholson said in a press release. "The situation is absolutely unacceptable at this time."

And Idaho Department of Health and Welfare employees plan to file grievances this week against the agency to protest continued problems with the computer system, a union official said.

Warren Lundquist, business manager for Service Employees Union Local 687, said Monday that the grievances will be filed in the department's regional offices by business eligibility workers who are members of the union.

Lundquist said the employees are frustrated by what they claim is an unworkable computer system that is making their job difficult. The situation is "absolutely unacceptable at this time," he said.

Health and Welfare Director Rich Donovan said H & W will open local "help desks" around

the state during the coming week to aid welfare recipients or applicants still having problems with benefit payments.

The decision to open 23 telephone assistance desks in all seven of the department's regions came during a statewide meeting of regional directors and eligibility program supervisors, Donovan said.

"Not only should this help the clients, but it should help the department identify what kinds of cases are causing problems," he said. "One complaint might be an 'isolated instance, but if we hear the same thing over and over, we'll know we have a system-wide problem."

Several "help desks" will be set up in the Magic Valley, including the following: Region V (Blaine, Camas, Gooding, Lincoln, Minidoka, Jerome, Twin Falls and Cassia counties); Northside, 324-8144; Mini-Cassia, 678-1131; Twin Falls/Southside, 734-4000; Region IV (Elmore, Valley, Ada and Boise counties); Glenns Ferry, 358-7424.

The union said representatives of Idaho Hunger Action Council blame problems with the \$3 million computer system, installed in October, for delays in distribution of food stamps, medical assistance money and Aid to Dependent Children funds to recipients.

The union members will ask two things in their grievances, Lundquist said. "They either want the system to work or they want an alternate system put in, and they don't want to wait two systems as they are now," he said.

Department employees are See WELFARE on Page B3

## Callen tries again to keep kids in class

By JANE ROBISON  
Times-News writer

BOISE — State Rep. Jerry Callen, R-Jerome, was unsuccessful again on Tuesday in his campaign to see students spend more time behind their desks.

Callen briefly renewed his campaign to keep children, and teachers, in the classroom longer, this time by not allowing time off for parent-teacher conferences.

His efforts were thwarted by the House Education Committee, which generated a lot of feedback, especially from schoolchildren.

Callen said Tuesday the idea generated a lot of feedback, especially from schoolchildren.

# Buhl man drowns in raft incident; 1 rescued, 1 missing

By Associated Press and The Times-News

NEWPORT, Ore. (AP) — A Coast Guard helicopter landed on rough water Monday to rescue a man whose inflatable raft was swept into the Pacific, but a companion pulled from the water was dead and a third man was missing.

Troy Dean Stevens, 20, of Buhl, Idaho, was pronounced dead at the hospital about five hours after his body was pulled into the helicopter that landed in the surf near Waldport.

The Coast Guard resumed its search Tuesday for Eric Charles Mann, 19, of Albany.

Troy Dean Stevens was remembered Tuesday by friends in Buhl as an outstanding athlete and student.

Tom Tappen and Carolyn Walker, both of Buhl and friends of the Stevens family, said Troy Dean is a son of Larry and Gloria Stevens. The parents were in Oregon Tuesday

after receiving word of the accident. The young man's father is in charge of the field department of Green Giant Co. in Buhl, and the family moved to Buhl about eight years ago from Minnesota when Larry Stevens was transferred to the Buhl plant. His mother is employed at Salsbery in Buhl.

Troy was active in basketball and track while attending Buhl high school and on graduation was granted a track scholarship to attend Eastern Oregon State College. He and other members of his family were also active in the Reformed Church of Twin Falls.

His survivors also include two younger sisters, Nancy and Carrie Stevens, both of Buhl.

Boatswain's Mate 2nd Class Tom Herzog said a ground party was sent to the beach about a 15-mile stretch of coastline Tuesday, while a helicopter was being used to search the surf.

Mann's companion, Russell Andrew Wakehouse, 28, of Ketchikan, Alaska, was treated and released late Monday from Pacific Communities Hospital in Newport, a spokesman said.

The surf line in the middle of the "T" lye, within 500 yards of the beach," said Lt. Jeff Pettitt of the North Bend Air Station, who piloted the rescue helicopter. "It was far enough that they couldn't be reached by land-based swimmers and close enough (to shore) that it was too rough and too shallow for a small boat to get in."

The two men were 25-40 feet from each other, and one man was conscious enough to wave at the helicopter, Pettitt said.

The three men, all students at Eastern Oregon State College in La Grande, were spotted in the raft near the mouth of Alsea Bay about 12:30 p.m. Monday, according to Whittier Patrick, commander of the Coast Guard station at Yaquina Bay.

About an hour later, a man called the Coast Guard to report seeing a

deflated raft in the surf line on the south side of the bay.

Rescuers, who included members of the Waldport Fire Department and the Seal Rock Fire and Rescue Unit, spotted two men in the surf about an hour later, Patrick said.

The core-body temperature of Stevens, the last to be pulled into the helicopter, had dropped to 80 degrees, Patrick said.

Coast Guard helicopters have built-shard, watertight bodies that can land in the water, but Pettitt said the maneuver was seldom used.

"It was pretty hairy," said Pettitt. "We were trying to land in the water between the incoming waves and we had a 4-to-8-second period before the next wave would come in. The seas were running 8 to 10 feet

above the level of the ocean we were sitting in."

As each wave would come in, Pettitt said he had to lift the helicopter above the waves, then come back down to make another attempt.

It took four or five attempts before helicopter crewmen could complete the rescue of the two men in the water.

was written by an agency under fire that is attempting to deflect any responsibility away from itself," Ward said.

Twenty-six men and one woman were trapped by the fire a mile inside the mine as they were trying to set a world longwall coal-mining record. Only one man trapped in the section escaped.

Emergency mining operated the mine for UP&L at the time of the fire, but the utility since has absorbed Emery and now operates the Wilberg and its other central Utah coal mines.

Officials — at Savage Industries, Emery's parent company, had no immediate comment. The companies have 30 days in which to contest the citations by requesting an administrative hearing with the federal Mine Safety and Health Review Commission, an independent agency. Each citation carries a possible civil penalty of up to \$10,000.

## Federal agency cites mine owner

SALT LAKE CITY (AP) — The owner and operator of the Wilberg Mine were cited Tuesday for nine alleged violations of federal mine safety standards which, investigators said, contributed directly to the deaths of 27 miners in a 1984 fire.

The federal Mine Safety and Health Administration issued a total of 34 citations against mine owner Utah Power & Light Co. and former operator Emery Mining Corp., as a result of its fire investigation.

Earlier this month, UP&L reached an out-of-court settlement with the victims' families, who had filed wrongful death lawsuits seeking damages of \$250 million. Terms of the settlement were not disclosed.

The agency also released on Tuesday a preliminary report on the disaster, which repeated investigators' earlier findings that the fire originated at an electric air compressor rigged to operate with its heat sensor and on-off switches disconnected.

Contributing factors in the miners' deaths, the agency said, were "inadequacies in escapeways, alternate travel routes, and evacuation and self-rescue training, as well as a delay in starting evacuation" after the fire broke out the night of Dec. 19, 1984.

UP&L spokesman John Ward denounced the report's conclusions as "severely flawed" and said it was highly likely the company would appeal the citations.

He also accused MSHA of falling to "recognize the inadequacy of its own mine safety requirements" and said UP&L officials were not convinced the fire originated at the air compressor.

Donald Huntley, an MSHA district manager who took over the investigation last October, said the cause of the fire "is not quite clear yet," but the final report expected in several months will fully detail investigators' conclusions.

However, he said, the mine's operators should have recognized the dangers associated with the faulty compressor and other alleged safety violations.

"The whole report reads like it

was written by an agency under fire that is attempting to deflect any responsibility away from itself," Ward said.

## Group backs porno charges

POCATELLO (AP) — An Arizona-based pro-family legal organization has agreed to help the city of Pocatello prosecute the Front Page adult bookstore on sexually-charged charges.

The Front Page is being represented by Halley Attorney B. Keith Roark, a former Blaine County prosecutor.

The intervention by Citizens for Decency Through Law of South-Idaho, Ariz., came at the request of Chief Deputy City Attorney Nancy Ferris. CIDL attorney Bruce Taylor said, the group will pay its own costs.

It's the second time CIDL has agreed to help the city. In the mid-1970s, the group's attorneys assisted in the case against the Gallery Theater, a former adult movie theater.

Taylor and Mrs. Ferris are scheduled to appear in District Magistrate Court on Wednesday to argue motions on trial procedures.

A June 18 trial has been set on the obscenity charge, a misdemeanor. It's the second trial date set involving the downtown adult bookstore since Pocatello officials acted on a citizens' complaint alleging the sale and distribution of obscene materials last July. The owners of the bookstore pleaded innocent.

Idaho law prohibits the sale, display and distribution of what each community considers sexually explicit material. Violations carry a maximum penalty of six months in jail and a \$500 fine.

The movement of pornography from the "back alleys" of the metropolitan areas onto the "front streets in small communities and urban areas," is one of CDL's main concerns, Taylor said.

"Most smaller communities like Pocatello are really defenseless and they need government to enforce obscenity laws," he said. "Those rural and urban communities are the first to feel the brunt of the national pornography syndicate and are also the first to react to battle its introduction into their cities."

Independent Meat Company vs. L.Z. International Inc. The plaintiff seeks \$15,881.61, interest, costs of suit and attorney's fees.

Charles S. and Hazel D. Sather vs. Tom and Janet Phillips. The plaintiffs seek a monetary sum, interest, costs of suit and attorney's fees.

Michael Goehardt vs. Mitchell P. McDowell. The plaintiff seeks damages and attorney's fees.

Now some school financial measures can be approved by a 50 percent majority.

According to Snapp, the governor is expected to sign the bill within a day or two, but it will not be in effect until the first of July.

The bill also requires voter registration, and at this point, we don't know if this will be done by us or by those at the county courthouses," he said.

The defeat of the levy came despite an all-out effort by Minico High School's 15-year-olds.

Balth Heinrich, clerk at the Minico High School polling place, said that eligible seniors were encouraged to

vote as part of their government classes. Wes Patterson, government teacher, said about 90 of his students exercised their right to vote.

He emphasized that while students were taught all the facts of the levy, they were not told how to vote. "We got them down there primarily to teach them the procedure of voting," Patterson said.

According to Heinrich, however, most of the students appeared to be strongly in favor of the levy, which passed at Minico by a 137-41 margin.

The kids were so excited by the procedure," she said. "Many of them wanted information as to how to register for general elections."

Shoshone — Jerred Ray Irish, 43, of Shoshone, died Tuesday, March 24, at the Veterans Hospital in Boise.

The service arrangements are pending and will be announced by Reynolds Funeral Chapel in Twin Falls.

Oakley — Greg Gorrige, 28, of Boise, and formerly of Oakley, died Tuesday in Boise.

The service arrangements are pending and will be announced by McCulloch's in Burley.

Falls. Burial will be in Clover Lutheran Cemetery. Friends may call at the White Mortuary Chapel in Twin Falls today from 5 to 8 p.m., and on Thursday from 9 to 11 a.m. The family suggests memorial contributions to the Good Shepherd Home of the West or the Immanuel Christian Life Center.

Filer — A graveside service for Eugene Ball, 67, of Filer, who died Sunday, will be held today at 2 p.m. in Sunset Memorial Park. Military rites will be under the direction of the Magic Valley Area Veterans and Auxiliary. White Mortuary is in charge of arrangements. The family suggests memorial contributions to the Veterans of Foreign Wars or the Heart Association, and may be left at the mortuary.

Boehl, Karl Pope of Wendell; Louise Rosen of Murtaugh; Diana Thomas and daughter of Filer; Mrs. Michael Thompson and son of Jerome; and Robert Tupper of Hagerman.

CASSIA MEMORIAL Admitted George Buzz of Burley; Alberto Morales of Rupert; and Orville Johnson of Heyburn.

## District court

TWIN FALLS — The following cases were recently filed in 50th District Court in Twin Falls:

Eddie and Fae Nichols vs. Harold Armstrong, R. Veri Hansen and Victor Cypher dba Armstrong, Hansen, Cypher and Company. The plaintiffs seek \$12,000 plus interest and attorney's fees.

Safeo Insurance Co. and Idahoone Farms Inc. vs. Carma L. Cagle and George Kelley. The plaintiffs seek

Explicit material. Violations carry a maximum penalty of six months in jail and a \$500 fine.

The movement of pornography from the "back alleys" of the metropolitan areas onto the "front streets in small communities and urban areas," is one of CDL's main concerns, Taylor said.

"Most smaller communities like Pocatello are really defenseless and they need government to enforce obscenity laws," he said. "Those rural and urban communities are the first to feel the brunt of the national pornography syndicate and are also the first to react to battle its introduction into their cities."

According to Snapp, the governor is expected to sign the bill within a day or two, but it will not be in effect until the first of July.

The bill also requires voter registration, and at this point, we don't know if this will be done by us or by those at the county courthouses," he said.

The defeat of the levy came despite an all-out effort by Minico High School's 15-year-olds.

## Minidoka

Continued from Page B1

The board will consider ways to cut back and may consider trying the levy again if pending state legislation is approved.

Snapp said that Gov. Cecil Andrus has a bill on his desk to change the percentages needed for levy passage in the future.

"Depending on a district's indebtedness, the bill could change the required voter approval to anywhere from 55 to 66 percent," Snapp said.

"However, it could hurt our district, where patrons supported our last bond issue to build the new school increasing our indebtedness. We could still require close to a two-thirds majority."

Now some school financial measures can be approved by a 50 percent majority.

According to Snapp, the governor is expected to sign the bill within a day or two, but it will not be in effect until the first of July.

The bill also requires voter registration, and at this point, we don't know if this will be done by us or by those at the county courthouses," he said.

## Welfare

Continued from Page B1

Currently issuing the aid through the computer and manually.

Donovan said about 85 percent of the food stamps, Aid to Families with Dependent Children, Medicaid and Aid to the Aged, Blind and Disabled benefits paid out by the department last month were processed through EPICS, the Eligibility Programs Integrated Computer System.

The rest were handled manually, as they were before last October.

"Our main concern all along was to make sure clients got their benefits," Donovan said.

In fact, glitches in the process of switching to the computer system prompted the department's EPICS Inc. to ask a federal judge last November to force the department to comply with state and federal time standards for payment of benefits.

U.S. District Judge Harold Ryan rejected the request, agreeing with former Division of Welfare chief Theo Murdoch that such an order would do nothing to speed up the process.

But the complaints have continued. The Hunger Action Council alleges in a statement issued Friday

## Welfare

case-by-case basis," he said.

The decision whether to allow the student to attend classes will be made in a public meeting of the Blaine County School Board, probably by mid-April, the superintendent said. The child will be given a case number, so his or her name is not revealed, even to the board.

## AIDS

Continued from Page B1

If the school board approves the request, the student plans to begin classes immediately.

State Epidemiologist Charles Brokopp has said that since AIDS is believed to be transmitted solely through sexual contact or intravenously, a student suffering from AIDS poses no greater health risk than other students. He has said there is no reason to restrict a student's attendance simply for having AIDS.

# Briefly

## Haig declares GOP candidacy

NEW YORK (AP) — Alexander M. Haig Jr. entered elective politics Tuesday with a bid for the presidency, pledging to raise a tax increase and warning against "arms control for arms control's sake."

Declaring his candidacy for the 1988 Republican presidential nomination at a news conference in the Waldorf-Astoria Hotel, Haig emphasized his experience as a former secretary of state, NATO commanding general and White House chief of staff.

But he conceded he is a longshot in the political battle to succeed his former boss, Ronald Reagan.

"It remains to be seen whether or not Al Haig, with my experience and background, is going to be the best candidate to meet the perceived needs of the American electorate in 1988," he said.

## Marines arrest former guard

WASHINGTON (AP) — The Marine Corps has arrested a second former embassy guard on suspicion of espionage as a result of a closed investigation of Sgt. Clayton J. Lonestree, the service disclosed late Tuesday.

The former guard was transferred from the Marine base at Twentynine Palms, Calif., to Quantico, Va., Tuesday night and will be held in confinement pending an appearance before a military magistrate.

Lt. Col. John Shotwell, a Marine spokesman, identified the man as Arnold Bracy of Woodside Queens, New York City, a 21-year-old corporal whose tour of duty overlapped Sgt. Lonestree's at the U.S. Embassy in Moscow.

## Specialists back bilingual cap

WASHINGTON (AP) — Congress would send the wrong signal to school districts if it adopts a Reagan administration proposal to loosen requirements for bilingual education programs, several education specialists said Tuesday.

The Education Department objects to a requirement that students with limited English proficiency be taught in their native languages to the extent necessary — a system known as transitional bilingual education.

Under current law, only 4 percent of the money in the \$143 million program can go to school districts that use other methods.

"The administration wants to get rid of that cap," said Carol Pendas Whitten, director of the department's Office of Bilingual Education told a House Education and Labor subcommittee. "We believe through allowing all methodologies we can better address (non-English-speaking students') needs."

## Contra filibuster continues

WASHINGTON (AP) — Senate opponents of aid to the Nicaraguan Contras failed again Tuesday to shut down a filibuster and move toward a vote on a six-month halt in military assistance to the rebels.

The vote was an evenly divided 50-50, or 10 votes short of the 60 needed to end a filibuster.

Senate Majority Leader Robert C. Byrd, D-W.Va., said another attempt would be made on Wednesday and possibly yet another on Thursday. "It depends on how much gain we make," he said.

A first attempt to choke off the filibuster failed on Monday, with 46 senators favoring it and 45 voting against it.

However, Byrd said the real goal now is merely to rally a "constitutional majority" of 51 votes, all that would be required to kill President Reagan's request for an additional \$105 million in aid to the Contras when that request reaches the Senate floor later this year.

## Martin still hopes son survived

MARCH AIR FORCE BASE, Calif. (AP) — Entertainer Dean Martin held out hope Tuesday that his son may be alive somewhere on snowy Mount San Geronimo where the actor-flier's jet was believed to have crashed, a family spokesman said.

Dean Paul Martin, 35, a California Air National Guard captain who was piloting the F-4C jet, and the fighter's weapons officer, Capt. Ramon Ortiz, 39, of Las Vegas, Nev., disappeared Saturday over the San Bernardino Mountains.

Military rescuers who scoured the 11,500-foot mountain in an extensive air-and-ground search expressed optimism that the two-man crew may have ejected and survived temperatures in the teens and snow depths up to eight feet.

Clearing weather and diminishing winds aided the search, officials said.

## Time-release developer dies

COLUMBIA, Mo. (AP) — Takeru Higuchi, the pharmaceutical chemist who developed pills that release medicine slowly into the bloodstream, died Tuesday, it was reported.

Higuchi, who held more than 100 patents in chemistry and pharmaceuticals, died at the University of Missouri-Columbia Hospital and Clinics. He became ill during a conference last week at Lake Ozark, and cardiovascular bypass surgery was performed March 18.

Higuchi was the Regents Distinguished Professor of Pharmaceutical Chemistry and Chemistry and chairman of the University of Kansas Department of Physical Chemistry. He was also chairman of Orad Laboratories in Lawrence.

# Koop advises pre-pregnancy AIDS test

WASHINGTON (AP) — Any woman who wants to have a baby should be tested for AIDS before becoming pregnant, Surgeon General C. Everett Koop said Tuesday.

Koop's advice came during a question-and-answer period at the National Press Club in which he was asked — about — mandatory AIDS testing for people applying for marriage licenses.

"I can't understand why it is so controversial," he said. "I would think anybody who is getting married today would want to be tested and would want to know" whether his or her intended spouse had the AIDS virus.

"One of the things I think is most important about this ... is my great concern for the babies who are born to ... positive mothers," he said. "I think no woman should contemplate a pregnancy — without voluntarily wanting to be tested for the AIDS virus."

Some researchers say there is about a 60 percent chance that a woman infected with the virus will

pass it on to her newborn child. It is not clear what percentage of people with the virus ultimately develop the disease itself.

Koop, a strong opponent of abortion, answered cautiously when asked whether abortion is an option for a woman who discovers she has the AIDS virus after becoming pregnant.

"If you wanted to give her all the possibilities that were available to her, you would have to mention abortion," he said.

"I can tell you what the practice is around the country at the moment, anecdotally," Koop continued.

"These things are not reported scientifically yet, but they will be. It is my understanding that in major obstetrical clinics on the East Coast where the population has a high incidence of ... the AIDS virus that women who are pregnant under 13 weeks are being advised to have abortions and about 50 percent of those, I understand, are indeed having abortions."

AIDS, or acquired immune deficiency syndrome, is an affliction in which the body's immune system becomes unable to resist disease. There is no known cure, and some 18,000 Americans, most of them homosexuals or intravenous drug

users, have died from it.

Koop said he thinks the general resistance to AIDS testing for marriage applicants is "a hangover from the old days of syphilis" when a person with syphilis could not obtain a license unless undergoing treatment.

"But in those days our culture was quite different," he said. "If you couldn't get married the chances are John and Mary would not live together. Today, John and Mary — three-quarters of them — are living together before they get married."

"Suppose you were to make premarital (AIDS) testing mandatory in some particular municipality," Koop said.

# Court OKs drilling offshore in Alaska

WASHINGTON (AP) — Major oil companies may resume exploratory drilling off the coast of Alaska, the Supreme Court ruled Tuesday in lifting an injunction imposed to protect fishing and hunting rights of native Alaskans.

In a 9-0 decision, the court said a federal law aimed at protecting Alaskans who rely on fishing and hunting to survive applies only to land within the state and within three miles of the coast.

The ruling is a victory for the Reagan administration and oil companies that have paid \$4.2 billion to the government for leases in two Outer Continental Shelf areas of the Bering Sea.

In other action, the court:

- Said, in a 5-4 decision in a case from California, that states may require companies with federally approved mining operations on federal lands to obtain state permits as well.
- Heard arguments in an appeal by a San Francisco homosexual-rights organization seeking to label its quadrannual international athletic competition the Gay Olympic Games.
- Heard arguments in a Maryland case that will determine whether the impact on a murder victim's family may be considered when sentencing the killer to either life in prison or death.

In the Alaska oil-drilling case, the

IF YOU NEED A DRINK TO COPE, YOU NEED TO STOP. THAT'S ALCOHOLISM. IT'S A DISEASE AND IT'S TREATABLE.

CALL CANYON VIEW HOSPITAL IN TWIN FALLS PHONE 734-8760

Justice Byron R. White, in his opinion for the court, said the law was designed to protect the rights of Alaskans only within the state — an area that extends to three miles off the coastline but no further.

"We reject the notion that Congress was merely waving its hand in the general direction of northwest North America when it defined the scope of the (law) as federal lands situated in Alaska," White said.

White also said the native Alaskans failed to show there would be serious damage to fish and wildlife from the oil exploration. On the other hand, White continued, the oil companies stood to lose some \$70 billion already spent for planned exploration.

The ruling overturned an injunction issued by the 9th U.S. Circuit Court of Appeals in October 1985.

The appeals court said Interior Secretary Donald Hodel, in awarding oil leases, failed to weigh the impact on natives who hunt and fish in the region.

The court on Tuesday ordered further lower court hearings to determine whether the native Alaskans have the right to challenge the oil exploration under another federal law, the Alaska Native Claims Settlement Act.

The areas directly involved in the dispute are Norton Sound and Navarin Basin, consisting of millions of acres of seabed with potentially billions of dollars in oil reserves. Navarin Basin is more than 200 miles from the Alaska coast. Parts of Norton Sound are within about 20 miles of the shore.

## House panel approves poll closing time

WASHINGTON (AP) — Polls would close at the same time throughout the 48 contiguous states on presidential election day under legislation approved Tuesday by a House subcommittee.

The legislation, virtually identical to a measure that was derailed in the Senate last year after passage by the House, calls for all polling places in the 48 contiguous states to close at 7 p.m. MST.

Passage by the elections subcommittee Tuesday moves the bill to the full House Administration Committee.

Sentiment for the measure has been prompted by the ability of television networks to project the winners in elections based on voting in the East, before the polls have closed in western states. Supporters contend that voters may stay home from the polls if they feel the result is decided already in the earlier states.

After the 1980 election, in which TV networks used exit polls to predict the outcome of the election hours before the polls closed in the West, lawmakers began working on ways to standardize the poll hours.

## Warning set on castor oil

WASHINGTON (AP) — The Food and Drug Administration warned Tuesday that three brands of castor oil distributed in 21 eastern and midwestern states and the District of Columbia may contain a poisonous ingredient.

Two-ounce bottles of castor oil may have been sold under the brand names Rite Aid, Gray Drug Fair and Peoples Drug and may contain spirits of camphor if the label bears the 1st number A19A, the FDA said.

The FDA estimated at least 1,700 possibly mislabeled bottles may still be in consumers' hands.

While castor oil is sold to be swallowed as a laxative, spirits of camphor can result in convulsions, coma, respiratory arrest and death if taken internally.

FDA spokesman Bill Grigg said no illnesses have been reported but that "only a few teaspoons could kick off problems that could lead to respiratory difficulties and even death if prompt medical attention is not obtained."

**IRA claims W. German blast**

RHEINDAHLEN, West Germany (AP) — The terrorist Irish Republican Army claimed responsibility Tuesday for the car bombing that injured 31 officers, wives and staffers at British military headquarters in West Germany.

The outlawed IRA, fighting to end British rule in Northern Ireland, issued the claim a day after the bombing at the base of officer's mess in Rhendahlen, in northern West Germany near the Dutch border.

"British forces can count themselves extremely lucky" that none of the casualties was serious, the IRA said in a statement read to The Associated Press in Belfast. "Our unit's brief was to inflict a devastating blow but was ordered to be careful to avoid civilian casualties."

But West German federal police still could not rule out a role by the West German leftist terrorist group Red Army Faction, said West German federal prosecutor's spokesman Alexander Prechtel.

**Disney park to open in France**

PARIS (AP) — Mickey Mouse and the Magic Kingdom are coming to Europe, under a contract Premier Jacques Chirac signed Tuesday for a \$2 billion Disney theme park outside Paris.

The world's fourth Disney park is to open in 1992 on a 4,400-acre site in rural Marne-la-Vallee, 20 miles east of Paris.

French officials say it will create 30,000 new jobs and should draw about 10 million visitors a year.

"We think France is the ideal country to welcome EuroDisneyland," Michael D. Eisner, president of the Walt Disney Co., said at the signing ceremony.

Chirac told a news conference the venture marked the first time France signed a contract with a private foreign company for a project on French soil, "but I'm sure it will be a great success because it's Disney Co. and France." The French negotiators, sensitive to inroads on their culture, won what they consider important concessions from the Walt Disney company aimed at guaranteeing a French and European flavor to the theme park.

**Guide radioed avalanche call**

BLUE RIVER, British Columbia (AP) — A guide killed along with six other skiers in an avalanche radioed a frantic warning before he was swept to his death on a remote mountain, a helicopter pilot said Tuesday.

"Get out of the way! Avalanche!" Fred Pfisterer radioed as the fall of snow came crashing down Monday in the snow-capped Cariboo range, northwest of Blue River. It was the last transmission received from the group, helicopter pilot Dan Cloutier said.

Royal Canadian Mounted Police were on the mountain Tuesday investigating the accident with two avalanche experts and a local coroner, an RCMP spokesman said.

RCMP staff Sgt. David Bryce identified the dead as John Hill, 27, Chicago; Michael David Lutz, 46, and his wife Julianna Lynn Lutz, 30, San Diego; Philip Gary Marchildon, 31, and Terry Linden, 33, Phoenix, Ariz.; and Martin John Zajac, 28, a Phoenix real estate agent originally from Vancouver.

**Officer faces weapons charge**

MANILA, Philippines (AP) — An army captain under investigation in last week's explosion at the Philippine Military Academy was charged Tuesday with illegal possession of weapons, a military spokesman said.

Col. Honesto Isleta said more military ammunition was found at the house of Capt. Wilhelm Doromal, a suspect in the bombing that killed four people and wounded more than 30 others.

The explosion occurred Wednesday. President Corazon Aquino addressed a graduating class of cadets at the damaged academy Sunday.

Isleta said Doromal has not been charged in connection with the bombing.

Chief Investigator Brig. Gen. Jesus de la Cruz quoted Doromal, an explosives expert and military science instructor at the academy, as saying he had no time to return the materials after using them for his classes.

**Protest marks Romero murder**

SAN SALVADOR, El Salvador (AP) — Hundreds of college students showed past police at the U.S. Embassy on Tuesday and stood chanting "Yankee assassins!" on the seventh anniversary of the murder of Archbishop Oscar Arnulfo Romero.

They daubed anti-American slogans — "Yankee invader!" "Yankee go home!" — on embassy walls, burned a rag-and-paper effigy of Uncle Sam on the sidewalk and marched away, shouting other anti-U.S. slogans.

Romero was killed March 24, 1980, while saying Mass at a small hospital chapel in the capital. A lone gunman fired a single low-caliber bullet from a rifle into the Roman Catholic prelate's heart and fled.

No one was ever arrested. The U.S. Embassy is considered the symbol of U.S. support for the Salvadoran government, which has neither solved the case nor halted the civil war.

The students also charge that the government still is corrupt and repressive.

The demonstration was one of several planned to commemorate the death of the 62-year-old archbishop, who in his Sunday homilies denounced the violence from left and right prevailing in this small Central American country.

**Iran: Americans 'unsafe' if U.S. strikes**

NICOSIA, Cyprus (AP) — The Strait of Hormuz, the 40-mile-wide southern gateway to the Persian Gulf through which 20 percent of the non-communist world's oil passes. This has revived fears that the United States will try to close the strait. The United States has vowed to preserve free navigation in the gulf, which has been a battleground since the Iran-Iraq war began in September 1980.

The events of Lebanon could be repeated for the Americans around the world" if the United States attacks, Rafsanjani said. "If God forbid, such a thing takes place, Americans will be unsafe throughout the world."

The United States says Iran has deployed anti-ship missiles in the Persian Gulf, which he said, "but we are warning the American people to tie the hands of their leaders."

By the events of Lebanon, Rafsanjani appeared to be referring to the 1983 suicide bombings of the U.S. Embassy and Marine headquarters in Beirut, in which more than 300 people were killed, and to the abductions of Americans.

Eight Americans are among the 24 foreigners missing in Lebanon and presumed held by Moslem kidnapers. Most are believed to be captives of "extremist Shiite groups" backed by Iran.

In an apparent reference to the controversy over secret U.S. arms sales to Iran, Rafsanjani said American political leaders "have no other before testifying.

balance and have political problems." "Perhaps to undermine these domestic problems, they're saying such things (about Iran)," he said, "but these things won't solve their internal problems." Defense Secretary Caspar Weinberger said Sunday the United States is ready to protect oil tankers against Iranian attack and is making contingency plans for military action.

British, French and Soviet warships also patrol the Persian Gulf area.

Iran has attacked neutral ships in the gulf in retaliation for Iraqi attacks on its tankers, oil fields and petroleum export terminals.

**Demjanjuk defense suggests collusion among witnesses**

JERUSALEM (AP) — Defense lawyers said Tuesday four survivors of a Nazi death camp who identified John Demjanjuk as a brutal guard there "like a family," and suggested there was collusion in the witnesses' testimony.

The retired Ohio autoworker, who was born in the Soviet Ukraine, is accused of being the guard known as "Ivan the Terrible" at the Treblinka camp in Nazi-occupied Poland, Kolar, 67, to aggressive cross-examination Tuesday. He challenged Kolar's reasons for choosing the four witnesses, who also have testified in U.S. courts. Demjanjuk was stripped of U.S. citizenship and extradited to Israel in February 1986.

O'Connor said the witnesses, who identified Demjanjuk as the dreaded Ukrainian guard in photographs in 1978 and 1979, were "like a family." He implied that they consulted one another before testifying.

The United States says Iran has deployed anti-ship missiles in the Persian Gulf, which he said, "but we are warning the American people to tie the hands of their leaders."

By the events of Lebanon, Rafsanjani appeared to be referring to the 1983 suicide bombings of the U.S. Embassy and Marine headquarters in Beirut, in which more than 300 people were killed, and to the abductions of Americans.

# Carter discusses Arab-Israeli peace efforts with Hussein

AMMAN, Jordan (AP) — Former President Carter discussed Arab-Israeli peace initiatives with King Hussein on Tuesday, after arriving from Syria where he said President Hafez Assad assured him he was working to free foreign hostages held in Lebanon.

The issue of 24 foreigners, including eight Americans, missing in Lebanon and presumed kidnapped by Moslem extremists, was a focal point of Carter's discussions in Syria.

"I received the fullest assurances that every possible avenue is being explored to locate and obtain the release of the hostages safely," Carter told a news conference in Damascus, Syria, before flying to Jordan.

He said the Syrian military intervention in Moslem west Beirut last month "has certainly expanded the chances of locating the hostages" and added: "President Assad is very keen to have Syrian troops locate and work for the release of hostages."

Carter, the architect of the 1979 peace agreement between Israel and Egypt that infuriated most Arab nations, met late Tuesday with Hussein.

State-run Jordan Television said they discussed Hussein's efforts to convene an international Middle East peace conference that would include the Soviet Union along with the four other permanent members of the U.N. Security Council. Israel opposes Soviet participation in any peace talks and wants negotiations with the nations directly involved.

The broadest said that in an earlier meeting with Prime Minister Zaid Rifai, Carter "declared support for the proposed conference and the Arab position, which views it (an international conference) as the only available means to bring about a just settlement in the region."

Carter, who is staying in Hussein's palace compound, is to leave Thursday for Israel, the fifth and last stop on his private Middle East tour. He is accompanied by his wife, Rosalynn.

Foreign Minister Taher Masri said Monday he did not expect Carter to bring messages or suggestions for the Arab-Israeli peace process.

Carter said in Damascus he supports a

Middle East peace conference with the Palestine Liberation Organization involved, and that he was "disappointed by the lack of progress" in resolving the Arab-Israeli conflict.

Israel accuses the PLO of being a terrorist organization and has said it will never deal with the organization.

Israel has proposed talks with a joint delegation of Jordanians and Palestinians not linked to the PLO.

Carter told the news conference in Damascus he saw "an expression of flexibility recently that's unprecedented" from the Palestinians and any Palestinian delegation to such a conference should "be obviously controlled by the PLO."

Jordan and other members of the Arab League consider the PLO the legitimate representative of the Palestinian people.

On Monday, a Lebanese group called Islamic Jihad for the Liberation of Palestine offered to trade American hostage Alann Steen for 100 Arab prisoners in Israel. It said Steen, 47, is so ill he may die within 10 days.

"I think that's one of the most disgusting events that I've ever heard about in public life," Carter said. Israeli Prime Minister Yitzhak Shamir rejected the exchange offer.

Carter said he would not oppose an exchange if the Arabs freed were "innocent of any crime," but "yielding to blackmail" might encourage more "criminal acts."

## Terrorists threaten hostage

BEIRUT, Lebanon (AP) — Moslem kidnapers said Tuesday they are still considering the "execution" of French hostage Jean-Louis Normandin, one day after he decided not to kill him.

"The organization announces that the execution of the spy, Normandin, was not postponed and was not canceled," the Revolutionary Justice Organization said.

The one-page handwritten Arabic statement, delivered to the independent *Al-Nahar* newspaper, also said the organization had again put Normandin on "trial."

It came with a photograph showing a bearded Normandin from the knees up and wearing a red and blue track suit. He appeared to be healthy.

Normandin, 35, a lighting engineer with France's Antenne-2 television, was kidnapped March 8, 1986.

Revolutionary Justice is believed to be made up of Shiite Moslem zealots loyal to Iran's Ayatollah Ruhollah Khomeini.

On Monday, it released a four-minute videotape showing Normandin saying the group had suspended plans to kill him after appeals from Shiite religious leader Sheikh Mohammed Hussein Fadlallah and Greek Catholic Bishop Hilarion Capudji.

Fadlallah is the spiritual guide of the Iranian-backed Hezbollah, or Party of God. The militant-Shiite group denies it holds hostages, but Western intelligence officials believe it is the parent group of factions holding hostages.

The Syrian-born Capudji, the former Bishop of Jerusalem, has close ties to Yasser Arafat's Palestine Liberation Organization.

A Revolutionary Justice statement last week claimed Normandin confessed to spying for France and Israel.

The group said Tuesday it was "studying the apologies and excuses that have been put forward by the French government as well as the promises and pledges that it has assured anew."

**Burma rebels killed**

RANGOON, Burma (AP) — Government troops have killed 591 Kachin and Communist rebels and have retaken positions in northern Burma, the Working Peoples Daily reported Tuesday.

The state-owned newspaper said 175 government soldiers died while recapturing government outposts the rebels seized last November in the Hsitswan and Tapang mountain ranges. The area in Shan state is south of Namkhan, near the Chinese border.

The government offensive at Hsitswan-Tapang began last winter shortly after about 800 Communist and Kachin rebels seized the outposts, the paper said.

In the offensive, the government also recaptured the border town of Pansat-Kyukik, which the Communists had held for 17 years, it added.

## Today's Cooks

## They're smarter and faster

Serving easily prepared, appetizing, nutritious meals every night — not just once or twice a week — is a major concern for most busy people. And that includes just about everybody.

Luckily, today's cooks are smarter than ever. They know more about health and nutrition; they use a wide variety of foods prepared with taste and style, and they cook faster and more conveniently than ever before.

But they have some help — such as freezers, well stocked with frozen vegetables that are ready to be quickly thawed for salads, stir-fried or used in soups and casseroles.

Many cooks today also have microwaves. And with many families eating at different times, it's made meal preparation less of a hassle. Refrigerated meals can be warmed in just minutes in the microwave. And, the "keep warm" setting on some microwave ovens holds a meal at a ready-to-eat temperature.

Whether it's regular weeknight family dinner or a special "company is coming," here is a meal that is loaded with flavor, color and nutrition. Best of all, it is easy to prepare with the aid of a microwave oven:

**Green Salad (recipe not given)**  
Chicken And Vegetables with Pasta

**Carrot Cake**  
Fresh grated ginger and cashews add flavor — and crunch — to this meal-in-a-dish that starts with Oriental-style frozen vegetables. Add a green salad that takes just minutes to assemble.

For a dessert, a packaged yellow cake mix is transformed with the addition of frozen carrots, cinnamon, raisins and nuts into a delicious carrot cake.

For those evenings when there is just no time to cook, rely on the

casseroles and easy to assemble main dishes stocked in the freezer. This menu is based on a make-ahead frozen casserole that can be on the table in less than 30 minutes.

**Marinated Bean And Cauliflower Salad**  
Italian-Style Spinach And Sausage Casserole

**Microwave Streusel Apples**  
The casserole (not pictured) goes together quickly and with the microwave can be piping hot on the table just 15 minutes after it comes out of the freezer. A quick pass under the broiler melts the mozzarella topping, giving a golden brown finish to the dish. While the casserole is cooking, toss the thawed vegetables with a favorite Italian dressing. Round out the meal with a dessert that tastes like it took a great deal of time.

**Microwave Streusel Apples (not pictured)** takes just 7 minutes to cook in the microwave.

**CHICKEN AND VEGETABLES WITH PASTA**  
(Microwave Method\*)

6 teaspoons soy sauce, divided  
1 tablespoon rice vinegar  
3 teaspoons cornstarch, divided  
8 ounces chicken breast, boned, skinned and thinly sliced  
1 package (16 oz.) mixed oriental-style frozen vegetables\*\*  
¼ cup chicken broth  
1 tablespoon sherry

In a microwave-safe 2-quart dish, combine 2 teaspoons soy sauce, vinegar and 2 teaspoons cornstarch. Toss with chicken to coat. Let stand 5 minutes, add vegetables and microwave at HIGH (100 percent) 7 minutes. Combine chicken broth, sherry, remaining

soy sauce and cornstarch, ginger and sugar. Microwave in 2-cup microwave-safe measure at HIGH 1 minute or until thickened. Pour sauce over chicken and vegetables over noodles on a 12-inch round microwave-safe tray; toss lightly and sprinkle with cashews. Makes 4 servings.

**TIP:** To reheat, microwave at HIGH 2 to 3 minutes.

\*Recipe developed for 600 to 700 watt microwave oven.

\*\*Other 16-ounce package of mixed vegetables can be substituted.

**CARROT CAKE**  
(Microwave Method\*)

2 cups frozen carrot slices  
2 to 3 teaspoons ground cinnamon, divided  
2 teaspoons granulated sugar  
1 package (18.25 oz.) yellow cake mix  
3 eggs  
¼ cup water  
½ cup vegetable oil  
½ cup finely packed brown sugar  
¼ cup each raisins and chopped nuts

**ICING**  
Microwave frozen carrots at HIGH (100 percent) 3 minutes. Shred in food processor or blender or finely chop; set aside. Combine 1 teaspoon cinnamon and granulated sugar; mix well. Lightly grease microwave-safe tub dish; sprinkle with cinnamon mixture. In large bowl, combine cake mix, eggs, water, oil, brown sugar and 1 to 2 to 3 cinnamon using a wire whisk to mix ingredients. Fold in carrots, raisins and nuts. Spoon into prepared tub dish. Microwave at MEDIUM (50 percent) 15 minutes turning pan a quarter turn every 5 minutes. Microwave at HIGH 5 to 6 minutes or until wooden pick inserted near center comes out clean. Cool 10 minutes in tub dish. Turn cake out on plate.

**ITALIAN-STYLE SPINACH AND SAUSAGE CASSEROLE**  
(Microwave Method\*)

1 package (10 oz.) frozen chopped spinach  
8 ounces Italian-style sausage  
2 cups cooked rice  
½ cup prepared Marinara sauce  
¼ to 1 teaspoon ground black pepper

\* See COOKS on Page C2

Drizzle icing over cake. Makes about 12 servings.

**ICING:** Combine 1 cup powdered sugar, ¼ ounces softened cream cheese, 1-tablespoon milk and 1 teaspoon vanilla; mix well. Makes ½ cup.

**TIP:** Cake platter may be decorated with small fern leaves and daisies.

\*Recipe developed for 600 to 700 watt microwave ovens.

\*\*Wire whisk beats in less air than electric mixer and produces better results when microwaving.

**MARINATED BEAN AND CAULIFLOWER SALAD**  
(Not pictured)

1 package (10 oz.) or 2½ cups frozen cauliflower, thawed, drained and cut into bite-sized pieces\*  
1 package (9 oz.) or 2½ cups frozen green beans, thawed and drained  
1 medium tomato, seeded and chopped  
1 green onion, diagonally sliced  
2 tablespoons Italian dressing

Saute cauliflower, stirring constantly, over high heat in non-stick pan about 5 minutes or until vegetables are crisp-tender. Cool slightly. Combine all ingredients in mixing bowl; mix well. Marinate, refrigerated, 1 to 2 hours to allow flavors to blend. Makes 4 to 6 servings.

\*About 2 cups when cut into bite-sized pieces.

\* See COOKS on Page C2

## Book series offers recipes to reduce the risk of cancer

By TONI TIPTON  
The Los Angeles Times

The final installment of "An Ounce of Prevention," a four-volume series of easy-to-prepare recipes designed to meet the dietary guidelines for lowering the risk of cancer recommended by the American Institute for Cancer Research, is now available.

The recipes in each of the books, based on the premise that many cancers are related to diet, offer a full range of foods, from appetizers to desserts, with a wide variety of entree suggestions as well as a section on meatless entrees.

The series began as part of an educational program for donors to the organization, offering healthful but tasty menus that focus on less fat and fewer calories and that stress increases in fiber and some vitamins. But the growing correlation between cancer and diet encouraged the organization to produce the books on a wider scale.

"In 1982, the National Academy of Science's Committee on Diet, Nutrition and Cancer made several recommendations for lowering cancer risk through dietary changes," a passage from the book states. "AICR has publicized these recommendations through its Dietary Guidelines to Lower Cancer Risk."

These recommendations are consistent with American Heart Association as well as American Dietetic Association guidelines for optimum health. They include: Reduce intake of dietary fat — both saturated and unsaturated — from the current average of about 40 percent to a level of 30 percent of total calories; increase the consumption of fruits, vegetables and whole-grain cereals; consume salt-cured, smoked and charcoal-broiled foods only in moderation; and drink alcoholic beverages in moderation.

Each recipe includes the fat and calorie content per serving. There are cooking tips and storage hints plus some background information included with each recipe. But be careful. Some of the recipes are oversimplified, using terminology and explanations in the method that can be confusing. A 10-inch springform pan, for example, was referred to as a "pie pan (preferably springform type)," and a recipe for vegetable soup forgets to tell us when to add the pasta during the cooking time.

The American Institute for Cancer Research is a national organization, which provides educational programs to teach consumers how to lower cancer risk through proper diet and nutrition. The institute also funds cancer research at hospitals and universities across the country.

Copies of the four spiral-bound volumes are available for a donation of \$6 per volume. To order, write to the American Institute for Cancer Research, Department CB, Washington, D.C. 20038. Be sure to indicate which volume — winter, spring, summer or fall — is desired.

**CHIFFON CHEESECAKE**

2 cups crunchy nugget-type wheat cereals  
2 tablespoons margarine, melted  
1-tablespoon brown sugar  
2½ teaspoons grated lemon zest  
2 envelopes unflavored gelatin  
2.3 cup granulated sugar  
3 eggs, separated  
1½ cups skim milk  
2 cups part-skim ricotta cheese  
2 tablespoons lemon juice  
1 teaspoon vanilla

## Singapore offers cultural diversity and delightful cuisine

Singapore — the name is as musically magical as this tiny island metropolis.

But it's more than just a city, it's a magical, rather mystical kingdom by the sea.

You first sense the specialness of this place as your plane glides over the harbor, where a multitude of seacraft lights are reflected again and again. Glowing and shimmering, the tall-towered hotels and apartments are spread over the land.

The first jolt of reality hits when you stand on the humidity and heat hit you, and you know you are only one degree from the equator. It's only March. What would it be like in July?

**Nancy Joy Jones**  
Valley cooking

tailors and astrays every few yards, and then the laws enforcing eye are strict.

It's said you're only shot once for jaywalking, twice for littering and three times for any kind of drug trafficking. And judging from the number of unformed, very visible and polite police and cadets, you would be a fool to try anything.

But there are always those who try. And of course, tourists are the universal, gullible prey.

This country is a shopper's paradise. I saw stickers on one shop door indicating it accepted cards such as Visa, MasterCard, American Express and 32 others! Nope, they

didn't take Penney's or Sears but I imagine there were places that did. Basically there are two kinds of shops. The first is called a "One Price Shop" and is usually one of the department stores or designer boutiques. The second is called, well perhaps, "Open Season on Tourists."

You can find great merchandise in electronics, luggage, shoes, sequined dresses, tablecloths, etc., but you never, never, ever pay the first price asked.

I learned that the hard way on my first trip seven years ago. The price on a pair of earrings I wanted was listed as 11 Singapore dollars. So I put out a 10 and a one. With utter scorn, the shopkeeper pushed the one back. After two more ones, then gave me the earrings.

My new technique is to shake my head no, and keep shaking it no and try to leave.

about bargaining this way is to know for what price the item usually sells. You can easily get it for half, if you're stubborn enough.

Singapore is one of the few places that is peacefully multicultural and thrives on its very diversity. There are three dominant cultures: the Chinese, the Indians and the Malay. Of course there are others. After all, it's the busiest port in the world.

The food is great in its diversity. One place we accidentally found was called "Rasa Singapura" (loosely translated as Happy Place).

It's a second-story, open-air eating plaza with booths which each serve a special dish. It's sort of like the food wing of a modern mall, only much more pungent, aromatic and downright delicious. However, buyer beware, not because of the quality of food, but because of the bargaining again. You have to make sure you order by money amount.

ferred lamb, beef or chicken for 25 Singapore cents each (about 12½ cents in U.S. currency). I ordered what I thought were two of each flavor, but when I wouldn't accept a \$20 order the lady was miffed. We ate giant barbecued prawns, fried rice, curried meat, fried noodles (four kinds mixed together), whole steamed fish, vegetables and the best fruit juice I've ever tasted.

This recipe for fried noodles I've adapted to our kitchens. Its origin is Chinese, Indian and Western, and I think you'll like it. It can make a quick lunch or a side dish for dinner. I used five packages of Oriental noodles and threw out the flavor packs that come with them. After breaking up the noodles, I poured 6 cups of boiling water over them and let it sit five minutes, then drained in a colander.

I am also calling for tofu to be optional because the kind the recipe called for was the very compact kind

that comes in air-tight packages on your grocery shelf. It's kind of difficult to find. The regular works OK, but I would add a drained can of shrimp instead.

**FRIED NOODLES**  
5 packages Oriental noodles (3 ounce-size) cooled  
¼ cup vegetable oil  
1 package tofu (optional, see note above) or 1 can shrimp, rinsed and drained  
1 medium red onion (use yellow if you have it on hand)  
1 medium tomato, finely chopped  
2 tablespoons chopped chives  
¼ teaspoon commercial curry powder

2 tablespoons tomato sauce  
1-tablespoon chili sauce  
2 teaspoons soy sauce (light kind)  
2 eggs, lightly beaten  
1 boiled potato, diced small  
1 fresh green chili, sliced (You

# Cancer

Continued from Page C1  
 1 pint strawberries, hulled  
 3 tablespoons orange marmalade  
 Blend cereal in blender to make fine crumbs, then combine with margarine, brown sugar and 1/2 teaspoon lemon zest. Press on to bottom sides of 10-inch springform pan and bake at 375 degrees 5 minutes. Cool.  
 Combine gelatin, 1 1/2 cup granulated sugar, egg yolks and milk in top of double boiler. Stir over boiling water until gelatin dissolves and add sides of 10-inch springform pan. Remove from heat and chill until slightly thickened, about 15 minutes.

being careful not to allow mixture to get too firm.  
 Meanwhile, blend ricotta, lemon juice, remaining 2 teaspoons zest and vanilla in food processor or blender until smooth. Beat egg whites with remaining 1 1/2 cup granulated sugar until soft peaks form. Set aside.  
 Fold cheese mixture and egg whites into gelatin mixture. Turn into crust. Refrigerate until firm. Slice strawberries or cut into fans and arrange on cheese. Place fish and vermouth in large skillet. Cover and simmer 10 minutes per inch thickness of fish. Add leek during last 5 minutes cook-

ing time and cook, uncovered.  
 Remove fish and leeks from pan. Boil cooking liquid until reduced to about 1/4 cup. Add milk and thyme and cook until reduced by about half, about 1 cup. Season with pepper and lemon juice, adding lemon juice slowly and stirring constantly. Pour sauce over fish and serve. Makes 4 servings.

**TOFU PROVENCAL**  
 1 medium onion, chopped  
 1 large tomato, coarsely chopped  
 1 (8-ounce) can tomato sauce  
 1/2 teaspoon dried thyme  
 1/2 teaspoon dried marjoram  
 1/2 teaspoon dried sage  
 1/2 teaspoon dried rosemary  
 1/2 teaspoon garlic powder  
 1/2 teaspoon black pepper  
 1 pound firm tofu  
 1 cup sliced mushrooms  
 Place onion, tomato, tomato sauce, thyme, marjoram, sage, rosemary, garlic powder and pepper in large skillet. Simmer, uncovered, 20 minutes, stirring occasionally.  
 Meanwhile, cut tofu into small cubes. Add with mushrooms to pan and cook 5 to 6 minutes longer or until heated through. Makes 4 servings.

**SPICED PUMPKIN FROZEN YOGURT**  
 2 cups plain low-fat yogurt  
 2-3 cup sugar  
 1 cup canned pumpkin  
 1/2 teaspoons ground cinnamon  
 1/2 teaspoons grated nutmeg  
 Combine yogurt, sugar, pumpkin, cinnamon and nutmeg in canister of cream maker. Mix well, then freeze according to manufacturer's directions. If prepared ahead of serving time and stored in freezer, remove to refrigerator, uncovered 10 minutes before serving, to allow slight softening. Makes 6 servings.

# Asparagus

Continued from Page C1  
 1/2 cup cornmeal  
 2 eggs, separated  
 2 teaspoons baking powder  
 1 teaspoon salt  
 1 tablespoon sugar  
**Cheese Sauce**  
 Snap tough ends off asparagus stalks. Wash well. Cut into 1 1/2-inch lengths. Cook, uncovered, in boiling water to cover, about 8 to 10 minutes. Drain, reserving 1/2 cup liquid for Cheese Sauce.  
 In medium saucepan, gradually stir milk into cornmeal. Cook over medium heat, stirring constantly,

until thickened to consistency of most mashed potatoes, about 5 minutes. Remove from heat and cool slightly.  
 Beat egg yolks until well mixed. Add to cornmeal mixture with baking powder, salt and sugar. Mix well. Beat egg whites until stiff but not dry. Fold into cornmeal mixture.  
 Arrange asparagus pieces in bottom of well-greased baking dish. Pour cornmeal batter over asparagus, smoothing over asparagus and to edge of casserole. Bake at 375 degrees 45 to 50 minutes

or until golden brown. Serve with Cheese Sauce. Makes 4 servings.  
**Cheese Sauce**  
 2 tablespoons butter or margarine  
 1 tablespoon cornstarch  
 1 cup milk  
 1 cup cup grated Parmesan cheese  
 1/2 cup reserved asparagus liquid  
 1/2 teaspoon salt  
 2 teaspoons lemon juice  
 Place fish and vermouth in large skillet. Cover and simmer 10 minutes per inch thickness of fish. Add leek during last 5 minutes cook-

ing time and cook, uncovered.  
 Remove fish and leeks from pan. Boil cooking liquid until reduced to about 1/4 cup. Add milk and thyme and cook until reduced by about half, about 1 cup. Season with pepper and lemon juice, adding lemon juice slowly and stirring constantly. Pour sauce over fish and serve. Makes 4 servings.

3 tablespoons flour  
 2 1/2 cups hot milk  
 Salt, pepper  
 1 tablespoon dry Sherry  
 2 (8-ounce) packages cheese or mushrooms, stirred  
 1 pound asparagus spears  
 Melt butter in saucepan and saute garlic until lightly golden. Remove garlic. Stir in flour and cook over low heat 3 to 5 minutes. Return garlic to pan. Stir in hot milk. Season to taste with salt and pepper. Stir in Sherry. Keep warm.  
 Cook tortellini according to package directions. Drain and keep warm. Steam or cook asparagus in boiling salted water - 10 to 15 minutes. Drain and arrange on plate with tortellini. Pour garlic sauce over (or cut up asparagus into 1-inch pieces and mix with sauce and tortellini). Makes 4 to 6 servings.

Arrange remaining asparagus spears over egg layer. Top with remaining egg mixture. Chill until set. Turn out onto serving platter. Garnish as desired and serve. Makes about 10 servings.  
**EGGS BENEDICT ASPARAGUS ON CROISSANTS**  
 12 asparagus spears  
 4 croissants  
 4 poached eggs  
 8 slices crisp-cooked bacon  
 Hollandaise Sauce  
 Cook asparagus in boiling salted water until tender-crisp. Drain. Split 4 croissant in half. Place 3 asparagus spears over each of 4 croissant halves. Top each with poached egg. Spoon over Hollandaise Sauce. Serve with 2 slices bacon each. Makes 4 servings.

# Jones

Continued from Page C1  
 choose how hot. Opt for a milder kind.)  
 Heat the oil in a wok or frying pan. If you use the drier bean pack, saute it until golden then remove to a paper towel to drain.  
 Cook the onion in the oil for 3-3 minutes, until soft, then add the drained noodles, tomato, chives, curry leaves and three sauces. Cook over low heat for 3-4 minutes.  
 Pour the eggs over everything and let sit for 45 seconds before stirring it into the noodles. Add the potato and the bean curd or shrimp. Then stir, cooking for another 30 seconds.  
 Put on a platter and garnish with green chili. Serve it with additional tomato and chili sauce according to each person's taste.  
 The next recipe is for one of my

favorite dishes, known as Satay. These are the meats that are woven onto bamboo skewers and barbecued. They can be broiled in the oven if your charcoal grill is still in winter storage.  
 I am going to give you the original recipe, which calls for some rather exotic ingredients, but I'll also suggest substitutes. You might want to try my variation now and start to gather the other, sometimes difficult to locate, ingredients for a festive party on your deck this summer.  
**SATAY**  
 2 pounds meat: chicken breast, lamb leg or beef rump (or equal amounts of each)  
 1 teaspoon coriander  
 1 teaspoon cumin  
 1/2 teaspoon fennel

8-10 shallots or 1 1/2 medium red onion  
 2 cloves garlic  
 1 stalk lemon grass (or substitute small piece of lemon peel)  
 2 slices lemongrass (Sometimes found powdered under the name of laos. Use a teaspoon of the powder. I left it out of my first attempt and the dish was fine.)  
 1/2-inch fresh ginger root, peeled  
 1/2 teaspoon salt  
 1 teaspoon turmeric powder  
 2 teaspoons brown sugar  
 1/2 cup tamarind water (or use lemon juice)  
 4 tablespoons oil  
 50-60 bamboo skewers  
 Cut the meat into slices about 1/2 inch thick, about 1/2 inch wide and about 1 to 1 1/2 inches long.  
 Heat the coriander, cumin and fennel in a dry pan and then grind and set aside. (You can use a blender

or food processor for grinding).  
 Pound or grind shallots, garlic, lemon grass or lemon peel, lemongrass and ginger together until fine. Combine in a bowl with the ground spices and all other ingredients except oil. Add meat and leave to marinate for 6 hours.  
 A couple of hours before cooking, soak the bamboo skewers in cold water for at least one hour to keep them from burning.  
 Thread the meat onto the skewers and brush with the oil on both sides. Cook over charcoal or under grill until golden brown.  
 You can serve these with all sorts of sauces and ingredients, such as prepared chutney, sour cream, chunks of fresh vegetables (cucumbers are especially good), steamed rice or steamed compressed rice cakes. I've even known people who loved to dip them into ketchup, so experiment!  
 It's great getting back to the Magic Valley and seeing the first crocus.  
 Enjoy!

**EGG SALAD ASPARAGUS MOLD**  
 3 tablespoons unflavored gelatin  
 1 1/2 cups water  
 1 cup mayonnaise  
 2 teaspoons Dijon mustard  
 1/2 cup vinegar  
 2 teaspoons sugar  
 Salt, white pepper  
 1/2 dozen hard-cooked eggs, diced  
 2 tablespoons minced onion  
 1 (2-ounce) jar pimientos, chopped  
 1/2 cup minced celery  
 16 asparagus spears, blanched  
 Sprinkle gelatin over water. Let stand until softened. Heat, stirring, until dissolved. Whisk in mayonnaise, mustard, vinegar, sugar and pepper to taste with salt and white pepper. Cool until mixture begins to thicken. Mix eggs with onion, pimientos and celery. Add gelatin mixture.  
 Spoon 1/3 of mixture into lightly oiled 9-inch loaf pan. Chill until almost set. Arrange half of asparagus spears atop egg mixture. Spoon over another 1/3 of egg mixture. Chill until partially set.

# Mother Nature plagues oysters

BILOXI, Miss. (AP) — This oyster season has been so bad along the Mississippi Gulf Coast that last weekend's Biloxi Oyster Festival was forced to serve imports.  
 "See that mound," said Billy Goltoff, pointing to a pile of gray and white shells across the street from his processing plant in Biloxi. "Those are all from Louisiana and Texas. Not one is from Mississippi."  
 The shellfish are offshore, but pollution makes the crop unfit for harvesting and thereby a lucrative and traditional industry. Health officials have closed nearly all the state's oyster reefs since mid-December because heavy rain washed pollution into the Gulf of Mexico, raising "fecal coliform" bacteria levels.  
 "For Mississippi, I think this is the worst year I've ever seen," said Goltoff, whose family has been oystering and processing the shellfish for at least four decades. "And this town survives on tourists and seafood."  
 About 3,000 oystermen usually work out of the Mississippi Gulf Coast, said Fred Deegan, chief of the salt water fisheries division of the Mississippi Bureau of Marine Resources.  
 While state studies show oystering in Mississippi is usually a \$7.8 billion to \$11.7 million industry, less than \$1 million in landings have been reported this year, Deegan said. Oystering in Mississippi is dwarfed by the industry in Louisiana and Texas and by Mississippi's own shrimp-popping industry, which raises \$96.3 million to \$142.2 million a year.  
 Wholesale prices have risen from \$7 to \$10 per sack of oysters in 1983 to \$15 to \$20 a sack for Louisiana oysters today, Goltoff said. Each sack contains 100-120 pounds of oysters.  
 Oystermen all over the Gulf Coast have run into many of the same problems their Mississippi counterparts, but Mississippi officials say this state has been hit hardest. An only about six weeks are left in the season.  
 Closed beds won't be reopened until Thursday at the earliest, said J.O. May, director of the state Health Department's sanitation division.  
 "The problem has been Mother Nature," said John Cirino, a

biologist with the Gulf Coast Research Laboratory in Ocean Springs. "I hesitate to say that we even had oysters on 20 percent of our stable fields."  
 A predator, the oyster drill, has claimed much of the state's 9,500

acres of reefs. And an early season drought and winter rain disrupted the balance between salt and fresh water the oysters need to grow.  
 May said runoff from heavy rain also brought waste from animals and septic tanks in southern Mississippi.

# Food expert gives winter tomatoes a summer taste

By NINA KILHAM  
The Washington Post

Dr. Karaklan Bedrosian has cured a disease, restoring vitality to the garden salad. The afflicted were tomatoes; their disease, he says, was refrigeration.

"Winter tomatoes are, aside from two glorious months in the summer, what are generally available in supermarkets. They are grown for the most part in Florida, then refrigerated during shipment to consumers to arrive mealy, flavorless, with the bluish of an anemia."

"Tomatoes are a tropical fruit, so the genes have never been used to low temperatures," says Bedrosian, a food-research scientist who has developed a method of shipping tomatoes without refrigeration.

"The color pigment, he says, can only develop at temperatures of 65 to 75 degrees. The refrigeration with temperatures 55 degrees and below causes chill damage and results in a mealy texture. Most importantly, the cold inhibits any development of flavor."

Bedrosian, who has a Ph.D. in food technology and an M.B.A. in marketing and finance, began his research in 1977. His objective was to grow a winter tomato that tasted like a summer tomato.

Every summer for two to three months, you are reminded how good a tomato tastes. The reminder, he says, generates consumer distress.

His solution is TomAHotos (they put back the AH into tomatoes—says the ad), tomatoes that can survive the five- to 15-day hiatus between Florida and their Eastern-seaboard destinations.

Bedrosian modified the temperature in which the tomatoes grow to retard the ripening process. To modify the atmosphere, he had to reduce the percent of oxygen in the air from 21 to 5 percent. In a research laboratory this process would hardly be exceptional. What is revolutionary is that Bedrosian has the tomatoes doing their own lab work.

Tomatoes breathe in oxygen and exhale carbon dioxide and water. Bedrosian sealed the cases of tomatoes with a semi-permeable film, enclosing a purifier the size of a purse tissue-pack to trap any mold produced by the water. The result is ruby red tomatoes with a fresh taste after up to 15 days of traveling.

He sold 23,000 cases in 1983 and

plans to sell more than 1 million in 1987. He also intends to introduce an avocado in the Natural Pak System in the second half of this year, adding more fruits and vegetables thereafter.

Bedrosian likens the importance of the development in the advent of freezing 50 to 60 years ago. "Fruits and vegetables are now shipped too green. We will be able to bring mature fruit to the market."

He hopes that consumers won't have to take chances on buying unripened produce anymore. "People won't have to figure out what a real piece of fruit tastes like."

If you have a passion for tomatoes, the Florida Tomato Exchange offers a 57-page recipe booklet for \$1, including shipping and handling. If you write to: P.O. Box 29653, Orlando, FL 32829, the recipe below is one of its delicious entrees.

**Express-lane List:** tomatoes, chicken, curry powder, chicken broth, garlic, green pepper, cornstarch, rice for serving

## CHICKEN TOMATO CURRY (4 servings)

- 1 1/2 pounds tomatoes
  - 2 tablespoons vegetable oil
  - 3 pounds chicken parts
  - 1 garlic clove, minced
  - 1 1/2 teaspoons ginger powder
  - 1/2 cups chicken stock
  - 4 teaspoon salt
  - 1 cup green-pepper strips
  - 1/4 teaspoons cornstarch
  - 1/4 cup water
- Sliced rice for serving
- Add curry powder for 2 minutes. Remove chicken; set aside. Drain off all but 1 tablespoon of the drippings. Heat drippings until hot; add minced garlic and sauté for 2 minutes. Add curry powder. Cook and stir over medium heat until browned, 10 to 15 seconds. Add chicken stock and salt; mix well. Bring to a boil. Add reserved chicken. Simmer, covered, until chicken is almost cooked, about 40 minutes. Add green-pepper. Simmer, covered, until vegetable is crisp-tender, about 6 minutes. Add tomatoes; simmer, covered, until chicken and vegetables are cooked, about 2 minutes. Combine cornstarch and water. Stir into cooking liquid. Cook and stir until thickened, about 2 minutes. Serve with steamed rice.

# New grass blades first sign of spring

The first signs of new growth in the early spring are new blades of grass. The lawn starts growing earlier than almost anything else. However, much of the new growth is still covered by the old, dead, brown growth from last year.

Allen Wilson Intermountain gardening

By mowing your lawn now at half inch height, most of the old growth will be removed. The new green growth will be visible sooner. If the grass is also matted or a thick cushiony thatch layer is present, raking may also be advisable. Get down on your hands and knees and look closely after mowing at half inch. Stick a ruler into the grass until you are sure it has reached the soil. If it sticks in more than one inch below the top of where you mowed, you have too much thatch.

The easiest way to remove this thatch layer is with a power rake.

You can rent a power rake from many nurseries and garden equipment stores. You can also arrange to have your lawn power raked by a landscape maintenance or lawn service company. Power rakes have vertical blades which reach down and pull out part of the dead thatch. Power raking can be done any time until early May.

However, the earlier it is done, the less new green grass will be removed.

Thatch and clippings removed from the lawn make an excellent amendment for the vegetable

garden and flower beds. Simply spread them over the garden or flower beds and till or spade into the soil.

An early application of lawn fertilizer will also stimulate earlier and greener grass growth. Now is a good time to make the first application of lawn fertilizer. There are many brands of lawn fertilizer available. However they are all very similar in fertilizer content. Most contain about 15 to 20 percent nitrogen, 4 to 10 percent phosphorus and 4 to 10 percent potassium. They are listed on the bag in that order. If you look at the list of ingredients, you will notice that phosphorus is listed as available phosphoric acid and potassium is listed as water soluble potash.

water insoluble or comes from ureaform or sulfur coated urea; it will last much longer. Instead of being used up or washed out in a few weeks, it will be gradually released until mid-summer. For optimum appearance, lawns should be fertilized about three times during the growing season. If slow release fertilizer is used, twice is enough.

With the growth of the lawn care industry, those who live in urban areas have another choice for lawn fertilization. Fertilizer can be applied by a professional service company. They generally make up to four applications a year. Each time fertilizer is applied, they also apply any needed pesticides for weeds, insects or other problems.

Allen Wilson teaches horticulture at Ricks College.

# Glass bakeware ideal for microwaves

By MINNIE BERNARDINO  
The Los Angeles Times

Going hand in hand with success and popularity with microwave ovens is glass bakeware. During the last decade, these versatile cooking utensils have shown tremendous growth. Because metal pots and pans reflect microwave energy and could ruin the microwave unit, glass is ideal for this type of cooking.

Now, going beyond the ordinary benefits of glass in microwave, as well as conventional and convection baking, is the new non-stick Pyrex Clear Advantage bakeware from Corning Glass Works, N.Y.

Yes, non-stick. True enough, when we tested these new dishes, our baked goods popped right out as if they were baked in a greased casserole. Cleanup, of course, was a zip, with no soaking needed. Called Invisi-Clean, the clear, non-stick coating functions like other non-stick coatings but is inherently smooth and non-porous and formulated differently to adhere to glass.

Is the product necessary? Alan Donnelly, supervisor of consumer information for Corning, said

that the product was conceived out of consumer need. He said, "It's basically marketing at work. We have found that when buying cookware, consumers ask these two things: 'First, does the cookware have non-stick quality?' and secondly, 'Does it go in the microwave?'"

This bakeware can go from freezer to oven to table. Sudden cooling, such as adding cold liquid to a hot dish, however, can cause breakage. Although a wonderful tool for microwave cooking, the dish should never be used with the browning element, or under a broiler.

There are other limitations with the non-stick glass bakeware. The product should not be washed in the dishwasher because the coating may become cloudy, and the non-stick quality could be affected after repeated dishwasher use. Instead, use warm, sudsy water to clean the dishes (never use any abrasive cleansers or scouring pads).

The coating should be protected from scratches. Avoid using metal utensils or sharp knives, and when nesting pieces for storage, place a paper towel between them. The manufacturer promises to replace any Pyrex Clear Advantage

bakeware item that breaks from oven heat within two years from date of purchase. Scratching of the non-stick coating is not covered under this warranty, however.

The Pyrex Clear Advantage non-stick bakeware is available in two-quart, three-quart and four-quart sizes, an eight-inch square dish, nine-inch pie plate, 1 1/2-quart loaf dish and two-quart covered casserole. The suggested retail price ranges from about \$4.49 for the nine-inch pie plate to less than \$13 for the four-quart oblong baking dish.

Other than conventional and microwave baking, a third role for glass bakeware has been revolutionized in Corning's Visions cookware line. Made of see-through Pyroceram-brand material, the amber-colored cookware line can actually be used on top of the stove.

Tarrie McBride, quality assurance supervisor for Crown Corning Glass Works in Los Angeles, said, "Visions is enjoying unbelievable success; people are getting back to (seeing) what's cooking inside."

He said that the low-expansion glass is so strong and tempered that it is guaranteed by Crown Corning for 10 years against heat breakage.

Joining the existing line of covered saucapans, Dutch oven and skillet are the new 2 1/2-quart Visions Chicken Fryer (\$20), the 1 1/2-quart graduated, lipped saucapan (\$10) and an 11-piece cookware set (\$80).

The covered chicken fryer has just the right width and depth to fry a good batch of chicken pieces. It also can be used for roasting, sauteing vegetables or braising other foods. Like other Visions pieces, the one-piece handle remains cool during range-top use.

Bless the little Visions saucapan for instant sauce making and reheating of small leftovers, particularly in compact microwave ovens. Its calibrated, lipped design makes it ideal for tilt mixing and pouring.

The largest combination of Visions cookware items, the 11-piece set consists of two covered saucapans, two covered skillets, a double boiler and a five-quart covered Dutch oven. Aside from avoiding boil-overs, another great advantage to the glass cookware is the easy cleanup. The Visions line is dishwasher proof.

For best results with both types of Corning products, always follow manufacturer's instructions in care and usage.

# Get the most from vegetables

By the Associated Press.

## LOCK IN VEGETABLE NUTRIENTS

Health-conscious grocery shoppers will get the most nutrition from fresh vegetables by storing them to store, clean and cook them right.

## STORE THEM RIGHT

It's best to wash and trim fresh produce just before using. If you do wash vegetables before storing in plastic bags, they will lose nutrients. To store, clean and cook them right.

Use the outer, nutrient-rich leaves as well as the inner leaves of cabbage and lettuce.

Vitamin C, the B vitamins, some mineral salts and iron are water soluble and wash out of food when placed in water. To minimize this, cut produce into large pieces or leave whole and cook in as little water as possible. Steaming and microwaving are winning ways to cook vegetables because they use little water. Don't overcook vegetables.

Never add baking soda to the cooking liquid of vegetables. Soda destroys thiamine and vitamin C.

dry, dark place to prevent sprouting. Hard-rind squash, eggplant, rutabaga and sweet potatoes should be stored at about 60 degrees F.

## COOK THEM RIGHT

Wash and drain all vegetables well before cooking. Use more fiber, scrub vegetables with edible skins, such as potatoes, rather than peeling them.

Use the outer, nutrient-rich leaves as well as the inner leaves of cabbage and lettuce.

Vitamin C, the B vitamins, some mineral salts and iron are water soluble and wash out of food when placed in water. To minimize this, cut produce into large pieces or leave whole and cook in as little water as possible. Steaming and microwaving are winning ways to cook vegetables because they use little water. By LOU DOLINAR  
Newsday

When painting problems occur, it is seldom the finish coat that causes them. Instead, look to improper surface preparation and, in many cases, the use of an incorrect primer.

You can gauge the quality of a finish coat by eye and adjust your technique as you go along, but if you make a mistake before applying it, you're setting up long-range problems with peeling, cracking and flaking. For starters, the area to be painted should have a layer of paint, either primer or an earlier coat, to which to adhere. Here's a guide to typical trouble spots:

Interior walls, plaster and Sheetrock: If you've patched your walls before painting, the patches should be spot-primed with a latex-based primer before the final coat is applied. Also, use latex primer on new Sheetrock and plaster. The material dries in two to four hours. If you are in a rush, and you don't have a large area to cover, try an alcohol-based primer-sealer, such as Bin, which can typically be finished in 30 minutes.

When you have applied the primer, watch for bleeding. Markings from felt-tips pens, for example, will typically soak through latex primers, and possibly even through a finish coat. A quick touch-up with alcohol-based primer will stop bleeding.

Most finish-paint directions specify that the wall should be

"clean" before application, but how clean? Generally, unless the walls are badly and visibly stained, you can paint right over them. Some problem areas do need to be cleaned: Kitchens, to remove grease build-up around stoves; bathrooms, to remove mold; and if you have forced-air heat, stained areas around duct registers. Strong detergent and water will do the job.

If the current coating is gloss or semi-gloss paint, it needs to be roughened to ensure adhesion of the finish coat. You can do this by sanding, which is tedious, or by using so-called Liquid Sandpaper, a solvent-based product that dulls the finish of the undercoat and promotes adhesion. Bear in mind that the glossier the final finish, the more resistant it will be to dirt. Unfortunately, glossy finishes more readily reveal surface imperfections. Flat finishes tend to hide them.

If you are radically altering the color of a wall or covering up a dated, multicolor supergraphic, you may certainly need a primer, and you should probably resign yourself to applying two coats. Primer, after all, is a lot cheaper than finish paint. A really professional paint store can tint your primer to match your finish coat.

Raw Wood: Before painting raw wood, you should first prime it with an alkyl primer, not latex, which tends to raise the grain of the wood. Knots in unfinished furniture or trim work can bleed through primer,

though, and may have to be touched up with alcohol-based primer-sealer. Most finish coats, including latex, will adhere well to alkyl primers.

Alternately, you can apply a clear sealer. The latter contains a high proportion of solvent, and thus dries quickly and does not soak into the wood. This is particularly important with clear polyurethane finishes, which will darken unprimed wood.

For an extra-smooth finish coat, sand the wood lightly after it has been primed.

Metal: This is the least porous material you're likely to be painting and, thus, requires the most careful preparation. And frequently, the type of primer you use is specific to the metal being painted.

The longstanding rule for steel and iron is to sand or wire-brush away every speck of rust before repainting. Unlike painting "dirty" interior walls, you can't fudge this step. Then you apply an alkyl or oil-based metal primer containing zinc for rustproofing.

# Tomatoes hopscotch across Midwest

By the Associated Press

According to Midwest Living magazine, in an average year, more than half of the 250 tomatoes that dotop over the continental U.S. hopscotch across the Midwest.

Though the paths of twister-spanning storms vary as the months

go by, tomato season generally starts in the Midwest states of Kansas, Missouri, Illinois, Indiana and Ohio by late March or early April, spreading north to Michigan.

Wisconsin, Minnesota and North Dakota during the summer.

## FARM FOR SALE

The Government is offering for sale 240 acres with 2 homes, corral, and a mobile home. The land has 210.5 acre cropland and 16 acres pasture, all evenly irrigated with 240 shares of water in the Twin Falls Canal Company. The property is located 7 1/2 miles South of Castletown, Idaho. This property may be purchased for cash or on terms of not less than 15% down with a balance payable in not more than 25 equal annual installments at 11.25 percent interest. Offers must be in the form of sealed bids and must be accompanied by a cashier's check, postal or bank money order or bank draft payable to Farmers-Home-Administration (FmHA) for at least 10 percent of the bid. The required bid forms and further information concerning the property may be obtained from the FmHA County Office located at 673 Fifth Avenue, Twin Falls, Idaho, telephone number (208) 733-8899. Bids will be opened at 5:00 p.m. on April 3, 1987, at the FmHA County Office. The bids must be delivered to the FmHA County Office no later than April 3, 1987. The outside of the sealed envelope will be clearly marked with the following identification: "SEALED BID OFFER: Date of Bid Opening - March 15, 1987; Property Address or Location - Route #1, Castletown, Idaho 83321." Bidders requesting terms other than cash will be required to submit a current financial statement and evidence of repayment ability with their bid. The Government reserves the right to reject any and all bids. Acceptance of any bid based on the condition that the FmHA finance all or a portion of the sale on terms will be subject to approval of the bidder's credit by FmHA. The property will be sold without regard to race, color, sex, age, religion, national origin or marital status.

# Letters of thanks

## Central school students gave an excellent show

The Parent-School Organization (PSO) would like to sincerely thank all the parents for their attendance at our last program.

We would also like to thank Sharon Peterson, Jane Houghland, Bev Peavy, Roy Parton, and Paula Simmering of the Peer Helpers for their presentations and for all the fine work they are doing with our children.

Last but not least, we extend a special thanks to the sixth grade students of Central Elementary who gave us such an excellent talent show. Cooperation and sharing between parents, teachers, and our children is what PSO is all about, and it is a fine thing to see it at work. Thank you.

**KATHY KRUCKER**  
President  
Parent-School Organization  
Jerome

## Cystic fibrosis research will receive local funds

The recent cystic fibrosis Swim-A-Rama held at Slinger's Thousand Springs Resort in Hagerman was a big success.

I would like to thank the Magic Valley Regional Medical Center, the pharmacies at Smith's, Buttrely and Shopko, Dick's Pharmacy and Save-A-Drug for their support of that event.

Through continued efforts such as theirs I would hope the cause of cystic fibrosis will soon be determined.

**DR. HAROLD R. GEIST**  
Twin Falls

## Serious ailments found through testing at show

Evergreen Manor sponsored a screening clinic at a high blood pressure and diabetes at the Home

and Garden Show last week. We tested over 600 individuals and found about 50 people who should follow-up with a doctor's visit.

We want to give a special thanks to NORCO for furnishing the equipment and material for the blood glucose testing. Considering their cost, it was a remarkable contribution. We thank you, too, Magic Valley.

**JOLENE TUMA, R.N.**  
Inservice director  
Evergreen Manor

## \$865 are raised in Filer for library furnishings

The Filer Library Fund is \$865 richer, thanks to a fund-raising event hosted by the Filer American Legion and Auxiliary. More than 100 persons enjoyed participating in bingo games and door prize drawings. Each person received a product

of the community as they left. All prizes and other gifts were donated by local merchants and interested friends of the library.

The money collected will be used for furnishings for the new city library when it is completed. Co-chairpersons were Lillian McIntyre and Lydia Yoder. They were grateful to all those who made this event a success.

**NORMA BROWN**  
Public relations director  
Filer American Legion Auxiliary

## Area engineering group appreciated donations

The Magic Valley Chapter of the Idaho Society of Professional Engineers gratefully acknowledges financial support from the following sources for the 1987 Regional Mathematics competition held on Saturday, March 14, at the College of Southern Idaho:

Twin Falls Rotary Club, Blue Lakes Rotary Club, Twin Falls Lions, Twin Falls Kiwanis, Twin Falls Elks, H.O. Bowen Co., Inc.; First Security Bank, PMP, Inc.; Dale and Bobby Riedel, Joseph K. Humphrey, Bonnerville Pacific Corp., Current Control, EHM Engineering, Inc.; Howard Associates, McClure Engineering, Power Engineers, Inc.; JUB Engineers, Inc.; Gary and Eilly Young, Shovel's, Inc.; Mooroc, Inc.; and Universal Frozen Foods, Inc.

**GARY L. YOUNG, P.E./L.S.**  
Mathcounts chapter coordinator

## Program demonstrates interest in humanities

The Twin Falls Public Library recently completed its presentation of the nationwide "Let's Talk About It" reading and discussion program. The theme "Mapping the West" provided a welcome opportunity to

explore significant literary works about the American West. The success of this endeavor, as evidenced by the enthusiastic and sustained interest of the participants, suggests that there are those who are eager for exposure to the humanities when given the opportunity.

The library would like to acknowledge the Idaho State Library for sponsoring this series through grants from the Idaho Humanities Council and the Idaho Library Association. Many thanks also to this newspaper and the area radio and television stations for publicity and to the guest scholars and discussion leaders for their contributions.

**LINDA MITCHELL**  
Twin Falls Public Library

The Times-News welcomes letters of thanks of fewer than 100 words which will be published as space permits. Send to "Letters of Thanks," The Times-News, Box 548, Twin Falls, Idaho 83301.

# Couple finds love in the mail

**DEAR ABBY:** Last year when I was a freshman at Tulane University, I read in your column (The Times-Picayune) that the Marines at Guantanamo Bay, Cuba, were "lonely" and wanted mail, so I wrote a friendly letter to a Marine (any Marine) telling him all about myself.

Much to my surprise, I received a wonderful live-page letter from Lance Cpl. Mark Dennis — a native New Yorker. I answered immediately and enclosed my picture. He wrote again and sent me his picture. (He's very handsome!) Soon we were often exchanging letters and there were hour-long long-distance telephone calls!

Mark was promoted to corporal and transferred to a base in Florida. The best news is that we have fallen in love through the mail. Mark flew to New Orleans and we met for the first time when I picked him up at the airport on a rainy Thursday night in December. Our weekend was like a fairy tale!

We exchange letters and phone calls almost daily now. From pen pals we became sweethearts dreaming of the future. I flew to Florida to spend Valentine's Day weekend with Mark, and it's like a dream come true.

How can I thank you, Dear Abby, for giving fate a hand by publishing that address in your column last April?

— VANESSA McMILLAN

**Abigail Van Buren**  
Dear Abby

**DEAR VANESSA:** Don't thank me, and don't thank fate. You reached out to cheer up a lonely Marine, and in so doing, you caught the gold ring. Congratulations and all the best to both of you!

**DEAR ABBY:** Some young relatives of mine are getting married. Bonnie is 19 and Chuck is 20. The other evening a friend (not a relative) was over and the kids were here.

This friend congratulated the bride, then asked her what she wanted for a wedding present. Then Bonnie said, "How much did you want to spend?"

I nearly fainted! The friend was obviously taken aback, but she hemmed and hawed and never did give Bonnie a direct answer. I got into it, and saved the situation by telling the friend that Bonnie was registered at such and such a store downtown.

Later I got into an argument with Bonnie's mother. She thought Bonnie's response was perfectly OK. What do you think?

— IN THE MIDDLE  
**DEAR IN:** Bonnie's response was

frank and forthright — although somewhat startling. The answer you provided in the interest of "saving the situation" was the one Bonnie should have used.

**DEAR ABBY:** A very bright, single and absolutely beautiful young woman recently came to work in our office, and I would like to ask her for a date. There's only one problem. She wears a very strong perfume, and too much of it.

I would like to tell this otherwise appealing young woman to either change brands of perfume or use less of it, but I don't want to offend her. I'm not the only one in this office who can't get too close to her. Others even make jokes about it. Isn't that a shame?

How do you feel about anonymous office memos? — OVERPOWERED

**DEAR OVERPOWERED:** I'm not crazy about anonymous memos — even those that are well-intentioned and constructive. Why not be upfront with the lady and tell her you would like to ask her out, but you can't handle perfume in anything but minimal doses? You would be doing her an enormous favor.

*(Problem? Write to Abby. For a personal, unpublished reply, send a self-addressed, stamped envelope to Abby, P.O. Box 6940, Los Angeles, Calif. 90069. All correspondence is confidential.)*

# Nanny schools find few students

**PORTLAND, Ore. (AP)** — Business should be booming for Oregon's nanny schools. Parents are practically knocking down their doors wanting to hire nannies.

There's just one big problem: There aren't many women or men who want to be nannies. "I'd say we have about 20 jobs for every nanny that graduates," said Linda Riefe, co-director of a Portland nanny school. "I can't tell you how many schools have opened and then had to close their doors, and how many never get off the ground."

Riefe and her partner, Carol Kavanagh, founded the Northwest Nanny Institute in late 1984, when nanny-training was new to this country.

"We're the seventh-oldest nanny school in the U.S.," Kavanagh said. "And we're only six months younger than the first one."

Today there are 20 members of the American Council of Nanny Schools, and many more programs through community colleges and other groups. Lane Community College in Eugene will graduate four students

this year in one of the first two-year associate degree programs for nannies in the country.

Two closely linked issues make recruiting students difficult. The first is that the public doesn't recognize a nanny as a professional. The second is low pay.

Parents won't pay much for a nanny unless they know her or she will be more than a baby sitter, and would-be nannies won't pay for specialized nanny training unless they know they will be treated as professionals and will be paid accordingly.

A Lane graduate can expect to make a minimum of \$200 a week, plus room and board, said Linda Riefe, the coordinator of the professional nanny degree program. In some areas, such as New York, a nanny can command much more, she said.

The job also offers many fringe benefits, she said. Placement is usually with professional families, some quite wealthy, and the nanny will be exposed to new opportunities. "I can meet different people, get a chance to meet the upper crust and

travel," said Christine Janoushek, a 20-year-old Lane Community College student from Springfield. "I can't think of a better way."

Kavanagh estimates that the families employing Northwest Nanny Institute graduates in the Portland area make about \$75,000 a year and that the institute's national placements are with families making an average of \$150,000 to \$200,000. The Northwest Nanny Institute is overcoming its struggle to attract top-notch students, she said.

"When we opened, I thought we'd run our first ad and within the next couple weeks the mailbox would be bulging with letters and the phone would be ringing off the hook," she said. "But the mailbox was empty. The phone was ringing off the hook, but it was only families wanting nannies."

Through aggressive recruitment and careful selection, she said, the school has survived. From a humble beginning with six students, the institute probably will teach two classes of 15 students this fall, she said.

# Some people don't outgrow childhood attention disorder

**SALT LAKE CITY (AP)** — That little whirlwind, the child who just can't sit still and concentrate in class, may well grow up to be an impulsive, quick-tempered and often miserable adult, says the author of a new book on the subject.

In the past, the child may have been labeled as simply hyperactive and the adult as disorganized and the flighty and moody. Now each may be diagnosed as having an attention deficit disorder, or ADD, said Dr. Paul H. Wender, director of psychiatric research at the University of Utah Health Sciences Center.

After a decade of pioneering work with some 200 adult patients and so many children, Wender said that up to two-thirds of ADD children grow up without growing out of the symptoms that marked their young years.

Wender is the author of "The Hyperactive Child, Adolescent and Adult," subtitled "Attention Deficit Disorder Through the Lifespan," published this month by Oxford University Press.

"ADD fits a very recognizable pattern in a bunch of things that cluster together: they're attentive to things they aren't interested in, they're bossy, they have short fuses," Wender said in an interview. "That's what makes it look like a disorder rather than an individual characteristic."

ADD, which affects between 3 percent and 10 percent of all children, usually is accompanied by hyperactivity, but not always. It differs from brain damage and specific learning disabilities like dyslexia, a disturbance in the ability to read or do arithmetic. Intelligence is rarely a factor.

Instead, attention deficit disorder is just that — an inability to concentrate for a reasonable period of time.

"We often find we have a very unhappy little person," Wender said. "His behavior gets him into trouble, he gets unfavorable comments. He feels wretched about himself."

When hyperactivity persists among adults, it takes a somewhat different form, Wender said. While

cautioning that his conclusions are tentative, he said the ADD adult exhibits symptoms strikingly similar to those of ADD children — distractibility, impulsiveness, disorganization, wildly fluctuating moods and a hair-trigger temper.

"We have had the repeated experience of identifying a new patient in the waiting room because he or she is continuously tapping on the arm of a chair, or, more noticeably, jiggling a foot," he writes.

"During our diagnostic interviews we often find such patients squirming in the chair, tapping their legs, playing with their hands or picking at their face and hair."

Not least, the individual often suffers deep depression. Case histories

often contain a litany of complaints about alcohol and drug abuse, stormy, short-lived relationships and underachievement on the job and in the home.

Wender quotes one patient, a baseball fan, who observed: "When your life is characterized by no hits, no runs and plenty of errors, you do not have a terrific view of yourself."

While hyperactivity and ADD are much more commonly recognized among boys than girls, the number of grown women seeking treatment is rising, Wender said.

"Women are appearing from nowhere. Maybe in their adolescence they start cutting loose, and then they pop up in studies — three marriages to alcoholics. (unplanned

pregnancies," he said.

Wender muses that women also may possess a "lower help-seeking threshold," than men, who often are persuaded to begin treatment by a wife at the end of her rope.

Whatever the reason, Wender says, drug therapy can make a profound difference.

Ironically, ADD children are, in most cases, effectively treated with stimulants like amphetamines or methylphenidate. Instead of making the child "high" or over-excited, the proper dosage has a calming effect which enables him to settle down and pay attention.

With improved self-control, the child usually is more attentive, more obedient and a better student. In

that way, he feels better about himself and his family, friends and teachers feel better, too.

In the adolescent years, especially when ADD is diagnosed late, the treatment is much more difficult. Buffeted by peer pressure, often possessed of a shaky self-esteem, the teen-ager may heartily resent treatment as a "chemical strait-jacket" employed by an oppressive adult world to control someone whose views differ, Wender writes.

For adults, stimulants again are indicated, but many doctors are loathe to prescribe them because of the very real possibility of abuse, Wender said. Instead, physicians turn to antidepressants and often recommend psychological therapy.

"So many people think you're making people conform," Wender said. "What you're really doing is making them better able to cope."

The cause of ADD is not precisely known, but Wender theorizes it may be an inability of brain chemicals called neurotransmitters to connect with one another, resulting in attention difficulties and some lack of a certain kind of neurotransmitter, which usually increase in number as the child ages, easing the condition.

Research also indicates the condition likely is genetic. Nevertheless, Wender believes up to 80 percent of ADD people can be "appreciably improved" by evaluation and treatment.

## Engagement

## Harding-Williams

**JEROME** — Mr. and Mrs. Donald Harding, formerly of Jerome, announce the engagement of their daughter, Keri, to Mark Williams, son of Mr. and Mrs. D.R. Williams of Boise.

Harding, a 1983 graduate of Jerome High School, is attending Boise State University and is employed at the University Book Store.

Williams, a 1980 graduate of Boise High School, is employed by the Idaho Air National Guard and attends Boise State University.

The couple plan a May 2 wedding at the Cathedral of the Rockies in Boise.

## Havey-Weigle

**JEROME** — Mr. and Mrs. Thomas Havey, Spokane, Wash., announce the engagement of their daughter, Betsy, to Scott A. Weigle, son of Mr. and Mrs. Weldon Weigle of Jerome.

Havey is a student at the University of Idaho.

Weigle graduated from the University of Idaho in December 1986. The couple is planning a May 17 wedding in Spokane.

## Mr. Jerome to be picked

**JEROME** — The Jerome High School Office Education Association is sponsoring its third annual Mr. JHS Pageant to help fund Special Olympics April 1, from 1 to 3 p.m. in the high school auditorium.

The eight contestants will be competing in five categories: academics, talent, evening wear, physical fitness and impromptu question.

Prizes will be awarded to the winner, first runner-up, second runner-up and to the winner of each category.

Admission is \$2.50, and the public is invited.

## UNLV: Tark would rather play Pacific

By ROBERT MACY  
The Associated Press

LAS VEGAS, Nev. — Nevada-Las Vegas will not be facing the team Coach Jerry Tarkenton would have preferred in Saturday's Final Four matchup with Indiana, but count on him to show up in New Orleans anyway.

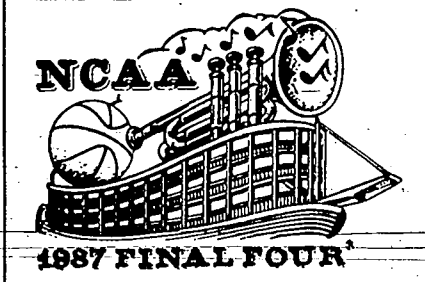

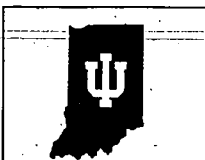

"I'd rather have played LSU than Indiana because I thought we had a better chance of beating them," Tarkenton said Tuesday. "I just wanted to play someone I thought we could beat."

"For that matter, I'd rather have played Pacific," Tarkenton said as an afterthought, referring to a Pacific Coast Athletic Association opponent.

UNLV beat Iowa 84-81 and Indiana edged LSU 77-76 Sunday to advance to the semifinals of college basketball.

# Four for the final

## Indiana: Alford's luck holds out

BLOOMINGTON, Ind. (AP) — Steve Alford, Indiana's two-time All-America and career scoring leader, is trying not to think about the possibility that Saturday's NCAA semifinal game against top-ranked Nevada-Las Vegas might be his last as a Hoosier.

Every game for a college senior, in some way, is a farewell performance, he says.

"I've tried to take that approach in every game I've played this year, whether it's been on the road or at home, saying this will be the last time I'll play against so-and-so, the last time I'll play at Iowa, or at Illinois or at Michigan or wherever," said Alford.

Now that he is a member of a Big Ten champion for the first time, the No. 3 Hoosiers share the title with Purdue. Alford's only unattained goal is an NCAA championship.

## Syracuse: Orange fret about Friars

By WILLIAM KATES  
The Associated Press

SYRACUSE, N.Y. — Anyone who says Providence is not a physical team has not played them, says Syracuse forward Howard Triche.

Triche says that past experience tells him to get ready for another battle of bodies Saturday when the two Big East teams play in the Final Four semifinals at New Orleans.

"The first Big East game we played was in Providence and I was extremely exhausted," the Syracuse co-captain said. "They're so disturbing. They're never going to give up."

Providence, 25-8, is a team that likes to trap on offense, and use its 10-deep bench to pound and tire an opponent.

Syracuse, 30-6, can expect more of the same Saturday from the Friars.

• See SYRACUSE on Page D3

## Providence: Friars still in shock

By HOWARD ULMAN  
The Associated Press

PROVIDENCE, R.I. — Even Coach Rick Pitino, who has orchestrated Providence's surprise rise from mediocrity to the Final Four of the NCAA basketball tournament, has trouble believing it.

"It's difficult for me to imagine," he said Tuesday. "When I watch TV and they say Providence is going to the final and say, 'Hey, we're in the Final Four.'"

The Friars are there for just the second time in school history. They will face Big East rival Syracuse, where Pitino once was an assistant coach, Saturday in the semifinals in New Orleans.

When he began his second season as Providence's coach last fall, did he think he would approach the

## Nebraska sends S. Mississippi to final, 82-75

NEW YORK (AP) — Southern Mississippi was playing ugly against Nebraska Tuesday night until it found the keys to victory in the National Invitation Tournament championship game against La Salle.

Randolph Keys had 24 points and nine rebounds and combined with John White to score all of Southern Mississippi's points during a decisive 15-2 second-half spurt that broke open a close game and gave the Golden Eagles an 82-75 victory in the NIT semifinals.

"It was not a pretty win, but it was a great win," Southern Miss Coach M.K. Turk said.

"We aren't used to watching, to anyone but our wives and girlfriends," Southern Mississippi, 22-11, will face La Salle, 20-12, in Thursday night's title game while Arkansas-Little Rock, 26-10 after losing 57-73 to Nebraska's other semifinal, meets Nebraska, 20-12, for third place.

Southern Miss made only two of its first 15 shots and fell behind by its 13 points in the first six minutes of the game. After making 54 percent of their field-goal attempts in three previous NIT victories, the Golden Eagles hit just 44 percent

against the Cornhuskers. "We had defensive problems early and in the second half we struggled until we went to the zone when we got ahead 61-60," Turk said. "Man-to-man pressure is our usual defense, but we had to use the zone when we got ahead because their fast break was hurting us."

Keys, scoreless in the first 14 minutes of the second half, had 11 points down the stretch.

"It's a money player for them and when he got going that won the game for them," Nebraska co-coach Steve Nitt on Page D3

## Sharpshooting LaSalle bombs UALR, 92-73

NEW YORK (AP) — La Salle used the 3-point shooting of Tim Legler and Rich Tarr in the first half and the inside play of freshman Lionel Simmons in the second to defeat Arkansas-Little Rock 92-73 in a semifinal game of the National Invitation Tournament.

La Salle, 20-12, advanced to Thursday's championship game against Southern Mississippi, 22-11.

UALR, 26-10, will play the Nebraska in Thursday's third-place game. Legler finished with 26 points, Tarr had 23 and Simmons 21 for La

Salle. James Dawn led UALR with 19 points and Paul Springer had 12. La Salle, with no player on its roster as tall as the shortest starter on UALR's front line, refused to challenge the Trojans' superior height in the first half, but it hardly mattered. The Explorers hit eight of 12 3-point attempts in the first 16 1/2 minutes of the game for a 43-25 lead. Legler had 15 points and Tarr 14 in the first half, and both guards had three 3-pointers.

Left-outscored La Salle 9-2 in the final three minutes of the first half, cutting the deficit to 45-34 at way-

halftime. Dawn, who scored 15 points in the opening half, found baskets during that rally.

The Explorers, who tried 14 3-pointers in the first half, attempted only one long-range shot in the second. Instead, La Salle went inside to the 3-foot-6 Simmons, considered one of the top freshman players in the nation. He scored nine points as La Salle increased an 11-point halftime advantage to 66-41 with 10:26 left in the game.

The Trojans, with three players 6-foot-9 inches or taller, got closer than 12 points the rest of the

# UVC brings Eagles down to earth by taking double-header

By LARRY HOVEY  
Times-News writer

TWIN FALLS — Left-hander Bob Cameron brought College of Southern Idaho's offense up short Tuesday afternoon and pointed the Utah Valley Wolverines to a non-conference double-header sweep of the Eagles.

Utah Valley won the opener 6-1 and claimed the second game 9-7 when two late CSI bases-loaded threats fizzled.

Cameron, who had a no-hitter going until Jeff Rice laced a single to left in the sixth inning, and the Wolverines thus left town with a four-game split with the Eagles. CSI swept Monday's twinbill.

But the Eagles, now 7-9 for the season, remain at home this week.

## Prep baseball — D3

entertaining usually strong Dixie College in a pair of twinbills Friday and Saturday and then taking on Lower Columbia College of Longview, Wash., in another double-header Sunday. All action is slated for Frontier Field.

"He was a good one," said CSI Coach Jim Walker of Cameron and his performance. "We told our players before the game he was and he just stopped us."

Walker agreed that the carryover from Cameron's performance in the first game, made things a little easier for Utah Valley right-hander

Derek Slaney to go the distance in the second, although he was forced to fight out of three bases-loaded situations in accomplishing the trick.

"We proved we're a young club today," said Walker, who had expressed pleasure with his troops' showing Monday. "You can tell when they're ready to play. We came in here today a little complacent after two good games yesterday and Utah Valley made us pay."

"We're still fighting to find guys who are consistent," he continued. "We lack the one important mental ingredient that probably can only come with time, experience and probably some success. We don't lack in talent. We've got a people who can run, throw and hit a little bit. It's

just getting that mental ingredient of playing head-up.

Utah Valley got enough cushion for Cameron in the second inning when Shane Whetman singled in a pair of runs off CSI right-hander Jim Tegler, the starter and loser. The Wolverines' added single runs in the fourth and fifth and two off reliever John Braase in the seventh.

The nightcap took off like the high-scoring affair it was as Utah Valley scored in each of the first six innings. But CSI couldn't match that pace, getting six of its seven runs in the first three innings.

A single by Dave Carlson and an error that let Randy Wilestead reach base set up two RBIs for Jeff Nelson and his double. Shaun Peters, who

had three doubles in the nightcap, doubled in a run in the second and opened a two-run fourth inning with his second two-bagger. His third double drove in the eighth and decisive run in the fifth. CSI errors led in the other runs in the third and sixth.

Leadoff batter Billy Satterfield got CSI off on a winging start, belling a lead-off homer, and the Eagles then came up with consecutive singles by Chris Hanks, Kirk Slater and Lance Letner for two more tallies. Errol Shirer walked and eventually scored on a wild pitch in the second and the Eagles last saw daylight in the third when Mo double and roade in on Slater's second base hit of the game. Slater came around on a stolen base and Shirer's single.

The Eagles put-runners at second and third with no outs in the fifth but then saw strike out three in a row. In the sixth, the Eagles again loaded the bases after two were out but couldn't score. And again in the seventh the first three Eagles attain base safely, but only one could score and that was on a rally-killing double play.

# Trenkle isn't likely to depart CSI until he gets a better offer

TWIN FALLS — "I'm really not in this game to collect personal plaques and I'll guarantee you, I'd a lot rather have that national junior college basketball trophy in the CSI trophy case than a plaque that says Fred Trenkle is the coach of the year hanging in my living room."

In other words, Fred Trenkle, College of Southern Idaho's second attempt to attain a national championship, doesn't seek or want anyone's sympathy for not being named NJCAA coach of the year. And Trenkle shrugged off another swipe from the NJCAA which has precluded his coaching the national stars against the Texas stars in the annual U.S. vs. Texas junior college all-star game.

Trenkle will have CSI's Joey Johnson there on time but he's not planning to attend.

Larry Hovey

"I can have a lot more fun for myself and my family doing a little steelhead fishing over the next couple weeks than coaching a bunch of all-stars," said Trenkle. He was on his favorite rock on the Salmon River within nine hours of the "welcome home" shindig the community provided late Monday afternoon.

While Johnson will be playing in the national all-star game, there remains a question of when NBC, or whoever, will be airing

a "special" on the youngster and his leaping ability. CSI officials are given the impression it will be a half-time feature of one of the NCAA Final Four semifinals or finals this week.

It will be the Al McGuire business although the videotape being used will be provided by the school or the local station, KMVT-TV.

But if you're a successful coach as Trenkle now is, this is the fun time of the year. Your name becomes associated with every move from the smallest NIAA to the biggest NCAA vacancies. Of course, his name came up with Nevada-Reno.

And, the team championship unclogs previously busy telephone lines to coaches of hot high school talent. In this latter field, Trenkle is moving with

speed and confidence and is having the recruiting time of his life.

Most CSI fans already know that Trenkle has Tank Collins signed and that most of his recruiting effort is being directed at four or five highly regarded California prospects. Collins' early signing with CSI, plus the national title, has given Trenkle great credibility.

Trenkle pushed his advantage through the nationals last week, calling some recruits each night to say "we'll, we're in the quarter-finals (semifinals, finals)." In that way he was able to share some of the excitement with them.

He was given a surprising reply when he told one player "we'll, we're in the finals against Midland tomorrow night."

"I know," said the youngster, "and I'm go-

ing to be there to see it."

It happened the lad was being recruited by a Kansas junior college on the weekend where he could see the national finals and the Kansas state junior college all-star game in Great Bend.

The Kansas coach wanted to a friend later that bringing the player into watch CSI win the national title might have been a fax pas. "I didn't know they were talking to him," the coach confided.

The stories continue to fly about Trenkle being here or Reno or Provo or anywhere next year.

One has to consider one very major thing: The CSI job is better as a stepping stone to bigger things than any job in the Big Sky Conference and most Western Athletic Con-

# UNLV: Fighting against the 'sin city' label

By SALLY JENKINS  
The Washington Post

SEATTLE — In the city that should be taken out only at night, a preacher's son and a crusader against drugs have been trying to lend a new image to the Runnin' Rebels of Nevada-Las Vegas. Articulate and well-grounded, No. 1-ranked UNLV's six seniors reportedly are about to graduate mostly on time. So what is this Las Vegas suddenly, New Haven?

Just as the Rebels were readying to go to the Final Four for the first time in 10 years, this team with the reputation for lapping around NCAA rules like a floor-show dancer seemed to be straightening out its act. In casual conversation with Coach Jerry Tarkanian, mention that Indiana looks strong and the reply is that Gary Graham is taking graduate courses. Run it up the flagpole that Providence is a surprise, and Lois Tarkanian takes graduation figures.

For awhile, the gambit was working. As the 77th Congress on the West regional last week in Seattle, Tarkanian and his kids were apparently on the verge of one of their best seasons on and off the court. Since then, however, the school has been rocked by new allegations, that coaches and boosters violated NCAA rules by giving cash and special privileges to the Rebels. The Rebels' coach, New York City player who had been trying to become eligible to play for the Rebels before he was arrested on drug charges. Once again, the Rebels wear a bandit label.

"We're tired of it," said academic

counselor Ann Mayo. "We fight this image thing all the time. The kids are No. 1. They're about to graduate, only they're not the headlines."

The Daniels controversy is a bitter blow to a program trying to remake its public perception. This is the place where Tarkanian has vehemently battled the NCAA for the last 14 years. There was NCAA probation for recruiting violations in 1977, and in 1984 he won an injunction to keep the NCAA from suspending him from coaching. He has always flouted conventional recruiting by accepting players with troubled backgrounds and argued that a chance to play for him was better than none at all.

When Tarkanian was graduating just 27 of 68 players in his first 13 years as coach, and even those figures are arguable, he didn't appear to have much of a leg to stand on. But with graduate degrees in sociology and working on anti-drug campaigns, and forward Armon Gilliam, the preacher's son, readying himself to graduate this summer while averaging 23.2 points per basketball game, UNLV had a chance to finally silence critics.

"We've never had a problem kid in the program," Tarkanian said at a Seattle press conference last week. "I know that disapp. I know that some of you guys. I love it when they come out and talk to our players. They come back and tell me these are great kids, like they're surprised or something. I know we have great kids."

Now, the New York newspaper Newsday,

after a month's investigation, alleges that Daniels received cash, at a motorcycle and free housing from UNLV coaches, boosters and other representatives while he was attending Mount St. Antonio Junior College in California. The player who went to four high schools in three different states without graduating finally enrolled at UNLV as a full-time student in January with the idea of becoming eligible in December, 1987. However, he was arrested Feb. 9 during an undercover drug investigation while allegedly attempting to buy crack. Tarkanian announced that he would never play for the Rebels, but now says he's trying to get him into a junior college.

Tuesday at a weekly press conference, Tarkanian said he has documentation to refute some of the Newsday charges. He said the school would conduct an investigation, and expects to hear from the NCAA as well. "Some of the things I know are not accurate, others we will have to look into," he said.

Albrite director, By Robert Sel said Tuesday he will look into the allegations as soon as time allows. He said he was unaware of any violations.

"The Daniels situation remains that he hasn't ever been a student athlete here, and won't be," Rothermel said. "I am unaware of my level of violating any rules in recruiting."

But Tarkanian's recruiting of Daniels was controversial long before the latest charges. Even among his supporters there was some sentiment that the courting of the impoverished urban talent seemed to undercut

UNLV's improved image after an intensive five-year effort to upgrade academics. In 1983, Tarkanian invited UC-Berkeley sociology professor Harry Edwards to come to UNLV to write a survey of the program and offer suggestions. Since then, the Rebels have developed a state-of-the-art staff under Edwards that runs on a budget of a \$50,000 and has three full time advisors and 10 tutors. With six seniors about to graduate, the Rebels entered the NCAA tournament determined to show off their new success.

"We deal a lot with junior college transfers and inner city kids and we work hard with them," Tarkanian said. "If we recruited the same kids that go to Notre Dame and Harvard, they'd all graduate. I don't believe any university is making a greater effort than ours."

The program has shown results, Mayo says she has "never been denied anything," by Tarkanian for her department, and the Rebels senior who will graduate on schedule is Mark Wade, the point guard who changed his major and will wait until the fall to get his degree.

"The last five years we've had a bunch of good guys," Graham said. "The individual has to want it and the university has to want it. I think I was in the right place at the right time."

Edwards of Berkeley has become perhaps one of the most surprising supporters of Tarkanian, after visiting four years ago prepared to write what he called a "blistering" report of Tarkanian's policies. Now, he says UNLV gets them out of school with im-

proved academic skills and attitude even if they do not get a degree.

"I came out with a whole different perspective," Edwards said. "It is no worse than most and better than many. You have to use a different yardstick. It takes the athletes no one else wants, with difficulties or unsavory backgrounds. And he probably does as well as anyone given the fact that he has to evolve out of this problem."

"You're not going to turn it around overnight. One day they've got no grades, the next they aren't going to be Phi Beta Kappas. They come in with 460 SATs, and they aren't going to get a degree, but maybe when they leave they can get 500. I say it's better if they trade their basketball skills for that than being on the street, where they're going to knock you and me on the head."

"He falls in love with those players and he'll do anything for them," Edwards said. "He tries not to break rules. But then an inner city kid comes in with teeth so bad he looks like someone has set off a hand grenade in his mouth, and UCLA rules say you can't let him get them fixed. He reacts negatively to that."

Allegations aside, UNLV may always be misunderstood, the James Dean of college basketball. This is the show town with slot machines that eat your social security check.

"The kid may come here to visit and love it," Mayo said. "But his mother won't let him come. Because it's Las Vegas, and that's Sin City."

# Jordan hits 56 points to lift Bulls over 76ers

By The Associated Press

CHICAGO — Michael Jordan scored 56 points and sparked a 12-point burst in the fourth quarter as the Chicago Bulls held off the Philadelphia 76ers 93-91 in NBA action Tuesday night.

Jordan led the game 71-71 with 9:50 left, then stole the ball and scored on a slam-dunk 27 seconds later. After a three-point play by Gene Banks, Jordan added a free throw and two more baskets to give the Bulls an 81-71 lead with 5:14 left.

Philadelphia, led by Steve Colter's season-high 21 points, pulled within 83-91 on Colter's steal and layup with 14 seconds left. But Colter's last shot fell short as time ran out.

Jordan scored 28 points and had six steals in the first half as the Bulls committed 11 turnovers as the Bulls' four.

The Bulls ran off six straight points and took a 41-35 lead on John Paxson's corner shot but the 76ers scored the next eight points and went ahead 43-41 on Andrew Toney's basket and Colter's free throw after a technical foul on Paxson.

**Boston 111 Cleveland 88**

HARTFORD, Conn. — Larry Bird scored 32 points and Kevin McHale added 22 Tuesday night as the Celtics rolled to their fourth straight NBA victory, 111-88 over the Cleveland Cavaliers.

**NBA Roundup**

McHale had all his points and Bird had all but two of his in the first three quarters as the Celtics built a 20-point lead and substituted freely in the first period.

It was the second straight loss and second straight low-scoring performance for the Central Division's Cavaliers, with Celtics cutting off a season-long total of 76 points in a weekend loss to the Indiana Pacers.

Bird made 13 of 16 shots and added nine assists and eight rebounds. Danny Ainge had 17 points and nine rebounds for Boston and Robert Parish had 14 points and nine rebounds. Brad Daugherty led the Cavaliers with 16 points and Phil Hubbard had 12.

Boston held high-scoring rookie Ron Harper, who leads Cleveland with 22 points per game, to 10-12 shooting. His was the first time all season Harper failed to score in double figures. He had been held to 10 points three times previously.

**San Antonio 103 Houston 97**

SAN ANTONIO, Texas — Artis Gilmore scored 24 points as the San Antonio Spurs avenged a string of five straight losses to Houston with a 103-97 NBA victory over the

Rockets on Tuesday night.

The Spurs had five players in double figures. Walter Berry had 22 points, Jon Sundvold 18 and Johnny Moore 17 while David Greenwood had 14 points, 10 assists and 15 rebounds. Houston was led by Akeem Olatunju with 22 points.

In the fourth period, the Rockets closed to 90-88 before Moore hit nine straight points for San Antonio to put the Spurs ahead 99-92 with 3:49 to go.

Houston's drove the length of the court for a layup but the Rockets blew an opportunity to cut San Antonio's lead to three points when Olatunju was whistled for a double-dribble with 1:44 remaining.

The Spurs led 33-24 after the first period but trailed 55-47 at halftime.

**Dallas 119 New Jersey 107**

EAST RUTHERFORD, N.J. — Mark Aguirre scored 17 of his season-high 43 points in the fourth quarter as he led the Dallas Mavericks to a win from behind to defeat the New Jersey Nets 119-107 for their sixth straight NBA victory.

Aguirre, who became involved in a controversy with Coach Dick Motta and several teammates after being ejected from a game in Dallas on Saturday, eclipsed his previous season high by two points. He also tied the professional scoring record for the Byrne Meadowlands Arena. New Jersey, which lost for the

fifth time in six games, led by nine points in the third period and was still ahead 88-84 early in the final quarter. Then Aguirre took over, scoring all of Dallas' points in a 13-4 stretch that put the Mavericks ahead with a good lead.

Aguirre jumped from the key and then added a 3-point field goal. After Jeff Turner hit a jumper for the Nets, Aguirre scored on a short turnaround shot, then drove the lane and was fouled for a three-point play.

A hook shot by Buck Williams cut Dallas' lead to 94-92 but Aguirre came right back with another three-point play.

That put Dallas in control and the Mavericks went on to their 14th victory in the last 18 games. The Mavericks lead second place Utah by 7½ games in the Midwest Division.

**Atlanta 96 Washington 87**

LANDOVER, Md. — Dominique Wilkins took six stitches above the eye in the first quarter Tuesday night as he came out to score 31 points and lead the Atlanta Hawks to a hard-fought 96-87 victory over the Washington Bullets.

Kevin Willis had 22 points for the

Hawks, who won their third straight to move a full game ahead of the idle Detroit Pistons in the NBA's tightly bunched Central Division.

Washington has lost three in a row and is 3-5 since center Moses Malone was traded with the Hawks.

Atlanta shot 39 percent and Washington 25 percent in a first half that included Wilkins' injury. J. Webb and Washington's Michael Adams and the ejection of Bullets coach Kevin Loughery and Jeff Malone.

The Bullets led 21-19 after one period but Atlanta was in front 42-37 at halftime. Wilkins scored 12 points in the third period as the Hawks extended their lead to 72-64.

Jay Vincent led Washington with 17 points. Bullets guard Jeff Malone, who was averaged 22.3 points a game, missed his first 13 shots and finished with only six points. His only field goal of the game came with five seconds remaining.

**Milwaukee 135 New York 96**

MILWAUKEE — Craig Hodges scored 27 points and the Milwaukee Bucks erupted for 44 first-quarter points en route to a 135-96 NBA victory over the injury-riddled New York Knicks on Tuesday night.

The Bucks, who snapped a three-game losing streak, took command in the first period, closing with 10 surge that put them ahead 44-30. Jack Sikma scored 12 of his 14 points in the period.

A Milwaukee built the lead to 78-54 on a jump shot by Hodges with 35 seconds left in the first half, which ended 78-57. The Bucks shot 53.9 percent from the floor in the first two periods.

A 3-point goal by Hodges put Milwaukee ahead 106-77 with 29 seconds left in the third quarter. The Bucks' biggest lead was 133-90 when Jerry Reynolds' basket with 1:09 to play.

Ricky Pierce added 24 points for Milwaukee. Trent Tucker scored 19 points for the Knicks, who lost for the seventh time in the past eight games. New York played without three injured 7-footers — Patrick Ewing, Bill Cartwright and Jawann Olden.

The Bucks' 44 points in the first quarter tied their season high for points in a period and their 78 points was the most in one half this season.

ference and most Western Athletic Conference schools, as examples. The CSI job does not pay as well as those at other schools would pay, but CSI coaches do not starve. And they get rather a moribund of choice, too. Only one has simply taken off at the first offer.

While something like Reno might be \$75,000 a year and a healthy increase for Trenkle another year or two — especially if this recruiting promise comes true — makes him a very marketable commodity. We doubt any CSI coach who was able to take his choice of jobs, left Twin Falls for less than \$100,000 (all fringes included) for the first year. At least one of them has made in excess of \$3 million per year.

# UNLV

Continued from Page D1  
lege basketball's championship tournament. Tankarian said just being in the Final Four is more than he allowed himself to dream last fall. He has contended since preseason practices began that the four teams making it to New Orleans would have to be not only very talented, but also very lucky. He stuck with

# Syracuse

Continued from Page D1  
upstart Friars, who knocked off the Southeast Region's top two seeds, Georgetown and Alabama, enroute to the national championship foursome. "Even at the end they still play like they want another couple of minutes on the clock," said Triche. "To tell you the truth, every time I've played Providence I've felt exhausted at the end of the game," said Orangemen center Ron Selkay. "They don't give you anything easy. They press the whole game. If you have a layup,

# NIT

Continued from Page D1  
captain Brian Carr said. "They outplayed us during the spurt and made some 8-9 Southern Nebraska Coach Danny Nee said. "We just couldn't come back. I think the two best teams will be playing for the championship." Nebraska led 60-58 before White started the decisive spurt with a 3-point goal that gave the Southern Mustangs the lead for good with 7:17 remaining. Keys followed with a rebound-basket-and-free throw

Trenkle has indicated he feels there are "two or three" jobs in the country he wouldn't turn down. He doesn't know, however, if they would be offered to him, either, but he would chase them as hard as he could. And it remains infinitely easier to maintain a high profile at CSI than just about any second-echelon Division I school in the nation.

Plus, when you send in your application you can always extend the added incentive of bringing along a player or three from your current program.

After discussing these matters with Trenkle, one gets the impression that he is pretty well settled on a game plan for his career and no

sudden hunch or offer is going to change it a lot. But here's the other thing. When Trenkle is gone, CSI will have nothing but top-quality, proven applicants to choose from. The key is to find the guy who can recruit well enough to keep it going the first year. We have told you this before. College of Southern Idaho is a major stepping stone into the upper echelons of coaching. And it would serve the college or its fans no purpose to hire a coach who didn't view it exactly as a stepping stone. It is the only way to guarantee success.

Larry Hovey is a sports writer for The Times-News.

# Indiana

Continued from Page D1  
He set his school scoring record during the season. And 38 points by the 6-foot-2 Alford in last weekend's two Midwest Regional victories over Duke and Louisiana State pushed his career total to 2,382 points.

The realization that in the tournament, any game could be the final one for Alford, starting forward Daryl Thomas and reserve forward Todd Meier to play for Indiana has made them play even harder, Alford said.

"I think we've really tried... the three seniors have really tried to instill that kind of attitude into everybody, that it's not only the last game of our careers but for everybody else, it's the last game of their particular season. And you never know when another opportunity is going to come around. I remember our freshman year, we were two points away from going to (the Final Four in) Seattle, and that opportunity didn't come for three more years," said Alford. "So you never know when another opportunity is going to come by. The younger guys feel that and know that and really have worked hard to do all they can to make the most of the opportunities we've had," he said.

weeks in the Associated Press poll. The heavy success of this year's team is still tough for Tankarian to comprehend. "It's been like a fairytale season," Tankarian said. "At the start of the season I thought we were going to have a good team, but I don't believe anybody could have foreseen a 37-1 record and the Final Four."

# Providence

Continued from Page D1  
end of it needing just two victories for the national championship? "Probably not," he said. "I thought last year we got every ounce of perspiration and got as far as we could possibly go. This year we've improved in so many areas." The Friars were 17-14 last season and won two NIT games before they were beaten by Louisiana Tech. This season they were 21-8 when they began NCAA play as the sixth-seeded team in the Southeast Region. Since then, they have beaten

Alabama-Birmingham, Austin Peay, ninth-ranked Alabama and fourth-ranked Georgetown. They are 25-3 and hoping to be 27-0. "It would be understating it to say it is a shock" to be in the Final Four, Pittino said. "The biggest shock is the way we have done it." "We played on Alabama-Birmingham's home court and that didn't bother us," he said. "One of the toughest defensive teams we faced all-year was Austin-Peay. Then we played the SEC (Southeast Conference) champions and the Big East champions and executed very well."

# Darkness suspends Burley-Minico game

By STEVE CRUMP  
Times-News sports editor

## Prep baseball

BURLEY — Burley High School baseball Coach Dean Satterfield called it the thrill of victory and the agony of defeat, all in the same game.

Minico scored eight runs with two outs in the top of the seventh inning to take a 15-9 lead over Burley headed into the bottom of the inning in their Region III contest here Tuesday. But the Spartans took so long doing so that the game had to be suspended because of darkness.

It will be completed before the Bobcats' and Spartans' regularly scheduled rematch in Rupert on April 7.

The Burley High ballpark is equipped with lights, but they haven't been hooked up yet this spring.

The 3-hour marathon included 24 runs, 19 hits, seven errors and 13 strikeouts, all in 6½ innings.

It came within a pitch of being a 27 victory for the Bobcats when right-hander Jason Whitehead, the second Burley pitcher, got Dan Poulton to fly out and struck out Kevin Miller to open the seventh. But Minico's Craig Anderson hit Whitehead's 1-1 pitch to right-hander Kelly Simon, who watched the ball bounce out of his glove. That put Anderson on second for sophomore Jesse Villanueva, who had come on to pitch the previous inning. Villanueva doubled to right, driving in Anderson. Senior Tony Martinez pitched-billing for Eric Blingham, then hit Messenbrink's 0-1 offering into left field for a single, driving in Villanueva

with the tying run. That brought on sophomore right-hander Tom Messenbrink, who served up successive singles to Kent Schow and Dave Cosgrove, a walk to Kevin Condie, and consecutive singles to James Frost, Poulton, Miller and Anderson, who was the 12th Minico batter in the inning. Before the inning was over the Spartans had eight unearned runs.

Burley took the lead in the bottom of the sixth in similar fashion, trailing 7-6. The Bobcats got left fielders J.J. Gonzalez and Jared Skaggs aboard on walks and moved them along on Whitehead's sacrifice bunt.

Villanueva, the third Minico pitcher, then uncorked two wild pitches — scoring Gonzaless — and Skaggs and struck out Jeff Bray. But the third strike eluded Frost, the Minico catcher, and Bray ended up on first base. He stole second and Frost's throw got past second baseman Schow, putting Bray on third for Fele Rodriguez. Rodriguez singled to left to drive him home. All three of those runs were unearned as well.

Although the lead changed hands six times in 6½ innings, Minico's pitching predominated until the Spartans' error-filled sixth.

(Suspended, darkness)

Minico 15-9 (6-11-8)  
Burley 9-15 (10-11-8)  
Poulton, Christensen (4), Villanueva (6) and Frost; Skaggs, Whitehead (3), Messenbrink (7) and Rodriguez.

# IF SOME LOUD MOUTH ON TV SAYS HE'LL SELL YOU A \$7,500<sup>00</sup> CAR FOR \$49 DOWN

## CHECK THE FINE PRINT WITH US FIRST

Check the facts. All advertising of consumer credit is required by law to include the terms of the contract. Don't be swayed by TV commercials that make light of the real cost of the agreement by flashing a few seconds of disclosure on the screen. Read the fine print and check the facts in the Times-News.

Your newspaper can be read, saved, and re-read. You can even take it to your dealer with questions and comparisons.

A low down monthly payment doesn't always mean you're saving money.

### HERE IS A TYPICAL EXAMPLE:

Vehicle Sale Price/		
Cash Price		<b>\$7500<sup>00</sup></b>
<b>\$49<sup>00</sup> Down</b>	<b>\$166<sup>29</sup> per month</b>	<b>15.5% APR</b>
<b>UP FRONT COSTS</b>		
Down Payment		\$49.00
Destination Charge		\$398.00*
Sales Tax		\$375.00
Title & License		\$48.65*
<b>Total Due on Delivery</b>		<b>\$870<sup>65</sup></b>
<b>FINANCING</b>		
59 Payments at \$166.29		<b>\$9811<sup>11</sup></b>
<b>BALLOON PAYMENT</b>		
Final Payment After 5 Years		<b>\$2150<sup>00</sup></b>
<b>YOUR TOTAL COST</b>		<b>\$12,831<sup>76</sup></b>
On a \$7500.00 Purchase		

Buy right. Shop, compare and check the facts in The Times-News where you CAN read, all about it. \*Estimated
