Don't blame IRS for tax law mess

We can all be grateful, we suppose, that some where along the line Congress had the decency to quietly drop the word simplification from the Tax Reform Act of 1986.

Reform Act of 1986.

Had it not done so it is likely that millions of tax payers and professional tax preparers who are now starting to look into the new law as it applies to 1987 income would find themselves rolling on the floor in uncontrollable laughter. Either that or the nation's health-care services would be forced

the nations neath-care services would be lored to cope with an epidemic of apoplexy.

For the consensus of tax professionals is that the new Form 1040 and the regulations that stand behind-it-far-from being simplified, are in-fact stupefyingly difficult. In the words of one tax-course teacher. "It's the most confusing thing I've lover sear."

Don't blame the Internal Revenue Service. It

only enforces the law that Congress writes.

The reformed tax code, as it finally emerged,

only enforces the law that Congress writes.

The reformed tax code, as it finally emerged, turned out to be considerably longer than the canon that it replaced, and for a lot of taxpayers it will prove to be considerably more complex to apply. This doesn't mean that when all the numbers have been crunched and the bottom line stands revealed the new code will not prove beneficial — i.e., money-saving — for many Americans.

One consequence is that a lot more people will probably have to turn to the services of tax preparers. This raises at least—three—problems. First, some professionals are warning that the extra time needed to do many returns means that they cannot take on new clients. Second, the added time means that the cost of tax preparation will go up. Third, that cost is no longer a tax-deductible expense. Only when tax-preparation charges and other miscellaneous expenses exceed 2 percent of adjusted gross income can any tax savings occur.

The IRS, recognizing what Congress hath wrought, is this year adding 1,000 taxpayer service personnel to answer questions, 900 more toll-free telephone lines and 2,000 volunteers to give advice at schools, churches and IRS offices.

That should help. What would help most of all, of course, is a-tax law that was indeed simplified. Washington accountant David Berenson has this washington accountant David Bereison has this suggestion: Before any new tax code is adopted, every member of Congress should be forced to sit down and prove that he can fill out a tax return himself. We like that proposal Congress, on its part, would probably respond with uncontrollable

Andrus didn't make any friends

Governor Andrus recently had his photo in papers around the state accompanying an article about State Insurance Fund Dividend—Payments. The way I have read these articles, the Governor is not cut to make friends with the insurance industry or private enterprise in research.

the insurance industry or private enterprivageneral.

He saw dividend payments by the State Fund
as an opportunity to gain points politically and
took advantage of it.

I am sure Governot Andrus weighed in advance acceptance to the manner by which he
made his comments, and sectificed votes and

he felt would be a favorable reaction from the
general public.

I will bet if I brought the president of my

TWIN FALLS — Twin Falls County Commission
Chairman Judy-Felton announced Monday ahe would
not seek re-election this fall.
Following the resolution of several dominant issues,
including bluiding a new jail and restructuring the
hospital, she said the time seemed ripe for leaving her
post of six years as the county's west-end
representative.

"It seems they're drawing to a close now and directions are established for things," Felton said. "I
don't anticipate there will be as many controversial issues in the next few years as there were in the last five.

Her successor may not agree with her political philosophy. She characterized elected officials as either gathering input from constituents for decisions or blazing the trail themselves once in office.

"I felt the only reason I was elected was to reflect the community winhes and not trying to make these decisions for thom," Felton said.

One major issue in particular that went against commissioners' intentions was the proposed restructuring of the county hospital, Magic Valley Regional Medical Center.

Tangled fingers of wind played havoc with power lines and curcuits as well. From 3:50 a.m. until after 7:40 a.m. yesterday, more than 3:000 people around the valley were without power for electrical super intendent Dile Monson.

The lights went out for people in Twin Falls and in the Hagerman. Jerome and Burley, areas.

This is very little jower outage compared to what we normally have with this kind of storm; Monson said.

The damage was caused by a fast-moving cold front that blasted through the state in the early morning hours yesterday. Temperatures before the front twere between 55 and 40 degrees. After the front they dropped to the upper 20s, and Bill Galkin of the National Weather Service in Kimberly.

The winds peaked around 4 a.m. when apparently most of the damage occurred:

The weather station recorded 0.1 inches of moisture in snow, and rain by A a.m. yesterday. Moisture-levels were generally the same across the valley. The heaviest percipitation was recorded in Fairfield with 17 inches.

Strong wind and scattered snow showers continued throughout the day and into last night.

Today is expected to be partly cloudy with temperatures near 34 degrees, Galkin said. Winds should die down at last to 10 to 16 miles per hour.

first time in 12 years.
The Soviet Olympic Committeeurged that some Olympic events be
held in communist North Korea instead of pro-West South Korea, but
made it clear that Soviet athletes
would participate regardless.
"Soviet athletes will take part in
the Summer Olympic Games of

Litvack, said that perhaps the most unusual aspect of the Maravich case was the fact that he could participate in competitive athletics at all, let alone excel. Maravich established a collegiate basketball scoring record that still stands, averaging 44.2 points per game at Louisiana State University, between 1967 and 1970.

His scoring total of 3,667 points also set a National Collegiate Ath-letic Association- record. In a 10-year National Basketball Associa-tion career, Maravich played with the Atlanta Hawks, New Orleans and Utah Jazz and Boston Celtics. He was a two-time alliesar and led the NBA fuzzoring in 1977.

THE ACES ON BRIDGE

All fits of pleasure are balanced by an equal degree of pain or languor,), 'its like spending this year part of the next year's revenue."

- Jonathan Swift.

South enjoyed immediate plea 4, K, J, 6, 5 + 10.4 |
Sure with his discard of his diamond loser. In return, he had to pay dear. Iy, The club losers came more slow-ly, and the interest rates.

iy. The club losers came more slow-ly, and the interest rates were usurlous.

South won his spade ace and crossed to dummy in trumps to cash two more spades. On these, he dis-carded his sure diamond loser and a small club. Nax he led-a club fromsmall-olub. Next-he-led-a club from-dummy and East won the king. East led his trump queen to South's ace, leaving-dummy—with-only-one-trump. Able to ruff only one club in-dummy, South had to concede two more club tricks and a trump for one down.

one down.

South would have done much better-had-he-forgotten-about-his-dia-mond loser and started the club suit

sooner.

- After winning the spade acc,
South should lead a low club from
his hand, East's nine winning. East
leads a diamond to West's king and leads a diamond to West's king and a trump comes back. Dummy's king and a trump comes back. Dummy's king clifficence, thee's pades would-show in spades and South-crossruffs in the miniors, limiting the defenders only three tricks.

This game is easy when trumps split 2-2. It requires more care when trumps are not so kind.

Look, then leap into your own business

As 1988 gets under way, many business managers who have never before been out of work are finding themselves unemployed — with little hope of returning to the industry in which they were trained and in which they were trained and in which they have contacts.

This is a direct result of the reshaping and resizing of the job market in the wake of the October, 1987, stock market crash, the rash of consolidations among big corporations and the dramatic rise in entrepreneurial enterprises that followed these dramatic developments.

Going-into-business for yourselfise as American as apple ple. For example, one study by a major placement firm reports that out-of-work executives are starting their own businesses at more than twice the rate compared to two years ago.

There are the lures of 13 being your own boss, 22 chalking up a big success; and 3) making a lot of money, Security, revenge — how sweet it is!

4) Conduct thorough market research. Test the following questions not only on yourself, but on others whose full great the collowing questions not only on yourself, but on others whose full great your crut. Allow them to respond freely, unpressured by your own views and hopes. Why will people buy the product of services you are offerfrig?

What need does it satisfy? What will they buy it? How much will they buy it? How much will they be willing to pay for it?

5) Nurture your credit. Develop a relationship with a bank in, your area known for making loans to small businesses. With 22 percent more of each gallon burning in the engine, 22 percent fewer gallons are required.
Although this product is fairly-new-to the public, industry has been using this knowledge for years. Many large oil companies use the same technology to increase their refinery profits.
Now that the consumer is aware that large companies profit from this catalytic process, it is time that the consumer profit as well.
Believing in the public interest, Joel Nobinson of National Fuelsaver Corp. developed this simple device.

Called the Platinum GaSaver, it injects microscopic quantities of platinum into the airstream entering the engine.
The injector itself takes only minutes to install, while the platinum entering the engine increases the percentage of each gallon burning in the engine from the normal 58 percent to 90 percent. Normally, that 22 percent would only burn when it came in contact with the platinum-coated surfaces

of the calalyticconverter. But withthe GaSaver introducing the platinum into the engine, platinum
catalysis can now burn that fuel in
the engine where the release of
that heat and energy is harnessed
to drive that vehicle.

With 22 percent more of each

-percent fewer gallons are required.
The process works on both
leaded and unleaded gasoline,
and meets EPA and California
standards.
Federal Judge Walter Jay Skinner concluded the live-year administrative procedure studying
the GaSaver by staling, "Independent testings shows greater

In another study concluded recently, the government confirmed that the Platinum GaSaver raised the octane of gasoline, eliminating the need for premium gasoline:

eliminating time need for premium gasoline. Robinson, the developer, commented. "We've already sold over 30,000 GaSavers. Ironically, we find more people buying the GaSaver for its third benefit of extending engine life than buy it for fuel savings or octane boosting. Ever since our economy became battered by OPEC in 1973- we were convinced it would be a small company like ourselves that fuel costs.

Other Commercial Uses For Platinum Technology

catalytic converter — platinum causes unburnt exhaust gases to burn, reducing air pollutants.

platinum spark plugs—platinum tips prevent carbon-buildup on the spark plug to stop fouling:

platinum rings — platinum helps the combustion of racing engines to yield the maximum power from each stroke. refineries & boilers — platinum—increases the release of energy from all Fossil based fuels.

catalytic combuster for wo stoves — platinum inside the sto increases the release of heat from t burning wood fuel...
