E. Stanley Pons, left, Martin Fleischmann hold flask model

## Scientists skeptical of cold fusion claim

The Associated Press

WASHINGTON — Scientists at major laboratories are skeptical that a simple, low-cost experiment in Utah could achieve nuclear fusion — the energy secret of the sun which has been sought for 20 years by thousands of researchers who spent millions of dollars.

But some experts admitted Friday they also are intrigued by the University of Utah reports and at least one warned that if the experiment actually achieved fusion, it could pose a serious radiation hazard.

And some scientists also expressed a bit of envy.

"Suppose you were designing jet airplanes and then you suddenly heard on CBS news that somebody had invented an anti-gravity machine. That's the way we feel," said Ian H. Hutchinson, a nuclear fusion researcher at Massachusetts Institute of Technology. "And, of course, we're skeptical."

An Idaho laboratory announced Friday it was conducting experiments to confirm the Utah reports, and scientists at other laboratories said they were searching the literature to determine if others have performed the experiment. And all are waiting for more technical details expected to be published later this year in the journal Nature.

At a news conference Thursday, B. Stanley Pons, chairman of the University of Utah chemistry department, and Martin Fleischmann of the University of Southampton in England said they achieved a sustained nuclear fusion reaction with equipment that is available in any college laboratory.

Pons said they were able to force atoms to fuse together at room temperature using a rod of palladium metal and a platinum cylinder immersed in a flask of deuterium, a chemical commonly called "heavy water."

The Utah scientist said that when an electrical current is applied, deuterium nuclei are driven into the lattice structure of the palladium where they are compressed together long enough for fusion to occur.

Proof that it works, said Pons and Fleischmann, is that the experiment generated heat that cannot be explained in conventional chemical reactions. They said it produced four watts of energy for every watt of electricity.

## County gives 'green light' for cancer center project

By JENNIFER KAUTH  
Times-News writer

TWIN FALLS — About this time next year, cancer patients won't have to travel out of town for treatment if a decision made Friday morning by county commissioners stands.

"After a 45-minute discussion Friday, the commissioners voted unanimously to approve the county hospital's \$6.9 million budget amendment."

"The green light has flashed so now we proceed," said Dr. Ben Katz, chairman of the county Hospital Board.

"Let's get on with the project and get it done," said Commissioner Jim Fraley.

The decision means Magic Valley Regional Medical Center won't have to wait until its next budget year begins this fall to begin construction on the cancer center and other projects.

"Obviously, I'm pleased," said Hospital Administrator John Bingham. The hospital, however, may have one more hurdle to jump before construction begins. State law allows for an appeal of the commission's decision, and one citizen says that's still a possibility.

"We're exploring all the options available," said Kathy Suresell, spokeswoman for the Idaho Citizens Network and the amendment's most vocal opponent.

She said the appeal process is unclear, however, and hiring a lawyer may be beyond the group's budget.

Twin Falls County Commissioners Norma Blass, Jim Fraley and Marvin Hempleman, from left to right, discuss budget amendment at Friday's session

"But we're still considering that avenue," she said.

"It's not over till we start digging," said Commissioner Chairman Marvin Hempleman.

Approval of the budget amendment was needed because the hospital's 1989 budget did not include expenditures for the treatment center or other equipment purchases or improvement projects.

In the past, the hospital has not budgeted capital projects or its reserves funds. The funds now total about \$19 million.

## Tanker strikes reef, spills oil off Alaska

The Associated Press

VALDEZ, Alaska — A tanker ran aground on a reef and ripped holes in its hull Friday, gushing millions of gallons of thick crude oil into pristine Prince William Sound, the largest spill of North Slope crude in history.

The Exxon Valdez, a 367-foot tanker owned by Exxon Shipping Co. Inc., struck Bligh Reef about 25 miles from Valdez, the northernmost ice-free port in the United States, spilling an estimated 270,000 barrels or 11.3 million gallons of oil into the Pacific Ocean, the Coast Guard said.

"The rock they hit is definitely not in tanker lanes," said Coast Guard Lt. Greg Stewart in Juneau. He said the reef is about 11 miles outside normal lanes.

Early Friday the tanker initially was losing 20,000 gallons of oil per hour, but the outflow slowed to a trickle later Friday. An oil slick snaked about five miles from the ship as wind and tide pushed the crude oil into the sound and away from shore.

The Alaska Department of Environmental Conservation said three tanks on the ship's right side and five tanks along the centerline were punctured. The tanks on the left side appeared intact, the agency said.

Exxon was bringing in three plane loads of cleanup crews from around the world.

The vessel had loaded 1.26 million barrels of oil at the Alyeska Pipeline Service Co. marine terminal at Valdez and left late Thursday.

## Violence fear trims Good Friday turnout

The Associated Press

JERUSALEM — Hundreds of Christian pilgrims went, prayed and sang hymns along the Via Dolorosa in Jerusalem's Old City in a Good Friday procession that retraced Christ's path to his crucifixion.

About a dozen devotees carried heavy wooden crosses to symbolize Christ's walk of agony, and many knelt for communal prayers at the 14 stations that mark the route.

A costumed Armenian group, complete with a thorn-crowned Christ figure, performed along the way. A minor scuffle broke out when Roman Catholic and Protestant groups crossed paths, each demanding right of way.

The turnout was considerably lower than in past years, reflecting fears over the 15-month Palestinian revolt that has torn the Israeli-occupied West Bank and Gaza Strip and spilled into Arab east Jerusalem. No major violence was reported.

In the Philippines, at least 10 people were nailed to crosses and thousands of Filipinos drew blood by beating themselves on the back to symbolize the suffering of Christ. About 5,000 people attended in ritual in San Pedro Ciudad, 40 miles north of Manila.

Pope John Paul II heard confessions from worshippers in the Vatican's St. Peter's Basilica before carrying a 5-foot wooden cross in a Good Friday procession to symbolically relive Jesus' final agonies before his crucifixion.

Before the hour-long procession, the pope told the crowd: "Jesus is

near to those who suffer and fall."

In a comment taken as a reference to drug abuse, he said Jesus "supports the slaves of vice who after having abandoned the habit, fall again; he sustains those who, having been dogged by tragedies, have doubts about God."

In Jerusalem, scores of city police and paramilitary border forces armed with automatic rifles, tear gas grenades and riot batons were moved into the Old City to ensure security for worshippers.

The Old City contains sites holy to Judaism, Christianity and Islam, and is part of territory seized by Israel in the 1967 Middle East war.

The procession swept through the Via Dolorosa, or Street of Sorrows, to the Church of the Holy Sepulchre, where tradition holds Christ was buried after dying at the hands of the Roman rulers of the Holy Land.

The main procession was led by 20 Roman Catholic Franciscan monks. About 600 worshippers followed, a fraction of the crowd that traditionally participates.

A guitarist accompanied Spanish devotees, whose songs echoed in the narrow alleys. Palestinian Arabs sang hymns in Arabic, a contrast to the Islamic call to prayer that rang out from the Old City's mosques.

"You just feel you are part of a tremendous movement, this Christian religion, no matter what denomination it might be," said John Eberlein of Manassas, Va., who came with 10 other Roman Catholics. "To see all colors here, all believing the same thing you believe, it's just very exhilarating, spiritually moving."

## Attempt to amend driving age bill fails

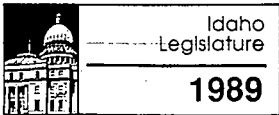

The Associated Press

BOISE — The Idaho House has defeated a series of proposals to amend the bill raising the state's minimum driving age from 14 to 15, a move backers said probably saved the measure.

The Senate already has approved legislation boosting the driving age to 15, effective Sept. 15. It contains exemption for those who must drive to school or work.

"There will be no bill approved this year if you amend it," said Rep. Gary Montgomery, R-Boise, as the House debated the amendments Friday.

"If you want a driving-age change this year, re-

consider these changes," Rep. Kathleen Gurnsey, R-Boise, said.

The votes were not recorded, but appeared to be close.

Rep. John Sessions, R-Driggs, urged House members to amend the bill to change the effective

**Budget battle - A3**  
**Ethics measure - B4**

date from Sept. 15 to the end of the year. He said many school driver education programs continue into the school year, and the change would fall right in the middle of them.

But Montgomery said no matter when the driving age is changed, some students will be in driver's ed programs, but find themselves unable to drive when they complete it due to the change.

"Some will have to wait no matter when you do it," he said. "It's a one-time hump to get over."

## Admission of failure gains Bush latitude in Central America

By JIM DRINKARD  
The Associated Press

WASHINGTON — President Bush's compromise policy toward Central America was a tacit admission that his predecessor's military approach has failed and a signal that Congress, in turn, is willing to give Bush latitude in the region it was reluctant to provide Ronald Reagan.

But because the new bipartisan approach leans heavily on how Nicaragua's Sandinista government behaves over the coming months, it represents a respite, rather than a final settlement of the long-running policy

### Analysis

dispute between Congress and the White House.

For now, both sides on Capitol Hill are willing to read the somewhat vague and artfully drawn two-page policy agreement in their own ways.

Democrats stress language supporting regional peace efforts and provisions permitting aid to the Contra rebels to be used to relocate them into Nicaragua and re-integrate them into the political process there. Republicans

emphasize that such resettlement is strictly voluntary, and that the agreement does not bar future military aid to the rebels should Sandinista promises be unfulfilled.

The agreement means the United States "still supports the Contras as a viable force," said Senate Minority Leader Bob Dole, R-Kan., whose most vocal congressional leaders by Bush and congressional leaders.

Dole said he hoped the peace process would work and that the Nicaraguan government would open its political system to opponents. "But if not, if the Sandinistas continue to do what they have been doing — saying one

thing and doing another — you're going to see at least an effort for military aid in the Congress."

But Democrats pointed out that Bush's new secretary of state, James A. Baker III, had specifically de-emphasized that kind of thinking during hours of talks with key lawmakers over the past month. At the very outset of those conversations, they noted, Baker said military aid — the issue that bedeviled President Reagan's relations with Congress — would play no role in the discussions.

Announcing the new policy at the White House on Friday, Baker said, "We all have to admit that the policy basically failed to some

extent, because we were not united."

That conclusion is underscored by an unreleased draft report from the General Accounting Office, which concludes that Reagan's single-minded reliance on military solutions, both in Nicaragua and other countries in the region, "slowed progress toward economic reforms and development," which it says are the region's real problems.

U.S. policy toward the region since 1980 appear to have been driven largely by a need to counter the threat of Soviet Bloc expansionism," says the report, being prepared for

# Drug addict's rampage in Denver heats semiautomatic arms debate

The Associated Press

DENVER — A drug addict who cut a bloody path through a Denver suburb with a semiautomatic gun heated up debate over semiautomatic weapons Friday in a state where residents jealously guard their firearms and their freedom.

Denver City Councilman Cathy Reynolds said she intends to introduce a resolution Monday declaring the council's intention to pass a law restricting or prohibiting the sale of such weapons.

"They're weapons of war, even if it's only a small war, like we saw yesterday," said Reynolds, who expects strong opposition to the measure.

Eugene Thompson Jr., described by authorities as a 20-year-old man with an insatiable appetite for cocaine, killed two women with a semiautomatic machine pistol, raped another woman, and wounded two deputies and a hostage before fatally wounding himself in a 10-hour reign of terror Thursday.

Thompson used a semiautomatic MAC-11 semiautomatic gun, which can hold 32 bullets. Only five bullets were left when the manhunt for him ended.

Last week, following a trend of nationwide outrage over semiautomatic weapons, state Senate President Tim Strickland sponsored a bill that would ban the sale, transfer and receipt of semiautomatic assault rifles.

The Republican legislator said Thursday's tragedy

would stir emotions on both sides, but he doesn't expect the measure to be very popular among Colorado's residents, who tend to love their firearms and their freedom.

"There will be an awful lot of heat generated, not much light and very few minds changed," he said.

Authorities said the gunman was a drug addict with a long criminal record. They are trying to determine how Thompson, as a convicted felon, could have obtained the gun he used.

Thompson was a suspect in about 140 thefts and burglaries, and was being sought on arrest warrants issued Monday for failure to appear in Golden District Court for probation revocation, authorities said.

His 18-year-old hostage, Jake Carper, remained in critical but stable condition Friday following surgery at Swedish Medical Center, officials said.

Anaphoe County Deputy Daniel Thomas, 36, was released from Swedish Medical Center after being treated for gunshot wounds and shrapnel wounds from flying glass, and Deputy Arthur L. Hilton, 37, was in serious but stable condition at the hospital Friday with gunshot wounds to the upper chest and arm.

In addition to Thompson, the dead included Beverly J. Swartz, 48, and Janice Irene Swartz, 68.

Anaphoe County Sheriff Pat Sullivan, who took part in a dramatic rescue of two of his wounded deputies by driving his car through a fence, held up the MAC-11 after the shootings and demanded that such "weapons of war" be regulated or banned.

## Fusion

Continued from Page A1

trical energy used.

Fusion is the energy source of the sun and other stars. A hydrogen bomb is an uncontrolled fusion reaction.

The reaction occurs when the nuclei of two deuterium atoms are forced together. As they fuse, a burst of energy is produced, along with fast neutrons and helium 3, a benign chemical that could be used in children's balloons.

Fusion is the opposite of nuclear fission, which involves splitting the nucleus from heavy atoms.

Scientists have long viewed fusion as the ideal energy source because it could be fueled with deuterium, which is easily extracted from seawater, and because it would produce a much smaller radiation hazard than the fission of conventional nuclear power plants.

Thousands of scientists in every major industrialized nation of the world have spent the last two decades researching fusion. Most efforts concentrate on duplicating in a controlled way the processes on the sun. This involves compressing deuterium plasma while heating it to 200 million to 500 million degrees.

Most research has involved doughnut-shaped machines, called Tokamaks, that use powerful magnets to contain and compress the plasma while it is being heated. Other efforts use laser beams that zap pellets of deuterium, attempting to achieve the heat and compression for a fractional second.

The goal is to reach a "break even" point, where the amount of energy produced matches the amount used to achieve fusion. Once this is reached, the fusion process could sustain itself.

"Cold fusion," such as that claimed by the Utah experimenters, has been recognized theoretically, but most such concepts use muons, a type of subatomic particle.

John Soares, a University of Rochester fusion researcher, said that if the Utah experiment actually produced four watts of energy, it is also emitting a dangerous level of neutron particles.

Four watts of fusion energy, said Soares, would produce about a trillion neutrons a second "and would certainly be a safety hazard."

## Policy

Continued from Page A1

Senate Foreign Relations Committee Democrats.

The new accord between Congress and the White House puts that goal on a diplomatic track. It notes that continued communist support for "violence and subversion" in the region violate the five nations' peace agreements. But it calls on the Soviets and Cubans to themselves come into compliance with the peace process by ending their military backing for the Sandinistas and the rebels fighting El Salvador's government.

Congress' next step will be to pass, soon after it returns from its Easter break next month, legislation providing the \$45 million or so needed to continue humanitarian aid to the Contras through February 1990, after Nicaragua's scheduled national elections.

Because of Baker's efforts to reach bipartisan accord on the underlying policy, that step is expected to be far easier than past aid renewals.

More significant in the long run than the agreement to give the new administration an extension of Contra aid is Congress' willingness to restore to Bush the latitude to conduct policy in Central America that it had revoked from Reagan.

The Congress recognizes the need for consistency and continuity in policy and the responsibility of the executive to administer and carry out that policy, the programs based upon it, and to conduct American diplomacy in the region, the document stated.

Reagan's covert war against the Sandinistas, which led to the Iran-Contra affair, also prompted a plethora of restrictions on money spent in the region.

For Bush, lawmakers are willing simply to say that they support the use of rewards and punishments to encourage the Sandinistas along the road to democratization, and for now will let the administration decide which actions to take and when to take them.

## Spill

Continued from Page A1

day for Long Beach, Calif.

The terminal was closed to tanker traffic early Friday while officials tried to deal with the spill. The Federal Aviation Administration closed airspace for six miles around the tanker to keep sightseers at bay.

Coast Guard Petty Officer John Gonzales said the tanker's captain was experienced and may have been maneuvering to avoid icebergs from Columbia Glacier when the vessel ran aground. Two Coast Guard investigators went aboard the tanker, he said.

Gonzales said employees of the Alyeska Pipeline Service Co., which operates the trans-Alaska oil pipeline for a consortium of oil companies, were working to contain the oil with floating booms.

Don Cornett, Alaska coordinator for Exxon USA, said about two dozen people were aboard the Exxon Valdez. There were no immediate reports of injuries.

Gov. Steve Cowper arrived in Valdez on Friday to evaluate the spill. He said state officials were considering the use of chemicals to disperse and sink the oil.

"The problem is that chemical use can have a bad effect on marine life," he said. "It's going to be a tough judgment call."

Cowper said conventional responses, such as booms, probably would not work because the spill is so large.

"You probably couldn't do it (contain the spill) with all the equipment available in North America. This is a major spill by any reckoning."

"We've been able to brag for a long time that there's never been a major oil spill in Valdez Harbor. Now, we can't do that anymore."

The Alaska Department of Fish and Game called an emergency meeting to discuss the potential effect on marine mammals and birds in the sound.

In addition to the terminal, the picturesque community of about 3,000 year-round residents about 125 miles east of Anchorage relies on the fishing and tourism industries. The sound is a playground for kayakers, sport fishermen and tourists.

Exxon's Cornett said his company was bringing three planeloads of oil spill response workers from all over the world to deal with the mess. He said the company hoped to pump the oil remaining aboard the grounded vessel onto another ship, refloat the Exxon Valdez and clean up the oil.

"I haven't the foggiest idea what it will cost," he said. "It won't be cheap."

Jason Wells, executive director of the Valdez Fisheries Development Association, said he believed the oil slick would cause little damage unless wind pushes it back toward Valdez. The fishing industry is between seasons.

## Amend

Continued from Page A1

Throughout the controversy, hospital officials have said the budgeting mistake was unintentional and have blamed the county's budget forms for the error. There is apparently no room on the forms to record reserve funds.

The commissioners approved two resolutions: one to adopt the amendment to bring the hospital's budget into compliance with county budget laws, and one to declare the cancer treatment center an emergency need for the immediate preservation of public health.

Discussion about the emergency resolution focused on cancer patients and their need to be close to home during treatment.

Friley said he was unsure whether to classify the need for a cancer treatment center an emergency until he heard stories from families and friends of cancer victims during a public hearing last week.

"They felt like it was an emergency, and I do too," he said.

"There's a lot of life that can't be

measured by a heartbeat," Commissioner Norma Blass said. "Like what you can give by letting a patient stay at home."

"I couldn't find any facts in the testimony tapes that the cancer treatment center would not be an emergency," Blass said.

Surely, however, said she did not hear the county commissioners give any facts stating that the need for a cancer treatment center is an emergency.

Bingham didn't have an estimate on how much money the budget amendment battle has cost the hospital. But he said it has taken "lots of time" and that construction on the cancer center has been delayed by about 45 days.

"But I think it's been beneficial to clarify the steps and the processes," he said. "And we can improve on the basis of experience."

If all goes as planned, the hospital probably will break ground on the cancer treatment center in mid-July, and the new center's doors will open mid-March.

## Today's weather

### Easter bunny likely to have wet feet

Twin Falls, Burley, Rupert, Jerome and Gooding:

Today increasing clouds. Good chance of afternoon showers. Highs in the lower to mid 50s. South winds 10 to 20 mph. Tonight rain showers. Lows upper 30s. Sunday early morning rain showers then becoming partly cloudy, windy and cool with a chance of afternoon showers. Highs upper 40s.

Cannas Prairie and Wood River Valley:

Today partly cloudy in the morning with patchy fog. Cloudy in the afternoon with showers likely. New snow up to one inch above 6000 feet. Highs mid 40s. South winds 5 to 15 mph. Tonight and Sunday showers. Snow level 5000 feet. Lows in the lower 30s. Highs 40 to 45. Windy Sunday.

Northern Utah and Nevada:

Utah — Today through Sunday cloudy with showers and a few thunderstorms likely. South winds 15 to 25 mph except gusty and variable near thunderstorms. Probability of measurable rain 50 percent today through Sunday.

Nevada — Rain or snow likely today becoming snow showers late in the day. Highs upper 40s to mid 50s with steady or falling afternoon temperatures. Rain or snow likely east tonight. Lows in the 30s. Cooler with scattered snow showers Sunday. Highs upper 30s to mid 40s.

Summary: Light rain fell over much of the north and southwest sections of Idaho Friday.

The rain moved into the east in the afternoon, the National Weather Service said. Amounts of rainfall have generally been light, just a few hundredths of an inch. Winds were strong out of the east in western sections of the state gusting over 30 mph.

The pollen count in Twin Falls Friday was 125 particles per cubic meter of air.

The extended forecast for Southern Idaho — Partly cloudy Monday. Scattered showers Tuesday. Partly cloudy again Wednesday. Highs lower 40s to lower 50s. Lows mid 30s to mid 40s.

The warmest temperature in the state Friday was 61 degrees at Malad. Powell and Elk City reported the coldest at 16 degrees.

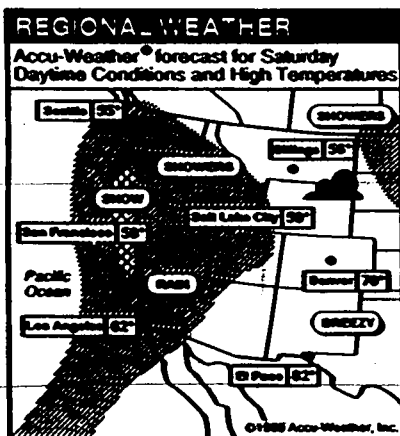

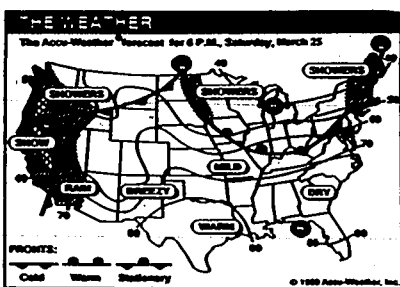

Elsewhere in the nation Friday, the highest temperature was 89 degrees at Chidwell, Texas, and Imperial, Calif. The lowest was minus 2 degrees at Houston, Maine.

## Easy time predicted for college bill

BOISE (AP) — Legislative leaders, falling short of their goal to wrap up the 1989 session before Easter, predict relatively smooth sailing for the newly negotiated \$13.5 million college construction program.

This is the going-home bill, House Speaker Tom Boyd of Conese said, and leaders were optimistic the session would wind up about the middle of next week.

The Joint Finance-Appropriations Committee removed the major roadblock to final adjournment on Friday when it overwhelmingly endorsed the scaled-down building plan that relies on the state receiving a huge unanticipated revenue windfall this spring.

There was little discussion leading up to the Committee's 20-4 approval of the proposal that provides capital improvement financing for every college and junior college campus except Boise State University.

Rep. Mack Neibaur, R-Paul, author of the multiproject plan heavily

weighted to the three schools in the north, remained optimistic that the cash will materialize to underwrite all the projects. But he acknowledged that Democratic Gov. Cecil Andrus' budget director Charles Moss "thinks we're kind of buying blue sky."

The key to paying for any of the projects is the state gaining more than \$6.5 million in unanticipated surplus revenues. The first \$6.5 million over the current revenue estimate has already been earmarked for a cash reserve as a hedge against spending problems looming next year.

The projects in the construction package will be financed based on their priority until the money runs out.

## Legislative log

By The Associated Press

**Sent To Governor**

**SB1207 (Transportation)** — Allows registered owner of any vehicle, not just motor vehicle, to apply for personalized license plates.

**HB245 (State Affairs)** — Sets minimum number of election board clerks at one rather than three and provides for county to determine specific number.

**SB1132 (Education)** — Allows precinct boundary to coincide with a school district boundary which does not follow a visible feature.

**SB1288 (State Affairs)** — Defines logging and adds logging to the list of operations which may claim the production exemption.

**SB1311 (Finance)** — Appropriates \$4 million for operation of veterans services in fiscal year 1990; includes \$600,000 for half the cost of new Veterans Administration facility at Pocatello.

**SB1312 (Finance)** — Appropriates \$10.3 million to Department of Health and Welfare for community developmental disability services programs in fiscal year 1990.

**SB1114 (Resources and Environment)** — Imposes triple damages upon those who remove minerals from state lands without a lease.

**SB1174 (Resources and Environment)** — Allows foreign military personnel stationed in Idaho to obtain a resident fish and game license.

**SB1287 (State Affairs)** — Creates the Bear River Development Task Force.

**Legislative Action Complete**

**HJ111 (State Affairs)** — Asks Congress to impose a national uniform poll closing time in presidential elections.

**HCR119 (Transportation and Defense)** — Creates a special legislative committee to study the role the state should play as new federal regulations on underground storage tanks take effect. Killed in Senate.

**HJ111 (State Affairs)** — Amends the constitution to clearly allow legislative veto of administrative rules. Introduced in House.

**HCR29 (Revenue and Taxation)** — Rejecting 1985 rules of the Board of Health and Welfare regarding individual and subsurface sewage disposal systems.

**HB147 (Appropriations)** — Appropriates \$10.7 million from Permanent Building Account for various projects.

**Introduced In Senate**

**SCR129 (Finance)** — Creates a committee to review the problem of big game depredation.

**SB1331 (Finance)** — Allocates \$176,000 for Veterinary and Agriculture Quality Assurance Program.

**SB1332 (Finance)** — Creates a \$14 million reserve as a hedge against spending problems in the 1990 season.

**SB1333 (Finance)** — Allocates \$853,000 to the Water Resources Department for ground-water quality operations.

**SB1334 (Finance)** — Allocates \$20,000 to the Lava Hot Springs Foundation for consulting work.

That project sparked the debate over campus construction because it was begun by the Andrus administration through private bonding from the Boise State Foundation without legislative approval. The budget panel grudgingly agreed earlier this week to make the first \$500,000 payment on those bonds.

## ISU researcher wins grant to study ecology

POCATELLO (AP) — An Idaho State University researcher has won a \$256,000 National Science Foundation grant to study stream ecology in central Idaho and Yellowstone National Park.

G. Wayne Minshall, professor of zoology and ecology, will use the funds to study the movement of small organic matter in the upper Salmon River and in Yellowstone streams.

Most of the grant money is dedicated to research in the Stanley Basin,

but about \$20,000 will be spent in Yellowstone, where fires charred hundreds of thousands of acres last summer.

Minshall will be conducting the research with Colbert E. "Bert" Cushing Jr. of Battelle Northwest Labora-

tories in Richland, Wash. As many as 25 people may be involved in the project, Minshall said.

He said the purpose of the research is to develop a study technique that is applicable to all streams.

After 33 years of perfecting smiles in the Magic Valley, Dr. Egan Drenker says he will miss the kids the most

## Magic Valley's first orthodontist calls it quits after 33 years

By JENNIFER KAUTH  
Times-News writer

TWIN FALLS — The Magic Valley's first orthodontist saw his final patient a week ago Friday — on the street.

"We met accidentally, she recognized me and asked me about her retainer," explained Dr. Egan Drenker, 68.

Although Drenker shrugs off the chance meeting, colleagues say it's just one more example of Drenker's compassion and devotion to his patients.

"He was extremely loyal to his patients," said Dr. Daniel Haymore, a practicing Twin Falls orthodontist who worked with Drenker in the early 1970s.

"He chose to treat his patients one at a time," Haymore added. "He wasn't an assembly-line orthodontist."

Drenker opened his practice in the Magic Valley in January 1956, bringing with him skills that could not previously be found in the area.

His retirement marks the end of a career that began when professional orthodontia training was in its infancy.

He received his orthodontia degree from the

University of Nebraska, one of the first universities to offer training in the field. Before that, Drenker said, orthodontists learned their skills from other orthodontists.

**'He's always been very meticulous and a careful thinker. He always wanted to do everything himself so everything was right for the patient.'**

— Dr. Michael Badell, Hailey orthodontist

In his 33 years in the Magic Valley, Drenker has earned the respect of patients and colleagues alike.

"He's always been very meticulous and a careful thinker," said Dr. Michael Badell, a Hailey orthodontist. "He always wanted to do everything himself so everything was right for the patient."

Drenker's patients were even included in his

retirement plans. Instead of just closing his doors, Drenker phased out his practice. He stopped taking new patients two years ago, continuing to care for those whose treatment he had begun.

"He felt he had started these patients in good faith and he felt that they expected him to finish," said his wife, Barbara.

In the way he seemed to take most compliments, Drenker downplayed his retirement method. He said he phased his practice out because he couldn't find anyone interested in buying it.

Haymore, however, said only one patient has been visiting Drenker's office during the past month. He estimated Drenker spent about \$1,500 to keep the doors open for the \$60 paid.

"He's a one-of-a-kind guy," he said.

Drenker, whose modesty is notorious among his acquaintances, described himself as "just like any other klutz out there." He even shrugged off the distinction of being Magic Valley's first orthodontist.

He said some area dentists were already doing some orthodontia work before he arrived. But he said he had no problem starting up his

## Jaggers to appeal long prison term

By CRAIG LINCOLN  
Times-News writer

TWIN FALLS — Confessed knife murderer Jesse Ray Jaggers is appealing the 25-year-to-life prison term he received for killing Virginia Westergren.

Jaggers, 18, is appealing even though he asked 5th District Judge Daniel Mehl for a long prison term. "I don't feel right now I'll be safe on the outside," Jaggers said at his January sentencing hearing. "I feel I need a lengthy sentence."

Jaggers has decided he wants to appeal, said lawyer Greg Fuller, a partner of James Meservy, who represented Jaggers.

Meservy was in Moscow Friday and unavailable for comment.

Jaggers recently filed a notice of appeal in 5th District Court, the first step toward an appeal hearing.

Briefs and arguments will be presented later to either the Idaho Supreme Court or the Idaho Court of Appeals.

Jaggers confessed to the May 1988 murder of Westergren, 79, after prosecutors agreed not to seek the death penalty and to drop several felony counts.

Mehl, rejecting prosecutors' arguments for a fixed life sentence, in February ordered Jaggers to spend at least 25 years in prison and urged the state Board of Corrections not to release him until a psychological evaluation indicates Jaggers is no longer a threat to society.

Neighbors found Westergren's body, throat slashed and abdomen stabbed, on May 14. Jaggers was arrested in Las Vegas a short time later.

## Hansen school panel studies consolidation

By LYNDIA BOODY  
Times-News correspondent

HANSEN — A committee of 10 local residents has begun studying the future of Hansen's schools.

The committee met Tuesday to study the advantages and disadvantages of consolidating with another district or taking on a building program.

"I'm real positive about the group," said School Trustee Jeanne Gibson, who is heading up the group along with Trustee Kenny Johnson. She said she encouraged the group to put aside their personal feelings regarding consolidation.

The School Board earlier this month approved the committee idea in response to the request of local residents who presented a petition asking that information be gathered so the town can be well informed on the options.

The group will split into three subcommittees to look at consolidating with Kimberly, a building program and curriculum.

Several residents questioned the board earlier whether Hansen, an agricultural community, should be without a vocational-agriculture program.

The committee is charged with gathering information that will allow residents to make an informed selection of either building new

schools or joining the Kimberly schools.

Gibson said the subcommittees will meet separately to investigate their respective topics. The building subcommittee plans to tour existing facilities. The committee will meet

**The group will ... look at consolidating with Kimberly, a building program and curriculum**

again April 11 to discuss preliminary findings. The group plans to make a recommendation to the School Board no later than October.

Other members are Linda Medvin, Kenny Daw, Burl Duncan, Marjory Norris, John Gibson, Pat Lucht, Kenyon Cumell, Zeb Bell and Lou Eggenquist.

In other business, the board awarded a contract to Columbia Technical Service of Fuhl to design an asbestos removal plan. The plan is expected to be done within the next 10 days and will cost the district \$850. The design plan is necessary prior to accepting bids for the removal of the asbestos.

School board members plan to hold a work session on April 4 to discuss next year's budget. The budget is expected to be similar to the current year's.

## Area banker gets small business advocacy award

By MARTA CLEVELAND  
Times-News writer

TWIN FALLS — C. Alan Horner, vice president of Twin Falls Bank & Trust, has become the first Magic Valley resident to be named Idaho's Small Business Financial Services Advocate of the Year.

Horner was selected for the honor, which usually goes to a Boise-area person, because "his efforts to help small business have done more than any other financial services person in the state," said Joe Herring, executive director of the Region IV Development Association, who nominated him.

"I thought it was kind of far fetched," Horner said of his prospects for winning. Many others

are doing a "super job" in small-business development in areas such as Boise and Coeur d'Alene, areas where there is more growth, he said.

"It's a big deal to have our local banker named," Herring said.

The award, sponsored by the SBA Division of Advocacy, is given to recognize special efforts to assist developing small businesses by a member of the financial-services industry, which includes bankers and accountants.

"I pride myself on sitting down and really listening to every proposal that comes along," Horner said. "If I can't make a loan I want to be able to tell them why and to help them find other financing sources."

"I don't try to discourage people even when I can't make them a loan."

Horner spends most of his time with small-business finance.

He is currently working on creating a new "micro" loan program. He knew small-business financing had a gap. Small loans to new businesses are not cost-effective for commercial lending institutions to get involved with, so they generally don't.

Horner is working with local lending institutions, public entities and SBA to establish a program to fill the gap and provide tiny loans — \$50 to \$5,000 — for new businesses.

He is involved in numerous other development efforts including the establishment of the Region IV Development Corp.

C. ALAN HORNER  
Advocate of the Year

## McClure considers Nelson for federal judgeship

By The Times-News  
and Associated Press

TWIN FALLS — Former Twin Falls attorney Thomas G. Nelson is one of eight Idahoans reportedly being considered for a federal judicial post.

"I'm honored to even be considered," Nelson said Friday in a telephone interview from his Stanley cabin.

U.S. Sen. James McClure is considering the eight candidates for a seat on the bench of the 9th U.S. Circuit Court of Appeals to be vacated by the quasi-retirement of 68-year-old Marion Callister on June 6.

Nelson, 52, now a Boise attorney, is considered an authority on water-rights law

A 22-year Twin Falls resident and former City Council member, Nelson left town about a year and a half ago to run the Boise office of his law firm.

He grew up in Idaho Falls and attended the University of Idaho Law School in Moscow.

In 1965, after three years as a deputy state attorney general, Nelson moved to Twin Falls to work for a private law firm.

In 1979 the firm became Nelson, Rosholt, Robertson Tolman and Tucker.

Nelson is married and has two sons, a stepson and a stepdaughter.

According to a Friday newspaper report the other candidates include:

• Republican Idaho Falls lawyer Mike Crapo, 55, who became top floor leader of the

Senate in December.

• Idaho GOP Party Chairman Blake Hall, an Idaho Falls attorney who at 36 is believed to be the youngest of those under consideration. Hall worked as a legislative assistant to McClure for two years.

• U.S. Magistrate Mikel Williams, 43, a former assistant Idaho U.S. attorney and partner in a Boise law firm who assumed the bench in 1984.

• Alfred Hagan, 57, the state's chief federal bankruptcy judge, appointed in 1984. He was a 4th District judge from 1967 to 1984 and left private practice in Boise for the federal position.

• Edward Lodge, 55, Idaho's other federal bankruptcy judge, who previously served 23

years as a 3rd District judge.

• C. Timothy Hopkins, 52, senior partner in an Idaho Falls law firm.

• Fourth District Judge D. Duff McKee, 50, a Kellogg native who practiced law in Boise for 21 years before assuming the bench in 1985.

"All of these people are well-known and respected people," said McClure aide Ted Neuenchwander.

He declined to comment on the candidates, but confirmed that Boise attorney Guy Hurlbut, McClure's choice for the Ninth Circuit last year, is not under consideration.

The San Francisco-based Ninth Circuit, authorized for 28 judges, currently has three

vacancies, including one created by the death of Judge J. Blaine Anderson of Boise last April.

While some court observers expect an Idahoan to be appointed, court spokesman Mark Mendenhall said there is no requirement for any 6th State representatives on the nine-state court. The last appointee was Stephen Trott, a former associate attorney general in Washington, D.C., who chose to make his home in Boise.

Within a couple of weeks, a Justice Department team is expected to visit Idaho to interview candidates and conduct preliminary background checks.

## Magic, Soldier ski areas to be open only 1 more weekend

TWIN FALLS — Wax up those skis for one last run down the slopes.

The Sawtooth National Forest reports this will be the final weekend of skiing at Magic Mountain and Soldier Mountain. Both resorts offer reduced lift-ticket prices for this last spring ski filing.

Magic Mountain offers \$7 tickets today and Sunday with ski-rentals for all ages today at the Poma lift.

With a foot of new snow, Soldier Mountain offers \$10 tickets today and Sunday — all runs, all day.

Resorts at Pomerelle and Sun Valley also will be open, with a

base of 119 inches at Pomerelle and 75 inches at Bald Mountain.

Cross-country trails also are open, and most have been groomed: In the Sawtooth National Recreation Area, snow levels range from 68 inches at Galena Summit to 17 inches in Stanley.

The SNRA visitor center, after Sunday, will be closed weekends until the first part of May.

Skiers, snowmobilers and other forest visitors are urged to call the 24-hour avalanche information number at (208) 622-8227 for daily updates on avalanche hazards, snow conditions and weather.

# Spud industry claims aldicarb scare hasn't hurt much

**POCATELLO (AP)** — Idaho potato industry officials say leaked preliminary results on an Environmental Protection Agency study of the insecticide aldicarb have not been as damaging to the market as initially feared.

But just to be sure, the industry is preparing a public relations effort to reinforce its good standing reputation.

David Smith, president of Idaho Growers Shippers Association, said Thursday that there has been no reduction in sales, and he expects none.

"I think the matter has been clarified with the proper documentation of the fact that the

aldicarb scare is a wholosome, nutritional product that is pesticide-free," he said.

But some lawmakers apparently see it differently.

A letter sent to EPA Administrator William K. Reilly on Wednesday by 28 congressmen, including Idaho Rep. Richard Stallings, said the link to The New York Times that resulted in nationwide publicity is "damaging potato markets."

The Stallings spokesman also has been quoted as saying the report "basically froze the potato market" in Idaho, and that farmers have begun presenting buyers with sworn affidavits that their potatoes are

aldicarb-free.

"We've been told... New York buyers said you can send potatoes but we're not sending any money until we hear more about aldicarb," said Stallings aide Brent Searle.

It's going to devastate our agricultural economy.

But both Smith and Dick Watt, president of the Potato Growers of Idaho, said they were unaware of any serious impact on the market.

"We feel the growers are still in a positive marketing position right now," Watt said.

Still, the Idaho Potato Commission has decided to begin a public relations campaign

to counter "misleading" reports on aldicarb.

"We are going to mount a consumer education effort on EPA changing their position," said Mel Anderson, the commission's executive director. "The difficult side of this is that it has been hard getting the retraction statement out."

EPA Acting Deputy Administrator John Moore said Wednesday he saw "no basis for any undue concern, at this time, about eating bananas or potatoes" treated with aldicarb.

The New York Times' article on Tuesday said EPA's preliminary report indicated aldicarb residue poses a health threat to

infants and children.

The chemical, with the trade name Temik, is widely used on Idaho's \$457 million potato crop and about 40 percent of the crop nationwide.

State potato officials said they were disturbed that East Coast newspapers publicized the EPA's preliminary report, but in some cases have not run the agency's clarification statement.

Anderson said that has made it necessary for the industry to buy advertising.

"We have got to get the message out somehow," he said.

# INEL scientists to check claims of controlled nuclear fusion

**IDAHO FALLS (AP)** — Scientists at the Idaho National Engineering Laboratory will conduct experiments to test the claims of two researchers who claim to have achieved controlled nuclear fusion, an INEL spokesman says.

Martin Fleischmann of the University of Southampton in England and B. Stanley Pons, chairman of the University of Utah chemistry department, have announced their electrochemical

process had produced a surplus of energy for periods of up to 100 hours.

Fusion, which now occurs in the sun and in hydrogen bombs, has long been considered a possible source of clean, abundant energy.

"We propose to do an experiment to confirm the results," said Gus Caffrey, a scientific specialist at EG&G Idaho Inc., a major private contractor at the U.S. Department of Energy facility.

The INEL will conduct its tests in

May or June, he said Friday.

Pons and Fleischmann said Thursday in Salt Lake City that they had discovered a method to achieve nuclear fusion at room temperature, but cautioned that more research is needed to determine whether the process will work on a large scale.

In fusion reactions, the nuclei of two heavy hydrogen (deuterium) atoms are combined to become the nucleus of a helium atom. A neutron and a lot of energy are produced.

Pons said the new process can be carried out in simple glass flasks at room-temperature. Heavy water — water with deuterium — circulates between a negatively charged palladium metal rod and a positively charged platinum cylinder.

The electrical current drives deuterium nuclei (deuterons) into the lattice structure of the palladium. Pons said the lattice structure holds the deuterons close together long enough for fusion to occur.

The science of nuclear fusion — where energy is produced not by splitting atoms, but by joining them — has a long history of "wild, flaky ideas," said Doug Holland, manager of EG&G's fusion safety program.

"I would not classify this right off as one of those," Holland said. "We

can't dismiss it."

For the last five or six years, the INEL has been working on a "low-key program" to test cold fusion, Caffrey said.

That research, done in connection with the Los Alamos National Laboratory in New Mexico and Brigham Young University, involves using subatomic particles called muons to fuse hydrogen atoms.

The muons behave like electrons, since they have hydrogen atoms, but they weigh 200 times as much as electrons. As a result, they draw the hydrogen nuclei 200 times closer together — close enough to create energy, Caffrey said.

Between \$300,000 and \$400,000 is spent annually on muon research at INEL, Caffrey said.

Pons and Fleischmann said they had spent \$100,000 of their own money to achieve their results, which began with experiments in Pons' own kitchen.

Another \$1.5 million is spent each year on INEL fusion safety research to ensure that commercial fusion reactors, if developed, are safe, Holland said.

Another \$500,000 is being spent annually on magnetic fusion research.

If the new fusion method pans out, it could cause a reshuffling of fusion research at all national laboratories, Caffrey said, as well as a great deal of long-term research since it could take years to bring the technique from desktop-sized tests to full-scale use.

## Obituaries

### John K. Berrett

**TWIN FALLS** — John Keith Berrett, 58, of Ogden, Utah, and formerly of Twin Falls, died Friday, March 24, 1989, in an Ogden hospital.

He was born Aug. 22, 1930, in Ogden, the son of John and Vera Street Berrett. He married Linnie I. Caldwell on Sept. 3, 1956, in Ogden. He was employed at Hill Air Force Base where he was a warehouse foreman. He was an Army veteran of the Korean War.

Mr. Berrett was a member of the Disabled American Veterans.

Surviving are his wife of Ogden; four sons, Staff Sgt. John D. Berrett of Mountain Home; Kelly Lee, Joseph K. and Timothy E. Berrett, all of Ogden; one daughter, Sherry Lynn Lawson also of Ogden; two brothers, Daniel W. Berrett of Ogden and Mark L. Berrett of Howell, Utah; one sister, Anne L. Haynes of Lawton, Okla.; and eight grandchildren.

The graveside service will be at 11 a.m. Monday at the Evergreen Memorial Park in Ogden. Friends may call from 6-8 p.m. Sunday and on Monday one hour prior to the service at Myers Mortuary in Ogden.

### Earl H. Downing

**JEROME** — Earl H. Downing, 58, of Spirit Lake and formerly of Jerome, died Wednesday, March 22, 1989, at his home.

He was born July 24, 1930, in Jerome, the son of Harvey and Eula Downing. He graduated from Jerome High School and served in the United States Navy.

Surviving are his wife Edith of Spirit Lake; one daughter, Ann Ford of Orange, Texas; four sons, Bradley Downing of Newman Lake, Wash., Kelly Downing of Spokane, Wash., and Lance and Cori Downing, both of Seattle, Wash.; two brothers, Clair Downing of Jerome and Robert H. Downing of Twin Falls; three sisters, Gladys Towne of Ely, Nev., Delores Towne of Dietrich and Velma Wageman of Boise; and nine grandchildren.

The funeral will be at 2 p.m.

today at the Thorn Hill Mortuary in Spokane, Wash.

### Vickie Swan

**BURLEY** — Vickie Swan, 46, of Burley, died Thursday, March 23, 1989, at Cassia Memorial Hospital from injuries sustained in an auto accident.

She was born Jan. 27, 1943, in Logan, Utah, the daughter of Sherman and Donna Davis Hansen and attended schools there graduating from Utah State University. She married Gary B. Swan on Jan. 9, 1964, in the Logan LDS Temple. She taught school in the Minidoka School District and in Oakley. She lived in Burley for the last 10 years.

Surviving are her husband of Burley; two sons, Brett Swan of Provo, Utah and Wade Swan serving a LDS mission to Scotland; four daughters, Shanne Branhman of Provo and Laurel, Nicole and Michelle Swan, all of Burley; her father, Sherman Hansen of Logan; and two brothers, Don Hansen of Centerville, Utah and Roy Hansen of Denver, Colo. She was preceded in death by her mother.

The funeral will be at 11 a.m. Tuesday in the View Second Ward Chapel, 560 S. and 500 E., Burley with Bishop Michael E. Burley officiating. Burial will be in the View Cemetery. Friends may call at McCullochs Funeral Home on Monday from 6-8:30 p.m. and Tuesday at the church from 9:45-10:45 a.m.

### Charles H. Baker

**BURLEY** — Charles Henry "Chuck" Baker, 68, of Burley, died Thursday, March 23, 1989, at Cassia Memorial Hospital.

He was born July 3, 1920, in Burley, the son of John W. and Emma Lou Weaver Baker. He received his education in Burley. He served in the Army Air Force during World War II. He married Pauline Oates Taylor on Dec. 9, 1958, in Ely, Nev. He worked as a well driller all of his life.

Mr. Baker was a charter member

of the Colonial Baptist Church in Rupert.

Surviving are his wife of Burley; one stepson, Walter S. Dunn of Fairbanks, Alaska; two sisters, Loma Lallaman and Nellie Johnson, both of Burley; one brother, Walt Baker of Burley; three step grandchildren; and four great-grandchildren. He was preceded in death by his parents, his first wife, Dolly, in 1976, three brothers and one sister.

The funeral will be at 10 a.m. Monday at the Joseph Payne Memorial Chapel, 221 W. Main St., Burley with the Rev. B. G. Stumberg officiating. Burial will be in the Gen. Memorial Gardens. Friends may call at Payne Mortuary from 6-8 p.m. Sunday and on Monday until 9:30 a.m.

### Ida Williams

**BURLEY** — Ida Rebecca Nelson Anderson Williams, 86, of Burley, died Thursday, March 23, 1989, in Burley. She was born Feb. 16, 1903, in Marion, the daughter of Hans Peter and Rebecca Pinnus Frost Nelson. She received her schooling in Burley. She graduated from Lower Columbia Community college with a social arts degree. She married Edgar Anderson in Aug. of 1924. In Burley and he died in 1933. She then married Martin Elmo Williams in May of 1934, in Burley and he died in 1960.

She was a member of the LDS Church and also belonged to the Toastmistress Club.

Surviving are two daughters, Gloria Hall and Maureen Mason, both of Hurricane, and one brother, Harvey Nelson of Kelso, Wash.; 16 grandchildren; 25 great-grandchildren; and three great-great-grandchildren. She was also preceded in death by three sons.

The service will be at 2 p.m. Friday at the McCullochs Funeral Home. Burial will be in the Gen. Memorial Gardens. Friends may call at McCullochs on Friday prior to the service.

**Senior Citizens Center.** Arrangements are under the direction of Demarys Gooding Chapel.

**TWIN FALLS** — The graveside service for Hazel A. Modin Weller, 89 of Twin Falls, who died Wednesday, will be at 3 p.m. today at Sunset Memorial Park with Dr. John Parish Jr. officiating. The family suggests memorial contributions may be given to a favorite charity. Arrangements are under the direction of Reynolds Funeral Chapel.

**HANSEN** — The funeral for Jared David Scott, 10, of Hansen, and formerly of Filer, who died Wednesday, will be at noon today at the Filer LDS Stake Center with Bishop Wesley Frey officiating. Burial will follow in Sunset Memorial Park. Arrangements are under the direction of White Mortuary in Twin Falls.

### Birch

A daughter to Mr. and Mrs. Peter Shawver of Eden; and a son to Mr. and Mrs. Graydon Stanley of Filer.

### CASSIA MEMORIAL HOSPITAL

### Admitted

Nina Shadley and Nicole Swan, both of Burley; Orlo Garrard of Okaday; Arthur Priest of Paul; and Margaret Tompkins of Rupert.

### Released

Christine Graythorn, Mary Anne and Rose Watrell and baby, all of Burley; Diana Breeding and baby, both of Murtaugh; Marna Graham of Rupert; and Leann Wright and baby, both of Declo.

## Police ready for anti-abortion protests; no one materializes

**SPOKANE (AP)** — Police blocked streets leading to a hospital and medical clinic where abortions are performed, but anticipated Holy Week civil disobedience by anti-abortion groups never materialized Friday.

Streets near Deaconess Medical Center and the Sixth Avenue Medical Building were barricaded as a precaution against possible demonstrations, said Spokane Police Lt. Robert Van Leuven. Police also kept watch on a Planned Parenthood office, he said.

Police began setting up barricades at 5 a.m. after receiving numerous anonymous messages in the last two weeks that anti-abortion groups planned some sort of demonstration, Van Leuven said.

Since being caught by surprise by a demonstration March 3 at the Sixth Avenue building, police officials have met several times with local abortion foes, urging them to give advance notice of planned events, he said.

"Our position is, every citizen has the constitutional right to conduct a peaceful demonstration," said Van Leuven. "We will protect that right. But we also have to protect the rights of those not involved in these demonstrations."

After the March 3 demonstrations, in which 101 people were arrested for trespassing and obstruction, police Chief Terry Mangan criticized the organizers, saying public safety was jeopardized by thinned police ranks.

Should demonstrations occur this weekend, police "are prepared for any eventuality," Van Leuven said.

Judy Schlomer, a spokeswoman for Deaconess, the only Spokane hospital where elective abortions are

performed, said officials anticipated trouble because of Holy Week activities by abortion protesters in other parts of the country.

Police officers were stationed inside the hospital and visitors during the day were being issued passes, similar to those issued to after-hours visitors, she said.

Meanwhile, lawyers on Thursday asked a federal judge in Seattle to start contempt-of-court proceedings against 34 people who took part in the March 3 Sixth Avenue clinic abortion protest.

The 34 were among 101 people arrested when they occupied two floors of the Sixth Avenue building in a blockade demonstration allegedly patterned after Operation Rescue, a national anti-abortion group.

The motion was filed with U.S. District Judge Barbara Rothstein, seeking a March 31 hearing.

It asks the judge to order the protesters to appear in court and explain why they should not be held in contempt for violating a statewide injunction the judge issued last year, barring "Operation Rescue" sit-ins and blockades.

If found in contempt, the protesters could face fines of as much as \$500.

Most of those arrested were charged with first-degree criminal trespass, a misdemeanor. Their cases are pending in Spokane County District Court.

In addition, more than 30 people were arrested last Saturday at a "rescue-type" protest at the Feminist Women's Health Clinic in Yakima.

## Authorities successfully detonate letter bomb sent to police station

**HELENA, Mont. (AP)** — Authorities are examining evidence from photographs and physical fragments to determine the mailing point of a letter bomb delivered to the Highway Patrol headquarters here, a postal inspector said Friday.

Police removed and safely detonated the device Thursday afternoon, shortly after it arrived at the office of Col. Robert Griffith, chief of the Highway Patrol.

"We do have some evidence to work with to determine where the parcel entered the postal system," said Jim Bordenet, public information officer for the U.S. Postal Inspection Service in Seattle.

Authorities may already have some answers.

"I am not at liberty to say," Bordenet replied when asked where the package was mailed. Asked if he knew what the postmark was, he replied, "I am not going to comment on that."

Police took photographs of the parcel — a large matchbox wrapped in black electrical tape and

addressed in crude handwriting — before they detonated it by remote control at the county's junk vehicle yard north of Helena.

Those photos will not be made available to the public, Lewis and Clark County Attorney Mike McGrath said Friday.

"They're using that as part of the investigation to trace the source of the bomb," McGrath told The Associated Press.

He said he has not seen the photos and would not comment on whether they reveal the postmark or other information that might help authorities trace the parcel.

The fragments remaining after the package was detonated have been sent to the Postal Inspection Service laboratory in Washington, D.C., for analysis, Bordenet said.

While Helena police have described the device as a bomb with sufficient explosive force to cause substantial personal injury, Bordenet said that has yet to be determined.

"At this time I would not

characterize it as a letter bomb," he said in a telephone interview. "It is a suspect parcel. We are in the process of analyzing the item to determine what it is, and from that we will be guided on how we proceed with the investigation."

Rick Koss, the federal postal inspector for Montana, based in Great Falls, will head the investigation with assistance from Helena police and with "as many resources as are required" from the Postal Inspection Service, Bordenet said.

Helena Police Chief Bill Ware had said the FBI and federal Bureau of Alcohol, Tobacco and Firearms would be involved, but Ware later said it was determined the Postal Inspection Service had jurisdiction.

Postal inspectors in the Seattle division, which includes Washington, northern Idaho, Montana and Alaska, normally see "about one (case) a year that is in fact a letter bomb," Bordenet said. "Recently, it's been less than one a year."

## Drenker

• Continued from Page A4

practice because people had been driving to Salt Lake City and Boise for treatment.

"He is quiet," said Dr. Joseph Lyman, a Twin Falls dentist. "But he always had time to talk to you."

Drenker's accomplishments are not limited to his practice. Before becoming an orthodontist, he was part of the World War II Manhattan Project that built the atomic bomb.

He was a supervisor in a plant that produced uranium isotopes.

With a background in engineering, mathematics has always been a

hobby for Drenker.

Haymore said when he worked in Drenker's office, he would read Sports Illustrated during lunch while Drenker doodled equations at his desk.

Applying his hobby to his career has resulted in nationally circulated articles about headgear and about how wires move teeth. Drenker said he will continue to write in his retirement.

"I don't want people to think I didn't go whole-hog," he explained. "I believe in orthodontics."

Over the years, Drenker has seen

many crooked teeth and a couple of chokes in orthodontia.

He said surgical techniques are now used in conjunction with orthodontics to correct jaw positions.

But the biggest change was when orthodontists began "bonding" braces to the teeth instead of using bands to hold the metal brace in place, he explained.

"Kids don't like to be too tiny," he said, applauding the technique.

He said he'll miss the kids the most.

"I had a whole bunch of good kids," he said, as he gazed out a window.

## Hospitals

### MAGIC VALLEY REGIONAL MEDICAL CENTER

# Historians, theologians continue resurrection debate

By GEORGE W. CORNELL  
The Associated Press

NEW YORK — To substantiate a miracle, natural logic says the evidence must be so overwhelming that any possibility of its being wrong would be more miraculous than the miracle itself.

This theory of 18th-century Scottish philosopher David Hume, insisting that historians must reject as erroneous what is not possible in nature, would preclude proof of the resurrection.

Celebrated by Christians this Sunday, that event didn't occur within natural laws.

British atheist philosopher Anthony Flew contends, "We have no alternative but to continue in the presumption that anything that is naturally impossible did not happen."

However, a church historian Gary Habermas says "it is an unjustified assumption that whatever occurs in the world must automatically be a natural event. This is to 'beg the very question that we seek to answer.'"

The differences were aired in a debate between Flew and Habermas at the resurrection, "Did Jesus Rise From Dead?" issued in a new paperback by Harper & Row.

Flew says his "major point is that we simply have not got enough evidence to reconstruct what happened then. You need better evidence."

Since the event is "naturally impossible," he says, "we should demand evidence of a much higher order than we demand when it is an everyday event."

Habermas of Liberty University in

Lynchburg, Va., says "we do have enough facts to know." He says that even "if you utilize only the facts that critics admit, you have enough of a basis to say that the eyewitnesses saw Jesus." The "earliest eyewitnesses were absolutely convinced they had seen the risen Jesus."

The arguments have persisted through the centuries, although it generally is conceded that something powerfully influential occurred at that time to spur the sudden and rapid rise of Christianity.

But challenges to the resurrection have gone on from the beginning, including the biblically recorded bribing of the guards at Jesus' tomb to claim his followers stole the body. That notion, however, involves an insurmountable problem of how such a robbery of a closely guarded tomb could

have been executed, and also contradicts character and motivation.

Various other naturalistic attempts to explain away the event have been largely discredited, including:

The "swoon" theory that Jesus wasn't entirely dead, that he revived in the tomb and managed to get out. However, a wounded near-cadaver could hardly move the heavy, sealed stone door, nor afterward give the impression of a triumphant conqueror.

The "hallucination" theory that Jesus' post-resurrection appearances were psychologically induced visions. Such hallucinations stem from intense expectancy, but the disciples were broken, utterly defeated men.

In the debate, Flew agreed the naturalistic

theories were not reasonable in the circumstances, but maintained the accounts of the event were recorded too long afterward to be reliable.

The earliest written accounts were 10 to 20 years after the event, and Flew says that "is enough time to permit the forces that corrupt testimony to do irrecoverable damage."

Who knows what they claimed at the time, he said. However, about the resurrection, he added, "I suppose they claimed something of this sort, yes, I would expect it."

As others have done, Habermas points out that many accounts in ancient history were recorded much longer after the events described, 30 to 60 years afterward, and are accepted as reliable.

## Services

Continued from Page A6

**NAZARENE**

**KIMBERLY** — Church of the Nazarene, 423-6282.

Sunday — Easter sunrise service — 6:30 a.m. City park or Kimberly Christian Church if bad weather; Easter service — 10 a.m. children's program, choir musical, the Rev. Weldon Shuman's message — "The Meaning of Easter"; evening service — 6 p.m./Rev. Shuman's message — "Living Like Jesus Loved."

Monday — Ten all nighter rock-a-thon — 9:30 p.m./Wood's.

Wednesday — Adult prayer and Bible study; teen puppet practice (jr.-sr.) children's Bible quizzing (grades 3-6) — all at 7 p.m.

Saturday — Men's Bible study and fellowship — 8 a.m.

**TWIN FALLS** — Church of the Nazarene.

Today — Teen American heart fund drive — 10 a.m.

Sunday — Continued morning worship — 10 a.m. the Rev. Ray Doane's message — "God Does Not Lie"; evening service — 6 p.m./Rev. Doane's message — "Christian Maturity."

Monday — Prayer group — 9 a.m.; Retirement Center Ministry — 6:30 p.m.; visitation — 7 p.m.

Tuesday — Josh McDowell video, "How To Build Bridges of Communication," discipleship and Single Again (child care provided) — all at 7 p.m.

Wednesday — Men's fellowship breakfast — 6:30 a.m.; puppet ministry — 6 p.m.; Bible study, Wednesday night live, King's Kids and men's fellowship — all at 7 p.m.

Thursday — Men's prayer group — 6:30 and 7:30 a.m./Tommyknocker, Bible study — 9:15 a.m.; women's Bible study — 4 p.m.; personal evangelism — 6:30 p.m.; That all-night thing at Danny's — 10 p.m.

Friday — Women's Bible study — 9:30 a.m.

**PENTECOSTAL**

**TWIN FALLS** — Bethel Temple.

Sunday — Sunday school — 10 a.m.; Easter worship services — 11 a.m. and 5 p.m. the Rev. Phil Blanton.

Monday-Friday — Prayer — 6 a.m./church.

Tuesday — Ladies prayer meeting — 9:30 a.m.; Bible study — 7:30 p.m.

**TWIN FALLS** — The Pentecostals of Magic Valley, 261 Fifth Ave. East.

Sunday — Church school — 9:45 a.m.; worship — 11 a.m. the Rev. Richard Klein's Easter message — "The Great Reversal," special music by children and adult choirs.

Wednesday — Scotch Shop — 9:30 a.m.

**WENDELL** — United Presbyterian Church, 536-0270.

Today — Egg hunt for children — 10 a.m./church.

Sunday — Church school — 9:45 a.m.; worship — 11 a.m. the Rev. Richard Klein's Easter message — "The Great Reversal," special music by children and adult choirs.

Wednesday — Scotch Shop — 9:30 a.m.

SYDNEY OMARR

## ASTROLOGICAL FORECASTS

**IF MARCH 25 IS YOUR BIRTHDAY**  
 you are spiritual, sensitive, psychic, a perfectionist. Paces, Virgo persons play important roles in your life. You are embarking upon pioneering project, will make fresh start in new direction. You feel uncertain where love is concerned because of recent breach of confidence. You are well on way to recovery, will take greater charge of your own destiny. In April, events will occur that relate to creative, greater self-assurance. July will be your most memorable month of 1993.

**ARIES** (March 21-April 19): Scenario features winning and dining, sensuality, psychic impressions. You'll have access to "inside information." Emphasis on the occult, hidden values. Reunion with family member featured. Capricorn involved.

**TAURUS** (April 20-May 20): You're given more leeway in connection with legal decision. Focus on public image, special appearances, serious consideration involving marital status. Budget expands because of travel necessity. Gemini represented.

**GEMINI** (May 21-June 20): Spotlight on work, pet, dependents, ability to discern hidden motives. Open lines of communication. Someone is trying to tell you something. Contact made nine days ago could now bear fruit.

**CANCER** (June 21-July 22): Scenario features style, creativity, adventure, sex appeal. You'll be encouraged to write, speak, represent special group. Agree to interview. Some very lively people pay meaningful compliments.

**LEO** (July 23-Aug. 22): Attention centers around home base. What you seek is available, but family member must be questioned. Focus on last articles, financial review.

lations. You receive gift representing "token of affection."

**VIRGO** (Aug. 23-Sept. 22): Your "opponent" will cry "Uncle." You get your way and can substitute shoddy material for the "real thing." Message will become startlingly clear. Scenario also features trips, visits involving relatives.

**LIBRA** (Sept. 23-Oct. 22): Lunar position accents personal possessions, basic values, income. You are going to win, reward follows. Relationship intensifies, responsibilities increase. Older man will prove his loyalty.

**SCORPIO** (Oct. 23-Nov. 21): Moon in your sign highlights personality, charisma, colors, including your own dark red, purple, emerald. Long-standing "enfranchisement" will be resolved. Aries, Libra persons are in picture.

**SAGITTARIUS** (Nov. 22-Dec. 21): Secret is revealed in unorthodox manner. Child could be involved in three way dispute. You gain by taking initiative. Member of opposite sex says, "I like it when you're forceful!" Leo plays role.

**CAPRICORN** (Dec. 22-Jan. 19): Emphasis on cooperation, joint efforts, reunion with loved one. Focus also on home, security, family relationships. You'll win through powers of persuasion. Cancer, another Capricorn figure prominently.

**AQUARIUS** (Jan. 20-Feb. 18): What was a "misadventure" opportunity? "homages in your favor." You not only get "second chance," but also are offered third try. Superior expresses confidence in realistic manner. Sagittarius plays role.

**PISCES** (Feb. 19-March 20): Spiritual values surface. Frank discussion with Taurus or Scorpio individual brings enlightenment. Emporia also on education, philosophy, travel. Distant relative communicates desire to "see you once more."

**Mummy murders**  
 Scholars examined mummies found in the Chulien Desert. Many had bone fractures - 30 percent of the males, 50 percent of the females. What the scientific detectives thought significant was the females' fractures mostly were in face and forearm. Domestic violence of 1,000 years ago, they figured.

**Nothing is perfectly white.**  
 Q. At one commercial airport, after prop planes take off, they descend to reach their normal cruising altitude. Name the airport.  
 A. El Alto, Bolivia. At 13,400 feet, it's the world's highest commercial. Jets there need a 2,162 mile runway.

**Q. How many people hold Vatican citizenship?**  
 A. About 400. Two-thirds are either Swiss Guards or diplomats.

**FAT LIVER**  
 Would you order a menu item listed as "Pate de Fat Liver?" Neither would I.

**Sounds better dandified as "Pate de Foie Gras," doesn't it?**  
 When your dog comes in soaking wet, do you hold your nose and go "Whee?" A dog's sense of smell is approximately 100 times more sensitive than a human's. What does the dog do when you come in soaking wet?

**You know how the test tube folk mix chemicals to sink oil spills?** Said Jacques Cousteau: "How clever of Man! He has a big slick on top of the water. So he adds something to sink it slowly and kill everything in its path all the way to the bottom!"

**COSTLY CURRENCY**  
 Brazil stopped printing the one cruzeiro banknote in 1980. When it figured out the printing cost ran a cruzeiro and a half per cruzeiro.

**What, your car's door lock froze up?** Heat the key with a lighted match, and try again. Quickly, quickly.

**Q. What's "Devil's Rope?"**  
 A. Barbed wire. In the cattleman's lingo of a century ago.

**It's said all TV half-hour sitcoms are divided into two acts, each 11 minutes long.**

Briefly

**Steinberg receives maximum term**  
NEW YORK (AP) — Joel Steinberg was sentenced Friday to the maximum eight and one-third to 25 years in prison for killing his illegally adopted daughter in a case that riveted attention on the problems of domestic violence.  
Steinberg, a disbarred attorney, spoke about the charges for the first time before he was sentenced by state Supreme Court Justice Harold Rothman in Manhattan on his manslaughter conviction for the 1987 death of 6-year-old Lisa Steinberg.  
The death resulted from Steinberg's "life of violence, selfishness and self-gratification at the expense of other people," Assistant District Attorney John McCusker told the court. "Mr. Steinberg has shown not one ounce of remorse for killing Elizabeth."  
"I understand the meaning of remorse," said Steinberg. "I have remorse about losing my life."

**'Star Wars' rocket gets test flight**  
CAPE CANAVERAL, Fla. (AP) — A Delta Star missile-hunting satellite thundered toward orbit Friday in a key 'Star Wars' test to develop a split-second defense against nuclear rockets.  
The \$140 million satellite was to aim its sensors at a series of missile and space launches over several months to help perfect the technology for detecting and destroying enemy boosters within minutes after they leave their launch pads.

**Personal income continues upswing**  
WASHINGTON (AP) — Americans' personal income shot up 1 percent last month while consumer spending advanced at a more restrained pace, boosting the savings rate to its highest level in nearly three years, the government said Friday.  
Personal income, bolstered by strong growth in employment and wages, has posted two straight solid gains, rising to a seasonally adjusted annual rate of \$4.32 trillion last month after surging 1.7 percent in January, the Commerce Department reported.

**Official calls for Sudan famine relief**  
WASHINGTON (AP) — A State Department official, saying "it's a race against time," called Friday for nations around the world, including the Soviet Union, to do more to support an international famine-relief effort organized during a break in Sudan's civil war.  
"Everybody wants peace, but peace will be a hollow victory if the people for whom peace is the goal are not alive because we can't deliver the food in time to save them," said Julia Taft, director of the State Department's Office of Foreign Disaster Assistance.  
Ms. Taft spoke about the U.S. role in "Operation Lifeline," the U.N.-sponsored effort to deliver more than 100,000 tons of food to more than 1 million people during April.

**B-1B bomber fuel system suspect**  
WASHINGTON (AP) — An internal Air Force report produced after a B-1B bomber crash last November in Texas raised questions about maintenance procedures and design problems with the plane's fuel line system, officials said Friday.  
The report, first disclosed in The Washington Post on Friday, elaborates on the findings of an accident report the Air Force made public in February.  
The internal document already has prompted changes in maintenance procedures for the B-1B's fuel system.

**Bush praises Discovery astronauts**  
WASHINGTON (AP) — President Bush voiced strong support for further U.S. space exploration on Friday as he praised the Discovery astronauts for "exploring the new horizons of this nation's technological future."  
"Gentlemen, your mission is accomplished. Your nation says, well done, thank you," he told the five astronauts in a White House ceremony.  
"You showed exactly where we are going and why," Bush said.

Nation

North's lawyers want Reagan to testify as leadoff witness

WASHINGTON (AP) — Oliver North's lawyers asked the judge in his Iran-Contra trial Friday to order former President Reagan to testify as leadoff witness for the defense next week.  
The Justice Department said it would seek to have the subpoena for Reagan's appearance thrown out.  
Reagan told the Tower commission investigating the Iran-Contra affair in January 1987 that he did not know his National Security Council staff — including North — was engaged in helping the Contras.  
But the defense, which contends North had authority for all his White House actions, wants to question Reagan about trial testimony during the past month that as president he himself had been deeply involved in helping the Contras.  
The activities in question came in 1985 when Congress had banned U.S. military aid to the Contras.  
Attorney General Dick Thornburgh told the court in January that neither Reagan nor George Bush, then vice president and now president, should be ordered to testify in the case. The issue, he said, raised concerns about "executive privilege" and secrets they might be asked to divulge.  
But defense attorney Brendan Sullivan said in Friday's court filing. "The importance of Mr. Reagan's testimony to the defense of this case is clear."  
North's lawyers argued Jan. 23 that concerns about privileges for confidential communications and state secrets must yield to a demonstrated need for testimony.  
U.S. District Judge Gerhard A. Gesell likely will schedule a hearing for sometime next week before ruling on North's request. In Los Angeles, Reagan spokesman Mark Weinberg declined to comment.  
At the Justice Department, David Runkel, an aide to Thornburgh, said the government has a court motion pending to quash the subpoena for Reagan and "we will pursue that matter." The motion says the defense hasn't shown that Reagan's testimony is needed or that the information can't be obtained "any other way," he said.  
Reagan and Bush got subpoenas from North on Dec. 30 to testify at his trial but sought through the Justice Department to have them quashed.  
On Jan. 30, Gesell threw out the subpoena for Bush on grounds that it hadn't been shown Bush's testimony would be relevant. But the judge said Reagan should remain "subject to call" pending trial developments.  
Documents introduced in the trial and testimony by witnesses have indicated such Reagan involvement with the Contras.

DICK CHENEY  
'Not happy' with general

Freelancing top general irks Cheney

WASHINGTON (AP) — Defense Secretary Dick Cheney publicly scolded the Air Force's top general Friday for consulting privately with congressmen on how to modernize the nuclear arsenal, denying in the process that any compromise on the issue had been reached.  
"I think it's inappropriate for a uniformed officer to be in a position where he is, in fact, negotiating an arrangement," Cheney told reporters. "I will make known to him my displeasure."  
Gen. (Larry) Welch was freelancing," continued Cheney, who had been sworn in as defense secretary a week earlier.  
"He was not speaking for the department. He was obviously up there on his own hook, so to speak. No, I'm not happy with it, frankly. Everybody's entitled to one mistake."

Welch is the Air Force's chief of staff, or top military officer. He was not present at the Pentagon news conference at which Cheney went public with his rebuke. A spokesman later said Welch had no comment.  
Discussing options for modernizing the nuclear arsenal, Cheney said that "all of our options are open" when it comes to the future of the land-based nuclear missile force.

The Bush administration, like the Reagan administration, is struggling to develop a plan for adding a mobile nuclear missile to America's arsenal. The idea is to make it more difficult for the Soviet Union to target U.S. forces and thus deter the Soviet Union from ever considering a first-strike attack.  
The Pentagon has told Congress it would like to buy 50 more MX missiles and place them on rail-car launchers. Congressional Democrats would prefer to see the development of a small, one-warhead Midgetman missile that could be deployed on a truck launcher.  
Welch and Navy Adm. William J. Crowe, the chairman of the Joint Chiefs of Staff, have been searching in recent days for a compromise.  
According to some congressmen, Welch has suggested a compromise in which 50 MX missiles already deployed in silos would be shifted to rail launchers.

# Soviet first lady says candidates should be allowed to state views

MOSCOW (AP) — First lady Raisa Gorbachev said Friday that candidates in this weekend's parliamentary elections should be allowed to state their views freely.

She declined, however, to say if she'll vote for him.

As she guided a group of Soviet and American students on a tour of the Kremlin, the wife of President Mikhail S. Gorbachev offered a rare glimpse of her views on domestic politics when asked twice by reporters to comment on Yeltsin's campaign for a seat in the new Congress of People's Deputies.

"Everything is normal," said Mrs. Gorbachev. "Every candidate has a right to his program, to stating it, to its reasoning. And the people have a right to express their attitude to it."

Although Mrs. Gorbachev often answers reporters' questions when she

is visiting foreign countries with her husband, it was unusual for her to comment on domestic politics.

Communist Party leaders have criticized Yeltsin, ousted as Moscow party boss by Gorbachev in 1987, and last week launched an investigation into whether his views clash with the official party line.

At campaign appearances, the 58-year-old Yeltsin has railed against the privileges of the Soviet elite, complaining that more radical economic reforms are needed to put food on empty store shelves.

In Sunday's elections, Yeltsin is running against Yevgeny Brakov, director of the huge Moscow ZIL limousine plant, for the country's most visible parliamentary seat, the one representing all of Moscow. Brakov generally conforms to the party line.

Mrs. Gorbachev was asked whether she will vote for Yeltsin, whom her husband brought into the

Soviet leadership in 1985, or for Brakov.

"Why namely for Brakov, or Yeltsin? We have many candidates running today," Mrs. Gorbachev said as she stood among the Soviet and American students.

Pressed to name the candidate of her choice, she said: "Well, elections are a secret matter, and I think it would not be polite, not modest, for me" to state a preference.

Sunday's elections are the first national balloting involving more than one candidate in the Soviet Union, and Mrs. Gorbachev said the campaign has gone well.

For us, it has great significance because it shows the practical implementation of all the steps taken so far in the field of political reforms. And so completely unusual social activity has developed during the elections, and that's excellent," Mrs. Gorbachev said.

# Christians' Aoun wants Syrians out

BEIRUT, Lebanon (AP) — Gen. Michel Aoun rejected a truce in his Christian army's fight with Druse militiamen and Syrian soldiers, and declared Friday he will settle for nothing less than Syrian withdrawal from Lebanon.

The 17-day-old artillery and rocket battle, in which Syrian troops joined the Druse this week, resumed in the afternoon after a 14-hour lull.

Hundreds of rounds fell on both sides of the line that divides Beirut between Christians and Moslems, and on Druse and Christian towns in the mountains overlooking the capital, police said.

Rocket volleys and popping flares lighted the night sky and rumbling explosions shook the city.

Police had no immediate report on casualties, but have given the total in previous action as 81 people killed and 253 wounded, most of them civilians.

It is the worst fighting since 1985 in Lebanon's 14-year-old civil war and magnifies a political crisis that arose last fall, creating sectarian army commands and competing Christian and Moslem governments.

Aoun said he would continue the battle even if Beirut is demolished.

A U.S. Embassy spokesman said the United States was withdrawing a military technical assistance team at the Defense Ministry as part of the embassy's policy of reducing American personnel due to the current situation.

# Canada plans review of report on Gander crash

TORONTO (AP) — Canada will review a report that blamed a buildup of ice rather than an explosion or fire for a 1985 jetliner crash in Newfoundland in which 256 American soldiers and civilians were killed, a newspaper said Friday.

A Transport Ministry spokesman, Rene Mercier, dismissed the report in The Globe and Mail as speculation, but he said Transport Minister Benoit Bouchard would make an announcement on the issue next week. Mercier would not elaborate.

The newspaper said Bouchard would announce the review next week as part of a sweeping program to reassure Canadians about aviation safety.

In December, the Canadian Aviation Safety Board concluded the crash at Gander, Newfoundland, probably was caused by ice on the wings of the Arrow Air charter DC-8.

That conclusion was approved by five of the board's nine members, but the other four members issued a report saying an in-flight fire or explosion was the most likely cause of the Dec. 12, 1985 disaster.

The airline's report from Ottawa said it was not clear whether the inquiry would reopen the entire investigation of the crash or only review the evidence compiled during the safety board's investigation.

**Gorbachev visit set**

DUBLIN, Ireland (AP) — Soviet President Mikhail S. Gorbachev will meet with Prime Minister Charles Haughey during an April 2 stopover at an Irish airport on his trip to Cuba, the Irish leader said Friday.

Their first meeting at Gorbachev's request, is expected to last several hours at a site near Shannon International Airport in western Ireland, Haughey said.

(below) Just arrived from "Taboo" acid washed light blue jeans stitched and trimmed in pink. Pink zipper and pink bow at back of ankle. Two styles in girls sizes 7 to 14. 30.00.

# Survey shows Shamir's stand has widespread support

JERUSALEM (AP) — A survey released Friday indicated majority support for Yitzhak Shamir's refusal to deal with the PLO, but President Bush said he would try to persuade the prime minister "something good might come" from talks.

Shamir and Bush are to confer in Washington on April 6.

Israel radio and Arab sources said two Palestinians died of wounds suffered earlier, and Arab reports said Israeli soldiers wounded 24 Palestinians during protests in nine towns and refugee camps in the West Bank and Gaza Strip.

One of the wounded was said to be a 4-month-old girl hit in the head by a rubber bullet.

The two deaths raised to 407 the number of Palestinians killed.

# Illinois

## Illini lose, regain big lead to eliminate Louisville, 83-69

By DON MARKUS

The Baltimore Sun

MINNEAPOLIS — Illinois has been accused in recent years of falling apart after taking big leads in the National Collegiate Athletic Association basketball tournament, and it appeared that the Fighting Illini were about to live down to their reputation against Louisville Friday night.

But after letting its 12-point first half lead slip away, Illinois regained its composure as the Cardinals lost theirs. The result was an 83-69 victory for the Fighting Illini and a place in Sunday's NCAA Midwest Regional final at the Metrodome.

The victory was the ninth straight for the Fighting Illini, who have yet to lose this season on a neutral court (7-0) or with Kendall Gill in the lineup (22-0).

Leading 62-55 with a 91 minutes remaining, Illinois watched as Louisville (24-9) cut its deficit to 64-62. The Cardinals tried twice to take the lead, but each time LaBradford Smith was short on three-point shots.

After Gill gave the Fighting Illini a 65-62 lead, Smith was stripped going up for a shot, and Illinois reserve Larry Smith scored on a breakaway layup and was fouled. He missed the

free throw, but Steve Bardo got the rebound, went up and was hit across the arm. Bardo made the first of two to give Illinois a 69-62 lead with 6:14 remaining.

Louisville missed another three-point try, this time by Keith Williams, and Larry Smith hit a short jumper at the other end. He was fouled but missed the free throw.

A breakaway dunk by Larry Smith gave Illinois a 77-66 lead, and two free throws by Gill increased the lead to 13. The Cardinals kept firing up three-pointers and missed a half-dozen in a row before Kenny Payne buried one with a little less than a minute remaining. It hardly mattered.

The game started out as if it were going to be college basketball's answer to wrestling's battle royale: the team with the last player standing would win. Early on, bodies were going down faster than jump shots.

First, Pervis Ellison hit the floor after bumping knees with Marcus Liberty of Illinois, a little more than two minutes into the game. Ellison went to the bench, where an icepack was waiting.

Then, 18 seconds later, Illinois forward Lowell Hamilton limped off with an apparent sprained ankle. The Illini started the game without second-leading scorer, Kenny Battle.

Illinois' Kenny Battle cheers during the closing minutes of their 83-69 win over Louisville

## Blue Devils end Minnesota's surprising turn-around year

By TOM CANAVAN

The Associated Press

EAST RUTHERFORD, N.J. — Minnesota had all the ingredients to be this year's surprise team in the Final Four.

Four straight losing seasons until this year, a low seed in the tournament and a program rebuilding from the depths of scandal.

Everything was right for sudden fame — until the Gophers met Duke in its northern backyard at the Meadowlands and nothing went right from start to finish.

Robert Brice scored seven straight points to cap a game-opening 14-4 burst as Duke moved within a victory of its third Final Four trip in four years with a 87-70 decision over Minnesota in the NCAA East Regional semifinal Friday night.

Getting out to a lead in any game is a big help, especially in an NCAA tournament game. Duke All-American Danny Ferry said, "We lacked a little killer instinct."

It didn't matter as Duke, 27-7, never trailed in running away from Minnesota, 19-12. The Blue Devils will meet the winner of Friday night's Georgetown-North Carolina State game on Sunday for the right to go to Seattle.

Duke also went to the Final Four in 1986 and 1988, and both times the Blue Devils took the friendly road through East Rutherford and the Brendan Byrne Arena.

"I thought we were a very alive team," Duke coach Mike Krzyzewski said. "I think the (NCAA) games last night got them really excited because they were so close."

Against Minnesota, the 11th seed in the regional and the lowest seed left in the tournament, the second-seeded Blue Devils were in fifth gear almost from the start. They hit six of their first eight shots and did just as well on defense, limiting Minnesota to 2-for-5 from the field, forcing four turnovers and blocking two shots in the opening four minutes.

# Syracuse

## No. 7 Orangemen get by No. 6 Missouri, 83-80

By MIKE NADEL

The Associated Press

MINNEAPOLIS — Sherman Douglas keyed a 16-0 spurt early in the second half with six of his 27 points and carried No. 7 Syracuse to an 83-80 victory over No. 6 Missouri Friday night in the semifinals of the NCAA Midwest Regional.

Billy Owens added 25 for Syracuse, 30-7, which meets No. 3 Illinois Sunday for a chance to go to the Final Four for the second time in three years. The Illini, 30-4, defeated No.

12 Louisville 83-69 earlier Friday. Missouri, 29-8, never trailed in the first half and scored the first five points after halftime to take a 47-40 lead with 18:11 to play.

Douglas made a judgment error just 29 seconds into the half when he intentionally fouled Byron Irvin. Irvin made both free throws and, with Missouri maintaining possession, Gary Leonard added a free throw.

But the Orangemen soon began controlling the boards against the Tigers' front line of 7-foot-1 Leonard,

6-10 Doug Smith and 6-8 Mike Sand-bathe.

And as Missouri missed 11 straight shots and Derrick Coleman and Owens pulled down rebound after rebound, Douglas — college basketball's all-time assist leader — was there to trigger Syracuse's potent fast break.

Matt Roe and Stevie Thompson scored before Douglas set up a Coleman dunk. With 16:11 to play, Douglas hit a tough fadeaway jumper from the right baseline to give Syracuse a 47-40 lead.

# Utah Valley, CSI on top after rodeo

By RON GATES  
Times-News writer

TWIN FALLS — A four-month lull in actual competition appeared to have hurt nobody as Utah Valley dominated the timed events and the College of Southern Idaho the roughstock in front of a near-capacity crowd in Friday's opening performance of the 13th Annual Indoor Intercollegiate Rodeo.

The Utah Valley club, beaten by CSI in a pair of fall rodeos, picked up the first of three victories with a 1-2 finish in bareback. Golden Eagle cowboys failed to place in that event as Kirk Jensen and Eric Nielsen tallied 55 and 52 points, respectively, for the Wolverines.

Kary McNeill and Zane Dansie gave the Beehive State club its second triumph in team roping and Jackie Wadsworth, in breakaway roping, provided the third.

Ricks nailed down its only first of the evening on Guy Neitz 12.6 in calf roping and, while CSI girls were blanked in goat tying, the top contestants were familiar faces to Magic Valley fans. Shoshone's Patti O'Maley and Shellee Heil, of Castleford, both now competing for Idaho State University, garnered big points there for the Bengals.

CSI finally broke loose in saddle broncs — likely the club's strongest event — winning the top three places and tying for fourth. Unfortunately from a team standpoint, only the winner, Oakley Steve Manning, and Lance Holt were competing as club members.

The lead in steer wrestling went to Southern Utah State's Ross Murie on a 5.4-second clock.

Bareback rider Shawn Davis of ISU gets his hand caught on Flash Dance

ing as the Eagle's Dave Anderson failed to place. CSI's Lon Aslett suffered that same fate in missing out on the top four by one tenth of a second in barrels, which went to BYU's Dehus Adams by a full second over the balance of the field.

Dustin Dantley, CSI's bull riding leader,

chalked up a tough-to-beat 78 points in his specialty, but teammate Jim LaCone earned a second chance after accepting a reride.

"We had probably our best crowd in several years," enthused CSI Coach Shawn Davis. "CSI, in broncs and bull riding, shined. We did."

# Georgetown

## Hoyas enter final 8 for 5th time in 8 years by beating Wolfpack

By BILL BARNARD  
The Associated Press

EAST RUTHERFORD, N.J. — Jim Valvano said he needed a miracle to beat Georgetown, and North Carolina State nearly got it when All-American Charles Smith took only two shots and scored one point.

But the Hoyas advanced to the final of the NCAA East Regional Friday night as Dwayne Bryant and Jaren Jackson took over the outside scoring load for the ailing Smith and Georgetown won, 69-61.

"I know Smith wasn't feeling well, but I have to give our defense credit," said Valvano, the Wolfpack coach. "It was set up to stop their best players. But Bryant and Jackson were terrific, especially shooting 3-pointers."

Bryant was 5-for-6 from 3-point range and Jackson hit three 3-pointers for Georgetown, 29-4.

"This is a team where we have a lot of men who can do the job," Bryant said. "I've had to compromise my skills, but I have no problem with that."

Georgetown, the top-seeded team in the East, advanced into the final eight for the fifth time in eight years and will play second-seeded Duke in Sunday's regional final. The Blue Devils beat Minnesota 87-70 in Friday night's other semifinal.

Bryant, averaging only seven points per game, scored 14 of his 21 points in the first half as Georgetown grabbed a 42-28 lead.

Jackson added 12 of his 17 points in

the first half, while Smith took just one shot in the first 20 minutes and two in the game. Smith, who scored 34 points in Georgetown's second-round victory over Notre Dame, missed practice the previous two days with a fever.

"In the last two days, we got used to the idea that he wouldn't play at full strength," Georgetown coach John Thompson said of Smith. "Mentally, I think we were ready for it."

Georgetown held off a second-half rally by North Carolina State, 22-9, which was seeking its fourth regional final appearance in seven years under Valvano.

Rodney Monroe, who had 40 points in the Wolfpack's double-overtime victory over Iowa in the second round, scored all but six of his 26 points in the second half.

With two minutes left in the game, Monroe had outscored Georgetown 20-17 in the second half and the Wolfpack trailed only 59-56.

But Bryant's fifth 3-pointer of the game, with 1:03 left, salvaged the victory.

Charles was coming off a pick and Rodney backed off him, leaving me open, so I just stepped up and made the shot," Bryant said.

We were right there in the last three minutes, but we couldn't get over the top, said Valvano, who refused to blame a disputed traveling call against Chris Carchiani with 1:47 left for the loss. North Carolina State trailed only 30-28 with 4:29 left in the first half, but Georgetown scored the final 12 of the period.

## UNLV's Anthony may not play

DENVER — Not only does Coach Jerry Tarkanian have to bring his Nevada-Las Vegas Runnin' Rebels back to reality, he might have to do it without point guard Greg Anthony.

The 16th-ranked Rebels gave Tarkanian one of the biggest victories in his 27-year career Thursday night, beating No. 1-ranked Arizona 69-67 on freshman Anderson Hunt's 3-point shot with four seconds to play.

The victory sent UNLV 29-7, into Saturday's NCAA West Regional final against 11th-ranked Seton Hall, 29-6, at 2:05 p.m., MST, at McNichols Arena.

The winner gets a trip to the Final Four next week in Seattle.

"I think the big thing now for us is to get emotional and intense and get ready to play," Tarkanian said Friday. "We were about as ready as you could be yesterday. The big question is whether we can get that way again tomorrow."

Anthony, the home-grown sophomore who plays a major role in UNLV's tenacious pressure defense, sprained his right ankle and left knee blocking a shot in the final minutes Thursday night.

"Our trainer said today he thought Greg was very doubtful for tomorrow. He didn't think he could play, but we'll have to wait and see," Tarkanian said.

"It would be a real big loss. He's our point guard. He's our best defensive guard. In fact, we think he's one of the best defensive guards in the country," Tarkanian said, "but I'm hoping he will be able to play."

"His knee is sore but I think the ankle is the real problem," the coach said. "He said he can't put any

### West regional

weight on it today."

If Anthony can't play, his place will be taken either by junior Stacy Civanovich or Clint Rossum, the only seniors on the team.

Seton Hall, a 78-65 winner over eighth-ranked Indiana Thursday night, is a fine team, but is no Arizona, Tarkanian said.

"Going into last night's game, I thought Arizona was the best team. I thought they had a great chance to win the whole thing," he said. "Going to last night's game I thought Indiana would beat Seton Hall, too, so I'm 0-2 in predictions."

"But Seton Hall, I don't think they're as good as Arizona was. Arizona doesn't have a weakness anywhere," he said.

"I'm sure Seton Hall has a weakness, we're just going to have to figure out what it is," he said.

David Butler, UNLV's 6-foot-10 center, thinks he already knows a weakness on the Pirates' front line.

"They're strong but I feel they don't run the court real good," Butler said while Tarkanian winced.

"You better be careful," the coach said.

"I'm careful," Butler said, then he continued. "Our big guys run the court real fast. I think we can beat them that way."

Tarkanian, looking for his second trip to the Final Four in the last three years, said his young team, with only three returning players from last season, needed time to come together.

"The kids all have to sacrifice some

of their own personal selfish desires for the good of the team, then you get chemistry," he said.

Seton Hall coach P.J. Carlesimo said his team, with six seniors on the roster, has had that chemistry all season and is not overwhelmed as it faces the prospect of the first Final Four appearance in the school's history.

"I think they're confident. I think they're loose. I think they're relaxed," he said. "They're not arrogant or anything like that. They're good and they know they're good."

Carlesimo said his team might be a little stronger physically inside than Las Vegas, but he worries about the Rebels' defense.

"You can talk about the Runnin' Rebels, but they're a great defensive team," he said.

Tarkanian and Carlesimo are friends.

And the UNLV coach praised his Seton Hall counterpart for patiently building a powerhouse that tied for second in the Big East this season.

"When he went in there, everybody said it was suicide, it would end his career, and it almost did," Tarkanian said.

"I think he'll be strong for good now. I think when you're a coach like P.J. and you get it going, you'll always get it going."

But Carlesimo, who weathered calls for his firing two seasons ago, said his performance, and that of his profession, is "overrated."

"You can't be a coach, you can't be a coach," he said. "You just have to get kids to work hard."

## Michigan beats North Carolina

Los Angeles Times

LEXINGTON, Ky. — Instead of hiring substitute musicians, as it did last weekend in Atlanta, Michigan brought its own band and cheerleaders to Rupp Arena this week for the Southeast Regional semifinals.

Carrying the theme a step farther, the Michigan basketball team showed North Carolina Thursday night that it was for real, too.

The Wolverines defeated the Tar Heels, 92-87, keeping interim coach Steve Fisher unbeaten and reducing

## Twin Falls remains only unbeaten team in Easter Tournament, at 3-0

By LARRY HOVEY  
and STEVE CRUMP  
Times-News writers

Twin Falls continued its timely and torrid hitting Friday, beating Highland 8-4 and becoming the only undefeated team in the Mini-Cassia East high school basketball tournament.

The Bruins downed 3-0 due to a quick three-run homer by pitcher-hitting Ralph Obay, responded with the 13-hit attack that drove Obay off the mound in the sixth inning with the loss. It was Highland's only loss thus far in the Easter Tournament and set the pairings for today's single-elimination finals at the Burley and Minico High School diamonds today.

Twin Falls, 3-0 for the first two days, will take on Minico, 1-2, at 9 a.m. at Burley while Meridian, 2-1 and the Minico division No. 1 seed, will play Burley, 0-3, at 9 a.m. at Rupert.

At 11:30 a.m., Centennial, 2-1, goes against Nampa, 1-2, at Burley with Potomato, 1-2, and Highland, 2-1, colliding at Rupert.

The winners at each site will play in the semifinals at 2, with the championship game set for Burley High School's diamond at 4 p.m.

In other action in Friday's second round, Nampa run-ruled Burley 15-4 and Highland turned back Nampa 8-4.

In Rupert, Centennial defeated Minico 8-7 in eight innings, while Meridian outgassed Potomato 10-8 and Centennial beat the Indians 11-4.

**Twin Falls 8, Highland 4**  
Obay, hitting his third homer in as many games, hit his homer after Paul Echolfalk had singled and Dave McCormick walked in

## Rodeo

Continued from Page B1  
n't do much in barrelback though and we realize we're a little weak in the timed events. It's going to be another good show tomorrow with the toughest bulls and some of the best riders up."

Action resumes at 2 p.m. this afternoon at the CSI Expo Center. Art 8 p.m. finale, preceded 30 minutes earlier by the Latham Motors Championship Mini-Rodeo wraps up the rodeo.

## Amendments endanger ethics measure

BOISE (AP) — In what could be a killing move, the Idaho House voted Friday to amend a Senate-approved ethics in government measure.

Some members warned that the move could kill the measure this late in the 1989 session.

"It's a dagger in the heart of the bill," said Rep. Li. Ed Brown, R-Pocatello.

And even if the measure survives, Attorney General Jim Jones notified legislators Friday afternoon it appears the amendments submitted by Rep. Jerry Deckard, R-Engle, effectively repealed Idaho's laws against nepotism — the hiring of one's own family or relatives for gain.

Jones notified Deckard that the way the ethics bill now stands, its first section repeals the law banning nepotism. A second section, covering that and other violations, was stricken by the Deckard amendment.

He suggested that another effort would be made Monday to amend the bill again to correct the problem, making it even less likely that the legislation will find its way through both chambers of the Legislature before adjournment.

In unrecorded votes, the House approved amendments proposed by Deckard, deleting major sections of the bill. "It's not a dagger in the heart of the bill, it's a little surgery that makes it better," he said.

The Senate approved a conflict of interest bill earlier this month, 30-9. It sets clear definitions on what constitutes a conflict of interest by a public or appointed official. Jones said the more than 70 state laws on the subject are a "hodge-podge" and almost impossible to enforce.

After a three-hour hearing Thursday night, the House Judiciary, Rules and Administration Com-

mittee voted to follow Deckard's advice and amend the bill.

Sponsors warned that Friday was the 75th day of the legislative session, and even if the bill was approved by the House, it still would have to go through the Senate again.

Brown argued both in committee and on the House floor that it would be better to draft a new bill next year.

"Vote on the basis of your confidence level on how well you understand the whole business," Brown told House members.

Rep. Patricia McDermott, D-Pocatello, first tried to get the bill held in committee, usually a killing effort.

She was critical of the fact the Senate did not decide the measure until the final days of the session, leaving the House no time for lengthy study or major hearings.

But she lost a 9-5 on her motion to hold the bill and then the committee voted 8-6 to put the measure up for amendment.

## Repeat by resolution

Two years ago, the Legislature passed a resolution to repeal the sewerage system rules for the entire state because officials in eastern Idaho didn't like them.

The vote was 39-37 after nearly an hour of debate for legislation sponsored by Rep. Stan Hawkins, R-Idaho, which was introduced, debated and sent to the Senate all in the same day.

The legislation specifically repeals regulations adopted by the health and welfare agency Oct. 16, 1986, dealing with individual and subsurface sewage systems.

Opponents claimed it would be "chase" for the Legislature to re-

peal sewage system rules for the entire state because officials in eastern Idaho didn't like them.

Opponents claimed it would be "chase" for the Legislature to re-

peal sewage system rules for the entire state because officials in eastern Idaho didn't like them.

The vote was 39-37 after nearly an hour of debate for legislation sponsored by Rep. Stan Hawkins, R-Idaho, which was introduced, debated and sent to the Senate all in the same day.

The legislation specifically repeals regulations adopted by the health and welfare agency Oct. 16, 1986, dealing with individual and subsurface sewage systems.

Opponents claimed it would be "chase" for the Legislature to re-

peal sewage system rules for the entire state because officials in eastern Idaho didn't like them.

## School negotiation bill brings Senate slowdown

BOISE (AP) — Senate Democrats are threatening to slow down action in what leaders hope will be the closing days of the 1989 session next week in a dispute over the handling of a teacher-school-board negotiation bill.

The bill, approved last week by the House on a 45-39 vote and endorsed by the Senate Education Committee earlier this week, was pulled from the floor-vote agenda by Education Chairman Jerry Thorne, R-Nampa, in a rapid parliamentary maneuver on Friday.

Democrats and some Republicans are demanding the action be overturned, but Republican leadership efforts to resolve the controversy fell short.

"It doesn't look good," GOP Floor Leader Roger Fairchild of Fruitland said.

After Thorne asked unanimous agreement of the Senate to pull the bill, Lt. Gov. C.L. Otter, the presiding officer, said there were no objections and approved the order as the bill's committee sponsor Roger Madson, R-Boise, was rising, apparently to object.

That was the fastest gavel I've

ever seen," Assistant Democratic Floor Leader Gail Bray of Boise said.

The bill would give teacher associations the right to be represented in contract negotiations by a professional negotiator — a right school board already have.

But Thorne said he objected to the measure because with the backing of the Idaho Education Association teacher groups all over the state will be guaranteed representation by negotiators while small school boards would either face great expense in hiring a negotiator or be at the same kind of disadvantage in negotiations that teachers currently are.

Sen. Dennis Hansen, R-Soda Springs, has offered a compromise to ease that financial burden. It would allow teacher negotiators only if the school board has a negotiator.

The education association has reportedly agreed to accept that change. But Senate leaders said the school boards association has balked at it on technical grounds, and the IEA fears that opposition would doom House reapproval of the amended bill.

## Exemption restriction dies

BOISE (AP) — A Senate-passed bill that would have made charities and fraternal groups prove their tax-exempt status every year has died in the Idaho House.

"I don't really know what the goal of this bill is," said Rep. Jim Stoichoff, D-Sandpoint. "I haven't heard any public outcry to repeal any of these exemptions."

The bill would have required fraternal, benevolent or charitable groups to re-apply for their property-tax exemptions each year, rather than getting them automatically. It

also would have required they qualify as non-profit organizations to get the exemption. No such rule now exists.

Another provision would have called upon counties to publish annually the total value of land exempted from property taxes, including the fraternal exemptions. Several representatives said their county assessors opposed that as a new burden.

"This is another legislative mandate to local government with no funds attached," said Thomas Lortens, R-Idaho Falls.

Under a plea agreement, Raymond L. Montgomery pleaded guilty in 7th District Court Tuesday to a charge of felony malicious injury to property. He originally was charged with grand theft, also a felony.

Judge Grant Young fined Montgomery \$1,000 and gave him a five-year suspended prison sentence. He also placed Montgomery on probation and ordered him to get mental health counseling and to pay restitution, in an amount to be determined later.

Under the withheld judgment, the conviction will be taken off Montgomery's record if he complies with the terms of probation.

Montgomery, 39, was charged Nov. 18 after he crashed a single-engine airplane belonging to a Bonneville County resident. The plane was reported taken from Rigby Airport the night before. He crashed near Coon, apparently after running out of gas.

Montgomery was found injured a short time after the crash on the back porch of a nearby home.

Cocaine was once thought to be non-addictive, because users don't have the severe physical withdrawal symptoms commonly associated with heroin—delirium, muscle cramps, and convulsions.

However, cocaine is intensely addicting, and its effects are very dangerous substances. No one thinks the things described here will ever happen to them.

But you can never be certain. Whenever and wherever you use cocaine, you're playing Russian roulette.

**You can't get addicted to cocaine.**

## Idaho

## Amendments endanger ethics measure

BOISE (AP) — In what could be a killing move, the Idaho House voted Friday to amend a Senate-approved ethics in government measure.

Some members warned that the move could kill the measure this late in the 1989 session.

"It's a dagger in the heart of the bill," said Rep. L. Ed Brown, R-Pocatello.

And even if the measure survives, Attorney General Jim Jones notified legislators Friday afternoon it appears the amendments submitted by Rep. Jerry Deckard, R-Eagle, effectively repealed Idaho's laws against nepotism — the hiring of one's own family or relatives for gain.

Jones notified Deckard that the way the ethics bill now stands, its first section repeals the law banning nepotism. A second section, covering that and other violations, was stricken by the Deckard amendment.

He suggested that another effort would be made Monday to amend the bill again to correct the problem, making it even less likely that the legislation will find its way through both chambers of

Idaho  
Legislature  
1989

the Legislature before adjournment.

In unrecorded votes, the House approved amendments proposed by Deckard, deleting major sections of the bill. "It's not a dagger in the heart of the bill, it's a little surgery that makes it better," he said.

The Senate approved a conflict of interest bill earlier this month, 30-9. It sets clear definitions on what constitutes a conflict of interest by a public or appointed official. Jones said the more than 70 state laws on the subject are a "hodge-podge" and almost impossible to enforce.

After a three-hour hearing Thursday night, the House Judiciary, Rules and Administration Com-

mittee voted to follow Deckard's advice and amend the bill.

Sponsors warned that Friday was the 75th day of the legislative session, and even if the bill was approved by the House, it still would have to go through the Senate again.

Brown argued—both in committee and on the House floor that it would be better to draft a new bill next year.

"Vote on the basis of your confidence level on how well you understand the whole business," Brown told House members.

Rep. Patricia McDermott, D-Pocatello, first tried to get the bill held in committee, usually a killing effort.

She was critical of the fact the Senate did not decide the measure until the final days of the session, leaving the House no time for lengthy study or major hearings.

But she lost a 9-6 on her motion to hold the bill and then the committee voted 8-6 to put the measure up for amendment.

Repeal by resolution  
sewerable resurfaces

BOISE (AP) — Two years ago, an ethics measure's sponsor said it was necessary to repeal the Legislature's attempt to repeal sewerage laws. Now, the Legislature is repealing the repeal.

On Friday, the House chose to repeal that repeal, using a resolution to repeal sewer regulations put into place by the Board of Health and Welfare more than three years ago.

Opponents claimed it would be "chaos" for the Legislature to re-

peal sewerage system rules for the entire state because officials in eastern Idaho didn't like them.

The vote was 38-37 after nearly an hour of debate for legislation sponsored by Rep. Stan Hawkins, R-Idaho.

The legislation specifically repeals regulations adopted by the health and welfare agency Oct. 18, 1986, dealing with individual and subsurface sewage systems.

Another provision would have called upon counties to publish annually the total value of land exempted from property taxes, including the fraternal exemptions. Several representatives said their county assessors opposed that as a new burden.

"This is another legislative mandate to local government with no funds attached," said Thomas Lortsch, R-Idaho Falls.

Another provision would have required they qualify as non-profit organizations to get the exemption. No such rule now exists.

School negotiation bill  
brings Senate slowdown

BOISE (AP) — Senate Democrats are threatening to slow down action in what leaders hope will be the closing days of the 1989 session next week in a dispute over the handling of a teacher-school board negotiation bill.

The bill, approved last week by the House on a 45-39 vote and endorsed by the Senate Education Committee earlier this week, was pulled from the floor-vote agenda by Education Chairman Jerry Thorne, R-Nampa, in a rapid parliamentary maneuver on Friday.

Democrats and some Republicans are demanding the action be overturned, but Republican leadership efforts to resolve the controversy fell short.

"It doesn't look good," GOP Floor Leader Roger Fairchild of Fruitland said.

After Thorne asked unanimous agreement of the Senate to pull the bill, Lt. Gov. C.L. Otter, the presiding officer, said there were no objections and approved the order as the bill's committee sponsor Roger Madsen, R-Boise, was rising, apparently to object.

That was the fastest gavel I've

ever seen," Assistant Democratic Floor Leader Gail Gray of Boise said.

The bill would give teacher associations the right to be represented in contract negotiations by a professional negotiator — a right school board already have.

But Thorne said he objected to the measure because with the backing of the Idaho-Education-Association teacher groups all over the state will be guaranteed representation by negotiators while small school boards would either face great expense in hiring a negotiator or be at the same kind of disadvantage in negotiations that teachers currently are.

Sen. Dennis Hansen, R-Soda Springs, has offered a "compromise" to ease that financial burden. It would allow teacher negotiators only if the school board has a negotiator.

The education association has reportedly agreed to accept that change. But Senate leaders said the school boards association has balked at it on technical grounds, and the IEA fears that opposition would doom House approval of the amended bill.

## Exemption restriction dies

BOISE (AP) — A Senate-passed bill that would have made charities and fraternal groups prove their tax-exempt status every year has died in the Idaho House.

"I don't really know what the goal of this bill is," said Rep. Jim Stoicheff, D-Sandpoint. "I haven't heard any public outcry to repeal any of these exemptions."

The bill would have required fraternal, benevolent or charitable groups to re-apply for their property-tax exemptions each year, rather than getting them automatically. It

also would have required they qualify as non-profit organizations to get the exemption. No such rule now exists.

Another provision would have called upon counties to publish annually the total value of land exempted from property taxes, including the fraternal exemptions. Several representatives said their county assessors opposed that as a new burden.

"This is another legislative mandate to local government with no funds attached," said Thomas Lortsch, R-Idaho Falls.

Temple buzzing  
plea produces  
fine, probation

RIGBY (AP) — An Idaho Falls man received a withheld judgment after pleading guilty to taking a single-engine airplane in November and buzzing several vehicles and the Idaho Falls LDS Temple.

Under a plea agreement, Raymond L. Montgomery pleaded guilty in 7th District Court Tuesday to a charge of felony malicious injury to property. He originally was charged with grand theft, also a felony.

Judge Grant Young fined Montgomery \$1,000 and gave him a five-year suspended prison sentence. He also placed Montgomery on probation and ordered him to get mental health counseling and to pay restitution, in an amount to be determined later.

Under the withheld judgment, the conviction will be taken off Montgomery's record if he complies with the terms of probation.

Montgomery, 39, was charged Nov. 18 after he crashed a single-engine airplane belonging to a Bonneville County resident. The plane was reported taken from Rigby Airport the night before. He crashed near Ucon, apparently after running out of gas.

Montgomery was found injured a short time after the crash on the back porch of a nearby home.

## Shock kills toddler

BOISE (AP) — A 15-month-old Boise boy has been electrocuted after he stuck a cord hanger into an electrical outlet, Ada County Coroner Erwin Sonnenberg said.

Nathan Gaddery died in the emergency room at St. Albans Regional Medical Center on Thursday morning. Sonnenberg said the family was at home at the time of the accident.

## Cocaine lies.

There's no way to tell who'll become addicted. But one thing is certain:

No one who is an addict, set out to become one.

## Sex with coke is amazing.

Cocaine powers as a sexual stimulant have never been proved or disproved. However, the evidence seems to suggest that the drug's reputation alone serves to heighten sexual feelings. (The same thing happens in Africa, where natives swear by powdered rhinoceros horn as an aphrodisiac.)

What is certain is that continued use of cocaine leads to impotence and finally complete loss of interest in sex.

## C'mon, just once can't hurt you.

Cocaine hits your heart before it hits your head. Your pulse rate rockets and your blood pressure soars. Even if you're only 15, you become a prime candidate for a heart attack, a stroke, or an epileptic-type fit.

In the brain, cocaine mainly affects a primitive part where the emotions are seated. Unfortunately this part of the brain also controls your heart and lungs. A big hit or a cumulative overdose may interrupt the electrical signal to your heart and lungs. They simply stop. That's how basketball player Len Bias died.

If you're not lucky the first time you do coke, your body will lack a chemical that breaks down the drug. In which case, you'll be a first time O.D. Two times will kill you.

## It'll make you feel great.

Cocaine makes you feel like a new man, the joke goes. The only trouble is, the first thing the new man wants is more cocaine.

It's true. After the high wears off, you may feel a little anxious, irritable, or depressed. You've got the coke blues. But fortunately they're easy to fix with a few more lines or another hit on the pipe.

Of course, sooner or later you have to stop. Then for days at a time you may feel lethargic, depressed, even suicidal.

Says Dr. Arnold Washton, one of the country's leading cocaine experts: "It's impossible for the non-user to imagine the deep, vicious depression that a cocaine addict suffers from."

## THE ACES ON BRIDGE BOBBY WOLFF

"All things are difficult before they are easy."

— Thomas Fuller.

South gambled on a couple of long shots to avoid his obvious club loser. Had he paid more attention to dummy's assets, he might have found an easier road home.

South ruffed the second diamond and drew two rounds of trumps with the ace and 10. He ruffed another diamond, hoping to drop the ace. When this failed, South ran his hearts. His plan was to discard two clubs from dummy and then ruff a club with dummy's last trump. Had West held a fourth heart, South's plan would have worked. As it was, West ruffed the fourth heart and dummy overruffed. But South still had his club loser for one down.

The slam plays more easily (and has a much better chance) if South makes dummy the master hand. After ruffing the second round of diamonds, he rashes the ace and 10 of trumps and before and ruffs another diamond. Dummy is entered via the heart 10, and dummy's last diamond is ruffed with South's last trump. Dummy's heart king provides the crucial entry to draw the last trump (South throwing his low club), and South then claims the rest with two high hearts and two high clubs.
